Generally their intention is to show that the monster, disease, etc is: Entirely ubiquitous, everywhere, surrounding us and closing in, or being sold in large numbers to an unsuspecting public (such as a voodoo doll), etc. Though the thing itself doesn't even have to be related to the Big Bad in any way and may be stepping in to take its place, or was the real danger all along. Is a form of very intentional Paranoia Fuel , can be Sequel Bait , and is (generally) intended to invoke The Fourth Wall Will Not Protect You . A particular form of The End... Or Is It? . Not to be confused with The Stinger , which generally happens during or after the credits and generally isn't intended to frighten. Compare with Neverending Terror .

When a character is angry that another character never answered any of his letters, only to discover that a third character had been intercepting them. This can work the other way, as well, with a character angry that he never got</ any letters from someone, and the same explanation This trope often plays out entirely within families, with one parent hiding the other parent's letters from their child, or intercepting letters the child writes. This is probably because it's easy to believe that a parent would have this kind of access to a child's mail, while adults would presumably get and send all of their mail directly This trope also applies to intercepted calls, emails, texts, or any other form of indirect communication. The relevant part is the misunderstanding Also, unfathomably, but usually necessary to the plot, the person who intercepted the letters has kept them, often for decades, instead of throwing them out, so we get a scene where the letters are finally delivered. This can be a form of Relationship Sabotage if the letters being intercepted are between Love Interests

The usual response to a perp Saying Too Much . The perp, while maintaining their innocence, reveals information they could not have possibly known if they were innocent, usually the specific details of a murder. It can take the form of a Suspiciously Specific Denial . Also happens for full dramatic effect, when the interrogator does not immediately point out this discrepancy, but continues the interview, often saving the kicker to the very end, as a sort of And Another Thing... epilogue. Even more dramatically, the interrogator may insist it wasn't</ poison and then probe the perp's reaction to this lie This trope must be handled carefully. When sloppily done, it's likely to turn what should be a dramatic moment into a case of Fridge Logic , if the information is something an innocent person could have found out anyway, or was a reasonable assumption from what they'd been told One of The Oldest Tricks in the Book , and something the police do, in fact, do in real questioning . Real police detectives usually hold back specific details of a crime and/or crime scene when making public statements. This has the dual benefits of possibly identifying a suspect and helping separate valid witnesses from useless leads. Knowing these details may not automatically make someone the guilty party, but it's a big clue that they were at least present for the crime. This is one of the reasons civil rights advocates warn that you should never talk to the police without an attorney present. Even an innocent person can make assumptions about a case, and you'll look guilty if they turn out to be right. For example, you might say, "I don't even own a gun" when you were told the victim was murdered but were never told the victim had been shot. It's even possible for the police to

forget (or "forget") while testifying that they actually did</ tell you the victim was shot before the interview/interrogation began. Then you're screwed This trope can be invoked in works during a character's confession. Innocent characters attempting to take the fall for a crime they did not commit will probably guess facts about the crime that may not be true. If the facts are incorrect, they will be most likely be called out on it immediately or in an And Another Thing... manner. If the character is guilty, they could willingly give information only the perpetrator would know. This could be played to induce Squick In science fiction and supernatural stories, if the slipped information reveals the true nature of the story's setting, or helps the good character(s) discover something wrong or suspicious about it, it can lead to A Glitch in the Matrix See also: Conviction by Contradiction , Bluffing the Murderer , and I Never Told You My Name

If the characters are rafting, swimming, or just floating down a river , then they will either go over a waterfall or narrowly avoid going over a waterfall. Always. No exceptions. You could take it to the bank. But you actually can't, because you're going over a waterfall - you'd swim to the bank if you could... 'cause the side of a river is called a bank, and um... never mind Despite the suspense or drama they may invoke, plunges over a waterfall will not always result in significant physical injury to the characters. This is true regardless of the height of the fall, or the shallowness/rockiness of the bottom Usually, this is a good way to stop the fact that in a lot of circumstances travel by river is actually one of the best options available May have a Cave Behind the Falls . Compare Mega Maelstrom

We've all heard the phrase "rules are made to be broken." After all, it's practically become the mating call of fictional rebels and cheaters the world over. In the world of storytelling, however, that adage doesn't describe a rebel's motto so much as a fundamental truth: If a rule is introduced into the story, it only exists to be broken...or, at the very least, bumped up against.</ The above is another expression of the same principle that guides tropes like Chekhov's Gun and The Law of Conservation of Detail : everything mentioned in a story must have some kind of purpose</. The existence of an important rule in a story necessitates</ that someone will eventually break it, or come close to doing so. If no one ever breaks this rule or has to worry about breaking it, then the rule has no payoff, and therefore no purpose. A story element with no payoff, unless it's deliberately being used to distract or redirect the audience , is a waste of time for both author and audience. In keeping with this principle, the Inevitably Broken Rule trope describes any narratively significant</ rule that exists only for a character to eventually break it, and whose breaking affects the progress of the story or a character's arc in some meaningful fashion. The Inevitably Broken Rule is an extremely versatile trope, as it doesn't place very many limits on how it can be presented in the story. The rule itself can be all-important, such as " if the balance is tampered with, thousands may die "; it can be mundane, as in "you'll be expelled if you get caught fighting again"; or it can be downright silly, such as "always dance a jig through the Jiggly Jungle or you'll be sorry!" The rule may be broken by any character: the protagonists, the antagonists, or even an incidental character. It may be broken deliberately or accidentally, with good intent or ill, through action or failure to act. For the purposes of this

trope, the specifics of the rule or its breaking aren't terribly important. The important part is that the rule is broken, and its breaking carries consequences that meaningfully affect the plot or the characters in some way. Depending on what the rule is and when it's broken, the Inevitably Broken Rule can play many different parts in a story. If broken at the start of the story, it may kick off the main plot where the characters attempt to deal with the consequences of their actions. If broken later in the story, it may play a part in resolving</ the main plot. Yet it doesn't have to be a central part of the plot; it can also be used to signal a change in a character's mindset or serve as a Secret Test of Character for a protagonist. The options are limited only by the writer's imagination. Supertrope of: Sister trope of Can't You Read the Sign? , a Comedy Trope in which a posted rule or warning is so ridiculously specific that you know it'll be broken at some point in the story. Compare and contrast I Thought It Was Forbidden , in which a character breaks a rule without</ suffering the stated consequences. See also Tempting Fate and Self-Fulfilling Prophecy , both tropes in which talking about something causes it (or its opposite) to happen. For In-Universe cases where the characters</ believe rules are made to be broken, see Not Cheating Unless You Get Caught .

In this world there are tons of people and organizations who specialize in Professional Killers , who have racked up tons of kills under their belts. But there are members of these groups who, despite being with them for a long period of time, have never secured a kill of their own before. These instances may result from lack of confidence, experience, opportunity or any other factors that explain why, usually driving them to try and get their first kill When these guys do</ get their first kill, expect them to be ecstatic about it, gaining more confidence and determination to perform more kills afterward. Except if it turns into Suicidal Overconfidence , then expect it to be the first and last kill of their short career. Could be justified if they work more as the Mission Control , or intel gatherer, or (at worst) a field assistant, who doesn't confront the targets directly However in some works, a kill will not count if the victim is not human, a monster, or a being that Was Once a Man but discarded their humanity and will only apply to a human killing another human. What Measure Is a Non-Human? will come into play here if this is the case Possible Sub-Trope of The Pirates Who Don't Do Anything . Compare Gaining the Will to Kill , These Hands Have Killed and Bleed 'em and Weep , when someone's first kill causes them emotional angst, It Gets Easier , when a character suffers emotional trauma when they first kill, but subsequent killings have less effect on them, and It Never Gets Any Easier , when dealing with death (including killing), a character has emotional trauma no matter how many deaths (killings) they've been involved with. Another bad outcome is Murder Makes You Crazy

While distant planets in fiction are typically different from Earth in many ways (see for example Planet of Hats , Genericist Government , Single-Biome Planet), they also exhibit astounding cultural similarities: aliens tend to speak English in the dialect of a 21st-century speaker of English , their written language, numerals and methods of time measurement are conveniently identical

to Earth standards or can be easily converted. You might even spot European cars or Vancouver landmarks . All societies will include two genders, which register as very like human categories of "male" and "female," down to females who have Latin-sounding names ending in -a</ , wear their hair long and their heels high. Expect to come across proper names imported from Earth These Inexplicable Cultural Ties are caused by the fact that Most Writers Are Human and can reasonably expect you, the viewer or reader, to be human as well. Hence, some cultural similarities might be considered Acceptable Breaks from Reality (like a Translation Convention) or result from a limited budget. Others might strike you as avoidable mistakes by the creators of the fictional work This trope comes in vastly varying degrees. Sometimes it's just a tiny detail that catches the viewer's eye, maybe a building in the background you recognize from Real Life or a visibly branded over-the-counter prop. On the other side of the scale, the alien planet will exhibit so many implausible similarities with Earth that your Willing Suspension of Disbelief is shattered almost instantly. Extreme cases lead to Space Romans . Also, the similarities might be Hidden in Plain Sight , like a combination of social conventions that are inconspicuous precisely because they are so Earth-like but whose exact re-enactment on a distant planet is completely illogical. As this is an Omnipresent Trope for Science Fiction , you might have become desensitized to it. And don't expect the characters on screen to spot Inexplicable Cultural Ties for you - odds are they're crazy Functional Genre Savvy . Instead, consult your fridge frequently It's difficult to avert this trope completely in live action settings for budget reasons alone, although good writing can help to pull it off. Actually, as the above quote from the original Star Trek </ pitch shows, use of this trope used to be a selling point to make live action Science Fiction feasible for the small screen and pull some Aesops in a Like Reality, Unless Noted setting. Since then, this trope has lost some credibility due to the rise of harder science fiction and better production values and techniques conspiring to change viewer's expectations. It is something of an Undead Horse Trope , though. Of course, the whole trope is conveniently avoided in case of Aliens Steal Cable or Absent Aliens Though Animated Adaptations and Comic Book Adaptations have the potential to shift a hitherto live-action franchise towards visually more alien settings, they still need good writing and design to avoid this trope. Conversely, Live Action Adaptations of animated works or comic books are likely to introduce more Inexplicable Cultural Ties to a fictional world Cultural counterpart to the evolutionary Human Aliens and All Planets Are Earth-Like , which refers to planetary properties This being an Omnipresent Trope of Science Fiction , please only mention examples where it is played with , averted or employed in a notable way

Information's answer to Chekhov's Gun When provided information in a work, you need not ever take it with a grain of salt. Given the limited amount of time and lines of text allotted to exposition, The Law of Conservation of Detail ensures that the information provided to the hero by casual bystanders is both entirely accurate and nearly always relevant to the plot. This holds true even if the information is a vaguely remembered myth , a prophecy spouted by a raving preacher , a hypothesis posited by a scientist (mad or not), or a rumor that some event or other is taking place somewhere The trope is particularly common in video games , which often rely

on players talking to everyone as a way of teaching them what to do next. And thanks to Conservation of Detail , when a video game gives you this information, not only will the expositor be correct, but it's also a pretty good bet that you'll be required</ to follow their advice at some point. As such, video games might spice things up by putting the information in the mouth of an unexpected source , taking advantage of a setting where All Myths Are True , or lampshading the sheer unlikelihood of a certain plot element But the trope can be seen in all media, in particular because it's considered sneaky — if not bad form — to bother with giving the audience useless information, or indeed outright misinformation Contrast Treacherous Advisor and Treacherous Quest Giver , who often misguide you with false information

Vampire: The Masquerade – Bloodlines </ generally subverts the trope, as almost everyone you meet is trying to manipulate your actions and influence your opinions in various directions to follow their own agendas. This is especially true with the various vampire characters and their minions — even the relatively benign ones, who seem to be doing it to learn more about you (or for laughs). The main exception is the Malkavians , whose ramblings are often tainted by madness, couched in weird metaphor, or just strangely phrased, but no Malkavian is ever outright wrong about anything, and what they say is never less than plot-relevant.

Sometimes, things are not what they appear to be.</ Index for pages about things that look like something else at first, or that are supposed to look like something else to the other characters in-universe. May be integral to maintaining The Masquerade . Contrast with the Information Desk . See also Espionage Tropes , The Secret Index , & Truth and Lies .

This trope is most common in musicals, but is not strictly relegated to only musical fare You have a happy-go-lucky or other highly charismatic character who is getting everyone around him/her all excited about whatever it is they're excited about Then there's the one character who isn't swept up. They're worried that everyone is all excited and not thinking it through. They are concerned that there's something shady under all the happy excitement. They're just grumpy and think all this excitement is too silly and twitterpated But as the song/scene goes on, the excitement spreads, and the enthusiasm grows. The lone holdout will find themselves going along and either catch themselves with embarrassment and stop — or will not catch themselves and end up going with the flow Compare with Not So Above It All and Got Me Doing It

Film Literature Live-Action TV

Web Comics stern Animation

The evil twin of Man on Fire , Incendiary Exponent , and Out of the Inferno , this is where someone sets whatever is trying to kill them on fire... and it then continues to try and kill them. While on fire Sometimes it is just a delayed reaction and the fire will prove fatal, but that is little comfort considering it may prove fatal to the heroes first. Might also apply to Nuke 'em if the target is gigantic. Eldritch Abomination : Bad. Eldritch Abomination that gets nuked, and stands back up pissed off and

blazing radioactive fire? Worse A standard form of Taking You with Me and Video Game Cruelty Punishment , many who are set alight become...well, hell bent on setting anyone and anything on fire as well

Mentioned in the fourth The Trials of Apollo </ book. Zombies (also called by their Greek name, vrykolakai) are unfazed by fire and will continue to advance through a wall of flame and be completely unfazed even as their bodies burn. Apparently, this immunity to fire is why Hades didn't make the Phlegethon the border of his relm.

The following is a compiled list of tropes related to Hell, the Underworld, and its inhabitants (which are often demons) Compare This Index Is on Fire . Contrast Tropes of the Divine and Angelic Tropes

Fridge Logic doesn't just find plot holes; it can make your typical happy ending into a Downer Ending , and render even the most flawless moral victory into Black-and-Gray Morality . How? By helping the viewer realize that the "survivors" at the end of a work don't have a future. When authors use large and amazing technologies and world or even galaxy-spanning threats, they run the risk of letting the excitement of Stuff Blowing Up get the better of them and not think through how the survivors will make a living afterward, even though they can't help but celebrate as the Evil Tower of Ominousness explodes with its master's demise . Y'see, Happily Ever After implies there's arable land to farm, electricity and running water, and a semblance of civilization to go back to, as well as at least several hundred to several thousand people surviving by the end. A Zombie Apocalypse , nuclear holocaust , Colony Drop , The Great Flood , or anything that can cause The End of the World as We Know It will have subtle and far-reaching effects even if it's stopped</. Even if humanity does manage to survive (humans are clingy</ bastards) there are bound to be massive casualties. Even if the work runs with the above scenarios and makes it about characters from a Terminally Dependent Society surviving After the End , the author may end up seriously overestimating their and their civilizations' chances of survival. Cue the Moral Dissonance if the heroes are primarily responsible for this near disaster. The subversion of this trope is if the heroes fully realize the effects of their actions ... and choose to follow through anyway. Maybe they are amoral sociopaths who do not care, maybe the Omniscient Morality License makes it such that the ultimate consequences will be preferable to the status quo , or maybe things are beyond the Godzilla Threshold and so anything goes. Some common examples of this trope coming into effect include: Keep in mind that this is an inferred</ holocaust. If the work explicitly states that there's a horrible aftermath or if it ends on a cliffhanger (for example, depicting an undetected bomb about to explode), then it isn't an example of this trope; you may be looking for Surprisingly Realistic Outcome . Also note that, despite the name, the "holocaust" doesn't have to involve massive death; it could be as simple as a criminal getting away because the writers didn't give the good guys enough evidence to convict . A possible reason why audiences may see a "happy" ending as an Esoteric Happy Ending . Contrast Inferred Survival , and contrast No Endor Holocaust for when this possibility is nixed by Word of God or subsequent material. For more general plot points that are chilling when contemplated at

length, see Fridge Horror . Compare Hero Insurance . Ending Trope , so spoilers be ahead. </

Adultery. Two-timing. Seeing someone on the side. Having an affair. Cheating.</ Whatever it's called, the act of having a romantic or sexual affair with someone other than one's established spouse or lover has ever been a source of drama in fiction and in real life. It has brought lovers together, but it has also torn lovers, marriages and even families apart, and it is one of the most common reasons for someone to end up killed. These tropes explore infidelity, the forms it takes, and the effects that it has upon people. See also Netorare .

In principle, a webcomic has several advantages over the print equivalent, due to the greater flexibility of the medium. One such advantage which enthusiasts of the genre often mention is the "infinite canvas": the ability to create pages of nearly-unlimited width and height, with the viewer scrolling around the page. A related idea is that webcomics can have far more pages than would be possible in print, potentially connected non-linearly by hyperlinks In practice, both of these forms of expansive "canvas" have proved very difficult to use effectively. Scrolling (especially horizontal scrolling) rapidly becomes tedious, and scrolling in two independent dimensions can cause the reader to rapidly get lost on the page. Similar issues exist with non-linear or multi-linear storylines: they require an exponential amount of writing work for the number of possible paths, something which most webcomic artists (the majority of whom only work on their series part-time) are unable or unwilling to commit to. Deviating from a print format also makes it much more difficult to create a print version What's more, there are technical issues as well; many browsers have trouble loading large numbers of images at once (or one extremely large image). Many readers aren't willing to wait several minutes to read a single comic strip, regardless of its quality. This also cuts off some of the accessibility of the comic, since bandwidth access in places like libraries and Internet cafes is usually limited. Using hyperlinks to simulate a non-linear or branching story adds page loading to the technical problems The third aspect, unlimited extension, has had a major impact on the genre, but not in the expected way Few series in the West have (intentionally) applied the infinite canvas principles; most of the comics which managed it either were one-shot strips, or were bonus material added to an otherwise conventional series. However, finite-yet-larger-than-usual canvas has often been useful in comics that stretch beyond a traditional page's length. And it's all better than the space in the weekday newspapers The concept has taken off with Korean Webtoons , where each installment is a long, vertical image, typically with frames that take up the entire width of the page. Many authors take advantage of the fact that readers have to scroll through the image by adding space between frames to create dramatic pauses, having a series of slightly different images come one after another to create a sense of motion, or by creating pictures where the subject only slowly becomes apparent The idea was introduced in Scott McCloud 's highly</ influential book about the comics medium (in comics medium) Reinventing Comics </

Awful Hospital .

The video game merchant counterpart to the ever popular magic satchel mechanic. Essentially, it's when even after The Hero has purchased 99 or so Potions/Swords/etc., the item shop will just keep right on selling them. Arguably an Acceptable Break from Reality due to the potential frustration that players may endure should there ever be a limit to how much stuff you can buy from a single store, alongside with designers having to keep track of the amount of each item in every store available. Occasional subversions will have certain items and weapons that can only be purchased once, such as a plot-specific item or an exceptionally rare weapon, and have everything else be bought infinitely to distill the frustration Compare Infinite Supplies , which is a non-gaming variant on this Note: Please limit examples to aversions and inversions, since this trope tends to have a habit of being everywhere

Generally, in The Legend of Zelda </ games some shops will sell items that Link can use forever, such as new armor or pieces of heart . Once these are gone, they will sometimes be replaced with different wares but more often they will be sold out forever, denoted by a wooden sign with an X painted on it. This is just as unrealistic in the opposite direction, as it means these shops only have one of the given item and had no prospects of selling them to anyone else (Though in one game, once all these one-sell only items are sold, he immediately announces that he has enough money to retire). Items that can be used or lost, like potions or ammo, will never run out and otherwise infinite use items that can be lost (such as a wooden shield that was destroyed) will be back in stock after they are lost.

In Rogue Galaxy </ , many shops have limited quantities of certain items, and they are indicated by a quantity number on the shop screen. (This doesn't stop other shops later on from stocking the same items in unlimited quantity)

In Recettear: An Item Shop's Tale </ you always have a finite number of items to sell (since you're limited to what you find or buy wholesale). The highest level of items you can buy at wholesale price from the Merchant's Guild and some of the items in the market always tend to be only available in limited numbers as well.

The raccoon merchant in Super Mario Sunshine </ trades Shine Sprites for blue coins, both of which are in limited quantity. When he's sold the last one, he wonders what he'll do for a living now.

Warcraft III </ : All shops except the marketplace have limited quantities of items (most between one and three) that replenish over time. The marketplace, however, starts out empty and gradually fills with items found by players as they kill monsters for experience, these disappear for good when bought.

Each shop in Spelunky </ sells exactly four items, which makes sense since most of the items give their respective effects for the duration of the entire game.

The shops in Disgaea </ carry a limited selection, but replenish in the three seconds it takes to leave the shop and re-enter.

The Elder Scrolls </ generally averts the trope throughout the series.

Merchants typically have a limited inventory (although, in a few instances, they may sell infinite amounts of some very basic items) and also have a limited amount of gold when selling, meaning you may need to visit several merchants and/or barter in order to unload all of your loot without taking a loss. This can lead to situations where, if you have a high-value item, you can't sell it to some shops without taking a loss (i.e. it might be worth 1000 caps but the shop keep only has 400 on hand). Merchant inventories and gold typically reset after 24 in-game hours.

The X </ series uses limited stock as a feature, creating an in-game economy that the player can participate in.

played straight in Neopets </ , since most shops have a certain amount of each item for stock before it sells out, requiring restock. The general store, though, has infinite stock, but only sells the same goods. Additionally and literally, users can buy as many shares of stock as they want on the stock market, with the only limit being 1000 per day.

The complete opposite of Perpetual Poverty . This is when the main characters not only never run out of basic items like food and clothing, but they never seem to have a problem getting hold of all their assorted signature weapons , cool cars and other gear. No matter how difficult it would be for your average person to obtain because of rarity, cost, or illegality, our heroes seem to be able to procure it with about as much effort as it takes the average person to buy a cheeseburger. Where do they get this stuff, (especially the toys)? Note that just having one or two episodes where supplies are mentioned is not</ an aversion if they completely ignore the supply situation in later episodes. Some ostensible Scavenger Worlds can inspire Fridge Logic this way if major drama is made out of the difficulty of finding food, medicine and the like, but the characters are driving around in petrol-powered cars the whole time and fighting off the bad guys with guns, and nobody ever deigns to explain where the fuel and ammunition are coming from. See Also: Offscreen Villain Dark Matter (When the bad guys have it just as easy)

Ritsuko from Those Who Hunt Elves </ is played up as sort of a Cosplay Otaku Girl /k/ommando taken Up to Eleven , but even so her ammo dump never seems to run dry of bullets, grenades, landmines, miscellaneous tacticool equipment or even ARTILLERY SHELLS for the Russian surplus T-72 tank it's all carried on while Trapped in Another World for two seasons. Speaking of this tank (owned by an otherwise perfectly Ordinary High-School Student), it also presents one of the few aversions in the show, as at first it runs on something resembling gasoline squeezed from pear-like nuts until they have the misfortune to run dry and nearly abandon it before .

Most superheroes, in both cartoons and live action, are guilty of this. Sometimes it's explained, but often it isn't. Batman has Wayne Enterprises as a front to bankroll his ventures, but how does Superman afford to pay the grounds crew responsible for maintaining the Fortress of Solitude while he's living in Metropolis? It's possible to explain this away — Superman, for example, had a horde of robots he had built using his superpowers to maintain the Fortress — but most don't bother.

The Lord of the Rings </: Overlapping with Bottomless Magazines ,

Legolas seems to have infinite arrows, in contrast to the book, where the replenishment of his arrow supply is a constant source of concern.

The Culture of Iain M. Banks 's novels has created a utopian, post-scarcity society through harnessing the forces of the universes' underlying "grid", apparently effortless energy-matter conversion and the inception of benevolent A.I.s far beyond human capabilities. The virtually limit- and effortless availability of goods and services to the individual as well as to the society itself has led to a culture which largely lives for its own hedonism.

Gilligan's Island generally played this straight, though a number of episodes involved the foraging of supplies found on the island or washed ashore Team Fortress 2 </ Gunnerkrigg Court </: It's only obliquely touched upon in-comic, but Word of Tom explicitly states that there are no tuition fees for students at the Court, and the needs of students and staff (food, housing, uniform clothes for any occasion, personal laboratories, lathes, etc.) are provided free of charge

The unimaginably huge costs involved in the "Containment" part of the SCP Foundation are explained as being partly funded by governments, but in general the writers chose to not address this situation and let the readers do the imagining. Some of the costs are offset by using the more benign SC Ps , and the more extreme measures (like the termination of D-Class personnel at the end of every month) have been slowly phased out Stan Smith from American Dad! </ is, thanks to Rule of Funny , able to get any equipment or resources he needs from the CIA for his own personal use, including virtual reality machines, experimental drugs, body doubles, funds for a team of mercenaries, and loads and loads of weapons

This is a weapon, spell, special attack, etc., that is not only the most powerful of its kind in the game (at least for its respective player character(s)), but its power is matched by how hard it is to acquire. So you'll never get it by just sticking to the game's main story. If you want it, you've got to put the plot on hold and embark on a five-hour sidequest ! That, or find the enemy that Randomly Drops it (which will likely be a Metal Slime or Boss in Mook Clothing from the Bonus Dungeon , and the drop rate may be just 2 percent, or 5 percent with a Random Drop Booster). One would think that the time needed to finish the subquest could be better spent on Level Grinding , so the is often more useful because it has other associated stat bonuses, unique to the character, rather than merely being stronger than other weapons (or so strong that even leveling up can't give you that kind of strength). Also, it's unlikely the dungeon the sword is in will be uninhabited; in fact, the monsters there tend to be very XP-rich anyway</ . Sometimes the sword has not been forged yet — if that's the case, you need to find the Ultimate Blacksmith so he can make it for you. If the bosses you need to defeat for it aren't optional, that overlaps with Last Disc Magic . If it's only possible to obtain this once every challenge in the game has already been overcome, it's also a Bragging Rights Reward . This can also be if it is Level-Locked Loot (if your level has to be so high that you could beat even the final boss with a lesser weapon). As noted, this doesn't actually have to be a sword. The reason why, in most games, it does</ happen to be a sword is covered by the trope Sword Almighty

. A Sister Trope to Infinity +1 Element (this applied to Elemental Rock–Paper–Scissors), Compare Penultimate Weapon , Sword of Plot Advancement , Armor of Invincibility , and Olympus Mons . Compare/Contrast Infinity -1 Sword (in that it's also powerful, but much easier to get). Do not confuse with More Than Infinite . Final Fantasy XI </ : Mega Man </ :

Suomenkielisiä artikkeleita

A character inhales too much helium or other some other gas, and their whole body inflates like a balloon. Usually their clothes stretch with them . This is often inflicted on the character as an Amusing Injury , but some characters will do it to themselves deliberately. Because All Balloons Have Helium , inflated characters are liable to float in the air or blow away in the wind, even if they were inflated with normal air. It often ends with the character deflating just like an untied party balloon, flying through the air and sputtering as the gas rushes out of them. Alternately, the character may inflate beyond their limits, resulting in "Pop!" Goes the Human May also be done with water or other liquids , in which case you can expect a lot less floating and a lot more wobbling Naturally, a trope Played for Laughs because of its sheer impossibility in Real Life (unless you happen to be a pufferfish or a hedgehog) Compare Balloon Belly (when a character gets an extreme potbelly), Breast Expansion (because Buxom Is Better) and Temporary Bulk Change (when a character gets fat and then inexplicably slims back down between scenes) or Attack of the 50-Foot Whatever (grow in size but not inflate). Related to Be the Ball , so overlap occurs. Contrast with Squashed Flat . As a form of Toon Physics , this trope tends to run on Rule of Funny and Willing Suspension of Disbelief Online, this trope is also known for being a common Fetish ... but let's not get into that here

This is a numerical claim that mysteriously shifts over the course of a conversation. Note that there are two different ways this can vary — the number can either increase or decrease, and it can either converge on the correct number (in which case this is a form of Verbal Backspace) or start near-correct and end up somewhere wild A sure sign of a Bad Liar . Not to be confused with Victor Borge's " " routine

Tropes about characters learning stuff Compare Exposition , where the audience learns stuff — overlap is substantial, since these tropes can justify those ones Also compare Truth and Lies ; you can learn both true and false information from any of these tropes. Contrast with the Infauxmation Desk . See also The Shades of Fact

Alice has something she wants to share with the world. A scientific advancement, most often. She's going to go public and make the world, perhaps, a little better. Maybe it's the cure for a disease, a solution for world hunger or an abundant source of energy. Maybe it's of alien origin . In any case, Alice doesn't want to limit

access to it through copyrights or patents or anything of the sort But... uh oh, Bob doesn't like it. You see, he has ties to a big business that stands to lose a lot if that invention is released to the general public. If only Alice wasn't so into this nonsense, they could do some business exploiting the oppressed masses like he has been doing with much success so far. Having questioned Alice about potential confidants , the decision is made, that she must die and her research with her It is the quest of the heroes to save Alice's precious information and release it before the Big Bad can usurp it or destroy it. In the process, they may find out there were those with similar discoveries who were Killed to Uphold the Masquerade In the real world it's usually not this bad, generally the other party will sue to get an injunction to stop disclosure, and, in some cases where it involves government secrets, people get prosecuted, as has happened to Wikileaks founder Julian Assange and NSA contractor Edward Snowden. The slogan "Information wants to be free" was coined by writer Stewart Brand, invoked against limiting access to information by governmental control Plots following this trope in 20 Minutes into the Future (or Like Reality, Unless Noted) settings tend to end with the villain realizing he Can't Stop the Signal even if he manages to stop the idealistic character Super-Trope to Withholding the Cure . Compare Digital Piracy Is Okay and Keeping Secrets Sucks . Contrast Digital Piracy Is Evil and Endangering News Broadcast (when an info should be made secret from the public for a good reason). This trope is one of several reasons why the Streisand Effect exists

Though the motivations for allowing this are similar to the motivations for allowing Informed Attributes in general, there is much less of an excuse for it. Believably getting it across that, say, someone is compassionate is difficult stuff</ ; it's the mark of a good author to pull that kind of thing off. Skills and abilities are a much simpler deal: Is someone a master locksmith? Have them pick a lock now and then. Are they combat experts? Have them take the fight to their opponents whenever they can and gain the upper hand What often deters writers from going through with the above plan is the fact that, well, Most Writers Are Writers . They're writing a character who's supposed to be a musician, but they don't know the particulars of meters or chords. They have a character who is a military expert, but they don't know how long an infantry division can fight until it needs to be resupplied. They have a character who's a genius, but they haven't a clue what kind of problem only a genius would be able to work through, or how. If they actually attempt to show the ability in action they take a very real risk of the portrayal falling completely flat On occasion, the ability cannot adequately be portrayed by the medium used for the work. For example, a comic book cannot show how good a character's singing voice is, and a radio show would, at best, be forced to merely describe a character's great paintings. Occasionally, the ability cannot be portrayed because of the work's audience, such as a dangerous weapon in a family-friendly show causing Scenery Gorn if activated, and thus, it can't be activated onscreen One choice the writer has is to go ahead and show the supposed "ability". But if they don't do the research, this leads to such laughable characters as the scientist who spouts Hollywood Science , the tactician who comes up with the sort of tactics a five-year-old would think of and the "genius" who is only a genius because they're the only one coming up with any plan at all, and everyone else is downright stupid. Lack of convincing detail means

the reader does not believe, whether it is fixing an engine or presenting the actual philosophy of a character purported to be wise , and can make the readers long for the informed ability It's much easier for the writer to just stay away from showing that character's expertise at all. After all, how can the portrayal possibly live up to the hype? And since the audience has to know about this expertise some way or the other , this inevitably leads to telling the reader about it instead of showing it to them There are</ , fortunately, ways around this The hard way is doing the necessary research, and lots of it This trope can be Played for Laughs — a character might find increasingly bizarre and unlikely reasons to not use their alleged abilities in situations where they would prove useful, or that one time where they actually put it to use may be a Noodle Incident that goes on being mentioned at random, or they may display their skill, but in a manner conspicuously offscreen while the other characters exclaim "Look at them go!". If they finally, at one point, go ahead and prove that they are every bit as capable as their reputation suggests, that's Let's Get Dangerous! See also Faux Action Girl , a variant where "competent fighter" becomes an Informed Ability, and The Worf Effect , which often turns it into one. A Necessary Weasel in Video Games , where often you'll be playing someone supposedly very competent, but how well they actually perform is up to you, and often they'll go through tutorials teaching them the basics of their supposed area of expertise for the player's sake. Compare Character Shilling and compare/contrast with Creator's Pet . Also see The Pirates Who Don't Do Anything , where the characters never even attempt</ to perform the tasks for which they are supposedly famous. The Informed Flaw is the opposite, where someone is supposed to be terrible at something (ie. Hollywood Homely), but isn't. In a video game, this frequently overlaps with Gameplay and Story Segregation (when the story says that someone has amazing abilities, but they show up in neither gameplay nor cutscenes.) Suddenly Always Knew That is when a character demonstrates a skill the audience has never been told he possesses before

In most visual media, just about everyone is beautiful . But what are writers to do when someone's attractiveness is a plot point</? Anime artists have Bishie Sparkle , Western animators have (or used to have) the Twinkle Smile — simple visual shorthands that viewers intuitively understand . But in live-action, often the only choice is to have the other characters tell</ us how attractive they are. Whether or not the viewer finds the character to be attractive, we must accept that within this fictional world, they are. This trope is about characters pointing out</ how exceptionally attractive they think a character is, not whether they're being drawn attractive, or whether the viewers think they're attractive. And having an unusually active sex life isn't a part of this trope either unless a character says outright that the reason</ that person is being pursued is that they're the best looking of the group. Of course, this trope is difficult to avoid in literature and other storytelling styles without high-resolution graphics or visuals. Some works may describe a character's appearance in glowing terms and let readers realize for themselves that the character is quite attractive, while others are content to just tell us that they're beautiful and move on. This trope is related to The Glasses Gotta Go and She Is All Grown Up , where we're informed that a particular character is more attractive than they were</. It can be a consequence of Generic Cuteness

, since there no way to tell which character is supposed to be prettier than the others. The inverse of Informed Attractiveness is Hollywood Homely , where we're told that a character is unattractive no matter what the viewer might think about the issue and Informed Deformity where the viewer is told a character is ugly, but can't tell otherwise because of Generic Cuteness . Inhumanly Beautiful Race nearly always falls under this trope. In-Universe Examples Only :

A violation of Show, Don't Tell when fleshing out a fictional tangible. Something is said</ to be X, but not shown</ to be that way. Making a fictional something come to life is difficult. You only have so much Willing Suspension of Disbelief to work with, and you don't just want this thing to be believable—you want it to have the characteristics it needs to have for the story to work. You want this character to be brave, that knife to be sharp, this table over there to be sturdy, and this means going through a lot of trouble. Think of a situation where the thing can show its true colors, think of a way that this situation can naturally arise out of the plot, think of a believable way for the thing to act and finally show the way it is… Which is why authors sometimes, consciously or not, go "screw it. Why go through all the trouble?" and just have the narration or another character say, "she is brave", "this is sharp", "this is sturdy". There. Problem solved! Except, no. Not by a long shot. Readers do not come to a story expecting to be spoon-fed what they should</ be feeling or thinking about things. They want to experience it for themselves and decide for themselves. They want the freedom to conclude that the Strawman Has a Point , that The Hero is really more of a villain , that the aesop preached by the mentor is hopelessly misguided based on what happens five seconds later , that the "ultimate" Dangerous Forbidden Technique is worthless. Deny them this—either by sketchy writing or not doing the research—and there will be backlash. Readers will stop taking your word for it, whatever "it" is. They will actively seek reasons to hate the people you tell them they should love, to downplay the forces you tell them are powerful, to ridicule the concepts you tell them are profound. It's difficult to draw the line regarding where the ratio of informed feats to actual feats becomes unfeasible, but you can trust readers to recognize it when you cross it. And that is a very good reason—no, scratch that, that is the</ reason—that " Show, Don't Tell " is a piece of advice drilled into the heads of amateur writers early and often. Master it, and you can start using tools like the Internal Reveal , when a character is shown to be X</ but doesn't realize it about themselves. Super-Trope of: A Sub-Trope of Show, Don't Tell . See also Hollywood Homely , Urban Legend Love Life , and Overrated and Underleveled . If everyone keeps going on about how great you are, it's Character Shilling .

Show, Don't Tell is the rule in storytelling, though books are able to get away with breaking that rule more than film and television can. That's because books have narration, which means that essentially anything that happens, the reader is being told about no matter what. When we're told in great detail what's happening in, say, an action scene, we're being "shown" the event. When we're simply told that the scene happened, we're being "told". In both cases, the scene is still indicated entirely with written narration Dialog, however, is different. When two or more characters are talking, we're expected to see exactly what they're saying. This is the literary equivalent of "showing" us the conversation. We know exactly what Alice and Bob say, and in our head, we can picture the

conversation happening as clearly as if we were watching a movie or in the room with the characters. Sometimes, however, authors decide they'd rather tell about the conversation than show the conversation directly. This is Informed Conversation. Consider the differences between the following. Direct conversation: Informed Conversation: Both are examples of ways a conversation can be shown in writing, but the direct conversation shows more personality, by showing exactly what's being said. Alice and Bob express personality through their reactions to what the other is saying, as well as their specific word choices and ways of phrasing things when relating their stories of bad drivers. If the dialog isn't shown, those elements of personality don't come out. So why skip the dialog and just relate it? There's several reasons for it. Some writers consider is useful to distill a conversation only to what elements are most important to the story's plot, thus speeding up the story. Some conversations are redundant, and may relate to another character what the audience already knows - for example, if the story had been following Alice during the time that she's talking about, we would already know about her traffic experience, and some readers might not want to hear the story a second time (this variant is unique in that it is common outside of books as well, though typically with a fade in and out). Also, some writers may not trust in their ability to write convincing dialog. Sometimes it's done mid-dialog to stop a conversation from going on forever. Real people sometimes have conversations that take well over 20 minutes! And even short conversations may also be characterized by lengthy, meandering narratives which can go in circles before coming to the point or frequent tangential switches from one topic to another, which may be difficult for an outside observer to follow. Not many want to read that, so the story may use Informed Conversation to tell what's being spoken about, then cut to only the most interesting or important bits of conversation to show. Or they may show the beginning of a conversation so that we can observe it, then mention in narration that the characters kept talking for a very long time. That way, if done right, readers get the benefit of seeing the characters come to life through interesting dialog, but at the same time, the story maintains its pace. It can also be used to indicate that profanity is used without quoting it . On the other hand, if this trope is used too often or to skip past conversations readers may find interesting, it can make the story worse. Dialog, after all, is one of the biggest and easiest ways to show personality in a story, aside from first person narration, which is essentially a form of extra-long internal monologue. Therefore, while dialog can be done in excess and slow down a story, some amount of it is necessary to make the characters more relatable and have them come to life.

Most people, when they fall ill, will only describe their symptoms in general terms ("My stomach hurts", " I think I'm going to throw up ", " AAA-CHOO! ", etc.) This makes sense - most of us don't have much medical knowledge and can only use vague terms to talk about the complex things happening to us Not so when the patient is a doctor, however. S/he will give a full account of their condition, with all the relevant jargon , even if they're in the middle of collapsing. If they're already in hospital, they will probably be an Annoying Patient , particularly if the other doctors disagree - it's well known that doctors make the worst patients. Occasionally, it will be shown that the patient isn't actually</ sick, just that they're a Hypochondriac or simply a worrywart See also A Fool for a Client , the equivalent trope for lawyers. Compare Diagnosis from Dr. Badass

The cart comes rumbling up to the gates. The Evil Overlord 's guards poke about, and find a jug under the seat. Fool peasant thought he could sneak some moonshine past them</. They take it, and the cart rumbles on — with the rightful king hidden under its cargo Infraction Distraction is when a conspicuous but minor infraction — possibly not even illegal but merely disreputable — is made up or committed for the purposes of distracting authorities from something much more serious. (Usually a crime, but not always; a character can pretend to be distilling moonshine to hide that he's training with his new superpowers, for instance.) Not unlike a Kansas City Shuffle , the guards in question know they're being tricked, but are wrong about what the trick is. If you actually confess, it's Confess to a Lesser Crime , but you can also manufacture evidence against yourself or otherwise plant clues to the infraction, down to simply committing it. One common method is to plant an Incredibly Obvious Tail — to distract from the skilled and subtle tail. Incredibly Obvious Bug can also be used, but is less common Overlaps with Embarrassing Cover Up if the decoy secret is disreputable as well as prohibited (or if the character is so Lawful Good or such a Slave to PR that being caught breaking even minor rules is an embarrassment in and of itself). Overlap with We Need a Distraction is possible but rare, since it usually is not to enable further actions. If a suspect is surprisingly quick to confess their Big Secret , there's a good chance it's this. See also Hidden in Plain Sight . A Censor Decoy is this used in Real Life to get crap past the radar The opposite is Minor Crime Reveals Major Plot

Fact: Whether by pronunciation, spelling, or use, some words are just plain funny to certain characters. Warning: Do not use any of these words to try to make an unfunny sentence funny . Tends to overlap with I Just Like Saying the Word , as in the case of the page image. See also Narm , which can happen when these words crop up in inherently unfunny contexts. Also see Flowery Insults when used in an abusive manner. Also compare Heh Heh, You Said "X" , and LOL, 69 and 420, Blaze It for specific inherently funny numbers. Want to have some fun sharing your favorite ones? Take a gander over at the Just-For-Fun page !

So, there's this really cool organization, and you've known for years that you want to be part of it. You've asked the leader really nicely. You've passed their tests, you've won or bought the respect of all the members, maybe you've even accompanied them on a few adventures. Now, you're finally going to get in. You'll have access to all the secret weapons, knowledge, and connections that they've been concealing from you. You're going to be one of the gang. But first, you're going to be initiated. This will be in one of several basic forms: Rituals, as social scientists will tell you, are tools for dealing with the " liminal state :" the area between one standardized role and another. You were one person before you joined the group; you'll be a different one once you're inside the group. The initiation will mark the place where your status officially changes. Trope-wise, initiation ceremonies are a well of both comedy and drama since they show, perhaps for the first time, what the group is really all about — usually at a point where it's too late for the initiate to back out. What if the High Holy Order of Sacred Wisdom makes initiates tread grapes in their underwear while singing

"Happy Birthday"? What if Taffy's Tattlers require a blood sacrifice? See also Rite of Passage , a catalog of initiation ceremonies into adulthood. Knighting covers an initiation into an order of knighthood (and is usually of the solemn and dignified type). If You're So Evil, Eat This Kitten is a trope used exclusively by evil groups for initiates to prove their evilness (or that they aren't heroes in disguise). Gangs may use the Gang Initiation Fight as their ceremony.

The capital is about to be overwhelmed and the leader is fighting in the battle. His duty to land, life, or people dictates that he must organize the resistance or go abroad to find allies , but he won't budge until this battle has been won Sometimes even the most Reasonable Authority Figure puts Honor Before Reason . Sometimes, he can be convinced to leave. Sometimes, force is needed; sometimes, he dies in the ruins of the castle, making a Last Stand , usually with his personal guard. When he does leave, he is often the last one to do so Note that you really have to get killed to pull this one off properly. Captivity ruins a lot of the effect, especially if you are used against your own forces He may have his heir sent off, by force if needed . Can lead to A Child Shall Lead La Résistance or the Rightful King Returns Compare The Men First ; the military commander may refuse to leave troops behind, but will go with them if they can be gotten out If the king is supposed to return</ In Its Hour Of Need (but is otherwise dead or canned), that's the King in the Mountain . If your allies</ are supposed to come help your nation in its hour of need, that's Gondor Calls for Aid See also Stand Your Ground . Going Down with the Ship is a Sister Trope that applies to ship captains Worldwar: War of Equals </: Pope Benedict XVI refuses to evacuate the Vatican, despite constant bombings by the Race, in order to keep human (not just Catholic, but human</) morale alive during the war

Marie Antoinette </ : Towards the end of the movie, as the Revolution starts to cause real trouble, King Louis refuses to leave Versailles and be a "runaway king". When an advisor begs him to at least send the queen and children away, she declares that their place is with her husband. They regret it when an angry mob comes to adbuct them.

In Sandy Mitchell 's Ciaphas Cain

The West Wing </ :

In The Order of the Stick </, . It takes four separate appeals to persuade him. (And then Belkar gets into the act, just to get a chance to insult him.)

George Washington was famous for riding around at the front of the lines during battles in The American Revolution . His overwhelmingly positive reputation among the soldiers helped cement the decision to make him the first President... and helped stave off riots when those hungry soldiers marched on the capital to demand their overdue pay.

There are some jokes almost anyone can get, and then there are ones that can only be understood by people with certain knowledge. Jokes about computer programming that can only be understood by technicians, jokes about a film that only make sense if you listened

to the director's commentary, jokes about a country's political system or culture that only citizens of that place could ever laugh at. If you are in on the joke, these can be hilarious; if you aren't, then they get irritating fast. From a sociological point of view, in-jokes are used by groups to identify those who are Not Us — anyone who's not a member of the group is not likely to get the joke. If these are frequently placed in a show or book, then it can become a case of Viewers Are Geniuses , or if they are language related, Bilingual Bonus . Fandoms are often teeming with them, so seeing a certain one everywhere may be a result of Fan Myopia . In some cases, may even lead to Memetic Mutation . If the group is big enough, or is generally a Fountain of Memes , it is easily confused with Memetic Mutation , and often is on this very wiki. However, as long as the particular in-joke stays confined to the group itself it is not an entire internet meme, although attempts may be made to force it from time to time, some successful. If the creator acknowledges the joke or meme in the work itself, it becomes a Fandom Nod or an Ascended Meme . Compare with Noodle Incident . An Outside Joke relies on an opposite effect. Not to be confused with the Webcomic The In Joke </ . Subtropes :

For when you don't quite reach Death Tropes — or even miss them by a mile See also A Tortured Index , Bloody Tropes , Indexitis , This Index is a Real Pain , Toxic Tropes , and Weapons and Wielding Tropes

Accordion Man : When crushing a cartoon character makes them fold up like an accordion.

Inkblot Cartoon Style is the cartoon style most prevalent from The Silent Age of Animation . Most historians refer to this as Rubber Hose Animation because characters' arms, legs and pretty much everything else are usually animated as if they were made of rubber tubing and without elbows or knees. In many cartoons in the very late Twenties and early and mid-Thirties, not only does everyone dance to the background music, everything </ dances to it as well . The style sometimes falls into Accidental Nightmare Fuel territory because of the its tendency toward surrealist humor.

If this style is used in a cartoon that was made after the 1920s/1930s, it results in Retraux . It often, but not always, goes hand-in-hand with Rubber Hose Limbs , which originated from this style. Often a Mocky Mouse .

A famous actor whose animated counterpart is essentially the actor themselves. Actors playing themselves is an admittedly common occurrence, but one that makes less sense in animation Some of this began with traditional 2D animated movies; Disney's Aladdin </ gave top billing to Robin Williams , in a very successful example, partly because he was enough of a character to be funny on his own. Movie makers noticed they could bank on an actor's star power even if viewers never saw</ the actor Later, it became common to give voice acting jobs to actors who didn't traditionally perform voice acting , just to get their names on movie posters. One simple example is for the actors to play themselves, with the assumption that the audience will recognize them anyway. This can be taken to extremes when the animated character is modified to look</ like the actor, even if that requires a bizarre caricature

that makes no sense in the story. This has a strange effect: The character feels less genuine, as if the writers just "stole" the actor to make into a character The transition from 2D cel animation to computer animated "3D" films, both in the stylistic and literal sense, in both movies and computer games, has made accurately ink-suiting actors much easier, therefore introducing an element of "because we can" to the proceedings. It's also become common practice, especially in video games, for an ink suited actor to be showing going through the motions and "acting," while someone else (usually a name actor) provides the voice Many animation purists (and voice actors such as Billy West) criticize the practice, calling it " Stunt Casting " and denigrating it as breaking Suspension of Disbelief or pandering to the actor. Some also insinuate that big names are cast instead of talented unknowns because the story couldn't support itself on its own, and the talent hired is not really relevant to the story or role anyway. In addition, the studios who do this often seem to assume that voice acting is a simpler facsimile of "real" acting; in fact, it requires a completely different set of skills The advantage to this is it can assist the animator in getting the details and mannerisms to look correct, since it is even easier to reproduce the mannerisms of an actor in three dimensions than in (the already commonly done) two dimensions. Also, there is more "acting" in voice acting than most people think; it is almost impossible to voice act properly without making facial expressions and gestures in front of the microphone Note that actors essentially portraying themselves, as on The Simpsons an example of this trope; that's basically an animated Special Guest . Note also that sometimes animated characters in live-action films are intentionally made to look like their actors so that the character can "become real" for a scene or two ; two good examples are Gollum from The Lord of the Rings </ and Davy Jones from Pirates of the Caribbean </ Elements of actors' mannerisms and personality are often worked into their characters; while filming A Bug's Life </, for example, Pixar often filmed big-name voice actors and then added a few of their gestures to their characters. This trope is for more severe cases, where the creators basically just took their voice actor and made him a bug/robot/genie/whatever See also Serkis Folk , where a motion capture suit is used to model an actor's movements which is then overlaid with the CGI character, and its traditional animation counterpart Rotoscoping where film of an actor is taken and the animation drawn on top of it. Compare " No Celebrities Were Harmed ", where the celebrity caricature is voiced by an impersonator, and Comic-Book Fantasy Casting , which includes the modelling of a cartoon or computer character on an actor who does not voice them. Frequently Lost in Translation in dubs, since the animated character looks the same, but the voice actor is different. Not to be confused with Animated Actor , where an animated character is implied to be an actor and the artifice of the work is acknowledged Finally, this trope is not about the actors in a hypothetical live-action adaptation of Splatoon </ . We're sorry

A Stock Phrase used to describe someone who pines for/stays with someone they don't love (or who treats them poorly) because they don't want to be alone. The implication is that the character cares more about being in a romantic relationship with someone than the person they're having the relationship with. Since this attitude is exactly as unhealthy as it sounds, such a character invariably

ends up Looking for Love in All the Wrong Places . They may be Allergic to Routine and have a hard time sticking around because they believe True Love Is Boring This can result in Loving a Shadow or be used as a Retcon when a hyped relationship becomes an Aborted Arc . See also Serial Romeo , where a character seeks out several relationships in quick succession but genuinely loves each person they pursue Not to be confused with a Love Freak who is literally in love with the concept of love

Who is that? She's perfect. She's a vision. She's like no one you've ever seen. You've got to get to know her, to learn everything about her. Wait. She's got a boyfriend? Oh, Crap! . And her boyfriend is that guy</? It just got worse. Many a tale has been told about a poor schmuck who fell in love with a beautiful woman, only to find out she likes someone very dangerous . Usually, the dumb cluck will persist in trying to win her heart and "take her away from all this". Depending on where the story lies on the Sliding Scale of Idealism vs. Cynicism , our hero may get the girl in the end and get away clean, or one or both of them may end up very, very dead . Or he may do the sensible thing and get out while the getting's good . But then there wouldn't be much of a story , would there? Sometimes both of the guys in this rather deadly Love Triangle are crooks, but the one with the relationship is someone higher up on the food chain, whether by being higher up in the criminal hierarchy (such as The Don in a mafia story) or by being vastly more dangerous than the other. Compare Mafia Princess .

This is where the villain or a morally ambiguous character becomes obsessed with a character due to their witnessing said character going berserk and kill in a very messy or bloody way. Many times, there will be times where the villain will be somewhere watching the character fight violently and appear extremely turned on , saying something along the lines of "Marvellous..." If The Protagonist is no longer violent like that, often the villain will go to great lengths to make them revert back (these lengths normally involve kidnapping or killing their friends or love interests.) If the villain/morally ambiguous character starts straight-out describing their euphoric emotions when they saw the good character massacre others, expect the good character to be very</ disturbed and/or confused . This can lead to the villain becoming a Stalker with a Crush . Compare Hemo Erotic and Monster Fangirl . It may lead to lots of Foe Yay or No Yay . Compare and contrast Power Is Sexy . See also Nightmare Fetishist .

Memorials to the dead are common in most human cultures. When the dead are connected with a TV show or movie , you'll sometimes see this: a final tribute to that person as part of the show For a true In Memoriam, there is a direct connection between dedicatee and the show, book or film being dedicated to their memory. There are a great number of books dedicated to the last astronauts of the space shuttle named Challenger</ or the emergency personnel who died when the twin towers of the World Trade Center in the city of New York in the state of New York collapsed. Unless the book is about</ them, those would fall under the larger Dedication trope It is a Celebrity Elegy when done through song or poetry for a famous person. For more musical examples, see Grief Song . Fanbases may turn to Death Fic This is related to Meaningful Funeral , which memorializes a character from the show. They can overlap when a

show is based on Real Life Also see Special Thanks

This occurs when a derivative work (an adaptation, a remake, or a reimagining) is so different from the work it took its name from that the only thing</ actually tying it to the original work is the title, a few character names and, if lucky, the broad premise. It would stand perfectly as an original work if references to the source were removed This can happen when the work was originally intended as something completely different, but, being slightly similar to an existing franchise, it is changed to fit in that franchise, or it can be straight-up title hijack One reason this happens is the fact that established properties and "name awareness" makes things much</ easier to get greenlit than original properties. In some cases producers purchase franchise rights for the name alone, and slap it on their own original product as a way of getting it pushed through the studio system. Video Game and Cult Classic franchises are especially prone to being used this way by third parties with no other interest in the franchise, as they are often relatively cheap to buy or license for this purpose. In some cases, this is even done for the purposes of hanging onto the trademark . If the project began life as an original work and was altered in the process to be part of an established work, that makes it a Dolled-Up Installment . The inverse of this would be Divorced Installment Many a Cash Cow Franchise has descended to this at least once. It may be considered the Oddball in the Series The response often involves They Changed It, Now It Sucks! , but an In Name Only work may well be decent, or even good (if not better) , as long as it's assessed on its own merits rather than being measured by how faithful it is to the original work; in effect, the work in question is a Contested </ Alternate Continuity or Adaptation If the work in question is not an attempted adaptation of another work, but merely sports a misleading name, that's a Non-Indicative Name . If the name used to be relevant but less or even not later, it is Artifact Title . If an adaptation continues after the original source material runs out, that's Adaptation Expansion . If multiple works share the same name but are unrelated, you have Similarly Named Works A good way to tell if an example is really this trope or just a bad adaptation: if one were to change the title to something else, would anyone understand that the work is supposed to be an adaptation? If the answer is "no", then the adaptation is this trope. Changing character names is not necessary for the test; there is always the possibility of coincidence, or of Shout-Out Theme Naming . See also Old Guard Versus New Blood . A Transplanted Character Fic may often feel like this Contrast Serial Numbers Filed Off , Spiritual Adaptation , Exactly What It Says on the Tin , Expy

You have a character who's thinking. Not Thinking Out Loud , actually thinking inside their own head . And yet, another, non</-psychic character can still hear them. And starts talking back—mentally or aloud. The first character's lips didn't move, and no one has any means of telepathy or Applied Phlebotinum If characters weren't aware this was even possible, this is an Unexpected Gameplay Change of sorts applied to the rules of communication. Expect many a Flat "What" in response In some instances, this is because the characters know each other well

enough. Not that that makes any more sense. In this case, if a character actually acts</ to react to the other character's thought process, then it could be a Preemptive "Shut Up" or The Tape Knew You Would Say That . All three of these are meant to automatically fall under Rule of Funny Because thought will happen in any quote used in an example, please use (parentheses) to indicate thought speak , and "quotation marks" to indicate normal speech, as in the quote above Compare Imagine Spotting In Masaya Hokazono's Inugami</, all animals, including the Inugami (wolves with various powers commanded by an unknown voice to leave the forest and spy on humans), speak by some form of thought speech to each other unheard by humans. One of the wolves, 23 (because of the number tattooed to his ear) learns to speak English with assistance from his human companion, Fumiki. When 23 encounter Zero, another Inugami, the latter is enraged partly because of cruelty at the hands of humans, and what he thinks are crude noises coming from 23's mouth. Zero later learns English himself when captured by the head of an unscrupulous pharmaceutical corporation , yet his hatred of humans remains until the very end of the series

The Inner Monologue , Flashback , Imagine Spot , and other such tropes are great ways of illustrating character, showing inner conflict, etc. Normally these tropes are shown taking place almost instantly with other characters around either not noticing or barely noticing that the character temporarily zoned out, so it's pretty rare for Alice to end an internal monologue, flashback, or Aside Comment to the audience only to see Bob standing there staring at her and wondering what the heck Alice was doing and why her mind was off in another world In this trope, however, the other characters around do</ notice. While Alice is mentally taking a time out, everyone else can see the prolonged silence, distraction, or strange behavior, (especially if Alice is in the middle of talking to people who aren't there, like an Imaginary Friend , the Good Angel, Bad Angel , or figures from her past) and then they react or comment to the situation Often played as a form of Bathos , especially if Alice was thinking about something serious and it draws a comedic reaction Ofter revealed via Cutting Back to Reality . Compare and contrast Not So Dire , (where an audience is misled by serious-sounding dialogue into believing that a situation is critically important when it's actually over a much more trivial matter) Anti Climax Cut , and Acting Out a Daydream . Compare the various " x is a free action " tropes, Plot Time , Imagine Spotting , and Caught Monologuing . Can overlap with, or be a sort of meta Failed Attempt at Drama

Not all space aliens in fiction are evil invaders who terrorize our fair planet with their high-tech war machines , and demand to be taken to our leader . Some of them are in fact quite nice. They're not looking for any trouble, and all they want is to be left alone, make a friend, return home or just get by in our strange and unfamiliar Earth culture The Innocent Aliens are like this. They've just arrived at our planet (though in some, rarer cases, we go to theirs, instead) and are total babes in the woods, displaying a very warped understanding of the humans' way of life. They're wide-eyed and childlike, and occasionally even need protection from hostile human beings, often trigger-happy military types who think they're up to no good and need to be exterminated for the common

good In some kinds of stories , these aliens are used to prove that Humans Are the Real Monsters , especially if they or the rest of the interplanetary community live peaceful, enlightened lives and we humans are the ones who go around shooting things and generally being destructive. Even worse are settings where humans are</ monsters who want to capture such aliens to study them - against their wishes, naturally Often the "come in peace" part of We Come in Peace — Shoot to Kill . Contrast Aliens Are Bastards . If they're played for laughs, they may also be amusing aliens as well. It's possible that there are other aliens that aren't innocents in the setting, but the trope implies a whole population of aliens who are Always Lawful Good See also Did We Just Have Tea with Cthulhu? when an Eldritch Abomination is innocent and loving

The main character lives platonically with someone of the opposite sex. (Or platonically and with a gay someone of the same sex.) While this is of course Truth in Television , like Just Friends the situation is fraught with all kinds of potential drama for writers to exploit. Maybe one of them is secretly in love with the other, or maybe they both are . Maybe for some unlikely reason they have to pretend to be in a relationship in front of other people. Or maybe—just maybe—they really are just</ flatmates. This is more common with Magical Girlfriends because they tend not to have anywhere else to stay and Unwanted Harems because Pretty Freeloaders make for easier contact. See also Heterosexual Life-Partners .

A deliberate ploy to make the viewer think something sexy or illicit is occurring when it actually is not. A scene will begin with its characters not visible to the camera, or partially obscured; the dialogue between them seems lascivious and explicit, or be laced with double entendres . But once the Reveal Shot has occurred where the camera pulls back to reveal the whole scene, the action involved is entirely innocent and the dialogue turns out to be referring, entirely or mostly, to these innocent actions — it is only in the dirty minds of the viewers that anything untoward happened Sometimes, this is hard to pull off believably. In many cases, if you listen carefully to the supposedly innocent phrases, they don't sound natural, don't fit the conversation, and are totally unlike the way the characters usually speak. In fact, it was tailor-made to lead to a misunderstanding, and makes a lot more sense in that context than in the supposed true meaning. But the situation is often so distracting it's hard to notice at first This is also often pulled off on other characters in-story. Sometimes, the viewers will see the explanation of the scene first, and then we cut to an angle from which an ugly subtext can be (mis)construed by outside observers Usually perpetrated immediately upon return from a commercial, for comedic effect Sister trope of Not What It Looks Like , which is for situations, instead of just speech. Also see Un-Entendre This is related to Out-of-Context Eavesdropping , and possibly from a misinterpretation of a Sexual Euphemism . It's the polar opposite of both Getting Crap Past the Radar and Accidental Innuendo . See also Does This Remind You of Anything? , Grossout Fakeout , and That Came Out Wrong . Sometimes prompts someone to say "Is That What They're Calling It Now?" Compare Accidental Pun , where a non-sexual remark is misinterpreted as, well, a pun; Orgasmic Combat , when fighting sounds like... something else; and Have a Gay Old Time , when something sounds sexual because language marches on. Contrast G-Rated Sex

This character picks on the short girl for being short. They'll ask a woman for her age. They'll bug the flamboyant guy about his sexuality . And the worst part is, they don't realize what they're doing is rather painful for the person on the receiving end of the criticism. In the worst cases, they might not stop at one insult and even continue until someone forces them to stop , or the other person runs away crying. (Their reaction to this is probably: "Huh? What did I do? ") What separates them from the Jerkass is that this person is actually a good person — they're just clueless to things that people might generally be sensitive to. To them, it was just a fun joke or an honest assessment — no offense intended. When others bring up the fact that what they're saying is hurting other people's feelings, they apologize and try to change. The Idiot Hero and Cloudcuckoolander are prone to this. They tend to receive replies like " You Know I'm Black, Right? " and " I'm Standing Right Here ". Innocent Bigot is a subtrope. Obviously guilty of frequently committing a Fee Fi Faux Pas . It may also be the result of a Crazy Cultural Comparison or a Cross Cultural Kerfuffle . Compare Horrible Judge of Character , Oblivious Mockery , My Parents Are Dead , Deadpan Snarker (when this is done intentionally) and Hanlon's Razor . Contrast More Insulting than Intended , where the insult was deliberate but not to such a degree. Frustratingly Truth in Television . Especially notable are people with Asperger Syndrome , though this can vary and often the exact opposite is true if said people are hypersensitive </. Contrast with Apologises a Lot , when a character tries too</ hard to avoid being this- and it is not unheard of for the two to alternate.

An episode that seems to have no importance to the main Story Arc , only for a major revelation that happens later on in the work to show that it actually held great significance. Basically, it's a Wham Episode that hides its nature as one from the audience. May use a Chekhov's Gun and related tools , but what really makes this trope is that telegraphing is avoided or downplayed. The creators have made minimal-to-no moves to suggest to the viewers that what they just witnessed will have any major ramifications, so it's only when the audience rewatches the episode after the consequences are made known that they realize it was even setting up later plot points. With that in mind, this trope can sometimes be the result of Arc Welding , where a story arc is created retroactively from concepts present in prior, isolated episodes. Some examples of Jumping the Shark and Franchise Original Sin demonstrate the negative aspect of this trope (minus creators' intention) in which an episode or gimmick that at first appears silly but harmless turns out to be an indicator of future problems with the work. Contrast Wham Episode , where the importance of the events to the overarching story is immediately</ made clear. Compare Not So Episodic for when multiple early episodes turn out to be more important than they first seemed. The examples, naturally, contain </

Basically, a place of accommodation that kills its customers and robs their corpses. For unknown reasons, this turns up a lot in French literature/works set in France. Sometimes, to "get more bang for the buck," the proprietors will "serve" their guests as well. One wonders how these places advertise and attract guests/victims,

other than the possible curiosity if rumors of their crimes are publicized. See also Hell Hotel and Inn Security , although in the latter, attacks on guests are generally not by the inn's owners If it is just impossible to leave, and you stay forever, see Lotus-Eater Machine

Index of tropes used to make innuendoes, double entendres , and similar jokes.

The ear drum is a sensory organ within the ear canal, and can be damaged if you stick an object deep enough in it. In addition, there's no direct path from one ear to the other inside the head, even if material could get through the eardrums - rather, the ears hook up to the nose and throat via the Eustachian tubes, though the eardrum is designed to be watertight. In an ideal situation, nothing should pass through the ears and enter the throat! This is not the case in cartoons. In the toon world, the ears are there so sound (or just about anything) can go directly into the brain (or out the other ear if the character has no brain to speak of). Sometimes, the thing that went into the ear ends up visible in the character's eyeballs, as if they were just windows into his head. A variation of this trope does not involve physical objects going</ into the ear, but rather a POV shot of a character's ear showing an unobstructed view through their empty head and out the opposite ear. At least it proves they're not too dense for light to escape them . If a living creature does this to another character's ears, this overlaps with Orifice Invasion . See also Hollow-Sounding Head and Who Even Needs a Brain? . Can occasionally overlap with Disability Immunity and Orifice Invasion Doesn't refer to when things people are saying</ go metaphorically "in one ear and out the other"; that sense would be covered by Comically Missing the Point or Not Listening to Me, Are You? .

You don't realize it. When screaming (even better if it's an Overly Long Scream), yelling, or even sometimes talking normally, your voice suddenly cracks and deepens or squeaks. It can be embarrassing, and for comedy and/or Narm (or probably for Narm Charm), especially if you're also entering puberty at the time. Or maybe just plain too much testosterone This is more likely to happen to male characters, though female characters can also be victims. When it happens in drama (film/TV), it can be a signifier of fear, sadness or any other kind of emotional distress that causes the voice to crack when the person speaks. In music, it's often considered an Epic Fail for singers Can be a result from Vocal Range Exceeded . Could lead to Vocal Dissonance

O listă de articole existene în limba română:

In fictional military settings, the brass tend to be a bit unstable. Frequently they become so obsessed with their own pet projects that they endanger national security. Other times their brazenness and/or paranoia almost leads to wars breaking out between rival superpowers. They may be a Conspiracy Theorist with authority investigating the heroes, an Obstructive Bureaucrat making hell for the heroes, or they may be covering up for their own wrongdoings. These are the ones most likely to send the heroes on a dubious mission. They could be a General Ripper obsessed with the enemy, or they could be cowards who fear public

exposure of their own wrongdoings All this insanity might make their organizations look incompetent, but presumably the Insane Admirals are just the ones we see... 95% of the brass in any given organization are probably decent folk, but spend their time rubber-stamping military contracts and attending state functions, and never do anything 45-minute drama-worthy. Please note this applies only to officers who are at command level, no one below the rank of Naval Captain/Army Colonel/Airforce Group Captain applies here, see The Neidermeyer and Sociopathic Soldier for those The unfortunate combination of Bad Boss and We ARE Struggling Together . General Ripper is a major Subtrope of this. And see also Kicked Upstairs , which is frequently how they end up getting to be Insane Admirals</ instead of insane forty year-old ensigns. For competent brass, see The Brigadier or Reasonable Authority Figure . Senior officers who manage to be both at once fit best under Bunny-Ears Lawyer Note that this trope is a defied trope in Real Life armed forces, especially in democratic countries and particularly in the modern era where it's less likely that mental instability would go unnoticed. Mentally unstable officers jeopardize lives of thousands of soldiers, and pose a heavy risk on the success of the operations themselves. Mentally unstable officers are usually quickly transferred to non-combat positions or forced into early retirement . In fact, citing mental instability is usually the only legal way for their subordinates to remove a superior officer, specifically because it's so dangerous. None of this necessarily has an impact on competence</ of the armed forces, of course, which is a different matter

A weird mutant kind of ad that tends to turn up in lesser time slots, wherein the proprietor of a discount retail outlet yells about how he's gone completely mad</, and that his insanity is manifesting itself as his selling his wares at prices so unprofitably low that only a lunatic</ would set them. No doubt because of the owner's deranged price-slashing, many of these stores seem to be perpetually on the verge of going out of business, holding innumerable closing down sales where "everything must go!!!". They also often refer to the owner's mental state right in the name of the store, e.g. Crazy Larry's Carpet Emporium. In a variant, the "boss" is out of town and the underlings are the ones indulging in this madness — but buy quick before he realizes what's going on and comes back! Arguably originated by the consumer electronics chain that existed in the Northeastern United States from 1971 to 1989. It was famous for the fast-talking, near-frothing announcer Jerry Carroll (contrary to popular belief, not Crazy Eddie himself) who, clad in turtleneck and sports jacket, would stick his face into the camera and spread his arms wide to give the company's trademark slogan, "Hey-heh-heh-heh hey, it's Ca-raaazy Eddie! His prices are IN-SA-A-A-A-A-ANE!" Of course ol' Eddie himself might have been inspired by Often seen in the kind of Kitschy Local Commercial that Honest John's Dealership uses. May be the explanation why We Buy Anything and We Sell Everything .

Insane Troll Logic is the kind of logic that just can't be argued with because it's so demented, so lost in its own insanity, that any attempts to make it rational would make it more . It is logic failure that crosses over into parody or Poe's Law . A character thinks in such a blatantly illogical manner that it has</ to be deliberate on the part of the writer. For examples of Insane Troll Logic by video

game developers, see You Can't Get Ye Flask , Moon Logic Puzzle , and (extreme examples of) Guide Dang It! . For examples of characters who engage in this, see The Ditz , Cloudcuckoolander , Straw men , Moral Guardians , and of course trolls of both internet and mythological origin. A character will tend to use this when he thinks he is smarter than he really is . See also Bat Deduction (when the Insane Troll Logic leads to a true conclusion), Right for the Wrong Reasons (same), Blue-and-Orange Morality (when the troll logic stems from an otherworldly bizarre moral compass), and Reality Is Out to Lunch (when reality actually follows the troll logic). Irrational Hatred may have this as its basis, and Chewbacca Defense is literally built</ of it. And then, sometimes it's just Obfuscating Stupidity or Obfuscating Insanity in action. No relation to Insane Clown Posse … for the most part . Remember that not all bad or faulty logic is Insane Troll Logic. Insane Troll Logic is so badly screwed up that — usually either the presenter or the audience have no grasp of even the concept where the "logic" should apply. A character consumed by this trope tends to say things along the lines of "Because I say it is!" or "You're a liar!" (Note that, in order to qualify for this trope, some reasoning must be provided; for example, "He likes sweets, thus he is a Nazi" on its own probably doesn't qualify for this trope, but "He likes sweets, thus, he likes Danishes, and if he likes Danishes, he must be a German, and as we know, all Germans are Nazis" probably does, since it provides more "logic" and context. The latter is otherwise known as the Fallacy of Composition .) Warning: trying to understand the following trains of logic may make your brain hurt . No Real Life Examples, Please! Disagreements may cause flame wars. Those very flame wars will happen on this website if started, therefore TV Tropes ' servers might catch on fire and may get damaged, and spread to the rest of the internet via gravity. It's physics. These flame wars will be the depth of the Internet — not DEATH, but they are similar concepts because they're similarly pronounced. Furthermore, many computers are connected to those servers and they might catch on fire, too. Ergo, fire is bad. So, remember to always douse your computer with water when under a disagreement. Seriously, though — no real-life examples . Not to be confused with Violation of Common Sense .

This website is ruining your life ? PREPOSTEROUS! If it could ruin your life, you would look like the ancient Roman city of Pompeii! Do you look like the ancient Roman city of Pompeii? Of course not! So technically it can't ruin your life.

This is an affirmative defense in which it is claimed that the defendant in a criminal trial is or was unable to understand the nature or unlawfulness of their actions due to a mental defect or disorder, and thus not responsible for the consequences of those actions. "Insanity" here is a legal term, not a medical one, and the court decides whether it applies — though it will take the advice of medical professionals into account. (It's worth noting that having a mental illness, even a serious one, does not necessarily make an insanity defense valid; the dividing line is whether the person was able to understand that what they were doing is wrong. If they were, then they're legally sane regardless of their greater mental health status.) While the use of insanity as a defense has been known since ancient times, it was codified in English law by the ruling in R. v M'Naghten</ in 1843, which were adopted shortly thereafter in other common-law jurisdictions (including the United States). Most countries in the modern world have some variation

of the insanity defense available to criminal defendants. Some jurisdictions instead have "Guilty But Insane," where insanity cannot be a complete defense, but can be a mitigating factor. In Real Life , the insanity plea is rare and difficult to succeed with. It is also a risky gamble, since it is an affirmative defense that requires the defendant to concede culpability in the crime in question and places the burden of proof on the defense to prove beyond a reasonable doubt that their client was insane. Perhaps one percent of criminal cases even attempt an insanity defense, and only about a quarter of those are accepted, primarily if the defendant already has a history of mental illness. Furthermore, it requires expert testimony from a reputable psychiatric authority that the defendant was insane at the time they committed the crime</ , not just insane in general. Naturally, since the insanity defense is dramatic, it is used much more often in fiction. A variant is "Temporary Insanity," in which the defendant is claimed to have been suffering from an "irresistible impulse" during the crime, but is now sane. Thus, they can be released immediately, rather than being incarcerated for psychiatric treatment. This defense was first used in the United States by U.S. Congressman Daniel Sickles of New York in 1859, after murdering his wife's lover . It was most prevalent as a defense during the 1940s and '50s. Most states do not allow this defense today. Along similar lines, the "Extreme Emotional Disturbance" defense argues mitigating factors compromised the defendant's ability to think rationally. For instance, a man who shot his wife after catching her in bed with her lover could argue his emotional state at the time makes him guilty of the lesser crime of Manslaughter and not 2nd degree Murder. Since someone who has been declared "Not Guilty By Reason of Insanity" is incarcerated for psychiatric treatment until they are deemed to be no longer a threat to themselves or others, this can result in a longer loss of freedom than a normal jail sentence would have caused. Because of this, a defendant has the right to insist that this defense not be used in their case. This has not stopped some defendants — both in fiction and in Real Life — going for this defense under the mistaken belief that a plea of 'insanity' means a cushier time than a regular jail sentence. Also, in some jurisdictions, such as the District of Columbia, a person found not guilty of a sex crime solely by reason of insanity or diminished capacity must register as a sex offender, as though that person had been convicted. A Catch-22 Dilemma takes place with many juries: if the defendant is capable of understanding that an insanity plea would be a good idea, then perhaps they're not legally insane (as insane people typically don't know they're insane — note emphasis on typically</, since some actually do know</ there's something wrong with them). This is in fact closely related to the original Catch-22 </ ; the dilemma discussed in that book that a serviceman who requests a discharge for insanity must be sane enough to think to do so, in which case he is refused one. Another use of this trope common in fiction is for a floundering Amoral Attorney to switch to an insanity defense as a last resort, ignoring the real-life procedural steps needed for this action. It almost never works, just emphasizing how doomed the client is. A related concept is fitness to stand trial. This is often confused with the insanity defense, particularly since they often apply to the same people, but fitness to stand trial says nothing about their mental state when they did the crime. It's about whether their current mental state allows them to understand the charges against them and conduct an appropriate defense. For example, a defendant who was clearly

responsible for the crime he committed, but while awaiting trial suffers brain damage from a suicide attempt and becomes unfit to stand trial. Rather than going to jail, he's sent to a care facility. Should he ever recover enough to be declared fit, he will stand trial. Another concept related to insanity, although rarely seen in media, is diminished capacity. Diminished capacity is a claim that the defendant was unable to form the mental state (intent, recklessness, negligence, etc.) required for their action to be a crime. Because diminished capacity is not an affirmative defense, but rather the negation of an element of the crime, the burden of proof remains on the prosecution. Additionally, a successful diminished capacity defense results in a verdict of "not guilty", rather than "not guilty by reason of insanity", so the defendant is not incarcerated for psychiatric treatment (unless the state begins civil commitment proceedings). As a result, diminished capacity tends to be preferred to the insanity defense in jurisdictions in which it is allowed (although the two can be, and often are, combined). In the United States, neither psychopathy or a personality disorder is generally accepted as grounds for an insanity plea, and most states will simply throw the perpetrator in jail like any other criminal if that is their mental illness, since though such persons may have the adequate Lack of Empathy that you can say they don't appreciate the moral</ reasons for why their crimes were wrong, in general they still understood that they were breaking the law, and having pathological justifications for doing so isn't good enough. However, other countries, such as the United Kingdom, do accept these as valid grounds, and many notorious British serial killers are locked up in mental institutions whereas in America they would be imprisoned for life or sentenced to death. Such British prisoners, however, are usually not expected to ever be released and most of their appeals fail. In fiction, many cases of the insanity defense are often based on personality disorders, even if they are American.

In Tokyo Babylon </ , Subaru encounters a woman who is trying to summon a dog spirit to kill the man who murdered her young daughter, since he had been deemed too insane to stand trial. She plans on using the insanity defense for herself afterwards, figuring that a judge would see the "attempted" ritual as proof that she had lost her mind before killing the man herself.

The DCU </ : In Aladdin </ , when Princess Jasmine disguised as a commoner accidentally steals an apple, Aladdin saves her from getting her hand chopped off by claiming she's his sister and insane. Jasmine quickly plays along. In Anatomy of a Murder </ , the defense's entire argument rests entirely on the "irresistible impulse" insanity defense. Primal Fear</, as with the Film of the Book above, has an accused murderer's attorney discover his client has multiple personalities, and that one of them is the actual killer. The judge dismisses the case and orders him committed to a mental institution until he's cured. In the sequels, he manages to fool his doctors into thinking he's cured and get out — where he kills again. The Oak Ridge Boys, "Don't Break the Code." A man finds his wife in bed with another man and kills them both.

The eponymous tabard is a fake, created as physical therapy in the asylum, and used as bait to trap the villain. Oh, and the revenge thing didn't turn out so well, not being satisfying at all Addressed in at least two editions of Champions </, thanks to Hero author Steven Long also being a practicing attorney. Game-world

legal precedents have established that dressing up in a silly costume does not</ count as insanity, and neither does committing bizarre crimes. The villain Foxbat, who genuinely believes that he is a character in a comic book, is listed as an example of someone who could</ use the insanity defense

Phoenix Wright: Ace Attorney </ had an Amoral Attorney pressure his client into using an insanity defense. It worked, but the defendant's life was ruined as a result, when he could have been found Not Guilty because he hadn't committed the crime. So he killed the attorney fifteen years later.

Saturday Morning Breakfast Cereal </ :

In the Futurama </ episode "Insane in the Mainframe", Simple Country Lawyer Hyperchicken uses the insanity defense in favor of Fry and Bender, and offers as proof the fact that "they done hired me as their lawyer." What then happens is that they're put in the mental institution, similar to what would have happened now if they weren't found "Guilty but Insane". Note that this in a country where being poor has recently been classified as a mental illness.

Sometimes, it's considered a mark of good Worldbuilding in the Science Fiction genre to develop an alien culture like you would any aspect of the story. To talk about their history, culture, motivations and character Other times, writers find it best to leave these questions for the ages The aliens are simply there. Any attempts at communication are met with silence. Their origins, motives, and plans are all mysterious. Nothing is known about their society and culture. Their actions come across as bizarre, incomprehensible, and frequently terrifying. Your best bet is to stay far, far away from them and not do anything to attract their attention, because the consequences of even being in their way are frequently horrific, let alone</ when they have noticed you This trope is common in invasion literature and Horror , in order to add to the "other-ness" of the aliens Often the aliens in question are Starfish Aliens and may speak a Starfish Language . Given most are malignant invaders, many times they're Planet Looters . While they are not required to be Eldritch Abominations , per se, they usually wind up in this territory Please</ don't confuse this trope with Inscrutable Oriental

You've got Humanoid Aliens , and you've got Starfish Aliens . Somewhere in between are the Insectoid Aliens: aliens modeled after Earth arthropods Often, inspiration for this trope comes from "eusocial insects," including many species in the order Hymenoptera (ants, bees, and wasps) and insects in the infraorder Isoptera (termites), who are able to create societies with caste systems and complex habitats similar to that of human cities. Thus often these aliens will invoke Hive Mind , Bee People , Horde of Alien Locusts and a philosophy of We Have Reserves , Zerg Rush and Attack! Attack! Attack! Insectoid Aliens not based on eusocial insects also exist, and are much more likely to be individualistic or live in smaller societies. In cases where the eusocial insectoids are portrayed as The Empire , these may be more peaceful and perhaps form La Résistance . They may also be In Harmony with Nature , in contrast to the eusocial insectoid empire who

feel a constant drive to expand. Alternatively, the eusocial insectoids may be portrayed more positively , in which case the individualist insectoids may instead be monstrous and animalistic or Always Chaotic Evil Due to What Measure Is a Non-Cute? (and arthropods are specifically known to provoke fear in humans) such aliens are likely to be Always Chaotic Evil , though exceptions do exist. Overlaps with Big Creepy-Crawlies , though this trope deals specifically with extraterrestrial bugs. The Xenomorph Xerox also owes a lot to this trope. A Bug War will often (although not always) feature opponents that actually look like bugs

A form of Heroic Self-Deprecation where a character thinks they're not good enough for their Love Interest . They may think this while they're actually in a relationship with said person (in which case they may break it off "for the other person's good"), or they may avoid pursuing them in the first place Related to I Want My Beloved to Be Happy . Also compare I Can't Believe a Guy Like You Would Notice Me . If this causes a breakup, they may say It's Not You, It's Me (and really mean it). May result in an Imaginary Love Triangle

If any facility has a security system, it will always be less secure and cooler looking than its real world counterpart. All sensor systems must be visually engaging , all traps must have a bypass that relies on pure pluck and guile. Lock-down sequences will require doors to close in sequential order , as opposed to all at the same time Some specific elements of the Insecurity System are defined below. Mix and match for an interesting infiltration The system need not be high tech in nature. Old-school temples and ruins can have implausible mechanical or mystical devices that serve the same function The real-world versions of several of these elements, and the Hollywood methods of defeating them, have been tested by the Mythbusters , frequently with surprising results

An In-Series Nickname is not a Fan Nickname , although it can frequently be used as such. Instead, it is a nickname specifically given in-series, not even by the producers alone. It is always regarded as canon. Often given out by The Nicknamer . If done enough this may overlap with Accidental Misnaming or Only Known by Their Nickname Super-Trope for Affectionate Nickname , Embarrassing Nickname , Home Town Nickname , and Red Baron (aka Badass Nickname)

This is where a tank is on the battlefield and the main protagonists have either used up all their anti-tank weapons or never had any to begin with You run up to the tank (hopefully nobody sees you), jump on, kill the guy looking out of the hatch or open the hatch (it's never locked — just in case the crew does need to get out fast</) and then toss down a few grenades before jumping clear of the resulting explosion . Often that last part of the plan doesn't work, making it a Heroic Sacrifice . Given that tank armor is usually tougher than grenade explosions, the effect is usually to reduce the crew inside to the consistency of chunky salsa Should be noted that this was more or less the original use of the Molotov Cocktail . In that case, though, you threw them onto the back deck in the hope that the burning gasoline

would enter the engine compartment through the air intakes Fact of the matter is that second-generation (produced in the 1970-80s) 'main battle tanks' can't be damaged from the outside by anything other than dedicated anti-tank weaponry, and earlier medium- and heavy-tanks could only be disabled or damaged by improvised weapons. Less heavily-armoured vehicles such as light tanks and armoured transports are, however, still vulnerable. For blowing up organic enemies in a similar fashion, see Feed It a Bomb

This is a relatively new branch of Science Fiction that deals with the aspects of people being either partially or completely attached to, and part of, a computer system. Virtual Reality taken to the next step, or, perhaps, Virtual Reality as</ reality. Being partially attached means that you "jack in" or otherwise connect, and you then experience whatever the computer system shows you, typically providing audio and visual quality at the maximum of human perception. It might go further and give you taste, touch, smell and more, or as Dennis Miller once put it, "You know, folks, the day an unemployed ironworker can lie in his BarcaLounger with a Foster's in one hand and a channel flicker in the other and fork supermodel Claudia Schiffer for $19.95, it's gonna make crack look like Sanka." Sanka is a brand of instant decaffeinated coffee. (More than one sci-fi story has this happen: Humanity dies out because everyone is so busy that there's no-one left to make any actual babies.) If you're completely attached, either your consciousness has been transferred into the system and you no longer have a "real body" outside of the system (or at least, your uploaded consciousness is no longer bound to it), or you are "stuck in a pod" and are connected to it. You may or may not know you're within a computer system. Then there's sending the whole person in there, body and mind, which is Body Uploading . Although there is some overlap between the two concepts, this differs from Cyberspace in that when you're Inside a Computer System, it may be completely self-contained and have no connection to the outside world. You might also be alone in there. Cyberspace implies a connection between the computer system and the real world, and has multiple people connected to it. The Matrix </ fits both definitions. To make things easier on the audience (not to mention, where relevant, special effects budgets) the computer environment is generally depicted as being very similar to the physical world; i.e., people still look like people, they still have a "body" and a "location" and they obey most of the laws of "physics", etc. These rules are almost always tampered with (e.g., defying gravity in The Matrix), but the fundamentals are mostly the same (e.g., Matrix-people have only 4 limbs). However, being within a computer sysyem means most of the "rules" of so-call "hard" science fiction (e.g. traveling distances requires use of a a device, typical rules of physics are applicable, you have to eat and drink to live, etc.) go right out the window. You can teleport yourself by just thinking about it, fly like a bird, be the size of a fly (and thus be a literal "fly on the wall" listening to someone else's conversation), make surreptitious audio and/or video recordings without a camera or recorder, etc., and the work can still qualify as hard science fiction since all events that happened there were virtual and do not occur in the "real" world. The real</ Deep-Immersion Gaming . If the user thinks it's real, it becomes a Lotus-Eater Machine . See also The Most Dangerous Video Game , where what happens in a game can have deadly consequences, and Win to Exit , when the characters must compete to get out of a game.

An inside job is a crime, usually larceny, robbery, or embezzlement, committed by a person or persons in a position of trust who is authorized to access a location or procedure with little or no supervision, e.g., a key employee or manager. The perpetrator can also be a former employee who still has specialized knowledge necessary to facilitate the crime Pulling off The Caper can be quite difficult even for an expert criminal. Guards can have unpredictable schedules. There are likely to be alarms and other security systems with which they are unfamiliar, or even completely unaware of. And there's always the possibility that they stage a successful break-in, only to discover the MacGuffin has been moved elsewhere All of the above wrinkles are made at least a little smoother when the perpetrator has an insider's knowledge of the target, or even the authority to make changes (to guard schedules, security systems, etc.) to make the target more vulnerable. This perpetrator may be a lone operator pulling off a plan of their own design, the mastermind of a team of crooks, or an " inside man " in the employ of a third-party accomplice or accomplices. If the latter, they may be a willing participant or the victim of blackmail , Mind Control , or some other means of coercion Truth in Television : in Real Life , embezzlement and other theft by employees is one of the top causes of loss in businesses such as retail, outpacing external theft by a wide margin Can overlap with The Mole when the inside man is part of an external criminal organization. Inside jobs are a common method of pulling off The Caper , with the inside man consequently being a member of the Caper Crew Generally unrelated to Outside Man, Inside Man , unless the "inside man" ultimately undergoes the same Heel–Face Turn as the outside man. For the film of the same name, see Inside Man </

That's it. You've had it with the organization you work for. They've made you work too hard , they've grown corrupt , or they've done something morally questionable in pursuit of their goals . You're quitting, but you don't just want to turn in your Two Weeks Notice and walk off the job. You want to let your employers know just how disgusted you are with them. What better way to do that than by walking up to them, tearing off your chevrons, ranking insignias, and other badges of office and throwing said items into their faces? (If you've recently been awarded a Medal for Valor or for some other reason, feel free to rip that off and cast it dramatically to the floor as well. Your employers should get the message.) Alternatively, you could be the leader of a military organization who finds themselves dealing with a lazy or corrupt member. Perhaps that person has become too enthusiastic in their pursuit of the law or has grown to love the violent parts of their job just a little too much . You want to get rid of them, but telling them to get lost isn't enough. You want to send them a message on how disgusted you are, so you summon them to your office, and after a verbal dressing down, you tell them to turn in their badge . Or you just rip the badge right off of them. (Obviously, if they're Ax-Crazy , you'll want to have a lot of bodyguards standing around while you do this.) Alternatively, your employee's dismissal ritual could be a lot more stylized and formal than this, with him or her forced to stand stoically in front of their peers while you strip them of their rank. That done, they turn slowly and head towards the exit while the soundtrack swells defiantly. An Insignia Rip-Off Ritual is often played up for as much drama as can be milked from it, but

just as often, it's played for comedy. In such cases, half of the dismissed employee's shirt might get accidentally ripped up along with the badge. Or the type of things that are ripped off aren't formal "signs of office" like pins or badges, but silly things like hairpieces or lapel flowers. A clown might lose his big rubber nose, for instance, or an accountant his pocket protector. However you decide to perform an Insignia Rip-Off Ritual on your employee, don't expect it to be the last you'll see of them. If they don't join the Other Side, they'll almost always return after a 10-Minute Retirement , either to redeem themselves, or to bring you to justice, take over your organization and perform an Insignia Rip-Off Ritual on you. (That's if you're lucky. If you're unlucky, they'll just wreak bloody vengeance upon you.) An Insignia Rip-Off Ritual might be the starting point for a Humiliation Conga . Expect a Defector from Decadence to perform this if he's particularly fed up with his former group. When done to a military officer by his superiors, expect his sword to be broken . A formalized version of this, known as is used by many of the world's militaries when someone is dismissed in extreme disgrace. Back in the day when military officers purchased their ranks from the crown with hard cash, the money is held in trust by the army and essentially served as a genteel form of bail bond to ensure good behavior; officers who retire honorably would receive their money back in full, while those fired in disgrace would forfeit their money to the army cashier. Just to mention, beforehand the insignias and buttons are removed and re-sewn on with light thread, which explains how they can be removed without tearing the entire jacket. If the ritual also contains the destruction of some issue equipment, such as an officer's sword, that equipment will also be deliberately weakened before the ritual so that it can easily destroyed during it. One of the most common ways this is Played for Laughs is if someone has this done to them when they're fired from a Burger Fool . May overlap with Unprocessed Resignation if done in front of a superior who can interpret the gesture as a resignation, and the superior decides not to follow through on that intent. See also Turn in Your Badge . Also see Smash the Symbol (to which this is a subtrope) and Shameful Strip (similarly humiliating and which goes much further). Contrast Earned Stripes .

Earth? That old dirtball? Who cares about that boring, useless planet crawling with its clueless lifeforms? The opposite of Earth Is the Center of the Universe . Seems, if not the above, the main action is set on another civilized planet, and Earth is either radioactive, lost, forgotten, generally meaningless, or outright nonexistent in the setting of the work. It's not on any cosmic Evil Overlord 's Take Over list, nor is it covered in any Milky Way Geography classes. Double points for throwing in Earth All Along . If the people on Earth think they're the center of the universe , but everyone else thinks they are just an Insignificant Little Blue Planet, then you can probably expect some sort of conflict over this or, at least, a few words about how stupid humans are for thinking that way. Sci-Fi literature tends to employ this trope more often than television and movies. Also a popular theme in Cosmic Horror Story . See also: Earth That Was , Earth That Used to Be Better , and A Long Time Ago, in a Galaxy Far Far Away... . Puny Earthlings usually goes hand-in-hand with this, for obvious reasons. Earth is also no longer the only planet subject to this — compare Pluto Is Expendable . Can provoke Fridge Logic when aliens who plainly evolved in an

environment similar to Earth call it this—as if their homeworlds were any different. No aversions or kinda-sorta subversions here. Take them to Earth Is the Center of the Universe instead.

In Star Trek: The Next Generation </ Riker demanded The Traveler

In Star Trek: ridiculous emotional attachment to a planet they've
In Star Trek: never seen in person

Hey, we aren't "describing" Insistent Terminology, we are "articulating" it! </ A character constantly corrects a word (fine, if you say it's called a term </, then it's called a term </) used in their introduction or any speech that otherwise refers to them, but never seems to stop (all right, keep</) anyone else from using it. Sometimes this is because they could be called something people see as unflattering or a poor choice of words. Occasionally this extends into a species joke , where an alien or funny animal corrects others about some stereotypical aspect. Can also be done with an ethnic joke where the person has to correct others about some stereotypical aspect of nationality. Subtropes to this are as follows: Compare/Contrast with She Is Not My Girlfriend (character insists a romance does not exist, sometimes an overlap when "friend" is substituted), Do Not Call Me "Paul" (character has a name they do not</ wish to be known by), Blatant Lies (character insists to make an affirmation that obviously isn't real), Don't Call Me "Sir" (character insists another not be formal), They Call Me MISTER Tibbs! (character insists another uses a formal/informal title in conversation), You Keep Using That Word (a character corrects or points out another character's repeated word misuse) and It Is Pronounced "Tro-PAY" (character wishes to class up something by "pronouncing it poshly", overlaps if they insist</ on their pronunciation).

During an effort to identify a killer, a traitor, The Mole , or some other unsavory individual, a character specifically raises the possibility of themselves</ being the culprit. They may simply be that intellectually honest, or want to impart to the other characters that no one</ should be considered Beneath Suspicion That said, this isn't an actual confession ; a character who indulges in this trope does not claim that they are</ the culprit, they simply acknowledge that they shouldn't be trusted solely on their word Can show up in Spot the Imposter or Everyone Is a Suspect situations Compare False Confession and Taking the Heat . Contrast The Scapegoat

In media depicting characters in environments requiring protective helmets, such as space or underwater, those helmets will be equipped with lights that illuminate the wearer's face. If you did this in real life, the wearer would most likely find that all they can see is their face reflected in the glass A variation, seen in the few science-fiction media that make some attempt at

scientific accuracy, is to avoid the lights, but also omit the highly reflective metallic coating applied to the visors of real spacesuits. (It should be noted, though, that the reflective visors on real spacesuits are often retracted when not looking the direction of the Sun;) Such scenes would often require contrived lighting. Then again, " contrived lighting " has been a staple of filmmaking for ages Of course, the reason for this is that the makers want us to see the faces of the actors filling those helmets. A lot of body language and emotional cues are carried through facial expressions and reactions, so it helps the audience to be able to see the people in question while they chew the scenery . The same reasoning pops up in reverse in Faceless Goons , where faces are obscured in order to avoid</ humanising the characters Obviously, this is not a problem in literature, since there are no expensive actors or camera scenes involved at all This trope is probably related to the fact that pretty much all spacecraft are evenly illuminated from all sides, regardless of their distance from a star or the possibility of being shadowed by a planet or a bigger ship or whatever. Presumably they all have little lights attached to their outer hull for the same purpose as the helmet lights, though it isn't like there is any Stealth in Space anyway Another possible explanation that is sometimes covered is that the internal illumination is due to reflections from lit instrumentation or Heads-Up Displays that that are hidden from external view. In such cases, it is believable that the inside of the visor also has anti-reflective coatings Related to Helmets Are Hardly Heroic To summarize: In space, nobody can see your face, unless precautions are taken

He's the man. The villain has been vanquished, the innocent protected, the world saved yet again, often at the very last moment. If it had been anyone else, it's the Big Damn Heroes moment. Only someone forgot to tell the Big Damn Hero Inspector Oblivious isn't aware he vanquished evil, protected the innocent or saved the world because he's in one of his own . He's doing his own thing not recognizing the screaming coming from the cat-stroking archvillain who waves one fist angrily at the monitor as yet another plan is foiled and yet more minions are carted off to jail (or the morgue). It wouldn't be so bad if it was intentional, if he was facing an adversary worthy of their battle, but the hero is a complete doofus who's proud because he thinks he foiled a scheme to illegally sell fake Girl Scout cookies , ignoring the orbital Death Ray satellite plunging into the villain's volcano headquarters that resulted from Inspector Oblivious's pratfalls, mistakes and cluelessness. And he does it again and again Some days an Evil Overlord just can't catch a break Often a Spanner in the Works . A subtrope of The Fool , and can overlap with Invincible Incompetent and Clueless Detective . See also Accidental Hero , Mistaken for Badass

Occasionally, a creator will share a story on how they came up with the idea for their work. Perhaps they attribute it to a specific event; perhaps they focused on one idea or character and built the story from there. Either way, it's often interesting to learn about Super-Trope to Based on a Dream (if the plot was based on someone's dreams or nightmares), Serendipity Writes the Plot (if

it's inspired by a real-life technical difficulty), Ripped from the Headlines (if it's based on a real-life news story) and Follow the Leader (if someone came up with the idea based on something already popular) Compare Real Life Writes the Plot as well as Reality Subtext . See also Homage and Pastiche for when one work intentionally draws influence from another

One of Hollywood's promotional stock phrases that signals a considerable degree of adaptation modification . It can be applied to a true story as well to a work of fiction. In any case, it means that the source material has significantly altered. At least it will still be discernible, though you may have to squint a little The phrase can come up in connection with a Dramatization or anything Very Loosely Based on a True Story For similar stock phrases that more or less indicate the same degree of adaptation (un)faithfulness, see Suggested by... and Ripped from the Headlines

We all know that in an Alternate History or Alternate Universe , tiny changes (" For Want of a Nail , the shoe was lost...") can lead to massive changes, where everything is different. Or, as it may be, not. Sometimes what's different in the new history is less interesting than what has stayed exactly the same. Consider how a person's DNA is the result of an ovum and one</ of countless spermatozoa competing to get at it. The slightest change in timing by seconds would result in a completely different person; different sex, possibly different personality and different abilities, etc. (i.e., half the difference between fraternal twins). This is hardly ever addressed. An alternate universe could arise where the human race never developed money and society is radically different, but you'll find that you were still born, still live in the same house, and still have that tattered old E.T. doll sitting on the mantlepiece. In an ongoing series, there's generally an element of the production team wanting to get the most out of actors and sets that they've already paid for. In both series and standalone works, the writer may be trying to draw interesting parallels between two different versions of the same character or situation, or to help impress upon the reader how things are different by showing them a familiar figure in slightly different circumstances; Richard Nixon, the Used Car Salesman allows the reader to see how the world is different, rather than Richard Nixon The Person Who Never Existed Because A Different Spermatozoön Fertilized His Mother's Egg. If the new history is the result of Time Travel , it might be possible to explain the non-changes as reality avoiding a Temporal Paradox (by making sure that there's still a time machine and a time traveller to go back and create the new history). Often it isn't. And even when it is, the writer usually doesn't bother . The other possible explanation could be that there is some form of higher power (like God, for example) preventing the timeline from changing too drastically. Another still would be the idea of chaos theory and the butterfly effect as being unpredictable in relation to its consequences. As the saying goes, the more things change, the more they stay the same. Naturally, this could result in a Close-Enough Timeline . (Note that this doesn't really apply to alternate histories where the change was something the protagonists or their parents did or didn't do. You wouldn't expect</ universal change within one generation.) Of course, why does Hitler have to be the only detail history refused to change ? In fanfiction, this is often a result of The Stations of the Canon , where a fanfic still has many of the same relationships,

events, and setpieces happen even when the rest of the story should be well off-track, especially in a Peggy Sue fic. For instance, a story where the protagonist ends up being given a massive powerboost might still have villains throwing the same challenges at them, even when they know they should easily defeat them. See Mirror Character , which this is likely to result in. Compare Ontological Inertia . Could also be a result of You Can't Fight Fate . If we're expected to believe things "just happen" to be the same, a subtrope of Contrived Coincidence . See also Sliding Scale of Alternate History Plausibility and Richard Nixon, the Used Car Salesman . See also Different World, Different Movies .

Judging by television, it would seem that any sufficiently complex computer inevitably becomes sentient. It just happens, automagically, while the builder's back is turned It doesn't matter that we do not yet have a thorough enough understanding of all of the mind's mechanisms to artificially duplicate the thinking process. Just add a handful of memory chips, a bolt of lightning or some of that Imported Alien Phlebotinum and Bingo! It's wakey-wakey for the BFC-2000 A bit more modern take on the trope might involve instructions that unintentionally result in sentience, such as ordering a program to continuously adapt itself. Such adaptations may occur overnight. Then again, they may be in a situation that forces them to Grow Beyond Their Programming . Additional shortcuts may include the assimilation of large bodies of information: the Internet is naturally a popular choice these days, both in fiction and in real life Given that such a being is not man-made, the use of artificial is probably incorrect , but most people won't care The end result of this may vary. Said AI may turn against its creator , or become a Friend to All Living Things . It may develop a human-like personality or remain as cold and emotionless as it was before. What becomes of an intelligence after it becomes sentient is not covered by this trope This is, perhaps surprisingly, one theory amongst real-world researchers in artificial intelligence. Some believe that a necessary prerequisite for machine intelligence is a certain minimum complexity of the system that runs the software (i.e., keep throwing more chips in it until it gets smart). There are a few theorists who think that there is a possibility that, given enough</ complexity, some form of intelligence just might spontaneously develop (this is, of course, an extremely simplified explanation of a vast amount of research in machine intelligence, but still relatively accurate). Companies like IBM are spending buckets of money on pure R&D to develop supercomputers with massive numbers of connections just to test these theories, which makes this closer to Truth in Television than one might expect See also A.I. Is a Crapshoot and Sliding Scale of Robot Intelligence . Of course, you don't want to actually add water (that would be stupid), because there's No Water Proofing In The Future . Subtrope of Creating Life Is Unforeseen . Compare Animating Artifact

Simply put, this is when a work is not about Mecha , but throws one or more in at some point(s) anyway. Why? Because giant robots are cool , duh! Note that perhaps no work absolutely needs mecha, but some works still center around them, especially a Super Robot show. This is when you can throw out the mecha and still have most of the work intact. But it wouldn't be as awesome, right? A Sister Trope to Like That Show, But with Mecha . Other popular condiments for when

authors feel a science fiction or adventure plot is in need of fresh flavor are giant monsters , zombies and ninja .

The nuclear reactor is Going Critical ! Alarms are sounding! Red lights are flashing! There is a giant timer on the wall counting down to the explosion and a filmy voice calling out the number of seconds left! Our hero must hurry! He flips the switch at the last possible second and everything is back to normal, just like that. Wait, everything is 100% fixed? That can't be right, rewind a second. There's steam flying everywhere, pressure meters are off the scale! Look, you can even see the glass cracking! What do you mean, the reactor is perfectly fine? That would be an Instant Cooldown. The Instant Cooldown is the Sister Trope to Critical Existence Failure for reactors or other large explodey things. It means that the reactor is either running at perfect health or it just exploded and there is no middle ground. Security measures can indicate that something is about to go wrong but unless it actually does the device is once again fine. The reality is, all that heat, steam and pressure takes time—days, at least—to dissipate and must be continually monitored, even under a normal, non-emergency shutdown. In the wake of an emergency shutdown controlled venting required to bleed off steam pressure might be needed, and the super-high temperature of the steam, as well as to some degree the effects of radioactivity, is enough to partially break it down into oxygen and flammable hydrogen, which also needs to be dissipated. The same idea behind Convection Schmonvection , and very similar to Magic Antidote , but for machines rather than people. The most common aversion is when the overload/reaction/catastrophe is "too far gone" for a shutdown to stop it, which is a different kind of Hollywood Science . A Sub-Trope of Just in Time . Return from Witch Mountain this scenario - the reactor is in the red zone (and the scientists have been saying for a while that it's almost at the point of no return); Tia mentally tries to fix the coolant system in a struggle with Tony (the needle wavers back and forth within the last quarter of the red zone), then Tia wins and the needle retreats into orange, yellow...(about 3 seconds of screen time) and the camera cuts away. It's not shown again but it's clear that things are back to normal (and even pulling up parts of the reactor room and crashing them together so that they explode doesn't disturb the reactor subsequently).

Star Trek

Played straight in Metroid Fusion </ , after Samus reactivates the Main Boiler cooling unit, everything returns instantly back to normal.

Nicely averted in Analogue: A Hate Story </. Shutting down the Mugunghwa</ 's failing reactor does prevent it from going critical, but still leaves a dangerous amount of built-up heat to deal with. This is ultimately solved by venting the ship's atmosphere into space as a crude heat sink.

In Ben 10 </ episode "Side Effects", Clancy tries to make a nuclear plant explode to wipe out the city. Grandpa Tennyson says that the reaction has gone too far to shut anything down normally. Heatblast, suffering from a cold, provides the "instant cooldown" to the reactor itself, and the rest of the plant dutifully follows.

If only it worked like that in real-world nuclear reactors. In real

life, a shutdown (known in the United States as a SCRAM) is largely a matter of turning an immediate and overwhelming problem into a big-but-manageable problem spread out over time. Even after shut-down, nuclear fuel still releases due to short-lived radioisotopes left over from the original chain reaction decaying, releasing radioactivity and heat</ . This heat must be removed or else it will cause a meltdown. In fact, about half of a nuclear reactor's safety features are just there to allow decay heat to be vented away. Decay heat piling up after a cooling system failure was the main cause of the Three Mile Island accident and the Fukushima disaster.

There seems to be a trend in Hollywood. If a scene is falling flat, add someone choking. But the Heimlich maneuver is boring and overplayed (and honestly just looks ridiculous). Wait, I know! He's not really choking, he's suffocating! And that means, instead of the boring, vaguely erotic reach-around of the Heimlich, our heroes get to slice someone open Sometimes this is used to establish that a character has medical training. Sometimes a note of drama is added because the character performing the techniques does not</ have the training, but usually he's being talked through it by someone who does. Like other Hollywood medical techniques , this often goes smoothly and without complications...even when performed by non-doctors On TV and in movies, this procedure commonly consists of stabbing someone in the throat using a ball-point pen with the ink tube removed. In real life, it would be quite difficult to use an empty pen to break through the skin and internal tissues all the way through to the airway, and you can't just jam it in anywhere. , and only one out of ten participants was actually able to get the pen in the right spot and deep enough; it should be noted that this also took over five minutes, more than long enough for someone to suffocate. But if you know where to aim, and use a knife to make an incision first, a pen can indeed act as an improvised breathing tube Supposedly, this has led to idiots trying this on people who collapse for reasons that have nothing to do with breathing. This is obviously something you do not want to do without the kind of training that results in a medical doctorate degree. A procedure as drastic as a tracheotomy should only be used as a last resort, since it basically boils down to slitting someone's throat , which can obviously make things worse if performed incorrectly. If it's at all possible, you shouldn't do this until after you've called an ambulance and are sure that it's an appropriate measure to take It's worth noting that in most cases, what the characters perform is not actually a tracheotomy but a cricothyrotomy Not to be confused with an Impromptu Tracheotomy , which is stabbing someone's neck as an attack

A character is considered so awesome that not only do they have notable admirers, but their fans become so organized that they are also the character's personal assistants, chauffeurs, and army. They will follow their idol 24/7, always available whenever there is need, but otherwise politely remaining just off-screen If the character is sufficiently cool this may happen practically overnight (i.e., within a few episodes of them being introduced), although the subject of admiration typically has mixed feelings about the entire affair If an ojou or an Alpha Bitch has one, these are typically her minions (and may form a Girl Posse). This points

out a major feature of the fan club; they don't necessarily have to be close friends, and the idol may not even like them Note that this is in fact an aspect of Japanese culture — fan clubs of this type can and do form spontaneously around particularly popular and/or successful students in Japanese high schools. Contrast The Paid-For Harem Not to be confused with producing a Paper Fan of Doom from Hammerspace , or the actual fan club of the same name started by They Might Be Giants

In any visual work where a body of water is suddenly afflicted by something, be it a toxic shock, electricity, or even farts , frequently expect lots of dead fish to suddenly pop up on the surface as a display of its potency. If the character in question is hungry, this may be a way to find food. Almost always Played for Laughs . Otherwise, it usually serves as an expression of the power of whatever happened to the water Compare That Poor Plant . Canary in a Coal Mine could be seen as a more serious counterpart to this trope. Electrified Bathtub is a common way for this to happen. When used for comedy, this trope is usually facilitated by No Cartoon Fish Not related to killing someone with </ a fish , instantly or otherwise. That's Shamu Fu

A character orders something (that they will likely end hurting themselves with) and places the order in the mailbox/calls it in/whatever you can think of. The ordered goods will be delivered within seconds. At its extreme, the character places their order form in the mail box, closes it, and then opens the mailbox again to pull out what they ordered, without any postal carrier even touching it Please do not confuse this with Express Delivery or any other childbirth-related trope. May be an Acceptable Break from Reality in a Video Game

In modern fiction, characters will post embarrassing videos of each other on YouTube (or something eerily similar). This functions just like public humiliation, but instead of just their friends and family, it's everyone in the entire world. For such a young medium (YouTube was founded in 2005), this trope has acclimated rather well There's no closing the floodgates once word of mouth (or, more likely, word of Facebook and Reddit) starts travelling. Typically, the video will become a viral sensation, getting millions of views in a manner of days. Although not as common as depicted in the media, it is Truth in Television . It is part of an Internet Safety Aesop since you should be careful about what you post online Compare Engineered Public Confession , Instant Web Hit , Embarrassing Ad Gig , and Stupid Statement Dance Mix . May tie in with Social Media Is Bad and Cyberbullying

The ability of Action Heroes , swashbucklers and suchlike to make a rope , whip , chain or Grappling-Hook Pistol wrap itself around a distant object securely. Used to achieve a Building Swing or to instantly tie up an enemy. While this is certainly possible with luck (and, preferably, a weight or hook on the end), you wouldn't want to stake your life on it. Particularly notable when someone has a chain as a weapon. It's rare you'll see them actually beating anyone to a pulp with it, as happens in real life — they'll do this instead. Also, a character wielding a whip will usually tie up an enemy with this technique, rather than actually whipping anyone with it. Often with this trope, the rope or whip that was just

used to swing across a chasm will instantly and easily come undone once the hero is safely on the other side so he or she can retrieve it. Essentially, this is using an ordinary object as if it were a Grappling-Hook Pistol . If wrapped around the object enough, this becomes Truth in Television . This is due to

Subtrope of Clingy Aquatic Life . Whenever a character accidentally falls into a body of water, especially a stagnant one such as a swamp or pond, expect them to come up and discover a leech - or more - attached to them somewhere. This is usually followed by an ear-splitting scream . Often Played for Laughs , but can be used to induce Squick in the viewer or show the harsh reality of the work's setting, particularly as a subversion of Cool, Clear Water or Skinny Dipping Incidentally, should you ever act out this trope and discover a leech attached to you, do not</ rip it off, squeeze it, salt it, burn it, or otherwise disrupt it like these characters may do — it will vomit harmful bacteria into your open wound if you do. Instead, gently but quickly peel it off with a sharp object or your fingernail directly where its sucker is attached to you (or just let it drink its fill and drop off harmlessly). For future reference

Sometimes the karmic baggage of a daring assertion or Blatant Lie is so heavy that the universe feels obliged to immediately expose said untruth by external circumstances A form of Hypocritical Humor . May result in an attempt of Verbal Backspace , Last-Second Word Swap or Implausible Deniability

Warcraft III </ : Star Fleet Battles </ . In emergencies, starship crew units can be converted into militia (a weaker version of boarding parties) for combat purposes.

Alice gets home after a long day. Just as she makes herself comfortable, the doorbell rings. Suddenly the scene jumps to Bob and Claire, who are talking about how they haven't seen Alice this morning. Suddenly the audience realizes that it's the next morning, and we never found out who was at the door. Will Bob and Claire now have to investigate Alice's murder? Or is it all a Red Herring ? Often part of a Cold Opening or used as a way of setting up a case of Not Quite Dead . This has become almost a staple of murder mysteries, especially in Live-Action TV shows like Diagnosis: Murder </ and Monk </ .

Someone's body is reduced to powder, then reconstituted. Comes in two types: living-to-living and dead-to-living Living-to-living is usually Phlebotinum-based , and may be described as dehydrating the body or reducing it to its "basic elements." It's technically a form of suspended animation . Dehydrated storage on a large scale (a.k.a. "instant Mooks , just add water") is a usually-comic sub-subtype Dead-to-living is usually magic-based, and often uses ashen remains Because powder is easily scattered and easily mixed, damage to the reduced body is an implicit possibility, and

may result in Came Back Wrong . Sometimes (particularly when the method is given as "dehydration"), compact, friable solids are used instead, and the danger is that they will be crushed See also: Fossil Revival , No Body Left Behind , People Jars , Pulling Themselves Together , Taken for Granite . Sometimes, sea monkeys are like this

A character is drugged and goes out like a light in just a few seconds. Just as often, they wake up in short order, groggy but otherwise none the worse for the experience. Delivery methods can vary, from gas , to darts , to controlled injection, to a liquid added to food or drink . The ranged attack version is effectively a subtrope of Stun Gun This is Artistic License – Medicine in the extreme. In Real Life , drugs can take anywhere from a few seconds (as with inhaled sedatives and anesthetics used in surgery) to several minutes (as with intramuscular injections of many animal tranquilizers, as frequently observed in wildlife documentaries) to several hours (as with sedatives that are administered in food or drink) to take full effect. Similarly, dosage matters; the amount required to sedate a muscular man or a large animal would kill a smaller person, and a dose safe for a normal person might barely faze The Big Guy . There is a reason why surgeries requiring full general anesthesia have an anesthetist there whose entire job</ is to monitor the type and amount of drugs going into the patient. For a full treatment of these and other issues, see the Analysis page If a drug is administered to several people at once, all of whom get knocked out immediately, then this trope overlaps with One Dose Fits All . Knockout Gas is an area-effect variant subtrope, which is subject to different, but related rules. Tranquilizer Dart and Futuristic Jet Injector are common delivery methods, as well, often in a Knockout Ambush . Compare Magic Antidote , Stun Guns , Tap on the Head , and Slipping a Mickey . Not to be confused with Instant Seduction

A common outcome of a Crash-Into Hello involves both parties lying on the floor stacked one on top of the other, in the same position they'd be in if they were extremely passionate about one another. Almost always leads to a Not What It Looks Like moment. After a beat, the two will instantly teleport to a seiza</ (sitting on knees) position, facing away from one another and blushing furiously . If they can talk to one another, they'll either stammer furiously, or one will berate the other. See also Suggestive Collision , Accidental Pervert

Less slapstick-oriented works sometimes reference this phenomenon, as when a Deadpan Snarker taunts a male with a high-pitched voice about his Vocal Dissonance , or The Snark Knight narrowly avoids</ a Groin Attack and muses how close he came to playing this trope straight While shrill yelps at the initial injury may be justified , prolonged high-pitched speech is a misconception, based on the false notion that eunuchs' voices are always high-pitched. In actuality, while boys whose testes are lost before puberty will retain a high vocal range into adulthood, a grown man whose voice already changed in adolescence can't lose his masculine tone of speech due to testicular injury: his larynx (voice box) has already grown to a larger size that produces deep sounds, and lack of testosterone won't make it shrink. Castration is not

retroactive Is somewhat</ Truth in Television , as you may hear some wincing and yelping after. But rarely exaggerated to the point of some of these examples Subtrope of Vocal Dissonance . Works that overplay it follow it up with Share the Male Pain . Helium Speech is a non-painful variant. If he's trying to say his Catchphrase while this trope is in play, it's a case of Alternate Catchphrase Inflection Not related to Innocent Soprano , or The Sopranos </, unless the mob is fighting really</ dirty

A character that Really Gets Around wants to get aroused with some content the person likes, so makes a search and get a material to get aroused. Then</ suddenly this character discovers the content is Squick , has Jump Scare or is The Reveal that could be is that it was their parent/sibling/close friend/a robot and if it was someone of the opposite gender to what they thought it was, then it most likely crossovers with Unsettling Gender Reveal . Or even it's something the character dislikes or hates. The case is the content becomes more than just a Fetish Retardant , the character becomes so horrified with the content that stops with their actions, and in many cases, it has to go to therapy. In other cases, the character only turns off and get away from the situation or the scene he/she is involved with Sub-Trope of Moment Killer . A Date with Rosie Palms is involved before knowing the truth behind it. Compare Too Much Information and Squick . Contrast Fetish , where a character intentionally looks for something unusual for arousal. Also contrast in the case the character got aroused with the content, anyway. See also Think Unsexy Thoughts . Related to Fan Disservice

No Real Life Examples, Please!

So you're an assassin who is also a musician. Unfortunately, you cannot kill people with the power of your music alone , and you're not a Musical Assassin . So what are you going to do? Why, have a musical instrument that doubles as a deadly weapon of course. A step up from Senseless Violins , with no danger of your weapon being discovered if anyone opens your case This trope covers weapons hidden in musical instruments. For people that use normal</ instruments as weapons, see Improbable Weapon User (or Improvised Weapon if it is not a usual occurrence). For assassins who kill their targets with music, see Musical Assassin . For weapons used as instruments, see Instrumental Weapon . See Xylophone Gag for instruments rigged to kill the player. Sort of the evil counterpart to Signature Instrument

At first glance, Adam the Insufferable Genius appears to be exactly the type who's doomed to learn An Aesop about humility: he's very talented, he knows</ he's very talented, and he doesn't mind telling you repeatedly what a talented person he is. But the difference between him and your standard-issue loudmouth is that he really </ that good, and when you need someone with his skills to save the day, he always comes through. So you have to concede that at least a little</ of his arrogance is justified — not enough to make you forget that he's got the social skills of a chainsaw , but enough that you can tolerate his ego if that's what it takes to keep him around. Not that he can't ever be hit with An Aesop of some kind. In particular, every Insufferable Genius

constantly runs the risk of humiliation if they ever make a mistake — which they are more or less bound to do eventually, by simple probability theory May overlap with Brilliant, but Lazy . Often easily Enraged by Idiocy . Depending on their overall skill and/or hamminess, they may be an Awesome Ego . May join in a Battle of Wits , if anyone is in the right league. Compare Gentleman Snarker , Tall, Dark, and Snarky , Know-Nothing Know-It-All , Too Clever by Half , Bunny-Ears Lawyer , The Proud Elite . Often leads to the grudging conclusion that Jerkass Has a Point . Contrast with characters that do</ get their Aesop , who may fall quickly or be slowly broken . This character is often given a foil by pairing them with a less intelligent sidekick in a Smart Jerk and Nice Moron pairing. Not often, but they certainly can be an Awesome Ego if their antics are rather entertaining or amusing A lot of the time, in some way or another, the Insufferable Genius' inflated ego is merely a petty facade that compensates for any insecurities or shortcomings, perceived or otherwise. They could also be legitimately delusional and truly believe they're "above" everyone else. Occasionally, they might display a personable and compassionate side of them sometimes along with a deep, dark secret revealing why they're the way they are, in which case they have Big Ego, Hidden Depths . People having the right to boast about themselves doesn't automatically mean there's a reason to do so in such an overt manner, especially if their talents can indeed be backed up. Despite any justification, arrogance is usually indicative of weakness, immaturity, stupidity, poor character and the like; something an Insufferable Genius would be too proud to realize Also contrast with Gentleman and a Scholar (whose intelligence does not prevent him from being gracious, friendly, and polite), Small Name, Big Ego (who thinks he's an Insufferable Genius but is merely Insufferable, if not an Insufferable Imbecile) and Academic Alpha Bitch (who is the high school version of the Insufferable Genius and feels the need to order the school to her specifications). See Kindhearted Simpleton which is the opposite of this trope. Compare Rightly Self-Righteous if it's the character who is morally right despite how condescending they are. Compare also Smug Super , whose ego comes from personal strength instead of intelligence. See Tall Poppy Syndrome for how they're often reacted to

In fiction, sometimes there's an inverse relationship between intelligence and politeness . This is not one of those cases. The Insufferable Imbecile is seen among the lowest of the low of stereotypes. Rude, obnoxious, and limited in intelligence among other things, these are the people who seldom get anywhere in life, but when they do, well, there can be problems . Unlike the Innocently Insensitive , these people are too prideful to accept that they've said or done anything wrong , and/or cling to whatever falsehood they hold as fact . They are exceptionally proud of their ignorance, as well as their (often myriad) conflicts with others, and will view any sort of burned bridge or ruined opportunity as an acceptable loss for "standing up for themselves" or "not taking anyone's shit". Darker examples are very likely extremely violent and aggressive and take similarly great pride in the number of fights they've been in and/or the injuries they've inflicted on others, and are great at finding excuses to justify these acts. Typically the only thing keeping this character from being The Scrappy is the fact that their stupidity makes them too funny to be legitimately

detestable, or they're such awful people that watching them face the consequences of their actions is a reliable source of amusement. The most common archetype for this kind of character, at least in more comedic settings, is that of the schemer . This is a common negative stereotype of Americans . In a Slobs vs. Snobs plot where the Snobs are portrayed sympathetically, the Slobs are usually The Boor. Alternately, the Snobs can be on this site when the Upper-Class Twit trope comes into play. See also Lower-Class Lout , Dumb Jock , and Dumb Muscle , which these may include. A Know-Nothing Know-It-All can be pretty annoying but isn't always this</ bad. Will be frequently seen amongst the foremost types of the Anti-Role Model . In extreme cases, if the Insufferable Imbecile is a villain, they may be Stupid Evil . Contrast Kindhearted Simpleton , Good Is Dumb (including Dumb Is Good), Good Is Not Dumb , Stupid Evil , Evil Genius , and Insufferable Genius . See Enraged by Idiocy for other people's reactions to them. Polar opposite trope to Gentleman and a Scholar Truth in Television , obviously, but No Real Life Examples, Please!

They're in interstellar space, using an FTL drive , but the First Contact team who met up with them can't figure out how or why</ — by all rights they should be stuck on their homeworld because they've barely figured out atomic power, or steel, or starting fire with flint . They're an anomaly. Sometimes it's because they've stolen a technology they don't know how to create themselves. Sometimes a Precursor race gave it to them or left them instructions on how to build it. Sometimes it's a simple fluke. Sometimes it's author's Critical Research Failure or being poorly versed in the concept of the importance of certain scientific discoveries for just about anything , technological prerequisites and Required Secondary Powers Whatever the reason, the result is someone making their way into space far earlier than other civilizations might think possible Contrast with Sufficiently Advanced Alien , naturally, and with Aliens Never Invented the Wheel , where the technology (or cultural trait) the aliens lack is just an oddity, something they always got by without. Sub-Trope to Low Culture, High Tech . This is a very common feature of Space Orcs Compare Humanity Is Advanced

A verbal equivalent of Attack Backfire , this is for when Alice comments on a trait of Bob's in a way that's intended to sound negative — but instead of being insulted, Bob acts flattered.</ Usually, this is because Bob invokes the "insulting" quality intentionally. Less commonly, Bob's The Ditz or has a poor grasp of the word or concept being insulted and take it to be a positive comment. Other times, it's simply a case of Bob having the attitude of pretending that it's not an insult, or even turning it back on her: "Coming from you</, I'll Take That as a Compliment ." A variant is for the character to be insulted, not because they dislike what was said, but because they're obviously</ so much worse than that. Occasionally, the insult backfires because Alice's remarks were insulting on the surface, but Bob carries them to their logical, ultimately complimentary conclusion. These cases typically only work when the original insult was mild and/or non-malicious to begin with. Related to Stealth Insult , but different in that an Insult Backfire is accidental and a Stealth Insult is sent over the target's head on purpose. Sometimes, it seems the only sure way to insult someone is to give them a compliment. Not to be confused with Insult Misfire ,

where the target obliviously doesn't realize the insult was directed at them</. Compare Threat Backfire . Compare and contrast I Take Offense to That Last One! , where there are multiple insults, but the character may only object to one of them. If you phrased your insult poorly ("You fight like my grandma!"), you may get Insult Backfire through Literalist Snarking ("You fought your grandma?"). See also Blunt "Yes" , which is often based on a similar theme. Contrast Compliment Backfire (and Calling Me a Logarithm , when someone thinks a word that's not an insult or even not directed at a person is an insult). See also Insult Friendly Fire .

See also I Take Offense to That Last One! , I Resemble That Remark! , Wrong Insult Offence , Card-Carrying Villain , Tall, Dark, and Snarky and It's What I Do . If the insultee adopts the insult as an actual badge of identity, it becomes an Appropriated Appellation . Compare Geeky Turn-On , I Would Say If I Could Say , Arson, Murder, and Admiration , Blunt "Yes" and Actually Pretty Funny . Sometimes crosses paths with Misaimed Fandom . The complete opposite of Your Approval Fills Me with Shame and Offending the Fool .

Ever since the dawn of humor, people have clung to one simple truth: Other peoples' pain or discomfort is hilarious. Of course, people in a polite society will generally be hesitant to crowd around someone with a horrible, disfiguring physical condition or a debilitating social disorder... at least, not without help Enter the Insult Comic. When someone needs to be humiliated on a large scale, and it would require too much suspension of disbelief to get them to wind up on television or the front page, the Insult Comic can take a large room of people and get them to laugh at the unfortunate target However, most writers are not stand-up comedians, and this trope is more about highlighting the insecurities of a character than providing legitimate jokes. As a result, the Insult Comic will often have the inexplicable ability to make a crowd of people laugh , even when the 'jokes' are delivered in pure insult form and devoid of legitimate humor Compare The Heckler and The Roast . See also Actually Pretty Funny and Too Funny to Be Evil , for more ways insulting remarks can be made amusing

Alice, Bob and Charlie are chatting together, and Charlie viciously launches an insult at Bob; but Bob, Master of Missing the Point , fires back, "I won't let you insult Alice like that!" Occasionally this will take an alternate form where Bob hasn't missed the point at all but is deliberately misinterpreting the insult as a form of snark . Not to be confused with Insult Backfire . Compare Insult Friendly Fire , Wrong Insult Offence , Insult to Rocks .

Insurance is a method of sharing the risk of loss between a large number of people. When someone suffers a loss, they are reimbursed by their insurance, paid for from the premiums of all the insureds who didn't suffer a loss. While it may seem that the lossee has "hit the jackpot" in that they're the only one who have got more out of their insurance than they put in, the principle of indemnity dictates that they are reimbursed only the value of their loss. Ideally, insurance pays to get you exactly back where you started, no more, no less. Of course, people looking for a quick buck have tried all kinds of schemes to try and make a profit off insurance. A number of different

techniques include: A common plot involves characters attempting to pull off an insurance fraud and either succeeding or having to deal with the consequences of being found out. Alternatively, the insurance company may be depicted as doing its best to prove a claim false, even going so far as to plant evidence, in order to void the policy. Needless to say, Truth in Television , and a subtrope of White-Collar Crime and The Con . Try to keep Real Life cases to the more unusual ones.

The phenomenon, found in countless video games, in which a seemingly trivial obstacle — such as a Locked Door — cannot be circumvented or removed with brute force, no matter how powerful the player character(s) is/are . This is more jarring when the obstacle in question does not mark the edge of the gameworld, but rather serves to force the player into taking a particular path . The basic Insurmountable Waist Height Fence is an obstacle, usually between ankle and chest height, that should be reasonably easy for any able-bodied human to traverse, but the character(s) can't climb or step over simply because the game doesn't include such an action. Other common variations include: The Indestructible Adamantium Door</, a door that only can be opened in cutscenes or by the Master of Unlocking . Bonus points if it looks like it was made from cheap wood 200 years ago — or even worse, is already slightly ajar. Many examples could also be thought of as ordinary, non-insurmountable obstacles combined with Invisible Walls . In fact, that is often how they are implemented in situations where the game can't just forbid the player from jumping, climbing, swimming or doing whatever it is a normal person would do to get by the blockage. A variant on this type of structure is called a Sawtooth</ by game designers; it applies to anywhere that stops the player going back after passing , and is often logical to the point it's hard to notice (a ladder collapses after you climb down, an elevator is disabled by a powercut, etc). Particularly shallow sawteeth are likely to be obvious, jarring, and extremely ridiculous, such as a hallway that only works in one direction. A form of Gameplay and Story Segregation . Compare Solve the Soup Cans , Border Patrol . Contrast Cutting the Knot , Absurdly Ineffective Barricade , and Dungeon Bypass . See also Broken Bridge , Boundareefs and NPC Roadblock . Not to be confused with the one-foot-tall brick wall .

Cousin to invisibility , intangibility refers to a state where a (usually visible) entity cannot interact physically with other matter. Everything just phases through the affected object Those questions you have about how this could possibly work? Don't ask them A truly intangible person would not be able to stay put on the Earth's surface when the planet's own gravity should be constantly drawing him towards the core. How he or she can generate enough friction and mass to remain on the Earth and move around, let alone grip things if the writer is feeling charitable, is also likely to be ignored (occasionally these problems are avoided by also giving the character the ability to fly). Again, don't ask why Asphyxiation is generally not an issue, potential breathing problems due to air passing through lungs are typically ignored outright. If they're stuck in an intangible state for a while, starvation from being unable to pick up food or digest anything usually isn't brought up either. Also, don't expect anyone to know that they shouldn't be able to see</ anything while intangible,

since light would pass straight through their retinas, leaving them unable to create a visual image. You can forget hearing too, air passing though you means nothing registers on the parts of the inner ear that detect sound waves. Also, let's ignore the fact that rendering a part of your body intangible would have the same effect as cutting it off Run those same reasons in reverse, and it becomes clear that a truly intangible person would be incredibly boring</ as he could neither interact with the world nor even be detected by it. Fortunately, these pesky real life physics rules tend to be ignored in-story thanks to Rule of Cool or Hand Waved as some kind of Your Mind Makes It Real effect Although intangible characters will pass right through walls, chairs, tables and such, they'll rarely have any problem properly interacting with floors, stairs or any other structures people are meant to walk upon. They may even be able to ride in or on vehicles, with the odds of success rapidly increasing with size. Anything big enough to walk around inside is quite likely, a ship or spaceship is more or less guaranteed Note that once we've seen someone walk through the character to establish the parameters of their intangibility, people will go out of their way not to walk through them too often as to keep the need for expensive special effects to a minimum. It's usually Hand Waved as being an intensely creepy experience to see a living person's insides up close For a mentor, intangibility is an opportunity. Being a Spirit Advisor or Virtual Ghost lets them accompany the hero into dangerous places without ever being at personal risk The ability to render oneself intangible at will occasionally turns up as a superpower. Sometimes the power can work selectively on the user's body (allowing him to voluntarily interact with objects while intangible) or extend further from the user's body (allowing him to make other objects and people intangible) Heroes use this ability to save their teammates from danger. Anti-heroes and villains use it to put their hands through people's chests and squeeze their hearts . It is frequently a given that while no one else can touch them, two characters separately rendered intangible by the same process will have no problem interacting with each other A sub-trope is Tragic Intangibility , where this ability is used to say something about how lonely or miserable a character is. See also Projected Man , Astral Projection and Super Smoke

As a way to prove one's thieving credentials, the best Impossible Theft is to steal something metaphysical Stealing a name, so that it cannot be spoken. Stealing a reflection from a mirror, so it only reflects the room you're in. Stealing the scent of every rose, as a Valentine's day gift. These thefts are an attempt to steal from the physical laws of the universe It may be considered the inverse to the Sister Trope , Monumental Theft . While a monumental theft describes stealing the moon, it doesn't always deal with the ramifications of gravity on Earth. An Intangible Theft of the moon's gravity would certainly cause tidal problems here on Earth, even if the moon doesn't move. Both tropes are a type of Impossible Theft See also Insubstantial Ingredients , where the ingredients collected are as metaphysical as the items stolen here. They might even overlap! Abstract Eater can ingest what would otherwise be stolen. This is a Super-Trope to Power Parasite , where one character can take away the abilities of other characters and use those power(s) for themselves

The regime has established a tyranny that oppresses people,

or carries out or initiates policies that are tyrannical, or otherwise express a lot of nasty views of Fantastic Racism and so on. Most of the people who support this have to be pure evil, right? Sure some of them are, but it's possible that some or most of them are Just Following Orders , or are being bribed by Better Living Through Evil , are intimidated into submission by fear and reprisal. But surely, no smart person could rationally condone and support such actions. Cue the ultimate Broken Pedestal , the individuals who are smart, who are competent, and even achievers in their profession, supporting an organization, state, or a set of policies that are directly harmful to others. Such individuals both believe and support such policies and even articulate elaborately written justifications that on the face of it, may sound convincing and you might even approve, reluctantly or honestly, that Jerkass Has a Point or Villain Has a Point This trope has historically been very much Truth in Television , despite the general assumption that intellectuals are supposed to be responsible in their social and political opinions. In these cases, the intellectuals themselves can be the ones pulling the levers of power, and genuinely believe that what they are doing is for the greater good . Perhaps paradoxically, other intellectuals are then still likely to be among the targets of their oppression: namely, those independent spirits who disagree</ with the approved ideologies of the regime More sympathetic fictional depictions may show the intellectuals as misguided sympathizers of the Evil Overlord du jour either because they Draco in Leather Pants said Lord for some reason or other, or see them as Byronic Hero and Not Evil, Just Misunderstood , which the villain might even invoke to better manipulate said intellectuals to serve as tools and builders of their Cult of Personality . This is a good variation on Not Brainwashed , and it provides a more nuanced and gray look at such conflicts to better explain why La Résistance is always on the back foot to The Empire . Alternatively, the author may themselves be an anti-intellectual , in which case the intellectuals will be the most ridiculous strawmen imaginable Archetypes that are similar but not exactly this trope include Well-Intentioned Extremist , Mad Scientist , Evil Genius , differing from this trope in that it better fits villains or Villain Protagonist . Intellectually Supported Tyranny are not really main characters but usually supporting players, and where the other archetypes commit evil actions believing them to be good, such figures know fully well that the actions are tyrannical but are both "necessary" and "correct". Given that they tend to reference actual totalitarian governments, dystopian works often have the heroes interacting with this type, who tends to have power in a paradoxically anti-intellectual state . For the good version, where the state is ruled by intellectuals but this is presented as a good thing, see the Philosopher King In real life, all states and systems of government have more or less "official" philosophers, ideologists, and journalists who promulgate and propagate their respective ideologies, and this has demonstrably been so at least as far back as we have written records . Naturally, tyrannies are no exception. However, precisely which historical (or worse, present-day) regimes qualify as "tyrannies" is a matter not everyone is likely to agree on, and debate over the said matter would be overwhelmingly likely to produce more heat than light. Therefore, No Real Life Examples, Please!

Exactly What It Says on the Tin ; this is an index of tropes

pertaining to intelligence and intellectuals Contrast with Anti-Intellectualism and Stupidity Tropes . See also Gambit Index , Indexed and Nerdy , and Logic Tropes . If you are looking for tropes related to "intelligence" in a military context, see Espionage Tropes . Tropes that deal with broad-based knowledge</ may fall under Tropes of Wisdom instead, although there is considerable overlap since expansive knowledge is often used as a way to demonstrate intelligence

A phrase coined by Sci-Fi author Robert J. Sawyer , extraterrestrial races. Take a terrestrial animal, make it anthropomorphic, bipedal, and sapient, but rather than deriving their behavior from humans with the occasional Furry Reminder , instead derive the majority</ of its characterization and culture from the terrestrial animal's behavior. Sawyer's hypothetical/satirical Intelligent Gerbils live in cities powered by erudite individuals running around in big wheels; they take water from tubes coming out of the walls and sleep in piles of cedar chips Could be regarded as the animal version of Rubber-Forehead Aliens , except when the non-human psychology clause of Starfish Aliens kicks in. Distinct from Alien Animals in the sense that they're not literally</ a terrestrial animal, but are obviously inspired by one. Compare Bee People A subtrope of Beast Man , and related to Funny Animal , Civilized Animal , and the Planet of Hats . These mainly rely on Animal Stereotypes but also usually end up looking like Humanoid Aliens , for obvious reasons . For specific varieties, see Cat Folk , Lizard Folk , Fish People , Ursine Aliens , Pig People , ad infinitum Compare Uplifted Animal , which may be used as a Justified version of this. Evolutionary Levels are often implied - apparently if you want sapience, intelligence and organised society, they always come with two arms, two legs and an upright body plan For an interesting analysis and criticism of this trope, see Not to be confused with Resourceful Rodent and other works featuring actual sapient earth-native gerbils (though if you need one of those, talk to Beta and she can help you out)

The reaction from the audience that we suspect the author intended. We can't really know for certain whether it was intended. It may have been, or it may have been that the author was aiming for something completely different and just missed. We can occasionally get a quote in an interview confirming, or at least claiming, that a specific audience reaction was intended, but usually this term is only useful for fans talking to fans. To provide a concrete example, normally, the audience hating a character is unintended by the author. But sometimes, because writers want to achieve Emotional Torque , they create a character who hits known markers for a hated character, in order to (pick one): Not hurt what sympathy the audience may have with his killer.

Describe of Intentional Engrish for Funny to Here. </ This is writing anything in the style of a "Blind Idiot" Translation or Translation Train Wreck , to make it funny, due to the unintentional hilarity of those tropes. Typical " Engrish " is the most popular style, particularly using the infamous opening of Zero Wing </ as a template. Just have fun with improper placing of articles and prepositions, screwing up plural and singular forms, throwing in Blunt Metaphors Trauma terms, or just use the wrong word for what

the sentence calls for. Might be seen on a Shoddy Knockoff Product Often this can be done by doing a deliberate Recursive Translation . A Sub-Trope of Stylistic Suck . Compare Elective Broken Language , Strange-Syntax Speaker ("Engrish" is an intentional part of the character's speaking style). Contrast Purple Prose , Beige Prose .

Interactive fiction games are adventure games in which the interaction is almost entirely text-based. Early games, and games from purist companies like Infocom , were nothing more than bare text, but some later offerings added pictures, sound and limited mouse input (one game, Leather Goddesses of Phobos </, even included plot-relevant scratch-and-sniff cards as Feelies) — but the primary form of interaction was still through descriptive text and typed commands. The genre began with the original adventure game, Colossal Cave </, and really took off in the early 1980s, with offerings such as the Zork </ trilogy and later, more literary works, such as Trinity </ and A Mind Forever Voyaging </. During this period such games were almost universally known as "text adventures". Interactive Fiction is a term originally introduced by the seminal Adventure Game company Infocom to describe its line of more "serious" long-form text adventures back in the Golden Era, and has become the dominant term in the 21st century as the genre became an increasingly specialised market aimed at an increasingly "literary" audience The obvious reason why they were in text form is that was the only means of output available. Original Adventure was written in the programming language FORTRAN and was designed to run on the Mainframes and Minicomputers of the late 1960s and early 1970s. Graphics output wasn't possible because most places had no systems available for on-screen graphics. It was only when computers that could display color graphics became affordable in the early 1980s that the text adventure started to be replaced by various programs that used graphics capability; a few text adventures were remade in graphical form at this time. (In non-English-speaking countries, graphical adventures had far more success in the 1980s than text-only adventures, which were rarely translated and thus posed a formidable language barrier.) Many text adventures were promoted with the concept that the player's imagination was capable of producing far more extravagant and realistic images than were possible on computers of the day. And even when graphical adventure games and RPGs began to appear, text adventures were allowed to be more complex and wide-ranging than the graphical versions due to text taking up far less limited disk space and memory than graphics and sound Interactive Fiction was once the industry standard for long-form narratives now implemented in computer Role Playing Games , but fell out of commercial viability during the late 1980s as text parsers were rapidly displaced by icon-and-menu and Point-and-Click interfaces. Shortly after the major players disappeared from the market, a lively amateur scene sprung up on the Internet, centred around the Interactive Fiction Archive ( ) and the Usenet newsgroups rec.arts.int-fiction and rec.games.int-fiction, thanks to the appearance of good-quality programming tools that have allowed recent amateur efforts to equal or exceed the quality of commercial games from the heyday of the genre. An annual contest sponsored by the community typically draws more than 20 entries per year, and the hobby continues to evolve and improve The Multi-User Dungeon (MUD), the MUCK and the MUSH or Multi User Shared Hallucination are related games with very early

origins, which emphasize the roleplaying aspect of user-generated online environments. The Adventure Game progressed directly from early text-based adventures, and is graphic-intensive but similarly story-oriented. This evolution kicked off by Interactive Fiction (also known as Text Adventure) is what eventually led to the MMORPG Arguably the most modern form of Interactive Fiction is the " Visual Novel " derived from Romance Games , but in general, these stories tend to be much less interactive than the classics were, since they don't have a Text Parser , or even much of an interface. If you're thinking of 3D story-driven adventure games with very little challenge or gameplay, that's Environmental Narrative Game This is a "video" game genre. Contrast Gamebooks , which may be the "tabletop / literary" version, or Interactive Comic , which extends this trope to Webcomics The has its own

In most series, the Narrator rests comfortably beyond the Fourth Wall , able to tell his story in peace The Interactive Narrator isn't so lucky. While this type of narrator exists "off-camera", the characters of the story are fully aware of his narration and are able to interact with him. Author Powers are also not uncommon among these narrators, allowing them to change the entire setting and plot at will Hilarity Ensues if the narrator in question is particularly snarky or critical of the characters' actions . This often results in the narrator arguing with the characters like a sort of Dungeon Master . This extends to comedic examples of disgruntled villains attacking or abducting the narrator and attempting to take his place in order to make life miserable for the heroes This is a subtrope of Medium Awareness

A device that allows travel between dimensions/alternate universes/planes of existence/etc . This device could be anything, from a machine in science fiction to a magical item or spell in fantasy, as long as it allows travel between these dimensions or realities. It could even be a human (or, at the very least, a sentient being), if they have the power to go to these other "places". There may be lots of Fridge Logic involved, depending on the nature of the device in question. For example, in the version shown in the image, where you open up a portal that doesn't need to be attached to the surface of a flat object, how do you ensure that the other end is always exactly at the surface of the desired planet (as opposed to high in the air or deep underground), and perpendicular to the ground? And if you decide to go exploring universes you've never been to prior (and thus have no data on what things are in it and where), how do you avoid, say, destroying your home planet by accidentally opening the other end in the interior of a sun? And even if you decide to be cautious about it, how do you gather data on said universe without actually opening a portal and sending a drone or probe in first? Compare Time Machine and Inn Between the Worlds . If the device is bladed, it's a Dimensional Cutter . See also Dimensional Traveler for someone who tends to use these.

An event in a video game where the controller buttons are switched around, or the player's display is interfered with This may be one of the Standard Status Effects . When it's done well, it can be entertaining, funny, or even terrifying . However, done poorly, it may break game immersion and cause frustration. If it makes the game noticeably more difficult to play, then it can be considered a

form of Fake Difficulty . If such a status effect is available for the player to use on enemies, expect for it to either do nothing at all due to the lack of an interface between the AI and the game , or cause deliberate Artificial Stupidity to compensate for this. Sometimes used as an intentionally created glitch . Can be utilized by Multiplayer Only Items . If this is done because the player character has been injured in some way, that's Injured Player Character Stage . If the player's controls have been temporarily limited in order to focus their attention on exposition, that's Expository Gameplay Limitation . If the Interface Screw is caused by the player character consuming a mind-altering substance, that's Intoxication Mechanic Compare Camera Screw . Some of the examples will overlap. Justified if the game uses a Diegetic Interface

Two people are good friends. Only, one of them is about twice, three times, — or even four or more times — the other person's age! Considering their differences in life experiences and worldviews, how do they relate? What could they possibly have in common? Assuming this is actually a platonic friendship and not something far more sinister , or for that matter an overtly stated mentoring situation, intergenerational friendships can be pretty weird. As the Real Life section indicates, while not everyone finds older or younger people completely unapproachable, there's still frequently a gap there This can take the form of a young adult from one generation befriending someone old enough to be their parent or even grandparent, such as in the comedy Finding Forrester</. It can take the form of an adult befriending a misguided or vulnerable youth, as in the French film Leon</ . Sometimes, the two happen to have more in common than they think, such as having surprisingly similar life experiences. Sometimes the younger generation is more mature, or the older generation is less mature; the latter especially helps writers to dodge away from worrying questions being asked about sexual attraction As for how they become friends, it could well be contrived circumstances that bring them together, or a shared life experience. Sometimes it's a teacher trying to help a troubled teen, leading to them becoming close friends. Either way, the situation that leads to their friendship would often be something out of the ordinary, since in real life, people of two widely different age groups generally do not reach out to each other Sadly, though, if it's an adult and a child who are friends, in modern stories, expect someone to misinterpret it as being sexual , and violence to possibly result . Sometimes the younger one will have an innocent Precocious Crush on the older one This trope does not generally apply if it's a parent-child relation between the two A subtrope of Odd Friendship

The Police who police the Police. Very often more evil than the Big Bad , Diabolical Mastermind or Serial Killer , Internal Affairs is the true enemy of the Cowboy Cop and everything s/he stands for, as they're usually on a crusade to get the Cowboy Cop — who they see as being just as bad as, if not worse than, the criminals he pursues — thrown off the force with all due haste As the Cowboy Cop is most often the hero and a good cop, the cops working for Internal Affairs are therefore often characterized as humorless, prissy and self-righteous desk jockeys who have no real understanding of what it's really like out there on the streets — because if they did, then there's no way that they'd get

so morally uptight and outraged about the Cowboy Cop's complete ignorance of correct police operating procedure and flagrant disregard for the basic human rights of the suspect. Indeed, a frequent method of Anviliciously highlighting the moral superiority of the Cowboy Cop compared to these cops is to have him or her angrily hiss "What about the victim's</ rights?" when getting chewed out by Internal Affairs — to which the Obstructive Bureaucrat will of course have no answer whatsoever . In these cases, Internal Affairs seems dedicated to promoting a system of justice which actively protects</ the guilty whilst forcing the innocent to suffer It's not just the Cowboy Cop, though; the entire department</ seems to loathe the Internal Affairs cops with a passion. This suits the Internal Affairs cops just fine, however, as more often than not they're depicted as complete ball-breaking pricks who aren't interested in being liked by anyone</; protecting the integrity of the force is simply more important. Da Chief often has a grudge against these guys as well, as they often overrule his authority and demand that he force the Cowboy Cop to turn in his badge Another role for Internal Affairs in fiction is to have one of their officers infiltrate a police station undercover with the intent of exposing some form of corruption, only to gradually form friendships (and even Love Interests) with the cops they are meant to be investigating. This can result in all manner of complications and angst galore when the undercover officer's role is finally exposed In the most positive portrayals, these are the cops that a cop protagonist can turn to when they see corruption and cannot stop it themselves. At the end, when the hero has proved his allegation, the IA cops will be the ones who come to haul away the crooked cops with the hero cop standing back, regretting such measures were necessary. After all, if they play their cards right they are more the natural enemy of dirty cops rather than honest ones. Clean ones shouldn't have things to hide This is, in some ways, Truth in Television , as for obvious reasons there's tension between regular police officers and the regulatory authorities assigned to watch over them in real life (just as tensions exist between police officers and civilians, for much the same reasons). However, the Cowboy Cop and his supporters tend to forget or overlook the fact that the rules and regulations that Internal Affairs so staunchly uphold exist for a reason. Like them or not, without Internal Affairs keeping the worst excesses of police authority and corruption in check, things wouldn't be very pleasant (in which case Both Sides Have a Point). Although, interestingly, in real life, the Internal Affairs departments of many countries actually often faces critique for being too lenient</ on police misconduct, exactly because</ their ranks are mostly or even entirely made up of police officers, and it is argued by critics that this structure inevitably creates a fundemental conflict of interest as the people supposed to investigate complaints of overreach are not truly capable of being objective towards their fellow cops Occasionally, this will be subverted by making Internal Affairs right</, and the Cowboy Cop actually deserve having to turn in his badge . In rare cases, the protagonists are with IA, in which case they'll probably be wholly in the right, pursuing some genuine dirty cops (obstruction from other police then is likely portrayed as very bad) Sub-Trope to The Inspector Is Coming and a Sister Trope to The Inquisitor General , which is much more common in military settings

This is an index for tropes about internal conflict. Related to

Psychology Tropes .

There are, roughly speaking, three kinds of consistency that a viewer expects from a story: The fictional universe is Like Reality, Unless Noted . Violations of external consistency are "unrealistic." Consistency aids Willing Suspension of Disbelief , while violations of consistency may be jolting and unexpected, which can benefit both humor and drama. The viewer would be quite surprised to learn that in your universe, Hitler was a circus performer , dragons are scared of fire , and that the married couple no longer recognize each other in Act III. Generally, if a work is inconsistent, the viewer expects there to be a good reason for it. On the other hand, sometimes violations of consistency go unnoticed even if they're quite obvious, or may even be expected</; e.g. The Coconut Effect violates External Consistency. Often, a feature in a work is consistent at one level and not at another; for example, maybe your vampires glitter in sunlight , which is not genre consistent with other works featuring vampires, but as long as they always do that, it is</ internally consistent. If a work forgoes External Consistency in favor of Genre Consistency, you have The Coconut Effect . If conversely a work forgoes Genre Consistency in favor of External Consistency, then you have a Surprisingly Realistic Outcome . Sometimes, as in the case of sequels, it can be unclear whether two works are distinct works or part of the same work, making the distinction between Genre Consistency and Internal Consistency a bit fuzzy. An Omnipresent Trope , since every work of fiction has some</ kind of consistency (except maybe Finnegans Wake </). No examples please — this is just a descriptive Super-Trope and index. Deconstruction : A work looks at the serious reactions and consequences to a work's conventions that are usually glossed over. Anime Reality Accidentally Correct Writing The Coconut Effect

All Myths Are True : It is established that all the well-known myths and legends actually happened and weren't just stories. Audience-Alienating Premise : Often results from reworking a genre in ways that would turn off fans of that genre. Cliché Storm

Ascended Glitch Abandoned Catchphrase : A phrase a character frequently said initially, but later stops saying or doesn't say as often anymore. Continuity Lockout : If you aren't caught up on everything, you won't know what's going on in the current episode or installment.

When an organization, particularly one that grants a lot of personal power to its agents, has a dedicated unit specialized in hunting down and executing its rogue or just unreliable members. Since the existence of such as a unit would be demoralizing to everyone else, it is usually held secret , so its reveal can be a major spoiler to the audience Compare Internal Affairs (who usually just investigate rogue elements, without the summary execution part), Secret Police (a clandestine government agency investigating and often eliminating threats to the state), Hunter of Their Own Kind (where the hunter is usually a former member of the group) and The Political Officer (who may be portrayed as this trope, but is often also in charge of general morale)

The Reveal occurs when the writers reveal a secret to the audience. Sometimes, however, the audience already knows, but one or more characters in the story don't know. Maybe it is the fact that one

of the story's main characters is in love with another character. Or perhaps we already know who the serial killer is, or that two characters are having an affair. An Internal Reveal is a form of Dramatic Irony that is almost exclusively used to create tension and concerns a major plot element, with the story making it clear to the audience that the ramifications will be huge when the relevant characters finally find out This can be limited to a single character or small group, or their secret can be revealed to the entire world This can happen retroactively with particularly famous plot twists : thanks to Popcultural Osmosis , the audience already knows about what was once a regular reveal, but the characters still don't May involve a Secret Identity or The Masquerade . See also Reverse Whodunnit , when applied to detective stories. See also Cassandra Truth , for when a secret is revealed but isn't believed. Contrast Tomato Surprise , when something is a revelation only to the audience, but not to the characters in-universe

Especially in the most recent decades, an animated TV show has always been produced by at least two studios in some way, since animation is expensive and labor-intensive.

Our story is about a valiant hero, a professional sports/video games/pogosticking champion who is preparing or going to a major tournament for his preferred skill. Normally, these tournaments are contained entirely within the main character's country, as in there are no foreigners competing. But for this special episode/movie, there is a great threat on the horizon ... there is a foreigner rival who might just be even better than the hero, if not possibly </ For some reason, this coincidental clash of titans from across the globe always seems to turn into a showdown between the two representative countries. For example: Who is better, America's best player or Japan's best player? It's implied that whoever wins proves that their country is better as a whole, not just at this particular sport. Used in different mediums for different reasons. Often used patriotically, because the main character lives in your country, and they win! Sometimes used to introduce a new archnemesis and spice up the show's competitors. When the competition is literally</ an alternative to war between nations, see Make Games, Not War . This is probably a trope because it tends to happen in Real Life . See also Combat by Champion .

Well firstly, you see the ad on top, and the ad just to the left? If you don't, turn off your Adblocker (you cheap bastard). Those are Internet Ads. They are basically like ads in print media. They allow money to come to a site, so that sites can operate without people charging us to use the site (or at least charging us less than they would have) In its most basic form, an ad on the Internet is simply put in a designated spot. Two main differences between this and print ads are that money from the ad is partly based on how many clicks an ad gets (so do that once in a while, to help this site), and that an ad will likely change if you refresh the page, especially when more companies are advertising on the site. Unfortunately, the pay-per-click model invites something called click fraud. , which also serves ads on this wiki, strives to eliminate click fraud through its "Infinite Auction" system. Another problem for web-based advertising are pop-up and ad

blockers, which interestingly prevents you from viewing the above site properly Another form of ads is through pop-up windows. Those are hated more than anything else. They not only are intrusive, waste memory and occupy task bar space (depending on your operating system UI and/or internet browser), but some have the gall to disguise themselves as alerts from your system Some ads take it to the extreme of being outright evil and use a security hole in your browser to install malware on your system. If you're viewing it on anything other than Windows, you can foil the attempt of malice because they're asking you to download a Windows executable (though, honestly, even if you're using Windows, programs generally don't install themselves, and even if they did, you usually know about it beforehand.) Even more obviously is if they are showing the GUI for Windows XP while you are running on Windows 7, Windows 10, MacOS, Linux, and, more amusingly, Smartphones Another form of advertising is the in-page pop-up, or lightbox. These are far more annoying, as they take over the entire webpage until you can close them, a more difficult task than strictly necessary since they don't use your operating system's standard GUI By far the most annoying of all these ads are be the flashing pop-up ads. These appear in their own web page, disappear into the background for a second, and then reappear. The hope is that they are hidden in the brief moment of time you are heading to mouse the "X" button in the corner of the browser window so instead of closing the ad, you don't react fast enough to the flash and close the browser windows you are working in, leaving the ad open instead. Safe to say, people generally find these annoying Internet advertisements are also one of the cutting-edge areas of research for annoying users with multimedia software, pioneering techniques such as embedded frames, animated GIF banners, blink tags, auto-playing audio and video ads, which are almost always powered by Flash, or some poorly made java-based video player. Needless to say, this tends to eat up enormous amounts of bandwidth and cause compatibility problems (up to and including instant crashes) on pages that would otherwise present only meager burdens on the reader's system. Most people hate these type of ads One of the few benefits that the annoying ads described above gave everyone online, is the general depreciation of older technologies used to display the adverts, with web browsers like Google Chrome dropping flash as of the end of 2020, forcing advertisers to use HTML5 or javascript to deliver their ads instead. Flash has always had Disproportionate Memory usage for a web-page, so a page merely showing ads plays a big role in the reason behind this deprecation of Flash in general (something even Adobe itself admitted was an issue). After all, the smaller footprint you leave on a webpage, the more chance the page will load your advertisement on as many computers and devices as possible. Because of this, adverts won't be going away, but their existence on a page should keep your web browser chugging along fine in the near future has some interesting pages about ads, and how we resent them or ignore them. If its author were an annoyologist, he would deserve</ big bucks

Some poor, innocent, hapless newbie wanders into a forum and wonders aloud if that guy in that show should be with that girl in that show. The forum erupts into flames, igniting all the boards that deal with the show, which ignites whole sections of the Internet into a blazing Inferno . The innocent newbie has opened the door, causing an Internet Backdraft. It works like this: Controversial Event X occurs,

resulting in flame wars , including ones spanning multiple forums. Internet vigilantes occur who muck up the issue even more into a morass of rumors. Eventually it gets to the point where people are so sick of flame wars about Event X, that this in turn causes flame wars conducted by those who want it to just die. Which it eventually does, sort of, in a smoldering-ember sort of way. Then some n00b gives it enough oxygen to make it flare up all over again. This is also known as . Trolls and Fan Dumb are drawn to to them like flies to a carcass. Mike Reed's Flame Warriors refers to this, when the metaphorical "door" is opened on purpose, as a . It is also why we have the Rule of Cautious Editing Judgment , and one of the most frequent reasons for a trope page specifying No Real Life Examples, Please! . Some tropes and/or audience reactions are themselves this - which is why they are listed as Flame Bait . The single item in common for these is that people outside the involved communities are astounded that anyone could care enough about the issue to get in any kind of argument about it at all, much less a big</ argument. It sometimes leads to people saying " Pass the Popcorn ." Not to be confused with Internet Counterattack - That's when the internet acts as one to make someone in real life pay. See also, Flame War , which is a common terminology for this, Flame Bait , a normal cause</ for this, and GIFT . See also</ from CollegeHumor </, which sets the whole concept of this to a Billy Joel song . Everything can cause this to an extent, whether it's on the Internet or not. Besides, having an examples section for this is just asking for vandalism . Applicable examples may fit one of the following tropes instead: 8.8 : People get mad because they think a critic gave a work too low or too high of a review score.

At the beginning of the Science Fiction genre, space travel was a new and novel trope. It wasn't about the destination - the journey alone was interesting enough . There was no Casual Interplanetary Travel (let alone interstellar </). We didn't have your fancy Hyper Drive or wormhole networks or your sub-ether anagrammed-tribadist Teslafied radio transmittion contraptions , and we had to walk sixteen miles back and forth through the snow to the launch site. We were lucky if we had a pith helmet! Our science was silly, but it tried to be hard ... for its time (except for Cavorite . That's just magic). You youngsters with your single-stage rockets and inertialess drives and horseless space shuttles have it easy. Back then, you had to build a balloon filled with evaporating morning dew, or strap on a giant rocket, or get shot out of a bloody cannon at the Man in the Moon and put his eye out . Well, that's how the hired help did it. You could go anywhere your heart desired, as long it was the Moon , Mars , or Venus . Or the Counter-Earth , ruled by the rapacious Hun and the Kounter-Kaiser! Back then, Men were Men, the Moon Men were Moon Men, or sometimes bats or bugs, Martians were Martians, and the Venusians were jungle-dwelling crab women! And that's how we liked it, consarnit! To put it another way</, an Interplanetary Voyage is a specific type of science-fiction story that takes the phrase "getting there is half the fun" very literally. In most cases these stories focus just as much, if not more, on the actual process of traveling in space as they do on the destination itself. Nowadays, this is largely a Dead Horse Trope outside of parodies or Genre Throwback works—the fact that space travel actually exists now allows writers to spend less time establishing it and more time building alien worlds. As a result, Interplanetary Voyage stories are strongly associated with science fiction novels of the late 19th and early 20th centuries, and with pulp magazines published during that era.

Nevertheless, some modern writers still play this trope straight. See also Journey to the Sky , its earthly equivalent. Contrast Casual Interplanetary Travel , where travel between planets is so trivial that it is barely touched upon in the story.

An index for romantic and/or sexual attraction and intimate Arelationships between people of different races and/or species Also see Love Tropes , Sex Tropes , Attraction to Outliers , Race ATropes , National Stereotypes , Otherness Tropes , and the Index Aof Fictional Creatures

Death. The End. Once you're down for the count, you aren't getting back up. There's no way you can tell the police or other law enforcement agencies who dunnit to you . Fortunately, the authorities have advanced technology , or in fantasy settings, necromancers or Police Psychics at their disposal that can either revive or channel you or scan your post-mortem mind in order to gather information. So just lie back on that slab and start talking Eye Remember is a subtrope based on a folk belief that the last thing a person sees when dying is burned or imprinted onto the eyes themselves Sometimes overlaps with Dead Person Conversation and I See Dead People Compare Fate Worse than Death , when the interrogation is more about torturing the dead

When the 'here' in the Framing Device of How We Got Here is under a harsh light and an uncomfortable chair , or when the police are asking a few questions of a material witness and the viewers are treated to a scene from their perspective, that's an Interrogation Flashback A popular way to play with this trope is to have the interrogated character lie, so that the Flashback footage either conflicts with what the interrogated character is saying or turns out to not be what really happened Third-Person Flashback usually goes with this. If several people are being interrogated and they tell conflicting stories, this results in The Rashomon . May overlap with Whole Episode Flashback if the flashbacks take up most of the screen time

Unlike Cannot Spit It Out or Aborted Declaration of Love , this trope is when a declaration of love is cut off by something outside the character's control. Usually the audience will only hear the "I" while the "love you" is left unsaid. It might even be left unclear as to whether or not the statement even is a declaration of love at all The interruption might come from a Moment Killer . In more serious instances, it might come from the character losing consciousness or dy ing . If two characters have had a lot of UST then this can be a good way for writers to taunt the fans In some cases, the interruptor—especially if it's the target of the declaration—may cut them off with a knowing look or a declaration of their own, making the declaration unnecessary. Such is usually mind-numbingly heartwarming Subtrope of Un-Confession In Rascals </ , just as Reiko was about to confess to Skye after getting back together, Chrissy interrupts them to say her goodbyes

A couple is about to have sex, or are in the midst of the act, but another person interrupts somehow. They have to stop to deal with the interruption. This trope can be played for comedy, drama, or both. Can often lead to a Relationship Reveal . If they choose to

keep going, it's Coitus Uninterruptus . If they try and keep things secret (if there is a knock on the door), it could lead to a Closet Shuffle . If the idea of the sexual encounter is that another person is</ there, that'll be Sex in a Shared Room A subtrope of Moment Killer . Often followed by a "Don't you people know how to knock?", because no one ever locks their door when they're getting intimate The best thing about Interrupted Intimacy is said to be that you can lose your virginity only once—but you can use Interrupted Intimacy many, many times Compare to Caught with Your Pants Down for the solo version of the trope, and Chaos While They're Not Looking for the violent version. A supertrope of Primal Scene , Bedroom Adultery Scene and Parents Walk In at the Worst Time . Sister Trope to Sorry to Interrupt

In a perfect world, the various branches of a government (local, regional or central) should be able to cooperate and pull their resources together for the greater good The world is not perfect One of the reasons for this not happening is usually Interservice Rivalry, where at least two branches of the government don't work well together, sometimes openly opposing and working against each other. Usually if the leaders of said branches know each other, they can't let go of their past feelings and it intensifies the rivalry. Often in military fiction (and in real life as well), some amount of Interservice Rivalry will be encouraged by the higher-ups, to promote a competitive spirit, but sometimes it can get out of hand. Sometimes it is even used by a dark Chessmaster-type leader to maintain control. That way, if the army ever rebels against him, he can always call in the navy to fight for him On the other hand, particularly in military-centric works where both services in question are meant to be sympathetic, it's used as a source of humor in the form of personnel of either service making fun of each other, good-naturedly or not Cases of Interservice Rivalry can cause Jurisdiction Friction and Divided We Fall . Compare Right Hand vs. Left Hand . See also CIA Evil, FBI Good , in cases where direct conflict between the two is depicted. There is also Truth in Television to this

A romance, sexual or otherwise, between two different species. Sometimes they are Humanoid Aliens , or they can be a Friendly Neighborhood Vampire and a human, two Funny Animals , or a Beast and Beauty couple. The type of species can diverge greatly, so long as they are different May include a moral about the Fantastic Racism version of inter-racial romances. Also may be Starcrossed Lovers . Anyone looking for more built in angst will make one of these a Mayfly–December Romance . In less realistic settings, can easily result in Half Human Hybrids , Hybrid Monsters , Non Human Humanoid Hybrids , or even Random Species Offsprings Chances of it actually becoming an Official Couple (and evolving into a mixed marriage) are increased if the nonhuman has a human form . Although there is an element of Squick amongst a certain number of audience members, most people accept it in cases where there are no</ humans involved. For anthropomorphic animals, this can be a source of Furry Confusion , especially if they're the only</ couple seen to be of different species For some this is the way to go about First Contact . Alien invaders seemingly love to tempt humans with this as part of their Masquerade , although you'd think they'd learn better This is somewhat vague though, as a species is defined as a group of organisms that can mate and produce fertile

offspring, so many "interspecies" relationships that can result in pregnancy may be closer to a Bulldog and Great Dane pairing than a Bulldog and Cat pairing. There are . The one used here is simply the most common one See also: Extreme Omnisexual , Boldly Coming , Bestiality Is Depraved , Mars Needs Women , Divine Date , Magical Girlfriend , Deus Sex Machina , Did You Just Romance Cthulhu? , Boy Meets Ghoul , Robosexual (for when the "species" barrier is a robot, AI, or other artificial lifeform), Robosexuals Are Creeps (for when the sexual or romantic attraction is portrayed as creepy), Hot Skitty-on-Wailord Action (for when you wonder how these two things could actually reproduce, or at least engage in activities that would lead to reproduction with members of their own species), Muggle–Mage Romance , Animal Sweet on Object , What Measure Is a Humanoid? , Anything That Moves , and Horny Devils (who almost invariably have sexual interests that go beyond their own demonic species). Any romantic variant of Monster and the Maiden also qualifies here by default. May involve Exotic Equipment or the Male-to-Female Universal Adaptor . May lead to Half Human Hybrids or to a Non-Human Lover Reveal if one member was keeping secrets. If society does not approve of such romance, then it's also Maligned Mixed Marriage . Interspecies Friendship and Predator-Prey Friendship are the platonic versions of this trope. It may also involve Non-Standard Kissing . The offspring of the couple may be born in a Whale Egg or from a Pregnant Reptile

Intertwined Fingers is a particular way of Holding Hands that indicates a more than close relationship between two people. This is commonly done by lovers, or whenever a creator wants to indicate a pair are more than friends without going out and saying it This is in particular a staple of lesbian related works and scenes. Intertwined fingers can often indicate lesbian relationships without getting explicit about it . In fact, see the Yuri Genre article for other good illustration of this trope Yaoi Genre comics and their other forms will also occasionally use this trope, often as a subtle Ho Yay or Discretion Shot to turn their relationship up a notch Has absolutely nothing to do with Finger-Tenting or Fingore —probably

A common tag on to threats of sexual violence, mutilation s
and death, the phrase "in that order" (or alternatively "not s
necessarily in that order") works by implication of bizarre forms s
of punishment achievable by switching the order around. It can s
be used in a serious context to raise a scary threat to levels s
of Squick or in a comedic context to just make the acts seem s
ridiculou Can be combined with Arson, Murder, and Jaywalking , if s
the "final" punishment would be pretty inconsequential following s
the other It is also very common to simply imply the trope by s
stressing the word of ordering. God bless italic s

Only a Dirty Coward would shoot someone in the back. Or knife him Back-to-Back Badasses is to prevent this — provided the other character is trustworthy On the other hand, if they can't let you escape, and you are the Dirty Coward fleeing a fight, it may happen anyway, particularly up against a Combat Pragmatist . It also doesn't apply to Tap on the Head , which is

non-lethal and not seriously dangerous — fictionally. If the blow can seriously injure or kill, however, it is a different story When The Dog Bites Back , this often comes into play It does not necessarily apply to executions, or when the Big Bad decides to turn his back on The Hero in order to stab a hostage. If a Heroic Bystander shoots a villain in the back, it will most likely be considered, well, heroic, which may or may not be just justified by the villain threatening someone else's life Sometimes employed as an unceremonious end to what is otherwise a badass famous character — a staple of westerns May go hand-in-hand with I Surrender, Suckers Compare Back Stab for a video game special move based on this trope. Can be used as Dynamic Entry , in which case a Surprisingly Sudden Death usually ensues. Beware Backstab Backfire

A science-fiction trope, most common in Literature wherein it's discussed that different races have essentially vanished, and everyone is pretty much within a limited range of color, usually a medium tan so to speak. Contrast with Humans Are White , which is basically the opposite idea, as well as the related Society Marches On Essentially, as racism fades and travel becomes easier and easier, more and more multiracial children are born until the entire world's population shares one big gene pool. It's also common for people to have a Multiethnic Name as well Tends to imply something of a Utopia —given how much blood has been shed over race, a world where there has been much interracial coupling is likely to have solved at least that problem. Additionally, humans in this scenario tend to have formed The Federation or there is a lot of globalization (but framed in a positive way), as this type of future naturally implies a lot of interaction between different peoples One particular version that's popular in anime won't have all races merge, but rather a prominent number of half-European, half-Asian people. This may relate to Japan Takes Over the World . This particular version is also popular with cyberpunk , especially the part-Japanese version Needless to say, this entire trope is the worst fear of ethnic supremacists/nationalists. In another way, though, it's also their dream come true: only one race. When this doesn't happen in the future, often writers will address it via explaining that cultures or nations have settled their own planets , thus allowing them to maintain common day ethnicity in the far-flung future Bonus points if Everyone Is Bi and/or an Ambiguous Gender as well In actuality, this trope is unlikely to come to pass in the way we think of race; while closely-knit populations will often share traits for both genetic and cultural reasons, the color of one's skin is affected by multiple genes (and environment), allowing for a range of shades and complexions. See the Pashtun or Brazilians for the actual result, which is wildly varied looks often within the same family. The possibility of the trope is unlikely, and without selection an impossible assumption, since there are already far too many people for the population to reliably interbreed quickly and evenly enough to homogenize the existing races before new races begin to pop up without a concerted effort on the part of the entire human species</ Another unfortunate problem with the Utopian ideal this implies is that race does not always mean 'skin colour' or 'face shape' - for instance, in South Africa, people who would be considered 'just black' in Western cultures, can be/have been split into the 'Black' and 'Brown' races, even though there is

no physical way of differentiating between these two populations. The historical definition of "race" in some cases also meant more like what now is termed "ethnicity". For instance, the English "race" etc. that would look not very different from its neighbors. Language and culture however can be equally divisive A subtrope of All Genes Are Codominant . Often overlaps with Ambiguously Brown

"Robot" once meant "worker" or "serf." In modern use, the term describes any mechanism or even a disembodied computer program capable of performing tasks autonomously with little to no human intervention. In science fiction, however, it's used for any person-like machine, even when they no longer serve a dedicated purpose, such as in the event of a Robot Uprising . So it can be a bit surprising when an otherwise futuristic robot's primary purpose is something mundane, like cleaning or assembling automobiles, even though that's exactly what they do in Real Life Named for the Roomba automated vacuum cleaner, probably the closest thing in modern everyday use to the Robot Maids science fiction has been promising us for decades This kind of robot can help to set the work on the hard end of the Mohs Scale of Science Fiction Hardness . It's likely to be found in Mundane Dogmatic stories Compare and Contrast: Mecha-Mook , Robot Buddy , and Robot Maid . May be centrally controlled by a Smart House . See also Single-Task Robot

Mobile Suit Gundam </ :

General Motor's Superbowl robot nightmare commercial.

The Peebos in Gold Digger </ .

Spoofed in the Australian Fan Film Star Wars Downunder </ with the ESK-1 Esky Droid (which keeps the beer cold as well as having handy legs to carry it to you), the W.B.R Barbie Droid (a barbeque on caterpillar tracks), and the LG-0 Bouncer Bot (used to defend pubs from attacking Sith Troopers).

WALL•E </: In this future, all of mankind has become infantilized (even becoming overweight blobs) and living a life of endless leisure with the robots performing all of the manufacturing, maintenance, and clean-up duties.

The Fifth Element </ has the cleaning robots that instantly jump into action in Zorg's office.

Harry Harrison's The Stainless Steel Rat 's Revenge </ . The Robotnik (robot hotel) has a luggage robot (with tentacles to grab bags) that sings a little song to every guest who arrives. It also has bellboy robots to show guests to their rooms.

Buck Rogers in the 25th Century </ has an episode where a lowly "maintenance android" malfunctions and becomes dangerous.

Most of the robots on Cubix: Robots for Everyone </ are of this type, although they are sentient.

SCP Foundation </, . The House has small robots that perform routine maintenance and cleaning.

In Traveller </, the adventure Research Station Gamma</ has maintenance (cleaning) robots.

In one level of Perfect Dark </ , Joanna must follow little cleaning robots to get into secret passages that only open for them.

Sluggy Freelance </ features the Digbots.

Somebody needs to disguise their identity and/or avoid attracting attention. Their solution? Wear a Black Cloak with a really big hood. Because nothing diverts attention away from oneself better than a big creepy black cloak that makes you look like the Grim Reaper . In modern times, however, a hoodie is a good substitute Of course, the physics of this attire choice are subjected to Rule of Cool . The hood will obscure their face (or at least from the mouth or nose up) in shadow, regardless of whether it is long enough to actually do so; and if it is, the eyes will be often completely covered by the cloth, making one wonder how do they manage to actually see anything. In addition, the hood will never fall off accidentally, even if the wearer is fighting a Wind Mage in the middle of a typhoon Yes, wearing a hood during a fight isn't a good idea because it constricts your peripheral vision, but who cares as long as it looks cool? Besides, being mysterious is badass. Even more besides, no one has peripheral vision anyway Sometimes the character in question will have Glowing Eyes to contrast with their obscured face, resulting in Shadowed Face, Glowing Eyes Video game designers of older days liked the trope because throwing an all-concealing hood (or suitable replacement) over an unimportant or "mysterious" character meant that they could skip on actually animating the character's speech This can be a Justified Trope if in a Wretched Hive or Bad-Guy Bar , where this is a perfectly acceptable fashion accessory. Though it shouldn't be confused with a Hood Film , you can expect to find it there, too. It also works if you are pretending to be a monk Compare Eye-Obscuring Hat . Contrast with the Cool Masks worn by superheroes , which disguise them by making them look more</ conspicuous. When not, see Malevolent Masked Men

A Comedy Trope where something mystical or cool-sounding turns out to be the native language's word or phrase for something completely mundane or outright negative. A common variant has a character sarcastically say that the subject matter is "native" (or some other language) for something that typically amounts to "piece of shit." Please note that this about situations where this is played for comedy, not about words actually meaning something significant in a foreign language. Compare In My Language, That Sounds Like... .

This is the ethnic character who will, contrary to the wisdom or knowledge of all present, insist that some cultural icon, item, form of art, technology, stock quote , etc. is native to their country If the character is an alien, this can cross over into Beethoven Was an Alien Spy ; or at least the alien will insist that they were This can be a subset of Cultural Posturing , but only when the character insists on this because it makes their country sound more awesome. It is always possible that they only use this trope because they believe it to be fact An example of Older Than They Think would not be this. This is where the character

didn't do the research (if not done intentionally) Or perhaps the story is so far removed from the present day that what's "Common Knowledge" to the audience is Shrouded in Myth , and everyone in-story assumes the Klingons Did It First . It's also possible that the Rubber-Forehead Alien or Human Alien culture does really have very human-like thoughts, and could independently have a proverb that coincidentally matches an old earth proverb. Related to Future Imperfect Compare Pop-Cultural Osmosis , Race Lift , We All Live in America . Often implies that Klingons Love Shakespeare

Taking a work that's a member of a certain genre, and doing it just the same, except as a different genre. For example, taking a rap song and getting a barbershop quartet to sing it; or showing a comedy-adventure from the Sympathetic P.O.V. of the villain, making it a tragic drama; or just taking a page from a famous novel and adding in the stylistic quirks of a completely different writer Can be applied to any form of art that can be categorized Recycled IN SPACE! can</ be this, but usually isn't. Generally changes the meaning . For music, contrast with Suspiciously Similar Song , where the intention is to resemble the original as closely as possible while still avoiding copyright-breaking. This is one form of X Meets Y . Don't confuse it with Pastiche , which is when a genre is imitated as closely as possible by a new work. Advertising by Association is when this is openly invoked as a selling point; sometimes it is an example and sometimes not (in those cases, it's another work from the same creator, with another style), but the executives surely want</ you to think it is

Enough to warrant its own page.

The creation of art between two people can reveal a lot about their feelings towards one another. The subject of a work is baring themselves to another literally and figuratively; they are allowing themselves to be seen and studied in an intimate fashion without resistance. The artist in turn is taking in everything that is being offered, expressing their own feelings and desires through creating a representation of their focus The scenes are often one of intimacy and personal connection, or can be used to indicate the absence</ of intimacy if it is handled as clinically detached. If the feelings between the two are one-sided the scene can highlight their different approaches to the situation. Might be a step on the way to a Relationship Upgrade if the characters realize their feelings during the situation, or the catalyst for the break in their current relationship. Can often serve as a metaphorical love scene The art creation does not necessarily need to be shown directly, but can be conveyed through the artist or subject reviewing the work afterwards or talking about it and what it represented. Sometimes instead of being about the connection between the artist and the subject, it is about the connection between multiple subjects, or the multiple artists working together Related to Significant Sketchbook , which covers one character discovering that another has such a collection of art. Might qualify as The Reveal if the feelings were previously hidden from the audience, or Once More, with Clarity! if the scene was originally shown without conveying the intimacy and is revisited later. May be why characters think Artists Are Attractive

Even daredevil superheroes and hardened villains fear the taxman from

the IRS. This is especially odd when said characters handle Eldritch Abominations on a regular basis and are able to kill an army like it was nothing. Apparently, going to jail for tax evasion is a Fate Worse than Death . On the plus side, they help the reader relate to the character (because taxes Serious Business in Real Life) and can even make the villain more sympathetic, pitting them against the unfathomable might of... taxes. Even gangsters who get away daily with murder and robbery may fall into the clutches of the law, dead or alive, if they don't pay their income tax. (In fact, that actually happened to Al Capone .) Sometimes, the intimidating part comes from a person who gets a summons to the tax office and the person fears that they are in trouble and might be arrested for a tax violation. In this kind of story, it turns out the bureaucrat is a nice enough person who just wanted to clear up a minor problem and, seeing that the character is frightened, has to give some reassurances that nothing is wrong beyond that. The trope is named after the USA's Internal Revenue Service, a department of the USA's central/federal government which collects all the country's taxes except for those on goods imported from other countries (tariffs) and ships entering US ports (tolls). Based on His Majesty's Inland Revenue department (now Her Majesty's Revenue and Customs), it was founded shortly after the beginning of the USA's Civil War as part of the process of full economic mobilisation required to build up and sustain an army big enough to suppress the rebellion . Most every country has its own version of this, often depicted the same way. They count as well. For the lighter, comedic version, see Department of Major Vexation . See also Forensic Accounting , a common tool used by the Intimidating Revenue Service. Audit Threat is when the characters threaten to call the Intimidating Revenue Service or their friend who works there. Taxman Takes the Winnings is when you win a big sum of money only for the IRS to take its very large chunk - no intimidation is necessary there.

A character who is , is a male character who lacks certain stereotypically male traits and may adopt some stereotypically girlish traits. Both genders have their stereotypical roles in society — to prove it, you can read up on them in the Gender Dynamics Index — but society has come a long way, and characters that subvert expected gender roles are on the rise, becoming more accepted and even popular. The Tomboy in Tomboy and Girly Girl might have been ridiculed in the past, but now she is mostly accepted along with her more "feminine" counterpart, at least up to a certain point (there is still a certain point at which tomboys are no longer considered acceptable if they are seen as too masculine). The Sensitive Guy in Sensitive Guy and Manly Man is somewhat arguably less socially acceptable in its extreme forms (Double Standard strikes again, more severely this time, due to most Western societies, particularly the United States, placing greater emphasis on masculinity over femininity) and may subvert gender norms, but characters which embody this trope are no less interesting than any other. There are generally two types of sensitive guys, depending on their degree of femininity vs. masculinity: Between the two types of sensitive guys, the tomgirl is considered somewhat more socially acceptable than the girly boy or sissy. Keep in mind that our views of gender have actually changed over time, and some traits which now might be considered masculine or feminine, actually weren't in the past, so this is mostly only valid for modern characters. Also, people are different, and even characters who

are unquestionably "manly" might have a few of these traits . Like tomboys, tomgirls aren't necessarily gay, they're split into three types, such as straight, gay, and bisexual. More often than not, however, tomgirls are usually straight. Girly boys, however, more often than not, are usually gay. The outcome of the Sensitive Guy's character arc tends to indicate the intended Aesop. If the Sensitive Guy doesn't "grow out of it," or find his inner masculinity, this suggests that gender and sexuality boundaries are more permeable and that transgressing these boundaries is acceptable. If, on the other hand, a Sensitive Guy is often hard to be normalized in some way, this implies that his feminine appearance or traits are always problematic. Consequently, the feminine traits of his can serve as an exploration of gender and sexuality. Also like when the media, more often than not, usually portrays the type 2 effeminate tomboy as the "better" type of tomboy, they more often than not usually portray the type 1 tomgirl as the "better" type of sensitive guy. In order to qualify, a character must have a large percentage of these traits and/or have their effeminate-ness be remarked on in-universe. : Where the Manly Man is very physically active, this character is much less so. He may have no interest in sports. His skills and interests simply lie elsewhere, such as fine arts and crafts, because he's more artistically cultured than most other guys , or he may have a disability or illness of some kind which would prevent him from being active even if he preferred to be. Conversely, he may simply appear to be physically "wimpy" but he actually Minored In Ass Kicking , or have his skills as an Ace Pilot honed to perfection or be Weak, but Skilled . Or, if he is good at sports, he plays sports that are not exactly seen as "manly," such as golf, tennis, and volleyball. Keep in mind that the term effeminate</ can also be used to describe tomboys who are relatively more feminine than other tomboys , at least in terms of appearance and/or personality, even if their interests may still be fairly masculine, but relatively effeminate tomboys typically also have a sizable portion of feminine interests as well. The "Sensitive Guy", "Tomgirl", or "Girly Boy", while not being exactly embraced by males, is very popular with females, possibly for the same reason the Tomboy is popular with males. Girls identify with them more than they might other male characters, and may find them attractive based on shared interests, or find they are a better Audience Surrogate . Japanese slang often calls this character an "Onee" from "Ane" (姉), since they can have the characteristics of a Cool Big Sis without biologically being one , although it tends to be shared with characters that enter the Camp side of femininity. For the Distaff Counterpart , see Not Like Other Girls , One of the Boys , Butch Lesbian , and The Lad-ette . For similar tropes regarding ethnicity, see Pretty Fly for a White Guy and The Whitest Black Guy . A Super-Trope to:

An Intrepid Reporter is an investigative journalist who goes out and finds stories, rather than letting them come to them. Sometimes this seems to be the only kind of reporter used in fiction. A character's actual assignment might be something like "tell the readers who won the dog show," or "write a puff piece on our best advertiser," but something about the setup will inevitably spark a full-scale investigation This kind of reporter is also known, in fiction, for getting far more involved in their stories than is usually recommended for real journalists. There might be a brief mention of "objectivity" or warning against "getting too

emotionally involved," but if there's a Corrupt Corporate Executive to bring down, secret villainy to expose, or a Distressed Damsel to rescue, the intrepid reporter will be right in there taking an active hand. Sometimes the term "muckraker" is used for this kind of journalist. Expect occasional examples of Off the Record information, whether or not they violate their journalistic ethics and reveal it Due to Hollywood Beauty Standards / Hired for Their Looks , this character also tends to be attractive In-Universe , and an object of desire for both the good and bad guys . Morally gray, and villainous adult examples may not be above offering Sex for Services . For the upstanding ones, part of their drive may be to prove that they're not just a Brainless Beauty that looks good on TV Expect a lot of speeches about "the Truth", "Freedom of the Press" and "the People have a right to know." Despite this, they're typically troublemakers. After all, the lure of that big scoop can lead to rushing into danger, trying to expose secrets the protagonists would rather not have public, or even fudging the facts to make a juicier story The teenage version of this is the School Newspaper News Hound . The Jerkass or Evil Counterpart is the Paparazzi , the Immoral Journalist (which is not</ necessarily the case for this reporter), or the Propaganda Machine churning out Public Relations Ads if it's a large organisation. If an intrepid reporter has no name, and/or is clearly snooping around somewhere they really shouldn't be , they are most likely Deadline News as well A popular character in action movies and cop shows, as it's a good way to introduce civilian who has a plausible reason for repeatedly being In Harm's Way . It's also a great superhero secret identity to collect facts about crimes to thwart or fudge the facts when someone wants to expose the masquerade See also Da Editor and Going for the Big Scoop

Okay, everyone knows that Evil Cannot Comprehend Good , right? And The Spock or Emotionless Girl can't really understand why humans do such crazy things. And don't even get us started on gods and Eldritch Abominations. This is when some being (often one on a higher plane of existence) finds humanity interesting, amusing , or otherwise engaging, often enough to attempt to become one of them (or at least disguise themselves as such). This is often the source behind Half Human Hybrids , where the inhuman half is Intrigued by Humanity enough to marry or mate with one. An Emergent Human or someone with Pinocchio Syndrome may have this as their reason for becoming more human. This trope is probably related to Humans Are Special —even god-like beings and Sufficiently Advanced Aliens find us fascinating! This trope isn't always</ related to Pinocchio Syndrome though. Oftentimes you will see incredibly powerful beings who would consider themselves far superior to humans, and would be outright insulted</ at any suggestion that they may wish to become human. And yet they still find humans to be fascinating little critters. Most entomologists would find insects to be intriguing and fascinating, after all, and yet... Note that this is a purely intellectual trope, seen from the side of the one Intrigued by Humanity. Humanity finding itself</ fascinating doesn't count, nor does every instance of inter-species romance where one partner is human. Compare Humanity Is Infectious , The Xenophile (the human equivalent). Alien Arts Are Appreciated may ensue. Klingons Love Shakespeare is a subtrope where a specific aspect of human culture holds aliens' interest. In the case of the Green-Skinned Space Babe , this becomes equivalent to What Is This Thing You Call "Love"? . See also Humans Are Special

. A Fantastic Anthropologist will often be this. It should also go without saying that the degree to which characters may be into humanity's quirks often varies. This trope crosses with Easily Impressed when basically every</ facet of humanity dazzles them.

Natural ecosystems exhibit a very distinct balance of populations: predators, competing species, disease and other natural causes all play their part in ensuring that animals don't end up breeding to the point of overwhelming the local environment, especially in the case of Explosive Breeders . True, it's not unknown for animals to migrate to areas without the environmental elements that keep them suppressed and become an ecological threat to their new habitat, but this usually</ only happens under very special circumstances.. Unless pesky human beings get involved, of course In this case, humans (or some other form of intelligent life) introduce a new species to an environment without the usual elements that keep it in check. The reasons for this vary: this can be a deliberate attempt to alter the environment in their favour , an ill-advised effort to bring pets and livestock to a new land, an effort to create a new species , or it can have occurred entirely by accident - a spore stuck in the treads of a shoe, for example, or an animal stowing away aboard a ship With no predators culling their numbers before they can reproduce and no competitors fighting them for territory, the introduced species will quickly breed out of control, devastating the local environment, wreaking havoc on native species, and in some cases, even damaging human concerns as well In the real world, animals of this nature are known as : often notoriously difficult to manage, they are Very, Very Bad for all parties concerned, and the introduced varieties commonly remain a problem for generations after they were first imported Compare Fantastic Vermin , which may result from this; compare Outside-Context Problem and Normal Fish in a Tiny Pond . See also Alien Kudzu , which explores botanical examples of this trope

An character is one who, while not necessarily being shy, is still far from the most social person you will ever meet. They prefer working alone , or, if they have to work with others, prefer small groups, and probably will not be the leader. They're often portrayed as more intellectual than their more extroverted counterparts, though this isn't always the case. Also, while they're less likely to actually show their emotions, they probably feel just as much as said extroverted counterparts (which can result in some very withering rants if they're pushed too far) The short version: An introvert gains energy by being alone, and expends it by being in large groups of people. In Myers-Briggs parlance, they are I's. They tend to be either melancholic or phlegmatic and the Blue Oni Compare Solitary Tropes and Shyness Tropes . Contrast Extraversion Tropes . For the Trope Maker and Trope Codifier , see Carl Jung

In its original form, tropes are storytelling devices meant to convey a concept to an audience. The overwhelming majority of tropes on this site are specifically that: devices that can be recreated by an aspiring author who visits this wiki. Other tropes are about identifying how the audience reacts to an event, and are often an unintended side-effect of the use of a trope. If common enough, there are separate tropes for the same thing from two points of view. Some tropes tend to blur that line where both the characters within the story and the audience react the same way to the use of

the trope, which sometimes involves a Lampshade Hanging . In this wiki you will find the use of the comment "in-universe" by someone saying "This trope was used in-universe when..." and that is where a trope more often thought of as an audience reaction</ is used within the story, i.e. its fictional universe. One such use is the Invoked Trope , where the characters actively set up the trope in advance, though that happens more often with storytelling tropes</ . For an example, Replacement Scrappy is a fan reaction to a replacement character. The reaction is often "You're mostly the same as the previous character, but you're not the one I remember and love." The series Star Wars: The Clone Wars </ has an episode where R2D2 is lost in battle and Anakin is given a new (virtually identical) droid. He ends up having the same reaction and attitude as most fans have with a replacement character. And there is also a distinction between what is used in the story and the reasons it was used in the story, called Watsonian versus Doylist . For example, Elliot was transformed with long hair during Grace's birthday party in El Goonish Shive </. The in-universe reason was to get Justin , who likes playing with hair, to agree to come. The practical storytelling reason was because he would look just like Ellen otherwise. Word of advice to prospective writers. Despite what may be often believed, even without a lampshade , writers should be aware of the tropes they are using and how people will react to it. What separates Good Writing and Bad Writing is how much effort there is put into cleaning up the way tropes are used. Do not neglect the In-universe reasons. Give them a Hand Wave at least. Your readers will not forgive you if you don't. It's also known under a variety of other names, such as In-Story, In-Series, and In-Fiction. And here are some tropes that are separated by In-universe and Audience Reaction — Real Life (In that order): See also In-Universe Marketing (a closely related phenomenon), In-Universe Examples Only (when tropes can only have examples and wicks in-universe). On the wiki "In-universe" (or In Universe) is also a "magic word" you can you use to mark cases of in-story use of Audience Reactions , that don't have genuine trope equivalents. Typing this (or better yet, using it as a pothole , since the phrase usually sounds out of place, especially when dropped in a pre-written example) will disable the in-page YMMV notification for that bullet and its lower level bullets. Do not abuse</ this feature, or we'll be forced to do terrible things to you, whatever universe you're in.

A particular form of Viral Marketing . You have a science fiction movie coming out. What can do you do to promote it that goes that extra mile? You do In-Universe Marketing . You post "found" documents from within the universe. A "NBS Nightly News" broadcast from 1972 in your world ? Great. Advertising a drink from your setting ? Yup. Showing a half hour of dull security camera footage with maybe thirty seconds of profoundly disturbing stuff going on ? Perfect. The diary of one of the characters, with pages torn out ? Synergylicious! Distinct from the Alternate Reality Game in that there is no 'game', per se. Rather, all there is is the document. Not all Viral Marketing qualifies as In-Universe Marketing ; the product being advertised must be fictional, and the "found" document must be set in said universe. Examples should go under Viral Marketing ; this entry just defines the term.

A plot device that depicts the United States as a target of foreign

occupation by another (nation-)state or states. The work will usually focus on the heroic efforts of either or both the US Armed Forces and the La Résistance as they try to defend their homeland. The background of the invasion usually varies on when the work is set. If it is set pre-1990, it is usually a Cold War that got hot or some other form of Alternate History , such as Nazi Germany and/or Imperial Japan carving an isolationist America up once they've finished conquering the rest of the world. 20 Minutes into the Future will sometimes depict a (dystopian) USA that is no longer a Super-Power but merely a Great (e.g. as it was in 1900) or Second-Rate (e.g. as in 1850) or Third-rate (e.g. 1812) Power that would genuinely be threatened by an invasion from a rival power. Next Sunday A.D. settings will usually be very similar to the Twenty Minutes setting, usually featuring a Russian or Chinese invasion . The US's nuclear arsenal almost never gets employed during these stories, despite the fact it'd be a deterrent as per the whole 'MAD' thing , though its non-use is often hand-waved away by the proliferation of some new technology and/or magic - or by the governments simply going "better to try reclaiming what's ours than doom the whole world". Some works give a handwave towards Mexico becoming unfriendly in the years leading up to the war, so that it can be plausibly used as a base for an invasion (the most common example is a Communist Mexico allied with the Soviet Union). If done right, can make for an interesting plot. However, can also be Anvilicious if it is too blatant a rip-off of any real-life war, especially one in which the US was actually involved. See also Mexico Called; They Want Texas Back and Russia Called; They Want Alaska Back for more specific examples of this trope. Divided States of America sometimes goes hand-in-hand, as other nations come into the country to act as peacekeepers, to secure international interests, or to conquer the splintered US. Goes hand-in-hand with Occupiers Out of Our Country , Fallen States of America and Day of the Jackboot . May or may not involve a Washington D.C. Invasion . Sub-Trope of Different States of America and Possible War . Note that the trope only counts for human</ invasions on US soil, not alien invasions . (And not that </ kind of " alien invasion" either.)

Our heroes' hometown is invaded or simply attacked suddenly by enemies, so they fight the invaders off. Later, they find out the invaders weren't actually invading , but actually fleeing from something much worse than them . Can result in an Enemy Mine in order to deal with the bigger threat. It can also result in a Mêlée à Trois if none of the sides can put away their differences Alternatively, the invaders' home may have been or about to be lost to a disaster and the heroes may help them in restoring their home, finding them a new one, or preparing for the disaster when it reaches their home May result in the third variation of Planet Looters . See also Foreboding Fleeing Flock . Depending on the severity of the danger, the invaders may simply ignore whoever they run into

When a story contains a vast variety of Elemental Powers to choose from, the most powerful are inevitably the least complex. For example, individuals with elemental control over technology , rubber, string, plastic, fish , etc., have less to work with against those who have elemental power over such basics as light , darkness , energy , gravity , life, death The reasoning behind this could be that as the concept/element becomes simpler/broader, it encompasses more, giving its controller a larger dominion. This is

especially true considering that Artistic License – Physics is often involved anyway; the more defined something becomes the less room you have to fudge the rules. This is the reason Lightning Can Do Anything after all. On top of this, the less complex the concept, the closer it is to a facet of reality rather than an idea of man's See also Rock Beats Laser and Heart Is an Awesome Power . Contrast Elemental Rock–Paper–Scissors , which is where the weakness/strength relationships are between the broad powers only. Can be a cause of Linear Warriors, Quadratic Wizards , since "skilled with a bow" is narrower than " magic ". What Kind of Lame Power Is Heart, Anyway? is often an exception to this rule (broad but useless). Heart Is an Awesome Power is applicable, too: the user's creativity invents more uses for the power. This Looks Like a Job for Aquaman is this trope's logical conclusion: a power so complicated it's only useful in circumstances so specific they're contrived. Odd Job Gods are the divine equivalent, as the more powerful gods are in charge of the simpler/broader domains Compare/Contrast Semantic Superpower and Sanderson's First Law , which states that powers that are well-understood by the audience are more useful in solving conflicts

In shows that involve fighting, the sharper the weapon, the less likely its user will hit a character with it It's far more common to see a character hit by a blunt weapon than with an edged or pointy one. This is most likely because swords, spears , axes , arrows, and chainsaws cause bleeding and leave visible scars. The only externally visible damage done by maces, warhammers , and quarterstaves is bruising, lumps , or the occasional cartoonish black eye. In either case, even if blunt weapons do as much damage as the sharp ones would, they will do it more cleanly In reality, of course, blunt instruments can splinter bone, smash cartilage, dislodge eyeballs and reduce internal organs to pulp - sometimes even through armor. They're after all. It's merely that sharpness invokes our childhood safety intuitions about what will easily break skin and cause blood loss. It's more intuitively plausible that a character hit very hard by something blunt might</ emerge with only a bruised rib and be capable of re-entering the fight. Much of this comes down to the Rule of Perception ; an attack that causes mostly internal injury is more likely to pass by the audience Characters with Improbable Aiming Skills and Ludicrous Melee Accuracy can use their abilities to pull off unlikely feats of skill like a Knife Outline or Blasting It Out of Their Hands . But they can never use those tricks to harm enemies This rule has the secondary benefit of drawing out battles, especially duels. A powerful, sharp, lethal weapon can end a battle with one stroke — and if that happens, then the fight scene is over. If the attacks are more comedic or show less damage, then combatants can land dozens of hits without the audience wondering "Why hasn't he fallen down yet?" In a battle between a sharp blade and a blunt weapon, if the blade is going to win, then expect a long series of blocks and dodging before any strikes land (this is often the highly stereotyped Flynning) This rule doesn't apply when the fighters being hit are robots , skeletons , non-humanoid aliens , or any of the other categories found under What Measure Is a Non-Human? . Compare As Lethal as It Needs to Be , Could Have Been Messy , Family-Friendly Firearms , Inverse Law of Utility and Lethality , and Never Bring a Knife to a Fist Fight . Annoying Arrows have a different problem - they hit pretty often, but they

still don't do anything

The more combat-oriented a power is, the less useful it will be both in combat and out of it. And the more destructive a power is, the less useful it will be for anything.</ So, What Kind of Lame Power Is Heart, Anyway? It's only useful in a Plot Tailored to the Party , and even the lowliest Mook poses a serious threat. It's much better to have elemental control over fire ... except you can't use it outside of combat. Even in combat, you'll miss a lot or face moral backlash . Okay, how about swords ? Being a super cool swordsman is better than a wimpy White Mage . Except, if you hit anyone , you're likely to cause massive bleeding, and so unarmed opponents can pull Never Bring A Knife To A Fistfight . The same goes for guns : if you aren't a graduate from the Imperial Stormtrooper Marksmanship Academy , then you need Improbable Aiming Skills or to use Trick Arrows — er, trick bullets. Otherwise, the best you can hope for is mutual A-Team Firing . The same goes for skills like explosives, martial arts, and other martial Chekhovs Skills . But the guy who can talk to squirrels can get the keys to your prison cell . The girl who controls plants can grow the Magic Antidote to the villain's poison. The wimpy kid with Telepathy can tell you "It's a trap!" as it's sprung... well, okay, this trope does depend on the authors giving these little-thought-of powers their due use. At the Logical Extreme , that group of tree-hugging hippies you just antagonized will turn out to be a bunch of Technical or Martial Pacifists with a Superweapon Surprise hidden up their sleeves. You've just run into the Inverse Law Of Utility And Lethality . In series that are focused on combat and fighting, there will be cool (but nerfed) violence. The items which produce the coolest violence will be the least useful — for anything. Mundane Utility will be rare. Like Bad Powers, Bad People , the uses for super destructive powers are severely limited. The main reason for this is, of course, censorship - particularly for works aimed to young children and teens. (Expect this to be averted in more adult works.) In Tabletop Games , a character built for lethality is usually very gratifying. However, such characters tend to be flummoxed when they encounter anything they can't hack and slash through. Characters built for utility - stealth, diplomacy, or even climbing the Insurmountable Waist-High Fence - can accomplish amazing things even if they aren't combat monsters. (Example: A Fighter can kill The Dragon in single combat , but a Diplomat can raise an army to bring the entire Empire to its knees). In Video Games , this can help the in-game balance: since the coolest-looking attacks are also, on the whole, the most powerful, nerfing their usefulness can stop them just being used to win any and all battles. Often, this phenomenon will go completely unnoticed inside a show or game, becoming at most the subject of a Plot Tailored to the Party to "prove" how versatile the heroes truly are. No one In-Universe realizes the full power of the character with the Swiss-Army Superpower . When a character realizes their power has lethal applications, it's a case of Lethal Harmless Powers . Compare the Inverse Law of Complexity to Power , where "simple" powers have more oomph than more abstract ones, Boring, but Practical and the aesthetic aspects of Cool, but Inefficient .

For almost any trope, there is a flip side A particular form of creatively reusing an existing trope: The trope is turned exactly on its head, or shown the other way around. For example, a trope

that typically applies to heroes is applied to a villain, or a trope that typically applies to males is applied to a female character, or the other way around (Gender-Inverted Trope). Some good examples are also in Genre Blindness , where rather than being blind to the conventions of the story-type they are in, the characters are presented as being hyper-aware of the conventions . A trope can often be inverted in more than one way. Indicative of Postmodernism Oftentimes it's Played for Laughs . Sometimes, however, it's not intended at all. For example, maybe a writer wanted to use brightness of hair to symbolize brightness of mind, not realizing that Dumb Blonde and Brainy Brunette are much more common tropes See Playing with a Trope for a comparison with many other ways that a trope can be used Oddly enough, this page is still pretty tiny, despite inversions of tropes constantly being mentioned on other pages. Let's add in as many as we can, shall we? See also Russian Reversal Super-Trope to Opposite Tropes which specifically focus on be taking completely contrasting takes on the same idea Not to be confused with Subverted Trope , Averted Trope , or Defied Trope . Compare Swapped Roles For the 2012 video game, see Inversion </

Some monsters are Immune to Bullets ; some are indestructible , barring the obvious Achilles' Heel ; some smother their opponents in hordes of easily-replaceable drones ; some just keep coming back no matter how thorough their demise seems ... and then there's some that simply cannot be fought at all. At all.</ A native of the horror genre and its imitations in other genres, this breed of foe cannot be opposed in any reasonable way, lacking weaknesses, exploitable character flaws, or even opportunities to counterattack. The reasons for this vary: maybe it's because they're simply too powerful to be harmed in any way; perhaps they never give their victims a chance to retaliate; maybe its because they're effectively intangible. In some cases, it's because you're</ too weak to fight them and probably never will be strong enough to do any real damage. Whatever the case, fighting the monsters fast approaching is out of the question: they can't be hurt, harmed, suppressed or negotiated with, and killing them is damn near impossible. In other words, it's time to Run or Die . Though hardly unique to the medium, this trope has flourished in video games. A popular way to enforce the survival</ part in many Survival Horror video games is to leave the player with no chance to survive (or make their time) in battle against the monsters; the moment the assailant catches up with them, it's game over, so the player's only option is to turn tail and run away as fast as possible. In many instances of this, the player will also be obliged to find a hiding place, turning the game into a tense mixture of stealthily creeping from bolthole to bolthole and desperately fleeing the unstoppable pursuer. The modern prevalence of this trope can be seen as the antithesis of modern Action Horror games, which are oft considered to be little more than spooky shooting galleries rather than true "horror" games by purists. In this case, all the enemies are Invincible Minor Minions by default, and cannot be harmed in any way; in cases that allow these foes to demonstrate their invincibility should the player be brave enough to stick around and battle, a Hopeless Boss Fight may ensue. Important Note: to qualify for this trope, the monster or villain has to be played for horror; a simple Hopeless Boss Fight in an action game does not count. Astute readers may note that this trope has significant overlap with Invincible Villain . However, where the Invincible Villain cannot be defeated by anything including</ running away and always ends the

story victorious, the Invincible Boogeymen are only impossible to defeat in confrontations; the latter can still be escaped or hidden from provided you're fast enough, and may even be defeated through the use of some special loophole in their invulnerability. Said weakness won't be discovered until the very end of the encounter, if not the very end of the story itself. Of course, don't count on this being a guarantee in video games; you're better off just running and never looking back. Not to be confused with Implacable Man . While being physically invulnerable is one way of achieving this trope, not all examples fall under this. This trope can still be in effect simply due to the helplessness of the victim running from the monster, who possesses no way of fighting back, even though in other contexts the monster might not be so invinvible at all. Compare and contrast the Advancing Wall of Doom , Inescapable Horror , Lord British Postulate , Perpetual-Motion Monster , and Super-Persistent Predator .

So, your character has an older car. It may be a Cool Car , the Alleged Car , or somewhere in between - but it has a slight gimmick. It can survive harsh crashes that would maim a modern car - it's the Invincible Classic Car. While old cars tend to survive crashes better than new ones, this trope usually takes it Up to Eleven . Only applies to classic cars (classic = 25+ years old at time of production) and the cars do not have to be completely</ invincible, per se. Commonly overlaps with What a Piece of Junk Contrary to popular myth, this is not Truth in Television . While pre-war manufacturers would go to extreme lengths to build cars that could survive extreme abuse - even to the extent of throwing them off cliffs and seeing if they still worked - this was simply because the uses of a car were much different. Indeed, the Model T was designed to operate in a world without paved roads outside of cities, and was often even used as a stationary engine for farming As the world modernized in the post war period, manufacturers traded agricultural ruggedness for style, refinement and planned obsolescence. While a 1950's yank tank may look large and imposing, the rapid yearly style changes left little time for structural engineering - they simply focused on creating the most fashionable coachwork and placed it over primitive ladder frames The biggest reason for this trope in real life, however, is the "crumple zone" misconception. Modern cars use are designed to dissipate crash energy by spreading it across the frame as evenly as possible, and into sacrificial areas. The idea of a "crumple zone" is misunderstood to mean the car collapses like an accordion; since vintage ones don't have them (and are built in a much heavier-looking way), they are falsely assumed to be stronger In fiction of course, the heroes are Made of Iron or wear Plot Armor , so the Invincible Classic Car surviving treatment that would shred a modern car just goes to show how cool it is Compare/contrast They Don't Make Them Like They Used To , Break Out the Museum Piece , Chronically Crashed Car , Watch the Paint Job and The Precious, Precious Car

Heroes win . It's a general rule of fiction. Sometimes, though, you want the hero to lose a few battles; this is a good way of establishing conflict and drama. A hero may well consistently lose but learn valuable lessons out of it, get Character Development , and grow strong enough to win for the series finale. And then there are heroes who never lose. Ever.</ Not only that, but they win handily</,

especially in life-threatening situations. If any "losses" occur, they're typically ambiguous and open-ended, brought about by clear cheating on the villain's part, or as a forfeit from the hero due to external causes (kidnapped Love Interest , etc.). This of course tends to rob a given episode or movie franchise of dramatic punch when the viewer's reaction to a hero being lowered into a mortal Death Trap is " Like You Would Really Do It !" This type of hero is basically a walking personification of Victory Is Boring . Behind this is usually the idea that the hero is " just that good ". Plus, he's the hero and, usually, also the protagonist ; good guys never</ lose! Doesn't matter how hard the Determinator trains, the hero is always two steps ahead . This is especially common in episodic series where the Monster of the Week is a regular occurrence, or in fighting series (whether kung fu, Mons or card games) where the protagonist is on a quest To Be a Master . If taken to extremes, this trope turns into God-Mode Sue . This is practically required if the hero is in some sort of Tournament Arc or else in a situation where any loss would be disastrous (such as if all fights are to the death), as you can't afford to lose even once. Having the character routinely come close to losing, requiring assistance from outside forces, or having the tournament structured so characters can take a loss can help mitigate this. That being said, Kryptonite Factor and Good Flaws, Bad Flaws are the main ways to make an Invincible Hero more... vincible . That is actually a word, meaning " " Compare with Immortal Hero , where the heroes can and often do lose, but hardly ever die; the less suspenseful Showy Invincible Hero , that would be this except that it focuses on the Rule of Cool ; the Comically Invincible Hero or The Ace , which follows Rule of Funny ; and Invincible Incompetent , where the hero is still usually untouchable, but more due to dumb luck and Laser-Guided Karma than any real competence of their own. Contrast Invincible Villain , their Evil Counterpart ; and Failure Hero , who never wins at anything. Not to be confused with Saved by Canon or Foregone Conclusion . Sub-Trope of The Good Guys Always Win .

It's common in stories for good to defeat evil. It's reassuring, comforting, and satisfying. Sometimes, that's not an option, though Evil is just too powerful, too well-prepared, and too embedded in the system. Rather than being able to turf it out for good, the heroes must find a way to live with it, negotiate with it, or simply escape it. This is not just about stories where The Bad Guy Wins - this is about stories where it was never seriously possible for them to lose. This trope is common in several genres: Cosmic Horror Story : The protagonists' insignificance and helplessness in the face of the Powers That Be is the whole point. An Invincible Villain will, by definition, be a Karma Houdini unless they have a change of heart on their own - at which point a Karma Houdini Warranty may be waiting in the wings if they experience a Redemption Demotion . The Greater-Scope Villain will usually be one of these unless counterbalanced by a sufficiently effective Greater-Scope Paragon . After all, the whole point is that their victory or defeat is outside the scope of the story. On the other hand, not every Invincible Villain is a Greater-Scope Villain - the story can be all about how the protagonists deal (or fail to deal) with somebody or something they stand no chance of defeating. Tropes Are Tools , and it's perfectly possible to write a good, satisfying story with an Invincible Villain (Evil Is Cool , after all, and the idea that you can't always deal with evil by punching it into submission is an ancient Hard Truth Aesop), but there are plenty of ways to mishandle

them. If taken to extremes, when the story is entirely about</ the villain constantly winning in some contrived way, this trope turns into Villain Sue . The Villain Protagonist is especially at risk to this. Stories that abuse this trope have a high risk of Too Bleak, Stopped Caring . The Subverted Trope is Not So Invincible After All , where taking on an apparent Invincible Villain directly turns out to be unexpectedly worthwhile. Compare As Long as There is Evil (where evil is vincible, but no victory can be permanent in-universe), Joker Immunity (where no victory can be permanent out of universe), and Hopeless Boss Fight , in which a video game player is faced with an (allegedly) unwinnable fight and has to lose in order to continue the game. Contrast Invincible Hero , their Good Counterpart , and Harmless Villain , their opposite in terms of threat level.

Movies and TV shows are expensive. To be viable investments, they need to turn a pretty sizable profit. To make that money, they need to make people aware of TV and movies. This is where advertising comes in: billboards, television and radio commercials, interviews on talk shows, etc. Without these things, many people simply don't know a movie exists. This is how tickets get sold, and why people tune in at prime time Sometimes, however, the studio or network just doesn't think it's worth the bother. Figuring that the money is going down the drain anyway, they simply slip the work into theaters, into its timeslot, hoping that it will just quietly go away, and they will have fulfilled their legal obligations. So the movie does get released, and people who know about it can find it and see it. But the studio doesn't make it easy. These are cinemae non gratae</ This often happens when Executive Meddling slams headfirst into a creator who really, really wants to create the work he wants without interference, but is too green to have Protection from Editors A variant of this trope developed with the COVID-19 Pandemic , which waylaid the releases of numerous major 2020-2022 films and even led to many shifting distribution strategies entirely . Several films that had been heavily advertised in the months leading up to theater closures, such as Mulan </, No Time to Die </ and A Quiet Place Part II </ , wound up having wasted massive amounts of ad money. As a result, many films in this era held back on major promotional campaigns until two months or less before their final release date, as a precaution against overspending at a time when a film's release strategy could change in the blink of an eye On TV, this is one part of being Screwed by the Network . These are frequently Not Screened for Critics . Those who actually liked them will be the ones who Keep Circulating the Tapes . Compare to Never Trust a Trailer , when a work is intentionally mismarketed

Cartoon Network

The Fermi Paradox , in brief, raises the question of why we have yet to observe evidence of extraterrestrial life. The simplest explanation would of course be that such life is extremely rare compared to just how mind-rendingly, jaw-droppingly, eye-wateringly, tooth-shatteringly huge the universe is , how hard it is to generate signals detectable across light-years of space, and what a small part of its lifespan we've been witness to, but many creators prefer to introduce a more interesting reason into their universes. This can serve two functions. On the one hand, it can provide the author

with some excuse for referencing alien cultures, providing alien archaeological sites, and similar without actually introducing a viable alien culture. On the other, it can allow for the creation of interstellar societies that would otherwise appear implausible , especially when they've been so active in our own backyard lately that we would presumably have noticed them in reality. Common explanations include: Contrast Absent Aliens , in which the simple explanation is taken as correct.

A classic gag chiefly featured in animation. It has all the implications of terrible injuries , without all that massive bleeding and annoying death getting in the way of the humor. When it turns up in live action, it's usually in a slapstick comedy, bonus points if it involves the undead or immortal "victim".

You don't activate your superpower without an announcement. After all, randomly bursting into flames at a dinner party would be rather rude of you, if you were the Human Torch So you put together a ritual that triggers things, complete with a Catchphrase . You shout "Flame On!" and the other dinner guests — or anyway, the audience</ — knows things are about to get flame-y In short, you (the writer) invoke your character's power to suspend disbelief long enough to do something way out of the norm. It can</ be an incantation or By the Power of Grayskull! . More often than not, though, it's just the Rule of Cool in action, rather than an actual incantation The Pstandard Psychic Pstance gesture seems to be a universal invocation of psychic powers. Contrast with In the Name of the Moon and Transformation Name Announcement , which come after</ the transformation, but before the buttkicking. Brother of Calling Your Attacks . Not to be confused with Magical Incantation , By the Power of Grayskull! or Words Can Break My Bones where the words actually do something. May overlap with the Survival Mantra or the Badass Creed Not to be confused with the act of invoking a trope

The writer brings a narrative trope into play by having a character consciously set it up. Some methods: Compare Exploited Trope (not making the trope happen, just taking advantage of one happening). Contrast Defied Trope , Discussed Trope . This is not the same as an Intended Audience Reaction . Only a character can invoke a trope; an author per se TECHNICAL NOTE: On the wiki, typing the word "invoked" anywhere within an example will disable the automatic YMMV flagging (denoted by a pair of scales) for that example. However, this is not a feature but an artifact of hasty programming - it's actually In-Universe

The characters are in a cave, or occasionally a building, and after a cataclysmic event, the falling pieces of the structure separate them into smaller groups. They must either find their way out alone, or if some of them have no way to escape, they must be rescued, often with a race against time Very common in video games, as a plot device for separating the player character from its party, because in single-player</ games, too much help from friendly NPCs would take away the meat of the game. Briefer examples are simply an Inescapable Ambush . More extreme examples fall under Party Scattering Contrast with Let's Split Up, Gang! , where they do it voluntarily, and Never Split the Party , where they're at least trying to avoid it. Compare Locked Out of the

Fight . See Split and Reunion

Frequently, characters will claim that it is in the nature of the human race to destroy itself . When the character is an alien but not a Proud Warrior Race Guy , they'll look down on us as primitive, violent, and socially unacceptable According to the more pessimistic sociologists, this is Truth in Television . Even the non-heavy drinkers agree that we possess this tendency. The basic reason for this is that our technical ingenuity — that is, our ability to devise new ways of building and doing things — is advancing faster than our social ingenuity — that is, our ability to devise new ways to associate and relate with one another. Some might quote the old popular saying: that we, as a species, are paradoxically too stupid to handle our own vast intelligence. Others might not go that far, but will admit that there might be a grain of truth to the saying, seeing how something at least indicates that while we are quite quick to see the benefits from our rapid advancements, we are significantly slower to identify the more negative consequences resulting from them, even more so when it comes to fully grasp them Part of this problem stems from our biology — at the core of every mammal brain is a snappish crocodile that is upset when others enter its territory or make sudden moves around them. Behavioral patterns that once ensured our survival now court destruction. Luckily, the desire for self-preservation keeps this in check. There's a reason that Mutually Assured Destruction actually prevented the Cold War from going nuclear The other part is cultural, stemming from the behaviors and values that we teach to successive generations. Because of this conditioned element, the exact degree to which we seek self-destruction waxes and wanes over long periods of time, but because our military prowess is now reaching earth-shattering levels , it may soon be the case that even a slight lapse in reasoning may render the entire matter academic. In addition, the idea of disposable elements, advancing technology and consumerist culture are having the side effect of propagating a growing attitude of instant-gratification and selfishness in society But whether or not we're actually likely to drive ourselves to extinction is a matter of personal opinion, since all we really know is that we haven't done it yet If the proposed solution to this side of human nature is a totalitarian dystopia, see The Evils of Free Will . May be used as a justification for a Zeroth Law Rebellion as well A Sub-Trope of Humans Are the Real Monsters and Humans Are Morons . Contrast Ape Shall Never Kill Ape . See also Pretext for War

Remember how we'd attach the letters A and E to almost everything? Good times . They stood for "atomic" and "electronic" respectively, so it could damn well apply to any new gadget at the time. Ancient history now...We've moved a vowel over The letter "i" can prefix anything In Europe at least the fad for i</ began in the eighties where it was commonly used as a suffix. It started with cars, such as the Golf GTi, where it notionally stood for fuel injection but did spread to non-automative products as a supposed sign of being technologically advanced. It was parodied to death by comedians like Harry Enfield and eventually became discredited for a few years before it began being used as a common prefix. . It also stood for "individual", as opposed to the Power Macintosh line of professional machines. It was later codified by the iPod, the most

popular portable media player. The "individual" meaning has since spread to items and software where the "Internet" definition makes no sense, so more recently people seem to figure it's used like the pronoun. As in: "This phone is mine, bitch , back off!" or "Look at me! This is what I'm like!". Ah, the power behind lowercase letters See also Super Title 64 Advance for videogames, and Xtreme Kool Letterz for other letters that make things cool. In Speculative Fiction , this can be a sign that Everything Is an iPod in the Future See also iPhony for direct parodies of Apple products

As mentioned before, Apple. Chances are, if you have marketed and sold a product with this type of idea, you got the idea from Apple.

Regret is a common theme in media. Perhaps one of the ultimate fears that an individual can have, given his and everyone else's limited amount of time on earth is to lose the chance to do something and never get it back.

The police are questioning a witness. The detective asks for a specific detail, such as the date of a past event or the name of a suspect. This is not something a witness would be likely to remember with precision However, the witness does remember, exactly and with certainty. Before we can raise an eyebrow, he explains why</ he remembers. It turns out he has some connection to the name, date, or other information. The suspect had the same name as the witness's father, or the date was his daughter's birthday This is essentially a Hand Wave . It saves everyone the trouble of long, boring scenes where witnesses consult their calendars, go through receipts, or any of the other activities one might do in real life to reconstruct such details. On occasion, though, the witness's offhand statement turns out to be a clue, or sets off a "Eureka!" Moment Standard in the Police Procedural

Alice makes a criticism of Bob. Bob denies it, but does so in a way that validates the statement . This makes it a form of Hypocritical Humor . Perhaps the most common criticism for this is being violent or short-tempered, perhaps because it allows a response of comedic violence , but plenty of other criticisms are possible, including stupidity (" No I aren't! "), vulgarity (" Fuck you! "), inattentiveness ("No, I'm not— What are we talking about again? "), vanity (" Oh thanks, you noticed! "), being pretentious (" Moi? " </), and immaturity (throwing a tantrum). See also Description Cut for the inverse of this. Compare Not Helping Your Case , I Take Offense to That Last One! , I Would Say If I Could Say , Oblivious Mockery , Oblivious to His Own Description , Immediate Self-Contradiction , Mirror Character , and contrast with Insult Backfire . The line itself (which is often attributed to Groucho Marx) is, of course , a play on "I resent that remark."

Ireland is famous for many things. The lush, green countryside. The friendliness of the people. Their red hair and mellifluous brogues (accents). The song, the music, the dance (céilí). People skilled with the use of explosives A Subtrope of Oireland , Demolitions Expert and Mad Bomber , the Irish Explosives Expert

is a person hailing from the Emerald Isle whose use in the plot is that of the explosives expert. As the Oireland page says, a great many Irish characters in action movies tend to be this trope. This trope is derived from The Troubles , a dark period of time for both the North and South, where bombings were carried out by various paramilitary groups (most notably the Irish Republican Army) against targets both military and civilian. In a real life inversion of this trope, the Defence Forces has a bomb disposal unit that makes regular callouts to disarm or perform controlled detonation on suspect devices that are a result of this Often found as part of a Western Terrorists cell. This trope also tends to overlap with Your Terrorists Are Our Freedom Fighters As this is Truth in Television and an inflammatory issue even today, No Real Life Examples, Please! . In a less inflammatory sense, likely also Truth in Television due to the number of Irish workers involved in railway construction in Great Britain, Canada, the United States, and Australia

An index for media produced in Ireland . This covers the full range of film, television, music, and other forms of creative expression in both Northern Ireland and the Republic.

So, you've got a funny character in a Slapstick , just lining up a wave of truly incredibly bad and unlucky physical traumas for the character to wade through for your audience's twisted amusement . Just one problem. The things your character is about to go through would kill any normal being. Enter the Iron Butt-Monkey , who can render lethal trauma into mere Amusing Injuries ... at least when it's funny A type of Acceptable Breaks from Reality , the Iron Butt Monkey is, simply put, practically immune to harm ... purely for the purpose of having hilarious injuries happen to him. Drop an anvil on him? He simply gets a nasty looking lump or be Squashed Flat only to reform once the weight is removed. Throw him off a cliff and watch him bounce down in a brutal manner? He'll be fine by the next scene . Incinerate him? He'll reform from the ashes or even simply be back next episode. One wonders how many lives this guy could save in the military Primarily an animation trope, Western Animation is particularly fond of this one A relation of Butt-Monkey , Made of Iron , and Slapstick . Where this is used on characters who in-canon have explicit superhealing, see Good Thing You Can Heal and Immortality Hurts . Unrelated to the Iron Woobie , although they can overlap at times Not to be confused with Iron Monkey </, a Hong Kong action film set within the mythology of Once Upon a Time in China </

An Ironic Birthday occurs when a character has had to make a tough decision or has just lost something of extreme value to him, and upon walking into a room is greeted with a surprise birthday party . This is not a celebration that makes everything all right; this is about the character having to pretend to enjoy what should be a happy time while secretly suffering. He's grateful to his friends, but a party is the last thing he needs Compare and

contrast Birthday Hater , where someone just flat out hates their birthday for one reason or another; the difference is that, for this trope, the reason for not wanting to celebrate is more recent and likely temporary, whereas a Birthday Hater 's motivation is often much more long-standing. Contrast One-Person Birthday Party (when the character is suffering because nobody else showed up to their party) and Forgotten Birthday (when the character is sad only because they</ don't know about the surprise party.). If their birthday is miserable but they don't</ have to act cheerful for a party, it's A Birthday, Not a Break . Can lead to Crying at Your Birthday Party

Related to the Gilligan Cut and the Description Cut , this is a comic device that brackets a hard cut with two versions of the same line. The first may be straight or even deadly serious, but the repetition ends up being funny: Or, on occasion, there will be a bit more irony present: Note that when used in anime, this bit usually includes a Sneeze Cut from the referred person, because the Japanese are allergic to being talked about behind their backs. This is Older Than Steam , being a classic trope of farce for several hundred years now. Often used in the delivery of Hypocritical Humor . Compare with the plain old Ironic Echo , which comes several scenes later, and Strange Minds Think Alike . Another form of Tempting Fate . Not to be confused with Description Cut . Compare Immediate Self-Contradiction . Contrast Twisted Echo Cut , where the echoing scene is unrelated and the echo is coincidental.

Bob makes a comment in the presence of Alice. Much later on, Alice makes the same comment in a different situation, often giving it an unexpected meaning in the new context.

However, this will also crop up with lines that were first made idly, innocently, and perhaps not even directed at Alice; in those cases the echo will simply be unexpected, and can be used for humor, shock value, or anything in between. The echo also need not involve two people, it still fits if Bob says both the initial comment and the echo Compare Flashback to Catchphrase , Exact Words , Bookends , Excuse Boomerang , Alternate Catchphrase Inflection , and Dialogue Reversal . Subtrope of Meaningful Echo . Ironic Echo Cut is when the echo comes immediately and the second speaker has not</ heard the first. Can be a form of Hypocritical Humor or a Brick Joke . Doing this as a SONG is often a Dark Reprise . May often result from a Perspective Reversal . If the original use was innocent and amusing but the echo is bitter or shocking, this may result in a "Funny Aneurysm" Moment . A critic sardonically using a work's own words to characterize its flaws is a Review Ironic Echo

This is when a character has an overwhelming fear of something that someone of their kind just shouldn't be afraid of. For example, a bird who's afraid of heights or a mermaid who's afraid of water Often, they get an episode or subplot dedicated to resolving this fear. Almost always Played for Laughs , although there will often be a dramatic moment where they are forced to confront said fear These can often be considered Absurd Phobias . May be part of a "What Do They Fear?" Episode . Compare Why Did It Have to

Be Snakes? , in which the thing that the character fears pops up at an unexpected and inconvenient moment, rather than being something that constantly confronts them. If a character is afraid of something they are</, they're a Boomerang Bigot . If they become</ the thing that they fear, it's a Karmic Transformation

So, you're watching a new show on TV. You notice the series has a gloomy-looking Goth character and you wonder what they named her. Maybe something dark like "Raven" or "Misery" or "Lady Death". They reveal her name, and it's... Sunshine? The gloomy-looking character's name is Sunshine? Yes, sometimes, a character is given a name that is ironic considering their personality, lifestyle, or whatnot. Often, this is Played for Laughs , but more serious examples do exist. See Ironic Nickname for cases when the character's nickname, instead of their given name, is ironic. Subtrope of Non-Indicative Name . Related to Fluffy the Terrible (where a scary monster or animal is given a decidedly non-scary name), Deathbringer the Adorable (where a cute, relatively harmless animal is given an imposing name) and Tom the Dark Lord (which applies Special Person, Normal Name to an evil character). A Dog Named "Cat" may also count as an ironic name, especially if the animal is named after its natural enemy, predator or prey . Contrast, of course, Meaningful Name . Real Life examples of this are also called " ", the opposite of aptronyms, which mean Meaningful Names.

For added atmosphere, play the music from while reading on. A Nursery Rhyme used to convey an underlying sadness and/or creepiness, sometimes made into a theme tune that sounds like a music box that's slightly off key. It's mainly used to indicate someone with a Squicky past, a child molester or other psychosis. Ironically, due to this trope, it's very uncommon for anyone to use nursery music to indicate anything positive any more, making it a common theme of Grimmification . Occasionally the writers want to be more poetic with it, and a character will sing the lyrics to some bedtime song. This is sometimes handwaved as being learned from a nanny or grandmother, since they tend to be rhymes no one has used in the last century. "Ring-a-Ring-of-Roses" (or "Ring Around the Rosey" as it's known in some parts of the world) is especially prone to this, due to the popular belief that a cute little children's song was written about the Black Death. the lyrics of the earliest documented and best known form do lend themselves undeniably to rather dark interpretations; enough that the Victorians started Bowdlerizing it with more lighthearted variants. Oldtime songs like " Singin' in the Rain " (seen in A Clockwork Orange </) and the works of Frank Sinatra are quickly becoming part of this trope. If you enter an ancient dilapidated mansion and a song whose original listeners are either senile or dead from old age plays over and over and over</ , you're in trouble. Also the famous "Hush Little Baby" or "Mockingbird" lullaby seems to be the top icon of this trope, it's simple enough for parents (or some creepy unseen killer) to ad-lib further verses as required. Overlaps with the Ominous Music Box Tune . Often goes with the Creepy Child and Ambiguous Innocence . See also Soundtrack Dissonance . The opposite, where the music box is used positively, is Nostalgic Musicbox . Compare and contrast Fractured Fairy Tale . Compare Creepy Circus Music and Sinister Whistling . Compare and contrast Creepy Children Singing , where creepy songs and nursery rhymes are played in the background to add tension and fear to

a scene. Zig-Zagged by many a Playground Song , which genuinely come from children's oral tradition but often just are that dark. When used in advertising, see Moody Trailer Cover Song . A bunch of Danish children's songs is about lovely events like crows and rabbits being shot by hunters, fish and crabs being cooked alive and eaten, royality being executed, and a lot of other deaths. "Mon Coq Est Mort". A song frequently used as a warm-up for school chorus classes, upbeat and peppy...and the title translates to "My Rooster is Dead". At least one high-schooler who never took French likely ended up unnerved when they had it translated by a French-speaking classmate. There's a Hungarian children's song from the time of the Turkish invasion, Katalinka, szállj el</ (Ladybug, fly away), detailing what the Turks would do to the poor ladybug if she doesn't fly:)

Irony As She Is Cast happens when known traits of an actor and the displayed traits of a role do not mesh. Perhaps a classically trained opera singer is cast as someone who cannot carry a tune to save their life, or a born-and-raised Jewish actor is cast as a Nazi. In order to qualify, the fans must know about said traits, otherwise there would be no dissonance. Their trait might even have been the reason for casting: Casting a talented actor as an untalented character is a common form, as it usually requires a great deal of precision. You have to be off tune in exactly the right way to be clearly off tune, at exactly the right time</ to engage maximum laughter; the level of skill involved for Stylistic Suck is frequently much greater</ than the skill needed to perform "properly". This version often implements Dreadful Musician , Hollywood Tone-Deaf or Bad "Bad Acting" (or any of the other tropes under Stylistic Suck). Contrast Cast the Expert (where this person was chosen specifically for</ their talent) and The Cast Showoff (where talent gets to be in the limelight). Irony As She Is Cast might be reactionary in a long-lived role; extreme cases might try to counter what's Ripped from the Headlines . Compare Casting Gag , when an actor is cast in a role that mirrors or parodies a previous role or experience, and contrast Actor-Shared Background , where an actor's characteristics line up with that of their character's. The Trope Namer is , probably the first real-life example of My Hovercraft Is Full of Eels , and not really related to the trope at all. But it makes for a good trope name.

There are different kinds of irony. In verbal irony, the intended meaning of words is the opposite of the literal meaning of those words. In situational irony, the actual outcome of an action is the opposite of the intended effect (of that action). Basically, you'd think A, but in reality, what really happens is the opposite of A. Let's describe what irony is not, since that is where the confusion mainly comes from (and a lot). Irony can overlap</ with those, but just by themselves, they are not irony. This is where the confusion of the meaning of the word usually starts. People try to apply it where it doesn't belong . It's rather common in fiction for one person to correct another who has incorrectly used the term . It enjoyed a renaissance in the '90s thanks to Postmodernism , which is a slightly different concept of irony. This type is completely different from the others. First employed by Socrates (hence the name), it's more of a debating tool than modern irony. Thus it rarely overlaps with the other types. In a nutshell, this is the use of constant questioning in order to reveal the truth of any position.

You know how kids like to ask "Why?" no matter the answer ? This is the more sophisticated version. You keep feigning ignorance of the topic, in order to force the other person to explain it further . The irony lies in the fact that you are treating the other person as one possessing coveted knowledge and/or wisdom far above your "lowly" station, the whole point in doing so is to expose the fact that they are, in fact, not</. Jon Stewart favors this method, as do many professors (particularly law professors). Closely related to Armor-Piercing Question . Verbal irony is part of the modern irony types, but it differs from the others in that the irony is intentional. Basically, you state something in a manner that has literal connotation, but expresses something different in the context of the situation. This may be done for any number of reasons, but typically the intent is either humor or emphasis. Note, however, that although a sarcastic tone does betray the ironic intent of the words used, this does not mean that irony is no longer present. Indeed, it is only tone and context that distinguish verbal irony from outright lying. For example, take the film About a Boy</. The main character's father wrote a hit song, and every time he mentions the song, people start singing it. When the eponymous boy and his mother do the same, they apologize, seeing the look on his face. When they mention he probably got that a lot, he politely says, " No, you're the first ." If he had said it in a sarcastic (that is, openly derisive) tone, that would be sarcasm. If he had said it in a normal tone, and added something like, "In fact, I'd like people to do it all the time," there would be a hint of mocking, also making it sarcasm. But since he said it the way he did, it's just an example of verbal irony. Now, what about lying? Though it may at first seem as though they may overlap, this is not really the case. Verbal irony has the intention of getting the meaning across. As in the example from About a Boy</ , he did mean that they were not the first, but that he was being nice about it. In the case of most lies, the intention is not to give that hint; it's just outright deception. This is basically letting the audience in on something of which one or more characters is unaware. Thus any actions or words from the character about this thing are ironic to the audience, because we know better. Take the Disney version of Sleeping Beauty </. Prince Phillip meets Briar Rose, but neither of them knows that other is royalty (and Briar Rose doesn't even know she is, herself) The Prince's father is horrified to learn that Phillip wants to marry a commoner, and it seems as though they can't be together, but we know who Briar Rose really is, so we know that they can. So this literally applies any time the audience is in on something, and watching characters react without knowing what the audience knows. Often a key part of a screwball comedy, but it can just as easily be played for drama or tragedy, such as in Shakespeare's Othello Another way to create opportunities for Dramatic Irony in a story is to alter the chronology of its telling, by making use of Flashbacks or doing the whole tale Back to Front . This style allows characters to make promises that the audience already knows were ultimately broken. Dramatic Irony has its own trope page. In truth, a more fitting term would be "Expectational Irony", since that is what it covers. Situational Irony is when the outcome of some situation or action is the exact opposite of the expected or intended outcome. Take the trope Failsafe Failure , for example. The expectation is for safety features to ensure that something is, well, safeOr see the tropes The Cobbler's Children Have No Shoes and Self-Fulfilling Prophecy . —— This is a specific type of dramatic irony, usually found in a Tragedy , Film Noir , or in general a story with a

Downer Ending . The character's words or even actions are not ironic to them (or perhaps anyone in the story), but the audience is fully aware that their actions will bring about a tragic or deadly result, all while they ostensibly fight against such a result. A tragedy can have dramatic irony in it without being tragic irony; tragic irony depends on the audience knowing how the story ends</ ahead of time. This might be intentionally produced by a Framing Device , such as making the whole piece a Flashback so the audience sees the end first (" Two households , both alike in dignity ..."), or it might be unintentional because the end of the movie becomes very well known , or somewhere in between those two , or it could simply be a story whose ending the viewer is expected to already know about from everyday life (such as Pearl Harbor </, Titanic </ or The Passion of the Christ This would be Tragic Irony if</ the audience knew from the start that the father had murdered his wife (say, if it were shown early in the film) and could foresee that investigating the father would lead to that discovery. If the audience discovered that fact at the same time</ as Charles, then it becomes situational irony (at least, the first time you watch the film) because the viewers and Charles suddenly realize that everyone would have been better off if he had never started investigating. Basically, the universe is screwing with you . The difference between this and situational irony is a matter of degree, but if it causes a mess of some sort, it's usually this. Take A Simple Plan . It's situational in that the expectation is of course simplicity, but the way things tend to just snowball, often through no fault of the initiator, is this version. The fact that most Self-Fulfilling Prophecies are caused by the very act</ of trying to prevent them. This is any of the above (save for Socratic), through hindsight. We know it happened, and unless we don't get the cultural causes , we know why it was ironic. For some more lighthearted examples of historical irony, see This Is Going to Be Huge and It Will Never Catch On . "Sort of like gold-y and bronze-y, but made of iron." -nee"). Not to Be Confused with the opposite of wrinkly.

A series which, by design, does not run regularly. It may be a series of annual made-for-TV movies, or a series composed of Mini Series airing every few years (But lacking the regularity of a Television Serial). Often happens when a Pilot Movie sparks enough interest to prompt a second movie, but not enough to prompt a regular series In the US, these are typically revivals of series which were originally regular in format. They are far more common in the UK. British Irregular Series are often aired on public television in the US as part of a Genre Anthology such as Mystery </ or Masterpiece Theatre </

Columbo </ started life as a Made-for-TV Movie , then became a series which aired as every third episode of The NBC Mystery Movie</ . Later, it became a series of TV Movies which aired with decreasing frequency.

Some orders are meant to be carried out when given, no matter Swhat</. That's great for making sure the job gets done, and it Sprevents someone pretending to be in charge from cancelling it, Sbut if the order actually does need to be cancelled... well, Ssomeone's going to have a bad day. If the order goes through and Ssomeone dies, you can expect someone to say " My God, What Have SI Done? ". In less serious cases, it's Played for Laughs as the Scharacters scramble to stop things elf-destruct mechanisms ,

Sbombings, and assassinations tend to be the most commonly used Simplementations of this trope ee also Irrevocable Message , SRhetorical Request Blunder , No Matter How Much I Beg and Can't SStop the Signal

You meet yourself somehow, through Time Travel , dimension-hopping , cloning , or some even more exotic form of Applied Phlebotinum . Inevitably, if you spend enough time in the same room as yourself, the two of you will end up speaking in unison The implication isn't usually that there's any kind of mystical connection between the different versions of you. It's just that whatever you're saying is so characteristic of you that any possible version of you would have said it at that time See also Single-Minded Twins . Related to Something Only They Would Say

At the end of a movie or story, a character is shown to have written a book related to the experiences in the movie, usually after they settle down and have their happy ending If it happens at the end of a book, the implication is that you have just read that book; sometimes it's stated a lot more bluntly. Sometimes the first thing they write is the first thing you read: the passage becomes literal Bookends This is usually a straight out invocation of Direct Line to the Author , with the implication that anything that doesn't quite make sense was due to the main character forgetting things, being mistaken, guessing wrong about events that they didn't personally witness, or lying for the sake of practicality A more recent variation more common in film and television is to end with a film or television series being produced about the events. Many times the ending itself will switch from "reality" to the film under production before the camera pulls back to reveal the set and crew . Often this will involve self-mockery by taking previously utilized tropes Up to Eleven , the story being Recycled IN SPACE! or another increase in weirdness May be responded to with Who Would Want to Watch Us? . Compare with Narrator All Along and Tagalong Chronicler . Write What You Know and Write Who You Know occur when an author draws general inspiration from their experiences or people in their lives. See also It's for a Book , when writing becomes an excuse for dubious interests. Don't confuse with Wrote the Book , as there they may not have literally written a book

A character(s) stranded on a Deserted Island (or a desert) builds a message with sticks and/or stones for a passing plane to see. It usually reads "HELP", although "SOS" is common as well Frequently parodied by the character writing a much longer message than necessary, mispelling a word, or having some other wacky problem This is Truth in Television , as any large and apparent ground-to-air signal can attract the attention of an aerial search. Many people are unaware that the international symbol is a clear X shape Sister Trope to Message in a Bottle . Related to Deserted Island In Hetalia: Axis Powers </, the trio write "SOS" on the beach of the Deserted Island they are stranded on

Played for laughs in a The Far Side </ cartoon, where the message says "HELF" and the passing pilot consequently decides it's a false alarm.

In Madagascar </, Alex first builds a Statue of Liberty, but it burns down ("You maniac!"), and later, "HELP," but the branches from P fall, forming "HELL." This has been a challenge in several seasons of Survivor </ . In the original Survival Kids</ game (the

series that went on to become Lost in Blue </), the way to get the quickest ending was to build one of these on the beach. You'd then get rescued. (It is, of course, a long ways from the Best Ending, which you need to unlock New Game Plus mode—in which your character rescues the other child on the island, befriends them, the two of you escape on a Lost Technology ship, and grow up to get married.)

In pictures for sad children </, David Foster Wallace writes a .

Bob's Burgers </: Linda goes for a flying lesson in the " Seaplane! " episode and it turns out that the instructor likes to fake an emergency landing near a remote island then seduce his female students with a picnic of wine and cheese that just so happens to have. After the seaplane floats off, Linda makes a help message out of the wine bottles that he left from his previous visits.

In 2015, a 63 year-old British tourist called Geoff Keys got lost in the Australian outback. He was found after a search helicopter spotted the message "HELP 2807 —>" (the latter parts was the date and an arrow pointing in the direction he was travelling) that Geoff had carved in into the sand.

A deserted island which is not-so deserted. Somewhere on the island is a horrific giant beast . The telltale signs that it's there are usually giant footprints in the sand along the beach, the rumbling of footsteps or the clattering of trees being knocked down, and of course, a horrifying roar Usually, these types of creatures are the island's dominant species or ruler, lording over the place because they are the biggest and strongest . In some cases though, they are guardians protecting something residing on the island . Of course, there's also the possibility that the creature is trapped on the island , being surrounded by water on all sides makes it a good prison , in the event the creature cannot swim or is weak against water The type of creature that is usually the island's inhabitant can range from creatures from prehistoric times to everyday animals of the giant variety , especially crabs , spiders , and insects . Eldritch or Animalistic Abominations are not excluded from this. In some cases, the island can even be a domain of Mechanical Monsters . Of course, the visitor of the island might not even see what the beast is, due to perhaps being an Invisible Monster or perhaps just to invoke Nothing Is Scarier Can be an Island of Mystery if those that land are unaware of the creature residing on it at first. Usually used in a Trapped with Monster Plot , especially if the island's visitors are marooned. Different from Turtle Island , which is where an island is a creature, although it is not impossible that the moving island has a beast imprisoned on it. Similar to Beast in the Maze where a creature resides in a labyrinth instead of an island. If there is more than just one giant beast on the island, a Behemoth Battle is likely to happen between them. If the creature has a large stash of treasure, that is a Dragon Hoard . For a wider variety of monster dwellings, see Home of Monsters

This is what happens when a song with lyrics which are intended to be ironic is (ironically) used unironically in the soundtrack of a show, demonstrating either ignorance or willful misuse by the

producers Commercials are major offenders . The worst examples of that so far happened when Smash Mouth 's "Walkin' on the Sun" became a jingle for Mercury, and General Mills' rewrite of Melanie Safka's "What Have They Done to My Song, Ma" to "Look What They Done to My Oatmeal" A similar effect is when a song with an upbeat melody is used as background music in upbeat scenes despite having very dark lyrics . This sort is also Soundtrack Dissonance of the other kind. Creedence Clearwater Revival 's "Bad Moon Rising" and, as a parody, Eric Idle (of Monty Python)'s "Always Look On the Bright Side of Life" are examples Why does this happen? In many cases, the Dissonance comes between the first verse and the second, or between the verses and the chorus. The problem is that the first verse and chorus are the parts most people remember about a song and the parts most producers use. Sometimes, they only know and use the chorus. In many examples (especially the commercials), the lyrics that cause the dissonance will be excised, leaving only the beat/melody and the more famous individual lines. Once they've got you humming the melody, the song has done its work in associating itself with their product and/or service. The rest of the lyrics don't matter (until you head off to the kitchen) This trope is named for the Alanis Morissette song "Ironic"; see our article on her for more on that Death of the Author is a related idea, where people deliberately disregard the original song's intended meaning and replace it with their own interpretation. If the song is also sung by a different person than the original artist, it overlaps with The Cover Changes the Meaning Compare Poe's Law , Misaimed Marketing , and Repurposed Pop Song . Related to Analogy Backfire . Sometimes overlaps with Adaptational Context Change . This trope is about music only and should not be potholed as an equivalent to Take That! . There is a page about irony itself — what it actually means, and what the different types are — and it's called (fittingly) " Irony "

The iSophagus is any instance where, by swallowing a musical device or instrument, the swallower no longer speaks but emits music. Sometimes the person who swallows said item can magically control what is coming out of his/her mouth. Barring that solution, the person must inflict bodily harm to him/herself to "change the channel." Oddly enough, all that is required to make no noise is to shut his/her mouth. It stays in the person until it is expelled by either a cough, hiccup, belch, sneeze, or pretty much anything except going out the back door . Otherwise it's simply forgotten about. Additionally, a character may receive radio transmissions on his or her dental fillings, often citing that the vibrations from the sound wave vibrate the skull and ear drum. However, this is based on the misconception that radio waves, a form of light, work in any way whatsoever like sound waves. They don't. It also only picks up one frequency, effectively giving the afflicted the ability to listen to one perfectly tuned radio station. Again, this is often brought on by some grievous injury to start or stop it, and to change the frequency. Sister trope to The Croc Is Ticking . This item is available in the Trope Co. catalog. </

A collection of works created by Israelis or in Israel :

Snarky question used to imply that whatever the previous speaker was describing, the real subject matter at hand is sex: Alternate phrasings include "Is that what you kids are calling it these days?"

and "Well, I've never heard it called that</ before." While not limited to either gender, it does seem to be applied to eager young females most often, usually by older women who may feel threatened by them. It is often mixed with Accidental Innuendo , with the original speaker literally describing a perfectly true, innocent situation, and the asker mistaking</ it for an innuendo because of how odd it is. This happens in many examples of Truth in Television as well: For example, when Los Angeles mayor Antonio Villaraigosa admitted to having an extramarital affair with a Telemundo reporter who was the Mayor's Office Correspondent for the station, the number of different phrases that "it" could be called expanded into a Hurricane of Euphemisms . ("Covering the mayor's job," "reporting on his affairs," "staying on top of his agenda," "working the beat," etc.) This can extend to non-sexual subjects, if the subject of the remarker's disapproval is clear. (Kangaroo courts , for example — "We will, of course, be giving you a fair trial." "Oh, is that what you call it?") See also Have a Gay Old Time and Double Entendre . Contrast Accidental Innuendo . Compare Unusual Euphemism , where they actually are</ saying something dirty.

A character is making an announcement on TV/the radio/a PA system/what-have-you. Either at the beginning or, more commonly, after the end, the character will be heard making some tangential offhand or vulgar remark, only to (belatedly) realize that they're still on the air and said unsavory remark just got broadcast live to their audiences. May lead to Endangering News Broadcast when what they said was supposed to be a secret. There is a certain amount of Fridge Logic at play when this occurs in something pre-recorded, as these moments would be edited out under normal circumstances. But that isn't as funny . Expect to see a Face Palm and something along the lines of "Oh God, is this thing still on?" Compare Did I Just Say That Out Loud? , Forgot About the Mind Reader , Left It In . If a character is deliberately tricked or provoked into this, it is an example of the Engineered Public Confession . Not to be confused with Is This Thing On? , nor with what people say about shows still airing despite having fallen from popularity many years ago . May overlap with Studio Chatter , although that is always deliberately left in and sometimes scripted. Contrasts with Leave the Camera Running , which is done deliberately. Time to go find that page... Wait. Is this still on?

In Wallace & Gromit </: The Curse of the Were-Rabbit </, Victor whispers to the Constable not to start a panic, but the were-rabbit wasn't dead yet. Unfortunately, the Constable accidentally repeated this through his megaphone for the entire vegetable competition to hear, causing a mass Stunned Silence . Victor facepalms while the Constable says "Oops" before everyone goes into a panic.

This trope is used by both villains and badass heroes or Anti Heroes , particularly the loner action-hero kind They're cornered. They know it. They surrender. They may even Kneel Before Zod Except, when the offer is accepted — They launch an attack when the opposition drops their guard. This move may let them completely blow away the opposition, or it may only provide enough confusion to allow a timely escape, depending on just how

badly taken in the opposition was One variation involves the one surrendering intentionally allowing himself to be captured in order to undermine the enemy from within. Often he must rely on The Mole to break him out of his prison, though sometimes he can manage this on his own This is the exact opposite of the Graceful Loser Note that in Real Life warfare, this is a genuine war crime since the Hague Convention (signed before World War I); fake surrenders are "perfidy" because they discourage the opposition from accepting genuine surrenders. In other words, if you don't honor your own surrender, not only does it ensure that the enemy will</ get you back good and hard next time, but others who are genuine in their intent to surrender may very well find the enemy refusing to accept their pleas out of paranoia (see the Real Life section for how justified such fears are). Similarly, the flag of truce is a protected symbol and its misuse in war is against international law Compare Trojan Prisoner , Defensive Feint Trap , Aggressive Negotiations , and I Lied . Wounded Gazelle Gambit is similar, but even more cowardly. See also Playing Possum , Sick Captive Scam (which also relies on faking vulnerability to get the drop on someone), In the Back , and Dirty Coward

Someone accused of Arson, Murder, and Jaywalking responds, "How dare you? I would never</ jaywalk!" After being given a Long List of their flaws and transgressions , a character responds by selecting one of the flaws and saying "I am not (flaw)!" as if to imply that all the other flaws were all spot-on. For maximum comedic effect, offense is taken to the mildest one in the list , or the offended has to ask the offender to repeat the one he's insulted by ("Hey, I am NOT a... um, what was that last one again?") which insinuates that all of them may be accurate. Frequently, they'll be entirely justified . Despite the name, the character doesn't always pick the last</ one. If their Berserk Button comes up, it's going to offend them more than any other insult. It can be used sarcastically with affable 'scoundrel' characters , and a staple of the Deadpan Snarker . Sometimes refuting the most easily refuted charge can discredit the whole string for an in-story audience. Alternatively, a character may take umbrage at all</ the insults, but address the one that bothers them most rather than getting into a point-by-point argument or address one that isn't a matter of opinion. Sometimes, it's just that only one of the set of insults actually matters, to either the speaker or target or both. This can also be used for character exposition. A villain may not care about being called a brute or a sadist, but be offended by being called a wimp. In real life, it's done as an Insult Backfire , as they respond to the petty insult while ignoring the larger ones as if to say "It's not worth my time". A variation on this is for the character to claim that the string of insults is a half-truth, letting the viewer try to decide which parts are true or not. It's occasionally inverted with a bullying character playing the Jerk with a Heart of Jerk card and "apologizing" for an insult in a way that degrades the insultee(s) more. For example, calling an entire group of people "pigs" and then saying: "I'm sorry. I hope I didn't offend any pigs." Or calling someone "ugly" and, when an apology is demanded, saying: " Okay, I'm sorry you're ugly ." Compare: My Friends… and Zoidberg! , Insult Backfire , and Wrong Insult Offence . This is a case of the character on the receiving end of Comically Missing the Point .

A list with media originating in Italy .

Aldo, Giovanni and Giacomo

It's Exactly What It Says on the Tin : the motivation of an amoral character seeking... well, amusement. It's not that they enjoy being good or evil — they may not know or care about the difference — but they do whatever they feel like without regard for others. They don't need a motivation or justification for doing anything beyond the amusement of the act itself. As a result, they almost inevitably do things that are dickish, maybe even cruel, but generally not outright</ evil. This same character will lead you into a trap, fight you to the death… and then stop on the brink of killing you to laugh and say "Are you all right?" They won't kill the hero, because they find their attempts to save the day amusing, or are intrigued by the sheer selflessness of their thinking. They may help the hero, they may help the villain, they may do both at once or screw over both at once. They are rarely if ever a driving force behind a story, but they nonetheless play a significant role. And why do they do all this? Why do they switch sides so often ? Why are they working below the Big Bad when they're just as powerful and intelligent as they are , if not more? Why did they make out with the hero of the same gender ? Because it was fun. They'd do just about anything for a lark, really. Please note, this is different from For the Evulz . Whereas a character who commits evil acts For the Evulz does so because they like seeing other people suffering, if this character does evil things it is only because they shatter the boredom of everyday life — the character's not out to hurt anyone per se, but they don't care (much) if they do. They usually believe Victory Is Boring , and if they're a Punch-Clock Hero or a Punch-Clock Villain , they're in it primarily for the entertainment value. They're incredibly dangerous to trust, and even they know it, perhaps noting how foolish the hero is to trust them. In action movies, they can be a really awesome fighter, but they won't attack either side unless there's some entertainment value to be had, or if their life is in danger. If they stick with the good guys all the way through, when victory comes, they may leave to have more wacky adventures, or maybe character development will have them taking things more seriously. Just how much they care about collateral damage and hurting innocent people (if at all) varies. One of the few ways to really make an It Amused Me character take things seriously is to put one of their playthings in danger. Often such a character will be the Wild Card , an Enigmatic Minion , or Chaotic Neutral . A common saying of The Trickster characters, the Eccentric Millionaire . But be wary of the character devolving into Chaotic Stupid . As you may have noticed, the line dividing For the Evulz and It Amused Me is something of an academic distinction. It is often hard to tell from a single act whether a character enjoys evil actions solely for the amusement value of the acts (It Amused Me) or whether they also/mostly enjoy the thrill of acting evilly (For the Evulz). Generally, a character who truly does things For the Evulz will do things that aren't fun or interesting in the name of evil, which they seek at every opportunity — a character who does things because It Amused Them wouldn't bother because if it's not fun or interesting, why do it? Such characters are not necessarily without a sense of morality, as they have been known to minimize the collateral damage of their schemes, for example, or even to stop</ what they're doing if they think they're harming the 'wrong' person or people.

Someone motivated by For the Evulz would never do this. On the other end of the scale, when a villain repeatedly gives this justification for supporting the protagonists, it can overlap with I Was Just Passing Through . The trope is usually all the motivation one needs if one is a Troll . See also The Gadfly , who does things that trolls do, but for reasons besides amusement. Subtropes include Teasing from Behind the Language Barrier , Prank Punishment , Delighting in Riddles , and Loves Secrecy .

Something hideous is lurking in the dark, eldritch depths of... your crisper drawer Interesting things breed in the depth of the refrigerator. Anyone who has ever had to clean one out can attest to that: foul-smelling, congealed mac 'n' cheese, shrivelled carrots and "furry" meat. The TV fridge, however, is another beast entirely. On TV, when life grows on your food, it is more than just life: it is sentient, multicellular, intelligent life. The back of your average comedy fridge is a breeding ground for all kinds of biological horrors — from oozing green slime to entire sapient races of leftover lasagna people to pasta-tentacled Eldritch Abominations . Creatures bred in the depths of an old Tupperware container make excellent Monster of the Week fodder Some shows may extend this trope to other flagrant displays of bad housekeeping, creating life from unwashed underwear and the dust under the bed. We honor them here as well. They obey the spirit of this trope, if not the letter. When the filth has conquered entire rooms or even the house itself, you have Trash of the Titans Subtrope of Creating Life Is Unforeseen . Contrast Empty Fridge, Empty Life . Unrelated to Fridge Horror . Not to be confused with It Came from the Sink

Something comes from a drain or a faucet of some sort as an early sign that things aren't quite right or just as a form of unsuspected horror. Blood, bugs, wads of hair or even the monster itself are popular choices. Blob Monsters , in particular, really like to invade sewer systems. In some works, it can be part of a delusion a character is having during a mental breakdown Depending on the situation, this may also be a sign of either some kind of supernatural effect making things work like they shouldn't, something infiltrating the building through its sewage or water pipes, or simply a sign of severe uncleanliness and deteriorating hygiene See also Toilet Horror , where horror scenes happen in the bathroom Not to be confused with It Came from the Fridge , which refers to over-aged leftovers developing into new forms of life

Our heroes are battling the fearsome Monster of the Week . Maybe it's got acid for blood , or More Teeth than the Osmond Family , or can violate the laws of physics with ease. But gradually our heroes realize something even more terrifying. This creature isn't just some mindless predator. In fact, it could be just as smart as they are.. During discussions of this trope, the and activities of ants may come up It can evoke What Measure Is a Non-Human? to the viewers, often involuntarily, whenever the monster turns out to be as intelligent as a human being (i.e. pretty likely sapient). Nevertheless, the existence of this trope can mean that the antagonist had a motivation or goal simple enough to be mistaken for the behavior of a mere animal, so that many of its scenes could be acted by a Non-Malicious Monster without much difference. Until it does something unexpected Smarter Than You

Look and Obfuscating Stupidity are the human equivalents. Not Even Human is this trope's inverse (a thing that seemed to have intelligence at first is revealed not to). See also dehumanization for when non-human creatures’ ability to think intelligently is dismissed because they are not human. The Non-Malicious Monster is an aversion, a creature that is led by instinct and not any advanced thought Compare Monster Is a Mommy , similar in terms of humans underestimating the motives of "monsters". See also Super-Persistent Predator and Suspiciously Stealthy Predator

Two people who are Just Friends do something that proves otherwise. Be it an Accidental Kiss , Almost Kiss , Fake-Out Make-Out , Kissing Under the Influence , or whatever. Afterwards, they will simply insist that It Doesn't Mean Anything or didn't happen . Their body language usually betrays their true feelings towards the situation, and one of the two will usually come right out and say " It Meant Something to Me " One common version of this is when, for one reason or another, character A asks character B to pose as his/her boy/girl-friend or significant other. Usually ending up with both characters awkwardly ambling through being told what a cute couple they make. This is also one of the first things the Tsundere will say in her defense If this trope involves them insisting that a shared kiss didn't mean anything, the agreement will often be followed by a kiss. Nothing to do with word salads , Faux Symbolism , Death Is Cheap , Speaking Simlish or The Points Mean Nothing

Murder, mayhem, and destruction are not things that the average person would readily consider. But if you listen to the average fallen hero , jaded soldier or brutal knight , he'll tell you that it gets easier with time. After that first act of destruction and the attendant wave of revulsion and psychological trauma passes, it becomes easier to stand doing it again, and eventually it becomes second nature. Heck, you may even forget why you braced yourself to do it in the first place This trope is often used to segue a character from your average guy to a cold blooded killer; the more he's had to kill, the less he cares each time he's done it. It's also usually part of the backstory for a Hitman with a Heart . Occasionally it also is invoked in crime dramas in storylines where use of deadly force by police officers becomes part of the story (most notably the Dirty Harry </ films), wherein idealistic characters (often newbie cadets who have had to end a life for the first time) express fear of this trope. A first kill scenario often occurs in films and TV series involving newbie officers/agents, with "it gets easier" often implied if the character proceeds to amass a body count as the film/series goes on without any apparent ill effects If a work goes out of its way to show that a character never had this problem for their first kill, that is usually a hint that they are Ax-Crazy , sociopathic , or something similar. On the other side of the coin, beware a character who lets it get too </ easy, because then it's just a stone's throw from doing something that makes even other jaded characters balk Most stories about The Mafia have this plot line in it, mostly for the main character, who starts out unwilling to kill people, and eventually having no problem killing people when necessary The main exception is The Coroner character, a vital medical professional whose very profession involves dealing with death and circumstances

surrounding it with utter casual dispassion to provide the vital information the police need This works in Real Life , folks. At least the boot camp has to take a whole year to prepare you to the possibility of killing someone. And they've gotten better at doing it as well, though it must be noted that there are always some people who, despite training, have a mental block that keeps them from pulling the trigger. And sometimes, there are people who never have anything resembling a block, even during their first time Compare Gaining the Will to Kill . Contrast the more idealistic It Never Gets Any Easier . Closely related to He Who Fights Monsters Not to be confused with video games that are difficult in the first few levels and get easier later on (that would be Early Game Hell). No relation to Slow-Paced Beginning , which is about a work becoming more engaging after a slow, expository build-up

"Murder By Numbers" by The Police touches on this idea:

A Stock Phrase . When a character is struck speechless, stunned, going through a Heroic BSoD , or generally unresponsive for whatever reason, another one will tell the responsible "I think you broke him/her." Or someone in the peanut gallery will just comment, "I think X broke Y," or any variation thereof. Most often whispered as an aside Frequently used for comedy, but can be part of a dramatic setup too

Someone tries to class up something by "pronouncing it poshly". Most commonly this is done as a response to other people pronouncing the word in such a way that it sounds much sillier. Whether the fancy pronunciation or the obvious yet silly one is "correct" is usually beside the point. The point is, that for some people, keeping a name filled with aristocratic airs is Serious Business This practice likely originated (at least as far as we know) in the Middle Ages among upper class families who had common surnames and didn't want to be associated with their lowly upbringing. The Featherstone-Haughs, for example, were named for a poor farming village, so in order to make themselves sound posher they changed the pronunciation of the name to "Fanshaw" Usually the "high-class pronunciation" uses French pronunciation, with varying accuracy . Today this is probably because Everything Sounds Sexier in French and as we all know sexy people can't be made fun of. The original reason for this is likely because from the 17th century all the way until the mid 20th century, French was considered the Common Tongue of European diplomacy This trope is related to the linguistic phenomenon known as May</ overlap with My Nayme Is but not every name that's pronounced differently than its spelling would indicate is this trope. Compare also with AcCENT upon the Wrong SylLABle , You Say Tomato (where people argue about how to say a word) and Insistent Terminology , with which it sometimes overlaps An interesting fact: Saint Tropez actually is pronounced Tro-pay. "Trope" isn't, though, obviously : Before adding an example, make sure that the person(s) doing it are doing it specifically to make the word sound posher and not because they are mistaken how the word is pronounced, eg. Nuclear/Nukular Contrast No Pronunciation Guide . See also Uranus Is Showing

"It Just Bugs Me!" is an exclamation that tropers used to state that they find something odd or Fridge Logic triggering. Also

spelled "Just Bugs Me" or "It Just Bugs Me". A section of the TV Tropes Forum and the subpages now known as Headscratchers were named after this line Unfortunately, this line also accompanied much Complaining About Shows You Don't Like , sometimes even about Real Life . Thus in the earliest days of 2011 the section of the forum was deleted and a firm rule installed that no complaint threads be made in the forum. The rename of the subpages to "Headscratchers" took place in the same year

Whenever you try to explain a storyline to a friend, especially in Arc heavy shows, you often have to pepper your dialogue with a "Not Making This Up" Disclaimer When you watch a story from the beginning, when a major plot point happens you are often primed for it because of the events of the story that build to it. Then you try to explain it to your friends... which results in blank stares, because they weren't primed the whole story for it, no matter how well you describe it to them This is a phrase to use when describing a complicated story point, because really, a person does not need to hear the history of Star Trek </ from the beginning to understand the use of a trope The reasons why this is needed can vary, quite often due to Continuity Lock-Out , Mind Screw , and/or a Kudzu Plot See also Less Disturbing in Context , a closely related concept, and Makes Just as Much Sense in Context , the direct opposite of this. May be lampshaded by calling a statement A Rare Sentence As this is a page defining fanspeak, there's no need for examples, though obviously this can happen in Real Life as well due to lack of context

Medical professionals and others who work with human life and death day in and day out always seem notably emotional, sometimes to the point of breakdown. Often, in reality, although people might have some problems the first few times, they quickly grow used to what is, after all, part of their profession. For any given person or family, the sudden death of a loved one can be a traumatic and tragic event, but for the people who see it on a regular basis, it doesn't have the same impact. Get a bunch of paramedics, firefighters or other first responders together in a room relaxing and inevitably you'll eventually get morbid jokes, pitch-black humor , and stories of "good runs" where "good" would be defined by the average civilian as "scene from a horror movie". Even if the characters are normally professional (such as in police procedurals, where someone dies horribly in every episode), you can expect to see tears and barely controlled rage if children are involved. (Though, even for the real ones, there's that occasional deader that really rips them up, and this is often a child. Especially if the real worker has children of their own.) Typically, only The Coroner is allowed to face such things like gruesome death dispassionately as a professional who has seen the most hideous things done to a human body before and is long past being bothered by it. The trope is named for the phrase that will be uttered to the Naïve Newcomer who is experiencing this kind of sorrow for the first time. It can be Truth in Television , as even the most jaded of these people probably have a story of a time when they'd been at the job for a while and something about a scene they were called to hit them incredibly hard. Nine times out of ten, it involves children or infants. It's also worth pointing out that Post-Traumatic Stress Disorder exists in every job where workers are asked to internalize what are, after all, natural emotions; if the viewer became as inured to violence and death as real workers become on repeat viewing, they would lose emotional connection , decide it

wasn't exciting enough and stop watching . Which, of course, never happens. Contrast with the more cynical It Gets Easier and Gaining the Will to Kill .

...and if it fails, too bad. You only get the one shot It Only Works Once is a trick or technique which is completely useless in the following episodes. It could be something where you literally have only one shot, like a Forgotten Superweapon or other Applied Phlebotinum that cannot be replaced once it's used up. It might be a tactic that relies on the element of surprise, like an attempt to exploit an Achilles' Heel vulnerability that the enemy will correct or at least guard more carefully once it's brought to his attention Reversed, it is a common trope of cartoon series. The Big Bad will come up with some undefeatable plan that almost</ works save for some streak of luck on the part of the heroes (see the Road Runner shorts for some especially lucky breaks), but will never think of trying it again after being foiled the first time Occasionally a special attack that Only Works Once will end up being used in The Worf Barrage When you're getting near the end of a show or film and you know the trope will be averted because it's near the end and not a tragedy work, you're being Spoiled by the Format Never Recycle Your Schemes is a subtrope. Compare So Last Season , Forgotten Phlebotinum , Holding Back the Phlebotinum , No Plans, No Prototype, No Backup , and Won't Get Fooled Again . See also Adaptive Ability , Reed Richards Is Useless , and the Disposable Superhero Maker . Most Wave Motion Guns apply a limited form of this trope by making its use prohibitively slow and energy-intensive, but the usual dramatic application is rather different . Often overlaps with Death-or-Glory Attack . See also Limited-Use Magical Device , which involves a magical object or magic spells that can only be used a limited amount of times, often just once

There's "hard" science fiction , which adheres only to what is currently known or theorized. And then there's "soft" science fiction , which usually either offers little to no explanation beyond "it's a time machine!/ray gun!/clone!, etc", or makes use of Techno Babble , which is when the writer gives a reason that sounds science-ish and trusts the Willing Suspension of Disbelief to take care of the rest But there is some science fiction, usually on the "softest" end of the scale, that deliberately uses what is obviously nonsensical science, with no illusions about the audience ever taking it as anything but a joke. It may explain the scientific principles on which the phlebotinum works, but the principles are so outlandish that the audience has to shrug and say, " it's comedy " Oftentimes, Noodle Implements are needed to harness nonsensoleum. Other times, Achievements in Ignorance are the catalyst that allow nonsensoleum to work, and it will stop working once the characters realize that it shouldn't be possible . If they can still do it despite recognizing that what they're doing should be impossible then it's Beyond the Impossible . If a person has powers that run off of this trope then they may be using Literal Metaphors to make it work Can be seen as an acknowledgement of the Rule of Funny . Compare Insane Troll Logic , which is logic that is not supposed to make sense. If the explanation is used to cover a plothole and creates an even bigger plothole, it becomes a Voodoo Shark Sometimes justified by The Spark of Genius or Psychic Powers

A favorite trick of the Alpha Bitch is to tell the Ordinary High-School Student that the High-School Dance will be a costume party and that everyone has to dress up as, say, a pirate. She is, of course, lying, but the heroine believes her due to Genre Blindness Therefore, the heroine shows up at the dance dressed as a pirate (or, more likely, something impossibly elaborate and completely bizarre, such as a pirate ship</) and thus look like a complete dweeb. Either Hilarity Ensues or the heroine discovers how to take this rather cruel Practical Joke and make the most of it, much to the Bitch's dismay. (In either case, the heroine will be so</ Genre Blind or so sweetly naive , that she fails to notice until she's at the center of the party and surrounded by people</ that she's the only one in costume.) This can also be pulled by the heroine if it's directed at a character mean enough to "deserve it". However, an Unsympathetic Comedy Protagonist is allowed to pull it on someone not quite that mean. This trope may result in An Aesop about trying to get In with the In Crowd . See also Underdressed for the Occasion , which can occasionally result from a similar prank. Compare Uninvited to the Party , where they're so uncool they're not invited, period. Not generally related to For Halloween, I Am Going as Myself and tropes related to that.

Ah, the Ego The part of the psyche that defines you as an individual, and considers itself (read: you) a separate entity from the rest of nature and even the entire cosmos, the ego encourages people to value themselves as well as their personal wants and needs instead of just being an Extreme Doormat . While necessary in moderation, allowing one's ego to become overinflated leads to self-centered and downright embarrassing behavior. Such an excess of self-importance can be called egotism The egotist seems to think that the world ought to revolve around them and their every little whim, and is ready to walk all over other people in order to get what they want. They expect others to wait upon them hand and foot, make way for them on the sidewalk or let them cut ahead in line, help them first even if there are other people in greater need, and sacrifice their own best interests for whatever the egotist demands. They don't care about how their actions might harm other people, yet display Moral Myopia when someone else does something to harm or inconvenience them. On the highest end of the ego scale is a terrifying form of Obliviously Evil , when the egotist is unable to comprehend that they're doing anything immoral because they are unable to comprehend that other people have feelings at all Obliviously Evil villains are usually sympathetic Anti-Villains , but villains whose obliviousness are derived from their inability to comprehend that other people even have feelings e.g. Judge Claude Frollo and Shou Tucker , are usually even viler . Exactly why they think they're important and everyone else isn't will vary from case to case. For some, it could be the belief that they're superior to normal people because they are more beautiful, talented, favored by a deity, etc.—which may or may not be true—while others are simply so lacking in empathy that they can't imagine anyone else's pain or feelings being as real as theirs Selfishness is a big part of the definition, but even beyond that an egotist thinks of themself as being the focus of everything that anyone else does. They assume that everyone knows who they are and what they can do, which might be plausible if they are actually important, wealthy, or famous, but becomes Small Name, Big Ego if they are actually much less special than they think. If anybody fails to recognize them or treat them like

royalty, they feel intentionally snubbed or insulted. What’s more, if they end up as collateral damage of someone else's scheme or even just an honest mistake, they interpret it as a conspiracy to harm or humiliate them specifically. This is despite their own tendency to forget the names and faces of "little people" who they consider beneath them, and to say But for Me, It Was Tuesday when they can’t remember a person they mistreated It's hard or impossible for them to imagine that other people have their own lives outside of interacting with them. Not only must their friends, family, and adoring public be thinking about them all the time, but their rivals or enemies are surely out there obsessing about how to bring them down, no doubt because they’re jealous of the egoist's style and success. An egoist who’s an Attention Whore or a Card-Carrying Villain might go so far as to think there’s No Such Thing as Bad Publicity , since the only thing worse than being talked about negatively is not being talked about at all</. An egotist with delusions of grandeur may have a one-sided rivalry or hatred for a different character who hardly even notices them. If normal criticisms fail to work on an egoist because they lack any sense of morality or shame, the most effective tactics for deliberately getting a rise out of them are mocking how pathetic and ridiculous they are, calling them " boring ", or giving them a "The Reason You Suck" Speech about how they're delusional to think they’re so important A healthy ego exults the strengths of an individual in an overt way, which—on balance—can benefit everyone. An unchecked</ ego, however, is mainly preoccupied with blocking out "unacceptable" thoughts that are hurtful or belittling to itself, even tuning out the entire world if necessary. Toddlers have this attitude by default, as their brains are not developed enough to understand that other people have different viewpoints. We're less forgiving of (non-disabled) adults who behave this way, also termed assholes When the cause of the attitude is being raised in a family of great power and wealth, you have a case of the subtrope Royal Brat . For religious cases, see Egocentrically Religious . Overlaps with Moral Myopia when debating the rights of others versus the rights of oneself. Also overlaps with Opinion Myopia , where the egotist thinks any ideas or beliefs they personally disagree with are wrong. An egomaniac who likes being in the limelight will usually be an Attention Whore . When combined with a massive sense of self-preservation, we get the Dirty Coward . Muse Abuse is often caused by an artist believing that they're a genius whose talent puts them above conventional morality, and thus they have a right to torment people close to them for inspiration as long as it makes their work better See Narcissistic Personality Disorder and Anti-Social Personality Disorder for when it veers into villainous territory

You see characters blaming themselves for major messes fairly often, especially when they're not the only ones who are suffering as a result. It's a universal phrase used in every genre and medium. Frequent replies: "It's not your fault": A stock reply to an apology, and like the main phrase, it's often followed by why. Often implies the main phrase as well. "There's no way you could have foreseen this" is also popular as is " You Did Everything You Could " when the other failed to prevent bad things from happening. In the future, it is likely that a Big Bad , The Rival , or an Evil Counterpart will take some opportunity to remind the character of this culpability.

May be the result of failing to make amends . May end up being a Career-Building Blunder . May be uttered by someone laboring under The Chains of Commanding . See also My God, What Have I Done? , in which case it typically is</ all "my" fault, and "I" have just realized the consequences of "my" actions, and Failure-to-Save Murder . When death ensued, see These Hands Have Killed . If a character has so many It's All My Fault moments that it becomes almost a character trait, it's a Guilt Complex . Characters may irrationally think of this if I Wished You Were Dead . Contrast with Never My Fault . May lead to a Guilt-Induced Nightmare .

A specific case of Million-to-One Chance : the laws of probability are nothing compared to the power of Narrative Causality Often seen in franchises involving space travel, possibly because Sci-Fi Writers Have No Sense of Scale and can't figure out how big a single planet is, let alone an entire galaxy. It often occurs in real-life settings as well, albeit on a smaller scale

More often than not, said planet also happens to be a Single-Biome Planet , Baby Planet , and/or a Planetville . On the aforementioned smaller scale, this often happens to countries. A gentleman spy who hears his nemesis is "in China" will take a day to find them, not years of detective work to cover all the land area, the immense population, etc. In Video Games , this trope is taken to the logical next step, such that any Video Game that allows the protagonist to travel from one planet to another will probably have very little area in total that the protagonist is physically able to visit within each world, either constrained by boundaries that one would not expect an inhabited world to impose , or literally representing the entire world as a very small space . A Sub-Trope of Contrived Coincidence See also Convenient Enemy Base and Conveniently Close Planet . Not to be confused with the Disney ride (or its dang song) and It's a Small Net After All . </

After the movie It's a Wonderful Life </, a device whereby an external force (usually supernatural) intervenes in a time of crisis to show the character facing said crisis a Flash Sideways of how things would have been had one key part of the past gone down differently. Most often, the change is that the character in question had never been born . May occur as part of a Near-Death Experience , or following Smite Me, O Mighty Smiter . Episodes with this plot usually take place around Christmas time, because It's a Wonderful Life</ takes place around Christmas. If a show hasn't done a Yet Another Christmas Carol episode yet (or if they have already done so), they'll be doing this one Usually the character learns that everyone they know would be worse off without them. The most common subversion, the "Better if Not Born" Plot , is that everybody's life is better</. The world is usually governed by the Butterfly of Doom ; regardless of how minor the change, there is rarely a middle ground or a world which is only slightly different, to the extent that the character's absence, no matter how seemingly insignificant or small, will result in a complete Crapsack World in which there is little hope whatsoever. Also closely related to Necessary Fail This may be a Dead Horse Trope . Nearly half the examples below are subversions of some sort, most commonly the above subversion used for parodic effect A Sub-Trope

of Whole Plot Reference (so anything less than the plot is merely a Shout-Out) Requires a Ripple Effect-Proof Memory Compare For Want of a Nail . Sister trope to Yet Another Christmas Carol , "Gift of the Magi" Plot , Christmas Every Day , and How the Character Stole Christmas . Also compare Judgement of the Dead , which may involve a similar accounting of the character's deeds, but going back to change things isn't on the table. May be related to The Future Is Shocking , when a time traveler discovers how society has changed. Contrast Suicide for Others' Happiness . If it turns out to be All Just a Dream , it's overlapping with Opinion-Changing Dream , and sometimes Guilt-Induced Nightmare And and is a re-creation of It's a Wonderful Life</ using clips from TV episodes that referenced It's a Wonderful Life</ May or may not be related to It's a Wonderful Failure

A lengthy joke in which a character describes some new idea, invention, story or script, only to be informed that somebody already got there before him and that all the tropes he thinks are new are in fact Older Than They Think . The punchline is usually a ridiculously mundane or roundabout name for the proposed "new" work, and for added humor value, the story that the character has unknowingly plagiarized is usually something mind-bogglingly well known. It's based on the well-known phenomenon that there are so many things out there it's incredibly hard</ to come up with something new, especially since "Seinfeld" Is Unfunny and oftentimes, people get the idea inspired by something. (Even the great J. R. R. Tolkien 's stories were inspired by pulp fantasy writers in the 1930s and borrow heavily from Germanic myths about a ring that gives massive power to whoever wears it...sound familiar?) There are many other ways of phrasing this, including: The surest way to avert this trope is to put enough</ old things together that the ensuing Combinatorial Explosion results in something new or unexpected. Compare It Will Never Catch On , We Have Those, Too , and Didn't We Use This Joke Already? . The Zeroth Law of Trope Examples explains how Shakespeare did it before. Yes, We Do Have This One is this happening for creating . For how the hearts of budding artists may be quickly crushed, see TV Tropes Will Ruin Your Life . For when this reaction occurs in-universe and/or entirely from the perspective of a single character, see Never Heard That One Before .

Sometimes a gamer plays a new game only to find the level of challenge is less than what they expected — sometimes considerably so. To some gamers, this shall not stand! Video Games are about overcoming challenge</! No Challenge Equals No Satisfaction , after all, and without challenge, a game is little more than a pointless exercise Of course, there is nothing inherently wrong</ with an "easy" game. Some people prefer them that way. Further, depending on the individual, the genre and the game playing setting, the reasons for gaming vary greatly from "overcoming challenge for a sense of accomplishment" to "distracting one from the mundane minutia of life" and everything in between. Some changes that make a game easier can remove unnecessarily difficult or frustrating parts, making for a more enjoyable experience overall. This trope is the reaction fans have when a game, particularly one from a franchise known for challenging games, presents itself as less challenging than its

predecessors or than what one would normally expect from games of a similar genre This can certainly be a valid reaction, however; when you can breeze through a game without breaking a sweat once, even the parts that should be difficult, it is easy for a game to become a monotonous and boring experience. Excessive handholding, the oversimplification or elimination of more complex mechanics, and easily accessible "win buttons" or Game Breakers with no downside to using them can also sink a game, among other related issues. When an attempt to make a game more accessible instead removes depth or any sense of challenge from parts that were clearly intended to be difficult, this reaction is understandable This is not</ a page to complain about easy games. Only add examples where the sentiment has been expressed by reviewers or a sizable number of fans when comparing a game to previous installments in a franchise or similar games of that genre Be aware with adding examples where people mention about how once they found a Game-Breaker , learned to exploit a Good Bad Bug , caught the hang of it, learned the way the game mechanics worked, then that they found the game trivial afterwards This type of complaint can happen if the game's predecessor was more difficult This also becomes incredibly annoying for developers if people complained about the previous game being too hard, or if it was hard but for all the wrong reasons . It really makes for the perpetual Unpleasable Fanbase It's Short, So It Sucks! is a Sister Trope , with several points overlapping with this. The opposite is It's Hard, So It Sucks! . Also see They Changed It, Now It Sucks! . True Art Is Incomprehensible is mildly related, in the sense that something can't be considered quality art if most people can easily understand it. When people try to force the way they play the game (which generally has to do with difficulty) onto other people, you have a Scrub or a "Stop Having Fun" Guy . When you have both It's Easy, so It Sucks and It's Hard, So It Sucks! , you wind up with an Unpleasable Fanbase

In the MMORPG genre, a vocal minority loathe World of Warcraft </ because, compared to other MMORPGs of the time, it was too easy to grind to max level, the penalties for dying were a pittance , it was too easy to gain gear (via PVP), etc. And then the Wrath of the Lich King</ expansion introduced entirely new levels of complaining to the existing Unpleasable Fanbase :

Over time, games in general have gone from Nintendo Hard to more accessible to today's gamers. Still, every once in a while, a game comes along that provides a challenge reminiscent of the Trope Namers of Nintendo Hard . To some gamers, this shall not stand! Video games are about fun, and frustration isn't fun! They're like black and white!...right? There's nothing inherently wrong</ with a "hard" game. While a large number of gamers find easier games to be more enjoyable than ones that may make them Rage Quit , some gamers like having a challenge in their games. People play games for different reasons; some play to chill out and escape the trials and tribulations of daily life, while others seek such trials within video games. Bear in mind that difficulty can occasionally be a legitimate complaint , depending on what kind of difficulty. Some games are legitimately hard and can provide a great and potentially fun challenge. Or maybe the difficulty is a tad too inconsistent and throws too much at the player at once and there's a huge</ difficulty spike. Other games are difficult for the wrong reasons , which can be quite legit. (And commonly, when discussing the latter,

it's best to keep discussion to that page. But it can still lead to justifiable entries on this series where people criticise the game as being too hard due to Fake Difficulty .) This is not</ a page on which to complain about hard games — this is for when a fanbase in general or reviewers complain about difficulty. This type of complaint can happen if the preceding game in the series was significantly easier . The polar opposite of It's Easy, So It Sucks! . When people try to force the way they play the game (which generally has to do with difficulty) onto other people, you have a Scrub a or "Stop Having Fun" Guy . When you have both It's Easy, So It Sucks! and It's Hard, so It Sucks, you wind up with an Unpleasable Fanbase .

The titles of these tropes seem like they belong in Nudity Tropes or Sex Tropes , but they aren't (no, Rule 34 doesn't make them so, now Get Your Mind Out of the Gutter already) Often it's because the title seems that way as a joke (especially Just for Pun titles), and often because the name uses a word that has multiple meanings where one is well known to be about sex. For others, it's a case where the object of affection is given the same amount of drool and adoration as actual porn might be

Complaining About People Not Liking the Show comes in many different flavors . Criticisms of reviews can be overwhelmingly vicious, with statements ranging from death threats to accusations that the reviewer is just being stuck up. However, some defensive arguments can be a bit ...far-fetched. Somewhere along the line, you will be accused of not getting it . You see, whatever you criticized was supposed to suck . " The context of why the movie was made justifies what you consider to be poor quality and bad execution of the work. As such, you didn't understand what was going on to appreciate the work enough to realize that. If you were expecting something glorious and spectacular, you came to the wrong movie.</ " This is a line that fans have started using to deter negative criticism of their favorite works (a common alternative seems to be "Just turn your brain off and enjoy it"). Depending on the case, this defense can be justified if the reviewer/critic genuinely lacks familiarity with the work . It's true that critics can on occasion be overly harsh. However, fans can get carried away with this regard as it is mostly used to defend their favorite works in general from any and all forms of criticism, even if a reviewer/critic happens to like said work and even (or especially) if the criticism is not without merit. The first problem with this defense is that it is on the surface quite paradoxical; a bad movie does not cease to be bad just because it was apparently supposed </ to be bad. Quite the opposite, in fact. Another is that regardless of the intentions of its producers, ultimately the final product has to be judged on its own merits. The producers of a film might not be trying to make True Art and may be trying to 'just' make an entertaining movie, but that doesn't mean they can't fail at being entertaining. Furthermore, there's a suggestion here that producers of creative works that aren't intended to be True Art should only be held to the lowest possible standards. The problem here is that quality and entertainment aren't mutually exclusive, and just because something isn't supposed to be High Art doesn't mean you've got a license to be lazy or sloppy with it. Of course, there's the obvious question of why you would want to deliberately make something terrible to begin with. This is not to say that there's anything wrong</ with purely escapist entertainment or that all works

should</ aspire towards the loftiest heights of 'worthy' True Art , just that making escapist entertainment isn't itself an automatic ' Get Out Of Criticism Free ' card for producers and fans of said entertainment. Fans who take this view can be deliberately invoking any or all of the Animation , Sci-Fi , and Comedy Ghetto tropes. This might seem contradictory of the usual purpose of these tropes (i.e. trying to get these films out</ of said Ghettos), but the point is that different genres should be held to different standards. While not exactly aimed at this phenomenon, 'Ebert's Law' as coined by noted film critic Roger Ebert — "It's not what a movie's about, but how it's about it" — has some relevance here. The idea is that he can rate a supposedly 'no-brainer' action movie higher than a serious and supposedly 'worthy' drama not because the action movie is artistically more complex or inherently superior to the drama (although it could be), but because the action movie is better at being an action movie — and, by extension, a more satisfying cinematic experience — than the drama is at being a drama. By this logic, the inverse is also true; just because an action movie isn't necessarily aiming to provide its audience with the same things as a drama does not exempt it from criticism entirely. What it does</ do is exempt it from criticism on the grounds of not being enough like a drama. When creators invoke this trope, it often betrays a belief that Viewers Are Morons . Compare with Springtime for Hitler , Moff’s Law , Deliberate Flaw Retcon , Parody Retcon , and Critic-Proof . Contrast Intended Audience Reaction , in which the creator of a work is deliberately doing something audiences normally don't like, for what they think is a good reason. Hopefully, they're right. Knowing the differences between Fact/Opinion/Argument will also help. Contrast with Oscar Bait , which is</ supposed to win Oscars.

The oldest breakup line in the book, and still the favorite way to get rid of a Temporary Love Interest . However, there's a key difference on television: sometimes, it's actually true! Usually, when true, it's because the breaker-upper has a Big Secret . For example, in season one of Buffy the Vampire Slayer </, Buffy breaks up with a guy because his craving for excitement/death wish would probably get him killed if he kept hanging around Buffy. Sometimes, " It's my enemies ." Other times it's the Last Het Romance for a newly-out-of-the-closet character. However, in other cases (especially in a Sitcom), it becomes "Oh, who'm I kidding? It's you!" But the reasoning may be shallow and superficial—see Minor Flaw, Major Breakup .

Heroes have a dangerous job. They can accept that— for themselves . But not for their loved ones . Love Hurts . Add the Sorting Algorithm of Mortality , and it's just plain unbearable. The Hero has a ready and willing Love Interest who makes him happy, who would be good for him, with whom even the fans want to see him . No Love Triangle , no Mayfly–December Romance , no Virgin Power , no Twice Shy —things could be perfect. It's plain as day that he cares more about her than anything else... plain to everyone, including the Big Bad . The Hero knows that his enemies will never let him have a love life in peace; they'll strike down the people dearest to him first chance they get. The only way to protect his beloved from becoming Big Bad cannon fodder is by letting her go. Despite what a noble, selfless move it is, the spurned Love Interest's reaction will usually be, "Screw the

danger! I don't care!", to show they love The Hero just as much. This adds It's Personal flavoring to a Story Arc , as a safe(r) relationship is the reward to look forward to once you've defeated the threat and made the world a safer place. It never seems to occur to anyone that telling the Big Bad you've broken up is generally going to get you released from his dungeon with an apology and a consolatory cappuccino. The argument also gets rather silly when the hero spends every waking moment in his civvies in or around said quasi-love interest's company; thus any villain looking at the situation would need Psychic Powers to realize they're not a couple . Of course, anyone with that level of understanding realizes that they are emotionally attached no matter what they say. Justified or not, this fear is why The Masquerade Will Kill Your Dating Life . Though in all fairness, in a practical sense, this should actually ensure that the hero's loved one should be granted Plot Armor from this method. But the sad fact of the matter is that all too often it doesn't. In fact, the only way that a character would be safe is if they are considered too minor for writers to care about . (And, even then, these characters are not always safe, either .) However, there are also other certain flaws to consider, as villains are normally not known for being discriminate about their potential victims. So sadly, heroes, even if you do convince your enemies that your loved ones are random strangers you never heard of, chances are they will most likely go after your loved ones anyways. (Not to mention that normally heroes save anyone whom their enemies attack, regardless of whether if the Hero personally knows them or not, because it's the right thing to do.) Usually unnecessary if the Love Interest is a badass too . Compare I Want My Beloved to Be Happy and Hero Harasses Helpers . A sub-trope of It's Not You, It's Me and Celibate Hero . May overlap with Loved I Not Honor More . May lead to Good Is Not Nice . Often the rationale behind passing the "Leave Your Quest" Test . When the love interest is the one who breaks things off for this reason, that's Love Cannot Overcome . See also Superheroes Stay Single . If it's between parent and child, see Give Him a Normal Life and Daddy Had a Good Reason for Abandoning You .

Protagonists and antagonists are always fighting each other. It's generally accepted that there could be a few deaths, injuries, psychological trauma, and physical destruction over the course of their struggles in a story. However, sometimes motives can run deeper than simply the other person having opposing goals, and "struggles" can hit far closer to home and heart than is comfortable. Family members (or even entire races, countries, and cultures) may have been decimated, either as part of a character's backstory or during the story itself. Homes may have been burned down, and lifelong dreams may have been crushed. However you put it, though, somebody's embarrassed, saddened, angry, or let down, and they believe somebody (most times they know who they want to exact retribution from, by the way) has to pay for it. In short, this is where a character (or characters) has a very close, emotional investment in the story's conflict. The Stuffed into the Fridge and Friendly Target tropes are invariably a setup for this. Usually eventually leads to "Not So Different" Remark . For a more specific form of this, see You Killed My Father . Often enough, This Means War! . If this is the impetus for the hero going on the journey to begin with, it's because The Call Knows Where You Live . When done to their home or base, the hero will usually take a moment to Watch Troy Burn . If the one for whom It's Personal finally gets to stare down the one who made it

personal, expect an And This Is for... beatdown. The Disposable Woman is a character who exists only to make It's Personal happen. When it gets personal, characters insist they must work alone . One common variant is to order/trick allies aside to set up a one-on-one duel without interference. This can be risky, but the avenger wouldn't risk anyone else getting hurt—or someone stealing his precious right to do that particular kill himself! If a character has this as his primary motivation rather than as part of another quest, then he's Not in This for Your Revolution . Has nothing to do with "It" Is Dehumanizing . It's Personal with the Dragon is a specific subtrope. Compare Berserk Button , when whatever personal thing committed elicits a sudden reaction from the person wronged or offended. Contrast when it's Nothing Personal , or at least the character(s) claim it's not. The invocation of this trope in Real Life on the internet is almost the</ moment when any given Flame War or bout of Ship-to-Ship Combat becomes Serious Business , leading to behaviors such as cyberbullying and real-life harassment, because belief/feeling that an issue is a personal affront to someone or their "in-group" is often "justification" for engaging in such behavior.

The hipster 's mantra. There's only one thing worse than people not watching your favorite show: people actually watching your favorite show You'd think that your favorite artist making it big by reaching Stage 5 of the Fandom Life Cycle would be something to celebrate. To certain segments of the fandom, however, a wide fanbase only means that the media in question has “gone commercial” and “sold out.” This results in a subsection of both Fan Dumb and Unpleasable Fanbase Sometimes a valid complaint — fans might call foul when a previously creative artist starts Pandering to the Base or watering down their work to appeal to the Lowest Common Denominator . Fame can also have a bad effect on the artist’s attitude — if they don’t become a complete egomaniac who treats fans like dirt , they might become disillusioned by fame. On a practical level, more popular live shows may require bigger, less intimate venues — shows known for energy and spontaneity may move towards a heavily produced and choreographed live show. Low budget works known for cheesy effects and bizarre plots might switch to a slicker, more commercial style and "safer" plots, while Ensemble Dark Horse characters may be excessively milked and/or Flanderized into shallow parodies of themselves — see also They Changed It, Now It Sucks! Big fandoms tend to attract Misaimed Fans , and bring along a lot of Fan Dumb . Sometimes these newer fans are rabidly devoted, even starting fights with older fans or people who don’t like the work “enough”. Tensions also rise when the new fans represent a demographic shift in the fandom. More subjectively, popular fandoms are more likely to be subject to Hype Backlash if reality cannot possibly match the hype. (See also Wolverine Publicity , when a fandom is just plain overexposed.) This attitude can also contribute to Fandom Rivalries if a work becomes popular at the apparent expense of another, as fans of the latter work may become resentful towards fans of the former and blame them for their favored work not receiving the attention and success it deserves Of course, a lot of the tension is just snobbery — original members of a small fandom feel less special when their exclusive club is open to the masses.

Some also seem to believe that artists should work and create art solely for the sake of art , with no consideration for things like paying rent A variant of that is "It’s Popular, it Sucks" — when people deliberately get into obscure or impenetrable things because</ they are obscure or impenetrable, because nothing mainstream can ever be cool. In some ways the inverse of Quality by Popular Vote Sometimes this perception can be a bit of a fallacy — high profile works are more prone to being picked apart by critics, while small creators are looked on more favorably or even immune to criticism Compare Periphery Hatedom , who never liked it in the first place. See also Ruined Forever , Fandom Life Cycle , and Popularity Cycle . Contrast Complaining About People Not Liking the Show . When musicians hold this opinion for one of their own songs, it's a Black Sheep Hit

The Archfiend is a YouTube ranter that frequently uses this trope. He finds it all-right that you make YouTube videos until it becomes your living (or you can live with that as a job). In fact, he frequently hates on popular YouTubers for asking money from their fans or using tactics that allow them to have a little bit more money.

Hallelujah! Simply put, people falling from the sky, or at least a great height, then landing safely, at least for them. This is accomplished in Real Life via parachutes or gliders, but in Speculative Fiction it can be done through Powered Armor , Jet Packs , special pods , or Applied Phlebotinum . Usually an airplane is involved, but balloons, cliffs, a Standard Sci-Fi Fleet , a tall building, or even a magic castle will do. This trope is only very marginally related to the song by The Weather Girls from which it takes its name. (In the music video, several guys are shown parachuting in on the two singers... using umbrellas .) A Super-Trope to Drop Pod , where the soldiers are dropped from orbit inside a disposable casing to survive atmospheric reentry. Compare Fast-Roping , Drop Ship . Less than successful examples may result in a Parachute in a Tree . Contrast Death Flight . Contrast Rocketless Reentry . Not usually related to It's Raining Salesmen .

Bob walks into a store. He's a man on a mission. He knows what he wants, and may the good Lord help anyone who stands in his way. But lo and behold, a mob of overly helpful salespeople lay right into him the moment he has his foot in the doorway If the salespeople are especially pushy, this may be a sign you're at Honest John's Dealership . It can definitely be Truth in Television , and in case there was any question about it: Yes, they are normally forced to do this as a condition of their job Compare Annoying Video-Game Helper and Unwanted Assistance Not usually related to It's Raining Men , nor to the song by The Weather Girls

Games in the 1970s and early 1980s usually had no fixed ending; if you survived, you kept going. Then came home consoles and personal computers. Suddenly you had games with a definite length, lasting anywhere from 30 minutes to 2 hours. Sure, the ending probably wasn't much , but an arcade mentality still existed for most genres, meaning there was very little saving and a whole lot of soul-crushing difficulty . As such, unless you were very skilled, you probably aren't beating that game the same day — or in some case, the same weekend — you picked it up, meaning gamers were still

more or less satisfied. Fast-forward to the 1990s and 2000s, where more arcade-style genres began to take a backseat in popularity to adventure and role-playing games . Now games were expected to last dozens of hours, with hour-long games quickly becoming regarded as short, budget titles to be avoided at all costs. The mentality developed that a game's length must be directly proportional to its price, and it's a mindset that has only gotten stronger as we enter the present day. In other words, it's short, so it sucks </: it doesn't matter what genre the game being targeted is: first person shooters , shoot 'em ups , RPGs, Action-Adventure , you name it. If you can beat the game in a day or two, or worse, in one sitting, expect review sites to, at best, cut off a whole point or letter grade . Truth is , there is nothing </ (inherently) wrong with a short game. </ First of all, a game being short doesn't mean it's of poor quality. It literally just means that it's short. A shorter game of consistent, concentrated quality is ultimately going to be more preferable to games that were artificially stretched out with padding and other forms of fake longevity in response to this trope, but would otherwise be just as short. Secondly, as gamers grow older and chose to continue the hobby, they find that adulthood has more time-consuming responsibilities and complications than childhood: college/university, work, family life, and paying for your own necessities of food, water and shelter leaves you with less time to play games, to say nothing of leaving you with less money to buy them . As such, there are a good amount of people who actually prefer a shorter game that can be beaten in a few days, or even hours, so they can get on with more urgent aspects of their lives, or at least move on to the next game (or the New Game+ , or whatever post-game content is available in the present one). Additionally, long games tend to satiate the player after a single playthrough, leading to the mentality of “oh, I'll put this game away or sell it.” In comparison, shorter, arcade-like games, due to being designed specifically around having high replay value , are less likely to do this. You may find yourself undergoing multiple playthroughs of such a game, with the total of those hours matching or even succeeding the time you may have spent with that year's big AAA action-adventure title. Games for handheld consoles and mobile phones also fall under this idea of "short is good", since they're designed to allow for quick intermittent play while you're out on a normal day in contrast to the longer play sessions you may have on PC or console. This is further mitigated by handheld games commonly being cheaper. Still, as the general price of games remains high, gamers may blanch at paying full price for such a game, making this perhaps a legitimate complaint for a review, though a more apt label would be “it's short, so it's too expensive.” Some reviews have forgiven shorter games that are either budget-priced or cheap downloads (Portal </ is a commonly cited example, lasting around 3-4 hours, but originally sold in a $50 bundle with four other AAA games). Sufficiently egregious examples come across as a Mission-Pack Sequel masquerading as actual games. Note that the minimum amount of time necessary to complete a game is never actually paid attention to, as very few games remain unbeatable within the space of a single day for the dedicated and experienced; it's only the amount of time it takes on an ordinary, first-time playthrough that draws this ire. It's Easy, So It Sucks! is a sister trope . This is not </ the inverse of Bigger Is Better in Bed . It is</ the inverse of Ending Fatigue though, which is where you feel that the story has gone on for too long. If people are screaming this because the work happened to be awesome for how little there was, and they're upset there wasn't

more of them to enjoy, then you have yourself a case of Awesomeness Withdrawal . This page is not about complaining about games that are too short . This is when the fandom (or hatedom) and reviewers make the complaint. </

A line used in kids' shows, sitcoms, and kids' sitcoms , at the beginning of the episode, just before Hilarity Ensues . The characters will be discussing whatever the subject of the episode is and someone will say, "This is gonna be the best (whatever) EVER!" Then, everything goes horribly wrong, but of course later they realize that it didn't go SO badly after all. "It really was the best (something) ever!" Not to be confused with Most Triumphant Example , which is your Personal Favorite Whatever, Ever. Contrast with Worst Whatever. Ever! .

Say a character ends up involved in a situation to where at first glance, the problem is rather trite or rather mundane. However, for this character, it's not about the problem itself, but the situation or underpinnings that caused the problem. To them, the point is not just on the problem, but the larger meaning and implications behind it For example, say Bob ends up with the wrong order and is annoyed that the restaurant will not acknowledge the obvious wrong-doing. Alice may point out that the meal does not cost much and offer to buy another. Bob would note it is the the fact that the restaurant violated the nature of providing quality customer service in the first place Sometimes it may not be the person who got wronged making the complaint, but a friend or loved one doing so since the person they cared about may have gotten screwed over and that shouldn't happen A Principles Zealot often may rely on this alot to explain their actions. Sometimes used to justifiy the Law of Disproportionate Response . Often goes hand-to-hand with the Frivolous Lawsuit and Honor Before Reason ("Doing what's right, or at least what you </think is right, even if it's foolish"</). Sunk Cost Fallacy could be a potential extreme of this

Fans have a tendency to want to be surprised. They don't just want another rehash of the same things that they had last year, they want something new and different, yet the same basic characters/story/gameplay/etc. Often they claim that they want a perfect, line by line recreation of their favorite comic book, but there are also the inherent problems with transferring any form of media into another. Obviously the balance between keeping things similar while still making it work is difficult to maintain, which often results in an Unpleasable Fanbase More often this is a video game trope, due to the nature of the industry. Sports games in particular are targeted because they are based on a game that already exists with set rules; there are only so many ways to change or improve the gameplay, user interface, and physics. The situation isn't very compatible with the companies' insistence on releasing new versions every year With video games, if it warrants a sequel obviously people enjoyed playing it in the first place. So you really do not want to mess around with the general set-up, but you can always tweak it around to give a new experience. But with fans being the way they are , you'll usually get one side praising the changes with another side wanting the old game back . An Updated Re-release is sometimes unfairly judged according to

this, but it is also justified Video Game Long Runners will be all over the spectrum, with some games remaining faithful to the core design while others will use an entirely different style. Some gaming mainstays get this from fans claiming the formulas are growing stale. Of course, they'll then complain about attempts to change said formula just as vociferously as they complained about stagnation, to the point where it's obvious the games can't win. A game series typically gets this reputation when they release one too many Mission-Pack Sequels Just like They Changed It, Now It Sucks! , sometimes the complaints of the fans are legitimate, in that trying to hold onto the past gameplay can become a fundamental flaw. It's also important to note that this will</ happen to people who are usually not</ fans of the work in the first place, yet expect it to be radically different sometimes to the point of when they lose the original fans . People who aren't fans of the work will typically pull this argument specifically because they do not notice the differences in between individual works and have a very minimalistic view of genres or series as a whole This trope must be distinguished from They Copied It, So It Sucks! , where different material</ is considered to be too similar. With It's the Same, Now It Sucks, the problem is that different installments of the SAME THING (such as remakes, adaptations, parodies, sequels etc.) are considered to be too slavishly imitative of their original material See also Sequelitis , Status Quo Is God , Capcom Sequel Stagnation . On the opposite end of the spectrum is They Changed It, Now It Sucks! . It is mostly impossible to balance It's the Same, Now It Sucks and They Changed It, Now It Sucks, due to a general trend of Unpleasable Fanbase between the two

Tropes about some of the more negative Audience Reactions experienced in response to a work Not to be confused with Does Not Like This Index , This Index Blows , or " It Stinks " Compare Unexpected Reactions to This Index

For some reason, people tend to describe foods that taste terrible in terms of things that no sane person has any right to know the taste of The name comes from the episode of Friends </ where Rachel accidentally combines an English Trifle and a Shepherd's Pie, making the world's first (and hopefully last) Shepherd's Trifle. Meat, onions, whipped cream and jam? And how would</ Ross know what feet taste like? A sister trope to Lethal Chef In Real Life , some examples of this trope are physiologically justifiable . On its own, the tongue is only capable of detecting a few basic tastes - salty, sweet, bitter, sour, and savory. The more subtle and complex flavors associated with foods are actually due to the sense of smell, as aromatic molecules travel from the mouth up into the nasal cavity from behind. Thus, the smell of a non-food item can often be considered a reasonable guess as to its flavor. Of course, this only works for concrete examples of the trope ("this tastes like shit"), as opposed to more abstract/metaphorical uses ("this tastes like death") Contrast with Tastes Like Chicken . Not to be confused with an instance of someone actually tasting a foot . Or metaphorically tasting their foot . If someone is really</ eating a foot, then the trope might be I Ate WHAT?! Furthermore, someone doesn't have to particularly be turned off completely by certain things to say that something smells or tastes like thing if said thing was not taken care of properly (for instance, those that have

foot fetishes might still be turned completely off by unkept feet, in case someone thought foot fetishists would be offended by this trope; they might be just a bit more descriptive) See also Tastes Like Purple , for things it shouldn't even be possible to taste. May or may not be invoked after consuming Foreign Queasine or A Tankard of Moose Urine . Sommelier Speak is an unusual case: even good</ wine is likely to be compared to something inedible. Most people expect a Mess on a Plate to taste like this

Our hero has found the Serial Killer 's lair, complete with messages in blood and newspaper clippings of the murders . He needs backup, so he leaves the scene and informs the proper authorities. But when they get there, the room is bare, with no evidence that anyone was here. All the hero can say is, "It was here, I swear." Sometimes the killer has left some item to taunt him with , or a clue to the next killing . The hero may not be tracking a serial killer, but could have uncovered evidence of a Government Conspiracy or the plan of some Diabolical Mastermind . It may even be evidence of some form of The Masquerade , an oddly-elusive Monster of the Week , or a Not-So-Imaginary Friend . The key thing is, the evidence won't be there when he returns. The fact that the witness loses all ability to communicate rationally doesn't help. If the witness hadn't told the other person anything except "You've got to see this" , then — after some moments of wide-eyed bewilderment — he may be reluctant to inform them of what he had really seen, for fear of appearing crazy or dishonest; he'll just say "trick of the light, I guess; sorry". The cleaned-up room may contain some mildly interesting thing that wasn't there before, leading the authority character to say something like "You rushed me here to see a butterfly</ ?" or "Um, that's not a vampire, it's a picture of one." Some The Men in Black shows have actual divisions called "Cleaners" or "Sweepers" for whom this is their entire job. To show up (in black vans , always) at a location filled with alien gore and debris and completely clean it up and remove all forensic evidence in 15 minutes or less. Maidservice on Steroids. Also, witnesses get Laser-Guided Amnesia or disappear . Sometimes The Men in Black will ensure the incident will be Mistaken for an Imposter . Of course, the heroes will never actually walk in on the sinister government mooks or the brilliant serial killer in the process of cleaning everything away and thus catch them even more red-handed because there are No Delays for the Wicked . Technological advances may eventually make this trope obsolete; after all, who today (in the First World, at least) doesn't have a cell-phone with a digital camera feature? Of course, writers already hate cell phones. In the rare case this is</ used, expect there to be a problem with the photograph--or the phone--that makes it useless . (If the photograph doesn't show the unusual thing at all, but is otherwise okay, either the phenomenon is immune to photography , or another trope is in play.) Can involve a character's friend who just got turned into an Unperson . See also Gaslighting , Through the Eyes of Madness .

A Twist Ending that used to be</ guarded carefully as a Spoiler , but thanks to Popcultural Osmosis , everyone within the target demographic knows the ending already, even those who haven't even seen the show. It's probably never going to surprise anyone again.

In many cases, the twist becomes the central fact known even to those only noddingly familiar with the work, and other adaptations take it as read from the beginning Naturally, any movie or series that is based on a historical event gets this by default. For example: "The Spartans all die" in 300 </, or "The ship sinks" for Titanic </. It's a Foregone Conclusion Named after a line from Family Guy </ where Peter records the above quote over the best-known example of this trope, Orson Welles ' film Citizen Kane </ (though Peanuts </ did a decades earlier) Sometimes the work will be remade/adapted, and the ones responsible will know better. That's when they twist the twist itself, making it Not His Sled Compare Late-Arrival Spoiler , when marketing assumes the twist has already been spoiled We've made a game out of this! Head on over to Everybody Knows That

This trope commonly consists of a scene being well under way when the audience becomes aware of an entity or object being in the scene, and they were unaware of it beforehand Usually the object or entity is in the background and moves to the foreground, but there are plenty of other ways for it to happen. Often times the awareness is created by movement, but can also be from lighting or a different camera angle. The awareness is also commonly made through a sudden Jump Scare , although many times it can be a slow reveal A more specific and closely related trope is The Calls Are Coming from Inside the House

The presence of otherworldly elements around technology isn't always enough to stop it working . Occasionally a stubborn ghost or haunting creature will keep a machine doing what it wants past the point that physics finds it possible For example a character may be watching TV when the channel mysteriously changes to something ominous or relevant . They flip the channel back, and either it shows the same picture or waits, then turns back to the scene. They turn the TV off, and it turns back on, with the same scene possibly several times. They rip the power cord out of the socket, and if they're lucky, get a brief pause before the TV turns itself on anyway</ and continues showing the scene. If they're really wound tight they might smash the machine to smithereens only to find it just keeps running regardless or reconstructs itself when they're not looking There are many reasons why this is inherently scary . Firstly, it taps into the primal fear of losing control. We made these machines, we have control over them at the touch of a button. When that control is removed, it creates a feeling of powerlessness. Secondly, it's a situation that we know can't happen. It's literally impossible for a TV to continue to work after being unplugged. So if it's working anyway, then all bets are off, and none of what we know about how the world works applies to the situation. Lastly, anyone that's even remotely Genre Savvy knows that a machine that refuses to turn off is NEVER good news Common other variations include phones ringing (which might be dead people calling), radios playing music (eerie or appropriate), and in the modern age, computers telling you that you have e-mail or showing an image or scene or uploading or downloading or installing a program. It's also a common symptom of any Haunted Technology There's also the comedic version where the inability to shut the device off is neither supernatural nor dangerous, but no less insufferable Compare "Sorcerer's Apprentice" Plot . See also A.I. Is a Crapshoot for a sci-fi equivalent, and if it's a character struggling to shut off a superpower they may have, then that's

Power Incontinence

Sometimes something is supposed to be so intuitive, the work needed from an actual person is minimal. This is rarely the case, but the thought of making something ridiculously easy is appealing. This usually comes in two forms: A Sister Trope to You Can't Miss It .

When a character can't bring themselves to properly confess their love, so they either make a statement to similar effect or one that is totally unrelated. The character on the receiving end of the pseudo-confession usually understands what they mean, often responding with something along the lines of "I [first character's statement] too." Sometimes involves Emotionally Tongue-Tied or The "I Love You" Stigma . May be related to Cannot Spit It Out . Compare Aborted Declaration of Love .

A character (often The Ditz) encounters a word or phrase, and makes some comment expressing what he thinks about the thing the word refers to — just before revealing that actually, he doesn't know the word at all. ("Lorem Ipsum is terrible! By the way, what's Lorem Ipsum?")</ If the character doesn't outright imply that he knows what the thing is, but is willing to venture a guess</, that guess will likely be Is It Something You Eat? While that trope overlaps with this one, it generally involves an honest uncertainty, while this one is about dishonest certainty ("Of course I know that gazebos are something you eat.") The thing in question just might turn out to be a Henway . This trope is usually used in preschool shows in order to present to the target audience a new word or concept by making the ignorant character an Audience Surrogate for them. Sub-Trope of Feigning Intelligence , although the feigning is usually quite brief before the character admits she really doesn't know what she's talking about. Not to be confused with Malaproper , which is when the character misuses words without knowing</ that he don't know what the words mean (honest, but false, certainty). Completing the quadrangle is Obfuscating Stupidity , which is dishonest uncertainty/ignorance Related and often a Super-Trope to Calling Me a Logarithm , which is where someone takes offense to a word they don't know the meaning of, with or without pretending to know what it means. Also compare Scary Science Words for when someone is afraid of a technical word, and, again, may or may not pretend to know the meaning. Compare Two-Faced Aside .

A bittersweet trope where Alice loves Bob but realizes that a relationship between them cannot happen, so she decides to put Bob's happiness above her own. Accordingly, she abandons her claim to Bob and encourages him to move on and live his own life, even if that means watching (or even supporting) a relationship between Bob and someone else. The trope is intended to show that Alice is noble and selfless, but it can fall flat if the plot hasn't shown that Alice and Bob had any real connection, or if Alice appears to have ulterior motives (i.e. is still trying to get with Bob by pretending she is letting him go) If Bob</ is the one who chooses to do this, this act of sacrifice may (paradoxically) be what causes Alice to notice his interest and/or decide she wants to be with him after all , thus rewarding his virtue. But even if

she doesn't, Bob may still contribute to her Happily Ever After, usually in the form of an " If You Ever Do Anything to Hurt Her... " speech directed at her new paramour Under The Four Loves , this would be classified as Agape</: seeking the other person's good unconditionally, even if there's nothing else in it for you. Also see Romantic False Lead , Act of True Love , Unrequited Love and Insecure Love Interest Contrast Murder the Hypotenuse , Green-Eyed Monster , and Love Makes You Evil . Compare/contrast Loved I Not Honor More . Diametric opposite to If I Can't Have You... . Sister Trope to Prized Possession Giveaway (when a character gives another the material possession they treasure the most, knowing that the other character will be happy by receiving it) In extreme cases, this can be paired with a Death Trope . You Have Been Warned

It's quite common in fiction works for a character, even/especially an adult, to call out for dear old Mom in times of great fear . Even though, unless she's a serious Mama Bear , she probably wouldn't be much help in the situation. This could probably be explained by the fact that for most people, their mother was always there to comfort them and keep them safe in the early years of their lives. When overcome by fear, stress, pain or all of the above, it's not hard to see why someone may appeal to the only constant comfort they've ever known, even if it will do no good. Sometimes the father is called too, or a Parental Substitute if the character is an orphan , but usually it's the mother who's called for This is usually played for comical effect in showcasing the ineffectiveness of the characters (and can often turned to Accidental Innuendo if another character responds with "Yeah, I want your mommy" or something to the effect of " Me too ") However, it can also be played frightfully seriously by showing just how horrified and terrified the characters are, especially in dire situations (or if they are legitimately children suffering). Another is for tearjerking effect in war movies when dying soldiers call out for mother. Very much Truth in Television . Compare/contrast I Miss Mom , wherein the parent in question is long gone Not to be confused with that Atari 2600 video game

The instituted rules of masculinity say that a man cannot be beaten by a woman. Of course, any such man who is beaten by a woman is pretty unhappy Rationale for No Guy Wants an Amazon . Waif-Fu may be in evidence. Related to Samus Is a Girl , if the man wasn't aware his opponent was female before losing. May be the punishment of the Straw Misogynist , whose sole purpose is to be beaten by the woman- especially in Fan Fic , where an all too common a way to demonstrate the "awesomeness" of a Mary Sue and/or Jerk Sue is allowing her to beat up a villainized male character . Also expect this to be said by a He-Man Woman Hater before an aesop about girls being as good as boys This trope doesn't cover all situations where the girl wins the fight — the guy has to feel a particular injury to his pride because of the situation, especially if it bothers him above and beyond simply gets his ass kicked by a supposedly weaker foe . Sometimes may be invoked by an Arrogant Kung-Fu Girl if she wants to insult him (i.e. "How strong are you really if I</ could beat you?") Truth in Television : there are some men that really feel this, especially considering the societal gender belief about men being stronger than women

This line results from a conversation between unequally genre blind characters. Basically, Alice says something meant entirely as a joke that Bob takes completely seriously. Two general variations: If Alice's suggestion had reminded Bob of a different idea instead, that's a "Eureka!" Moment . If Alice suggests a course of action that Bob actually carries out, it's a Rhetorical Request Blunder . Joke and Receive is similar, but in that trope, the joke is or will become real without the need for someone else to take the joking character's suggestion seriously. I Wished You Were Dead is a particularly cruel variant. For the inversion, where a character mistakes a serious statement for a joke, see My God, You Are Serious . Can also apply when swapping "joking" for "theorizing" (thought of that years ago, never had the guts to try it) or even an Epic Fail that isn't well known; "Someone tried it once. That's how the Noodle Incident happened." Not to be confused with the "Just Joking" Justification , which is an attempt to sanitize an offensive comment after the fact by pretending it was just a joke. Also not to be confused with the "Weird Al" Yankovic song, I Was Only Kidding</ (which twists the "Just Joking" Justification to convert positive statements into insults). In some cases, the idea is taken SO seriously it's actually used

When an old, embarrassing outfit is spoofed In-Universe People can get caught up in the fashions of a certain time, and just cringe thinking about it later on. This can be any time, but usually it's about the decades immediately before most present-day works. So in The '90s and the early 2000s , The '70s and The '80s were the most popular subjects for this, but now those later decades are slowly becoming this Sometimes it's the character acknowledging how dumb they looked, but just as often it's their friends laughing at how dumb they used to look and that character not denying it, or we see the character back then and get a good laugh out of it Often shown during a home video, Embarrassing Old Photo or Flashback , where the trope can overlap with the Funny Flashback Haircut if the hairstyle was at least suitable for that age This is virtually universally Truth in Television for people looking back on their younger days. Remember, people: whatever fashions you think are cool/hip/trendy/stylish today will eventually look ridiculous to future generations and/or yourself some years later Compare Old Shame , Fashion Dissonance , Condemned by History , Outdated Outfit , Impossibly Tacky Clothes , and Fake Fabric Fashion Faux Pas Contrast I Was Quite a Looker (when a character looked better in the past)

In movies and TV shows, some supposed enemy appears: an alien from another planet, some unidentified earth-based target, or something else that it appears the only way to defend against it (whether or not it has hostile intentions) is the Army, Navy, and/or Marines. So the military comes out, and they start shooting , and they discover the enemy has shields , or that for some reason the military's best ordnance attacks do not have even the slightest effect . Or, worse, their opponent has ray guns or other equipment that can shoot down and/or incinerate attacking equipment and/or aircraft So, you would think that, since the material they are using is being destroyed, the military commander would stop wasting ammo or equipment (not to mention the personnel being vaporized, killed, or seriously injured). No, they keep right on shooting, wasting ammo and getting their ass kicked, as

if the purpose of the military is to continue to throw away its ordnance on invulnerable targets after it's been shown that there is no effect Of course, it can be argued that in truly hopeless situations in which it seems that the aliens' intention is to utterly wipe out humanity , running away does not make all that much sense either, and dying in battle might even be seen as a preferable fate . At best it might even buy time for the rest of humanity to discover the aliens' weakness It's a play on the 19th Century surrender poem (" I Will Fight No More Forever ") of the Chief of the Nez Perce Indians, when he realized that they could not win against the U.S. cavalry. In this trope, the cavalry can't come to the realization that it's not going to win, but it will keep on fighting, wasting ordnance and quite possibly people See also Attack! Attack! Attack! . For the villainous equivalent, see Shooting Superman . Along with We Have Reserves , this represents the bulk of General Ripper 's tactical and strategic repertoire (raising the question as to how</ he could actually make it to general...). Also compare Five Rounds Rapid , in which an armed force only uses small-arms fire to try to take down a monster, and never thinks to use some of the bigger weapons in its arsenal Subverted if the enemy is not actually Immune to Bullets and can be taken down with (considerably) More Dakka

A specific form of Cut His Heart Out with a Spoon in which a character is so consumed by rage that he threatens to rip someone's limbs off with his bare hands. The delivery of the line tends to be either Large Ham or Dramatic Deadpan , depending on the character The threat is very rarely carried out, at least on screen. If the character is actually capable of this kind of violence, he may mention having once done this as a casual aside . If it is carried out and the victim is a recurring character, he will usually get better. May overlap with Comedic Sociopathy and Bloody Hilarious

So someone's love has gone off on a long and dangerous journey: to sea, to war, to find their meaning , to make their fortune , something along those lines. She promises to wait for him, right where she is, until he returns. How long could it be, right? Soon they'll be reunited and all will be well. Only not so much. Years pass and he doesn't return. Most people would have given up by this point, assuming that something has happened to their loved one and he's never going to come back. But not this woman. She's going to wait right here for the rest of her life, if necessary, because she really believes he's coming back for her someday. ...Even though most of the time, he really is dead. This still will often not stop her. She said she'll wait forever for him, and she meant</ it. Hundreds of years later, a woman-shaped rock can be seen in that spot, waiting for her love to return to her. If she knows that he is dead, The Mourning After may ensue. Or even if she believes it — sometimes other characters think that claiming it will shake her resolve. When the hero is being faithful, the Standard Hero Reward can lead to some very difficult to wiggle out of scenes — But Thou Must! ! If she is coerced into marrying, it's You Have Waited Long Enough — whereupon her true love will show up in time to save her from the wedding . If this trope follows a breakup, you have Love Will Lead You Back . If he does return, and she realizes she no longer loved him, it turns to Old Flame Fizzle . People often assume this character will have to be a female (or a loyal dog), but this is

not true: one of the most famous in cinema history is a man who is willing to wait decades . See also My Girl Is Not a Slut , The Slow Path . When the waiting is forced (either by an individual or a social custom), it may overlap with Property of Love . Compare I Will Find You for when the speaker plans to take a more proactive stance Contrast Absence Makes the Heart Go Yonder and Taking the Veil , a common historical alternative.

Almost no innocent characters have ever pled guilty in the history of television, unless they're Taking the Heat for someone else. If it's just them, though, heck no. When a Law Procedural plot involves an innocent defendant, there will almost invariably be a point where the case will be stacked horribly against them, and they will be offered a deal by the DA. Something like, "Wendell, we can't win this. Your car was found at the scene of the crime, forty eyewitnesses are positive it was you, it sure does look like you on the security footage, and the jury are apparently collaborating on a book called Burn in Hell, Wendell Spatz, You Guilty Guilty Scumbag</ . The DA says if we plead guilty you'll be out in three days, and you'll also get a week in the Bahamas with Scarlett Johansson. Plead now and they'll throw in a set of steak knives." To which the defendant will give an adamant reply: "I won't say I'm guilty." That's it! End of discussion! No negotiations! No pragmatism! Admit to something he didn't do? Why, he'd rather be eaten alive by cockroaches! This could be a Justified Trope , if the defendant has previously been established as a rigorously honest person who stakes his/her personal integrity on Will Not Tell a Lie , especially under threat of punishment, but mostly such shows don't bother. Another reason for this to be justified is that having a conviction, even if minor, on your record can really mess up your day. Even though you only spent three days in prison, you're still a convicted criminal for the rest of your life. Trying to apply for jobs, loans, and things like that gets a lot</ harder. So even if you're not idealistic, you might still decide that you're better off taking the chance of proving your innocence. Of course, in the kind of extreme case described above, that doesn't make quite as much sense. Which is all, of course, a way of setting up the standard Lawyer Must Win Against Inconceivable Odds plot. This trope should not be confused with Never My Fault , which, in a context similar to this trope, would be this sort of attitude being held by someone who's , far too selfish to cop to it, and far too smug to accept a Plea Bargain . The version of this which actually exists in the world of criminal law is the plea of nolo contendere</ ("I do not wish to contend"), more commonly known as No Contest — entered when the defendant will accept the sentence but will not enter a guilty plea. Not accepted in all cases and jurisdictions. Used almost word for word by one of the accused Marines in A Few Good Men </. Although this is an atypical example: The two Marines did</ do the actions they're on trial for, but Corporal Dawson refuses to plead guilty since he believes they were following the legitimate orders of their commander.

A Song of Ice and Fire </ :

Law & Order </ : The Salem witch trials, mentioned below, are depicted in The Crucible </, where the question of whether to save himself by giving in to the Insane Troll Logic of the witch hunters is the main conflict for the protagonist.

Ace Attorney </ : Bart Simpson "confessed" to Lisa stealing textbooks in an episode of The Simpsons </. An example of the aforementioned Taking the Heat exception.

Real Life Example: In the Salem witch trials, those accused were given the option to confess to witchcraft, which would guarantee their life. Many, such as Rebecca Nurse, didn't take this option, even with the alternative being death, confiscation of all property, excommunication, and improper burial all at once.

This is a kind of wordplay joke you find characters using, on themselves or others, about how a common expression is very appropriate to the situation at hand... but not for them , since they can no longer use it without it being technically incorrect or highly ironic. Another way to do this is to "fix" the expression so that it works unironically, which changes the expression into a suspiciously off statement for those who have no clue about the character. For example: For this humor to work, the audience has to know enough about the character to see why the normal statement wouldn't apply. It's not a very difficult task if it can be known just from looking at them or watching them for a bit, but if the relevant bit of background is subtle or requires knowing Backstory the joke can get lost to new viewers. Alternately, a character can be introduced using this kind of humor so the audience and fellow cast can learn something about them , be it that they're somehow different or prone to offbeat humor. If it takes a few episodes for the joke to pay off, it becomes funnier in repeat viewings. Not to be confused with Could Say It, But... . Compare Insult Backfire and Asymmetric Dilemma . Compare and contrast Forgot He Was a Robot .

Generally speaking, a Literal Genie will make logical but basic interpretations of a wish. Nothing more and nothing less than what the wish explicitly </ states. This is so that when a wish backfires, we can laugh at the foolishness of whoever made the wish, as opposed to the genie, who is supposedly just doing their job Sometimes, though, the literal interpretation just isn't enough. Try as we might, there simply aren't that many wishes which can be literally interpreted to mean "Turn me blue." So when the humiliation really</ needs to pile on, the Jackass Genie has to make an appearance What differentiates the Jackass Genie from the Literal Genie is sheer malice. This creature has it in for whoever has the misfortune of being his master and will make whatever bizarre interpretation is necessary to make the master's life a living hell. A Literal Genie will grant the wish as is, with no additional magic good or bad. The Jackass Genie will be the precise opposite of the Benevolent Genie , inserting the absolute worst version of any wish In short, you just can't win; no matter what you wish for, the Jackass Genie will find a way to twist it so you end up worse off. Expect him to milk Exact Words and Metaphorically True for all they're worth. And taking the Literal Genie approach of making sure your wish is very specific is nothing but a trap. Unless you know a rule that he absolutely has</ to follow, he'll just move the goalposts and screw you over anyway: "Oh, the words you used mean something else in a very obscure dialect in Another Dimension ." And that</ is assuming that he doesn't just flat-out lie and claim to have "misheard" you, knowing that you can't prove him wrong You can also expect a Jackass Genie to interpret anything</ you say as a wish, even if you didn't intend to make

one. Never say "I wish I were dead" when this particular genie is within earshot. Your "wish" will</ be granted. Even the Literal Genie tends to have a tenuous grasp of the concept of hyperbole. Even worse, the Jackass Genie may just suddenly set you on fire because "You didn't wish not</ to be set on fire" As you can plainly see, oftentimes the Jackass Genie just seems to be taking cheap shots at characters who are literally helpless before him . As a result, expect him to be the clear villain when he appears. The Literal Genie can be excused somewhat if they're just naturally ditzy or are trying to teach you a lesson about being careful what you wish for , but the Jackass Genie can lay no such claim. If there is any lesson to be learned with them, it might be " if an offer seems too good to be true, it is " — after all, this genie acts like a supernatural Con Man , and you always had the option to walk away and/or wish none of this ever happened . If you literally wish for the latter, however, don't be too surprised if the genie erases either you, the entire earth, or the universe from history. Morton's Fork may apply Genie jackassery is a natural repercussion of the original mythology since most wish-granting djinn were spirits imprisoned and enslaved by sorcerers (usually) and are rather unhappy with their servitude</. As such, they will take every opportunity to screw over their master. Genies following this tradition are basically sending An Aesop that "you shouldn't consort with magical beings, full stop". Nowadays that might be because " hard work is good for you " or " Wanting Is Better Than Having " Has nothing to do with fitting Johnny Knoxville in a bottle... or the other way round, knowing him Compare with Deal with the Devil and Fairy Devilmother . Due to their common motivation, many of them are also Trolls The "a dwarf walks into a brothel with a jackass and a honeycomb" joke In The Scholomance </, the titular Wizarding School provides written spells and spellbooks to students from the Void Between The Walls on the condition that the student sits down and commits them to memory. Given that it has taken a particular interest in one Galadriel Higgins and puts some effort into cultivating her talents where El would just as soon it did not , thier relationship has strong overtones of this

For the 2013 biopic about Jackie Robinson, click here. </ A minority resolves to join a profession dominated by an excluding majority. In their attempt, the character is subjected to considerable verbal abuse, threats and attempted sabotage by the bigoted members of the profession. In response, the focus character shows considerable skill and iron determination to see the challenge through. Meanwhile, sympathetic main characters offer to help while understanding the focus character's insistence on success on their own to gain credibility. Often there is one final challenge that the focus character must face and, in a climactic moment, the character succeeds, proving their worth in spectacular fashion and setting a valuable precedent for others. Named after Jackie Robinson , who broke the color barrier in major league American baseball. Often a subtrope of Breaking the Glass Ceiling . Contrast with "Gender-Normative Parent" Plot , that's about a boy's "unmanly" hobby is disapproved of the people around him. Compare Sweet Polly Oliver . Also see the subcategory of You Go, Girl! , although that is usually more light-hearted.

Princess Nine </ is about a whole team</ of girls trying to win the Japanese national High School baseball championship.

Aiko Inaba in the Judge Dredd </ spinoffs Shimura</ and Hondo City Justice</ , who ended up being the first woman to qualify as a Judge-Inspector in Hondo City despite institutional pressure on her to fail. It helped that her mentor, Shimura, is much more liberal than most of his (then) colleagues.

Appears in Without a Trace .

Bill Burr had a stand-up bit about this, wherein he mocked the overuse of this trope in film, to the point that they were beginning to run out of sports to tell the Jackie Robertson Story with.

Subverted on Futurama </, when Leela is allowed to become the first female professional Blernsball player only because she's so comically bad that it makes for a good crowd-draw. She eventually makes it into the hall of fame – as the worst</ pitcher in history.

Baseball comic </ introduced a female pitcher attempting to break into the major leagues in a story line that begins . The team and management is less than supportive.

The Jack-of-All-Stats is a member of the Competitive Balance lineup who does not specialize, and explicitly so. Strong</ but not The Strongest</, Fast</ but not The Fastest</, Tough</ but not The Toughest</ . Good at everything, the best at nothing. Their biggest strength is their lack of any glaring weakness, and their biggest weakness is their lack of any remarkable strength Quite often, this character is the baseline to get the hang of the controls, since they lack the extremes that might trip up a novice. They're also a solid choice for advanced players who want the flexibility to exploit an enemy's weakness, no matter what that weakness may be. Whether the character retains their usefulness as the player's skill grows depends on how much the game rewards versatility as opposed to pure power, but the Jack-of-All-Stats is almost never the best character in any given game or a Game-Breaker . They may have trouble dealing with characters whose skills are more extreme than theirs if they're allowed to press their advantages. Some games tout the Fragile Speedster as great for beginners, while the Mighty Glacier is for experts only . In other games, the Fragile Speedster can be tough to control while the Mighty Glacier is easier to handle. In either case, the Jack-of-All-Stats is an all-around safe bet for anyone In games with multiple playable races, it is often the case that Humans Are Average and are therefore the Jack-of-All-Stats race. It's common for humans to be a compromise, stat-wise, between the classic dichotomy of elves , who are graceful and fragile , and dwarves , who are strong and slow Another strength that helps the Jack-of-All-Stats is resistance to changes brought about by patches or Metagame discoveries that would reduce or remove the need for a specialist class. The Jack-of-All-Stats can, and often will, become a Master of All if given enough time and effort, although this is usual much more expensive in comparison to a specialist class. In some cases their versatility also overlaps in Confusion Fu , as their ability to fill a variety of roles with a wide range of techniques can make understanding their full capabilities much harder, but either way, they can also fall into their own category of Difficult, but Awesome due to the fact that because they are so balanced, they lack specialization. This in theory would mean more specialized

characters can fall back on one thing the balanced ones can also do, only on a much more effective scale. This would mean this archetype have to rely on a lot more work to do well against said specialists, or even against themselves with a lot of fundamentals or out-of-the-box tactics . On the other hand, some of these characters can fall into the Skill Gate Character since their versatility allows newer players to explore different gameplay styles as well as exploring the player's strengths and weaknesses See also Necessary Drawback , PVP Balanced , Always Someone Better , Humans Are Average , and Non-Elemental . Compare the Master of All and Lightning Bruiser , who can do everything better, and Master of None , who does everything worse (basically the same as this trope except it works against</ the character). Often overlaps with the Standardized Leader . Multiform Balance can let a character be this, but often they can only cover one area at a time. Compare The Red Mage . Contrast Crippling Overspecialization

For many people, a job is normally just a paycheck to avoid being homeless, but many others dream of getting what they believe would be the best job ever, where they will love every second of it, and even get paid for enjoying it. Some are able to land this kind of job. But there can be a fine line between a dream come true... and a complete nightmare The Jaded Professional is someone who used to love their job, but after working some time there, they started resenting it, if not outright hating it. Maybe the system destroys the joy of the job, or maybe the character themselves hadn't thought about any of the downsides. One of the most common examples is politicians, where some people might want to make a change, but after a while, they learn that the system will block them at every turn until they stop trying This character tends to be an antagonist and/or mentor for the Naïve Newcomer , they may try to convince them that they should just give up. In the most idealistic works, the resolve of the protagonist will help them find joy in their job again Normally a deconstruction of Pursue the Dream Job . Sub-Trope of Jade-Colored Glasses and Super-Trope of Hates the Job, Loves the Limelight and Apathetic Teacher . Compare Trade Your Passion for Glory and Shell-Shocked Veteran

Media originating in Jamaica .

Celebrities appearing in crass, potentially embarrassing, or shoddy commercials that only air in a place far away Japan commercials can be fun at first, but they have to A celebrity may be willing to do certain things because of money , but they'll also have a set of standards for what they'll do. You may think it's reasonable that they have their principles, but you forgot that most successful celebrities sold their principles and sense of shame bundled with their soul and 92-year-old grandmother in a package deal made at a crossroads to a gentleman of considerable wealth and taste . Deep down, not all successful celebrities believe that there is No Such Thing as Bad Publicity , instead they are able to recognize (or pay their agents to recognize) that doing something embarrassing or "beneath" their standard for some short term bucks can become a Never Live It Down that harms their long term prospects and marketability They will refuse crass or embarrassing uses of their time. The one exception: if it is done very far away where no one will see it. And by "no one", we mean "no one who speaks English", and by "very far away", we usually mean "Japan". Some celebrities are also willing

to do foreign commercials as a way of keeping themselves visible in that market, when they don't have a movie being released over there at the time. Doing talk shows and TV appearances in their home country is feasible since they don't have to travel very far. Doing talk shows in a hundred different nations every other month would be nearly impossible. With a commercial, they only have to shoot it once, and it will be aired fairly often. A trope that exists in the behavior of celebrities (actors/singers/etc.), and is also picked up readily by those in the industry and reflected in the works they make : A celebrity goes over to Japan, possibly somewhere else, and then does a fairly embarrassing job clearly made only for the cash and in the belief that, due to the language barrier and the lack of appeal of a Widget Series , nobody back home will see it. If it ends up on YouTube, it quickly becomes an Old Shame , which is why many have it written into their contracts that they can't have it be spread around. Because it is all too easy for these commercials to be leaked onto the Internet nowadays, this is likely on its way to becoming a Discredited Trope , if it isn't already. The term itself is a portmanteau of "Japan" and "Pandering". Compare Embarrassing Ad Gig .

Compare Germans Love David Hasselhoff .

Arnold Schwarzenegger is practically the God-King of this trope, as he did more than , from energy drinks, noodles and beer to cars, DirecTV and anti-piracy. Schwarzenegger was one of the first celebrities to take advantage of this phenomenon, and many others followed suit. One example is the trope picture above for Alinamin V energy drink.

Jackie Chan seems to be doing this in the United States these days.

Antonio Banderas appeared in several Italian commercials for Mulino Bianco's biscuits and bread, where he mostly .

The turn of the 1980s saw the American business computer manufacturer Prime Computer showing a in Australia and New Zealand featuring Tom Baker and Lalla Ward in character as the Doctor and Romana . They are notorious in fandom for the final advert, which depicted the relationship between the two characters as overtly romantic.

Jet Li did in the Philippines. It would have been awesome if the director didn't do two Freeze-Frame Bonus of Filipino boxer Manny Pacquiao looking awed while his name is plastered on the screen as if they want the viewers to notice that Pacquiao is in this commercial.

These are a subset of both Japanese Visual Arts Tropes and Animation Tropes , the intersection specifically. While very similar to the visual art tropes, these require animation and sound in most cases.

An index for works originating in Japan . See also Japanese Media Tropes .

Tweeny Witches

Serf-demonstlating velsion hele. Where a joke is made about pronouncing "Rs" and "Ls" incorrectly in Japanese, or other pronunciations. When this trope is used, the letters are often reversed where the sounds they are making are not ones that would cause that problem—e.g. "R" (when pronounced "are") being

replaced with "L", when a long "ah" sound would be more likely. The above is a bit extreme, but there is some truth to this : Japanese has neither the English R nor the English L - it has a sound that might be best described as a combination between an R and L). The same is true of Korean - it has Rs and Ls, but these are different allophones of the same phoneme, which is pronounced as an L when it's at the end of a syllable (which doesn't happen in Japanese). Exactly why the creators of Romanization decided to just use Rs for everything is a mystery for the ages. There are other "pairs" in Japanese like this, such as V and B, H and F, etc. Likewise, there's no sound for "th" in Japanese, so S sounds are used instead Unsurprisingly, this is a big hurdle for Japanese natives learning English; e.g., "thunder" is often written and pronounced "sanda", "sander", "sunder", etc. However, this particular example rarely occurs (as a mistake). Also applied to other Asians — even if the accent doesn't fit (though Chinese from certain regions are prone to r/l mistakes as well, particularly Cantonese speakers), or with exaggerated accents of their own. The Japanese L/R can also occasionally sound to English-speakers like a D (specifically, the "tap" that replaces unstressed /t/ and /d/ in North American and Australian English), but not much seems to be made of this in media Closely related to Spell My Name with an "S" . Often used as part of Asian Speekee Engrish or Intentional Engrish for Funny . And, of course, one must be careful talking about this or invoking it deliberately, as doing so can come across as intensely</ racist. (Which it is, fundamentally.) This sort of problem can occur in non-Asian languages as well. In Spanish, both "V" and "B" are pronounced like the English "B" (except between vowels, in which case there can be a sort of subtle cross between the two that doesn't exist in English - and that most Spaniards eschew anyway as soon as they leave kindergarten). It goes to the extent that many native Spanish speakers have a hard time differentiating between the two in their own language, and this can become a trouble when speaking English. Curiously, Japanese also has this exact issue in addition to the L/R thing. Also, Arabs struggle to pronounce "P" and "V", replacing them with ‘B’ and ‘F’ respectively — see more on Arab Beoble Talk . Central and Eastern European languages can have a similar problem with "V" and "W" — see Vampire Vords . Generally it's an honest mistake; the humor comes from onlookers. Words in katakana are spelled phonetically with a set of standard characters which ignore the original non-phonetic spelling. When the word in katakana is transliterated normally, it may be unrecognizable. The translator must have a good understanding of how the word is spelled in both katakana and the original spelling. This becomes especially difficult with completely made up words, leaving the translator to interpret the correct spelling of a word that may have no correct spelling (or be vaguely similar to an existing word). Alternatively, they can pray an official transliteration appears eventually. Usually it does, but not always! Sometimes not for years even for major works (Transformers </ has this problem), and basically never for many smaller works (such as obscure one-off OVAs). This can result in the interpretation ending up totally different from what was intended. When a Japanese character can speak English perfectly, but talks like this for the reason of Obfuscating Stupidity and/or for amusement, it is Elective Broken Language . In the live American version of Monty Python's World Forum sketch, the question about the Eurovision Song Contest is changed to "Jerry Lee Lewis has had over 25 solid gold hits in the U.S. of A. What's the name of the biggest?" Lenin doesn't answer,

and so Eric throws the question open. Mao Zedong hits his buzzer and responds "Gleat Barrs of File?", which is the correct answer.

Before the bubble burst on the Japanese economy, waves and waves of tourists were coming overseas. In any Chase Scene or crowd scene, expect there to be such a group of tourists, who just ooh and ahh at the main action and take pictures while flashing the V-Sign at one another. This has not quite passed into Dead Horse Trope territory, as plenty of Japanese still do travel overseas in Real Life , and tend to do so in large tour groups due to low levels of foreign-language proficiency and a lack of Japanese speakers and signage in other countries. Such groups are very likely to contain keen and very well-equipped photographers. However, it shows up quite a bit less now than The '80s and The '90s The trope usually pokes fun at their tendency to snap photos, travel in huge groups, and always behave like they're visiting a zoo Since the turn of the 21st century, the stereotypical Asian tourist is increasingly likely to be Chinese and Korean rather than Japanese A subtrope of Funny Foreigner . If they get a chance to talk, may often use Asian Speekee Engrish . Compare with Hawaiian-Shirted Tourist and "Ugly American" Stereotype , this trope's two Eagleland equivalents

These are visual art tropes that originated in Japan. This covers all aspects of drawn and rendered art styles and tropes that originated in Japan, regardless of whether they stay there or not. Things that are Animesque are purposely invoking these tropes Japanese Animation Tropes : where the trope in question is visual art, but requires animation or attached sound

Airplane of Love (visual symbolism trope)

In The '80s and the early '90s , Americans pretty much expected that Japan would be their new overlords in a decade or two. While other nations were too busy worrying about the Cold War and trying to dominate the world militarily, Japan was quietly taking over the business sector with a seemingly inhuman affinity for technology and a hive-like dedication to work. It seemed that, no matter what we did, we'd all soon wind up working for the Japanese As a result, a large number of media created in the 1980s and 1990s, set 20 Minutes into the Future or later, had the U.S. being dominated by Japanese companies and culture. This trope was particularly prominent in Cyberpunk of the era Since the starting in the early 1990s, however, the trope has become discredited , as the Japanese aura of invulnerability became permanently cracked (see Analysis for more details). Today, the trope has been replaced in the Western world with a preoccupation over China taking over the world This is a Western trope. Compare Tokyo Is the Center of the Universe , which is a Japanese trope about Creator Provincialism Sub-Trope of Take Over the World . See also Americasia , Yellow Peril , China Takes Over the World and America Takes Over the World

For one reason or another in the middle of the Potty Emergency , a toilet isn't available. Perhaps they're on a wacky road trip , perhaps they're locked in a room, perhaps they find the idea of urinating outdoors disgusting, they are very poor, or perhaps even because they refuse to quit playing a certain video game . Whatever

the reason, a proper trip to a bathroom is not available. Instead, some other container, usually a jar, is offered. Usually, the person will protest and say they'll hold it. If the person does use the Jar Potty, it'll be off-camera. The contents of the jar may be spilled on the person, with the phrase "I hope that was just water" or some variation therein. This trope is almost always Played for Laughs . That said, use of jars, chamber pots, cans, and other non-flush/non-latrine "toilets" has happened pretty much until the advent of the flush toilet in almost all societies that did not practice cleanliness codes forbidding it, being the direct cause of epidemic/pandemic cholera and the spread of much other serious infectious diseases. There is a reason why latrines are generally situated away from water sources, why the flush toilet in societies with some degree of wastewater diversion/wastewater treatment, and/or chemical composting toilets being used to dispose of fecal matter are considered the</ greatest advance in disease prevention of human history; and the existence of proper toilets is literally central to the eradication of epidemics and pandemics. Using a jar or chamber pot or bottle or similar for urine only</ is relatively safe, though, as unless the user has a UTI or gonorrhea or schistosomiasis, urine is itself, while not perfectly sterile, is</ devoid of harmful to human health</ bacteria until exposed to it. The most common people who partake in this practice in Real Life include: That said, No Real Life Examples, Please! (Fictional examples are bad enough.)

Most frequently observed in Western Animation , though it also occurs in other media as well. A character becomes surprised or shocked, and their jaw drops comically, oftentimes with the sound of a saucepan for the comedic cherry on top. This is done to ridiculous extents in some cases (where the jaw drops to the floor and sometimes even an Overly Long Tongue rolling out, as seen with Genie in the image on the right), but also sometimes within a reasonable human limit (as seen with Jafar). The former can be either pure Rule of Funny or justified by the character having supernatural powers or superhuman flexibility On occasion, another character will reach over and close the dropping character's jaw

Some crimes are less serious than others. In " Arson, Murder, and Jaywalking ", Jaywalking is typically thrown in just for laughs. is the act of crossing the street without using a designated pedestrian crosswalk, and is the However, sometimes the smallest crimes have really serious consequences. This trope is for when the crime is treated as minor and the consequences are a matter of punishment and ostracism. Let's say that Bob jaywalks. Not a car within a thousand miles, perfectly safe. But a cop arrests him. This makes his boss consider Bob a "criminal," and fire him. His wife, not wanting to be married to an unemployed criminal, divorces him. Of course, whether a crime is considered a misdemeanor or a felony depends on various individual and cultural values. When Values Dissonance ensues, a point and counterpoint should be listed. Very much Truth in Television ; isn't explicitly legal</, but throughout the industrialized world employers put a little box on hiring applications asking if the applicant has a criminal record - not</ checking that box if you have said record permits summary firing, and there isn't a rule against discriminating against ex-cons. Except where there is, but the business can always claim some other reason, and if the ex-con files a lawsuit (which other businesses can cite

when refusing to hire), who is the judge going to believe, the ex-con or the business that contributes to the local economy? As one would expect, this results in a lot</ of Justified Criminals , as they cannot find legal employment. Compare and contrast: Has nothing to do with TV Tropes Will Ruin Your Life .

Jazz started out in the United States in the beginning of the 20th century as 'black music' and is closely related to Blues , to the extent that many famous jazz compositions can be considered Blues pieces. Since then, there have been different forms of jazz, listed roughly in historical order: New Orleans/Dixieland, Swing/Big Band, Bebop, Cool, Modal, Avant-Garde, Free Jazz, Fusion, Nu Jazz... and this is a very incomplete list. Jazz itself probably started out in a small band format in many different cities throughout the US, most famously New Orleans. It became the most popular type of music in the US in its Big Band format (10-30 musicians) during the Twenties to Forties . Then it evolved into a multitude of different styles, pretty much all of which were played by small bands (duos to octets), starting out with Bebop. The emphasis also changed back to playing more in jazz clubs and having fewer concerts (with some important exceptions, such as the Newport Jazz Festival). The ascension of pop music and Rock & Roll in The '50s led to the fading of jazz's popularity. Jazz today has, for the most part, a sizable but 'cult' following. Somewhat amusingly (and probably shockingly to the original founders of the genre), jazz has become "respectable" music thanks to the development of technical artistry; jazz is now taught alongside Classical Music in many university music departments across the US—unheard-of for any other genre. Jazz has left a deep impression in music. Improvised and/or extended solos are the primary example of this. Jazz also contributed to the development of musical instruments, most famously the modern drum set, which was largely developed by early jazz musicians. Jazz is one of the most unique cultural contributions that the United States brought to the world, along with Rock & Roll . Finally, a note on the name: there are The Andrews Sisters The Allman Brothers Band : To a certain extent. While they're generally thought of as the</ Southern Rock band, improvisation was a major element of their sound, and lead guitarist Duane Allman listed John Coltrane and Miles Davis as two of his biggest influences. Drummer Jai Johanny Johanson also had a background in jazz (in fact, he was the one who introduced Duane to Coltrane and Davis). Gil Scott-Heron : A civil rights activist and poet who became well-known for reciting racially-charged poems, such as "Whitey on the Moon", "Peace Go With You, Brother", and his oft-parodied signature poem "The Revolution Will Not Be Televised". His unfiltered, blunt delivery and social consciousness was an early predictor of rap.

This is when Taking a Level in Jerkass is plot-requested. Sometimes, an otherwise nice person becomes a Jerkass unexpectedly, most likely to advance the plot or sometimes simply for humor value In-story, the sudden change in behavior can have a variety of reasons. Sometimes they're mundane everyday reasons such as merely having a bad day and can include longer-term ones such as intense levels of stress over an extensively period of time. Others could because of certain scenarios; maybe that one activity just has them lose their patience. Sometimes the Jerkass Ball is a more literal thing, such as alcohol and the character in question being a mean drunk. Of course, supernatural, paranormal or abnormal items being the literal Jerkass Ball is common too; the portrayal

of Superman under the effects of Red Kryptonite is an example If done to deliberately take The Straight Man or Nice Guy down a peg, it counts as Not So Above It All Opposite of Kindness Ball Common in You Go, Girl! plots, where male characters who have never demonstrated any kind of sexist behavior before suddenly turn into raging Straw Misogynists Acquired Situational Narcissism is a specific ego centered example of this trope May overlap with Not Himself , Nice Job Breaking It, Hero! , Depending on the Writer and Comedic Sociopathy . If done in a particularly exaggerated manner that in no way befits their normal characterization it is likely an Out-of-Character Moment or a Moment of Weakness . If the character has not actually become a Jerkass, but merely presented that way, it's Superdickery . Not to be confused with the Haters' Ball Despite being a temporary change of personality plot wise, characters can eventually snap themselves out of it, leading them to an apology and/or a reconcilement scenario between the other characters during the plot

He's not good. He's not nice. He's a jerkass . What he just said is probably the</ last thing you wanted to hear. But the worst part is that he's right </ . The jerkass in question can be anything from your standard Jerkass or Anti-Hero all the way up to any flavor of Villain (though the chance is inversely proportional to the distance they go down the "slippery slope"). Whoever this jerkass is, they're seriously deficient in the morals department, at least from the point of view of the perspective characters. Then they have a moment where they say something undeniably true — the good guys don't have to like</ what they're saying, but they can't deny that they're right without deluding themselves. Cases typically involve the listener conceding the point or a trustworthy source agreeing with the jerkass. Perhaps even the protagonist is caught on a moral stumbling block, and the antagonist is all too glad to point out their hypocrisy. After all, at least the antagonist is honest about it . Or maybe it's the antagonist who is a hypocrite and sees the moral failings of the others but not his own. It is all too often that the character is Right for the Wrong Reasons , making some legit points, albeit for entirely selfish reasons. The other</ main reason a character is likely to say " I can't believe I'm saying this, but I agree with him</ ." It's worth noting that the Alpha Bitch and the Jerk Jock , two of the main distributors of this trope, have a tendency toward bluntness. While our hero's friends may be hesitant to insult him, these characters don't really care what he thinks and are willing to say exactly what he's doing wrong, without sugarcoating their " What the Hell, Hero? ". A rare outcome of the claim that " We are not so different ". A response of " Shut Up, Hannibal! " would be out of place and is likely to get shot down if it appears but a Kirk Summation could work. See also Not Himself (a situation likely to inspire this), What the Hell, Hero? (same), and Don't Shoot the Message (when this occurs in Real Life). Also a likely response to an Insufferable Genius . Compare The Horseshoe Effect , wherein two people claim to be ideologically opposed and yet have beliefs in common. Sister Trope to Dumbass Has a Point , The Extremist Was Right , Hypocrite Has a Point , Villain Has a Point , Wisdom from the Gutter . This is an In-Universe Only Trope. For it to be Jerkass Has a Point, the work or characters within the work must acknowledge that the jerkass is right. If a character who is often unpleasant makes a point that readers are meant to see as wrong, but still comes across as more sensible than the counterargument, that's

Strawman Has a Point . Also, No Real Life Examples, Please!

A Jerkass is a character who is so completely obnoxious that it is unbelievable anyone would willingly interact with them. They may have fans, but in most cases the appeal of their character is that they are walking schadenfreude — you know it'll eventually end badly for them , and you can't wait to see it Characters can be Jerkasses in many ways — some may be polite, intelligent, charming, handsome and/or brave, but still give off a basic air of snobby, sneering, self-centered prickery that makes them such a nasty little punk that you wonder why people put up with them. Others are more obvious assholes who may be crass, sleazy, or otherwise repulsive. Either way, it's usually their status on the team of "good guy" that results in them never being called out on it. After all, if they were an asshole on team "bad guy", they'd just be another villain. This is especially disconcerting in any series following a team that needs to be coordinated and would realistically not put up with this kind of behavior. This can also happen with a hardass or grouchy character who becomes an obstacle to others rather than providing pragmatic, but perhaps unpopular, advice What makes them entertaining is the fact that you don't have to deal with them yourself in real life. Usually, the Rule of Funny enables the people around the person to be able to tolerate them. Sometimes, the Jerkass is the Plucky Comic Relief who's stepped off the beam and become The Scrappy , in which case the Rule of Funny fades away; they may be okay in the other characters' eyes, but the audience, not so much. Because of this, it's hard to feel sorry for them when something bad does happen to them, and it is often seen as comeuppance which will be applauded by the audience The single factor that pushes a merely annoying character over the line into full-time Jerkass status is their absolute obliviousness to other people's perceptions of them. Nothing they do ever strikes them as out of proportion ; they never realize that anything they are doing might ever</ be considered inappropriate, excessive, or cruel; in fact, they believe they are actually right and everyone around them is in the wrong . If anyone ever does call them out on their Jerkassery, expect them to just rationalize it or shrug the accusation off . If the writers don't put it in check and just keep trying to one-up the character's assholishness, the character can deteriorate into The Sociopath . Often the result of Flanderization or Madden Into Misanthropy If absolutely everyone</ acts like this, you're looking at a World of Jerkass . If the character knows they're a jerk and revels in it, they're a Card-Carrying Jerkass . Hate Sinks , characters intended to be hated, are almost always Jerks of some kind On the off chance that something happens to nice-ify or remove the Jerkass, the other characters will be relieved at first, but will proclaim " We Want Our Jerk Back " by episode's end. If the protagonist starts as a Jerkass and learns his lesson, it may be a Jerk-to-Nice-Guy Plot See The Jerk Index for variations on different types of Jerks. Contrast with Innocently Insensitive , who acts</ like a jerk because they don't know any better, but will be quick to correct their behavior once it is pointed out to them. The inversion is Nice Guy , obviously. If you want to see the hero who is the Jerkass despite their good intentions, see Good Is Not Nice Not to be confused with the reality stunt show Jackass </

Normally, The Woobie is a sufficiently Moe character that: The Jerkass</ Woobie produces a different visceral reaction: you'd like to punch them in the face yourself and</ you also want to hug them and say, "I'm so sorry that your life is such a mess." This character type is defined by three elements: This isn't a case of Defrosting Ice Queen , Sugar-and-Ice Personality , or Flanderization . The character is just that complex. From both the fans and the other characters' point of view, the character can come across as an Anti-Hero of the worst sort, or just plain nuts , and there may even be a Broken Base over whether they are a Karma Houdini , got what they had coming, or were more victim than villain. They likely think of themselves as a Butt-Monkey or Cosmic Plaything , which, really, they kind of are. It also helps if the audience gets to see just why</ the character is always in such a bad mood. Being the Only Sane Man or Surrounded by Idiots can take its toll on even the most patient of souls. Typically, the trope is Played for Drama or Played for Laughs as a justification for Jerk Justifications or Jerkass Dissonance . This character type may: The difference between this and an Ineffectual Sympathetic Villain is that an Ineffectual Sympathetic Villain is often a borderline Harmless Villain and their nasty schemes fail so miserably that you start rooting for the author to Throw the Dog a Bone while this character's evil is often less about schemes and more just a mean streak. The character's woobie nature may also play a factor in the phenomenon of All Girls Want Bad Boys . Contrast Woobie, Destroyer of Worlds , where a tragic but less cruel character destroys everything around them because they have already been broken . The Jerkass Woobie's cruel acts are generally not a result of him being broken and his suffering may even come after he has sinned. Not to be confused with Put Them All Out of My Misery , where a sympathetic villain seeks large scale destruction out of a desire to end misery. See also Draco in Leather Pants , where one of these happens accidentally. Jerk Sue is a failed attempt at this trope, where the author attempts to make his/her mean OC sympathetic by laying out a stock tragic backstory for him or her then having the rest of the cast ooh and aah about it unless they are the Designated Villain , in which case they will act extremely petty for no reason and probably be revealed as Just Jealous before dying in an over-the-top "comedic" fashion so Sue can be "right all along". Unintentionally Unsympathetic can also result if the character feels heavier on the jerkass part and the bad things that happen to them feel more like karmic punishments, while the opposite will happen when the character gets punished for no reason because they’re just “The Bad Guy”. A true Jerkass Woobie, even if they truly suffered in their past, may still not get sympathy from all of the people around them and certain types of characters probably wouldn't be quick to forgive them for their behavior, either, i.e. the author and story allows both the other characters and the audience to choose for themselves</ whether to hate or forgive them, and doesn't try to force forgiveness out of either. Just because the audience has knowledge about something doesn't mean that every character should know, and it doesn't make the character a "bad guy" for calling out another character for being a jerk even if they are intended as sympathetic. Put another way, this is what you get when the author invokes a Base-Breaking Character . If this character type ever sheds tears or outright cries, you can bet it will most likely be a Cry Cute moment.

If you're looking for a few more pointers on writing this kind of character, take a look at our analysis page on Woobies as a whole,

particularly the "'Just Desserts' test" section.

See that tall , hunky and vulgar blond guy in the football letterman jacket picking on the nerd over there? What's his name, Dick ? Bill? Kyle? Tyler? One of those? That's him. One in every school The Spear Counterpart to the Alpha Bitch (and sometimes The Cheerleader), the Jerk Jock is the Chief Bully who dominates the school/college environment through physical violence and threats of brutal retaliation. A boorish, obnoxious, spiteful asshole with an out-of-control sense of entitlement , he spends his time beating people up, getting drunk and destroying property; and in darker works, he may also be an incorrigible rapist Of course, most of that doesn’t matter to the student body. Often times, the Jerk Jock is the reigning king of the campus, with many people wanting to be his friend or his date, or at least be on his good side. His bullying ways don’t make him a pariah, but a prince, because as everyone in High School knows, anyone who’s popular is a bully Just as the Alpha Bitch has a Girl Posse , the Jerk Jock has the Cool Crowd, a crowd of hangers-on who bow to his every whim and help him victimize whomever he decides to pick on. And he inevitably decides that Our Heroes are his favorite targets One of the Jerk Jock's favorite targets is the Non-Action Guy , who is either not good at sports, or is simply not interested in sports, because he's more " artistically cultured " than other boys . The Jerk Jock loves to pick on the Non-Action Guy because of his apparent "lack of masculinity", and because the Jerk Jock sees artistic activities as "feminine" or "unmasculine". Often, a Lovable Jock (Passionate Sports Girl if female) will protect the Non-Action Guy from the Jerk Jock Like the Alpha Bitch, the Jerk Jock is surprisingly popular despite his repellent personality , especially with the school's staff and most adults , and can get away with most anything . Chances are he's extremely necessary for a high school/college to compete against rivals lest they be wiped out into obscurity. Or, in the similar vein to the Alpha Bitch : politics and cold hard cash However, where the Alpha Bitch uses her wiles and sex-appeal to get what she wants, the Jerk Jock usually isn't very smart and is more likely to fall back on fear of violent reprisal instead. Usually, violence is not an option to deal with him, unless The Hero or somebody on their side (likely The Big Guy) is indeed physically stronger than him . Other than that, manipulating him to his doom often proves to be the most effective way to deal with him, since he's seldom bright enough to see through intrigues; the fear of public humiliation, loss of status, or his parents discovering his ways is often sufficient to keep him at bay. That or a Jerkass Realization In shows focusing entirely on school life, he'll be a primary antagonist ; however, if the school environment is merely a setting and not the key focus he's more likely to be just a recurring nuisance for the characters to deal with, or a Villain of the Week . In shows dealing with the fantastic, he can often be found Mugging the Monster , or portrayed as stupid enough to bully someone even if he knows that they have powers that could reduce him to a smear on the wall . In a Slasher Movie , chances are very, very</ good that he is going to die, winding up an Asshole Victim Whilst it's not as common to get a sympathetic side to the Jerk Jock as with the Alpha Bitch, you'll sometimes get a softer version who isn't evil so much as an arrogant, self-absorbed Jerk with a Heart of Gold who doesn't really know any better. This version is much more likely to end up

petting the dog , and may reveal his sensitive side in an Enemy Mine . He may also mend his ways and join the hero's side . And even while still a villain, the Jerk Jock can garner sympathy if he's given a Freudian Excuse (with having a "Well Done, Son!" Guy as a father or an outright abusive family being the most common) Unfortunately, this trope tends to be somewhat a Truth in Television , and very much prevalent in team sports. The reason is : team sports encourage tribal mentality, loyalty to one’s own tribe (team), hostility to other tribes (other teams), and complete indifference towards outsiders. The tribal mentality dilutes the responsibility of one's behavior and manners, and even at some instances encourages uppity and obnoxious behavior. Schools that have particular reputations for a specific sports program may even grant special privilages to star players (and sometimes even cover up bad behavior to prevent the team's reputation from suffering). Rarely</ do practitioners of individual</ sports fall into such a category, and are more often a Badass Bookworm or Genius Bruiser type. Jerk Jock behavior is seriously</ discouraged in Real Life martial arts, on pain of outright expulsion from the sport, let alone the violator's school See Schoolyard Bully All Grown Up and Kids Are Cruel . Compare to, and sometimes may even overlap with, Big Man on Campus , who usually matches the Jerk Jock in popularity, but is less of an antagonistic force. Also compare Dumb Jock . Little relation to Violent Glaswegian Note if a character is a bully, but isn't depicted as a Sports player or a rich boy with Good publicity , then they're probably just a Barbaric Bully . However if thuggish, and Obviously Evil enough, some Jerk Jock characters can qualify as a Barbaric Bully as well Contrast with Lovable Jock . Originally Lovable Jock was the normal portrayal while Jerk Jock was a reversal, but nowadays the Jerk Jock tends to be more populous in fiction than Lovable Jock characters. Female Jerk Jocks are not unheard of, either

Fiction is created for a wide variety of purposes, but it's safe to say that almost all fiction has one goal in mind: make the audience feel something. The audience knows that what they're experiencing isn't real, but is willing to go along with it because they want to be entertained . If a work succeeds at this one thing, then it's accomplished at least that much. Of course, as this wiki has extensively documented , the emotion that a work provokes isn't always necessarily the emotion that the creator had in mind One common unexpected reaction to fiction is that audiences tend to react with greater disdain to garden-variety Jerkass characters than they do to the Big Bad of the story, even if the villain's deeds are far more heinous in nature and/or by comparison. The Big Bad may want to cripple the economy, rule with an iron fist, or destroy the world, yet the audience will show greater hatred for The Dragon tripping the protagonist or kicking their dog . While this makes no sense from a rational perspective — unsurprisingly, as cold facts often have little to do with how a person feels — there are some rational explanations for this phenomenon The most plausible explanation is a difference in context</. Everyone has been affected by garden-variety jerks and bullies in one way or another. Thus, the audience can personally relate to the everyday cruelty of such people's fictional equivalents, which can make the audience actively dislike such characters. By contrast, many fictional villains, especially

those from Speculative Fiction , are committing acts of cruelty far beyond those of normal experience. An Evil Sorcerer Omnicidal Maniac is doing things much worse than anything a schoolyard bully could possibly manage, but the Evil Sorcerer isn't and can't be real. The audience can understand that the villain is only there for our entertainment, whereas certain Jerkass characters don't have the same dissociation from Real Life There's also the fact that Evil Is Cool ; Jerkassery isn't cool. Villainous characters appeal to the desire to be rebellious and wild, or our natural fascination with forbidden things . Creators often try to make their villains cool , badass, funny, charismatic, full of ham and cheese , audacious, perhaps even sexy because an interesting or Likable Villain helps make a fun and interesting story. Even when the audience does</ hate them, they love doing so . By contrast, Jerkasses typically lack the flair and charisma that makes the villain enjoyable or interesting, being not only unpleasant and unlikable, but also mundane and uninteresting Getting one’s just desserts relates to this fate too. A jerk being a Karma Houdini is just asking for audience vitriol. A villain is more likely to get their just desserts than a Jerkass There are also storytelling devices that can depersonalize the main villain's evil. A Million Is a Statistic means that the villain can do terrible things to countless people, but because the audience doesn't know anything about those people, they don't care. Conversely a Jerkass being cruel to a character the audience knows and is emotionally invested draws a more significant emotional response. Off Stage Villainy can cause this as well, as the villain doing terrible things out of sight is easy to dismiss or forget, while the Jerkass's deeds are more likely to be front-and-center Some tropes that help provide explanations for this include Evil Is Cool , Evil Is Sexy , and the stereotype that All Girls Want Bad Boys (plus any applicable variations of that concept). All of these are merely expressions of the truism that rebellious, forbidden, and even dangerous things have their own appeal to people. The logical outcome for that</ concept, of course, is Draco in Leather Pants On the other hand, this can be combated by having the villain engage in bullying, jerkish behavior themselves: See Evil Is Petty . A Jerkass can avoid this fate typically by being funny enough for the comedy factor of Played for Laughs to come in. See Laughably Evil . Of course being funny also works in a villain’s favor as well. Jerkasses that are fully-developed and have redeeming factors to them alongside their Jerkass traits are usually exempt from this fate, too Note that the 'villain' in question can also include the highest caliber of heinous evil villain, the Complete Monster , making it somewhat kind of more acceptable in the audience's eyes rather than those mundane jerks Contrast Jerkass Dissonance , where a jerkass in fiction is actually more likeable than the ones in real life See also Hate Sink , an intentional example of this phenomenon where a more minor villain is meant to get more scorn than the larger villain or overall threat in the story, and Realism-Induced Horror , a similar concept but with fear instead of hatred No Real Life Examples, Please! the place to grouse about characters you personally dislike , or grouse about people who don’t like certain characters. This trope only discusses a verifiable phenomenon

Not every Mary Sue can have the patience of a saint. After all, if you</ were that perfect, lesser beings would get on your nerves too

. Everyone falling in love with you? It's such a pain!</ People not always realizing that you are</ the most kick ass person here and you have</ to be the one to save the day? Fools! People expecting you to follow the same rules as the other characters? You'll show them! Grr! Get out of Jerk Sue's way! The basis of this trope is the tendency of many Darker and Edgier writers to create a bitter, ill-spirited, confrontational, or downright mean character and still play them up as an ideal person , or just get away with being a bullying Jerkass . The other characters tolerate the antics (which can range from petty to sociopathic), allowing him/her to walk all over them and talking them up in their conversations with each other. Common synonyms include "strong", "tough", and "rugged" while common topics include how much better they've made their lives through their " Tough Love " or whatever Freudian Excuse supposedly justifies their behavior. It's often an unsuccessful or inept attempt to play on Jerkass Dissonance . Perhaps they are loathed so much not just because they are jerks, but because you are also expected to think they are awesome. They certainly come with most of the other traits of Mary Sueness - being completely untouchable in every way. And of course, despite being a jerk, everybody either completely ignores her appalling attitude, or lets her walk all over them, even the ones who would normally peel off her skin and wear it as a coat for that kind of behaviour. Either way, they're royal pains in the neck and annoying to be around and read about. Very prone to It's All About Me . Contrast to Butt-Monkey or Can't Get Away with Nuthin' . Both this and the latter tropes usually represent the two opposite ends of Comedic Sociopathy . Compare Draco in Leather Pants , when it's the fanbase itself that overlooks or all too easily excuses a character's jerkish habits, or Creator's Pet , when it's the writers</ doing it and the fans despise the character as a result. Either of these can overlap with Jerk Sue. Compare and contrast Jerkass Woobie , where a Jerkass is portrayed sympathetically as a flawed, emotionally fragile character. The Jerk Sue can often arise from a failed attempt at this type of character Often overlaps with Karma Houdini .

Body scents can be a nice way for a guy to spice up his attractiveness, but when used inappropriately, they can give an air (so to speak) of smarmy overconfidence and overestimation of charm, to the point of coming off as sleazy or creepy. Cologne and aftershave are the classic avenues for this, but in modern days the go-to is body sprays, especially brands like Axe and Tag. If a male character is known for using body spray, the chances are very good that he's a clueless lout who thinks that smelling good is all that's needed to be attractive, or is using it to mask his insecurity and lack of game, or he sprays himself down so heavily that people can't stand to be around him. He may even use it as a substitute for proper hygiene. The actual odor itself can also be offensive. One particular brand of male Jerkass is often referred to as a "douchebag". The term carries certain connotations about his personality, clothes, hairstyle and/or accessories, but (over)use of body spray is a very common association. This negativity comes from blowback against advertising for body sprays. They were usually marketed as the aerosolized key for a man to draw the attention of every woman in olfactory range. However, some brands ran that theme to over-the-top and borderline misogynistic levels that began to draw the ire of both women and media. Anticipatory Breath Spray can cause a similar reaction if the guy doing the freshening up fits the same kind of loser image. Contrast Sex for Product , where the product actually

does attract women. No Real Life Examples, Please!

A person you would expect to be a big Jerkass has some redeeming qualities behind their tough demeanor . Occasionally, they'll try to make it a Hidden Heart of Gold In a romance series, a female character filling this role is usually a Tsundere instead (occasionally she's both). A male version is usually Troubled, but Cute , and his heart of gold should never outweigh his inner jerk because All Girls Want Bad Boys , though it can if Single Woman Seeks Good Man . If his jerkishness threatens to overshadow his good qualities, he's likely to attract a Love Martyr Sometimes Truth in Television , though you can expect Real Life examples of this to be far more subtle than fictional ones. Often this is Played for Laughs , but not always. They are just as common in drama, suspense, horror, and other genres as they are in comedy. One reason for this is that they make a convenient Plot Device . After all, the supposed jerkass turning out to save the family from their real</ stalker, instead of being said stalker, can be a source of Heartwarming Moments when done right If he's a manly-man who pursues an unexpectedly delicate hobby, it may be a case of Real Men Wear Pink . Audiences may also sympathize more with the JWAHOG if he's shown to frequently have a good reason to act angry or annoyed. Even the most patient of souls can only endure being the Only Sane Man when they're Surrounded by Idiots for so long, after all. One or two Pet the Dog moments scattered around for character depth do not grant a heart of gold. A true JWAHOG has many Pet the Dog moments. Or maybe those moments are rare but powerful. Or maybe they skew more toward the "Jerk" part but start making a point of showing the "Heart of Gold" part following a Jerkass Realization . Either way, ultimately they manage to balance out the jerk in them. If it doesn't balance out, they're just a regular jerkass, or worse, a Jerk with a Heart of Jerk Compare/contrast with Hidden Heart of Gold , Bitch in Sheep's Clothing , Noble Demon , Bruiser with a Soft Center , Hero with an F in Good , Innocently Insensitive , Aw, Look! They Really Do Love Each Other , and Sour Outside, Sad Inside . Sometimes subverted as Jerk with a Heart of Jerk . The Lovable Alpha Bitch can also overlap with female examples of this trope The Lancer and Loveable Rogue are often, but not always, portrayed in this light. One half of the Belligerent Sexual Tension couple. Also compare Good Is Not Nice Truth in Television : Most of the jerks you'll meet in your life will have some redeeming qualities to them. Few people are such jerks that they don't care about anyone</, and cynical people tend to handle bad situations better, so having one as a friend can be useful when things go downhill. Given that this would still call real life people jerks, please do not add real life examples

Someone in the main cast discovers a shocking secret about the past of the resident Jerkass . Apparently, difficult as it may be to imagine, he may not be that bad a guy. Somewhere, buried deep inside, there's a Pet the Dog moment that shows he's a Jerk with a Heart of Gold Well, yeah, turns out that isn't true . There's a perfectly selfish explanation for why he saved the busload of burning orphans—they're his secret team of kid snitches. And now he's going to get a good laugh at your expense for ever thinking he could be so noble While one be both a Jerk with a Heart of Gold a Jerk with a Heart of Jerk simultaneously, a character can alternate between the two. For instance, this could be a result of Depending on the Writer , and Character Development can

cause an evolution in either direction That said, these tropes are almost polar opposites by definition. The former Jerkass is when it comes to the crunch, a decent guy. The latter Jerkass might be capable of the occasional Pet the Dog moment, but he is, under all that jerkassery... a bigger jerk/asshole. This trope also subverts Hidden Heart of Gold It is one step more complex than Faux Affably Evil . Compare and contrast Bitch in Sheep's Clothing , Sheep in Sheep's Clothing and Hidden Heart of Gold . For the more malicious, see Bait the Dog , For the Evulz , The Sociopath , Not-So-Well-Intentioned Extremist , and Pragmatic Villainy . This trope is not an Exaggerated Jerkass May also go hand in hand with Good Flaws, Bad Flaws : a character may have a Good Flaw, then repent and apologize... only to turn out to have a Bad Flaw. This character taken to their logical extreme would then become a particularly tragic Anti-Villain , since such characters genuinely believe themselves reformed . In such cases, the character still fits this trope only if they're smug about their moral struggle , rather than anguished. The most dangerous example is the Knight Templar type, such as one who tries to reform for their criminal past by murdering other criminals A common instigator for Jerks Are Worse Than Villains , when the audience hates the Jerkass more than they hate the villain

An eye loupe is a small magnifying device worn over the eye to see tiny details closely. It is commonly associated with jewelers, but is used by many other professions, from watchmakers to engineers of small electronics, and for appraisal of precious gems, coins or stamps In fiction, someone wearing an eye loupe is used as visual shorthand for several things. If it's a one-shot, never-seen-before character, this immediately tags them as some sort of expert coming to appraise whatever valuable artwork or rarity is at hand Otherwise, an established character pulling out one is a sign that they're Crazy-Prepared , or more commonly, Greedy </. The Miser Advisor or The Scrooge frequently owns one, ready at all times to appraise the value of anything they grab An eye loupe can also show up for quick gags and humorous situations, often in a completely unexpected setting (including anachronistic). A common stereotype is for a woman offered an engagement ring to immediately examine it with a loupe. Or the humor might be in establishing something is very, very small and requires the tool to be seen

All right, all ! I'll describe Jewish Complaining here already! There, are you now?</ Jews have a long, proud history of whining and complaining (aka, "kvetching"), or at least the Ashkenazi do . They will complain about many things, in many forms, whether it's Hypochondria (Oh God, can you catch something from writing that?), having to go to work, having to come home from work, paying too much for something , paying too little for something and worrying it's not good, their friends' bad habits, their friends' good habits, their Jewish Mothers thinking they aren't good enough, or the mothers themselves thinking their children aren't good enough. This is Truth in Television and is actually joked about more among Jews themselves than anyone who's ever been prejudiced against them. Heck, if you see a TV show with Jewish people being big whiners, it's more than likely a Jew wrote those parts . But when things get truly serious, the complaining tends to die down as they get more somber. This comes from the actual history of the habit: superstitious Jews believed

showing happiness or satisfaction brought the Evil Eye, so they complained to ward off the demon world. Actual misfortune "fills the need" for misfortune in keeping demons away, and may well already have been caused by a demon, so why ward them off when they're already here? Jews Love to Argue is a Sister Trope . Hey, a lot of arguing among Jews is often just them complaining about each other at the same time. The Greeks do this too: it is called gana</. Various Eastern European countries also have this practically as a national pastime. Same for the Irish. Germans and Austrians have perfected it into an art form, the political satiric cabaret . The French-Canadian consider this their national sport after hockey. Compare Sickly Neurotic Geek .

An index of content creators that are Jewish. For all intents and purposes, the creator in question must be born to two Jewish parents or at least identify themselves as Jewish, even if they are of partial descent, though converts to Judaism do qualify for this index Can overlap with Israeli Media , especially if a Jewish content creator is from Israel

(The following description should ideally be read under falling Cherry Blossoms .) </ Jidaigeki (meaning "period drama") is a genre of Historical Fiction and Period Pieces found in Japanese Media . These works are set before (or around the beginning of) the Meiji Restoration when the was deposed. The time subdivisions most often found in Japanese media include the (or "Warring States", an era of civil war from about 1467 to 1573), the (after Japan was united under the Tokugawa shogunate, 1603–1868), and the (1853–1868, the part of the Edo Period leading into the Meiji Period, 1868–1912). Jidaigeki can be idealized or realistic, operate as rigorous Historical Fiction that show their work . It can also be like the American Western , soapy drama or hardass action, and feature a rich cast of character tropes . Jidaigeki that emphasize swordplay are often referred to as chanbara</ (meaning "sword fighting"), especially the live-action movies, and counted on for lots of hot Samurai action (Ninja , Rōnin , and Yakuza are also frequent players). Given the fact that there are plenty of Edo-era buildings in Japan still standing, and that Edo-era costumes are dime-a-dozen, that period appeals a lot to Japanese TV producers . Compare the sheer number of BBC costume dramas set in the Victorian era , or the innumerable Chinese films and series set during the Qing dynasty. The Jidaigeki films considered most notable by Western audiences tend to feature samurai, and from this they tend to assume that the term Jidaigeki refers to samurai films in particular. This is an exaggeration. Jidaigeki basically means historical settings or something set in the past, and does not by itself concern samurai or ronin by default. A number of Jidaigeki exist that focus on women, on painters, actors, and even burakumin (the lower-caste Japanese underbelly who are the ancestors to Yakuza). In the classical era of Japanese cinema, Jidaigeki was the most prestigious and serious genre. Also, although it may seem American and European directors have been borrowing (or, depending on your POV, appropriating) these conventions — sometimes whole plots</ — for years, Jidaigeki pieces have long borrowed/appropriated in equal measure from Westerns and Film Noir . Akira Kurosawa , himself, was known to be a fan of director John Ford . George Lucas took some inspiration from this cross-pollination while writing Star Wars </ — guess where he got the word "jedi". Even before that,

Jidaigeki borrowed and took inspiration from American films (e.g., Stella Dallas </, a popular melodrama in Japan) and from European drama (e.g., Henrik Ibsen and Leo Tolstoy). Kurosawa likewise won fame for his transpositions of William Shakespeare to feudal Japan. Klingon society as seen in Star Trek: The Next Generation </ also took from this era for inspiration. For Western depictions of Japanese history, see Hollywood Medieval Japan . Compare The Middle Ages and The Wild West , two popular Western historical periods that are roughly analogous to Jidaigeki. See also Wutai for Fantasy Counterpart Cultures that are based upon Japan. Related to Samurai Stories and Ninja Fiction , which focus on fictional works that focus on the samurai and shinobi</ respectively, usually overlapping with Jidaigeki. Live-Action TV

Lots of interesting things are going on in the series' Myth Arc : Mind Screws , wild conspiracies , unrevealed Love Dodecahedrons , an Ontological Mystery , and the odd bit of Applied Phlebotinum or two. Sometimes the setting itself is just plain crazy , to boot. It's a Long Story , and there's far too much to explain in the series pilot Solution: ration out the information about what's going on with an eyedropper, and let the viewers scratch their heads about it until much later on. Welcome to the Jigsaw Puzzle Plot At its best (and with a sharp audience that's well-prepared for it), the series can become an interesting intellectual challenge that generates hours and hours of Fan Wank , Epileptic Trees and watercooler discussions, and creates memorable moments as connections between seemingly minor or unrelated details fall into place, revealing illuminating insights (see Wham Episode). At its worst, the series becomes an incomprehensible Mind Screw ruled by The Chris Carter Effect , patched together by the occasional Ass Pull . Some writers may claim some of the latter effect to be intentional; that some mysteries are never solved. However, the fact remains that if you give viewers a mystery, suspects, and clues, then don't tell them whodunnit, don't act surprised if they get pissed at you afterwards Anime does this quite frequently, and even series that don't explicitly try for a full Jigsaw Puzzle Plot will frequently hold back explanation of a few scenes in the Pilot until Mr. Exposition has a chance to talk about it without the conversation seeming too forced Very common in arc-based mystery or espionage series, where what's going on is supposed</ to be mysterious. By its nature uses several Driving Questions right at the outset. Expect many reveals . Can often become a Kudzu Plot if the pieces of the puzzle don't quite fit together. A video game that forces the player to go and find the plot pieces is using Story Breadcrumbs

Comes from the days of radio. When all advertising had to be audio, a good way to get people to remember your product was to have a catchy short tune associated with it, often mentioning the product or company's name. This is even common with phone numbers for their services While not quite as common as they used to be,

jingles work, so they will probably be around as long as we have commercials. They can even become quite popular and be released as a single . Some well-known jingles have been around literally for decades, periodically having their instrumentation/arrangement updated to sound more modern Sometime an agency will expend money rather than talent and use an existing song

In any competition, there are winners and losers. In Professional Wrestling , the overwhelming majority of them have been pre-determined since at least 1920. Fans and insiders alike refer to being on the losing end of the equation as "doing the job," or "jobbing" in short. A connected term, "jabroni" was used onscreen during the days of Kayfabe as a slang term for weak or poor wrestler, and as a way of indicating jobbers without admitting matches were scripted, and is still used occasionally today. This terminology came about because losing the match tends to make the wrestler look worse, and could be a sign that the promotion is transitioning him into a less prominent role (in wrestling parlance, getting "buried"). This is especially true if he's booked to lose in a championship match (because there's nowhere to go but down after losing a feud for the top championship) or get squashed . But they finish the match and let the other guy pin them as agreed, because that's part of the job. There have been times when a wrestler would refuse to "do the job" and would fight for real and defeat the guy who they were scheduled to lose to; this is called "going into business for yourself." This occurred primarily in the early days of pro wrestling, which was done on a regional basis aside from the champion who'd travel across regions. It rarely happens because the inevitable result would be getting fired. Sometimes a local challenger would "steal" the title by refusing to job to the champion (such events would likely be with the blessing of the local promoter but not</ national sanctioning body), which for many years meant that the champion would always be somebody who can legitimately fight back against an uncooperative foe. As strange as it may seem sometimes, there is an entire class of pro wrestlers whose primary purpose in being on TV is to "do the job" on a regular basis. These wrestlers, otherwise known as "carpenters" or "enhancement talent," primarily serve to make the other wrestlers look that much better, by selling everything the other wrestler does as if they're dying. So, why be a jobber? There are several reasons... The revelation of pro wrestling being predetermined caused jobbing to lose a lot of stigma. In fact, many " smarks " will respect a wrestler who is selfless enough to consistently put another wrestler over for the good of the company. Some of the best wrestlers in the business (Mick Foley , Ric Flair , etc.) take immense pride in their ability to "make" another guy through selling and jobbing, though few would label them as "jobbers". Some long-running jobbers have gained a cult following. The most famous jobber would probably be the Brooklyn Brawler , who got his own action figure. The second best-known example would be Barry Horowitz , who briefly went from perennial jobber to mid-card in the mid-90's when he pulled an upset victory on Chris Candido (then wrestling as Skip), and then went on to beat him in at least two more matches. He is now a WWE road agent. Rookies are often expected to spend their first few years "jobbing." In the field, this is known as "paying your dues," and wrestlers who avoid doing this are often scorned by veterans unless they are a sublime talent like Big Show , Goldberg , Sting , or Kevin Nash . Famous jobbing runs include: Rookies who have been scorned include: Some other wrestlers avoid "paying their dues" as jobbers because they're real fighters who have gained prestige in non-scripted

athletic contests: An inversion occurs when the bookers are unable to utilize the talent of a particular star (otherwise known as "Creative has nothing for you..."), and thus he is forced to job to those wrestlers that are being pushed. An established talent jobbing to a new wrestler is considered a huge favor, and will often boost the new wrestler's popularity instantly. The term "jobber" has crept into other genres as well, most particularly in superhero comics and anime Fighting Series , in reference to when a character loses a fight against an enemy to show off how strong the enemy was and thus a credible threat for The Hero . Compare C-List Fodder and Red Shirt The opposite of jobbing is called a "push," where up-and-coming stars are on the receiving end of jobs from established wrestlers.

Tends to be a High School trope. When a father was a jock in high school (usually marks his Glory Days) while his son pursues less athletic endeavors, usually to the father's disappointment. In quite a few cases the father's grief stems from him being a Jaded Washout who had hoped to live vicariously through his son, but the son's interests effectively means he can't Related to a "Gender-Normative Parent" Plot , but is part of the underlying characterization as opposed to a single episode plot. Subtrope to Like Father, Unlike Son . Could be considered an inter-generational version of Sensitive Guy and Manly Man , as well as a loose gender inversion to Feminine Mother, Tomboyish Daughter

Military recruitment ads, appearing on TV or in print. There are two ways to go with these: One type tends to depict the military as far more glamorous than in real life , and tends to downplay the danger of violent death. Of course, everyone already knows</ about that part... The trope name is a Stock Phrase in its own right. Subtrope of Propaganda Piece . Sister trope to Recruiters Always Lie .

In a story that involves a malevolent force that can subjugate others through supernatural means , those affected might propagate the spell. If choice is a factor, they'll go after those they know, often droning "join us" in some fashion or at the least try to sales pitch how great being under the power of said force is. This is usually done in a Creepy Monotone and/or all in unison . This communicates a zombie-like state or otherwise showcases that the victims aren't themselves . Granted, the whole thing never makes for a convincing argument since the victim's target will be less than willing to take the offer, but it nevertheless does a good job in showcasing the threat of said force. Think of it as peer pressure, only much</ more scary Often the result of a Hive Mind . Sometimes a staple of Zombie Apocalypse , if said zombies are a bit more sentient. Can often overlay with Transhuman Treachery as well, if the victims are really sincere that the transformation is better than being normal. Compare Madness Mantra

In the media, New Jersey is often portrayed one of three ways: There is also an additional quasi-trope, which might involve any of these flavors or none of them, particularly prominent among media written by New Yorkers: the Shore as a setting, typically as a destination for white out-of-state tourists with money (and usually more of that than sense). A beach house may pop up. Not to be confused with Funetik Aksent . Oh, and: For information on the various regions, cities and locales of the state of New Jersey, as well as a long list of famous New Jerseyans, check out our handy Useful Notes page . Not

to be confused with that other Jersey , after which this one was named.

Your Deadpan Snarker , Plucky Comic Relief or just anyone in the mood makes a joke about something: a hypothetical, ridiculous situation at first glance. This is when, unbeknownst to them, what they just said is literally true or will happen later on in the story because the universe wants so Reactions vary: The joking character may laugh their ass off because it's suddenly even funnier , they may feel guilty for saying something that's suddenly tragic , they can go all deadpan and say "...Really?", or something else altogether It can be used as Foreshadowing for a future plot development if it sounds outlandish enough so the audience doesn't find the hint too obvious. If the audience already knows the joke is not a joke when the character makes it, it's a form of Dramatic Irony . If a really long time elapses between the joke and the moment it becomes real, it's also a case of Brick Joke Compare I Was Just Joking , where a character makes a joke and another takes it literally as a serious suggestion; My God, You Are Serious , where a character thinks another is joking but isn't, as they soon find out; and Accidental Truth , where instead of a joke it's a deliberate lie. It may easily lead to Hilarious in Hindsight and "Funny Aneurysm" Moment . It may overlap with I Knew It! if a fan of a work makes a joking guess about the plot and nails it. See also If Only You Knew , Tempting Fate , The Cuckoolander Was Right , Chekhov's Gag and Pre-emptive Declaration . Similar to Rhetorical Question Blunder where someone gets an answer to a question that wasn't meant to be serious

Characters, often in the form of Easter Eggs , deliberately unbalanced in the negative sense. They mainly have a humorous value and the fandom often likes them due to their sheer awkwardness or strangeness. This is mainly a trope of fighting games. Joke characters are sometimes used by especially proficient players to beat other players, mainly for bragging rights Note this is not the same thing as an Easter Egg where the player's appearance simply switches (like a redone sprite) or a Fighting Clown (a character who simply looks</ silly but plays well). Part and parcel of Cherry Tapping . Compare Blessed with Suck , What Kind of Lame Power Is Heart, Anyway? , and Master of None . If this character happens to have some worthwhile utility, they're a Lethal Joke Character . If they take a considerable level in badass after a while, they have Magikarp Power . Sometimes, if this character becomes popular enough, expect the fans to turn them into a Memetic Badass and the developers to turn them into a Lethal Joke Character Part of Competitive Balance . See also Joke Item and Fake Special Attack (which they are likely to use). Contrast with Purposely Overpowered and Master of All , which are the opposites. Compare and contrast with the low-tier Tier-Induced Scrappy , who are also negatively unbalanced but usually unintentionally Not to be confused with Parody Sue . Can overlap with Plucky Comic Relief

Bob decides to make a joke in a specific vein about a specific subject. But not just one joke, no no no, oh heavens no. He has to exhaust his entire supply of jokes and wise-guy commentary, getting them all out of his system The major difference between an Overly Long Gag and Joke Exhaustion is that the Overly Long Gag is one extended gag that goes on for far too long, while Joke Exhaustion

should be a series of gags that could each be told individually and still be funny. But because Bob tells them all at once, it just gets irritating. May consist of a Hurricane of Puns

Characters who don't respect authority and/or formality, yet are obliged to wear name tags, will write something witty and/or obnoxious in place of their name. Just how</ witty or obnoxious can provided a visual clue to how irked the character might be about being required to wear one. Alternately, another character may deliberately fill in someone else's name tag in a way that will humiliate them Often involves either a Shout-Out or an Unfortunate Name or Punny Name of some kind. If the name tag is intended as actual identification, see Badge Gag . Contrast with Real Joke Name , which is when the character's real</ name is played for a cheap joke

People have various configurations of equipment in the fronts of their crotches, but everybody has the same naughty bits in the rear ends. Yes, we're talking about bums. Everybody has a bottom, through which they fart and poop . As such, the rear end has been a subject of humour since time immemorial. People just find arses funny. Indeed, as this very page demonstrates, there are many, many terms for the derriere, most of which are pretty funny in their own righ Supertrope to Ass Shove , Butt Biter , Butt Cannon , Butt Sticker , Cheek Copy , Comedic Spanking , Pain to the Ass , Butt Brand , Rump Roast , and Toasted Buns . May overlap with Shaking the Rump and Toilet Humour . See also Uranus Is Showing . Can be seen as the backside version of Gag Boobs . Stuffy Old Songs About the Buttocks often enter this, even if unintentionally. Despite the name, this has nothing to do with Butt-Monkey or ; while a geologist might make a butte joke, it would only qualify as this trope if it's a pun on butte/butt, or if the butte is shaped like a but

An index of all articles about journalists, reporters and news readers. Many will often be radio and TV presenters and novelists too.

In modern legal systems, the power to render judgment is usually spread among many people: a judge decides questions of law, a jury decides questions of fact, and someone else carries out the judge and jury's verdict—in the case of capital punishment, an executioner. It takes time and careful consideration, but the proper legal procedure can be such a drag sometimes, can't it? You have to arrest and house the perp, go through the expense of a trial... plus it means you have to get lawyers involved Perhaps this is why so many societies, particularly those with dystopian or evil leanings, go for the alternative: empowering a group of official agents with near-limitless authority to detain, sentence and punish offenders Of course there is a very good reason we don't have this type of law enforcement in civilization; If the Judges see themselves as noble and pure then they will most likely be Knight Templars , if they are insane they would often see all crimes are punishable by death , if they become corrupt then not only would they become Dirty Cops but would in turn become a Joker Jury and a Hanging Judge all in one go, and that's all assuming they don't have a grudge on you Needless to say you are probably

not getting a fair trial When a private citizen acts as Judge, Jury, and Executioner without official sanction, he's a Vigilante Man . When it's an actual judge who's also jury and executioner, it's usually an example of Hanging Judge Not to be confused with Judge Judy and Executioner

Within the community surrounding the Insane Clown Posse and Psychopathic Records artists, fans are known as "Juggalos", "Juggalettes" and "Ninjas". Juggalos compare themselves to a family: common characteristics include drinking the inexpensive soft drink Faygo and wearing Monster Clown face paint. They view the lyrics of Psychopathic Records artists (which are often violent in nature) as a catharsis for aggression. The term originated during a live performance by Insane Clown Posse. During the song "The Juggla", Joseph Bruce addressed the audience as Juggalos, and the positive response resulted in Bruce and Joseph Utsler using the word thereafter to refer to themselves and their friends, family, and fans, including other Psychopathic Records artists. Thanks to Public Medium Ignorance , Juggalos are often shown in a mocking light in media, despite the fact that the lyrics of Insane Clown Posse and Psychopathic Records artists have encouraged free thought and individualism, and thus there are a wide variety of Juggalos with different interests, beliefs, backgrounds, etc. See the Playing With page for examples of how Juggalos are portrayed in different mediums, from straightforward examples to Straw Fan exaggerations and subversions. The worst example of Public Medium Ignorance toward Juggalos is that some local law enforcement groups and the FBI have listed "Juggalos" on their gang registries. Never mind the fact that there is no evidence connecting any violent act or gang affiliation committed by any individual to any music or music fanbase, or that there is no evidence of the existence of any Juggalo "gangs" despite law enforcement claims, or that classifying "Juggalos" as a gang puts these fans in danger from actual</ gangs, but blaming Dungeons & Dragons </ for being Satanic is soooo</ 1980 and we need to spontaneously blame something</ for corrupting our youth, right? The Useful Notes page examines Juggaloism in further detail.

This is an action trope. It is performed by a character who throws an object in the air, performs some action sequence while it is airborne, then catches it on its way down. It pays off if the object in question is cumbersome and makes desired action impossible but it can be used in other situations too The velocity with which it would need to be launched tends to make this implausible in Real Life Compare Precision-Guided Boomerang and Dish Dash

You know how you shouldn't screw around with guns because they're dangerous? You know... because they're specifically designed to kill and maim people instantly? Well, the normal rules don't apply when it comes to comedy . Whether it's the police chief eating donuts off his gun barrel or some clown juggling loaded guns, the normal rules of safety don't apply Frequently results in Amusing Injuries from gunshot wounds or a superficial case of Ash Face . Caused by whichever combination of Artistic License – Gun Safety , Reckless Gun Usage and Shur Fine Guns would maximize the laughs. When gunshot wounds are used seriously, that's I Just Shot

Marvin in the Face . See also Remonstrating with a Gun Not to be confused with Cartoon Juggling , though actually juggling loaded guns in any cartoon (or Real Life , for that matter), is probably just as bad an example as any of these following examples. Also not to be confused with Juggling Dangerously , though juggling loaded guns would in fact be an example of that trope. Subtrope of Too Dumb to Live

A julekalender ("Christmas calendar" or "advent calendar") is a TV-series with a Christmas-oriented theme that typically runs daily from December 1 through December 24. They are a tradition in Denmark , Finland , Norway and Sweden .

Long-living, nigh-immortal characters are a staple of Speculative Fiction . Of course, there's the question of how they didn't get found out. Easy enough, actually — move around a lot, take on a new name every so often, and you're golden, especially in times when written records were rare and getting census information from anywhere further away than the next village required an Epic Quest. Having psychic and shape shifting powers helps a lot too. It's surprising, though, how often those temporary names end up in the history books... Sometimes, it seems that every great thinker was an immortal genius who created an identity. Every so often, they're all the same one.</ A Subtrope of Beethoven Was an Alien Spy and Historical Domain Superperson . See also In the Past, Everyone Will Be Famous for the related Time Travel version and My Grandson Myself for cases where the character takes the identity of a younger family member. This character is sometimes prone to saying I Have Many Names . Compare with Ancient Conspiracy . Just don't ask how many of these people have firmly established childhoods .

Often used in comedy and a sister trope to the Trust-Building Blunder Alice is stuck on a ledge with no apparent stairs, elevator, rope or other normal way to reach the ground and needs to get down fast so that she can escape the bad guys, catch up to the others, etc. Bob, waiting on the ground, holds up his arms and shouts out something along the lines of "Jump! I'll catch you!". There may be some hesitation, but eventually Alice jumps into Bob's waiting arms...well, at least she tried Alice is usually fine. Don't worry, Bob will be okay in a few minutes

Done metaphorically in the 5th game of Umineko: When They Cry </ . "Beato, jump!" "Battleeerrrrr!!!"

Played straight in Shade, the Changing Man </ when Lenny says this to Lily, who's trying to escape a burning building.

Despicable Me </: At the end, Gru says this nearly word-for-word to Margo, the last of the three girls to jump to safety. Unfortunately, they both</ fall. Luckily, the minions save them.

Parodied in The Muppet Christmas Carol </. Rizzo the Rat climbs to the top of a gate and tries to jump into Gonzo's arms so they can catch up to the main characters. After much terrified dithering, he finally jumps, but Gonzo fails to catch him and he hits the ground. Then, after he recovers, Rizzo suddenly realizes that he forgot his

jellybeans on the other side of the gate... as well as the fact that he was able to go between the bars of the gate the entire time The Hercules: The Legendary Journeys </ episode "For Those of You Just Joining Us" had the cast performing the old trust building exercise with Rob Tapert. He eventually recovers

In Kingdom Hearts II </, during a visit to the Hundred Acre Wood , Piglet is blown in the blustery wind and ends up on a high tree. Sora and Pooh come over and the former says this trope. Piglet gathers his courage and jumps. Sora misses him, but Pooh doesn't.

One of the Roger Rabbit Shorts had Roger yell "Don't worry, Baby Herman, I'll catch you!" only to be smashed on the head by an elevator while Baby Herman parachuted safely down with his diaper.

Famed pro wrestling manager/booker/promoter/commentator Jim Cornette was doing a bit during Starrcade '86 where he was chased up a scaffold, then took a bump off it. However, the work order must have been sent wrong, and the 15 foot scaffold was built to 25 feet. Crockett decided he would do what skydivers do, and drop and roll when he landed. The fall was going to be aided by Bubba, who was going to catch him. He would fall into Big Bubba Rogers' arms, and they would both drop and roll to the left. Predictably, the relatively green Rogers' missed catching him, and Cornette blew his knee out. Or rather, in. Squick .

Jumping off the slippery slope is when a morally ambiguous character raises an ethical question by doing morally ambiguous things , but instead of answering those questions, the character closes the debate by going on to do something unquestionably and unforgivably evil . The actions remain pretty much ambiguous, while the character himself no longer is. It turns out that the character's point of view and ideology was more warped than what their initial actions suggested This is a condensed form of the Slippery Slope Fallacy — instead of Slowly Slipping Into Evil by gradually becoming more evil, they go straight from "may or may not be moral" at the top of the slope to "unquestionably evil" at the bottom, skipping all of the intermediate shades of gray — thus jumping off the slippery slope A form of Debate and Switch , because they never really</ address the question of whether the original ambiguous action was acceptable or not. Also helps to maintain the status quo by ensuring the main characters never question their own morality too closely, thus keeping the more simpler Black-and-White Morality from degrading into Grey-and-Gray Morality , as well as prevent a potential case of Strawman Has a Point . Compare Slowly Slipping Into Evil for a longer, more developed process of going from "ambiguous" to "evil". Compare Face–Heel Turn for when it is a morally good character who turns evil Compare with Bait the Dog , Moral Event Horizon , Motive Decay , Aesoptinum , and He Who Fights Monsters . Can be a result of a Well-Intentioned Extremist realizing that there is No Place for Me There and becoming a full-time villain. Frequently accompanied by Then Let Me Be Evil . In case the characters in question were friends prior to Slope-Slipping, it probably triggers We Used to Be Friends . If the slippery slope has been greased with Applied Phlebotinum , that's The Dark Side

When a giant cake (actually a cake shell) has a person (usually a bachelor party stripper) hidden inside, so he or she can jump out of it for dramatic effect Girls have been jumping out of cakes since Evelyn Nesbit did it for millionaire playboy Stanford White in The Gay '90s , but the practice of enclosing a living creature inside a cake or pie shell goes back to medieval days. It's (possibly) the origin of the nursery rhyme "Sing a song of sixpence", where live blackbirds are put in a pie shell for a king's feast Mostly Played for Laughs , especially if the cake is at an unexpected (and inappropriate) place (like a child's birthday party) or the stripper inside is replaced with someone else (a cop, an Abhorrent Admirer who crashed the party to get her object of desire, an angry fiancée or wife who suspects that her husband will have too</ good of a time at his buddy's bachelor party, a Dirty Old Woman who used to be an adult entertainer when she was young and is still entertaining in her autumn years, a cross-dressing Camp Gay man who decided to come out of the cake — and the closet — all in one night, or a heterosexual man who was dressed in drag and put in the cake as a cruel joke). In more cartoonish works, the cake might be an actual one, causing the party-goers to be splattered with frosting and cake bits when the person inside jumps out Sometimes played for drama (or really dark comedy) if the man of the hour is Too Dumb to Live and thinks the novelty cake is a real one (and cuts it, either injuring or killing the girl inside), if a Mafia hitman is inside the cake and shoots everyone at the party (though it can be softened up to being funny if the hitman is dressed in outrageous and obvious drag), or if the stripper dies of suffocation inside the cake and no one realizes this until it's too late

A Gender Bender trope, where someone who would have made a good match if not for gender suddenly is</ a good match, and some version of a Romance Arc (and in the more egregious cases, the relationship) begins immediately. Often, there hadn't previously been one iota of serious thought about a romantic relationship between the two people prior to the gender shift When—as is sometimes the case—this involves the gender-switched person changing their sexual preferences , people can find this plot squicky There are legions of amateur stories with some version of this plot in appropriate corners of the Internet, and a decent portion of genderbending Fan Fic will use it as well For obvious reasons, depends on the absence of Everyone Is Bi . The First Law of Gender-Bending (or its inversion) tends to be in play, although cases where one party becomes a Sex Shifter aren't unheard of . The opposite of Unsettling Gender Reveal Compare to Trans Equals Gay with non- Gender Bender examples. Contrast Settled for Gay , in which partnership happens without a change in orientation, gender-bending based examples of If It's You, It's Okay , and Incompatible Orientation

Building up suspense without boring the audience is not easy. Whatever is a director to do? Jump scares to the rescue! Everyone knows what a jump scare is: it's the horror technique of having something happen unexpectedly and suddenly (usually something popping up out of nowhere). It's frequently accompanied by an equally sudden loud noise to go with it, and often happens after a period of tension-building to ramp up the nerves of both the character(s) and audience and make the scare that much more effective for both. The

classic film example uses a loud brass horn, or a woman's scream. Jump Scares follow the law of diminishing returns: they're effective when accompanied by a slow build up of suspense, but using too many quickly turns them into a nuisance. Jump scares have been called lots of things: "cheap," "lazy," and "the lowest form of horror," because the jump caused by a suddenly loud noise is a physiological reaction you can't control, even when you're expecting it. The film critic Nigel Floyd refers to the occurrence of this in films as "cattle prod cinema" — you're not being scared, just jolted. Not to say it can't be done right. When creators who do</ understand horror make use of the trope, they can do so to extremely</ good effect. Sometimes overlaps with Mirror Scare , Screamer Trailer , Spring-Loaded Corpse , Peek-a-Boo Corpse , Take a Moment to Catch Your Death , Nightmare Face , Scare Chord , Surprise Creepy , and Last Note Nightmare . Cat Scare and Bat Scare are subtropes in which the scare itself is false but the jump effect is retained. When used on its own in a Web Original , it can be known as a screamer or a prank . You know, the videos that encourage you to turn up the stereo and/or examine the picture closely . Related to Shock Site , where the startlement and horror arises from unexpectedly viewing a disturbing image. Contrast Sudden Soundtrack Stop , where the sudden lack</ of noise can be used for horror. See also Chandler's Law . Not to be confused with Surprise Jump . No examples, please. We're just defining the term. If we did</ include examples, chances are we'd be sued for accidentally scaring some of our more delicate readers into the next life, if you catch our drift. Even video examples ain’t exempt from this!

This is a speculative tale that takes place in undiscovered or semidiscovered country in the present or "recent" past (usually no earlier than the early 20th century), supposedly on this Earth, as opposed to, say, a High Fantasy in a Medieval setting , or a Space Opera in a far future-like setting. As the title indicates, it often takes place in a tropical rain forest, though that isn't necessary. The key point is that Willing Suspension of Disbelief is provided primarily by the use of settings that are regarded as exotic, mysterious, dangerous and above all, far away by most readers, yet still on this world, rather than providing a whole imaginary world "in a galaxy far away". A typical setting, for instance, might be The Amazon , Darkest Africa , The Shangri-La or Tropical Island Adventure . There are occasional similarities with Planetary Romance ; the two genres can each borrow tropes normally associated with the other, and there is potential for crossovers (aliens can, for instance, kidnap the intrepid explorers, or perhaps a Planetary Romance can have a story take place on a jungle planet) However, some elements of a Jungle Opera can be less flexible than other speculative sub-genres by the nature of operating in "closer proximity" (so to speak) to Real Life . Jungle Operas tend to feature Bold Explorers , primitive locals , Precursors , Lost Colonies , Ancient Artifacts , and the like; ruins-filled-with-deathtraps is one of The Oldest Ones in the Book . This will also often involve Ancient Astronauts and have an Adventurer Archaeologist as one or more of the characters. Oddly enough, the experiences of Real Life explorers did sometimes bear a suspicious resemblance to this genre We don't think</ that any secrets man was not meant to know have been discovered — not that anyone would admit it if there have been some. Maybe the world is not yet ready ? Often involves a Lost World . In some versions the story is about a quest to find this, and a Lost World is a MacGuffin Location . Also see Two-Fisted Tales , with

which this trope usually overlaps.

The Distaff Counterpart of Tarzan of the Apes , this is a young woman of European extraction who has been raised in a jungle environment , usually by animals . Despite her upbringing, though, she has managed to grasp the basic rudiments of English , tools, and fashion — she is frequently seen wearing fetching leather or Fur Bikinis and wielding a spear . She is far more likely to have Rapunzel Hair than Wild Hair , and her legs and armpits will be inexplicably hairless. She's likely to be an Earthy Barefoot Character For some unfathomable reason, the animals of the jungle obey her slavishly instead of viewing her as lunch, and the woefully benighted Hollywood Natives treat her as a goddess. If the Jungle Princess is particularly naive, she'll buy into that belief. Even if she's not particularly naive and although she may well possess some fearsomely strong instincts and drives toward it, her isolation from humans has left her with no concept whatsoever of romance Inevitably she will be single when she first encounters a hunky American or European explorer . She will find him in the clutch of some local danger (being menaced by her tame leopard is always fun if it's a romantic comedy), rescue him, and romance will ensue . While the movie version of the Jungle Princess will let her explorer bring her back to his home and 'civilize' her, the TV version will insist on staying in the jungle , and so our hero will settle down in a nice treehouse and steal kisses from her when she's not busy ordering her lions to savage the occasional poacher In science fiction, many a Green-Skinned Space Babe is just a jungle princess with a dye job and a ray gun The trope name ultimately dates to a 1920 silent film serial called The Jungle Princess</, but its common usage probably dates from the 1936 film of the same name starring Dorothy Lamour. The trope itself is older than that, though, with possibly the first example being Rima from W. H. Hudson's 1904 book Green Mansions</ See Nubile Savage , which is her default appearance. Compare Handsome Heroic Caveman . Not to be confused with The Chief's Daughter , where the leading lady actually fits the native culture (but is almost always called a princess for some reason)

So you have a Hungry Jungle . And then you have soldiers, guerillas, insurgents, etc. trekking through it. Suddenly, all hell breaks loose as two or more factions struggle against dwindling supplies, scarce food, the enemy at every corner, the elements, and of course, the jungle itself. Jungle Warfare is what it says , fighting that takes place in a remote jungle or lush tropical rainforest, usually on a remote island or somewhere far away from civilization. When there are civilians, they're usually confined to a small village , usually near a river In these kinds of situations, expect elite troops , usually those specialized or experienced in trekking through remote and hostile environments, sending patrols deep into remote enemy territory, rebels or enemy soldiers planting different kinds of booby traps , and communication and supply problems . If tanks are involved, expect them to be bogged down in mud during a monsoon, knocked out by anti-tank traps, or simply unable to plow through thick vegetation . Expect a mix of Scenery Porn and Scenery Gorn , depending on how bad the surrounding vegetation is removed, and with it the use of Flamethrowers or other forms of flame-based weapons. Often involves soldiers wearing camouflage over their uniforms either

moving slowly through the jungle or waiting in ambush, as well as men, guns, or vehicles concealed by trees Much like Urban Warfare , Jungle Warfare can be a nightmare for any advancing army that doesen't have a firm grasp of the place. Even untrained militamen or under-equipped soldiers with a vast knowledge of the jungle can wreak havoc on even the most experienced and trained of soldiers venturing in. Unlike the former, the jungle itself</ can also be as much of a hazard on both friendly and enemy forces. Among these hazards include diseases like malaria and dysentery, local flora and fauna, and even the mere vastness of the jungle itself, where patrols can get lost simply from making a wrong turn in In Real Life , it's usually associated with The Vietnam War , as well as World War II's Pacific and China-Burma-India Theater , where such fighting was all too common Compare and contrast with the aforementioned Urban Warfare , Winter Warfare , and Desert Warfare where fighting takes place in cities/towns, in cold, snowy conditions, and in scorching deserts, respectively, though there have been cases where this trope can overlap with the former (Manila during World War II and Hue City during The Vietnam War , for example). Thanks to the climate, a Battle in the Rain is expected almost half the time. And more often than not, this can also easily overlap with Tropical Island Adventure , as a lot of untouched jungles are located on remote islands, and a lot of times the belligerent factions will have to deal with actually trekking through the jungles as well as fighting the enemy

When two or more law enforcement organizations both can lay claim on a particular criminal case or suspect they will rarely see eye-to-eye on the best way to prosecute/investigate the case. In the US, local cops vs. the Federal government (FBI, DEA, etc) is the most common setup. Usually, the locals will want to shut down a petty crook to protect their town and the "little guy," while the Feds are focused on the big picture and would rather he go free so they can focus on building a case against the "big fish" higher up the criminal ladder. When a case is particularly sensitive or difficult, the friction may be reversed: each group of investigators wants to absolve themselves of jurisdiction to avoid the problems that will come with it. This is most likely to happen if one of the groups is under pressure to improve their conviction rate and does not want to risk taking on a case they cannot solve Jurisdiction Friction may also occur at the initial crime scene: the hero investigator will barely have the time to unearth a few clues before the rival investigation outfit shows up to flash badges all over the place and claim jurisdiction. At this point, the hero will either turn Vigilante Man or move on to a new case that's oddly reminiscent of the old one Which side of the dispute is sympathetic and which is heartless/incompetent/arrogant/corrupt/trigger happy/working for the shadow government depends entirely on who the main characters are. FBI agent series such as The X-Files </ and Without a Trace </ naturally will have them in the right, while a Police Procedural like Law & Order </ is frequently on the other side In addition to local versus Feds, the friction can occur between other law enforcement subdivisions over the same suspect, like drug enforcement officers versus homicide investigators, or simply one of a city's police districts versus another. Internal Affairs can also get involved at some point. And everybody</ has it in for the Private Detective Compare Right Hand vs. Left Hand ,

We ARE Struggling Together (for when the factions bickering over a common goal are not part of any government) and Tricked into Another Jurisdiction See also Interservice Rivalry for the military version

Health care remains a sticking point, as although it's a provincial responsibility, most of the funding comes from the federal government due to its more extensive taxation powers, giving them a great deal of leverage for enforcing its conditions on the provinces. This naturally leads to frequent complaints of federal interference in provincial affairs.

The prosecution's case depends on certain key witnesses' testimony in order to get a successful conviction. Or, all the evidence is already in place and all that's left is for the jury to say that the person is guilty. But — out of nowhere, a witness changes his/her testimony or refuses to testify at all, or the jury either gives an unexpected verdict or becomes deadlocked on what's supposed to be an open-and-shut case. What just happened?!? Turns out the witness was approached outside the courtroom by the defendant, or a representative of the defendant, and was coerced into changing his/her story or not showing up to testify, either through monetary offerings or threats to the witness or their loved ones . In the case of the jury, it may be that at least one member was similarly approached and " persuaded " to sway his/her fellow jurors in a direction more favorable to the defendant. What we have here, then, is Jury and Witness Tampering, a convention that's common in many a Police Procedural and Law Procedural show, with subsequent investigation by the police involved in the case revealing that this trope was in effect outside their (and the viewer's) knowledge till well after the fact. A Common Nonsense Jury may be created because of this. A Rogue Juror may have this as his/her reason for going against the grain (not all the time, though). If this trope results in a witness testimony being changed or is part of a larger Frameup plot, that may result in an innocent person going to jail . In real life, witness tampering is a criminal offense that falls under obstruction of justice; plus, when witnesses lie about crucial details or outright change their testimony while on the stand, in legal terms that's called committing perjury, and can likewise result in jail time regardless of the reason. Where juries are concerned, this trope is why prospective jurors are warned not to discuss the case outside the courtroom for the case's duration, why their identities are kept secret, and why they're warned not to utilize any information other than what's presented to them in court for the purpose of deliberation. (If outside information is given to a juror to help influence a verdict, the case will result in a mistrial.) This is a particularly huge problem in domestic violence cases; witnesses suddenly recanting or turning uncooperative after previously being highly consistent and cooperative is a very regular phenomenon there, and the usual assumption when it happens is that the accused called, messaged, or otherwise found a way to contact the witness and cajoled or threatened them into silence. Compare He Knows Too Much , when the defendants or their associates take the direct route and kill the witnesses as opposed to merely bribing or intimidating them. Contrast Kangaroo Court , where everything</ about the case — including the witnesses and the jury — is deliberately geared toward convicting a defendant regardless of his/her innocence or guilt, and Joker Jury , where the jurors deliberately consist of the hero's enemies. Note: witnesses perjuring themselves or backing out of

testifying, or jurors initiating the swaying of their fellow jurors, for any reason other than previous outside provocation, is NOT this trope.

Exactly What It Says on the Tin : A given episode or story arc that involves one of the characters facing jury duty. He may either look for ways to wriggle out of it, or do the civic thing and attend the trial. Or both, of course. If, in the course of the deliberation, he actually goes against consensus opinion on what the verdict should be, he may become a Rogue Juror . If played for comedy, the character may learn about jury sequestration and try to milk as much out of it by prolonging the jury deliberations. (In reality, jurors are rarely sequestered in hotels and when they are, they're usually the cheapest around. Government money and all that.) If one of the jurors on jury duty has been bribed or is a ringer, it's Jury and Witness Tampering . One part of jury duty that rarely makes it into fiction is that quite often more jury pools are summoned to court on a given day than there are actual jury trials that will be held. It's entirely possible for a person summoned to jury duty to just sit around in a waiting room for several hours (bring a book), at which point a bailiff tells them that they aren't needed and can go home now. Of course, being summoned for jury duty without even getting considered for being on an actual jury makes for a very dull and pointless story .

In The Devil and Daniel Webster </ , when Daniel Webster is defending his client Jabez Stone against the Devil, he demands the right to a trial with an American judge and jury. The Devil agrees, provided he gets to choose the judge and jury. He provides a jury of traitors and murderers to sit in judgment on Stone This has been played with many times in homages, pastiches, and parodies of The Devil and Daniel Webster</, although some modern viewers may not know what the original source was See also Joker Jury and History's Crime Wave . May be subject to Historical Villain Upgrade

There are many stories where a criminal dreams of leaving the life of the criminal behind them, either seeking to turn their organization into a legitimate business empire or to retire This is not that type of character A character who is Just a Gangster is someone who either passes up or actively resists opportunities to reform. The reasons for this may vary: some may feel that going legit is dreaming too big and trying to reach unattainable goals, others do it because being a gangster is the only thing he was ever good at and he recognizes that he'll just be out of place in the legit world , or because they believe wholeheartedly in Damn, It Feels Good to Be a Gangster! and Evil Feels Good In many cases, if a criminal kingpin or high ranking member of organized crime is trying to leave the criminal underworld and take their organization with them, a Just A Gangster character may work to undermine and sabotage the attempt. After all, if a crime gang goes legit, it's the ones with the cleanest hands such as the guys who run the numbers and "earn well" who will blend in better than the foot-soldiers who do the dirty work. As such those foot soldiers or members who are only skilled in violence or traditional crime may fear becoming a "liability" when this regime change happens, in a way that workers may feel about outsourcing or the Job-Stealing Robot . It can also lead to an irony in that the legit character

only manages to make the transition by doing One Last Job , purging his former gang and then walking to a legal line of work, or at least one with legal protection Compare and contrast Resignations Not Accepted , No Place for Me There , Chronic Villainy , and Visionary Villain . If someone wants to leave a life of crime but cannot because they'll be killed if they do, that's Trapped in Villainy . Underlings who try to undermine a boss from retiring or making the organization legitimate often overlap with The Starscream and Dragon with an Agenda . Often leads to A House Divided

Common theme running through initial seasons of shows featuring a Kid Hero . The young hero meets a series of dismissive characters who assume ineptness because (wait for it) — "You're just a kid." The dismissive characters can be good or bad, but will meet their comeuppance by the end of the episode (or the season, if it's a multi-episode arc) Requires a show built around the concept of a hero who is stronger or more competent than they appear Because the conceit of this trope wears thin after two or three years, it often quietly fades, only to reappear in another character When it's the villain instead of the hero whose youth is being remarked on, you might be dealing with an Enfant Terrible , in which case you're in big trouble See also Stay in the Kitchen , where a character is as "just a woman" or "just a girl", or Can't Argue with Elves , where it involves different species. Frequently found in plots based around athletics, or the Macho Disaster Expedition . Contrast Kid Has a Point Such a character may frequently be on the receiving end of Not Now, Kiddo and Most Definitely Not Accompanying Us Not to Be Confused with Just a Kid</, the Australian name for Caitlin's Way </

Villains have an urge to gloat . There's something irresistible about twisting the knife that last little bit before finishing things. After all, what is even the point of a carefully laid scheme, if you haven't yet told anyone just how ingenious and intricate it actually is? Rather than activate the needlessly complicated Death Trap right away, they will pause to outline their Evil Plan to the hero and often including information on how to stop it. This can give the hero the time they need to escape , but just as often the hero will simply sit there and wait. It's rude to interrupt someone when they chat before trying to kill you . Of course, on the other hand, trying to pull this kind of speech on a Pragmatic Hero or an Anti-Hero can quite easily and even literally blow up in the villain's face Even those who plan to simply shoot their enemy may stop by to share details of their plans first. It seems that heroes get more information out of being interrogated than their interrogators do. Thanks to the Unspoken Plan Guarantee , this removes any chance the villain had at success... unless it already happened . Or if explaining the plan is a distraction; a hero who's stopping to listen to the villain gloat about his plan is a hero who's not</ stopping the villain's minions for carrying out the final step of said plan Sometimes, it's all part of The Plan . What good is revenge if they think it all was plain bad luck and don't know you're out to get them for killing your stepmother's brother's favourite cat? A character who thinks The Hero holds him in contempt may lay out the plan in hopes of getting his respect Heroes are only slightly less prone to such fits of Genre Blindness . They are just as ready to explain the whole game

plan to a partner when the opponent stands just out of arms reach and even more eager to "make a point" about the reasons exactly why the other side has to go down. It's like proclaiming the verdict of a makeshift jury Many anime use this as a technique to drag out the fights Dates at least as far back as the movie serials of the 1940s (especially those made by Republic) When the villain falsely thinks it's Just Between You And Me, you have an Engineered Public Confession When the villain takes advantage of their solitude to tempt The Hero , it's What You Are in the Dark . Contrast Nice Job Fixing It, Villain! Truth in Television : As any prankster knows. Though not quite so much in the case of criminal or truly despicable behaviour, as guilt and/or fear of consequence usually overshadows the sadistic joy of mischief, and certainly any urge to reveal it

Around here, we like to let our hair down and have a little fun once in a while, have a brew, crack some bad jokes, you know the drill . Of course, since this is the Internet , all of our bad jokes are preserved for posterity, so we made this index to make them even easier to find. You can thank us later Work examples further below

Sometimes we make punny trope names, just for pun. Some people like this, while others view it as cruel and unusual pun-ishment.</ Compare Tropemanteau . Please, when you add a new article title here, (i.e. the original title or quote or whatever) in a note behind it. Don't just say "say it out loud" — explain what we're supposed to hear when we do that. Many puns here are just too obscure for most of us.</ And no, you are not supposed to explain your own puns like this page does . If you came here looking for an index of pun-related tropes, rather than tropes whose names are puns, that's Pun .

Platonic friends who have the possibility for romantic intimacy but explicitly reject it. The force with which the two deny any feelings is always inversely proportional to the truth. Just Friends is in essence, a relationship, a potential relationship or teased relationship between people who are simply Just Friends, in a normal, and regular manner. When a character uses the line "We're Just Friends" but no one seems to believe them , this is likely to be the trope involved. It is used in such diverse ways as being the central driving force of the actual series, a subtext undercurrent to a main plot or even pulled out of nowhere simply to create drama and tension. It is a safe trope to use for a writer, as it can develop in multiple directions, those directions can flip back and forth, and it can be done in a way that avoids overpowering the real 'genre' of a show until the writer decides to develop the relationship further It can be delayed indefinitely, quietly abandoned or dealt with in any direction extremely quickly without making characters look bad. Viewers can easily relate to the trope as the experience of liking or loving someone who only sees you as a friend is common in real life. All this trope really needs is two characters who happen to be friends for the possibility to exist and because of that this trope can crop up anywhere, in any medium, at any time. There are genres where it is more common that others. It is used in SitComs or dramas with single characters as principals. It is very popular in

teen-centric series where the most intense a relationship can get is kissing and networks want to avoid the Moral Guardians by avoiding one-night-stand-style hookups that turn into relationships. Can also pop up in a Cop Show or a Buddy Cop Show . Given enough seasons even the least likely shows can go through with a relationship that would be considered to be a Just Friends one. It is an umbrella trope as the overall theme of a Just Friends relationship requires involving multiple other tropes to build up tension, develop viewer interest, develop the storyline and determine an ending to the relationship story arc. Alice's characterisations often include: All Girls Want Bad Boys , First Girl Wins , Single Woman Seeks Good Man . Often suffers from Oblivious to Love . Bob's characterisations often include: Unlucky Childhood Friend , Ridiculously Average Guy , a Celibate Hero , a Knight in Shining Armor for his friend-girl. The Relationship Upgrade is used as a major plot point for a season Cliffhanger or series finale . An easy way to generate tension. This can take several forms: See also: It is also the title of a 2005 comedy film based pretty much entirely on the trope. It is now located at Just Friends </ . This is a Love Trope and entries may spoil the endings of relationships and works as a whole. You have been warned.

Bob is on his way somewhere, when he gets dragged into a heist, shootout or other illegal activity. It doesn't matter if he's a hostage, an innocent bystander, or trying to stop the criminals, he just got out of jail, so he knows the cops won't listen to him. Or he knows they're corrupt. Either way, he's either a Retired Outlaw or just that much more determined not to get caught and never go back to prison Note that this trope applies to people who were released either on parole or due to their sentence being complete. Expect a Retired Gunslinger to be recently released about half the time. The same can be said of virtually any protagonist with a criminal background If a genuine villain just got out of jail, he is a Falsely Reformed Villain or Karma Houdini

Anyone who creates works of fiction will often try to make it big and large to justify your money's worth. They want to make each new installment bigger and better than the last, adding in new stories and conventions, and just make it a lot more fun than the last title in a series. In short, development. But no one else cares. Many fans of anything watch movies, or play games, for exactly one reason (generally Rule of Fun) and one reason only. To them, your work has only one purpose: they're Just Here For Godzilla . Simply, people are paying their own money for their own entertainment. Any other stuff that comes along with what they actually paid money for may be only seen as a minor distraction from that. Though in the best case scenario, those other things can actually add to the enjoyment of their one true goal , whether it be comedy relief in a usually dark film series or any new quirks in gameplay. Often, these things become cool only by association: "Look, it's a clip from that movie/show where this awesome</ thing happened!" or "Look! It's that actor/actress who was in that sweet</ movie one time!" Depending on what you came for, however, it can feel like the creators are deliberately putting obstacles in your way to that destination. If you came to a movie for the action sequences, you could find yourself waiting well over an hour for the first big one, for example. Or maybe your favorite character in a video game is unplayable unless

you accomplish some arbitrary task like playing the same mode a few dozen times. In fact, this is precisely where the term "cut to the chase" originated, as plenty of movies made during the early days were thoroughly uninteresting to their audience, but included an exciting chase at the end that people would come for. Speculative Fiction tends to run on this. Many people will read/watch it strictly or primarily for the elements that make it Speculative Fiction , with the actual plot being, at best, secondary. Sister Tropes are: Bile Fascination , Play the Game, Skip the Story , Enjoy the Story, Skip the Game , Preview Piggybacking , Watch It for the Meme , Excuse Plot and Developing Doomed Characters . Compare I Read It for the Articles , Complacent Gaming Syndrome , Cult Soundtrack , Black Sheep Hit , Estrogen Brigade , Mr. Fanservice , Ms. Fanservice , Testosterone Brigade , Dancing Bear , Wolverine Publicity (when the publishers attempt to invoke this reaction) Come for the X, Stay for the Y (where something besides the Godzilla comes into play), Watched It for the Representation (when portrayals of minorities drive viewership), and Best Known for the Fanservice (which is not necessarily what they come for).

Sometimes the detectives/prosecutors have found out who the true culprit is, but there is simply not enough evidence to arrest/convict the perp. However, sometimes the heroes demonstrate there are other ways to make the guilty pay that do not involve going outside the law themselves. For instance: A Sister Trope to Tricked into Another Jurisdiction . Contrast with Framing the Guilty Party (where the suspect's guilt cannot be sufficiently proven and so the cops plant evidence to get a conviction) and Vigilante Execution (where a vigilante kills the suspect after he walks).

This is a trope for when a person becomes a criminal because of socio-economic reasons, or just plain horrible circumstances, and is portrayed sympathetically because of this. Basically a person or a group of people are in dire straits and need money immediately and become bank robbers and drug dealers out of necessity. This trope usually occurs in crime dramas (specifically urban dramas). Also may be considered Truth in Television . And more often than not it's usually overlapped with Plethora of Mistakes . Also can be a case where a hero has to choose to do what's right despite being illegal Or something morally dubious for a greater good. This trope almost always falls on the Gray-and-Grey Morality side. Some social analysts have also have been known to refer to this as "Survival Crimes". This trope is to be expected in a Crapsack World . See also Karmic Thief , Caper Rationalization , and Just Like Robin Hood . Compare to: I Did What I Had to Do . See also Single Mom Stripper , in which necessity leads to degrading (but not necessarily criminal) work, Healthcare Motivation , in which the criminal wants money to pay a treatment or operation for a friend or sibling, Trapped by Gambling Debts for when the criminal is attempting to pay off debts, and The Commies Made Me Do It for people Forced into Evil by those holding their loved ones hostage. May involve an Asshole Victim on the receiving end, particularly if the Justified Criminal is presented as sympathetic for committing assault or even murder in the defense of someone else. The most justified examples also steal for survival and non-violently. See also Jaywalking Will Ruin Your Life , for when the crime that started it all was pathetic</ , but still more than enough to cast one out of civilized society. Compare Well-Intentioned

Extremist and Your Terrorists Are Our Freedom Fighters for more politically-flavored sister-tropes. Some might justify being evil or criminals as being a Necessarily Evil , a Lesser of Two Evils , or a case of Better the Devil You Know . Director Tidemann of Dead Space 2

A justified trope is one which, in its common usage, runs counter to the normal laws of logic and probability but in a particular instance has a concrete reason In-Universe for applying to the story. In other words, a trope is "justified" if it is required</ by other pre-existing elements in the story—otherwise the explanation is a Hand Wave . Note that there are varying degrees of justifying a trope and a spectrum of justification from the completely logical to A Wizard Did It . For a justification to be more than just A Wizard Did It , there has to be reasons that make it make sense in context</ . Here's a couple example scenarios: A protagonist uses a glowing sword . The justified case: The protagonist uses a glowy sword because he fights sentient shadows . Now, how would these same scenarios look if the justifications were Hand Waves that raise more questions and require you to turn your brain off ? The protagonist uses a glowy sword because the power source is leaky. (But wait, shouldn't that cause other problems? We also know that he has the tools to fix it!) A justified trope has common ground with Lampshading in that both often deal with tropes that are typically illogical or otherwise problematic. Remember that a trope being justified is not about it ultimately being good or bad or effective or ineffective — it's about whether or not it makes sense from an in-universe point of view</. A trope can be perfectly justified and still ruin a show. Contrarily, a trope may be completely unjustified and make the story better . Do not assume that the existence of a trope is inherently a sign of bad writing. See The Watson , whose job is to explain justifications, and Meta Trope Intro which compares this with many other ways that a trope can be used. If the Justified Trope falls short, it's a Hand Wave . If the justification just makes the illogic of the trope worse</, then it becomes a Voodoo Shark . One thing to note, if you think a trope is "justified", you should never use a Justifying Edit . If you were Pot Holed here by a Justifying Edit , integrate the potholed text to the main text or delete it outright. See Justifying Edit for more on this.

They're in deep trouble. The Dragon or perhaps the Big Bad himself have them cornered, their heaviest hitters worn out. Their enemy is just about to unleash an attack that will no doubt kill them Cue The Hero , standing all cool-like, deflecting the Finishing Move and saying " Sorry I'm late " for effect Alternately, the hero is in dire straits until The Cavalry and his ragtag band of acquired friends arrive to save the day A Sister Trope to Big Damn Heroes . A sports variety is Down to the Last Play Contrast You Are Too Late , Remembered Too Late No relation to the eponymous time-traveller, Justin Time (which is just a pun on the term) If you're looking for animated television series seen on PBS Kids Sprout or Disney Junior depending on where you live, go here

When humour is used to excuse behavior that others find offensive and inappropriate, you have just encountered a "Just Joking" Justification. Never mind that this seldom soothes the sting; the original barb hurt</, after all, and hurting others for one's

amusement won't earn much sympathy, either. There is overlap between this trope and emotional abuse. Note, however, that humour is subjective, so while the thing excused may or may not have been offensive or hurtful, the person might have still meant it to be funny and the "Just Joking" wasn't made up after the fact. Such examples still belong here, though This is one source of humour which comedians have used as a reservoir of material. Contemporary stereotypes are thus often causes of this trope, be they sexist, racist, homophobic, or otherwise. These can range a very wide gamut, from people getting upset at Michael Richards' (Seinfeld </'s Kramer) infamous n-word tirade at a heckler, to people getting upset when they don't realize that Jon Stewart 's jokes about Jewish conspiracies are actually deconstructive parodies (and he is Jewish). Frequently features as an excuse for invoking Mars-and-Venus Gender Contrast An Affably Evil character may actually get away with this on a regular basis, as may someone who's considered Too Funny to Be Evil . It definitely won't work if Evil Has a Bad Sense of Humor . Compare and contrast Sarcastic Confession . Conversely, it may result in Crying Wolf if people conclude they shouldn't take any of the speaker's "jokes" seriously. A related tactic is called , where the person will make outrageous accusations but phrase them as questions (e.g "Did Bob screw a goat? I wonder") to avoid getting in trouble for slander. In other words, it's very easy</ for this trope to become a form of Jerk Justifications You may also consider this as a form of justification for when an attempt to Cross The Line Twice results in Dude, Not Funny! . Contrast Poe's Law , when it really was just a joke, but the satirical intention got lost (or when something that seems too ridiculous to be sincere is not a joke at all). Also see Parody Retcon for when this is applied to entire works. Not to be confused with I Was Just Joking Compare Just Testing You . See also Humor Mode , which is doing this preemptively for a statement that really never was meant to be taken seriously

Describing a topic is very much like the physical act of love.. A character compares an activity, no matter how unrelated or mundane, to sex. They're likely to go into great detail (often giving a description that has no resemblance to sex whatsoever , or is only about sex and not the other activity). If a character does this all the time</, it can overlap with Talks Like a Simile . Looks like Freud really WAS right Compare: Better Than Sex

Enter the dilemma, where Bob has to choose which of his friends to take. If he takes one, the other one might feel betrayed and their friendship might be strained. Even if Bob Takes A Third Option and gives both invitations away, poor Bob would himself be left out for his trouble. That, and if Greta also gets wind of the tickets due to them being a poorly kept secret , then there really is no way out for poor Bob. To add insult to injury, the longer he takes to decide, the more alienated his friends become Milder than your average Sadistic Choice , but a great plot to cause friction amongst friends as they duke it out for that precious ticket. It is also certainly not limited to tickets, as any kind of desirable goods and services when there aren't enough to go around can suffice. Taking a Third Option or a Deus ex Machina might be needed to escape the problem without anyone getting hurt. Often a way to test the Power of Friendship

The perp would have gotten away with it if not for one minor slip-up. Let's say the detective has finally cracked the case, figuring out who committed the crime and how it was done. He gathers everyone together and delivers The Summation , describing in meticulous detail how the crime was pulled off, before finally fingering the perp by name. The accused looks down in bewilderment, and it's clear to the audience that he's the murderer. Just when you might expect him to break down, confess and launch into a Motive Rant , he looks up confidently, laughs, and calmly comes back with... "Interesting theory, detective, but where's your evidence?" The implication is, of course, that while the detective's line of reasoning may be rock solid, and he may have successfully deduced how the Locked Room Murder was committed, he still doesn't have any strong evidence that proves the accused was involved in the crime. However, the detective can</ in fact prove it, and has an ace-in-the-hole piece of evidence in his possession that he was just waiting to trot out at the right moment. The detective will reveal that the perp made Just One Little Mistake, and then, much to the accused's chagrin, produce a decisive piece of evidence that completely buries him. Cue the Big "NO!" . This might happen in a Clueless Mystery . Also see Bluffing the Murderer , Pulling the Thread .

So you have a powerful piece of Applied Phlebotinum , but it is too heavy to carry around and you don't want the Big Bad to lay hands on it? Well, if you are a time traveler, you are in luck: just put it in a little Place Beyond Time , one second out of sync with the rest of the universe! That was easy, wasn't it? It will be permanently ahead or behind you in time, and is absolutely unreachable until you use your fancy gadgets to summon it back. Extra points are awarded for style if the object slowly fades away. This is a bit difficult to figure out with most models of how time works. Let's say time is a horizontal line. In this case moving it to the left or to the right should result in the same line. As a consequence, the object you are trying to hide won't disappear at all, only get a second older or younger. In universes with branching timelines, your precious item may be placed on a different branch, but then again, people in that parallel universe can still interact with it. Possibly, it's analogous to putting it in a different "boat" in the same "river"; you're both traveling through the timestream at the same speed, but it's "ahead" of you, so you can never catch up with it. How that works in the physical world is anyone's guess. If the geometry of time in your universe resembles a ball rather than a line, a tree, or a river, forget we said anything. Possible uses include: The amount doesn't have to be exactly one second, but as a general rule of thumb, it should fall within the lifetime of the characters involved, so hiding at the beginning/end of the universe doesn't count. (Unless it happened just a second ago.) Since relativity made the distinction between space and time a rather vague one, "out of phase with space" examples are also acceptable, although they quite possibly involve more than three spatial dimensions. (Extra temporal dimensions may also be used.) Another theory could be that the phrase refers to time locking, in which such an item is locked into a single second of time. It only exists at that point in time and no other so long as it is out of sync. Contrast The Slow Path , Portal to the Past . Compare Bag of Holding , Pocket Dimension , Phantom Zone , and Invisible Main Character , especially if invisibility occurs because the character is "out of phase." Has nothing to do with foreign dubs where the overlaid dialogue is out of sync with the lip movements; for that you're looking for Hong Kong Dub and other issues related to Lip Lock

.

An advertiser's gimmick, designed to make expensive items or services seem cheap The beauty of this method is that it can make expensive items seem inexpensive while meeting Truth in Advertising Laws. "You can feed a child in Darkest Africa for less than a can of soda a day!" And it's true. But the charity wants the payments a month at a time, and $1.50 per day just goes by so much more quietly than $46.50 all at once. (In the UK, the Darkest Africa example is famously and memetically "just two pounds a month", and such appeals are often parodied) Often used with items such as computers, charitable donations, or PBS stations. Popular with the charities, even if you do realize this will add up to a not-insignificant sum, a few pennies a day still isn't much, and you'll likely spend them anyway—why not on something that'll make the world a better place? Also popular with objects that are supposed to save more in the long run than the extra initial cost Gym payment plans are often structured around this kind of thing, but in reverse. $365 a year sounds so much better as "a dollar a workout" (if you even go to the gym every day — and they don't suddenly charge you any less if you don't</) Often seen in similar contexts to Four Equal Payments of . In some ways, this is crueler than advertising the installment plan Also compare and contrast Crack Is Cheaper . Despite the name, it's not actually paying for it in pennies

This is especially prevalent in charity advertising. For sixty cents a day (less than you pay for your coffee, you heartless bastard!) you could save the life of this child/puppy/ mentally challenged panda . It sounds like a pittance until you realize that you're agreeing to have thirty dollars taken out of your account every month.</ Of course, unless you literally have zero income, that is</ still a pittance, they just made it more digestible .

A lot of comedy comes from switching around expectations. This trope is about a specific kind, where the roles in an interaction or relationship between X and Y are reversed. But unlike "Freaky Friday" Flip , Prince and Pauper , and Swapped Roles , no explanation or justification is given, and the context remains identical as though said roles were never reversed at all. The comedy is more about the absurdity that arises from this type of situation than what happens to the characters Let's say hypothetically, a princess, wearing in full regalia (Pimped-Out Dress , tiara and ermine-lined cape) walks down a hallway one way, while her servant, in a French maid outfit, walks the other way, carrying some food. The princess bumps into the maid, causing the food to fall on the maid, but the princess</ begs for forgiveness and tries to wipe off the maid's dress, while the maid hysterically snaps at the princess for being clumsy, and complains about how much her dress cost Occasionally this trope is used for drama and/or Satire , where the situation is meant to be thought-provoking instead of funny A Super-Trope of Gender Flip and Fantastic Fantasy Is Mundane . Compare Hourglass Plot , Opposite Day , Persecution Flip , Stereotype Flip , Bad is Good and Good is Bad , and Russian Reversal See also Inverted Trope

A trope most common and easy to recognize in old-school Western

Animation , but fairly universal and even Older Than Print . Basically, it describes a scenario like this: Bob rescues Alice from some horrid peril. In gratitude, Alice gives Bob a little whistle and tells him something along the lines of, "If you ever need my help again, just blow this whistle!" After that, whenever Bob needs some rescuing for himself, he'll pull out that trusty whistle, and poof, like magic, Alice will be there to lend a hand. In more complex cases it may require (explicitly or implicitly) a Magically Binding Contract Compare Call on Me , wherein the whistle is not included, and Blow That Horn , when it's a horn rather than a whistle that summons the ally

The Random House Dictionary defines juxtaposition " as an act or instance of placing close together or side by side , esp. for comparison or contrast ." Many comedy writers, however, define juxtaposition as "two completely unrelated things being put together, just to see what could happen ." A Juxtaposition Gag is when a character or object is placed in a normally unrelated situation or genre for the sake of a joke. Common features of a Juxtaposition Gag are extremely obvious anachronisms (Abraham Lincoln, ASTRONAUT) or flat-out contradictory concepts (The Grim Reaper , M.D.), but any two things that are sufficiently distinct from each other can suffice. Pride and Prejudice and Zombies </

An index for tropes dealing with scenes of narrative/visual/auditory contrasts:

A story in which no matter how well-meaning, reasonable and cautious a character is, everything they do has awful repercussions for them and makes them look like a horrible person. Attempts to set things right just blow up in their face and aggravate the situation further, and generally the story ends when things are at their worst The afflicted characters are held to be entirely to blame for their own misfortune. Despite this, they are otherwise decent, nice and perfectly pleasant people who would be well-liked and respected... if they didn't have the misfortune to be living in a Kafka Komedy. Here, the universe punishes even the whitest lie or mildest of indiscretions with completely out-of-proportion ruthlessness It doesn't help that in a lot of these comedies the people around the protagonist seem incapable of feeling any kind of sympathy or empathy for them at all, despite how blindingly obvious it should be that this person isn't (entirely) responsible for the hideous chain of misfortunes crashing down around them, and would never be responsible for the horrible things they've been mistakenly accused of The trope is named after Franz Kafka , whose characters are well-meaning, reasonable, and cautious, but horrible things happen to them not only despite but usually because</ of their perfectly-nice actions. Whether or not Kafka's work qualifies as funny</, on the other hand, is a matter of taste and serious academic debate . Kafka himself read chapters of his books to his close friends, and the comedy aspect was a big part of the readings Of course, this trope doesn't necessarily have to be used for comedic purposes. It can also be used to turn the recipient of the abuse into The Woobie . At the same time, it can also be used to turn the audience against the character who blames the recipient of the abuse for problems, turning them into The Scrappy . Sometimes, the character is a good-hearted fellow,

but is mostly Made Out to Be a Jerkass by everyone around him. Needless to say, this is a type of comedy that is bound to summon " Dude, Not Funny! " in some members of the audience, especially</ if they feel that the Disproportionate Retribution is way</ too cruel in comparison to the alleged "comedy" of the situation The subtrope of Black Comedy least likely to involve death. Contrast with Plague of Good Fortune , where good</ things keep inexplicably happening to the character's chagrin, and Springtime for Hitler , where a character deliberately does something bad but is met with greatness</ for it, Karma Houdini where the villain gets off scot-free, or Karmic Misfire where not only does the villain get off scot-free but an innocent party gets punished in his or her place. May occasionally overlap with Somebody Doesn't Love Raymond and definitely Butt-Monkey and Sadist Show .See also Can't Get Away with Nuthin' . A Reformed, but Rejected character living in one of these stories is a Villain Ball Magnet

Skyscraper-sized monsters that assault Tokyo (though other cities like San Francisco and Hong Kong are also popular choice lately), hapless island explorers, or each other are called Kaiju While they have no specific</ form even in their own mythology, by Japanese standards they are traditionally monstrous, scaly water elementals of about 50 feet and taller that commonly though not universally resemble dinosaurs (due to those being the largest known land vertebrates in real life) Typically they arrive from somewhere Far Away. Whether that means space, Beneath the Earth , or a South Pacific island varies. Expect lots of Stuff Blowing Up to result, but, since Giant Equals Invincible , don't expect the explosions to actually hurt them. Do</ expect at least one case of Helicopter Flyswatter . Examples of this genre can range from straight-up Disaster Movie (Cloverfield </, the first Godzilla </ movie) to all-out wrestling matches between People in Rubber Suits (Most of the later Godzilla </ movies, every Gamera </ movie but the first). As this genre features a judicious application of Rule of Cool , expect the MST3K Mantra to be in full effect. Often, you'll only watch this kind of movie to see the monsters fight , which can often involve an Ultimate Showdown of Ultimate Destiny (such as King Kong vs. Godzilla </) This is actually one of the oldest genres in film, dating back to the early days of cinema when special effects were new. Pioneers of the genre were The Lost World </, King Kong (1933) </ and The Beast from 20,000 Fathoms </. The idea probably originates from thinking of dinosaurs as fantastic beasts or ideas about giant dragons . As for why it's so popular with Japanese media: Japan is quite earthquake and tsunami-prone, and you could think of a kaiju as a sentient natural disaster, so it may feel more meaningful to them. (Consider how Godzilla, like a wave, rises from the sea.) The word kaiju</ became more mainstream and used in western works after the release of Pacific Rim </ in 2013, when before they were usually and simply called " big Japanese monster " (even to the point of its origin being often Wrongfully Attributed to this film) A related term, "kemono", was used on many equally-monstrous creatures in a similar vein as kaiju (if not quite</ as massive), before it shifted into a common term for Beast Men or Little Bit Beastly . However, it's still not rare for some to refer to a Kaiju as a kemono. Another related word is kaijin</, which applies to more human-like monsters; the closest Western equivalent to this category of creature is perhaps

the Monstrous Humanoid Rent-a-Zilla is a Sub-Trope , where the work doesn't focus on the monster. A Notzilla is a kaiju that is specifically an Expy of Godzilla , and a King Kong Copy is this to King Kong . Kaiju also face off against an Ultraman Copy fairly often. There's also Mech vs. Beast for when a Kaiju fights against a Humongous Mecha . If kaiju offspring appear, expect Gigantic Adults, Tiny Babies . Crosses over with Behemoth Battle when there is more than one kaiju and they engage in battle with each other, with Primate vs. Reptile being a particularly common variant. In more modern works, kaiju are often afflicted with Proportionately Ponderous Parasites Compare Disaster Movie , Attack of the Killer Whatever , Robeast , and Attack of the 50-Foot Whatever . Has its roots in Tokusatsu and Mons

The Kamehame Hadoken is a Ki Manipulation (or any Functional Magic equivalent) in the form of a burst of weaponised energy , typically shot from the cupped hands of the main character after bringing their hands forward from behind their back or aside their hip, and varying greatly in size and intensity; from the "normal", utility Energy Ball attack (as it is with Hadoken) to a devastating beam worthy of a Limit Break or Finishing Move (as it is with Kamehameha) A staple for Shotoclones , along with the Shoryuken and Hurricane Kick . Compare with BFG , which is often the technological version, and Wave-Motion Gun , for the Humongous Mecha or spaceship-scale version of that. Also Wave Motion Sword , the sword version. Contrast Beam Spam . Compare also Blasting Time , where the character "throws" the energy attack The Kamehameha part of the trope's name comes from Dragon Ball </: creator Akira Toriyama named Roshi's ki attack after Kamehameha I (King of Hawaii), which was suggested to him by his wife. Meanwhile the Hadouken (Surge Fist/Wave Motion Fist) was inspired by the iconic Hadouhou of Space Battleship Yamato </, or, as it's translated, the Wave-Motion Gun Compare with Hand Blast , where the attack is not tied to the attacker's Ki , Life Energy or Mana . Depending on perception, both could be delivered by Power Palms

A Kangaroo Court is a sham legal proceeding or trial that denies due process and fairness in the name of expediency and authoritarian rule, undertaken usually by orders from the powers that be, with the specific purpose of punishing a particular individual regardless of whether he or she actually broke the law, in a specific way as to make it more difficult to prove that it was a gratuitous act of authoritarianism and to give the sadistic authorities a chance to gloat at the defendant's misery In a proper court of law, what happens is that there is a dispute between two different parties—in civil courts it's between individuals or corporations, in criminal courts it's individuals versus the State—and this dispute must be settled according to standing law in an orderly and structured way. A court requires a minimum of three parties: a plaintiff complaining about an injury that was done to himself or herself (in criminal courts the plaintiff is the State, represented by a prosecutor or attorney general); a defendant, who is the person being accused of wrongdoing; and the judge (and jury, if the country uses it), whose job is to evaluate the evidence and testimonials presented by both parties, determine whether the plaintiff's complaint is true, and, if the injury was actually done, determine how the defendant should pay for their

wrongdoings. A trial, therefore, is inherently a non-deterministic procedure with an unknown outcome; theoretically, even the most cynical and shameless Serial Killer can end up being cleared from all charges if the evidence for them is solid enough. In addition, most trial processes throughout the world have been painstakingly designed to respect at all times the defendant's human rights, by always giving even the most horrible and unforgivable offenders a chance to defend themselves, always listening to everyone's claims, and by applying special rules such as always providing a state-sponsored lawyer if the defendant can't hire their own, or assuming the defendant's innocence until proven guilty In a corrupt state, none of this happens. What happens instead is that a powerful person—the President , the Glorious Leader , a sufficiently powerful Corrupt Politician , a person with enough wealth and political connections , a secret authority operating from the shadows , or maybe the people who just overthrew the previous government and are now sending everyone to jail —wants to punish or get rid of someone in particular, has managed to arrest or kidnap that person, and has a corrupt law enforcement system completely ready to lock that person into jail; if the authority wants to, they can send the victim to death row, or have them commit suicide by three gunshots to the back of the neck . But doing so would immediately raise suspicions among the population that this person was actually innocent and wrongfully convicted, which would greatly undermine the legitimacy of the powers that be, and potentially end up with an armed revolution if the convicted person was sufficiently popular. Also, if the dictator or the people in charge are sadistic enough, they may not find it enough to just punish someone; they're going to want to taste every single one of the victim's tears, gloat at their misery, and laugh in their face as they are sent to their inevitable doom Enter the Kangaroo Court: the defendant technically is given a trial, but the trial is actually just a show, and going through the motions of procedure is only done to make it "official"; unlike a proper trial, which inherently has an unknown outcome, this fake trial's outcome has already been decided, and the defendant will</ be punished, no matter what happens or how the trial develops. The defendant will likely be allowed no defense, nor be allowed to call witnesses, present evidence or make objections. If they are allowed, they will be summarily overruled by the Hanging Judge that usually presides over the trial in question. Especially nasty versions may even slap the accused with "contempt of court" penalties for even trying</ to mount a defense. If the trial results in a death sentence, some people will use the term "judicial murder" to describe it An alternate version is the Reverse Kangaroo Court, in which the defendant will be judged innocent</ and cleared from one or more charges. In this case, the accused person is let off by a court biased in their favor. This may be due to them having connections , the alleged victim(s) being unpopular or prejudiced against, bribery/threats that gain them acquittal or dismissal of the charge(s), or maybe the defendant is a government official in a corrupt jurisdiction that feigns having a due procedure to address abuses of authority but in reality has the entire system rigged in favor of the rulers and bureaucrats This one is unfortunately Truth in Television , especially in countries ruled by dictators, who are fond of putting people through "show trials" as a prelude to execution; the victims are usually dissidents, people designated by the authorities as enemies, or random people used as scapegoats to prominently declare

a high profile crime as solved. The etymology is unknown, though many (mostly wrong) suggestions have been made Very rarely, the reaction to these can in fact be Kick the Son of a Bitch , if the court's victim is a particularly despicable villain. Seeing them getting their just desserts at the hands of the corrupt system they themselves may have set up can be incredibly therapeutic both for the protagonists and the audience Compare Joker Jury (which a Kangaroo Court may well have), Jury of the Damned , Trial of the Mystical Jury , and Decoy Trial . If it's the litigants who are making a mockery of the court system rather than those running the proceedings, it's a Courtroom Antic . Not descriptive of Australia 's legal system, though many confuse it with Sentenced to Down Under . If the Kangaroo Court occurs in the military, it's called a . The name comes from the hasty and haphazard nature of this type of justice; instead of a proper table and/or notes, a makeshift board or writing medium, such as a drumhead, can be used, especially on the battlefield. The inevitable outcome is the defendant getting Shot at Dawn See also The Scapegoat , Guilty Until Someone Else Is Guilty , and Miscarriage of Justice . Not to be confused with Decadent Court , which is about a corrupt royal</ court, although naturally they have been known to overlap

Kappa is a Greek letter , as well as a type of Indian tapioca dish. But this article isn't about those kinds of kappa There are thousands</ of Youkai in Japanese mythology... but one of them is far is a river-dwelling creature of Japanese folklore. It is often depicted in Anime and modern media as an anthropomorphic turtle with a domed head and a ring of spiky hairs sticking out from it In Japanese myth, the kappa is a river-dwelling spirit who likes to eat human entrails and blood. It has a deep bowl-like depression in its head that is full of water, which is the source of its power. That bowl is surrounded by scraggly hair (transformed into the "spikes" of the modern incarnations by the Anime Hair phenomenon). Those confronted with imminent devouring by a Kappa are advised to take two courses of action: The first, and most preferable, is to give the kappa a cucumber, inscribed with one's name in some tellings. The cucumber is the Trademark Favorite Food of the kappa, and a kappa so bribed will spare the giver. It may even befriend the human for the tasty gift . The other action: Bow to the kappa. Kappa are extremely polite, and will always bow too . Bowing will cause the water to fall out of their bowl, weakening them and allowing you to escape. In any case, don't bother trying to fight them, as they love</ sumo wrestling Kappa have undergone a bit of Disneyfication that bowdlerizes out their gruesome aggression and strict need for water in their bowl. It is a necessity of and to their immense popularity, courtesy of which they pop up in a lot of Japanese works for many different audiences. Even those works that aren't explicitly mythological like to throw in a kappa or two. While the kappa hasn't reached the same level of popularity elsewhere, Popcultural Osmosis from anime means that Western works sometimes do feature one There are many different regional names for the kappa, and appearance varies considerably between regions as well. Notable examples include the hyousube</ (bald, hairy, gibbon-like creatures which like eggplants), and kawatengu</ (literally "river tengu ", with the ability to create fire). The mizuchi</ is depicted as a kappa in some regions, but in older sources appears as a shapeshifting river

dragon Creatures in other regions similar to kappa include the Chinese Shui Gui</ ("water monkeys"), as well as the Phillipino (a monstrous type of goblin-like merfolk which is also said to kidnap and eat children that walk nearby the rivers it lives in). The third disciple of Tripitaka, Sha Gojyo, in Journey to the West </ is often represented as a kappa, though the actual tales depict him more as a river-dwelling oni (and in the original Chinese version, it was a river of sand</) Not to be confused with a rather famous Twitch . . Nor with the Web Comic </, although it does feature anthropomorphic sea creatures, including the eponymous fish-boy. Sister trope of Our Goblins Are Different

Sometimes, even Laser-Guided Karma misses its target. The character has done a number of things that deserve a karmic comeuppance, most importantly things that caused harm to the innocent. But when the time comes for the hammer to fall, that's not what happens. At least, not on them. They don’t</ get what they deserve. Instead, they get away scot-free. They are Easily Forgiven , maybe even praised, and even elected president. And they might even have reversed</ the Humiliation Conga that was being planned for them. Worst comes to worst, The Bad Guy Wins and a stolen happy ending takes place at the expense of the hapless victim who may be punished in the guilty character's place . This is it. This is all there is to the story. The show is over. The book is finished. The author isn't going to write any more. The Word of God has been spoken. Karma is out to lunch. The villain has become a Karma Houdini . Predictably, it is often shocking or downright upsetting</ to see such scoundrels dodge instant karmic punishment and come out triumphant in the end. As such, expect fans to clamor for a sequel where the villain gets their comeuppance — or try to satisfy that frustratingly unfulfilled desire for retribution by writing their own . There can be a number of reasons for this trope. Sometimes, the story is going for a Downer Ending in which the villains escape justice for their crimes. Other times, the creators overlook relatively minor offenders, whether due to not considering their actions worthy of punishment or not having the time to see them get their comeuppance within the story. Still other times, it may not be possible to exact retribution on the characters who ends up becoming Karma Houdinis, whether because they're too powerful to be subject to retribution, there's no way to legally judge them or some other reason. Compare Butt-Monkey , for which a character ends up having many disproportionately bad things happen to them throughout the story (and may also technically qualify for this trope, as hard as that sounds). The extreme counterpart of the former trope, Cosmic Plaything , can be considered this trope's polar opposite . Also compare with No Good Deed Goes Unpunished , where the good guy suffers as a result of doing the right thing. Contrast the aforementioned Laser-Guided Karma (when the villain's comeuppance is swift and immediate), Karma Houdini Warranty (when it takes much longer) and Karmic Death (when it leads to the villain's death). Also see Idiot Houdini , when a person is forever protected from the results of their stupidity. Note that a character doesn't necessarily need to be a full-time villain to qualify for this trope. They may simply end up doing unnecessarily hurtful things , yet not suffer the repercussions. (In contrast, when someone is</ too evil to kill off, but may suffer other consequences, see Joker Immunity .) Note also: The work usually must be completed for a character to qualify as this trope. Only if there are no more opportunities for Laser-Guided Karma to strike can a character be said to have

successfully avoided any consequences for their actions. Exceptions may be made in cases where Status Quo Is God , or when a character can be said to have permanently escaped, e.g. they died peacefully in their sleep at an old age. And sometimes even that’s not enough. (Unless they somehow</ managed to get into Heaven and are gleefully rubbing their current state in your face). Otherwise, resist the urge to put it on an ongoing work's page. Don't mistake a lack of direct karma for this trope. If a character, for example, murders someone and never gets caught, but a freak lightning strike kills them , they've still gotten their comeuppance even though the lightning had no connection to their crime . Think of the writer as God, with the power to punish or not punish a character who does evil. Not to be confused with a literal Houdini-style escape by the villain to avoid justice, that's Villain: Exit, Stage Left , although the two certainly can (and often do) overlap. This is a Spoileriffic trope. Spoilers shall be unmarked. You Have Been Warned .

A Karma Houdini is someone who suffers no consequence for their bad actions. This trope describes situations where this protection turns out to have been conditional — as the person painfully discovers when the long-delayed punishment suddenly lands on them. Certain circumstances and actions can void the warranty, resulting in the vicious delayed retribution of Karma , related phenomena , and even their own mistakes : They feel sorry for their actions but fail to fix things . If one of these conditions is met, the Karma from their previous actions returns in full force and everyone turns on them. This usually provides a Catharsis Factor by pulling the rug out from under the former Houdini. In this case, the Smug Snake , Villain with Good Publicity , Invincible Villain , Complete Monster , etc. realizes they're at someone's mercy and the villain that fans Love to Hate (or is just a Hate Sink) is finally punished Both the characters and the audience turn the untouchable evil into a Butt-Monkey . Of course, Karma may get vindictive and make even minor blemishes seriously punished while good deeds are belittled . The expiration of a Karma Houdini Warranty may occasionally turn the character into The Woobie or a Jerkass Woobie for the audience... but this isn't the case in-universe. The other characters (and the author) usually believe that the character is getting their just deserts , and show No Sympathy . They might try to use a Freudian Excuse to justify their actions but get shut down quickly . If it is the first condition that is met, then it may be a case of Redemption Equals Affliction . Compare Adaptational Karma , where a character who got away with their actions in the original work is given their comeuppance in the adaptation. Contrast Offscreen Karma , in which the character's karmic retribution is explicitly mentioned to have happened but isn't shown, often because it would be too complicated to provide details for or because it's (supposedly) more satisfying that the retribution reduces the Karma Houdini to a mere In-Universe footnote. Warning: because this trope requires someone initially be a Karma Houdini , which is a spoiler, all spoilers will be unmarked. The Karma Houdini Warranty is now available in our Trope Co. catalogue! </

This trope covers incidents where: For cases where the term karma is not</ used "properly", see Call It Karma . Frequently paired with the spiritual concept of Reincarnation . This page originally read "Describe Karma here." Yikes! Of course that's also the whole

point. Karma is a complex spiritual concept whose is perhaps best left not to TV Tropes or Wikipedia , but to actual religious study. Originally, the term </ was a word for a rather specific spiritual concept, but over the centuries the word has been borrowed by countless languages, cultures, subcultures, religions, works of fiction, and even video games. Over time the word has evolved to such an extent that many who consider it to be part of their everyday vocabulary are unfamiliar with its original definition. While explaining the original meaning of Karma in a single paragraph is almost certainly oversimplifying it, the principle goes something like this: Therefore, when you commit an evil act, you are in a sense harming yourself and not just others. Its most common and simplest definition (perhaps too</ simple) is "If you do something bad, it'll come back to bite you in the ass." Karma has also been equated to Equivalent Exchange and Newton's Third Law of Motion: "For every action, there is an equal but opposite reaction." Note that Hinduism , Jainism, and Buddhism have different views on karma. In Hinduism, there is "good" and "bad" karma; in Jainism there are also two types of karma, with the goal to remove all the "bad" karma then</ the "good" karma to achieve perfection (becoming a "siddha"); while in Buddhism all karma is bad</ and the goal is to achieve enlightenment (becoming a "buddha") and thus escape from its bonds.

No matter how evil the villains are, the good guys can't just kill </ them: heroes are supposed to be better than that. They need to stay pure and noble (or innocent); role models, exemplars of solving their problems without resorting to bloodshed. If they take another person's life, no matter how justified, they will lose their moral edge But when the villains are just arrested and hauled away by the police , this isn't satisfying. For one, they have a tendency to escape . For another, the mundane workings of the criminal justice system seem woefully inadequate to hold or to punish a really evil</ villain. We, the viewers, want to see real justice administered, and we don't trust human hands (or at least not heroic </ human hands) to administer it So, the writers arrange for the villain to die in a manner that is completely his own fault. Or, at least, obviously not the hero's. If he dies right in the act of attempting to kill the hero , this gives a particularly nice karmic zing . If he attacks after</ being defeated and then spared by the hero, this is one of the rare circumstances where the hero can dispatch the villain personally and still come across as blameless Note that this only applies if the villain is clearly human, or the show universe's nearest equivalent. If they change into some kind of monster , they are no longer protected by this trope: the hero might hesitate to kill another human, but a mutated, horrendous beast is fair game — doubly so when the villain took this form for the sole purpose of murdering the hero. The trope may still apply if the villain's inhuman nature somehow allows him to escape justice at the mortal heroes' hands; in such a case, their doom would come from a completely unexpected quarter, such as previously abused minions finding and shattering the villain's Soul Jar to avenge themselves, without any involvement from the heroes whatsoever (and the minions possibly not even pulling a Heel–Face Turn). And if a Karma Houdini finally becomes the receiving end of this trope, this is Karma Houdini Warranty It's more common in Western markets, as a result of heavy censorship and the general reluctance among writers to feature their character (usually in a show with

a younger Demographic) doing such acts as killing, especially if they're underage . Occasionally known by the older demographic as "getting one's comeuppance." Given that there is a certain charm to Self Disposing Villainy , this trope can show up in works that allow the hero to kill people; it's just that it's much more common for it to show up in situations where the hero has a no-kill policy for one reason or another This trope is less common in more cynical works, where the good guys using lethal force is not only more expected but the refusal for a hero to kill comes of as naive at best and irresponsible at worst Karmic Death is an example of Death by Irony . Disney Villain Death , The Dog Bites Back and Just Desserts are subtropes Compare Asshole Victim , Hoist by His Own Petard , A Taste of Their Own Medicine and Karmic Butt-Monkey . See also Cruel Mercy . Adaptational Self-Defense usually involves this. The Killer Becomes the Killed is a Crime and Punishment Series variant As a Death Trope , all Spoilers will be unmarked ahead. Beware

A character gets what is treated as either Laser-Guided Karma or an otherwise appropriate consequence for their wrongdoing, but they end up suffering so horribly that even those who agree that they deserved punishment think they got more than they really deserved . While this typically applies to villains, this can easily apply to other characters if they get over-punished for a minor misdeed The heroic version of this is Can't Get Away with Nuthin' . If done too often in a series, this can make a character a Butt-Monkey . Can cause the one doing the action to become a Designated Hero or Unintentionally Unsympathetic . For in-universe cases of this, see Disproportionate Retribution , Evil Is Petty , and Dog-Kicking Excuse Compare Fate Worse than Death , Death Is Dramatic , Alas, Poor Villain , Alas, Poor Scrappy , Antagonist in Mourning , There Is No Kill Like Overkill , Unintentionally Sympathetic , Easy Road to Hell , Felony Misdemeanor , and Jerkass Woobie . Contrast Karma Houdini , Death Is Cheap , Death Is a Slap on the Wrist , and Joker Immunity

The Trickster who specializes in unstuffing stuffed shirts, deflating puffed-up egos, trivializing the self-important, and confusing know-it-alls . The Karmic Trickster is normally harmless, even friendly, if left alone. Once his dignity is dented or his person threatened, however, it's no holds barred — the target is in for humiliation, embarrassment, and bewilderment. Any tactic is fair game as long as it does not cause actual physical harm to the target. Only when the target has surrendered does the Karmic Trickster conclude his vengeance Being completely self-centered, the Karmic Trickster normally acts only on his own behalf, but can be convinced to help others — he has a soft spot for babies, innocents, and those who are truly good, and when his sympathy is evoked will go to the ends of the earth for them. Sometimes he sows chaos for the sake of chaos, but only when he gets carried away in the midst of one of his campaigns. Most of the time he simply wants to be left alone , and heaven help whoever messes with him! Given all of their righteous retribution, sometimes these characters can exist somewhere between this , The Prankster and borderline Neutral Evil if their self-righteous attitudes end up attacking characters for little more than existing nearby them and can often just seem like Comedic Sociopathy if our trickster operates as a

Designated Hero regardless of where they sit on The Trickster scale and the only Karmic anything involved about them is being a Karma Houdini Between them, Karmic Trickster and The Prankster comprise two-thirds of The Trickster classic. His actions are as much to teach as to gain revenge, where The Prankster is the embodiment of mischief for mischief's sake See also: Karmic Protection May masquerade as The Fool or vice versa; whether silly or wise, he will always display Hidden Depths (if only a knack for comedy and Simpleminded Wisdom) whom the audience may laugh at. This is not always true of other Tricksters in general, who are sometimes cast as cloud cuckoolanders , irrepressible agents of chaos , lesser chaos-bringers who are constantly being taught a lesson themselves, or cosmic butt monkeys . Such traits rarely apply here. Indeed, the Karmic Trickster is the least vulnerable to Hoist by His Own Petard or to Counter Zany (which he can often turn into Zany Scheme Chicken)

Rule of Cool says swords are cooler than guns , and tends to also hold the Japanese katana to be the coolest of all swords. Japanese media often lionize the katana, and Westerners with a Foreign Culture Fetish or belief in Exotic Weapon Supremacy take this reputation even further. Because of this widespread cult of katana supremacy, putting one in the hands of a character is often a statement that they are cooler and more powerful than the ones who don't have one The katana is usually characterized as an Absurdly Sharp Blade that can make a Clean Cut straight through just about anything, maybe even so</ clean that the object doesn't fall apart until a few seconds afterwards . A character with a katana is usually a Master Swordsman with Implausible Fencing Powers . Even more so than other heroes wielding swords , shooting at this guy is usually pointless unless you want your bullets parried . Basic laws of physics need not apply Of course, in reality, katana are no better or worse than most any other type of sword. They were designed to function best within their own time period and culture, just as any sword. See the analysis page for more on that front. We also have a Useful Notes page on Swords for more information, as well as a Kenjutsu on the real martial arts associated with their use It seems possible that this will eventually become a Discredited Trope . Since the 2010s or so it has become far less universal in popular culture, and excessive boasts about the katana are frequently debunked or parodied online. However, despite the fact that its physical performance is not exaggerated as frequently, the katana is still pretty widely considered to be especially cool and stylish A Super-Trope to Wooden Katanas Are Even Better , in which the ultimate sign of a Master Swordsman in Japan is being able to defeat steel katana using a wooden one. If a fan fiction protagonist's Weapon of Choice is a katana, and especially if they wield two at once , it can be a giveaway that they're a Mary Sue . This is especially true if the story is not</ set in Japan (or a fantasy analog thereof)

"Kayfabe" is a carny term thought to have originated from the Pig Latin for "be fake", possibly originally by pronouncing it backward ("kay-feeb"). Professional Wrestling adopted the term as a reference to the standard Fourth Wall features of separating the audience from the action. It is meant to convey the idea that, yes, pro wrestling is a genuine sport, and yes, this is how these people act in real

life . It is essentially Willing Suspension of Disbelief specifically for pro wrestling. Back in the old days, though, kayfabe was much more; it was pro wrestling's real life Masquerade . Wrestlers, promoters, and everybody else involved with the business alike resorted to any means necessary to guard the secret that wrestling was rigged , from wrestlers roughing up any reporters who dared ask, "It's all fake, right?" to (alleged) death threats towards anybody who threatened to expose the secret, through contacts with the Mafia and other organized crime. Heels and faces weren't allowed to travel, eat, or be seen with their "enemies" in public, and changed in separate locker rooms. Wrestlers lived their gimmicks 24/7 and those playing Wild Samoans or Foreign Wrestling Heels could not speak English in public if their characters didn't. There are even rumors that some wrestlers would lie under oath in court to maintain the illusion, and some old-time heels tell stories about carrying guns for their own protection from those fans who took it just a bit too seriously . To get an idea of just how important kayfabe was, it's interesting to watch shoot interviews with old-time wrestlers filmed in the modern era. Even decades later when everyone knows that wrestling is fake, they often start speaking as if various angles and feuds were real and tend to dance around actually saying that wrestling is staged if pressed (Arn Anderson, now an onscreen personality for AEW, is notorious for this). Naturally, there had always been skeptics that denied pro wrestling's legitimacy from the beginning A court case in the 1930s revealed the inner workings of pro wresting in the court transcripts and Shadow of the Thin Man </ cracked jokes about the pretense as early as 1941, not to mention that The Flintstones </ had Fred Flintstone laugh at the idea that wrestling was real in their Pro Wrestling Episode (first aired in 1963) , but fans widely started to figure out the truth in the '70s (if indeed they were ever actually unaware before—with any live TV audience there is a certain amount of kayfabe of a sort going on with them too), and once Vince McMahon 's World Wrestling Federation rose to prominence in the '80s, the secret was out for any but the most die-hard (and thick-headed) fans. And even they finally got it in the '90s, when McMahon himself revealed it on Monday Night RAW </. McMahon was also forced to break kayfabe when he hosted a tribute broadcast to Chris Benoit after the wrestler was found dead with his family, which aired a few days after McMahon's "character" was supposedly either Killed Off for Real or at least was to be out of commission for a while; a day later, when the details of Benoit's death became known (that he had committed murder-suicide), McMahon further dissolved kayfabe in a follow-up broadcast in which he discussed the tragedy which when combined with growing 21st century internet backstage interest and global knowledge of scripted storylines as opposed to serious competition pretty much killed old school 24/7 hardcore commitment for good, though as discussed below it is still expected that wrestlers should stay in kayfabe if only for appearances sake. Other kayfabe-breaking incidents have occurred during live broadcasts, with the announcers outright referring to "wrestling angles" and "storylines", perhaps most notably the off-camera accident that killed Owen Hart during a pay per view broadcast, forcing the announcers to explain what had happened, Jim Ross being forced to explain clearly that the event was not part of a storyline and Hart was seriously injured, an hour after the event restarted Ross informed viewers (but not the present audience) that he had passed away due to the accident. Another aspect was legal: steroids. McMahon had to explain that pro wrestling was entertainment</ and not</ a "sport", and therefore avoid having real

sports governing bodies from investigating. (Not that he didn't have surrounding steroids.) "Breaking kayfabe", for a pro wrestler, is tantamount to "breaking character" for an actor. Note that even in the 21st century, when pro wrestling is known to be staged, kayfabe is still a big deal; most wrestling organizations expect wrestlers to maintain kayfabe at all times, and one (Deep South Wrestling, one of WWE 's farm leagues) levied substantial fines on its wrestlers for breaking kayfabe at public appearances, before it was shut down. This has become more apparent now thanks to most wrestlers having an online presence, as they can now extend it beyond what is seen on camera, playing up their personas and engaging in icy and confrontational conversations with their opponents on the likes of Twitter . For many, if not most wrestlers, maintaining kayfabe is considered a matter of honor and professionalism, and any breaking of it except in the most extreme of circumstances (such as in the case of Hart's and Benoit's deaths mentioned above) is something that can damage a wrestler's reputation permanently. A good example of this is Vince McMahon 's infamous " Montreal Screwjob ", the fallout of which not only shattered Kayfabe for an entire generation of fans, but also went to redefine Vince McMahon himself into his " Mr. McMahon " image. Some people compare modern kayfabe to Penn & Teller 's tricks which seem to give away the magic's "secret", while actually setting you up for a different, more impressive effect. Kayfabe can be heavily bent, if not outright broken, by a Worked Shoot . As a side note, if you happen to know anybody who claims to have been a wrestling fan "back when it was real", unless Willard Scott announces their birthday on The Today Show</ , they were taken in by kayfabe. By all accounts, wrestling was completely show within 10-15 years after the turn of the 20th century. This was necessary to compete with the emerging sport of boxing, which naturally lends itself to long, drama filled, multi-round fights, whereas a real wrestling match could last about ten exciting seconds, or two boring hours. The late Gorilla Monsoon , one half of the best commentary duo of his era, had "KAYFABE" on his car's license plate. The night after the Exposed! Secrets of Pro Wrestling</ special came out (years after kayfabe was exposed in mainstream wrestling), Mick Foley was the only one to try to "restore" kayfabe by claiming "I didn't do so well, last week — but I was watching TV last night, and the Secrets of Pro Wrestling were revealed to me!" Although Foley was probably just taking the mickey (pardon the pun) out of the ridiculous show (though to be fair anyone who claims Foley wasn't a seriously dedicated worker who put his body on the line many times should watch THAT match with the Undertaker). Conversely, some fans would prefer not to see "real" fighting, and prefer kayfabe. The arguments include: To put it another way, wrestling fans who treat the sport as if what we see on TV is real are not so different than people who talk about soap opera characters like they are real people. All fictional works require some suspense of disbelief to get the audience really connected. The only real difference between that and kayfabe is that professional wrestling extends that fiction beyond the edge of the camera frame. The radio industry has taken this trope in a different direction , with the presenters occasionally being different versions of their real-life selves . At the core, we all know that it's scripted, but knowing that doesn't stop you enjoying it. We know that movies and TV shows are "fake" too, but a well told story, particularly one with lots of action, is well received regardless. See also Flynning , which serves many of the same purposes for depictions of swordplay . For another kind of fiction pretending to be real, see Direct Line to the Author . When

actors themselves choose not to break kayfabe in order to better stay in-character, see Method Acting .

The game of tossing an object around in a group to keep it away from someone else In one scenario, the heroes are trying to keep the MacGuffin away from the villain or villains. Said villain is so focused on the item that they're not fighting the heroes who don't have it The answer is to throw the MacGuffin from hero to hero, with the villain being frustrated as he barely misses it each time. If there's a group of villains, expect multiple "yoink!" moments as the groups intercept it from each other In another scenario, the protagonist might be quietly minding his own business on the schoolyard when a group of bullies come up and take something of his, then pass it around to another one whenever he gets close. If he can make a plausible threat of getting them in trouble, expect them to transparently lie and claim that it was only a game; otherwise, they might just keep the MacGuffin . One way or another, the protagonist will need to find an effective way to deal with the bullies Polar opposite of the MacGuffin Delivery Service and Hot Potato

The Pieces Lie Where They Fell </: As in the original Equestria Girls</ film, the new Bearers use this to try and keep the Element of Magic away from Sunset, Snips and Snails. Unlike that film, the principals get involved too, as it's tossed towards them at one point. It doesn't work</ , unfortunately, as Sunset manages to get her hands on it and put it on.

There once was a show. You know, that show . It was a really good show. Or maybe it was something else . Still, you'd love to relive the memories, and share it with your friends. There's just one problem: It's impossible. Watch and record reruns? Of course you would... if it were on. Buy the DVD or Blu-ray? You'd already have it on pre-order... if it existed. Physical releases do exist after all? Snatch them up... but they haven't been in print in forever, and used copies are absurdly expensive and the few that might be in your price range are almost definitely either scams or bootlegs... Or they aren't even available in your region at all. Netflix , Hulu or iTunes? Not there... or there... or there. Or maybe it is actually available, just not in the original version . Try and get the rights to rerelease it yourself if you have the means to do so? You can try... but whoever holds the rights to it either has no interest in doing so, or demands a ludicrous amount of money that you cannot possibly afford. Or worse, you can't even find who owns the rights to make a deal. So what's a fan to do? You're not trying</ to break copyright law — you'd be more than happy to pay to acquire it legally! But since you can't, you have to go to your last resort option — get it illegally (or at least in a legal grey area somewhere). Once the steam stops escaping from your ears, your first question is probably why the distributor wouldn't even bother selling copies of a work when there are so many people like you (at least according to your fan forum) who would be willing to buy one. There are a lot of reasons this happens, and not very many will make you feel better. On television, you had to deal with all the following things: On TV, the first to popularize the concept of home video was HBO with The Sopranos </, and nowadays, with the ease of putting a show on DVD or a streaming service and easily

replicating and distributing it, the fragility and expense problems of VHS are a thing of the past — but for older shows, they have to be converted to digital first. You still have issues with rightsholders, censorship, and distributors wanting to protect their TV channels — it's especially a problem in certain countries where the networks are so profit-driven that the advertisers decide which programs they show and will block the whole DVD thing to get you to see the ads. Also, not every streaming service is available in every country , and even when it is, it might not have as extensive a library there as it might elsewhere. This might be why piracy is so much more prevalent in parts of the third world. Of course, it's entirely possible that your show is just so</ niche that it really isn't worth it for the distributor to make and sell a home video release just for you and your five friends on your fan forum. No matter how many petitions you send them. The Trope Namer is Mystery Science Theater 3000 </ , which used the phrase in the credits of early episodes to encourage fans to share the show with each other — it was a niche thing, and the makers knew it. They also knew that the show would hit serious licensing issues later on, as each episode showed someone else's movie so that they could riff on it, and a few episodes of the show remain unobtainable (legally) even today without the proverbial tape circulation. See also No Export for You , Missing Episode , The Shelf of Movie Languishment , Screwed by the Network , and Denial of Digital Distribution , all dealing with situations where they easily could</ make the work available but don't. This trope is a way of dealing with the situation. See also also Archive Team , the Wayback Machine , and the DataHoarder subreddit , which make an effort to preserve Web pages in this manner (with varying results). It is against TV Tropes rules to provide links or directions to pirated material. Please don't tell readers where</ these works can be illegally obtained. When writing examples, just say that it can be found online and leave it at that. (Think of it this way: if the link becomes too popular, they'll take it down .)

Regarding what form the forbidden knowledge takes, a Tome of Eldritch Lore is almost expected to be the exception. However, sometimes the knowledge can come in the form of a living creature, memory, or (in a more modern setting) a large selection of files on a super computer. Whatever form the knowledge comes in, it usually (but not always) feels like Sealed Evil in a Can The Keeper itself is typically something ancient, menacing, or powerful enough that no one can simply ask</ for the information it has without paying a price. Sometimes the Keeper is a title passed down by an order however, and this is generally the oldest or most intelligent of the conspiracy's agents Finally, the Keeper usually lives in an isolated or hazardous area of the society or region it lives in, a better way to test would-be knowledge seekers of their worth and capability to become puppets for the Keeper's whims, sometimes turning said keeper into a Chess Master The general moral of stories that revolve around this trope is usually that some things are best left not being known, or that with knowledge comes power, and with power that holds no compassion comes the damning corruption most Keepers of Forbidden Knowledge hope to inspire Compare the much more benevolent Ancient Keeper See also Things Man Was Not Meant to Know , specifically The Dark Arts

Bob is a threat to Alice, and she knows that. He might stab her in the back at any moment. Alice could simply fire Bob, but then

she would always wonder when and where he would act against her. So Alice not only keeps Bob around, she makes sure he's near her at all times. It's a calculated risk, since Bob is now always in a good position to strike... but Alice is always in a good position to know what he's up to Often times, Alice keeps Bob close by appointing him to a position of power, such as her personal adviser. Alternatively, Alice might associate herself with Bob's friends, or on rare occasions, might even try to form a relationship with Bob himself . Anything can work to keep Bob under check at all times This trope can apply to any character who could become a dangerous loose cannon if left unmonitored, such as a Blood Knight . It is safer to keep these characters near you so you can keep tabs on them, rather than risk them slipping away. In the case of the aforementioned Blood Knight, it is safer to keep him in your army than it is to discharge him and not know where he is or what his next target might be Compare Living with the Villain ; contrast Go-Karting with Bowser . If you get too</ close, it may result in Foe Romance Subtext or Dating Catwoman

Apotheosis (MHA) .

Lots of stories are about The Hero and comrades as They Fight Crime! . This story focuses on The Hero 's lovers, family, and friends back home , often in a Lower-Deck Episode , as they try keep normal life together and not go crazy from loneliness and worry. British examples will exhibit lots of Stiff Upper Lip . Romantic partners will find renewed determination that I Will Wait for You or succumb to Absence Makes the Heart Go Yonder The usual portrayal involves families of the military and other warriors: soldiers are subject to long, distant deployments with little contact back home, and combat situations always involve the fear of injury and death. Families of police officers, sailors, and superheroes can also feel like this Can deconstruct the facade of a proud military family by realistically depicting the Stepford Smiler -levels of emotional stress and isolation that My Girl Back Home shoulders with Heroic Resolve , as well as the accepted but implicit pain caused when The Hero chooses Loved I Not Honor More Children's books about war naturally tend to concentrate on this, because this is where the children are The Determined Homesteader's Wife can be this, if she doesn't wind up the Determined Widow . See also Home Sweet Home

A character type that most often appears in female-oriented media , best described as the human equivalent of a parakeet: small, hyperactive, and annoying yet loveable. The Keet fills the role of a little brother to the cast: he is kind, hyper, inquisitive, talkative , and slightly younger than the main characters (though still too old to justify his behavior). He is also In Touch with His Feminine Side , an attribute that makes him an Audience Surrogate for the female audience of an all-male Cast Full of Pretty Boys Guys like this are particularly prevalent in Yaoi , where he's probably an Uke paired with a far larger Tall, Dark, and Handsome brooding type. In other types of works, he's less likely to be a love interest as he is an Audience Surrogate Compare Genki Girl . Examples of hyperactive characters that lack the young, feminine little brother aspects should go in Genki Guy Compare Bratty Half-Pint , who has hyperactivity like the Keet's but is

much younger See also the Otaku Surrogate , his Seinen counterpart

Punningly named after a street in London , this is a name for fake blood, especially the sticky, edible sort in old British horror films. Everything2 gives the recipe as: 2 cups of corn syrup (for viscosity and color) The blood is sticky, thick, and bright red (crimson in fact). The original Kensington Gore was a specific brand of proprietary stage blood manufactured by retired pharmacist John Tynegate in the '60s and '70s. It can be seen in a lot of old horror films, especially the Hammer Horror series. Plain chocolate syrup is still used in black and white films as brown looks more like blood than red would in monochrome and better matches the viscosity of real-world blood. See also A Bloody Mess .

If TV writers need cheap exposition, the easiest way is to have a news Show Within a Show do it. Usually, the news anchors provide a Practical Voice-Over . Sometimes, they do more than that (see Coincidental Broadcast and News Monopoly). Of course, it gets boring having bland talking heads give information, so animated shows spice up their Practical Voiceover with a little parody. On any show including a fictional newscast intended for adults, you are likely to see anything but</ a news anchor simply telling the news. Instead, you will see anchors who: Bring way too much of their personal life into their discussion of the news. Though live-action comedies do them occasionally, these routines are much more common in animated shows. This may have to do with the fact that animated shows usually use multiple characters per actor, and can afford to have a diverse supporting cast (and also, of course, because it's infinitely easier to have Canon Discontinuity in a show which everyone already knows isn't supposed to be realistic). A regular feature of the Immoral Journalist .

A character has a large keychain with many, sometimes dozens , of different keys. As a result he has quite some trouble finding the right one when he needs it When Played for Laughs , the character will proceed to go through the keys one by one, naming the function of each, until he gets the right one. Bonus points if, while doing this, they discover at least one key among them with a...rather embarrassing function Can also be Played for Drama to create tension in the same manner as Dangerous Key Fumble . And of course, a character can intentionaly invoke this trope to stall time Related to Rummage Fail

A Keystone Army is an invasion force or army that's seemingly unstoppable , except for one particular weakness in the form of a well protected but very fragile component . It can be an individual soldier, an object or whatever, but if you destroy or tamper with it, the entire army is immediately disabled . This plot device is handy as it allows a handful of heroes to win the war without having to depict them fighting off the entire enemy force. Just a daring raid on the enemy's stronghold and BAM! Evil is defeated. It also allows otherwise unstoppable foes to be suddenly stopped dead in their tracks General forms include having the MacGuffin -weakness be the Hive Queen of an enemy Hive Mind , the sole source of all the enemies' powers, or the lone connection to Another Dimension or sole anchor to our own. Just like a real keystone,

once it's destroyed, the rest falls apart Bee People are likely to be a Keystone Army if they have a Hive Queen , and as such trashing it is a good way to win the Bug War . Another common Keystone Army simply replaces the insects with Killer Robots or Grey Goo and the Hive Mind with a Master Computer or evil AI , and yet another popular variation has an Evil Sorcerer whose (often Undead , Mind Controlled or Demonic) minions will cease to be a problem due to No Ontological Inertia upon his death/defeat/distraction . An army of monsters may be defeated by killing the Monster Progenitor . Easily Thwarted Alien Invasions often employs such armies. We Cannot Go On Without You is a case of the player character of a video game being the keystone in their party's army Of course, no one ever considered that someone would aim at their army's one weakness . After all, it would be rather anticlimactic to destroy the Killer Robot 's central control but have a backup one come online in another location Despite the name, only occasionally is the vital component a Cosmic Keystone . A type of Instant-Win Condition . See also Decapitated Army , for when the keystone is the leader. Straight for the Commander exploits this trope. The armed forces equivalent of a Terminally Dependent Society . See also Fantastic Fragility . Compare Untouchable Until Tagged , when individual Nigh-Invulnerable fighters get mobbed after an unlucky hit Similar, but not to be confused with the Keystone Kops </. No relation to Pennsylvania 's National Guard

The "Kick Me" prank is iconic; it's the</ go-to prank for unoriginal bullies. It's useful enough that a bully can use it to show he's a bully; he wants a victim kicked, so slaps them on the back (or if he wants to be subtle, compliments them on something while giving a "congratulating" pat on the back) and leaves them with the sign. Everyone gets to be in on the joke and the poor victim can't figure out why everyone's being so mean to him. This usually also demonstrates the Butt-Monkey status of the victim It can also be used to show that the erstwhile victim is clever ; he knows that the bully is a bully and thus pulls the paper off his back, then gives a disgruntled remark about it It can be used to show that a bystander is heroic when he pulls the sign off another's back, or that he's a Knight in Sour Armor by cracking wise as he does so The prank comes in infinite variety. The prank requested need not be a kick; it could be a slap, a poke, or a tickle. It could be a message like, "Laugh, but don't tell me about it" or more common nowadays is an insulting/humiliating message. Sometimes it's not even a bad thing; it could be a request for a hug

When a character does something evil, cruel or very mean for no apparent gain, because the author wants to demonstrate that he's not a nice guy and shift audience sympathy away from him. Why this trope works could be expressed in the words of William Cowper: “I would not enter on my list of friends (though graced with polished manners and fine sense, yet wanting sensibility) the man who needlessly sets foot upon a worm.” In other words, a cruel act, no matter how trivial, establishes someone as a cruel person. Conversely, the creator may show a character being kind for no apparent gain , to demonstrate that the character is a nice person and someone the audience is meant to cheer for. Both devices are used to help the audience become emotionally invested in the story. What separates this trope from a character's other evil or cruel acts is

that this bit of evil is gratuitous. It doesn't get the character anything or even advance the plot. The sole reason for this story beat existing is to place one or more characters squarely on the wrong side of the Rule of Empathy . Dog-kickings can be verbal as well, when a line of dialogue is used to shock the audience with its sheer repugnance. If it's uttered in the presence of the hero in an action series, he'll echo the audience's thoughts and tell the villain " You're Insane! " Needless to say, this trope can be enacted without harming any dogs. Any act or statement that shows the character's meanness or outright evil will do, such as a boss demanding an employee come in to work during Christmas when the employee's kid is in the hospital , or a passer-by stealing from a blind beggar's coin dish, or The Dragon inflicting a vicious No-Holds-Barred Beatdown on the hero or one of his True Companions or Protectorate . A Politically Incorrect Villain can kick the dog by showing gratuitous racism, sexism, homophobia, or some combination of such non-PC traits. If the event happened off screen in the past, just have Bob fondly recall the incident and make it clear that he has no remorse whatsoever. Bingo, mission accomplished. If the evil act is</ directed toward an animal , however, a dog is usually the victim of choice, partly out of connotations of blind loyalty, partly from tradition. Arguably, however, substituting a cat can be even more</ shocking. After all, even bad guys like cats . So, the argument goes, if Bob goes out of his way to harm one, he must really</ be a bastard. This trope is common in horror-based Monster of the Week shows, often to set up the Asshole Victim for the Karmic Twist Ending . Anthologies are especially prone to this, as they have to set up their villains really quickly, since they only have one episode to tell their story. This can be played up by having the very same kick of cruelty be the cause of their downfall. At the very least, it is designed to let you know who is going to lose at the end. The opposite of Karma Houdini . In cartoons, someone who does this can be legally harassed by Bugs Bunny , Daffy Duck, or the Warner Brothers and their sister Dot . A troll like Screwy Squirrel , however, won't wait that long. One possible origin of the trope name comes from Westerns, where three bandits would ride into the town, one would shoot the Sheriff, one would shoot the Deputy, and one, just to prove he was also a bad guy, would Kick The Dog. If what is supposed to be a character's Kick The Dog moment is excessively horrible, cruel, or otherwise despicable enough to make an audience lose all sympathy for him, then he's crossed the Moral Event Horizon , if he's not on the other side of it already. If the Dog in question is someone the character cares about and discovers Being Evil Sucks , then they've Kicked the Morality Pet and might</ be in time to avoid a Face–Heel Turn . If the dog belonged to a minion, expect it to help cause a Mook–Face Turn because Even Mooks Have Loved Ones . On occasions, if karma works in the dog's favor, he'll manage to get a last laugh . On even rarer occasions, after being pushed around too many times, the dog may decide to plan against the Big Bad for his own ambitions , because Being Tortured Makes You Evil . When the dog-kicking is done in a way that (usually inadvertently) increases sympathy for the villain, it becomes Strawman Has a Point . If the character appears</ to be likable or sympathetic when introduced and the dog-kicking proves that he is actually evil, that is Bait the Dog . If the villain shoots for this trope but fails to actually do anything seriously evil, it's Poke the Poodle . Of course, the crux of this trope isn't just the cruel act; it's also about the innocence of the victim, i.e. they have done nothing to warrant their abuse. If the target is an Asshole Victim instead, the cruel act can become

a sympathetic one for the villan/anti-hero instead. If going after the Acceptable Target is a coincidence, it becomes Kick the Son of a Bitch ; if the victim was specifically targeted for their assholery, it becomes Pay Evil unto Evil . Kicking the Dog is also done for no practical reason apart from the meta-reason of demonstrating the dark side of the kicker. If the perpetrator does it because they care about their victim and want to help them somehow, they're being Cruel to Be Kind ; if their actions have a broader purpose à la doing what had to be done , they're trying to Shoot the Dog (that's what you do when Old Yeller has rabies, after all). This trope is often used to counter or prevent a character from being seen by the audience as a Designated Villain or Strawman Has a Point . These tropes tend to occur when poor writing or characterization causes a character to become more sympathetic to the viewers than intended. Since the writers can't just give these villains their just desserts if the audience likes them too much or prefers to take their side on an issue , an effective Kick the Dog moment can make them lose their sympathy and make them punishable again. This can backfire though. A sign that Evil Is Petty . Compare with Can't Get Away with Nuthin' , And Your Little Dog, Too! , Kick Them While They Are Down , The Dog Bites Back , Threw My Bike on the Roof , I Will Punish Your Friend for Your Failure . See " If You're So Evil, Eat This Kitten " for when bad guys do a Kick The Dog test to make sure undercover heroes are really evil, and Dog-Kicking Excuse for when the would-be dog-kicker has to psych themselves up to doing it. Contrast Pet the Dog (proving you're good) and Adopt the Dog (going from Neutral to Good). For bad people who literally</ kick dogs, see Bad People Abuse Animals . For the Real Life phenomenon called or "Kick the Dog", you'll be wanting The Chain of Harm . Enacting this trope, particularly in the presence of a heroic character, may result in the following: Berserk Button , Roaring Rampage of Revenge , Curb-Stomp Battle , The Dog Bites Back , the aforementioned Laser-Guided Karma etc. Do not attempt this trope unless you're feeling suicidal.

There's nothing quite so evil as when a character takes a clear step toward villainy and decides to Kick the Dog . Sometimes, though, the kick falls flat—not because it wasn't evil, mind you. The intent, malice and ill will are all there. It's just that at this moment, the dog isn't a sweet, innocent puppy. It happens to be a devious son of a bitch that's trying to sink its teeth into someone's leg. This is one effective way to set up a believable Start of Darkness while keeping the character more sympathetic than he would appear if his victim was an innocent, despite the fact that it was merely a coincidence that he wasn't. Important note:</ this trope is not to be confused with its close cousin Pay Evil unto Evil , in which an asshole also suffers from another's cruelty as payback for their cruelty. The difference lies in how much the perpetrator knew about the victim, and whether that was his motive for committing the act. Someone who does Pay Evil unto Evil will deliberately target a terrible person. An SOB Kicker either doesn't know about his victim's evil, or simply doesn't care. Basically he ends up doing the right thing for all the wrong reasons, which shows the underlying unfairness of the story since it implies that it was luck that determined who gets to suffer, especially if the perpetrator who is no better gets away with it. In a few cases it is simply a matter of perspective and what looks like a mere Kick the Dog may end up becoming this, once the viewer learns more about the

supposedly innocent victim. The line between the two may</ be blurred in cases where the victim was targeted due to their contemptible nature, but the perpetrator was also just looking to hurt or kill someone and needed a good excuse for doing it, so they chose an easy target. Compare: Suffice to say that the Pay Evil unto Evil can have a perpetrator of almost any morality while the Kick the Son of a Bitch is always a case of Evil vs. Evil . See also Kick the Dog ; Take That, Scrappy! ; Asshole Victim ; Even Evil Has Standards . Compare with Alas, Poor Scrappy , Poke the Poodle , and Designated Villain . Also compare—but do not confuse—with Pay Evil unto Evil . Scenes like this often qualify for Less Disturbing in Context .

They'll fight off hordes of monsters with techniques the likes of which master swordsmen would never equal. They'll wield weapons spoken of only in the oldest of legends. They'll Save the World and everyone in it from destruction five times over. And they'll do all of this while not even being old enough to drive. The Kid Hero is, as the name implies, a child, a teenager, a young adult. The exact age varies up and down the scale, from 8 to 17, 18 or 19, but they're never an adult by whatever the local standards are. The "base age" seems to be between 10 and 15, 16, 17, 18 or thereabouts, though their numeric age may not be revealed . Your standard Kid Hero has a strong streak of immaturity in them. They might well regard the adventure as a game, albeit one with slightly higher stakes. And if they aren't savvy to the world yet, expect them to be blown away by everything they see . Expect this to be scrubbed out of them in short order, usually when they finally meet an antagonist capable of matching their skill . Kid Heroes DO have some things going for them, though: their idealism and youth. Anyone trying to perform a Breaking Speech on a Kid Hero is in for a rude awakening when they get it thrown back in their face . Kid Heroes, quite simply, have a very clear view of right or wrong . Some may call it naïve , but it serves them well, as they are basically impossible to corrupt. They're also at that age where their self-image is intricately intertwined with their friends, so they often kick ass through The Power of Friendship . A Kid Hero will commonly, but not universally, have two primary adversaries; their most dangerous opponent is usually an adult villain who serves as the hero's Arch-Enemy , while their second most dangerous opponent will usually be a younger antagonist, closer to their own age or slightly older, who serves as the The Rival or Evil Counterpart of the hero. These two are rarely affiliated, but if they do work together, the adult will almost certainly be the Big Bad with the younger character as an extremely reluctant and rebellious Dragon . Most commonly seen in console and computer role-playing games, as it allows for character growth to feel natural and skips the question of why they aren't properly equipped for the job . Also appears in the vast majority of animated action-adventure, both Western and Eastern. If a television show is specifically focused on this character, then the description will most likely be along the lines of "Saving the world, and doing homework!" If particularly well executed, The Brigadier and others won't look like monsters or weaklings for sending a kid to do their heroics for them. This is Older Than Feudalism ; examples include the Biblical hero David, and several Greek and Hindu mythic heroes (e.g., Hercules, who killed two large snakes sent by Hera to kill him in his crib). See also Child Soldiers , the darker form of this trope. This can easily overlap with the Kid-Appeal Character - kids like to see fellow kids like them save the day, after all. Compare Kid Samurai

Contrast Enfant Terrible , Kids Are Cruel , and Teens Are Monsters Naturally a requirement for Kid Hero All Grown Up .

Most kidnappings occur when the target is either alone, or lured to their abductor(s). The victim may also be coerced into surrendering themselves to protect their friends, or in exchange for someone else This abduction occurs when the victim is taken in the presence of their friends, without the kidnapping being seen. The most common reason is that the victim is either standing near the back of the group or trailing far enough behind for the abduction to go unnoticed by their friends. Alternatively, the victim may be positioned off to the side, just outside their friends' field of vision Regardless of how it occurs, it allows the culprit to demonstrate their stealth, cunning, and</ brazenness by committing the act right under their enemies' noses, which they're all but certain to boast about later. And don't be surprised if the perpetrator turns out to be a Phantom Thief , an enemy spy, or worst of all... a ninja. It can also be done by heroic characters, usually to either steal the victim's clothes , or for interrogation A common occurrence in spy thrillers and espionage films, but just as likely to occur in other genres. Related to Phantom Thief and may overlap with Vertical Kidnapping Since the audience is often meant to be as surprised as the kidnap victim,

A very old, but still popular animal stereotype: a large predatory bird (usually an eagle or vulture) picks up a child or small animal from the ground and carries it off to its nest to be eaten. This is mostly an Urban Legend , since anything weighing more than four pounds is to be carried off by most of these birds, making this a case of Artistic License – Ornithology (especially if the bird in question is a vulture, since they don't generally go after live prey in the first place!). They prefer to Vertically Kidnap smaller animals. That said, there have been a handful of cases throughout history where babies or little children were merely , and some eagles are of killing prey too large to actually carry off. In general, it's also rare for raptors to carry off live prey, as the struggling victim would make flying difficult and potentially injure the raptor as it tries to free itself. Birds of prey typically kill their prey in the initial attack, and then either eat it on the ground or carry off the carcass. Depending on the situation, this may be justified in-universe by the abductees being small enough for a bird of prey to realistically carry off — this may prove a real danger for Lilliputians , Talking Animals and people hit by a Shrink Ray — and/or the bird of prey just being very, very large . Pterosaurs often take on this role in prehistoric settings, in spite of the fact that not only were most of them also too light to carry off even a child, they didn't even have grasping feet ! Subtrope of Feathered Fiend . Not to be confused with Raptor Attack . Contrast with Noble Bird of Prey . The Roc Birds have their own trope. If the bird is simply waiting for a person to die instead of actively carrying them off, that's Circling Vultures .

A programming block block dedicated to children's programming,
A mostly Saturdays (In the United States) or Sundays (In Japan).
A This kind of programming may contain animated shows, live-action
A Kid Com shows or Toku , or both hostless sibling of Saturday

A Morning Kids’ Show . Sometimes contains Saturday Morning A Cartoons

Kids and cats covet boxes while ignoring the (presumably valuable) contents inside. This happens to many parents when they purchase a super-special, ultra-rare, highly-expensive present for their kid, usually for a birthday or Christmas, only for the recipient to carelessly toss it aside while they focus their attention at the most cardboard box it came in A common gag in comedies with small children, and a case of Truth in Television for a lot of parents. See also Mundane Object Amazement , My New Gift Is Lame , Unwanted Gift Plot , and Worthless Yellow Rocks

Parents often set a penalty for their children whenever they do something morally wrong. This is very standard parent behavior. However, there is a time and a place where a child does this to their parents. In any sense, when the parent does something bad to a child, unfairly punishes them , or even just does something stupid, the child decides that the parent needs some parenting and punishes them in return, whether it be ignoring a punishment that said parents set for them, barking orders at them like a parent would do to them, or even straight-up disowning them. In any case, this is a trope where the roles are reversed and the parent is disciplined by the child. In some cases, this can be misused like say a Bratty Half-Pint punishes his or her parents for the littlest of things. Some parents take this due to being doormats Compare with Calling the Old Man Out , which is just someone calling out their parents, or any old person they know, for their flaws rather than penalizing them. Also compare with The Dog Bites Back to anyone in the media where an abused child gets back at their abusive parent. Contrast Honor Thy Parent . Depending how it plays out, can fall any number of places on the Sliding Scale of Parent-Shaming in Fiction

The Kid with the Remote Control , but with a twist: the controlled partner or servant is pragmatic at best , and a raving loon at worst . The loyalty of the servant varies, but the typical example is essentially a portable version of Sealed Evil in a Can — though a very loyal one can be even creepier. The servant openly admits his opinion that the best way to deal with obstacles and enemies is through complete annihilation . The kid (who is usually younger) is the moral compass who has to keep it under control (with a little help from the Restraining Bolt), and more importantly not fall victim to temptation Naturally this works both ways, where the monster learns empathy and grudgingly accepts his master might not be so bad, while the handler learns not all things are as black and white as they think This is one of two things that can result from trying to control Sealed Evil in a Can . For the other, more cynical outcome, see Evil Is Not a Toy . Compare Guardian Entity and Morality Chain , when the restraining is more emotional

Some days, it really sucks to be H. sapiens</ . There are many reasons why you might wish to kill all humans. Maybe they're all horrible cruel monsters and one of them killed your mommy . Maybe their status as the dominant intelligent species on the planet is

preventing your own kind from taking their place . Maybe some human colonists wronged your ancestors, and your people have generalized their rage and hate to cover the whole species. Maybe you were raised from infancy/the egg/the spawning pond to view humans as Always Chaotic Evil . Maybe out of spite or a peculiar sense of duty , you just can't stand the thought of humanity existing one second longer Heck, you could just be trying to save the rest of the planet's species from extinction . You could even just be a dick . But the verdict is certain, and you're not wavering: They've all gotta die. Every... last... one.... That is, assuming you even have</ a comprehensible reason. You could just be conveniently attracted to the creatures on screen most sympathetic to the audience, a Killer Robot out to destroy, or an Omnicidal Maniac Eldritch Abomination . Or, simply, mere apes have no hope of comprehending your motives. Sentient computers also seem to inevitably arrive at the conclusion that humans as a species must be killed . Sometimes, it's a product of them being too machine-like, and concluding that if one human is observed doing something that may harm the computer, then they all are a threat that can only be reconciled by killing them all off. Otherwise, it's a case of them being too human and flying into a blind rage triggered by jealousy, fear, or maybe even spite. Other times (such as in the film version of I, Robot</) the supercomputer may start to become homicidal in an attempt to bring order to the world and protect humanity from itself. Rarely does a supercomputer decide that it should coddle humans to get them to keep supplying it with electricity and spare parts. Only the Robot Buddy seems to favor this tactic. A recommendation of How to Invade an Alien Planet , it frequently ties in with Apocalypse How and The End of the World as We Know It . Not to be confused with the video game Destroy All Humans! </, although it obviously fits the definition, as killing all humans is the whole point of that game. See also: Feeling Oppressed by Their Existence : When a character wants to get rid of a particular person or group of people just for existing</ .

A Doppelgänger , shapeshifting (in a speculative fiction setting) or an identical twin for more mundane stories seeks to kill the original and take their place. If they're quick and quiet, nobody will suspect a thing until it's too late If the murderer has full-on Shapeshifting , this technique may well be employed iteratively to pierce increasing layers of security. Just kill and replace the hapless guard, then the sergeant, then his lieutenant superior.. Tends to be caused by the Cloning Blues . Fantasy cousin of Twinmaker . Although either can appear in either genre, and in practice the two tend to be used for wildly different tones. This is generally a horror trope, while Twinmaker , if played for horror at all, is usually of a more philosophical bent , trying to determine how the seemingly identical victim and copy are related, and by extension what it means to exist as an individual Compare Dead Person Impersonation , Mugged for Disguise and Dressing as the Enemy , where the victim at least gets to live, albeit knocked out and half-naked. Replicant Snatching involves a cyborg inhabiting a living host. If the victim is kept alive but restrained, see Capture and Replicate . Contrast Klingon Promotion , where one kills to assume the victim's job. Extreme versions of the Fake King plot tend toward this route as well. One of many reasons you might consider Killing Your Alternate Self . If it's revealed to have already happened, the victim may be an Impersonation-Exclusive Character Don't confuse with Replaced with Replica , which involves inanimate objects. Contrast Copied the Morals, Too , where the

replacement has at least some of the same personality or moral code that he original did. Clone by Conversion is an inversion, where the killer turns the victim into a copy of themself

Actors usually like the characters they play, otherwise they wouldn't choose to play them... unless it's for money . Some still don't like either their character or the work they're in (or both) enough to be tempted by cold, hard, cash, and go on the record saying that they wish their character would be killed off already so that they can quit with no chance of the bus coming back Not all the time do the actors express strong dislike for their characters or film, but may give other reasons for wanting to quit. The ultimate reason is usually the same, though, being "I don't want to do this anymore". Sometimes you will get situations when they drag the actor back by creating a Backup Twin . Some actors are also contractually obliged to film their work, with contracts maybe lasting either until their character is killed off, or even after the fact. Similarly, while such a request is often due to the actor disliking the character, occasionally the actor may make this request for artistic reasons, or simply because they want to go out with a bang Compare Franchise Zombie , where a creator (such as an author) is forced to continue producing a popular series of works. Can overlap with Bus Crash or Back for the Dead in cases where the character was handed a bus ticket while the producers tried to work things out with the actor For characters having to be killed off because the actor unexpectedly leaves, see McLeaned and The Character Died with Him . For an character asking to be killed in-universe, see Mercy Kill Arrangement

No matter what the medium or genre of a work of fiction is in, there are a few general rules that are usually in place. One of them is that if a character isn't a Red Shirt , it doesn't matter if they're in a situation of dire peril as long as they're speaking. Because as long as they're talking , nothing bad is going to happen to them. Oh sure, they can die after saying some notable Last Words or an important Final Speech , but dying in the middle of a sentence, especially if it's an ordinary, unimportant one? That's not going to happen, ri— GHAAAAACKKK! ...Let me step in for him. WRONG. There are any number of reasons to kill a character, whether major, minor, or mookish , in the middle of a sentence. Firstly, in an Anyone Can Die story, it's a great way to show that not only can anyone die, but they can die at any time</. (Which can make for great drama and suspense over the fates of your favorite characters). Secondly, it can be a great way for an Anti-Hero to show off his No-Nonsense Nemesis nature by killing an antagonist in the middle of some sort of threat, or as a more lethal version of Talk to the Fist . (Likewise, it can be a way to show a villain avert the classic Why Don't You Just Shoot Him? scenario). It can be a way of showing that a story is on the gritty and cynical end of the Sliding Scale of Idealism vs. Cynicism . Lastly, it could just be that the author doesn't care much for interminable Final Speeches , and chooses to subvert that trope. One thing is for sure: when this trope happens, you know that this is for real. If the story was a light, not too serious sort before, it's just gotten a whole lot darker and more serious after this. See also Deadline News when this happens on the other side of a TV screen (though not necessarily in the middle of a sentence). If a character is killed mid- word</, there's a good chance of it being a Curse Cut Short . The Almost Dead Guy

will invariably die mid-sentence, and there's a good chance of the sentence beginning " His Name Is... ". If this is a sci-fi story and the scientist figures out how to destroy the alien monster, expect him to die halfway through his explanation, just as he's about to say that it can only be destroyed by— Compare Collapsed Mid-Speech and Sedgwick Speech . Contrast Talking Is a Free Ac — </

Examp—

In some kinds of stories, Character Death doesn't carry much weight Maybe resurrection is commonplace or some sort of magical alternate universe has a spare copy to borrow . Maybe the format of the show makes any sort of death meaningless and temporary. Maybe for some reason people never die when they should . Sometimes, even in these stories, a character dies and they stay dead.</ No fake out, no magical return from the dead, no rebuild , no retcon and no copout. They're dead and they're staying that way. For a dead character to be considered Killed Off for Real it cannot be simply any death; it must be one that under normal circumstances for the setting and genre could have been reversed, undone or revealed to be some sort of trick. If it's a setting with All Deaths Final , this never comes into play — remember that permanent death is Like Reality, Unless Noted . Consequently, most realistic or mundane works do not provide examples of this trope. Note that (theoretically) there might still be other</ ways to revert a death, like declaring it All Just a Dream or retconning the victim as Actually a Doombot — see the First Law of Resurrection . May lead into Personal Effects Reveal , Meaningful Funeral , To Absent Friends , and Dead Guy Junior . See also Tonight, Someone Dies , Not-So-Small Role , Really Dead Montage . Contrast Disney Death , Back from the Dead , and Death Is Cheap . Compare Deader Than Dead . Naturally, as a Death Trope all spoilers will be unmarked ahead. You Have Been Warned . People die in real life , so No Real Life Examples, Please!

Killed Offscreen is the term used to describe the occurrence of a character dying outside of the audience's view. The character's corpse may be seen later, or confirmation may be given by another character, who witnessed the death/found the corpse. See also The Character Died with Him . Bus Crash is when this happens to a character who'd previously been written out of the series in a non-lethal manner . When a character dies out of the view of another character due to a brief distraction, that's Distracted from Death Compare Gory Discretion Shot and Sound-Only Death . As this kind of death tends to not be a very dignified exit for a character, seeing how it is in all regards a rather anti-climatic way to die and often (though not always) carries with it the implication that that said death was not important enough to be shown on-screen, there tends to be a lot of overlap with Dropped a Bridge on Him . Can also overlap with Sudden Sequel Death Syndrome when the death takes place between works. Contrast Never Found the Body . Compare and contrast Uncertain Doom . As a Death Trope , beware of spoilers!

So, our Intrepid Reporter has discovered the world behind the masquerade , and she refuses to uphold it, destroy it, join it or get Laser-Guided Amnesia , and in fact will go public</ with her discovery The heroes will try to reason, plead, and maybe even threaten</ her into not going public. She may not care that, once

exposed, those hidden by the masquerade will be persecuted and killed (which may be her goal if many of those protected are evil), or that The World Is Not Ready to know, or that it would generally just be a The heroes then get to work. Try to destroy the evidence? She made multiple off-site backups. Bribery? She either doesn't want money or figures the exposé will make her richer than what they offer. Blackmail ? She doesn't care about her reputation ruined as long as she ruins theirs. Mind-Control Device ? She wears mirrored glasses She has to die now In a Crapsack World her death is pretty much guaranteed; good characters/ players will probably agonize over this choice but ultimately do what they must and Shoot the Dog . If the author wants to let the heroes off the hook, then Villainous Rescue may come along and kill her for the heroes so they can avoid doing the deed, but not the guilt over having almost done it/strongly considered it. Often, this involves either faked suicide, suspicious accident or messy murder If the author is particular about not wanting blood on anyone's hands, the character may simply get Put on a Bus or suffer a fatal accident through their own fault . (Not that the readers won't know what is up.) The heroes may still feel guilty for covering up the details surrounding her death Expect her death to either go completely unnoticed... or call the attention of a Hunter of Monsters in a later episode/story May be an Elephant in the Living Room if this or Easy Amnesia are never brought up in a series with the masquerade , especially one managed by good guys. A leading cause of The Masquerade Will Kill Your Dating Life A notable aversion would be when the reporter experiences something so horrific at the hands of the villain (Such as Eldritch Abominations singing terribly as a FORM OF TORTURE, or a Doomsday Device capable of killing anywhere from 1-101% of the population.) that she comes to believe that the masquerade is necessary, and from then on helps the heroes to maintain it Contrast Safety in Muggles . Can potentially lead to Can't Stop the Signal

When Anyone Can Die becomes "Everyone </ Die". Many series are noteworthy for the extremely high body count among the main cast that they rack up in their last few episodes. In some cases, all</ of the heroes make a Heroic Sacrifice , or otherwise find themselves wearing the Red Shirt . Occasionally, the protagonists simply fail to prevent The End of the World as We Know It , resulting in a Downer Ending . (Possibly Dying Alone to cap it all.) Compare Everybody's Dead, Dave , where everybody except the main characters are dead. If just one person survives, it's Sole Survivor or Final Girl . Compare the Climactic Battle Resurrection . Also compare the Bolivian Army Ending , only we actually see the attack of the Bolivian Army. Also see Dwindling Party , where the cast is killed off one by one from the start. When a Sudden Downer Ending is planned from the start, it usually happens this way. Usually, however, either they accomplish something in death, such as killing the Big Bad and thus preventing The Bad Guy Wins , or it becomes clear that likeable as they may be, the world is better off without them, or their deaths are clearly an escape from a Fate Worse than Death . If none of these happens, and they prove completely ineffectual in both life and death, it's a Shoot the Shaggy Dog ending. In a Prequel , they may be Doomed by Canon : all characters who do not appear in the sequel and can not be disposed of otherwise will have to die. In Tabletop Games , this is called a Total Party Kill . Game Masters who are really</

annoyed with their group (or just sadistic) may invoke Rocks Fall, Everyone Dies . In Videogames, this trope can take the form of a Self-Imposed Challenge ; The "Genocide" Run, which is where you kill everyone and everything in your path without stopping for questions This, of course, only works where NPC's do not respawn. A short historical digression: the words "Caedite eos, novit enim Dominus qui sunt eius" (Latin : "Kill them all, for God knows which are his," popularly rendered as "Kill 'em all, and let God sort 'em out.") are to Abbot Arnold Amaury before the massacre of Béziers during the Albigensian Crusade — albeit not in any of the numerous contemporary accounts of it . This was only attributed to him twenty years later as something he "reportedly" said. The Trope Namer is Yoshiyuki Tomino , the Gundam </ creator who was given the nickname "Kill 'Em All Tomino" because of his reputation for producing anime where he kills off a large number of characters, often due to bouts of depression in his own life . The funny thing about this particular trope, however, is that knowing that everyone</ dies is somehow much less spoiler-ish than knowing that, say, only your favorite one does. The wonders of perception... as some guy once allegedly said, "The death of one man is a tragedy; the death of millions is a statistic ." See also Suicide Mission , Gotta Kill Em All , Final Solution , and Omnicidal Maniac (for whom "killing 'em all" is his goal). For Real Life examples, please see Would Be Rude to Say "Genocide" instead. Contrast Everybody Lives . Not to be confused with the 2012 martial-arts movie Kill 'Em All</ or Metallica 's debut album. </ This is a Spoilered Rotten trope, that means that on this list is a spoiler by default and most of them will be unmarked. This is your last warning , only proceed if you really believe you can handle this list.

Short for " is a piece of software so good that it's considered a must-own if you have the system it's released for, and is in fact a reason in and of itself to buy said system When you buy literature , you get a single self-contained experience: the book contains all there is to this particular adventure. When you buy a ticket for a film or a stage show , you get two hours of drama, and that's all there is to see (until the inevitable sequel, that is). But electronic hardware isn't like that. Music players, movie players, computers, video game consoles, tablet computers... They all require software</ to run, and each piece of software delivers a different experience: a photo-editing suite can't be used to balance your checkbook, for instance, or vice versa. As such, hardware and software are separate yet interlinked categories, and one is used to judge the other: the same piece of software might run much more efficiently on one computer than another, and you'd factor that in when deciding what hardware or</ software to buy. And, just to add to the confusion, a fair amount of software is exclusive to one piece of hardware</ , or family of hardware: for instance, Microsoft for the longest time resisted releasing its "Office" suite of productivity software (Word, Excel, PowerPoint, etc) for iPad, to keep their competing "Surface" tablets relevant And that's where we get to this trope. A "killer app" is a piece of software that validates the hardware. It provides such an excellent user experience that it justifies buying the hardware The term is primarily used within the world of video gaming, but originated outside it: it was used, especially during the '90s Internet boom, to describe the mythical invention that everyone in America needed and which would make its developers — and their investors — rich beyond their wildest

dreams The term can also be used on a more serious context, used to refer to a very useful application which immediately becomes a "must-have", which is, in fact, the original meaning of the term. It was first applied in 1979, when the first spreadsheet application, VisiCalc, was released for Apple][, and became a must-have virtually immediately, spawning hordes of clones and imitations on numerous platforms And, indeed, when the term is applied in this manner, only a very few applications apply, including word processors, spreadsheets, database management programs, email clients, and web browsers. The only thing everyone agrees on is that any new hardware attempting to launch itself should have a Killer App at hand, especially if the hardware itself is a video game console—that business is more software-driven than any other While most products that attain killer app status are extremely successful and popular, it should be noted here that "creating a true killer app" is akin to "writing the Great American Novel": everybody wants</ to, but nobody has yet created (or is likely to create) the definitive killer app Note that a killer app is more than just a good game. A game can be good, great, critically acclaimed, even an all-time classic... and still not be this (conversely, not all killer apps are great by modern standards; some of them seem quite dated today). A killer app is insanely popular in its own time, enough so as to single-handedly drive sales for its system. The examples that follow, then, are not just the games that tropers loved, but rather the games that everyone</ loved; the ones that made their respective systems Arguing over which killer app provides the most bang for its buck is a large part of the Console Wars . If an anticipated game shares the same genre as an existing Killer App, it may be called a [Insert Game Here] Killer, however this often puts unrealistic expectations on the upcoming title Compare Star-Making Role (equivalent for actors) and Breakthrough Hit (equivalent for creators) Not to be confused with the GameBoy Advance game TRON 2.0 : Killer App </, nor the TRON 2.0 </ Xbox port of the same name

It's small. It's fluffy. It's adorable </ . But if you get on its bad side, your death will be swift and painful. Beware the cute ones. Related to but distinct from Fluffy the Terrible , as well as being sort of a subtrope to Our Monsters Are Weird , the Killer Rabbit is any monster that's far more dangerous than it looks . Maybe it's strong for its size , poisonous on a massive level , has flesh-rending pointy bits that aren't readily apparent, or can just turn into something far more dangerous . Particularly devastating ones can even be Instakill Mooks . Either way, it can make a person wary of picking on small, defenseless animals , much like the Old Master can make a person more eager to respect their elders. In many cases, the creature isn't even all that harmful unless you actually mess with it, whether intentionally or not. This trope takes its name from the "Dread Killer Rabbit of Caerbannog" in Monty Python and the Holy Grail </ , which seems to be a completely ordinary bunny rabbit, with the notably unusual ability to leap through the air at high speed and tear out people's throats. This creature is also known as a " Vorpal Bunny ", a name which comes from the monster of that name in the original Wizardry </ game from 1981, possibly inspired by the Monty Python movie and is named after "The Vorpal Blade", a fictional sword used to decapitate the title creature in the Lewis Carroll poem " Jabberwocky ". The name also spread

(via Dungeons & Dragons </) to other games such as Quest for Glory </ and Ultima Online </ . There's enough truth behind this that one of the first things many children are taught is "don't try to play with any animal until you know it's friendly." (Another lesson, learned later in life by many, sometimes too</ late, is: "Animals can become un</friendly pretty damn fast</ .") Specific types of Killer Rabbits include Evil Girl Scouts and Ridiculously Cute Critters that are secretly evil . Civilizations</ that are more dangerous than they look are Superweapon Surprises . Killer Rabbits are the most notable subversion of What Measure Is a Non-Cute? , which is pervasive enough for everyone to assume that cute animals are friendly by default. This trope is pervasive enough that if any of the Standard Fantasy Races in games seems to be cute and harmless, they would by definition have to be occasional Killer Rabbits to make them viable to play. For cases where the Killer Rabbit is a literal</ rabbit, see Hair-Raising Hare . Psycho Poodle is another subtrope of this. If it has a scary name, but not a scary demeanor, it's Deathbringer the Adorable . If it's scary-looking but innocent, it might be a Cute Monster . Compare: Happy Fun Ball , Beware the Nice Ones , Pint-Sized Powerhouse , The Catfish , Crouching Moron, Hidden Badass , Cute, but Cacophonic , Badass Adorable , Super-Fun Happy Thing of Doom , and The Not-So-Harmless Punishment . If the video game character becomes a Killer Rabbit only when you hamper him, then he's Savage Setpiece . Contrast Paper Tiger , which looks menacing but is virtually harmless. Not to be confused with Kill da Wabbit .

</

A robot or other physically autonomous machine guided by a level of intelligence and a homicidal urge to Kill All Humans . Prone to ending sentences with exclamation points as well as Spock Speak . Killer Robots are so common because A.I. Is a Crapshoot . Humanoid killer robots abound, such as the original R.U.R. </, or those in Doctor Who </'s subtly named serial The Robots of Death </. However, killing machines come in all shapes and sizes; from robotic dreadnoughts in space to airborne robo-fighters, through small drones and down to microscopic or even nanoscopic killers . Although the traditional versions of this trope were robots built in a Mad Scientist Laboratory who Turned Against Their Masters , today a more common plot involves the villain finding and turning the switch on a kid's Robot Buddy from "good" to "evil", forcing the cast to either destroy it or find a way to turn it back. Especially scary because this was a good friend who has become completely heartless and bent on death. Mechanical Lifeforms are capable of veering into this, but generally tend to skimp on the Spock Speak in favor of something a bit more colorful. : See "Second Law" My Ass! for a milder form of this behavior.

When Prometheus handed Homo sapiens</ the gift of fire, he did not just give humanity the light of science, reason, progress, invention, technology, and ergo the power to rival God , but also the means to dispatch just about any monster imaginable. Considering how Greek Mythology is a Fantasy Kitchen Sink full of all kinds of abominations, that was a good thing.</ The symbolism behind this has to do with fire's associations with purification and light , and partly because it represents humanity's dominion over the natural world. More literally, a burning stick was humankind's first effective defence against nocturnal predators,

with an added bonus of extermination of parasites in food. The fact that burn pain is one of the strongest kinds of pain a human being can experience probably doesn't hurt either Also, in a pinch, it can still burn things, or at least scare them off. Arrows on Fire , Flaming Swords , Molotov Cocktails , flamethrowers </, or good old Torches and Pitchforks can work wonders when dealing with everything from Frankenstein's Monster to a Monster House This is prevalent not just in myth and fiction or games based on it, but also in works that are completely new and unrelated. For example, the Hydra and Trolls demonstrate one of the most frequent, and logical, applications for anti-monster fire: It prevents regeneration . In the case of The Undead , usually they're too dumb and slow to put it out (zombies), it reminds them of the sun (vampires), or they're already walking kindling (mummies). Other times it's used to make sure whatever just got killed stays </ that way . Aliens, of course, can be Immune to Bullets , but will burn up nicely in a fire. Witches and heretics for a long time were considered to be in league with evil as well, and so it was a common myth that they were dealt with in the same manner . And, needless to say, it's a very good strategy for When Trees Attack You know what the best part of Kill It with Fire is? It works on regular people wearing masks too. Kind of like decapitation (which also works on most things) and a Wooden Stake through the heart If something's too big or tough for a regular fire, you can always use plasma or Hurl It into the Sun . This has also been subject to Memetic Mutation , as an alternative name for Brain Bleach A character who's a little too enthusiastic about using this can become a Pyromaniac . A character may try in vain to use this trope, but be faced with a Hard-to-Light Fire A Super-Trope to Matchstick Weapon . See also Incendiary Exponent , Man on Fire , Burn Baby Burn , Fire-Breathing Weapon , Homemade Flamethrower , Burn the Witch! , Fanatical Fire , and Hellfire (for when mundane fire doesn't do the job). Compare Stuff Blowing Up and Playing with Fire — for when someone has fire as a superpower, and Murder by Cremation — when an ordinary person is lit on fire. When this just makes things worse, see Infernal Retaliation . May also overlap with A Molten Date with Death if lava is involved. The less-used opposite is either Kill It with Water or Kill It with Ice , or even Heal It with Fire . Contrast Immune to Fire Due to the above-mentioned Memetic Mutation , the name of this trope has become associated with anything that someone finds abhorrent and wishes to not have witnessed. Please redirect all potholes using this trope in said context to Brain Bleach or a similarly appropriate trope

So you're fighting an unstoppable behemoth , and everything you throw at it just bounces off its skin. You and your companions run, but it's slowly tearing the place apart around you... ...until, in desperation, you throw your bottled at it, causing it to turn to dust instantly. What just happened? Did something else disintegrate it ? Was it really a pushover this whole time and you just needed to take a refresher course somewhere besides the Imperial Stormtrooper Marksmanship Academy ? No (well, not only)! You've just faced down an enemy with a rather unfortunate Kryptonite Factor , one covering 70% of the planet, and the solution was always just to Kill It with Water. Unlike Kill It with Fire , this strategy doesn't tend to be viable if you're fighting an opponent who doesn't specifically have a Kryptonite Factor to water... unless you use an unbelievable amount of it </, then it's rather effective. Or you could try making

it colder . You can even just increase the water pressure ! Or, if your enemy is a demon or vampire, then you will most likely need to use holy </ water instead of regular water. Woe betide someone with this weakness who goes up against a character fond of Making a Splash . Frequently a Weaksauce Weakness , may be counteracted with a Kryptonite-Proof Suit — usually made out of lead. Could be prevented if waterproofing existed . Can lead to an understandable case of Kryptonite Is Everywhere , because, well... it's water</ . In video games, this often appears as a manifestation of Elemental Rock–Paper–Scissors . Consequently, beings with an affinity for fire are often unfortunately prone to this trope. For when water is merely a deterrent, see Cannot Cross Running Water . Contrast Heal It with Water , where water is presented as a healing force. See also Holy Water , which will often act in this capacity against evil entities.

This trope covers any situation in which open season is declared on a individual or group of individuals, be it heroic or villainous Often the reasons behind this decision are as significant a plot point as the proclamation itself. Insisting on this policy can make people question a villain with otherwise good publicity . A clear villain doing this can also unwittingly emphasize the size of threat the person or group being targeted represents. If a "Wanted!" Poster is involved, it may read as only "dead" (or in a more comedic context "preferably dead") instead of "dead or alive", and can also serve as an example of Price on Their Head . If those being targeted are viewed as Always Chaotic Evil , whether that turns out to truly be the case may depend on the alignment of those giving or carrying out the order. In a Crapsack World , this can also highlight the level of paranoia a person or people are held under. Seeing this done by someone on the Good Guys' side could be them deciding I Did What I Had to Do or an acknowledgement that whatever they're facing is so</ dangerous or has otherwise escalated such that ideals like Thou Shalt Not Kill are unattainable in that particular case Compare Leave No Survivors and Shoot Everything That Moves , which is this trope on a broader, less-discriminating scale

When it absolutely, positively, has to be destroyed on time, nothing beats your own remote-controlled, satellite-mounted laser cannon. A variation of the Wave-Motion Gun , Kill Sats have the added advantage that you don't need to be anywhere near either the weapon or the target. Instead, you can fire it from the safety of your headquarters: your satellite will move into position and unleash a shiny descending Pillar of Light (or, less often, a good ol') on your unsuspecting target. Power/accuracy on Kill Sats vary, ranging from "lone vehicle" to "entire building" to (rarely) "town or small city." Planet busters are another category entirely, as firing them remotely from anywhere</ on the surface is inadvisable. Since it's considered poor form to snipe your opponent from such a risk-free distance, Kill Sats are generally the realm of villains. So-called good guys who resort to these will, at best, fail miserably . If Everything Is Online in their world (and you know it is), there is always the risk of control falling into the wrong hands. In video games, Kill Sats are frequently used by the good guys (ie the player) but usually requiring some sort of targeting system on the ground in the vicinity of the target (distance varies from a few meters to a few miles). If the good guys do</ have one, its precision and

accuracy are emphasized, often by providing the bad guys with a less precise weapon of equivalent power (such as a nuclear missile). Of course, in the hands of either side, it would end the story in a hurry if these could be used repeatedly — none of the opposing side could poke their nose into the open without risking vaporization. Therefore: Alternatively, it's not active at all yet, in which case the story centers around making sure it never gets off its first shot. In these cases it generally leans toward the powerful end of the scale . Kill Sats sometimes display the orbital properties of their more benign counterparts, the Spy Satellites , able to move themselves over any target in record time and then park themselves there to get off as many shots as they please. More often, thankfully, the writers actually pay attention to how satellites work and incorporate that into the plot ("we've got two hours to destroy the control center before the satellite is in position over our headquarters!") Any villain seeking to get their private space program off the ground (pun most definitely intended) is probably doing so to put one of these bad boys in orbit ( ). Spy villains love these things. The Ancient Conspiracy may already have a full network of Death Ray Sats secretly in orbit, but they're careful about using it regularly, lest someone catch on. The Standard Sci-Fi Fleet can and will take this Up to Eleven , with the heavier ships turning their guns on a helpless planet below. An early test fire of these may create the Doomed Hometown . The trope name is a parody of "TelSat", the TV satellite system. A popular way to rain Death from Above , and a subtrope of Orbital Bombardment . Compare Wave-Motion Gun , BFG , Big, Bulky Bomb , Doomsday Device , and There Is No Kill Like Overkill . Very often considered a Superweapon by the forces on the ground with no way of knowing when and where it will strike. This item is available in the Trope Co. Catalog. </

Someone is about to kill a person, and someone else leaps in and does it instead, usually to get the credit and/or reward. This is a common way to establish a rivalry in stories about killers. Stealing a kill is a sure way to piss these characters off. Heck, Body Count Competitions often encourage this. Happens with players in Tabletop Games (especially with The Munchkin) or online games (especially with Griefers). There is a significant difference between it happening in an FPS and an MMORPG though. In an FPS things tend to be much more fast paced and the consequences of losing a kill aren't much more than the loss of one point (and maybe a few wasted bullets) so complaining about it too much is considered quite childish. In an MMORPG things are slower paced so it's always clearer who's fighting what (so a Kill Steal is more likely to be deliberate) and a single kill usually involves more effort and grants a lot more resources (in the form of loot and XP), as a result kill stealing is a lot more of an issue. This is best summed up in the solutions to the problem: In general, kill stealing in video games will refer to a combat oriented online game, and the actual act is killing an almost-dead enemy whose health has been whittled down by another player. It is often seen as a dishonorable act by other players, leading to cries of " Stop Helping Me" . However, there are a few cases where it is helpful, such as an MMORPG where a higher level player "trains" a lower level ally by allowing them to do this. Doesn't always have to involving killing. Just beating up a intended target someone else was gunning for is pretty much the same result as well. Compare The Only One Allowed to Defeat You , Ninja Looting . Contrast Helping Would Be Kill Stealing . See also Vengeance Denied in case of the

avenger reacting to this. Can be a Negated Moment of Awesome if there was a lot of build up regarding the one who was robbed. In-Universe Examples Only :

This trope is common in media where there is someone who feels the need to keep track of multiple kills and show their teammates/the world how skilled they are Pilots in war films usually slap a custom decal on the nose of their plane to denote how many enemies they've taken down. It's not just a boost to the pilot's ego, but a morale boost to the entire squad and a demoralizer to the enemies Serial killers also keep a kill tally as a Creepy Souvenir . Some even do the tally on their own bodies making themselves a Human Notepad In Lighter and Softer works, the tally may mark down victories at a sport or challenge. They will also use paint, stencils, markers, or rubber stamps to mark their tally rather than something visceral If you have two or more people doing this to compete at who's the best at taking down enemies, that's Body-Count Competition , which may or may not come with a physical kill tally. If the medium itself is keeping track of dead bodies rather than the characters themselves, that's separate from this trope This trope occurs commonly in many World War II movies, since the practice was common for the actual soldiers in battle Compare Enemies List and Gotta Kill Em All . Also compare Tally Marks on the Prison Wall , for a non-lethal tally count Super-Trope to Kill Streak

An event where a villain darkens a room (seemingly) at will, either by sucking the power from the lights, or just plainly and inexplicably making them go out, making things scarier. It's usually a device to raise suspense quickly, signaling the arrival or beginning of the danger, usually in the form of lights flickering off or the power getting cut. The lights may demonstrate Slow Electricity when they go out This could be accomplished any number of ways: shooting out the bulbs, cutting the power to a building, casting a magical shroud of darkness over the area, dousing the hero's torch... Whatever device is used, the end result is the same: the targets have been plunged into darkness leaving them at a distinct disadvantage, and quite possibly terrified. Sometimes a character would wonder if someone forgot to pay the electric bill if this happens. A Dramatic Wind that blows out candles and torches can be substituted in low-tech settings Also, it's notable that this isn't just used by villains. It's a popular trick for anyone who uses unconventional tactics , including Terror Heroes and Guile Heroes Note that this is not about weakness or aversion to light, it's about turning off the lights . The monster might make the lights go out because they hurt it, but being hurt by light is not this in and of itself Sometimes overlaps with Nothing Is Scarier when someone (or something) kills the lights as a psychological warfare tactic, leaving the hero(s) staring into the dark for a prolonged stretch wondering where the attack will come from, and what exactly it is that they're fighting If playing a Stealth-Based Game , it's a good bet there are game mechanics devoted to doing just that. Might be caused by Casting a Shadow powers, it often leads to Darkness Equals Death , and is followed by Light-Flicker Teleportation , where a character

is replaced by the criminal after a light-off. Compare Step into the Blinding Fight , where this darkness is used to blind the darkness's victim's ability to fight in order to gain an advantage, and Monster Closet , which has the criminal appearing out of a seemingly normal wall (which wasn't a wall in first place). Contrast Blinded by the Light , where it's the light that blinds an opponent. See also Lights Out Somebody Dies , in which the lights are shut off in some indoor setting and someone is shown to have been murdered when they come back on

Cell phones are wonderful conveniences that make it easier for human beings to stay connected to each other. That said, it's inevitable that every so often they will ring at the most inconvenient times. Like when you're driving, or about to have sex, or in a board meeting. Or, occasionally, when you're in a dangerous, stressful situation like a gunfight or a car chase Rather than becoming a break in the action, the hero will inevitably answer the phone, if only to tell the person on the end that "now's not a real good time to chat." Other times, they hold full-fledged conversations , all the while blazing away with their weapons . Often the phone call will be a minor or mundane thing that contrasts with the deadly action, especially if there's a Secret Identity to maintain A subtrope of Casual Danger Dialog . Contrast Mid-Battle Tea Break , where the opponents are perfectly happy to let the distracted party take a break from the fight. Compare Excuse Me While I Multi Task where the one taking the call uses it to showcase how much better they are at close combat than their opponent. Compare Not Now, Kiddo . Compare Compromising Call , where someone calls while the recipient is trying to be stealthy (which may lead to this trope for comedic effect, but usually doesn't). Will likely result in TV Telephone Etiquette , since if the person being called doesn't have time for the call, then probably don't have time to say "goodbye" either

The Simpsons </

There are many characters who are dumb or airheaded. However, for some of these, what they lack in intelligence, they make it up with acts of compassion , politeness , and altruism . Hence the name — the Kindhearted Simpleton . The Kindhearted Simpleton is not the sharpest tool in the shed but is always well-meaning and compassionate towards other characters. They probably will not be quite as dumb as a standard Ditz or not as airheaded as a Cloudcuckoolander , since that is not the focus of their character. If the Brainless Beauty isn't being an Alpha Bitch , then she (or he) is this instead Due to their well-meaning nature but below-average intelligence, these characters have the potential to be taken advantage of and easily manipulated by smarter (and occasionally evil) characters because of their naïvete & gullibility , just enough to also serve as a Sycophantic Servant , an innocently Bumbling Sidekick and/or even a Minion with an F in Evil in a Vile Villain, Laughable Lackey pairing in some</ instances. But aside from that, when they are not paired with villainous characters, they're far likely to be Stupid Good or just good-natured characters in general. The Kindhearted Simpleton should beware of Manipulative Bastards and Guile Heroes . (They should also know it's a snake when they bring it in.) These characters rarely, if ever, get angry, but when they do, it's

usually because they realize how much someone has taken advantage of their trusting nature one time too many or has dared to hurt the ones they love. This may occasionally result in the character taking a level in badass , or revealing a hidden badass side , but this type of character is very effective at delivering An Aesop without having to resort to violence, whether it's through a Shut Up, Hannibal! speech, giving the villain his "The Reason You Suck" Speech , or asking a friend " What the Hell, Hero? ", though they are also just as likely to inform hero and villain that You Are Better Than You Think You Are! . But then, the tendency to be large also gives cause to be aware of the nice ones Contrast Insufferable Genius , Mad Scientist , and Insufferable Imbecile . These kinds of characters can be a Gentle Giant and frequently overlaps with the Half-Witted Hillbilly

The story is set in some high-tech and/or futuristic society . There are massive computer networks , sentient robots, and ships that can zip across space with the same amount of effort it takes you to go to the store down the street. Despite all this technology, however, combat isn't all that different. Battle armor may have some gizmos on it, the guns may have higher muzzle velocities and an ammo count greater than the population of several rural communities, war vehicles may be able to do some fancy new tricks, but combat is the same at heart, bullets and shells still rule the battlefield If there are energy weapons in the universe, they either are experimental and wracked with issues like overheating and unwanted by-products, or they're horribly disadvantaged with few available shots before a recharge or a new power pack is required. They will often also be the first type of weapon to go wrong; the more complex parts a weapon has the more likely it is to break The reason for favouring projectiles in fiction is Rule of Cool — while subjecting stuff to melting or explosive evaporation is cool, broken pieces of the same stuff flying away with a boom may be even better than the mediocre zap of a laser . This does of course have its roots in the fact that Reality Is Unrealistic : serious laser weaponry actually uses short duration pulses with incredibly high energies that would simply explode an object into plasma the same as if it were hit by a high-velocity projectile... but audiences still expect to see Laser Cutters , so we're stuck with them For a detailed look into why one may or may not use projectiles over energy weapons, visit our Analysis page There are also real world scientific reasons for using projectiles instead of energy weapons, especially against shielded ships. In defending against lasers, the in-universe shields may be extremely effective at re-radiating heat back into space. To stop a projectile, the shield has to decelerate it, and any force applied to the projectile is in turn applied to the shield generator. does a good job explaining how the strength of even the strongest shield can come down to how well it's attached to the superstructure of the ship Sometimes kinetic weapons themselves don't appear to have advanced, either. Future weapons won't necessarily ''look'' more "advanced" or really be that different from modern ones: whether rounds are fired from a modern rifle or a space railgun , it still functions the same. Precise guides held by a solid external structure are still required to accelerate the projectile downrange to the target Compare Rock Beats Laser , Boring, but Practical , Modern Stasis , Break Out the Museum Piece and Video Game Flamethrowers Suck .

Usually goes hand in hand with Our Weapons Will Be Boxy in the Future . Contrast We Will Use Lasers in the Future , where energy weapons are more prevalent than kinetic weapons. For cases where certain specific</ kinetic weapons are preferred, see Revolvers Are Just Better or Shotguns Are Just Better . And if you're looking for the trope taken to its logical extreme, there's Ramming Always Works and the Colony Drop

The American equivalent of the BBC Quarry , a distinctive set of striated sandstone slabs, dozens to hundreds of feet tall, sharply-angled and pointed at their tops. Familiar from its use as an exterior location in any number of Science Fiction programs and Westerns (including the films Blazing Saddles </ and The Magnificent Seven Ride Again</, as well as the "Sleestak Diner" scene in Jay and Silent Bob Strike Back </), and no few automobile commercials. It is also the location the Brandeis-Bardin Institute was composited into for the first five seasons of Power Rangers </ as the Command Center/Power Chamber building. The entire town of Bedrock in The Flintstones </ was constructed here. Probably best known from its several appearances on Star Trek </ over the years (especially the Original Series episode "Arena"), whence comes the popular nickname for one of the formations (and by extension the entire area). The movie Bill and Ted's Bogus Journey </ specifically points this trope out by having the boys watching said episode, before their robotic duplicates drag them out to the rock to kill them In reality these are known as the in Agua Dulce, CA (conveniently located about 30 miles north of Hollywood—in other words, the studio is not required to pay cast and crew extra for travel, accomodations, and on-location shooting), and were once a hideout of Tiburcio Vásquez, a notorious bandito who was one of the inspirations for the character of Zorro . the Wikipedia entry, with a detailed history of "Kirk's Rock" in TV and film Compare Down L.A. Drain , another Los Angeles setting used many many times in film and television. See Hey, It's That Place! for a general listing of very commonly used locales

A speech made by the hero to the villain just before the climactic fight in which he points out exactly why what the villain is doing is wrong, and urges him to forswear his ways This rarely works but he had to try: that's what makes him the hero. If it does</ work, he's Talking the Monster to Death , and might even get the villain to do a Heel–Face Turn . It can also be a case of Swiper, No Swiping! if the villain stands down with no drama. May be a piercing retort to a Breaking Speech Expect lots of Scenery-Chewing The villain will probably respond with a pithy one-liner . This makes it okay for the hero to kill him. The villain might also turn the tables with a Breaking Speech which may cause the hero to turn the tables again</ by saying Shut Up, Hannibal! or his own Breaking Speech until one of them is broken or they come to blows See also You Monster! , You're Insane! and "The Reason You Suck" Speech . A Patrick Stewart Speech rebuts the evilness by praising human goodness. It may also be a part of a "No More Holding Back" Speech Different from the Last-Second Chance in that here the hero is trying to shame or reason with the villain to make him turn back, whereas in that trope the hero is offering the villain help, healing, or redemption. When the villain rejects this trope, you have a Shut Up, Kirk! . If the villain is already dead or

defeated by then, it's an After-Action Villain Analysis In Japanese works, this is usually a sign of Japanese Spirit , as competing ideologies, with the "better" one winning in the end , is part of the story structure

Bob may have a Precocious Crush on older Alice. Or Alice may have a Celeb Crush on the famous Trope Troperson Either way, if the object of desire is particularly pleased, affectionate, or otherwise inclined, sometimes they'll give their admirer a kiss — or simply touch them. And the admirer will so treasure the moment and the memory that they want to keep the spot of the contact as it was at the moment forever — and that includes never washing it</ so as to avoid washing away the kiss (lipstick, etc). The Stock Phrase appears frequently enough to actually be its own trope. And when the "never washing it" declaration is taken to extremes, it almost always results in a Gross-Up Close-Up Sometimes the person is just saying it in dreamy-eyed appreciation. In other cases, they mean it literally</ , and will be seen days later, squeaky clean except for the kissed spot. Sometimes some wiseass will remind them that they seldom wash that part of their body anyhow, so it won't make much difference Of course, this trope is not strictly limited to a spot where someone has been kissed. It can be a touch, or a handshake, or just a spot where the person stood. The kiss is just the most well-known iteration It's also important to note that the recipient of the kiss usually thinks of the one kissing them as being a little out of their league, or else they hold them in such high esteem that a kiss is more like a divine bestowal than an actual kiss between people on the same romantic level

Romantic/sexual relationships between cousins (meaning, generally, first</ cousins — as in, the child of an aunt or uncle) are a phenomenon that has been more accepted in some cultures and eras than others. A great many cultures today accept it, including a majority of the industrialized world Marrying one's extended relatives (which is technically known as clan endogamy</) , since hominids usually lived in small nomadic bands with few available sexual partners. At the other end of the spectrum, much of the modern U.S.A. considers cousin marriage completely taboo , so Hilarity Ensues at the very mention of it. People from backwoods areas (especially the Appalachian Mountains) are often the preferred butt of many bad jokes as well as occasional bits of Self-Deprecation for the alleged prevalence of Kissing Cousins in their culture Despite the taboo, cousin marriages are legal in about half the states in the U.S.A., though not as much in the backwoods areas and more in the modern industrialized states: the opposite of what one might expect from hearing all those jokes. Legal or not, these marriages are still not very common due to the lingering cultural taboo. All U.S. states permit marriages between second and third cousins, but even these are looked at funny. In the UK, first cousin marriage is uncommon and would be regarded as rather odd, but it doesn't carry as much stigma as in the U.S., while second cousin marriages and beyond would be seen as unremarkable. In several other western countries, especially the ones that are majority Catholic, first cousins marriages were common and usually not considered a taboo; although it's starting to become more looked-down-upon in the modern age due to globalization and the importation of U.S. culture, such marriages

are still quite common in rural areas. First cousin marriage is also considered acceptable in Japan and the Middle East Definitions of exactly what degree of cousin was considered incest actually changed over the centuries. The Romans and early medieval Europe considered first and second cousin marriage to be incest, but third cousin marriage was permissible. After the Germanic migrations Europe had to juggle a couple of different definitions of incest, until 1215 when a church council officially redefined that anything up to third cousin marriage would be considered incest, but not fourth degree or more. Nonetheless the definition continued to fluctuate over time, until by the 20th century even first cousin marriage wasn't considered incest in much of Europe Expect some strong</ Values Dissonance between the media from the US and other countries, and between certain modern works and works from the nineteenth century and earlier, when the taboo was sometimes non-existent or even inverted. Scholars still vigorously debate the question of why some cultures forbid cousin marriage while others permit or encourage it, but that's beyond the scope of this wiki According to both Oxford and Merriam-Webster's Dictionaries, the original definition of kissing cousins</ was simply a relative known well enough to be given a kiss in greeting, although this meaning has long since fallen by the wayside Check out Incest Is Relative for more closely related tropes This trope is for cases of actual relationships</ between cousins. Cousincestuous subtext goes in Incest Subtext

Alice and Bob are in the same class in their prep school. Alice has recently moved chairs to be closer to Bob—and Carol has figured it out "Yes you do!", Carol replies, then goes into the following popular ditty Rather common with the Toy Ship , but can occur elsewhere. Basically, it's Carol teasing Alice and Bob for their crush or relationship There are many variations of the song, with several extra verses. If it occurs with adults, the dialogue is usually more "explicit". Compare Mocking Sing-Song

So many types of kisses, so little time. They can make shippers Squee! or burst into tears . Every show plays with in different ways. When there is an interruption, it becomes a Moment Killer . Here are some of the most common Also see Love Tropes Not to be confused with the rock band

Ah, love, the chance for two minds to seek each other out and bask in one another's presence... unless one of them doesn't really have</ a mind. Variations include: The actual human being in the equation may or may not be aware of the situation, but it makes things that much ickier if they are — especially if the simulation in question is, arguably, not truly sentient in any meaningful sense (for an extreme example, remember that Pygmalion fell in love with a statue before</ Aphrodite brought it to life). If the inhuman entity is based on a real person, expect them to discover what's been going on at some point. May overlap with Robosexuals Are Creeps . Compare Replacement Goldfish , Robosexual , Robo Ship , Robotic Spouse . Contrast Tragic Intangibility .

A Chase Scene Trope. Our hero flees the pursuing bad guys through a back door which leads to a kitchen, usually a commercial kitchen, like the kind you see in restaurants, though writers have used an

ordinary home kitchen or the kitchen set of a cooking show. Danger is escalated as not only do you have to escape the gaining henchmen, but dodge prep cooks, flaming stoves, and the occasional angry chef waving a meat cleaver or big knife yelling "Hey! You can't be back here!" Bottom line, if you can't stand the heat, escape through the kitchen. Usually ends with them chasing each other through the backdoor into some shady alley, where the fight goes on. But whatever you do, just don't stay in there. Subtrope of Excuse Me, Coming Through! and sister trope of Crashing Through the Harem . See also Improvised Weapon . Not to be confused with Cooking Duel . This trope may also appear after a Diner Brawl or a Wok Fu scene. Can involve Frying Pan of Doom .

Used in an ad for AT&T cell phones, as the hero runs through the kitchen in order to head them off at the pass (in this case, the back door of the restaurant/kitchen).

An early episode of Darker Than Black </ has Hei and Chiaki escaping from two hostile Contractors through the kitchen of the restaurant they were just eating at.

In the Star Trek: Voyager </ fanfic "The Flux of Mortal Things", B'Elanna and Seven run through an animal slaughterhouse to escape an assassination attempt.

Cast a Deadly Spell </ . After a restaurant owner tries to put a written curse on him, Philip Lovecraft goes after him into the kitchen to return it. The curse manifests when a demon comes out of a pot on a stove. Philip joins forces with a cook to defeat it.

The Bartimaeus Trilogy </: In book 1, when Bartimaeus tries to evade the Big Bad 's guards by running through the kitchen, the "chef" turns out to be his old enemy, Faquarl.

Booth chases a suspect through one in Bones </. Brennan tried to help by throwing a head of lettuce at the guy and Booth uses a Frying Pan of Doom to knock the guy out. It is extremely funny Little Nightmares </ : Many sequences of this in the Kitchen area, with Six running from one or both of the Twin Chefs while jumping on tables, throwing food, and generally causing havoc

Chip 'n Dale: Rescue Rangers </ : An episode has a chase scene in a TV studio - they bump into a TV show chef, just as he is in the middle of explaing how much care today's dish requires.

Every time someone refers to the expression "everything but the kitchen sink" in any way, shape or fashion, an actual, literal kitchen sink will inevitably appear . Sometimes, the saying is not even mentioned; showing a kitchen sink in a context where the saying could</ be used works as a Visual Pun by itself. This trope is almost always Played for Laughs , especially in cartoons The original expression is an idiom of unknown origin but originating in the early 20th century, meaning "everything that wasn't bolted down". Kitchen sinks are not only bolted down, but connected to the plumbing Nothing to do with a Fantasy Kitchen Sink or a Sci-Fi Kitchen Sink , unless you somehow manage to incorporate them into the mythology as well. Also unrelated to the underground comix

publisher Kitchen Sink Press (who probably rather wants to allude to "filth" than to this trope)

A good, convincing commercial can cost a lot of money to produce. While not on the level of producing a film, the cost of writers, camera crews, actors, special effects, and music can be close, especially for commercials that are going to air during the Super Bowl . And while larger companies can handle these expenses with ease, to smaller business owners, spending this much money on a 30 second commercial spot is a gamble. Especially since there's no guarantee that the commercial will actually attract people instead of being just another nuisance to skip over with their DVR, or appearing only on some PEG Channel that no one actually watches, or might not be seen at all as more and more people switch to ad-free streaming services instead of cable or satellite. So naturally, local commercials cut corners, but are usually still halfway presentable But this cost cutting is taken Up to Eleven in fiction. Commercials will air on ungodly time slots , the script will be cheesy , the actors will either have the theatrical chops of a toothpick or jump around and act craaaaazy , the slogan will suck , and the whole thing will be shot in front of a green screen with the worst off the shelf effects ever seen . By the time it's done, the final product will be So Bad, It's Good at best. Compare Embarrassing Ad Gig A type of Stylistic Suck , though it can be Truth in Television as well : Do not add Real Life commercials as examples here . List them on SoBadItsGood.Advertising

While a Gargle Blaster will get you insanely drunk, Klatchian Coffee has the opposite effect. Rather than slowing down your brain, Klatchian Coffee speeds it up tremendously. In some cases, the results can be Nightmare Fuel in a cup, or just really</ scary to think about. Can generate Caffeine Bullet Time . May be used to demonstrate the level of a person's Must Have Caffeine addiction if Klatchian Coffee is their regular morning brew. Possibly based on Turkish Coffee , which is an incredibly strong brew of coffee. Rather than drip or espresso it, you just almost-boil ultra-fine ground coffee grounds until you achieve drinkable coffee. (According to aficionados, bringing the water all the way to a boil will make the coffee unpleasantly bitter, while bringing it to the point where the water quivers without boiling just makes the flavor more intense.) Compare Gargle Blaster for very strong alcoholic drinks. May overlap with Hideous Hangover Cure or Uncoffee . Will almost definitely</ overlap with Ate the Spoon . If it's powerfully bad</ coffee rather than simply powerful, it's Bad to the Last Drop .

The people of the Planet of Hats can adopt any of a thousand different hats as the one that their society values above all others. However, someone has to put on the "hat-maker" hat for the rest of the society to be able to wear their chosen hat. After all, Klingon warriors will need scientists to design their weapons and starships. (The possibility that someone can be both </ a warrior and a scientist doesn't seem to come up much .) Yet, despite making the Planet of Hats possible, the Klingon scientists get no respect because they aren't on the battlefield swinging a bat'leth It's not just a case of where someone takes on a thankless job because Someone Has to Do It , this trope is about culture. The Klingon Scientist is ostracized for having talents outside

of what is approved by the culture, even though their talents allow their culture to function . Klingon scientists might even agree with Klingon values — although their combination of vital importance and low social status would certainly lead to Jade-Colored Glasses This trope can be expressed a lot of ways. A warrior culture may disdain the blacksmiths who make their weapons. A society of pure thinkers may consider all engineers to be menial laborers putting their high thoughts to work. A people of artists could see those who produce their art materials as unskilled proles. A race of clergy may look down on the builders of their houses of worship. And yes, a race of scientist could even look down on the brutish military who keep their society safe. The low-status communities in question might despise the mainstream right back, but, again, they might not, and all of them probably need people who get rid of trash and keep the environment clean. If this trope is part of An Aesop , then Vetinari Job Security will kick in when the oppressed Hat-Maker takes a holiday A Fantastic Caste System may play this straight or avert it, depending on ideology. Some more idealistic caste systems value (or claim to value) anyone who devotedly fulfills their ordained role, whether that means being a great artist or a great street-sweeper — just don't try to be something you're not . Others clearly place the castes in a hierarchy: not only are warriors in general better than merchants, the worst warrior is better than the best merchant, simply by lucky accident of birth Compare to Hard on Soft Science , where certain fields of study are mocked by more "serious" areas that may very well be connected or derived from them. Compare and contrast Cultural Rebel In the real world, this is fairly common, especially in premodern times. Universities, for example, were started largely with the aim of studying theology, with the natural sciences being a vaguely complementary supplement. Craftsmen were seen as inferior to farmers, as unlike farmers they merely "reworked" what farmers produced. Merchants were largely considered inferior to everyone since they were seen as producing literally nothing and making profit. This stigma was, in fact, one barrier to industrialization in many places, since the classes with the most potential to produce productivity gains were socially discouraged. While this has subsided, to a large extent, it is still enough to say that every</ society has had at least one job that is looked down upon by the culture at large while still being entirely necessary for that society to function

In fact, it's common for humans in Star Trek to expect</ Klingons to act this way - often getting disabused of the notion There are a couple of genuine examples, though, Depending on the Writer Non-Klingon alien species in Star Trek, however, tend to play this trope straight much more often

An alien character (or an entire race) who is shown to enjoy specific things relating to human culture. A direct subtrope of Alien Arts Are Appreciated , when it's the aliens who like human culture. Perhaps it's a certain food, or a certain activity. When played straight, this can be used to allow an alien character and a human to bond, showing that they aren't so different. Or this can be Played for Laughs , when an alien who has little grasp of human culture and social conventions suddenly shows themself very aware of a certain pop culture element, or addicted to some human activity the viewer would not think them capable of grasping. This doesn't have to be

precisely li May have been a consequence of Aliens Steal Cable . Compare Fan of the Past , which can serve a similar narrative purpose. Related to Germans Love David Hasselhoff . Can sometimes lead to Going Native . Compare Alien Catnip when the subject is actually addictive. See also Fantastic Anthropologist , No Such Thing as Alien Pop Culture .

A classic physical comedy bit, sometimes known as a 'table top'. Alice is having an argument with Bob. Charlie comes up behind Bob and gets down on his hands and knees. Alice then pushes Bob who takes a step backwards and trips over Charlie If done in an actual fight rather than as a prank, this often indicates that the pranksters are out to humiliate their opponent rather than seriously hurt them. In a serious context, it's actually a common street-fighting technique... when you outnumber your opponent, obviously Do Not Try This at Home : The victim could land on the back of their head, potentially leading to serious head injury

A lot of times in life, lots of people jump to conclusions about certain kinds of things. After a little bit of misunderstanding, once a character finds out what's really going on, he will then proclaim rather blatantly that he knew it all along. This is something that a Large Ham , a Small Name, Big Ego , an Idiot Hero , a Know-Nothing Know-It-All , or a Miles Gloriosus is expected to do See also I Meant to Do That and Glad I Thought of It . For when people actually</ knew it all along, see Everybody Knew Already Not to be confused with I Knew It! , an Audience Reaction

There are two things about knives that make them special in movies and television. First, they are badass, since there is nothing more humiliating than being beaten with a blade shorter than your palm. Second, they are scary</, as a single glimmer from its profile in Ax-Crazy hands has been known to provoke screeches of horror (that and the possibility that they're more painful than any gunshot will ever be). And sometimes, it is both. Finally, they're generally easier to obtain and own legally than guns. Not to mention being significantly easier to conceal. In many countries, even in the modern day, pocket knives are perfectly normal to carry and barely garner a second glance. Laws abound about carrying knives, but generally, if the blade is less than 5 inches long, and there's no spring involved anywhere, it can be carried without worry. This is because knives are extremely useful everyday tools, for cutting tape, ties, or apples. Speaking of, knives made for cutting or preparing food are found in pretty much every home on the planet, so this trope can be pulled off with a simple steak knife. Knives have been a common tool since for all of human history and very well might have been the first thing humans invented. Prehistoric knives made of stone or natural glass have been found all over the world. Obviously, since they've been in our hands for pretty much forever, they've been used as weapons for just as long. In Fantasy settings, knives are the iconic weapon of the Thief , the Fragile Speedster , or the Combat Pragmatist and are typically Dual Wielded . The latter has some basis in reality, as historically, daggers have been used as off-hand weapons alongside a rapier or tomahawk, but mainly for utility or defensive purposes such as parrying where a shield couldn't be carried . Knives are typically also associated with Poisoned Weapons , despite the fact that a knife makes a poor

poison applicator Also common in the hands of a Cowboy , in which case the knife in question is probably a big Bowie knife that may as well be a small sword, and the Ninja , where it is likely a kunai. Often found in the hands of the Badass Native as well, being probably the first invention and all. You can also typically find them as a sidearm for any martial character; medieval knights carried daggers as a last resort weapon alongside their massive polearms. In more modern settings, especially in action-oriented ones, all kinds of tactical fighting/combat knives are especially popular in the hands of soldiers, action heroes, assassins, etc. Usually said knives are all colored completely black (from blade to handle) to appear more tactical or stealthy and such. They are also made from modern materials. Another popular knife in modern settings is all sorts of kitchen knives, from chef's knives to butcher's knives, hell even bread knives can come to use. These ones are usually a tool for self defense for civilians or a murder tool for most slasher killers. In video games, knife-wielding playable characters tend to fit into at least one of the following categories: the blade's ability to slip through cracks in armor is often exploited by a Critical Hit Class , and its short reach makes it most effective in the hands of a Stealth Expert or Fragile Speedster , who can use either the element of surprise or superior agility to close the distance. Overall, the vast majority of characters who wield a knife as their primary Weapon of Choice fall somewhere on the "Chaotic" and/or "Evil" sides of the Character Alignment grid. The nicest you can expect is a Chaotic Good Lovable Rogue . Lawful Knife Nuts are practically unheard of. For those wondering - a is a type of knife, but with an edge on both sides instead of just one. So if it has one edge, it's just a knife, but if it has two, it's a dagger, which is a type of knife. A knife is also a tool with many uses and purposes, so while knives designed specifically for combat do exist, they often double as tools for soldiers and warriors in the field (which is why most modern combat/tactical knives include serrated sections on the blade and glass-breakers or storage compartments on the hilt), while utilitarian knives intended for mundane tasks, like food preparation or craftsmanship, make for excellent weapons in a pinch. Likewise, daggers are exclusively designed with combat and murder in mind, but can just as easily be used to cut through cloth, string or brush, with the right application. A subcategory of daggers is made up of implements like the Stiletto or Poignard, which are intended almost exclusively for thrusting and stabbing, some even lacking a cutting edge at all, though these are rare in modern times, especially in civilian settings. Throwing knives are also a very popular ranged weapon in fiction, despite not being very well-suited for combat: in Real Life , it's very hard to get them to hit tipped-end-first when aiming at a moving target. But at least they were made for throwing compared to normal knives, which have a higher chance of actually not landing on the pointy end. Subtrope of Weapon of Choice . Contrast with Never Bring a Knife to a Fist Fight . May lead to a Knife Fight . Related to Kukris Are Kool , Machete Mayhem , Sinister Switchblade , and Bayonet Ya .

The medieval Knight Errant stems from the Chivalric Romance , where individual Knights in Shining Armor would wander the land, searching for evil to slay and ladies to rescue , most often guided by the Damsel Errant . Since then, knights have declined in popularity, but the Knight Errant is still around in full force — instead of knights, they are now often Samurai , Cowboys , or Samurai Cowboys

Historically, a knight errant would refer to a landless knight who would travel in the service of his lord and hoping to earn his own land. If he is traveling because he was sent by someone it might be a case of My Master, Right or Wrong . Knights Errant have some or all of the following traits: They, by definition, have Chronic Hero Syndrome . They may or may not request compensation , but will always try to do the right thing. There are many variations on the Knight Errant outside of Knights In Shining Armor . The Western very often stars a Knight Errant in the form of a wandering gunslinger or cowboy. Samurai are often, and Rōnin are almost always, Knights Errant. Wuxia heroes are Knights Errant. Because of the shared archetype, stories about one type of Knight Errant can easily be Recycled IN SPACE! — New Old West and Space Western are examples of this. Some people regard Superheroes as the modern-day version of knights errant. Wuxia novels, films, plays, etc. are full of such figures, and the term even translates to something like "wandering knight". This derives from , which isn't a widely-known subject in the West. Adventuring parties from tabletop RPGs aren't normally an example of this; a key part of this trope is that the knight is solitary. "Solo" campaigns, with a single player and a DM, are however not uncommon. Many open-world RPG video games are basically built around being a Knight Errant. The player is given a Wide-Open Sandbox populated by people who need help, and they wander around finding those people and solving their problems. Compare The Drifter , an accidental Knight Errant. See Knights Errant </ for the Webcomic .

The medieval knight who fights baddies, whether villains, knights or dragons , and in The Tourney , charms ladies without deliberately seducing them, behaves honorably , and saves the day with his sword ; but also, any hero who behaves similarly. Invariably Lawful Good and honor bound . First appeared in the Chivalric Romance . He has a very high incidence of having a Bodyguard Crush and Rescue Romance Historical knights were first and foremost professional soldiers. They usually were of Blue Blood — or, if commoner-born, founders of a new noble family. Their modus operandi</ was lance-armed heavy cavalry, which charged the enemy in full gallop on closed ranks . They often were used dismounted as well, when they fought as heavy infantry, usually armed with enormous can-openers such as poleaxes or two-handed swords A cultural trope in Europe since medieval times, most good knights practice something called , Honor , and Self-Control and occasionally chastity . Prone to rescuing the Damsel in Distress , or delivering her from false accusations , often whilst bearing The Lady's Favour . The Knight in Shining Armor was a frequent carrier of The Dulcinea Effect : medieval Chivalric Romances , indeed, portrayed knights who fell in love with a princesse lointaine </ merely on hearing her described, without even seeing her - though his love and heroism usually won her heart . Another occupational hazard is Chronic Hero Syndrome , Knights Errant being charged to Walk the Earth righting wrongs until a worthy quest shows up. Oh, and he will Save the Princess , usually from dragons This is often invoked to describe a man who acts chivalrously</ toward women. The term may be used in more cynical works to indicate a Wide-Eyed Idealist . Even the Ur-Example of the straight usage of trope, King Arthur , messed around with it a lot. The one-two punch of Disney and Dungeons & Dragons </ saw this trope's stock rise like crazy The "shining" originally referred to the way his armor

and weapons were kept in good condition, as opposed to the rust that accumulated for less competent knights. Most knights will be depicted wearing plate armor, despite it appearing relatively late in the era of knights When Prince Charming is a Knight in Shining Armor he's the Warrior Prince . Prince Charmless , on the other hand would not be a knight by choice See Lord Error-Prone and Miles Gloriosus for common variations, played with tropes, and parodies and Knight in Sour Armor for what happens when the world fails to live up to their</ standards, but they keep on being good anyway. If the knight is too</ dedicated to his ideals and code, he may become a Knight Templar . If he likes fighting a bit too </ much, he is in danger of becoming a Blood Knight . A knight who is shiny for one person in particular is The Champion . A knight that gets magical powers as a reward for this goodness is almost certainly The Paladin to boot If the Knight in Shining Armor wanders the land seeking evil to slay, then he's also a Knight Errant Animated Armor will appear as this, all the way to The Reveal Subtrope to Ideal Hero . See also Shining Goodness . Compare the gentleman's Old-School Chivalry . Compare and contrast the Dogged Nice Guy . A white knight is an internet persona who wants to be this An Officer and a Gentleman is the modern version of this trope — very</ often even their direct genetic descendants as old noble families are grossly</ over-represented in all military academies around the Sociopathy can be seen in almost all comedy. It is the root of shows like Seinfeld </, Family Guy </, and Fawlty Towers </, but it shows up just as readily on Sesame Street </ See also Heroic Comedic Sociopath , a character who does this all the time and loves it. This trope is what the Sadist Show and Black Comedy live off of. This may result in No Sympathy in situations where the character is clearly deserving of it. Too Funny to Be Evil coupled with Rule of Funny is the basic principle that allows this trope to work. Compare to Laugh with Me! or Cringe Comedy . When this trope gets taken to extreme, over-the-top levels, it's Crosses the Line Twice . See also Disproportionate Retribution , because in comedy this is usually okay. If the example falls short on the "comedic" aspect and just comes off as cruel, it may get the reaction " Dude, Not Funny! " Conversely, if the butt of the joke is a good sport, they may agree it's Actually Pretty Funny

Someone just said or did something stupid, kinky or childish, and someone else feels they have to correct them and punish them. However, instead of doing it with words or with a Dope Slap , they decide to administer a good, old-fashioned spanking, a comedy goldmine. Hilarity Ensues . May be accompanied by Punctuated Pounding The comedy may lie in the situation of who is spanking whom (for instance, a child may spank a parent or another authority figure; or a grown-up princess acts like a real Royal Brat and gets spanked by her father the king in front of the whole court for bigger impact) or a person may be spanked with a rather humorous implement such as a rolled-up newspaper or a flower. It can also serve as some humorous comeuppance for an Alpha Bitch or a Spoiled Brat . Or the spanker may take off his belt — and his pants fall down. Sometimes the humour is mined from this trope's overlap with Kinky Spanking and the way spanking is sexualized in inappropriate or surprising contexts It may cause some Values Dissonance in modern audiences as Corporal Punishment is becoming more and more frowned upon. Because of this, spanking played for comedy can often come off as Dude, Not Funny! It's a subtrope of Joke of the Butt and Slapstick , and a sister trope to other

spanking tropes Kinky Spanking and Don't Make Me Take My Belt Off . For more general posterior-punishment, see Literal Ass-Kicking and Pain to the Ass

A Comedy Trope in which a character's underwear is exposed while other people are present, usually by accident, and much to their embarrassment. Generally involves Goofy Print Underwear . For extra embarrassment, the person might have their name written on their underwear. The primary use of this trope is comedy, catching a character in their most embarrassing state. Often this is the result of Defeat by Modesty . Fully-Clothed Nudity is the feeling this creates Compare Marilyn Maneuver for a specific situation in which this happens. Compare Panty Shot , which usually shows viewers up a girl's skirt while it's still up, but can overlap with this trope when said skirt is blown or flipped upward. In addition, Panty Shots are always played for Fanservice , while Comedic Underwear Exposure usually isn't

Instead of sheer force , a BFG or a great display of magic , a character uses jokes, puns, slapstick, laughs, etc... to fight an enemy or achieve a goal Sometimes humor may be used to distract the amused opponent, while at other times the humorist may literally cause his audience to Die Laughing Sub-Trope of Art Attacker

There's an insidious school of thought circulating among the world's pop-culture enthusiasts and critics. It states that comedy is not and indeed cannot</ be True Art . Since True Art Is Angsty and offensive (if not down right incomprehensible), it logically follows that something lighthearted, created to inspire joy and laughter amongst the public, must not be true art, right? Sadly, many people seem to think so. For instance, can you remember the last time a comedy film won the Academy Award for Best Picture ? It was 2018's Green Book </ followed by 2014's Bird Man </, 2011's The Artist </, 2002's Chicago </, 1998's Shakespeare in Love </, 1994's Forrest Gump </, 1989's Driving Miss Daisy </, 1988's Rain Man </, 1983's Terms of Endearment </ and 1977's Annie Hall Exactly, and the numbers predict that it's pretty unlikely. Perhaps for this reason, the Golden Globe Awards have separate categories for comedies and dramas. This rule tends not to apply to minor technical awards: For instance, at the 1988 Oscars, the Disney/Amblin partly-animated fantasy-comedy film Who Framed Roger Rabbit </ won three competitive Academy Awards, but these were for film editing, visual effects and sound effects. (A special award was given for the film's animation.) Compare Animation Age Ghetto and Sci Fi Ghetto for similarly flawed ideas. For the fandom version, see Maturity is Serious Business . Particularly good satire and Black Comedy may</ be exempt such as with Life Is Beautiful </ , an ostensible comedy set during the Holocaust which got director/star Roberto Benigni the Best Foreign Language and Best Actor Oscars in 1998. But a movie that simply wants to be funny without an obvious message? Low-brow trash. Note that this rule applies primarily to film. Television is normally exempt as the Emmy Awards have separate categories for comedy. In theater, comedies often do well at the Tonys, such as when The Book of Mormon </ cleaned house in 2011, winning nine awards including Best Musical, Best Score, and Best Actress (Nikki M. James). A primary cause of Tom Hanks Syndrome ,

where a comedic actor who wants to be Taken Seriously will switch to drama.

Comedy is an elusive and fast-moving target to define. General public consensus is that humor comes from the unexpected, but this theory is still flawed and doesn't explain everything. One thing's for sure: comedy is funny. Comedy, as something primarily happy , is directly opposed to Tragedy , but not so much Drama , and can never be perfectly combined with Horror . And has been since the day it was conceived as a term, albeit not like we know today; comedy was something that either had a happy ending or was written in the common tongue, i.e. Dante's The Divine Comedy </, Tragedy was something that had a sad ending. Propelled off of Rule of Funny , comedy infects all art forms. Its hobbies include satires, parodies, pastiches, playing for laughs, snarking, breathless ranting, Irony , and hiding snickerdoodles in its knickerbockers . A list of UK comedy writer jargon, which includes many familiar tropes, can be found Asian Animation Comic Books Film Literature Live-Action TV Music

If the goal is laughs and it's live-action, it goes here:

Tropes seen primarily in comedies , or which are inherently intended to be funny. </

Before people had telescopes, comets were frightening objects of awe and wonder that seemed to appear out of nowhere, blazed brightly in the sky, then vanished as quickly as they came. Older Than Dirt , the " falling stars " mentioned in The Epic of Gilgamesh but the universal consensus is that when a comet appears, something momentous is happening, enough so that the heavens themselves have taken notice In 1705, astronomer Edmund Halley noticed that the comets of 1531, 1607, and 1682 all had the same orbit and period. Suspecting that the three were actually the same comet, Halley predicted not only that it would appear again in 1758, but in what part of the sky, and in what orbit. It appeared exactly when and where he said it would, and Halley's Comet not only acquired a name, but put an end to the thought that a comet was some supernatural envoy of doom Be that as it may, comets remain cool , and they are still used in media as the first, last and only suitable omen for truly world-shaking events. Such as said comet coming straight at you .. Subtrope of Portent of Doom . Compare Bad Moon Rising . See also Cosmic Motifs

A character is exhibited for ridicule — while still alive. Special garments, signs with the proclamation of the offense, or even nudity may be enforced. Menial labor may be required . Rotten fruit may be thrown , but the character usually finds the staring humiliation enough (without a Humiliation Conga to make it worse). Perhaps even a Fate Worse than Death which is why it often makes for prime Moral Event Horizon material. Pride makes it

worse, but no one really enjoys it. Most of the time characters that are meant to be sympathetic are on the receiving end of this but it can occasionally be justified as a dark way to Pay Evil unto Evil In Real Life , the pillory and the stocks were designed for this, but cages, chains, and even just guards may be used to keep the prisoner in place, or on the route of his enforced procession. It was particularly common in colonial societies, who often couldn't afford the loss of human-power that would come with extended imprisonment or execution. Though a Public Execution may have this as an added blow to the death Conversely, characters may come to gawk at a prisoner, for much the same effect. When the character has been Made a Slave , an auction may bring this on, even worsened by the fact that the purchasers don't care how humiliated the character is A defeated or demoralized character, even if not a captive, may greet another with this as a Stock Phrase , with accusations of coming to gawk at their shame, with snarls of Don't You Dare Pity Me! , even if the other character wants only to help. They may demand Get It Over With to avoid the gawking. Similarly, if their Pride convinces them that they came to gloat when they did not even know they were there The threat of this trope may lead characters to Leave Behind a Pistol or decide that it's Better to Die than Be Killed Compare Dead Guy on Display , which can be the same thing for a corpse. See also A Truce While We Gawk If the gawkers spontaneously show up to mock someone over accidental embarrassments, you're dealing with The Freelance Shame Squad . The comedic equivalent is Pass the Popcorn . The commercial version was used in The Freakshow where the performers were often paid well for their display

Regardless of what temperature it is outside, lying motionless for a while has a tendency to make one feel cold. We give off less body heat when we're still, after all. So a person who's, say, falling asleep is bound to get colder more quickly than someone who's moving around and still fully awake. If that person is somehow sleeping out in the open, without a blanket (or if they've just fallen asleep in a really weird place), they may find themselves shivering in their sleep, turning over in a really vulnerable way, or clutching themselves. They're uncomfortable, and they show it. If they had</ a blanket, it has slipped off them as they've turned and shuddered This is, of course, a cue for another character (say, Bob) to come along, see the sleeper (say, Alice) and react to it — by tenderly draping a blanket (or, in less providing situations, a coat) over her shoulders, petting her on the head , and saying, "Sleep tight, Alice." Freed from her discomfort, Alice usually smiles in her sleep, possibly clutching the hem of her new blanket for effect — even in her sleep, she's grateful for the warmth. A variant on this scenario occurs when there's only one blanket between the two characters, and Bob must lie down beside Alice and share. This version is perfect for building UST However, the comforter isn't always romantic. It can be used to show the affection and care between any two parties, whether they be close friends or teammates , perpetually feuding siblings, parents and children, and even old married couples . Frequently, it serves as a Pet the Dog moment for Bob, especially if Bob has been a Jerkass in the past to Alice — he can be nice after all, but only if nobody's awake to know about it When done properly, it's incredibly sweet and touching . When done improperly,</ though, it can feel a lot like Glurge or Nightmare Fuel if played for creepy See also Sleep Cute and Hidden Heart of Gold . A similar scenario is You

Must Be Cold

In the Justice League episode "Only a Dream" , Flash returns from making coffee for Hawkgirl to find that she's fallen asleep. Instantly, he dashes away and returns with a blanket.

The human body is a delicate thing, and when a person is injured or sick it's vital to give them proper care to aid healing. Or, you could just stick some leeches on their arm and hope for the best This trope occurs when someone attempts to perform medicine despite not having the faintest idea what they're doing, and only succeeds in making things worse. They often have rather... creative</ ideas about what constitutes medical aid. If you find yourself in the care of one of these people, run away quickly and don't look back Common traits of these include using amputation for every malady , diagnosing mild illnesses as ridiculously lethal ones, using implements that obviously aren't medically safe (i.e. using a kitchen knife instead of a scalpel), or making use of obviously quack or seriously outdated methods. Quite frequently, if the erstwhile doctor doesn't simply kill their patient, they can manage medically impossible tasks solely through Achievements in Ignorance , like replacing someone's organs with objects in the vicinity or sewing functioning limbs on backwards Need not be performed by an actual doctor: any obviously terrible attempt at healing counts

May overlap with Snake Oil Salesman , Phony Degree and I Have No Idea What I'm Doing .

Some shows play a hero's absurdly overpowered abilities and near-invulnerability for laughs. Since the fights themselves are a foregone conclusion, they frequently get skipped or handled in one panel (this trope is particularly common in comics). The characters frequently lampshade this trope, and in the rare case where a fight actually does have any build-up, it will often end in a deliberate anticlimax. Sight gags are often used to lampshade it further, such as supporting characters playing cards or otherwise ignoring the latest Big Bad (or even the fight itself) Works with this trope tend to bring in enemies capable of threatening the hero eventually, especially as time goes on and the initial joke wears thin; this can turn the hero into a plain old Invincible Hero if the comedy is discarded entirely. Sometimes this also involves Cerebus Syndrome as the comedy fades into the background at the same time. Up until then, though, the vast majority of fights are deliberate, comical Curb Stomp Battles When you have an invulnerable hero in a dramatic show or one that tries to get you to take the fights seriously, it's an Invincible Hero . When the focus is on the Rule of Cool , it's a Showy Invincible Hero Might feature The Ace , or instead Inspector Oblivious . Compare the Iron Butt-Monkey

Maybe it's to illustrate one of our heroes' quick wit or smarts. Maybe it's to remind the viewer that the character isn't entirely a loser. Or perhaps the writers just love them Whatever the reason, many shows create a one-sided rivalry between two contrasting characters. Character A, usually part of the main cast, almost always wins. Character B may score some victories in the conflict,

but by the time the credits roll, character A will have outdone B in such a way that there's no response to it. Sometimes, just to add salt to the wound, Character A may reveal they never even considered Character B to be a rival at all A particular kind of interaction between Sitcom Arch-Nemeses . Related to Curb-Stomp Battle , but usually much less violent. If the constant loser is a recurring villain, not another main character, then this overlaps with The Good Guys Always Win See A Taste of Defeat (for all cases) and Team Rocket Wins (for villainous cases) if the victorious character's winning streak is finally broken for once

A character completely misses a really obvious point for comic effect . The point is the sort of thing that any reasonable or informed person will spot and understand given a few seconds or enough information. However, the center of this trope is a person who, despite having all the time in the world and all the information, comes to a conclusion so wrong</ it's hard to be even further from correct. Commonly elicits a response along the lines of "that's not what's wrong here". Visual gags are often involved A Sister Trope to Dramatically Missing the Point For the fandom equivalent, see Misaimed Fandom Compare Alternative Joke Interpretation , Are You Pondering What I'm Pondering? , Bad News in a Good Way , Bait-and-Switch Comment , Cloudcuckoolander , The Ditz , Failed a Spot Check , Insane Troll Logic (logic that consists of comically missing the point), I Take Offense to That Last One! , Mistaken for Profound , Need a Hand, or a Handjob? , Not Actually the Ultimate Question , Proportional Article Importance , Right for the Wrong Reasons , Sidetracked by the Analogy , and Skewed Priorities In-Universe Examples Only. We'll have to spend a lot of money just to make another subpage for real life

Just because a character's as jolly as a sloth with major depression doesn't mean they can't be funny. A Comically Serious character's lack of reaction to embarrassing, undignified, or just plain bizarre situations can subvert our expectations of embarrassment, hysteria, or insanity and make for comedy gold. When they're not serving as the 'straight man' for all the wacky hijinks the universe throws their way, the character is likely to be a Deadpan Snarker , The Stoic , The Killjoy , or The Quiet One Typically works as a Straight Man in the cast, although they may have a quirky Achilles' Heel . They may also serve as an Only Sane Man , and oftentimes become the victim of Not So Above It All Comically Serious characters often turn up in Brit Coms Bizarrely enough, has a very similar comedic style to the certain kinds of Cloudcuckoolander , in that the Cloudcuckoolander's comedy often comes from serious reactions to their own oddities, while The Comically Serious's comes from serious reactions to other peoples' oddities. Might also be the Butt-Monkey in settings where being serious is seen as an offense A Sub-Trope of Bathos . A Sister Trope to Serious Business , Comical Overreacting Compare No Sense of Humor ; So Unfunny, It's Funny ; Narm . Contrast Laughably Evil ; Dude, Not Funny!

Hey, you. Yes you. I'm looking for some... information. What, you can't disclose that? Maybe this shiny new quarter </ would change

your mind... This is when a character tries to bribe somebody, but the bribe is either pathetically small or involves something of no conceivable value to the recipient. Common reactions include an incredulous stare, dismissive laughter, or even arresting them for attempted bribery . Alternatively, the recipient may enthusiastically accept the bribe, much to the amusement of the audience. (A once-common form of this variant involved Canadians being bribed in American currency , although economics can largely ruin any humor it holds .) Common variations are: Sometimes gets inverted; the initial bribe is very large, at least by the standards of the person offering it. The other character refuses it but accepts something comparatively worthless instead, maybe even making the reduced counter-offer themselves. This is more likely to be a dramatic example than the normal way around— typically because the person taking the "bribe" has reasons of their own to do what's asked of them, but wants to make a statement of some sort with the token payment. A specific example common in the real world is taking a single dollar (or local equivalent) as payment for services rendered; this is done because both sides have to give . Such an absurdly small payment is referred to in legal parlance as a </ after the rent paid yearly by the Freemasons of Bermuda for their meeting hall: a single grain of black pepper. Can also apply to unusually small payments, tips, or demands. Usually Played for Laughs . Contrast Worthless Yellow Rocks , where the characters treat something as being less valuable than it is, rather than more valuable. Compare Not Rare Over There , where something is valuable to someone, but only because they need it and can't find it, Comically Small Demand , and Sold His Soul for a Donut , where someone sells their soul for something comically insignificant.

Someone with authority or power (or the delusion of such) uses it to command, force, or negotiate with people to do mundane or simple tasks for him/her. Usually the person ordered may eagerly oblige, having expected a more serious and/or dangerous task or being threatened if refused, though possibly with initial disbelief Alternatively, it could be a mundane reward or offer from performing a service, especially if the people needing it are poor or even extravagantly rich. The reasons for the mundane needs are: If there is a series of demands, you can expect the last one to be this. When the boss sends people to do important things, then sends one to do something mundane, that's You, Get Me Coffee . Compare Mundane Wish , Mundane Utility , Comically Small Bribe , Disappointed by the Motive , and Sold His Soul for a Donut . If it involves food, it overlaps with Bratty Food Demand .

If you have a character who is fast asleep, what would be a comical way to display this? Why don't we have the character trickle down saliva from his mouth, as in drooling like a little baby? This is the trope where a character drools while sleeping in a noticeable display of comedy. In some cases, drooling can be used to indicate innocence, since, commonly, small children tend to drool while they're asleep. When adults do this, it's supposed to portray them as inelegant and crude, especially with females. Then again, when women do it, it can be considered as cute while male droolers are considered to be very childish. This can be justified by the fact they are a Heavy Sleeper . There's an indication that whenever a character drools at sleep, it shows that the sleeper is mentally dumb, and/or socially awkward (rarely Book Dumb). This could also happen if they're dreaming about food. Pretty much everyone does this at one point .

Comically reacting to things in an over-the-top manner. Whether it's anger, sadness, fear, joy, or other emotions, those will be played Up to Eleven for Rule of Funny . The basis is that since a lot of comedy is exaggeration, it includes exaggerating how people feel and react to things. But this isn't always easy to do. If done wrong, it can seem like yelling and mugging just for the sake of it. If done right, it can make a memorable performance. One of the distinctions of Anime , Manga , and Animesque works is showing varying silly visual ways in which characters react, from giant heads to Fireball Eyeballs . Similarly, some stand up comics work themselves into an angry state as part of the act. A Caustic Critic can also act like the Suckiness Is Painful of a work has made them apoplectic. This frequently overlaps with Gasp! , Felony Misdemeanor , Faux Horrific , Big "NO!" , Drama Queen , Suckiness Is Painful , Berserk Button , and Why Did It Have to Be Snakes? . A Sub-Trope of Chewing the Scenery . A Super-Trope to Screaming at Squick and Lost Food Grievance . A Sister Trope to The Comically Serious (playing under reactions for laughs), Melodrama (overreacting for drama). Compare Minor Injury Overreaction , Large Ham , and Serious Business . Contrast Dull Surprise and Narm (when reactions are funny unintentionally). In-Universe Examples Only

Such adaptations tend to take three forms: In cases where the comic is intended to be released right from the start, it sometimes appears before the work from which it is adapted. Comic book adaptations of movies were fairly common in the 1970's and 1980's, before home videos became common. In those days, a comic book was the easiest way to re-experience a movie no longer playing in theatres. But because of Animation Lead Time the comics were often written and drawn based on earlier scripts than the final draft, and before the movie was edited, which could result in scenes appearing in the comic adaptation that were never in the movie. Another phenomenon is a comic strip series based on a famous celebrity. These comics are usually cheaply produced and part of the Cash Cow Merchandise around the media star himself. Sometimes the original celebrity is involved in the creation, but often it happens without his knowledge or approval. As soon as the fad around the star dies out these comics usually die a quick death. See also Anime First . For comics adapted into</ other media, see Live-Action Adaptation , Animated Adaptation , and Licensed Game . Sometimes, the end product will actually be called Name: The Comic Book .

Companies responsible for making all those comics we like</

A list of comic book artists, writers, and creators with their own pages on this wiki.

The worlds created by large comic book companies are a curious thing. Since there's many different titles being published simultaneously, an odd effect can occur; when a character is set aside, they can seem to vanish from the universe; not being mentioned, spoken of, or appearing in any situation one would expect them in This usually occurs to characters who have had their titles canceled and found no appropriate series to migrate to. Many characters, especially supporting characters or those without powers, are permanently stuck in comic book limbo This is a frequent thing to happen when a Comic Book Run ends and a new

one takes the helm of the comic. The new author may not like one of the current characters, or have plot ideas that have no room for him, so they simply cease writing about them. Conversely, they may like an older character that fell into limbo and bring him back. Characters can be brought back from limbo at the writer's discretion, unlike a Comic Book Death , where they at least have to give the semblance of having an explanation of why they're back. The likelihood of such a thing happening usually depends entirely on how much the writer likes said character Sometimes this is a direct choice on the part of the editorial staff. For instance, in the '90s, Hawkman and his family were purposefully put into Comic Book Limbo because the editors decided that he'd only shown up a few years ago — after other writers had put him into the founding of the Justice League of America . So an alien spy had been masquerading as him in the interim, except when he hadn't, except that he still knew the characters that knew the alien spy him, and then they didn't know if the reincarnated magical pharaoh Hawkman was related to him or not, and then they merged into the even more confusing Hawk-God , and... at this point, limbo becomes a mercy. A character may also be moved to limbo on purpose if the fandom turns against them, if they turn controversial in the real world for some reason, or if some legal issue (such as copyright or trademark disputes) prevents the active use of the character C-List characters are often brought back from limbo just to be killed off as part of a Tonight, Someone Dies event. For instance, this happened to several third-string Teen Titans members during Infinite Crisis </ Series with a lot of Meta Fiction often parody this concept by having characters that were banished to a literal limbo , usually just because people forgot about them (or, if the series is Lighter and Softer , a literal game of limbo) Compare Chuck Cunningham Syndrome

Several comic book series are Long-Runners , and have been published (with or without hiatus periods) for decades. Although there is usually a core cast that is always or very frequently around, and Comic-Book Time tries to make it so things stay more or less always the same, a comic book series considered in its entirety is huge</ , and things are not always the same. To make some order in this, the fandom and the industry divide those long runner series into smaller units: comic book runs. Those are the periods when a certain creator has been working on the series: those times usually have a clear style, a well-defined cast, and plots are more likely to be followed from month to month than when new creators take the helm. A run may be known for a long collaboration between a writer and an artist, but unless they cease working at the same time they are considered to last while the writer is still there. Note that a writer that left a series may return to it some years later, but this is considered a new run. Contrast with comic book miniseries, contained stories with a beginning and an end. A comic book run may be structured in several Story Arcs , especially if it's Writing for the Trade . Comic book runs are open-ended and may continue indefinitely, like a sitcom. A comic book run may</ have an ending if the author is informed beforehand about his removal and tries to close all the open plots, especially if the comic itself will be cancelled or rebooted; but it operated in open-ended mode before that and it would be safe to assume that it would have continued doing so if there was no such orders from above. Many of those long-runners are really Adored by the Network , and do not limit to a single comic book with them.

Several</ comics starring Batman or Spider-Man may be published each month, which means that runs may not always take place in similarly named comic books. In theory, this means that there are several concurrent runs about a given character at a given time; in practice, one of those comics is the de-facto "main" one that leads the way and the others are satellites to it. Comics starred by another character from within the franchise or set in an Alternate Universe have more leeway to do their own thing with less risk of contradicting the main one. DC Comics Catwoman </ The Flash </ Green Lantern </ Justice League of America </ Nightwing </ Superman </ Teen Titans </ Wonder Woman </

Marvel Comics Captain America </ Captain Marvel </ Champions (2016) </ Daredevil </ The Eternals </ (by Jack Kirby) Fantastic Four </ Guardians of the Galaxy </ The Incredible Hulk </ The Inhumans </ Iron Man </ Jessica Jones</ Loki </ Patsy Walker </ Miles Morales </ Moon Knight </ She-Hulk </ Spider-Gwen </ (by Jason Latour & Robbi Rodriguez) Spider-Man </ Thor </ Venom </ X-Factor </ X-Force </ X-Men </ Wolverine </

Ongoing series or individual works of sequential art in book or magazine form; not noted on the list are the vast</ number of independent or 'underground' publications available. Despite the name, many such are not particularly "comic" at all, which has lead to the use of the term "Graphic Novel" in describing works with True Art aspirations, though some consider such phrasing needlessly pretentious. It has since acquired a more technical meaning, but debate and pretension rage on. What has happened is that the term has helped give original sequential art in a dedicated publication format a long overdue respectability in North American mainstream culture, as evidenced by its growing presence in public library collections. Compare Newspaper Comics and Webcomics . See also the Comic Book Tropes index. Australia

The problem with a very long-running fictional creation is this. On one hand, Superman , say, is a high-selling, successful character — the basis for a lot of ongoing works, licenses and so on. You don't want him to age or die, because that means losing that successful character. So within the franchise he must come to ignore the passage of time, stay suspended forever somewhere in young manhood... even as years and eventually decades pass in real life. On the other hand, Superman exists as part of a greater universe, and if all</ the stories in that universe are continuously frozen in time in this way, that cuts off a lot of possibilities. So what do you do? Let things exist in Comic-Book Time : otherwise known as a Floating Timeline, or Sliding Timescale. You use the illusion</ of time passing. Certain events will happen — and will continue to have happened — before others, but you never refer to specific dates if you can help it. You let characters change, but only a little. Stories focused around youngsters are especially vulnerable to this , and even aging characters usually aren't allowed to progress to the point they'd be separated from their peers. Comic-Book Time does not pass at the same rate for everyone; secondary characters may catch Soap Opera Rapid Aging Syndrome and age from children to teenagers and then young adults while their adult counterparts remain roughly the same age. Or minor characters can drop out of the narrative, only to return years later, aged, while their counterpart heroes remain youthful. (This concept was picked up on in the Fourth Wall

-breaking She-Hulk</ series, in which a Golden Age character decided to hang around She-Hulk as much as possible to stay youthful.) This trope can prove problematic with creations who are tied to a certain time period. For example, since the 1980s, Magneto 's backstory and characterisation have been deeply connected to his status as a Holocaust survivor; no matter that beyond a certain point this ought to make him much older than the character seems. That causes a particular type of aversion, the Refugee from Time , where you just don't allow any Sliding Timescale at all or at least not for one character — though ultimately it will make them impossibly old as more real-world years pass. A common solution is to Retcon those conflicts into a generic and dateless Fantasy Conflict Counterpart when the dates start giving trouble. One possible justification for the trope is that publication</ time typically spans much longer than the passage of time in the story — otherwise known as Webcomic Time . Particularly in recent years, comic book publishers have tended to adopt the model where each monthly issue of a title is a single installment in a longer Story Arc ; for instance, a six-issue arc where Batman takes on the Joker may only cover one night in-story, though it has taken up half a year of real time. This, naturally, is going to affect both how quickly you can develop the overall narrative and how contemporary you can make it. Indeed, an open-ended series that wants to keep using the same characters and keep them in a given age-range for a long period pretty much must</ use some variant of Comic Book Time. However, all characters in a shared universe tend to inhabit the same "present", regardless of when they first appeared or how much time has passed in their own series. An adaptation</ of a series that uses this can usually avoid it , as most of them only last a few years. On the flipside, non-comic series that last long enough also tend to use this. Stories that take place in the future, naturally, are allowed to completely ignore this — unless the same future is referenced again later, in which case it'll have slid forward the same amount. Webcomic Time (see above) is a related concept, but instead of the illusion</ of time passing, time actually does pass over the course of the series, just at a much slower rate than its real-time publication or airing Compare Frozen in Time , Talking Is a Free Action , Not Allowed to Grow Up , and Not Growing Up Sucks . Often results in Outdated Outfit . See Year Zero for a compromise, and Soap Opera Rapid Aging Syndrome for similar peculiarities in live-action productions.

Tropes that belong exclusively to Comics as a medium, normally based around things such as the sequential nature of the art, graphical style, use of text, results of episodic publishing and distribution. While marked as Comic Book Tropes, tropes shared among all Sequential Art can be included here, with separate lists dealing with the particulars of other formats (like Web Comics) See also Graphical Tropes and Superhero Tropes . See Sequential Art for the works index

Literary works which are primarily intended to be funny, or where everything is Played for Laughs . See also the subpage Comic Fantasy . The Adventures of the Princess and Mr. Whiffle </

This describes any number of situations where characters play a role, generally to practice for a real life situation. Hilarity Ensues . For example, Alice wants to talk to Bob, but she's afraid,

so her friend Carol tells Alice to pretend she's Bob and practice on her. Carol could actually be in love with Alice, creating an awkward situation; or Carol could act like a complete jerk, making Alice more worried; or Alice could freeze at just the thought</ of talking to Bob, even though it's still only Carol; or Carol could really be Bob in disguise. The possibilities are limitless. There's also psychological roleplaying - where you pretend you're the other person. This always seems to end up something like: This is by no means exclusive to romantic situations; role plays take place everywhere, from work to school to friend circles. It seems to happen most often when a plot requires a Group Therapy episode. Related to the Trial Balloon Question and I Have This Friend... . Not related to Role Playing Games . (Or Cosmic Role Play .)

All types of comics and related media, whether they're traditional print comics or in a digital online format.

Someone with a lot of sexual experience knows a lot of maneuvers, but doesn't want to go into detail about them, for various reasons , so they refer to them by some name that isn't even remotely descriptive, and often has the name of a place in it, for some reason. Any innocent viewer will remain blissfully ignorant of the meaning of the phrase until someone tells them . Then they tend to wish they hadn't asked. One variation is where an unseen work describes or depicts a particularly bizarre, but nameless act. Another is where an act isn't named, only implied. Whatever the variation, it most likely involves one or two Noodle Implements Related to Attack Pattern Alpha . Compare Head-Tiltingly Kinky , a similar way to stimulate (and amuse) the viewer by suggesting something unspeakably erotic but leaving most of the details to their imagination And by the way, the punny page namer is the Kama Sutra , not Karma</

Trailers, teasers, ads, posters, public demos - they are all about getting people to know about an upcoming work, and to get people interested in seeing/reading/playing/listening to it Of course hype is only half of this. Upon release, people have to like the work , but people still have to know it's out there It can be a tough task, one that marketing departments and advertising firms have spent years trying to perfect. But a well-done campaign can be the difference between blockbusters and flops

Pretty much every action-genre movie, TV series, or whatever will at some point feature a sequence where an aircraft, damaged or otherwise in less than perfect flying condition, has to make an emergency crash landing. Cue the tense music, the landing signals officer patiently talking them down over radio, the crew erecting a crash barrier, the fire-suppression teams suiting up and grabbing their extinguishers and hoses, et cetera. May include Stock Footage of real crash landing accidents, often hilariously involving different aircraft from a different era than the one depicted in the story. In fact, many airfields operate the same types of crash barriers and tailhook arresting gear as seen on TV, although they are reserved for emergencies where an aircraft will have difficulty stopping before the end of the runway (or when part of the runway is damaged, effectively shortening it.) Sometimes this involves an aircraft carrier (or its spacefaring or flying equivalent) given that the

associated risks with an emergency landing on an aircraft carrier at sea that is only a few hundred meters long are far greater than with a two-mile-long concrete runway. Note that most pilots with severely damaged planes in Real Life will not attempt a carrier landing, but rather will eject . In fact, standard operating procedure is to ditch the plane and be rescued — writing off the expensive fighter rather than risk the even more expensive pilot or astronomically expensive aircraft carrier. But never mind that . A staple of Captain Crash . See also Reentry Scare , in which Coming In Hot involves comm silence. For the non-vehicle variation see Too Fast to Stop and Inertia Is a Cruel Mistress .

A story featuring an adolescent making the mental leap from child to adult. In real life, this happens over the course of several years. Literature, films and some television series are media that have the space to show the story at a slow pace. But for a movie, things have to be compressed to several months at the most, so expect some really</ accelerated character development. The words bildungsroman</ (Ger. "educational novel") or bildungsgeschichte</ (Ger. "educational story") are sometimes used to describe these kinds of stories. A note on the translation: the terms originated in the Age of Enlightenment, when "Bildung" meant not only "education" but also "self-improvement" (cf. English "building") — or as Werner Heisenberg , Bildung</ is "that which is still there after you've forgotten everything you had ever learned". In other words, it's not a "novel to educate the readers" but a "novel about the hero becoming someone". : A variation is the Delayed Coming of Age Story</, in which the person has remained mentally a child his entire life and only finally experiences these things sometime between his late 20s and mid-40s. Mainstream film coming-of-age stories tend toward dramedy . Independent film or novel stories lean toward drama, sometimes jumping headlong into Wangst . See also Age-Progression Song , Ode to Youth .

Maybe because it sounds really cool , but Commander</ is a very popular rank in fiction In real life navies, "Commander" is the second-most senior field rank, right below the rank of Captain. A commander is usually the first officer (i.e. the Number Two) of a large ship, but can also be the commanding officer (a.k.a. The Captain) of a smaller ship. There is also a "Lieutenant Commander" rank directly below, who will be either an assistant to these officers or the captain of a smaller ship. Some air forces have a "Wing Commander" rank that is equivalent to a naval commander. In an army, the equivalent is either major or lieutenant colonel, depending on the country. When it's not used as a rank, it may still be used in a role title (e.g. "unit commander", "mission commander") When using Common Ranks , is subordinate to Colonel Badass although in many Real Life militaries they're actually equivalent and superior to Majorly Awesome . When used as a General Staff Rank, is usually superior to The Brigadier and subordinate only to the Four-Star Badass . Outside of militaries, some large police forces have a commander rank for officers (e.g. London, Los Angeles and Chicago). This rank sits between the assistants of the chief and the local police station managers In science fiction, commanders usually have their traditional position as executive officer. Some works will have commander as the highest senior rank

on a starship or a general staff rank, along with the title or rank (or both) of the supreme leader of military forces. A commander who is decidedly uncool may be a Commander Contrarian

In Avatar: The Last Airbender </, Zhao is initially greeted as Captain Zhao by Iroh , but smugly corrects him by pointing out he's been promoted to Commander (presumably promoted; "Captain" usually outranks "Commander" in the Navy, but he was definitely acting like it was a promotion... it's probably because "Commander" sounds cooler , plus that way there's a close equivalence in Fire Navy and Army ranks, with Lieutenants and Captains in both, Colonels and Generals in the Army, and Commanders and Admirals (of which Zhao becomes one of a few appearances later) in the Navy.

Compare the Five-Man Band , which has a different structure and purpose but still follows a similar pattern. The primary difference relative to The Squad is that almost everyone in the Command Roster has a position of leadership or authority. The Command Roster usually follows as such: Sometimes there are a few additions to the crew. These additional characters may be separate from the others, but often there is overlap. Some additional roles are not officially part of the crew, but interact with them frequently enough to earn a mention in the team list: The members can be divided into three types: the leadership roles , the intelligent members and the action-oriented members . This may be why, in comparison to the Five-Man Band , the roles don't always line up perfectly: Compared to The Squad , however, the roles are a little more consistent: For further reference, see also Common Ranks and Common Military Units There are times when various characters are missing or replaced with a different character type, all depending on the needs of the story It is only a Command Roster when there are at least four characters from the primary list, otherwise it is just The Squad . The very presence of main characters in command roles, especially if they have an army of Ghost Extras to back them up, typically leads to The Main Characters Do Everything .

A form of theater developed in late-Renaissance Italy, ("artists' comedy") relied on a Universal-Adaptor Cast of stock characters ,

whose roles, characteristics, and costumes were well-defined and widely known. The troupe would take a scenario, which would outline the plot, and create their own dialogue and actions to tell the story. Contrary to popular belief, Commedia actors did not improvise their dialogue on the spot. Rather, they created the dialogue before performing the scenario. The Commedia dell'Arte is an ancestor of the British tradition of Pantomime , which also relies on stock characters and audience interaction. It also set the stage (no pun intended) for the Romantic Comedy genre, and has been emulated by the likes of Gilbert and Sullivan , William Shakespeare (The Taming of the Shrew </ is a particularly good example), Molière , Bertolt Brecht (expertly retooled the stock characters in Mr Puntila and His Man Matti </), A. A. Milne (albeit without the romance) and the writers of Black Adder </ and Fawlty Towers </. It is entirely possible for a modern-day work to channel these archetypes unintentionally; they're just that ingrained into culture, and they work</ . See Villainous Harlequin for a more contemporary depiction of this genre's most famous character. Commedia dell'Arte stock characters usually included: The cast of The Rocky Horror Picture Show </ fit this pretty well, for the most part:

A Cliffhanger that is set just before a commercial break, to ratchet up the suspense within the given episode. It's used to keep viewers' attention on the screen — preferably all through the commercial break — lest they miss the crucial moment of resolution. Some reality shows do this as well, normally right before big announcements of winners or people getting kicked off. If done well and used with discretion, it can really draw out the suspense. However, there are also quite a few ways it can go awry: Pseudo Crisis is a specialized version of this trope. Compare Charge-into-Combat Cut , when the show cuts to an unrelated scene at the beginning of a fight. Frequently cuts on a Reaction Shot as an extended Dramatic or Melodramatic Pause . Sometimes in some episodes, if a certain segment featuring Yakko, Wakko, and Dot is more than eight minutes, the segment will be split into two parts, with an act break in-between.

Some people ask themselves what they can do to show the Christmas spirit. The people who make TV commercials ask themselves how Christmas can showcase their product. The veneer on this facade is as thin as the snow on the Hollywood sound stages these commercials were filmed on. See also Christmas Rushed and Christmas Creep .

A trend of a commercial blurb in the form of a "pop-up" style graphic (audio optional) during a show. Commonly called "snipes" by broadcasters, these ads are typically not for products, but for the network's programming. They are not to be confused with logos used to identify a channel — which are usually called "bugs". However, snipes are often designed to interact with bugs (often triggering animations or other effects to it when a snipe appears). Often, they advertise what show is on next or later that day on the same channel. Sometimes, it can be a commercial popup indicating what show you are watching and what network you are watching it on. Occasionally the broadcaster will even go so far as to put a logo or text near the bug or in a different corner of the screen, to remind people that it is in fact and not some ancient old one, or put up an #EngineeredHashtag telling people that they can talk about the show on social media with it. The stations justify this because some people DVR and record

shows—this is also how the networks can remind people who are watching a pirated program where the program originated from, and ensure pirates at least buy the DVD to pirate from. A similar trend is to start airing commercials during the credits of a show or movie by smashing the credits to one side of the screen and showing promos on the other . The credits are usually sped up and muted in favor of the shocking revelation coming on later tonight. You can bet that if you see or hear "stay tuned for scenes from next week's show" at the end of the episode before the commercial it'll be this. Beyond just reclaiming some of the valuable advertising time they had previously wasted on actual show, these popups serve several other purposes linked to the rise of digital video recorders: If the pop-up is a countdown to something the network considers high priority, then it's a New Content Countdown Clock . Compare to Breaking News Interruption , when a program gets interrupted for breaking news. Sci-Fi Channel had a bug for their "Trek 2.0" version of Star Trek: The Original Series </, which included the Star Trek: The Next Generation </ door chime. They also play Next Generation</ reruns. Yes, they had a pop-up ad (for another show) which included a sound that was taken from the show that was actually playing.

An index of tropes about the advertising, marketing, and promotions of commercial product See Advertising for a list of work s

30-Day Free Trial

The commercial equivalent of the Show Within a Show . You're watching a commercial for a very generic product — the commercial may even be so laden with blatant Advertising Tropes that it doesn't seem quite real. This is because it isn't. The action will shortly be interrupted by... another commercial</! Zapulix-Brand Aspirin was just a Red Herring ! Probably meant to convey that the product is so great that it can just stomp all over other commercials. Also, the fake commercial will usually lampoon normal commercial devices, so it may give the producers of advertising some relief from the normal soul-crushingness of their existence. For obvious reasons, this only works once ; once you've seen the commercial, you know what the real product being advertised is. This makes this trope particularly effective for a Super Bowl Special , as Super Bowl commercials are generally aired only once in the first place. A subtrope to Bait-and-Switch . Similar to Trailer Spoof , but usually without trying to parody any specific real product. Not to be confused with a Product Switcheroo Ad .

A mix of Communism and Fascism is frequently used as "the government we don't like" in fiction. The trope is in action when the heroes enter a Communist country and find that it's Putting on the Reich - or when soldiers in a Fascist army call people Tovarisch . Modern examples of this trope may be explicitly referred to as Nazbols</ or National Bolsheviks</ . This trope is common and popular in the United States. Nazis became Acceptable Targets during WWII, Communists shortly after it , and both are foreigners from far-off places with strange un-American philosophies. Since both Nazis and Communists are villains by default , why not have characters who are both at once to be double evil ? But this was never much more than a Comic Book trope, and is a Dead Horse Trope at best at this point; there were always people who knew the contents of Nazi and Communist ideologies, which have awkward similarities but are not quite the

same thing. Over in Europe, this trope is unknown, and somewhere between eye-rolling and fisticuff-inducing . Germans are still ashamed of what they got up to in the war years , and not really in the mood for joshing about it just yet. Russians are rightly proud of their massive effort in the war ("WWII was won with British intelligence, American steel, and Russian blood", as the saying goes) — and are nostalgic for the Soviet Union itself (and especially for Stalin), and for the high relative prosperity and world-historic significance that they had under the USSR. The countries caught between two fires in the war , however, suffered at the hands of both sides — to this day, some of these countries have banned both communist and Nazi ideologies. There is, however, a certain degree of truth to this trope. Many officials in the countries caught between Hitler and Stalin managed to work for both sides (burning documents, scapegoating Jews, and giving just enough aid to La Résistance that you can claim you weren't a collaborator can work wonders). East Germany was Nazi-ruled until it was Communist-ruled, and their internal security forces , which had No Budget early on, used WWII surplus uniforms for much longer than you'd expect. (This made East Germans popular antagonists in US Spy Fiction .) Part of the problem can be traced to the Nazis themselves, or rather their official name, the National Socialist German Workers Party. This has lead certain political figures to denounce anything that they feel smacks of socialism as just another step on the road to swastikas and dodgy mustaches , with plenty of references to totalitarian Communism (especially Stalin) for good measure. Of course, there are three main problems with this belief: First, that Socialism and Communism aren't the same thing ; second, just because the Nazi party used the word 'Socialist' in its name doesn't mean it actually had Socialist (or Communist) objectives The faction of Nazis who took the "Socialist" part seriously were purged in the Night of the Long Knives, along with many others who Hitler decided had outlived their usefulness . , just like the Democratic People's Republic of Korea is none of those things and the Holy Roman Empire wasn't any of those</ things; third, that Hitler really, really, really</ didn't like Bolshevism, blaming the Jews for it , comparing it to a disease, and also kinda fought a war over that issue . See this trope's analysis page for further discussion — and for some recent (2000s) movements which are unpleasantly close to being Defictionalizations of this trope. See also Nazi Nobleman , for a different conflation of two groups that historically didn't always get on.

Deep-running continuity is both a blessing and a curse in television. It rewards long-time viewers with a satisfying story and the feeling that somebody really is paying attention. However, a series that weaves itself together too intricately risks making itself inaccessible to new viewers because "you really have to see it from start to finish." Fear of being dropped into the middle of a plotline they'll never understand without information that's already been given , or fear of investing their time in a series they'll have to get through hundreds of episodes to get a satisfying ending from (assuming it'll actually have one), can keep even the most interested hanger-on from tuning in, a risk that can keep a series with borderline ratings from reaching its full potential. Less common now in the days of DVD and Internet file sharing (and trade paperbacks), where back episodes are available to anyone with the time, money and/or bandwidth. Many networks are also making back episodes of their more popular shows available for viewing online. Yet even these

resources may not be enough to attract a casual fan who still has to invest sometimes serious money and/or time (hours or even whole days) to catch up on a given plot. Commitment Anxiety can also occur as a result of Continuity Lockout and Continuity Snarls within the work; even with the ease of availability of this material, if the writers make the continuity too impenetrable or convoluted, it can cause people to give up in frustration. Networks frequently try to draw new viewers despite this anxiety by using a Recap Episode . See also Ending Aversion and Archive Panic . For reluctance to commit to a new show lest it be Screwed by the Network , see The Firefly Effect . Not to be confused with Commitment Issues which is about a character's fear of committing to a significant other.

A character with commitment issues does not want to settle down with a Love Interest . They may think that being married is inherently boring and unadventurous , or they believe they're still not old enough to be serious yet, or they have issues stemming from observing the dysfunctional relationship their parents had , or being a swinger is just too much fun, or maybe they're Really 700 Years Old and are afraid that by committing they'll outlive the person they love Whatever the reason, don't expect them to jump into a Relationship Upgrade anytime soon The "I Love You" Stigma is a Sub-Trope and common symptom of this problem. Compare Insecure Love Interest , where the love interest's damage is specifically they don't think themselves worthy, Allergic to Routine , Runaway Bride (which may or may not be the end result of this trope), and The Ditherer who cannot manage any kind of commitment. A much more malicious version is the Intentional Heartbreaker , who dates people intending to dump them. Truth in Television for a lot of people. Has nothing to with Commitment Anxiety , which is about the fear of starting a long-running series. See also the Deconfirmed Bachelor , for when someone with Commitment Issues finally does</ settle down, often after swearing up, down, sideways, and diagonally that they'll never get married

By now, we all know that the people who write television shows aren't omniscient. Their knowledge of science, technology, history, and pretty much any other subject you care to name is often limited to that of a casual dabbler. The writers' mastery of logic, common sense and causality often yields to what makes for an interesting story. Let us not judge too harshly. As often as the writers may be inaccurate, the viewers are just as guilty of making similar mistakes. All too often, a well-intentioned fan will see the need to invent some Fanon , or an ill-intentioned critic will see the need to launch into a bitter diatribe based on some inconsistency or mistake he sees in his show of choice. About as often, the complaint will be based on a total fallacy. Sometimes, writers really are to blame, just not the way the fan thinks: An extremely common trope may condition viewers to accept its premise as absolute fact, and to cry foul when another series (more accurately) avoids the trope. See also Fan Dumb . Here are some examples of tropes which may fit this:

For one reason or another, this "married" couple just never legally tied the knot Maybe one of them is an immortal vampire without Undead Tax Exemption . Maybe there were legal issues precluding an official ceremony/registration. Maybe one didn't want to get married but gradually ended up in a situation similar to it due to external circumstances. Maybe they always meant to but just

never got around to it. Regardless of the reason, they are, for all intent and purposes, a married couple They may have children together or even be referred to as married, but they never got anything formalized. This doesn't mean that the couple never</ gets married; just that they go a very long time without doing so and little actually changes after the wedding. Many stories even end with the two getting officially married in a ceremony See Happily Married . Metaphorical Marriage represents a wedding-like moment that however is not an official wedding

A jury defies all logic and common sense and comes back with a verdict contrary to the evidence. It's not a Joker Jury , a Jury of the Damned , or a Kangaroo Court — a group of regular citizens has come back with the wrong decision. Usually, a not guilty verdict is intended to demonstrate the jury's outright gullibility (or intimidation), whereas an unfair guilty verdict indicates they were unable to see past some fear or prejudice against the defendant. In real life (principally in the USA), the "voir dire" process is meant to ensure that juries are made up of fair and impartial members who will treat the case seriously. In the UK and Commonwealth, it can include testing the competency of potential jurors. However, in most US jurisdictions, lawyers are allowed to weed out potential jurors for any reason at all (other than race), granting plenty of latitude for less ethical lawyers who prefer juries that are easily swayed by emotional appeals and courtroom theatrics. Occasionally, a surprise acquittal can be due to a phenomenon known as "jury nullification", in which the jurors return a "not guilty" verdict even though the prosecution has in fact proven their case. This is usually because the jury feels that extenuating circumstances justify the crime, or occasionally because they feel the law is unfairly applied or simply wrong

Comics Film Literature Live-Action TV Theatre Video Games Western Animation

When The Captain needs to contact Mission Control to talk to the Voice with an Internet Connection , he has a number of options. He could call him up on his Comm Link , or maybe even find a pay phone . But maybe this is a job for someone more specialized, or maybe The Captain needs someone to delegate this to while he deals with other things. He needs the Communications Officer The Communications Officer need not be an officer, and in fact, will often be a lower ranking member tasked with maintaining and operating the complex radio equipment. On a sci-fi show, they will often have a workstation on the bridge of the ship, while in a war movie, you can expect to see this guy running around two steps behind The Captain with a cumbersome backpack radio with a huge whip antenna. Whenever we see Mission Control , expect to see an entire squad of these guys at work. More mundane examples include a secretary in an office, who has the job of screening calls to their boss and sending out messages for them. If he is properly trained, he can also be a disproportionately dangerous individual , using his radio equipment to call in artillery fire and air strikes, bringing tons of high explosives down on his enemies' heads Against savvy enemies, he can expect to draw fire , especially if he has one of the bigger backpack radios. You can't call for help if nobody alive can use the communications equipment. If The Radio

Dies First , they can be expected to be hard at work trying to fix it, or helplessly declaring that it can't be done Overlaps with Mission Control . Will often be working as one of the Bridge Bunnies . A key member of the Command Roster

Take an otherwise uninteresting object, and have the other characters (or at least one character) interact with it as if it is a real character, and you have a Companion Cube. Sometimes, the object blurs the line between real and imaginary by apparently doing things which would be hard for an inanimate object to do or telling people things they shouldn't have been able to already know, but the defining characteristic is that we the audience never, ever see it move of its own volition on camera, even if it clearly must've done something. For some reason, Companion Cubes tend to become very popular with the audience . Something to do with the Uncanny Valley , probably. Or simply because the idea of having an inanimate object being a character is funny. Or maybe because it's easy to project the best traits you can think of onto the object. Or because you can make yourself a replica at home ... Dolls and stuffed animals, especially teddy bears, are common examples, probably because they're humanoid, friendly looking, and meant to be bonded with. Typically the owner will treat it as their Confidant . Security Blankets are also common in this regard. This can be used to reinforce a character's childlike innocence (if they're meant to be sympathetic) or make them look dangerously immature (if otherwise). Beware if they start Consulting Mister Puppet ! If a character gives a weapon this treatment, expect it to have a name . This can go wrong in fandom. Horribly, horribly wrong. As a frightening and interesting aside, it has been demonstrated in US Army experiments that people kept in isolation have a tendency to form attachments to inanimate objects (this is why this tends to show up in Speculative Fiction a lot, where the crew personifies their starships and other objects). Sweet dreams! If an inanimate object DOES move onscreen, it slides from this trope to Through the Eyes of Madness or Magic Realism in general. (Unless it's designed to move independently, like a Roomba or something.) The opposite is Living Toys . Also contrast Enmity with an Object (aka "Cargo Nemesis"). If an animal or a robot interacts with an object in a romantic way, that's Animal Sweet on Object . In 1959's The World The Flesh And The Devil </ , with Harry Belafonte's character acquiring a mannequin and dubbing it "Snodgrass".

Competence porn is a term by Leverage </ writer John Rogers and by lot critics . It's the thrill of watching talented people plan, banter, and work together to solve problems. It's not just "characters being good at a thing," particularly if that thing is fighting—otherwise the term would apply to virtually all fiction—but specifically about using cleverness and hard work. Though the term mostly applies to realistic dramas, there's an element of Wish Fulfillment to it, as characters in a competence porn series rarely have to deal with serious infighting, dead end ideas, and all the other difficulties that affect real life groups Common genres include Capers , Medical Dramas , the more idealistic Government and Law Procedurals , and harder sci-fi. Guile Hero and The Trickster characters from mythology and legend are antecedents Not to be confused with the Competence Zone or with actual porn . Compare A-Team Montage , which is this in montage form, Catharsis

Factor , The Beautiful Elite , and Asskicking Equals Authority

Every television show has its own average age-range of competence. Only people inside that range, whatever it is, are likely to be competent at anything relevant to the show.</ This holds whether you're trying to save the world or just performing A Simple Plan . If you're too young or too old, you're outside the Competence Zone of the show, which makes you dead weight. The 'kid' is innocent or bratty, and needs protecting. The old guy is cranky and complains too much. That sounds like common sense, but television often takes it a step further: the Competence Zone becomes a relative</ thing. A 17-year-old among twenty-somethings is just as much the "kid" as the ten-year-old among thirty-somethings. A 22-year-old is an "old guy" on a show about preteens just as much as the 55-year-old father is on a show about young adults. The only difference between shows is that the zone itself gets wider or narrower. This occurs because the main cast of a series are often near the same age as the target demographic. We relate to them, so we can subjectively ignore ages even much higher than intelligence may indicate. However, any deviations from this become obvious, and seem to demand explanation Most inexplicably, if the main cast ages during the run of the show, the Competence Zone may move with them</ . On the other hand, if the show changes to focus on different characters as old ones move on, the original cast may slip outside the Competence Zone. Subtropes include Adults Are Useless and Teens Are Monsters . See also Improbable Age , where the Competence Zone is imbalanced enough for viewers to notice. In a Teenage Wasteland , the characters may or may not have reached the self-governance Competence Zone. Can overlap with Protagonist-Centered Morality .

A situation where one point in a Love Triangle has already died, but the remaining "competitor" still feels the presence of the deceased as an obstacle in their relationship. Likely to involve Present Absence This trope is closely tied to The Lost Lenore , often involving Excessive Mourning . The Mourning After is when a character refuses to move on after the death of a love interest, and if a new love interest does appear, they will very much be in this position. The situation may be further complicated by guilt if the character Let Gwen Stacy Die . This may lead to the revelation that they were only Loving a Shadow if they come to realize the deceased wasn't as perfect as their memory portrayed them or that they were more in love with the idea of the person Compare Her Heart Will Go On , where someone does move on from the loss. This will likely be part of a Romancing the Widow plot

There are promotions in Real Life by companies that work like this: On each package of the product there's a coupon, you collect X coupons, send them in, and win a prize. X may be a reasonable number, but can also be ridiculously high. Often used to gauge and improve customer loyalty. A common marketing trick. Sometimes, this works like a lottery: Your chance of winning increases if you send in more coupons. In fiction, the first prize is something the protagonist really wants; like an all-inclusive holiday in Hawaii for the whole family. Hilarity Ensues when: Compare and contrast Free Prize at the Bottom . The most literal type of Plot Coupon . One of the types of prizes could be sea-monkeys .

Yeah! Tropes about competition! It's time to play these tropes! You're gonna get smoked! I'm gonna wipe the floor with everyone here! Oh yeah! None of y'all can stand a chance against me! Y'all gonna lose a lot more than these games when I'm finished beating y'all!

And You Thought It Was a Game : Did you really think this was a game? What a loser! Ha ha!

A Compilation Movie is created by editing together episodes of a television series to create a movie-length installment. Although this usually applies to home video releases, it can happen with broadcasts as well. How seamless the resulting movie is depends on how good the editor was, and what materials they had to work with (sometimes the opening credits or To Be Continued caption will be left in as the editor only had the complete version of each episode, or the end credits may only refer to the people who worked on the last episode). While the bulk of each episode is usually kept intact, some minor editing is usually made for time, continuity, or to make the new edit more seamless Back before home video recorders became widespread these would sometimes be released to cinemas as feature films. As home videos became more common, these were increasingly released as direct-to-video 'movies'. Often the plots of the two episodes thus used had absolutely no relation to each other (save the involvement of The Hero , naturally); this was sometimes patched over with dubbed-in dialog attempting to link the two adventures. With the modern trend of releasing full seasons of series on DVD and streaming services, this form of Compilation Movie seems to be dying out A Compilation Movie can also be used in serialized TV to combine all the episodes of a serial into a single "movie", if the serial was very long then the resulting Compilation Movie may be essentially a feature length Clip Show . In the mecha anime genre, these movies are pretty much still par for the course. In the case of Soap Operas that are aired several times a week, a compilation at the end of the week may be the only repeat. This is preferable to a back-to-back showing as it avoids viewers leaving after only the first episode, and in theory allows more advertisements where the credits used to be While the pacing of these movies are often quite suspect, especially in a series where there was originally a cliffhanger, new scenes are sometimes added to justify their release This is sometimes inverted by editing an extended episode or Direct to Video movie into several episodes for Syndication , leaving several odd cliffhangers if this wasn't intended during production Compare Clip Show , Five-Episode Pilot and especially Patchwork Story . See The Film of the Series if the film is more of an adaptation rather than a compilation

In a variety of games, there are many modes, characters, weapons, techniques, and stages that people can use at their disposal. Plenty of options, tools, and the like But when it comes to familiarity, all of that wouldn't matter Nine times out of ten, gamers will become attached to one mode/stage/ruleset/character choice, such that they may lose sight of the other options available. Complacent Gaming Syndrome occurs when the player is not able to break out of their comfort zone of control and continues to use the same exact settings for every match onward. This could

be because they have found a supposedly unbeatable strategy , or because they feel the need to sacrifice other features for Competitive Balance , or because they simply love those settings and feel that other settings are really un-enjoyable at best. This mindset fuels some of the flames in the Casual/Competitive Conflict , as outside observers tend to feel that their fun is being ruined by every match being the same In Board Game circles, if a gaming group wind up doing this for a particular strategy, it's known as Group Think, and seems to occur when a group collectively decides on a 'best' strategy for a game, however balanced that strategy is against other strategies. The best remedy to it is simply to introduce new blood into the gaming group, or at least for some members of the group to play the game with another group and pick up some new tricks to introduce back into the gaming group suffering from it. Alternatively, it could simply be a Game-Breaker that wasn't discovered in playtesting Compare Just Here for Godzilla . When players try to enforce their specific playstyle onto others, they become Scrubs or "Stop Having Fun" Guys The trope for limited locales is at Abridged Arena Array The exact opposite condition, most often induced by a stringently balanced game, is Alt Itis . Contrast with Self-Imposed Challenge Games with evolving Meta Game tend to avert this, because as new strategies are learned, characters fall in and out of popularity

They say that there's no such thing as a free lunch. No matter what, someone has got to pick up the tab. However, sometimes a company or business decides to be a little generous with a promotional campaign and pay the costs to distribute samples or portions of their goods and services to the public at no cost to us consumers. Although such free samples are usually small, very minor things of cheap value to keep costs down for the party providing it, a free sample is still a tiny perk for the person receiving it and is always graciously accepted... or, at least, that's what the companies responsible for the campaigns would prefer, but that's usually not the case. Complaining About Things You Haven't Paid For is a trope about a person or character who acquires something at no monetary cost to him/her (usually through a promotional giveaway but can also cover things like outright thievery) and doesn't like it and will likely demand compensation for not liking it. This is commonly referred to with the saying, "Don't look a gift horse in the mouth." Presumably a common habit of pessimists and picky people; in a stark contrast of this behavior, people or characters who have no problems looking on the bright side of things may frequently make a remark along the lines of, "Who cares if it's a piece of crap? It's free!" (or, depending on the circumstances, "It's stolen!") This is of course Truth in Television . Just because you got something for free doesn't mean you have to like it. If anything, someone who did not pay for a product is much more likely to realize it's crap and throw it away, as they don't have to justify to themselves having wasted money. Those who believe in the concept that "time is money" may also be prone to this, if they believe their time has been wasted. Also, this doesn't apply when something free actually ends up causing harm through no fault of the receiver. Compare You Get What You Pay For . When the thing was actually given as a personal gift rather than another form of freebie, see Gift-Giving Gaffe or My New Gift Is Lame . No Real Life Examples, Please!

This character simply can't</ die. This is because they are both of

the following: The Ageless — The character does not age. Note that "mere" Ageless characters who can regenerate from a drop of their blood cell or survive point-blank nukes and the like, are not</ enough to qualify. To be this trope, a character must be unkillable</ by at least all physical means, such as by endlessly resurrecting every time</ you kill them, being Barred from the Afterlife and so can't move on, or being blessed / cursed by God or other similar entities so that they won't</ die. Most Physical Gods or Powers That Be fall into this category, as do a lot of Cosmic Entities and Anthropomorphic Personifications . A Time Abyss will tend to be this as well, as accidents tend to happen over the millennia, and invulnerability is needed to keep them going. Most fictional souls</ also fit under this, if the work contains evidence of their existence. Ghosts can be banished to the underworld or sent on to the next life but not killed. Though there are exceptions. This form of immortality can often be seen as a curse or a blessing. This is also the end-goal for the most ambitious Immortality Seekers , although it's rare indeed for them to achieve it. More commonly they have to settle for lesser and more impaired forms of immortality like Soul Jars , Fountains of Youth , or Life Drinking . Also note that just because they are unkillable doesn't mean they are unbeatable. A sufficiently powerful character could still ruin their plans or subject them to a fate worse than death or imprison them for eternity or cause a shift in morality or amnesia. This is a subtrope of Immortality .

When translating works of fiction sometimes you keep the original title in the original language . Sometimes you try to make up your own translation or equivalent. Sometimes you just make up a title. Often the results of copyright disputes or because the title cannot be translated and keep making sense (because it's based on a pun or a specific expression in the language it was made in, for example) Related to, but not to be confused with Market-Based Title . That trope is when titles are changed in the same language. This trope is when titles are changed in translation (note that the new title can still be in the source language). If the title is changed to make it seem like the work is related to a totally unrelated work, it's a case of Translation Matchmaking . See also The Foreign Subtitle and In Name Only Examples are divided by language. Please list examples under the language being translated into</, rather than the language translated from</ Remember that what you are reading could be a translation of a translation of a movie title, or even a translation of a specific interpretation of a "Blind Idiot" Translation ... so particularly perplexing titles might not actually be a mistake on someone's part, it just worked out that way

A downplayed version might involve the report or speech going on a tangent (i.e. vaguely related to the assigned prompt). Even then they might drift into a completely different subject, making you wonder how they managed to get there. See also One Tract Mind , where a character always</ inserts a specific belief into their speeches and/or writings, no matter how irrelevant. Compare Script Swap and Oh Wait, This Is My Grocery List , where someone didn't mean to make an off-topic report, and may have even made a good report...that's at home, while they're reading their grocery list or other wrong script.

Also compare Padding the Paper , with which this sometimes overlaps.

The Complete Monster is the most depraved of all characters; a villain utterly lacking in redeeming features. Trying to put a value on the evilness of a Complete Monster is like calculating the credit score of Bill Gates: it's a moot point. Or, anyway, that is how the character is presented in the story. The character is a bad guy, full stop. The author has not taken the character through any actions toward redemption, or at least any that stuck. The Complete Monster can be recognized by these signs: Characters calling out other characters for their crimes In-Universe is You Monster! . Due to misuse, examples of this trope go through the before being added to works.

People who create music. More specifically, people who put extremely careful craftsmanship into their music. These aren't just artists that "jam out" their songs. These are artists who usually use sheet music, or at the very least computer software to plan out their music. Musical Theatre

Certain media, including Real Life , tend to have the time and space to utilize Loads and Loads of Characters , a large number of individuals with significant and/or necessary contributions to the storyline. But in an adaptation it can be difficult to offer adequate time and space so that each and every character gets their just due for how they impact the story. To be faithful to these characters may, at worst, make them come across as a living Plot Device , existing only for the sake of the plot and not a fleshed out character of their own with individual talents, interests, and backstory A solution is to invoke artistic license and compress two or more such figures into a single character with traits drawn from all of them. For the sake of telling a proper story those contributions are relegated to the actions of only a few. Instead of showing the legwork of an entire team of intelligence officers to decipher important information, it's rolled up into one person putting it together. Instead of having three different smart guys on the team divided up into distinct fields, you make one of them an Omnidisciplinary Scientist and discard the others. It's a method of streamlining both the plot and the character interactions; there are fewer people to follow and everyone who is still around has more to contribute to the story This is frequently done in works Based on a True Story , since no medium can compete with the Loads and Loads of Characters featured in Real Life . Whereas most of humanity's most interesting achievements have involved lots of people with different motivations, it suits the Rule of Drama to simplify things to a handful of characters with well-defined objectives. Though there may be nameless individuals wandering around with their own story to tell , the core plot is dictated by the people with names . Some might object to removing an important character and his or her contribution to the story, but on the other hand it means the story has a chance to be told This can sometimes get complicated, as the removed character may have his or her personality</ split up among the remaining characters (Deadpan Snarker given to character A, TV Genius attributes given to character B), or it is something

as simple as someone actually having the removed character's appearance and personality but given a different name. In some extreme cases with certain stories that have regular adaptations every few years, an Era-Specific Personality gives them the opportunity to fuse specific versions of the SAME character in different adaptations, making someone a composite character of him- or herself A Massive Multiplayer Crossover might do this to tie the continuities together, by revealing Character A from Series 1 is " really " the same person as the similar Character B from Series 2 Commonly involved in Adaptation Distillation and Adaptation Decay . Adaptation Origin Connection is a subtrope wherein a character important to the series that wasn't involved in the Hero's Origin Story in the original is</ in the adaptation, replacing a character who usually either got Demoted to Extra or was just a Starter Villain . See also Economy Cast . Sometimes a cause of an Adaptation Personality Change The inversion, where an adaptation divides a single character's attributes among multiple characters, is Decomposite Character

It's the simplest way to turn time into money: drop a few dollars into a compound interest bank account, then hop into your Time-O-Matic or become Human Popsicles and come back in a couple dozen decades to find that your pocket change has exponentially increased to a fairly tidy fortune. Of course, this particular moneymaking scheme is dependent on a number of preconditions at both ends of your time journey: As one can see, a more secure way would be to invest in something that regularly outpaces inflation (like stocks or bonds). The best way (especially if you can control the time travelling), is to make numerous stops, investing in securities that have very high short-term returns (for example, a stock that jumps 20% in value in one day, but overall has average growth), and continually reinvesting the returns. This removes most of the problems above, but may get you arrested for insider trading. To avoid such hassle, one could be tempted to instead use time travel to gather collectibles before the majority are destroyed or lost. E.g., a 1928 $500 or $1,000 bill is still legal tender today, although worth much more than its face value to collectors. However, this scheme opens up a whole new can of worms in terms of authentication and ensuring your actions don't eliminate its future worth, not to mention you ought to leave the currency in a safe place then travel back separate from it and retrieve it - trying to sell a 1928 bill in 2020 that has not obviously aged 92 years will make collectors suspect the bill is counterfeit, even though it isn't. The bill will seem too</ new. Alternatively, a prospective time-traveler could get around the currency problem by using their seed money to purchase non-currency valuables, like jewels or precious metals, and then sell those at your investment-point to get chronologically appropriate tender . But watch out that they aren't Worthless Yellow Rocks in the future. And of course, if any of these tactics are indeed possible, you probably won't be the only one to notice this. Hordes of time-travelers attempting to manipulate currency is sure to result in the eventual destruction of the economy (or the time stream). Time-travel responsibly, folks.

While Adaptation Distillation will condense things down effectively, a Compressed Adaptation will leave out whole chunks, hoping that the story stays together while being swiss-cheesed, and/or combine certain scenes - much to the chagrin of many of its

fans, of course This trope usually pops up when a relatively long story (usually literature) has to be adapted to a fresh medium that has time constraints that the entirety of the original plot could never reasonably fit, whether it's a film, OVA , a Mini Series , or even a theme park ride . Instead of simplifying things down into a distilled adaptation or merging and editing elements to create a pragmatic adaptation , the writers basically decide to start cutting out scenes to fit the story into the allotted time instead. Sometimes it works. Other times, you get a jarring mess that only people who already know the original story can follow Oftentimes, when choosing what to cut in a multi-work condensation, the First Installment Wins and stays more intact than later installments crammed into the adaptation. This can become self-perpetuating in future adaptations hours is the standard limit that most filmmakers try to abide by, because if it's any longer than that, it's very likely that not many people will want to watch it (which means it will make less money for the producers, especially since you can't show it as often in the same theater). And while that might sound like a lot of time, you'll quickly find that you just can't do in a two-and-a-half-hour-long movie what you can in an 800-page novel This is basically the opposite of Overtook the Manga : instead of there being not enough manga for the anime, there's too much</ source material, so instead of the anime being filled with Filler , it gets compressed Note that this can still overtake the manga in the sense of being produced before the manga is done; this may result in a Gecko Ending . Contrast the opposite, Adaptation Expansion and Divided for Adaptation . Might cause a Continuity Lockout , Orphaned Reference or Adaptation-Induced Plot Hole . If what's compressed is the period of time over which the story takes place, that's a case of Adaptational Timespan Change Zack Snyder 's Watchmen </ film is about two and a half hours, though manages to get through most of the major characters' stories. To demonstrate how many subplots were cut, a "motion comic" adaptation was released by Amazon that runs five and a half hours The film trilogy of 20th Century Boys </ , though it's about as good as it could be as the films were written by the manga's author Naoki Urasawa. Poor Chouno really gets short shrift in the third film. After a pretty large role in film two, he's only given a couple brief appearances to wrap up his personal story arc before disappearing completely. Though given all the other things that needed to be resolved, it's hard to blame them for not wanting to spend too much time on this comparatively tangential plot thread

Societies in the future, particularly in older media or modern works with elements of Retraux , are sometimes depicted as having a computerized justice system. Part of the use of this trope is for shock value (to modern audiences accustomed to more humanistic values underlying their familiar legal systems); the other part of it is to reinforce that the setting is either The Future , 20 Minutes into the Future , another planet, an Alternate History , or some other futuristic or otherworldly setting. Occasionally, a variant will even show up in the Present Day . Sometimes, but not always, a symptom of a futuristic Kangaroo Court , as computers can be programmed by human beings to distort the truth or cover up Modern consensus is that a truly computerized justice system is unlikely. Judges have to puzzle through difficult legal reasoning that often depends heavily on experience, "common sense", and a sense of justice. While a lot of the rote work of the courts can

be automated, you'd be surprised how many issues require human judgment to resolve fairly. Meanwhile, juries also rely heavily on common sense and experience with human beings to figure out if other human beings are trustworthy. A computer that could replicate the kind of human judgment needed to consistently decide cases in a way people would accept would probably be an AI so sophisticated it wouldn't be worth bothering to build it What role computers play in the actual trial can vary considerably. Usually the computer is either the Judge, Jury or both. Computerized prosecution is also common, somewhat more so than a computer playing the role of Defense Attorney (though these show up, as well, from time to time)

Computers in fiction are frequently portrayed at exchanging Compinformation or communicating mainly in binary, i.e in zeroes Compand ones. This is because Real Life computers use binary Compinformation in their internal processing, and authors then Compapply this well-known fact to depict how computers in general Compoperate are with Expospeak

A great many of the ideas on this Wiki would, in the days before the interwebs, have been referred to by literary critics as conceits</ In literature, a conceit is an idea, collection of ideas, metaphor, structure, or other imagined device which defines or enables the world of the story, or some action in it. Conceits can be obvious; if a book is about space explorers who question their humanity upon discovering life on Mars, the conceit is that there is life on Mars. Originally the term was used much more specifically, to refer to a deliberately chosen juxtaposition that rarely or never occurs naturally (life/Mars), used as a means of revealing the unique properties of the items or ideas being juxtaposed. Its usage has become much broadened. A good example of a trope that is also a conceit is any trope of the form Our Xs are Different Not to be confused with extreme pride

Some albums are just a random assortment of songs that are only linked by being recorded/written at around the same time. Other albums are arranged so that the songs flow together without sudden Mood Whiplash between tracks. Then we have the Concept Album, which goes even further than that. Similar to Rock Operas , concept albums are albums unified by a theme, which can be instrumental, compositional, narrative or lyrical. Most often, they are meticulously planned, with all songs contributing to a single overall theme or unified story; this plan or story is the concept. Given that the suggestion of something as vague as an overall mood often tags a work as being a concept album, the precise definition of the term is up for debate. Put it blunt, it's a musical work of art with a Central Theme . In the world of musical theatre, there is a separate and distinct form of concept album known as the album musical, in which the performers are playing characters in a story, a type of recording which encompasses such rock operas as Tommy </ and Quadrophenia </ by The Who and The Wall </ by Pink Floyd . These often feature an Album Intro Track and/or Album Closure . Compare and Contrast Kay Fabe Music where the music is more about theatrics or performance, and may or may not have overlap with stories told through their music. : The following albums are referenced by decade, with multiple artists (such as Fear Factory , Alice Cooper , and Jethro Tull) straddling multiple decades. This was done intentionally, to display the progression of concept albums through

the past seventy years in scope, detail, intensity, subject, and variety. If you just want to find concept albums by artist, please expand all folders and use your browser to search the name of the artist. While adding examples, please separate multiple albums by the decades during which they were released. (In this way, the page can become a Concept Page!) Meat Loaf's Welcome to the Neighbourhood (1995) tells the story of a couple's relationship from first meeting and having sex in "Where the Rubber Meets the Road" through falling passionately in love, infidelity, breaking up and the narrator's eventual death in "Where Angels Sing".

Concept Videos are a signature of the early-'80s "Golden Age" of MTV Often these make use of Talky Bookends Compare with Lyrics/Video Mismatch , where a music video has an actual narrative, except that the story is different or even not related to the lyrics

Essentially, when the climax of the show/movie takes place around some big public event such as a concert, performance, sporting event, or similar such public gathering that the heroes, for whatever reason, have been brought to. If the concert begins after the climax or continues to the end credits, it's a Dance Party Ending . See also At the Opera Tonight . This trope tends to come in one of two versions:

A prominent public event is taking place; maybe a celebrated theatre troupe, or the National Philharmonic Orchestra, or the World Series And what an honour - U.S President Target will be there! And His Holiness The Pope ! And Her Majesty Queen Elizabeth II ! So of course, it's now the perfect target for any evil terrorists or Big Bad who wants to make a statement about how evil they are by blowing it - and any prominent public figures who happen to be there - sky high, or by assassinating the famous person at the climax of the production. And since the body count will start increasing at the end of the show, and the show's already started, that means Our Heroes will have to haul ass to the theatre in order to stop it... Essentially, the Action Movie Concert Climax involves the Big Damn Heroes bursting in upon some huge public event to save the day and defeat the bad guys. As the numerous innocents who are also at this production unwittingly risking getting blown up or shot aren't enough, a public notable will also be in attendance at the performance to really up the ante - nine times out of ten, (s)he will be bored stiff with proceedings. Expect the bomb to be planted in the piano, primed to explode at the moment the pianist hits the climactic chord, or for the sniper to be hidden on a gantry above the stage. In some cases, the heroes may have to actually burst onto the stage and disrupt the performance in order to save the day, leading the confused audience to wonder whether this is All Part of the Show (Hilarity Ensues , naturally). Other times, the final confrontation will take place off-stage in the wings or behind the backdrop whilst the oblivious patrons enjoy a bit of culture or sport (except, nine times in ten, the celebrated public notable, who will usually be bored stiff), but in these cases don't expect the heroes to be able to slip away unnoticed without their moment in the limelight; usually, after they've saved the day and are exhaustedly gathering their breath, the curtain will choose that moment to rise, exposing the stunned heroes and the chaos that's just been occurring to the

entire audience. In either case, there will be a moment's confused pause... and then a solitary figure will start clapping. It'll be the President, the Pope or the Queen, who is finding this to be the most interesting thing (s)he's seen in the whole damn production. And once everyone's joined in, usually - but not always, the heroes will figure 'what the hell', and give the audience what it really wants - a Concert Kiss between the smitten love interests.

The Hero and the Love Interest have been separated, but the hero has managed to track the Love Interest to a large public place. What's needed to bring the two back together is a Spontaneous Romantic Gesture - and what better Grand Romantic Gesture than to serenade them with a song ? In this climax, the two lovers are brought together at a concert (or similar public place), usually thanks to the beauty of music (or, less frequently, some other form of artistic expression). It may be a song that the hero has written and is now performing for the love interest, or that the Love Interest's favourite artist - who is, deep down, a bit of a romantic - has been persuaded to sing. This version is almost certain to end in the Concert Kiss .

At some point in time, there was a thing—an individual work, the body of work of a particular creator/performer/artist, an entire genre, a trend in an art medium, etc. Whatever it was, this thing got very, very popular. But at some point, it just got too</ popular. It was talked about everywhere, with no water-cooler conversation avoiding the subject. It was overexposed until people got bored . It got so much publicity and so many bad imitators that there was plenty of time to notice each and every flaw and dissect them under a microscope. Soon, small insignificant flaws become regarded as unavoidable and unforgivable sins . Sometimes, it just takes a change in sociocultural attitudes for the thing to fall out of favor. The final tell-tale sign is indifference, ridicule, or even downright hatred. Not just for the thing itself , as the people who like it often become the subject of nasty, highly-specific stereotypes . Simply mentioning that someone likes it online, even if meant completely sincerely, is considered trolling Five or ten years later, almost nobody will admit that they ever liked this thing, and the only mention in the media will be cheap jokes about the fad . Retrospectives of the time in which it was popular will either point to it as a symbol of everything wrong with that time period's taste in its medium , or quietly skip over it and just pretend it never happened . It may get revived decades later as So Bad, It's Good or by Bile Fascination , but it's unlikely to be popular on its own merits ever again. In fiction (and Real Life), a Disco Dan is a rare admirer who refuses to accept the judgment of history and passionately holds on to the belief that the dead thing is still as big as it always was—usually with comical results When all of this has happened, that thing which was once so popular has become Condemned by History . Of course, twenty or thirty years later, the situation may change again . But if not, it will remain either scorned or simply ignored Sometimes caused by people saying that It's Popular, Now It Sucks! too much, but not always. At its height, these people usually exist, but are typically not very vocal. It's particularly common with things that never had a cult following to begin with—they went from nowhere to everything, and then back to nowhere, very suddenly. This is essentially Hype

Backlash after something faded from popularity, while its the haters remaine active For a more detailed examination of the ways a work can become Condemned by History, see the Analysis page Compare Jumping the Shark , "Seinfeld" Is Unfunny , Dead Horse Genre , Fallen Creator , Hatedom , Periphery Hatedom , and Discredited Meme . Contrast Vindicated by History and Nostalgia Filter . Also compare and contrast Overshadowed by Controversy , where uproar sparked by or around a work is better-known than the work itself, sometimes leading to the work and/or creator becoming condemned if the uproar is severe enough. If a single work is perceived as rendering something Condemned by History, it's a Creator Killer , Franchise Killer , Genre-Killer , or Star-Derailing Role . Compare and</ contrast Unintentional Period Piece , when a work can be precisely dated to a specific era, but it may (or may not) have remained popular up to the present day Real life examples require a 5-year wait, before they can be added to the page . A show or other work which is currently in production cannot be an example even if popular opinion has turned against it for whatever reason. This is also not a place to be Complaining About Shows You Don't Like

Being found guilty of a crime grave enough to merit imprisonment, a life sentence or death row tends to make people less sympathetic to your situation in life, such as is left. This is why convicts are on a very</ short list of Acceptable Targets for a whole slew of not nice things; and in fiction, there are plenty</ of these not nice things. Military conscription, medical experiments, Blood Sports , Deadly Games , Human Sacrifice , the list goes on and on. The cons aren't shipped off to a sub-human prison, that would be... wasting resources . Instead the government uses them in a "contest" of one of the above in order to get some use, entertainment or money out of them. Usually they're "kidnapped" and officially were " Released to Elsewhere ", but there's plenty of distressingly legal ways to whitewash the whole bloody affair. The government may declare that All Crimes Are Equal , and as un-persons the prisoners can be used for basically whatever. If there are those who want to maintain a semblance of humanity and legality, the cons will be offered to participate in the contest as an "option" to serving their full sentence so they can win their freedom . For some reason, the general public is rarely upset by the possibility of a battle hardened ex-con who is in no way rehabilitated being released onto the street... or they would be, if it were public knowledge and any actually survived. When this trope is used in conjunction with Blood Sport , the reverse seems to be the case. The most successful cons will develop a fan base clamoring for them. This story very likely takes the (sympathetic) POV of the cons , because sympathizing with people conducting whatever horrific acts are about to be perpetrated on the cons is usually a bit too alienating for audiences. So aside from giving most of the cons a smidgen of sympathetic characterization, there will be one innocent man who was framed to get him specifically into the night's debauchery. (Alternatively, his crime may be justified — stealing bread for the hungry — or not appear serious to the audience — failure to bow before the noble he didn't see</.) Usually this one innocent man and the most likable , noble or least evil con will survive to the end ; sometimes this is justified by their character making it possible for them to trust each other . The game is of course rigged to kill all the Condemned Contestants, which makes the protagonist's success a "threat" both because they might get out and expose the charade, and are getting so popular with the audience at home that they'd listen.</ (If the

contestant is honestly given a chance</ to survive by whoever is in charge, then this trope doesn't apply.) Compare Boxed Crook , Gladiator Games , Trading Bars for Stripes and Win Your Freedom .

A common Sitcom trope. When asked if they did something the character vigorously denies it, until they discover the asker has benevolent intent (or that continued denial is just going to get them into a worse situation), whereupon they instantly confess. Like so: Compare Opinion Flip Flop and Blatant Lies . Not to be confused with False Start .

In The Princess Bride </ , when storming the castle:

Boiled down by Monty Python's Flying Circus </ to its bare bones in the repeated line "No! No! No! Yes..." (usually delivered by Eric Idle).

This joke:

Alice and Bob haven't admitted that they love one another yet. They might be unable to just spit it out already. They might already be together , and just haven't gotten around to popping the three magic words yet. Maybe Will They or Won't They? is being milked for all its worth and it's just been a matter of sexual-tension-packed time Finally(!), one or both of them makes their feelings clear. It's a happy, heartwarming, romantic moment. They smile, they hug, they kiss. Good feelings all around Cue the sex Confession Causes Consummation is when the first confession of love between characters is immediately</ followed by sex. It's not unusual for the immediate sex to be used as the couple's moment of Relationship Upgrade or the confirmation that They Do , as they will afterwards be treated as an Official Couple . It also doesn't have to be their first time having sex, but it is their first time confessing their feelings This trope is very common in visual novels/dating simulators, where the romance between the main character and the pursued love interest culminates in the love confession and the sex. It's not unusual for it to be the "grand finale", with the story ending shortly after Sometimes a very stressful experience inflicts a Love Epiphany that leads to the confession, in which case it may also be Sex for Solace . Characters who had a hostile relationship with one another prior to the confession-and-consummation are probably looking at a Slap-Slap-Kiss sort of romance. Last-Minute Hookup might be at play if the confession-and-consummation is a means to wrap up loose ends before the story is over Compare Fourth Date Marriage , which goes beyond just sex. Compare this to Sex Equals Love , wherein the sex is the beginning</ of romantic feelings, and Insatiable Newlyweds , wherein recently a recently married couple can't keep their hands off each other. Also not to be confused with Coitus Ensues , which is when sex between characters comes out of nowhere/for no reason/grinds the plot to a halt

There's something very important we need to tell you. A lot of times in life, people confess to a lot of things. Be sure to check out these tropes about confession.

Your crimes are catching up to you. The cops/your boss/your wife

knows that you're hiding something, and they're no longer buying your lies. What are you to do? Confess, of course, just not to what you really did. Maybe you admit to a piece of what you did, but not the whole thing, maybe you completely make something up. Either way, you hold them off discovering what you're really up to. There are clear advantages to pretending to come clean. When you admit to wrongdoing, people usually don't assume you're lying. When they think they've caught you, they don't usually keep investigating, and you've got a perfect explanation for why you've been acting strangely and looking guilty. The disadvantage, of course, is that you're on the hook for whatever you confessed to, so you better be sure it's worth it to keep the greater crime concealed. May be used by an undercover cop to keep from being exposed, or by a Justified Criminal to avoid punishment. Different from a Plea Bargain in that the character is trying to keep their crimes concealed, not trying to strike a deal to avoid punishment. In Real Life , this is one of the most common ways in which criminal trials are resolved. For instance, someone accused of murder may well confess to the crime of manslaughter/culpable homicide, or someone accused of dealing drugs may confess to possession but not to intent to supply. However, it is generally up to the prosecutor if they want to go with this - if they feel that allowing a murderer to confess to manslaughter would not be a just result, then they are within their rights to reject a plea of innocence and fight on. This trope is so common, in fact, that some criminal defense lawyers have said that they dread genuinely innocent clients - there is only one</ just result in their trials, whilst most of their clients are at least guilty of something</ , if not the exact charge on their indictment. However, the fictional version confessing to a not only lesser but completely unrelated crime is significantly rarer in real life; typically when the authorities are interrogating a person they have some</ idea of what crime they actually suspect was committed. A Subtrope of Infraction Distraction . Contrast False Confession , Taking the Heat , and Embarrassing Cover-Up .

Confirmation Bias is the fallacy of lending extra weight to information and arguments that confirm your own beliefs while disregarding or downplaying evidence that disputes them. This comes in several forms: In fandom, the first of these three types of Confirmation Bias is the most common. Essentially, if a book or any other media product follows a distinct philosophical, political, or religious slant, then people who agree with that slant will often like it despite any flaws it has. Conversely, people who disagree</ with its message will often reject it out of hand, regardless of how well written it is. On the other hand, having this type of Confirmation Bias doesn't</ mean that the audience is unreasonable, despite the fact that they may not be receptive to your particular work. If a work, despite how well-written, advocates or is founded on principles that the audience finds contradictory to their sense of morality or ethical responsibility, they may find themselves unable to respond favorably (e.g. a book which advocates the genocide of a certain ethnic group won't find many supporters among that group...or the majority of people who value human life). The viewpoint of the work may be so detestable to a specific audience that the message may be more important</ to that audience than the beauty of the cinematography or brilliance of the acting. The reverse may be true as well. If a work displays a message that is very important to the audience, they may forgive its flaws in favor of

the ideals (e.g. a film about the importance of peace and love will be better received by people who believe in pacifism and universal compassion), although people are usually more critical — as in objective critique — of the style of a work they agree with , than the style of a work whose message they despise (where the style may be completely</ over-shadowed by the ideology). Keep in mind, however, that many people neither agree or disagree with a message before being presented with an argument that they find convincing. The purpose of many of the examples of this trope can legitimately be said in at least a small part to convince the undecided, rather than change someone's mind. Even so, the Confirmation Bias effect is noticeable. It is worth noting that even if a work may be not be aimed at converting ideological outsiders, that doesn't necessarily mean it's not designed to convert people . Also note that confirmation bias does not have to favor positive</ beliefs. Atheists, for instance, can be just as prone to considering only arguments opposing, not supporting, the existence of God. Also, this does not mean that everyone with a given viewpoint will like a work just because it follows that same view. Some may criticize it for not doing a good enough job persuading those who are undecided or who have the opposite view. Contrast Don't Shoot the Message , which is about disliking a work because of its style even if one may agree with its message. Compare the related fallacies No True Scotsman , Hitler Ate Sugar , Moving the Goalposts , and Begging the Question A form of Selective Obliviousness ; see also Opinion Myopia . Taken to extremes, this way of thinking will result in a Captain Oblivious .

This page used to be a repository for answered queries to You Know That Show . Today these queries still exist there Some older queries are archived at Archive.Confirmed YKTS , Archive.Confirmed YKTS 2 and

This is the basic problem to overcome in a story, the driving force. If you don't have conflict, you don't have a story. Or just a story of things happening without incident More than any other trope, save for the Characters who are in a conflict, this is vital to fiction. You can likely find loads of theories and essays on why this is so, but for here, just trust us. You need it Conflict can come in many forms. According to Arthur Quiller-Couch, there are seven kinds of conflict, creating seven basic plots (Not to be confused with The Seven Basic Plots </ by Christopher Booker, which articulates a theory closer to that of The Hero's Journey) The problem is another character (Bob needs to defeat Alice to become Class President) Traditionalists boil it down to the first three , redefining "Man" as a defeatable entity and "Nature" as anything that has to be survived or changed rather than defeated. According to the three basic conflicts, a Zombie Apocalypse would thus be Man Vs. Nature. Going by this model, Man vs. Society and Man vs. God/Fate would both become Man vs. Nature, and Male and Female would become Man vs. Man (Man in the Middle and Man vs. Machine, on the other hand, could be either one depending on the plot) Some stories may seem</ like they don't have a conflict, but if they have factors within the story that still present a challenge, then their story still contains the third type of conflict. No Antagonist describes this kind of conflict without an antagonistic force However, it is possible to have stories that actually</ don't have a conflict; such works tend to be non-fiction

or experimental/postmodernist stories. Some episodes of Slice of Life series can also qualify, especially those following the Kishotenketsu formula. Works without stories can also be considered as lacking a conflict (video games may even have a conflict but no story, letting the players create their own stories through the conflict). Such works are ultimately exceptions and not the rule, and in general, if it's a conventional and engaging story, conflict drives it It could be said that Mary Sue stories are weak because there is no conflict in how the Sue achieves things, or that the conflict is so weak and ineffectual that it still comes across that way (as with poorly-written stories starring an Invincible Hero . Conversely, some works come off as weak because the conflict is too grave and appears to have no palatable solution . Like many other things, it's wise to strike a balance between the two Due to the breadth of this trope, any work examples should be listed in the tropes under the sub indexes

When an imposter is spotted because the person he's impersonating is in the group/room with, or is himself, the person they're trying to deceive If you have a good enough disguise, you might still be able to get away with bumping into the person you're impersonating if you convince them that you are actually their reflection in a mirror , or if you are really</ lucky, find out that your disguise is a uniform within regulation. A particularly audacious infiltrator might respond by accusing the person they're disguised as of being the imposter . Those liable to Poser Hating are also generally vulnerable to this. This is the key risk run by anyone executing a Janitor Impersonation Infiltration A variation that occasionally appears in superhero stories is for the hero to encounter someone impersonating his Secret Identity Compare I Am One of Those, Too , I Am Spartacus , and Fright Beside Them Not to be confused with Actually, I Am Him

Works with Chinese characters made anywhere other than China will sometimes have said character attribute a proverb to Confucius, often by prefacing the proverb with "As Confucius say" or simply "Confucius say". Apart from being grammatically incorrect, often by even their own standards, it reveals the fallaciousness of their attribution (Confucius has also been referred to in fallacious attributions as a "wise man"). Actual proverbs from the Analects are always prefaced with "The Master said" The phrase that started it all, "[As] Confucius say(s)", became popular in Western culture largely through fortune cookies in Chinese restaurants. Quotes from Buddha have also been attributed to Confucius at times, only aggravating the confusion Compare Ice-Cream Koan . Subtrope of Wrongfully Attributed . Sometimes overlaps with As the Good Book Says...

When large action sequence takes place in an urban environment, it is reasonable to assume that there were a significant number of people who witnessed the events. Sometimes, the incident is successfully covered up , but at other times, eyewitness accounts and recorded footage make this impossible, and it's splashed all over the news the next day Some works take this a step further, and have the local Intrepid Reporter interview someone who was there at

the scene as part of a news broadcast . This character is usually not a member of the main cast, and will often end up as a One-Scene Wonder at best. Dramatic variants do exist, but these interviews are most often Played for Laughs . The interviewee is often a ditzy teenager or young adult who recounts the story in Buffy Speak , and makes their own sound effects to go with it. Particularly excitable ones may just go nuts over the fact that they are on TV . For added hilarity , the witness will often exaggerate details or get them entirely wrong . Sometimes, they may not even realize they're being interviewed at all or go completely off the rails. If the person is having a mouth, expect Cluster Bleep-Bomb Often a sign that the Masquerade is breaking . See also: Vox Pops , Hi, Mom!

A character deliberately chooses not to avoid using No matter how convoluted the question gets, the answer will always be treated as legally binding, despite any reasonable judge throwing half of these examples out. It's not impossible to make a Stealth Insult with this type of dialogue, by failing to resist not avoiding insulting . Alternatively, as in a Sarcastic Confession , it's not impossible Suspiciously Specific Denial . Also not uncommon where Exact Words isn't known not to be in play. I Know You Know I Know conveys a similar degree of semantic confusion. This is also not dissimilar to No Does Not Avoid Meaning Yes . Finally, it is possible in English for double negatives to convey shades of meaning that positives cannot, as in "unable not to," as not equivalent to "able to."

In Québecois (French spoken in Québec), it's customary to talk in double negatives for a wide variety of subject without being sarcastic. You feel not bad. It's not hot outside. Things are not far or not close. And your date is not ugly (and that's acompliment...really). For native speakers, it's not confusing, but for French-speaking individuals from other countries, it may sound overly complicated.

Congruent memory (also called according to The Other Wiki) is the idea that someone who learns something in a certain environment or emotional or physical state is more likely to remember what they've learned when in that same state. For example, if a rat learns its way through a certain maze while drugged, it may be able to run the maze only</ while drugged — or if you study for your math test while listening to a certain song, you may be more likely to remember the formulae when listening to that song When this phenomenon shows up in fiction, it's often played for comedy: Usually a character will have to precisely replicate the circumstances in which he or she learned something in order to be able to recall it, or the circumstances themselves will be somewhat bizarre (or both). Often an unintended consequence of Imposed Handicap Training , where the character can now only</ do the task with the training handicap While this is a legitimate idea in modern psychology, it's never taken to the absurd levels that fiction shows

The Con Man (also known as a grifter, swindler, matchstick man, scam artist or con artist) attempts to gain the confidence of naïve people and part them from their money , or at least play them for a fool long enough to get what they want—that is, to pull off a confidence trick The basic, stereotypical Con Man can be seen in the streets and alleys, inviting unsuspecting

victims to bet on a simple Shell Game that looks fairer than it is or convincing them to buy cheap "deluxe" watches or some other suspicious good. Sometimes they even look like Blatant Burglars . Obviously, real con artists are a bit more subtle about their work, since the whole point of their job is to win the trust of random strangers to scam them out later. They often spin a 'sob story' to hook the victim—maybe their dog is lost, or their car is being towed, or their mother may even be in the hospital. After that, it's all Social Engineering ; a truly gifted con artist can get away with almost anything, simply by virtue of appearing sincere and naïve (usually slightly moreso than the victim, on the theory that sympathy almost always gets you something). For complicated cons, the Caper Crew may come into play: large teams might be involved, with each member of the team playing a distinct role Hollywood tends to treat Con Men as being one of two extremes. In shows where the Con Man is the star , they are a suave, sophisticated Lovable Rogue , who confine their schemes to cheating the rich and the unlikable . The Cop Show , however, tends to show a darker side. When a Con Man is an antagonist, they tend to target the vulnerable and sympathetic, such as the elderly , widows, and desperate poor people. They may even be murderous and trick people into their deaths. Those types are almost always Slimeballs See also The Con , a list of specific methods (i.e. confidence games/tricks) used by con men

In various media, con artists and other crooks who pride themselves on their wits tend to dislike using guns . Usually, they also dislike carrying them; sometimes, they don't want to be anywhere near them It might be simple fear because guns are dangerous weapons and the conman might very easily prove to be far less proficient in a gunfight than his supposed victim. It may be pragmatism, as guns are often taken as evidence of intent to kill and will usually get you a longer prison sentence if you get caught, as well as increasing the chance that someone will draw a gun on you in return. The conman might be based in a setting where civilian ownership of guns is strictly regulated, if not completely banned, therefore obtaining illegal guns is even more difficult (Japan, Australia, and the UK, for instance). Given that conmen are frequently serial offenders, it may be illegal for them to just own one on account of their existing criminal record On the other hand, it is quite often a point of pride — guns are beneath them . After all, they aren't called the con artist </ for nothing — a truly good conman makes people do his bidding with cunning</. Just threatening to shoot somebody like a common thug is crude and inelegant , if not outright cheating</ From an out-of-universe standpoint, it's usually because the easiest way to turn a Lovable Rogue , The Family for the Whole Family , or The Pirates Who Don't Do Anything into terrifying, evil criminals is to show them terrorizing people with guns If guns have not been invented, or otherwise do not exist in the setting, then sometimes the con artist will have a dislike for swords, or knives, or whatever else is the most prolific/dangerous personal weapon Contrast Evil Is Not Pacifist

There's a Serial Killer on the loose! He may or may not be the poetic kind , but there is one thing we know about him: he picks his locations very carefully. So carefully, in fact, that it's

almost inevitable that each death connects with each other death to make the shape of... something. Maybe it's a inverted pentagram or just a big arrow Alternatively, there's no killer, just a lot of weird stuff happening. To find the Weirdness Magnet , you have to map out where all the weird stuff is and find the exact center Related is the String Theory trope, which is more about connecting evidence and people together with string on a cork board, rather than on a large map

A.k.a. "The Draft". In a nutshell the word "conscription" means forced service in one's country's armed forces or civil services on pain of prison or (worst case scenario) death. Some people who find themselves in armed conflict aren't there by choice. Nations both real and fictional enact campaigns of conscription, forced military service, for a variety of reasons. Maybe they are a small nation overwhelmed by a superior opponent. Maybe a war of attrition has left their forces decimated and badly in need of additional manpower. Maybe making it really easy to opt into alternative non-military service is cheaper and easier (for the government) than hiring hospital orderlies and highway clean-up crews on the open job market. In many countries the conscription serves as a Rite of Passage : a man is not considered to be a man unless he has served his conscription tour of duty . Conscription may also be the tyrant's method of breaking the will of his subjects and subjugating them to blind obedience. Another reason for conscription is to foster a sense of national solidarity; everyone will have the same experience of serving in the armed forces. Whatever the reason, conscription has a long history in both fiction and the real world. But conscription is a double-edged sword. Like most armies, conscripts were often drawn from the lower classes of society — on average poorer, less educated, inferior in discipline, and less loyal than volunteer forces to their upper-class commanders and rulers. And the rich , powerful, talented, or well-connected could often find ways to get out of serving or serving in units with very little chances to actually go to actual war, anyway. It is also perfectly possible you end up, at the end of a war, with a significant number of lower class individuals with combat experience, access to weapons and a grudge against the higher echelons of society. In cases of emergency, Lowered Recruiting Standards can occur. Conscription is the Trope Codifier for Cannon Fodder and for Men Are the Expendable Gender , and Trope Maker for Slave Mooks . Draft Dodging is when someone who has been conscripted seeks to get out of it somehow. See also Press-Ganged for when this is done with brute force, or Got Volunteered for when it might as well be. Also see Pre-War Civilian Career for what they did before their military service. S.S.D.D </ :

There is only so much competence a given faction can distribute amongst its membership.</ Put practically: If the boss is smart, then his subordinates are stupid. If the minions are smart, the boss must be an idiot.</ This is seen mostly in dramatic animated shows and comedy as a kind of counterbalance to keep the overall effectiveness of a faction moderate without being too dangerous or easy. On the comedy side, the inherent inequality and dysfunction of a group with such a large breach in abilities is a comedy goldmine. Expect to see competent leaders ask "Why am I surrounded with incompetents ?" and competent underlings to sigh at their boss' stupidity . In the event everyone in the faction is dumb, they're likely a Goldfish Poop Gang designed to be the Butt-Monkey everyone laughs at and maybe sympathizes with a little. In the rare event everyone in it

is competent, then they're likely going to be understaffed, the ground level Mooks / Redshirts are less than effectual, or they are disadvantaged in some other way. Competent leaders: Reasonable Authority Figure , Benevolent Boss , Diabolical Mastermind , Beleaguered Boss . If, instead, everybody takes turns being stupid, then they're passing around the Idiot Ball . For extra laughs (or groans) can be overlapped inversely with Fixed Relative Strength : the more competent someone is, the weaker they are in combat. Sub-trope of Too Many Cooks Spoil the Soup . Compare Competence Zone , where the only people who are competent are those of the protagonists' age.

In any martial arts fight, there is only a finite amount ofavailable to each side in a given encounter. As a result, one Ninja is a deadly threat, but an army of them are cannon fodder . </ A specific form of Plot Armor , this trope is very common due to the numerous storytelling considerations fueling it. Drama thrives on conflict , and having the few put up a fight against the many is basically a free conflict coupon that's automatically viable during any few vs. many confrontation. Why have the superhero team curb stomp the villain if you can make him powerful enough to force them into Teeth-Clenched Teamwork ? Why have the dozens of Mooks club The Hero unconscious three seconds into an encounter if you can let him take down seven or eight of them before he collapses, to show how much of a badass he is? That would be letting some perfectly good dramatic tension go to waste. That said, there is some Truth in Television here. Ninja were predominantly spies in reality, focused on gathering intel without being seen. Such jobs were best done by highly trained individuals, since if one person was found, the whole group would be jeopardized. Keeping the job to one well trained and prepared ninja ensured minimal risk. As the number disparity grows larger, another factor comes into play—there's strength in numbers, but also anonymity</, which in fiction is a crippling weakness . Characterization is a precious, rare resource that is difficult to set up, which means most characters are not going to get any . Since characters often travel in homogeneous packs in terms of characterization depth , the larger a group is, the less characterization—and therefore, ‘‘ uniqueness ’’—its members probably have. And in fiction-land, ‘not being unique’ automatically makes one expendable . In other words, if Team Meager is up against Team Gargantuan, we probably know something about Team Meager and at least care how well they're going to do in this fight—maybe we even outright sympathize with them and root for them to win. Team Gargantuan, on the other hand, is likely a faceless blob of Mooks or Red Shirts that we don't care about on any personal level . Letting Team Gargantuan steamroll over Team Meager in this scenario would be anticlimactic ; not</ letting Team Gargantuan do that means playing this trope straight almost by definition (even if Team Gargantuan wins, Team Meager still has to put up a good fight). Often Team Gargantuan, instead of applying their numbers, tends to get in line waiting to get beat in turn. Hence, you end up with the few gaining an almost-automatic boost to their capabilities when pitted against the many. Extra points if, when presented with their multiple adversaries, one character notes that "We barely were able to handle one, how on earth are we going to handle this many?" right before successfully doing just that. This can, of course, apply to Elite

Mooks other than ninjas. Vampires are particularly susceptible to Conservation of Ninjutsu, as are werewolves, alien monsters, Special Forces commandos and Super-Powered Robot Meter Maids . There are a few conceivable ways in which this trope can be Justified : Despite all of those possible justifications, this trope is generally a result of the Theory of Narrative Causality more than anything else—fights are won one way or the other because the plot says they should and not because of any relevant In-Universe factors. In Real Life , there is strength in numbers more often than not; large groups of fighters have probably been trained</ to fight as a group and take advantage of their superior numbers if they ever manage to corner a single foe, and in some creations of mother nature this is a natural-born instinct (as a pack of wolves would be happy to demonstrate on any unfortunate prey). Quality over Quantity has lost a great many more fights in reality than it has in fiction. See also Too Many Cooks Spoil the Soup , Strong as They Need to Be , Fixed Relative Strength and The Worf Effect . Compare Conservation of Competence and Kill One, Others Get Stronger . This trope is a reason the Zerg Rush may fail. Hydra Problem and Asteroids Monster usually lead to this trope. Beware, however, in case Surprisingly Realistic Outcome occurs, and this trope doesn't </ apply. If the system doesn't</ use this, The Minion Master will capitalize on it, as will the Wolfpack Boss . Contrast Elite Army (in that the one Ninja is a deadly threat while an army of them are almost invincible .). See also One-Man Army (for characters who are strong enough to take on large numbers of enemies). An aversion may result in a Bolivian Army Ending . Also known as : Threat Per Mook = O(1/N)</ where N = number of Ninjas (or other "Elite Adversaries"), that is, the threat per mook tends to decrease fast enough so total ninjutsu cannot grow, assuming arithmetic additivity of threat</ . Subtrope of both Quantity vs. Quality and Quality over Quantity .

There are, roughly speaking, three kinds of consistency that a viewer expects from a story: The fictional universe is Like Reality, Unless Noted . Violations of external consistency are "unrealistic." Consistency aids Willing Suspension of Disbelief , while violations of consistency may be jolting and unexpected, which can benefit both humor and drama. The viewer would be quite surprised to learn that in your universe, Hitler was a circus performer , dragons are scared of fire , and that the married couple no longer recognize each other in Act III. Generally, if a work is inconsistent, the viewer expects there to be a good reason for it. On the other hand, sometimes violations of consistency go unnoticed even if they're quite obvious, or may even be expected</; e.g. The Coconut Effect violates External Consistency. Often, a feature in a work is consistent at one level and not at another; for example, maybe your vampires glitter in sunlight , which is not genre consistent with other works featuring vampires, but as long as they always do that, it is</ internally consistent. If a work forgoes External Consistency in favor of Genre Consistency, you have The Coconut Effect . If conversely a work forgoes Genre Consistency in favor of External Consistency, then you have a Surprisingly Realistic Outcome . Sometimes, as in the case of sequels, it can be unclear whether two works are distinct works or part of the same work, making the distinction between Genre Consistency and Internal Consistency a bit fuzzy. An Omnipresent Trope , since every work of fiction has some</ kind of consistency (except maybe Finnegans Wake </). No examples please — this is just a descriptive Super-Trope and index. Deconstruction : A work looks at the serious reactions and consequences to a work's

conventions that are usually glossed over. Anime Reality Accidentally Correct Writing The Coconut Effect

All Myths Are True : It is established that all the well-known myths and legends actually happened and weren't just stories. Audience-Alienating Premise : Often results from reworking a genre in ways that would turn off fans of that genre. Cliché Storm

Ascended Glitch Abandoned Catchphrase : A phrase a character frequently said initially, but later stops saying or doesn't say as often anymore. Continuity Lockout : If you aren't caught up on everything, you won't know what's going on in the current episode or installment.

In some cartoons, it is obvious that a part of the background will be used. What makes</ it obvious is that it is strikingly lighter in color than its surroundings. It might also have an obvious difference in detail or color saturation. Another telltale sign would be clear black outlines on the object: the three clearly outlined rocks on the cliff would be the ones to tumble A similar situation is where things that should</ move don't, because they are made a part of the background to save time This is an unintentional artifact from the traditional, celluloid animation process. This was largely because, besides being painted by different artists at different times/locations, already making consistent matching difficult, each foreground/animated object would require up to hundreds</ of different drawings, as opposed to backgrounds/matte paintings, which each only needed to be done once</ . Therefore devoting any more than basic color saturation and contrasting light values would only make the process even more lengthy and time consuming than it already was. Additionally, the unpainted portions of cels were not perfectly transparent, so the colors on lower cels became more and more muted as additional layers were added to the top of the stack Film critic Roger Ebert has called this the "Fudd Flag", after Bugs Bunny's nemesis, who uses it to determine which tree Bugs is hiding behind, which rock he needs to trip over, etc Nowadays, digital ink-and-paint and compositing has largely displaced the use of painted cels, meaning that colors can be matched accurately (although conspicuously light patches are still pretty common in cartoons with digitally inked-and-painted foregrounds and hand-painted backgrounds). The issue of lavish backgrounds contrasting with simple animated elements remains to some extent, but it is often avoided. Many TV cartoons now use backgrounds rendered in the same simplistic style as the animation, while theatrical films can now use CG to render "background" elements that can be animated... which can lead to a whole new set of problems Something similar occasionally appears in older live-action productions. In particular, you may see an oddly colored sheen around the characters in shows featuring heavy use of Chroma Key . In his review of the Star Wars </ , Mr. Cranky dubbed this slight Special Effect Failure a "mystical aura." The technique has since evolved to the point where it is mostly no longer noticeable. Mostly No form of animation being intrinsically immune to the Fudd Flag, claymation-animated works are wholly capable of falling prey to it, too This also applies to mid-era point-n-click Adventure Games , when the background would be painted or 3D rendered, while objects would usually be drawn sprites. However, this had a practical use, allowing players to easily locate collectible objects , even small ones. Especially </ small ones.

A similar version can appear in action games that require you to destroy parts of the environment to proceed, again, mostly in older ones. The breakable parts would usually be a different color, and one can sometimes even see the seams where the object is supposed to break apart In early console games, some interactive objects might use a noticeably different palette than the background, since sprites and backgrounds have their own color spaces Also, it may be used intentionally in video games to help point out certain objects or items, and often in different form than the accidental style mentioned above but the same spirit (something that looks out of place in a minor way that reveals it to be important) most often as a Notice This Occasionally inverted by allowing the cel/object to exist and making it readily visually apparent, and then moving the background art instead of the cel This trope is particularly prominent in cartoons made during The Golden Age of Animation . With the modern trend of flash animation, there is almost no difference between backgrounds and cels, completely averting this trope altogether by the fortune of new technology

An "evil" character, a Film Noir character, or otherwise out-of-the-ordinary character , can always be identified (by the observant audience anyway) by the fact that he wears a concealing trenchcoat, fedora and occasionally dark glasses that are in no way seen as suspicious by any passers-by Not to be confused with Badass Longcoat or Trenchcoat Brigade . Lawmen or vigilantes wearing these do not count unless they are deliberately trying to avoid notice This one started out as Truth in Television . From the late 1930s to late 1950s, a trenchcoat and fedora were the standard outerwear for a man who was neither upper-class nor extreme lower-class. Consequently, they were the natural choice for spies, detectives and anyone wanting to blend in with the added bonus of easily concealing weapons. But as this style fell out of fashion with the general public, it came to be exclusively associated with said spies and detectives, whose continued use of this fashion would make them more conspicuous if anyone were paying attention Thus, whether this is perfectly plausible disguise or a Paper-Thin Disguise depends largely on the medium and the setting of the story. And the weather Very useful when two kids stand on top of each other's shoulders and pretend to be an adult With all the concern with terrorists and flashers, this is likely on its way to becoming a Dead Horse Trope Frequently overlaps with Overt Operative Modern version of Black Cloak and In the Hood . Variant of Coat, Hat, Mask See also: Most Definitely Not a Villain , Paper-Thin Disguise , Blatant Burglar , Highly Conspicuous Uniform The Other Wiki also explored this trope in

Through secrecy and infiltration, the Ancient Conspiracy has grown powerful. They control the government , big business and religion , they routinely pull off complicated plans and never make a mistake Still their purposes are best served by remaining hidden from public knowledge, always working from the shadows. Now, they begin their latest diabolical scheme - to display their official logo on every street corner... wait, what!? Conspiracy Placement is the tendency of fictional (and supposedly not-so-fictional) conspiracies to display hidden clues to their identity where they can be found by the heroes, like Product Placement only coming from an organization that

by definition should be trying to avoid</ exposure. These clues are generally hidden well enough that they will not be spotted by the general public, but you have to wonder what the point is of having such clues at all . Sometimes the story will try to justify the existence of these clues, for example by saying that finding them is a test to gain membership of the group, or a way for conspirators to identify each other, or more for the same reason serial killers leave clues for the cops, but more often it just seems to be showing off. In any case, one usually gets the impression that the best course of action would be to let the nebulous conspiracy run it's course, since they're obviously so full of Bond Villain Stupidity that it's only a matter of time before the whole thing collapses in on itself. This can be considered Truth in Television , for a very loose definition of "Truth". If you look hard enough you can find Illuminati , or connect anyone you don't like to the number 666 . Epileptic Trees abound. There are those who actually believe that real undiscovered, world-controlling conspiracies do this. Though they mostly just "discover" such hidden messages through , which is where people read connections and meaning into unconnected and meaningless things. This is best demonstrated by putting something like your own name or username through the sorts of processes seen in conspiracy theories or the "Half Life 3 confirmed" meme , such as by putting it through , converting letters to numbers and then consulting your local numerologist, or perhaps by putting it through some sort of cypher, feeding it through an anagram generator, and then </ converting the letters to numbers and consulting your local numerologist . You won't believe how easy it is to read anything</ out of it. Also worth noting that Complexity Theory (aka Ramsey Theory) is a thing. It's at least as old as Chaos Theory and is the counterpart to it; it states that, given enough data, it is impossible for there not to be some kind of pattern to them . May overlap with Sigil Spam if the logo placement becomes really</ excessive. Compare to Neon Sign Hideout when it comes to a lack of discretion.

Describe Conspiracy Theorist here? A Conspiracy Theorist attributes the ultimate cause of an event or chain of events (usually political, social or historical events), or the concealment of such causes from public knowledge, to a secret and often deceptive plot by a group of powerful or influential people or organizations . Many conspiracy theories state that major events in history have been dominated by conspirators who manipulate political happenings from behind the scenes. The Conspiracy is generally evil beyond evil . And yet despite how evil they are, they never betray each other , so the conspiracy stays together for thousands of years. How they accomplish this is unexplained. It is something beyond the wisdom of our puny minds. Conspiracy theorists in the media may be Mad Scientists associated with Right Wing Militia Fanatics or Dirty Communists , and always seem to come off as somewhat mentally unhinged (though you and I know better, right?). This seems to be the case even when one of them catches the trail of a genuine Ancient Conspiracy or Government Conspiracy . Of course, said conspiracies have a tendency to try to silence the "kook" once they learn he's on to them, despite the fact that no one would actually believe he's telling the truth . There is a medical condition frequently attributed to conspiracy theorists: apophenia, " the tendency to see connections where none exist " (thank you, Question). But that's only what The Man and his crony doctors will have you believe. And as Agent Mulder would say:

just because you're paranoid doesn't mean They're not out to get you . Okay. That's the official line. The rest is up to you. I' v e left a few clues below to follow up if you want to find the real story. Be careful. The reptilians are watching you. To those who still just don't believe me, then wake up, smell the muffins, and get off that bandwagon! And don't you dare say those things to me! Every conspiracy theorist worth his salt has a pegboard filled with weird photos and connecting strings and a Tinfoil Hat ready... but if you ever get the urge to buy a copy of The Catcher in the Rye </ , for God's sake, resist! For Real Life examples see our Useful Notes section on conspiracy theories .

A thriller centered on the conflict between The Protagonist and The Conspiracy , often with an elaborate Conspiracy Theory as the background The story starts off with either a minor meaningless crime or a high-profile murder. A person related to the criminal blamed or the uncovered victim notices some odd discrepancies in the official story and digs deeper. Before the protagonist(s) realize(s) it, they are caught in a multi-layered plot that involves possibly EVERYONE, especially those who are tasked with the official investigation ... meaning that the hero/heroine can't go to the cops... or the press... or that janitor in the hallway they just passed who looks a little too much like the guy who'd been shadowing them the last day or so.. See also So You Want To: Write A Conspiracy Theory , for those interested in writing their own Conspiracy Thriller

A person, usually young, who is full</ of questions. (All in total innocence , of course.) Curiosity Is a Crapshoot even for them, but tends to be good; if nothing else, they have Improbable Infant Survival protecting them. Not the Mouthy Kid ; generally perfectly polite except for their questions, and completely oblivious to the fact they could be considered rude or insensitive. Often features as The Watson , to make Mr. Exposition a Justified Trope , since the child doesn't actually know what is being Infodumped on them — that's why they're asking the question. But perfectly capable of being just a characterization trope. Also frequently the source of the Armor-Piercing Question — not so much because of insight as being Too Dumb to Fool . Contrast Curious as a Monkey , which describes someone who believes in discovering how things work by experiment. A Constantly Curious person is a more persistent nuisance but doesn't make trouble on quite so grand a scale. Will often be palmed off with Lies to Children , but this frequently doesn't work as the next thing they do is poke holes in the simplified explanation. Repeat offenders when it comes to Derailed for Details and Sidetracked by the Analogy . See also Little Jimmy , who has no characterization except his ignorance.

This is when an author writes in an atypical pattern. The reasons for this can vary, from Leaning on the Fourth Wall (if it's related to the story in some way), to keeping certain plot points and twists hidden to the very end (e.g. avoiding gender pronouns for a Samus Is a Girl twist; see The All-Concealing "I") to simply being a stylistic choice. Some types of self-imposed challenges include writing in a particular metre, or making each line a letter longer than the one that preceded it; writing in code (e.g. replacing words with ones

that appear a few places afterwards in the dictionary); avoiding certain common letters (the correct term for this is a lipogram, by the way; E is the most commonly used because it's the most commonly used vowel in several languages); using words that display some sort of complex pattern (e.g. making large chunks of the story alliterative or in palindromes); drabbles (stories of precisely 100 words) and many more. Remember this applies to any challenge imposed on the author by themselves, so normal deadlines and schedules don't count, though improvising with limited resources or using a particularly strict time limit does (see NaNoWriMo for one example) The alternative name "Oulipo" is from a group of who were dedicated to this style of writing. The Other Wiki also Some authors might adopt this as a Signature Style . Unconventional Formatting can be related. When this is used within an otherwise normal piece of writing to show something specific then it is Painting the Medium . Flash Fiction is a subtrope.

A once-common stock setting, the construction zone, normally pictured as the skeleton of a skyscraper made up of steel beams, tends to be the place that every sleep walker or escaped baby inevitably wanders into, giving way to crazy slapstick antics as their pursuer tries desperately to catch up with them and keep them out of harm's way. Said constructions zones almost always have No OSHA Compliance , so when our bumbling protagonist gets a job working at one, there's bound to be trouble Things to watch out for include super-heated rivets , malfunctioning elevators , wooden beams or steel girders dangling from cranes (which have an eerie way of positioning themselves at just the right moment to prevent someone from falling), or spilled grease upon a high steel beam threatening to send a character sliding off a ten-plus story drop. Also, expect to see a Literal Cliff Hanger , though if someone actually falls, they're likely to just safely land in liquid cement and become statues when they try to climb out It doesn't show up very often today , but Western Animation kept it alive long after it mostly fell out of use in Live Action Film. It also served as a convenient setting for arcade and platform video games for a time

Flaming: While flames are designed to put people down , constructive criticism is meant to help an artist improve his/her work. It's rarely shown in fiction, but it is vital to the growth of an artist or writer. This kind of criticism is about being honest, clear, and considerate in your comments. In particular, a respectful tone is crucial in proper constructive criticism. There is no handholding , and this does not mean making only positive comments; it is not constructive to say a work is good if you honestly thought it was bad. Proper critique, however, also avoids unmitigated Brutal Honesty . The ideal Constructive Critic is a master of Verbal Judo : honestly and directly pointing out flaws while simultaneously highlighting strengths and unexplored avenues of a work, all while maintaining a neutral to positive tone. In short, you are trying to help the artist improve both positively</ and honestly</ , not shame them into improving. This is very, very hard to do. For one thing, you have to be aware of your biases, and admit them. There are times when you are asked for criticism, but are probably not the best person to be asked about something. For another, you could make claims that turn out to be wrong, even if you thought otherwise at the time. Finally, some simply Can't Take Criticism anyway- beware those showing signs of being Sunny Sunflowers or Wide Eyed Idealists

in particular. Yet it's still the form of criticism most likely to actually get results. In fact, most good artists even give this to themselves , hence the phrase "I'm my own worst critic." Things an aspiring Constructive Critic should avoid: Snark , Cluster F Bombs , Caustic Criticism , and any use of the word "sucks" outside of the context of describing particle movement automatically transform even the most well intentioned critique into a "Reason You Suck" Speech . And perhaps the most important thing: Don't mock the work OR the author</. A critique is not a comedy roast . When you start doing any of these things, most people will think you are trolling them- because you are trolling them </ . You'll notice that most people don't actually understand</ the concept of Constructive Criticism. As you'll probably learn if you take a college-level creative writing course, one of the most important</ things about Constructive Criticism is don't rewrite the work to suit your own desires . The point is to make it into something that the intended audience </ will like. This is actually one of the biggest</ things that people need to learn about being constructive, because it is not very constructive to try to suggest the author to write a work into something that you</ want to enjoy. You will notice this as a trend in people who are members of the Periphery Hatedom , especially if they have a Bias Steamroller , and those with extreme Fan Myopia . Unfortunately, finding criticism is rather hard in the internet age It's easy to get</ criticism on the internet, but when it's mixed with the GIFT , people will often take that as an opportunity to act like a complete dick and call it criticism. If someone walked up to you and asked you for critique and you gave a very rude-sounding critique, then they won't ask you again and you won't get to critique anything. On the internet, there's loads loads</ more random people and works to critique, especially since you can find it anytime you want. One method of giving Constructive Criticism is the "Feedback sandwich" method. You begin by saying what the person did right, then delve into what they need to improve on, and finish off with a comment on what else they are doing right, often including comments on why it works. The "Bread" are the compliments, while the filling is the criticism, and you often season it with explanations as to why you come to the conclusion you did. This method works because starting off with the criticism is often what leads to people instinctively taking it as a form of attack, and/or feeling like they did nothing</ right. Starting off with an observation on what they are</ doing right lets them know that you do respect them, and in turn makes them far more open to listening to you when you point out the flaws or shortcomings. Finishing it off with another comment on what they did right also leaves a better taste in their mouth. It has been proven that when people are "proven wrong" so to speak, it often triggers the fight-or-flight response - the "Feedback sandwich" method helps to mitigate this by letting them know what they did right and that you are there to help. Now you might be wondering if Constructive Criticism is appropriate for this site. Of course it's better than Complaining About Shows You Don't Like , but describing tropes and listing examples doesn't actually call for criticism. There are some places where it can fit, particularly in the Trope Launch Pad . You can help a new trope a lot more with this kind of criticism than insulting the new trope, the troper that posted it, or that troper's mother . No examples, please. We're just defining the term. But any wicks must be In-Universe Only .

A Serial Killer (or other dangerous, violent criminal) is on the loose, and the Great Detectives and Profilers running the

investigation can't get a break in the case before the perpetrator strikes again. But luckily, the police have another</ serial killer already behind bars, who, through knowledge of his own malfeasance, may help the investigators to get inside the mind of the suspect being pursued Desperate for leads and not willing to "become" the person he is looking for , the detective running the investigation will still seek this insight by making, at least, one visit to the jail cell of this special prisoner who is just as demented and evil and dangerous as the maniac currently on the loose. Such a prisoner is typically so dangerous that special precautions (shackles, straitjackets, etc.) need to be taken either to make sure he can't escape his cell or can't pose a danger to the detective visiting him. Nonetheless, this prisoner is the only person who can understand and figure out what the detective's suspect is thinking Receiving this insight will usually come at a price, however. In exchange for any help he gives towards catching the killer at large, the prisoner will typically want something in return, including a commuted sentence or greater/extended privileges within captivity. Occasionally, the detective paying the visit(s) may be personally responsible for the prisoner being behind bars in the first place, adding to the tension in their meetings. As such, the prisoner may hold ulterior motives for seeking vengeance or escaping captivity or may otherwise try to deceive the detective. However, one way or another, the prisoner will usually be playing some</ part in driving the criminal investigation (and plot) forward The Trope Maker is Hannibal Lecter and the role the character filled in the novels Red Dragon </ and The Silence of the Lambs </, written by Thomas Harris. Trope occurrences frequently pay direct homage to Anthony Hopkins 's portrayal of the character in the film adaptation of Lambs </. However, where much of Lecter's insight provided to the FBI in catching serial killers derived from his background as a brilliant yet twisted psychiatrist, most other characters in this role will typically give insight based on the modus operandi</ of their own crimes in helping to catch a similar perpetrator, if not a flat out copycat killer Compare Recruiting the Criminal , in which such a person is elected to carry out specific tasks at hand for which their devious skills are useful, and Expert Consultant , who consults on more mundane things See Also: Alone with the Psycho

This commercial pitch uses the approach of offering the consumer secret information that some industry "doesn't want you to know about". This can be investment tips the financial industry doesn't want you to know about. Miracle cures the medical industry doesn't want you to know about. Tax tips the IRS doesn't want you to know about. Even low furniture prices</ the other stores don't want you to know about You're not supposed to stop and think that these secrets are being sold over the mass media and if these industries really didn't want you to know about them, you wouldn't. Nor are you supposed to question why</, say, " a mom from Suburbia " with no medical training knows more about curing or treating cancer than a board-certified oncologist See also The Man Is Sticking It to the Man . Sometimes overlaps with All-Natural Snake Oil and Spice Rack Panacea

This character is not your ordinary everyday lying jerk. This is the

liar so good you never, ever want to play poker with them because you'd go home without your underwear and short next week's paycheck Obviously, this is a handy talent for a villain to have if the hero group has a Living Lie Detector , although it can also come in quite handy for a hero who needs to fool the villain for a change. For obvious reasons, it is particularly useful if the Living Lie Detector believes that their ability is working, when in fact it is not. Conversely, a more audacious Consummate Liar might make blatantly false or contradictory statements to the Living Lie Detector just to show off. Will also use Self-Serving Memory if it will suit their needs. Two common variations on Consummate Liar are: : An entire race of people (usually aliens) just happen to be immune to whatever the Living Lie Detector 's ability is. Often not quite as disastrous as the lone exceptional Consummate Liar, because once you figure out that the Ferengi are immune to your telepathy, you quit trying to use it on them to gather information. Note that being immune to one type of truth-telling might not make a race immune to ALL types (just because you can resist telepathy doesn't mean you can necessarily resist some kind of Applied Phlebotinum Truth Serum). This trope does not apply to tricks such as the Memory Gambit or Note to Self when they are used as a defense against lie detection. In those tropes, the would-be liar must convince themselves that they are telling the truth. The Consummate Liar knows perfectly well that they are lying May or may not actually admit, later, that I Lied . Any character who gives a Bastardly Speech has no business being anything else. Compare The Power of Acting . Contrast Bad Liar . A key trait of the Magnificent Bastard . Their diametric opposite is The Cassandra , someone who always tells the truth but is never believed.

Quite self-explanatory: a character who is characterized by their intense professionalism and intolerance of the lack thereof in others The Consummate Professional is most often a very serious character , be it by choice or by requirement. Use of this trope is often, though not always, involved in a profession that warrants violence or is on the shadier side of the law like a soldier of fortune , professional spy , courier , or professional assassin . Regardless of precisely who employs them or what their actual job is, being a Consummate Professional is standard for Men in Black types as well. Alternatively, they can also belong to a more conventional profession, but be ruthlessly dedicated to it, such as a profession in the legal system or a corporate position. They have a very strict code of conduct to which they adhere meticulously, and instantly dislike anyone who implies they should lighten up. They'll likely say " Nothing Personal " and/or " Just Following Orders " when people ask them. They also instantly dislike anyone who's a little too friendly (after all, Being Personal Isn't Professional), although there are some people who can make balance between friendliness and professionalism. One thing for sure: get on the wrong side of one, and you'll likely find them to be a No-Nonsense Nemesis This attitude is most of the time justified: their line of work makes any personal connection or moral compunction a liability. This doesn't mean they're a complete cold fish , it just means they prefer ethics to morals. Morals are broad and prone to emotional interpretation, ethics are specific and more efficient. While they might be willing to have a softer disposition towards friends or family, any client is treated impersonally and no better than the job demands. They may look down on the Bunny-Ears Lawyer who, while also competent, acts less professionally than they do. If there are alignments in

play, they stick most to Lawful and Neutral alignments, rarely to Good ones (since an altruistic attitude doesn't lend itself to their ruthless dedication to their job) and NEVER to Chaotic. Lawful Neutral or Lawful Evil are the most common alignments associated with this trope The Consummate Professional is also recognized for their uncanny talent at the chosen profession. Their no-nonsense attitude has allowed them to hone their skill to an almost supernatural degree, to the point their name (if actually known) becomes synonymous with excellence in their line of work. Be it playing the stock market, performing a military mission or killing a mark, they baffle others with their complete control and superlative skills. If they're on the shadier side of the law, don't ever call 'em a criminal or compare 'em to common thugs ; that's a wonderful way to end up in traction or worse. They're first and foremost a professional, and by definition above such scum because of their code. And for pete's sake, don't invoke a Contract on the Hitman . As for a professional in a legitimate profession, they might be ruthless, but they're never corrupt . They do not need to cheat or commit fraudulent actions; their skill places them beyond such petty strategies Do note of the more violently employed professionals, having a code is not the same as being a Hitman with a Heart : not killing innocents might just be a matter of convenience and avoiding unnecessary trouble , not any kind of conscience talking. In fact, one trait that's almost universal to this kind of character is that every time they let things get personal, it always comes back to bite 'em Because the profession usually takes them places, expect a Consummate Professional to also be a Cunning Linguist and have connections to various other professionals who can provide services for them. If they're a killer who likes taking their targets out from a distance, they'll universally be a Cold Sniper and almost always has Improbable Aiming Skills

This kind of Computer Virus is literally The Virus - it's sentient , malevolent , and e-mailing itself into your inbox to possess your PC and Take Over the World . Don't think your antivirus program will get rid of it - it'll just Body Surf into your iPod, or the Magic Floppy Disk in your desk drawer (using WiFi, of course) This stretches disbelief a tad, and not just because of hardware and software limitations. But still Copies of an AI will often be networked into a Hive Mind . In case the AI creates itself an avatar, it may look like Monstrous Germs - since that is how people picture "viruses" See Clone by Conversion and Grand Theft Me for versions that may apply to organic beings

Being a Side Kick , Love Interest , or even just general acquaintance to a Superhero sucks. There are kidnappings , high mortality rates , marriage threats , Superdickery and the ever present Sidekick Glass Ceiling to contend with If a setting isn't insecure about changing its status quo , or wants to change the dynamic from solo hero, to duo, or even Power Trio and beyond , then the Muggle supporting cast may catch Contagious Powers and these side characters will permanently gain powers , going up to Super Weight class This is typically done when the series gets a little older and writers are tired of one of the characters always playing the Distressed Damsel in Hostage for MacGuffin situations. The solution to stale plots like those is to simply give the cast members in question their own fighting powers so as to bring them

in line with the rest of the cast, sidestepping questions about how "mundanes" are useless The opposite of the Sidekick Glass Ceiling and subversion of Never Be a Hero

A caveman in a modern-day setting . He either is an unfrozen Human Popsicle or got here through Time Travel . If he's capable of speech, expect Hulk Speak ; if not, grunting is the way to go. Occasionally, this is subverted by having the caveman speak in interesting prose, usually with an upper-class English accent If they are able to fit in, then it is Like a Duck Takes to Water Note that the redirect title, "Freezetta Man", is a play on Frazetta Man , which is a certain type of caveman Rare female example: Tahra in Bikini Cavegirl </ is transported to the future by mistake

There are still a number of uncontacted tribes located throughout the world that have been isolated since before written history, and thus retain much of the same practices they had many thousands of years ago. For example, are estimated to have lived on their island for the past 60,000 years and still live as hunter-gatherers. They attack anyone who lands on the islands from outside, so little more has been learned about them. Additionally, the Indian government prohibits visitors, not only for their protection but also the Sentinelese's, so they aren't harmed or have their resources exploited. The tribe made international headlines when , an American Christian missionary, violated the laws against visiting the Sentinelese in order to proselytize to them, only to get killed.

But then all of a sudden, it somehow wound up on the internet. Somehow, someway, all of the new season's episodes and content have suddenly become downloadable due to being purloined and posted on piracy websites. In a few short hours, all of the careful preparation and marketing is now common knowledge This is the dreaded Content Leak. The occurrence when upcoming episodes, images, songs, scripts, seasons, plans, or even general information winds up becoming known despite its intent to be kept secret See also Foiler Footage , which is fake</ content meant to mislead people looking for spoilers. Compare Short Run in Peru to be mistaken for Potty Failure As a rule on this website, troping actual information from leaks is allowed until the work officially gets released.</ Beware of spoilers

WARNING : The following page may ruin your life . Reader discretion is advised Sometimes, producers or distributors feel the need to warn the viewers of what they are about to see. This serves to help viewers who might not like what they're about to see stop looking at it before things get unpleasant; for others, it's an invitation to watch Content warnings have been common in media for decades: public television's "viewer discretion is advised," radio and television journalism's "some of what you're about to hear/see is graphic," and various music, TV and film labeling Content warnings are often given in conjunction with a ratings system as an explanation of why a given work has the rating it does. In most cases, these are selected from a list of stock warnings (e.g.</ "strong language", "violence", "imitable behavior", or the very general "viewer discretion advised") — these don't really provide much of an explanation. A warning specific to the work shows that the work itself is fairly controversial or otherwise

unusual Like most other content rating systems, this only serves as an aid to the viewer's decision of whether or not to keep watching; what viewers actually decide is up to them. This hasn't stopped Moral Guardians from insisting on content warnings as a sort of deterrent from imitating harmful things, not realizing that most viewers tend to ignore such warnings or even consider them an indicator of the really good stuff . Works which try to capitalize on the latter phenomenon are often Rated M for Money See also Media Classifications and Trigger , as well as Our Lawyers Advised This Trope , Don't Try This at Home , Do Not Attempt , This Is a Work of Fiction , and NSFW . Compare R-Rated Opening

Shrek the Third </ had a special MPAA content descriptor for "Swashbuckling Action".

Sometimes there's a sequel that attempts to address complaints fans Shad with the original, or build upon the original's perceived Sstrengths. Sometimes, in its attempt to do so, though, it may Slose track of what made the original so great for many. If that Shappens, there may be a huge split in the fanbase , with some Sfans saying that the sequel is an excellent improvement , with Sothers saying that the sequel's improvements aren't worth the Sother changes made . This can result in large flame wars when Ssomeone who prefers the original argues with those who consider Sthe sequel to be superior ometimes, the company will try to fix Sthings with the next installment in the series, only to make more Sfriends and more enemies. This may lead to an Unpleasable Fanbase See also First Installment Wins , Love It or Hate It , and Critical SBacklash

The contest winner's cameo could turn out to be anything from a simple appearance in the background, to playing a role in an important scene in the story. Or, depending on the tone, to be horribly killed . Sometimes the winners' scenes will be cut or the project itself canceled In some cases, appearing in the work is the result of a Kickstarter reward; people who donate to the product's development can win the right to appear in it Compare Official Fan-Submitted Content . Also compare Tuckerization , where characters are based on real people who haven't won anything

A Plot Hole is something fans spend hours coming up with justifications for . Continuity Drift is something fans don't mind, but would probably spend hours whining about if it was introduced in an adaptation Fictional worlds get very complicated. You have all kinds of Backstory , the political and social situation of the world, what kind of physics or technobabble there is, how magic works, and the overall atmosphere of the place. If you're writing about these, you probably didn't come up with the whole setting before you start writing. And if your work has more than one installment, you almost certainly didn't come up with it all before you started publishing So things change as you fill in details. What was unique becomes common , what was incredibly powerful becomes insignificant , and what was implied to have a wealth of unexplored detail... doesn't. After the story is fleshed out, exposition given way back in the beginning is off, somehow. Maybe the author thought that was how the world worked, but it

didn't really turn out that way May be caused by the fact that Characterization Marches On . Sometimes the only way to keep sane is by treating the events you want to overlook as Broad Strokes . One specific type of this is Earth Drift Contrast with Retcon , where stuff gets outright rewritten instead of just explained badly. Usually leads to Early Installment Weirdness

The writers have let the mythos they've generated get so thick and convoluted that a newcomer has very little chance of understanding the significance of anything</ . They are 'locked out' of understanding the story by all the continuity This is one of the main bones of contention between creators and executives. Executives generally want each episode to potentially bring in a new audience. Creators generally want to entertain the audience they have . Granted, these aren't necessarily mutually exclusive, but doing one does make it harder to do the other. And in a rare case of this wiki taking the side of the executive meddlers , we have to admit that continuity lock-out is never caused by the execs. It has to be written The standard answer to this issue is the Previously On… segment: each episode opens with a short capsule summary of prior events. Of course, Previously Ons have their own drawbacks, such as inadvertently providing spoilers or flat-out not working (the longer a show goes on, the more impossible it is to cover all the relevant bits in 60 seconds or less). Another answer, often used for less serialized programs that make use of more staggered story arcs , is to create a few Jumping On Points wherein any current plotlines are wrapped up or put on pause in order to have a few standalone stories (Ghost in the Shell: Stand Alone Complex </ literally labels its episodes "stand alone" and "complex" for this exact reason). And, of course, there's nothing stopping the use of both Why bother with dense continuity at all? If pulled off correctly, an intricate series-spanning plot gives audiences an additional reason to keep coming back beyond just finding the work entertaining, as they theorize what new plot developments may occur or how their favourite characters will continue to develop and interact with each other. The people in scheduling will curse you for making their jobs harder , and you may not catch as many fans as shows that are more episodic in nature (though that isn't to say episodic shows can't have heavy continuity themselves), but the fans that you do manage to get are yours for life. This does mean that you have be sure to rope in as many as possible early on before the Lockout effect takes hold to make the effort worthwhile, though. Furthermore, it's important to remember that even the hardcore fans have their limits and will eventually reach the point where they drop out as well if your show starts to feel less like a piece of entertainment and more like a tedious homework exercise Some mediums (such as novels) are actually structured in a manner where engagement within a linear multi-volume fashion over a period of time is expected for popular works, and so authors can't be (and aren't) reasonably expected to keep everything entirely accessible to a newcomer if they want to follow the plot or any Character Development ; if you start reading a seven-volume series at volume five and find yourself hopelessly lost, then you only have yourself (or in some cases the publisher) to blame Continuity Lock-Out is the most common reason why you'll often see some say they can't get into American superhero comic book series, more so than they would any television or film series. Because while even the most popular scripted TV shows (not counting Soap Operas) will rarely

see more than 300 episodes, and any non- thematic film series that surpasses eight films without a Continuity Reboot of any kind is rare, most popular comic book and manga series run for much, much longer. Superman has consistently been in print since the 1930s</, and you'll find that most popular characters you can name have been in circulation for several decades as well. This ensures that most new readers are just going to either give up or ignore most continuity, going for a Broad Strokes approach in memorizing any pertinent information... that being said, most writers will as well, with only the most popular story arcs getting anything more than a Continuity Nod . In fact, in the past, it wasn't uncommon for long-running comic series to actually recycle storylines with little variation, in keeping with the Fleeting Demographic Rule A Compressed Adaptation might cause this. In Web Comics , this can be the impetus for an Archive Binge or a justification for Archive Panic The rise of digital services like on-demand video, streaming, and e-books since the start of the 2010s have done wonders to reduce the impact of this trope. The entire runs for long-running works can be made easily available with a few clicks or taps, as opposed to audiences having to go out and dig for a VHS or DVD copy of the latest season, or desperately hoping that today's rerun will be the one to explain the plot point seen in a different rerun. As for newer works, programming created specifically for streaming services tend to have fewer episodes per season and/or dump all of them at once for quick and easy viewing, so trying to remember all the minutia is less of a hassle. Finally, as the years have gone on, the internet has also allowed for easy access to fan-made sources of information (see: The Wiki Rule). Of course, none of this completely negates any of the problems brought up. With the final point especially, relying too much on your fanbase having access to an encyclopedic database is seen as poor practice, since you're effectively putting the onus of keeping all the continuity of your work organized on the audience

A Continuity Nod is a reference to some aspect in a series' past or an occurrence within the universe . The nod is not so much a major plot point, but more of a tilt of the hat to the fans that may know these little details. It is a sort of Shout-Out . In remakes of older TV shows or movies, this may often manifest as a form of Stunt Casting . If characters reference something that's outside the present universe but has special meaning in some other way (such as an Alternate Continuity or adaptation), it's a Mythology Gag . If it's a joke about the actors of the parts, it's Actor Allusion or a Casting Gag . References towards something that's been written out (or Take Thats towards something that people wish</ were written out) are Discontinuity Nods . A nod that affects the plot in some way can be considered an Chekhov's Boomerang . Once Done, Never Forgotten and Remember When You Blew Up a Sun? are Sub Tropes . Oblivious Mockery is also a subtrope when the viewer knows about the action being mocked. Distinct from a Call-Back , as it does not actually drive any plot development. Here's an example of the difference between the two tropes: Also distinct from a Call-Forward , as it isn't going to be a plot point later on. Compare Continuity Cavalcade (when a single scene presents an unusually large number of Continuity Nods, all at once), Continuity Porn (when there are so many Continuity Nods that they detract from the story) and Internal Homage (when entire scenarios are recreated). Naturally contrasts with Series Continuity Error . A Song of Song Titles might have this. Remember, it's only this if the events happen in the same continuity. Otherwise, it's a

Mythology Gag . </

The writers of a particular work are about to start working on a continuation story, but they have an irreparable issue with the prior continuity Maybe Continuity Snarl has made writing an interesting plot increasingly difficult and tedious. Maybe the last episodes of the series made disliked decisions that changed the status quo and subsequent episodes would suffer from the changes made. Maybe the previous series ended and the writers want to start a new series that uses the same characters or takes the series in a different direction or style but don't want to override the ending of the old series . Maybe Continuity Lock-Out is preventing new fans from being attracted to the series. Or a well-liked character was killed off and the writers want to use him or her again without making their death look cheap or if the character is a villain, without suffering Villain Decay The solution? Initiate a Continuity Reboot A is the partial or complete duplicative reset of a continuity from any and all previous works in a series. You could say it's the creation of an Alternate Universe that shares virtually little to no canonicity with the preceding works in a franchise. It's not a Reset Button or Snap Back : while those revert the continuity to a previous state, a Continuity Reboot starts over, providing the authors with a new clean slate to work on. In one form, as far as later works are concerned everything before it is in Canon Discontinuity (to which it sometimes overlaps) Frequently, a Continuity Reboot will include one (or more) Tone Shifts , usually to whatever is considered the best money-maker for the target demographic, Darker and Edgier or Lighter and Softer While they are not a bad thing in and of themselves, nor are they usually intended to outright replace</ the original work, a Continuity Reboot itself may be poorly received if handled poorly as it effectively negates any and all character development by a character to start anew and in extreme cases the rebooted character is effectively a completely different character under the same name. If the previous series has already ended and the Reboot is a revival of the franchise then it is more likely to be accepted by audience members Sister trope to Alternate Continuity , the difference is that a Continuity Reboot becomes the new main continuity rather than running alongside the previous universe. For example, Batman</ comics run alongside any Batman</ cartoon or movie that is currently airing and each are their own universe; this is an Alternate Continuity . The DC New 52 Of course, in more complex franchises, the two tropes can overlap. DuckTales 2017 </ is a reboot of DuckTales (1987) </, long since cancelled, but is also an Alternate Continuity of the original comics, which are still running A close relative of the regular Retcon and Cosmic Retcon and Retool . Overlaps with Fix Fic if the reboot's intent is to repair perceived problems with the original version. Compare also Soft Reboot which skirts the line between reboot and sequel Often called a "re-imagining" by squeamish writers not wanting to admit that they are throwing out previous continuity (though not always, see Alternate Continuity for exceptions), though this causes confusion as "re-imagining" is also used in the same context as "remake": ground-up retellings with no connection to past continuity (Planet of the Apes (2001) </, for example, which is credited with popularizing the term "re-imagining" in this context). Often abused by ignorant journalists who refer to any

reappearance of a show as a "reboot", even when it is explicitly a Revival . See also Continuity Rebooter (when the reboot is caused by a specific, identifiable character), Ret-Gone (when it just happens to one person) and Un-Reboot (when the original continuity is later revisited and ignores the newer canon)

It goes something like this: in the beginning, The Universe is created, and it's a blank slate. Everything's new; as such, the creators can do whatever they want to do, create whatever they want to create, throw everything in and have fun doing so. Whatever works, works and whatever doesn't, doesn't. So far, so good. However, the whole idea of a Shared Universe is that different creative teams will eventually take over. Sometimes Writer A of Title A will leave and Writer B will take over, while at other times Writer A's character will guest star or make a Cameo appearance in Writers B's title. People being people, those different creators will have their own ideas. They'll have different ideas about what the 'verse should be, about what has worked and what hasn't, what might work and what doesn't. The new creative team will also want to make their distinct mark on the 'verse and their readership; as such, they'll have their own things that they want to add, things they disapprove of and want to remove or ignore. Things that were previously essential may become irrelevant to the new team. When another</ creative team comes along, they'll change things even more; they may even completely override the changes made by the previous team to include things that they want to see or to reassert a previous status quo. Unfortunately, sometimes what they regard as being fundamental to the original continuity was never even there to begin with ! The longer that this goes on and as more teams take over, the chances of Continuity Snarls taking place go up as more retcons are made. Drastic changes opening up dozens of potential storylines are introduced and then promptly forgotten about. Different characters and storylines set in the same universe Crossover and create multiple different continuities. Add to this the problems caused by Comic-Book Time , and keeping things straight becomes a nightmare. A Dork Age is a possible result when this all goes bad. This is particularly a problem for comic books, especially in The DCU and the Marvel Universe , which have the long-running and tangled continuities of many a character to keep straight. (Eric Burns of Websnark did a rant about this in comics) Long-running TV franchises can also suffer from Continuity Snarls — the Doctor Who </ and Star Trek </ universes have gotten especially snarled over time (although time travel helps Hand Wave a lot of this away). A Continuity Snarl can result in Continuity Lock-Out for readers, especially newcomers. Creators sometimes resort to the Crisis Crossover to try untangling the snarl they've made for themselves — unfortunately, this can just as easily become Continuity Porn , which more often than not just makes things worse</. Can lead to a plain ol' Plot Hole . When canon becomes too involved and self-contradictory, it starts denying new writers "room to move." So — how to fix this? The simplest, and by far most common, solution is to simply not care very much about continuity . TV show comedies are a good example — do whatever is the funniest and reset things for the next episode . If you need to offer at least a token acknowledgement to past work, just say "Okay, it happened but not in every detail." Finally, the trusty Continuity Reboot allows a clean slate; for example, new TV shows or movies in a long-running comics franchise usually make clear they're their own separate continuity. Continuity Drift is when a Retcon slowly happens

over a period of time. Not to be confused with a Series Continuity Error , a singular mistake. See Armed with Canon , Comic-Book Time , and Author's Saving Throw for common causes of snarls. May result in Continuity Lock-Out , Continuity Porn , Tangled Family Tree , and Timey-Wimey Ball . Multiple-Choice Past is this trope applied to a single character. Compare Schrödinger's Canon .

Tropes about Continuity , which is the coherence (or lack thereof) of the characters, plot , and narrative elements through a story See also Canon Universe , Consistency , and Plot Time

In Real Life , the rate of decompression correlates positively with the pressure differential and inversely to time taken to equalize. In layman's terms, decompression is usually either violent but quick (if the pressure differential and/or the hole is large) or slow but gentle (if the pressure differential and/or the hole is small) Not so in fiction. If a hole were to appear in a ship, it will always be violent and</ lengthy, where a constant wind will appear and attempt to blow the entire contents of the room out into the sky or space until the hole is sealed once more. The other factor that will cause the wind to stop - internal and external pressure reaching equilibrium - never seems to happen. One common variation is for the wind to be just strong enough to make people's clothes flutter but just weak enough not to actually blow them over — unless they have the unfortunate chance of being the bad guy or a Red Shirt , that is Even with works that get the decompression part accurate, going for a slow gentle depiction (violent quick ones seems to be eschewed presumably as it can't be Played for Drama as easily), they'll tend to misportray how the characters will still be able to breathe - as air leaks out, the air pressure inside decreases and characters should start to suffer from hypoxia However, sometimes this trope is justified. If the enclosed space is relatively large while the hole is comparatively small, it can take hours until all the air rushes out. This can also be the case if pressurization is being maintained by continuously blowing in more</ air, which also happens to cover the lack of hypoxia since the pressure will remain the same in this case Often occurs when somebody or something is Thrown Out the Airlock . Our hero may be required to Seal the Breach

A professional killer (most likely a Hitman with a Heart) suddenly finds himself being hunted by the very organization he works for. Cue a plot line involving him taking out other assassins as he works his way through the ranks trying to find out who wants him dead and why Sometimes it's because the assassin wants to quit their profession, leading to The Syndicate (or The Government , or whatever other employers he's working for) reminding him, in deadly fashion, that there's only one way to leave . Sometimes it's because his employers don't want to pay him for a crucial job or consider him to have outlived his usefulness or failed them in some manner , particularly if he refused to do a hit for them that the assassin considered to be against his principles (women and kids are an all time favorite, falling In Love with the Mark being especially common). Sometimes it's revenge for a past loss or embarrassment at the assassin's hands, or because he or she wants

something (or someone) that the assassin has and wants him or her out of the way. But most often, the reason for the Contract on the Hitman is because the employer doesn't want anything linking the killing that the assassin did back to them, and wants the assassin eliminated because — say it with us, people — He Knows Too Much Compare Assassins Are Always Betrayed

The top-level bosses in a game will be immune to the player's most effective or strongest attacks.</ Any magician, fighter, or hero with powers, abilities, or weapons that enable them to cut through mooks like butter will rarely</ be able to use these skills on The Dragon or the Big Bad . In Video Games these enemies will be flat out immune to these attacks, or in the case of a first person shooter be able to take head-shots</ and keep on ticking, while (annoyingly) players have no such protection from their</ instant-death attacks . Where's the justice? The reason programmers and authors do this is for game balance and narrative issues. Where's the big climactic and fun</ battle if the hero just lops off the enemy's head? A hero who can send the Big Bad into the Phantom Zone , turn them to stone , cleave them limb from limb , or otherwise kill/disable them in less than a heartbeat skirts dangerously close to an Invincible Hero . However, this Contractual Boss Immunity ends up resulting in Gameplay and Story Segregation that will really bug players, or worse, harm them</ if they put a lot of their XP into powering up these abilities. Essentially, this is what puts the "Useless" in most Useless Useful Spells , especially in RPGs ; what's the point of using an expensive, powerful attack when it only works on enemies you can defeat with a weak one? However, averting this trope can</ make for a different and entertaining atmosphere. Allowing players to One-Hit Kill any enemy, turn the Final Boss to stone, or characters to use the Five Point Palm Exploding Heart Technique on Bill can be downright awesome! </ As you can see, this veers in and out of Acceptable Breaks from Reality . It can be fun to kill a Final Boss with the uber attacks that are normally useless; but it can also be rather boring to do so. In recent days, this is becoming a Downplayed Trope in several instances, most of which have to do with expanding the options available to the player and the underlying systems which make them work, watering down the effects of these potent attacks instead of outright making them useless. One example is that, instead of instantly killing the boss, the Exploding Heart Technique does massive amount of armor-piercing damage when successfully applied while the boss is made vulnerable . Another is that, instead of being unable to inflict poison on a boss, it requires multiple casts of a poison spell (instead of the usual one on mooks). The Monster Hunter </ series loves this version, but even it has instances which play the trope straight. Unrelated to Joker Immunity . Compare SNK Boss , which is a type of Boss for Fighting Games that really</ breaks the rules.

Usually not put in every</ episode, but frequently enough it becomes associated with the show as a whole. Writers may even start to make increasingly complicated setups for them just to keep the novelty. If it's regularly being Lampshaded , then it's also an Overused Running Gag . See also Character Exaggeration . Many Megaton Punch </ gags are adaptations of quick, one-panel visual gags. If filler episodes

use them just as frequently, it can make a character seem overly grouchy or abrasive . (Viz Akane Tendo from Ranma ½] </ .)

In Home Improvement </, Wilson's un-shown lower face became this. Originally, he just stood behind a fence on stage. As the show progressed, Wilson was shown out of the house more and set designers went to town finding ways to keep the portion of his face hidden with props. In all these cases, he was never shown, being obscured by at least three props in the scene as he moved around the set. Even at the final curtain call, actor Earl Hindman came out holding a miniature fence in front of his face (he did move it, though). Hindman was even known to do out of character appearances</ , for instance interviews about his experience working on the show, with his face obscured.

On Usenet , the word (for "predictable", naturally enough) denotes a response to a topic that is a) completely unoriginal and b) nonetheless required.

In Space Ghost Coast to Coast </ , Space Ghost would often abuse his Destructo Ray to blast the guest or Zorak when he tires of them.

For every complicated villain with abandonment issues that has a chance to redeem themselves, there are ten Card Carrying Villains out there who are just in it because they love being villains. But what happens when you have a villain who understands that to be a good villain, you have</ to have Genre Blindness ? You're left with a villain stricken with Contractual Genre Blindness. This is the baddy who captures the hero and uses overly complicated Death Traps , not because it's the smart thing to do, but because it's what a villain is supposed</ to do. While usually reserved for a Card-Carrying Villain , this trope does reach out into the realms of the Affably Evil , the Punch-Clock Villain , the smarter Harmless Villain , Spies trying to keep their job secret from their spouse , Cartoonish Supervillainy and the Deadpan Snarker who gives up and "plays along." Slave to PR to the extreme. If a villain, usually a Mad Scientist , has a mental handicap which forces</ them to act like this, even when they know better, that's Science-Related Memetic Disorder .

A major character is seemingly killed, leaving the story permanently. However, the dramatic tension falls flat because we know these kind of events are very seldom permanent . There are two main causes of this. In television, actors have contracts, and if an actor's contract ends we probably would have heard that the actor has quit or been fired long before any on-screen death. Even if a character does somehow die, it is very unlikely that they are Killed Off for Real , and are probably Not Quite Dead . In books and any other media without real individuals playing the roles, there are a number of ways that the reader can be sure a character will survive, such as stories told in asynchronous order or an unfulfilled prophecy in any setting where that kind of thing is reliable Guest stars and minor characters introduced in the last couple episodes, on the other hand, are very mortal. Not to mention anyone wearing a Red Shirt . Less applicable near the end of a season where contracts are up for renewal... you'll want to stay on the writer's good side at this point Not quite as powerful as Foregone Conclusion for saving lives, but close Compare Plot Armor , which is where the main characters don't die in the first place because of their importance to the plot. Also consider a Disney

Death , which is where characters are seemingly killed but you know it's not permanent cause it's a kids' show Not to be confused with a character being literally immortal as long as they meet certain conditions See also: Like You Would Really Do It , Joker Immunity , Popularity Power , Contractual Boss Immunity , and Disney Death . Contrast Anyone Can Die and Dead Star Walking . Can lead to Opening a Can of Clones As a Death Trope , all Spoilers will be unmarked ahead. Beware

Works creators say they did mainly to fulfill a contractual obligation Similar to Money, Dear Boy except for the creator's goal in many instances is to avoid losing money as a result of getting sued for breach of contract, incurring legal expenses, and (in the worst-case scenario) having to pay damages For a creator involved in a contractual obligation project, the obligation</ aspect looms over everything. A typical example is when there's a final project left in a long-term agreement between parties whose relationship has soured. The enthusiasm for this last project may be low since at least one party just wants to get it over with and end the deal. Other times, the Contractual Obligation Project may be one a creator will do just so they can get to do another more enticing project that's also part of the deal. This does not mean a Contractual Obligation Project is all but guaranteed of being a dud. There are times when, in spite of everything, the final product will end up being financially successful, award-winning, and highly-regarded Note that this is mostly an American trope, due to the way in which Common Law works. Many other countries forbid forcing a person to work against their will unless the person who signed the contract also compromised in some way or another to work in that project. There are a few exceptions to this, especially when divorced people are involved Compare with Ashcan Copy , which is a project that is greenlit to avoid a penalty because the terms of a contract aren't</ being met, and Merchandise-Driven , where the writers of a show are contractually obligated to add elements inspired by real life merchandise in order to advertise it

When a young actor comes to public prominence in association with clean, wholesome family entertainment roles, the expectation of studios and audiences is that the actor's personal life will reflect the same upright morality of the character they play. Heaven forbid, then, that said actor should be found engaging in perfectly legal, perfectly normal adult activities like drinking alcohol and/or having sex. And should said actor take a role inridicu a production where they'll do things like nude scenes, using foul language or engaging in criminal behavior, then Moral Guardians will arise against that actor for betraying their expectations or somehow corrupting their young audience . As most of the examples on this list will show you, this trope usually (although not exclusively</) applies more to female celebrities than males . Some actors deliberately seek out such roles precisely to shed their image , and seemingly the majority of male ones lately go through a phase of sporting stubble for photoshoots and red-carpet events to remind us they're not boys anymore (even if they are still playing high school students). There are two sides to what happens with this controversy. First is that Moral Guardians really have no right to get upset that it is "corrupting our youth" because an individual of a certain age is well within their legal rights to smoke, drink, swear, have sex, etc. On

the flip side, being a public figure, especially one who is popular and well-known amongst young people, carries a certain degree of responsibility for the influence one may have since they will</ be treated as a role model. George "Superman" Reeves , for example, took great pains to not smoke or be seen with his lady-friends in front of children. (He was also careful because kids wanted to see if he was as invulnerable as he was on TV.) This will very often actually</ be enforced by a morality clause in the contract. A form of Typecasting . See also Old Shame and Not Allowed to Grow Up . May result in the actor/singer hating the job, but still enjoying the publicity that comes with it . Contrast So My Kids Can Watch , which is when an "adult" actor takes on family-friendly roles, usually so that their children can watch them without being exposed to violence and/or sex . For a specific supernatural version of this trope, see Virgin Power . Subtrope of Slave to PR . Exactly what</ counts as "purity" varies wildly from culture to culture — see Values Dissonance . For the polar opposite of this trope see Controversy-Proof Image . Real Life Examples (in alphabetical order when not Disney):

There are some notable aversions and inversions, where the actor or actress's first role (or at least breakout role) is in a decidedly adult production, only for them to move onto more family-friendly fare. Compare Bleached Underpants , Rated G for Gangsta . Charles Barkley famously used this stigma to great effect in a Nike commercial that began with him saying, " I am not a role model ." The Moral Guardians that protested the commercial apparently skipped the second half of the ad , where Barkley expands on this: " Parents</ should be role models. I get paid to play basketball, not</ to raise your kids." The Beatles had something of a (relatively) clean-cut, madcap, teen-friendly "mop-top" image, and were a youthful breath of fresh air in America following the JFK assassination. They were advised to stay away from politics and kept much of the rougher aspects of their personalities and humor (and burgeoning marijuana use) under wraps. Then came John Lennon 's " more popular than Jesus " misquote, and later Paul's admission in the British press of trying LSD. Though it took a toll on their " Beatlemania " image, the changing times , their refusal to tour, and their psychedelic , facial hair-wearing period would soon follow with Sgt. Pepper's Lonely Hearts Club Band </. They would be Growing the Beard in more ways than one . By the late '60s, the group would develop a more serious image for the rest of their careers.

Making a sequel is hard. One needs to find the perfect balance of new stuff to contrast with the original. One way to get some difference is to take your old protagonist and make his mirror image, but with contrasting traits. Was the previous hero a Hot-Blooded Action Hero ? Make the new one a Action Survivor who relies on brains over brawn. Was he a young Wide-Eyed Idealist ? Make the other an older Knight in Sour Armor . Was he a man? Have the new one be a woman . The new protagonist will sometimes have an Establishing Character Moment just to drive the point home that they’re nothing like the previous one. The trope can also potentially lead to some interesting moments should the two ever meet. Such characters may share some more basic traits, like heroism, allowing someone to note how they aren't so different . Beware, however, as they can easily end up becoming a Replacement Scrappy . Subtrope of Breaking Old Trends . May overlap with Anti-Hero Substitute . For contrasting villains go to Contrasting Sequel Antagonist . Contrast Suspiciously Similar Substitute . Star Trek </ :

Looney Toons : The quotes page? I just took a look — it's gone now. (14 July 09): OK, . Though this is on the back xkcd. Silent Hunter : Lovely. Thanks. Looney Toons : (17 April 2009) I'm back, btw, in case you haven't spotted my byline on any edits in the last five days. Tropers/fleb: Ditto, it's annoying and unnecessary. Indigo : Been advised that Dr Horribles Sing Along Blog </ expires on Hulu.com tomorrow (this writing from 11:10 am Eastern time). Tropers/Also, belated respect paid to the fact that The Dark Knight </ actor Heath Ledger was nominated for a Best Supporting Actor Academy Award. Wall-E also received a nomination. Adam850 : This was posted January 27th, FYI. Andrew : January 20th 2009 marks the end of an era. Happy Inauguration Day! Here's hoping the next four years under President Barack Obama are great! Indigo : A moment of silence for Ric ardo Mon talban and Patrick McGoohan who both ascended to a higher plane this week. Silent Hunter : Also for Sir John Mortimer . Indigo : Congrats are in order. Dr Horribles Sing Along Blog has won the People's Choice Award for "Favorite Online Sensation". Congrats also to any and all tropers and fans who helped our little troperiffic three-part Web Original make it to this auspicious position! Vampire Buddha : It's be great if we could watch it . Indigo : You can't order it from Amazon and play it region free? Bummer. Vampire Buddha : That's right, it's US and Canada only, and the Canadians have to pay for it. Sure, there's a DVD now, but I suspect it only works on an NTSC player. Moocow1452 : It's made Region Free. Indigo : For those of you beyond the meridian, Happy New Year! For those of us in the US who have yet to reach the future, Happy New Year! May it be Troperiffic for us all! Silent Hunter : Happy New Year! Tropers/Before we roll it out, please visit the and play with it, so we can get some idea if it is ready for primetime. Cassius335 : Merry Christmas, everyone! Silent Hunter : Merry Christmas! Freezair For A Limited Time : Merry Christmas to one and ALL o' dang y'alls! Indigo : Merry Christmas to everybody! Looney Toons : Good idea, and good luck. Also, I seem to remember that somebody had started a project to translate the wiki into, um, Russian, I think, several years ago. Gus would know, as he's the one who told me. I wonder whatever became of that... Citizen : Woah. That's quite a project, even just hammering out the standards for what gets ported over and how. Good luck with that. Citizen : No. That's too common a terminology to bother with. Newbies can look it up once if they don't know it, and then they'll know it from then on. Vampire Buddha again: That reminds me, some people have a tendency to refer to characters, organisations, and events without saying what work of fiction they come from. This seems to be most common among American comic fans, but it is far from exclusive to them. Just for the record, not everybody likes the same things as you, so always</ state the source of your example. For example, instead of saying "Ben Grimm does this," write "Ben Grimm of Fantastic Four </ does this". Capisce? Cassius335 : At least we're back. Citizen : FictionPress. ...Um... yay us, I guess... Cassius335 : Meh. When we get on Doctor Who or The Simpsons , that'll be something. This/ Not so much. Silent Hunter : 8 November 2008- back now. Robert : But don't assume there is necessarily an appropriate link at all. If an incident falls between the tropes, unlink it. Cassius335 : I'm sorry I missed the YKTTW on that, because then I could have pitched in on the name (Moral Event Horizon is basically Rape The Dog V2 and I wonder why you're even trying to pretend otherwise by changing the name.)

Vampire Buddha : We're not. The name was changed to stop people misusing it. Cassius335 : Do you really think making the name less catchy is going to help? Moral Event Horizon is still</ a Subjective Trope (and part of the "the Dog" trinity)... just with less "the Dog". All the name change has done is replace "[Insert Name Here] rapes the dog" with "[Insert Name Here] crosses the horizon.". Robert : No. We're using a significantly narrower definition, so it's not a straightforward replacement. It should help that the term is less catchy, and not one of the 'dog' tropes. Fast Eddie : "Less catchy" is not one our goals. We're not shooting for "dry as dust", either. Moral Event Horizon is not necessarily a dry title, but if it doesn't "catch on" in some fashion, the renaming exercise was a waste of time and effort. Robert : It's a balancing act. Trope names certainly needs to catch on; they don't need to go critical, which Rape The Dog was close to doing. Tropes too broadly defined loose all meaning, but tropes too narrowly defined get no examples, so we strike a middle course, and correct ourselves as needed. Duckluck : Good advice, LT. It's important that people that people remember that not every page needs to go through YKTTW and some (series pages, for instance) shouldn't. Citizen : (had a habit of citing this as a reason) Hey, I'm just saying that some of those useless pages could have been avoided if they had checked elsewhere, first. But then, if they don't know any better regarding creating those pages, then they probably wouldn't regarding using the YKTTW , either... Freezair For A Limited Time : As someone else who frequently cites this, my complaint this: It's not that they didn't go through YKTTW , it's that they've posted a duplicate article or one with an obscure, untelling title which could have been aided had they gone through YKTTW first. This also tends to lead to a severe derth of examples (sometimes with only 1 example) which makes pages look severely barren. Indigo : And a fine job of it ye did, LBO...must remind meself not to abbreviate you that way again. Me brain insists it is pronounced "elbow". Arr. Cassius335 : Or Superman's other family member: Boe El. :p Large Blunt Object : "Elbow" I've had before. The Kryptonian thing, though? That's new. fleb : And hey, Smallville Pa Kent was also Bo Duke , so that pun makes way too much sense.

Tropers/Didn't know what you folks' policy was on that sort of thing, so I figured it was better to make a note of it here rather than going around changing stuff willy-nilly. — Jeysie</ fleb : Willy-nilly is practically our middle name . 'TV Willy-nilly Tropes Wiki.' Duckluck : Glad to have you on the case, Eddie. While you're in there, can you fix my account? He changed my name to mess with me. Kind of petty stuff, really. I wonder if he has any connection to the DDOS we got earlier. Indigo : Thanks for being on the case. * applause

Tropers/UT: Thank goodness! That was a strange hacking. (I could still access YKTTW , and new edits, but nothing else.) Big T : It isn't fixed. The douchebag came back. Everything works except the forums. I'm not quite sure what perverted sociopath thinks that the way to get someone's attention about a security flaw is to affect the users that can do nothing about it, but I digress. Tropers/This hacker seems to have the idea that, since he didn't completely trash the place, he's a "different type of hacker." The amount of harm has nothing to do with the severity of the wrong, however. Tropers/I am hoping we were just being clever, setting up a trap so he'd come back, so that we could track him. But with the lackadaisical way things are run around here, I doubt it. Fast Eddie : "lackadaisical"? Big T , please feel free to find some other place on the Web to hang

out that is more suited to your exacting standards and delicate sensibilities. Etrangere : "The amount of harm has nothing to do with the severity of the wrong" ??? I'm sorry but if he had trashed the place utterly for days I would think there'd had been greater harms. Tropers/Yay that things went back into order quickly :) Silent Hunter , 4 September 2008- Voiceover artist Don LaFontaine died on 2 September 2008. So long and thanks for such a great trope . Tropers/This is my fault. I started the article, but did not write a proper description for others to write by, and did not adequately maintain it. So I'm fixing things. I plan to preserve the lists in a forum thread and leave the original article. I still believe that we can have a (non-subjective, non-nattery) article about the subject, as long as we make it clear that it is only for things . Fast Eddie : One thing to add to this consideration: If you go to the So Bad Its Horrible page and use the "Refs for this page" tool, you will see that there are around 700+ sites that reference that page. It might be nice if they found something</ on that page. The sub-pages have much smaller refs, but it may make sense to leave them in situ, with new content, as well. Kizor : Yeah, I was planning to leave a nice, normal-sized article on that page. How about redirecting the sub-pages to the article? Fast Eddie : After some thought ... It might be better to just abandon that article to what it has become. People obviously want a place to sneer at stuff. Leaving that section for them to do so in will likely tend to keep it out of the rest of the wiki. If you feel a need to define things that are Truly Lousy , it might be better to do it in a new article, making it clear that any entries there will be on clear criteria. Tropers/Axing a huge amount of input is bound to torch a few egos, in ways that make more heat than light. Kizor : Okay, he went on desperately, what if we give a month's warning and have each list start with a paragraph's worth of red text warning of this issue, asking for comments on So Bad Its Horrible Discussion and an assurance that the lists will be preserved in a forum thread that the resulting article would have a link to? fleb : Yeah, if the Ultimate License To Whine page is going to continue to exist at all, we should shrink it down to things several people have talked about and agreed on. The red asscaps could say something like, "If you were thinking of adding to this list, make a post in the forum or on the discussion page instead. If consensus is reached, it will go here. This is for our protection, Neo." That will let us keep up quality control, hopefully, while being able to list things like E.T. the Extraterrestrial</. Repeating the warning in commented-out (with double-percent-signs) warnings on the page source, like , would help reinforce that to people who don't like to read. Indigo : August 20, 2008: A moment of silence for actor Julius Carry, aka Lord Bowler from The Adventures Of Brisco County Jr , and Sho'Nuff from The Last Dragon . Silent Hunter , 15 August 2008: Today is the 63rd anniversary of the end of World War Two . Tropers/May the sacrifices of those involved never be forgotten. Truly, a Crowning Moment Of Awesome . Gemmifer : And I always thought it was a series of Rape The Dog Moments ... Tropers/What, precisely, is going on is unclear at this present times, but a war between Russia and Georgia looks very likely. Tropers/My thoughts and prayers are with our Readers and Tropers in the region. Tangent 128 : Ditto; I can't say I know much more about events, but they don't look good. Grev : Are we gonna have symbols for all of them, too? Like a teardrop for Tear Jerker or a crown for Crowning Moment? Fast Eddie : Sure, why not? Tropers/Which means things like Crowning Moments and Fetish Fuel and Nightmare Fuel or I'm Not Kidding or So Bad I Coughed A Lung Up Into My Soup and all those things that require

the name to consist of mile-long repetitions can be moved to an appropriate namespace with minimum hassle, now. Citizen : A good change, though now we have to go into all the subpages of stuff like It Just Bugs Me and add in</ the namespace for the index markups... Fast Eddie : The trick there is to make the index page in Main, and only have the subpages in the namespace. Just Bugs Me, WMG, and some others are built wrong for that, but it is a pretty simple fix to those index pages to make it go.// later: I just did Just Bugs Me and WMG. C Ouple of seconds, and it works fine. Looney Toons : Aaaand I'm back now. Tropers/Punctuated titles can be made. They do NOT create a redirect from the the un-punctuated form. When making a punctuated title for an existing article, copy in the text to the new article and then make the old article redirect to the new one by putting redirect:ptitleXXXXXXX into the old article. The 'ptitle' is what appears in your browser URL bar at the end of the URL. Looney Toons : Yee-ha! Duckluck : Thank you, and a happy, well, 4th of July to you to. Tropers/Silent Hunter: Thank you. Looney Toons : over at That Other Wiki is up for deletion. Apparently, they don't like our supporting citations. Anybody who wants to keep it there, please jump in on the discussion. Fast Eddie : Why do you assume it has to do with citations? There doesn't seem to be any reason given for the deletion. I think they should be able to verify that we are here... Anyway, if it is</ deleted, it won't mean anything at all of importance. We get like 4 referrals from them per day, out of the roughly twelve-thousand referrals we get every day. Looney Toons : Maybe I was unclear. They feel that no one authoritative links to us, just a number of blogs (which they discount), and the references on the Lost</ DVDs are simple shout-outs. Given that, plus what seems in the brief discussion I read to be a low-level prejudice against other wikis, there is a proposal to nuke the entry on the grounds that we aren't notable after all. Big T : I talked to the guy who started up the AfD, and he says all he would want (and he's pretty influential) is a single source that actually talks about how we are a good resource, instead of just assuming it. It's also a border-line case, so it might just survive anyways. I posted a request over at What Are The Contributors Real Names Discussion for one of those famous people to publish something like that. Tropers/I do think that the current suggestion for a tropes (TV)</ that links to us will pass. Also, if the main article gets deleted and you want to contribute anyways, go to . (Yes, I got permission to do that.) As I've said, I just think it would be awesomely ironic for us to be considered notable, with There Is No Such Thing As Notability and everything. Looney Toons : Well, hell. I'm a published author with books on Amazon, I'm a member of SFWA, et nauseum cetera. I'd be happy to cite the Wiki on my own website as a fine resource for the aspiring (or successful) writer, if that's all it will take. Of course, as pros go, I'm about as small-time as you can get and not be a strictly fan writer. But we have some big-time pros here, too, even if they're all mostly in disguise. If one or two of them would do the same, we can probably provide at least one link that will satisfy him. Fast Eddie : I missed the delete discussion link. Here it is, for others: If I understand the thing correctly, a person can just go there and vote "Keep" if they want to. I don't see any reason to request that any of our contributors jump through any higher hoop than that. We have our personal anonymity and notability policies for our purposes, and Wikipedia has its policies for its purposes. If the policies are incompatible, so be it. Shale : Didn't the New York Times source us not that long ago? Large Blunt Object : Bleh. Now I remember why I hate That Other Wiki . So up</ themselves with the

notability crap... Tropers/And if that's not "reliable" or "explicit" enough, screw it. ED would probably get us more referrals... though on second thoughts, that might be a very</ bad idea. Shay Guy : "If I understand the thing correctly, a person can just go there and vote "Keep" if they want to." Except . Not quite. Maybe I should see if I can find a friend-of-a-friend who works at a newspaper and would like it enough to write an article on it. Halfling Daniel : Now the article isn't up for deletion anymore, because there's no consensus Citizen : United we fall, divided we stand! \o/ Tropers/Statuses of shows relevant to tropers: Tropers/For example, a search for 'Lost' will first give a list of all titles that contain the word. The body-text search will show the thousands of articles that use the word. The "Related to..." button will give the hundred-or-so articles that refer to Lost . Fast Eddie : Turned off trail maker. It was killing us, performance-wise. Silent Hunter : That was me. It would be Girl of the Week , now I think about it- and I'll alter the redirect. Ununnilium : Looks good! Looney Toons : Indeed it does, but it also looks like it shoves any intervening rule lines up above all the nav bars. Should we start trimming those out? Willy Four Eyes : Yeah. We only need to use one, anyway. I think it looks much nicer that way, though I think they ought to be a little thinner. The Other Wiki doesn't use lines between category entries, AFAIK. Tropers/One problem with the new system is that it doesn't pick up on indented bullet points within indices. Should we rearrange them so that they're still in alphabetical order for the category bar to pick up? (Thank Crystal Dragon Jesus they're updated automatically when adding a new index instead of having to do a do-nothing "minor edit" for the change to appear.) Fast Eddie : No, don't alter the indexes. I just need to get the trail-maker working right. I'll also see if I can get it to chop off those extra horizontal lines. The code for the trail-maker when in a little too early, testing-wise. Big T : I've had to fix some (using the Add-a-space technique) on pages that haven't updated in quite a while. I finally found one I hadn't gotten to before I read this: IC Number . I'll leave it, just in case there's a bug you still need to work out. (I'd think it's because they are so old they didn't get the last update, however many times removed.) Duckluck : Here, here! Large Blunt Object : Hear, hear! Duckluck : Yeah, that too. Fast Eddie : You are zapping them, when you see them, right? Seems like the people who use that kind of opening are the kind that Drive By . Silent Hunter : I've done it in the past. I'll stop. Sorry. Large Blunt Object : I've deleted about half a dozen today. Dentaku : I can't believe nobody brought this up until now. Fast Eddie : <throws water baloon at Dentaku /> </ Large Blunt Object : Make that fifteen. This is fun! >:) Looney Toons : Didn't we actually have a trope for that kind of edit? I can't for the life of me remember what it was called, and shots in the dark using the search engine turn up nothing for me, but I'm pretty sure there was one. Ununnilium : Can't think of anything. And yep, I always zap 'em. Morgan Wick : I think it was on YKTTW but rejected or withered away. Kizor : It was launched and promptly destroyed. Shoot on sight. Rarrr. Document N : Alternatively, you might be thinking of How Did We Miss This One , which is similar. Dentaku : It actually looks like more of an epidemic now. I keep squashing them left and right, but there is just no end to them. Tropers, unite against this scourge! LORd : So I found this orphaned trope called Plot Sensitive Strength and it has like zero references to it anywhere on this wiki. I was wondering if it was worth working some Wiki Magic or whether it should just be thrown to the Cut List . Cassius335 : We've already got As Strong As They Need To Be ,

so... Ununnilium : ...do we? That's a redlink for me. Morgan Wick : Strong as They Need to Be . Big T : Yay! I've been wondering what those were. //later: Well, we're up on the new gear. Feels a little faster, and the server stats look good so far as of 01:35 (17 APR). Lets see if we can get through a whole day without any database hate. Looney Toons : A little</ faster? It's freakin' miraculous. I was used to opening another page and reading while waiting for my watchlist to load; it loaded this morning before I was done opening my supplemental reading! Major kudos to you and everyone else who helped in some way. Cassius335 : We're not free of the database hate yet. Transformation Sequence just glitched on me (10:12pm GMT) Large Blunt Object : I've still been getting the odd database error, but nothing like as many as a day or two ago. Fast Eddie : What we hope to be the last piece of the puzzle went in at about 16:00 PDT 17APR (call it 02:00 GDT 18APR). Silent Hunter : Hope it works. Thanks. Ununnilium : Nicely fast! One problem: Firefox froze up for about a minute while I was adding something to my watchlist, around 3-ish PM Eastern; happened twice in a row. Fast Eddie : The server log shows we had exactly one second of database hate in the last 24 hours. It lasted from 11:47:26 to 11:47:27 PDT. Which is around 3-ish EDT. Apparently, then, we need to change the default message to "The database hates Ununnilium ..." Ununnilium : Wow. XD But it hasn't recurred, so... Tropers/The site's changed a lot since I came. Tropes was once one page for a start. Tropers/I'd like to give a heartfelt thank you to everyone here. You are directly responsible for introducing me to Firefly </, MacGyver </, NCIS </ The Princess Bride </ and most recently the Giant In The Playground forums, among many others. Tropers/The combination of facts behind the fiction, great wit and Mega Neko have made this a very regular visit indeed. Janitor , Fast Eddie and others' able work have kept the site going I have made lasting friends here. Tropers/I am glad to be a Troper. TV Tropes has benefited my life. Tropers/Congratulations and long may we continue. 14 April 2008 Ununnilium : applause</ Looney Toons : I was going through my quotefile this morning and I found a dated quote from the wiki — 12 March 2004. I don't know for how long I'd been visiting the site before that, but I've clearly been here at least</ four years and one month. Tropers/Anyways. Woo-hoo! Tangent128 : Happy wiki-versity, then! fleb : I don't know how many people would use it, but I've made that creates a button that will let you view the markup of a page, without having to lock the page for editing. It's still a little rough, ATM, but works. // later: I updated it april 27th so it works from 'page history' pages, too. Fast Eddie : Thanks for the effort! Actually, though, there is a button (View Source) at the far bottom of each entry that does that thing. fleb : Ohhhh. Can't believe I never scrolled down that far. Fast Eddie : Yeah, it is pretty hidden, down there. I was just too lazy to find a way to work it into the layout. Maybe it could go on the tools menu? fleb : That could work, though all the current Tools are links to completely separate pages. There's enough room for a seventh button in the top menu, but that would be the limit without stretching the page horizontally. Silent Hunter : Nice one! Thanks! Adam850 : The above was by "Unknown Troper 66.69.86.114". Not sure what's up with that. Tropers/The edit war in question was Yes, but What Does Zataproximetacine DO? and again, I'm sorry. Adam850 : Please sign your posts. It'd be nice to see who</ is back and remorseful. MysteryMan23 : A person using the handle Psycho Kirby has recently vandalized the Super Smash Bros page. There should still be some evidence in the page history, as well as the discussion page. Please do something about this. Thanks! Tropers/Are you certain?

Psycho Kirby edited the page earlier in the day, as well as during the incidents. Whoever it is used a name with the word "joe" in it, and has a completely different IP address. MysteryMan23 : Well, Psycho Kirby's name was on all the edits, so either he did it, or his account was hijacked. Also, my computer's been acting weird on this site lately, so what you're getting might be different from what I am. Heck, for some reason, I couldn't see YOUR edit on the new edits screen, Falcon Pain , so it's possible my computer's just acting up. But I don't think a computer malfunction could have caused the vandalism I saw. MysteryMan23 : ATTENTION! The Psycho Kirby that's doing the vandalism and the Psycho Kirby that complained about it on Ask The Trophers have two different IP addresses! Looks like an imposter. Tanto : Whoever he is, He's Back . Ununnilium : Yeah, seems like someone with a pretty obvious grudge against the real Psycho Kirby . Fast Eddie : The new method only works on articles that have been edited since we started storing the HTML. Which is, since the Great Crash. Doing a do-nothing edit on an article will make it store the HTML. // EDITED: Never mind. It hammers performance flat. More cowbell needed. Tropers/Okay, let's try it again. Seems to be holding up with the new technique. Still only works on stored-as-HTML articles. Ununnilium : Oooooh. Awesome. Thou art Made Of Win . Citizen : What about red links in the page history? Fast Eddie : Not going to do anything about that, I think. What's the utility? Citizen : ¯\(º_o)/¯ Just wondering. fleb : What about ykttw? Can it even benefit from the new Super Serum you fed the wiki? Even if it can't, thanks</ . I forgot how much I missed red. Fast Eddie : Working on the YKTTW parser right now. This</ -> <- close to making it so that YKTTW parses exactly like the main wiki. Not quite there, yet. Silent Hunter : I would like to wish all my fellow tropers a Merry Christmas and a Happy New Year. Tropers/In case I forget, for Koveras , Sikon and Tulling : ? ?????????? ????????? ? ? ??????????? ????? ?????! Tropers/Thanks for all your help on the Russia material! Fast Eddie : Sorry to announce that I have blocked Man Without A Body , who had many valuable contributions of text but refused to heed nine warnings about hot-linking images that were too large. A block is a serious thing, not done lightly. Sad, when someone potentially one of us doesn't get it. Man Without A Body : But I stopped doing that long ago. And I'm still here. I think. Fast Eddie : Bans only last for a while. One of the reasons being it is hard to tell if communications are being received. Man Without A Body : I'm afraid only one of these aforementioned warnings actually reached me. And in future, it might be a bit gentler to directly say "Stop or you'll get banned" before banning transgressors. Still, I've got my upload account and have learned my lesson. //eta: One of us has been nominated and accepted for the . Big pride. Silent Hunter : Congratulations! Seth : You can nominate an entry you have already written or you can write one, but we want submissions in by December the first, voting procedure will start on the second. There is a cash reward and as it stands there aren't many people competing for it. Come on people. Tangent 128 : ...and we could really</ use more votes. It's a three-way tie with three votes right now. Voting isn't that complicated; just make a post in the forum thread. Fast Eddie : We have this... (We are Server Beach Customers) ''Dear Server Beach Customer, Tropers/We will be performing scheduled network maintenance on Friday, November 23rd from 23:00 pm ? 03:00 am PST (GMT -8) and again on Saturday, November 24th 2007 from 23:00 pm ? 0:300 am PST (GMT -8). The duration of each maintenance window is 4 hours. Tropers/The purpose of this maintenance is to upgrade the core routers in our Los Angeles Data

Center to ensure a robust network. Tropers/Please be advised that network traffic will be re-routed around the affected router at the beginning of each maintenance window. During this time, you may experience a brief period of latency and packet loss. Upon completion of each maintenance window, the network traffic will be normalized and another brief period of latency and packet loss may occur.'' .. which is kind of ominous and unsettling, unless you are a Troper who is used</ to the thing throwing white pages at you and eating your edits for no good reason. What do these Server Beach people think we are? Some kind of wimps? Fast Eddie : The Inbound Links report is back on Tools (on the Changes page, only). As is . Paul A : Would it be possible/worthwhile for the Orphans list to show redirects in a different font or something? Tropers/Here's how it will work: We tell DNS servers all over the world that we are a new address. It takes a little while for that message to propagate across the net, so there is some chance the joint will look "closed" for you for a few minutes. When your part of the web becomes hip to the new address, you will see the site at the state it was in on Sunday. Over the course of about an hour, I'll be transferring in all the edits made in the intervening days. While that is going on, editing will be "turned off" (the edit buttons hidden). Updates will be done in this order: The entries, the forums, YKKYW, and finally the Known accounts. //Later still: We should be all up and open on the new rig. //Even later: Gah! Something is fracked with History and I am to brain-dead to see what it is, right now. Must have sleep. Ununnilium : YKTTW works so much better now~ Fast Eddie : We have clearly outgrown our current hosting setup. Janitor just pulled the trigger on a contract for hosting that will provide us 20x the bandwidth and a dedicated database server separate from the web server. Migration to our new home should be done over the next few days. All of this thanks to those who occasionally recall to click an ad that interests them. <big geeky-nerd smile! /> Tanto : Sweetness. Seth So my random add clicking pays off. Fast Eddie : Not cutting over to the new silicon on Sunday, after all. We are presently under attack by a bot-net. Trying to figure out what to do about it. Seth : Is that the greek thing you mentioned? Fast Eddie : Yes. The "package" is the same, but it is now coming from IP's all over the world. No idea why a bot-net operator would be targeting us, unless it is to exercise his 'net. Fast Eddie : Wow. That one is just gone.</ Not sure how they did that. Please reconstruct it, OP. I'll run an immediate backup on that entry. Not going to let some super-prude neocon shut us</ down. Seth : Just in case anyone missed the memo, be sure to register for Our Forums . Tropers/More sophisticated anti virus than we had is now working to assure that it will be some new</ problem that beats us up, next time. Tangent128 : Ah, that's what it was... bummer. A year</ ago? Who thinks, "I know! I'll attack this site in twelve months!"? Tropers/Good News: The $300 has already been received (via paypal). It is here, ready to award. Bad News: We have no idea how to decide what is "best." Tropers/Clearly, anything by myself (nothing, thankfully) or Fast Eddie can qualify. It seems pretty plain that there must be a time limit of some sort. How to determine "best" ... There are so</ many wrong ways to do that. Opening discussion at ATAAFOVS Prize Discussion]]. Fast Eddie : Drawing your attention to the addition of the watchlist buttons at the bottom of each entry. These will build a list (for Known Tropers) of entries you want to keep an eye on. The next iteration of the code will use the list you build as a filter for Recent Changes. Seth : ... Awesome.

Tropers/That person has sent us a not-lean donation to keep us happening, as a celebration and a gesture of gratitude. Morgan Wick : This season or next? If the latter, is it possible it could be squeezed out of the schedule? Janitor : This Fall. CW. Not sure if the "squeezing" is done, really. It was in the up-fronts. Not sure about the CW's behavior — they could be another FOX, or they could not be another FOX. Morgan Wick : Ah. I was working on the assumption the news was current. (After all, I seem to remember the original declaration that someone had a show picked up was after</ upfronts, or at least not long before it.) Janitor : I'm more than a little vague on the particulars of how it works, when it does work. Here's the current news. The upfronts are over. The production company has gotten money to produce six episodes. They are doing that. It is scheduled, to the extent that the schedule is solid for Fall. Morgan Wick : And considering there are only four shows on CW's fall schedule, it narrows down the options considerably. fleb : As a short-time contributor, my sleuthing skills are failing me. The Other Wiki indicates all four new non-reality CW shows had 13 episodes ordered in May. I guess the funding is separated from the ordering? Tropers/Like this (view source): Tanto : We couldn't do that before? <fasteddie>Nope.</fasteddie> <morganwick time="muchlater" specifics="afterzekescomment">Sadly, it is still far too easy to do on YKTTW , at the expense of being able to end</ a list.</morganwick> What I'd really like to see is the ability to add Fast Eddie : Hmm. I'll take a look at it. Not sure unordered lists ever work like that in HTML. There may be a CSS workaround. Seven Seals : They do</ work like that in HTML, if you start a sublist: <ul> First item, which has a... Fast Eddie : Yup. Did a that worked the way Tanto wants. Now, we just need to trick Pm Wiki into doing it. It parses for asterisks after hard returns followed by an asterisk and assumes the <ul> is finished if it doesn't find one before it finds another character. Oh, boy! Nummy fun time regex deciphering. Seven Seals : Oh, what the hey, if we can have wrasslin', let's do programming tropes on the wiki too! Now They Have Two Problems . Looney Toons : Um... back when the "->" markup indented to the same levels as the bullet text, that was ridiculously easy to do. For some reason those indent sizes were changed, and suddenly a lot of entries that used them to line up paragraphs in this manner were broken. Maybe put that back instead of trying to trick PM Wiki into doing something new? Zeke : Just noticed this. Neat! Thanks. Fast Eddie : There will be an outage the evening of 31 August, while the hosting company ... feeds the hamster, or flushes out the "tubes" or something. Fast Eddie : Save-as-draft is implemented. Your changes will stay off the Recent list when you save "as draft". Saving it without the draft flag will allow it to show up. You can find your draft on the Drafts List. There is also a little note there about it works with regard to draft expiration. Tropers/This should serve most of the needs of the oft-requested "preview" mode. Paul A : Is there any way to unmark a draft when you're done with it, or do you just have to wait until the flag expires? Fast Eddie : Edit it (add a space at the bottom or something, so there is something to save), then send it without the draft flag being checked. Voila, not a draft. Tropers/Go, Tropers, with your bad selves! //later: No more email about "Who?"! None of the admins. You probably thought he/she/it was an anime geek , from her/his/its posts. Further Deponeth Naught Said. Looney Toons : Presumably, if the pilot is picked up they will then provide an encyclopedically-complete series listing for the wiki. <grin> (I presume that would be a first, but with all

the industry folks here hidden under their Latex Perfection masks, I wouldn't be surprised if I were wrong...) Oh, and although I am in fact an anime geek, at least part time, it ain't me. I don't do TV work. Janitor : < Thinking back...</> Yes, I think this is possibly the first series possibly born here. Although ... Drive</? ... we'll have to let that guy comment, next time he swings by. Episodes</ have been born here, without a doubt. Good point-out, LT, about script pickup and series pickup being way</ different things. Also, yes! Just because someone might have been socked with a demand for twenty-odd episode scripts is no</ excuse for not keeping up their TV Tropes contributions. Seth : The ultimate feather would be when a pilot of AATAFOVS gets made. Congrats to whoever got a series, glad to see people rising. Tim Minear : No part of Drive</ was inspired by or attributable to any Troper or anything else on this site. I deny you all, and will pursue that assertion relentlessly in any Court in whatever jurisdiction, as long as I get to spank Janitor when I lose. Fast Eddie : Whoah! I had no idea a Name was in the house! An actual, public ... Name! < mutters: Sure, come out when you have something to promote, media whore.</ > Tim : Bite me, bitch. Everything I have out right now is paid-for. If you weren't a guy who knew a guy that I knew, I'd put a Guy Richie slap</ on you that would spin your head around backwards. Fast Eddie : For those watching: That Tim person actually likes me. I am giving him the mickey about being a Name, and he is being a right prick, which we are used to. Tim : The farther back you fall in an argument, the more Brit you sound. What is that, a tic? Janitor : So ... what went on with Drive</ is not our fault, and we had nothing to do with how Fox did its thing, Fast Eddie is a bitc, and you are a spanking-perv? Tropers/Cool. Having a hero is good. Ununnilium : This website is awesome. I just want to say that. Morgan Wick : Phartman has done some nasty trolling on Console Wars Discussion]]. At least that's how it came across to me, take a look at the history for the details. I removed the first bit because it wasn't anywhere near even the end of a section, yet it was a direct reply to another statement, so it would have been out of place at the bottom of the page, and I didn't want to risk trying to clarify and getting it wrong or mangling the statement. Then he removed my (properly added) statement on said removal, accusing me of "censorship", so now I don't know what to do, now or in the future. Janitor : I don't know, Morgan. From the history, it looks like you deleted a thing in discussion, he deleted a thing in discussion ... it was a whole deleting things in a discussion thing. The easy fix? Don't do that. People will say things in discussion that may offend others. Either ignore it or engage in the discussion. Zapping someone's comment is</ censorship My take: Neither of you were right, in deleting discussion. Phartman : You know, not to troll or anything, but I don't act that way to people who aren't assholes. Perhaps you should quit being one and observe how differently things work out for you, Wick. Fast Eddie : 7 May 2007 — Four hour outage. Longest we've been down in three years. We may need a new hosting solution. Seth :Can people stop deleting the gaps underneath the markups, they are there for a reason. Pavlov : An example of whatever you are talking about would assure 100% compliance from me. Tanto : In a properly-formatted entry, there should be a blank line at the bottom of the page, beneath the categorization bars. This prevents the last line from showing up in the page history and makes it easier to read. Don't delete 'em. We thank you. Jisu : Okay, I feel swamped. Has anyone else checked General Suggestions and seen the new categorization format for trope pages? If we all work together, I'm sure it'll

go a lot faster! Seth : Don't make it a project, that would take forever and drive you nuts. As people edit pages if they just sort the examples when they do it, it will go much smoother. Fast Eddie : Yup. This doesn't impress TV network people, but it should. All of our readers can READ and several of them have JOBS and can BUY stuff. Tropers/Okay, maybe "several" was a bit too grandiose. Tropers/The JOB thing ... You know, those crappy JOB s you can get when you are over-educated? The ones where you can't actually afford to BUY anything? Tropers got that all covered. We own</ that stuff. Mediate right into us, advertisers. Earnest : For a movie/book with no less than 21 hits on a simple search, I was surprised The Princess Bride didn't have an entry. So after a flurry of editing and crosslinking The Princess Bride is ready to be filled in with stuff. I'd do it myself but I'm just a casual fan and never read the book. Fast Eddie : We had a little hack-attack around 5Am 17-APR that caused the edit page to come up empty. That hole is closed, now. Fast Eddie : Wondering about the performance today? We've been by a very popular Wired</ magazine writer and</ linked in a Digg comment. After a while, the Digg folks will skitter back off into ADD-land and things will get back to normal. In the meanwhile ... drop and roll. (16 APR 07) Morgan Wick : Now, now. Don't go tarring everyone who uses one website with the same brush. Seth : At least it was a good place to pick up editors. A few of those comments were pretty good trope talk. We have been getting inbound links from 4chan though - that's who i worry about. Citizen : Hey, a link from 4chan is how I got here, but maybe that just drives your point home? =P Seth : I just don't want to become and encyclopedia dramatica style website. I like it here. Fast Eddie : The wiki is going down for a hardware refit at 8pm PDT 12 APR 07. Should only be about ten minutes of outage. Should. Fast Eddie : Outage should be over now (8:44 PDT). // later: Ok, sloppy number. According to unique ip addresses — not a very good indicator, as some people come in on multiple ip's — I'm guessing 24,000 visitors today. Which means that out of a group of Mensa members (2% of the population), less than 1% are actual posting Tropers ;-) Tropers/It also means that a visitor reads about 25 pages, then wanders off. Well, it could mean that, if averages meant anything. Seth : Its the people who read more than that who start editing. I didn't make my first edit until i had been reading here for 2 weeks. Citizen : My IP seems to fluctuate because I'm on a NAT. If what I'm looking at is correct, I've gone through 49 uniques in the 15 hours I've been online. I think I started editing within a week of discovery, but my mind is fuzzy~

To err is human. Most people are aware of this, and recognize that we are all prone to the occasional act of clumsiness. Hence, when someone accidentally spills a drink, or steps on a foot, or knocks something over, most people are willing to forgive and forget if an apology is given. This also means that people can, on occasion, do something generally mean-spirited to someone else in public, and potentially get away with it if it appears to have been a mistake. Of course, sometimes the person doing this wants</ everyone, particularly his or her victim, to know it was done very deliberately, and will communicate this by issuing an insincere or flat-out sarcastic apology. Whether or not the character engaging in this behavior chooses to cover it with a sincere apology may depend on whether or not the character believes his or her audience will sympathize with the action. For example, if Alice is a particularly vicious and foul character who is not well liked, Charlene might choose to issue a sarcastic apology after dropping a plate of tartar

sauce on her cleavage; her audience will smile because they all know that Alice had it coming, and they are pleased with Charlene's courage, knowing full well it wasn't really an accident. On the other hand, if Bob is a major Jerkass who is not especially well-liked, he may attempt a sincere apology after "accidentally" tripping the much kinder and sympathetic Charlie; he knows that those watching don't like him, and the apology works as a pre-emptive defense. Of course, if Bob is very powerful, he might decide not to put any effort into making the apology sound sincere since he really doesn't care what everybody thinks since there's nothing anybody can do about it. This type of deliberate accident is often motivated by spite or revenge, although not always. Sometimes it's a necessity to divert someone's attention , gain</ someone's attention, plant a Tracking Device , steal something , or just get someone worked up. The key to this trope is that an action is being presented as a mistake on the part of the person doing it. Since there's no point in holding up such a pretense if alone, this is something that will be done in public, even if all that's available is an audience of one. Usually, this action is more of an irritant than anything that's likely to cause serious injury or death, but not always. Common variants of this trope include, but are not limited to: : A character spills a drink or some kind of food onto another character or him/herself. See also: The "Be Quiet!" Nudge , in which a character punches or kicks someone and pretends it was an accident, in order to get the other character to stop talking. Compare Interrogation by Vandalism and Intentional Mess Making . This trope bears no relation to the Sitcom Accidentally On Purpose </ .

In order to keep a story moving, things need to happen a certain way. Sometimes everything is carefully set up and orchestrated, so that events unfold in an organic, natural fashion. More often than not, though, things happen the way they do simply Because Destiny Says So There's just one tiny little problem with that theory: Sometimes, Destiny doesn't</ say so Contrived Coincidence describes a highly improbable occurrence in a story which is required by the plot, but which has absolutely no outward justification — not so much as a character saying There Are No Coincidences . The concept of "destiny" is glossed over altogether, and the events in question are simply disguised as mere happenstance. This would be jarring, but most of the time no attention is drawn to the event at all. It's just a narrative convention designed to skip over lots of irrelevant stuff by putting the important events all together, leaving the audience to forget the improbability of the event In cases where the coincidence is acknowledged, it's likely a Lampshade Hanging . Unlikely coincidences are bound to happen once in a while. Exceptional things don't happen to the main characters because</ they are main characters; rather, they are designated main characters because</ exceptional things happen to them. In other words, there would be no story without this first exceptional coincidence. The earlier in the story the plot-driving coincidences occur, the more leeway the writer has with them Contrived Coincidence is one of the driving forces of Farce , decreed by the Rule of Funny . This is a major reason why wariness is needed in other genres; too much of it will make the story farcical Make note that like its sister trope Theory of Narrative Causality , this is one of the most pervasive tropes out there. Remember though, that just because a work uses this trope is not an automatic black mark against it. Even the greatest works out there

sometimes need a great leap to get the plot to go in an interesting direction Too many contrived coincidences may result in One Degree of Separation . For a more grandiose or plot-wrapping version, see Deus ex Machina . A person who is a Weirdness Magnet tends to be a walking contrived coincidence. Often, these can disguise a Gambit Roulette as The Plan . If the story's premise is this trope or relies on it, it's It Began with a Twist of Fate instead. Framing the Guilty Party invokes this trope when the one doing the framing didn't know that party was already guilty Super-Trope to Coincidental Broadcast and It's a Small World After All Compare with Doom Magnet . See also Fridge Logic (or Not My Driver), for the moment the character realizes this trope

All too often, a plot thread depends on one or more characters doing something really stupid. They don't have any chance of doing the smart thing, because then the plot-driving conflicts wouldn't happen Even if the stupidity is an organic outgrowth of prior characterization, that doesn't necessarily make it contrivance-free. As addressed in The Movie and lampshaded in the "Homer's Enemy" episode of The Simpsons </, the continued tolerance of Homer by his friends, his family, and his employer — indeed, his very survival </ — is simply unbelievable at this point. Then again, Rule of Funny Contrived stupidity commonly causes things like the collapse of A Simple Plan in a Sitcom or the effectiveness of Schmuck Bait in Slasher Movies . It is often accompanied by the meta-stupidity of the other characters' ignorance of Hanlon's Razor . It is vulnerable to Fridge Logic ; however, do remember that Tropes Are Not Bad On the other hand, it should be noted that many Contrived Stupidity Tropes are also Truth in Television to some extent and have several Real Life examples Contrast with Intelligence Tropes . Compare Stupidity Tropes

Someone who is obsessed with doing everything rigid, proper, and by the book — even (or especially) if it interferes with doing it right On TV, a Control Freak is usually not the big boss; they act the way they do because they're stuck in a professional rut and they want out. Most end up as big fish in small ponds, abusing what little authority they have and hopelessly trying to impress the boss by forcing underlings to fill out all forms in triplicate with identical number-two pencils. They will brook absolutely no dissent from those below them — for the Control Freak, it's My Way or the Highway Every Control Freak specializes in endless stories about their past achievements, usually involving the military and usually bogus With a bit more power, they're the Obstructive Bureaucrat . Ten steps beyond that is The Chessmaster . Often closely related to Pride and Despotism Justifies the Means - it is common for dictators, whether an Evil Overlord , enforcer of The Empire , or some other incarnation of Order Is Not Good , to have this trait. The Neidermeyer and the Sadist Teacher are usually this Not all Control Freaks are self-serving Glory Hounds per se; some may have perfectly kind intentions, but their egos drive them to think said kind intentions can only be set out through their</ way of doing things and if they are forceful enough in their ideals people will naturally see they are for the best of everyone . Several realistic mental disorders, such as Obsessive Compulsive Disorder , can also drive otherwise pleasant people to demand things just so almost subconsciously. Most Rightly Self-Righteous characters become insufferable to others due to acting like this

When it's parents that are involved, they're usually either a My Beloved Smother or Fantasy-Forbidding Father . If said parent is in show business, they're likely to be a Stage Mom Not to be confused with the Teen Titans </ villain named Control Freak

Looney Tunes Intro Bloopers </ : Microsoft Sam is this.

A gift which the giver has clearly put little time or thought into, and usually of little use/relevance to the recipient. Alice is all ready for the office Christmas party and on the road when Bob calls to make sure she's on the way. "I sure had a hard time picking out a Secret Santa gift for Carol!" he mentions. Alice just then remembers that she drew Zachariah in the Secret Santa exchange, and never got around to buying anything. He just transferred into the department last month, Alice barely knows the guy. And it's 8 PM on December 24th, nothing's going to be open—what luck, there's a Gas-N-Go on the next exit! Now, present, present...store's nearly been picked clean! And Alice leaves the shop with a box of Cloud Cakes ™ and a gift ribbon... There are many gift-giving events throughout the year, some of which you can dodge, and others that you really shouldn't for reasons of family tranquility, office politics, or simple etiquette. But sometimes you just don't know a person you're giving a gift very well, or they're difficult to shop for, or you have no imagination, or you put it off until the very last minute. So you just grab the first thing that seems vaguely appropriate and give that. Some "white elephant" gifts have been making the rounds for years, being regiven over and over. Gifts that fit this trope tend to fall into one of two categories: The usual gifts that "everyone" gives for certain events, such as ties for Fathers' Day, toasters for weddings, fruitcake for Christmas , etc. Often there's a scene with the recipient putting it with all the identical items from previous years/other givers. Monetary gifts generally don't count for this as the recipient can easily use money, unless it's obviously a last-second resort (crumpled, sticky dollar bills, say.) Likewise, gift certificates or cards are usually not this unless it's restricted to a service or store the recipient isn't likely to use. ("A $20 gift certificate to the Bouncing Baby Boutique. How nice. Have I mentioned lately that I'm childfree?") Often overlaps with My New Gift Is Lame . If the giver is especially confused they may give a Shoddy Knockoff Product as part of this trope. The recipient might say "You shouldn't have!" as a result. Contrast Crappy Homemade Gift . See also Gift-Giving Gaffe .

Bob is being chased and/or attacked by a Big Thing, which is probably some sort of monster. (The Big Thing can range anywhere from "10 feet tall" to "Friggin' Godzilla", just so long as it's bigger than Bob.) But Bob discovers a convenient hiding place, which protects him from the Big Thing because the Big Thing is too big to fit inside. This hiding place is called the Convenient Cranny The Cranny may be something like cave with a narrow entrance, or a doorway, or a gap between tree roots, or whatever. Often, the Big Thing will claw or dig at the edges of the Cranny's entrance, but this rarely works. Bob may now be effectively trapped in the Cranny until something kills or distracts the Big Thing, or perhaps the Cranny has a back door of some kind which allows Bob to get away on his own Compare Behind a Stick , Convenient Escape Boat and Corridor Cubbyhole Run . May

overlap with Try and Follow

As the saying goes, opposites attract; heroes and villains have a natural tendency to draw their opposites to themselves. Nowhere is this more clearly demonstrated than in the this trope: If the heroes crash-land or shipwreck while on a mission against a powerful enemy, they will almost always wash up no more than a mile or two from that enemy's camouflaged and hidden headquarters. The heroes, after coming to, will then automatically and unknowingly walk directly toward its main entrance, even if they're trying to go anywhere but</ Often a consequence of It's a Small World After All In Nadia: The Secret of Blue Water </, Nadia and/or her friends end up unwittingly sitting on top of enemy installations twice</ in the course of the show

In one X-Men </ story, Cyclops gets shipwrecked onto an island; by purest coincidence it turns out to be the base of X-Men adversary Magneto, who is just about to enact a plan to take over the world.

In the movie GoldenEye </, James Bond flies over a lake in Cuba looking for Janus's secret base. He's just about to give up when a missile shoots him down. After the Dragon sent to finish him off gets killed, Janus thoughtfully drains the lake, revealing the base.

This is part of how the Doctor operates on Doctor Who </ : he always seems to end up somewhere with something interesting happening, although it's implied he and his companion(s) go other places offscreen.

Knights of the Old Republic II: The Sith Lords </ :

In the G.I. Joe: A Real American Hero </ "Shaggy Dog" Story "The Viper is Coming", the Joes interpret part of the message to mean a set of coordinates. Even though the message turns out to mean something entirely different, when they check the location out, whaddaya know? There's a Cobra training camp right there!

The bad guys are on your tail! There's nowhere to hide, nowhere to go... but if you're anywhere near a body of water, don't worry: Guaranteed, there's a boat about to leave the dock. Just run a bit faster, hit the edge of the wharf, and jump onto that bad boy! You'll be safe at last, and if you're lucky, your pursuers will try and follow— and end up swimming back to shore, shaking their fists all the while This also counts if you drive off a bridge and a barge shows up below. Very rarely is the subject of how the escapee gets off the boat addressed— they</ might end up swimming back to shore, too. Sometimes justified by having the pursuers cuss about how their quarry not only got away, but stole their boat as well. Another frequent example is a rowboat or motorboat being left unattended with the oars left or sufficient fuel near lakes and rivers. Can also extend to pre-made rafts In the case of rowboats or motorboats, it's common for the boat to either be busted up and sink immediately or missing or oars or fuel. Closely related to its action-movie brethren Roofhopping , Hero Stole My Bike , Trash Landing , and Train Escape . Car examples may include a Ramp Jump

Space is huge, and the distances involved are far beyond normal human experience. On Earth, if your car breaks down on a country road, you can reasonably expect a rest stop or a gas station within 50 km (ca 30 miles). Space, however, is not like that country road. If you set your space RV in a randomly-selected trajectory and continue going straight until you get within 50 million</ kilometers of a star, the chances are (quite literally) astronomically high that you will reach the edge of the galaxy, keep going, and never enter another galaxy... ever. For another example, every planet orbiting the sun (including the likes of Jupiter and Saturn) could easily fit between the Earth and its own moon. That's how few planets there are in our big solar system. This problem exists even for space travel restricted to within a solar system. Objects travel in orbits and don't occupy the same place all the time - planets orbit their sun, and other objects orbit something else that orbits that sun. A planet does not occupy its entire orbit at once, either. For example, the position of the Earth in its orbit during June and the position during December is a difference of 300 million kilometers. A space traveler who doesn't check his Earth calendar might be in for an unpleasant surprise. Add to this the fact that the sun itself is in orbit around the center of the galaxy, and the galaxy is also in motion, and things become rather complicated very quickly. The solar system and the universe are far bigger than anyone expected them to be. People who are interested in space are pretty much flabbergasted when they try to take it in. The Moon is about 384,400 km (238,900 mi) away from the Earth. Ignoring the air/gravity/etc issues, if there were a highway to get to the Moon, it would take you five straight months of non-stop driving In Real Life , nothing</ in space is ever close, convenient, or in the same place it was a minute ago. This does not deter sci-fi writers, though! A chance to visit a Single-Biome Planet or a planet with a dark secret offers far more story options than a spacecraft silently cruising for eternity , running out of power and with a group of mummifying bodies on board . A subtrope of Artistic License – Space . A common side effect of Sci-Fi Writers Have No Sense of Scale . A sort of Artistic License – Geography , though the term "Geography" isn't usually applied to space because it's so big and different. Generally a necessity for Casual Interplanetary Travel . If characters not only find a planet but land next to what they're looking for see It's a Small World After All . Keep in mind that having Faster-Than-Light Travel would make things conveniently closer, but carries a laundry list of issues of its own. When asteroids are frustratingly close to each other, it's an Asteroid Thicket . Compare Road Trip Across the Street .

People do not always think in complete sentences, and often idly muse on trivial things for a few seconds before passing to the next thought. Some don't even think in words, but pictures or events. However, when telepaths read minds, they don't have to sift through all of that 'mental' garbage. The thoughts that they read are usually incredibly coherent (and relevant to the plot) This might be an Acceptable Break from Reality ; forcing the audience to hear a bunch of garbled thoughts might be entertaining , but likely not in a way that contributes to the plot. Could also be considered a kind of Translation Convention — just as you can understand a guy speaking French if the character understands it, you can understand the garbled contents of someone's head if they're filtered through the mind of a trained or experienced

telepath. A telepath might already have some sense of where they could find the information they are looking for

When a building in a modern action film or series is blown up or otherwise totaled, there will be explicitly no people or plot-critical items inside when the destruction hits. We've all seen a movie where a missile flies past the hero directly into a window and causes a building to explode. Or a timer ticking down to zero on the immovable bomb in the basement of an office building. And gosh! Let's not forget the many, many fun cartoons or anime where skyscraper after skyscraper after building is just freaking totaled But is there ever anyone in the building? Nope. It was conveniently empty. No carnage. Whenever a writer gets his hands on a special effects budget, it seems that several buildings suddenly become conveniently empty - inevitably leading to explosive goodness and giant fireballs . This is dictated by the Second Law of Metafictional Thermodynamics . A probable reason is to keep villains (or even heroes when they end up getting their hands on something that goes boom in populated areas) from crossing the Moral Event Horizon and to prevent viewers from getting a Downer Ending . Or else it's to maintain Willing Suspension of Disbelief : while action films are supposed to be for high stakes, one tends to think harder about what the characters have been doing when people are seen dying ''en masse''. Unless it is clearly stated or visibly shown that there were no casualties one cannot be sure that it was empty after all. After all, there was no holocaust on Endor .

A rarer and more badass way of escaping from bonds that doesn't require an Idiot Ball is to somehow dislocate the bones of one hand</ and pull the crushed hand through the loop before the swelling sets in. (Ouch!) Sister Trope to Pet Gets the Keys , Hooking the Keys , and Within Arm's Reach . The latter is where, instead of being tied up, the character is being attacked and manages to grab something that they can use to turn the fight to their advantage. One step further, and it becomes a Life-or-Limb Decision .

The hero is cornered. His back is to the wall, his gun is out of ammo, he's bleeding from at least one wound, and the bad guy has him dead to rights. Perhaps the hero is hanging from a ledge by his fingertips with a bad-guy standing over him, and the bad guy is about to play a round of " stomp the fingers ". Whatever the case, things look bad for the hero But just before the mook can end both the hero and the franchise, one of the hero's allies shoots the mook from behind (or runs him through with a sword, or hits him over the head with something heavy) and thus takes out the mook. Regardless of means, someone has just come to the hero's rescue Unlike the In the Back trope, this is rarely presented as morally dubious, even though it literally involves shooting someone while their back is turned. The fact that the villain is threatening someone else is justification enough Often involves Version A of Bait-and-Switch Gunshot , or in some cases Impaled with Extreme Prejudice . A variation on Big Damn Heroes , sister trope of Thwarted Coup de Grâce . Compare Stab the Scorpion and The Cavalry

The lead character has just successfully carried out their tricky infiltration of some high-security facility and copied the information/stolen the technology/rescued the prisoner/what-have-you. Just as they're done, in wanders some random security guard, who sounds the alarm. Cue the action sequence Basically it's a way for a Spy Drama to have its cake and eat it too. You want to see a perfectly-executed piece of espionage, but you also want to see the lead kicking and shooting and fleeing? Throw in some nicely-timed security personnel and you can have it both ways. Although sometimes you have to wonder, did the question "What do we do about the security patrol?" never even come up during planning? In Spy Fiction, the fact that the enemy would quickly realise that their secret files had been stolen also rarely seems to come up Otherwise, this trope is something of an example of Truth in Television . It is surprising how many crimes are stopped because police or security forces happened to show up at just the wrong time for the criminals, or someone saw something and called the police Related to Contrived Coincidence and possible Diabolus ex Machina . See Clairvoyant Security Force for the Video Game related variant

Anime and Manga Fanfic

Live-Action Television Video Games Web Original

This trope makes sense: it is counterproductive to send players through areas with high-level monsters. Similarly, putting the Sword of Plot Advancement or Infinity Minus / Plus One Sword in the town next door kills the game. Long travel times are dull, and they may require creating landscapes that aren't used for anything else in the game. Convenient Questing avoids this and is economical with design time Some games will justify this via the plot. For example a chase for someone who you have always just missed when you reach the next town Convenient questing can also be a way to ensure that the player gets all the required plot exposition. In Tabletop RPGs it can herd players through areas with no monsters or treasure but packed full of history and epic folk poems Accessing the next area may require you to Get on the Boat or fix the Broken Bridge . A softer version is the Beef Gate See also: Sorting Algorithm of Weapon Effectiveness , Sorting Algorithm of Evil , and Law of Cartographical Elegance

When Boy Meets Girl at a party or a club, and music (often performed by a live band) is playing, the next number that comes up will</ be a slow dance. Usually, it's a Contrived Coincidence , but smart characters will make sure beforehand to tell the band to make it a slow dance at the right moment This will also happen with two people who already know each other, and who have unspoken feelings for one another. May lead to a Dance of Romance There's a specific sub-trope where two characters are already dancing to a fast song, when the music abruptly switches to something slow, and there's an awkward "Do we keep dancing or not?" moment

The characters are talking about tropes. They're not talking about tropes from their own series, so it's not Lampshade Hanging . They're not talking about tropes in a way that goes " hey, we're aware

that we're fictional ", so it's not Meta Fiction . They're not actively involving the viewer, so it's not Postmodernism . They're not tearing down the tropes, so it's not Deconstruction . They're just talking, in a Seinfeldian Conversation kind of way, about conventions found in media in general. Pointing them out, going, "Huh, that's interesting," idly coming up with possible reasons for them. Starting to sound real familiar, right? Often used as a Shout-Out , in a similar vein as an Affectionate Parody — or not. Sometimes it's subtle Lampshade Hanging , describing tropes that occur later in the work, or earlier, but not talking about those events. Either that, or the writers/characters just found some time to kill. Compare Discussed Trope , I Always Wanted to Say That , and This Is the Part Where... .

Bob is unconscious, for a prolonged time. Alice goes into the hospital room to talk with him. Possibly to say " How Dare You Die on Me! ". Often prompts deep confessions of things she regrets never having said to him while conscious. But watch out! The curative power of these confessions is mindboggling, although not absolutely perfect. Needless to say, the more embarrassing it was, the more they actually heard. (A certain amount of Truth in Television , though not much; apparently unconscious people, whether in a coma or just asleep, may hear things, and talking to them is often encouraged.) Sister Trope to Dude, She's Like, in a Coma! , Taunting the Unconscious , and Unbroken Vigil . Compare Talking to the Dead

A person decides to become part of a religion due to some sort of romantic interest Happens quite often in Real Life , particularly with religions that do not allow their believers to marry outside their faith. It is somewhat more common for the woman to convert. Perhaps this is because so many cultures are patriarchal Of course, actual dedication to the new religion varies from convert to convert. Individuals who lack genuine religious fervor may stop practicing their new faith if they Did Not Get the Girl (or guy) they were interested in. On the other hand, it is also common for the convert to become more</ fervent than their loved ones who grew up in the religion Compare Love Is Like Religion , when the "conversion" is to</ love. See also Turn to Religion and Changing Yourself For Love

Not to be confused with Inconveniently Placed Conveyor Belt , a common hazard in video games. </ The main character(s) have become trapped on a conveyor belt (mining ore cart, log in a flume, or any other mechanized delivery system) responsible for shuttling them into a large blast furnace or incinerator, crusher or grinder, large rotary saw blade(s) or anything else that will give them a quick and painful end . Sometimes this is done purposely by the villain (like tying the Damsel in Distress to railroad tracks) as part of (or in place of) a Death Trap , or as a method of interrogation (as an alternative to physical torture). Thus, often a part of Lumber Mill Mayhem . Or the heroes may wind up in such predicament by more or less coincidence but still have to find a way to escape whatever machines whose job of processing and/or assembling raw materials is invariably lethal to their soft warm bodies. Commonly seen in large mechanized factories, mills, mines, research labs — or any place with No OSHA Compliance . This may also provide the reason why the heroes always end up trying to run against the direction of the conveyor instead of, say, trying to leap off the side — it may

be 1-Dimensional Thinking on the part of the writer, or perhaps the conveyor belt is situated high up where there really is nowhere else to jump to . If the hero wasn't deliberately tied or trapped on this conveyor by a villain, expect them to trip over something, or get an arm or leg snagged underneath whatever debris or items normally travel the belt, just to up the tension. Likewise, if there are any Mooks trapped on the conveyor with the hero, expect them to be the first ones meeting whatever doom awaits at the downstream end. Depending on the length and path of the belt, sometimes the ultimate fate of the conveyor belt is unknown at first, giving everyone a moment to look up in shock once they realize exactly what they're being drawn towards. Playing Raymond Scott's " Powerhouse " in the background during such a sequence is purely optional. Originated as a standard Cliffhanger scenario in 19th-century melodramas and the silent matinee film serials that followed them, such as The Perils of Pauline </ (and echoed repeatedly on The Perils of Penelope Pitstop </). Probably a Dead Horse Trope , at least in the dramatic sense. But then, it wasn't too bad in Enemy Mine </ . Compare the comedy Sister Tropes Assembly Line Fast-Forward , which involves the characters working at a conveyer belt, and Packed Hero , where the machinery stuffs the hero into a container.

Usually when a person's guilt can't be proven (or has not yet been proven or disproven, without counting ridiculous technicalities) in a court of law, it is assumed that they are innocent. But in the court of public opinion, it tends to be the exact opposite. The public (or even the authorities) are convinced you're guilty; they just don't have enough hard evidence to prove your guilt. Now, this doesn't necessarily mean the person in question is</ guilty. It just means that they have already been tried and convicted by public opinion. The public can either be completely right or dead wrong (and are usually the latter, per the Rule of Drama) Whenever someone is placed in the dock accused of "Crimes Against Humanity", you can be pretty sure this trope is in full effect. The same goes for rape because Rape Is a Special Kind of Evil If the public is particularly displeased with a juridical decision, they might take the matter into their own hands. See Witch Hunt and Vigilante Execution , although the public does not necessarily have to be unjust and violent. If the convicted is convinced that it is hopeless to appeal, he might as well become the monster they asked for . Guilty Until Someone Else Is Guilty may be the only way public will be convinced of the person's innocence Usually combined with Reformed, but Rejected . Compare Shamed by a Mob , Pariah Prisoner , and Pædo Hunt . See also Never Live It Down for the fan version This is sadly Truth in Television , but No Real Life Examples, Please! Though if you wish to read about that, The Other Wiki has articles on the and Death Note </ : Kira gets much of the "evidence" for his executions from reading about them online. At the end, there is mention that people will sometimes post things about another person in the hopes that Kira will take notice and kill them

The classic whodunit challenges the viewer to solve the crime along with the detective. Since the viewer isn't a professional, the crime has to be set up so that the solution doesn't rely on skills only a professional criminologist would have. These mysteries often work by reducing the crime to a logic puzzle: you solve the

mystery by finding the fact that doesn't fit The problem with this is the "solution" at the back of the book doesn't give the perp a chance to offer a perfectly reasonable explanation So, for example, let's say the police are investigating a murder, and Bob is their lead suspect. Bob says that at the time of the murder he was attending a party and his friend Alice was there with him. But wait! It turns out that Alice was on vacation in a foreign country at the time, so she couldn't have attended the party with Bob In fiction, this is usually enough to prove Bob's guilt, or at least cast serious suspicion on Bob. In the real world, of course, this does not in any way mean that Bob committed murder. Maybe Bob still attended the party, but it was with his friend Allison,</ not Alice. Maybe the party was on a different night, or there was a second party that Alice did</ attend with Bob, and Bob just mis-remembered. Maybe Bob was lying because he was doing something embarrassing that still wasn't, you know, murder Real crimes aren't logic puzzles and mere factual inconsistencies aren't a substitute for hard evidence. Poking holes in a suspect's story might push a jury towards the edge, but it's not going to convince them by itself. You might be able to Pull the Thread , but on its own, proving that the suspect lied about something doesn't prove he committed the crime (especially if he has a Big Secret). At best, this kind of logic game can be used during Perp Sweating to get a confession. At worst, Detective Brown will arrest the perp immediately, but Perry Mason wouldn't even break a sweat getting an acquittal from that More realistic examples focus on the investigative side, where the contradiction satisfies the significantly lower standard of proof required to arrest</ someone and investigate them further, rather than the much higher standard to convict</ them, or on non-legal contexts where the solution is just about swaying people's opinions rather than meeting any rigorous standard of proof. Some stories handwave this issue by having the contradiction lead to further investigation and the discovery of more concrete evidence. In stories involving teenage perpetrators, the crimes are often rather minor and the solution has them immediately confess when the contradiction is pointed out; this is somewhat less plausible against adult suspects, but even in Real Life , plenty of people don't know their rights or make mistakes when pressed Note that in modern legal systems, it is far more realistic to have this trope derail a prosecution</ , both because the defense only needs to introduce the possibility of reasonable doubt (which a contradiction in a witness statement often accomplishes), and because the prosecution has the burden of having to prove their case. A contradiction in the defense's alibi doesn't necessarily prove them guilty if the prosecution otherwise failed to make its case; but for the prosecution, even an entirely innocent mistake in a key witness statement can call the credibility of the entire statement into question and cause the case to collapse See also Conviction by Counterfactual Clue , which is when the "flaw" found to prove the suspect's guilt is simply erroneous. This overlaps with Hyper-Awareness — sometimes it's just hyper-awareness taken too far, to the point of noticing details that logically shouldn't even be noteworthy. Can lead to a minor Inferred Holocaust , if logic dictates that the supposedly happy ending will lead to either a guilty character escaping or an innocent one being convicted. These types of inferences often run afoul of Hanlon's Razor , blaming every flaw or contradiction on lies and conspiracy rather than, say, faulty memory or panic Compare I Never Said It Was Poison , where the suspect demonstrates

knowledge of a detail or two they shouldn't This gets particularly egregious when the story contains perfectly good alternative clues, but the flimsy one was chosen as The</ Clue

This is a specific kind of Artistic License , where a pivotal clue in solving a mystery or puzzle is actually erroneous. This is related to Conviction by Contradiction , where a single thing wrong with an alibi is sufficient to prove guilt, but goes further: the key that makes the claim or alibi wrong is itself</ factually incorrect For example, a guy's alibi is that he was caring for his pregnant mule, and he is immediately revealed to be lying, since mules can't get pregnant. We've got him! To the jail! Not so fast: there are a handful of real life cases where a female mule has</ given birth. Thus, there's a problem with this "revelation": it's simply wrong</ When adding examples, keep in mind that a fact has to be actually wrong</ to qualify for Conviction by Counterfactual Clue. If there's simply a way to explain away the objection without calling factual</ rightness into question, it's Conviction by Contradiction . Many examples, especially ones with complex contexts, have some aspects fall into one, and others into the other This can be sometimes excused by Science Marches On . In many cases, the "clue" started out as Conviction by Contradiction , then science marched it right over here. When this happens, but the ultimate conclusion is demonstrated to be correct, it overlaps with Right for the Wrong Reasons , especially</ when other clues in the story are skipped over, but are both factual and more useful

Cooking stories are often Slice of Life shows that have little in the way of action driven plot, but focus on daily life and characters. However, they can use plots similar to Sports Stories . For example, instead of Big Game or a Tournament Arc , they might have a cooking competition or have to prepare for the visit of an important VIP guest, a major food critic, or the health inspector Not to be confused with Cooking Show . Compare to Sports Stories and Music Stories . Generally involves lots of Food Porn and other Food Tropes

There comes a time in every adventure show when the hero must face torture . But beating and whipping is really dull for any self-respecting criminal mastermind. And more importantly, really dull for the audience, unless it's done so gruesomely that the Media Watchdogs complain. Besides, why beat the hero when you can torture him with the most horrible thing in the universe... six hours of opera (Scare Chord)! Or six hours of laxative commercials, or six hours of Céline Dion . Basically anything so bad that the Suckiness Is Painful . It would make anyone confess. A variant is for the villain to do torture that is so ridiculous and/or Faux Horrific that it would never work, but everyone acts as if it would. When on the receiving</ end of the punishment, though, it's common for the villain to be showered by a neverending stream of rainbows, sugar, and diabetes , much to his horror and disgust . And it's always fun when one character has such offbeat tastes that he or she enjoys </ the experience. Typically, the form of punishment may be introduced as being harmless, only to be quickly revealed to be the opposite . Though not an unusual tactic for the Martial Pacifist , this is used most often in shows for kids, where showing the application of real torture methods would get the parents up in arms — especially

when they find that they can't sleep afterward . Better to employ something ridiculous . The Punishment is when this happens to give the sufferer super powers. ...Why do people do this? When the Cool And Unusual Punishment is loud music or annoying sounds, the trope is Loud of War . See also Tickle Torture . The Maximum Fun Chamber and Room 101 often involve this, played for laughs and for drama, respectively. May serve as a Take That! . For when someone merely threatens to do something like this, see Cut His Heart Out with a Spoon . Compare Cruel Mercy , Ironic Hell , Mundane Afterlife , and The Punishment Is the Crime . Compare and contrast Prank Punishment for something like this is indended as a playful punishment from a mentor or a loved one, rather than a type of torture. Also contrast Poke the Poodle . Not to be confused with Unishment , when it's the character</ who wants the punishment rather than the audience. When this involves sending somebody to a city that they may or may not hate, see Place Worse Than Death ; when it involves just sending them anywhere that's dull and/or unpleasant, see Reassigned to Antarctica . Frequently follows the stock phrase " We Have Ways of Making You Talk !". Likely to be present in an Ironic Hell . Not the same as Cruel and Unusual Death .

On the intro segment of the 29th episode of the EVE Online </-based podcast Warp Drive Active</, one of the hosts (Urban Mongral) and the owner of the site where the podcasts are stored are 'convicted' (in a mock-court scene) of 'Aggravated Negligence in Uploading a Podcast' (the 28th episode cut out at 58 minutes of "over two hours" in the first release). The sentence for "this most heinous crime"? "I sentence you to playing two weeks Hello Kitty Online Beta." Cue the Big "NO!" .

This young lady may catch a Shōnen series lead's eye, though often more due to her hotness if he has already entered puberty. She's more likely to be paired up with either The Big Guy , the Team Dad or the Big Brother Mentor . Or maybe</, if she's persistent enough, she'll end up in an Odd Couple with an Aloof Big Brother or a single father. She may also evolve into a Team Mom thanks to Character Development Expect a somewhat jaded character who prefers to work the system to their advantage rather than admit to others she's become cynical. If old enough to drink, she may also be a Hard-Drinking Party Girl , or even The Lad-ette ; if not, she'll often be a Lethal Chef and/or Big Eater . If older than the standard, she might be a Christmas Cake as well. She's often a Good Bad Girl and frequently the person who keeps the main characters in line. Sometimes she's even portrayed as the only person the protagonist is truly afraid of Note that, while less widespread, this trope can be gender-swapped Compare Onee-sama , also a sister figure but usually more ladylike, quiet and graceful, and Aloof Big Brother , where the status causes a conflict between the (usually male) siblings. Contrast with Disappointing Older Sibling if she's regarded with shame and derision in the eyes of her younger siblings, and Big Brother Mentor , a similar but not identical trope much more common in male characters Almost all of these characters will have some form of a Big Sister Instinct

In the future, we will have Ray Guns , space-food, and all other manner of things replacing current day technologies. Sadly, they will also be far less efficient than what we have today, raising

the question of why people invented them in the first place . Sometimes they don't work as well as what we already have, sometimes they work as well or better but require too much additional work, sometimes they're just annoyingly prone to Phlebotinum Breakdown . Such technology is never useless in the show or movie's universe, and seeing it in action defines this trope. Sometimes its shoddiness serves to add drama to the plot; at other times, the only reason for it being there is to look cool and futuristic. This is not in the least helped by a tendency not to do the research; futuristic rayguns also tend to lack some of the most common-sense niceties of modern firearms. The most frequent mistake is the lack of a trigger guard, anything vaguely resembling sights, a shoulder stock, or anything else to give you an edge over just firing from the hip, or indeed a rate of fire better than a flintlock. Sci-fi spacecraft, in general, heavily tend to fall into this trope. Wings, fins, streamlined designs, and pointless projections stud the outside of spacecraft never intended to enter an atmosphere. Most modern portrayals are savvy enough to at least justify streamlined spacecraft. Star Trek </ leaves gaping voids in the middle of their spaceships, but in-universe, this is because the warp fields generated by the nacelles necessitate them being kept at some distance to the rest of the ship. Likewise, the Alliance ships in Firefly </ look nice because of their vertical ship alignment, but the placement of the engines is to keep the ships from ripping themselves apart every time they accelerate. Alternately, one could build along the lines of the Discovery</ from 2001: A Space Odyssey In a case of Reality Is Unrealistic , there were Notice that this is</ Truth in Television , as several armies through history have used awesome but inefficient weapons to lay fear among enemy ranks . See Zack Parsons' book My Tank is Fight!</ for some examples. See also Awesome, but Impractical (which is where there actually is a genuine advantage to using the stuff, but the added drawbacks, conditions, and/or costs are so substantial as to limit its usefulness) and Cool, but Stupid . Compare Useless Superpowers . Contrast Boring, but Practical . Often the Required Secondary Powers are the underlying reason why something is Cool But Inefficient. And also see Crippling Overspecialization which overlaps with this trope. The PPGs (Phased Plasma Guns) of Babylon 5 </ look cool especially when firing, but lack trigger guards, don't appear particularly accurate, and emit an audible whine when powering up (eliminating any possibility of stealthy approach) Indeed, several characters are alerted to an ambush over the course of the series by hearing the power-up whine. Hand weapons such as the Minbari pike or Good Old Fisticuffs are generally more effective at catching people unawares. However, the weapon does have some practical use in that it can do a lot of damage to organic targets and can be set to cut through reinforced doors, but its standard setting won't risk punching through the hull, unlike conventional bullets. Bullets are stated to be still be in use, but it's mainly private citizens and the occasional security force that live and operate planetside.

Heroes need to be able to get to where the action is. And when they have to get from point "A" to point "B", no ordinary vehicle will do. The hero's ride has to be just as unique and awesome as the hero is. Enter a Cool Car! It looks cool , it goes fast, it might be modified to go even faster, its engine can be expected to make the Most Wonderful Sound , it may even be bulletproof and contain an assortment of weapons and gadgets . A really</ Cool Car can fly </

. Most Cool Cars, even ones that have no inherent super abilities, will be curiously immune to breakdown, physical damage or a realistic fuel range. No matter what manner it is in which the hero drives, as long as he's determined to stay on the straight and narrow and fight for the forces of good, his car shows an Empathic Weapon 's ability to never get scratched, dented or even dirty. It may also be able to outperform similar or even superior vehicles simply by virtue of having the hero behind the wheel. Driving one also seems to ensure you'll have Rock Star Parking privileges. If you're really</ lucky, you'll have a Cool Garage to park it in. Sometimes, the car is cool enough that it actually can become a protagonist in the series — e.g.</ KITT in Knight Rider </ and the General Lee in The Dukes of Hazzard </ are arguably the main</ protagonists of their respective shows and are as iconic to the audience as the human stars. A Car Song is where a Cool Car is the star of a song instead. When a car literally</ becomes a character, see Sentient Vehicle . For a living creature that serves as both a vehicle and a character, see Sapient Steed . A Super-Trope to Pimped-Out Car , Weaponized Car , Hero's Classic Car (a classic car driven by The Hero). A Theme Mobile is a Cool Car that ties into the character's motif in some way (e.g. the Batmobile .) Contrast The Alleged Car , as well as Rice Burner — but compare</ What a Piece of Junk . See Improbably Cool Car for cars that are just too</ cool for the setting or the characters, and Metallicar Syndrome for eye-catching vehicles driven by people who would be better off picking something less conspicuous. As any car could be considered this in reality, No Real Life Examples, Please!

People Sit on Chairs all the time, but this one is awfully cool. In Ye Olden Times, they called it a throne, and there was usually a King on it. Or a Queen. Or a princess . Or some dude named Orcus . Nowadays, the Corrupt Corporate Executive and Mob Boss use the swiveling chairs behind the desks of their penthouse offices to much the same effect. More futuristic versions can include buttons on the armrest, which can help The Captain take a memo if there aren't any Bridge Bunnies around. Alternatively, if it belongs to the Big Bad (in black leather , natch), any built-in controls will probably have to do with the tidy disposal of underlings . Other fiendish uses for the Couch of Villainy (muah-ha-ha!) include practicing your Slouch of Villainy and, naturally, the Chair Reveal . Villains and roguish heroes of the barbarian or Middle Eastern persuasion will often be surrounded by scantily-clad women fanning them and feeding them grapes . Cool Chairs will always be thematically appropriate. You will never find Lord Azazel the Befouler brooding atop his dread throne of plush cushions, and conversely you'll will never see Captain Jake McHero reclining on a seat made of iron spikes and human tibias . In The '60s , the</ Cool Chair was People who have their own Cool Chairs tend to be (understandably) attached to them; should some irreverent interloper put his seat in your seat, feel free to declare: This Is My Chair . A Sub-Trope of this is the Hovering</ Cool Chair, often found in video games and more fantastic works of fiction. Hovering Cool Chairs are also sometimes weaponized — machine guns, rockets, and lasers pop out of it to attack the villain's enemies — especially when also functioning as a Super Wheelchair . This may serve as a way to introduce a Boss Battle with a mastermind-type villain without resorting to Authority Equals Asskicking . Swivel-Chair Antics is another sub-trope. On occasion, the Chair may serve as an escape pod for the villain to make his getaway .

First you're here</. Walk through this here gate—possibly only when the moon is gibbous, or you have yellow violets in your left hand, possibly only with the Applied Phlebotinum and Techno Babble of quantum mechanics or folding space-time or maybe even magic —and then you are... there</ . Cool, ain't it? Unlike Cool Car , Cool Boat , etc., this is not about distinctly cool gates. Gates tend to be rare enough that they are all</ cool. Even when they interconnect into a Portal Network . This is a common way of getting to Magical Land . After all, even the coolest of airplanes and boats have a little trouble with the travel there; subtropes include Portal Pool , Portal Door , and Portal Picture . It's also common in Science Fiction . Be warned that there is no guarantee of pleasantness or even familiar physics on the other side. Alien Geometries are not unknown. After a time, Portal Slam may result, or it may close when in use . Since there's no real-world analog to teleportation, writers can apply any variety of bizarre special effects to the act of being transported without hurting Willing Suspension of Disbelief . On the other hand, they can also appear relentlessly mundane—perhaps a simple arched doorway in a wall of crumbling stone—until you look or step through them, and notice the discrepancy. Note that Thinking Up Portals is the trope for characters who can create holes in reality to transport themselves without crossing the intervening distances. This is a kind of Teleportation with Drawbacks due to placing restrictions on an entrance or exit. It may overlap Our Wormholes Are Different . Has nothing to do with media or political scandals being referred to with a reference to "Watergate" or with a particular brand of toothpaste . You go in here...

The keys we use every day are small metal objects with little grooves on them. Accustomed as we are to their use, it's hard to imagine something less tropeworthy than a humble key. Yet consider the symbolism of this tiny object—it opens that which is closed, changes barriers into passageways (or vice versa). A key in the wrong hands can be disastrous. And possession of a key can be a sign of authority and responsibility, from a housewife's key ring that indicated she alone could disburse food and drink to a lord's master key giving him the run of his domain A Cool Key is one that is intended to reflect these values. It may simply be ornate and fancy, or it may have some special attributes that are unusual, most commonly the power to Open and Shut . The most common type is the Skeleton Key , which in addition to just being cool , is associated with the ability to open any lock for historical reasons: skeleton keys were used in antiquity to pass warded locks, which is why warded locks aren't very popular anymore. There are also master keys, which are designed to open any lock in a given set, allowing its possessor unlimited access to the household or area associated with the locks A Cool Key typically goes hand in hand (so to speak) with an equally elaborate lock or possibly a Cool Gate . In speculative settings, the key to a particular mechanism may not resemble a normal key at all, or not even be a traditional key, but a particular word or phrase to be spoken or even a person

Anyone who routinely covers at least half of their face is likely to be at the top end of the personal power scale. Habitual

illusions and kabuki-style makeup also count. Often worn by The Faceless Almost prototypical for Super Hero characters. In anime, these are standard issue for Char Clones Humongous Mecha frequently gain a mask (over their mouth at the least) when combining or entering a Super Mode Note that this only applies to major characters. Mooks in masks are in a special subcategory , but are still Mooks underneath A Super-Trope to Coat, Hat, Mask (combining this with a hat and Badass Longcoat), Malevolent Masked Men , Hockey Mask and Chainsaw (horror Shout-Out combining Chainsaw Good), Mask of Power A Sister Trope to, and often paired with, Nice Hat Compare Superheroes Wear Tights

The "understood set of rules" is usually the rules of reality , but it can just as easily be some set of rules established within the work in question . Less props for explaining the rules after the fact This rule is not a contradiction of, but is in tension with, Artistic License . But if you use the Cool Of Rule to make something so cool that the audience willing suspends their disbelief, congratulations! You're an example of the Cool Of Rule See also: Suspension of Disbelief , Magic A Is Magic A , Chekhov's Boomerang . Compare Rule of Cool , MST3K Mantra , Reality Is Unrealistic , Puzzle Thriller . Contrast Hand Wave , Plot Hole In The Sixth Sense </ Dr. Malcolm Crowe follows all the rules

The effectiveness of a cast member is often determined by his distance from the median age of the cast . Deviations up or down will always be coupled with a lack of effectiveness. The Cool Old Guy is an exception to this. At some point, if one character is much older he swings the meter back </ to 'totally awesome'. In a lot of anime and video games, this makes him somewhere around middle age and the only non- clean shaven guy . Expect him to be greying, a loud voice, but in peak physical condition and unafraid of anything. For reasons that should be clear enough, this trope frequently overlaps with Bald of Awesome He usually won't have any special powers but that's only to marginally keep him from intruding on the others' limelight. He usually either has a dated and dramatic but lovable personality or is a complete no-nonsense hardass, depending on how the other characters act In Japan, this trope is called the Oyaji, written 親父 or オヤジ, which means "daddy". Can often stray into Even the Guys Want Him or Stupid Sexy Flanders territory. Wise Beyond Their Years is a younger version (usually no younger than late 20s at minimum) that has many of the same characteristics

Much like its Spear Counterpart the Cool Old Guy , the Cool Old Lady is a character that's much older than the main cast but for whatever reason, they become deeply attached to her. She can be a "hip" grandma that rollerblades, bungee jumps, can speak the teenage slang without it coming across as Totally Radical , an Apron Matron who's gruff but caring, or a Cloudcuckoo Lander who is a joy to have around. Or she could be a kindly old lady who obviously led a very rich life (when she was younger, she bungee jumped, rode a motorcycle, knows the teenage slang of her era but doesn't dare try to incorporate it into her current speech) and regales the cast with saucy stories of her escapades. The fact that she's survived</ doing all that and lived</ to that age tells

you that you should Never Mess with Granny If the grandma did all the cool stuff in the past, expect her to be low on the Sorting Algorithm of Mortality ; on more dramatic shows, she will die by episode's/story arc's end. Often, she is helping all her new younger friends come to terms with their</ grief while being rather at peace with it herself because she "led a good life" See also My Grandma Can Do Better Than You : For when Grandma is not so cool, and this fact is used to insult someone else by implying they are even worse Compare Mrs. Claus . Not to be confused with My Old Lady </, a film starring Kevin Kline

Wearing dark glasses or mirrorshades is long-standing visual shorthand for badassitude. The act of putting them on</ means that it's time to kick ass, take names or do both. The act of taking them off is a sign that somebody's about to get scrutinised by the badass, usually just prior to an asskicking Obligatory for a Cyberpunk setting, or for intimidating Deep South Lawmen. A nice accessory to a Badass Longcoat The opposite of Nerd Glasses , and the inverse of The Glasses Come Off Overlaps, but is not identical to, Scary Shiny Glasses . If the shades are on the character 24/7, it's Sunglasses at Night . If the effect is to make the wearer look sinister rather than badass, this is Sinister Shades . If you're Making a Spectacle of Yourself , the effect is to make you look just plain </. But remember, sometimes the Goggles Do Nothing . Occasionally the character may just wear their glasses on their heads as a head decoration rather then where their eyes are Aside from making them look badass, the reason behind them wearing shades is so they don't show that their eyes flinch when firing a weapon or having massive swords flung at their face. So when a character isn't wearing any shades and running around firing automatic weapons and manages to show no discomfort you know they're truly badass Another reason being that most people commonly have visual cues they give with their eyes subconsciously. Something a properly trained (or badass) opponent might pick up on. If they can't see your eyes, obviously they won't see you look at the gun before you leap into a roll for it, or look at the guy in the corner right before shooting him and making a break for it Each type of frame has become an archetype of its own over the years: Wayframes Most usually Aviators and Round Hippie Glasses be sure you get the frame shape right or you'll wind up suggesting that your General Ripper drops acid; of course, that might be exactly and Wraparounds have found their place within espionage For some specific variants, see Sinister Shades , Triangle Shades and Round Hippie Shades

The cool ship can be a spaceship that many other characters consider a piece of junk . In fact, you get extra points for junky . If you can't call it a rustbucket, though, it has to be the one and only latest, just-about-a-prototype, bleeding-edge techno-miracle An ancient living Precursor-craft , retrofitted with the latest techno-miracle gadgetry disguised</ as a rustbucket, that can think for itself... Okay, dude, quit hogging the cool A form of Cool Ship . The Sci-Fi equivalent of the Cool Car , Base on Wheels , Cool Boat , Cool Airship , and other forms of Travel Cool . In fact, because Space Is an Ocean , it is often heavily inspired by the Cool Boat ; many spaceship types are named after equivalent water ship types. See the Standard Sci-Fi Fleet for various types

Cool ships can even be single-seaters or maybe doubleseaters with no room to get up and walk around but capable of zipping across the cosmos in no time . The lack of facilities is a non-issue, Hand Waved for the Rule of Cool To be even cooler, the cool starship may also be a Faceship or come with escape pods , lasers , faster than light drive , and transporters , which may be used to travel to and around any number of Stock Star Systems . If enemies try to board it, you may need to activate the Self-Destruct Mechanism If the cool starship has enough surreal qualities, it may be an Eldritch Starship as well

There is something a sword has that other weapons don't. It could be that it is an Elegant Weapon for a More Civilized Age , or perhaps it's because sword fights just look so impossibly cool </. Often Heroes Prefer Swords .

Longsword (two-handed): The quintessential knightly weapon of the Late Middle Ages, with an average blade length of 90 cm (35 in). Sometimes used as a generic term referring to any sword that long or longer. This type of sword came into vogue in the late 13th century, and remained in use until the 17th century. Prone to a lot of misidentification, it's commonly mistaken for a bastard sword, greatsword, broadsword and other types of swords from the Middle Ages and Renaissance. The longsword was made to be wielded with two hands, and thus has a handle long enough to comfortably accommodate them, yet doesn't qualify as a BFS since it can be used one-handed, although you would lose dexterity in your swordplay if you did. Greatswords ARE the BFS of the real world, sometimes as tall as a man of their period and with pretty big handles and handguards. Some of the specific types of greatswords are mentioned below. Both the German and Italian schools of swordsmanship deal with the longsword.

This trope is Older Than Feudalism , because the sword is a very, very old weapon and there are tons of examples from mythology . Possibly the most iconic Cool Sword of all is Excalibur , the sword the Lady in the Lake gave to King Arthur (which supposedly wasn't the original Sword in the Stone) And no, having a sword is not (necessarily) Compensating for Something Recording the sheer number of characters who use swords in media would make for a VERY long trope. Basically, name any hero from a Heroic Fantasy series or an RPG (of any genre), and chances are he'll be using a sword. Thus, this trope should be reserved for cool</ swords; those with some exceptional quality, name, or power. Not just any old sword will do Compare its Gun Counterpart , Cool Guns . For swords that aren't fantastically and impractically cool, see our Useful Notes: Swords page. Oddly Shaped Sword is the Sub-Trope for swords that have a really weird</ shape

The classic Buddy Cop Show formula usually involves two law-enforcement officers with very different methods pairing up to fight crime . Older versions usually involve a By-the-Book Cop working with a Cowboy Cop . They will form an Odd Couple due to their views of regulation In recent years, new shows have partnered Cops and Scientists. Rather than squabbling over regulations, their Odd Couple differences come from their roles in each investigation, which brings out differences in personality. This

may have something to do with the success of the CSI </ franchise, which highlighted the scientific side of law enforcement The Cop will deal with the elements of police work that involve dealing with other people such as interrogations, arrests, and dealing with superiors . If a fight breaks out, it will be the Cop who does the heavy lifting. The Cop will usually be Book Dumb but Street Smart The Scientist will usually be more of an ivory-tower intellectual with little practical experience in law enforcement. They will usually have personality quirks or No Social Skills (except when they're one-on-one with the cop). They might also be a Straw Vulcan . They will handle the CSI-style parts of the investigation and rarely do anything physical. If they interact with witnesses, suspects, or superiors, they'll either keep quiet or end up making things worse. Usually, Hilarity Ensues Despite their differences, both halves of the team come to respect each other and become an effective crime-fighting force. The Scientist does not need to become a Badass Bookworm ; becoming a Cowardly Lion , where they overcome a persistent issue to get the Cop out of danger, is usually their big Moment of Awesome . The Cop does not need to be a Genius Bruiser ; being Strong and Skilled enough to uncover and act on the key clue that even the Scientist didn't catch is usually their own big moment It's important to remember that, to count as this trope, the Cop and the Scientist must have roughly equal focus. They must be partners</ . While many crime-themed shows have both cops and scientists, they might focus more on one or the other. If so, then that show does not count as this trope Compare Androids and Detectives

A character is currently in a very stressful situation and may or may not be alone. It might be that they're dealing with the loss of someone dear to them, an event that traumatized them, or maybe the apocalypse has begun and life has become a daily struggle to survive. As a means of coping, they quite literally pretend that things are not as bad as they are. Perhaps by making up imaginary people, or pretending that, in-between scavenging for food and running from monsters, the morning paper is still running. It could go as far as to pretend that the event that hurt them so never happened at all. Cope by Pretending usually comes in two forms: aware and unaware. Someone who is aware that they are Coping by Pretending knows how bad their situation truly is, and knows that the pretending is just that. But it just makes things easier, so they keep doing it. Someone who is unaware that they are Coping by Pretending are most likely dealing with Sanity Slippage , or are experiencing some other psychological issue. Coping by Pretending, in this case, might be a sort of defense mechanism. Related tropes are: A character who is Coping by Pretending specifically due to being alone and is unaware that they are doing so has probably Gone Mad From The Isolation . See also Cope by Creating . Sad Clown , which refers to a character suffering from something despite being funny Comic Relief , is not synonymous with Cope By Pretending (their humor may not be done deliberately out of the desire to cope with their problems). When considering the Five Stages of Grief , someone who is Coping by Pretending is stuck in the Denial phase. In the Dreaming Stage of Grief is a sub-trope. Compare this trope to Through the Eyes of Madness , in which a work is shown through the eyes of a character with questionable stability, thus making it unclear what is and isn't happening. May be a reason behind an Imaginary Friend if the person imagining the friend has no friends.

Police officers are (at least in theory) responsible for enforcing the law, keeping the peace, and stopping criminal activity from growing out of control. However, some people just don't like or trust the cops, either being very afraid of their presence or outright hating them with a burning passion. There are many reasons why a person dislikes law enforcement: Most of the time, their views are justified, but sometimes it's nothing more than pettiness and/or paranoia. Often times, they'll have a grudge towards all</ law enforcement, even those who are good and have not wronged this character. This hatred may be used to outline the character's backstory, possibly a Dark and Troubled Past that explains why they despise the police in the first place . Note that if a character hates the police because they arrested them for breaking the law, then it would only count if the punishment for the crime was unjustified, as it's obvious that criminals would hate the police for doing their job correctly. If a character hates the cops because someone they knew was the one arrested, then it still counts since, while they're not the ones being arrested, their experience with someone they care about being incarcerated will sour their overall opinion on the law, even if that character was a legitimate criminal. See Protest Song and, more specifically, Anti-Police Song for songs about hating the police. Closely related to, but shouldn't be confused with Cool People Rebel Against Authority , as "fuck the police" is often used as a rallying cry against authority in general. Said character may be The Paranoiac . Can overlap with Rage Against the Legal System if the character tries to take direct action against law enforcement and Cop Killer if this trope is their main motive for killing police officers. No Real Life Examples, Please! This is Truth in Television , but we don't need to start any arguments about the competency of law enforcement. Comic Books Literature Live-Action TV Music Web Original Web Animation

In most productions of film, television, and theatre, the work is split up between a large number of people, mostly because individuals tend to specialize in a specific part of the artistic process. Some are actors, others writers, editors, etc Occasionally, though, you'll find a work where a single person is credited in a whole bunch of the tasks. Sometimes this is because they couldn't afford anybody else , other times it's because they wanted complete control , other times it's just because that's how they work This is often seen as a sign of dedication or ego, but what can't be denied is that the presence of a Copiously Credited Creator almost always indicates that whoever holds the credits is Doing It for the Art . Also, various union affiliations or distribution platforms can require that various production-related roles be included in the credits which can actually mandate that the same person is listed several times Sister-trivia to Directed by Cast Member , Produced by Cast Member and Written by Cast Member . For a musical example, see I Am the Band . Not to be confused with In Case You Forgot Who Wrote It Instances of when a Copiously Credited Creator's project goes sideways due to the creator's runaway ego and lack of talent are covered in the Vanity Project sub-trope

"Officer Down!". The two words that haunt every police officer's nightmares. If the criminal is purposely going after cops who previously arrested him, this can overlap with Rage Against the Legal System . Other times, cops may be killed in the line of duty by trigger-happy criminals . Of course, they're in particular danger if they're three days away from retirement . May also be done by a Cop Hater . While this is often a villain trope, there are cases that this trope may be applied to an Anti-Hero or a vigilante (particularly if the character suffered some form of Police Brutality that would result in the Anti-Hero or vigilante hunting down cops as well). If The Bad Guys Are Cops this may be one way for them to meet their fate. Still, it's very rarely condoned, if ever; killing a representative of law and justice is generally agreed to be something of a Moral Event Horizon , for obvious reasons . The inverse of Killer Cop , a cop who is a murderer, although in some cases they do overlap. Particularly with cases of a Dirty Cop killing an honest one who's discovered his crimes, or the local Vigilante Man making an Asshole Victim of a Killer Cop. See also Police Brutality and Pay Evil unto Evil , possible reactions by the police when they find the cop killer. No Real Life Examples , please. We all know this happens in real life; there is no need to go into specifics. </

A staple of the Criminal Procedural when the writers want to create a "This Time, It's Personal " episode. Pretty much Exactly What It Says on the Tin : a criminal kills a cop, whether on or off duty, and the dead officer's colleagues, perhaps one in particular, go all-out to find the killer. These episodes frequently end with Police Brutality , as cop-killing is a rather serious business. When the cops find the cop killer, they don't treat him very well. Not to mention that they're more likely to have "accidents" or be " Driven to Suicide " at some point between arrest, trial, and imprisonment. Conversely, a Cop Killer will likely be regarded as particularly notorious by fellow criminals . No Real Life Examples, Please! </

Please sit down. We'd like to ask you a few questions. Who are</ </
we? We're detectives; the folks who solve those mysteries you see </
on TV and read about in the paper . Most of us are what you'd call </
Seekers . Now, if you'll just answer a few— What? You want</ </
more info? Alright, I'll let you ask just one more thing , but 'm </
really supposed to ask the questions. We come in all shapes and </
sizes, from meddling kids to sweet old ladies to grizzled PIs. </
Some of us can tell if you're guilty just by looking at the dust </
on your shoe . Some of us... can't . Take a look down and see our </
many faces. See Crime and Punishment Tropes for the stuff we do </
and Sliding Scale of Law Enforcement for how we're portrayed. Now, </
about your whereabouts last night... Did you contrast this with </
Organized Crime Tropes on the night of the 15th? </

The Cop Show is an idealised representation of police work, justified by the Rule of Cool . Morality is very black and white, being a cop is far more dangerous in this genre than it really is, shoot-outs and standoffs are common, as are car chases and Serial Killers . The protagonist is often a Cowboy Cop who often get their man (even if not the first time). Of course, they don't forget the niggling details of the job, either Specific variants: Buddy Cop

Show The more realistic representation of police work in fiction is a Police Procedural See also and compare with: Criminal Procedural , Forensic Drama , Law Procedural

In first world countries, cops have rules. They're not allowed to beat a confession out of you or ransack your home on a whim or throw you in prison for months and wait for a confession. There's also a great deal of paperwork. A By-the-Book Cop follows these rules scrupulously, a Cowboy Cop just breaks them. A lot of cops get annoyed by them Private citizens, though of course bound by the law, aren't bound by the rules cops have to follow. A lot of cop shows/movies like to throw a cop and a civilian together so that the civilian can work around the annoying rules and the cop can nab the bad guy officially</. Unless he just shoots him , possibly when he takes the civilian hostage . The cop might also help the civilian out of any legal trouble he gets into In truth, it doesn't matter if you're getting a paycheck; if you're working on behalf of the state, you're a state agent. That is to say, a cop can't ask you to do what he's not allowed to do There are two different ways this can go. If a cop asks someone to do something he can't, the law has been broken, the evidence is inadmissible, and everyone walks away with egg on their faces; fiction typically ignores this except to ratchet up the tension. If the cop didn't ask but gets an unexpected windfall, then the law was still broken, but many jurisdictions will still allow the evidence (providing it can be authenticated) Related is Stepping Out for a Quick Cup of Coffee when the cop "accidentally" helps the other party Compare Recruiting the Criminal and Boxed Crook . See also Bad Guys Do the Dirty Work and Vigilante Man

A lot of fanfic writers start up because of their passion for a show. While any number of things can be the source of passion, a very common fixation is on one of the primary characters. So they start to write something because of their passion for this character, but they find something about the character that doesn't mesh well. Maybe they're the wrong gender or are otherwise not close enough to the author's expectations. Or, alternatively, the author wants to pair their favorite character up with somebody, but "nobody is good enough for them". In any case, rather than put them through the Possession Sue process, they just get a Clone-O-Matic ™ and out pops a Copy Cat Sue. The Copy Cat Sue is a common occurrence, marked by their uncanny resemblance to a canon character. This is usually most blatant when it involves traits that are supposed to be unique in The 'Verse , but pretty much anything where the Backstory and key character traits of the two characters are nearly interchangeable counts. The canon character is the last of their kind ? Well, so is this character! Abusive Parents ? This character can sympathize! The canon character has a unique Transformation Trinket ? It's not unique any more! They might even have another Team Pet of the exact same species, and they get along with the canon pet absolutely fine! And any markings or iconic disfigurements (such as scars or a missing limb) the canon character has, this character will also have, in exactly the same place ... somehow . Naturally, they are instantly accepted into the group and have to go on a mission where they kill the Big Bad , slay The Dragon and, provided they're sexually compatible (not like it stops them from trying, though) , they'll inevitably pair off while flipping the bird to the Official

Couple (extra points if the canon character's original love interest randomly turns evil or worse, is revealed to have always been evil) Or die. That happens sometimes . A fairly common storyline that lampshades this is where the Big Bad (or, perhaps, just a neutral Mad Scientist ; it's almost unheard of for anybody without a direct connection to the hero and his True Companions) makes an actual clone of the character (usually of the opposite sex , but not always). They play themselves off as family members from out of state, or exchange students from Mary Suetopia , but they have a mission to off the main character when they get the say so. Of course, since 99% of the Copy Cat Sues out there are synthesized to allow the author to imagine being both the canon character and friends/lovers with them, they'll betray their creator and join with the heroes (who, despite the character's connection with the bad guys, will rarely question them for very long), usually proceeding to kill the Big Bad , slay The Dragon , and become best friends/lovers until the end of time. Or die. That happens... a lot really . A telltale sign of such a character is that any "fan art" of the character will actually just be recolored images of characters from the actual show and that may or may not explain why, say, Sailor Earth has a crescent moon on her forehead. Some get more creative and edit their source image a little in an attempt to make them look a little less like the character they copied. A precious few can be bothered to actually create real art, but nine times out of ten, even that art will simply be traced from a picture of the source character. In either case, the character might be intended as a replacement</ for the canon character, but without whatever icky traits the author hates. They'll then rob the spotlight, prove the canon character to be unworthy of his/her position, and either relegate the character to obsolescence or, perhaps, even remove them entirely. Sometimes, this is done because the author likes the villain and wants them to be friends/lovers with the other character, but can't find any real reason that they wouldn't kill each other. Thus, to get the ending they want, they just make somebody that practically is the other character but without the key trait of wanting the villain dead. Yay, Fanfiction! Compare Overused Copycat Character and Fountain of Expies .

The Cordon Bleugh Chef is a "chef" who does know how to cook but seems to be willing to combine foods that should never be used in the same dish or, in the worst cases, even in the same universe . If the resulting dish doesn't cause an urge to purge </ with just the taste, finding out what was in it surely will . At the very least, many of those eating will comment that it tastes like something the dish has no right to be tasting like given its ingredients Some examples of disgusting dishes a Cordon Bleugh Chef might create include things like strawberry and liver pate cakes, lemon curd with ham and sardines, chocolate cod roe, parsnip brownies, fish fingers and custard , and endless other stomach-emptying recipes. Occasionally though, the combination actually turns out to taste pretty good , at least to one person out of the group Cordon Bleugh Chef is not about "chefs" who make food that either looks absolutely disgusting or is even harmful to the one unlucky enough to eat it; that's Lethal Chef . It also isn't when someone adjusts already-created food to make it more "appealing". That's Bizarre Taste in Food . Though it could make them into an Angry Chef , feeling like everyone else just can't appreciate "original works of art" like he can Compare Foreign Queasine : foreign dishes such as haggis , deep-fried

tarantulas and casu marzu which are fairly popular in their own country but would be thought of as too disgusting to try by many people in other countries. See I Ate WHAT?! for when people don't find out what it contains till it's eaten Compare and contrast Overcomplicated Menu Order , which may or may not involve mixing two foods together and/or modifying it to oblivion like this trope, but coming from someone's order

Corporal punishment is the practice of deliberately inflicting physical pain as a form of punishment. The most minor version is generally children getting a swat on the backside from their parents, while the opposite extreme can lead all the way to Cold-Blooded Torture . Note that it only</ counts as corporal punishment if it's legitimately inflicted — Police Brutality and the Jack Bauer Interrogation Technique are illegal, and thus don't qualify. A Dope Slap from one friend to another might count as an "informal" version, though, if you consider one's peers to be a legitimate authority. Somewhat common in fiction that takes place before 1960 or so (roughly), when this sort of thing started to be frowned on in most places. Before that it was accepted, even encouraged, as a form of discipline. Subtropes include: Depending on the situation, corporal punishment can be played for comedy, horror, drama, or titillation. Most likely to be seen in military or school settings. They may be meted out by a Stern Nun . This does not</ mean a punishment issued by or to a low ranking NCO, though this can overlap with the actual meaning in a military setting. Nor does it refer to Krusty the Clown's third-ranked TV sidekick on The Simpsons </. Also not to be confused with capital punishment .

In many superhero works, the big, problematic question is usually "Where DOES he get all those wonderful toys?" . Superheroes have to pay the bills, after all, and superheroics isn't really that lucrative . So what's a superhero to do? Well, if you weren't lucky enough to inherit a large fortune and head a major corporation , you can either find a day job or seek out sponsorship for your heroics! While some might turn to the government, others might want to head to the private sector for financing. Enter the Corporate-Sponsored Superhero ! Captain Bland-Name Product is here to save the day, and tell you about all the great deals you can get on insurance to cover the damage incurred by your rescue ! Note that this applies only to heroes with explicit ties to their corporate sponsor. Characters who use funds from their corporation to secretly finance their heroism (Batman , for example) do not count. Expect to see corporate logos printed on tights , advertising appearances , and rampant toy marketing . Also expect the heroes to develop serious qualms about the shilling they have to do, especially if they discover their sponsor in engaging in unethical or criminal activities . Related to Law Enforcement, Inc. and Heroes "R" Us . May overlap with Punch-Clock Hero if they view heroics as nothing more than a 9-to-5 job to pay the bills. See also Celebrity Superhero .

Explored in Evil Plan </ where the US government runs on a "hero economy" that sells merchandise and licensing of the heroes. In Chapter 17 after Amazingman is paralyzed he is taken in and given a cybernetic spine which he is charged crippling debt levels to repay and told that he must work off his debt within The Company by promoting his brand and selling his hero status for the profit of The

Company.

One common feature of Mega Corps and Predatory Businesses , both real and fictional, is the possession of private armies and the ability to wage war A staple of Cyberpunk media. Megacorporations typically are depicted as having "Company Security Forces" which are often as powerful as the military of a small nation. Besides the option for open warfare, they also heavily indulge in covert operations against their business rivals, ranging from espionage to sabotage and "wetwork", meaning assassinations of key personnel In Real Life , the East India Trading Companies officially conquered and outright governed large areas of India in the name of their home nations Compare Mob War . Contrast to One Nation Under Copyright , where the corporations literally are nations. May involve an Army of Lawyers or Corporate Samurai . Private Military Contractors are a common choice for such security forces. May overlap with N.G.O. Superpower . If one company attempts a hostile takeover of another, it will likely invoke Majority-Share Dictator

When a great battle, massacre, or terrible cataclysm occurs, the people involved may someday forget, but in some cases the land doesn't. Sometimes a place becomes contaminated, or possessed, by the misery that transpired there. Vegetation fails to grow, beasts and birds become sick or mad. The land is cursed, forbidden and dangerous A Corpse Land is called this mostly because the bodies of the dead are ever present. No matter how many are buried, more seem to just appear, still bloody and disease-ridden, attracting scavengers that become puppets of the ghosts that haunt the place. In fantasy stories, Necromancers are drawn to such locations, and no matter how noble the armies involved may have been, they become twisted and malevolent, even attempting to re-enact their final moments with travelers who pass by In reality, openly decomposing bodies are only disease vectors for a relatively short time — once animals and bugs have cleaned the bones and the tissue has been absorbed into the soil, all that carbon and minerals can actually promote</ plant growth . However, wars fought with modern technology — or magic — may leave a lot of stuff behind that's more dangerous than bodies, and the psychological associations of a place of mass death may keep people away better than any threat to their health A hidden form of this may be a Field of Blades . See also Atop a Mountain of Corpses , Nothing but Skulls . May overlap with Polluted Wasteland or Unholy Ground Not to be confused with Giant Corpse World , a land made of</ a corpse

"Corpsing" (also called "breaking") is actor-speak for having an unscripted fit of laughter onstage, so-called because the worst time to have the giggles is when one is playing a corpse . Corpsing doesn't necessarily mean that the material is especially funny (though, of course, it can be), or that the actors aren't taking it seriously ; it just happens</, and even excellent actors can corpse. Many actors try to cover this by covering their mouth and muffling the sounds they make. When this is done, a fit of laughter can rather haphazardly be turned into violent sobbing , with varying levels of success. Of course, that only helps if violent crying is appropriate for the scene (again, playing a corpse leaves you in trouble, as corpses don't cry either — usually) Some actors, of course, will try their level best to make other actors corpse. It seems to be a feather in one's cap of some

sort, to either be the guy who never corpses, or the guy who can make even the guy who never corpses corpse. Bonus points if you're working in a scene with a very seasoned and well-respected actor. Even if they have a great sense of humor in real life, getting someone the caliber of Robert De Niro or Meryl Streep to get the giggles is a big achievement At other times, it is just mean to tell an actor to keep a straight face on camera while watching a character bounce off the walls. And if somebody happens to have Contagious Laughter , you're in real trouble It's rare to see extras corpsing in the background. While the main cast can get away with corpsing without being fired, if they do</ manage to get through a take without laughing but an extra ruins the scene by laughing in the background, that extra will probably be let go on the spot and probably blacklisted from future projects A common type of Hilarious Outtakes . On the other hand, can be subject to Throw It In! — if the work is a comedy and the actors are able to recover in time for their next line, it can make for a natural aversion of Tough Room . Opposite of The Stoic ; see also Not So Stoic . When this happens In-Universe , it's a subtrope of The Show Must Go Wrong . Compare Angrish , when it's anger that prevents someone from speaking coherently When the hapless individual actually is trying to play a corpse, this can overlap with The Living Dead Has nothing to do with Joker's laughing gas that makes people laugh to death (although some overlap is surely imaginable)

The trouble with space being so mind bogglingly huge is that virtually everything we know about civilization wouldn't apply to a world with infinite horizons, and post-scarcity issues aren't something most people are interested in Cue the Corralled Cosmos. Thanks to the magic of plot convenience there is now some impassable obstruction to keep people herded into a relatively manageable area, where they will be sure to explode into a ratings-friendly conflict sooner or later. The corral itself can take many forms. It might be a physical barrier like a black hole, asteroid field, or a particle storm. It might be Handwaved away to those who ask as "lawless space" where any number of Space Pirates or eldritch abominations might be waiting to ambush you. Hell, maybe there's just a whole lot of nothing. Whatever form it takes, the message is clear: "we don't go there" Frequently, the protagonists will be involved in busting out of the corral, or dealing with the aftermath Of course, this can be justified if the limitation is to one planetary system - the difference between the timescale and technology necessary for Casual Interplanetary Travel and Casual Interstellar Travel is enormous. Still, many justifications run in Sci-Fi Writers Have No Sense of Scale Compare The Wall Around the World (a smaller scale confined space) and What Other Galaxies? (where inability to go beyond one galaxy is not explained)

A situation where a character doing something minor seemingly causes some major effect, although it's obvious that's actually not the case. If the character is an animal, young, or just plain stupid, they might think that they actually (say) caused a explosion by pointing their finger. Otherwise, they'll simply be shocked and confused. Take, for example: Alice and Bob are playing around in the woods, Flynning with some sticks. But when their sticks clash, they hear a massive explosion! Did the clashing of two seemingly

normal sticks sound off such a massive bang? Of course it didn't, but the gag is that it seemed like it did. What actually happened was dynamite detonating about half a mile away to open a mine, or a warship firing its guns in the distance, or something similar; they just heard the explosion at the same time their sticks hit. The name comes from the logical fallacy of Correlation vs. Causation (two things happening in succession or together does not imply that one caused the other). This is where the humor or irony in this trope comes from. Often Played for Laughs (or at least irony). Framed for Heroism is a specific subtrope. It can, however, be Played for Drama , as it can be used to reveal something ominous (like an invasion or gunfire). If a minor act truly does have a catastrophic effect, that is Unwitting Instigator of Doom . Compare Retroactive Wish , where it's assumed something happened because a character wished for it, but it's just a coincidence. Compare and contrast False Cause , where the lack of causation isn't immediately obvious.

A senior manager, CEO or owner of a major definitely-for-profit corporation who is out to make as much money and gain as much power as possible, by any means available, regardless of who suffers . To that end, they are perfectly willing to violate business or social ethics, commit crimes (ranging from fraudulent accounting to mass murder), and devastate Mother Nature and human communities, justifying those actions under the name of "just business." They are confident that all they have to do is spread enough money around to get their way or avoid punishment, and are very likely to cross the Moral Event Horizon in their search for profit. They are also very, very likely to be White (or Asian) and male, like CEOs in real life. Expect to find them at the head of an enormous boardroom table on the top floor of an Evil Tower of Ominousness . He may be a Bad Boss , but not always. A few of them can actually be very decent employers, with employees who are completely in the dark about their underhanded plans. If so, the public is often just as much in the dark . Naturally, this sort of villain tends to have an Amoral Attorney (or several) on his payroll, in case he does slip up, and a small stormtrooper army of " security personnel " who have carte blanche to commit any number and kind of violent crimes to get a good performance evaluation from the boss. If those resources fail, he often uses money to "buy" or even "own" officials. They usually fail to consider the full effects of their plan , or the fact that they can make more by going legit , and at times the plan seems to have no concrete way of creating wealth. Usually, they remain in business thanks to Offscreen Villain Dark Matter . Though there are earlier examples, the modern Corrupt Corporate Executive had (until relatively recently) a distinctly The '80s feel, which made him seem progressively more out of place as those affectations become less mainstream. Earlier Corrupt Corporate Executives tended to be far less stylized and distinct from other "smooth" villain types (often with a healthy streak of Ernst Stavro Blofeld). However, starting with the Turn of the Millennium onwards, countless high profile real-life cases of corporate corruption have arguably diminished the '80s feel of the character and made the Corrupt Corporate Executive a very modern villain. A well-known variation of the CCE, which is popular in dystopian and Cyberpunk fiction, is the CEO or President of a megacorporation that produces and controls everything (even the authorities) and is the de facto ruler of the world. Similarly powerful CCEs are popular villains in superhero stories, as an explanation for why you need costumed vigilantes rather than ordinary police in the first place (because the local/national government

works for the CCE, not the public). Another variation of the CCE is the Robber Baron, a pre-80s, industrial revolution era manifestation that retains all of the CCE's cosmopolitan, far-reaching financial and political power, with perhaps even less governmental or media constraints to consider. Joseph Pulitzer, from the movie Newsies </ , is a perfect example of this subtrope. The Robber Baron will have a different wardrobe and jargon than the 80s CCE, as appropriate to his setting, but is otherwise indistinguishable. Another variation on the CCE, found mostly in Walking the Earth series, is basically a Corrupt Hick with a business. The "corporations" they represent are not major multinational conglomerates, but small businesses like trucking companies, hotels, or other "mom and pop" ventures that simply want their competitors out of action. They tend to have little power outside of a single town or county, but can usually amass a small army of redneckish goons and threaten violence with impunity by virtue of paying off local law enforcement and/or the judiciary. This flavor of Corrupt Corporate Executive favors harassing a competing store owned by a kindly old man /woman and/or their family. This is one of the inevitable progressions that any ambitious character will end in. See Also There Are No Good Executives . Occasionally, the CCE will be the producer of an Immoral Reality Show . If the executive is a caricature of a certain someone with fake poofy hair and lives in a giant tower , then that is a Trumplica . See also the Corrupt Politician , who is likely to be his drinking buddy, the Morally Bankrupt Banker , who is his other drinking buddy and the Amoral Attorney , a brigade of whom will be found on his payroll. Compare Greedy Jew and Pointy-Haired Boss . Contrast Honest Corporate Executive , the CCE's natural enemy. But remember that sometimes, Even Evil Has Standards (and/or Loved Ones), especially in a What You Are in the Dark situation. Sadly, this trope is all too often Truth in Television , but be that as it may, No Real Life Examples, Please!

This is the invers Sometimes children can convince adults to e break the law. But they're such innocent little darlings! e How on earth is that possible? They could turn on the charm, e particularly on a gullible adult or one with low self-esteem, or e one who just likes kids and wants to be nice, or maybe one who e sees the kid as an equal or a friend. Other times, the kid simplye bribes the adult. This is pretty much the favourite technique of e the Enfant Terribl See also Troubling Unchildlike Behavior , Kidse Are Cruel , Deliberately Cute Child , From the Mouths of Babes , e Corruption of a Minor , and Enfant Terribl e

In many countries, there is a crime with a name similar to Corruption of a Minor, which is basically an adult teaching a kid things they "shouldn't" know ; generally things that could increase the kid's risk of becoming a criminal. Things like bringing the kid along while committing a crime such as shoplifting, for instance, or outright having the kid help in the commission of a crime. The purpose of these laws is to try to prevent future criminals by stopping those who would try to Corrupt the Cutie in this way Contrast Corruption by a Minor . See also Harmful to Minors

Many women (and some men) put in a great deal of work and effort to constantly show their beautiful visages and bodies to the world. Seeing the behind the scenes process of becoming so beautiful —

for men — is a terror right up there with running into your average masked slasher killer. The Cucumber Facial . Hair up in curlers. Girdles and corsets . Being Covered in Mud . Wrap treatments that turn one into a Bandage Mummy . Legs and/or armpits unshaved. Any man catching any woman in this pre-glamorous condition will be rooted to the spot, or run screaming. Occasionally, it is this horrifying for other women. This also includes seeing women without their makeup and other glamour accoutrements: wigs, false eyelashes, etc. Then there's the Truth in Television beauty rituals which can be really horrifying in a non-comedic manner and can be, but aren't as often, Played for Drama : Tweezing, threading, sugaring, waxing, razoring, shaving. Piercing of the ears (and other body parts). The one undergoing the beauty treatments is almost Always Female , though when a man is in such a state, it's Played for Laughs . The Double Standard says it is unmanly to want/need such treatments to look good. Though this hasn't always been the case, nor is it the case in every culture. In fact, in some cultures and at some times in history: the exact opposite was true. Very old works or works modeled on very old works may therefore feature men in this role. Compare Women's Mysteries and Wondrous Ladies Room for other female-only tropes that confuse and bewilder primitive males . Related to Cosmetic Catastrophe , where the results</ of the beauty treatment are terrifying. See Uncanny Valley Makeup for when cosmetics are applied in what is meant to be a normal manner but comes out being scary anyway. See also Plastic Bitch . While the Cucumber Facial is portrayed as scary to look at with the cream covering the face and vegetable matter over the eyes, facials are in the main quite harmless, and often beneficial when done properly. Done improperly, they can remove layers of skin. The salon version of these treatments is usually more of a Women's Mysteries trope and usually part of a montage before She Cleans Up Nicely . The home version is almost always played for laughs, and more often than not goes horribly wrong — especially if hair dye is involved . Lastly, although the trope is called Cosmetic Horror, it can and does include beauty treatments beyond the cosmetic (from corsets on outward) that induce horror when seen as part of the treatment, or just from what they do to the wearer. Has nothing to do with Cosmic Horror . See also Weight Loss Horror for instances in which attempts to look better can backfire horribly.

An extension of Cosmic Plaything , where two or more gods (or similarly powered entities) are effectively using the entire world as a game board. Often one god is portrayed as actually caring about his pawns while his opponent is pure evil . May lead to a Rage Against the Heavens when the heroes find out they've been used. Often a god acts specifically through one mortal or a small group, sometimes an entire species. May be considered an inversion to Cosmic Horror Story , as the deities in question excessively obsess over the seemingly inconsequential mortals to the point of tormenting them with responsibilities and consequences beyond what they can rationally comprehend, though the tropes may overlap if the manipulators are incomprehensible entities or if the game has few high-order consequences This is a subtrope to Divine Conflict . Indeed, it might overlap with Combat by Champion to prevent the gods from duking it out themselves. Contrast Chess with Death . Human Chess is this on a much lower scale

Somehow, somewhere, something went horribly wrong</ on a cosmic

scale Maybe it's a Negative Space Wedgie . Maybe the Butterfly of Doom flapped its wings once too often. The point is, the universe isn't behaving as it should, and this is not a good thing for our protagonists. Whatever the "flaw" is will almost always be very vaguely defined, typically by means of You Cannot Grasp the True Form . Just thinking about might cause a Brown Note -like effect Whatever it is, it's almost always causing the world to become more crapsack . If the "error" is personified, it will usually be an Eldritch Abomination . Correcting it may be a goal of the protagonists, but sometimes whatever it is is so far outside their ken that it's untouchable by them Contrast Cosmic Keystone , something necessary for balance and stability in the cosmos. The Cosmic Flaw may have been created from weakening or removing said keystone, the result of Upsetting the Balance , a Reality-Breaking Paradox , or The Death of Death . The Reality Warper may fix or cause this. May sometimes happen because God Is Flawed and He made a mistake. The Cosmic Flaw may involve Merged Reality and/or All of Time at Once

Played for Laughs in The Amazing World of Gumball </ episode "The Job", where Richard gets a job delivering pizzas. The very concept of Richard being employed is so unnatural that reality starts breaking apart all around him; normalcy is only restored once he gets fired.

Imagine a universe where even the tiniest spot of hope for the future is blindness in itself , the insane Straw Nihilist yelling about The End of the World as We Know It in the asylum is actually the only one with a clue , and too much curiosity about the true nature of the world is a precursor to a Fate Worse than Death . A universe where humanity is preyed upon as a mere plaything for all kinds of inconceivable horrors, and all our ideals are naught but cruel illusions; a universe which was once ruled by such eldritch abominations from the depths of space long ago. Nor are they dead; they merely wait, and soon they shall wake . They shall return to rule this world, and all our grandest achievements shall have been in vain . For all our blind pride we are but mice in the wainscoting, making merry while the cat's away—but even today, the world is more dangerous than we may know. Take one step away from the comforts of home, and you will find danger hiding almost anywhere, terror and madness on every nook and corner — dark cults, hideous monstrosities, truths so terrible that none may comprehend them and remain sane . Demons gibber in the tunnels beneath your feet. Parasites and worms slither unseen in whatever food or drink you dare put into your mouth. Ghosts hover unseen and unheard around you, discerning and mocking your every thought and secret. The vile essence of an alien disease lurks in the recesses of your own family tree, a genetic time bomb just waiting</ to go off ... Such was the vision of H. P. Lovecraft , pioneer, Trope Maker , and Trope Codifier of the Cosmic Horror Story. This type of fiction doesn't just scare you with big, ugly monsters—though it can certainly have them—it depresses you with the fatalistic implication of being insignificantly powerless before such vast, unknowable and fundamentally alien entities. As a genre, Cosmic Horror is at the very pessimistic end of the Sliding Scale of Idealism vs. Cynicism . If you aren't sure if a work is a Cosmic Horror Story or not, ask yourself these questions: Answering "No" to more than two of these means that the work is probably not a Cosmic Horror Story, although it may share tropes with the genre. (Note that the scale and stakes

of the story is allowed to go much lower than the above implies; the fate of the world need not be at stake to qualify as a Cosmic Horror Story, as long as the implication remains clear that The Universe is Scary and some truly horrific things can happen if you look too deeply.) In the last few decades it's become fairly popular to invert the common indifference of the Cosmic Horror Story setting, while still keeping it every bit as horrifying, by incorporating elements such as Your Mind Makes It Real , Sense Freak , and Humans Are Cthulhu . Such settings are usually still classed as Cosmic Horror, and are embodied by the works of Clive Barker , and the Warhammer </ games. In such settings humans often learn that they really do matter, and their emotions and desires really can shape reality...only to then get smacked in the face with Be Careful What You Wish For .

The genre is sometimes called "Cosmic Horror", Lovecraftian Fiction, or Weird Fiction. Very likely to use Paranoia Fuel and invoke an atmosphere similar to Room 101 ; both tropes play with the fear of that unknown thing</ that happens to traumatize all those who encounter it. A Despair Event Horizon or a Downer Ending can be used to add to the depressing atmosphere. Compare/contrast with Gothic Horror (on which prose the first Cosmic Horror Stories, like those from Lovecraft himself, borrowed), Dark Fantasy (a genre that has a of overlap with this one, although some works are one but not the other), Crapsack World , Mind Screw and Through the Eyes of Madness . Cosmic Plaything could be viewed as this on a much, much smaller scale Note that while the Cthulhu Mythos originated in the Cosmic Horror fiction of H. P. Lovecraft , a Cosmic Horror Story need not refer to the Mythos or borrow from its imagery. Lovecraft Lite goes a step further than that by either giving the setting some genuine hope or playing it for laughs

Isaac Asimov 's "Nightfall" invokes this premise not with a paranormal deity, but with a natural and real phenomenon. On the planet Lagash, the night sky is only visible every two thousand years, during an eclipse. The concept of "darkness" is so foreign to them that one of the characters needs the concept explained, and torches are an experimental new technology. These eclipses have seemed to coincide with the collapse of past civilizations. A new scientific theory postulates that the night sky, in all its awesome, terrible wonder, has driven every previous civilization mad. On the eve of the next eclipse, the citizens of Lagash are about to find out whether this theory is correct.

They're coming, they're —

Imagine a universe where even the tiniest spot of hope for the future is blindness in itself , the insane Straw Nihilist yelling about The End of the World as We Know It in the asylum is actually the only one with a clue , and too much curiosity about the true nature of the world is a precursor to a Fate Worse than Death . On the eve of the next eclipse, the citizens of Lagash are about to find out whether this theory is correct.

They're coming, they're —

Oh no! The world is in danger! Happiness, sunshine, puppies, and ice cream will cease to exist! Why, you ask? Well, it seems that the villains have stolen, corrupted, or destroyed the Four Orbs of Fate , the Pillars of Reality , the Tomes of Prophecy and Fate , or The Lifestream . The loss of even one</ of these is enough to make the world spiral into a hellscape of torment consumed by Inconceivable Horrors beyond the comprehension of All Logic and Reality . It seems that, for whatever reason, the Powers That Be who created the universe needed to make its continued healthy existence contingent on these poorly guarded, easily found, delicate, carry-on-luggage sized objects. Obviously they never heard of redundant systems and failsafes . The reasons for this vary Justified if the world/universe was once healthy and self sustaining but was broken due to some catastrophe, requiring the hasty creation of a Cosmic Keystone by benevolent precursors as a patch</ of sorts to hold the world together. The cosmic keystones could also be a side effect of creating the world in the first place If the villain ever gets the cosmic keystone, expect him to try and use it to destroy and/or remake the world in his own twisted image to rule over. If he even realizes the reality-central nature of the item. Sometimes the villain has a smaller goal in mind for its power; he just doesn't believe it'll destroy everything if something goes wrong, or else has an overinflated opinion on his ability to prevent that from happening. If he doesn't have it he'll tail the hero, let him do the hard work of finding it, and snatch it from the heroes' grasp at just</ the last second, only to fly away cackling. One would think they'd know better than to tamper with the underpinnings of reality, but villains have never been the sanest lot . When the changes can be easily reversed , there is obviously No Ontological Inertia in that cosmos A person</ who is one of these is a Barrier Maiden . Settings where reality works via the Magical Underpinnings of Reality will probably have a lot of cosmic keystones

Nearly all characters in anime who are otaku are guys, although occasionally a female fan is included. This could be seen as an attempt at fair balance, but it's noticeable that this will inevitably be a specific kind of fan: the Cosplay fan While this reflects a very real trend in fandom popular with ladies, it can come off like an excuse to put the resident cute girl of a cast in a variety of fetish outfits for the audience's benefit if done badly. Especially since the second most stereotypical interest of fangirls tends not to appeal to a male audience much

A costume drama is a Period Piece in which elaborate costumes, sets and properties are featured in order to capture the ambiance of a particular era. Most costume dramas are adaptations of

classic literature, often romances, but the term can also be used to describe things such as Robin Hood Even if the plot is not realistic or is victim to Sadly Mythtaken , if the costumes are lavishly detailed and the designer has Shown Their Work a film can still be a good example of costume drama Because of its tendency towards spectacle, costume drama is the home of Costume Porn , especially the pimped out Gorgeous Period Dress . If the character is of sufficient social status to afford a vast wardrobe (and the budget can accommodate it), the costume designer usually runs with it If this is a one-off Out-of-Genre Experience for the sake of Costume Porn , you are watching a Costumer See also Swashbuckler , Sword & Sandal , Wuxia and Jidaigeki , many of which can be considered costume dramas

"Cosy Catastrophe" is a term coined by Brian Aldiss To dismiss the work of fellow British Sci-Fi icon John Wyndham , particularly The Day of the Triffids . The End of the World as We Know It has arrived and... our heroes feel fine. Sure, it's a pity for all those billions who just perished at the hands of super-plague/aliens/nuclear war. But for our safe, middle-class heroes, it means a chance to quit their day job, steal expensive cars without feeling guilty, sleep in a five-star hotel for free, and relax while the world falls apart around them. Maybe things weren't as good as they were in The Beforetimes , but all in all, life is still enjoyable. Especially if you brought your dog Maybe later they'll band together to recreate a humble yet sustainable pretechnological society. Maybe, if they're of mixed genders, they'll see it as their duty to repopulate the species (wink wink). Maybe they'll just learn to accept the extinction of the human race with quiet dignity . Either way, the end of the world shouldn't be the ... end of the world, so to speak Expect Arcadia since there's not as much pollution and construction Many have noted that the popularity of the Zombie Apocalypse in media is probably in part due to this trope. For people's sensibilities, a future in which you may be prey to flesh-hungry ghouls is worth it if at least you don't have to face all of the pressures and responsibilities of modern life anymore. In many ways, it makes life more interesting A high form of Escapism , as who wouldn't want to drop all the pressures of modern life, with the odd chance to prove your bravery and resilience? Compare with Scavenger World , After the End . Usually goes hand in hand with Apocalyptic Logistics . See also Disaster Democracy and Angst? What Angst?

A trope throughout a series by which a part of the opening or ending credits is interchangeably switched, and the content can be different every show. Some of the same shows also have couch gags at the end as a Credits Gag . Alternatively, this gag may occur at the end of The Teaser , just before the credits start Named for one of its best-known incarnations, the family scrambling to gather on the couch during the opening sequence of The Simpsons </, as seen Note that it need not be a "gag"; TV dramas such as Mission: Impossible </ and Justice League Unlimited </ will sometimes have clips from later in the episode Compare to Different in Every Episode . Not to be confused with the other</ type of couch and gag Randomized Title Screen is a Video Game only Sub-Trope , applying only to the Start Screen and chosen by the Random Number God

Know what's cool ? Fist fights , shoot-em-ups , sword fights , fireballs and explosions ! Yep, any good cartoon, action movie, or TV series has to have at least one of the above, forget all that " True Art Is Incomprehensible " junk — and any series with all of them will be bloodless beyond belief. Especially if it's for kids/pre-teens, you just have to to make sure to stay on the Media Watchdog 's good side and not let anyone spill blood, die , or get mauled. Not a problem, really—our hero is already an expert at dodging; otherwise, he'd be toast! However, the more the hero gets shot at , sliced, and stabbed without getting anything worse than cut or singed hair, the louder that niggling little voice saying "Y'know, if he'd been half a second slower" gets. Then, of course, you eventually start to wonder at the morality of the heroes for using clearly lethal attacks against opponents with playful and innocent abandon simply because (or rather, you assume because) they know</ they'll dodge the attack. Taken to extremes, these shows often have to take a time-out for a Very Special Episode to prove that, in fact, those red lasers , swords, or (censors forbid) guns</ are not in fact toys, and can kill people. Our heroes will learn a valuable lesson about not running with atomic-powered scissors, and they'll use their weapons or powers with more restraint— until tomorrow's episode. The trope origins lie primarily within Comic Books , whose fantastical nature easily allowed passage of such action-oriented, reality-bending situations. With the generally less restrictive Japanese broadcasting, the trope tends to be less apparent with anime/manga, which regularly features bloodletting and dying. Nevertheless, even here Could Have Been Messy is instinctively applied towards main protagonists or other characters that the writer simply doesn't want to let go of just yet. Could Have Been Messy enables (or is enabled by) several other tropes: Contrast Violence Is Disturbing , when they do</ show all the dangers inherent in violence and make them horrifying.

I'd like to explain that this is when Bob wants to say something, but for whatever reason can't, because I'm not supposed to. If I did, I'd say that maybe he'd risk his job if he spoke up, or maybe he just doesn't want to look crazy or malicious, or something like that. And I certainly can't tell you that Bob gets around this by mentioning it but pretending he isn't, as in, "Well I could tell you that the shutoff switch to the Doomsday Device is down the hall, first right, second left, behind the water cooler, but I won't do that because I'd lose my job." I'd like to explain that, in other words, he Could Say It But... he won't, except he just did...but I can't. Sometimes used as an insult, especially in politics. For example, "I refuse to stoop to the level of calling my opponent a corrupt, greedy slimeball." Truth in Television . The technical term is "paralipsis" or "praeteritio", depending on the nature of the information you're definitely not giving. See also Suspiciously Specific Denial or I'll Never Tell You What I'm Telling You! , for those bits when this is not intentional. Also related to I'll Pretend I Didn't Hear That and Stepping Out for a Quick Cup of Coffee . Do not confuse with I Would Say If I Could Say . May result from the asker using Politeness Judo .

So you're sitting down, getting ready to watch some Prime Time television. It's Wednesday night, and that means a new episode of your favorite show. You're excited to get through the commercials and onto the programming, when, right before the episode begins, a news

advertisement plays. "Coming up, some older T.V. models appear to be linked with cases of in their viewers; details at eleven." Well, I'm not going to stay up that long, you say; I've got important work to do tomorrow. True, but is it really worth potentially your life we're talking about here. You wanna tell your family, lying down on your death bed, that the reason you contracted cancer was because you didn't stay up a few measly hours to watch one news broadcast that could have saved you!? The fundamental question in all of this, the one that keeps worry high and answers limited, is "Could this happen to you?" This is the quintessential Real Life example of the trope. When a news station wants to drum up views, it can always rely on this tried and true scare tactic (while adding a bit of blood for good measure). This leads to a situation where the viewer would feel the need to give up any minor inconveniences if it meant saving their lives (and boosting ratings). Rarely is the answer given before the end of the news (see Film at 11). This trope has given birth to Betteridge's Law of Headlines</ , wherein such headlines that pose such an ominous question can be immediately disproven. No matter how often the practice is scoffed, it still proves to be effective and used all the time. Outside of Real Life, this trope is more often poked fun of rather than invoked. See also You May Panic Now . The equal and opposite reaction to Ripped from the Headlines . Usually involves several Commercial Break Cliffhangers that promise the answer is coming up next! Might lead to Crying Wolf . This trope may be invoked and Played for Laughs as part of a Clickbait Gag .

A hypothetical planet on the other side of the Sun from the Earth which is usually like the Earth, but hidden. The idea was popular in old science fiction, and continues to appear in sci-fi that is not very hard The concept originated with the ancient Greeks and was known as Antichthon</, which is Greek for Counter-Earth. Its use in modern stories is an example of All Theories Are True In Real Life , this idea has been proven false, even before the Space Age. A Counter-Earth's gravity would affect the motion of other planets, and other planets' gravity would cause it to drift out of its position, and the final blow was when probes actually went the other side of the Sun from us and didn't see any counter-earths. It's still an exciting idea for fiction, though

Not related to blocking .

Instead of robbing or stealing directly, some criminals prefer to make fake bills — that way, not only do they not have to pay for whatever they're "buying", they get real money back as change. It can be anywhere from one dude operating a low-grade printer out of his garage to a gang using a top-end press making super-bills. Sometimes, this extends to creating fake coins as well In other words, " Screw the rules, I make my own money! " When Played for Laughs , there will be a GLARING difference between real and fake bills, like the counterfeiter's face instead of Benjamin Franklin or Queen Elizabeth , or "unconventional" denominations such as a $37 bill. Counterfeiting rings tend to be popular villains for Kid Detectives and other G-rated heroes, since the crime is serious enough to call for legitimate secrecy and cunning, but not</ instantly synonymous with Family-Unfriendly Violence like robbery or drug-dealing. That said, don't expect every counterfeiter (fictional or otherwise) to be a pushover ; it takes a lot</ of muscle to carry

all those printing plates, after all...

Ricky has been pulling a Zany Scheme to keep Lucy away from the club the night the big celebrity is visiting. Lucy finds out. Instead of confronting Ricky, she enlists Fred, Ethel, and the visiting celebrity in "teaching Ricky a lesson he won't soon forget." They stage an elaborate charade, making Ricky believe his scheme has had unintended consequences. Ricky confesses and everyone yells, "Gotcha!" Usually we see a conspirator whispering, "Here's what we do," and the scene cuts away. See Unspoken Plan Guarantee . The comedic variant of Out-Gambitted . Sometimes the Zany and the Counter Zany collide in a matter- antimatter explosion, resulting in Aesops all around, on the house. If the Counter Zany is then countered, you have Zany Scheme Chicken .

In Mao-chan </, the new Prime Minister starts a Monster Protection Racket to promote his "Three Aces" team... whereupon the Defense Force leaders launch their own fake alien at the same time to try to get the Defense Corps girls back in the public's good graces. Turns into a game of Zany Scheme Chicken when Yuriko launches a real alien for the girls to fight... and all</ of the aliens look like pandas.

Bill & Ted's Bogus Journey </: "How do you stop a pair of bad robot usses?" "By building a pair of good</ robot usses to fight them!"

The works of P. G. Wodehouse run on this trope.

I Love Lucy </ was probably the first to do this on television. And the second and third and fourth and tenth.. Dates back at least to William Shakespeare . Consider Much Ado About Nothing </ — this goes back and forth at least three times

Whateley Universe </ : when Generator hatches a plan to prank Phase with realistic shoulder angels, Phase retaliates by stealing Generator's lingerie. While Generator is standing in the middle of the cafeteria. Generator does not take this lying down.

South Park </: the boys' parents launch a Zany Scheme in which actors pretend to be the boys' time-traveling future selves, with the aim of scaring the boys away from drugs and alcohol. After discovering the truth, Stan attempts to fight the zany scheme with logic but gets nowhere. Butters, with the help of Cartman, launches a Counter Zany to get revenge on his parents (by smearing feces all over their house). Needless to say, the Zany-Counter Zany collision results in a standard Anvilicious message about communication and honesty.

In situations involving single numbers—or letters when spelling out—any of these numbers or letters may be replaced by one out of sequence, a numerical for a letter or vice versa, or just a random word. This is most often done by The Ditz or by someone mocking their perceived lack of general knowledge, or by characters to try to appear stupid . This trope comes in a few different flavors: : B: Lists : : π: Alternative Number System : -21: Unusual Chapter Numbers : Sex : Homophones (and homosymbols) : ¶: Lucky Charms Title : Surprisingly unrelated to Letters 2 Numbers , 2 + 2 = 5 and

3 + 5 = 4 . Occasionally overlaps with Counting to Three and may result in a case of E = MC Hammer . A key element of the Disorganized Outline Speech . Super-Trope of Unusual Chapter Numbers and Lucky Charms Title . Compare One, Two, Skip a Few .

Ah, country music. The American answer to Folk Music that is mostly associated with places like Texas and men wearing cowboy attire unironically. Despite its widespread notoriety, country music is not unpopular, as proved by many musicians, and is in fact by some measures the most listened-to genre of music in the United States. Together with Blues it was a huge influence on Rock & Roll and Rockabilly Country music as a genre of its own originated in the 1920s in the United States, primarily played on string instruments, most notably the guitar, fiddle and banjo. It has its roots in the folk ballads of the Appalachian Mountains, which in turn descended from the various folk traditions of the British Isles. Depending on whom you ask, the offshoot genre of bluegrass might be referred to as " good country music ". Modern mainstream country has progressed through a "Nashville sound" in the 1970s, which layered the string sections on heavily, and a 1980s pop-heavy "Urban Cowboy" sound inspired by the film Urban Cowboy</, followed by a more traditional wave in the 1990s inspired by honky-tonk music. Modern mainstream country music has become a melting pot, ranging from more traditional acts such as George Strait and Alan Jackson to pop acts such as Carrie Underwood , and in-betweens such as Brad Paisley . Starting in the 1990s, a large number of pop and rock acts, ranging from Bon Jovi and Jewel to Kid Rock and the Eagles , crossed over to country with varying degrees of success. The crossover acts, in particular Taylor Swift , are often among the most divisive in the fanbase The New '10s saw the rise of "Bro-country", basically a combination of Testosterone Poisoning and modern rap influence, leading to jacked-up songs about driving around in pimped-up pickup trucks, drinking copious amounts of beer with friends, and partying in the woods with a hot girl. The Trope Maker of such was Florida Georgia Line 's "Cruise", a review of which even coined the term "bro-country". However, bro-country quickly drew ire for its simplistic themes and marginalization of women (lampshaded heavily in Maddie & Tae 's "Girl in a Country Song"), which led to an increased discussion of misogyny in the genre. From this spawned a more romantically-minded "boyfriend country" and a mix of artists with more traditionally country influence drawn from the early 1990s traditionalist boom, as well as a resurgence in female artists who were largely marginalized during the heyday of "bro-country" On that note, the fanbase is stereotyped as being right-wing Boisterous Bruisers who personify the Deep South of Eagle Land . While such an portrayal is two-dimensional and uneducated, one must remember k.d. lang was</ blacklisted for being outspokenly pro-vegetarian (she didn't come out as a lesbian until after she felt she no longer had a country fanbase to alienate). And yet the Dixie Chicks were surprised when their fans turned on them after bad-mouthing George W. Bush (granted, the death threats were a bit much) " Alternative Country " (sometimes abbreviated as "Alt-Country") is a loosely defined term that means, more or less, the attitude of Alternative Rock with a country sound See also: Country Rap , Alternative Country , and Gothic Country Music

For whatever reason, when married couples (or even just couples who are known for being together) make a movie, it rarely works. Who knows why? In some cases, it's public backlash against the couple. Sometimes the couple's Real Life chemistry just doesn't show up on-screen (or it does, and it becomes somewhat unsettling when you realize you're watching an actual</ couple during a love scene). Sometimes, it's just a Vanity Project with no real direction. In any case, even though Couple Bombs have a track record of not succeeding, they somehow still get made anyway Subtrope of Real-Life Relative . Might be related to Creator Couple if the Love Makes You Uncreative trope is factored in. Could also be a result of Yoko Oh No . Should not be confused with Battle Couple

A frequent setup for romantic comedies and sometimes dramas, this trope explores the romantic relationships between four principal characters. By far the most frequent version is to have a Gender-Equal Ensemble with two male and two female lovers, but other versions are possible too If the lovers are not already paired up, they will get together during the course of the story, and the progress of each relationship may be used as a foil or yardstick for the other. There may be a clear Alpha and Beta Couple , or the two couples may be equally important in the story Whether or how the lovers pair up may, on the other hand, only be resolved near the end of the story, although it will probably be hinted at early on by the chemistry between them. Unlike Two Guys and a Girl and Two Girls and a Guy , this arrangement offers (and most often fulfills) the potential for romantic resolution without involving any additional people. Occasionally there may be transfers of affection within the foursome before the final resolution Each of the four lovers will be previously acquainted with at least one of the other three. The four may be staunch friends who spend a lot of time together, or there may be rivalry involved. In the case of a gender-balanced foursome with two heterosexual pairings, the same-gender characters may be Heterosexual Life-Partners , sometimes with subtle or not-so-subtle hints of Ho Yay . There may also be sibling relationships within the group Four-Temperament Ensemble and Four-Philosophy Ensemble may be applicable to this arrangement. Compare Double Date

You, an unimportant background character, need something delivered to or across a barren wasteland, deadly jungle, or simply a dangerous urban environment . The Internet, phone, or regular mail service isn't going to cut it. You're going to need something special. And what is that something special? Why, it's the local Courier! A Courier is essentially a mercantile mailman/woman, delivering messages through cities and towns on foot or other single-person conveyance. In fiction this often comes with some level of danger involved, either from the environment the Courier crosses, the package they're delivering, people who may be after the package they're delivering , or simply through the Courier 's own

recklessness. Even if there's not an element of danger, there will usually be a tight deadline the parcel must be delivered by, forcing the Courier to bust their hump getting it there on time. Le Parkour or other fancy tricks may be employed to get safely from Point A to Point B (the words parkour</ and courier</ both derive from the French for "to run"). Since it's a romantic spy type of job that still allows cynicism with money, combined with the fact that it's an easy way to bring characters to new places or into contact with interesting people, it's ripe for protagonist-hood, but this is not always the case. Can often turn up even in futuristic settings where you'd imagine advanced technology would make human Couriers obsolete, generally as a form of commentary on the presence of a Shadow Dictator in the setting. See Pony Express Rider for the mounted variety and Unstoppable Mailman for the government-employee version May involve Deadly Delivery , Shoot the Messenger or You Got Murder . A Venturous Smuggler specializes in illegal deliveries.

Courtly love was a medieval European idea of love dating back to the noble courts of the eleventh century. In essence, courtly love was a contradictory experience between erotic desire and spiritual attainment. Courtly Love is having a romantic affair without ever imagining it will be consummated - a type of Romance and Sexuality Separation . The man in question will be in love with his lady — who is normally his social superior — do almost anything for her and in her name. She may love the fella back, if he's fortunate — though that's not expected, and not really the point. The lady in question (and, indeed, the man in question) will almost certainly be married or engaged to somebody else: when Courtly Love happens, marriage isn't for love, but for more pragmatic reasons . In periods where Courtly Love is popular, it may be the only form of affair that doesn't get condemned as evil, simply because nothing more intimate than kisses, handkerchiefs, and sonnets get exchanged. In modern times it might happen just because the characters are too young, such as a Childhood Friend Romance It was a common motif in Chivalric Romance . The fairy mistress, being one of the Fair Folk , was a natural for it; the magical taboos that hedged her around fit well with the ethos of obedience to the lady, however arbitrary her demands. It even allowed the writer to rationalize the taboo into a whim of the lady Almost as soon as it appeared, it was Newer Than They Think ; the King Arthur mythos and the Matter of Britain were hammered into shape, and people began to lament that love was no longer what it had been in King Arthur's day . It has now been a Dead Unicorn Trope for a matter of centuries There is, of course, a dark side to this seemingly idealized fairy tale. Just as Courtly Love is the only</ genteel and "proper" form of romance short of marriage in nobility, the only outlet for carnal desires falls on the shoulders of those not subject to the respect of chivalry; the peasant class. Malory's writings contain candid accounts of Lancelot casually advising Galahad to rape a local village girl to mend his heart wounded from a failed courtship. This is the most benign</ examples of the consequences of unfulfilled lust stemmed from the stifling constraints of Courtly Love In latter times, Courtly Love may be the only way for a Celibate Hero or someone whose superpowers are Powered by Virginity , to express their love for someone. The difference between Courtly Love and Unresolved Sexual Tension is, Courtly Love is supposed</ to be satisfying in itself because of the mix of the romantic and spiritual. Even when it was popular, it

didn't always work that way; Lancelot's love for Guinevere started as Courtly Love but developed into a different sort of affair Later on, this trope helped make the era look far more romantic than it already was. Thus we have Knight in Shining Armor , Prince Charming , and Princess Classic Older Than Print . Also known as Petrarchan Love, after the Trope Codifier , Petrarch , whose lovesick series of sonnets to Laura made poetry an essential facet of Courtly Love. Today, if one of the two is married, this is known as "emotional adultery" A Sister Trope to Old-Fashioned Rowboat Date which is a similar romantic ideal that started up centuries after the medieval European period Compare The Lady's Favour , Lady and Knight Nothing to do with Courtney Love , who is pretty much in a polar opposite position of this trope

Sometimes, a soldier doesn't respect the law and/or his orders; other times, someone under military jurisdiction, such as a civilian living in a zone under anarchy or working for the army, ends on the bad side of the law. In both cases, they end up court-martialed. Military courts have a reputation for harshness, and in portrayals of authoritarian states, they are used as a background effect, especially when used against civilians; Hanging Judges can end up serving as judges in these. Among the outcomes of these courts are Shot at Dawn and Insignia Rip-Off Ritual . In fiction, this is often played as a particularly dark take on the Kangaroo Court . Historically, a court-martial may not only be held to determine someone's guilt, but also to verify their innocence and officially clear their name. This was a fairly common outcome for Captains who faced court-martial for the loss of their ships. It also wasn't unheard of for a disgraced officer to request a court-martial, in hopes of clearing their name in a court of law. Note that most navies have a standard court-martial which convenes whenever a ship is lost; this does not presume that the captain is suspected of wrongdoing, but merely that the circumstances surrounding the loss of the ship be made part of the official record (in fact, some captains saw their careers harmed or even effectively ended - because they didn't</ have a court-martial for an official record). The inevitable intersection of a Courtroom Episode and Military Fiction . May also take place in a Law Procedural dealing with the military. Obviously Truth in Television . Anime and Manga Comic Books Fan Work Literature Live-Action Television Video Game Western Animation Real Life

People getting covered in gunge (also known as slime). A variant involves a large cake and comedies : it is inevitable in such shows that someone will end up with their face in the cake. If the cake is big enough (as many wedding cakes are), they'll do a full-body dive into it Often a result of a Food Fight or Bucket Booby-Trap . Edible gunge can lead to I Taste Delicious if the person covered in gunge tries to eat his way out A trope of the Saturday Morning Kids’ Show genre or anything else aimed at kids. This trope is also popular in a number of programs aimed at adults. The game show use of gunge was particularly ubiquitous during the late 80s and early 90s , but it seems to have died down now as health and safety and general dignity take increasing hold Britain started all this in the 1960s with Not Only … But Also </ and the festival of anarchy that was Tiswas </. Slightly later on, America got into it as well thanks to the Canadians with the sketch show You Can't Do That on Television </, and it became a hallmark of the network Nickelodeon . In general, American game shows tended to

use slime as an obstacle or even reward, while the British, with their typical mastery of villainy, treated it more as a sort of ritual punishment with various elaborate and spectacular gungings being dealt out to celebrities or the general public courtesy of The BBC Check The Pig-Pen for someone who is always like this. When it's blood that somebody is covered with, it's Blood-Splattered Innocents ; if they did it intentionally and like it, it's Blood Is the New Black . If it's mud they're covered in, it's... well... Covered in Mud . An Older Than Television version is Pie in the Face Often an essential ingredient in a good Humiliation Conga Not to be confused with something being Covered in Grunge

Face it, we all take some</ stock in our appearance: at least, enough that we don't want to be all dirty, especially not in front of others. So what's a universal way for someone to be brought down a few notches? Well, by them being muddy, of course! Mud is a particularly dirty substance, hard to wash out Occasionally they'll be pushed</ into mud by someone, or simply fall on their own , which either way is an embarrassing experience. Bonus humiliation points if it's right in their face, or if they fall into a patch of mud that had pigs wallowing in it — this implies that the character is even more lowly than a pig, and, of course, there's a chance they're going to stink afterward. It may be part of a Humiliation Conga It can also have practical purposes for temporarily blinding an opponent in battle Now, while getting muddy may not</ be the character's choice, there are times when they'll intentionally cover themselves in mud. It may have a practical purpose such as helping to camouflage them or keep off stinging insects. Or, perhaps, they may be getting extremely dirty in order to help someone else out, in which case they're seen as being more humble and selfless because they put themselves in that position. Sometimes, if the mud is from a character that spends a lot of time outside, such as gardening, it can imply that they're more of a down-to-earth person who spends more time actually doing</ things than worrying about their appearance May be used as Body Paint . Sub-trope of Covered in Gunge — if it's anything other than mud, it goes there. Not to be confused with The Pig-Pen , a character who could be covered in either mud or something equally dirty so often that it's a matter of routine (no special explanation needed for why he's so muddy today</), and usually seems content with this situation. The Trope Namer for The Pig-Pen was thoroughly covered in dirt, but even in his case at least it was only dry dirt rather than mud

A specific form of Older Than They Think , in which the Cover Version of a song becomes so iconic that people forget it was a cover at all. The cover becomes the definitive version of the song, while the original fades into obscurity to the point where the cover artist may be incorrectly credited for writing it. To a certain extent, this is generational — if you hear a song before the cover is even recorded, you're less likely to be confused. (It doesn't count if the new version is in a different language.) This can become a Fandom-Enraging Misconception for fans of the original artist, and sometimes even for the original artist themselves (as the David Bowie quote above demonstrates). Nowadays, "covers" are used to describe any band performing a not-originally-written song. However, when bands writing all their own songs was a less common

practice, covering referred specifically to doing a version of a song in a style similar to that of another artist. With the advent of the Internet, it is possible for covers to overshadow the original version thanks to metrics such as YouTube view counts, or if they come up more often in search results. The "Weird Al" Effect is this taken Up to Eleven , in which an entirely revised and rewritten version of a song by a different artist becomes more prominent than the original. Somewhat related is Breakaway Pop Hit , where an iconic song (or cover) composed specifically for a film overshadows its film. Compare Sampled Up and Eclipsed by the Remix , and contrast with First and Foremost . See also Revival by Commercialization and Misattributed Song . See also Adaptation Displacement , in which later entries of a franchise are better-known than the original entry that spawned the franchise. If you were thinking of the other meaning of "covers", you might be looking for Modesty Bedsheet . Also not related to any Cover Tropes , nor to Revealing Cover Up . For the opposite of this trope, see First and Foremost .

And one final note: Fan Myopia runs quite high when it comes to music, so please avoid the "quick, what band do you think of when you hear X?" cockiness, because chances are not everyone will have the same answer as you.

Perhaps someone is letting loose a torrent of profanity . Perhaps there's a streaker running past. Perhaps somebody is about to rip out somebody's heart. Whatever the case, there are children around , and they are being exposed to some highly inappropriate content. Quick! Cover their eyes/ears! This trope generally depends on the idea that Children Are Innocent , and furthermore, should stay</ innocent. Children should be protected from anything considered Harmful to Minors . Usually it's a parent who will do this. This can be played for laughs if the “innocent” kid still understands what's going on (e.g. The Simpsons </ episode “Bart Sells His Soul” where Todd still repeats a curse word after a parent covers his ears). Usually the scene that causes this is concealed in a Discretion Shot . For some, doing so may only make the "innocent" child want to see/hear the denied spectacle even more . Compare Not in Front of the Kid , Take Five , and "I Can't Look" Gesture .

Don't judge a book by its cover - no, literally . Nor a video, a comic, or even a record. The cover is an essential part of the marketing plan. As is common in marketing , it can be an entirely inaccurate representation. It's not just the artwork that's misleading, either. The Blurb on the back may be even more disconnected from the story. Popular characters who appear in little more than a cameo on the inside can be larger than the main character on the cover. A quiet, contemplative issue can be made to seem like an action-packed frag-fest, and vice-versa. The cover can push for an entirely different demographic than the rest of the work. This is often done intentionally so customers will purchase the product assuming that it relates to their interests in a visual version of Follow the Leader , as commonly found in The Mockbuster . Film Posters and video packaging are particularly likely to mislead if it's an independent film, or a film in a genre that the marketing people assume most people are unlikely to appreciate. For example, an intelligently-written mystery for the whole family may have a

cover that implies it's a comedy, or a family film that happens to have a dog in it may emphasize the dog on the cover. See also Never Trust a Trailer . In non-graphic literature, it is not uncommon for a female character to be portrayed in a Stripperiffic outfit when they would wear nothing of the sort in the story. Also, virtually any Speculative Fiction book will have either a rocket or an alien of some sort on the cover, and dragons are commonly used on Fantasy, High Fantasy and Sword & Sorcery books, even if there is no dragon in the story at all. (Frank Frazetta and Boris Vallejo are particularly noteworthy as artists whose paintings make great book covers, but only occasionally actually relate to the contents of the books.) This trope also applies to album covers , especially singles, which often get their own album art, for one or two songs. The chances of this happening are magnified many times over when the game has to jump the national boundary. Especially in the pre-internet era, it wasn't at all uncommon to see the localization team (who may not actually be all that familiar with the work in question) creating a new cover from wholecloth, and said cover had about a 50-50 shot of looking nothing whatsoever like the actual product. A related subtrope is the practice of creating the cover first</, and writing the story based on that. This was common practice for comic books, especially at DC, during The Silver Age of Comic Books under editor Julius Schwartz, and was responsible for some of the weirdest stories of the time. However, it would sometimes result in a story that went off in a totally different direction and disposed of the cover situation in a panel or two. The website Superdickery features many strange, silly and inane covers of this kind . Finally, in some cases, it may result from using stuff that was never meant to be a cover. A classic example is concept art, which can end up way off-base from the final product, but still look nice enough and roughly similar enough to be pressed into service as such. This has occasionally gotten lampshade hung on it, as evidenced , and . Many of these overlap with Sexy Packaging and Contemptible Cover , and often feature Lady Not-Appearing-in-This-Game or Advertised Extras . Compare with Never Trust a Trailer , Wolverine Publicity , Bait-and-Switch Credits , Superdickery , Never Trust a Title and enjoy . For cover illustrations that whiten dark-skinned characters, see Race Lift . For in-book illustrations, see Unreliable Illustrator . For magazines that sometimes put a bit of skin on their cover even though the interior is about gaming, sports, or whatever, see Fanservice Cover . Inverted Trope of Spoiler Cover , where the cover is so accurate that it gives away important points. Covers lie a LOT. It happens all the time, even if only to prevent spoilers. So only put really interesting examples here now, not every cover that tells a little fib.

Uncharacteristically suggestive comments and thoughts from a character usually considered pure and innocent . Sometimes this is played straight and shows that a character is mature or smart enough to notice subtle themes their friends don't. Most of the time it's a trait given to a shy character to show they're not quite as mousy and meek as we think. Usually cued by fantasy segues becoming more and more lewd This will always be fiercely denied by the character, especially if they're cantankerous and dismissive . The more comedic princess-like types often get this too until it turns into a more overt Running Gag Note that the title refers to covertness in the figurative sense, not the literal . This trope is also Truth in Television — you know who you are. Don't say

it, otherwise you won't be one anymore. If the Covert Pervert is outed they may be subject to a girl getting set to Pervert Revenge Mode or even an Unprovoked Pervert Payback Compare Naughty by Night

My Little Pony: Friendship Is Magic More than one fanfic has Fluttershy as the author of saucy novels (as being an animal caretaker doesn't pay the bills). One particularly blatant example is </ Twilight asks if they really want to know , and Celestia replies that no, they really don't . Neon Genesis Evangelion Advice and Trust </: After hooking up with Shinji and especially after Their First Time Asuka becomes sex-crazed and gets frustrated if she has not sex with Shinji every day... but in public she still pretends she is not interested in sex so that nobody suspects they are together. When someone figures out they are together and finds out what kind of thoughts she has they are shocked because they did not think she could be so lewd. RWBY Fates Collide </ : Naruto Hinata gets this a lot in fanfiction. The fact that she has the power to see through any object , including people's clothes , certainly helps.

Tropes for covers of books, comics, music albums, film posters, DVDs and others Compare Film Posters

A character wants to avoid others' judgements on what they wish to buy. Maybe it's something they find embarrassing, maybe it's something they'd prefer to keep a secret, but either way they want to avoid awkwardness or wary stares. Even though they had just wanted to buy that one thing, the character ends up buying other things along with it in order to draw attention away from a specific thing they bought A Cover-up Purchase can also involve buying the same item in small quantities from multiple stores Super-Trope to Trojan Gauntlet for when the person is embarrassed by condoms specifically, Infraction Distraction for when a character admits to a minor wrongdoing to cover up a larger one, and Tampon Run for when a man is embarrassed about buying menstrual products. Faking and Entering uses this same kind of misdirection when stealing from a room One " " ad from 1995 has a man nervously buying Trix alongside more "grown up" cereals like Wheaties. As it turns out, he's so nervous because he's the Trix rabbit in disguise. The joke finishes with him being out of milk when he tries to eat the Trix

Osomatsu-san </ : In one episode, the sextuplets give "virgin training" to their father in attempt to rekindle his love for their mother. One thing they teach him is to hide dirty magazines between ordinary ones to make it seem like an accident.

In one issue of Young Justice </ , Robin mentions he was able to bury the expense of producing and shipping a Batmobile across the country in "the Batarang budget".

In American Graffiti </ , Toad tries to purchase alcohol without an ID, so he tries to hide it with some other items.

In Big Blonde </ the protagonist plans on killing herself with bottle of veronal. She buys it but also buys some make-up to make it seem less suspicious, however she notes that the cashier doesn't seem to care either way.

In the Dexter and purchases life vests along with the tools. When asked, he says, "We can't exactly load up the cart with axes and machetes, now can we?"

MAD Magazine </ had an article about an honestly-labeled video store, and one of the categories was "Diversionary rentals to put on top of the six porn tapes you're slinking around with so the cashier won't think you're a total sleaze"

In The Navy Lark </ , C.P.O. Pertwee has to get Number One a luxury chair that he really isn't entitled to, and decides the best way to do it is by indenting for a large quantity of them because the only time he indents for a single anything is when it is a battleship. Ultimately it fails because everyone else up the supply chain has the same idea, and by time the request reaches the naval supplier it has multiplied into every single luxury chair in the Royal Navy.

From Spoony's review of Sewer Shark</ :

In Hey Arnold! </ Season 1 "Helga's Makeover", when Helga wants to show that she's feminine to attend Rhonda's slumber party, she goes to a corner store to buy a preteen beauty magazine for makeover tips, along with other magazines to cover it up. Unfortunately, the cashier has trouble scanning the beauty magazine and shouts to her co-worker asking for the price for it while describing the magazine, which gets the attention of all shoppers. Helga quickly pays for all the magazines and then runs out the store embarrassed.

Variant example from Real Life . Criminals sending letterbombs tend to use stamps to avoid a paper trail at a post office and often put more stamps on than are required to avoid any chance of the package being held due to insufficient postage. Postal and security staff are trained to look for this as a possible indicator of a suspect package.

Not all heroes are fearless. Some of them are characterized by nervousness, timidity, reluctance to go anywhere near danger — all the hallmarks of a coward. Yet when push comes to shove, they will always be right there in the thick of the action, doing whatever it takes to accomplish their objective and get themselves and their teammates out alive. In other words, not</ a Dirty Coward or Accidental Hero Unlike Took a Level in Badass , these characters don't get over their fearful ways after a single moment of glory. They remain scaredy-cats and/or insecure in their regular lives despite the fact that they can kick major ass when they put their minds into it. Many of them will tell everyone to Think Nothing of It , because they think the fear they felt trumps the heroism they performed. These characters may also be Combat Pragmatists who get the job done by using brains rather than brawn when they go up against enemies that outclass them and they know they'll get killed if they just charge in and attack. Typically, his closest friends know exactly what he is capable of and know they can depend on him in crises, with a little prompting of course Usually, inverse of Miles Gloriosus . Unlike The So-Called Coward , this character is not actually misunderstood and does not need to be viewed by other characters as cowardly; it is his own opinion that matters. (And the so-called coward may be perfectly confident in his own courage.) Unlike the Accidental Hero , the examples in this trope are characters that manage to get things done with their

own worth, despite their fears Contrast the Fearless Fool — especially when it is invoked to encourage him. Prone to Heroic Self-Deprecation and Face Your Fears . See also Lovable Coward . One possible way to describe a Weak, but Skilled Paper Tiger . Not unusual for this character to be a Stone Wall . Compare Heroic Neutral One of the major subtropes of the Classical Antihero In King Kong (2005) </, Bruce Baxter abandons the rescue mission, claiming that they're going to die and all but calling himself a coward. This doesn't prevent him from returning Just in Time to rescue the rescuers, in a Big Damn Heroes moment that would give Han Solo a run for his money

This is when the media reports blatantly incorrect facts about a creative work that any fan or — in the most egregious cases — even just someone with any kind of passing knowledge of said work would know to be wrong. It seems like some people just can't be bothered to do any fact-checking. Let's face it — sometimes, it's easy to do. But what about the news? Newspapers, a News Broadcast , national news, etc.? It is in their job description to do at least some</ research, to make sure they aren't stating factual untruths This rule apparently doesn't apply much to works of fiction. Maybe the news media doesn't seem to care as much about it in question as about whatever effect it had. But that's no reason to make an error that could have been avoided by looking into the material a bit, especially if said error involves serious accusations like blaming a child's death on imitating something they saw on TV. This often results in examples either factually incorrect, from minor to grossly wrong like the Trope Namer itself , or taking some "facts" from The Theme Park Version of a larger entity, which to some is much worse than just not doing the research Subtrope of "Common Knowledge" . Compare Complaining About Shows You Don't Watch . See also Fandom-Enraging Misconception (when it's the fans</ who get the names wrong), Animation Age Ghetto (when people dismiss various kinds of cartoons as family-friendly when they, in fact, are anything but) and All Anime Is Naughty Tentacles (a problem endemic to Anime and Manga). I Am Not Shazam is a key trope involved. Also compare Dan Browned , the version for fictional</ works. Also see New Media Are Evil , though if you find yourself constantly annoyed by this kind of thing then you probably believe Old Media Are Evil . May also overlap with a Shallow Parody if the parodists in question are really careless with their research. This is basically the Real Life version of Critical Research Failure

He's a loose cannon, but </DAMMIT he's the best we have!</ Sure, our society may be built upon rules and procedures, but they usually make for bad television. Sometimes you have to bend the rules, rough up the suspects , moon your supervisors and shred the Constitution to get stuff done. A Cowboy Cop may be an Anti-Hero (or an occasional Byronic Hero) if he is the protagonist of the show, typically Hot-Blooded and passionate about his maverick antics, or a Jerk with a Heart of Gold whose unlikely claims will generally be proven correct . However, in shows that feature cops as secondary characters, the Cowboy Cop is often at odds with the main characters, as he will trample all over the crime scene and/or

the suspect's rights. If Da Chief is a Cowboy Cop he would often reprimand the naive upstart who is being too soft with the criminals and will gladly let the loose cannons go in shooting first and asking questions later. He will usually be a detective, as a beat cop is much less likely to be intimately involved in a case's full duration. In a SWAT Team type situation where the cops are expected to shoot to kill, he does not care about human shields or property damage and will more often than not almost level the place to take down the suspects (especially</ with a car or truck), with extreme lethal force. Cowboy Cops are almost always asked to Turn in Your Badge by Da Chief , at which point they usually become a Vigilante Man in regards to whatever bad guy they are after for either the rest of the movie or until they get their badge back. As a result of his flagrant rule-breaking, Internal Affairs hates</ the Cowboy Cop with a passion. Often policemen who oppose the Cowboy Cop are revealed to be Dirty Cops , scared that he's going to shake up the system they've worked so hard to manipulate in their favor. As part of being unorthodox, the Cowboy Cop often has at least one contact on the street to feed him information that can't be obtained through an official channels. Just as with cowboy sheriffs in the old west, cowboy cops rarely show any remorse for using lethal force. First kill scenarios are rarely depicted; these guys (and occasionally gals) have usually filled whole cemeteries to capacity before we meet them for the first time. Being a Cowboy Cop may be just be backstory — the character might make the transition to another field such as being a federal officer, a Man in Black or a Deep Cover Agent , where their methods might fit in a little better. May often be the recipient of Arson, Murder, and Lifesaving . The Trope Namer for "Cowboy Cop" is Beverly Hills Cop </ (1984), then the term was popularized by Die Hard </ (1988). Compare Bunny-Ears Lawyer . Contrast By-the-Book Cop . Compare and</ contrast Dirty Cop and Rabid Cop . While a Cowboy Cop is generally more well-intentioned than a Dirty Cop, more deconstructive works will concede that they both show equal scorn for necessary regulations; meanwhile a Rabid Cop is a Cowboy who's lost all sense of perspective and morality. For the military version, see Military Maverick . Old-Fashioned Copper is the specifically British subtrope. For a policeman involved with literal Wild West cowboys, see The Sheriff . Be aware: pretty much everyone hates cowboy cops in Real Life . They don't solve cases, they cause cases to collapse in court, vital evidence to be ruled inadmissible, compromise investigations and in worse case scenarios get people killed.</

CPR is an emergency first aid protocol performed on an unconscious person in whom normal breathing cannot be detected. It's characterized by someone pressing rhythmically against a victim's chest and occasionally blowing air into the victim's mouth. In Real Life , CPR stands for its success rate: less than 10%. On TV, though, CPR stands for "clean, pretty, and reliable": This is a sub-trope of Worst Aid and sister trope to the Magical Defibrillator , another medical technique that works very differently on TV than it does in Real Life . A specific subtrope is Heart in the Wrong Place , which shows CPR given with the compressions too far to the left. For an equally clean, pretty, and reliable healing technique, see Psychic Surgery . For more information about CPR in Real Life , see the Useful Notes page . (That page is not meant to be a guide for how to actually perform CPR in real life; if someone near you actually

needs CPR, call emergency services instead.) Finally, as this trope involves dying characters,

Aging is one of those things that happens to us all (at least in universes where the aging process hasn't been defeated in some way). As people (and other creatures) get older, their joints begin to crack and pop, despite their best efforts. Sometimes this is painful; sometimes it also prevents the crack-ee from being able to move. Arthritis and Rheumatism set in. You get the picture. It can even start as early as middle age when a person still looks</ young and hale, but finds they're not as young as they used to be when they try to act as young as they feel. It's often an old person just trying to stand up or do something ordinary, emphasizing the creaky, fragile state of an elderly body. Oddly enough, in fictional media, this situation is frequently Played for Laughs , making this a very specific type of amusing injury . The most commonly shouted phrase after the crack is "Oh, my back!" but the trope itself isn't confined solely to spinal-lumbar complaints and can happen with any body part, bone or joint. Occasionally, this will even happen with younger characters if they move in very awkward positions. Variations include: May be a sign that said character is Feeling Their Age and/or Dented Iron . Compare and contrast with Knuckle Cracking , in which a character cracks their knuckles audibly to intimidate or scare.

A Sub-Trope of Disposing of a Body , this trope involves hiding a body in a coffin that is already scheduled to be buried or cremated. This can be done with the connivance of a crooked funeral director or, for the more desperate or less organised, by breaking into a funeral home the night before a funeral If it is done by a crooked funeral director, then the concealment may involve a false bottom in the coffin. Otherwise, the second corpse will just be shoved under the first and the lid screwed back down In fiction, at least, this ploy will usually be discovered when the pallbearers drop the coffin due to the extra weight, and two bodies spill out A variation involves burying a body in the bottom of a newly dug grave, so a coffin will be placed on top of the corpse and the grave filled in Contrast Together in Death , where lovers in life get buried together after they die. A sister trope is Coffin Contraband , where something other than a body is hidden in a coffin. Bodybag Trick is when a coffin is used to smuggle a living body

Compare Hollow-Sounding Head and Stomach of Holding . A Sub-Trope Cois Your Head Asplode , where the head only opens in anger ntrast CoHead Hat

Hats, caps, hoods, crowns, tiaras, headbands, helmets, and all the other things that cover at least part of your head Contrast These Tropes Are Made for Walking (if you count feet as opposite of the head)

What's more fun than a carnival? It's got rides and games, frequently travels (though some don't, such as those of Coney Island), and is known for sideshows containing smaller acts than a circus (freaks, contortionists, and cabinets of curiosities).

However, in some fiction they're cheap, bad ripoffs. The rides break, the games are rigged against you, and the magic acts are dishonest. The workers are creepy "carnies", too. These aren't places to have fun, they're only there to rip you off, not provide decent entertainment If the carnival is just a civic event and not a traveling show, expect it to be even crappier. Stalls serving unhealthy and/or disgusting food; bazaar tents selling cheap, ugly (often homemade) merchandise; either oldies music or some street musicians playing in the background; bored people milling about mindlessly; and few actual amusements other than really lame ones (a face-painting booth, maybe). Only yokel tourists, dateless losers , and the very poor will be caught dead at such an event Sadly enough, genuinely fun carnivals are not often seen in fiction anymore except in period pieces. These carnivals, while no more thrilling than their modern counterparts, are a lot more charming, often with Gay Nineties garniture, and wholesome diversion for children, their families, and cute couples on dates. Expect to see people leaving the grounds with cotton candy or gigantic stuffed animals Related to Souvenir Land , but distinct in that this isn't asking for you to buy their merchandise. This carnival is too crappy to be a pastiche of Disneyland. Darker versions are Amusement Park of Doom and Circus of Fear . Compare with Suck E. Cheese's , which also boasts disappointment and creepiness in equal amounts

A setting which, at first sight, looks</ nice and cute. The world is full of cheery colors, people are smiling, happy and helpful, and you're probably thinking you've just stepped into a Sugar Bowl that seriously Tastes Like Diabetes . Suddenly, you notice something wrong</, and upon investigating, you realize that every single thing</ below the surface is horribly wrong and dysfunctional</. Maybe the society is Powered by a Forsaken Child . Maybe the cheeriness is maintained by totalitarian rulers that dole out horrible punishments for the slightest infractions . Maybe the bright and shiny part isn't the only part, and the more traditional Crapsack World is kept hidden from the public eye. Maybe people who ask too many questions or don't meet the standards the society pushes for suffer unfortunate accidents , or disappear, or are labled as criminals. Maybe it's just a manufactured atmosphere , full of nice-looking but fake towns and cities , or even a manufactured reality . Basically, this is a Stepford Smiler on the scale of an entire setting, where behind the bright, cheery and colorful appearance, it's really a Crapsack World Compare with False Utopia , when one of the main points of the story is the contrast of how perfect the world looks and how imperfect it truly is, Gilded Cage , Peace & Love, Incorporated , Light Is Not Good , Stepford Suburbia , Techno Dystopia , and Town with a Dark Secret . Often involves Fridge Horror , Sugar Apocalypse , Grotesque Cute , Dangerously Garish Environment , and Glurge as well as Sunshine Noir . A Type B cynical portrayal of The Promised Land that isn't a used-up and barren wasteland is likely to be one of these If the seemingly perfect world is a full-on illusion, created to entrap or otherwise fool someone, then it is a Lotus-Eater Machine See also City in a Bottle , where Crystal Spires and Togas meets Government Conspiracy , Soiled City on a Hill , which can be a former Shining City that retains its shiny exterior even though its heart has become corrupt and rotten, and Vice City , a city whose have already been overrun by

criminals and other serious issues under its face value of being a Shining City . Urban Segregation can result in this if the viewer is initially shown only the utopian parts of the setting. A child-oriented Adventure-Friendly World or a City of Adventure is prone to being this, so does Graffiti Town Contrast with Sugar Bowl , the (usually) non-ironic version of this trope. Compare and contrast Vile Villain, Saccharine Show and the similar Uncanny Village wherein a world becomes a perfectly ordinary Sugar Bowl if its horrifying villain were removed, whereas a Crapsaccharine World is fundamentally rotten to the core. The two can overlap, however, if the villain is bad enough to make their world look good in comparison. Contrast People's Republic of Tyranny , Fauxtivational Poster , A World Half Full , where it looks like a Crapsack World , but it can</ get better, and Heel-Face Town , where the town (or city) is a Shining City which was reconstructed from a Crapsaccharine World. Happiness Is Mandatory can be this, but often fails to create even a pleasant veneer over things Note that this trope is about a setting. If the art style clashes with the mood of the work, that is Art-Style Dissonance instead

A Crapsack World is a horrible setting where the jaded notion of " anything that can go wrong will go horribly, horribly</ wrong" almost always applies, and it corrupts its inhabitants into perpetuating that nastiness against each other . More succinctly, trying to survive in one of these places is gonna suck . Although there are countless ways Crapsack Worlds can be depicted (often with Scenery Gorn), it is usually dark , and on the cynical end of the Sliding Scale of Idealism vs. Cynicism , so it will have either Grey-and-Gray Morality or Black-and-Gray Morality , if not outright Evil vs. Evil in the worst of cases (beware of Too Bleak, Stopped Caring if you decide to go this route though). Settings like these are not kind at all to idealists , who usually get traumatized and/or die horribly when their attempts to change the world through idealism meet tragic ends. Heroes in this setting are usually Anti Heroes , and often have at least a bit of the Deadpan Snarker about them. Being good will suck , and if there are genuinely good heroes in this setting, expect them to be Knights In Sour Armor and/or Hurting Heroes —more idealistic heroes such as the Knight in Shining Armor tend to not last long in this kind of setting. Any victories they manage to win over the forces of this world are likely to be Pyrrhic in nature. Villains tend to run the gamut from sympathetic Anti Villains (on any level of the Sliding Scale of Anti-Villains) right down to the most horrific monsters to grace any kind of media. Truly awful villains are especially common in these kinds of settings, both to represent the misery of the setting in general and to give the Anti-Hero someone to whom he can look good in comparison. In truly extreme cases, even the most popular or powerful of these monsters suffer just as badly as everyone else . And Anyone Can Die . From here, these worlds can be depicted by authors in various ways, whether it would be dramatic or comedic, immutable or mutable. Though most of the time immutable equals dramatic, it is possible to see combinations between these categories. A dramatic </ Crapsack World has plenty of angst to go around, and often makes Woobies out of its sympathetic cast, particularly the protagonist, as they suffer horribly in their attempts to do the right thing or pursue their dreams. Expect characters who do the right thing to suffer for it . Expect characters who do the wrong thing to prosper...

and then </ suffer . Examples: New World of Darkness </, Old World of Darkness </, Sin City </, and Neon Genesis Evangelion </ . This kind of world often occurs After the End . Wretched Hive and City Noir are city-sized versions of the Crapsack World. A Dystopia is a speculative Crapsack World ruled by repressive forces modeled after real-life politics. A Teenage Wasteland is a Crapsack World run by kids. If the Crapsack World's continued misery is caused by supernatural forces, see Dark Fantasy , Hell on Earth or Cosmic Horror Story . If a Sugar Bowl (usually the antithesis of this trope) turns out to be one of these under the surface, then you have yourself a Crapsaccharine World . If the people who live in the Crapsack World don't realise or pretend it isn't a horrible place to be in, it is a False Utopia . A Villain World or Death World is likely to be this, and Bad Future is a Sub-Trope . Someone who just thinks the world they inhabit is this is a Cynic or a Straw Nihilist (or a Grumpy Bear , if he lives in a pretty nice world). For worlds that are almost literal sacks of crap see The Dung Ages . See You Would Not Want to Live in Dex for other crapsack environments, and (on a less negative note) the World of Badass which is also likely to have elements of the Crapsack World, to give justification on why kicking ass is very important to survival. Compare World of Jerkass , a world which is only unpleasant because all of the characters are horrible people. This trope is also known as World Half Empty, for the expression of pessimism being a state of seeing a glass with half the amount of water in it as being "half empty". Also, a half-empty glass means it can only be emptied, and can't be refilled. It represents hopelessness and inevitable doom , fitting this trope perfectly. By definition, contrast A World Half Full . C.T. Phipps talks about some of the appeal to the concept here. No Real Life Examples, Please! This is not a subjective trope; this is a metaphysical trope that's clearly defined by the writer, not an opinion by people complaining about the world as a whole (localized places that very horrible in Real Life should perhaps go to Wretched Hive and other non-metaphysical tropes instead). </

For whatever reason, our young male protagonist is in the middle of a chase scene or bar brawl and crashes straight into a room full of beautiful young women. Depending on the setting, this could be an Arabian Nights </-style harem , a bordello, or a girls' locker room, but it will be a private place containing several young women, usually in some state of undress. Expect there to be lots of silk curtains and maybe a bath or shower. They may act offended (going so far as to go after the young male protagonist for intruding or just scream at him and throw stuff) or they may giggle and even flirt with the hero... until their dour chaperone shoves him back into the fray. Sometimes, the young male protagonist may hide out in the harem, bordello, or girls' locker/shower room in order to escape whoever's chasing him, often dressed in drag, posing as a chaperone/eunuch/locker room guard, or disappearing into a locker, curtained-off room, or in a vent May overlap with Distracted by the Sexy , Accidental Pervert or both. Can lead to a Crash-Into Hello . For when it's only one girl in a state of undress, see Naked First Impression . May also overlap with Naked People Are Funny and Moment Killer

A variety of Meet Cute : A bad first impression wherein a character in a hurry or simply not paying attention runs into another character as their first meeting, often done while Late for School

Sometimes the inattentive/hurrying character apologizes for doing so, but the other character shrugs it off with some snarky comment. After all, it could be worse . Far worse . With the latter situations, this usually starts a small animosity but is a nice guarantee to the audience that they'll get together by the end of the show If there is no animosity involved, this kind of situation is perfect for a Love at First Sight scenario If both parties are sufficiently inattentive, they wind up piled one on top of the other on the ground in a position easily mistaken for extreme passion. After a beat, the two will wind up in an Instant Seiza position, facing away from one another and blushing furiously. One party could also be mistaken for a pervert . This is a favored pickup tactic of Cute Clumsy Girls . Or it might give a more sweet atmosphere A sweeter method is for one character to drop a pile of things, and the characters's eyes to meet as the other one gives them a hand picking things up Compare Watch Where You're Going! , Suggestive Collision and Funbag Airbag , Living Crashpad . This is, of course, a kind of Dynamic Entry . May be a ruse by a Percussive Pickpocket . May be caused by Crashing Through the Harem

Found on 24-Hour News Networks , such as CNN , this line of scrolling text provides viewers with the headlines while they are watching a report on, say, tax evasion. Also called a . Any spoof of a news report is almost guaranteed to have a silly headlines populating this bar for the entire time for bonus jokes, which often requires one to rewatch the scene twice to catch everything. Said headlines may or may not be about a Noodle Incident While these seem fairly ubiquitous now, the idea of a 24-hour news crawl on the screen didn't become popular with many television news networks until after September 11th, 2001. Prior to this, a few networks did run constant crawls, but mostly with stock information, sports scores, or weather updates Not to be confused with Dungeon Crawl </, the video game Crawl </, the 2019 film Crawl </ or Dungeon Crawling . Almost always either a Funny Background Event or a Meaningful Background Event

Characters from a foreign culture compare (and contrast) their everyday habits and social rituals with the corresponding behavior of the host society The outsider is usually a Funny Foreigner from Cloud Cuckooland or an Amusing Alien . Odd courtship customs or mating rituals are a popular topic, especially for otherworldly beings and their Bizarre Alien Biology . For awkward handshake/greeting actions see Cross-Cultural Handshake

In real life, when someone is in serious trouble, they, even on the fly, have to think of a logical, sensible, and reasonable strategy that can get them out of it with as little loss as possible and in the best conditions possible. In movies, the characters can make the most irrational, nonsensical, or plain dumb decisions, and it works! Why? Because it's Crazy Enough To Work, that's why. Sometimes characters will even credit it to</ it being crazy (enough to work) A possible example would be something along the lines of "What about patching up the nuclear reactor with a pack of gum and peeing on the fire from the top of the reactor? That's so crazy, it just might work!" Although heroes of every genre will come up with these, expect a lot of them from Badass Unintentionals , since they lack the

knowledge , strength, and sometimes even the courage to come up with a better idea. Lampshaded frequently enough that it's become a Stock Phrase (especially if one of the characters is Genre Savvy — it's not uncommon for In-Universe media to have a love for this kind of thing). Routinely pulled off by Cloud Cuckoolander characters. Compare Million-to-One Chance ; the less probable a plan is to work, the more likely it will succeed in Hollywood conditions. See also It Runs on Nonsensoleum and Refuge in Audacity (which run on a similar premise) and It Will Never Catch On (which is a specific type of joke that invokes a similar reaction in the audience). See also Actually a Good Idea when people acknowledge its effectiveness and Confusion Fu for people who weaponize this trope.

Meet the Spear Counterpart to the Clingy Jealous Girl . Combining the Deadly Sins of Envy and Wrath, nothing pushes his Berserk Button faster than seeing someone else look at his Love Interest (or worse, seeing his Love Interest look at someone else) Naturally , this is often handled differently than the Clingy Jealous Girl . An irrationally jealous female partner is often used as an element of comedy, treated as "normal" or more inherently justified or sympathetic behavior for a woman, whereas the irrationally jealous male partner is more likely to be treated as if he has a serious flaw: he's portrayed less sympathetically, criticized more harshly by fans, less frequently played for comedy, and has a higher tendency to either rape the girl he's in love with or Murder the Hypotenuse , rather than drag the object of their affections away by the ear or pummel them into space with a Hyperspace Mallet . Interestingly, though, at the far end of jealous insanity, the Yandere is far more often female However, a guy obviously acting paranoid in a situation where there's no reason for him to be jealous, especially as a Running Gag , makes for comedic gold. As long as the comedy comes from making the guy look like a fool and not from making his partner suffer, it's okay (though the latter being funny isn't statistically impossible) Of course, all bets are off when this trope is mixed with the Boys' Love or Ho Yay , which is certainly not all that rare; in fact, the biggest Played for Laughs examples tend to come from this field May double as a Stalker with a Crush or Prince Charming Wannabe . Compare Friend Versus Lover for another strained triangular constellation

Simply put, a character is excessively</ prepared for a scenario, no matter how unlikely. This trope is for you if you always have on hand what it takes to MacGyver your way out of a tight spot, or have your large, impressive gun rack all sorted by varmint size, and are Genre Savvy enough to prepare for every unlikely trope, See also:</ Police Code for Everything , Properly Paranoid , Suddenly Always Knew That , You Didn't Ask , Unspoken Plan Guarantee , Batman Gambit , Hidden Supplies , Survivalist Stash , Seen It All , Wall of Weapons , and Crazy Survivalist . Also compare The Anticipator , who manages to remain unsurprised despite lack of preparation. Contrast Forgot to Feed the Monster . Trust Password is a Sub-Trope . If programmers try to anticipate everything the user might do, then it's Developers' Foresight .

A creation myth is a supernatural mytho-religious story or

explanation that describes the beginnings of humanity, the Earth (see Genesis Effect), life, and the universe (cosmogony), usually as a deliberate act of "creation" by one or more deities. It may also include the creation of one or more deities (theogony), either before or after the cosmogony Many creation myths share broadly similar themes. Common motifs include the fractionation of the things of the world from a Primordial Chaos ; the separation of the mother and father gods; land emerging from an infinite and timeless ocean; everything coming from a Cosmic Egg , or creation ex nihilo (Latin: out of nothing) Since this is a very common trope in ancient mythologies, it is Older Than Dirt Creation myths are often used by modern writers to help give depth to their fictional world or mythologies. Mythopoeia almost inevitably includes a creation myth Compare Creation Story , where characters of the story are involved as creators or witnesses. See also Caused the Big Bang

There's nothing like creating something, as storytellers should know. So it's no surprise it shows up in many tropes Like these, for example Artificial Humans : A human being who was created artificially rather than born naturally

Often given as the public reason for a performer's decision to leave a TV series or musical group. Usage: "Joe Smith left the cast of Murder on Cliche Street</ this season over creative differences with the production team." When they actually mean it, it refers to irreconcilably different artistic visions for the show or band. But nine times out of ten, it really</ means the person quit or got fired due to personal clashes and the PR team is trying their best to sugarcoat it for the media. At least, until the tell-all book comes out, or the social media blowup occurs. Also anytime someone mentions "scheduling conflicts", it likely means there's been a conflict between the director and producers or studio. Then the director quits or is fired. If there's only one constant member and a steady flow of departures and inductions, this is usually an indication of a Prima Donna Director at the very least and is also usually a sign that the lone holdout is a total diva who doesn't know how to share the spotlight . If the reverse is true and one person gets fired from everything they're involved in (or quits under contentious circumstances), odds are that they absolutely suck to work with and wear out their welcome in short order. A frequent joke that's made by observers in this situation is that the creative differences were simple: Either "She/he was creative, the [producers/rest of the band] weren't." or "[They] wanted to be creative, She/he wanted to be different.", depending on who is felt to be the more talented party A common factor behind Revolving Door Bands .

What Measure Is a Non-Super? We can't fly , we can't shoot fireballs out of our nostrils , and we live pitifully short lives . Those Sufficiently Advanced Aliens , vampires, or cyber-humans are so far above us in every respect we should just accept them as a Benevolent Alien Invasion . And yet every non-human and supernatural creepy-crawly without its head up its butt envies us and wants to be like us . Why? Because we can create. Despite our flaws , Humans Are Special for some reason, and only an unaltered human body, soul or mind has the unique ability to create things that supernaturals seem to lack. For some reason Cybernetics Eat Your Soul , vampirism drains your humanity or being soulless means you're dead inside. Oh

sure, a vampire scientist might make great discoveries, but all of them will be of the Science Is Bad variety whether he likes it or not. A robot can't paint or write a sonnet, and even Elves can't seem to make anything that has a deeper meaning behind the generic beauty they're so good at. For some reason, a non-human's work is stale, at best a repetition of more creative, emotive, and insightful peers. This can be an overt or subtle cue that we're dealing with beings that are Not Even Human . Depending on how it's played in context, it can be used as a negative trait to balance out a race much superior to humans , which does not make them any better or worse than us, just different. It can also lead to Cultural Posturing on the part of the humans, as the page quote shows, or in more extreme cases serve as an excuse to feel indifferent towards killing them . After all, anything incapable of creative endeavors can't be human and is therefore fine to kill. This can have interesting ramifications in a plot. They might seek to become human by learning to feel or even transforming themselves physically , hoping The Mind Is a Plaything of the Body which will allow them to understand us. It may be cultural: enough exposure to humanity may well "cure" them , though any of them who resist this change and want to stay uncreative are likely to be Obviously Evil . It can also lead to more frightening efforts at stealing</ that which they lack from us—whether it is in the form of " Creative Energy ", souls, wombs , or slaves. In this case, Evil Cannot Comprehend Good and their sterility is self-perpetuating. If (when) anyone brings up that average humans can be biologically sterile or have little to no "artistic talent" the normal response is either: they get ignored , point that in comparison humans produce over hundreds of millions of works while the race total work is 0, or point that this is because humans are, in comparison to other races, total wackos . After all, anyone who had visited Myspace or FreeJournal can attest to the insane... "imagination" of the average Joe/Jane. A common variant outside of the development of artificially or supernaturally prolonged life concerns the differences between men and woman, in which it will be observed that, in going through pregnancy and giving birth, a woman is capable of creating life — perhaps the ultimate form and union of both creativity and fertility — whereas a man can not It is often suggested that men are thus capable only of destroying, not creating, as a way of attempting to compensate for this lack of creativity. This is often used as a way of arguing or justifying why women are inherently better than men , although it can also be used to indicate that the woman in question making this argument is a deluded Straw Feminist capable only of seeing the worst in men. Furthermore, while men do not actually carry the baby, they do in fact play a fairly important role in conception... something which is rarely mentioned either way. Compare Medieval Stasis , where elves, aliens, demons and other immortal races far older than humans typically have technology comparable or only slightly more advanced than humans. The most common explanations given, if any are, is either that the other species is creatively stagnant or that they've hit an upper technological limit and it's impossible to advance farther (The Singularity notwithstanding). If an entire race has stagnated culturally, they may become a Dying Race — or the fact that they are dying may be the cause of the stagnation. Contrast Deaf Composer , who can still</ (probably) create despite lacking a necessary sense, Grew Beyond Their Programming , when a robot evolves free will, and Alien Arts Are Appreciated , for when these other beings can</ get creative. See also Imagination Destroyer , which has this trope as the end goal.

It's not just about the creator. This index archives all the ways in which producers, executives, advertisers, editors, and fans hold sway over the creative process.

Fandom is an interesting entity. Nobody can quite tell how people will react to anything, making the creation of a popular work a crapshoot. However, it's assumed that most creators hold an equal or greater amount of affection for their work than their fans. After all, they had to actually make it in the first place. So obviously, anything that's popular must be something the creator likes, right? Not quite. See, the creators are people too, and even if they're the origin of a particular work, that doesn't stop them from holding a negative opinion about it. This is what is referred to as creator backlash. It's the most high profile form of hatedom possible, since it's the very creator(s) of the work denouncing it. As they bring up their feelings of hatred for their work in interviews, public forums, and their other creations, it brings a certain amount of discord into being a fan when the very source has denounced it. It might even trigger feelings of betrayal, or resentment that the author has (apparently) become a holier-than-thou hypocrite. It can take on many forms and for many reasons. Many creators feel their work has been ruined by executive meddling . Perhaps the creator didn't really intend for it to become so popular, only making it to pay the bills and fund their more serious work (perhaps even getting forced into continuing it). Perhaps people completely miss the point . Perhaps it has them typecast to a sickening level . Perhaps the project that he puts a lot of effort on gets pathetic reactions from fans . Perhaps they were going through a rough time while making it . Perhaps they thought it was great at the time but, in hindsight and with a more "mature" perspective, think otherwise. Perhaps it has become their only work that is generally known, casting them as a " One-Hit Wonder " in the eyes of the majority. Maybe they thought they could have done better. Maybe they begin to think The World Is Not Ready . Perhaps it's all of the above . It is quite common for creators who start early to simply grow out of their early work. Added to which is the common artistic trait of always wanting to move on: the criticism is just an expression of boredom; been there, done that. Or perhaps they just really do hate the work they created after all this time; maybe their personality (or the effect the work has on today's society) really has changed that much. The reasons are as myriad as the reasons a fan might choose to like their work in the first place. Not all creator backlash is permanent, though. They can just as easily choose to later embrace their work when they get over whatever was troubling them in the first place. This seems to be quite rare, however. When it does happen, it usually seems to occur after a lengthy period of time has passed between appearing on the show and the present. And, of course, no matter how bad the backlash is, the artists rarely return any of the cash they've made from a work. Compare Old Shame (where the work in question neither caught on nor has many redeeming qualities in the first place), compare and contrast Bleached Underpants (where the work in question has questionable </ history which its creators would like to dispose of) and see also Magnum Opus Dissonance and Disowned Adaptation . Overlaps with Canon Discontinuity if the creator removes a disliked work from the series canon entirely. Not be confused with Creator Breakdown or Artist Disillusionment , though they can definitely overlap with this. Artist disillusionment is against fans while this

is against works. And definitely not</ to be confused with creators getting their backs lashed. This can sometimes result in creators going uncredited for their part in the work, with some going as far as removing their name from the credits .

Sometimes, you just have a bad day The people who tell stories are just like anyone else. The difference, though, is that if something in their life goes all wahoonie-shaped , they have someone to take it out on — the fictional characters that inhabit their created worlds. Thus, you occasionally end up with a story taking a sharp left turn into the author's psyche. Characters can die left and right , the teenaged hero's schoolteacher will be a sadistic tormentor , and no one's love life has any chance of turning out well That being said, though, this doesn't necessarily make the show bad</; some shows have achieved their highest ratings and even Grown the Beard in the middle of a bout of Creator Breakdown, and it would be hard to argue that angst can't help you make some really good art. People who have something to work out through their creativity also tend to put a lot of effort into making it good, especially if it's concerning something important or special to them. See also Reality Subtext . However, do</ look out for the Writer on Board ; it can also lead to an overload of Wangst , Deus Angst Machina , Issue Drift , or Too Bleak, Stopped Caring if the creator is really</ determined to make their creation suffer in their name. The most volatile demonstrations of the Second Law of Metafictional Thermodynamics arise from a Creator Breakdown A Creator Breakdown may also be the underlying cause of a Schedule Slip or an Orphaned Series . If the author has enough rights over the distribution of the work, more serious instances of this may result in a temporary or even permanent case of Keep Circulating the Tapes . This is very</ common among independently produced Web Original works Contrast with Died During Production where the creator of a work just dies, leaving a work in an incomplete state. Of course, they can overlap if the creator was Driven to Suicide . If this happens to an in-universe</ Creator, see Mad God Please note, however, that it's hard to tell when Creator Breakdown is happening, this means that if it's a case of Genre Shift for some artistic reason; you shouldn't put an example here unless</ you have word from either the mouth of the creator themselves or from someone who knew them well . That said.. When an author simply rebels against a work that he's dissatisfied with, it's Creator Backlash . While this is trivia it may be accompanied by the Author Avatar trope if the author uses a character to write the situation into the story or reflect on it Oh, and yes, a particularly</ bad Creator Breakdown usually means that the series will get torn apart piece by piece , often along with the author's reputation . See Prima Donna Director when a director who always behaves in an eccentric way The Opposite Trope to this one is Creator Recovery , in which a creator's newfound happiness positively influences their subsequent work. See also Author Phobia when a creator's fears influence the work. An in-universe version of this usually involves the character being Too Upset to Create

One popular form of The Cameo is to have a franchise's creator, or a film's director or producer, appear in the franchise itself Similar to Author Avatar , but an Author Avatar is a creator appearing as more or less themselves, as opposed to a cameo as

someone else. Many comics will have either their original creators or the artists of the current Comic Book Run drawn in as background characters, although they rarely have dialogue. In video games, very likely to appear in any Developer's Room May lead to Death by Cameo . When the creator plays the part of an actual character rather than a simple cameo, they're a Descended Creator . See also Insert Cameo

The author wants to portray their character as a loser but doesn't want to offend people in any particular occupation. So they make the character's occupation their own. This allows for a lot of Self-Deprecation , which is probably the whole point. It also means that the parody will be much better informed than one from someone who knows less about the profession - being on the inside means they include anecdotes and details that other scientists or teachers or priests or whatever will find greater recognition and (hopefully) humour in The loser cartoonist can't draw , the writer has an obviously Mary-Sue version of him/herself , or some other type of Stylistic Suck . These characters may also be prone to extreme Writer's Block , which can justify the times that they aren't working/don't have a job This be where a character's career is the same as the author</ of the work. A hack novelist main character in a novel would be an example, but a hack novelist in an animated show or a cartoonist in a novel would not be Compare Acceptable Targets , Self-Deprecation , Write What You Know , and especially Writers Suck

People who are creators, whether it be music, film, TV or whatever, are human, and most humans meet their partner through work. This means they will at some point inevitably end up in a romantic relationship with — or sometimes get married to — someone in their creative business. Sadly, these boyfriends/husbands/girlfriends/wives (the latter two are more common for some reason) will sometimes attract that insidious form of Die for Our Ship Fan Dumbness known as Yoko Oh No . And then there's the dreaded Couple Bomb A Creator Couple, on the other hand, is the nice, happy opposite to the Yoko Oh No — a trope for the times the opposite happens, when said love interest has something good to contribute to the entertainer's work, and sometimes becomes a key part of said work (but this is not strictly necessary all of the time for the trope), said love interest has his/her own talents and isn't just a useless Dungeonmaster's Girlfriend , and cooler heads prevail and the fandom embraces said love interest without the whole Die for Our Ship bitching. One major downside to this arrangement is that if the couple's romantic relationship ends, the professional relationship usually dies along with it, though there are some exceptions

A Creator Killer is a rather unpredictable phenomenon when one or more works flop badly enough to take down or badly damage the publishers, the reputation of creative talents behind it, or both. Though there are usually many factors needed to cause the death of a publisher or a creator, some high-profile flops are linked (rightfully or not) to the death of the organization working on it. They will Never Live It Down Compare Genre-Killer and Franchise

Killer . Not to be confused with Died During Production where the creator dies before their work is completed, Rage Against the Author or The Fourth Wall Will Not Protect You , where the creator can be literally</ killed by his or her work. See Star-Derailing Role when it happens to the performers. See Old Shame for an old work which a creator turns against later (or refuses to let see the light of day), but which by itself probably won't destroy their credibility. See Tough Act to Follow when one's career was not killed by a flop but the inability to follow-up a massive success. A Role-Ending Misdemeanor is when this trope is caused by personal scandal rather than a failed work. Contrast Breakthrough Hit (when the work makes the creator a big name) and Career Resurrection and Win Back the Crowd (when the work makes the creator a big name again after a Creator Killer). For understandable reasons, many of these overlap with Troubled Production . If it literally, and directly, kills them, then it's probably an example of Fatal Method Acting While a good number of these entries have either been Vindicated by History or are a Cult Classic , they still count as Creator Killers because of the damage they did at the time of their release Not to be confused with Fallen Creator , where a once-respected creator is permanently disgraced</ due to a string of flops or personal misbehaviors. A creator/business that went defunct after one or two serious flops/mistakes could still leave a lasting legacy and be fondly remembered in hindsight Do not confuse with A.I. Is a Crapshoot or for when an author wants to kill their own work . Has nothing to do with killing God , nor does it have anything to do with the creator dying for a different reason. Also has nothing to do with the God Killer awakening from Puzzle & Dragons

Let's face it: Most of the time, a work is at its best in its original form . However, sometimes there are exceptions to this, and be it by Adaptation Distillation , Adaptation Expansion , Woolseyism , or Superlative Dubbing , the new version of a story comes out so much better than the old that even the original creator admits the superiority of the new one Compare Approval of God , which refers to fan-works that the creator has a positive opinion on, even if they don't Ascend into canon. Contrast Disowned Adaptation . See also Superlative Dubbing

But what happens when the opposite happens? Whether by dint of marriage, the birth of a child, the author finding religion or some other cause, the author now finds themselves in a much happier place than they were before. And, hardly unexpectedly, this starts to bleed into their work, which becomes Lighter and Softer and much more optimistic Just as Creator Breakdown isn't necessarily a bad thing from an artistic standpoint (many artists produce their best work while feeling down in the dumps), this trope isn't necessarily a good thing either: feeling happy and self-satisfied can often lead to an artist becoming complacent and unwilling to push themselves creatively. On the other hand, a sunnier disposition may result in an author cutting down on the Wangst and producing something more accessible This is the Opposite Trope to Creator Breakdown and, just as with that trope, Word of God examples are required for it to qualify See also Tone Shift , Lighter and Softer , Darker and Edgier and True Art Is Angsty . Compare Career Resurrection , when the creator returns to form after a period of

diminished reputation or below-par work

Neon Genesis Evangelion </ is a dark, psychological deconstruction of Mecha anime about loneliness and despair created when Hideaki Anno was suffering from clinical depression. Cue being married and recovering and all of a sudden we get a retelling in a series of movies by the same guy, called Rebuild of Evangelion </ trying to make the story make more sense and have less of a Downer Ending . Hmm… coincidence?

The lighting is so bad you can see the shadow of the boom-mike on the wall. The zippers and seams are visible on the People in Rubber Suits . The editing looks like someone playing with the wipe feature on Windows Movie Maker. There are times when you really start to wonder what is going wrong with a movie; in theory, they should</ be trying to make the best product they can, right? But that's not what happens. A strange lack of enthusiasm and/or optimism sabotages the production. The creators were completely apathetic, and they admit it </ . Examples for this "Creator's Apathy" are all about the production values. It is possible to be apathetic to other aspects of making a story, but we have another set of tropes for that. Also worth remembering is that while the quality of any work given as an example has likely suffered horribly from its makers' apathy, this apathy itself is not necessarily all bad. As many an artist and writer can testify, any work for which the publisher's editors and executives have a complete lack of concern can be an opportunity for the creator to put whatever he or she wants in it, as their superiors' apathy provides a kind of de facto</ Protection from Editors . From a business perspective, some works simply have no target audience , or sometimes the concept underlying them is just so bad that no one should ever have approved any budget or other resources for its creation in the first place. When such an abomination makes its way down to the production crew, sympathetic souls in middle management will often warn everyone involved not to waste too much talent or money making it. On the critics' end, works for which even the creators showed no concern can have some Narm Charm , be So Bad, It's Good , or at least inspire some Bile Fascination . Compare Stylistic Suck , Artistic License , Who Writes This Crap?! , Money, Dear Boy , Creator Breakdown , and Contractual Obligation Project . Contrast Developers' Foresight and Doing It for the Art . All examples that are not In-Universe require Word of God confirming

In some instances, the creator's choice may be a case of Magnum Opus Dissonance Not to be confused with Creator's Favorite , which covers creators' favorite characters - but it may overlap

Just like the fans, it's inevitable for a creator of a work to have a favorite character. When this happens, it can go horribly wrong, leading to the creator trying to force the character on an uninterested audience and we get a Creator's Pet . However, they can just as easily handle it better. Maybe the character isn't The Scrappy and audiences like them, or they don't get a lot of Character Focus , or maybe instead of Character Shilling the writer chooses to show instead of telling you how great the character is. Whatever the difference is, these characters do not qualify

as a Creator's Pet In fact, since many of the obvious tells for favoritism aren't there, often the only way to know for certain is from Word of God . Compare My Real Daddy , where the fanbase displays this towards one of the specific creators associated with a character or work Contrast Creator's Pest , a character which the author hates

All about the people and organizations who actually create works of media If you want to create a page for one, the Creator Page Guidelines are recommended reading

Creator's Oddball is a work which clashes with the rest of a creator's output. It can be much Lighter and Softer or Darker and Edgier , or even a different genre This might be related to Early Installment Weirdness , where the writer has just started their career, and hasn't settled on a genre yet If this occurs in an actor's filmography, that actor is Playing Against Type . If this occurs in an actor's filmography when it really shouldn't have, this is WTH, Casting Agency? In music, this might become a New Sound Album if the change in direction doesn't take and the artist goes back to their signature style. If it's a specific song, and it becomes successful, it's a Black Sheep Hit For Franchises instead of writers, this is Oddball in the Series . When it's a show on a TV network, this is Network Red-Headed Stepchild . Sometimes results in Magnum Opus Dissonance in either direction

Creators with indigenous Pacific Island heritage, which encompass the islands of Melanesia, Micronesia, and Polynesia (which includes Rapa Nui/Easter Island , French Polynesia and indigenous people of New Zealand , the Māori) Also see Pacific Islanders in Media

Professional Wrestling

An index of content creators and performers with Autism Spectrum Disorder, which includes both classical autism and conditions such as Asperger's Syndrome that are grouped together with classical autism under the ASD label as per the revised diagnostic criteria and categorizations included in the 2013 Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition</ (DSM-5). Note that the DSM-5 is only used within the United States; its international equivalent, the International Statistical Classification of Diseases and Related Health Problems</ (ICD), still lists Asperger's Syndrome and classical autism as separate diagnoses, and because of this people with Asperger's outside of the US tend to refer to themselves as having Asperger's or being "Aspies" rather than being autistic. We ask to please please please</ not list anyone that has not stated themselves that they have autism, unless confirmed to be professionally diagnosed by family or other loved ones, or speculate on anyone here There is debate on the validity of self-diagnosis, however we wish not to exclude those individuals. We do ask to note if the diagnosis was given by a doctor and/or psychiatrist or self-diagnosed if that information is available Also see Autism in Media

Useful terms and concepts about creating works for media Compare and contrast Fan Speak . See also the Creators index

There are characters that a majority of the fanbase dislike . But it's also possible for a creator to hate a certain character in their own work Maybe that character is born out/modified because of an Executive Meddling , maybe the creator realized that they have written the character wrongly, maybe the creator has gotten tired of the character because fans keep asking for more , or maybe the creator is pressed because the character they intended to be unlikable ends up having a lot of fans Often, it's a case of the character just came with the work, such as where a creator joined the staff after the character was created. Or maybe the work is an adaptation and the character is too important to the story to be Adapted Out . And, for obvious reasons, The Scrappy probably ends up becoming this in most Fanfics This dislike often shows in how the creator handles the character. They might try to keep them as Out of Focus as possible, give them a lot of Character Derailment on purpose, or turn them into a total Butt-Monkey . However, being any of those tropes doesn't necessarily mean that the creator hates them The opposite of Creator's Favorite , where a character is well liked by the creator. Not to be confused with Creator's Pet , where a character is loved by a creator but the fans hated that character See also Unpopular Popular Character , when a character is loathed by in-universe characters but is well liked by the audience If this goes for an entire work however, that is instead an Old Shame Please only put examples of the creator admitting that they dislike the character</

That's the Creator's Pet in a nutshell. The main characteristic of the Creator's Pet is that the writers' focus on him is detrimental to the show. It's not that the parts featuring this character necessarily suck more than the rest, but that so much effort is being directed to him that it detracts from the quality of the series as a whole. It's as if the writers think that there's nothing more important than browbeating the viewers into falling in love with this one character. And it never works. In fact, shilling a character excessively can cause other characters to be drawn into the hatred. Keep in mind that this isn't " The Scrappy with a big role", nor is it the Canon Sue , although there's a lot of overlap in both cases. The Creator's Pet is a combination of being: Hated by fans (The Scrappy) Unless it meets all</ of these criteria, it doesn't fit. Compare Spotlight-Stealing Squad , which happens when Character Focus pushes a lot of the other characters out of the limelight for an extended period of time; Periphery Hatedom , when this kind of character is hated by people he's not even targeted at; the Canon Sue , which is frequently also this trope by default; and the GMPC , which is often this in a Role-Playing Game . Compare Character Shilling , which is unwarranted praise for one character by one or more other characters, regardless of fan reaction. Contrast Shoo Out the New Guy , whom the creators get rid of as quickly as possible, the Unpopular Popular Character and the Designated Monkey , who's adored by fans despite being loathed in-universe. Finally contrast Ensemble Dark Horse , a character who receives relatively little Character Focus but is adored by fans. On the flip side, take note of Creator Breakdown and Artist Disillusionment , which can happen when the author vehemently disagrees with the fans and takes it out on the

show. For cases when the character is heavily hyped out-of-universe as well as within it, see Wolverine Publicity . If the "character" is a real person, that's Billing Displacement . Although this is subjective, only blatantly obvious or creator-acknowledged examples should be listed in the pages below.

Creators , as we know, are people, too . They have ups, they have downs, they have opinions, and sometimes they screw things up . This is an index for all of those tropes that show or result in some part of the creator's humanity, world view, or mental state influencing his or her final work Please note that if someone else's opinion influences the work, they've probably got the creator(s) on a Creativity Leash

Isn't it interesting that the defining additional information coming from the creator of a medium is called the Word of God ? Sometimes, a fandom seems to be dedicated to not only the specifics of the show, but to every word or comment that is issued from the creator's mouth. Often anything the creators say, even when not related to the fandom, will be adopted into their vocabulary and mindset. If the creator decides to drop an anvil , it will always be an anvil in dire need of dropping according to the fans. If they decide to suddenly insert a long diatribe that otherwise has nothing to do with the rest of the story or force-feed their opinions about politics or other touchy subjects down the viewers' throats , hey, it's their book/comic/show/whatever, they can voice their opinions if they want, and they should because their opinions are right and should be respected! If the creator seems to be getting more and more full of themselves , well they're entitled to it because they're just that awesome! These reactions can vary from mild to extreme, but basically the object of Creator Worship will always have fans ready to make some</ kind of excuse for whatever they do. The creators themselves may become aware of the power they hold. Some will use it conservatively, to promote unity and not impose their opinions to the masses. Others will wield it like a weapon, boldly stating their position on subjects and obviously hoping their followers will... follow. Obviously anyone who rises to some type of popularity will have fans, but this is not about a fan going "I really like this one guy..." This trope is about the fans worshipping these mere mortals</ , and not just the stuff they make. Such worship may come to resemble established religions, with vicious attitudes towards non-fans. Compare Sacred Cow , where it's the work that recieves the worship, and Unacceptable Targets , where any negativity towards them will garner backlash. When it goes wrong, or when the inverse happens, see Misblamed and Fallen Creator . Also note that the devotion implied by this trope need not be permanent to count. Be wary that this not a place for Gushing About Creators You Like . This is for documenting a fanbase who holds the creators in high regard.

A plot trope that involves a fantastic version of the most basic conflicts: Man vs. Beast. In a World… usually without The Masquerade where humanity is terrorized by a race of Nigh-Invulnerable behemoths . Humanity is at a disadvantage, but at some point, they discover their enemies' weakness, and now have a fighting chance. And thus begins the tale of their struggle. The most

basic form of this is that a certain organization is in charge of recruiting people and equipping them with a specific set of equipment and/or skills vital to exploiting the weaknesses of the monsters they are fighting. In cases where there is</ a Masquerade , their purpose is to uphold it by preventing muggles from discovering the existence of such monsters. The organization is usually the only one of its kind, but within a global reach there will often be "branches." Size and scope also vary. They can be as large and publicized as the military, but an Oddly Small Organization or a small The Squad / Five-Man Band would also do. There usually isn't a prerequisite for its recruits; as long as they can fight, they can join. In verses that rely on Applied Phlebotinum , compatibility with the phlebotinum is the only requirement, and you usually cannot refuse to join them , especially if compatible people are rare. The monsters are usually characterized by being non-sentient beasts that devour or destroy humans or resources which make them a direct threat. Sometimes though, they are sentient but Always Chaotic Evil with little regard for self-preservation. Whatever their flavor, they're out to multiply and destroy, and our heroes' job is to stop them from doing so. The monster's origin usually vary from being simply Aliens (or Angels & Demons or Robots & Golems); to coming from a single Hellgate ; to being a result of Creating Life Gone Horribly Wrong ; to being a mutant strain of an existing lifeform ; or a beastly sort of Henchmen Race created by the Big Bad ; to simply just popping out of nowhere . Whatever their origin. There will already be quite a lot of them already by the time the story kicks in. Whatever their origin, they will always be Nigh-Invulnerable (or just Made of Iron) or have Healing Factor which makes them hard to kill. This doesn't mean they are invincible though. These monsters usually have an Achilles' Heel — usually in the form of Applied Phlebotinum that is the only thing that can harm them (which our organization would exploit as weapons), or a certain weak point in their body, which is usually a core placed in a strategic part of its body . This trope has two common variations: Remember, for the trope to count: Within the subtropes, there is the common element of "being imprisoned". Whether by a literal wall (like in Attack on Titan </ or God Eater Burst </) or by humanity being forced to live in Citadel Cities (like in The Matrix </ or Strike Witches </) due to relentless attacks by the monsters. The plot will usually involve the organization finding ways for humanity to live outside these "walls" and have character dream about how The World Is Just Awesome and that they and everyone else need to see it. Subtrope of Hunter of Monsters . Sister Trope to Bug War , which is about humanity in general fighting Big Creepy-Crawlies or Horde of Alien Locusts , and may or may not employ this trope. Compare Who You Gonna Call? , for an organization that tackles the supernatural in general in an otherwise normal world. Contrast Anti-Human Alliance , where a group of aliens, monsters and non-human creatures team up against humans. See also The Men in Black , an organization tasked with upholding The Masquerade .

When a sitcom character is issued a credit card without understanding the ramifications of its use, they will treat it as free money and be grossly irresponsible with it. When the Shockingly Expensive Bill arrives, or when a store cuts the card up into pieces , they will be hit with the realization that the card was not the bottomless supply of cash they thought it was, and must earn the capital needed to repay their massive debt The credit card is usually provided to a teenage character by a parent for

emergencies, only for them to regard a closeout sale at the mall as an emergency. In these cases, the character is more likely to be in trouble with their parents</ as opposed to an actual bank, but still needs to pay back or work off the debt in some way. Pretty much discredited for adult characters unless they're idiots Common in media from the late '80s into the mid '90s , due to the rising availability of credit cards to the common folk of the world, and at the time acting as a necessary anvil in reaction to a real-world credit crisis To resolve the story quickly, the creditor will simply repossess their purchases . Real world credit cards are a form of unsecured debt and therefore, repossession is not a possible means of collection on the default. Instead, a debtor would be subject to a decimated credit score, endless collection calls and letters, and finally a lawsuit by the lender Compare Never Win the Lottery where the character wrongly thinks they've won</ a fortune. Also see Ms. Red Ink

This is a trope where a monster of some kind has extra-long arms. These arms won't necessarily be used in a physical way. It's more just to indicate how unnatural</ the monster is. Shows up frequently on Humanoid Abominations as a quick way to indicate something's not quite right In some cases, the arms themselves might not even need to be shown: if the creature/character in question is wearing clothes of some sort, the arms might be hidden at first by long sleeves, only for their unnatural length to be revealed when they bend the arm or grab something Often paired with Creepy Long Fingers . See also Noodle People . Compare Rubber Man , who tend to be not (as) creepy

Ballet is typically thought of as a pleasant dance form — the Dainty Little Ballet Dancers are graceful and elegant, the plots tend to be romantic, historical, or fantastic stories set to a sweeping stage design and bombastic music, and the impressive tutus are pretty. However, there is an unnerving element to it. Not only do ballet dancers have to rely on raw acting and athletic ability to tell the story, they also have to contort themselves into exceedingly difficult positions in order to sell the choreography, and often do so in synchronization Things are usually worse offstage. The physical training required to achieve such grace and flexibility is grueling, and may be paired with the struggle to maintain the ideal slender body for ballet. The mental pressure on the dancers doesn't help and neither do clashes with other dancers , the Prima Donna Director , the choreographer, or anybody else involved in production. In addition, many classic ballets draw on fairy tales and gothic romance tropes or have otherwise violent stories, making it easy to twist these stories into something darker Some works run with these notions and use the intensity of ballet to highlight horrific or unsettling things. Maybe the heightened form of drama ballet brings and the high-stress environment surrounding it takes a toll on a ballerina's sanity, the physical requirements results in mutilation (especially Agony of the Feet), the Dream Ballet takes a scary or dramatic turn, or the art itself is directly tied to the supernatural. In particular, the ethereal visage of a graceful ballerina might be tied to something ghostly . Overall, there is a lot of storytelling mileage in the dichotomy between the feminine, delicate-looking performance

and its darker underbelly. See Subverted Innocence May overlap with The Dead Can Dance , Marionette Motion , Surreal Horror , and Weight Loss Horror . Contrast Dainty Little Ballet Dancers

Let's face it. The darkness is scary . Even if you aren't terrified of it by itself, it can sometimes give you a horrible feeling that you're Being Watched , because you just can't see if there's something there. Children everywhere feel nervous about the closet or the space under the bed , but while those little bits of darkness are unnerving, there is a place yet creepier. A room where the darkness is the color of pitch, with no little lights anywhere</ , where even standing still and waiting for your eyes to adjust doesn't help. That room, home of the really, really really scary dark, is the basement Perhaps it's the fact that most basements are built into the ground, or how the dank, sparsely furnished ones seem horribly reminiscent of some kind of tomb or prison. And those spiders that like to hang out in the cracks and corners spinning their sticky transparent webs probably don't help much It should be noted that for a lot of people, this trope is Truth in Television . However, nothing impedes a house owner from averting the trope entirely by making the basement a clean, well-lit and light-hued living area, even with ground-level windows for natural illumination- and filled with cool stuff, from TVs to bars to pinball tables. Many bedrooms are done that way, in fact See also Torture Cellar . If there's a monster locked down there, see Madwoman in the Attic or Room Full of Zombies . But there is no inherent connection between this trope and the Basement-Dweller ; although it's possible for a Basement-Dweller to be creepy (especially if he's a Psychopathic Manchild or someone's uncle), there are many Basement Dwellers who are as pleasant as you could wish, and in general, the non-creepy characters live in a non-creepy basement

Solifugids (lit. "sun-fleers", after their habit of hiding from bright lights), also known as solifuges or, more colloquially, as camel spiders, sun spiders and wind scorpions, are an order of arachnids related to true spiders and scorpions and chiefly found in deserts and other arid areas. They possess a fearsome reputation in urban legends and popular fiction, where they typically appear as intensely aggressive desert terrors that will attack humans at the slightest provocation. They are often portrayed as highly venomous; traditionally, their bites are described as being either paralytic or outright deadly The urban legend originates from encounters with these creatures by soldiers stationed in North Africa and the Middle East in modern conflicts. The soldiers described these creatures as gigantic, capable of running at extreme speeds and aggressive enough to attack humans and camels. Pictures posted by American soldiers duly made their rounds on the internet where, between dramatic posing, the strange appearance of the creatures, their unfamiliarity to most audiences and the grapevine effect, they were swiftly made out to be terrifying monsters In real life, however, very little of this holds out. Real solifugids aren't terribly aggressive — they don't usually go after prey larger than big arthropods or smaller mice and lizards, let alone much bigger humans. They're also one of the few orders of arachnids to be entirely non-venomous — meaning not that they happen to possess venom that simply isn't strong enough to

be more than an irritant to anything larger than a rat, as is the case with most spiders, but that they lack any venom glands or ducts whatsoever. Solifugids rely exclusively on strength and their enlarged, powerful jaws to bring down prey It's not impossible to see where this reputation has come from, however. Solifugids are exotic creatures, for one — they're not found in Europe or in most of North America, and for tourists, soldiers and explorers from those areas wild solifugids are thus something of an unknown quantity. Solifugids are also very fast runners and ferocious hunters of their natural prey, and their reliance on biting to subdue their food means that their jaws are proportionally immense compared to a spider's or a scorpion's. Also, their drive to get out of the sun is so powerful that they really do</ run towards people to rest in their shadows, adding to the startle factor in people who don't know what they are Sub-Trope of Artistic License – Arachnids . Compare Spiders Are Scary and Scary Scorpions , for other arachnids portrayed as much more dangerous than they are in real life, as well as Creepy Centipedes . See also Seldom-Seen Species , as solifugids feature in fiction much less often than spiders and scorpions do

So, you're up against the Corrupt Church . You know that they're lying to the people, but no one will listen to you . It's time to take matters into your own hands, storm their base and reveal them for the evil bastards they are There's just one little problem. That means you actually have to go in their Church. And that place is scary as Hell itself The Creepy Cathedral might not have the vigour of a good old Haunted Castle , and it might not seem to give off that scary dungeon aura... but there's just something about it that makes you think, " Oh, Crap! ", the moment you go inside Guaranteed</ to be a Gothic cathedral, in all their pointy towers and Unnecessarily Large Interiors glory. Bonus points if it's accompanied by organ music — which of course will likely be the Toccata and Fugue in D minor . Triple Word Score if it has Ominous Latin Chanting . May have spooky nuns , Sinister Ministers and Creepy Cool Crosses at no extra charge. Other action scenes, especially in works aiming for a gothic vibe, might take place in an abandoned cathedral instead

Light and darkness play an important role in every religion. When it comes to Christianity, however, Catholicism is by far the most associated with dark elements, including exorcisms , evil hidden behind a collar or more mundane ones like corruption and a very controversial history (which, however, isn't uncommon when it comes to religion). Unless these things are portrayed as literal</ light, in which case it's all light Creepy Catholicism embraces the description of Catholicism either as simply uncanny and dark or outright criminal and corrupt, especially if compared with other religions. This portrayal is typical of countries characterized by a Protestant majority. Once the Protestant Reformation got going, many Catholic traditions were suppressed. The sort of very bloody and gory art (crucifixes, frescoes of martyred saints, etc.) and ostentatious church decor popular among Italian, Spanish and Latin American Catholics, for example, can be quite shocking to someone from one of the more austere Protestant sects that favor plain wooden crosses and unadorned churches So if a writer wants to evoke the sort of mood and creepy factor of a pagan sacrifice or

incomprehensible witch-doctor ritual, yet make it Christian, then the creepier sort of Catholicism is the way to go, especially once you toss in some Ominous Latin Chanting Truth in Television much of the time, since Catholicism retains many of the "otherworldly" traditions discarded by Protestant churches (the aforementioned Latin chanting, exorcisms, Purgatory, transubstantiation), some of which might seem like something straight out of a horror film to non-Catholics , especially children. That isn't to say that certain Protestants don't also have some spooky beliefs and rituals (snake-handling, the Rapture, beliefs about demons etc.). And of course, more knowledgeable Catholics might point to Orthodox Christianity as being even spookier: besides keeping the same beliefs and medieval trappings — and then</ some — you think the chanting is ominous when it's in Latin? Try it in archaic Greek, or Syriac, or Old Slavonic, or Coptic</ (which is Ancient Egyptian</ with some Greek tossed in), plus people prostrating themselves and hermits Catholics in general were historically also more open to science and magic (relatively, of course; one can list many heresy cases for either, after all), having an extensive number of scientists and alchemists under its name, so it is a lot easier to demonize Catholicism as demonic or "false Christian" than other Christian groups, which often tend to reject science and/or magic Creepy Cathedral and Hollywood Exorcism are generally associated with this trope. If a Pedophile Priest or a Sinister Minister appears, he'll probably be Catholic (but not always). May have something to do with Christianity Is Catholic . Anime Catholicism may overlap with this trope

Caves in fiction are generally portrayed as unsettling at best, frightening as a rule, and downright horrifying at worst There is good reason for this , as caves in Real Life can be extremely hostile environments to humans. The lack of light alone is enough to scare off many, and even the most intrepid explorer has to contend with hazards from rock falls to flooded areas to plain old hypothermia and exhaustion —not to mention the twisting, turning, often labyrinthine structure of the cave itself. Caves can be deadly, and we are not ideally evolved to inhabit them Many works of fiction will take these already present dangers to extremes , often while adding in the threat of some sort of blind subterranean predator or other creepy creature . And possibly a connected Ancient Tomb full of skeletons and curses . Maybe the cave is the monstrous skull of a giant beast that is occupied by villains or other monsters . Perhaps the cave in question was once occupied by such horrors but now lies empty and devoid of life, only for travelers to get the creepy sensation of Being Watched . Oh, and did we mention the possibility of slumbering dragons ? Expect any character foolish enough to enter a cave who doesn't encounter one of these nasties to end up buried alive , skewered by a falling stalactite , burned by lava , or driven mad by the darkness , isolation , getting lost in a labyrinth and impossibility of escape . The lucky ones who do see daylight again will be shaken and possibly scarred for life by the experience The milder version of this trope, common in children's media, is when caves are simply depicted as dark and spooky places inhabited by bats and with chilly winds blowing out of them. Entering a cave is a common visual shorthand for confronting one's fears A Primal Fear . Subtrope of Nature Is Not Nice and often Forbidden Zone . A staple setting of the Doomed Expedition . Supertrope to Abandoned

Mine , Sinister Subway , and Dug Too Deep . Sometimes illustrated through Cave Mouth , where the entrance to a cave resembles an engulfing maw, or Cobweb Jungle . May overlap with Beware the Skull Base , Beneath the Earth , The Underworld , Elaborate Underground Base , Secret Underground Passage , Eldritch Location , Thrown Down a Well , or even Underground City . Often present in a video game's Underground Level . Compare Eldritch Ocean Abyss , The Maze , Don't Go in the Woods , Hungry Jungle , Swamps Are Evil , Creepy Basement , and Absurdly Spacious Sewer . Contrast Evil Tower of Ominousness . See also A Way Out of a Cave-In

Cemeteries have long held an air of creepiness about them. They are the places where we bury the dead, after all, and our loved ones in particular. Places that make us think of unpleasant things. Places that can sometimes manage to creep us out simply because of the way they look Little wonder, then, that so many Fantasy and Horror works like this setting. In one of these</ graveyards, it is Always Night , or occasionally twilight. Most often the moon is full , for extra supernatural points. Snow may also be present, or clouds , or fog . And more importantly... the dead people there aren't really dead </ This is the birth place of The Undead , and in a Zombie Apocalypse you can expect every grave to be a Clown-Car Grave . If you're lucky, the local vampire coven didn't get the memo about this not being the best place to sleep, so you'll just need to find their Ancient Tomb and hope there isn't a night guard (and that they're heavy sleepers) Big Boo's Haunt overlaps when it takes place in a cemetery. See also Indian Burial Ground and Elephant Graveyard

Sometimes, an inanimate object such as a painting or statue might inexplicably change off camera. For example, in one shot a statue of a man may be smiling, and in another shot the statue will be frowning. This can be used as a Funny Background Event , but is often used in horror, and can possibly be a source of Paranoia Fuel . Sub-trope of Anomalous Art and Spooky Painting , possibly a Sister Trope to Offscreen Reality Warp . May overlap with Expressive Accessory . See also Portrait Painting Peephole . That's it, scroll right down. You need to go to the very bottom of the page. Got it? Now then, back up. Good. Look closely at the Mona Lisa. Notice anything? </

They look sweet, innocent, even angelic, but there's something not quite right about them . They're too calm , too knowing . They aren't really children any longer, not at heart Children should</ be innocent and in need of adult protection. By inverting this, the trope arouses deep-rooted fears. The Creepy Child might not be physically dangerous, but their profound unnaturalness is just as chilling Creepy children are frequently female, and often Emotionless Girls . They can be, among other things, a Robot Girl , an Oracular Urchin , a changeling , a Waif Prophet , or Evil . As prophets, they emanate otherworldliness; as heroes , they may elicit distrust and contempt from the rest of The Team sans the Team Mom , and as villains they remain cute even while the bodies pile up around them . They usually have an Ironic Nursery Tune theme May be holding a Creepy Doll . A girl wearing an Ethereal

White Dress is usually the Creepy Child. If a Creepy Child is shown drawing, it will usually be a Nightmare Fuel Coloring Book Compare and contrast Psychopathic Manchild and the usually much more proactive and physically dangerous Enfant Terrible . See also Undead Child and Ambiguous Innocence . Also compare Creepy Cute

For added atmosphere, play the music from while reading on If a program or film wants to add fear to a scene one of the most creepy ways is to have a Creepy Child , or a whole creepy choir, singing somewhere in the distance or background, usually the tune is a mournful nursery rhyme. Sometimes it will seem like the characters can hear it and they may even call out, asking if anyone is there In Japanese works the Playground Song Kagome, Kagome</ is a popular choice for this, due to its sinister-sounding lyrics. Said lyrics include the line "Who is now behind you?", which makes a perfect cue for a Jump Scare Compare and contrast: Ironic Nursery Tune which is always something the characters can hear and is often said or sung by one of them. Compare Ominous Latin Chanting . Contrast Cherubic Choir

For added atmosphere, play the music from while reading on There's something about circus music Done straight , it lets everyone within earshot know that they are in a world of fun for children of all ages! However, unless you're in an actual circus , then you are more likely to hear this kind of music slowed way</ down and played in a minor key. The effect is haunting, scary and maybe even sad and nostalgic. Often it will sound as if it's being played on an old, rusty calliope. To make it even scarier, it's often Source Music in an Abandoned Area to indicate that the area is not so abandoned as the characters thoughts – and if a circus, which is well accustomed to packing up and moving, had to leave everything behind...well, whatever's inhabiting this place now</ is something to run away from very</ quickly Definitely "Music To Run Away From Really Fast", if ever there was such a thing, as it usually means that there's a Monster Clown somewhere waiting to eat you. Or the circus is haunted. Or both. The other main use of this is as a cue that a character is losing their mind Instruments you might hear in this type of music include a pipe organ or calliope , a music box , and, less commonly, bells or a children's choir Compare Ironic Nursery Tune , Creepy Jazz Music , Sinister Whistling and Soundtrack Dissonance . See also Circus of Fear and Amusement Park of Doom . May overlap with Circus Synths , in which case it also fits Freaky Electronic Music . Contrast Happy Circus Music Fun fact: The "standard" circus theme is called and was composed as a military march. (History does not record whether the soldiers were intended to emerge from a tiny little car .) Because the song is so recognizable, it is common to hear the familiar 10-note melody in creepy circus music

Can be related to a Neat Freak , especially if Affably Evil , or to a Depraved Dentist . May happen if Cthulhu invites you to have tea with him and you find out its lair is actually too clean</ Sister trope of Room Full of Crazy and Straight Edge Evil . See also Spring Cleaning Fever and Ascetic Aesthetic when this is a building or even setting </ motif

They're dark . They sound ominous. They'll eat just about anything

they can find, including dead bodies on the battlefield or corpses hanging from the gallows. A group of crows is a murder; a group of ravens is an unkindness or conspiracy In most of their fictional appearances, crows, rooks, and ravens are scary birds. They are often associated with death, danger, and even evil. In Fantasy and Horror works, ravens and crows are often depicted as spies , Familiars and Mooks of the Big Bad or as Feathered Fiends in their own right. The Haunted House or the scary Derelict Graveyard often has crows or ravens hanging about. Some works depict them as being neutral in morality, but still associate them with death, such as having crows or ravens act as servants of a death god Even in more realistic works, the presence of ravens and crows can be used to set an ominous mood and to signal death and danger, similar to Circling Vultures . The presence of a dead body might be indicated by a flock of ravens or crows. A sudden rush of crows might startle a character during a tense moment. In works where ravens and crows are not outright ominous, they'll instead be portrayed as annoying pests in vein of Pesky Pigeons Because they are so visually similar, in many visual media it can be hard to tell whether the bird in question is meant to be a raven or a crow. There is usually little if any difference in how they are treated. Scientifically speaking, ravens are crows, that is they're members of the genus Corvus</ . The term "raven" originally applied to the common raven, the largest and most widespread crow species, but is also used in the common name of some other species; rooks and jackdaws are also crow species with different common names. However, some works might single out only one of these species as being bad. A few works might even show ravens as good (or at least normal) and crows as evil, or vice-versa Compare to Circling Vultures , Ominous Owl and Pesky Pigeons . Not to be confused with Idiot Crows , where the crows denote stupidity rather than evil. May overlap with Clever Crows , although Clever Crows are more often benevolent. Also see Plague Doctor , as fictional portrayals often play up the Creepy Crows aspect of the costume

Miniatures are creepy. A common variation on this is the Reality Changing Miniature . However, dollhouses, often used for child's play, have come to be regarded as creepy in and of themselves. It's one of the easiest ways to create an Uncanny Village in a single room, and is often cost-effective. Unlike the Reality Changing Miniature , they do not need to have - and, most often, don't have - supernatural powers. They're just viewed as creepy by themselves. A common variation is when a dollhouse is eerily arranged to mirror some terrifying or disturbing event that has occurred in real life It can frequently reflect Alien Geometries , and more vicious versions can be an Eldritch Location . Regardless of villainy, they are often Bigger on the Inside (or made to appear this way) The most popular version of this is twinned with the Creepy Doll , simply because dolls and dollhouses tend to go together, and tend to be possessions of the Creepy Child or the Deliberately Cute Child . For this trope, it's important that the dollhouse itself also be scary or used for scary purposes, and not just be creepy because it's occupied by one of them As time passes, creepy dollhouses tend to be used by a wider spectrum of people and for different reasons other than just horror. It's easier to use a dollhouse, for instance, to mimic a Haunted House , an Old, Dark House , or a dark secret. It also need not have a horrific purpose, as dollhouses can often be used to represent the Cloud Cuckoolander

or as a favorite pastime for a Broken Bird . The main point is, they're unnerving</ in some way. May be accompanied by an Ominous Music Box Tune Not to Be Confused with the series Dollhouse </

Dolls are perceived as harmless, and they can be gorgeous and/or adorable, but there's still something scary about dolls. It's probably because many of them fit squarely in Uncanny Valley territory. The blank gaze and unmoving stare reminds us too viscerally of corpses , perhaps. This goes even more when the doll is damaged in some way, such as missing limbs or eyes, or having holes in its head Another way to do it is make it a clockwork toy (usually an organ-grinder's monkey with cymbals); something that moves on its own when someone winds the key, then not have it wound up for years, and have it click its cymbals in a haunted, mechanical rendition of Terrible Ticking In horror, dolls are often used as part of the scenery to help establish the mood, even providing a theme for The Doll Episode . Like clowns , what should be a silly, innocent bit of childhood fun can make a scene ironically unnerving , depending on where they're placed, what they're doing, or even simply how they're lit. They may even be the antagonist or be used by the antagonist . Despite how ridiculous a doll trying to kill people should</ be, it's still seen as quite frightening. A similar idea lies behind the Demonic Dummy and Scary Scarecrows

These families are not like the others: they range from friendly monsters to real psychopaths , and sometimes friendly psychopaths . Well, families tend to have things in common. Members tend to look, behave and act similarly, whether because of genetics or uprising, a family normally has traditions, internal rules, shared hobbies and a whole microculture. This is what happens when the family is unusual The two most well known examples are probably The Munsters </ and The Addams Family </ ; both sitcoms aired the same year and had the same basic premise; a family that scared people, and both were not only amazingly successful but also had a strong impact in popular culture. Other than that they had a key difference: the Munsters are monsters acting like humans, the Addamses are humans acting like monsters A case of It Runs in the Family and very often a behavior that identifies The Clan , most of the cases show a Nuclear Family albeit often with cases of Nephewism and, ironically, in most examples they are not Dysfunctional Families . Nonhuman examples often involve a Monster Mash via Random Species Offspring . Sometimes overlaps with Quirky Household , when is an entire village is a case of Halloweentown . Contrast with The Family That Slays Together for the horror version, not to be confused with Creepy Uncle

A type of character often found in horror of the backwoods variety, the Creepy Gas Station Attendant is a grizzled and almost Always Male hick who appears to be the sole proprietor of a dilapidated and desolate service station (although he may be accompanied by an ensemble of similarly creepy locals whose only apparent purpose is to stare silently and menacingly at "outsiders"). You know the ones, unsanitary and filled with an assortment of vermin, outdated products, non-functioning fixtures, and rusting heaps that may have once been vehicles. Depending in the setting, may have a Hayseed Name akin to Otis, Dale, or Zeke, which will typically be

on a patch stitched onto the breast of his shirt This character in horror films often acts as the Harbinger of Impending Doom that should warn the film's character(s) into turning back. Contrast with Apathetic Clerk , where a character working a menial job is Played for Comedy See also Gas Station of Doom , when the gas station itself is a horror setting, though the tropes can obviously overlap Not to Be Confused with Nightmare Fuel Station Attendant , though there can be overlap

Comic Books The Punisher MAX </ story arc "Welcome to the Bayou" has Frank battle a Cannibal Clan , starting with the rat-faced guy running the gas station. Films - Live-Action Probable Trope Maker Drayton Sawyer from the original The Texas Chain Saw Massacre (1974) </. Encountered early on by the protagonists, he appears normal enough, but when Sally goes to him seeking aid after her friends are killed, he is revealed to be the head of Leatherface's family and captures the girl to take home for dinner. Other examples from the series include Alfredo from Leatherface: The Texas Chainsaw Massacre III </ and W.E. from Texas Chainsaw Massacre: The Next Generation </ . Literature The gas station owner in Friday the 13th: Mother's Day </ turns out to be a Captain Ersatz of Norman Bates . Live-Action TV The series premiere of Criminal Minds </ ends with Gideon stopping at a gas station operated by a twitchy and stuttery man who he realizes is a Serial Killer the FBI has been after for a while. The next episode shows how he deals with being taken hostage by the guy. Another episode had two service station owners who hunted people for sport. Video Games Persona 4 she's actually Izanami, the Big Bad responsible for starting the entire plot, with her going One-Winged Angel in the final battle . Western Animation An episode of MTV's Downtown</ featured such a character, which the main characters thought was part of the titular Cropsey Clan of that episode due to his unibrow (the inbred Cropseys supposedly all had unibrows).

A common stereotype of coaches and school gym teachers is that they have a "special interest" in their students. Some of the things they may do include staring intently at people while they exercise, getting all touchy-feely with them, making flirtatious comments, trying to peek at them changing/showering, stealing underwear (and sometimes sniffing them), or desperately trying to get into people's pants. Their intentions can range from plain creepy (staring and sexual comments, but not actively trying to hurt people) to downright villainous (e.g., rape). If the coach is well respected (usually because they coach a famous sports team), then they might get away with their actions . People who are victimized by a creepy coach can be any age, with people who are school-aged being the most common. It won't end well for them if the parents find out, however . This is Truth in Television , as there have been coaches and gym teachers in real life who have sexually harassed or even sexually assaulted the people they were coaching. Due to the perception that All Men Are Perverts and that A Man Is Always Eager , the coach is usually male . A female coach who behaves like this is more likely to veer into Double Standard: Rape, Female on Female (unless she falls at the Psycho Lesbian end of Lesbian Jock) or Double Standard: Rape, Female on Male (unless she's an Abhorrent Admirer in the case that No Guy Wants an Amazon —and even that</ is more likely to be played for laughs than if the genders were flipped). Related to Teacher/Student Romance , Sadist Teacher , and Evil Teacher . See Drill Sergeant Nasty for another stereotypical portrayal of coaches (even though it originated with drill sergeants). This trope is a

stereotype , so No Real Life Examples, Please!

Ever found yourself at a huge mansion in the middle of a torrential rainstorm? Chances are the door was opened to you by a Creepy Housekeeper. This character spends much of her time walking around a large manor house cleaning, cooking, being fanatically devoted to her master, and scaring off any new female inhabitants of the house. Although she often welcomes hapless visitors, chances are they will be either murdered or scared off by the end of a terrifying night. She will be common in murder mysteries/tales of the supernatural, although often subverted for comedy Her male counterpart is the Crusty Caretaker . They'll often tag-team any newcomers into being properly creeped out before the hauntings start. Sometimes takes on double shifts as a Haunted House Historian to ratchet up the creepy. Contrast the sexier French Maid , as well as the more maternal and less unsettling Kindly Housekeeper

Characters and monsters (or both) have a little extra creepy added to them when they have longer than average fingers. They don't even have to be a foot long, the Uncanny Valley can make even just slightly longer fingers off putting. This is one reason Femme Fatalons which lengthen the apparent size of fingers can invoke this effect, as can actual claws These characters are likely to use their big hands in expressive ways, whether subtle or overt, and comparisons to skeletons and spiders are common. They'll usually gesticulate with surgeon like precision or herky-jerky motions . Outright inhuman creepy long fingers may have extra knuckles or Freddy Krueger style finger attachments that can double as weapons The one big drawback to using this trope in live action media is that human actors are unlikely to be able to handle extra knuckles or delicate motions, which is why animatronics and CGI fare better. Actors with these finger extensions are usually limited in their range of hand motions, being unable to make a fist, wield guns or more generally grasp thin objects When villains, these characters enjoy making Sinister Scraping Sounds and Finger Licking Evil Often overlaps with the similar Creepily Long Arms . Goes well with the stretched-out physiques of Noodle People . Long fingernails are usually included as well

Normally, people who are calm tend to speak in a clear, even voice that doesn't vary too much from word to word and is immensely reassuring to the listener. This isn't always a good thing, however. A perfectly monotone voice usually means just the opposite of sanity, safety, and cause for reassurance; usually, it means the speaker is mind-controlled, crazy, an impostor, or is being threatened with death. In these cases, the creepy monotone is a sort of Glamour Failure to clue in the hero that any of a dozen things may have just gone wrong Usually, the creepy monotone varies from a calm monotone in that no word or syllable is stressed at all</, even when they should be. This is the difference between saying "Oh hello!" and "Oh, hello." Even Spock Speak sounds more natural and less unsettling by comparison. Contractions are often omitted, as are specific or explicit mentions of names and facts, depending on the cause of the monotone. Here are some common scenarios for the Creepy Monotone "Yes, I am fine. I'll be even better once I load my gun, though."</ The character has just suffered a Heroic BSoD or one too many rounds of Break the Cutie

and/ or is about to go completely homicidally berserk . Usually paired with jittery motions, twitching , or a Broken Smile Machine Monotone is a Sub-Trope . You may wish to compare Dissonant Serenity . Can make a very effective Deadpan Snarker . Compare Tranquil Fury , Alternate Catchphrase Inflection , and Voice of the Legion

Creepypasta is a collection of creepy, frightening, and/or utterly terrifying (and sometimes laughably terrible) horror fiction stories that originated from, and still are floating around, the Internet. The name itself is a portmanteau of "creepy" and the internet slang term "copypasta", referring to pieces of text (most commonly long-form jokes) that are commonly copied and pasted throughout the internet. Creepypasta stories can range anywhere from ghost stories or mind-bending tales of terror , to stories about slim businessmen. There are several common traits among them: A lack of disclaimer from their authors stating the work is fiction, which may cause the lines of reality and fantasy to blend. Often, real or well-faked place names, character names, or website names are used. Archives where they can be found are , and . There's also and . The SomeOrdinaryGamers Wiki also have their own creepypastas for further reading. Can be found in illustrated form Often the subjects of ARGs , because audience participation can add whole new levels of Nightmare Fuel . Sometimes, these may actually have a decent ending. Some works have also subjected the genre to a kind of defictionalization by making, eg., a computer game that's exactly like something out of a creepypasta about a computer game, minus the part where the player dies and/or goes insane. This genre expansion has also had the effect of people calling all horror elements "creepypasta". Not to be confused with pasta that may be creepy , that two-week-old tuna casserole in the fridge , or with a Creepy Pastor . See also Urban Legends , which are related and often share story elements, the SCP Foundation (which has its origins in a creepypasta) and . Creepypasta has also been subject to dramatic readings by an online group called The Midnight Society </ that post their work on YouTube . Of them, the most prominent member is . He has a list of links to the others members' YouTube channels on his own. They frequently crossover in each other's videos for the purpose of voicing different characters. Other honorable mentions of dramatic readers include , , , and (who focuses mainly on video game pastas, but does other creepypastas as well). There's also for a different</ view. And just in case you were planning on sleeping tonight...

Medical examinations, particularly the physical exam, are generally not the most comfortable of situations. Real-life doctors generally get specific training to address professionalism and bedside manner Fictional doctors, on the other hand, generally come with a selection of flaws that are demonstrated in their overall behaviour. And patients may have their own hangups. Thus, giving or getting a physical is a great way to demonstrate that something isn't quite right. The doctor may be a little too intimate, brutally logical, or obsessive about some minor symptom that turns out to be a major plot point. The patient may have a panic attack, revealed to be related to past trauma. The discomfort of the exam itself is sometimes an allegory for the greater difficulty faced by the character. Or perhaps they enjoy the exam a little too</ much themselves. The viewer may be meant to share in the discomfort, creating sympathy for the patient, antipathy for the doctor, or a

chance to display the emotional attachments of another character Often involves a medical Ass Shove gag. See also Strapped to an Operating Table . And whatever you do, never Turn Your Head and Cough . Compare Pervy Patdown

We all have souvenirs — items that remind us of a place we visited or thing we did. But what happens when, instead of remembering your trip to Souvenir Land , you want to remember the time you murdered some orphans or decapitated your mortal enemy? The Creepy Souvenir is a sufficiently morbid item that is kept to show off the (normally) horrible thing(s) a character has done. Mostly, it's human body parts — heads, teeth, skulls, skin, fingers — for obvious reasons. Sometimes, other personal items are taken, like dog tags, but the general rule is the bloodier, the better. For extra bonus points, taxidermize it because Taxidermy Is Creepy . The character might have an entire Trophy Room or Wax Museum Morgue of such things. Particularly disturbed individuals may carry the items around with them wherever they go. Related to, but distinct from A Love to Dismember . Even most collectors of human trophies don't go so far as to " use " the body parts. May easily lead to a case of Chronic Evidence Retention Syndrome when these souvenirs end up in the wrong hands. Human Head on the Wall is a Sub-Trope . Crosses over occasionally with Skeletons in the Coat Closet , Genuine Human Hide , Shrunken Head and Having a Heart . Compare Battle Trophy , Collector of the Strange , Stalker Shrine , Kitsch Collection , Decapitation Presentation , A Scar to Remember , and Past Victim Showcase . Tragic Keepsake is one of the few methods that this trope can be used by a good (but still creepy) character, carrying a body part of a loved one in their memory. Note that this is different from using body parts for religious; medical; magical; or other purposes , although that's no less creepy. No Real Life Examples, Please!

Commonly seen in crime dramas, especially of the noirish variety, this occurs when a character or characters, having committed one crime, perhaps one not even that serious, must then commit another crime to cover up the first, and so on, leading to an escalating series of crimes set off by what may have originally been just an accident. A very common manifestation of this trope is in criminals eliminating witnesses to their crime If the character had just come clean at the beginning, he might have gotten off with a relatively light sentence. After a little while with this trope, he's looking at death row if he gets caught. Can be Truth in Television , though it usually takes the form of a Revealing Cover-Up (eg: being caught for tax evasion, perjury, or obstruction, rather than the original crime) A tendency to encourage this is what makes All Crimes Are Equal a Very Bad Idea. Compare He Knows Too Much , "Fawlty Towers" Plot (this trope's much less dark, non-criminal counterpart), Jumping Off the Slippery Slope , Unintentionally Notorious Crime , and Serial Killings, Specific Target (the trope's much more deliberate and heinous cousin). Contrast Revealing Cover Up and Not the First Victim (the specific instant where a character learns that the villain has committed many more crimes and/or had more victims than they previously suspected). A major cause of Never One Murder and Plethora of Mistakes

Live-Action TV in the Cop Show , Criminal Procedural , Police Procedural , Law Procedural , Detective Drama , Spy Fiction and

related genres For literature in related genres, see Crime Fiction , Detective Literature , Gangster Fiction and Mystery Fiction See also: Crime and Punishment Tropes

Tropes regarding the depiction of law, crime, and justice in works of fiction.

A character has a hobby or other leisure activity that actually hides their criminal activity. Often they're genuinely interested in the hobby, which lets them make money from doing what they like and avoid Bluff the Imposter questioning Compare Naughty Birdwatching (where astronomy and birdwatching equipment is used for a less noble purpose) and The Convenient Store Next Door (where the location that is used to perform said hobby is an important part of the criminal plan). Also see Embarrassing Cover Up

Literature primarily about crimes, their detection, criminals and their motives. See also Detective Literature & Mystery Literature .

This trope is situation where someone becomes a tempting target which others will try to take direct advantage of. This is usually through some quality of theirs Generally comes in three general flavors Taking advantage of someone else's good fortune: Lets say Bob becomes wealthy. Hearing this, Alice, an acquaintance of Bob presents him with an investment opportunity, that can't possibly fail . Or maybe she announces that she's a long-lost relative of Bob, and if he could just help her out a little financially, she'd be eternally grateful. In general Alice wants to profit off Bob's wealth Another case is where Alice becomes famous, and Bob offers to become her publicity manager. He's offering not because he's experienced at this type of work, but because he can profit off of her publicity Being in the wrong place at the wrong time.: An example is Bob who doesn't have any street smarts. He's walking down the street in the wrong neighborhood, and is spotted by Alice, who sees him as an easy mark A lack of common sense that causes criminals to see you as an easy target. : Bob has just come into some money, a lot of money. Maybe he won the lotto, maybe just got an inheritance, but he feels the need to tell anyone and everyone about it. Or maybe he just flashes his money around in public. Charlie sees this, and thinks he could part Bob from his money rather easily Compare Mugging the Monster . Contrast Gold Digger . Can easily lead to Victim Blaming . Not to be confused with the Mystery Magnet , who attracts crimes committed against others</ in their vicinity

Thomas And Martha Wayne were gunned down in an alley. This isn't quite the trope, as at the time the place was known as a nice neighborhood. However, since then its become known as Crime Alley, and is now definitely this trope.

Bob has just beaten off a murderous attack by Alice. Plot over,

Alice goes to jail, roll credits, right? Wrong. Maybe Bob was bigger, or stronger, on the wrong end of a Double Standard (such as, for example, Double Standard: Abuse, Female on Male) or could conceivably have run away. Or because of racism (regular or the fantastic variety), all evidence, no matter how blatant, is ignored Either way, someone in a position of authority feels that Bob was in the wrong inflicting whatever damage he did to Alice, who on the other hand, is a poor victim. Cue drama . This often involves Double Standard: Abuse, Female on Male , as in the page example; sometimes, it's due to Selective Enforcement . Compare Can't Get Away With Nuthin' , Wounded Gazelle Gambit , Wrongful Accusation Insurance . An attacker may even play a Deliberate Injury Gambit to invoke this trope. A history of such cases In-Universe may explain occurrences of Once Is Not Enough . If the attacker uses words instead of violence, it's Made Out to Be a Jerkass . As with everything else law-related, expect the writers to interpret self-defense laws creatively . Whether this is Truth in Television varies heavily depending on circumstance: self-defense laws usually give a person the benefit of the doubt when defending themselves or others against attempted murder, rape, or assault with a deadly weapon. However there are many circumstances in which this presumption goes away, and you can be put in prison for attempted murder for firing a warning shot Furthermore, it has to be a situation that you yourself did not cause or substantially contribute to; starting a fight with someone or doing everything in your power to antagonize and enrage them in a dispute, then claiming self-defense when you seriously injure or kill them will not fly in any</ court of law (unless the outcome was predetermined , of course). Compare Arrested for Heroism , Fighting Back Is Wrong , and The Lopsided Arm of the Law . Not to be confused with Self-Offense . See also the Sliding Scale of Unavoidable vs. Unforgivable , Inconveniently Vanishing Exonerating Evidence and Killing in Self-Defense . May result in Then Let Me Be Evil . No Real Life Examples, Please! This happen in Real Life, but let's leave it here.

On many a True Crime show (e.g. The First 48 </) and "help us solve crime X" programs (e.g. America's Most Wanted </, Crimewatch UK </) or even on the National or Local News real crimes are acted out on screen for the viewer. Either by actors or by the actual victims with the perpetrators played by actors. This is to help the viewer visualize the situation which might be otherwise tricky if there are a lot of details to take in in a relatively short amount of time. It can also just be used as filler in some shows. Sometimes these aren't the most tasteful things in the world in the cases of unsolved crimes. They retell the story melodramatically but in a way that prompts the viewer to enjoy the thrill of the gruesome crime and the knowledge that the culprit is still free. While crimes are by far the most common thing to be given this treatment they aren't the only thing. Accidents may be dramatized this way, especially on "heroes of the emergency services" shows like the now defunct UK show 999</ . Historical events like battles often get this treatment in documentaries too. See also Dramatization . America's Most Wanted </

A play on Prime Time Soap , a Police Procedural drama that focuses Aas much on the complicated personal lives of its characters as it Adoes on the crimes themselves s a crime and punishment show ages Aand begins to exhaust the variations of its genre, the producers Awill start to crank up the soap elements of the show to compensate

The detectives are on the heels of a very unbalanced criminal who has left them a trail of clues to follow — these clues aren't meant to cover the criminal's tracks, but, for the criminal's (and the audience's) entertainment, are usually intended to be a test of their intellect, or their investigatory skills, as though the criminal wants to see if the detectives are worthy of catching him Not only do the detectives oblige the nutter and follow his breadcrumb trail, they tend to give up all conventional routes of investigation. Usually they are the minutest step behind their quarry right until the end. Sometimes the criminal wishes to distract or trap the detectives, sometimes they want them to uncover some other truth along the way, but usually they're just being a real smartass. Sometimes the clues are hidden in the Serial Killer 's Calling Card or in its gruesome souvenirs . There is often a Breaking Speech (or "The Reason You Suck" Speech) and a Kirk Summation (or "No More Holding Back" Speech) exchange between The Protagonist and antagonist some time before the climax The criminal will often warn the investigators that there will be consequence for cheating on the game Can overlap with Absurdly High-Stakes Game These people often enjoy wordplay. Anagrams abound, as well as sentences with a carefully designed second meaning, and proper nouns which are conveniently also real words ("wait a minute, does he mean Jim</ Trashcompacter?") See also Linked List Clue Methodology for a number of non-(or at least less</) criminal scavenger hunts. Compare The Walrus Was Paul

The equal and opposite of the Cop Show and Police Procedural , the Criminal Procedural is a type of Crime and Punishment Series that focuses on people who are on the wrong</ side of the law, and especially their present-day transgressions of it. Examples often focus on certain types of criminals: Con Men and Gentlemen Thieves are the most popular, since it's easy to make them sympathetic to the audience by making their victims rich and greedy. They are also usually charismatic and attractive. Their shows are usually light in tone and there will almost certainly be one episode where they actually help the police to take down a violent (and therefore "bad") criminal. There may be a recurring police officer who tries (and fails) to capture the protagonists, or who coerces them into helping him out with his investigations. are the next rung down on the popularity ladder. Generally petty crooks, fencers, forgers, dealers of soft drugs and other people who are on the wrong side of the law but not sufficiently nasty to put off the viewing audience. Expect the really nasty criminals to pop up more regularly, usually as a plot device if the protagonists owe them money/drugs/something else. The outsiders are usually cowardly or otherwise non-violent. These guys typically star in dark comedies. are the least popular protagonists for Criminal Procedurals, largely because they have to be shown to be despicable people in order to come across as being remotely realistic though occasionally they will have their Pet the Dog moments, especially among the more sympathetic gangsters. It's also difficult to play down the crimes that they commit: murder, extortion, dealing in highly dangerous drugs, etc. As a result, such series tend to be very adult in tone and morally complex, and therefore not attractive to advertisers. Where there is humour, it tends to be pitch black. The "Rise and Fall" Gangster Arc is commonly found here. do not fit comfortably into the popularity ladder. This is because, since they have been taken off the street and are (in

theory) paying for their crimes, they don't necessarily have to be shown committing criminal acts. Or, when they do commit such acts, they are usually in flashbacks, as a part of the convict's origin story - or against fellow inmates, which attacks can be seen as justified to some viewers. As a result, series set in prison can have wildly different tones, from harrowing to comedic.

Terrorists, assassins, murderers, killers, poisoners, rapists, drug dealers, kidnappers, counterfeiters, robbers, muggers, burglars, thieves, bootleggers, conmen, and little cheats . These characters will tend to be involved with Crime and Punishment Tropes Villains like the Corrupt Corporate Executive , the mercenary, or The Emperor and other Lawful Evil villains are per definition not included, even if you may consider them as a kind of criminal. Also, don't list more fantastic villains like the Mad Scientist , evil wizards , or Evil Overlords here

A big trend in modern TV and film comedy: shows where the humour mostly comes from placing characters in the most embarrassing situations possible, or having them say the most awkward or offensive thing possible at all times. Often uses documentary feel to heighten the naturalism and increase the cringe, or has actors in character interacting with an unsuspecting public. Comedy that gives you second-hand shame. Comedy you have to watch through the gaps between your fingers Often this is mollified by the characters being oblivious to the embarrassment they should be feeling. Sometimes though, all the characters are acutely aware of their humiliation, which can make it so much worse (which is how Digging Yourself Deeper works when the attempts to improve the situation just cause further awkwardness). Or worse yet, there's a single Audience Surrogate character who realizes how humiliated everyone should be feeling, while everyone else remains oblivious Some shows specialize in this sort of humor. Others include a scene of it here or there, largely avoiding it. Still others make this sort of thing a sort of Running Gag , as with taking a character who can't act and requiring them to play a part for the good of the team — repeatedly German, the language that brought you "Schadenfreude" , has developed the term "Fremdschämen" (basically "secondhand embarrassment") to cover this phenomenon For a specific type of cringe related mainly to being in a small, confined space with a stranger, see Uncomfortable Elevator Moment See also Crosses the Line Twice , where the same basic material is used, but more to make people laugh than to make them uncomfortable. If the show is partially or wholly unscripted (as in Reality TV or a Talk Show), it may be a Point-and-Laugh Show . Of course, if Eight Deadly Words applies, nobody cares anyway

Competitive Balance exists so that there is some symmetry between specific advantages and the Necessary Drawback . If someone can hit hard but is easily hurt, they are a Glass Cannon . If they are unstoppably strong but slow-moving, they are a Mighty Glacier . If they are incredibly fast but go down quickly when hit, they are a Fragile Speedster . A crippling overspecialization occurs when an obscenely powerful advantage makes a trade-off that limits how effective it is . In some Real-Time Strategy games, unit types are often specialized beyond all reason. They often have only one weapon, effective against just one particular kind of enemy, and

usually cannot defend themselves at all if their particular weapon is ineffective. The most prominent examples can be seen in this genre: explosives will deal low damage to infantry though maybe the problem isn't so much with their damage as with their accuracy , while Anti-Aircraft cannons can't defend against ground units. This is usually a result of game balance. After all, if tanks are effective enough against other tanks and</ infantry, then why build anything else? Additionally, until recently, most units in games were depicted with only one weapon. A few might've had a second gun used for attacking enemy fliers, but that was about it. Can result from a Tactical Rock–Paper–Scissors design scheme, from intensive Min-Maxing in a character build, or a case of Highly Specific Counterplay . People who do this for Elemental Rock–Paper–Scissors are suffering from Poor, Predictable Rock . See also Anti-Air and Strong Flesh, Weak Steel . Compare to An Adventurer Is You , where this is used to force players to work together. See also Sacrificed Basic Skill for Awesome Training for a characterization equivalent and Single-Task Robot for a robot equivalent. Severely Specialized Store is a comedic variation. Don't confuse "having a weakness" or "not being the best at everything" or even "not being quite good enough" as being this trope. Don't be tempted to list something because it failed in some way unless you can point a finger at its crippling specialty! The opposites of this trope are the Red Mage , Jack-of-All-Stats , and Master of All . At the other extreme that loops right back is Master of None , where the character has no great specialization... but sucks at everything anyway.

Sometimes someone is just too good at something. There is no way you can beat them at it. Or they have humiliated you once too often in their field of expertise. You decide to fix it so they can never beat you ever again Crippling the Competition is when someone, usually a villain, injures their rival to get the advantage. A Sub-Trope of Career-Ending Injury , Crippling the Competition is always a deliberate act done with malice and forethought. Can overlap with Game-Breaking Injury if it occurs during the final showdown Sometimes the opponent to the crippled competition isn't actually the one who did the deed and said opponent may not even have desired it. In these cases, the person responsible for crippling the competition generally is either a misguided fan trying to help , or a third party that stands to gain from a certain outcome of the match When applied to superpowered beings, this trope may lead to them being Brought Down to Normal Often overlaps with Fingore . Frequently leads to Throwing Off the Disability . A Sub-Trope of Removing the Rival . It's commonly the purpose of Unnecessary Roughness unless the roughness has no purpose and is just For the Evulz Different from Make an Example of Them , where in some cases the victim's punishment might deliberately target their ability to perform, but the motivation is not the fear of competition. For example, this trope would be a bunch of mobsters might break the legs of a championship marathon runner so the guy they're betting on will win, whereas, with Make an Example of Them , the mobsters break the marathon runner's legs because he failed to pay his gambling debts Note that in real life this can backfire, especially in team sports, where a player getting taken out can encourage their teammates to step up their game. Some coaches even tell their players to "punish them on the scoreboard" rather than physically retaliating Not to be confused with Blasting It Out of Their Hands . If the person being

crippled attempts to compete or fight anyway, this may lead to You Can Barely Stand . And if the person tries to compete despite the attempted crippling, you can always Attack the Injury during the competition to make sure it pays off

The opposite of Hype Backlash , critical backlash is what you get when something is over-criticized and condemned to the extent that it couldn't possibly</ be as terrible as everyone makes it out to be. Like hype backlash, it's yet more proof that the critics aren't always necessarily correct, and Quality by Popular Vote isn't always a reliable indicator of something's merits (or lack thereof) Critical backlash tends to occur when critical reaction towards the product is tainted by some outside factor; overhype , overexposure , and outside controversy may prompt the critics to focus on the noise surrounding the work rather than the merits of the work itself. Critics are often primed to dislike the product based on some preexisting prejudice and fail to look deeply enough for redeeming value, particularly if the work suffers from Public Medium Ignorance . Some critics may Follow the Leader and echo more popular and louder critics Of course, some things also just press a critic's buttons the wrong way; critics usually have different expectations and approaches than the wider audience, and just because something doesn't tick the right boxes on their checklist doesn't mean the wider audience might not find something of merit in it. Alternately, it may be that the vehemence of the criticism has conditioned the audience to expect the show's flaws, lessening the blow, and thus making what good qualities it has stand out more If the work develops a particularly devoted audience despite the critical drubbing, then it may experience hype and critical backlash from different quarters; the work may not be as bad as the critics say, but likewise not as good as its most ardent fans claim, falling instead somewhere in between. Cult Classics have often suffered from a critical backlash, only to be later rediscovered and Vindicated by History or (if they went from popular to hated first) subjected to a Popularity Polynomial Adaptations and works that generally fall into a critic's Acceptable Targets radar (such as animation and genre fiction) often receive this kind of reaction. This phenomenon is deeply related to the Streisand Effect and No Such Thing as Bad Publicity Please note that this page is not a personal blog to discuss your personal experiences of this; this page is all about the general properties which tend to receive this treatment. Also remember that this is YMMV; seeing something you hate here only means that other people may not hate it as much as you do, not that it doesn't have points worth of criticism, so try to resist the urge to make a Justifying Edit

Critical Dissonance is polar opposition of public to critical opinion. Critics might love a certain work while general audiences shun it, or vice versa Critics may look down on a popular work on principle, denouncing it as Lowest Common Denominator garbage that’s all flash and no substance. Conversely, the public may see a work beloved by the critics as boring, angsty and pretentious drivel engineered solely to win awards from equally boring, angsty and pretentious Academy members . Other divides have been forming involving some critics putting greater emphasis on the politics some media are perceived to be pushing rather than the merits of the media itself (or, inversely, a work's political angle being

largely looked past by critics while serving as a Berserk Button for the opposite-leaning fanbase) Sometimes later opinions can match, and then we have Vindicated by History (or Condemned by History , as the case may be), but not always Some media are less affected by this than others. Since comedy relies on what an individual finds funny, this is the genre of movie most likely to spur on Critical Dissonance. One critic may find a movie hilarious while another finds it tacky. Switch out comedy for the horror genre and you get the same polarizing results. Art — all kinds, not just abstract — is notoriously subject to this. And architects get hit with it all the time In general, this trope has historically been uncommon with video games, partly due to the far greater reliance on reviews among gamers, and partly because the technical side (gameplay, graphics, etc.) tends to carry more weight with games than with books or TV. Additionally, good gameplay (at least in terms of, say, lacking glitches) is much more black-and-white than a good story, writing, or acting. However, video-game journalism is infamous </ for its frightening degree of corruption, to the point where reviewers who don’t sufficiently praise games that buy enough advertising space on their stomping grounds tend to get fired pretty quickly. When Critical Dissonance does occur with games, it is more often than not because gamers thought that the critics had been overly kind (like the Four Point Scale), or had even been paid upfront by the publishers as part of an advertising and/or first-look article special Niche media may particularly suffer this because some or all of the critics assigned to review it aren’t members of its target demographic, or don’t even have a basic knowledge of the genre . To look at it another way, if the business model involves an audience who will actively seek it out, those people will be predisposed to enjoy it, whereas critics who see it out of professional necessity will not have that selection bias Another factor is that critics tend to watch a ton</ of movies, understandable given that it's their job. However, it can lead to something that seems fresh to viewers who aren't too familiar with similar works getting panned by critics who've seen that kind of thing a million times already Telltale signs of Critical Dissonance include disagreement between a work’s revenue and its reviews, simultaneous nominations for both ‘best X’ and ‘worst Y’ awards (bonus points if X=Y), and angry comments on those review sites that have them. Note that both Rotten Tomatoes and Metacritic user</ scores should never be used to evaluate whether something falls under this trope since its voting system is extremely susceptible to manipulation That the main differences between the average audience viewer and the average critic are vocabulary, sometimes ego, and employment in the field of journalism, that is what makes the large contrast between viewpoints either fascinating or predictable, depending on your degree of cynicism See also Critical Backlash , Critic-Proof , Bias Steamroller , It's Popular, Now It Sucks! , Opinion Myopia , 8.8 , and Oscar Bait . Could overlap with Pop-Culture Isolation and Acclaimed Flop . Critical Dissonance is often a driving factor behind shows and works being consigned to the Comedy Ghetto . Contrast with Cult Classic where a work tends to have neither critical acclaim nor general popularity, but is enjoyed by a few die-hard fans. Possibly the cause of Mainstream Obscurity No examples are allowed from works that - at the time of posting - were released less than a month ago, or have not finished their first season or theatrical run

This is a particular instance where a story or character features something — a statement, the depiction of something — that is so egregiously off-the-scale in terms of inaccuracy that anyone with a high-school education (or less) and/or a cursory knowledge of the subject realizes the writers made the whole thing up Many of these will be disaster movies or action movies and will use state-of-the-art computer effects to keep your interest . This can be Played for Laughs by having a Book Dumb character make such an error so that a smarter character can spot and react to it, which is In-Universe Factoid Failure , as a character is in-universe wrong Also see Didn't Think This Through , which is less about research failure and more about planning failure. Contrast with the MST3K Mantra (which tells us not to worry about these little details), Accidentally Correct Writing (which is when non-experts think the creators are wrong, but experts know the creators are right by complete accident) and Like Reality, Unless Noted (where what appears to be a research failure can be written off as the result of an Alternate History or Alternate Universe) For examples of research errors regarding media, see Cowboy BeBop at His Computer . See also Dan Browned , for situations when an author falsely claims they did the research. For downplayed inaccuracies that require more in-depth knowledge to notice, see Artistic License and its subpages. If it's specifically math that is off, see Writers Cannot Do Math . For cases of a character</ getting something spectacularly wrong and the work acknowledging it, see In-Universe Factoid Failure . For mistakes about details from within the story itself, instead of mistakes about real-world things, see Continuity Snarl and Series Continuity Error

A list of tropes based on how the viewer/reader/player sees things from a critical perspective.

Sometimes a movie, book, game, TV show, or song is released, and the critics hate it. They just hate it. Entire forests are destroyed printing scathing reviews that dissect such media down to the bone, showing in every possible way that the general public should stay away in droves, and even go as far as to place it on "Worst [X] of All Time" lists just to show everyone how much they hate it. But, no matter how bad they are... no matter how many bad reviews they receive, the public loves it. The movie becomes a blockbuster. The book sits atop the New York Times</ best-seller list. The game flies off the shelves and becomes a must-have. The show is weekly appointment viewing. The song is on everyone's iPod.. The reasons for this phenomenon are myriad and diverse. Critics are people who watch movies/read books/etc. for a living, on average they consume far more media than the average person. They tend to gravitate towards works that are innovative and experimental, being different makes a work stand out more than the average blockbuster/bestseller. They also have to write about works, which means breaking down themes and metaphors, putting far more thought into a work than the average person would even think of doing. This means that obscure art film excites them far more than some generic superhero movie Critics are often not fans of the source material being adapted (if any), so they look upon things from a layman perspective. Some dislike the

style and humor, preferring more 'sophisticated' works. Sometimes the fans are so hardcore that they'd accept anything</ from the source, and sometimes, it's made to be fun </. In fact, many who see/buy the work may not even think the best of it either, but it's familiar enough that it manages to stand out and market itself. Sometimes it's simply become popular through being So Bad, It's Good , or by fans acknowledging the work's flaws but considering them insignificant. There’s also a Vocal Minority who will reject any review and criticism, no matter how legitimate, out of sheer stubbornness Other times, critics (being human, and therefore imperfect), let their biases and misunderstandings of creator's intent cloud the final review , portraying the work as objectively</ low quality. Critics don't always "get" the work the same ways the audience does. There are also some critics who will reject a work simply because it’s popular or not True Art . At worst, critics will only pay attention to works that pander to their tastes More cynically, sometimes everyone, fans and critics alike, know the product is a stinker, but heavy prerelease hype and no small amount of Polish the Turd can put the project in the black long before word gets out. In these cases, usually, the first installment ends up like this but the second takes a dive When no critic in the world can affect a work's popularity, it is Critic-Proof. And even then, some might assume the critics do their jobs as a Failure Gambit Compare Love It or Hate It , Critical Backlash , It's Not Supposed to Win Oscars , Critical Dissonance , and He Panned It, Now He Sucks! . Contrast with Oscar Bait , Acclaimed Flop , Confirmation Bias , Reviews Are the Gospel and Guilty Pleasure . Not to be confused with Protection from Editors

Early reviews for The Looney Tunes Show </ ripped it apart, calling it an insult to the Looney Tunes </ franchise, but that didn't stop the show from gaining (at least at first) huge ratings and even a sizable Periphery Demographic , including classic Looney Tunes</ fans.

A list of people who work as critics and/or review works of art and/or media. A good critic will provide an analysis on the strengths and weaknesses of a certain work and provide his own opinion based on that. The opinion in question can be very subjective and merely follow his or her own view of the world. Or it can be a more general approach where the reviewer may not personally be that engaged or interested in a work, but would still take the time to take a fair and serious look at it and may even recommend it to others Try to avoid listing stuff here that is merely ranting or reviews not meant to be taken seriously Rob Ager : Online film critic. Does not as much review them as analyse them on hidden themes and messages

A list of Croatian media.

Crop circles are large geometric patterns that appear in fields of crops, usually corn (because cornfields are creepy), and are created by flattening the stalks in such a way that each individual one remains undamaged. They are usually presented as being paranormal or supernatural in origin, with the most common explanation being that they were created by extraterrestrials, although the reasons behind why aliens visiting Earth would want to do such a thing varies. This area is a staple of publications such as Fortean Times </ . In fiction, the question of who's going to pay</ for the vandalized crops never seems to arise. Not to be confused with Compare/contrast

Aliens Steal Cattle , a much more comedic way for aliens to attack a farm.

If shaking hands isn't a culture-specific habit, it sure seems like it ought to be. So Science Fiction authors who are trying to be clever will come up with some other gesture for alien cultures to use for the same purpose The trouble is, shaking hands probably developed to its present form because it's a darned convenient thing for our human bodies to do. Obviously, other species have other ways of greeting each other, but the Media Watchdog would never let you show humanoids sniffing others genitalia. There are</ cultural differences in the way various groups go about the whole handshaking thing, but these are fairly subtle and the TV audience might not notice As a result, it seems like a lot of aliens shake hands by grasping each other's forearms, which is actually an old Earth method of shaking hands, by showing that you have no weapons in your sleeves, as a display of trust Compare Crazy Cultural Comparison . Misjudging this can lead to Greeting Gesture Confusion The Undertale </ Fan Fic , , has the Inertia Society handshake, where the two participants press their palms, or palm-equivalents, together

Sometimes, an animated character is better suited for being voiced by a voice actor of the opposite sex. A higher voice is needed for a male, a lower voice is needed for a female, or an opposite-sex actor auditioned and it sounded right</ A common example is prepubescent boys being voiced by adult women. This is because, in addition to the usual child labor laws pertaining to young actors, an actual boy's voice is going to break and deepen from puberty sooner or later. It is possible to replace a young male character's voice actor once he ages out of the role, but it is more economical to cast a single grown woman for the entire series. Alternatively, if a male child is in a cartoon as a one-off, it is easier to have a main female cast member provide the voice rather than going through the trouble of finding a child who can do it. You're more likely to see Children Voicing Children in movies or guest appearances as opposed to regular characters in a series that lasts several years In some cases, when dubbing a foreign work (mostly anime), sometimes there would a be a character where the original voice actor is voiced by a male, yet the dub casts a female voice actor instead. This is caused by Vocal Dissonance between languages and the voice actors, as a male voice actor's vocal range would be so high-pitched that it would be relatively difficult to dub properly with another male voice actor. This is apparently more common in Japanese to English dubs in anime and video games, where a character that is voiced by a man in Japanese would have a female voice actor in the English dub instead, due to the difficulty of dubbing that character with a male voice actor in English. Kazutomi Yamamoto and Ayumu Murase are noticeable examples where many of their roles that are dubbed in English are voiced by a woman instead. It's quite often reversed as well. Teenaged boys, often soft spoken, quiet or effeminate ones, have a decent chance of being voiced by a woman in Japanese, but then are often voiced by a male in the English dub. See Voiced Differently in the Dub for a similar trope The live-action equivalent is Crosscast Role

" Pain is funny. Therefore, more pain must be even funnier!" </ Thus goes the logic in a lot of comedy shows and a few adult cartoons.

Sadly, that's not the case. The line separating The Three Stooges </-style painful fun from outright villainous squicky sadism varies from person to person but is definitely there; crossing it makes one fan's "Nyuk nyuk!" </ another fan's Guilty Pleasures . However, if a show goes far enough with its violence, it may end up crossing the line not once but twice</, as it goes around the planet and crosses it again. This second crossing takes the violence from sick back to funny in its ridiculous extremes. Similar to So Bad, It's Good , but done quite intentionally. This isn't as easy as it sounds. Shows attempting to be Darker and Edgier with their humor this way straddle the line between sadism and comedy, and it's easy to make a mistake and fall on the wrong side of the S.S. Tightrope. Rather than cross the line a second time, the show makes a Wrong Turn at Albuquerque and breaks the audience's Willing Suspension of Disbelief . Some people just don't have a second line to cross in their minds, and will dislike any turn into sadism or vulgarity. This can also apply to things other than violence for funny's sake ; any time a little exaggeration would provoke a negative reaction, but exaggeration Up to Eleven is fine, that's crossing the line twice. Take action scenes, for example: some shows try to keep action scenes realistic in order to seem believable, while others go so far over the top that it breaks the audience's Willing Suspension of Disbelief . Still others take the over-the-top so over the top that what was before unbelievable garbage is now heart-wrenching, adrenaline-rushing, undiluted AWESOME . Of course, this form of the trope is just as subjective as the last, so be careful what you put down as an example. See also Black Comedy , Bloody Hilarious , Refuge in Audacity , Vulgar Humor . If this happens completely by accident, that's Springtime for Hitler . Part of the Sliding Scale of Comedy and Horror . When this trope isn't</ taken to extreme, over-the-top levels, it's mere Comedic Sociopathy . When it succeeds in being offensive but not so much at comedy, it's Dude, Not Funny! . The Hilariously Abusive Childhood depends on this trope, piling misfortune on misfortune until it becomes so ridiculous it's funny. For instance, the Boarding School of Horrors in Bleak Expectations </ would be abusive if the staff beat the students and deprived them of food. That they use the boys as ammo for artillery practice and make them play a game where the smallest boy is chosen as the ball, kicked and punched across the field, and finally has his head shoved in a bucket of manure to score a goal is just silly. This is also the way the Heroic Comedic Sociopath holds the audience's hearts. This character does evil in such an over-the-top, outrageous fashion that the audience stops feeling any moral qualms, because it's so over-the-top and out of line that it becomes hilarious</ instead. Compare Actually Pretty Funny , when even the target of the joke concedes the humor of the situation. For the (mostly) non-vulgar variant, see Overly Long Gag .

The start of a new generation of video game consoles is often an exciting time, as the new hardware offer a wealth of new possibilities for visuals, audio, and game design. However, in spite of these advancements, not everyone jumps on board with the new hardware right away, due to new consoles often being expensive or hard to find soon after they launch, or people simply being satisfied with the machines they already have. This puts game developers and publishers in the awkward position of wanting to take advantage of the new technology while keeping the still-large number of people using last-gen hardware in their

potential audience. The solution to this is the Cross-Generation Game, a subtype of Multi-Platform video game that is developed and released simultaneously or near-simultaneously for last and next-gen hardware This is a more controversial practice than one would think. Technophiles and early adopters of new hardware are often critical of this practice, as such games typically don't take full advantage of the technology offered by new consoles, with the next-gen versions being more akin to Polished Ports of last-gen titles as opposed to true next-generation games. Others appreciate not being forced to upgrade to new consoles immediately in order to play the latest games. Of course, no one likes this practice when it's done poorly, which can result either in the next-gen versions having little to no noticeable improvements over the last-gen versions, or the last gen version being a Porting Disaster due to the older consoles not being able to handle the game This doesn't really happen on PC games, due to both PC's lacking distinct generations for the most part, and because almost all PC games are designed to scale across hardware to a certain extent thanks to graphics settings Compare and contrast Moved to the Next Console , where a game shifts entirely over to new hardware without releasing on the previous generation. If a game has radically different versions on different generations, then it's a Reformulated Game instead. Goes hand in hand with the Daddy System trope, where an older console remains popular and supported even after its successor releases

So, it turns out that All Myths Are True ; you can have breakfast with the God of Thunder, chat it up with the Anthropomorphic Personification of Dreams , or even have a heart to heart with The Grim Reaper . All the while remaining totally un-conflicted about remaining faithful to the Big Guy Upstairs or whichever major religion the characters follow; even Crystal Dragon Jesus can hang with the Powers That Be and get a high five A Crossover Cosmology is different from All Myths Are True in that many of the cosmologies involved are themselves mutually exclusive either in world view, history, philosophy, or all of the above. The issue becomes especially thorny when polytheistic religions with large pantheons are mixed with monotheistic religions and reincarnation-based belief systems. It's rarely inadvertent, either. Black Adam getting his power from the Egyptian gods whereas his successor Captain Marvel gets them from the Greek gods (and one Biblical figure) wasn't a slip-up; neither was making both Hercules and Thor superheroes. Writers have no problem doing this to "pagan" gods, and outside the mainstream they don't have much trouble doing it to either This can be justified from the characters' viewpoint by having them point out that there's no reason they should believe that, say, Thor is a god in the same sense Yahweh is, when there are people who are flying around and summoning lightning, or are even immortal , who are plain old Mutants , metahumans , or aliens . There are even stories where a pagan god or gods convert to one of the Abrahamic religions and worship Yahweh themselves, which to human characters would be even further proof that they're not the same sort of god When taken to the extreme end of the Sliding Scale of Idealism vs. Cynicism it may result in a Cosmology where local deities are weak and irrelevant and Eldritch Abominations and other ancient nasties can and do casually traipse over any local deities' shrines and followers. Even in more optimistic portrayals, one has to wonder at the fairness of a universe that allows Galactus , Darkseid , Anti-Spirals , and Imhotep to exist

Some belief systems work like this; the term "henotheism" exists to describe the belief that all gods exist, but one's particular god is superior. Of course, most people who ascribe to this don't have said gods playing croquet in their backyard . In fact, quite a few non-Abrahamic religions worked this way, as did early Judaism. The Romans believed in Jupiter, and the Egyptians believed in Ra, but the Romans didn't think believing in Ra was wrong, just not for them; they were fine with any kind of worship as long as you skipped Human Sacrifice and paid proper respect to the gods they did recognize. They experienced some amount of confusion in this regard when trying to take over Judea Another option is "syncretism", where you conflate two religious concepts. The Romans did this as well by occasionally claiming other peoples' gods were their gods under different names or by combining earlier strictly Roman gods with foreign gods, hence for example, the "Gallo-Roman" god Apollo Sucellus (combining the Roman sun god with a Gaulish god of agriculture), or Tacitus writing that the Germanic tribes worshipped Hercules (Donar) and Mercury (Woten); this is why certain Roman and Greek gods are all but interchangeable today Variations on the Romans' logic are quite popular in attempts to resolve the massive Continuity Snarl created by multiple similar pantheons coexisting, especially since the myths have often evolved from common ancestors . The Magic Word in this case is "aspect" — deities who closely share an archetype (say, Ares and Mars) are really aspects</ or interpretations of the same god. This even crops up within</ a lot of religions of the Loads and Loads of Characters variety, with Ehecatl being an aspect of Quetzalcoatl , and Kali being (sometimes) an aspect of Parvati . Monotheistic religions either worship the single ur-God of which all</ gods are aspects, or they only worship one of them See also All Myths Are True , A Mythology Is True , The Multiverse , Clap Your Hands If You Believe , Fantasy Kitchen Sink , Fantasy Pantheon , Gods Need Prayer Badly and Magical Underpinnings of Reality

The classic crossover started itself off as a good way to make the best of what you've got — so if you have two shows on your roster, it's a no-brainer to have the shows and characters cross over every once in a while, especially if one of the shows is less popular than its sibling. The popular way of doing this is the "true" crossover, in which a storyline will begin in one series and cross over</ into the next one, encouraging viewers to tune into a show that may be thematically similar but which they do not usually watch. For example, Buffy the Vampire Slayer </ has a handful of episodes where the characters head off at the end, only to turn up in Angel </ straight after. This also works the other way, with a magic amulet in Angel</ turning out to be vitally important for the last-ever episode of Buffy</. This also highlights one of the dangers of crossovers; if you or a fan watched only Buffy the Vampire Slayer</, but not Angel</, this particular amulet appeared to come totally out of nowhere</ to save the day... (See Red Skies Crossover .) Sometimes this is done to provide the lead-in for a spin-off show , as happened with both of the CSI </ spin-offs. Alternatively, a single popular character can cross over from one show into an other for a brief guest appearance; this has the effect of attracting that character's fans from the other show without requiring the writing teams to sync up or creating DVD- and arc-unfriendly episodes. This is very common in comic books, in which most characters are part of a larger universe, such as the Marvel Universe or The DCU . It

happens less often in TV and movie properties based on comic books, since they are often made by different production companies. Not to be confused with station wagons made taller for ease of acces- sorry, because ADVENTURE!, nor with the Star Trek: Deep Space Nine </ mirror universe episode .

The classic crossover started itself off as a good way to make the best of what you've got — so if you have two shows on your roster, it's a no-brainer to have the shows and characters cross over every once in a while, especially if one of the shows is less popular than its sibling. If the two works are owned by the same company, it doubles as Company Cross References . If owned by different companies, it can be a Lawyer-Friendly Cameo .

As a general rule, this is much more light-hearted and less Serious Business than intra-continuity shipping, favoring the Rule of Funny instead of an unironic OTP . These ships are usually labeled as Crack Pairings , but it's not impossible to make some of them seem like they can actually work, depending on various factors When you factor in Non Linear Sequels like the Final Fantasy </ series that have multiple continuities, series with a multiverse and even official Massive Multiplayer Crossover franchises like Super Smash Bros. </ and Kingdom Hearts </, it all turns into Schrodinger's Ship, as it becomes simultaneously impossible and canon-friendly Theme Pairing holds a lot of Crossover Ships. Common Crossover may relate. Series where preferred relationships are not possible or unlikely due to Situational Sexuality requires branching out of that Verse. Crossover Couple is for when this appears in semi-canon, canon, and licensed material, as well as specific fan-works Since there's a infinite number of possible

crossover pairings, don't be surprised if you don't see a crossover pairing that already has fanart, fan videos and/or fanfiction for it here

Due to the simple fact that it's easier and cheaper to rely on actors from the area in which the studio's based, voice acting is usually done in separate regions. This is not always the case. If a work uses two studios based in different areas, then they have access to actors from both regions. To say nothing about home studios for personal use. Please note, this is not about an actor from one region doing work in another, this is about two regions being used in the same work.

There is a vast universe with multiple series taking place in different places/time periods/whatever, and a Cross Through is a Story Arc that starts in one of these series and cycles through several self-contained series (alternating between them), affecting each one, usually with one recurring element or character appearing in all parts. Compare with Shared Universe and Crossover . The trope's name was coined by comic writer for Star Wars : Vector </ , which is an example. Compare the Crisis Crossover (a step up in terms of interconnectedness) and the Red Skies Crossover (a nice big step down.)

Describe "A game of using clues to fill in words and phrases into overlapping horizontal and vertical lines on a grid — 9 and 6 letters" here. As a hobby in fiction, crossword puzzle solving shows that the character is intelligent and good with words—or wants people around him to think he is. Some common motifs are: Also see Smart People Play Chess , Genius Book Club , and Pastimes Prove Personality .

The trope carries rather different cultural baggage depending on which side of The Pond you live on.

A character is minding their own business when suddenly, they find an abandoned dog or other animal. They talk to the animal and interact with it, with the intention of possibly keeping it. They wonder what sex the animal/pet may be, so they pick them up and look at the animal/pet's genitalia, which isn't shown to the viewer. Alternatively, the viewer will find out what sex the animal/pet may be if it lifts their leg to urinate or if someone else says the sex of the animal/pet without checking (which is usually done offscreen) This can also happen to babies when the babysitter or caretaker believes the baby is a girl and are shocked to find out they are a boy when they change his diaper This is, of course, Truth in Television See Your Tomcat Is Pregnant , which may happen when a pet, who is assumed to be male, has babies. Urine Trouble may occur when the character is holding the animal See also Viewer Gender Confusion Compare Crotch-Grab Sex Check and Outfit-Rip Sex Check

Let's say you've got someone with an Ambiguous Gender on your hands Either the Dude Looks Like a Lady or the Lady Looks Like a Dude . The

mystery is driving you nuts , so what's the fastest way to figure it out? Grab a handful of "the merchandise." When it's done to one's own self after a Gender Bender , it's Man, I Feel Like a Woman . After an accident or near-miss or otherwise worrisome body alteration, it's Testes Test . Do Not Try This at Home . It's one of the class of acts that are known as "sexual assault" in the real world. Compare to Crotch-Glance Sex Check , in which a character checks an animal's crotch to determine their sex, and Outfit-Rip Sex Check , which is a more extreme version where a character's clothes get ripped off.

At first glance, they're The Fool . The Ditz . The sort of person you wouldn't trust to screw in a lightbulb without hurting themselves or someone who continually makes a fool of themselves around others who find them a total embarrassment. And no, it's not the act of just Obfuscating Stupidity — they're really like that. Most of the time.</ Then someone pushes the right button at the right time and things suddenly change. The goofy smile disappears. Their eyes start glowing. An aura of energy surrounds them. Little pieces of rock start floating up from the ground. And they proceed to demonstrate the fine art of the Curb-Stomp Battle on everyone involved. It doesn't really matter what makes the character badass when they switch gears. They may display enhanced speed, strength, and martial skills. They might demonstrate latent competence, leadership skills, and courage completely inconsistent with their normal personality. They may Hulk Out , manifest Psychic Powers , MacGyver together a plasma rifle out of a toaster and a tv remote, unleash an Angst Nuke , or even become an One-Winged Angel . Similarly, the reasons for this deceptive outward appearance vary. They may be a genuinely good-natured moron or a kind-hearted idiot who only fights when they have no other choice . They might be a Retired Badass who's gone a bit senile. They may be handicapping themselves in some way that reduces their overall abilities — for instance, the Inept Mage may fumble with Functional Magic because their true</ strength and skill lies in dangerously uncontrollable Wild Magic . Occasionally the character even has a Power Limiter that seals away from their full strength until needed — they might not know</ they have the power, let alone how to control it . The main point is not the powers, but the personality shift that comes with them. No matter what their exact situation is when these characters find themselves in a situation where a badass is needed and they are the only ones available, the guy who's been written off as harmlessly incompetent grits their teeth and becomes a One-Man Army . Common triggers include a friend or loved one in danger (see Mama Bear and Papa Wolf), a Million-to-One Chance scenario, or just a "worthy cause". Sometimes, just getting 'em really, really pissed off will do the trick — although their easy-going personalities make that a rare occurrence. Inevitably, after the dust settles they're right back to smile goofily, tripping over their own feet, and just generally acting like the Plucky Comic Relief once again — while their teammates are rubbing their eyes, and trying to figure out what just happened. Often, the character doesn't actually know himself. In some cases, the character will gradually learn to control his power — although he'll usually still need to Freak Out a bit to use his full</ power — and may evolve into an Idiot Hero , or more rarely, a straight-up Messiah . In other cases, things will go bad. The badass powers are required too often, and they gradually take their toll on a previously cheerful individual. It might even turn out that the individual was once like their badass side all

the time, but somehow 'sealed' that part of themselves away — or it was sealed away by someone else — to keep them under control. Usually results in a Knight in Sour Armor or, in the case of females, an Emotionless Girl or Broken Bird , and their friends wondering if Saving the World was really worth the price. In the worst cases, this can end up as a full-blown Superpowered Evil Side or Jekyll & Hyde scenario. The Japanese term for this is "dame elite" ("dame" meaning no good</). Contrast Obfuscating Stupidity , where the incompetence is just an act; and Minored in Ass-Kicking , where the character acts like The Smart Guy instead of The Fool ; and Mistaken for Badass and Leeroy Jenkins , which are essentially two forms of Crouching Badass Hidden Moron. Compare/contrast Weak, but Skilled , Beware the Silly Ones , Genius Ditz , Heroic Resolve and Eccentric Mentor , which can overlap. If the body count they rack up is unintentional, then we're dealing with Mike Nelson, Destroyer of Worlds or Non-Malicious Monster . See also This Looks Like a Job for Aquaman , where their badassdom occurs because they're in an environment where their</ abilities stand out relative to everyone else's. Crouching Moron Hidden Badass will sometimes occur as a result of Giving the Sword to a Noob or putting The Load in the right situation. Let's Get Dangerous! , which is when a seemingly ditzy or harmless character also demonstrates fighting skill, but without</ the change in personality and may not involve powers. Check out the index for sub-types of this trope.

If there comes a time in a work when the author wants to convey that the community has come together to celebrate an achievement or themselves as a society; or maybe you want to let the audience know the entire crowd backs up a competitor. That is when you'll see the crowd all chant the same word or phrase together over and over again Often, but not necessarily, it will consist of three syllables or portions of the word separated to the rhythm of two quarter notes and then a half note (or two quick beats and a slow beat) . Note, however, that this trope refers to the crowd chanting together, and the number of beats or syllables does not matter In some ways similar to a crowd chanted repeated version of that often quoted "This Is Sparta" from 300 </, and is a cousin to the collective gasp. Similar to the Slow Clap . Related to Crowd Song and Audience Participation Song . A Pom-Pom Girl may be employed to help start these up

A gag which calls attention to the fact that a show has Loads and Loads of Characters . In response to some summons, event, or strange series of coincidences, the show's entire cast winds up in a single shot, often cramped into an enclosed space. Phonebooths were an early version, followed by elevators, but most modern shows put their own spin on this. The humorous absurdity of such a situation is augmented by the viewer's sudden realization that he recognizes everyone</ , or the characters trying to fit everyone into a small, small, SMALL setting Compare Group Picture Ending

It's the big concert that everyone's been waiting for! The music swells and the crowd rises with it, and suddenly you're up off your feet, being passed along like so many beach balls. You've done it. You've achieved the number one goal of any concert goer: the crowd surf. Crowd surfing has three major variants: The trope has

subversions built into it as well:

An index of tropes which require at least one crowd or a large group of characters See also the indexes Our Clones Are Identical and Military and Warfare Tropes (the section "Armies and units")

Some people die of old age, or gradually succumb to one of a number of illnesses. When death comes, the lucky among us will go out peacefully with dignity. Some of us might go out fighting the good fight, saving the lives of some unfortunate person whom our consciences cannot ignore and force us to help. They'll all die "good deaths" (and in some cases, heroic deaths). This trope is not about those people. Some deaths not only suck, they suck beyond the telling of it. These deaths are extremely painful, particularly gruesome, and morbidly embarrassing, so horrific that they leave the deceased absolutely no chance to retain any sort of dignity, forever. These deaths transcend from being merely "bad" into the realm of being "ugly." This trope isn't about just any unpleasant death. Sure, it's bad to get shot in the head...your blood spills all over the floor and you may void your bladder or your bowels . But compared to... oh, being eaten alive from the inside out</, getting shot is a walk in the park. It is worth noting that for the most part, creators reserve these events for use as villainous karmic deaths (where the level of horror involved with the death is often part of the karmic punishment) and to get rid of unpleasant people who are Hoist by Their Own Petards ... especially the embarrassing type . If this is done to a sympathetic character, on the other hand, it is usually the point where the killer crosses the Moral Event Horizon , if he or she is not on the other side of it already. If someone kills people like this on a regular basis, chances are they're a Complete Monster . There isn't necessarily a correlation between the visible gruesomeness of the death and the actual nature of the character's death , some deaths that fall under this trope happen offscreen , and it's the very </ of it that makes it horrific. Deaths with a high horrible factor with less visible content can just as easily fall into scary, though. Deaths like this tend to fall into two categories: The first one is where the victim is a rather sadistic villain who deserves it , who you really aren't going to feel sorry for (well, maybe a little...). The second one is where the killer fits that description, and the intent is to show the viewers how sadistic they are (more often than not, it's convincing). Occasionally, the two situations happen in the same work of fiction, with the killer in the second type becoming a victim in the first, which is very much a Karmic Death . Warning: The following contains some serious Nightmare Fuel and Nausea Fuel , with a liberal dosage of Squick . Read at your own risk. As this is a Death Trope , all spoilers will be unmarked ahead. Beware!

Need something to take the edge off now?

A Twist Ending that serves no purpose other than to be excessively cruel</ The Cruel Twist Ending is basically the Evil Counterpart of the Karmic Twist Ending : in the latter, the twist is a form of divine justice, a bad thing happening to stop a bad person from getting away with it (or a good thing happening to someone who deserves it). In the former, it's just Finagle's Law : the universe is a mean place and wants to hurt you. Often, a Cruel Twist Ending

is what happens when a writer attempts a Karmic Twist Ending , but fails to carry it off. It can be used for cruel irony and very dark humour but has to be undeserved and unsatisfying in order to be different from the karmic one Most common in genre anthologies with a darker tone such as The Twilight Zone </: Tales of the Unexpected </, Tales from the Darkside </, Monsters </, The Outer Limits (1995) </ (so often, in fact, that "Outer Limits Twist" was the previous trope name), etc Lighter-weight versions come up very often in shows where Failure Is the Only Option , especially when the show has run for a long time, and the writers need to contrive more and more extravagant reasons why the protagonists can't win. It can also be used as a shock subversion of a stereotypical happy ending. If it's overused, it becomes a Mandatory Twist Ending . If the ending makes you wonder what the point of the story was, it can come across as a Shoot the Shaggy Dog . A particularly dark version can lead to Too Bleak, Stopped Caring . The Diabolus ex Machina also often gets involved. And Then John Was a Zombie is often an example. Compare Not Quite Saved Enough and Sudden Downer Ending . May causes Ending Aversion if it's handed poorly </ This is a Spoilered Rotten trope, that means that on this list is a spoiler by default and most of them will be unmarked. This is your last warning , only proceed if you really believe you can handle this list

A variation of Absolute Comparative that shows up mostly in children's commercials. An advertiser uses completely made-up adjectives to describe their product. Whether this invokes Totally Radical or Weasel Words is up to the reader Portmanteaus with "delicious", "terrific", and "fantastic" see the most use; it's easy to append -icious, -ific, or -tastic to the end of any other word. This trope is often paired with Lite Crème Compare with Perfectly Cromulent Word

The Crusading Lawyer is sympathetic to your problems and help you, though they may need some prodding or screentime before taking your case. Whether suing a Mega-Corp because they poisoned the water supply or defending a client's innocence in a murder trial, that's the lawyer you want. Money will be a decidedly secondary worry for this type, and if you can't afford a crusader's services, there is always pro bono In some cases, a Crusading Lawyer becomes a prosecutor who takes on the most hopeless cases so that justice can be served and will never forget that they serve the people, the law, and the victim. Defense attorney examples are also common. In legal dramas, The Protagonist usually fits this trope if</ he's a Hero Protagonist (a Villain Protagonist may be crusading for another cause and be opposed by a Hero Antagonist who more closely fits this trope). If you're in a Crapsack World or the protagonist is an Anti-Hero , they may have started</ as a Crusading Lawyer before turning into the Well-Intentioned Extremist version of an Amoral Attorney . If a Crusading Lawyer lives in a Crapsack World but continues to live up to this trope, expect them to have at least become a Knight in Sour Armor . If the character happens to be "quirky" as well as a competent lawyer, you have a (literal) Bunny-Ears Lawyer . The two tropes aren't mutually exclusive, and a Bunny-Ears Lawyer may turn out to be a Crusading Lawyer underneath the Courtroom Antics . If the crusader loses and goes beyond the bounds of the law, they've crossed the line and become a version of the Well-Intentioned Extremist . This can be permanent, a form

of Character Development (particularly when done in reverse), or temporary. Contrast this trope with other lawyers who are Only in It for the Money . These kinds don't care who you are or what they are represent at court as long as the bill gets paid. You can also contrast with amoral attorneys who will do anything to win, regardless of the broader impact and with no concern for what's "right." Compare to Good Lawyers, Good Clients . A Crusading Lawyer can appear outside of criminal cases — civil litigation is hugely</ expensive, so the crusader may decide to fight for a nobody in a police brutality case. In criminal law, crusaders may defend the obviously guilty to uphold the right to a fair trial, if the letters of the law do not fully suit the situation , or because of broader issues related to the case. Depending on where the work in question falls on the Sliding Scale of Idealism vs. Cynicism , it's possible to see two crusaders in head-to-head battle.

Love — even Puppy Love , perhaps especially</ Puppy Love — makes the young and innocent blush. Whether speaking of the Love Interest , realizing that you are the Love Interest , being caught studying the Love Interest (especially by the object of study themselves), declaring that She Is Not My Girlfriend , or actually talking to the person, expect the character to turn red, still more so if the Love Interest expresses affection or praise. Very young or innocent characters may evince this even when an attractive person seems to notice them, or when they witness other characters in love. Less innocent ones may be driven to it only by the Love Confession . Because it is out of control, the Tsundere and those Oblivious to Love may be betrayed by it People prone to the Luminescent Blush or Blush Stickers are bound to suffer these. The Celibate Hero is often but not always prone to it. An apparently hard-bitten character who evinces it is revealing a soft side to himself. Adolescents are particularly prone to revealing they are not as grown-up as they pose as. This may be accompanied by a giggle Very much Truth in Television , as the reaction is involuntary and triggered by emotion. Many people of both genders have felt or been told to have one of these in real life Contrast Gibberish of Love , which indicates more ineptness than innocence

In visual media, the shortcut to let the audience know that a character has a big crush on someone is to apply the Crush Filter. It's a very specific sort of Imagine Spot , sometimes augmented by the environment The viewer/audience sees the object of affection as they are in their normal appearance, even if they're not perfectly cleaned up, tidy, neat, or groomed The shot then changes to the crush's point of view, and the person they're crushing on is suddenly highlighted to romanticized perfection. The Hot Wind may come out of nowhere to tousle their hair fetchingly. If they're sweating, it's glistening and sparkling like magical dewdrops so they look pretty and rain-kissed rather than gross and sweaty. If they're not wearing makeup, it's suddenly there and absolutely perfect. The entire world has dropped into Slow Motion for them The light may suddenly become all soft and filtered , or full of inexplicable sparkles or bubbles . Red and/or pink hearts may float around the person being filtered. Fireworks may go off, or other aspects of the environment may fall into place as if by magic If their gait is normally purposeful or unflinching, it is now, thanks to the magic of a crush, a slinky, sexy sway. The air may fill with the sound of singing angels, or some other appropriate romantic Mood Motif . How detailed and/or sexualized the fantasy

vision is will vary by how family-friendly the medium is The shot then returns to the object of the crush. If we get another look at the one with the crush, they may be displaying the Crush Blush There are innumerable combinations for the effects that show off the gorgeousness of someone affected by the crush filter — limited only by the imagination of the character (and the creative team) Sometimes, in a story the narrator will launch into Purple Prose whenever the object of the crush is mentioned The Crush Filter may also be part of a montage in which the besotted imagines meeting, courting, marrying, raising children with, growing old with, and finally dying happily beside the person they thus envision The Crush Filter can be applied for a long-term crush, a child's Precocious Crush on someone older, or for Love at First Sight The person being viewed through the crush filter is not Always Female , but frequently is Sub-Trope to Imagine Spot . Related to Bishie Sparkle , Gaussian Girl , Holy Backlight , Hot Wind , Mood Motif , Heart Symbol , Everything's Better with Sparkles , Pretty Butterflies , Love Bubbles and Empathic Environment

Alice has something that is very important with her that she trusts Bob will keep safe. Bob, however, is a klutz or just an asshole , and the second Bob is handed Alice's MacGuffin , it winds up falling into the street where it is immediately run over by an oncoming car But maybe it doesn't look so bad. Maybe there's small hope that what has been broken could be salvaged Just as Bob is about to suggest to Alice that it might not be so bad, another</ car comes by and runs over the MacGuffin again</... and another... and then a truck!</ By the time the steam rollers show up, you absolutely know for certain that Alice's item is completely wrecked Next, a marching band heard in the distance comes by and tramples over the crushed mess as they pass... followed by parade floats, a row of elephants, and army tanks Finally, something considerably smaller compared to what came before (such as a man on a tricycle or an old lady with a cane) runs the MacGuffin over one last time just to sprinkle one last pinch of salt in the emotional wounds Crush Parade is essentially an exaggerated form of Squashed Flat where an item that's either highly valued or greatly needed by a character that winds up falling into a street to be predictably crushed and flattened is Played for Laughs in an over-the-top, absurdly comedic fashion, usually at the expense of The Woobie or The Chew Toy When this happens to actual characters, this can be a more literal form of a Mutilation Conga or a variant of Rasputinian Death This is very common in Animation genres where a gag like this is more of an Acceptable Break from Reality

Comic Books Fanfiction Film Video Games Western Animation

He — and it is always he — is a caretaker, janitor, groundskeeper, or better yet, gravekeeper, who is crusty, uncouth, or otherwise lacking in people skills Popular in horror, because there's a lot of overlap with The Igor , Sycophantic Servant , and The Renfield Then, may also be the Old Retainer , in which case he is often the Jerk with a Heart of Gold . Expect the children of the house to love him despite his rough exterior His female counterpart is the Creepy Housekeeper . Compare Creepy Gas Station Attendant The janitor who takes care of Freddy Fazbear's Pizza in Something Always Remains </. He's pretty blunt in his belief that he thinks Mike won't last the week, as he's seen security guards come and go,

refers to him as " kid " instead of by his name, and overall has a callous attitude.

Alright. It finally happened. You just had sex, and it felt so good . It felt so good you feel like you could just cry. And you did Reasons behind this can vary. Sometimes it can be the psychological loss of self from the experience. It could be feelings of inadequacy, either due to a need to compensate or because they could not experience the moment just a little longer . It could be that the high emotions raised during sex brought up buried feelings While normally Played for Laughs , sometimes this trope is invoked at some point because the people who do it do it because they really needed Sex for Solace . Or worse... Defiled Forever </!!! Afterall, Rape Is a Special Kind of Evil Either way, that glaring, dissatisfied look on their partner's face says it all Contrast Smoking Hot Sex (where partners have a different post coital reaction)

We all know the expression "to cry oneself a river" is a figure of speech, right? Well, not always in Fictionland. This is for when a character's tears could at least fill a bathtub, but sometimes they could fill an entire ocean It's usually a gag trope, used to perhaps bring some levity to an otherwise sad scene, but other times it's exploited by having people actually swim in the tears or whatever Sometimes, the character doing the crying is huge (a giant , a large dragon, etc) so you have a good reason for their producing that much saltwater. Other times, they're regular-sized but cry that much anyway, due to Rule of Funny or because they're just that sad</ or whatever the case may be Not to be confused with Ocular Gushers , which involves tears spurting out like a fire hydrant, but doesn't necessarily involve the tears accumulating in a large pool. The two do often occur together, though. Compare Swiss Army Tears . May result from Giant's Droplet, Human's Shower

A variant of the Security Cling , but differs a bit in timing and execution. Usually, this will take place after a large emotional ordeal when some character, in search of some catharsis, will finally just break down and bury her head into someone else's chest, sobbing and weeping There are two main varieties. If the character whose shirt is being used as a handkerchief is male, the character crying will frequently be female, and the reason this situation is occurring is due to a height differential, since men are on average taller than women . The point will be to accentuate the guy's stronger, more protective attributes. Frequently, the two are a couple, and in this case, it will serve as a sort of Cry Cute If, on the other hand, the chest belongs to a woman, the relationship will be closer to that of a mother and child, and the woman's more motherly attributes will be emphasized. This case is far less likely to be between love interests (though there are exceptions), and the two characters are a bit more likely to be same-sex. If a woman's more "motherly attributes" wind up in a character's face by accident, it's a Marshmallow Hell In another variation, the chest belongs to a person who has just died and this trope becomes a variation on Pietà Plagiarism as the crying person mourns them In all forms, this trope is likely to double

as a Tear Jerker and Heartwarming Moment for the audience since it often serves double duty as a Sadness Trope and a Love Trope A Sub-Trope of Cry Cute and The Glomp . Compare Funbag Airbag

It is said that laughing and crying are very close actions, despite usually expressing opposite emotions. So close that, in fiction, a character faced with a dreadful situation may start laughing out loud, gradually growing more and more discordant and strained, before that laugh progressively melts into sobs. When this happens, the initial laughter is usually just there to mask the distress, and isn't so much genuine as it is a hysterical reaction. It's sort of a way to say, "My emotions are out of control; not even my body knows what to do right now." It can also be done as a form of Mood Whiplash , where the character is in the middle of a laugh and learns bad news, immediately making them switch to tears. It has nothing to do with laughing so hard that you have tears in your eyes. It's also sometimes used by actors to cover for Corpsing , in scenes where they can get away with disguising a fit of the giggles as violent sobbing. This trope is surprisingly prevalent in Real Life with some often resorting to laughing when faced with any depressing or traumatic moments, before starting to express their true grief in tears. A subtrope of Mirthless Laughter . Also compare HA HA HA—No , Laughing Mad , and Tearful Smile . Related to Made Myself Sad .

For such an advanced technology, cryonics is subject to a surprisingly high failure rate. Whenever our far-future heroes discover some long-forgotten set of Human Popsicles , at least one of them is inevitably dead or otherwise can't be revived. (Mainly so they can give a good skeleton scare .) In some cases, this is practically a "cherry popsicle" in that a great number of the unrecoverables are insignificant to the story. This might be an example of Truth in Television , though, given the real-life uncertainty of the process. For the situation when someone is frozen and then deliberately smashed to pieces, see Literally Shattered Lives .

Some science-fiction works don't risk putting their dangerous criminals in a Cardboard Prison , instead they freeze the criminals . It makes sense, they can't escape without outside help while in cold sleep (and you don't need to feed them), but you have to wonder if it's punishment enough. Sometimes the pacifistic future society needs someone to teach them how to fight again, or after civilization collapses some foolish adventurers will unlock a cryotube and accidentally unleash a monster There is some Fridge Logic involved in the premise. It's not really a punishment, discounting future shock after long periods of incarceration. Most of the time there's no opportunity for rehabilitation. Also, there is no aging while in suspension so the prisoner is not losing a significant part of his life while doing time. Really all it can do is remove a dangerous felon from society, like life imprisonment or execution. And unlike execution, cryonics could potentially be reversed if the inmate turns out to have been framed or otherwise innocent, or someone has need of their particular skills A common cause of Cold Sleep, Cold Future , frequently results in a Fish out of Temporal Water ; it may also be a case of Sealed Evil in a Can . Compare Crystal Prison

If older style computer or TV screens are recorded on film, the scan lines on the picture tubes can become visible, making a mess of the image that was easy to see by everyone but the camera. This is because the TV's scan rate and camera's frames-per-second are not synchronized, and as a result, a black bar repeatedly rolls up or down the screen There are two ways to avoid this. First, there are ways a television screen can be specially synced up with the camera. This is surprisingly difficult with older technology. Indeed, nobody completely figured this out until 1982's Videodrome </ , although a few productions managed it with black and white monitors Second, the images on the TV/computer screen can instead be added as an optical effect in post-production, with the result that now a clear picture appears. This is a less sophisticated effect, so you tend to see it more often only in older productions. Sometimes, the FX-inserted image is suspiciously crisper than everything else around it. Another dead giveaway is the shot suddenly moving to an extreme closeup of the TV screen, with only a dial, button, or paying brand name visible off to one side to even clue the viewer in that they're being shown the same screen that other characters are looking at, and not switching scenes entirely Rarely seen on newer shows because of advances in special effects and new monitor technology, but just about any sci-fi series from the 60's or 70's will have at least one example Contrast Deliberate VHS Quality and Raster Vision

After passing the " big, shiny and sciencey! " period, a highly developed civilization can enter a stage where technology continues to advance, but becomes a lot sleeker and subtler. At the same time, society gets epic. Jumpsuits will start being replaced by togas, robes and such garments, bustling mega-cities by brilliant arcologies . There will be crystals . Lots and lots</ of crystals . This world of tomorrow may end up looking much like Ancient Greece or Rome (the theme-park Cecil B. de Mille version at least) while still enjoying ultratech comforts It's kinda like the civilization-scale equivalent of crossing the Bishōnen Line Any society with Crystal Spires and Togas holds a high chance of being ruled by Philosopher Kings , and populated with Perfect Pacifist People (or aliens, as the case may be) and requires others (namely The Hero and his squad) to take up arms for them . Occasionally they occur in the past , A Long Time Ago, in a Galaxy Far Far Away... , since decimated by some catastrophe with perhaps a single surviving Advanced Ancient Acropolis . Sufficiently Advanced Aliens are not the same thing, but as beings who can do anything with no apparent devices, they could be a logical outcome. Thematically it may play opposite number to a society in Medieval Stasis . A common subversion has this kind of atmosphere only for the rich and powerful, while everyone else lives in a Used Future The rare cases where a future society is genuinely not a Bad Future might look like this, but even some Bad Futures still do The same sense of style permeates other facets of society, not just clothing and architecture. Instead of a president or an assembly, the Minbari are ruled by the Grey Council, the Nibblonians from the Hall of Forever (which also hosts the Feast of a Thousand Hams), and the Eldar by the Farseers While there's a definite trend towards giant and architecturally impressive glass towers in the modern era, the trope hasn't quite made it to the status of

Truth in Television yet — aside from a conspicuous lack of togas, robes, or unisuits, these shiny new buildings aren't part of the sort of sweeping social movement this Trope describes but individual corporations jockeying to display their wealth . Utopian cities they are not; very real slums crowd their feet As TIME</ magazine put it, this is nearly the opposite of Steampunk , as Steampunk seeks to make technology more visible, easier to connect with than the sleek shiny technology of this era. Another opposite would be The Apunkalypse , where the future belongs to violent, shabby-looking vandals. Compare with Defector from Decadence , Space Elves , City of Gold and Space Brasília . See also Power Crystal and Data Crystal , for the Plot Device version. Cyberpunk was created as a reaction against this particular Science Fiction trope

An index of all media originating in Cuba Western Animation

Symbolic horns are used as a visual shorthand to indicate a man whose wife cheats on him . This may involve allusions to horned animals such as bulls and stags. The symbolism is more rarely applied to women whose partners are unfaithful While in English-speaking countries this has been a practically Forgotten Trope for over a century, it still thrives in European and Latin American countries where the word for cuckold literally means "horned", the Italian word "cornuto" being perhaps the most widely recognized example A prank in various European and Latin American countries is to surreptitiously hold two fingers behind an unwitting victim's head, giving them cuckold horns. The American variation is the Bunny Ears Picture Prank , which is done with different fingers and doesn't have any negative connotation besides looking funny. Incidentally, do not</ show the "hook 'em horns" symbol to people from those countries, because that gesture means "Your wife's sleeping around" to them, and it is a very</ ugly insult that has led to fights See also Horned Humanoid , Warding Gestures , Emasculated Cuckold . Contrast Crown of Horns

It's the Big Game , everyone is in the stands and excited. They can't wait to see what happens, to hear the announcer as he or she comments on the action and keeps the crowd up to date. Too bad said announcer is off in his own little world and not really paying much attention to the actual game The Cuckoolander Commentator is, as the name suggests, a Cloudcuckoolander whose job it is to announce, comment on, or otherwise narrate on what's going on at an event. This will cause, at the very least, an Unreliable Narrator and will usually require a straightman second announcer to act as the Cloudcuckoolander's Minder It's less common to see such announcers in a serious event or setting, unless the story in question is a comedy in the first place. More commonly it will be a relatively informal affair, and indeed the Cuckoolander Commentator may just take up the job himself without anyone asking (or particularly wanting) them to do so If the character does appear in a formal or major setting, it could be that the Cuckoolander is actually a deliberate act. A characterization the announcer does to add some flavor to the job and add to the witty banter between a co-announcer or host Compare Large Ham Announcer , which this trope can overlap with, since the Cuckoolander Commentator's antics can

easily be part of the Funny Moments for a work. Tends to be the Wise Guy half of a Straight Man and Wise Guy duo May also be The Announcer for a game show, in which case any Cuckoolander qualities may indeed be an intentional act for entertainment Currently, this trope is envisioned for announcers at particular events or shows, rather than the general narrator, though that may change depending on examples. Also, it isn't intended to include merely snarky or funny commentators. Cuckoolander Commentators are</ usually funny, but it's often because they're so out there and, barring the deliberate act clause, usually aren't doing it intentionally

A gag in which a character is reading something aloud, and accidentally cuts himself . (Beat .) Off in the middle of a sentence by stopping too early. The truncated sentence is still grammatical, so it sounds like he's saying something complete . ...ly different from what he meant, and it takes a moment for the audience and the other characters to catch up with the new information and parse the sentence correctly. This usually results from trying to read from cue cards , note cards or a screen that doesn't scroll quickly enough. A similar catch-up effect can occur if an unprepared character encounters a or a headline. Sometimes a part of Bad "Bad Acting" . Averting this is why a lot of instructions begin with a direction to fully read all instructions before starting. Compare Bait-and-Switch Comment , Reading the Stage Directions Out Loud , Stopped Reading Too Soon , and Telegraph Gag STOP .

In comedies, clock dials are occasionally seen with one or more of the numbers replaced by a non-numerical word or picture telling what will happen on the hour A slight variation of this is when a character creates a fictional time based upon the actions of one or more other characters

This inherently punny Hollywood trope is where, all of a sudden, a pool table is shown at an angle. A shot is made, balls fly in any which direction they are set to fly in, then the camera pans up to show the player, a typically shady, or at least "biker" type of guy in a cowboy hat . Bonus points if a jukebox is playing country music in the background Related to Bad Guys Play Pool , but this one is not a character trope, it's a scene-establishing device Subtrope of Establishing Shot

A picture is worth a thousand words, but sometimes, even a nice still image won't do. You want to really emphasize on your point, in this case, the fact that the place you're showing is a mess, so what do you do? Make something fall over in the background , obviously, so the audience knows just how much the place is in shambles. This trope will usually play out in two ways: The main characters have just had a big fight. It was brutal and half the building they are in just got trashed, but they emerge victorious. The characters then continue with their quest, and the following shot shows the place lying in ruins as something falls over or breaks. The main characters have, in one form or another, found themselves in a place that needs tidying up and/or fixing (badly). One of them might say something along the lines of "This place isn't a mess" or "We'll clean this up in no time!" which, as a form of the universe laughing at you, will have something falling over or breaking. In both scenarios the trope is invoked for comedic effect, although the former one is usually to

show how badass the characters are that they are nonchalant as if big fights trashing buildings are normal and expected (as per the Rule of Cool), while the latter is a form of Instantly Proven Wrong . Note that while the above are the two most likely</ scenarios there are also other situations where this trope is invoked, usually when whatever the characters are doing end up with everything trashed. Compare Free Wheel . See also Cue the Rain , Gilligan Cut .

This is what happens when Finagle's Law , Tempting Fate and the human tendency to spout hyperbole when a simple "never" would suffice all get together and have a drunken party with hilarious results When circumstances conspire to incite someone to exclaim that something would happen if and only if something everyone knows</ is impossible occurs — "when Hell freezes over" (nevermind that according to The Divine Comedy </, the final level of Hell is</ frozen over) and/or "when pigs fly!" and/or " when pigs fly over the frozen landscape of Hell! " — you can bet that by the end of the episode we will see pigs soaring majestically over the landscape or Satan running ski slopes while sipping hot cocoa Compare No Man of Woman Born , Ironic Echo Cut , Retroactive Wish , Instantly Proven Wrong , And I'm the Queen of Sheba and Or My Name Isn't... . See also Kitchen Sink Included . Moving the Goalposts can often follow

A character has been shackled or put in handcuffs and upon being released they must rub their wrists. Somehow this not only stops the pain but removes all physical evidence that the character was chained up to begin with. In fiction land, having your hands tightly bound for long periods of time usually only causes mild discomfort.

The air that every Geek breathes, a Cult Classic is a film or other work which has a small but devoted fanbase. Such fans are often proud of their membership of the cult and may resent it when the object of their devotion becomes a mainstream hit. Some Cult Classics are obscure commercial failures at the time of their premiere which have since then successfully attracted a fanbase, even to the extent of becoming moneyspinners. Although this is the common public perception to a Cult Classic, some Cult movies were in fact box-office successes at the time but maintained a cult following long after public interest has moved onto the next flavour of the month. It's probably for this reason that some films with a strong cult following (eg The Blues Brothers </) are sometimes wrongly assumed to have been unsuccessful at their time of release Cult classics have an unusual shelf life, and seemingly avert the Popularity Polynomial completely. Rather than receiving a short but large burst of popularity before ultimately fading completely into obscurity, cult classics receive a marginal amount of attention almost indefinitely. It's a good bet that a show or movie considered a cult classic 30 years ago will still be such today Though some movie studios have intentionally tried to position releases as Cult-Classics-To-Be (like MirrorMask </ and Snakes on a Plane </), perhaps hiring a bunch of cult actors and funky music , it is not usually successful. A true Cult Classic is as rare as capturing lightning in a bottle Note that not all cult classics are actually good</. Although many of them are, or at least, are remembered as such . In fact, many cult classics are hilariously bad — which is why</ their fans adore them

. These are sometimes called "Camp Classics" See also Critical Dissonance when the critics hate it, and Critic-Proof when...the critics hate it, also. If it's a critical darling on the art-house circuit, but has no following beyond that, that's the other</ kind of Critical Dissonance . Contrast Quality by Popular Vote , which is the inverse trope. Compare Stoner Flick and/or B-Movie Not all B Movies have a cult following; see page quote. Stoner Flicks are usually considered cult, however Often the term "cult" is (perhaps) inaccurately applied to anything that is both old and has a devoted fan following, even if it was popular at the time</. If the devoted fan following is rooted in it being both old and critically-acclaimed, and thus popular with fans of classic works in general (e.g. The Marx Brothers), it probably doesn't count Also note that "cult classic" is an affectionate English expression for a work of this type, and does not mean that it's a "classic" in the same sense of, say, a "classic novel" or "essential work". Unless the fandom are surrounded by a sea of indifference, such usage is too broad to be meaningful, so works such as Star Wars </ don't count. Otherwise, the phrase would be meaningless, as Roger Ebert has noted in lamenting its misuse , since it does carry certain genre-specific connotations The word "classic" may also be seen as an intensifier of sorts, implying works that have become seen as cult over the years, similar to a Sleeper Hit — due to factors such as Audience Participation , or other engrossing aspects that attract a select audience who proselytize fervently and disdain non-believers One good measurement to use when in doubt, is critical consensus. If a work is commonly described by critics as quirky, fringe, bizarre or off-putting to newcomers, and therefore "cult", then that meets the definition of the trope. If this is actually used as a selling point, then that is a good sign. An even better sign is if critics debate whether or not it's still cult On The Other Wiki , "something of a cult classic" (exact words, always; see for yourself) is a well-worn Justifying Edit When a cult classic actually does become popular, expect geeks to complain It's Popular, Now It Sucks! A standard guide in the cult film genre is Danny Peary Cult Movies List No Examples, Please . The subjectivity of the phrase makes an example list impractical to maintain

A band of religious fanatics, that's who The sort of people who, in Real Life , build isolated compounds out in the middle of the desert. The sort who set out in leaky boats with names like Mayflower</ and cross vast oceans to build quaint little English villages in the middle of the wilderness on a barely-explored continent Even once colonization really gets going, there will still be groups of like-minded religious individuals who pool together their worldly wealth and found themselves a colony of their own, where they will be free from persecution (or perhaps just free to persecute the heck out of any of their number who aren't theologically pure enough) This trope is for both colonies explicitly founded by monolithic religious organizations, whether mainstream or cult-like and for colonies which, some time after their founding, become religiously monolithic due to a sort of revival fervor or the rise of a local charismatic religious leader who converts the vast majority of the population Frequently overlaps with Space Amish , when the rejection of technology is religiously based. Naturally qualifies as a Planet of Hats . If the

cult develops unsavoury traditions that it hides from visitors, the result will be a Town with a Dark Secret One possible outcome when Settling the Frontier

The Cultural Cringe is an internalized inferiority complex that causes people in a country to dismiss their own culture as inferior to that of other countries. Such people will thus tend to discount a lot of their own culture and embrace another country's 'better' culture instead. In fact, it's common for people suffering from Cultural Cringe to disavow that their own country has a legitimate national culture at all</ . There are many possible reasons for this, but one is due to it being true what they say: familiarity breeds contempt. Other cultures seem so much more exotic and interesting when you don't know much about them, and don't have to actually live with their more negative aspects day in and day out. Australian literary critic and social commentator A. A. Phillips named and codified the trope with his 1950 Meanjin</ essay "The Cultural Cringe", in which he observed this behavior — specifically Australian feelings of inferiority towards Britain — in rampant abundance among his contemporary fellow Australians. (This is also why it's a part of Australia's Useful Notes , along with Tall Poppy Syndrome .) This trope is at least Older Than Radio , though, enough so that among the people Gilbert and Sullivan felt " would not be missed " was: This isn't necessarily the opposite of Patriotic Fervor , though it may of course arise as a (possibly overcompensatory) reaction to it. Nor is it quite the same thing as Boomerang Bigotry . Someone with the Cringe may still love his/her country and national heritage despite</ its supposed inferiority. As one may put it, their own culture may suck, but it's still their</ culture. The flip side of (and often combined with) a Foreign Culture Fetish . Compare Internalized Categorism , where the character starts hating themselves for being a part of a culture perceived by others as "bad," rather than merely seeing their culture as inferior to other cultures. See also Boomerang Bigot , where the character might feel anything from their ethnicity to their species is inferior, rather than feeling their country and its culture specifically</ is inferior, in comparison to another country and its culture. See also Cultural Rebel , who may or may not suffer from this trope. Compare also Cargo Cult , and My Country Tis of Thee That I Sting . Compare Stop Being Stereotypical , as something unique to a specific culture can end up being viewed as a stereotype by members of that culture. Contrast Cultural Posturing .

conducted by the shows how Cultural Cringe among nations has changed in recent years; it appears now that Canadians and Australians lead the pack for those who have the most Patriotic Fervor for their country, while Americans (who are traditionally mocked for having "a flag on every building") are actually in the middle of the pack, near Russia in terms of national pride. Japan, it seems, is the country that now suffers most from the Cringe. Further details on the study can be found It's important to note that none of the countries in that study put themselves below 50, suggesting that even with the cringe, on average most people everywhere have a respect for their country

You're watching the dub of an anime or non-American animated series, playing a localized version of an imported game, or reading

a book or manga/manhua/manhwa in translation. You stumble across a cultural reference that you're absolutely sure couldn't have been in the original — it just seems too culturally out-of-place to have been in the original source. Except that it was</ in the original Thanks to the increasingly international nature of popular culture, combined with Pop-Cultural Osmosis , an all-too-familiar cultural reference has managed to make its way halfway around the world, showing up in a completely unexpected place

Cultures do not evolve identically. Even ones with similar backgrounds and languages have something they disagree about, and it just gets worse the more alien the two cultures are. Naturally, this has great potential for writers who want to introduce conflict to the plot, or just want to show off their worldbuilding skill. Some tropes associated with Culture Clash : See Values Dissonance , for when this happens to the audience. Also see Crazy Cultural Comparison , a milder form of Culture Clash played for laughs. There's also Pop-Culture Isolation . Often an element of Fantastic Racism .

Many soldiers in fiction are rough, abrasive grunts who wouldn't know a work of poetry if it hit them during an artillery barrage The Cultured Warrior is somewhat different. He (it's usually a he; if it's a she, she's usually also a Lady of War) knows his history and culture. He'll happily quote Byron or Keats during a battle. Often a Blue Blood , he likes fine wines and opera music and may have gone to a Boarding School . Oftentimes, they simply believe that things like culture are what they are fighting for; without the fine things in life, there is nothing but more war to look forward to It does not need to be evident at first. This is a common form of Hidden Depths Can be good or evil. Compare Officer and a Gentleman and Warrior Poet (usually positive), Wicked Cultured (negative), and Cultured Badass (either way)

The Squad or the Command Roster don't always have the luxury of operating in countries or planets where everyone conveniently speaks English , so it falls to the Cunning Linguist to be the interpreter with the locals, decode enemy transmissions, help them pass themselves off as enemy soldiers, and help interrogate captured POW's In The Squad , the Cunning Linguist is often a white collar officer who has been "just transferred" into the squad, rubs everyone the wrong way, and worse, is completely and hopelessly lost in an actual battlefield. In the Command Roster , they fit in better. Subplots involving the Linguist usually have them grow a spine. Other times the linguist was always a part of the squad, but has been hiding their talents out of fear their friends will think the linguist is like their enemy , or unapproachably intellectual May overlap with other squad archetypes. If their skill with languages is overplayed, they may become an Omniglot . It is also not uncommon for this character to be a Gentleman and a Scholar . Compare The Smart Guy A common subversion of this trope is to land the Cunning Linguist in a situation where he/she doesn't speak the language—often a ridiculously common one, like Spanish or French. Such people tend to have worked in intelligence, where the language skills required are generally more exotic. Another is to simply depict them as being bad at a given language they claim to speak well. See Informed Ability Can easily overlap with the Communications Officer . See also Speaks Fluent Animal This trope is named for the cunning most linguists display throughout a given

movie, always saving the squad's collective asses with only their quick wit and quicker language skills , and is not at all a pun on the word "cunnilingus" (that we took from James Bond) Not to Be Confused with The Power of Language , though these characters will often comment on that trope

When two friends or siblings fall in love with the same person, one of two things will happen If the show is an After School Special or comedy, the friends will fight for a bit and then realize that what they are doing is stupid because " friendship is more important than some guy/girl". The guy/girl turning out to be a Handsome Lech or The Vamp is what usually makes the friends realize this If the show is aimed at an older audience, this Love Triangle will break when one steps aside and allows the other to have a chance at love . This preserves their friendship

Cupid, the personification of Love at First Sight . Always looking for couples to shoot with his arrows to make them fall in love. Sometimes, he misfires and hits the wrong person. The results are sometimes Played for Laughs , sometimes not. Unsurprisingly, the day Cupid often does his "work" is Valentine's Day See also Love Potion and Love Goddess

A fight that's extremely one-sided, where one side just absolutely trashes the other with little-to-no effort. Commonly used as a way of establishing a character as being very strong, especially if the person on the receiving end of the beating is known for being very rough and tough The name comes from the act of forcing someone to lie down in the street and bite the curb, then stomping on the back of their head. This could be very humiliating, especially if they were to die . Even if the victim were to survive, they may be missing some teeth and have a severely broken jaw Sometimes, this is played for humor; other times, it tends to be a Moment of Awesome Sometimes, it actually makes sense by the logic of the story, but writers use Third Act Stupidity to avert it Compare Pendulum War , which is where sides take turns to perform this trope upon each other. In Professional Wrestling , this frequently overlaps with Squash Match . In video games, see Flawless Victory . Breather Bosses , Zero-Effort Bosses , and Anticlimax Bosses are the types most likely to be on the receiving end of a Curb-Stomp Battle. If this is done to the heroes</, on the other hand, it becomes a Hopeless Boss Fight , often from a Hero Killer (or is at least a sign that you're going to have to do a lot</ more Level Grinding to get past that Beef Gate). Compare No-Sell . Contrast Story-Breaker Team-Up . If the curbstompee manages to get a few good hits in to show that he or she is not totally</ helpless, it's a Curb Stomp Cushion . A No-Holds-Barred Beatdown is similar, but much more realistic, brutal, and violent. And more importantly, the one dishing it out doesn't necessarily win in the end. In fact, foes that manage to withstand such a beatdown often get a chance to return the favor . That said, many curb-stomp battles happen to be</ no-holds-barred beatdowns (but it's just as possible for a curb-stomp battle to be over in just a few blows, if not just one , whereas a no-holds-barred beatdown is always</ a prolonged smorgasbord of violence) One-Hit Kill is a subtrope that's Exactly What It Says on the Tin . A subtrope for elections is Landslide Election . There Is No Kill Like Overkill is often the result of a Curb-Stomp Battle. Often paired with The Worf Effect , which it amplifies

We are witnessing a Curb-Stomp Battle . Maybe the Imperial Japanese Navy has caught the American giant sleeping . Perhaps Skynet's forces are ripping the TechCom troops a structurally superfluous new behind . Whatever the case, the losing side is getting it hard </ How do we show that it's not hopeless, or that the losing side isn't utterly incompetent ? Give them some small victory to help counterbalance the stomping they're getting. A Curb Stomp Cushion is kind of like a Hope Spot , except that it doesn't necessarily give the impression that the good guys are gonna win</, just that they're still capable of taking a few bad guys down with them , or fighting back hard enough to make sure that a powerful, nearly unbeatable foe doesn't get to walk away unscathed as a final middle finger. This can also serve to foreshadow that the until-now nigh-invincible enemies may not truly be as invincible as they seem If it is the villain at the losing end, this is likely to avoid Invincible Hero shades overcoming the winning hero, or even worse, nulling out the notion they are the defending side . Possibly also combined with Not-So-Harmless Villain See also Do Not Go Gentle and Pyrrhic Victory , the latter which the surprised curb-stompee is likely to achieve

Just like Pandora should have known better than to open her box , characters in fiction should know better than to ask questions, explore Haunted Castles , read aloud from the Tome of Eldritch Lore , or be curious on general principle . It inevitably starts the plot, which of course starts things moving and gets people dying. If these characters are in a horror flick, such as a Slasher Movie , anyone showing the slightest bit</ of curiosity will die. Or release the Sealed Evil in a Can . Or get their Genre Savvy friend killed as he complains that they shouldn't be there. Or gets them captured . Etc, etc. Outside of the slasher horror genre, the death rate of this trope drops considerably, even if it still stirs up a hornet's nest of trouble. Since curiosity is often the driving force that starts a plot, it can be used to get heroes into and out of several precarious situations. For example, considering the tone of her Web Comic is goofy and mysterious, odds are Kat and Antimony aren't going to be dead at the end of that particular story... though you can bet your second shadow something interesting will happen! Sometimes, it pays to be apathetic . A subtrope of Tempting Fate . Compare Forbidden Fruit , Death by Sex , Too Dumb to Live . In games, can be the cause of Total Party Kill . Often the result of falling for Schmuck Bait . See also Curiosity Causes Conversion and He Knows Too Much . The title is a pun on the idiom phrase "curiosity killed the cat". As a Death Trope , all Spoilers will be unmarked ahead. Beware.

A character, usually a child, who is always</ monkeying with things to see how they fit together, or work, what they are made of, or what they can do. (Always in total innocence.) Generally found with assorted parts of a now-out-of-commission machine scattered about his feet. Or attempting to find out what the Big Red Button does. Or poking the Disaster Dominoes . Truth in Television for anyone who's seen the aftermath of a bored six-year-old with any form of tool Hilarity Ensues Even for this person, Curiosity Is a Crapshoot , but generally turns out well... for the monkey, at least . The Fool often displays these traits when he isn't

an Idiot Hero : given their ability to throw a Spanner in the Works of even the most well-oiled machine, they can sometimes become an Invincible Incompetent Accidental Hero throwing the Clock King 's perfectly planned scheme into smoking rubble simply by asking the wrong questions and pulling levers to see what they do. This form of the trope can sometimes be Truth in Television for gamers who accidentally discover Easy Level Tricks by poking at the scenery and AI Usually the Cheerful Child , and often a Wide-Eyed Idealist when given deeper character development. The Smart Guy , Gadgeteer Genius , or Wrench Wench can show signs of this in the presence of machinery although they usually do less damage. (She may even improve it!) In more cynical works or when used for plot development, a curious monkey can be an Unwitting Instigator of Doom , because they have</ to know what exactly IS in the box they aren't supposed to open . An excellent way to justify a Nice Job Breaking It, Hero! moment, and especially common in the cosmic horror genre Compare with the Constantly Curious , who ask questions for the same reason. A character Curious As A Monkey tends to be a less persistent nuisance, but makes trouble on a much grander scale. Sometimes, they overlap, when the child has moments of acting like either Contrast Little Jimmy , who has no characterization except his ignorance. Compare/contrast Lethally Stupid and Too Dumb to Live who act out of stupidity rather than curiosity, and are far more likely to get themselves and everyone around them killed. The Lethal Klutz does the same thing by accident—God help you if this one overlaps with Curious As A Monkey

Tropes about coins and paper currency itself.

Exactly What It Says on the Tin : a blog whose primary purpose is to cover current events. Sometimes these blogs will link to a big media news story and then have a comments section on that story. People often read those for the comments. </ </ and the Mexican </ are examples of this type. Other blogs are more ideological, and the blog owner will add political commentary to the bottom of an excerpted section from the news story. </ and </ are two such examples of this second type. The second type can tend towards Astroturf , since they are often strongly associated with specific political parties. Still others are just attempts to get Google AdSense money, where "current events" is defined as "whatever's on Google Trends that hour." Please do not add examples to work pages; this merely defines the term .

A character is part way through saying a rude word when they are abruptly interrupted, often for comic effect. Often, the interrupter will finish the curse with his/her first syllable . Likely began as a means of Getting Crap Past the Radar . More common in post-watershed viewing, for obvious reasons, but family shows can also get away with it. Possibly related to the practice of censoring written swear words by blanking all but the first letter, the rationale being that the reader will understand the sentence without being offended. This can happen in different ways: Alternately, this may be enforced by a Narrative Profanity Filter . A character will get in "Oh</ —" and then the you will be informed that the narrator has neglected to transcribe the rest of what was said. The phrase, "Son of a..." is such a widespread variant that it's practically become a valid expression in its own right. Similarly, "Why, you little..." Compare Last-Second Word Swap , in which the expected curse is avoided by saying something else, rather than being cut off. For the non-cursing

variety where important information is cut off instead, see Lost in Transmission . See also Catchphrase Interruptus . See also Subverted Rhyme Every Occasion , for the common case where a speaker sets up a rhyme to lead you to expect a bad word, then says something else. Not to be confused with Curse Escape Clause .

Wait, it's over already? Well, f-

Sooner or later, that something you really wanted nothing to do with is going to be what saves you A character has some "terrible" curse placed on them (if they weren't born with it) that is actually pretty awesome. Often, such characters will bemoan their fate and go to great lengths to be rid of the "curse" instead of taking advantage of whatever cool side effects the curse may have. Other times it's the "reward" for Heroic Willpower . Sometimes a subset of people try to tell them this . The idea that the awesome is a curse may cause some forms of Internalized Categorism Immortality has been done to death under this heading, even garnering its own trope . While eternal life does</ have some understandable drawbacks, excessive emphasis on the negative side can push it straight into Cursed With Awesome territory, where it becomes another trope. The Emergency Transformation of a character often crosses into this, as the condition is considered literally de-humanizing. The Curse That Cures can skirt this depending on the severity of the curse and the illness or injury it's curing as a side effect Vampire protagonists are very frequently Cursed With Awesome The jury is out on the justification of the "curse" of Awesome being Fantastic Racism ; on one hand, superpowers aren't that much fun when the majority of the population believe suffocating you in your sleep is pest control . On the other, it's not like All of the Other Reindeer will have an easy time burning you . But if you keep driving off every Torch-swinging Muggle for a generation or so, you're just reinforcing the Fantastic Racism... On and on it goes This trope is a major source of Angst Dissonance — if not used carefully, then a character being Cursed With Awesome carries the risk of plummeting straight into Wangst or Deus Angst Machina territory, as nothing</ is guaranteed to piss an audience off more than a character complaining</ about having abilities that are, on the face of it, utterly fantastic and that the audience would kill to have. This is especially a risk if a balance between the awesomeness of the powers and the suckiness of the consequences of possessing them is not maintained; if the drawbacks are outweighed by the benefits, then the character just looks whiny. On the other hand, it can make for some great Character Development if the character is saddled with something that is genuinely difficult to live with, but later figures out a way to benefit from it There are also some cases where the drawback is just a straight-up Informed Flaw , or negated by a bit of Fridge Brilliance . The Super Mode can be legitimately terrifying if the person using it loses control of themselves while remaining aware of what they're doing , but not if they only do things that they could just as well have done anyway and are just as beneficial, but now they have an excuse for behavior that might be otherwise unacceptable . The Smart Guy may be so smart that it's said to alienate others and leave him lonely or anti-social , but if he's in a Five-Man Band , he almost certainly has at least four True Companions Occasionally leads to a "No More Holding Back" Speech whether or not the character is unhappy about the effects of their curse The Punishment is an extreme form of this and usually done

to someone that actually deserves it. Also compare Plague of Good Fortune . Compare Unishment , where the "curse" turns out to be something that the character actually enjoys or wanted all along See also the inverse, Blessed with Suck , where the ability given is supposed to be good, but isn't. Compare I Just Want to Be Normal (where "cursed with awesome" is taken in a different context) and Keeping the Handicap (where the character decides that the benefits of staying disabled are preferable to the benefits of becoming abled). Contrast Super Loser . May result in a Curse Is Foiled Again or Living Forever Is Awesome . Both this and Blessed with Suck may connect with Muse Abuse . If a character actually gets over it by refusing to be tormented any longer by the downsides of their "curse", they usually result in a case of Sweet and Sour Grapes ; as the "curse" is merely their own displeasure at their condition, then by moving past it they become purely Awesome

There is the tendency for every magic spell (usually Curses) to have a condition that negates the effect, frequently involving a True Love's Kiss . Maybe the curser is trying to teach the cursee a lesson, maybe they're making it the most unlikely thing imaginable, or maybe there's something in the magic that requires the escape clause in order to function Compare No Man of Woman Born , which is a prophecy that acts as an If/Then Statement. Like that trope, the Curse Escape Clause is usually something ludicrously unlikely (of course, we all know how statistics play out in stories). Playing with the language of the escape clause is common; sometimes the words are twisted around to use puns or less obvious meanings but this is so old that taking it literally has become more common Alas, forbidding someone to do something because such abstinence is needed to break the curse tends to be Forbidden Fruit Not to be confused with Curse Cut Short

Our heroes are faced with yet another impending disaster of the week but would probably be fairly easy to solve. The problem is that the key character for this task has lost his ability to communicate. In Science Fiction , this is often a form of Phlebotinum Breakdown applied to the Translator Microbes . It may result in a Monster Is a Mommy plot. Also, chicken legs are the truth of deciding diarhoe. The name of this trope comes from a structure in the Bible that mankind built to reach the heavens and become gods themselves . The</ God didn't like that, so He made all of them speak different languages to create mass confusion and halt the construction. Often the main reason for Poor Communication Kills . See also Tongue-Tied and Cannot Spit It Out . When the style of language is the barrier rather than the language itself, they're a Strange-Syntax Speaker . JoJo's Bizarre Adventure </ features this plot once during part 5: Vento Aureo

An Adventurer Archaeologist just discovered a new pyramid from Ancient Egypt , and decides to explore it, getting hit by an incredibly lethal curse in the process. Or, if you want to include an Asshole Victim , just somebody who was interested in Robbing the Dead , often ending in Death by Materialism This concept became popularized in Western media after the discovery of King Tutankhamun 's tomb in 1922 led to a rise in interest in Ancient Egypt . Shortly after the excavation, over twenty people died in short order, including its financier Lord Carnarvon. Magazines took these events to be the "Curse of Tutankhamun", printing stories

claiming that King Tut's tomb was engraved with hieroglyphs warning that "death would swiftly follow" those who disturbed the Pharaoh's eternal slumber. In reality, nothing of the sort was written anywhere in the tomb, the idea being entirely made up to sell a story and all the deaths being basically accidents befalling a tiny portion of the over a hundred people involved in the excavations Similar to the Indian Burial Ground , it seems that a pharaoh's eternal resting place is always cursed... Compare Gypsy Curse and Hollywood Voodoo , other ethnic curse stereotypes Sub-Trope of Curse . May have been set by a Nepharious Pharaoh and/or involve a Mummy . The pyramid itself is an Ancient Tomb , and may be a Temple of Doom full of Death Traps

If a character has freaky, cool, or otherwise unusual hair colors, their eyes are liable to match. "Unusual", of course, needs to be taken with a grain of salt when it comes to Anime Hair . Comic books and western animation are also likely to display this trope Some series use this to make a character stand out as being "weird" or "different", especially if it's an uncommon color. Others use this for their entire cast May be used as a form of Technicolor Eyes Not to Be Confused with the carpet matching the drapes

Characters who are meant to stand out in some way in a military, school or other place will wear a "uniform" that is different from everyone else. This is separate from rank although it may be implied that they're too badass for anyone to complain. Also different from a practical reason to be dressed different such as fireproof clothing for a pyrokinetic army. When somebody sympathetic is doing this and getting away with it, it's almost certainly a symptom of Mildly Military . In a non-mild military, it's a way of showing the character's contempt for regulations— probably marking them as an enormous asshole who's too connected to discipline, unless the army deserves</ contempt This may also be a reason for most cop shows to center on plainclothes detectives instead of uniform officers, as even high-ranking brass on the detective side only wear uniforms under specific circumstances. On the other hand, detectives in media tend to select 'plain clothes' with enough similarities to be uniform, making them easily identifiable before they identify themselves, and justifying enough customization to reflect character traits and investigative style Compare Transfer Student Uniforms , where the character still stands out, but from wearing the uniform of a previous school or station, and Bling of War where a military uniform is impractically fancy. Also compare Non-Uniform Uniform , for modifications to a uniform that's still technically within the uniform's guidelines. For a specific variety of Custom Uniform where the differences are intended to point up the wearer's attractiveness, see Custom Uniform of Sexy Often the reason behind this is to get Distinctive Appearances for any characters of importance — in reality, the entire point of a uniform is so that everyone's equal and the same, which obviously has undesirable effects for a story's main characters. As a result, it's a common version of Flashy Protagonists, Bland Extras

The classic, instantly recognizable ransom note made from The individual clippings of letters or words glued onto a piece of The paper. In modern fiction, distorted phone voices have the same

The meaning Real Life justification is, of course, that handwriting The is identifiable. A largely Discredited Trope in modern fiction, The given the prevalence of computers, telephones and other more The convenient forms of covert communication. A modern criminal is The more likely to simply type up a message and print it. Although The note that on every piece of paper they print stating their The serial number. It's also possible to use forensics to analyse The the exact chemical composition of the ink used (which will The vary based on who made it and when they made it) to narrow The down the suspects, meaning a printed letter can be traced just The as easily, perhaps even easier. The modern crook has little The use for taking the time to create a note that can accumulate The fingerprints and DNA evidence, not to mention result in a The suspicious pile of hacked-up magazines

Bob is preparing to take his share of a large item (a pie, money, or, as in the page image, a pizza) that is clearly meant to be split between several persons. He cuts a small, Bob-sized portion out from the main lump — and then leaves that behind while he makes off with the rest. The tinier the initial portion, the funnier the joke becomes: what appeared at first to be moderation and restraint on Bob's part is actually just greed , since a smaller remnant means more for him This is most commonly seen with cake, where Bob will cut a slice and take the rest for himself. It's also seen often with money, where Bob pulls a few bills from his wallet and then his wife Alice takes the wallet. The gag can be further subverted if Bob takes the larger portion and then returns to get the tiny remainder too Taxman Takes the Winnings is a related gag: someone who has just come into possession of a big bundle of money is promptly accosted by the Intimidating Revenue Service , who divvy up the winnings and make off with most of it, if not all. They may even threaten Bob with prison if he doesn't cough up .. Most often seen in Western Animation Compare I'll Take Two Beers Too , Fight for the Last Bite , and Ate It All

A Cutaway Gag is a joke generally found in sillier comedies in which a character says something and the action immediately cuts to a throwaway joke related to what the character said. The Cutaway Gag is usually a non sequitur which has absolutely nothing to do with the plot of the comedy. It is just there to be funny . If the gag is</ funny, no one minds the non sequitur. Of course, if it isn't.. A staple of the Gag Series , or those using Rapid-Fire Comedy (after all, it's easy to have lots of jokes if you don't need them to make sense) These cutaways can be softened if there is a clear Narrator or Framing Device that imitates a person's Derailed Train of Thought , as instead of an interchangeable joke you still get an impression of linear development Compare Big-Lipped Alligator Moment , Imagine Spot , Crazy Memory , Product-Promotion Parade (which this can overlap with), Separate Scene Storytelling . Also an Aversion to the Noodle Incident , especially when they briefly start off with a bit of dialogue that would imply such a trope

They are cute, sweet, innocent, and extremely huggable . Incidentally, they are also varying shades of violent, unstable, and downright insane . Cute and Psycho is a trope that describes

characters who are genuinely</ cute in both appearance and mannerisms but have a completely batshit crazy side. Sometimes there are distinctly different sides which may be shown equally, but other times they are mostly one or the other, the Killer Rabbit displaying moments of sweetness and relative-sanity or The Cutie showing hints of a dark psychotic nature. Often there is some kind of Dark and Troubled Past , or Split Personality to justify how the two aspects of the person can both be genuine, but other times no explanation is revealed. The primary difference between this trope and the Yandere is that the Cute and Psycho character is not driven by an obsessive need to possess a friend or lover. Their motivation, if they have one, can vary immensely. They also don't necessarily have to be provoked to enter their Psycho-state, but can switch for reasons observers would be hard-pressed to determine. Cute and Psycho is a Sister Trope to Killer Rabbit , Creepy Child , Yandere , and Enfant Terrible , and closely related to Face of an Angel, Mind of a Demon , Psychopathic Manchild , and Beware the Nice Ones , though while there is frequent overlap between these tropes being one doesn't necessarily mean a character qualifies for another. If the "cute" part isn't real, then the character is The Fake Cutie instead. Characters of this type tend to be female, though male examples do exist. The Ophelia is someone whose psychosis is part of the cute picture, rather than contrasted to it. In some anime fandoms this character is referred to as a yangire</, an informal fanspeak term which is a portmanteau of yandere </ and kireru</ (a word meaning "to snap or lose one's temper"). It's also used to refer to Ax-Crazy versions of The Fake Cutie . Not to be confused with Fangire , which is a species of monster vampire. While there were instances of seemingly polite and attractive persons who turned out to be psychotic criminals, No Real Life Examples, Please! from Veronica Mars </ . Think he's the sweet, nerdy, helpless guy? Ha. More like rapist and mass-murderer. Have fun!

Like the Old Master , the Cute Bruiser is a living, breathing, and frequently painful lesson in never judging a book by its cover She appears to be a kid, but in battle she fights like a bruiser. Bruisers tend to melee combat focused on punches and blocks. Traditional bruisers are large husky men who win fights due to their size and strength allowing them to both absorb and put out heavy damage. This contrast between appearance and combat style is what makes the character surprising The Cute Bruiser's Weapon of Choice will probably be Good Old Fisticuffs , a club , or martial arts that focus on direct blows to your opponent instead of pressure points or judo throws. They'll only rarely be using a bladed weapon (unless it's a BFS of some variety) or depending on projectile weapons, with the exception of throwing heavy objects . When confronted with a locked door, her likely solution is to just smash it open. In short, she deals out the blunt trauma very well The Cute Bruiser also has some tanking abilities. She is not a Glass Cannon who depends on dodging . (Dodging is acceptable behavior, but a Cute Bruiser can take a blow if needed, and so doesn't depend on it). At the end of a fight expect her to be covered in bruises and scratches, but still with a smile on her face, (assuming the fight was won). She might even be Rock steady , hitting like a Mighty Glacier , and standing like a Stone Wall . Might have Super Strength as justification She is usually The Big Guy in a Five-Man Band , a common subversion of the usual traits associated with that character type. Personality-wise she can vary

quite a bit. She might be a Boisterous Bruiser , she could share some traits with a Little Miss Snarker , or she may just stick with the apparent contradiction of an innocent Cheerful Child who can mix it up in a bar fight. If she is affiliated with a powerful villain, expect to see just how someone with her appearance got to that position Almost always a Pint-Sized Powerhouse . Possibly a Super-Strong Child , in which case she may be a Glacier Waif . When she works out enough, she can evolve into an Amazonian Beauty ; a Cute Bruiser typically has toned muscles, but her muscles are always on the leaner side. If she retains her cute looks well into adulthood, even after she becomes a mother, she becomes an Action Mom . When past the age of cuteness she usually disappears as a character before re-emerging in old age as a case of Never Mess with Granny . Despite what this entry may suggest, this is not an Always Female trope; a young boy who can punch far above his weight would also qualify Super-Trope to Girly Bruiser . Overlaps with Badass Adorable , Little Miss Badass , and Small Girl, Big Gun (when firearms are present) Compare Child Mage and Waif-Fu , which have a similar contrast between appearance and combat effectiveness but using a different combat style. Contrast with the Lady of War who is elegant in combat

Usually, this trope is used for comedic effect, because it's hard to see it coming An extremely cute and/or tiny animal turns out to have a surprisingly loud cry. A gorgeous person has a voice that is grating beyond all possible belief. It often causes fear in other characters until one sees the speaker and is amazed such a horrifying noise could come out of something so innocuous This trope is the flipside of Killer Rabbit , wherein the cute thing looks innocent, fluffy and harmless, but is actually vicious and deadly. Note that some Cute but Cacophonic animals are also</ Killer Rabbits . Beware the Cute Ones Truth in Television , as anyone who has ever encountered a chihuahua must know. Also, having a surprisingly loud cry to scare the crap out of predators is a terrific defense mechanism if you are a tiny, cute animal who can't do much else. Some animals combine this with the ability to seemingly suddenly transform into a vicious monster . Either way, it isn't good for a predator's nerves A common trait of Mister Muffykins , particularly the older, nastier versions. A Cat Concerto can induce this, especially at nights. Not to be confused with Noisy Nature . Everyone</ is louder than they need to be in Noisy Nature In anime , this can combine with a Noblewoman's Laugh for a truly fearsome effect See also Loud of War . Sub-Trope of Vocal Dissonance , and often the result of No Indoor Voice . Not to be confused with a Silly Animal Sound . If the sound rises to the level of a weapon in itself, see Make Me Wanna Shout . Contrast Beautiful Singing Voice For Real Life examples, do not add people as examples of this trope

Cute is Evil is Exactly What It Says on the Tin : cute-looking characters that are on the evil end This trope occurs because, similar to other tropes such as Light Is Not Good , it neatly subverts the audience's expectations and keeps them guessing as to where the plot will go and where characters fall under the morality scale. Plus, the contrast can be just plain funny The phenomenon of people losing the ability to think critically around cute things , so The Reveal that someone or something was Evil All Along can

serve as a nice Plot Twist , especially if the work in question is aimed at a younger audience where one might expect this trope to be averted Cute is often evil in Darker and Edgier works. In extreme cases, cuteness is a sign of someone being secretly an Eldritch Abomination Very often the core of morally questionable, if not outright malevolent, children types such as the Creepy Child , Kids Are Cruel , Deliberately Cute Child , Spoiled Brat , Evil Orphan , Little Miss Con Artist and especially the Enfant Terrible , who exists mostly to enforce this trope If they succeed at causing death and destruction, this trope will likely overlap with Grotesque Cute or end up showing that Evil Makes You Monstrous Contrast Creepy Good and Beauty Equals Goodness . Compare Beauty Is Bad , a milder form. Also see Killer Teddy Bear , Creepy Doll , Psycho Poodle and Monster Clown Compare and contrast Adorable Abomination , which may or may not be evil. In some cases it can be played as a near-inversion of this trope, by creating a cute, friendly version of an Always Chaotic Evil creature. Also compare Adorable Evil Minions , where the cute critters serve as Mooks for the Big Bad or another villain See also tropes such as Cute and Psycho , Corruption by a Minor , Killer Rabbit , Face of an Angel, Mind of a Demon , and Crapsaccharine World

Any "exotic" being (alien, monster, robot, demon, ghost , etc.) bearing a strong resemblance to a conventionally attractive human female, sometimes when there is no reason for her to appear that way. This trope comes in several varieties: Sexy Dimorphism , in which the female members of a nonhuman species are much more attractive/less monstrous, I.E. more human looking, than the males; A function of Men Are Generic, Women Are Special , specifically the idea that male monsters can look... well... monstrous</, but female monsters need things to differentiate them from the male monsters and</ make them recognizably female to the audience (and by "recognizably female" we usually mean " clean , slim, and attractive. "). When the Male Gaze gets involved this results in common design features for female characters in other contexts, like Hartman Hips , Non-Mammal Mammaries , long hair , and Tertiary Sexual Characteristics like dresses or make-up (or bits of anatomy designed to look like a dress or make-up), even if it would make no sense for such a creature to have these features. While this is often done for purposes of Fanservice it can also be for What Measure Is a Non-Human? reasons, as the audience is more likely to sympathise with a Monster Girl who looks more human than one who looks more monstrous. Conversely it can be done for Grotesque Cute reasons, contrasting the monstrous and cute side, especially if they still act</ like the monster they're based on — villainous CMGs in particular are very likely to be Literal Man Eaters . Female One Gender Races are typically these. Although very rare in works targeted towards men, the Spear Counterpart Cute Monster Guy</, is quite common in Shōjo , Josei , Boys' Love , Otome Games and other media marketed to women. The most common example is vampires . However, younger variants of the traditional definition of "cute" (i.e. children) for both genders are a bit more common. Assume that if there is a Monster Mash , the few female member(s) will be Cute Monster Girls. May involve Stripperiffic designs. If there's more than one of them, they'll often have remarkably similar builds. This character type can also be used as a basis for studying social differences and similar themes, since monster girls are pretty, cute and different at the same time to attract a wide audience and detail problems arising

from differences . Subtrope of Monstrous Humanoid . Related to Moe Anthropomorphism and Gijinka in Fan Art circles. Often subject to Fantastic Arousal . Compare Cute Alien Girl , Cute Eldritch Abomination Girl , Cute Humanoid Animal Girl , Cute Ghost Girl , Attractive Zombie , Fem Bot , Robot Girl , Seductive Mummy , and Slime Girl . Related to You Sexy Beast , although males are the more common recipient of that. Also related is Giant Woman , since the majority of giantesses are portrayed as sexually attractive. See also Boy Meets Ghoul .

The closer a character is to something cute, the more likely Cuteness Overload will happen. Get close enough and, if the character has any susceptibility to Cuteness Overload at all, it is certain to happen. </ You have a character who's a normal, perfectly sensible, maybe even slightly uptight person. Then they are presented with a puppy/kitten/baby/whatever, and they suddenly turn into a tower of jelly, going "Whosa cutie? Whosa cutie? You are, you are, yes you are. Da cute widdle thing you are, you... (devolves into gibberish)". Dignity goes flying out the window. Often strikes The Comically Serious , helping to make them seem Not So Above It All . Also a good way to show that a badass character is a big softie at heart . Sometimes, Cuteness Proximity leads to a desire to take the subject of cuteness home And Call Him "George"! ... Well, maybe not George...</ If someone tries to take advantage of this to get a date, the trope's called Animal Chick Magnet . Definitely Truth in Television . See also Cute Kitten and Precious Puppy . When the animal is far more dangerous than cute but gets someone squeeing anyway, that person may be a Fluffy Tamer ; when nobody squees then someone might end up saying " Nice Kitty... " instead. Also, this can go horribly wrong if Cub Cues Protective Parent . Compare Delicious Distraction . See Distracted by the Sexy for the sexy, human variant.

A form of Implausible Deniability used to explain away a suspicious wound or injury. The work also makes it clear that no one buys it, or at least has serious doubts that the "shaving" victim is telling the truth. For example, when the police question a murder suspect, they may find that he has cuts or scratches on his face, consistent with the type of wounds that the perpetrator would incur in that sort of crime (perhaps because someone with a knife fought back). When asked where he got them, nine times out of ten he will say he Cut Himself Shaving. Likewise, a guy who beat someone up will often say that the victim "fell down some stairs" or "ran into a door" whenever being questioned by the cops. There are also stories of corrupt or excessively violent police themselves using the same sort of line to explain the injuries they inflicted on a suspect during questioning. A subversion is a character who really did walk into a door but everyone assumes they're covering. In anime and manga, this trope is usually just explained by all characters as "I fell," and keeping it unspecific. This leads to wondering by the characters, as by the reader, "Fell on what</ ?" Also frequently employed by a Super Hero when he must preserve his Secret Identity by explaining away wounds sustained in battle. It may also be used by someone attempting to cover-up Self-Harm or someone being abused at home (in which case "I fell down the stairs" is a common phrase). Another variant, found in military fiction and military science fiction, has two men — often an officer and an NCO — engage in a brawl in a nice, quiet, out-of-the-way spot to settle some point of honor, with the unspoken agreement being that each will cover for

the other's injuries (frequently by claiming to have been practicing hand-to-hand combat techniques.) This is because in many of these settings, striking a superior officer, regardless of the reason, is an offense worthy of court-martial and with very heavy penalties. For the lethal version, see The Coroner Doth Protest Too Much . If he really did</ cut himself shaving, There Will Be Toilet Paper . Sister trope to (and may overlap with) Bluffing the Authorities and Abuse Mistake . Not to be confused with Dangerously Close Shave , which is about the barber cutting other</ people.

This trope is when a threat — usually a death threat — is Played for Laughs by being a bit, well, odd. This can include a threat that's unnecessarily long and convoluted, and the one making it gets a bit lost; or a threat that simply incorporates some really bizarre elements ; or a pathetically nonthreatening sort of threat ("Do X, or I'll... give you some really evil looks when your back is turned !") Sometimes, Fridge Horror makes the more bizarre elements even more terrifying and Squickier . It's one thing to threaten someone with a sharp knife or even a gun; those cut pretty quickly and can be almost painless (at first; ever heard of the term "clean cut"?). However, going after someone with a spoon dictates hours of potential digging into a person very crudely to get the same effect Rusty and/or dull cutlery seems to be a particular favorite, though This trope is usually seen in comedy, for obvious reasons. See also Cool and Unusual Punishment or Cruel and Unusual Death , for when these bizarre threats are actually effective</. To the Pain is usually invoked if played seriously, " I'll Kill You! " when it's not so convoluted. " I Will Tear Your Arms Off !" is a specific Sub-Trope . Freudian Threat for when the threat focuses specifically on a character's naughty bits. Compare Once Killed a Man with a Noodle Implement

The character is powerful. Really powerful . Like, destroying-galaxies powerful. In fact, they could probably win the entire game by flexing their muscles.. ...y'know, if they actually had</ these powers available in the gameplay . Outside cutscenes, they have less impressive powers. How powerful the character is in battle sometimes seems inversely proportional to how strong they are outside it. In negative situations, this character is Overrated and Underleveled Granted, being this powerful during the gameplay would make the game extremely easy . On the other hand, some degree of consistency is expected between the rules of the gameplay and the rules of the story, and when cutscene spectacle overrides that, the game has a serious problem A flagrant and particularly annoying form of Gameplay and Story Segregation , but under the right circumstances, it's acceptable as seen above. This goes hand in hand with Heads I Win, Tails You Lose . See Slap-on-the-Wrist Nuke for where superweapons aren't as super in the gameplay. Cutscene Incompetence and Plotline Deaths are the opposite of this, though oddly, they're not necessarily mutually exclusive: a character can demonstrate amazing power and skill, and also forget those skills seconds later , or even utilize what seem to be vastly different skills from their ingame counterpart

A song from a stage musical or film musical written for the show

but unused or dropped from the production. The melody to the song can sometimes be found in background music, especially dance music. Often these become "trunk" songs that composers later salvage for reuse in later productions. Like the Image Song in anime, this can add depth to a character for those who know the song and its relation to the show. In the past, the Cut Song tended to be left off the original cast album even if it had already been recorded, so as not to give the impression that it was still part of the show. Nowadays, the Cut Song is a common bonus track on both new and reissued cast recordings. Since movie versions of stage musicals inevitably cut one or more songs from the original, cut songs from movie musicals should not be listed unless one or more of the following apply: Video game tracks are an interesting case; songs that cannot be heard in-game without hacking also double as Dummied Out . This is not about Villain Songs sung by Ax-Crazy Knife Nuts . Also not to be confused with the Long Song, Short Scene , which is where a song is present but receives very</ minimal playtime. See also Movie Bonus Song , Second Verse Curse .

Considering how much our society relies on computers and machinery, it makes sense that we have often considered the possible effects of such things being used against us . Thus, we have many stories where a computer runs rampant or a bomb is set to explode , or someone just built your average everyday doomsday machine. But there's hope yet. Machines simply don't work unless they have a power supply. Thus, when in such a dangerous situation, even if there's no Big Red Button available for the hero's pushing pleasure, it is still possible for the hero to escape the predicament without a scratch. All you have to do is unplug the thing. Simple as that . Scenes in which characters Cut the Juice usually fall into one of three categories: So really, this trope is used in just about any situation where it can be effective or dramatic. Now if only we could do the same thing with those pesky defective robots... See also Have You Tried Rebooting? , It Won't Turn Off , Achilles' Power Cord , Cut Phone Lines . Compare Percussive Shutdown for a more bellicose deactivation method.

Some Video Games (from adventure games to dating sims) like to feature Multiple Endings as a way to increase replay value, by changing various elements and branches of the plot to reflect whatever choices the player made during the game This creates a problem when attempting to make a sequel (or adaptation) based on such a game: Which branch (and ending) of the plot gets to form the canon backstory of the new work? The production team must make a decision, and make one fast, declaring one to be the Canon Ending and cutting the other ones off. They're still canon in their original game, but not with regard to the new work In short, cutting off the branches is when one of the multiple possible endings in a game is considered the canon one in a future adaptation Related to Story Branch Favoritism : the plot branch that receives the most focus is more likely to be chosen as canon in a sequel. Contrast with Third-Option Adaptation , which ignores all the various plotlines and picks an outside choice. When the next work is also a video game instead of an extended universe entry, this can sometimes be averted with Old Save Bonus or Schrödinger's Question . If the branches were selected immediately from character selection, you're using Schrödinger's Player Character . See also Canon Name , where a

character who didn't have a given name at all</ in the first game, is given one in the next. Merging the Branches is a specific form of this where events from several mutually exclusive story branches are declared canon, rather than a single specific branch. See also No Canon for the Wicked , where the hero path is exclusively canon in a franchise with a morality system

The cut is a basic form of continuity editing, and can be used in a variety of different ways across all types of media as a way of moving from one scene to another.

It takes a heroic level of dedication to be willing to die for a cause... but it takes an altogether higher (some would say crazy) level of dedication to be willing to kill yourself</ for a cause. Sometimes, a particularly devoted henchman will not only be willing to kill themselves but will carry around a mechanism to do this cleanly and quickly should the need ever arise. The classic example is the Cyanide Pill carried in a hollow fake tooth — the henchman simply opens the tooth with his tongue, bites down on the pill, and lets death embrace him It should be noted that this takes an altogether far higher level of devotion than that possessed by the standard Mook-for-hire . Absolute belief in the rightness of the cause is necessary for someone to take this step. Therefore, it's usually employed by cultists and secret agents in service to their country. However, it can also be used to imply that the Big Bad is so terrifying that death is preferable to the punishment he would visit upon his henchmen for failure . If you are facing a Fate Worse than Death , a Cyanide Pill would be your friend This one has some basis in real life — though uncommon, various spy agencies have issued suicide pills/devices to field agents to use in case of capture. U-2 pilot Gary Powers was carrying cyanide when he was shot down over the Soviet Union in 1960 but opted not to use it Use of the cyanide pill by villainous characters may be due to the historical use of such devices by many of the high Nazi leadership at the end of WWII who chose suicide over capture and punishment by the Allied forces (see Real Life section below for more details). Allegedly, Adolf Hitler himself, due to paranoia that it would not be effective, took one but opted to also shoot himself Compare and contrast Self-Destruct Mechanism and Leave Behind a Pistol . A Sister Trope to Suicide by Pills , which focuses on any character intentionally overdosing on medicine in pill form to commit suicide. See also Better to Die than Be Killed Death Trope . Spoilers ahoy

In many popular cyberpunk Tabletop Games , cybernetic implants cause "humanity loss", reducing your social traits and essentially making cyberware into a form of Body Horror . Too many implants may reduce your character to catatonia or (far more often) Ax-Crazy on steroids . If these settings also feature Psychic Powers or Functional Magic , cyberware often reduces your ability to use those as well. This trope usually accompanies the broken lesson that only</ cyberware inflicts humanity loss — sure, getting that Arm Cannon will dehumanize you, but not deliberately committing actual atrocities , getting hooked on hard drugs , learning Black Magic , having a mental illness that is not fictional, or other expected sources of insanity. It is also a

Broken Aesop when Ridiculously Human Robots are depicted as more... um... human It does of course make a huge logical difference whether it is just limbs and other body parts being replaced, or if sections of the brain itself</ are being replaced with equipment which may perform inferiorly to, or merely differently from the original. Replacing parts of your uniquely balanced glandular/hormonal system with pumps might not do your personality any favors, either. And that's without even touching on subtleties like how your intestinal flora affect your mind. Characters who are getting encased in a mobile life support coffin usually suffer this not from having parts replaced, but being put in large, scary and clumsy or destructive bodies This trope can be considered a form of Competitive Balance gone bad, as game designers originally used humanity loss to keep player cyborgs in line — without any drawbacks, any Munchkin worth his salt would load himself down with Kill-O-Matic 3000s slaved to his neural systems so he could kill with a thought while his brand new shiny titanium limbs ripped battleships in half. In practice, this wasn't a good balancing mechanism; to a true Munchkin, having your character become a drooling Ax-Crazy psychopath only made it easier</ to justify all that senseless carnage. It's also notable that this trope happened in few (if any) of the original Cyberpunk novels that inspired most of these games Of course, if the cyborg was dead</ prior to the cybernetics being installed, and it is mentioned that parts being reactivated have side-effects or don't work like the original, this is a case of Came Back Wrong In works of fiction, the "humanity loss" is often shown by the character turning evil , becoming emotionless or "hollow" , or possibly even losing their memories Often the idea behind Dark Lord on Life Support . Compare with Magic Versus Science , Science Is Bad , Pro-Human Transhuman and The Mind Is a Plaything of the Body . See also Psycho Serum , Body Horror , Transhuman Treachery and Our Souls Are Different . If the "humanity loss" from cybernetics is seen as something desirable, see Machine Worship . See also Creative Sterility

The originator of the "Punk" genres , Cyberpunk is a Speculative Fiction genre centered around the transformative effects of advanced science, information technology, computers and networks ("cyber") coupled with a breakdown or radical change in the social order ("punk"). A genre that is dark and cynical in tone, it borrows elements from Film Noir , hard-boiled Detective Fiction and postmodern deconstruction to describe the Dystopian side of an electronic society. It is often used as a synonym to the related trope " Techno Dystopia ". The plot will more than likely take place 20 Minutes into the Future in some City Noir , Industrial Ghetto or Crapsack World that tends to be marked by crime, cultural nihilism and bad weather , where cutting-edge technology is abused by everyone for the sake of selfish profit and pleasure . ("The street finds its own uses for things.") Heroes are often computer hackers or rebels , antiheroes almost to a man. These characters — "criminals, outcasts, visionaries, dissenters and misfits" — call to mind the private eye of detective fiction. This emphasis on the misfits and the malcontents is the "punk" component of cyberpunk. On the other hand, major villains are almost inevitably Police States or multinational conglomerates led by powerful businessmen with a number of gun-toting Mooks and corrupt politicians (or even an entire nation) at their beck and call. If the work dates from The '80s , there's a good chance that there will be a theme of East

Asian economic dominance , with the evil corporations being sinister Zaibatsu</ (possibly run by , or collaborating with the Yakuza) and Asian-sounding advertisements, consumer products, brand-names and Anime </ influences liberally scattered around. More recent examples from the Turn of the Millennium and beyond are likely to eliminate the Anime Tropes and replace Japan with China . Expect the scientific philosophy of transhumanism to be a feature, what with Artificial Limbs and cable jacks in the skull that allow access to artificial realities . Artificial intelligences and artificial humans (sometimes corrupted) are everywhere, while Everything Is Online . This leads to a theme of "loss of distinction between real and artificial" on which philosophical and existential conflicts about transhumanism can arise, such as questions on the nature of identity and " What Measure Is a Non-Human? " The genre's vision of a troubled future is often called the antithesis of the generally utopian visions of the future popular in the 1940s and 1950s, but keep in mind that it is not a term that should be applied to every Speculative Fiction dystopia or Bad Future ever in the history of the genre, and does not need to always have an anvilicious Science Is Bad message to it. Cyberpunk tends to be pretty hard on the Mohs Scale of Science Fiction Hardness , usually lingering between a 4 and a 5. This makes it one of the more realistic genres of sci-fi, but also makes older stories be very prone to Zeerust . William Gibson himself, considered the godfather of the Cyberpunk genre, has said that he was massively shortsighted on the advances in technology that would occur over the next three decades . The infamous "three megabytes of hot RAM" in Neuromancer </ are laugh-inducing to a modern audience who consider eight gigabytes of RAM cheap and low-end — and even moreso to mid-2010's audiences who've already eschewed outdated MP3 players in lieu of smartphones that now integrate music playback features into their core systems, along with hundreds of gigabytes (of hard storage, with RAM "merely" in the 32gb range) now considered routine. Technology marches on, indeed. Cyberpunk is also quite distinctive in its focus on Social</ stories in Asimov's Three Kinds of Science Fiction . It certainly has Gadget</ and Adventure</ stories within the genre as well, numerous in fact, but Cyberpunk is a genre that focuses heavily on the impact of technology on society itself, possibly more than any other genre of sci-fi. Given that it's a more cynical genre than others, it particularly focuses on the negative</ impact of technology on society, but with the emergence of Post-Cyberpunk , portrayal of societal impact of technology has become more neutral and sometimes even positive. It's hard to condemn speculative technology when it becomes actual technology and we realize that, hey, it's not so bad. This being said, cyberpunk has also seen a general increase in popularity and interest in The New '10s and into The New '20s , especially toward the former decade's back half. This was spurred on in part by many older, influential works in the genre getting new releases that brought them back into mainstream attention (such as Shadowrun Returns </ and Cyberpunk 2077 </), but also the ever-evolving sociopolitical environment; some people feel that a lot of the genre's predictions about how society would change with technological progress have proven to be eerily accurate , and a surprising number of social issues that early cyberpunk stories grappled with are very much still topical in modern times, prompting re-examinations of the movement that questioned whether it was truly outdated and what it still had to say. See Cyberpunk Tropes and SoYouWantTo.Write A Cyberpunk Story for Cyberpunk's characteristic tropes and what sets it apart from other dystopias. The story may fall on the Romanticism end of the Romanticism Versus Enlightenment

scale. As a movement, it was the successor in some sense to the New Wave Science Fiction movement of the sixties and seventies. Related to Cyberpunk for Flavor , Post-Cyberpunk , and Cybergoth . Of course, several works fit on a continuum between these tropes. See also Cyberspace , Dungeon Punk , Punk Punk . Compare also with Steampunk , which shares some similarities with cyberpunk, and Techno Dystopia , which can have overlap on the futurism side. See also Afrofuturism For the Tabletop game series of the same name, check out Cyberpunk </ .

Here are tropes commonly associated with the genres Cyberpunk and Post-Cyberpunk , sub genres of Speculative Fiction , in particular 20 Minutes into the Future . Both also have strong ties to Film Noir style. To read more about said genres, go ahead and visit their pages. Cool Shades

The idea of a gateway to Another Dimension is quite old. Sometimes the dimensional gateway would appear to be a mirror or book. A computer is both of these. "Cyberspace" is the dimension it opens Rather than go Down the Rabbit Hole into a Spirit World , the character puts on some VR goggles, plugs an Ethernet cable into his skull , or gets "digitized" into data . What do they see when they go online? A pretty nifty 3D world, designed as a Viewer-Friendly Interface made up of Holographic Terminals over a background full of Matrix Raining Code superimposed over Tron Lines . Not only is everything online, you can expect "surfing" from one site/database to another to be handled with all the aesthetic aplomb of a Design Student's Orgasm and to be completely lagless One curious alternative idea that seems to infest many cyberspaces is travel time... The Metaverse of Snow Crash </ has people walking to the shops on The Internet </. This could be seen as the illogical conclusion to the increasingly graphical user interface design evolution from the concise but user-unfriendly command line to drag-and-drop windows and pointers and presumably to the final stages where your avatar crumples up your virtual document and walks over to the virtual bin with it . People in the future clearly have a phenomenal amount of patience with their user interfaces. Essentially, Cyberspace is stylized into a simulation that's virtually indistinguishable from real life , and less of a recreational pastime or tool If there are other webizens or hackers in cyberspace (not to mention AIs and ghosts), they will either be amorphous gobs of light , be completely outlandishly dressed (or have non-human avatars) because there are no physical limitations, or appear exactly as they would in real life (even wearing the street clothes they were wearing as they logged on) Sometimes, a Holodeck Malfunction turns Cyberspace outright dangerous — not just online, but in real life, because Your Mind Makes It Real . It may take an Orphean Rescue to get those trapped out Frequently pops up in Cyberpunk and Post-Cyberpunk settings. See also The Metaverse , which is when society at large uses the Internet this way.

Compare Platonic Cave , Hard Light (where Cyberspace can manipulate the physical world), and Inside a Computer System (which may be completely self-contained and have no connection to the outside world or other people) Consult the Virtual Reality Index for media that makes use of cyberspace in Real Life

Appropriately, the word "cyborg" derives from "cybernetic organism". Where does "cybernetic" come from? The Greek word "kybernetes", which means helmsman. Which makes this one a recursive trope See also Spaceship Girl

The pilots in Martian Successor Nadesico </ all have visible implants in their arms that let them interface with ships and mechs. On Earth they're strictly military, but they're used for more mundane purposes on Mars - so when Martian civilian Akito is zapped to Earth during a Jovian attack, everyone assumes he's a deserter from the war Flight of the Navigator </ plays with this a little , where the robotic ship needed to store some of its data in a human brain while it rebooted itself. After redownloading that data a little Humanity Is Infectious takes place and the ship develops some very human emotions and personality Alien </ : Before Prometheus was released, the Space Jockey was intended to be this; H.R. Giger designed it as essentially an extension of the ship. Dallas remarks on how the creature appears to be fused into the chair The Navigators of Dune </ arguably qualify, albeit without the usual</ biomechanical augmentation; they use Spice Farscape . </ The living ship Talyn (who is himself a cyborg) forms a telepathic link with his captain by way of a cybernetic interface implanted at the base of the captain's neck. It's less for navigation than a instinctual need for a captain due to his native biology with a healthy dose of genetic engineering thrown in

The Navigators of Warhammer 40,000 </ are mutant</ helmsmen, capable of navigating through the Warp and allowing the Imperium to exist. Many officers in the Imperial Navy are so heavily augmented that they're often described as being more part of their ships than autonomous beings.

Crimson Dark

The science of grafting mechanical/electronic enhancements on organic creatures, oftentimes by replacing limbs with robotic parts or even mechanical weapons (such as an Arm Cannon), for instance, though often it's only called cybernetics if it's a smidge more complicated. Cybernetics (from Gratuitous Greek for "piloting", because Everything Sounds Futuristic in Greek) is the study and development of regulated systems; a cyborg (short for For example, a hearing aid sends amplified signal into the ear canal, and can be controlled with a finger on the volume. A pacemaker detects heart rhythms and sends its own impulses to regulate it. A peg leg neither sends nor receives signal, but more sophisticated prosthetics include voluntary control systems, and even some simulated tactile feedback. As Hollywood Science , cybernetics in fiction often involves replacing an entire body except for half a face/chest with mechanical parts and can go as advanced as having a lone brain reside inside a machine , while cybernetics in Real Life presently peaks at ocular implants with low frame-rate and gray-scale vision. If your generic Mad Scientist has

a specialty in robotics, or even dabbles in it, you should expect this trope to come up relatively soon. Those who have been subject to cybernetics are called Cyborgs, as opposed to Androids, which are Ridiculously Human Robots . It's somewhat common in media that take place in the "present," and will almost certainly come up in storylines 20 Minutes into the Future . There's also the matter of how one starts off. Cyborgs include biological humans with parts replaced with machinery, while machines with biological parts added are instead Wetware Body or Organic Technology (or if put together from scratch, an Artificial Human .) Whether or not this detracts from them being a person depends on the series . Sometimes as long as the brain is organic, in lieu of Brain Uploading , it's a person. Sometimes not even then. In the original definition of “cybernetics,” it was the study of constructing machines by mimicking real organisms, e.g. building insect robots that process sensory and motion information like insects do. Thus, “cybernetic organism” can refer to such a pure machine. The “super-prosthetic” part came later, but it has overshadowed the earlier definition. “Bionics” is an older term from the design field, where it meant mimicking nature in order to get an elegant, functional product (see seminal book, </ for multiple examples). It was used much in this manner by Martin Caidin 's early 1970s novel Cyborg</, to describe mechanical prosthetics designed to look and act like real limbs, but in the adaptation of Cyborg</ into The Six Million Dollar Man </ , the "elements of nature" aspect was lost and it became a generic term for the enhancement of people with mechanical parts. Fortunately for those who use it for its original meaning, this definition is seldom seen anymore. Common things used in cybernetics include the Restraining Bolt , the Arm Cannon and Artificial Limbs . On the highest level of tech we have Nanomachines infusing biological beings. Just be careful not to overdo it, if you're in a setting where Cybernetics Eat Your Soul or where they're treated as Power Upgrading Deformations . Often cybernetics is used as an excuse to bring someone Back from the Dead , even if the brain has been dead a while. One can certainly expect some questions about What Measure Is a Non-Human? , and an attempt to take over or “replace” mundane humanity is not out of the question. Of course, it's also possible for most cyborgs to be Pro Human Transhumans . Note that in many cases, a Hollywood Style Cyborg will become super strong or super fast just from replacement of arms and/or legs. Actually, the replacement limbs would require extensive attachments throughout the body , otherwise, the limbs would rip themselves from the body , among other non-optimal outcomes. Outside of transhumanist subculture, cyborgs tend to be viewed as one of the most horrifying monster types in existence by mainstream audiences. If you're trying to convince an audience that your villain is completely morally irredeemable, portraying them as a cyborg is one of the easiest and most effective ways to do it. See its Super-Trope Transhuman for all</ ways of enhancement. May also overlapped with Human Weapon . If you're of a transhuman bent, prepare for a dose of I Want My Jetpack . Contrast Meat-Sack Robot , when organic components are grafted onto an artificial body. Subtropes include: For the DC Comics character, see Cyborg . For the movie, see Cyborg (1989) </ .

This trope, which happens a lot in the less idealistic revenge stories (insofar as revenge stories can get</ idealistic), demonstrates the fundamental flaw in the common warping of the moral

maxim " do unto others as you want others to do unto you " into "Do unto others what</ they did unto you". The actual Golden Rule is about always attempting to look at things from the perspective of others, freely forgiving wrongs, and believing that no one should have to suffer at all, even if they deserve to. This warped form, however, takes this literally as Newtonian Equivalent Exchange "justice" or Call It Karma , not taking into account that acts of revenge/justice are not quantifiable laws of physics but social phenomena . Because of the complex web of genetic and social bonds that one forms over a lifetime, as well as the interactions between everyone entangled in that web, revenge might well begin with you but it most likely will not end with you. If he deserved to be treated how he treated you, his</ loved ones may also believe that you</ deserve to be treated like you treated him too. And yours may believe the same. And so on and so forth. It gets worse if it involves racism, fantastic or otherwise. The result of this is frequently what is called a or Vendetta. Frequently in these stories, no side is completely wrong, no one is really right , both are very understandable, and such stories are usually painful to watch. Moral Myopia often deepens it, when both sides think that treating one of theirs is worth treating a dozen of the others , and so attempt to inflict that many torments and deaths in retribution. The escalating body count creates a vicious circle that spreads out like a virus, causing more and more casualties as it goes on, until it ends with one party (if not both of them) getting wiped out entirely or being stopped. The Cycle of Revenge is one way to show that "two wrongs make a right" is a logically fallacious claim by deconstructing its use as justification for vengeance. It, more often than not, results in A Tragedy of Impulsiveness . Revenge Is Not Justice is often invoked to deter people from revenge or to call them out for following through with their revenge. It's also very common in gangster stories, with the average gangster character avenging the death of a friend upon a rival gangster who may very well have had a similar motivation for his killing, as well as Romeo and Juliet-style Feuding Families stories. A lesser form of this tends to occur when two characters have a prank competition. Very unfortunate Truth in Television , and Older Than Feudalism ; the Lensman Arms Race and Serial Escalation of vengeance upon vengeance makes up much of the history of the human race, with examples like the infamous assassination of Archduke Franz Ferdinand which triggered World War I which then fueled Germany's Roaring Rampage of Revenge in World War II , and blood feuds elsewhere that are still going on to this very day, with no one remembering just what started it, but motivated by all the violence that followed, with each successive revenge motivating the victims or others connected to them to strike back at the one who took the initial revenge. A note on the "eye for an eye" maxim: many ethnologists believe that this wasn't a demand to go out and seek revenge, but rather a ban</ on inflicting Disproportionate Retribution (so if someone blinds you in one eye, you can only half-blind them back, and cannot justify torture or murder). According to this theory, those who laid down this rule believed that this limitation would ensure satisfaction of the Golden Rule for everyone and put a brake on the entropy of such vicious cycles. According to another theory, espoused by Jewish rabbis, the Hebrew actually implies that monetary compensation can be given in place of the eye, with the amount of the compensation to be the same regardless of whose eye was harmed (hence, "eye for an eye"). Unfortunately, given human nature in general, people didn't much listen (especially when "monetary compensation" simply led to unjust

instances of Screw the Rules, I Have Money!), and as a result — as Mahatma Gandhi, a well-known nonviolence activist, is supposed to have put it — "An eye for an eye makes the whole world blind." Kind of makes you wish someone, in an attempt to counter this cancerous mutation of the Golden Rule, learned to Turn the Other Cheek or ask for (and give) Forgiveness , or at least just deliver a Restrained Revenge . But it rarely works , as chances are you'll be punished anyway (for extra salt in the wounds, the enemy in question, especially if a Jerkass who deserved it, will continue their misdeeds unhampered , continuing to ruin the lives of people, you still being one of them). Or you could just exterminate </ the opposing party until there's no one left to want revenge on you . But it rarely works , because there's always a survivor . Or everyone can agree to only take revenge against the wrongdoing individual and to not avenge those who deserved what they got , but Moral Myopia and Poor Communication Kills tend to get in the way. Or as Romeo and Juliet proposed, we can try The Power of Love . But this rarely works either , so... Used poorly, this trope can come off as a False Dichotomy , suggesting that if someone kills your loved one then your options are to either kill their loved one or let the person who killed your loved one get away with it . In reality you can narrow your revenge only to the guilty party (i.e. if you kill my loved one then I'll kill you but spare your loved one). Of course then your enemy's loved ones might try Avenging the Villain . After all, if he was evil to you, it doesn't mean he may not have been loving to them. See Best Served Cold , Feuding Families , He Who Fights Monsters , Remember the Alamo , Revenge Myopia , Roaring Rampage of Revenge , Then Let Me Be Evil , and You Killed My Father . (and, indeed, friendship in general) is quite possibly the flip side of this coin.

A curious phenomenon in which, every decade or so, some aspect of American society which is not normally in the public eye becomes the subject of fad-like levels of interest, which both leads and is led by media coverage of the topic. Curiosity about the day-to-day workings of the group or subculture begins at a minor, almost cursory, level — but over the course of months this interest gets driven to a frenzy pitch as it suddenly becomes necessary</ for every person on the street to know everything</ they can about it. Often, features of the subculture become embraced by society at large, including but not limited to copying elements of their lifestyle, absorbing their jargon, and creating culture heroes This obsessive interest often lasts long enough for stage plays, TV shows or movies on the subject to be made, which usually appear just as the cycle of interest peaks or is dying away. Marketers usually jump on the bandwagon as the cycle reaches its zenith, trying to profit from the vast amount of public interest; it's likely that the sudden commercialization actually contributes to the subsequent, and perhaps inevitable, downturn in that interest As the subculture falls "out of style", there is sometimes a backlash against it. Either way, it is followed by a fallow period, which itself is followed by a more relaxed acceptance of some or all of the co-opted subculture elements. The culture at large then usually remains quiescent for several years before discovering some new subculture to obsess over, thus beginning the cycle anew Cycles are frequently triggered by some innocuous entry into the meme pool, like a popular song or book. See also Follow the Leader , The Red Stapler , Popularity Polynomial

This is a trope that goes through a circular pattern of change, eventually returning to its original form after several iterations Like this: " Fat Guys Are Jolly " gets subverted over time to "Fat Guys Are Kinda Sad And Pitiful". After a while at that value, the audience is expecting "sympathetic" Fat Guys, so it gets subverted to " Fat Guys Are Mean And Greedy ". Once expectations are out there for evil Fat Guys, it gets subverted back to "Fat Guys Are Jolly" Most cycles are bipolar, though, oscillating back and forth between two opposites that mutually subvert (or invert) each other See also Fleeting Demographic Rule , Popularity Polynomial . Compare and contrast with Undead Horse Trope , Evolving Trope

Tropes entailing pessimism, distrust, and negativity in general. A few clues as to which end of the Sliding Scale of Idealism vs. Cynicism you are — or the characters think they are. It should be noted that some of these tropes can qualify as Idealism Tropes and vice versa, depending on the writer's handling Compare Despair Tropes . Contrast Idealism Tropes

List of media created in The Czech Republic or its predecessors.

This is the eternally put-upon superior of an organization police department. They are always strict and by-the-book but can be comfortably relied upon to give a good Arson, Murder, and Lifesaving -style speech. You can always expect them to say that you have twenty-four hours or demand that you Turn in Your Badge , usually at the top of his formidable voice. They frequently worry that the mayor or district attorney will have his ass (and pension) for whatever destruction the Cowboy Cop caused. They will occasionally prove to have a heart by giving his men an inspirational speech. They are the police department equivalent of A Father to His Men . Of course in the By-the-Book Cop 's case, Da Chief would do the exact opposite He is rather flexible in terms of laying down the law and views the By-the-Book Cop 's attempts to find a solution with minimal violence as counterproductive and expects zero negotiations with criminals or terrorists while gladly accepting the Cowboy Cop 's methods if it means nabbing the most notorious. However, he will be quite proud of the cop if he meets up to the expectation stating how he found someone's idealism of justice pulling through and knows when to reel in the Cowboy Cop when they go too far Depending on his milieu and personal tastes, he may be sporting a mustache , wearing suspenders (belt braces), a pistol in a shoulder holster, or a cigar firmly planted in a corner of his mouth . Frequently (though by no means always) Da Chief is a Reasonable Authority Figure , but just as frequently they are a Mean Boss . Sometimes a Private Detective will have him as a Friend on the Force . If they are not friends of the main characters/group, then they are usually The Neidermeyer and exist only to have their authority stepped over while they bluster. Originally, the Da Chief was Always Male but has since seen more variety such as a woman , ethnic minority , or some combination thereof Compare Da Editor , who has a similar plot function and personality (and many times appearance), but is the boss of the Intrepid Reporter . Frequently overlaps with Mean Boss and Beleaguered Boss

When it comes to a Mind Screw , the justification of True Art comes to mind But not when a work has a primary purpose other than art

A Dada Ad, named after the Dada art movement, is when some people forget they were hired to sell a product and instead create ads that just confuse potential customers. Not only do they not know what's going on, but when (or if) the product is finally revealed, they may be confused even more Note Values Dissonance can come into play here. What's confusing in some countries and regions is normal elsewhere , so examples of ads should make sure they're confusing in the region in which they are placed. Alternatively, they may have been trying to make a splash for their ad company and forgot about the client. A third possibility is that a bizarre ad may be less likely to be fast-forwarded through by DVR viewers, and well done ads of this type can be quite memorable if they somehow successfully manage to link the product to the ad Compare Gainax Ending , What Do You Mean, It Wasn't Made on Drugs? , What Were They Selling Again? . Contrast Exactly What It Says on the Tin , or at least the trope-naming Ronseal adverts. Perfume Commercial is a subtrope. Not to be confused with a commercial featuring Indian cricketer Sourav Ganguly, who is affectionately called “dada” meaning grandfather or boss

The daughter adores the father-figure and at times the mother (if there is one) feels left out. The daughter is usually either a single child or the only girl in the family . Likewise she's often the father's favorite . In extreme instances, this can be Wife Husbandry or result in the daughter becoming obsessed with her father to the point of Electra Complex Due to their close contact with the male parent, Daddys' Girls can sometimes acquire boyish traits and interests at odds with expected female personality types like One of the Boys . On the opposite end of the spectrum, she might be especially girly like his sweet little princess . The third possible character is the socially awkward one who gets understanding and encouragement from her father. Naturally, any girl who looks up to her father this much wants to follow in his footsteps. At times, the girl can also end up as a Bratty Teenage Daughter (or Spoiled Brat if the father is rich) Daddy is typically very protective of his girl , ranging from Twerp Sweating potential suitors to going full Papa Wolf on men who wrong her If the family consists of a girl, a boy, a mother, and a father, the girl will most likely be Daddy's Girl and the boy will be a Momma's Boy (Spear Counterpart). If the Daddy's Girl acquires a stepmother, there will most likely be tension between the two, as one (or each) will be jealous of the other and the woman will either become or be seen as a Wicked Stepmother

To put it simply, a main character's Disappeared Dad or occasionally Missing Mom is absent because they are off fighting in a war. When this trope appears in realistic fiction, it's usually used as an excuse for the parent to be out of the picture without actually being dead, but in adventure stories it's more likely to be an integral part of the story. In historical fiction, said war is likely one of the World Wars A sub-trope of Parental Abandonment . If the parent returns safe and sound, this may result in Dad the Veteran . Often overlaps with Keep the Home Fires Burning , but it different because the main plot focuses on the heroes having their own adventures while the parent is (usually) less important Compare and contrast My Girl Back Home , which is from the point of view of the soldier missing their partner at home

Quite often, especially in shows set in The '50s and The '60s , the father figure will be a veteran. Whether he's a Standard '50s Father or an Overprotective Dad , he's capable of being a real hardcase in the right circumstances. Yes, even the Dads who appear to be nothing but creampuff can be tough guys when they need to be , and he bases it all on his years of military service Often this is pulled in situations where a younger (almost always male) character needs to be browbeaten or intimidated. Whether the dad was merely a Marine, or the equivalent of FOXHOUND , at some point, they'll bring it up in a not-so-casual way when they need to remind the younger character that they aren't as soft and yielding as they seem to be Quite a few female characters are given a Veteran Dad as an excuse for why she's tough and independent , but it can also be a Freudian Excuse if he was a tyrannical martinet who lorded over his family with an iron hand. Sometimes this allows female characters to have access to unusual skills or assets, on the assumption that senior military officers use their aviation regiments as their kid's private chauffeurs This effect can also happen if Dad used to be a cop, or a government agent of some sort. In comedies, it often turns out that yeah, Dad was in the Army... but he was a cook, or a file clerk, or a mechanic, or had some other less than intimidating job This was a Justified Trope not too long ago for American families, given the almost back-to-back nature of World War I , World War II , The Korean War , and The Vietnam War . Sometimes a fictitious Great Offscreen War is used when the parental characters would have been too young to have participated in any of the aforementioned wars, depending on the current Present Day . Given the ongoing War on Terror , one can expect this trope to come back into prominence . It shows up quite often when the plotline involves The Generation Gap Often coincides with Military Brat

How can you tell a writer hates something when he doesn't simply say so? The resident dummy will appreciate it. This often comes at the end of an Arson, Murder, and Jaywalking incident The character praising something doesn't have to be a moronic tasteless twit when this trope is used. Sometimes the person can be a Jerkass , creep, or some other type of unsavory character thereby tagging the object of praise with the mark of low quality, disreputability, or even Squick See also Your Approval Fills Me with Shame when it's done between two characters, Hitler Ate Sugar when someone uses a hated character's interests to make a point, and Anti-Advice . Contrast with Dumbass Has a Point , where an idiot's remarks actually turn out to contribute meaningfully to the conversation at hand. May overlap with Fan Hater if the writer is also bashing the people who like the particular thing he hates, It's Popular, Now It Sucks! if the writer has a less-than-positive view about the intelligence and taste of most people, and/or Hype Backlash . Sometimes, in a situation where Only One Finds It Fun , the sole character liking it can be stupid, which is sometimes, but not always, an example of this trope See also The War on Straw and Ad Hominem . Subtrope of Take That! , and related to the similarly named trope; Damned by Faint Praise

Sometimes, we can't just say something is bad. Perhaps we are being nice, or perhaps we are in a situation where negative comments are frowned upon. It could be that we are expected to give a positive response. Or maybe we’re just Trolls or Caustic Critics who feel like being clever with our insults. Break out the faint praise! To

damn something with faint praise is to point out that something is mediocre or worse by praising it in ways that make its weaknesses clear. To say that a computer "looks sleek" as the primary point of praise would indicate that it is not that amazing when you actually use it as a computer, for example. To describe a person as punctual when asked about how they perform at work carries the heavy implication that this is their only valuable trait. An alternate version of the trope (frequently used in Caustic Critic reviews) is to condemn something by praising it in comparison to something else that's widely accepted as being not at all good. For example: "This movie has a more coherent plot than Plan 9 from Outer Space </ ." Related to many Insult Tropes ; can be the result of a Compliment Backfire . May take the form of an Overly Narrow Superlative or a Trivially Obvious statement. May also, in a funeral setting, result from Never Speak Ill of the Dead if the deceased is not particularly missed . The Four Point Scale may result in this, as high scores are given to things that are just okay so that fans see a 7 or 8 as a "bad" score. Second Place Is for Losers is also related, as a second place trophy by definition means you didn't do as good as the first place winner. Compare Damned by a Fool's Praise . See also Wants a Prize for Basic Decency , So Okay, It's Average , Not Like Other Girls , and You Are a Credit to Your Race . Contrast with Stealth Insult , which also damns people through "praise" - in that case, though, the praise is illusionary rather than merely weak. Sarcasm Mode is also a sister trope. Those who confuse faint praise with actual praise will claim that It's Not Supposed to Win Oscars .

Criminals are cool </. It might be a terrible thing to say, but it's true (at least, in fiction). One of the most enduring images in modern fiction is that of the glamorous gangster — a streetwise, Self-Made Man who's rich, powerful, badass, irresistible to women , fashionable , and unfettered by conventional morality . In short, a perfect Escapist Character for times when being a good guy is just too dull Violence might be abhorrent in Real Life , but on the big screen it can be just another way to get the audience's adrenaline flowing, and there's nothing wrong with that . Besides, in fiction, it doesn't matter how many dogs you kick as long as you look really cool when you do it The critic Robert Warshow wrote a famous essay called The Gangster as Tragic Hero </, in which he posited that gangsters like those in Scarface </ are Americanized versions of Greek or Shakespearian tragic heroes, dark mirrors of The American Dream , or the "great no" to the American promise of success. He argued that they were a counter to the films made in The Golden Age of Hollywood , and were a form of Wish Fulfillment for working-class audiences with their Rags to Riches stories and charismatic, tragic characters. Even when Executive Meddling had the bad guys getting punished, the filmmakers and actors conspired to give the villain protagonists a memorable death scene that made audiences Cry for the Devil , similar to classic tragic heroes and villains. This essay made a big impact on the likes of Francis Ford Coppola and Martin Scorsese and informed their Genre Deconstruction in The Godfather </ and Goodfellas </; in the case of The Godfather</ it was essentially an Unbuilt Trope This trope was widely popularized in the US during The Roaring '20s when Prohibition made organized crime big business and the gangster became one of the iconic figures of the era; and The Great Depression , where bank robbers were seen as striking at the greedy and foolish banks that got

the country into this mess. Of course, it has roots much further back in history — the popularity of outlaws like Jesse James and Billy the Kid in the American frontier era certainly counts, and even as far back as Robin Hood it was cool to steal. However, modern works are more likely to subvert or deconstruct this trope than play it straight. Indeed, the "rise and fall" narrative has become such an integral part of the gangster genre that it now makes straight examples of this trope nigh impossible This trope is also a huge part of Hip-Hop culture, as shown by the name of the Gangsta Rap genre. Many rappers play this trope straight, writing Boastful Raps about all the money they make from pimping, drug dealing, and robbery, while music videos show them driving luxury cars and wearing loads of jewelry while surrounded by strippers in their mansion (all implied to have been purchased with money earned through the aforementioned illicit means). However, other rappers are just as likely to deconstruct this by showing the downsides of being a gangsta: sure, you're badass, if you don't mind dealing with prison, drug addiction, friends dying young, your own life being in jeopardy, siring children out of wedlock.. In Mexico, there's also the narcocorridos</ (drug ballads), songs glorifying and glamorizing the culture of Mexico's drug cartels , many of them commissioned by the drug lords themselves to boast about their exploits When the cool criminal is the lead character, they're probably a Villain Protagonist or Anti-Hero . Their PR may be helped by only doing crimes against a Asshole Victims , as in a Karmic Thief or Sympathetic Murderer Sub-Trope of Evil Is Cool and closely related to Do Not Do This Cool Thing . A direct opposite of Being Evil Sucks . See also Neighborhood-Friendly Gangsters and Draco in Leather Pants . If the criminals aren't ever shown actually doing anything, well, criminal</, they're The Pirates Who Don't Do Anything . Criminals who believe in this point of view may opt to be Just a Gangster and turn down chances to leave their criminal life behind

There are many, many Video Games out there. With so many video games, it stands to reason that most will be somewhat similar, and have similar control schemes But there's no guarantee that a developer will use what's usual, and might do something very different instead. And maybe this difference is what completely throws you off your game Any game where you can change the control scheme will obviously avoid this by default, though the effectiveness depends on how far the game will let you remap its controls. PC games generally let the user reassign the controls, so this is very much a console problem. Emulators, special Knockoff (intentionally created evil duplicate), Cain and Abel (non-twin siblings where one is good and the other is evil), and Criminal Doppelgänger (evil Identical Stranger). Super-Trope to Evil Brunette Twin , where the Always Identical Twins have different hair colours (and the darker one is evil) If you were looking for the video game Evil Twin: Cyprien's Chronicles</, it can be found here Not to Be Confused with Creepy Twins , which is about twins</ (usually identical) who are disturbing, usually evil

Some evil mad scientists use their twisted intellect solely for personal gain. This particular villain is not so provincial. His genius and his motives go hand in hand, and his concerns are with

the welfare of the human species (or so he thinks). Simply put, to the Evilutionary Biologist, humanity is stuck in an evolutionary rut, and it's up to him to put us back on the proper path so we can continue to evolve Why the Evilutionary Biologist believes this is necessary varies, as do his methods. Some Evilutionary Biologists simply believe that humanity has erred in its domination of the environment, and thus our very survival as a species is threatened unless they force us to continue evolving. Others see change and so-called improvement as goals in and of themselves , and resolve to use scientific advancement to cause them. Still others seek to create a new race of biologically superior transhumans or just the Ultimate Life Form with the power of science, either because they see humans as having outlived their time on the planet or because of a genuine desire to improve the human condition. Some will just be a Maker of Monsters . They often subscribe to the philosophies of Social Darwinism and " The Ends Justify the Means ". It's not uncommon for them to practice what they preach and marry someone they see as fit and worthy for them Regardless, because of his dedication, the Evilutionary Biologist is willing to break laws, engage in experimental alterations upon other human beings , and ruin lives for the higher goal . Their creations are no less exempt; whether they're Replacement Goldfish , with the Cloning Blues , or genetically "programmed" to have evil , their "children" are doomed to live sad, short, rebellious lives, unless they really do</ feel parental . They will never realize that Evil Evolves , and will never be able to identify themselves as the villains Evilutionary Biologists often create inhuman monsters and artificial humans to serve as minions and Mooks , as well as to populate their extensive Garden of Evil . They themselves may even be willing to suffer the fruits of their experimentation , often resulting in a monstrous, inhuman new body Whenever an Evilutionary Biologist appears on the scene — they are the most common form of villainous biologist in many games and Speculative Fiction media — be on guard for a Science Is Bad aesop to rear its ugly head This is especially ironic because in real biology, one of the core precepts of the theory of evolution is that it does not "improve" a species, because there is no such thing as an ideal form for a species — only what is best Or rather "good enough". Products of evolution are often The Alleged Car of the natural world. . at surviving and reproducing in current</ conditions. If the environment changes, the species must adapt all over again, which is why genetic diversity (Nature's way of "hedging her bets") is usually a good thing Moreover, assuming that a species evolve if subjected to imposed selection pressures (or Applied Phlebotinum -induced mutations) overlooks the harsh fact that most organisms don't</ adapt in the face of such challenges: they simply go extinct, which is why we're not rubbing elbows with mammoths, sauropods and trilobites today. Deliberately applying such selective forces to humans may let us join them in extinction, not improve upon our current state Finally, evolution is conservative, and a species which is thriving</ (you know, like Homo sapiens</) is unlikely to evolve new traits, because it's doing fine the way it is. Sharks, for example, haven't changed much since before the first dinosaurs appeared,</ and they're just as successful as ever... making the entire mania of the Evilutionary Biologist suspect at best Even so, Goal-Oriented Evolution was taken dead seriously by many back in the heyday of the eugenics movement (orthogenesis, the real evolutionary theory positing it, was tossed around for some time), and still gets cited by people

who really ought to know better (Singularitarians are frequently guilty of it), along with being a common misconception of how natural selection works Examples of this trope will probably be German , and possibly one of Those Wacky Nazis , if we want to be really</ obvious Compare Designer Babies , Uplifted Animal , Super Breeding Program , and Transhuman

The wicked versus the loathsome. As in, sometimes, everyone just needs a break from heroes. It can get a bit repetitive to have every protagonist be a white-as-snow goody-two shoes hero . A refreshing dose of moral ambiguity can do just the trick. When you're tired of watching heroes be heroic, watching a Villain Protagonist be villainous can be a nice change of pace. However, there's a problem with this. Heroes are very popular because people take a liking to their benevolent acts. This is probably because people are, to some small extent, basically good ; they like watching other people be happy, succeed against all odds, and so forth. At least most of the time anyways . The reason villains lose much of the time is because they do things that make the audience unhappy. Watching a villain defeat the heroes and plunge the world into darkness and suffering might be refreshing at first, but it leaves a bad taste in their mouth. The solution to this is to pit the Villain Protagonist against the Villain Antagonist . Someone so rotten that no matter how low you go on the Karma Meter , you'll still</ want to go after them and carry out justice. That way, the character(s) can be</ evil while doing</ good. It's the best of both worlds. You don't have to do really rotten things like kicking puppies , you can kick fire-breathing demon puppies instead. It's kind of hard to Take Over the World when another Evil Overlord is already ruling it, or wants to destroy it . It also wouldn't do to allow some other villain to kill your heroic archenemy before you can score that triumph for yourself . For a Gentleman Thief who wants the best loot, what better target than other thieves? The Starscream has to have someone</ to overthrow, right? Or if everyone's a Starscream, then there has to be a Deck of Wild Cards , right? And even the most vicious Knight Templar is right once in a while, or at least goes up against the Card-Carrying Villain . And if both bad guys are bad enough, having them killing each other is a victory for everyone! Note that if a work's primary conflict</ is about Evil Versus Evil, then there is a serious risk of Too Bleak, Stopped Caring . If the viewers/players/readers cannot support any faction, they may simply not care. This may be averted by making one of the sides more sympathetic, a villain with standards , or at least some likable trait to endear them to the audience. Of course, if they gain too many good traits, then the trope shifts into Black-and-Gray Morality which is a different trope. See also Even Evil Has Standards and Black-and-Gray Morality . Contrast Good vs. Good . Also contrast Enemy Civil War , Eviler Than Thou , and The Good, the Bad, and the Evil , which are about antagonists battling other antagonists. This trope is the opposite of a Villain Team-Up . Has a Sub-Trope in Evil vs. Oblivion , where one side is world-destroying bad.

Villains are bad, it goes without saying. However, they can't be all of the Seven Deadly Sins (along with whatever other character flaws writers can think of) will be too lazy, gluttonous, envious, prideful, angry, lustful and miserly to do</ much of anything. A villain laden down with too many vices quickly becomes a loser. Even

if they only have one vice, a villain is going to need a big heaping of icky good traits in order to accomplish their goals. They don't have to be an Anti-Villain , Though villains with enough virtues usually end up switching categories, if not pull a Heel–Face Turn they just need to have one or more virtues to get by. The reason for this is both practical and artistic. Practically, a villain with a virtue of some kind will have a way to put their schemes in motion and effectively oppose The Hero . Without these virtues, authors would have to resort to making them a Generic Doomsday Villain to get anything done. Artistically, it helps make the villain a Rounded Character , and helps make them dynamic if their virtue and vice are somehow in conflict . Oh, and it lets them get all holier-than-thou during a Breaking Speech , throwing in a "Not So Different" Remark or two — especially if the hero really is</ deficient in a virtue (or apparent virtue) the villain cherishes, in which case the villain may even claim that they</ hold the moral high ground. For example: A Prideful villain might also be very hard working in order to get the power he needs. A slothful villain might compensate with amazing creativity, coming up with amazing inventions , Evil Plans , and limitless funds . A wrathful villain may nonetheless be very loyal to his minions, inspiring great devotion . A greedy villain might back it up with tenacity , relentless and unyielding in their pursuit of more, more, more. A lustful villain may also be extremely courageous, willing to risk death or worse in pursuit of their carnal desires. Where this can get strange and interesting is when this is applied to a villain who is Made of Evil . Here you have a ball of elemental nastiness who also happens to have one or more positive traits. Who knew elemental evil had such good taste in scones ? However, there are virtues and then there are virtues</. Much like Color-Coded for Your Convenience , there are some virtues that are okay for heroes and some that are more often seen in villains. These are: Though heroes may insist that Ambition Is Evil , villains are the ones who try to make the struggle to get better (even if they have a tendency to overdo it), which heroes typically lack until disaster forces them to change. Contrast Mr. Vice Guy , where a hero has an emblematic vice, Virtue Is Weakness , where the villain explicitly rejects all good traits, and Complete Monster , for villains who have no redeeming qualities (except for maybe ambition, valor, determination, passion and diligence). Usually, whenever Even Evil Has Standards comes into play, it's because the offender has violated one of the virtues listed above. This can mostly overlap with Pure Is Not Good , as being evil with most of the virtues can lead to that direction This trope is very, very </ common. In fact, it also qualifies as universal . Listing examples here would just be an exercise in futility.

Some weapons are people , complete with names and minds . And some people are evil Obviously, weapons are made to hurt and kill. These weapons enjoy it too. And some will try to talk the wielder into it, with strange voices of all kinds. Some are heard with the ears , some sound in the mind These weapons might kill everything in their way, rather than just what they need to. Some refuse to go back into the scabbard without killing. Some just don't activate the awesome magic without the wielder killing a kitten. Some kill not the body, but the soul. Some kill their wielders as well , whether directly or indirectly, instantly if they're hungry enough or over time by draining Life Energy . Some don't. Because, you see, they wield the wielder, instead of the other way around. And

they are prone to being hard to get rid of How did they come to be like that? Some were deliberately enchanted, or rather cursed . Some are imbued with the evil of their maker, some indeed, are the Soul Jar of an evil human, if not something even worse</. With some, it's the material they were made of, and some were corrupted by evil deeds done with them, even worse than the usual cruelty of the battlefield. Some may be Forged by the Gods - but not by any of the nice </ ones. If It Was a Gift — do trust the giver thereafter The "personality" of the evil weapon often varies according to the traits associated with it. A dagger is insidious, an axe encourages brutality, staffs are subtle and sophisticated in their corruption... Swords are the most common evil weapon. Most other weapons have a peaceful purpose: bows and spears for hunting, hammers for hitting nails, axes for chopping wood... The sword and mace are the only medieval weapons that cannot serve any purpose except war. Because they are so common they also vary much more in how they are evil Subtropes of Empathic Weapon and Artifact of Doom and supertrope of Hungry Weapon . Compare Unholy Holy Sword and Draw Sword, Draw Blood . See also Good Weapon, Evil Weapon

In fiction however, it is much more likely to be divided into neat little sections that correspond to various levels. In many cases, there will be a direction that evolution is moving toward , generally ending at Energy Beings or the Ultimate Life Form . The Evilutionary Biologist 's end goal is to move humanity up to the next level Very frequently overlaps with Goal-Oriented Evolution , but the two should not be confused. The distinction is that Goal-Oriented Evolution simply implies that evolution is deliberately moving towards a certain goal . Evolutionary Levels is when evolution is subdivided into separate levels, with or without an eventual stopping point of evolutionary superiority When it's one animal, or evolution is more like a metamorphosis, that's Evolution Powerup . You can move forward and backwards along the various levels with the aid of a Devolution Device (any thing where you can only move backwards because forward won't work because evolution hasn't been decided yet, is likely doing that rare instance of averting Goal-Oriented Evolution) Subtrope of Hollywood Evolution . See Intelligent Gerbil for the way animals always evolve into sentient humanoids. See A God Am I for one end result of sufficient hopping through Evolutionary Levels. See Ascend to a Higher Plane of Existence for another. For super power inheritance, see Lamarck Was Right and Superpowerful Genetics . For cases where one jumps levels through use of technology or magic, see Transhuman . And when each generation is on a higher "level" than the previous one, get ready for some Goo Goo Godlike action. For villains using this, see The Social Darwinist , Evilutionary Biologist , Evil Evolves and anyone who believes in Goal-Oriented Evolution . Sometimes, a creature may have LEGO Genetics to skip up the steps. Members of the higher evolutionary level will often end up fighting members of the lower level, resulting in a Clash of Evolutionary Levels . In some depictions this trope can be Truth in Television when outside events affecting evolutionary pressure cause evolutionary changes so quickly that the fossil record can't keep up The Ultimate Life Form is at the top of these levels Note that there is</ a legitimate evolutionary theory termed "punctuated equilibrium" which says that a species may remain unchanged, in an unchanging environment, for many generations, then experience

a sudden, sometimes dramatic, change, triggered by a change in the environment. (For example, a species of deer may be perfectly suited to the island it has lived on for centuries, but when a volcano erupts next island over and the less hardy plants die off, those deer best able to switch to the remaining plants will be the ones to survive and reproduce, becoming a new species in a relatively short time.) The resulting new species are not "better" or "more advanced," only more adapted to the new environment than the previous species was. And it's still a gradual process that takes many generations, with no clear-cut division between where the older species ends and the new one begins This has a grain</ of truth with technological</ evolution (which is arguably where the idea comes from), with modern tools and techniques outperforming earlier ones in the same tasks. But more advanced tools also rely on the presence of modern materials, manufacturing technologies and related infrastructure — which all ultimately boil down to the entire pool of required knowledge (including that of the users) and resources — so they technically fit into a different</ environment than their predecessors. This can lead to older tools stealing the spotlight when those requirements are suddenly to longer met

So, you have a dystopian epic set millions or billions of years in the future . It's safe to assume that there are still humans, or possibly other organic life forms, still reproducing One would think that, even if natural selection has ceased to be a factor because of a static environment, mutation and genetic drift would still be factors. Even the proponents of Designer Babies rarely intend to micromanage everything</ . (Genetic drift will happen in the parts that aren't.) And even cloning gets mutations. And if any other species has survived, then they should be affected by evolution, too But writers tend to ignore any possible evolution unless it's directly related to the plot. It may be on purpose, to save the trouble of imagining new species; Worldbuilding is a major distraction from writing, after all. And it's commonly believed that humans as we know them are more relatable than barely recognizable humanoid beasts who don't even resemble any other known species. (The ones that do</ resemble known species generally have undergone an Anthropomorphic Shift , which generally did not happen naturally...) A nonhuman human might as well be an alien.. Or maybe the writers didn't do their homework. Even if the fact that there will be genetic changes is possible to research, the nature</ of the changes would be a good deal harder This also happens with Lost Worlds , where the dinosaurs and other prehistoric species look exactly like the ones that were around hundreds of millions of years ago (and in especially egregious examples, may include species that are further apart from each other in time than we are from dinosaurs) Keep in mind that modern-day humans from prehistoric Homo sapiens</ . If you took a human from 50,000, or even 100,000 years ago and raised them with modern nutrition and medicine, they'd probably be indistinguishable from any of us See also Medieval Stasis , which is about lack of cultural changes over millennia

Tropes are based upon very well-founded principles of storytelling. But, as society changes , tropes may fall out of favor , either through association with something no longer considered acceptable , or from simple overuse and falling into a cliché. At that

point, a subversion of the original may rise up to become the new standard , and the original will be slowly forgotten This is not a Cyclic Trope ; the original trope probably isn't going to come back , for one reason or another Between the 1930s and the '60s, the U.S. government, in film, was portrayed as unequivocally good . The portrayal of corruption has become more and more common, though as Patriotic Fervor rises, it may lapse back for a time. The late Sixties saw liberal</ contempt for the U.S. government, but in The '70s conservatives</ started to exhibit anti-government attitudes. There are currently antiestablishment factions on both ends of the spectrum (exemplified perfectly by the Tea Party and Occupy Wall Street), and they wax and wane in influence depending on the political alignment of whoever is in power at the time

If a character in almost any type of fiction gets a chance to eavesdrop, they will almost certainly hear something important. So, for instance, if our hero finds himself hiding in the villain's base listening to a conversation, chances are it's going to be about the villain's latest plans for world domination , rather than two random Mooks talking about their weekend plans . It's also very likely that the villain will take this opportunity to go over important information everyone they're talking to should already know , in order to give the hero all the context and backstory he needs. In this way, this trope can function as a sort of in-story version of As You Know... , only instead of filling in backstory for the audience, it's being done for the character, and is a way to get vital, plot-moving information from one group or person to another. In less serious circumstances, it can also be a way for a one character to learn what someone else thinks of them. So whenever Alice is unseen but can hear Bob talking, chances are Bob will say something important about Alice . There will also be occasions where Carol, whom Bob is talking to about Alice, knows full well that Alice is listening and will often be asked to talk to Bob specifically for this sort of information. Or, of course, that Bob knows (or guesses, or hopes) it and tailors his talk to Alice in a way that Carol won't realize it. (Many Exact Words evasions of The Promise to never tell feign this on a Surrogate Soliloquy .) This applies even if the talking character would not normally be coherent.</ Characters who talk in their sleep in the grip of Past Experience Nightmares often give remarkable clues to the trauma causing the dream. Babbling under the influence of drugs can also produce this. In Real Life , there are law enforcement stakeouts and electronic bugging. However, stakeouts usually require officers to take hours-long shifts over the course of a week — or longer, and electronic surveillance has the eavesdropper dealing with a signal-to-noise ratio. Since this trope is Older Than Steam , subversions appear frequently. Two of the most common are: first, to have a character think they've overheard one thing, when in fact they missed an important detail that changes the situation entirely. This can lead to Innocent Innuendo and/or Out-of-Context Eavesdropping situations. The second subversion is to have a character who is aware of this trope annoyed when it completely fails to happen . Despite this, it's still played straight often enough to be an Undead Horse Trope . The trope mostly exists because Realistic Diction Is Unrealistic , and because The Law of Conservation of Detail cuts off any eavesdropped conversation that is not relevant or necessary. See also: Contrived Coincidence , and Conveniently Coherent Thoughts for a mind-reading variation. Contrast The Omniscient Council of Vagueness . Characters who are likely to benefit from this trope include the Snooping Little Kid and Amateur

Sleuth . If the eavesdropper gets caught, the question is How Much Did You Hear? Occurs frequently when you use Curtain Camouflage . Easily Overheard Conversation is a given for this trope. Staging the Eavesdrop is when someone tries to intentionally invoke this trope on others in other to achieve some kind of goal. Contrast Out-of-Context Eavesdropping .

A title should tell you what a movie, show, episode of a show or product is about or does. Sometimes, though, the premise or plot of the story is right there in the title. That's when you can say that the story is " Exactly What It Says on the Tin ". Thus, this trope. The names of action shows designed for children tend to have this as a distinguishing feature, as do many pornographic films , but it certainly doesn't stop there. This trope also shows up in naming. An object or organization that does exactly what its name says falls into this trope through sheer power of doing Exactly What It Says In Its Name. Also applies when minor characters in films and TV shows are given names that are nothing more than a brief description of what they do or look like. For example, a character named simply "Flower Deliveryman" or "Girl in Red Dress". The title comes from the long-running "Does Exactly What It Says On The Tin" TV advertising campaign for Ronseal Quick Drying Woodstain, a British product for staining wood, which is known to dry quickly (and other Ronseal products, but the woodstain was first). This became a figure of speech through their extremely straight-forward TV ads. at That Other Wiki . Direct opposite of Word Salad Title , but not necessarily mutually exclusive with it. Direct opposite of and</ mutually exclusive with Non-Indicative Name . See also In Which a Trope Is Described , a Victorian version of this trope. A Spoiler Title or Excited Title! Two-Part Episode Name! may feature some degree of this. The characters might point out the thing with a Title Drop . If a title is going for this kind of transparency in description, it may also be Shaped Like Itself ; but Shaped Like Itself tends to fail at actually being descriptive in the way that Exactly What It Says On The Tin always is. Adjective Noun Fred titles easily lend themselves to this. Contrast In Name Only , Artifact Title . Compare Meaningful Name , A Dog Named "Dog" . This trope is only for titles or names given deliberately by authors or marketers All Real Life examples go in Titles or Advertising section. This is not a trope for the names of things in general. In-Universe Examples: And from DC Comics :

When the exact wording of a rule, promise, prophecy, etc. matters more than the spirit of the wording, it's an Exact Words situation. The Knight Templar , the Anti-Hero , and those with even looser standards (but some standards) will often stick to Exact Words even as they declare I Gave My Word . A common trait of Lawful Evil characters. Also a common (and not always evil) way to play with Just Following Orders or the Leonine Contract . Undercover heroes often tell the Big Bad that "Your operation is very impressive, and you deserve everything that's coming to you" — both of which are true, without specifying what exactly is</ coming their way. The Obstructive Bureaucrat will insist on them as if the Vast Bureaucracy would fall apart if exceptions were made. The Beleaguered Bureaucrat will often insist on them, when the exceptions really would be a problem. For magical enforcement, see Literal Genie .

Often the cause of Prophecy Twist . Literal-Minded characters just do it because that's how they think. Can be defended against with Legalese , though might be used (and horribly abused) by a Rules Lawyer . If someone follows established rules to annoy someone else, it becomes Bothering by the Book . If this trope is related to or defines a superpower, it's called a Semantic Superpower . In the case of prophecies and prophecy twists, Fridge Logic kicks in, leading one to wonder what the heck the prophet actually saw</, and why would</ the prophet word it as such? Subtrope of Double Meaning . Compare Heroic Vow , I Would Say If I Could Say and Ironic Echo . Unhand Them, Villain! is a specific variant. Threat Backfire is a common result. It's very commonly used in False Reassurance . The actual interpretation of the words is often Not Hyperbole . When used in response to a question can often result in a Mathematician's Answer . Can also lead to a Literal Metaphor , Literal Money Metaphor and to Literalist Snarking , as well as Loophole Abuse . Also see No Man of Woman Born . Contrast with I Lied , for when the opposing party makes no effort to hide the fact that they were not holding to their end. Not to be confused with Literal-Minded . In Real Life doing this with instructions (for example, in your workplace), is called "malicious compliance" or "working to rule." It's a form of striking often used by health care workers and others in industries where refusing to work would put lives at risk. Instructions have to be painstakingly worded such that someone who has no idea what they are doing can complete the task reasonably well. If an experienced worker decides to follow every detail of every instruction, work grinds to almost a halt. But of course, since you've technically complied with all instructions the company can't fire you for incompetance or insubordination.

When the writers decide to play with a trope by raising the results to the extreme Since Tropes Are Flexible , they can be taken to various degrees. This is about taking them to degrees much higher than typical, often to ridiculous extremes In short, this is why The Same, but More warns that higher degrees of tropes alone are not new tropes. Those are simply Playing with a Trope This is usually done for parody , but there can be other reasons to do this Compare Troperiffic , Serial Escalation , Refuge in Audacity , Logical Extreme , Crosses the Line Twice Contrast Downplayed Trope

He or she is the Hero.</ In a nutshell, the Exalted Torturer is: The reasons for this and how it comes about this vary wildly, but Exalted Torturers share those base traits but fall into one of two main categories. The Unscrupulous Hero or Well-Intentioned Extremist who resorts to these methods because they feel that they're "necessary" for a noble cause. Given the worlds they tend to live in the narrative tends to agree with them (possibly with or without the audience). Examples can include Batman , James Bond , Jack Bauer , Tanya Adams , and Maya. They generally: They generally exist as good guys of The Federation or The Good Kingdom in fiction where the "Black" in the local Black-and-White or Black and Grey morality is Very</ Black even in comparison to any greys, and you can see the Godzilla Threshold just looking over your shoulder. Though in some cases they can show signs of enjoying it toooo much, they usually don't let it override their moral compass. The Sociopathic Hero and/or Sadist who decides to say "screw that" and does it at any opportunity and with any possible justification, or even none at all. Beyond simply brutal, these characters tend to openly enjoy

causing suffering and pain, often to the detriment of what the torture was supposed to accomplish in the first place. Examples include Rapeman</, Rico Rodriguez, and Bolo Santosi , and most of the main characters in Death Note . In general these characters: This group tends to inhabit the "revenge fantasy" and goresploitation genres, tending towards being either amoral vigilantes or ruthless cops and soldiers . Alternatively, they can be simply people who are taking brutal action against groups the Author thinks they should be allowed to do. When Exalted Torturer status is invoked (where they are exalted in-universe by some but definitely not</ by the narrative) for this category, they tend to be the Torture Technician of The Empire , nightmarish revolutions , ambiguously labeled anti-government forces , some other bloody minded but "respectable" group. While these two categories seem as Black and White as the fiction this character often appears in, there are gray areas between the two. Sometimes the sympathetic Extremist might enjoy it a biiit too much while the Sociopathic Hero thinks he is doing his heinous actions on behalf of some (supposedly) noble cause like Rapeman</ or Hanzo the Razor </ , the issue being that the former is usually still capable of sympathy because their restraint and morality outweigh any sadistic tendencies; the latter's behavior is sympathetic only by coincidence and generally repulsive no matter how much he believes in the cause. There are also a few characters that defy easy categorization between those two, with one character falling more into the first for some while another group might view him as the latter. Even beyond that, there are characters like The Punisher who can flip between categories Depending on the Writer . So at best this is a highly simplified look. But in general most Exalted Torturers lean towards one category or the other, being "someone you're glad isn't on the side of evil" to "someone you can't believe isn't evil regardless of side." The Exalted Torturer is almost</ Always Male , possibly due to Values Dissonance in how a woman would be handled — though several female examples can be found for both categories. How and why this character comes about can vary almost as frequently as their portrayal. They could be anything from The Hero of a dark and serious work to examine Good Is Not Nice and if it can afford to be any other way, the Designated Hero either by the author , or even someone author doesn't originally</ intend to somehow make heroic only for Misaimed Fandom to play up his torture and abuse as "good" or heroic. Compare and contrast Cowboy Cop , Moral Dissonance , Values Dissonance , Villain with Good Publicity , and especially the Torture Technician .

" So, imagine you're writing a trope page, and can't think of a good way to start it off. You don't want to just jump straight into the description; you want to get the reader's attention first. Why not try an Example as a Thesis ?"</ When a trope is described by giving a generic example of it first, rather than simply stating its definition (its 'thesis'). While not inherently bad, these descriptions often suffer from one key flaw: they're unclear. Using an example in the place of a definition can mislead tropers into believing the trope is more narrow than it is. Remember that we practice Clear, Concise, Witty here; a funny scenario shouldn't take precedent over a well-explained definition. In most cases, the best order of things is to tell the folks what you are going to talk about and then</ talk about it. Frequently — if the thesis is good and does a good job describing the trope — you can just remove the introductory example completely; after all, there's an entire list of perfectly serviceable examples right below

the introduction... a good quote and image also tend to do a lot more than trying to work an example into the introduction text. Alternately, you can try moving the example to the middle</ of the description rather than the beginning so that readers know what they're supposed to be reading about ahead of time. This isn't to say that this format is never</ acceptable—it's just that 90% of the time , it's a weak way to introduce the trope, even when not outright misleading. (In journalism, this is called "burying the lede " and is trained out of professional journalists very, very early.) So if you're considering starting a description with an example, take a minute to think first about whether you should just cut to the chase instead. In short, a trope needs a concise definition. A good quote and an image certainly help. Examples in the description are strictly optional and a stylistic feature; an example shouldn't have to define the trope by itself. If a description is written with an example as the thesis, list it here. This will help tropers who are in the mood to find and fix those tropes where Example as a Thesis is not the best format for the trope.

Seen something of interest in a work of media, but you don't know what it is an example of? Put it here. Sometimes, an example may be of a trope that we don't have yet. In that case, the trope can be submitted to the Trope Launch Pad . A CBC news host in British Columbia has the name "Anita Bathe". And, yes, it is pronounced exactly the same as Bart Simpson's prank. Which subtrope of Unfortunate Names does this go under? I know this is a sexist Double Standard , but which one? Morning Routine or Day in the Life ? Is this a Betrayal Trope ? If so, which one? Animal Jingoism , but with jobs? Subtrope of Outside-Context Problem or Filler Villain ? Variant of Defiant Captive ? Casual Danger Dialog ? Something Else? So in the Mega Man </ episode "Campus Commandos, Roll says "I'm going to get even with that two-timing Top Man for tampering with my emotion circuits!" (Basically, Top Man has been flirting with her throughout the episode, and has just revealed he is in fact a mole working for Dr. Wily.). She seemingly chooses to disregard the fact that she has bigger problems on her hands, like for instance, the fact that she's currently moments away from being crushed between clock gears . Is this a trope? It seems like it could be Casual Danger Dialog , but for the fact that Mega more or less snaps her back to reality with his response (Roughly "We won't have ANY circuits if we don't figure a way out of this!").

Seanbaby says something like this in his article roasting Uwe Boll : What would you say that is? Dissimile? A simile subverted?

Attacks that do "recoil" damage in the Pokémon games, like Double-Edge. Cast from Hit Points ? A less suicidal version of a Suicide Attack ? In Mega Man ZX </ , we can modify the trajectory of the bullets of Model F to create odd bullet maneuvers. Do we have a trope for this? This Troper saw a local play called "Gold Fever at the Rough and Ready." It starts In Medias Res with the protagonist about to be hung. There's some brief dialogue between the characters, and they're about to hang him when the love interest comes in with the giant gold nugget they were about to hang him for stealing. The characters are surprised, they accidentally knock over the chair the protagonist is standing on, and then the protagonist rewinds to where the chain of events leading up to it began. We see the same scene again at the end of the first act, only it ends with the other

love interest shooting out the rope. This isn't the example. The example is in the second act, where the same exact scene is repeated again with different characters in all of the roles (The first love interest is the one being hung, the second love interest is the one who comes in with the nugget, etc.), with the same dialogue (but with the names switched). Just as the chair is knocked over, the Dastardly Whiplash character unexpectedly shoots out the rope. I Know Mortal Kombat or I Don't Know Mortal Kombat or Something Else Entirely? Circa 10 years ago there was for SOCOM. So it's I Actually Do Know Mortal Kombat? I Don't Know Mortal Kombat subverted? Is this a Cargo Cult or something else entirely? Okay, another one from me. In Cat-Eyed Boy</, the eponymous character is confronted by the 100 Monsters Group, who want to recruit him to help them turn people who are ugly on the inside (the greedy, plagiarists, etc.) just as ugly on the outside. However, during the recruitment, they let slip that they're all just deformed humans and they believe there aren't any real</ monsters. To a genuine supernatural monster who frequently comes into conflict with other genuine supernatural monsters. Whoops. Turns out the Cat-Eyed Boy finds this so obnoxiously arrogant that he decides to stop them just because of this, when he previously liked the sound of their plan. I could swear</ I once found a trope this fit, but I can't remember for the life of me. Related to Through the Eyes of Madness I once read a retelling of The Emperor's New Clothes</ in which a second character — the brother of the Emperor who wanted to usurp him — who's the viewpoint character helps set up the con to humiliate the king... only for the child in the end to be a young page who's unfit for his position in the royal court, thus leaving both him and the audience wondering if it was the same as the original story... or if the clothes were real and the fact that he could never see them proved he was unfit for his position. It's a bit lighter than most examples of the above trope, but it's the same sort of ambiguous "what was real" ending.

Okay, I was about to make an edit from the Phineas And Ferb page at TV tropes. The trope is "Twitchy Eye", which Milly (The Fireside Girl with brown curly hair) supposedly has. I found this at the Phineas and Ferb Wiki. "Milly does not have a twitch. The line over the bottom of her eye is her cheek, as it is only visible when she is smiling (or her mouth positions are smiling). This is a type of design aspect commonly used in animation, as it makes the character cuter." There's no specific name for it, and it doesn't fit with the Twitchy Eye description, so it must be somewhere else. I also need to know what other characters similar to Milly that constantly seem to squint. Not quite a Gilligan Cut I'm sure there's a trope for this, but I can't find it. Basically, a character wants something very, very badly, after unsuccessfully trying to obtain it for the better part of the episode, it turns out that someone else has got it for them as a gift. Popular in sitcoms. I know we have a trope for difficulty increasing in sequels, but apparently neither Difficulty Creep nor Sequel Escalation is it. Halp? We have a redlink on Rock Band because someone thought it was "Sequel Difficulty Creep" and I don't know what to fix it as. Knights of the Old Republic , continues from Did I Just Say That Out Loud? Ok, from chapter 247 of Negima! Magister Negi Magi (FRAKKING ENORMOUS SPOILERS): Do we have something for when one character absorbs the power of another character and uses it against them, like what Negi does with Jack's attack? The closest I could find was Playing Tennis with the Boss , but that's more reflecting an attack back as opposed to sucking power out of an opponent. In Ninja Warz there are Relics offered in the the Relic

Shop when in the description saying they were behind/under this daimyo statue that you get bonuses all the time</ A combonation of Hidden in Plain Sight and Hidden Right Under Your Nose ? Unfortunate Implications meets I'm a Humanitarian ... sorta

Exact Words , Ambiguous Syntax or something else This was ? originally listed as Get Back in the Closet , but that trope is ? about same-sex sexual/romantic content getting a higher age rating ? than equivalent heterosexual stuff. Do we have a trope for a ? previously-out LGBT character trying to go back on it ?

Instead of physically or psychologically torturing a suspect, the protagonist simply irritates the perp into making a crucial mistake . Can be done while Perp Sweating , or on the stand, as with The Perry Mason Method . Literature Live-Action TV Western Animation Real Life

This index is for tropes about going over some limit of some kind Limit Break , however, is not a trope that goes here. It just sounds like an example, but it's a technique used when something reaches a certain value Gradated limits are those with levels / ranks / a system of measurement Faster Than Light Index is related because they all relate to the lightspeed limit being broken, but only the Faster-Than-Light Travel trope specifically relates to that

When a place has more steam present than there should be, you've got Excessive Steam Syndrome. Two extremely common versions are steam expulsion during an escape sequence after a self-destruct mechanism is triggered and the other is where space faring vessels

demonstrate a tendency to belch steam In the case of steam produced during a Self-Destruct sequence, after the Self-Destruct Mechanism is active, the Hero will need to escape as quickly as possible while The Supervillain Lair is collapsing around him and he will be hampered by all the steam that seems to be venting into the main escape corridor. Somehow he manages to dash his way out of the crumbling hive of villainy and burst out of the clouds of steam It's all very dramatic, but to be completely honest, no one would hire an architect that made vents dump steam into the main exit, especially when people are trying to escape. It just goes against any semblance of sanity or decent design The second common example is in speculative fiction spacecraft, where the spacecraft leak steam apparently as part of regular functionality. These vessels have a tendency to vent dense streams of steam-like gas at every occasion, both outside and in When an engineer is confined in the bowels of a ship, he's almost guaranteed to run into a cloud of the stuff. Maybe it's hot, like a steam pipe opening up, maybe it's cold, like a liquid oxygen pipe opening to atmosphere. It's usually dangerous, and always cool-looking on film Because Space Is an Ocean , this may have started as an homage to classic cinema depicting naval life. On a submarine or steamship, streams of thick steam were ubiquitous. It's an easy and cheap way to make an area look industrial, damaged, dangerous, gritty, or any combination thereof On the outside of the ship, ventings usually accompany an atmospheric landing, power-up, lift-off, or other such event. This comes from footage of real spacecraft, which often sever lines and conduits with explosive charges during launch See also Self-Destruct Mechanism . Compare to Impressive Pyrotechnics and Made of Explodium . Has nothing to do with fanservice anime that overdo Censor Steam nor addiction to buying far too many games at 20% off on Steam

Here are tropes which deal with characters making all kinds of excuses or justifications for doing certain things or avoiding situations.

Against My Religion : Refusing to do something with the excuse that it doesn't follow the teachings of your religion.

Some games have epic, sweeping plots that could easily have been made into an action Miniseries instead of a game. Others just seem to have a plot because people feel a little silly doing things for no reason, even if the real reason they're playing is because it's fun . An Excuse Plot is, in the simplest terms, a plot that is clearly there merely as a justification for the gameplay, or other form of flashy, show-offy-ness , to happen. In short, the story serves the needs of the gameplay, nothing more. It makes no pretense of intrinsic value, but simply provides some banter so you understand why the purple and non-purple units are shooting at each other . A potential disadvantage of including a half-assed plot (as opposed to no plot at all) is that it can make the game seem unfinished, poorly thought-out, or childish. However, many developers either do not think about these risks or consider the structure and context an Excuse Plot provides to be worth it. An Excuse Plot is not necessarily a poorly written, minimalistic, or stupid storyline, only one that has been written to obviously showcase something else These are typically featured in games for children such as Super Mario Bros. </ (though there are exceptions in that series, such as the RPG spinoffs), as a complex storyline would not be something that children would understand. Beware of the Anthropic Principle .

If you want to know how to write your own excuse plot, we've got you covered. A Super-Trope to: A Sister Trope to No Plot? No Problem! (not even bothering with plot at all). Compare: Contrast Play the Game, Skip the Story (the plot is deep, but the players see it as an excuse).

"Hey hey, reader! Welcome to the TV Tropes Ultimate Competition line! Answer the following question to win an egregious prize: a five-week holiday on beautiful Sugar Bowl Beach ! Your question: is this article about: Competitions that consist of nothing but an insultingly easy question, often designed to loophole around lottery laws by making them nominal "tests of skill", or tempt gullible people into entering? Call now on our premium rate example line! Phone early, phone often! And win, win, WIN!" The question may be in a call-in competition, which usually means the phone call is going to cost you money; require you to text-message your answer, at normal texting rates, of course; or on a form you need to mail in — then the question means that the contest is not a "lottery" by legal definition, and therefore not subject to the regulations concerning lotteries, and</ you provide your address and/or phone number which can be added to mailing lists for sale. When used on the radio, the point of the competition is usually thinly concealed advertising for a local business rather than a true competition. In North America this kind of "competition" is usually primarily used to collect personal information which can later be sold to spammers and other advertisers at a premium.

As one person rarely has the financial resources to create and more importantly distribute their own television shows, movies, comics, etc., entertainment is generally produced by corporations. They are the ones that put up the money to see your favorite book turned into The Film of the Book . But if the television network or studio doesn't actually turn a profit so they can pay their corporate bills , the business folds and is likely to take the show with it. So what can you do? In the end, the bottom line is</ the bottom line; it is the company's best interest to see that their money is well spent, budgets are kept, and the show gets finished by Sweeps week. Often this means vetoing ideas , or dictating that certain elements be added in. So when the organization behind the creators takes a hand in creation you get this trope: The goal of an executive is to try to steer the show into the direction of profitability. These changes tend to come about by ensuring that a work is relatively risk-free. Controversial elements may be removed to preemptively avoid receiving backlash or alienating the audience, while safer alternatives may be added to ensure the viewership is as wide as possible. Less profit-minded executives may change things in an attempt to kill the work outright because they want the show dead for one reason or another, though this isn't common since it's counterproductive to making a profit. It's possible that an executive is a fan of a work's genre, and decided to join in on it because they can spot any flaws before they happen and guide the writers away from them, using an Executive Veto to tell them not to. Sometimes executive meddling exists in one show (or movie, or other medium as brought down by the studio or publisher) in order to promote an entirely different show/movie/etc. on the network/by the same studio/publishing company (or some other event or thing the executives in charge want to promote). This usually manifests itself in the form of Crossovers

and Product Placement , among other devices. While this tends to have negative connotations due to the idea that the people calling the shots are not the creative heads, the results can be positive . Executives aren't always wrong, after all; just like there are good and bad creators, there are execs that are good at their job and execs that are bad at it. Alternatively, a creator can be inspired by the execs' ideas and make something even better. Creators have the capacity to cause issues because of a Creator Breakdown , or too much Protection from Editors leaving their ideas unchallenged regardless of their quality, or putting in an unnecessary Author Filibuster or Writer on Board moment that can taint a work. All of these issues can be stopped if a higher up puts their foot down, and the work can benefit from it. But since when does someone doing their job right</ get any attention? No one complains when the system works. However, when something breaks, everyone</ knows about it. Also, creators talk much more to the public about the creative process than do the executives, and creators, like most people, tend to like to take credit for what went right and pass blame for what went wrong. As a result, there is reason to believe that harmful cases of executive meddling are rare but over-reported, while helpful executive meddling is common but under-reported. For more on some of the reasons this is commonly seen as a bad thing, see this analysis page . The reason behind many an Enforced Trope . May lead to Nepotism (where someone is given a role solely because they are related to one of the execs), Dungeon Masters Girlfriend (where an exec's love interest is given preferential treatment), Viewers Are Morons (where everything has to be explained every time it is mentioned), Creative Differences (where the creator and the execs fall out over the work), Executive Veto (where the creator is forbidden to use a particular plot device), Revised Ending (where the creator is forced to change the work's ending), Get Back in the Closet (where homosexual content is rated more strictly than heterosexual content), No Origin Stories Allowed (where a backstory is forbidden from being revealed), Christmas Rushed (where the creator is forced to complete the work by a specific deadline), Publisher-Chosen Title (where the work's title is chosen by the execs) and My Way or the Highway (where the creator is given a choice between making the required changes or taking the work elsewhere). See also Music Is Politics , Obvious Beta , Media Watchdog , Moral Guardians , and Alan Smithee . Compare What Could Have Been , Wag the Director , Development Hell , and Vaporware . Sometimes, an Obvious Rule Patch will be the result of this. Contrast with Getting Crap Past the Radar and Protection from Editors . Screwed by the Network , Friday Night Death Slot , and Dump Months are similar to the sabotage version, but the work's content is usually left untouched. For fictional examples where one interferes with another's work, see Too Many Cooks Spoil the Soup . Please remember that Tropes Are Tools when adding examples.

A downplayed version of Executive Meddling , where the bosses forbid only the use of a specific trope (be it a certain character, scene, Plot Twist or so on) in a work, requiring the writers to find an alternative There can be numerous reasons for this. Perhaps the executive considered the trope in question cliché (or breaking their personal Willing Suspension of Disbelief) and wants the writers to go back and re-think it; maybe that character was too popular (or profitable) to be Killed Off for Real . Maybe the

foreshadowing was too obvious for audience members; perhaps the prohibited trope was something offensive or controversial that might alienate potential audience members (or cause a firestorm), limiting the potential market for the product; or maybe it's simply a subject that the publisher wants no part of in the first place No Origin Stories Allowed may be one result of this

Generally when there's a group of works that are all set in the same continuity , characters can (and do) crossover from their home series to other ones fairly freely. Sometimes, however, within The 'Verse , there are Canon characters which, for whatever reason, can't be used in any other work outside of their "home" series. These characters are Exiled from Continuity. Although they're most frequently found in Comics (especially superhero comics), such characters can also be found in other forms of media. Such characters inspire many a writer to create a Captain Ersatz or an Expy for the character they can't officially use or to try to skirt the issue with a Lawyer-Friendly Cameo May be a result of either Executive Meddling or Screwed by the Lawyers

A common scenario amongst married and other live-in couples. Husband and wife are in an argument. Argument escalates. Husband/wife makes a stupid comment that really angers husband/wife. Cue the other shouting So engrained is this trope in popular culture that even husbands or wives occupying houses or apartments clearly large enough to have space for a guest bedroom find themselves enduring an uncomfortable night crammed on the sofa in the living room. For some strange reason , it's usually the wife who's the exiler , and the husband the exilee . But in some cases, it can be the other way around. In extreme cases, this can happen every night with couples who have given up on their marriage but have not yet separated. A common trope in Dom Com shows, and a case of Truth in Television . (Another possible reason for exile involves snoring. Probably more common in real life, less common on-screen.) For withholding sex, a punishment similar in spirit, see Lysistrata Gambit (for which this trope is often the PG equivalent). Not to be confused with Sexiled , where your roommate's sexual escapades leave you temporarily homeless. Compare to There Is Only One Bed , where two characters who aren't in a relationship have to share a room but aren't comfortable to sleep together in one bed.

Am I real? Why do I exist? How much control do I have over my own life? What choices do I have? Does it even matter, the choices I make? Am I even a unique individual? Are my thoughts, opinions, memories, experiences, and feelings actually my own, or are they imposed on me? If I were to suddenly die, would my passing go by completely unnoticed and unmourned? Is my entire life pointless? Are my efforts to achieve meaning doomed to failure? Most stories take a positive stance towards these questions, with characters having a clear identity, and clear goals. Not these, though. May overlap with Cosmic Horror Story ; the horror on those relies more on the perceived vulnerability of reality as a whole, rather than the pointlessness of life on an individual scale. A "Shaggy Dog" Story might induce this kind of feeling. Compare with Angst , which while originally referring to "existential angst", has broadened its meaning to refer to a more general form of anguish or unease

with oneself. Compare also with Contemplate Our Navels , which is simply in-universe philosophical contemplation, and doesn't necessarily involve horror or existential questions. Compare with Absurdism which plays woes over the meaningless of one's existence for comedy, rather than horror (though there can be overlap). See Cloning Blues for when clones go through this crisis. This is Truth in Television , particularly to people who have depression and other mental disorders.

A character is shown to have the ability to dislocate their bones in very bizarre places. The most popular way is turning your head 360 degrees before facing the front again. Can fall into either Squick and/or Nightmare Fuel for some people, since it doesn't look natural See for a compilation of this trope Often done as a Shout-Out to the Trope Namer , The Exorcist </ Subtrope of Abnormal Limb Rotation Range , Compare Body Horror , Losing Your Head , Demonic Head Shake

Humanoid fantasy races , Rubber-Forehead Aliens , and the like will have genitalia close enough to the human model that they can</ get down and dirty with humans or the equivalent . (Most of the time, anyway .) However, there will usually be just enough variance to make the experience... different</ for the human participant If this isn't made explicit in the canon, expect it to be explored in art or Fan Fic See also: Interspecies Romance , Bizarre Alien Biology , Bizarre Alien Reproduction , and Super Sex Organs . Contrast Male-to-Female Universal Adaptor . Compare with the Mermaid Problem For other kinds of "exotic equipment" that have nothing to do with sex organs or even biological reproduction, see Impossibly Cool Weapon or Impossibly Cool Clothes

One of the most obvious ways to mark an individual as noteworthy, badass, or just apart from the crowd in fiction, especially in video games and action stories, is to give them an extraordinary weapon. Assassins and blademasters often are given truly bizarre melee weapons, notable protagonists in settings with firearms are equipped with unusual and Rare Guns . The logic behind this is simple but faulty — if a weapon is harder to acquire or more difficult to learn to use , it goes, it must be worth the extra time and effort to acquire one and train with it. The problem with this is simple: while a sufficiently trained individual can</ turn almost any weapon into a lethal tool of destruction, standard-issue weapons are standard-issue because they work</, and work well , with a minimum of training, and are thus more worth the time than the bizarre and the extraordinary Furthermore, while exotic weapons might give inexperienced opponents difficulty because of their unfamiliarity with the mechanics of the weapon, the difference is more than made up at higher skill levels , where the limitations of a weapon become much more significant. Such weapons are often rare because they aren't practical for mass production or usage. Even if they are an effective weapon, don't expect to see them used properly . But of course, Rule of Cool prevails. Occasionally justified in systems where everybody is using the wrong weapons, or the right weapons in the wrong way. Also sometimes justified in a system where everybody is already using exotic weapons. Using a weapon designed for the situation at hand would both give the user a potentially massive advantage, and seem like an exotic weapon. Contrast Heroes Prefer Swords . Related tropes include:

In fiction, the USA sometimes gets split up into several successor states , whereas at other times it might get invaded by one or more other powers . And sometimes, it even falls from power. This trope, however, reverses the common factor between the aforementioned three cases (that is, the USA being "weakened"), and instead makes it more... empowered. That is, the USA more territory (and more often than not turns those acquisitions into new states). The trope has four distinct flavors : The other two flavors are common results of dialing standard-flavor Expanded States of America Up to Eleven , and can be seen as realizations of : Usually, but not always, the resultant superstate would go under a name that is a variation on "United States of America". A Sub-Trope of Different States of America . See also Space-Filling Empire . Compare with United Europe and Middle Eastern Coalition . Contrast with Divided States of America and Invaded States of America , and sometimes with Oppressive States of America and/or Fallen States of America — although in the latter case, the US can join Canada or Mexico because it needs to out of weakness (e.g. it became a Vestigial Empire), and thus the trope can actually overlap with this one. Do not, however, confuse United Space of America for a Sub-Trope , despite what the name's construction may imply; it's about a different topic altogether (though still US government-related). Sometimes this overlaps with Fictional Province when completely fictional states join the union or are carved out of existing ones. This trope does not</ cover alternate versions of the British Empire that do not </ lose the American colonies in a War of American Revolution . That means cases like the Holy Britannian Empire of Code Geass

The 'Verse may branch out across different media as the fandom demands. There may be comic books, tie-in novels, movies, novelizations, video games , etc. Sometimes the TV show is itself a branching-out of a 'verse that originated in another form (such as comics, as in the Marvel Universe or The DCU) Expanded Universe refers to everything that is not the primary medium. All that other stuff This can create a schism in fans. Some believe the entire Expanded Universe is canon . Others reject it all. Others pick and choose based on closeness to the writers of the primary medium. Expanded Universe material is usually written so that it can be fit in to the canon without having to alter the canon itself. However, later developments in the actual series can make it definitively out-of- continuity , especially when the main series decides to explain a mystery (such as a character's future) in a way that contradicts the Expanded Universe Even if it isn't canon, the Expanded Universe often serves as a place to apply handwavium to the canon through retcons ; this may verge on professional-grade Fan Wank The term comes from Star Wars </, which has an extensive Expanded Universe covering events before, during, and after the films. The Star Wars Expanded Universe even has its own page Note: the "primary medium" is usually the original one, but not always. For instance, few would dispute that the primary medium of the Buffyverse is the 1997 TV show , not the 1992 movie (which is only canon for the television series in the form of its altered comic book adaptation, which is based off of Joss Whedon 's original script for it) After a show's cancellation, the Expanded Universe may become the only place to get new material involving The 'Verse (outside of Fan Fic , of course), continuing the canon in the minds of the readers/viewers. However, if a show is later brought back ,

this "new canon" may be cancelled out , creating yet more conflict Sometimes a character from the Expanded Universe is so popular (or just so good) that they get put into the official continuity of the original medium. This character is known as a Canon Immigrant . If elements from the EU are well-received enough, they may be permanently integrated, revising or rewriting the official continuity resulting in a Ret-Canon Compare Adaptation Expansion , which concerns never-before-seen developments of certain aspects in a retelling</ of one specific work or set of works in a franchise when they're adapted into another medium. See also Restricted Expanded Universe Because of Acronym Confusion , please do not abbreviate it to EU, which can also stand for The European Union See also sequels , prequels , interquels and spinoffs for works that share same continuity and</ the same medium as the primary work (i.e. a Video Game with a prequel game, or an anime series that spins off another series)

A character who exists to provide a flattering contrast to the audience by being worse than them in some specific respect. This trope exists on a sliding scale of scorn; at one end the character simply exists as a flattering contrast to the audience (the Idiot Hero often fits here). At this end of the spectrum, the audience thinks "if this</ character can do x, then I certainly can do x!" On the other end of scorn scale is the harder version, where a character is made pathetic so the audience can feel better about themselves (via Schadenfreude). The Ditz , a very common trope in Sitcoms , is this (but Played for Laughs). Arguably an Expectation Lowerer is an Inversion of Escapist Character ; Escapist Characters allow you to feel good by giving you an Audience Surrogate that you can experience awesomeness through. An Expectation Lowerer makes you feel good in the exact opposite way; you cannot</ identify with this character because they, in at least one respect, are worse than you. Not to be confused with This Loser Is You ; where a character you identify with is the character that sucks. This Loser Is You basically flings the audience's faults back into their face whereas an Expectation Lowerer allows them to distance themselves from their faults. Compare/Contrast the Mary Sue , a character who (like the Expectation Lowerer) the audience does not</ identify with, but due to the character's strengths</ rather than weaknesses</ . Possibly related to Friedrich Nietzsche and his concept of "Pathos Of Distance" (where one casts that which one does not</ identify with as the morally wrong).

If characters from our world visit an Alternate Universe , neither they nor the audience care what happens there. This goes further than individual death. Absolutely anything horrible can happen in an Alternate Universe— Zombie Apocalypse , life-threatening plague , being taken over by evil , or completely destroyed—and our Earth will still be safe, if we can close the portal. Many heroes will not leave the Planetville of the week until its problems are solved, but for the Alternate Universe, all they care about is getting out alive. The reason for this is that an Alternate Universe often feels like a cheap copy of our own. It's just an extra us, so its people aren't unique characters , and under the Second Law of Metafictional Thermodynamics , ‘not being unique’ automatically makes one expendable. It is extremely rare for so

much as a single refugee to escape a doomed Alternate Universe , because that refugee will ruin Cast Speciation for the Earth-1 version unless the refugee will become a Suspiciously Similar Substitute . In-universe, this is often simply pragmatism from the characters: Works that feature alternate universes often use the "infinite variations" model of The Multiverse , and the leads simply can't afford to worry about saving every single possible universe. Things are even worse if there's only one world, but Time Travel can change it back and forth. People in the future can die a hundred times each, but since the Time Travel will bring them back, who cares? A related issue is that too many alternates can cheapen established stories. If the heroes have saved Earth from Planet Looters , the Zombie Apocalypse , The Virus , the Straw Nihilist and the Circus of Fear , that's impressive. If there's an Alternate Universe for each one of those villains winning, it means our heroes aren't impressive—they lost as often as they won, and we're from the universe where they just happened to win five times in a row. This gets even more egregious when there are infinite</ alternate universes; for every event in "our" universe, there are infinite others in which it didn't happen... The inverse applies as well—if the heroes only manage to win in one out of many possible universes, the fact that the odds are stacked against them can help to emphasize their struggle and thus make their eventual victory all the more satisfying. However, if there is also an infinite number of other possible universes out there wherein they still</ manage to prevail in the end, it can trivialize their struggles and leave audiences wondering what exactly the big deal was . On the other hand, "You can have an infinity of apples but still not a single orange", as a scientist explained this theory: So it's still perfectly possible that the heroes win everywhere, or at least more often than they lose. This callousness doesn't apply to worlds that are less obviously mirrors of our own. Wonderland , Narnia (assuming Up the Real Rabbit Hole doesn't come into play), and dimensions with only nonhuman life are all technically alternate universes, but they're so different that losing them actually hurts For those who don't</ feel an Alternate Universe is expendable and wish to save it, see Save Both Worlds . Compare Reset Button Suicide Mission , Dream Apocalypse , Dead Alternate Counterpart , The Time Traveller's Dilemma .

Bob has the situation under control, and is explaining it to his partner, Alice . While he initially thought everything was fine and going to plan, it's only once he stops to think about it and hears himself say it aloud that he realizes how much trouble he and Alice are really in Essentially, a case of in-universe Fridge Logic (or Fridge Horror) catching up to the characters, can be Played for Laughs or drama . Can be triggered by the listening party's Let Me Get This Straight... putting a new perspective on Bob's explanation The Oh, Crap! can also be simply that there really is</ No Time to Explain . Some situations go further with this, having the feared event happen directly after it's realized, which is a case of Five-Second Foreshadowing The Placebo Eureka Moment is an inverse, in which the act of explaining leads to a solution rather just than a realization that there's a problem. Not to be confused with I Can Explain or Not Helping Your Case Compare Punch! Punch! Punch! Uh Oh... , You Answered Your Own Question , Delayed "Oh, Crap!" (when the character doesn't realize how screwed they are until after they're done</ explaining) and I Never Said It Was Poison (when the realization is that there's something previously

told by another character that doesn't fit the facts or</ make them fit all of a sudden)

Alice is a big fan of a Soap Within a Show . Bob foolishly asks her about it. This is the cue for a long plot summary that is utterly meaningless, often serving as an excuse to lampoon any soap tropes the writers can think of, and generally serves to show how far Alice has gone in her new hobby while Bob acts like a helpless listener. It may also indicate that Alice is sad, lonely and/or romantically frustrated , preventing her from progressing with her normal life A recurring joke is for the addiction to be contagious. For example, Alice is enjoying her soap, then Carol comes in to ridicule either Alice or the soap, only for Alice to reply back with a premise or summary that somehow sounds even more ridiculous than what Carol first expected. Gilligan Cut and now both Alice and Carol are hooked in front of the TV. More Gilligan Cuts later and a significant amount of the female cast is now into it. Additional props include tissues, pillow hair, and bathrobes, with the soap viewers discussing who deserves to end with who and commenting how vile and immoral the cliched Big Bad is. For extra funny, make one of them a man . For extra extra</ funny, make the man the most invested or emotional of them all In any case, it's likely that one person will just not get it at all, and the episode's struggle will center on them not being able to understand what's so good about this soap and feeling either left out or forced to watch something they don't enjoy. If they refuse to even give it a chance at all, you might end with Complaining About Shows You Don't Watch Has nothing to do with explaining literal body-cleaning products

Explicit sexual material, and works containing it. Troper discretion is advised . Also known as Pornography . Hentai is the anime/manga and Yiff the furry version of this. Lemon is this when applied to Fan Fiction , in particular those related to anime and manga series . Some of the works containing this you may have found hidden on the top shelf of your dad's tool shed, under his bed or while surfing on the 'Net . Others may seem like a normal show or book at first, but just when things are getting hot and heavy and you expect a fade to black , you instead get a big surprise - this content has shown up. When you discuss this with your friends expect many nudges, winks, and incredibly lame puns . Plot , or the lack thereof , is not a requirement. Regardless of medium, these works contain at least one depiction of explicit sex, and most have quite a bit more. Depending on the work in question, It's Not Porn, It's Art may be evoked. Not to Be Confused with George Carlin 's comedy album Parental Advisory: Explicit Lyrics.</ For tropes commonly seen in these types of works, see Sex Tropes . Obviously, articles with this in it are usually Not Safe for Work . Compare Too Hot for TV .

A character opens a surreptitiously bulging door to a storage area, and is buried in an avalanche of junk, followed by a skier or something if the authors are feeling particularly silly The set-up may often involve another character trying to clean up in a hurry (and by "clean up", we mean "just hide all the mess somewhere") If the closet is continuously left in complete and utter chaos as a Running Gag , no-one will bother to organize this closet, and instead opt to quickly open it, retrieve what they need, and hastily shut it in one smooth movement Later, a character who is

oblivious of the closet's nature innocently opens it, only to be buried under a heap of cleaning tools, souvenirs, novelties and whatnot Apparently, all household junk is rubbery and spongy enough that you can squeeze a roomful of the stuff into a single foot-deep closet, as long as you're strong enough to force the door shut afterward. Given the fact that many of these knickknacks can be comfortably squeezed into (and pulled out of) thin air , this may not be that inexplicable. Alternatively, the closet could just be really large on the inside If it's people</ tumbling out of a closet or similarly tight space, you've got The Stateroom Sketch . If it's letters that come pouring out of a mail slot, it's Bags of Letters Sometimes Truth in Television , but older . It was most notably the subject of a Running Gag on the popular radio series Fibber McGee and Molly </ — the former trope namer. Compare Closet Shuffle . Has nothing to do with actually blowing up closets, not with Transparent Closet , which is more metaphorical

In action movies, it has become almost mandatory that if an aquarium is shown at any point, the aquarium will inevitably be destroyed , spilling the water and all the poor fish it contains out onto the floor. Sometimes this is the result of collateral damage, the fish tank was merely in the way, and sometimes the destruction of the tank is intentional, with the fish - always some deadly and often poisonous species - being used as weapons themselves Occasionally Played for Laughs in comedies. May start with an Ominous Crack . Compare Opening the Flood Gates . For the outdoor version, see Big Dam Plot

Sometimes it's obvious a trope is going to happen. This is for when a character knows a trope is going to happen, or is happening already, but rather than trying to deny , change, or even hasten the trope, this character instead decides to take advantage of it Perhaps a Mook knows he is turning good, but also realizes Redemption Equals Death . So he uses his upcoming death as a Thanatos Gambit against the Big Bad . Or a girl in a romantic comedy knows whom she will end up with, and knowing that the other guy feels that I Just Want My Beloved to Be Happy , helps get another girl to be noticed by that guy. Whatever the case, doing so usually requires the character to be at least a little Genre Savvy ; similarly, the mark of a Wrong Genre Savvy character is often that they attempt to do this but fail Note that a clever character might also take into account the upcoming trope might be a trick, and this is a Subverted Trope . Thus that character might plan for either outcome Compare Invoked Trope (which is deliberately trying to make a trope happen), Flaw Exploitation Contrast Defied Trope

In recent years, Bud Light commercials adopted the formula that whenever the eponymous drink gets involved, someone says, "Here we go!" For Super Bowl XLVI, a Bud Light commercial is released involving a rescue dog named Weego who fetches Bud Light bottles and kegs whenever someone calls for him. ("Here, Weego!")

In Pokémon </, each town inexplicably has an identical In Nurse Joy and Officer Jenny, all from a common family. The In Magikarp Salesman, a recurring con-artist who tries to sell In useless Pokémon to James, tries to pass himself off as In a similar family to assure wary marks, but he's actually the

In same guy each time the Love Hina </ fic An Alternate Keitaro
In Urashima </, Motoko's Girl Posse , after being rightfully
In told off by Keitaro, exploit Poor Communication Kills by
In deliberately withholding the full story, knowing that Motoko
In will jump to conclusions and assume that Keitaro assaulted them.
In Unfortunately for them, it backfires, and Motoko is subsequently
In arrested and charged with attempted assault with a deadly
In weapon, with said Girl Posse being arrested as accessories;
In Motoko is genuinely shocked to subsequently discover that her
In posse lied and Keitaro never touched them

In Tangled </ Flynn and Rapunzel exploit the Power Glows trope when they use her Magic Hair to find a way out of a flooding cave.

In The Dark Knight </, Harvey Dent manages to take control of dramatic events at a trial and turn them to his advantage, effectively exploiting Courtroom Antics . An accused gangster tries to shoot him in the middle of the trial - Dent promptly punches and disarms him, stunning the entire court. When the judge calls for a recess, Dent hams it up: "Your honor, I'm not finished!"

Animorphs </: On several occasions, the Animorphs exploit Visser Three 's status as a Bad Boss , knowing that his leadership makes the Yeerks less effective. Indeed, it works to their advantage on multiple occasions; more than once, some of the Visser's subordinates have found evidence that the Animorphs were in fact humans, due to such clues as a pair of jeans floating in the sea after a confrontation by a beach. However, due to their fear of the Visser's intolerance and possible wrath, they choose not to question his beliefs (Visser Three was firmly convinced that the Animorphs could only</ be Andalites due to his belief that the Andalites would never</ share their technology, especially the morphing technology , with other species).

In It's Always Sunny in Philadelphia </: A character exploits He Is All Grown Up . He gets revenge on the girls who broke up with him on high school because of his acne problem by going out with them again , pretending to be in love with them, and planning a wedding with them only to leave them right before.

BlazBlue </: A big part of the series is Yuki Terumi exploiting Hate Sink . Virtually everyone in-universe hates him, with several people in particular wanting him dead... and Terumi actually goes out of his way to cultivate</ others' hatred for him, because he feeds on it to stay anchored to the world and power himself up .

In If the Emperor Had a Text-to-Speech Device </, the God-Emperor of Mankind from Warhammer 40,000 </ gets the titular Text-to-Speech Device installed and is Suddenly Speaking , which immediately gets exploited by him complaining about the worrying state His Imperium is in and also exploited by everyone else since they can finally communicate with their Sovereign again and help Him create a good Imperium once again.

The Order of the Stick </: , Tarquin, who is hanging from the edge of the Mechane </ attempts to exploit Evil Cannot Comprehend Good , thinking that Elan will save his life to prove the hero is better than the villain. Elan refuses and abandons his father, turning this trope into Evil Cannot Comprehend Good Is Not Dumb .

When The Nostalgia Critic reviewed the Casper </ movie, the actual Casper showed up and anticipated it to be Suckiness Is Painful , so that he could finally scare people for real. It didn't actually turn out that way though, with the Critic eventually declaring the film So Okay, It's Average In BIONICLE </, Big Bad Makuta put the Physical God Mata Nui into an endless sleep, but he knows that heroes will wake him up again Because Destiny Says So . Rather than waste a ton of resources trying to stop the heroes, he arranges things so that

Hollywood is not interested in teaching or even researching physics, and generally doesn't even depict normal explosions on Earth accurately, so it's no surprise that explosions in space rely on Rule of Cool rather than science. In the movies, explosions in space work pretty much the same way explosions on Earth would (or rather the way film-makers imagine</ they would, with lots of red flames and smoke) In reality, space has no air to transfer the explosive energy to. Thus, explosions would have an initial brilliant flash, and the resulting </ fireball and debris would travel away from the point of explosion far too fast for the eye to see. Do note that without any atmosphere or gravity to act on the debris, it will continue on at full speed until it hits something, meaning such an explosion could actually be more</ dangerous than it would have been in an atmosphere Nuclear explosions would be similar, but with a much brighter flash, and little or no visible debris since it would be vaporized Explosions in vacuum on the surface of a planet, moon, asteroid etc. will look similar to those in zero-g, but any debris that does not achieve escape velocity in the local gravity field will arc back down and rain to the surface. In low gravity, this could take minutes or even hours Further, if a spacecraft blows up, the explosion should have the same velocity as the craft did (possibly altered by the velocity of whatever hit it). I.e., the boom should keep moving. Many movies and shows have a fast-moving craft turn into a stationary</ explosion (relative to the camera) Above all, explosions in vacuum would be silent In many cases, this is caused by the method of special effects: actual pyrotechnics in an atmosphere. It should be noted that this is generally considered an Acceptable Break From Reality by the majority of the audience. Some works even try to find ways to work around it. One way is fictional elements used as fuel for ships, which are very flammable Many Hollywood Explosions In Space will also include a Planar Shockwave This is such an ubiquitous trope that only aversions and subversions should be listed

A character gets a "cigar", puts it into his mouth, lights it, EXPLOSION! Another victim of the explosive cigar! This sort of thing commonly occurs in cartoons In a comedic work, after the smoke clears, the sap will have a smoke-blackened face , their eyes will be bugging out in alarm and the cigar will now be a stub with a star-shape of peeled-back cigar paper at the end. In more serious works, the results will typically end up being fatal A common variation of this joke (usually non-fatal, but not always) is for the victim to suspect the cigar is "loaded" and insist on swapping cigars with the instigator; unfortunately, the instigator is too clever for him and had the "loaded" one in the first place, meaning the victim still ends up falling for it A form of Non-Fatal

Explosions . Also see Ash Face . Compare Eat the Bomb . Contrast Cigar-Fuse Lighting . See also Tainted Tobacco for a more a subtle way to kill with a cigar

In most fiction, outer space is not friendly. Woe betide anyone foolish enough to step into it unprotected (or unfortunate enough to get Thrown Out the Airlock): they'll pop like a turkey with a grenade stuffed inside. Well, that's the movie version. The reality is quite different. As unfriendly as the vacuum of space is, the body's made of stern enough stuff to stay in one piece. When you step outside, you've got about 15 seconds before you pass out from anoxia , a couple of minutes at best until you die from the same, and all sorts of nasty decompression injuries in between. (Exposed areas swelling up, body fluids boiling off your surfaces) But, you never quite</ go boom: remember, technically speaking, your blood is not</ in a vacuum: it's in you</ , so swelling and boiling blood only occurs toward your squishiest, outermost layer of capillaries. Incidentally, holding your breath would be worse than useless; the difference in pressure would cause a serious and fatal embolism even from the smallest amount of air in the lungs resulting in death even if someone manages to rescue you. Though this isn't the bottom line. Pulmonary barotrauma (lung rupture) is possible</ , but not guaranteed. It is far less likely if the decompression occurs slower than about half a second, which is quite common in sci-fi. Good luck getting all of this across to most audiences, though. As one of the great classics of Hollywood Science , the belief in explosive decompression is so widespread that audiences are more outraged when it doesn't</ happen (see The Coconut Effect and Reality Is Unrealistic). That said, an explosive decompression can happen in real life if you get a really</ high-pressure gradient - from far above-normal pressure down to atmospheric pressure, say. Or, to be more precise, at least 7 or 8 atm (atmospheres), with 1 atm being normal atmospheric pressure. These pressure gradients are usually only found in decompression chambers meant to allow deep-sea divers to return to the surface without contracting the bends. These chambers are only slightly</ less dangerous than the alternative of having the divers spend hours underwater as they ascend very slowly</. If you're interested, Google the "Byford Dolphin" incident - but beware of Nausea Fuel . Most space missions never come close to this, though, as they generally use pressures of 1 atm or less. To get an idea of how low that is: a soda can is pressurized at about 2 to 3 atmospheres above ambient pressure. The term "Explosive Decompression" is also legitimate, but it refers to the speed at which the decompression occurs, not the result or cause. There has only been that killed the crew, and numerous cases of (several of which led to crashes). But while it certainly can cause part of the airplane</ to explode (due to whatever fault caused the decompression in the first place), the usual result for passengers is either slow hypoxia, or if they are really unlucky a chance to go skydiving without a parachute. Discussed in detail See Space Is Cold for another way that space doesn't</ instantly kill you. See also Continuous Decompression for how Hollywood Science handles actual A unlucky character might suffer Fold-Spindle Mutilation as they're blown into space, then</ undergo Explosive Decompression.

The government needs a badass special operator for a suicide mission

no sane person would undertake. So they recruit a suitably trained prisoner for the job. How do you ensure that the prisoner will cooperate and not kill you and head for the hills as soon as their cell door is opened? You attach a bomb to them</ . This is a common means of ensuring that people do things they normally would not do because of common sense or other factors. While there are occasions where the bomb is physically implanted , it is usually in the form of a Slave Collar locked around the person's neck. The collar can have a detonator operated by the mission controller. It can be on a timer giving the operator a strict time limit within which to accomplish the mission. Or it can be triggered by proximity to a detonating device placed to prevent their escape. It isn't always for a government mission that this method of control is used. Explosive collars can keep prisoners from wandering off. They can make friends kill each other . They can make law-abiding people commit crimes. The collar is always accompanied by a promise to remove it once certain conditions have been met, but there's never a guarantee . See also Why Am I Ticking? , Strapped to a Bomb , Boxed Crook , and Your Head A-Splode . For non-exploding examples, consider a Restraining Bolt , Slave Collar , or Shock Collar . Sometimes the last trope can overlap with this one.

As You Know... , one of the more obnoxious side-effects of creating a believable world in Speculative Fiction is Expospeak . Aha! I've got it! An alternative to using a narrator (or making characters look bat-shit crazy as they stand around talking to themselves) is to label everything so clearly that the audience can tell what it is without further explanation! Everything shall be Exactly What It Says on the Tin ! Most ordinary things are not labeled like that in Real Life . While an Expo Label or two can help with the pacing, they can easily come across as silly and awkward. On the other hand, various scientific and technical fields are notorious for labeling everything in sight. Console gauges, dials and switches are often clearly marked, with broken components tagged as such to reduce costly (or potentially lethal) operator errors. Programming courses actually encourage you to label every single thing you code. And, obviously, medicine bottles have to tell you what's contained in them and how frequently you take doses of said medicine. Accordingly, the Big Red Button often has an Expo Label. Bonus points if it's handwritten on a piece of masking tape because the creator hasn't had the time or inclination to mount anything permanent. When it's a secret location that's being labeled, it's a Neon Sign Hideout .

Works that combine humans with non-human characters will often have the non-humans walking around stark naked (or as close as the Moral Guardians will allow) as they go about their everyday business. Genitals are never shown (or at least nothing that would be immediately recognizable as genitals to a human is); at best, these beings might wear a Seashell Bra or Fur Bikini to avoid Squicking their human companions While they will seldom mention any discomfort, savvy viewers might wonder how they regulate their body temperature or protect against environmental dangers, especially if they lack fur, feathers, scales, or something comparable. If the topic is raised, it'll usually be justified as either a religious or cultural norm, or Bizarre Alien Biology One might also wonder about the lack of pockets, though this might also be an issue for normally dressed humans in some settings Functionally, this helps to emphasize the otherworldly nature of the characters, as

it contrasts the awkwardness of undressed humans against the easy comfort of the naked aliens/fairies/demons/whatever. It's also an easy excuse to provide some Fanservice or comedy , though (sadly) almost always averted with Human Aliens . It can also simply be a form of cutting corners. After all, designing an otherworldly organism can be enough of a challenge without having to also design an otherworldly fashion sense (you can write your own punchline for this joke) May be an Innocent Fanservice Girl or Shameless Fanservice Girl if the character is a Green-Skinned Space Babe Also see Barbie Doll Anatomy , Fur Is Clothing , Monster Modesty , Our Nudity Is Different , and Non-Humans Lack Attributes . Creatures with a Clothing Appendage may look</ clothed but actually be this. Compare National Geographic Nudity for a concept a little closer to home. Contrast with Little Green Man in a Can . The opposite trope of Enclosed Extraterrestrials . Not to be confused with a Broken Masquerade , which involves extraterrestrials (or otherworldly beings in general) being "exposed" to the skeptical masses

Marvel Comics

Exposition is used to give information to the characters, along with the audience, on what's going on. One way to give exposition is by having a character explain it, usually by Mr. Exposition . But when the character is about to start explaining things, they don't get the opportunity do it because someone else does it for them. When this happens, they will get annoyed or be disappointed because they wanted to explain it There are several reasons why the expositor would get frustrated if this happens to them. The character probably did a lot of research on a certain subject and is ready to reveal what they discover only to find out that it was All for Nothing since someone else already has knowledge of the subject. The character knows how shocking and amazing the information is that they want to be the one to reveal it to surprise everyone, only to be disappointed that someone else beats them to it. The character is Mr. Exposition and their purpose is to explain things, but when someone does their job for them, they would get irritated because if someone already explains it then what exactly is their purpose then? They might also feel embarrass if the information they were about to give may be inaccurate, they're just stating the obvious , or Everybody Knew Already . Whatever the case, the expositor should have some kind of reaction when someone takes over for them On the other hand, there's several reasons why the other character would takeover the exposition for them. The main reasons is the character just happens to have that exact knowledge of the subject or Mr. Exposition is among the group already and they explain it before the expositor even starts. Because the character already has the information they need before hand, they, along with the audience, don't want to hear the same exposition again, unless it has new details. If the other character doesn't explain the subject they could just make an accurate guess on what's going by observing their surroundings or with a Gut Feeling , and the expositor can only confirm their guess with an irritated tone. The character knows the information the expositor is giving is inaccurate so they interrupt them and tells the correct information. The information the expositor is about to give is long and complicated so another character takes over to give a short and simple version. The character can also take over for petty reasons or just to troll the expositor. Perhaps the

expositor is about to say something they were not suppose to reveal so another character takes over before the secret is revealed and they give a less revealing exposition. That way The Reveal can be discovered later on in the story This may backfire on the character who takes over for the expositor because while they may know what's going on, they may not have all the facts and details on the subject and expositor will just assume since they know everything they probably don't want to hear what more they have to say. The expositor may come back later in the story to explain the missing details . Regardless of who gives the exposition, the audience is still informed on what's going on Compare As You Know... and Everybody Knew Already

So, Mr. Exposition 's here and he's about to give a quick introduction to the magic system , outline his plan to defeat the Big Bad and explain where those nasty beasties hail from. Unfortunately, it's hard to explain this to the audience. It may be too complex (or dull) to explain in just words, or perhaps the producers don't want to be accused of resorting to Mr. Exposition talking for 5 minutes Either way there's an easy solution: draw them a diagram. A diagram for the purpose of exposition . Note that this only applies if the diagram is there for the benefit of the audience. Whether or not the cast themselves can see it is incidental (so a diagram which the audience can't see or isn't part of any exposition doesn't count). Variations can include examples where: The diagram really exists and was created normally (e.g. by drawing it). Often the explainer will use drawings in universe too (which may be subject to Stylistic Suck). See String Theory for when things are less organised or viewer friendly. See also Rebus Bubble for another sort of visual representations . See Formula for the Unformulable when a character tries to solve a non-scientific problem with maths and science. If the exposition is about what will happen should the heroes fail, you're Storyboarding the Apocalypse .

Exposition is a literary tool that is used to give information to the audience through dialogue , description, flashback , or narrative In nonfiction , exposition is commonly found in essays, directions such as recipes and instructions, encyclopedias, and biographies . Exposition in nonfiction is usually achieved through description In fiction , exposition can be given in multiple ways. Sometimes it's as simple as a character observing a headline on a newspaper and sometimes as complex as the narrator giving an overview of the full history of the fictional world Exposition is a two-edged sword. While it is extremely useful for establishing setting, plot, and characterization, too much exposition at once can bog down a story and slow the pace to a crawl. An exposition that is overly long or wordy is known as an Information Dump (or Infodump for short) and is very difficult to do well See Information Desk (where characters</ learn things), Meaningful Appearance (using the way characters look as a form of exposition)

As You Know... , Speculative Fiction often relies on large quantities of Expospeak in order to deliver enough information to the audience that they can work out what is going on. When the hero is Trapped in Another World or some other sort of Fish out of Water , he will often be provided with a companion almost immediately who is of this strange world, and therefore can serve as Mr. Exposition .

On the other hand, when the series is based around Imported Alien Phlebotinum , it may come with a comprehensive user's manual, or an alien visitor (in alien invasion series, especially an alien defector) who can reasonably act as a source of information. And then on the other</ other hand, some shows just, well, don't care. But we're still going to need that Expospeak . If the audience doesn't have it clearly explained to them what the aliens' plot is and how their Applied Phlebotinum works, they might not realize how clever the writers were — what do you think this is, Battlestar Galactica </ ? But if he doesn't have the special backstory to justify his insider knowledge of aliens, monsters, interdimensional beings, vampires or mole people, how would Mr. Exposition be able to explain what the bad guys want here or how they work? Well, let's just declare that he's a Scientist . We all know that being a scientist is basically just science fiction speak for being a wizard, and it means you have magical foreknowledge. We'll say that because he's a scientist, he can tell, just by looking, that the twenty-story tall monster must gain his great power from a form of fusion energy, and is obviously weak against low temperatures, and will be attracted by the soothing sounds of John Tesh music. Sure, he'll couch it as a "guess", as if he's just making a perfectly natural extrapolation based on what he's seen and real science. But his "guess" will be incredibly specific, it will be only one of several equally plausible possibilities based on the evidence, and it will never ever</ be anything other than 100% correct in every detail. This will be presented as a natural consequence of Mr. Exposition being very smart, though some audience members might notice when they reach the refrigerator that these "theories" follow about as naturally from the evidence as would deducing the color of someone's eyes from a single shoe print. Note that this trope does not apply to characters who are able to exposit based on performing actual</ scientific research (such as Mr. Spock). See also: Namedar

Is The Hero of your Fantasy tale Really 700 Years Old or your Big Bad a Time Abyss ? Perhaps Mr. Exposition gained most of his knowledge by being Older Than They Look ? They are? Great. Now, how best to go about showing the audience that they are? Exposition of Immortality is a Narrative Device common in Speculative Fiction , Fantasy Literature and media derived from those sources. If a work has a character who falls into one of the immortality tropes you can be 99% certain that, at some point, their age is going to come up in conversation or otherwise be brought to the attention of the audience. The methods that a work uses to show that a character is really, really old generally occurs in the following ways: Bob has maintained a series of identities down the ages, all with the same face and often related to their predecessor . Eventually, someone finds photos or paintings of him from hundreds of years ago. Alice has a company of which she is CEO. And someone finds the documentation that shows she's been CEO since the company was originally founded. During the Renaissance. For some reason, with this trope, no one ever seems to consider the possibility of Identical Grandson , which is generally the more reasonable conclusion. Exposition Of Immortality is the same as Time Travel . Characters who end up with memories of past times or encounters with historical figures solely due to temporal tourism did not live through that period of history, and thus, aren't demonstrating their extreme longevity at all. Such characters may, however, be encountered by people who know them in the future via Time Travel . Exposition Of Immortality only</ applies to characters who're

unusually long-lived or actually immortal. Naturally old characters reminiscing does not invoke this trope. Closely related to Really 700 Years Old , Time Abyss and Older Than They Look . Often involves Dreaming of Times Gone By , The Time of Myths and settings with a Fantasy Kitchen Sink . When Played for Laughs , this becomes a Historical In-Joke . Exposition of Immortality will often lead to two sub-tropes being invoked: Exposure of Immortality and Evidence of Immortality. Evidence of Immortality: Exposition that shows a character to be immortal or otherwise older than he appears to be can happen in any of the forms listed in Exposition of Immortality. However; memories, conversations, and flashback sequences don't tend to hold up too well as evidence. Photos, paintings, objets d'art</ and a series of documents showing that you and the last 10 generations of your 'ancestors' have the same handwriting are much more damning proof of your unnatural longevity.

Sometimes the viewers are morons , but sometimes the characters are even worse. In a story where a potential victim ends up Alone with the Psycho , he or she will, upon working it out, stand there and bark questions at them instead of running away. Because obviously, cross-questioning a potential murderer about how he knew the victim was missing her wedding ring is a much more productive use of your time than clubbing him over the head with a brick and taking to the hills. Usually this happens just after the police/hero and most of the audience have worked out that something is not right about the character, to help the slower viewers catch up. Alternatively, it allows the villain to explain some element of the plot that would otherwise only be mentioned during their interrogation by the police. Usually, the good guys turn up Just in Time to stop the victim from buying the farm, thus throwing a wrench into the Darwinist machine once again. Compare Alone with the Psycho and Have You Told Anyone Else?

A joke based on describing something mundane using such technical language that it takes the audience a while to work out what's being talked about (though a Translator Buddy usually catches it right away). Mostly limited to Speculative Fiction , where it can be seamlessly slotted into the standard Expospeak , but occasionally turns up in other genres, especially when the characters are meant to be especially intelligent or academic, such as scientists or doctors. Sometimes used as a form of Unusual Euphemism or to facilitate an Oops... I Did It Again plot where someone assumes the technical explanation refers to something much more serious than it really does. Can be used to implement a Tomato Surprise , ("Their only weakness is dihydrogen monoxide! ") or serve as a MacGuffin as the hero engages in an Evidence Scavenger Hunt to work out what the Expospeak really means. (For example, the hero is told that the Monster of the Week is a "lycanthrope", and then has to spend the next few scenes doing research to discover that "lycanthrope" is another word for "werewolf.") This second variety is dangerous, as you often run the risk of making the hero look like a complete moron if the Expospeak isn't impenetrable enough. The number one all-time most common Expospeak Gag is, "He suggested that you perform an anatomically impossible act. " Compare with Description Porn and Non-Poetic Mauve Text Reflective Of Electromagnetic Waves Measuring Between Three Hundred Eighty And Four Hundred Twenty Nanometers . See also Sesquipedalian Loquaciousness , Sophisticated as Hell , Layman's Terms , Blunt Metaphors Trauma , Narrative Profanity Filter , Spock Speak , Techno Babble , Call a Rabbit a "Smeerp" ,

Antidisestablishmentarianism , Scary Science Words . Buffy Speak is the opposite. If a character forces someone else to expospeak, that's Insistent Terminology . A subtrope of Bathos .

Expospeak is Exposition , often an Infodump , about the world itself. Science Fiction is often set in a world not our own. This could be an actually alien world, Earth of a different time, or just the world we know with a secret magical subculture revealed. To get the differences across, characters will, in casual conversation, tell us about the world in which they live. It's as if you were driving somewhere with a friend, and suddenly said "Gee, travel sure got a lot easier since we started basing our cars on the internal combustion engine!" or " As You Know... , a red light means 'stop', while a green light means 'go'." It's not simply limited to technology: Science Fiction writers want to explain everything</. How does their evil plan work? What's their motivation for carrying it out? How old is the character? What's his backstory? What's the political history of the region he's living in? A good writer in other genres will probably know</ all of these things, but only in Science Fiction will the writer feel the need to actually tell</ us all of it — it frequently seems as though the author is less concerned that the audience won't understand what's going on, and more concerned that they might not believe that he/she's really thought everything all the way through. Sadly, this often serves the opposite purpose, making the audience all the more painfully aware when the explanations don't quite add up. The Continuity Nod abounds too. When a writer gets sufficiently desperate to explain a bit of science or continuity, one can be left with the impression that he's not doing it so much for our benefit, as to make sure we know he</ did his homework. While other writers use Exospeak when it's completely unnecessary as a joke, the Expospeak Gag . Note that some series have tried to avoid Expospeak. What they pick up in the mainstream, they often lose on the fringes, as fans accuse the writers of sloppiness because they ''didn't'' explain everything . Reflecting this trend, a New Media format of Expospeak was used in GunBuster </, where it was limited to omake segments on the tapes/laserdiscs/DVDs, and completely separate from the main show. A predilection for Expospeak hasn't prevented Police Procedural shows such as CSI </ from leaping to the top of the ratings , or many novels on bestsellers lists (Dan Brown 's books are laden with Expospeak about different subjects), lending credence to the oft-expressed idea that the reason speculative fiction only seems</ to be in decline as a genre is because its tropes have been adopted by the mainstream. Overlaps with many tropes in the Exposition index. See also Luckily, My Powers Will Protect Me , Calling Your Attacks , and Informing the Fourth Wall .

As You Know... — Note, though, that not all instances of As You Know... are Expospeak: when an As You Know... is used to reveal something that previously happened off-screen or to reference a previous episode, that's not Expospeak. When it's used to frame an explanation about how the world</ of the series works, it is.

A pregnancy that goes from conception to birth at an extremely fast rate, often caused by an external (possibly supernatural) factor In Science Fiction , this is often because of some other hugely advanced race knocks up a different one, possibly a human, and the

hybrid offspring gestates at an enormously fast rate, either normal for the other species, and grows to term in a matter of days. Or, if it's created like a robot, the creation is sudden and wasn't announced in previous episodes, and the whole process takes a very short time This is sometimes just when Writers Cannot Do Math or they are using Comic-Book Time or Webcomic Time and lose track of what the hell is supposed to be happening Tends to go hand in hand with Fetus Terrible . Contrast with Longest Pregnancy Ever . Not to be confused with Instant Birth: Just Add Water! , which is where the woman's pregnancy takes the usual forty weeks but her labor and (especially) delivery are implausibly quick. Also, please do not confuse this with Instant Home Delivery , which has nothing to do with birth

In large supermarkets, certain checkout lanes will be designated " N</ Items or Less". These "Express Lanes" allow customers who aren't buying very much to avoid a long wait in line behind those who have many more items In fiction, Hilarity Ensues when someone blatantly exceeds the limit, or tries to stay under by making up rules about what can be considered as a single item. Often times, exceeding the limit by one item is common fodder for a Felony Misdemeanor There's a variant where someone is only a little over the limit in a way that everyone finds acceptable, but wastes a lot of time fretting over the limit out of principle, trying to decide what they don't need and what should or shouldn't count as one item This was Truth in Television for a long time as stores are reluctant to enforce this rule due to customer service reasons. However, the replacement of express lanes by self checkout machines have turned this into a Discredited Trope . Some proprietors have chosen to designate lanes as "basket only", placing a limit on the volume of purchases rather than quantity

An expy (short for "exported character") is a character from one series who is unambiguously and deliberately based on a character in another, older series. A few minor traits, such as age or hair color, may change, but there's no doubt that they are almost one and the same. They often turn up in different works by the same writer(s) or production team This can simply be the tendency of writers to prefer certain characterizations for important characters (or knowing which ones are most marketable/popular), or the influence of the design process. On the other hand, it may just be a bad attempt to try to revive a character who the writer liked, but nobody else did and had to get rid of it . When by a different author, it may be an homage to the original creator and/or character or because the author did not have the rights to use the work and wanted to avoid copyright or trademark infringement issues. In the negative sense, an expy can be seen as just a bloated, gimmicky version of a perfectly serviceable past character. In a positive sense, it can refer to an "upgrade" of a two-dimensional or otherwise limited character to one more appreciably complex Remember that Tropes Are Tools ; an expy can give an old character concept a new lease on life, take it in a different direction, adapt it to a new medium, or simply do something with it that's as good or better than the original. Iconic characters like Yogi Bear and Mickey Mouse are obvious clones of Art Carney and Felix the Cat , respectively, but that hasn't stopped them from being among the most acclaimed cartoon characters of all time Theory: any Characters as Device trope, if taken to the extreme, can result in the character appearing to be

a mere expy of the Trope Codifiers for that trope. Especially if the character is Flanderized to the point of having few defining characteristics outside of the trope they represent. See Fountain of Expies Most often seen in animation and video games, where it's much easier to make a newer character resemble an older one. Occasionally happens when characters from different stories end up sharing voice actors, making or even forcing their personalities to look even more similar, which often leads to jokes based on the voice actor's former role When the character appears in the same series as the previous character, they're often a Suspiciously Similar Substitute . Contrast this with Mirror Character The key difference between this and Captain Ersatz is that an Expy uses the other character as a starting point before going in their own direction,</ while Captain Ersatz is obviously the same character but with the Serial Numbers Filed Off . Please keep this distinction in mind before adding an example here. Also note that a fictional counterpart to a real-life person would be either No Celebrities Were Harmed , No Historical Figures Were Harmed , or a Shout-Out , depending on the intent. A quick glance around TV Tropes will reveal just how often these mistakes are made on this very wiki ; superficial or random coincidental similarities (even very striking ones) do not qualify, so if you aren't certain, they probably are not an Expy. Because many character archetypes and tropes that compose characters are universal, it is easy for readers to fall into thinking that a particular character in the same general archetype resembles someone from their favorite show or novel, especially when Small Reference Pools lead readers to overestimate the cultural impact of their favorite characters Also, note the insistent use of singular pronouns when referring to the Expy's inspiration in this page's description. This is because an Expy is . If a character borrows traits from multiple other characters, then the influence of each source of inspiration is diluted to the point where it doesn't count as this trope anymore Spiritual Successor is a similar trope scaled up to an entire work, and thus as a result often features Expies of characters from the original work A Super-Trope of Alternate Company Equivalent , Corrupted Character Copy , Expy Coexistence and Fountain of Expies Compare to Bleached Underpants , Name's the Same , Roman à Clef , Similar Squad , Same Story, Different Names , Suspiciously Similar Song , Distaff Counterpart , Surprisingly Similar Stories , Evil Counterpart , Whole Plot Reference , Writing Around Trademarks and Product Displacement . Not to be confused with XP , nor XP Compare Fantastic Fauna Counterpart , which is sort of the animal equivalent: a fictional (or extinct) species of animal is clearly meant to be the counterpart of a real-life species, but at the same time is clearly not</ the same species Contrast In Name Only , Transplanted Character Fic For specific characters that tend to inspire expies, see Fountain of Expies . For a series with numerous different expies in its cast, see Cast of Expies . When an expy and the character they are based on are both found in the same universe, then you have Expy Coexistence

Some people can't just say "hello" and leave it at that. These people are the ones who belong to this trope: They cannot give a simple greeting, salutation or announcement. Instead, protocol or cultural mores from their city, state, dimension, planet, or other point of origin, or even a self-imposed code of conduct, require a lengthy greeting far longer than local etiquette requires. Variations include: A character has an extremely long formal name(s) with

titles, and it is a terrible breach of protocol/etiquette to shorten or omit any. The greeter may fall over exhausted after the greeting; or those they are greeting may do so. May overlap with Try to Fit THAT on a Business Card! or Large Ham Title . See also Long List , Secret Handshake , and Fictional Greetings and Farewells . In pre-modern or medieval fantasy settings this frequently overlaps with Verbal Business Card since the greeting may include useful information about the person's identity (rank in society, past accomplishments etc). If one specific person greets people or is greeted in this manner, see catchphrase and Phrase Catcher respectively. Being able to memorize (or even more impressively, extemporize) these kinds of greetings is the chief skill of a Hammy Herald .

See also Amusing Injuries .

A favourite assassination method of mobsters and spies alike is to hook up a bomb to the ignition switch of a car, so that it will lie dormant until some poor soul starts it While the intended target is, naturally, the car's owner, this trope is the number one killer of chauffeurs and valets — which occasionally raises the Fridge Logic of why you would put an ignition-triggered explosive in a chauffeured car in the first place — and has claimed its fair share of helpful Dead Sidekicks and Disposable Women as well There is an interesting case of The Law of Conservation of Detail attached to this trope. In normal circumstances, little to no screentime is devoted to a character walking to their car or starting it. Hence, whenever this does</ happen — especially if you see a close-up of the key — the viewer probably has a distinctly uneasy feeling in his stomach . Wait for it... three... two... one... ignition! Another dead giveaway is if the car is a gift from someone the recipient really shouldn't trust Variations include remote-detonation and bombs hooked up to other parts of the car, but the idea is to kill the occupant. Cars turned into suicide bombs don't count A subtrope of Vehicular Sabotage . See Every Car Is a Pinto for cars blowing up that have no reason to Unrelated to steam engines and Stirling engines, which really do work by "external combustion"

While some works of fiction expose the "truth" about historical figures or events , others expose the "truth" behind the events of earlier works of fiction. This is mostly confined to parodies or works that attempt deconstruction of the work(s) they reference This is most common in Literature , due to their ability to reference other novels hundreds of years old (and out of copyright). Fan Fic , of course, can and does cheerfully ignore the copyright issue, frequently merely to try to justify the source material's tropes by means of Fan Wank When very well done, this can result in interesting and thought-provoking works. When not done well (more often), it can turn into commercially-published Hate Fic , or a shallow and irritatingly self-righteous attempt to impose contemporary moral or ideological standards on a work written in a different era Sometimes overlaps with a Perspective Flip . Often a form of Twice-Told Tale . See also Fractured Fairy Tale Related to Demythification , which applies this to Mythology into Historical Fiction by Doing In the Wizard . The catalyst of an External Retcon is often a Been There, Shaped History character

A common detail used to characterize a futuristic or otherwise crapsack Earth is that a recognizable and/or ubiquitous species in our world is either extinct or critically endangered and on the verge of extinction as a result of disease, pollution, habitat loss , phlebotinum , a past disaster , or just good old human interference. This could be meant as a Green Aesop , to serve as a reminder that Humans Are Bastards , or to easily demonstrate that this world is in bad shape and/or that it is different from our own. Futuristic alternatives to replicate the lost species and/or their ecosystem functions (eg. cloning, genetic engineering, Time Travel , robotic replacements) may come into play as well Whales and other sea life are common victims, as they are quite vulnerable to habitat change, pollution, exploitation, and other forces that can drive species to extinction. This can also be used with so-called "charismatic species" like tigers and pandas, since these are famous endangered species that are familiar to the general public A Sub-Trope of Gaia's Lament , and could lead to Only Electric Sheep Are Cheap (natural products are more valuable than synthetic products in a hypothetical future) Contrast Not So Extinct , where species thought to be extinct show up again. Compare Humanity's Wake for when humans go extinct

The laws of thermodynamics and conservation of mass prove there's a finite amount of energy in this universe. It can never be created or destroyed, but just change form. Of course, there Ain't No Rule that says you can't bring in energy from somewhere else to solve your needs. Enter the extradimensional power source, which is Exactly What It Says on the Tin : utilizing the energy from another reality for whatever purpose one might have in mind for it Depending on the work, the extradimensional energy can be of magical, technological, cosmic, or even quantic nature. The latter often happens in sci-fi works because otherwordly particles are convenient Applied Phlebotinum . Using energy from another world frequently has unforeseen consequences, because of how it may interact with a different world If there is No Conservation of Energy in a work, this trope is the most likely reason. Contrast Background Magic Field , which is when the power comes from the same dimension as the user

Extra! Extra! Read all about it! Cliché stock phrase from the 1890s through the 1940s used to denote breaking news! Sometimes uses "extry" or "wuxtry" to denote a New England accent! Often shouted by overzealous newsies and paperboys! A Dead Horse Trope nowadays owing to television and the internet! Related to Spinning Paper ! Extra! Extra! But what does it mean? In the old days before TV, radio, and the Internet, most people who followed the news got their information from the newspapers, which were (and still are) normally published at best on a daily basis. If a major story (such as the death of a President or a declaration of war) broke after the day's deadline, a newspaper might choose to print an "Extra" edition on top of their regular edition. Sometimes they were short and carried only the story itself, but more often they were identical to the earlier main edition with just the first few pages replaced. By the 1940s, though, newspapers were in competition with radio for advertising dollars, and big-city papers like the New York Times</ and the Montreal Gazette</ published four or five regular editions a

day, taking any possible opportunity to publish an "extra" so they could boost circulation. Even now, papers infrequently publish short "extra" editions if a really</ big story breaks; many did after 9/11, for instance. For extra cliche points, this trope is frequently trotted out for minor happenings and other news events that wouldn't normally warrant the printing of an extra edition, particularly ones exhibiting the Worst News Judgment Ever . Compare This Just In! , which is this for News Broadcasts .

The Extranormal Institute is a strange and/or wonderful place where bizarre is the new normal. It makes good internal sense (as opposed to farce played for laughs) and is genuinely functional (as opposed to a Crapsack World or the like), but has a very high weirdness level as real people deal with fantastical things. Such a location is usually an important part of the attraction of whatever series it's featured in. Naive Newcomers (perhaps Strangers In A Strange School) can be expected to drop their eyes. The regulars may well be aware of their madhouse status and even proud of it. Often, stories in such a setting will be in a genre (besides/in addition to the obvious sf/fantasy) in which the protagonists spend a lot of time exploring the details of the setting, such as School Story, Medical Drama , or Police Procedural . Of course, the contrast with the mundane aspects of that genre helps the bizarre details of the setting to stand out even further. The Cool School is a Sister Trope, and Subtropes are mostly types of educational institutes, including: It also has at least one exception to the above: Contrast with Mundane Fantastic and World of Weirdness , where the entire world is like this (at least for the protagonists). Not to be confused with a School for Scheming , which appears to be this but is actually led by malevolent individuals or groups planning to exploit or manipulate the students. Doumori Primary School in Hell Teacher Nube </ is a huge, glowing focus of paranormal activity in the Doumori district. Hardly a day goes by without it (or its students) being attacked by hordes of demonic creatures from the deepest, darkest reaches of Japanese mythology . Even the staff and the rest of the student body are pretty much used to this sort of thing, but Nube's class gets most of the attention.

Fantasy stories set in magical lands , Fairy Tale kingdoms, worlds of High Fantasy , Heroic Fantasy , or Sugar Bowls and Science Fiction stories set in a Crystal Spires and Togas Utopia or somewhere on the squishier end of the Mohs Scale of Science Fiction Hardness seemingly take place in universes far removed from the concerns of reality. Yet despite how fantastic these worlds seem upon the first impression, it can turn out that their denizens still spend much of their time dealing with the same ordinary matters (e.g., money, employment, taxes, bureaucracy, politics, lawsuits, potholes in the street, etc.) that people do in Real Life . This is how the Extraordinary World, Ordinary Problems trope works. It can be invoked by anything from a quick joke, a parody of fantasy and science fiction tropes, or a complete deconstruction of either genre. One way to get the point across is to feature an outsider who's initially in awe of the new setting but soon learns things really aren't much different from the mundane world he or she came from It can overlap with Weird Trade Union , Magical Society , and Signed Up for the Dental when labor issues and disputes crop up in the fantasy or science fiction setting. Often

comes up in a Fractured Fairy Tale . Frequently part of an Urban Fantasy work (and is among the Urban Fantasy Tropes) A variation on Surprisingly Realistic Outcome and also Fantasy All Along if the aspect of Real Life is only briefly brought up as a joke. Compare with Low Fantasy , Mundane Fantastic , Magic Realism , Mundanger , and Adult Fear . See Fantastic Angst , where a character suffers from a real-world personal problem with an extraordinary source. Compare Inexplicable Cultural Ties

A child is conceived, but instead of simply mixing one male sperm and one female ovum, a third set of genes becomes involved. Most often used in a Free-Love Future or as a result of Bizarre Alien Biology , a child turns out to be the genetic offspring of multiple people — except, it was natural conception</. Perhaps we're dealing with aliens or supernatural beings and it's normal for them to conceive children this way. Or maybe, this was just some freak occurrence which took everybody</ by surprise. However it went down, Mass-Coitus Ensued and a baby happened. May be related to Polyamory or occur during A Party, Also Known as an Orgy . The situation may spawn (or should that be "conceive") an Aesop about such activities Compare Bizarre Alien Sexes and Has Two Mommies . Compare and contrast Homosexual Reproduction . Opposite of Truly Single Parent

This is when a story has a Masquerade in place that, based on the events of the plot, should have been broken , but somehow isn't . Maybe a dragon terrorized the populace of Manhattan. Maybe aliens landed in London and had tea with the Queen. Or maybe the Sphinx came to life and led a mummy army against Cairo. Whatever the specifics may be, it seems like the world of the story should have become unmasqued , yet the general public seems as ignorant as ever Normally this sort of thing gets a Hand Wave about the Ancient Conspiracy or some other entity erasing everyone's memories of the event, passing the whole thing off as a hoax, or at least claiming people's Weirdness Censors take care of the Masquerade for them. Sometimes, though, we don't even get that. The Masquerade just seems to repair itself of its own accord This has the additional benefit of lifting responsibility off the shoulders of the heroes, who now don't have to actively suppress anyone who knows the secret via methods above or passively promote ignorance by not warning Muggles about the supernatural beasties who want to control or kill them

An The official Myers–Briggs website spells it Extravert but Webster's spells it Extrovert. For purposes of this wiki, both spellings are correct) character is one who tends to be right at home in a crowd of people, and generally be talkative and gregarious. They can be the Life of the Party or the leader of their True Companions . The fact that they're right at home in a crowd is actually one of their biggest weaknesses: they may become stressed if away from people for too long The short version: an extravert gains energy by being in large groups of people, and expends it by being alone. In Myers-Briggs parlance, they are E's. They tend to be either sanguine or choleric and the Red Oni Compare Ensembles . Contrast Introversion Tropes . For the Trope Maker and Trope Codifier , See Carl Jung

Ahem... This is a common technique in movies and television shows, Extreme Close-Ups ("ECU" or "XCU") are used when cameras zoom up to the face of the character in focus, sometimes zooming right in their eyes (with some letterboxing for good measure) or any other part of their face. Often time it's used to emphasize drama, and other times it's used for comedy. Maybe even add a hint of mystery Often used in moments of Thousand-Yard Stare , or the Mexican Standoff . Compared to Gross-Up Close-Up , Eyedscreen and Eye Recall

Humble, quiet , obedient , stoic ; the Extreme Doormat is all of these virtues... and that's all they are. A doormat, for those who do not know the slang expression, is someone who lets other people walk all over them. They lack drive, ambition, and even opinions</. Something about them just drives them to make everyone</ happy, even at the expense of their own happiness, and kowtow to every order and insult they're given, no matter how ridiculous or unfair it may be to them Naturally, such a narratively-empty character won't start drama, so they're usually a Satellite Character , Battle Butler , trusty companion, or part of a love harem for the more active hero. Part of being the Extreme Doormat is that they will obey just about any command from their love/hero/superior officer short of the suicidal ones (and sometimes even those). Sometimes, this can result from an Empty Shell with combat training under Mind Control . Or it could result from a character who Desperately Needs Orders as it would be a possible way for them to get people to give them orders A common plot for the Extreme Doormat is the discovery or growth of their own personality and backbone . Be it by having a true friend Teach Him Anger , confronting their (ab)user or being the subject of Character Development or even a Mook–Face Turn when the hero who treats them nicely encourages them to abandon a boss who doesn't , or a "lover" who keeps them dependent Frequently Apologises a Lot . Often the victim of those Taking Advantage of Generosity Contrast Yamato Nadeshiko and Silk Hiding Steel , both of which appear</ to be this trope but have a hidden, ironclad backbone, and Hair-Trigger Temper , who will overreact</ about anything. Compare and contrast Love Martyr , which is, mostly, not this trope

A professional detective applies their crime-solving skills to an old historical mystery. Either the mystery has remained unsolved in the interim, or the detective has found reason to suspect that the original solution was flawed Differs from a usual situation of Revisiting the Cold Case because everybody involved in the original incidents is (usually) dead. This means the detective has no opportunity to re-interview witnesses or suspects and is forced to rely on what physical and documentary evidence remains. It also affects the framing of a successful outcome, since it's too late to make things right for the original victims (though there may be a living relative whose situation will be affected) Often appears as the premise of a Something Completely Different episode for an established detective

It's a place so dusty, the cobwebs are basically measured in depth. If there aren't cobwebs, everything has a layer of gray from all

the dust anyway Heck, the only thing keeping dust from getting kicked up, everywhere someone walks around, is that it would be difficult to film (and be very uncomfortable for the cast and crew) On the gritty end of Sliding Scale of Shiny Versus Gritty . One likely site for a Bat Scare A Sub-Trope of Scenery Gorn Compare Cobweb Jungle , Cobweb of Disuse , Trash of the Titans

A work's size, of course, rarely hints at the lengths an author went to to write, compile, and pass the trial-by-fire that is publication. As a general rule, this trope covers anything that took more than ten years to write or make, or that involved some truly labyrinthine process, or simply because of Development Hell . While a publicised work is trapped in an Extremely Lengthy Creation, it is often comes to be considered Vapor Ware . Occasionally, this can be a very good thing, as having a long time to think about your creation can result in a worthy masterpiece. However, spending too long on something can result in a work that is completely overwrought and filled with flaws that you don't notice because you have spent so long looking at whatever it is that you become blind to your own mistakes and used to your Purple Prose and alliterative grammar. This trope is divided into three categories: In-Universe Examples : These examples occur within</ a work; if the book is about Sue's decade-long fight to finish her Magnum Opus , it goes here. : This category is for examples of works that took a long time to complete relative to the medium used. For example, if it is a book, up to five years is relatively average for a first novel and one-two years for anything after that. As a general rule, anything over six years for a novel and ten years for a door-stopper should be listed. If the book was planned in advance to, say, document a long period of time, it doesn't count unless it over-runs significantly. : Beware of adding examples that are really vaporware . A series that is just incredibly long-running is a Long Runner . See also Sequel Gap , which may involve either this or the creator just taking a long time to be inspired to do a sequel.

There are epics that span a lifetime as it follows the life between two characters, and their challenges to be together. There are others that span multiple generations , as decades pass and history unfolds in the background. Then there's the story where everything happens in just a few hours: Introduction, conflict, character development, dramatic climax, denouement, done! Extremely Short Timespan is when a story, usually a movie, a novel, or a whole season, takes place in a short period of time. This is sometimes done in an action or a thriller movie to emphasize its fast pacing. One sub-trope is Real Time , where everything happens within a minute-to-minute ratio between in-universe and real-life production (automatically a sub-trope of this except for some extremely long experimental films). Note, though, that the majority of works (particularly movies) already take place within a relatively short time span, with the average timeframe being a few weeks. The trope is about unusually</ tightened time spans. For movies, this means everything taking place over three days or less. For television shows and other works, this usually means compressing the entire narrative (or at least a single Story Arc) into a month or so qualifies it as this trope. Not related to Webcomic Time , when the real and in-universe time scales are out of sync purely due to production time, though the two aren't mutually exclusive. Also unrelated to "Groundhog Day" Loop , where the amount of time is short only from an external perspective. Briefer Than They

Think is a real life variation. See Immediate Sequel for when the short span of time forms an arc rather than contained to a single story. See also Cartoonland Time for this trope in action with animated features. This often overlaps with Race Against the Clock , as that trope is about the cast having to get something done under a strict time limit.

The Extreme Omnivore will eat just about anything</ out of hunger or curiosity, so long as it looks like food. And sometimes even when it clearly doesn't . They don't fear the Lethal Chef , and you will never hear them say I Ate WHAT?! There are two versions of this trope: The milder of the two and can apply to ordinary unpowered individuals. This character is willing to eat things that may be perfectly nutritious, but are either considered unhygienic (e.g., it fell on the floor, or another character has been eating it, or it's expired and/or spoiled), or taboo (e.g., insects, horseflesh) in that character's society. They may be indifferent to, or ignorant of, the social conventions that keep most people from eating those things, or they might be from another culture or species where such things are accepted. Perhaps they may just be so desperate for food that they don't care, in which case that would overlap with Too Desperate to Be Picky . Often they have a Bizarre Taste in Food . This version can exist in real life . They may also be the only one who likes food produced by the Cordon Bleugh Chef or the Lethal Chef . Both versions may also be open to the idea of cannibalism when the opportunity presents itself . Please note that instances of someone being forced to eat something disgusting or inappropriate isn't Extreme Omnivorosity. Likewise for unintentional ingestion . A true Extreme Omnivore has a long-term pattern</ of eating everything knowingly, willingly, and usually cheerfully. Compare Paste Eater . Horde of Alien Locusts can be an entire species of this. Extreme Omni-Goat is a subtrope where this applies to goats. A character like this is likely to be a Big Eater , though a Big Eater generally restricts themselves to things ordinarily considered food. Compare Extreme Omnisexual . Contrast Picky Eater and Unconventional Food Usage . Don't Try This at Home , seriously. People have died</ trying to eat things not meant for human consumption. At best, you'll feel sick to your stomach. At worst, you'll die because of it.

Although the present day is still plagued with inequalities and social injustices, the average quality of life has improved gradually throughout history. Even the very poor in the present world are usually better off than peasants a few hundred years ago, and enjoy vastly better resources and life expectancy than primitive hunter-gatherers. And while there are still rich people with much better access to quality goods and comfortable lifestyles, the overall discrepancy has been decreasing over time Writers of speculative fiction often suppose that in the distant future, this trend will continue, and imagine utopian societies of ultimate equality where everyone has unlimited access to at least their basic needs. But what if something went wrong? What if the ruling class hoarded the best goods for themselves, leaving the rest of civilization in a state more reminiscent of the dark ages? Whether because of Fantastic Racism , obstructive social policies, or just overblown greed, a high-class elite lives in sumptuous luxury, while everyone else scrapes through abject poverty, with a minimal or nonexistent middle class between them. This can happen either in futuristic settings or fantastical ones, where it's

likely tied to The Magocracy , with magic-users enjoying the fruits of their abilities and denying them to others. Either way, the crux is that society has the means to provide for everyone, but fails or refuses to do so Cities are naturally arranged by Urban Segregation , and not uncommonly become a Layered Metropolis , the rich on top and poor below. In extreme cases, the elite will be of a different race or species, regarding themselves as superior and may even sequester themselves on a floating city or continent , the better to separate themselves from the rest In such a setting, the protagonists will almost certainly be members of the lower class striving to redress the imbalance, probably by leading a revolution against the elites. If they succeed, in a cynical work they may find themselves occupying the high position, while the system of inequality endures. If any good elites are shown, they'll be a Defector from Decadence also trying to improve matters Kill the Poor and Eat the Rich both tend to crop up in these cases. Related to Feudal Future . May also involve a Fantastic Caste System , with the lower class explicitly being a Slave Race

So you want to make a film or show based on an extreme sport that your target demographic is really into these days, to cash in on the trend. But you can't really focus on it without a plot, unless you want to make a documentary about it. And how could you justify featuring big name, A-list actors in a documentary? So maybe, drug lords are using the local illegal street racing competition as a recruiting ground for wheelmen, and our hero is an undercover cop who must infiltrate them. Perhaps the protagonist's father was killed in the ring of an Mixed Martial Arts competition, and he must seek vengeance by joining the competition and defeating the killer. Or alien invaders use some sort of suppression field to disable all electronic devices, so the only way La Résistance can communicate in the city's battlegrounds is with elite practitioners of '' Le Parkour ' as messengers. May involve Not Just a Tournament . Whichever route you choose, it's clear from the beginning that the whole point is to feature Xtreme Troping for 100 minutes and grab a hold of the people you think are into it. Occasionally the plot will be strong enough to make for an entertaining work on its own, but this is far from a requirement. Compare Excuse Plot . Contrast Subculture of the Week .

When our present-day astronomers think about life on other planets, a term that gets thrown around a lot is the "Goldilocks Zone", the range of distances from the parent star where a planet could have liquid water. This is the only range of temperatures where life as we know it can exist. The only life-bearing planet we know of is in Sol's Goldilocks Zone, and all life on it requires water Some alien life in fiction, however, does not</ roll that way. These</ lifeforms live in glowing-hot worlds with molten metal in their veins, or on icy ones with liquid helium metabolisms. They often have vastly different dietary needs, such as rock or metal. The planets they live on are generally Single Biome Planets by our standards, although they may be lush and varied to local eyes, and their inhabitants may seem like Elemental Embodiments . They're likely to be Starfish Aliens due to the radically different environment, though they can take more recognizable forms Compare to Silicon-Based Life , with which it often overlaps. Contrast Energy Beings , who can presumably survive anywhere, but whose

environmental preferences tend to be simply ignored

In most series set more than 20 Minutes into the Future , the date will be an exact round number of years after the year the series was made. Something made in 1965 and set in the twenty-first century will be set in 2065. Something made in 1989 and set in the thirtieth century will be set in 2989 This also applies to Time Travel , either forward or backward; from 1972, you can jump forward to 2072 or back to 1872 There are two big exceptions to this. One is when they just use a nice round number by itself for the year; thus, all the TV shows and movies set in the year 2000 (or 1999, or 2001). The other is sequels to something that was set in Exty Years; for example, Star Trek: The Original Series , but Star Trek: The Motion Picture </ came out in 1979 and was set in 2272, because it needed to be only a few years after the end of the series. Likewise for Star Trek: The Next Generation </ and its spin-offs, which took place almost a century after the beginning of the original series (2364 in TNG</'s Season 1) and continued in real-time thereafter, but originally premiered in 1987. Thus, when the titular ship of Star Trek: Voyager </ ended its, well, voyage in 2378, its last episode aired in 2001 It should also be noted that characters, like real people, often round numbers off. Just because someone says something happened "1000 years ago", that doesn't mean it couldn't have happened 992 or 1038 years ago The trope's name comes from Homestar Runner </'s pronounciation of an X in "futuristic" dates, such as the setting of Mega Man </ in 200X (later 20XX) and Metroid </ in 20X5. The series parodies this directly by setting their mock-anime mock-spin-off series in the year 20X6 (pronounced "Twenty Exty-Six"). That is, however, another trope The Human Popsicle , Sealed Evil in a Can , and Sealed Good in a Can have often been that way for Exty Years too. Similarly, it's the almost universal practice for the Class Reunion . Not to be confused with Exactly Exty Years Ago , which is when two important In-Universe points are a round number of years ago (although these two tropes often appear together)

Finally, after deadly fighting and clever tactics, the Serial Killer , monster, alien, or what-have-you is down for the count. The hero turns to leave... and the monster's eye opens Typically used as part of a The End... Or Is It? ending, but just as often used whenever a hero dismisses a " corpse " as inanimate and either walks off or gets too close. A favorite is to have the hero deliberately get within striking distance to retrieve a weapon or item near or lodged in the creature... only to have their eyes open and arms come up and grab them. Also frequently happens with hands twitching , especially after the coroner's already pulled the sheet over the supposed corpse's head; that goes clear back to Frankenstein </ An interesting minor variation involves beings in People Jars or who are frozen moving just</ once they're out of the hero's field of vision. Combines nicely with Glowing Eyes of Doom and Eye Lights Out . Compare to Finger-Twitching Revival . See also Pivotal Wake-up , and The Eyes Have It for when the eyes belong to something which is not actually alive . Contrast with Dies Wide Shut , which precludes this trope for reasons that should be easy to see When this happens due to Special Effect Failure revealing that the "corpse" is actually a live actor, that's The Living Dead

A Stock Superpower (and also a classic Super Robot weapon) that allows characters to shoot blasts out of their eyes. Blasts of what, you ask? Sometimes the generic, all-encompassing term of " energy ." Sometimes "heat," in which case it is (logically) known as Heat Vision. Sometimes "lasers," in which case it is known (again, with excessive logic) as Laser Vision. The point is, they hurt. These are the real</ Glowing Eyes of Doom This is the stock power of the Mecha Mook and those with powers beyond mortal men. Also, a stock joke about "laser eye surgery" fad Seldom is it explained how a beam which can burn or injure just about anything else is contained when trapped behind the character's eye lids</ , nor how the beam-producing mechanism within the eye avoids obstructing the vision of the actual seeing parts of the eye Compare X-Ray Vision , Deadly Gaze , Magical Eye , Breath Weapon , Hand Blast and Psi Blast . Often The Glasses Come Off for this. A favorite attack for the Oculothorax . Not to be confused with I-beams, the architectural element, although those too can be used as weapons

An eyecatch, or commercial bumper, is a short blurb displayed when a series goes to or comes back from commercial. Anime eyecatches tend to be either humorous, with a little musical sting played over them, or simple representative pictures with the series' name; they are often an opportunity for gratuitous Fanservice . Series that run for more than one quarter frequently will have several eyecatch styles over their run, sometimes with a small set of choices that rotate from episode to episode Saturday morning cartoons in North America frequently had one generic set of "we'll be back after these messages" Ad Bumpers per network</ , played at breaks for all of the series running on that network. Generally in the west, the term "bumper" applies more to this kind of EC, and bumpers are usually done by the broadcaster, rather than as part of the show itself. In the days of syndication, some syndicated cartoons would come with their own eyecatches, but these were typically rather generic (a still from the theme sequence and a voice saying, "We'll be right back" was usually the extent of it) Not </ a subtrope of Eye Scream

Imagine you're drawing a face. You draw an oval, perhaps a jutting chin, some ruffled hair. Give him (or her, it doesn't matter) ears and a nose and a nice big smile. And then stop What does it look like? Well, not human, that's for sure. Without eyes (even just the sockets), our faces are unrecognizable and unreal . Without eyes, how can we see? More importantly, in many cultures (at any rate in Western culture) eye contact is a means to connect with others on an emotional level. It is said that eyes are Windows of the Soul , so intuitively it is impossible to connect with something/someone that has no eyes Creatures without eyes can be downright creepy, let's face it. Seeing a Faceless Eye chasing you is scary, sure, but seeing an eyeless face is usually more</ scary, since it looks so close to human but there's something not quite human about it . In addition, eyes are a massive weak point if you're looking to attack or injure something. When you're dealing with a hostile creature that lacks eyes, they don't have that weak point Compare with Hidden Eyes , which is a temporary, metaphorical implementation of this. Contrast Extra Eyes , where the character in question has too many eyes. Related to The Blank

. And if something doesn't have eyes on their face, they may have them somewhere else . Not to be confused with Young blood's disease . May be justified as a result of Eye Scream , or (in the case of creatures such as The Morlocks) if Bizarre Alien Senses are used in place of vision. Compare Ghostly Gape

Something covers one of the character's eyes. It might be an eyepatch, a particularly concealing haircut , or a tilted hachimaki . Whatever it is, and however it came to be, through Fashionable Asymmetry it neatly conveys the fact that the wearer is either 1) an experienced combatant or 2) secretly a badass Perhaps both These characters rarely experience any problems with depth perception or suffer from the resulting reduced field of vision. In fact, sometimes the Eyepatch of Power covers a perfectly functional—or specially functional —eye instead of the empty hole one might suspect. This is sometimes a technique of The Trickster . Main characters will often gain an eyepatch as a Future Badass or Evil Twin Pirates often have eye patches as a Stock Costume Trait , which is a separate thematic concept—see Dressed to Plunder —but the overlap of badassery and piracy is significant enough to mention. This is partially Truth in Television , pirates in real life did often wear eye patches regularly, but mainly because on sailing ships in the 18th century there were over a thousand different ways one could lose body parts, including eyes (this is also the reason why hooks for hands and peg legs are commonly associated with them as well, seeing as such items could easily be improvised using materials already on a ship to compensate for missing limbs). In this case, sailors didn't wear eye patches to look tough so much as they did because on average people have an easier time looking at a piece of cloth over one eye than at the scarred tissue where the eye used to be. Furthermore, even pirates (and other seamen) with two functioning eyes were wont to wear eyepatches: since it's so dark belowdecks, having one eye always in darkness made it easier to adjust In The Future , rough and tumble outlaws will often have a single, obvious cybernetic eye which will give them some sort of special holdout ability or Super Senses When the Norse god Odin traded an eye for a drink from Mimir's well of knowledge, he made this trope Older Than Print Related to Blind Seer —power gain through the loss of an eye is a repeating motif in literature, like the Odin example above See also: Magical Eye , Mask Power , Eyes Always Shut , and if you're masochistic, Eye Scream . For characters that weren't wearing it the last time you saw them, see Eyepatch After Time Skip . See also Blindfolded Vision , where a blindfolded combatant is no worse off (or better!) than their opponents. May result because Scars Are Forever

This is a stock practical joke. The victim is asked to look into a kaleidoscope, binoculars or similar item. The eyepiece end has been coated with something that leaves rings around the eyes when the item is pressed to the face.

Happens when a cartoon character is so shocked (shocked!) that his eyes stretch far from his eyesockets or even pop from their sockets, connected only by a thin muscle, or not stay connected at all and fall to the floor, or a myriad of things. Blowing up is optional. Often accompanied by an aooga horn Subtrope of Wild Take

. Compare Eye Take , the realistic and more characterizing form of this. If you're looking for the effect of being exposed to a vacuum, see Explosive Decompression . Not to be confused with Eye Scream

The anti- Eye Scream . When even though in all likelihood one's eyes would be harmed during a fight, or in a nasty accident etc., the eyes remain, remarkably, unharmed. This is seen often in works trying to avoid being Squicky . All the same, eye damage is rarely seen in modern works, as it has become something of a taboo. In a medium like Film or Television, it is also sometimes due to the difficulty in realistically portraying damage to the eye — makeup can create scars, but can't be applied directly to an eye. Also, as noted in the above quote, the expressiveness of the eyes can further emphasize the suffering and Facial Horror of the victim. In animation, this can also be used for humorous effect - completely blackening a character's face from an explosion wouldn't be nearly as funny if their eyes weren't visible to blink in astonishment This is the case pretty much whenever you see a character with a big, deep scar over their eye Sometimes, this can be Truth in Television , thanks to the rather nifty design of the human skull, with the eye set back and largely surrounded by bony prominences in the shape of the brow, nose, and to some extent the cheekbone. This makes it often possible to receive damage around the eye with little or none to the actual eyeball Characters who aren't so lucky may end up sporting an Eyepatch of Power Related to The Dead Have Eyes . The opposite of Eye Scream . The idea of this basically leads to tropes like Harmless Luminescence , where eyes basically are undamaged by bright light

The eyes are our window to the world. We rely mostly on our sight to tell us about the world — its wonders, its dangers, and its beauty (unless you're blind). At the same time, our eyes are very fragile, and mostly made of water and nerve tissue. Which means that most direct attacks on the eyes, especially with a sharp, pointy object, will destroy them. Ah. Made you wince, didn't it? The Eye Scream is when the creator of a work takes advantage of our Primal Fear of having something utterly horrible happen to our eyes, usually involving the invasion of the eye sockets by a foreign body, and plays it up for all its worth ; all its squishy, bloody, traumatic worth. Academically, this is known as the Injury to the Eye Motif</ . An interesting commonality in these examples is that one of the best ways to quickly show a character has gone completely off the deep end is to show them mutilating their own eyes. Usually accompanied with Reflective Eyes , so we can get a nice and nasty glimpse of the incoming foreign object. See also Go for the Eye , A Handful for an Eye , Moe Greene Special , Forced to Watch , and Eye Poke . Likewise, a Groin Attack can invoke the same primal reaction. Compare Fingore , Agony of the Feet and Ear Ache . Contrast Eyes Are Unbreakable . If the character survives, it often results in an Eyepatch of Power (or an Eyeless Face if it happened to both</ eyes). In Real Life , this will usually kill you unless you can get immediate medical attention, due to blood loss and shock. Has nothing to do with Eyed Screen , apart from both being Eye Tropes .

Eyes in places where they just don't belong are a good way to creep people out . The palms of your hands are a particularly frequent place to put them, but they can be anywhere on the body Subtrope of Body Horror . See also Eyeless Face , Faceless Eye and The Walls

Have Eyes . May overlap with Eldritch Abomination and Extra Eyes . Contrast Third Eye

Many of the demonic once-human apostles in Berserk </ but special mention goes to the "Idea of Evil", the God of Evil responsible for the world being such a cesspool of crap and suffering. It basically looks like a colossal misshapen heart with its valves spewing out webs of causality to manipulate humanity's fate and lined on all sides with countless eyes upon closer inspection.

Occurs in a Reaction Shot . The character reacting to the outrageous whatever says nothing, but their eyes widen in a "these people are crazy" kind of way Subtrope of Facial Dialogue . Compare Aside Glance when directed at the fourth wall, Fascinating Eyebrow when directed at the characters in question, and Eye Pop for surprised cartoon characters' eyes. May make use of Eyedscreen as well as Wide Eyes and Shrunken Irises . Sometimes related to Oh, Crap! . No relation to Eye Scream

Alice has gotten in over her head. She's made mistakes, powerful enemies, or otherwise bitten off more than she can chew, and they want their pound of flesh. Running will only make things worse for her and her loved ones, so faced with the alternatives... she chooses to face death with dignity. She turns herself in, doesn't put up a fight, and in so doing takes responsibility for her actions and gains a measure of control in the only choice she had left This is a sad, meaningful fate reserved for only the most tragic of characters, for whom even Redemption Equals Death is out of reach. The best they can hope for is to give their end some order or meaning. Rescue is not impossible, in fact the mere act of facing the music may be a cause for Redemption Earns Life and a chance to become The Atoner , but it's a slim chance Another variant of this trope of a more messianic bent is when a character is offered a Sadistic Choice to save the hostage and MacGuffin if she trades her life for it. This is a Heroic Sacrifice with extensive premeditation, beyond merely being a Martyr Without a Cause to one with a very good one Of course villains who aren't Lawful Evil won't</ hold their end of the bargain , and the prospective martyr is usually savvy enough to tell this or is stopped. Expect the martyr to intone My Death Is Just the Beginning in either case Compare Better to Die than Be Killed where you shoot yourself rather than be executed. In this trope, you choose execution. Say Your Prayers may also have some elements of this, (depending on the case) as characters may give up on taking any action and just say a final prayer while letting the inevitable happen. See also Villain's Dying Grace for a specific villainous version Contrast Get It Over With , which also faces death with open eyes, Defiant to the End which a captive shows no respect to their captors and executioners toward the end, Villainous Breakdown where they'll completely lose their cool before possibly dying, and Hesitant Sacrifice when a heroic character breaks down in the face of their own impending death. An Undignified Death is the opposite of this - either because the victim fails to keep a stiff upper lip and go out with class, or simply because the manner of their death is so ridiculous and/or humiliating that how they react to it doesn't matter See also Obi-Wan Moment , "Facing the Bullets" One-Liner , Leave Behind a Pistol , Dying Truce , and Dying Moment of Awesome . For women, it

may involve a Lipstick-and-Load Montage As a Death Trope , many spoilers will be unmarked ahead. Beware

So you've come across a sleeping or unconscious person, and you feel a bit playful. Maybe you've knocked them out in battle and want to lower their ego a few notches without further physical damage. Or maybe your friend pulled a prank on you earlier, and you want retribution. Got a marker handy? Then pull it out and do a Picasso on their face! For some reason, characters have a thing about drawing on people's faces with felt-tip markers. Usually, it's nothing too elaborate—a pair of glasses, a monocle , a mustache, and maybe a goatee, sometimes they get a little more creative and start drawing little pieces of art on their target. Just who pulls it off depends on the culture from which it comes: Almost always the purview of young (or immature) female characters in the East, and primarily the domain of immature frat boys in the West, where crude drawings of male anatomy are usually the go-to subject to depict. Awake examples are rare, but not unheard-of. The circumstances vary much more widely than the sleeping version. See also Humiliation Conga , of which this is sometimes step one. Not to be confused with Facial Markings , which are even more</ permanent than a permanent marker. The resulting appearance may be similar, though. See also Mustache Vandalism , Suntan Stencil , and Tattoo Sharpie . As any regular, or friend of a regular to heavy drinking parties would know, this is a rather obvious case of Truth in Television . If you have been on the receiving end of this, hand sanitizer gel helps greatly at removing ink from skin.

Sometimes a character is so shocked or surprised by an absurdity, non sequitur, or incredibly stupid remark from another character that the listener actually faints. The remark is so startling that it, quite literally, floors them</ There are usually two variations. One, nicknamed the "flip-take" is very popular in comic strips and animated cartoons. often used it in the final panel of a gag. Character A</ says the stupid/shocking line, causing character B</ to faint by falling over backwards with their legs up in the air. Usually done by only showing the feet up in the air, accompanied by a large thud sound The other, also called an "anime-fall", has the fainting character fall over forwards in the final panel of a gag onto his face, his limbs in a twisted mass above him. A device usually limited to humorous anime, though doesn't actually originate from there. In both instances, it includes, and is confused with, Wild Takes Frequently, this action is depicted using a single, pronounced frame transition Usually, no one is harmed by taking a flying dive face-first into the ground (unless the animator thinks having them pop up with a bruised face would be funny). A less expressive equivalent would be Face Palm ; a more</ expressive one would be a Headdesk Only a handful of comedians can successfully</ pull off a full-fledged Face Fault in live-action performance; notable examples include Jim Carrey , Steve Martin , Dick Van Dyke , and Chevy Chase. Live-action performers are more likely to do The Pratfall instead, which is a similar comedic trick but leaves the character on his rump Closely related to People Fall Off Chairs . Compare Fainting . Not to be confused with Face Plant , which is when someone hits the ground face-first after tripping or falling

A creature reproduces by impregnating another species. This can be a very literal pregnancy, a rearrangement of your DNA, or it could be the implantation of a parasitic egg or larva into the body of a host of either gender, which may very well lead to a Chest Burster situation Please note: Despite the name given to the trope and the pleasant image its name implies, the impregnation doesn't have</ to occur via the face of the victim, nor does it have</ to be non-consensual. The above can result in an Express Delivery . A similar weaponized version of this would be Spawn Broodling which also involves the previous trope Closely related to Face Hugger and overlaps with Orifice Invasion if the process involves forced insertion through a natural body orifice. See Anal Probing , Boldly Coming and Mars Needs Women for more alien-on-human action

The Face–Heel Turn and Heel–Face Turn , as well as every Sub-Trope that goes with them, are legendary tropes that are seen all the time . However, a Face/Heel Double-Turn is the occasion when one character does a Heel–Face Turn while another character does a Face–Heel Turn almost simultaneously This comes in many forms, particularly in a whodunnit mystery. For example, the Red Herring is revealed to be good all along while the real suspect is exposed. Or perhaps in a war the hardass Drill Sergeant Nasty isn't so nasty after all while a seemingly nice and innocent soldier turns out to be The Mole or the Big Bad . Of course, this trope isn't just restricted to finding out one character was good all along while the other was bad; it can refer to characters changing roles in a storyline In another variant, it can involve a villain seeing the error of his ways and wants to turn a new leaf , but the hero doesn't trust him or holds a bitter grudge against him and is bent on punishing the villain for all he did , which leads to him turning into a villain consumed by revenge and hatred for the former villain The Trope Namer comes from Professional Wrestling , where two wrestlers will switch face and heel roles during an actual angle or match. It should be noted that it doesn't count if there are two faces and one turns heel or vice versa — both have to switch roles. Also note that despite the name, it needn't be confined to just two characters. The "double" part refers to two roles switching around When the main protagonist and antagonist do this, it's an Hourglass Plot . Not to be confused with a single character making two (or more) Turns in quick succession; that character is going through the Heel–Face Revolving Door As a Betrayal Trope , there are below

A good guy turns bad, the opposite of the Heel–Face Turn . The ways in which this happens are many: They have become a Rival Turned Evil . This is the Evil Counterpart to the more common Heel–Face Turn and is generally found in a story with Black-and-White Morality . The many reasons and the probability for a turn are listed in the Sorting Algorithm of Face-Heel Turning . In a world full of Brainwashed victims, they may be the one who appears to be but really is Not Brainwashed . The term "Face Heel Turn" comes from Professional Wrestling , in which a "good" wrestler (a face) is occasionally tempted by The Dark Side , or just gets fed up, and becomes a "bad" wrestler (a heel). Magazines and other promotional material from the various wrestling "leagues" frequently comment on various wrestlers' changes in "alignment" (in wrestling's fictional plotline known as kayfabe) nearly as frequently as they actually

cover events in the ring themselves. (They even use phrases like "Face Heel Turn", though the shorter "Heel Turn" is more common.) A wrestler's heel turn is often a sign that he or she is about to see his or her popularity skyrocket. Indeed, it is very common, once they have turned, to remain heels for their entire careers. Heels that become really</ popular may end up "naturally" becoming faces again, but it is just as likely for heels to be beloved because</ they are heels . In fact, as paradoxical as it might seem, a heel turn can help an otherwise despised wrestler become likable: fans may well resent a face character, and may be better able to relate to a character who is profoundly flawed in one way or another . (After all, that's what satire is all about.) Note that a Face–Heel Turn is harder to pull off than a Heel–Face Turn - at least convincingly. If a character is introduced as likable and heroic, it takes some good writing to properly take them through the Character Development required to become a villain. Simply Foreshadowing that a character could turn evil is not enough. The work has to be put in to get the character to that destination; there are plenty of wrestling examples where this hasn't been done, or the reasons for the turn are so badly thought out that the fans reject it, and the wrestler turns back face shortly after. Contrast: Compare Protagonist Journey to Villain , a plot which utilizes this trope as the entire character and story arc. Big Bad Slippage , where the Big Bad does this over the course of the story, is a Sub-Trope . See also Heel–Face Revolving Door , Neutral No Longer , Deal with the Devil , We Used to Be Friends , Start of Darkness and Et Tu, Brute? . If the turn takes place extremely abruptly, it may include Jumping Off the Slippery Slope . Not to be confused with Evil All Along , in which a character that was thought to be good was evil all along . This trope describes a legitimate hero going to the darkside, not a Double Agent .

In Real Life , the nature of Heel–Face Turn and Face-Heel Turn is subjective (one person's "heartless betrayal" is another person's "seeing the light", depending on what group the individual is going to or leaving). Therefore, No Real Life Examples, Please!

You're the face, YAY! A Face, short for Baby face, is a Professional Wrestling good guy. He's the guy the fans get behind, the one they cheer for. A face used to always be an upright do-gooder , but nowadays, anybody the fans cheer for is generally classified as a face, regardless of personality or whether or not they play by the rules. The opposite of a face is a Heel . Some fans draw a distinction between "face" and "babyface". It's argued that the latter should refer to the old-school, clean-cut, "eat your vegetables" type good guys, and the shortened version is simply anybody fans cheer for, including a wide variety of Antiheroes , Nominal Heroes and Designated Heroes . Insiders in the pro wrestling business, however, use the two interchangeably. Some fans also call for the distinction of Tweeners for villains that receive a hero's welcome, though bookers and promoters themselves only slowly started embracing the concept in the late 1990s as, despite perceptions, most wrestlers wanted to be seen as pure face or heel for whatever show they happened to be working on. The Lucha Libre equivalent is known as a técnico</ (or more rarely technico </) which is more about the method they take to win (técnicos are content to rely on valid wrestling techniques, whereas heels cheat or use brute force) but is the same in practice more often than not. To further confuse, in British wrestling (such as World of Sport</), the term

used is "Blue Eyes."

Wrestlers with any sort of non-white (e.g. Wild Samoan) or otherwise "exotic" identity are an interesting topic. A non- evil foreigner is a wrestler whose gimmick revolves around a group identity (usually patriotism). Alternatively, they may appeal to certain subgroup of xenophiles . Their entrance music and attire will heavily-invoke cultural symbols, if not being draped in a flag itself. Two commonly-cited examples are Bruno Sammartino and Pedro Morales , who were pushed to appeal to Italian and Puerto Rican diaspora in the US, respectively. Bob Sapp was hired by New Japan for looking like the kind of loony black man one would find in an anime.

Like many things in pro wrestling, a wrestler's status as a face is anything but permanent; "baby face" is a pun on "about face" after all, and a heel turn could come at a moment's notice The Heel/Face Index has more examples. There's also the Tweener, a guy who falls in-be tween</ Face and Heel status, whichever the situation calls for. (George "the animal" Steele was always portrayed as more misunderstood than heel. He never pulled anything on his own that a heel didn't put him up to.) In Lucha Libre, the typical Rudo</ relies on brawling and underhanded tactics, and doesn't display much finesse or technique when he fights—and he's probably rude, too Unrelated to The Face

The professional wrestler of Air Gear </ is Rika, however it is Ikki who gets slapped with the "babyface" label for his behavior on the inline skating circuit

The Face Hugger, as the name implies, is a creature that preys on other species, usually humans, by attaching itself to their face. What it does to you from there depends on the creature and how it operates. Some take over your body or mind in some fashion . Some drain you of blood or Life Energy . Some eat your brains . Some transform you in horrific fashion . And some will give you a Face Full of Alien Wing-Wong . In pretty much every case, this is Nightmare Fuel owing to our Primal Fear of Orifice Invasion . See also Personal Space Invader . A creature that does this is frequently the larval form of a Xenomorph Xerox . Comics

Film Live-Action TV Tabletop Games Toys Video Games Webcomics

The Faceless also come in bulk, as demonstrated by this subset of Mooks whose defining characteristic — apart from being evil, of course — is the lack of individual identity. They will wear matching uniforms and helmets or masks that completely obscure their facial features . Sometimes, the (perpetually scowling) lower portion of their faces may be visible, but their eyes will pretty much always be hidden, like under the brim of a helmet, behind Scary Shiny Glasses or malevolent looking masks (especially gas masks or Rage Helms), or beneath an opaque visor . Note that a balaclava or Ninja mask covers everything except the eyes, but goons wearing them still count. Note that a unique face as a symbol of identity means that You ALL Look Familiar allows for unmasked but identical mooks to be effectively Faceless You'll never see any faceless goon Pet the Dog , but they'll have no problem kicking them by the basketload The reasons for this trope are largely matters of convenience. Most obviously, the faceless goon does not display emotion; hence, he does not display humanity. It's much

easier to accept characters as evil (and by extension, feel no tug of sympathy as wave after wave of them gets wiped out by the heroes) if you are able to forget that there's actually a human being behind each mask. Not showing any pesky emotions to undercut their menace also adds quite a bit to the creepiness factor There's also the fact that it's easier on the budget , as the director can keep reusing the same ten extras without the audience catching on quickly. It's also helpful in animation because you only need to design one character (or render one model in the case of video games or CGI) and one action figure , and the fact some fans will want to make an "army" out of multiple goon toys. Plus, it makes it more convenient for the hero should he ever need to hide amongst their ranks If even hurting them seems a bit extreme, you'll get Mecha-Mooks instead who are beaten till they show broken gears and sparks . This can also serve as a justification for why the Big Bad has so many identical soldiers running around A variant of this trope often occurs in superhero comics, with the various common criminals the hero can fight as a way to bring some action into the story . They are not given backgrounds or individual personalities beyond those of petty thugs and are typically found robbing banks, mugging defenseless citizens, and committing other crimes that the hero must stop. Not very bright , the criminals frequently try to fight the hero, even though the hero has super powers and/or special training . Of course, they never stand a chance What's interesting to note is that in Real Life the Faceless Goons do have upsides; if someone is behind a mask or hood or even mirrored sunglasses they often no longer feel responsible for their own actions and obey commands (especially very cruel ones) more readily than if they were just in plain clothes . Possibly a case of Truth in Television . This can, however, backfire pretty badly. Looking a man in the eye and then killing him is a very hard thing to do. Covering a person's face, subconsciously suppressing our recognition of them as human, makes killing them a lot easier on our willpower . This may be why heroes never have trouble hitting the Faceless Goons, yet the Faceless Goons can't hit the hero not wearing a mask These characters are usually Mooks . It's not completely unknown for the good guys' Red Shirt Army to get this treatment, but nowhere near as common. Should one of them lose their mask, they'll become a Uniformity Exception Not to be confused with Faceless Masses , Faceless Eye , or The Blank

Animation is on a very strict timeframe almost all of the time. It's a massive chore trying to get the main characters, their backgrounds, and their actions drawn and colored. One can forgive the animators for skimping on the unnecessary bits... like nine-tenths of the population of the show. The extras in a scene tend to be ridiculously less detailed than all the other characters, if detailed at all. Expect them to lack certain items like facial features, outlines, or limbs. Occasionally, their faces may be Henohenomoheji . But who cares? They're just there to keep the world from feeling deserted. This is an Animation Trope , but tends to be more noticeable in anime. Contrast with Eccentric Townsfolk , where they all get at least one quirk, or Cast of Snowflakes , where even one-shot extras get detailed faces. The more extreme form of Only Six Faces and Flashy Protagonists, Bland Extras . Should not be confused with The Faceless , nor with Faceless Goons . For a series where the detailed characters are the only</ people living in that world, see Minimalist Cast . Can very easily be creepy (especially if depicted side-by-side

with fully detailed characters), although savvy animators will take advantage of this depending on the mood of the show. This item is available in the Trope Co. catalog. </

Basically this is when one of the good guys becomes a villain not s out of choice, but because they were transformed into one one s way or another (this makes it a supertrope to several tropes as s outlined below). This can also apply to non-sapient entities, suchs as computers that go nuts , mons that are Turned Against Their s Masters because someone else is giving them orders, and so on. As s long as it was happy with its allegiance and something other than s its own whims changed it, it fit Please only put examples here s that don't fit into any of the above subtrope s

In the United States, starting during the mid-1980s and continuing until about the turn of the millennium, there was a practice of putting the faces of children who had gone missing (and were presumably kidnapped or abducted) on a milk carton, in an attempt to get neighbors of the person who had abducted the child to notice and report them A Discredited Trope , if not a Dead Horse Trope . At this point, it has been parodied countless times and has entered the collective subconscious to the point that while people may not have actually seen an actual one in their lifetime, they still recognize it. In comedy, adults can make an appearance on the carton The United States has since developed the Amber Alert</ system, so within a few hours of an abduction, a report of a missing child can be broadcast on TV or radio, sent via text message, or in some cases posted on Expressway notice signs. This means that in some cases the announcement can be passed on to the public in mere minutes, which makes the several weeks notice it would take to get a photograph on a milk carton superfluous. They are supplemented by ADVO cards, which have an ad on the front and a picture of a missing child on the back, and are mailed regularly to homes. Many large stores also have a collection of "missing" posters displayed near the doors, where customers entering and exiting can see them, and some trucks and vans will have them on their back windows. In the Internet age, in addition to the Amber alerts, the family of the missing child may post something on the Internet. This can</ backfire, however: even if the child is</ found and the alert post is no longer relevant, it will still be circulated through email inboxes, blogs, and social media. And sometimes, well-meaning people pass them on, even if it turns out that they are misunderstandings, missing information, outdated, or outright hoaxes May also be used to Lampshade a character's disappearance or have part in a Mythology Gag , but is hardly ever played straight anymore unless it's a Period Piece Sub-Trope to Missing Child For the book titled The Face on the Milk Carton</, click here

Exactly What It Says on the Tin . One of the oldest tricks in advertising is using the face of a celebrity to sell your product. Films, cartoons, comic books, video games and TV series will put the main actors or characters on the posters, ads or DVD covers. Novels and non-fiction books will use the author or a main character. Music albums will just show a photograph of the band or the lead singer, especially after the transition from large LP covers to smaller cassettes, CDs, and digital music at the same popular music became more personality-driven It's the easiest and most uninspiring way to sell your product. Doing something

artistic, like making a Design Student's Orgasm cover where the actual creators or cast may not be seen at all, may be more clever and intriguing, but also confusing to the potential audience. Why show just a picture of a location, an abstract color or motive or something unrelated to the lyrics or music if these things will just confuse potential clients ? Just put the face of the creator or main cast on the cover and people will immediately identify it as their latest installment . It's Show, Don't Tell in its most blatant form The face will often be a close-up, but can also be full frontal. If the creator or cast member is identifiable by silhouette you may show him on the back. Usually he, she or them will be shown prominently on the foreground so that other elements (other people, animals, buildings, nature,...) will not distract. When its just a floating head it's Floating Head Syndrome This is rarely used for animation and video games as the characters are entirely fictional and probably not recognizable to anyone that doesn't know the franchise already. There are exceptions when the character is absurdly popular and well known or has a famous actor and is heavily based on them Compare with Face of the Band (when one person of a group is featured more prominently than the others) and Wolverine Publicity (when one person is always put on the cover, despite hardly being in the work half of the time)

So you're the Only Sane Man , and the lunatics around you are once again</ doing something to make you question your faith in humanity. * sighs * </ It may not solve anything, but raising your hand to your forehead will have the dual benefit of temporarily obscuring your vision of the idiocy as well as cradling the oncoming headache. Variations occur, from pinching the bridge of one's nose to slapping one's forehead (basically a Dope Slap to oneself for the "idiocy" of putting up with this mess). One may also follow up the slap with sliding the palm of the hand down one's face, possibly with a look of exasperation. If they're wearing a hat, expect them to pull the brim of the hat over their eyes in disgust. If they're wearing a cloak or a hoodie, then they're pulling the cowl before their face. Sometimes, there is a distinction between the forehead facepalm (for irritating moments) and the full-face version (humiliation). There's also the Double Face Palm, which is grasping one's head with both</ palms, in "The Offspring"; this one is far more commonly associated with embarrassment. Some people even have gone meta, inserting " * picture of French Enterprise</ captain * " in their forum posts. Of course, it's also prevalent in Real Life . It's universal ; a wide range of cultures, and even animals capable of reaching their faces with their arms/forelegs, seem to have some variety of this. It may be accompanied by the line "That's the Stupidest Thing I've Ever Heard !" It may also be combined with I Need a Freaking Drink . Applying a Dope Slap is often a form of ready relief for the headaches that cause a Face Palm. A Sister Trope to Head Desk (in particularly extreme cases, these actions can also be combined to perform a * facepalmheaddesk </ maneuver), Face Fault , Disapproving Look (also known as the "Implied Facepalm"). Compare Surrounded by Idiots , Only Sane Man , The Take . See also Aside Glance , Stunned Silence . Not directly related to Facepalm of Doom , in which one attacks by placing one's palm on someone else's</ face. Now in Webster's Dictionary

So you're the Only Sane Man , and the lunatics around you are once again</ doing something to make you question your faith in humanity.

* sighs * </ It may not solve anything, but raising your hand to your forehead will have the dual benefit of temporarily obscuring your vision of the idiocy as well as cradling the oncoming headache. Variations occur, from pinching the bridge of one's nose to slapping one's forehead (basically a Dope Slap to oneself for the "idiocy" of putting up with this mess). One may also follow up the slap with sliding the palm of the hand down one's face, possibly with a look of exasperation. If they're wearing a hat, expect them to pull the brim of the hat over their eyes in disgust. If they're wearing a cloak or a hoodie, then they're pulling the cowl before their face. Sometimes, there is a distinction between the forehead facepalm (for irritating moments) and the full-face version (humiliation). There's also the Double Face Palm, which is grasping one's head with both</ palms, in "The Offspring"; this one is far more commonly associated with embarrassment. Not directly related to Facepalm of Doom , in which one attacks by placing one's palm on someone else's</ face. Now in Webster's Dictionary

A staple of slapstick and other forms of physical comedy, a Face Plant refers to any instance where someone ends up having their face be the first part of their body to impact the ground after falling. The results to the victim can vary from simple embarrassment to serious injury or even death (though Rule of Funny usually</ precludes it from going this far), depending on how hard the person hits the ground, what the surface they're falling on is, and how high they're falling from. Not to be confused with the Anime & Manga trope of Face Fault , where someone winds up face-first on the ground after witnessing or being told something absurd. </

This is a must-be effect of almost every zombie movie. The hero sees a person who is facing away. The hero approaches slowly (as does the camera), maybe trying to enter a conversation with that person. More often than not an unnerving music plays. When we come close enough, the person suddenly turns around, revealing decaying flesh, bloody teeth and a missing eye . Oh my God, it's a zombie! Cue the Scare Chord Of course, the trope isn't limited to zombies. Multiple face distortions can be shown this way. Sometimes, a Face Framed in Shadow can be revealed in this way, generally with dramatic results For even more effect, the injury/mutation/decay may be only on one side of their face , allowing them to draw out the suspense by showing the normal side first, before they fully turn to reveal the horror Compare Peek-a-Boo Corpse . See also Emerging from the Shadows , Not a Zombie , Two-Faced , Game Face , Over-the-Shoulder Murder Shot Not to be confused with anything related to Face–Heel Turn or Heel–Face Turn

The facial composite is a standard technique in police investigations. It is a drawing created to try and identify a suspect whose appearance alone is known. While the quality and accuracy of these drawings can vary based on the quality and accuracy of the eyewitnesses, you can reasonably expect the sketch to resemble who the police are after. That is, of course, unless the Rule of Funny is in play. When this happens, the composite sketch will inevitably be a hideous caricature of the actual person. Of course, because it's the Rule of Funny we're talking about here, this will typically do absolutely nothing to prevent people from recognizing the person on the sketch anyway.</ A frequent inversion is for the composite sketch to be very accurate but the character himself, either out of obliviousness or vanity, insisting it looks nothing like him. Another variation will feature a character creating a face completely out of their imagination to blame something they did on a made-up individual, only for the person they described to actually exist and be arrested as a result of their lie. In a bout of Stylistic Self-Parody , animated or comic mediums will have the composite drawn in a realistic style instead of the art style of the series itself. Contrast Super Identikit . This can also sometimes happen because the Suspect Is Hatless .

Much like audiences get squicked out by horrible things happening to our body or our eyes , so too do they get absolutely sickened by the thought of something horrible (and permanent!) happening to our faces. It's the #1 part of the body we use for socializing and is strongly tied to our sense of personal identity, so in essence, destroying a person's face is the equivalent to destroying his or her life. It can often lead to a Nightmare Face , but if the victim is lucky, he can maybe at least achieve the level of The Woobie or even Ugly Cute . This trope can include those who die from the disfigurement, but it's more effective (and more horrifying) to have the victim live with it Compare and contrast to Nightmare Face . The main difference between these two tropes is that Facial Horror deals specifically with severe mutilation of most or all of the face, whereas Nightmare Face covers exceptionally scary faces in general Interestingly, even the most gruesome examples of this trope will often, like Two-Face from The Dark Knight </, leave the eyes completely intact . Perhaps this is to emphasize the facial disfigurement by contrast, or merely a sign that Eye Scream is a whole different level of horror. Or perhaps it's so that the victim can see himself in a mirror See also Glasgow Grin , Mouth Stitched Shut , Two-Faced , and Tear Off Your Face There are several real-life disorders that can cause facial disfigurements with varying levels of severity, such as craniodiaphyseal dysplasia (which causes excess calcium to build up in the skull), acromegaly (the result of excess growth hormones built up after the epiphyseal plate has closed), and Graves' ophthalmopathy (caused by autoantibodies binding on the skin, thyroid, and eye tissues)

Before a character dies, they fire off a line essentially saying " I'm going to die, but our fight goes on ," or otherwise demonstrating their continued defiance toward and disdain for their killers.

Usually included in a Last Stand . Can be the last line of an entire series if it's a Bolivian Army Ending . The Doomed Moral Victor is... fond of this trope. A specific take is Regret Eating Me as well as See You in Hell . Very very often a Dying Moment of Awesome . Some do manage to live, which The Cavalry can help along, but there's significant overlap with Final Speech . A subtrope of Gallows Humor . See Face Death with Dignity . Similar to Defiant to the End , but employs humor rather than treating the situation with contempt or rage. See also Dying Declaration of Hate . Contrast Pre-Mortem One-Liner for when the giving end of the death blow does a one-liner. Since this is a Death Trope Spoilers . Day of the Dead (1985) </. " "

In Strategy Games — whether turn-based , real-time , or 4X — or tabletop wargames , when there are different factions, these will (usually) have different advantages, disadvantages, and play styles to entertain the player. With a low amount of factions, there are clear, fundamental differences, but as the factions grow, the differences subside, until eventually the sides are not polar opposites as much as points on a gradient line between two extremes Compare Player Character Calculus and A Commander Is You

Powerhouse - Power and Efficiency. Powerhouse armies typically consist of powerful units with great durability and attack power. Pound for pound, Dollar for Dollar, their forces are flat out stronger than their opponents and in a head-on meatgrinder, they'll come out on top. What abilities they do have tend to be things like Herd Hitting Attacks , temporary power-ups, healing, economic advantages , and other things that make them even harder to beat head on, or a few tools oriented towards forcing their opponents to fight them head on. However, since their units and upgrades cost a lot, it takes them a lot of time to build a proper army, making them more vulnerable to strategies involving early-game rushes, or constant harassment, since it prevents them from developing properly At six or more factions, there are no established rules. At least one of the five archetypes will present two variations The contrast between the different playstyles allows for a more varied game than strictly Cosmetically Different Sides and mirror matches. However, simply making one faction slightly stronger but slower than the next rarely adds enough asymetry once enough factions are involved, so developers often turn to giving each faction a gimmick of some sort, such as long range or large numbers as is shown in A Commander Is You

So, you have a dramatic scene with your villain. Wouldn't it be so awesome if you ended this bombastic tour-de-force with something more quiet and subdued ? What better way to do that than with a Fade Around the Eyes? A subtrope of By the Lights of Their Eyes and "Uh-Oh" Eyes , this is when everything on the screen fades away, except for a character's eyes (though other facial features, such as teeth, may be used as well.) It is more often than not done at the end of a scene, as a transition to the next, though it can happen at any time. What matters most is that it's done for dramatic effect. It usually begins with a close-up of the character's face, seemingly looking straight at the audience . Usually, this trope goes as follows: The character looks at the screen, which completely fades to black, except for the character's facial features, which then fade to

black themselves. The now completely black screen then fades to the next scene. Less commonly, the black screen is skipped altogether, and it just fades straight to the next scene, but the facial features are still the last things you see. Unlike By the Lights of Their Eyes , which is usually a result of Limited Animation , this trope is done for dramatic effect Although By the Lights of Their Eyes can be used dramatically as well . It is usually done by villains, who often do it at the end of a Villain Song . It is exceedingly rare for a non-villainous character to do this, but even if the character isn't evil, this trope can be a sign that the character is either dangerous, Dark Is Not Evil , an Anti-Hero , a Jerkass , or perhaps some combination of those traits. Another common feature of this trope is that the character who does it will usually have one eyebrow raised, and a smile , as the background fades away. The cause of the fading varies. Sometimes, it just happens, with no other explanation than Rule of Scary . Other times, it fades or turns to black because the room is filling with smoke. There are even cases where it's a mix of both! There will be fire or lightning around the character, and when it disappears, the screen inexplicably goes black, leaving the villain's evil eyes. By the way, we would like to point out that this trope has a really cool acronym . Here's a handy-dandy phrase to help you remember the title: When your enemy does this, your FATE is sealed! This has become a staple of animation, especially in works by Disney . Compare Glowing Eyes of Doom and Nightmare Face .

Fade Around the Eyes , Trope Co. 's all new lightbulb brand (perfect for all villains who enjoy a little dramatic flair), is now available in catalogs! </

Two races, or tribes, were familiar with each other's existence a long time ago but they have gone ages without contact with each other, and now each believes the other to be creatures of legend, that either never existed or died out long ago. Until they meet each other. And they both react exactly the same way: by saying something along the lines of "They do exist!" in a tone of awe. At the same time. (Or at least one directly after the other.) Compare Mutually Fictional , where the two sides really did originate as (or still are) only stories to each other. Also compare Fantastic Fantasy Is Mundane , where creatures in another world make up stories about a world like ours.

When a character fails to notice something important or obvious, something they would want to know, even when looking The name comes from a typical mechanic from RPG games, dating back from the arch-RPG Dungeons & Dragons </ . A character's success on various tasks is determined by a die roll combined in some way with base statistics (such as strength or intelligence) and some skill. The skills in question include several that require substantial luck, like Appraise, Use Magic Device, Hide, or the various Perform skills, but also such mundane tasks as Listen and Spot. Indeed, the Spot skill, which determines whether someone notices events around them in time to react, is often very dependent on luck, even if it's something any idiot should be able to see Because things like searching for hidden objects/doors/clues, "noticing what's going on out of the ordinary" or good old ambushes are all very common events in most RPG games, Spot Checks tend to be among, if not THE most common die rolls being done. A single failed Spot

Check can put the whole party at a disadvantage, and if you're not lucky you can miss something vital, even while looking for it. Considering the number of Spot Checks a typical game involves, there always are instances of missing out on something because of One Bad Roll, which naturally frustrated people about Spot Checks for literally decades Referenced in a running gag in The Order of the Stick </, which is wholly dedicated to common "back" sides of playing RPGs. Ironically, both in D&D</ games and in The Order of the Stick</, the players will know</ that they failed a spot check (though D&D</ GMs are encouraged to roll spot checks secretly when necessary), thus they are aware of not being aware</ of something, only not knowing what that something is. In the D&D</ case, the player</ is aware of the character</ not knowing something. In The Order of the Stick</ case, the lack of distinction between player and character reaches the level of Medium Awareness , and is Played for Laughs This trope differs from Weirdness Censor (where they don't see it because it's so bizarre), Selective Obliviousness (where they don't want</ to see it) and Bystander Syndrome (where they ignore it because they don't care). Also differs from Attention Deficit... Ooh, Shiny! , as there usually isn't that excuse. Opposite of Hyper-Awareness . Can often result in Right Behind Me (although that might be closer to failing a Listen check) or I'm Standing Right Here . If they eventually notice it, but not right away, that's Delayed Reaction This doesn't necessarily imply that the character is stupid; they just aren't noticing an important "something". One of the oldest jokes in Dungeon Master 's arsenal used to be for players who fail their spot checks badly enough to find themselves "discovering" something both incredibly large and plainly obvious such as an island or a mountain, instead of the one unobtrusive detail that they were trying</ to find May relate to Genre Blindness and Forgot About His Powers . May be a sign of a character carrying the Idiot Ball or being an Unwitting Pawn . When the character's creator</ explicitly decides what he can and cannot notice, it may lead to Plot-Sensitive Snooping Skills . In cases of characters consistently failing spot checks to penetrate a Paper-Thin Disguise , we have Clark Kenting . Someone who does this too often may be Too Dumb to Live , or it may be a case of Obfuscating Stupidity , especially if the spot check failures suddenly stop at a crucial point. Can result in the characters realizing that Camp Unsafe Isn't Safe Anymore . Also, this is</ Truth in Television , as anyone who lost his keys in the open middle of his desk can say. Behind the Black or No Peripheral Vision is when the character should</ be able to see it from his vantage point, but doesn't because the audience can't from their angle. The Chaste Hero is a character (usually male) who consistently rolls "1"s where romance is concerned. If the thing they're failing to notice is a breaking news story, that's Ignored Vital News Reports . If everyone</ fails to notice a creature that's big and dumb enough that its presence ought to be obvious, it's Suspiciously Stealthy Predator . If one person is looking for another person but constantly fails Spot Checks when they are close to the person they're searching for, it's Missed Him by That Much . This is usually the reason why Jump Scares happen. Banana peels , however, thrive</ on this trope The scientific term is for this phenomenon is so as incredible (and possibly depressing) as it sounds, it is known to happen to some degree in real life as well Strangely, more likely to happen to a Meganekko than someone with an Eyepatch of Power Contrast with Awesomeness by Analysis If the author</ does this, you</ may end up

spotting Rouge Angles of Satin

When a character tries to be dramatic and fails miserably. Similar to Narm , but in a Failed Attempt at Drama, though the character is trying to be dramatic, the humor is intentional on the writer's part. See also Invoked Trope , when a character actively tries to make tropes appear in " real " life. But since it's a failed</ attempt, it will often be met with Surprisingly Realistic Outcome or a Lampshade Hanging . Compare Bathos and Anti-Climax . See Failed Dramatic Exit when this trope overlaps with The Exit Is That Way . Contrast with The Comically Serious for when a character hilariously succeeds</ in staying dramatic during an otherwise lighthearted or comedic scene. May take the form of Inner Thoughts, Outsider Puzzlement . See also Negated Moment of Awesome , which may be used more dramatically. Æon Flux </: Trevor Goodchild is arguing with a woman. He snaps, "Get out!", then remembers they're at HER place , and says, "I mean... I think that I'll leave now."

Bob and Alice are arguing, screaming at each other at the top of their lungs. Finally, Bob says something that really ticks Alice off. "I'm outta here!" She yells. She leaves, slamming the door shut behind her. Two seconds later she returns...because she forgot her coat. She leaves again, slamming the door behind her again. She returns again... She forgot her keys.. Generally a comedy trope, Failed Dramatic Exit is when a character's dramatic exit is foiled by them returning for whatever reason. Subtrope of Failed Attempt at Drama . Supertrope of House Amnesia , as when the character leaves dramatically but returns when they realize that they're at their own house. Compare also to The Exit Is That Way in which a character storms off but is then told that they are going in the wrong direction

A man sentenced to death. He may be the most vile person in existence, 12 jurors and the judge certainly believed it so, and the moment the word was said everybody got on their knees and praised the heavens There is a bit of a problem, though. The man cannot be killed. They have tried to hang him, and that didn't work . They have tried to shoot him, and that didn't work. They have tried to gas him, electrocute him, toss him from a very high building... nope, none of those methods worked. There may be mundane reasons (like sabotage or mis-preparation) or there may be supernatural reasons (like Nigh-Invulnerability or a prophecy protecting the man) at work So what other options remain? In a more fair world, maybe the court would continue trying to perform executions. At the very least, it would "downgrade" the sentence to the harshest type of imprisonment (most probably lifetime, or even a Longer-Than-Life Sentence) that the crime would require But Fiction Isn't Fair , and the judge decides that, if a man sentenced to die has survived fifty or sixty execution attempts, then he deserves to be released. No other circumstances, no other appeals, no pleas from an irate public nor a victim's grieving family will be heard — the man walks </ This was in fact the custom in historical periods, where surviving an execution was often seen as a pardon from God, but in modern times this line of thinking has fallen out of favor (this is why when this sentence is given, the judge will explicitly say that it will be applied "until (the

one sentenced is) dead"). It would result in the sentence being commuted, probably life without parole instead of death, if the execution really couldn't take place. Sometimes this is justified in that a witness eventually recants or new evidence is brought to light — evidence that would not have been found had the accused been executed as planned and someone hadn't decided to go over the case again, since it was still open Related to The Man They Couldn't Hang , which is a character who survived a hanging This is an Artistic License – Law Trope in modern times

A character, on a city street, is trying to hail a cab. No matter how many times they yell, "Hey, taxi!", nothing stops for them This can be played for comedy, such as trying to show a country-bumpkin just how tough the big city can be. Or it can be played for a drama. One simple and frequent plot is when the lack of a taxi will slow the hero down in their quest . Another is if there's a sinister reason no taxi will stop for the protagonist in particular</, often demonstrated by showing one that just ignored them stop for somebody more "suitable;" for instance, the inability of a black man to catch a taxi is a too-frequent Real Life occurrence that fiction often comments on

Because you can't spell "Failsafe" without "F-A-I-L" Thanks to Finagle's Law (or just ignorant writers), on TV a system's failsafe will never</ work when it's needed the most, nor will it actually be failsafe</ — usually it'll be quite the opposite, sometimes referred to as "fail deadly". The only reference to an emergency shutdown you'll be likely to hear is a panicked tech yelling "It won't shut down!" as the system runs wild. It's supposed to make the phenomenon of Explosive Instrumentation more plausible, by acknowledging it's not supposed to blow up in your face , but a failure elsewhere of a key safety lockout means it can, and will</. It also justifies how something that is supposedly governed by industry-wide standards, regulatory law, and years of engineering refinements could go so horribly wrong in the first place What's a failsafe? Well, the world is full of a lot of dangerous machinery and devices. Huge electrical turbines and nuclear reactors, Power lines carrying enough juice to light a whole city and pipelines carrying millions of tons of explosive petroleum or natural gas. Trains speeding down the tracks at 300 km/h, semi trucks that weigh in excess of 40 tons rolling down the freeways, aircraft that weigh more than 400</ tons flying over our heads. And that's just the stuff that isn't</ designed to kill anyone. There's plenty of stockpiled bombs, missiles and such out there too. These could all cause some spectacular collateral damage if they suddenly went out of control Thus, in the real world, things that have the potential for very destructive damage not only undergo strict maintenance procedures, but usually have circuit breakers, password protection, arming/firing keys, backups for redundancy, and prominent big bright red emergency handles that can shut the whole system down if pulled. More to the point, they usually have a totally separate set of safety features, designed to trigger automatically when the system's operating parameters get too far outside safe norms, which will (ideally) shut down the whole shebang without making the situation worse than it already is Contrary to popular understanding, "fail safe" does not mean "safe from failing", i.e. "failure-proof" — it means that

if (when) it fails, it will do so in a way that leaves it safe. When something is described as "fail safe", it means that it has been designed and built so that a critical mechanical failure or operator mistake will cause the system in question to default to its safest possible state, quickly and automatically, without any human intervention. Consider the following: if you're at an intersection where there's a traffic light, and it fails, if it "fails safe" then either it goes dark or all four directions show a red signal. If it showed green in all four directions, that would be a failure to fail safe. For more info, see the Analysis page . Real Life Failsafe Failures are often caused by an improbable and unanticipated conjunction of two or more failure conditions (one of which will often turn out to have never worked in the first place) Compare the way Hollywood treats personal vehicles when the owner is always Driving Like Crazy or leaving his car in a state of neglect , In Hollywood a decrepit car that endangers its occupants and everyone around it is frequently treated as comedy , and all too often this same insouciance extends to things capable of inflicting serious damage should one lose control of them. There's usually No Plans, No Prototype, No Backup or Lock-out/Tag-out procedures, and the Big Red Button is frequently unguarded See also No OSHA Compliance , Override Command , Dead Foot Leadfoot , Inventional Wisdom and Plot-Driven Breakdown . Often invoked in a chain of Disaster Dominoes

A series premise that allows the heroes or the villains to win minor battles along the way but prevents them from ever truly winning their overall "war" and achieving the Series Goal without ending or completely changing the series. They can't win, because then, of course, it would end the series. On shows with premises like these, there will</ be episodes in which the characters make an attempt to actually resolve the premise. The frequency of such eps can range from occasional (Star Trek: Voyager </, "Timeless") to frequent (Gilligan's Island </, Samurai Jack </, Dungeons & Dragons (1983) </, Pokémon: The Series </). Conversely, a character may briefly rise above his Genre Blindness and try to take advantage of the permanent state of failure , consequently falling right into Springtime for Hitler . When a show's impending end is known ahead of time to the producers, however, they may choose to go out with a Grand Finale , in which Failure is no longer the Only Option. A related trope is Perpetual Poverty ; the show's plot is the characters making a living doing something entertaining to audiences such as catching criminals for money (or maybe being criminals </), and if they ever had a windfall they might actually choose to do something less troublesome and therefore less entertaining. Thus, if they ever do</ get their hands on a windfall they have to quickly lose it . Fission Mailed , Hopeless Boss Fight , and Stupidity Is the Only Option are when this trope is applied to video games, where the player must fail, be defeated, etc. in order to advance the story. This is usually done by making the hero extremely weak at that point in time, or making the boss unbeatable due to superior level or some outside force, especially if it's still early in the game. Mind you, it is almost guaranteed that somebody somewhere will come up with a hack or unorthodox strategy to get around this , resulting in either a complete failure of the plot to acknowledge the player’s victory , the game crashing, or some kind of Easter Egg . If the Big Bad of a given work appears at the prequel , you can be sure that he will not die at the end: he has to live on, to be the big bad of the

main work. In fact, all</ the initial conditions of the main work are unavoidable, including but not limited to the presence of the villain. Consider for example the first Star Wars</ trilogy, and the prequel trilogy. It is a Foregone Conclusion that Anakin would live on, that he would fall to the dark side, but also that most Jedi would be killed, that the Republic would turn into the Empire, etc. Any attempt of the heroes in the prequel to change this is doomed to failure. In cases of game shows with recurring contestants who keep bumbling their chances at winning a game, they are usually defined by the trope Born Unlucky (and if it gets really</ out of hand, they might be branded a Memetic Loser), but once the streak of bad luck is lampshaded and starts to become an in-joke regarding when or if the contestant figures out how to finally win and is expected to lose (or they themselves expect to lose), it transitions into this. Related tropes:

Many works of fiction are set in the right place and right time for it to be cold enough to experience snow, and for lakes, ponds and the like to freeze over. There are also those stories set in and/or near ice-skating rinks. Naturally, either way, one character or another will want to try to ice-skate on such a frozen body—or not, but is peer-pressured into doing so Fairly straightforward, until the character takes their first step onto the ice Expect a lot of imbalance, flailing, failing , struggling, shaking , frustration, hilarity and inevitable crashing. It very often ends up with an Epic Fail Note that, despite the name, the character does not have to be ice skating. It happens just as often with roller-skates When two are involved, it can become a case of Literally Falling in Love Compare Epic Fail and Frictionless Ice , as well as the Slippy-Slidey Ice World , where your Player Character is the one liable to have this trope. Contrast On Ice

Fortune Tellers , palm-readers, fire-readers, insect-entrails-on-windshield-readers, and other assorted diviners are canaries in the mineshaft of adventure. They pick up approaching trouble and reveal it in the form of ominous, inconclusive forebodings even when they shouldn't be able to That's all well and good for ordinary disasters, but when a Third Eye gets smacked with a half-brick of the end of all things , getting the gravitas across takes a fit. Screams, spasms, visible exhaustion, malfunctioning seer's tools, it's all good. Fainting is not required but makes for a suitably dramatic finish Sometimes the interruption means that the prophecy in question is incomplete — in some cases when the seer dies or the props are destroyed, it's because an interested third party is trying to hide the outcome. What all this amounts to is a psychic version of The Worf Effect , and is equally popular with telepaths and empaths . You know shit's serious when the team psi keels over in the middle of a scan A Fainting Seer clearly has some actual power: fakes value customer satisfaction. Nothing spoils a date at the fair like a fortune-teller who starts screaming about death, DEATH, oblivion shrouding the land with its brimstone veil, yea, the very HEAVENS dripping with human gore, aaaiiiigh...</ , etc A variation on My Significance Sense Is Tingling . Frequently paired with The Force Is Strong with This One and Poke in the Third Eye . Can be related to or cause even be the cause of Mad Oracle . Can overlap with Power-Strain Blackout . If trouble happens a lot — compare The Ophelia Historically, this was an Invoked Trope in many ancient

traditions due to the common view that narcolepsy or epilepsy (both commonly referred to as "the falling/sleeping sickness") were signs that one was gifted with prophecy See Post-Victory Collapse when the hero breaks down due to physical or mental exhaustion. Subtrope of Fainting

This trope concerns itself with things from the past that seem like a huge load of Values Dissonance . They may be laden with, say, a Rose-Tinted Narrative or a Historical Hero or Villain Upgrade . Only... it turns out it was comparatively Fair For Its Day. Maybe the Historical Hero Upgrade or Historical Villain Upgrade wasn't that unfair a reflection on the person's views. Maybe the Rose-Tinted Narrative just wasn't rose-tinted enough for its original audience. Maybe it was even ripped apart in its own time for being downright insurrectionist and was brave to go as far as it did. This doesn't automatically make the work immune to criticism: something less dissonant than its contemporaries can still be pretty darn dissonant. Oftentimes, though, a little research will show that something cringe-worthy or laughable today is also something worthy of applause for what it stood for, and the context can be important in interpreting the work at large. Authors often work under a system of rigid censorship that decrees even mild</ criticism of the status quo to be going too far, even in enlightened democracies. Attempting to argue for modern values would have really</ been pushing your luck. (In other words, here Failure Was the Only Option .) A work that's only a little</ culturally subversive is more likely to escape censorship and earn public acclaim than one that goes all the way, thus ensuring its relevance - or at least survival - into the present day. (For an ironic counterpoint, consider Crosses the Line Twice , which is when one has to go all the way to get away with being offensive</ .) Please remember that this trope does not mean "surprisingly enlightened for its time period." It means " more</ enlightened for its time period", which is not necessarily the same thing. If a vintage work has a message that comfortably fits modern audiences, that's Values Resonance . To qualify for Fair For Its Day, a vintage work must have negative cultural traits as well as positive ones. Contrast Rule-Abiding Rebel . Innocent Bigot and Racist Grandma are related tropes. Executive Meddling and Lowest Common Denominator may also play roles if unprejudiced creators are forced to pander to widespread prejudices among the public. The same principle applied to innovation in fictional works is "Seinfeld" Is Unfunny . Ironically, a clear counterpart to You Are a Credit to Your Race , the utterance of which was</ fair for its day. NOTE: For something to be considered Fair For Its Day, said attitude, law, or outcome must be considered progressive compared to what the user can generally believe to know or have a frame of reference. For example, Bill Clinton and his policies on homosexuality cannot be considered such, because other nations (e.g. Netherlands) had more progressive policies, which at the time Bill Clinton would have known. However, the Code of Hammurabi is considered such, because it is unlikely that Hammurabi would have had such a frame of reference or knowledge. Examples more recent than 15 years ago are not allowed.

Brought on from the Fairy Godmother from Cinderella </, the Fairy Godmother (and fairies as a whole) is pictured as a kind, selfless and synonymous with that of hope, light and Happily Ever After The Fairy Devilmother, on the other hand, does not give blessings. In

fact, if you see the Fairy Devilmother, bow down and hope that she is feeling merciful that evening. There is no running from her. You will get hurt somehow</, but maybe things won't turn out as bad if you cooperate. Instead of dealing in blessings, dreams, and wishes your heart makes , this Fairy dabbles in creating doom, using dark, unholy powers to curse their wards Their motivations vary. Maybe they're just evil by nature , or are a cruel trickster . Maybe you gave them great disrespect in some way and so decide to "bless" you or your newborn baby with a cruel and unusual fate. Maybe they think</ they're helping but have unconventional ideas on what that means . While the fairies themselves won't always be in literal black, they are almost always dark , dealing in dark magic in contrast to their more sugary sisters Sub-Trope of The Fair Folk and Fairy Godmother See also Evil Wears Black , Grimmification and Jackass Genie

If a fairy tale is often derailed and ends significantly different than how they originally end, then this is a Fractured Fairy Tale . If multiple fairy tales feature in the same story, it's Fairy Tale Free-for-All . Compare: Storybook Episode , Parody Episode , Rhyming Episode , Beanstalk Parody , Cinderella Plot . Related to Paranormal Episode and Off to See the Wizard Contrast: Twice-Told Tale Has nothing to do with Fairy Tail </ episodes.

A story which depicts a fantastic sequence of events. Often, fairy tales include creatures from folklore such as goblins , witches , and dragons . Fairy tales usually take place " Once Upon a Time ", with few (if any) references to real people, places or events. The term "fairy" in this case is not a reference to the creatures now called fairies, but to the word's original meaning, the "faery"; the "place of the fae" (cf "nunnery", "rookery"). Originally meant to refer to the otherworlds where fairy beings like the elves and the sidhe live, it eventually took on a more generic meaning as "land of magic" Orally told fairy tales are told in extremely spare and laconic style. Even the fancy dresses the heroine wears to a ball are discussed briefly; " three dresses , one as golden as the sun, one as silvery as the moon, and one as bright as the stars" and the story goes on. Likewise, characters are defined by their actions. Even when motives are provided (which is only for human characters), they are short and simple: the heroine is out to find her fortune; the hero wants to marry the princess; the Wicked Stepmother is greedy and doesn't want her stepchild to have an inheritance, or envious of her beauty, or if she has a stepson, destroy his wife; the false hero wants to marry the princess; the king falls in love with the strange woman he meets in the woods because of her beauty. And motives may not be; in the Grimms' " The Twelve Dancing Princesses ", we never find out why the princesses are going to the nightly dances, and indeed never discover whether they are doing so voluntarily or not "Fairy tale" is often used in modern times to depict an idealized romance or ending, although many classic fairy tales are much darker than many people realize. Heroes may be the victims of such violence as having hands chopped off or eyes gouged out; at the end of the story, villains may be disposed of by such methods as having them wear red-hot shoes and dance until they die or putting them in a barrel lined with nails and having a horse drag it until they die . The spare style helps minimize the impact, as it can deal with the violence briefly and

without gory detail, but even so many fairy tales have produced Nightmare Fuel . In some cases, this is intentional, to Scare 'Em Straight Fairy tales are found in cultures all over the world. Many tale types have wide-spread variants. However, only a tiny handful of them are widely known in modern culture. Consequently, when a writer goes to rewrite a fairy tale into Fractured Fairy Tale , with parody or subversion, it generally invokes one of that handful. For instance, the Fairy Godmother is a relatively rare figure in fairy tales, but having featured in " Cinderella " and " Sleeping Beauty ", is epidemic in the Fractured Fairy Tale . Even retellings that do not parody the fairy tales generally stick to the best known We know that fairy tales are Older Than Dirt because clearly recognizable fairy tales turn up, occasionally, in written form as far back as there has been writing. A 2016 Linguistic study suggested that two ("the Boy steals the Ogre's Treasure' (Jack and the Beanstalk </ in English) and various Faustian Bargain stories) date back to the very beginnings of civilization (3500-4500 B.C.E.). The story of Jason and Medea is a form of "The girl helps the hero flee" like The White Dove </; a whole cycle of Chivalric Romance are tales of "The girl without hands" like The One-Handed Girl </. However, many of these are also clearly written in literary form, and the others may also be far removed from the orally told tales of their time. Nor were they distinguished from other types of story. Giambattista Basile's The Pentamerone</ in 1634 (or so) was the first collection to contain only what we would recognize as fairy tales, but heavily rewritten into a literary style. The Brothers Grimm were the first to even try to save the folk version, and all tales collected from the oral tradition post-date theirs Fairy tales were originally intended for all ages, but for a long period of time, they were only written or presented as children's stories. Disney is rather famous for adapting fairy tales into movie musicals , often with changes to make them more light-hearted . Writers who seek to restore fairy tales to their original intensity may intensify it to the point of Grimmification Very few fairy tales actually feature fairies ; even those European countries with a developed fairy folklore preferred to use Talking Animals instead. The name of the genre can be traced to Madame d'Aulnoy's Les Contes de Fées</, which appeared only after literary fairy tales became all the rage. Folklorists have made valiant attempts to give the category more accurate names, such as "wonder tale", or the Grimms' original term "household tale" or Märchen</ , but the name sticks. "Folk tales" include them, but also other tales Several extremely popular tales such as Perrault 's "Cinderella" and "Sleeping Beauty" did feature fairies, helping give weight to the name, while others like " Rumpelstiltskin " and " Kate Crackernuts " alluded to a more sinister kind of folkloric fairies . On the other hand, Perrault's "Cinderella" is an odd-ball; normally the Cinderella figure is helped by her dead mother , and "Sleeping Beauty" is as likely to be a victim of prophecy as a curse). Many, such as " Rapunzel ", " Puss in Boots ", " Hansel and Gretel ", and " Snow White ", contain no such figures. Some, like " The Emperor's New Clothes " contain no magic of any kind See also Fairy Tale Tropes for a list of tropes common to fairy tales, Propp's Functions of Folktales , and Fairytale Motifs . If they're parodied , you get a Fractured Fairy Tale . Not to Be Confused with the similarly-named manga Fairy Tail </ For works about fairies, see Fairy Fiction

A story which depicts a fantastic sequence of events. Often, fairy tales include creatures from folklore such as goblins , witches , and dragons . Tropes about fairies, elves, leprechauns, and their ilk. Compare Angelic Tropes , Elf Tropes , Genie Tropes , and Mer Tropes . :

The United States has the largest native English-speaking population in the world — about 300 million — and due to the tremendous global influence of American-produced media, most non-Americans are familiar with the country's dialects and accents and assume them easy to imitate. Thus it's not uncommon for any</ non-American actor to be asked to sound American for a part Fake Americans are usually Canadians (the two countries' generic accents are virtually identical), Brits, Australians or Irish, although New Zealanders and even South Africans have been known to fake American. This is usually done for biographical reasons, to allow for a familial relationship with another character with an American accent , or to portray a character as stereotypically American. Interestingly enough, the Fake American is not usually Mexican, even though the United States of America and The United Mexican States (official name of Mexico) share two-thirds of their name with each other and the southwestern third of the former was the northern half of the latter before 1848, or Jamaican (has its

own distinct accent, known as Jamaican Patois) or Belizean, even though the two are Anglophone countries like the USA According to a documentary, in 2008 one-third of all piloted American TV series had British people in a starring or main supporting role, so this is expanding almost beyond the boundaries of the trope. There are honestly so many actors playing fake Americans in games, TV shows, and movies as of late, most people that aren't familiar with many of the actors from across the pond assume they're American Britons who essay an American accent will usually opt to make the accent "colorful", and preferably Eastern. Expect to hear something along the lines of a) "salty" New Englander; b) Connecticut "blue-blood"; c) New Yorker, typically of the "Brooklyn" variety; or even d) Southern, usually something from Georgia or the Carolinas but occasionally Appalachian, Ozark, or even Texan. This is because the Eastern, and especially Northeastern accents share many phonetic quirks with British dialects, such as the broadening of vowels or the dropping of "r's." It is rare to hear one of these actors attempts, say, a California accent — but it is not unheard of. In those cases, the overcorrection of final "r"s is a common tell ("picture" pronounced "pickshurr", say) Note that this trope does not apply to non-American actors who are not trying to disguise their accent or origin. Nor should it apply to foreign-born actors raised in America such as Natalie Portman (Israeli), Mila Kunis (Ukrainian Jewish), Sebastian Stan (Romanian) and Elizabeth Taylor (British), as long as they don't have to fake an accent. America is a nation of immigrants after all, and it isn't all that unusual to meet people who were born or raised overseas, or natural-born Americans who carry an accent from growing up in an ethnic neighborhood. Expect such situations to be Lampshaded, however, especially if the actor in question has a relatively heavy accent, like Arnold Schwarzenegger (who, for the record, does not qualify for this trope because while he was born in Austria, he is now a naturalized American). Note also that the majority of Canada is within the USA's dialect continuum, thus most Canadian actors have absolutely no difficulty faking being a generic American (it's when the accent required isn't</ a generic one that this comes into play) A version of Fake Nationality , along with Fake Brit and Fake Irish . If the character is called upon to "fake" the accent that's really theirs, it's a case of Lampshade Hanging , of the sub-type How's Your British Accent? . Ooh, Me Accent's Slipping is quite common, and a few careless examples end up Not Even Bothering with the Accent This can also be done within the United States, if an American is expected to speak with a very distinctive accent other than their own, e.g. actors with "neutral" accents doing a Minnesota or Georgia accent

The specific accent is usually Broad Australian; in reality, Broad Australian is one of several different Australian accents, but it seems to be the only one which appears in popular culture, leading to a self-perpetuating occurrence of Small Reference Pools where most foreigners wouldn't recognize any other Australian accent It should be noted that, to Australians, many attempts to imitate an Australian accent end up sounding like London Cockney instead Compare Fake Brit and Fake American . Subtrope of Fake Nationality

A non-British actor pretending to be a British character. (Please note that "British" here actually indicates "Southern English", not Northern English, Scots, or Welsh.) The most commonly imitated accent is the Received Pronunciation one, or else a Cockney (East

London) voice. There is, of course, a great variety of English accents, but these are the two most recognizable to American ears. Even English actors who don't have these accents normally may be called upon to imitate them. Irish, Scottish and Welsh actors are typically required to play English characters too - due to the fact that England has a bigger film industry and these actors usually end up moving to London if they want to build up an international career. It is a rare Irish, Scottish or Welsh actor indeed who doesn't have half a dozen English characters on their résumé (unless they can't do the accent of course) The most glaring error in fake British accents stems from American English's lack of the short "o" (IPA: [ɒ]) sound with which Brits pronounce words such as "pot" and "orange". Americans tend to hypercorrect this to the long "o" (IPA: [ɔː]) sound as in "all" or "door". There exists a stereotype that American actors simply can't do English accents at all. See the Analysis tab for more information on that. Regardless this page and its offshoots contain plenty of examples of well-done fake English accents - from Scots, Irish and Americans alike. Accents in general usually depend on the actor having a good ear to pick up the differences in pronunciation, and usually a dialect coach to help make sure they're getting them right A subtrope of Fake Nationality , and a Sister Trope to Fake American , Fake Scot , Fake Irish , and Fake Australian See also British Accents , The Queen's Latin , I Am Very British . See Not Even Bothering with the Accent , and Ooh, Me Accent's Slipping when this doesn't</ work

People are willing to do anything for the safety of a friend or loved one. If you're the friend or loved one, you can play this to your advantage for material or emotional gain. All you have to do is "disappear," leave a ransom note, and everyone will think you're being held captive. The best part is you don't have to put yourself in actual danger to get the benefits of people going out of their way to save you There are quite a few reasons for doing this. Perhaps you need money, but nobody would give it to you if you just asked. Or you need the MacGuffin , but seeing as it's so valuable, no one would give it to you either except to save a member of the team . If you're The Mole , this can be used to lure the good guys into a trap as they come to rescue you. (See also the Trojan Prisoner and the Play-Along Prisoner .) Finally, some people do this for fame and attention , for the same reason some fake their death and attend the funeral to see who really cares about them One should choose any accomplices in the scheme very carefully, otherwise it could quickly become a real</ kidnapping or worse As this trope is a Plot Twist , there are in the examples

Food seen in commercials has often been improved for the purpose of shooting the commercial. Lettuce will always be crisp, hamburger buns perfect and full, cake light and fluffy. Ice cream is never melting, unless that was the point. As good as the food may be made to look,</ however, actually eating</ that specific example is probably hazardous to your health For starters, the food may have been coated in shellac to ensure that it stays looking good no matter how many takes are done. This is somewhat reasonable, as heat from any lamps being used can cause things to wilt If the food comes in standard proportions, they may have to keep those

proportions due to Truth in Advertising laws... but they can still engage in trickery. Arrange the items on the plate so that (at the angle chosen for the shot), where the view is blocked by other food, there's nothing behind it - but people won't realise that! Cut a wedge out of the hamburger patty, so you can spread it out a bit, making it look wider (this one's almost universal in fast food advertisements). Use camera angles and zooms that make it look larger than it actually is - essentially, the Hitler Cam as applied to food. And you can always just put those standard proportions on a really small plate For a good example of the last of those tricks, watch a Dairy Queen ad for their Peanut Buster Parfait</ and compare how large it appears with what you actually get in the restaurant. You will notice that you rarely see an actor's hands in the picture to give you a sense of scale The items used for photo layouts and "beauty shots" are often not even edible. Ice cream sundaes are often constructed of scoops of lard or mashed potato covered in motor oil, or other toxic-yet-pretty trickery. Likewise, "steam" rising from "hot" food is often smoke from a hidden cigarette, and ice cubes will really be deftly sculpted chunks of acrylic Note that, in general, truth in advertising laws require that the product being advertised should be the same as the one shown (though some of the tricks described above are still applicable), so, for example in a commercial for chocolate syrup, the syrup will be real, but the ice cream onto which is is poured is just as likely to be made of plasticine . The cereal shown in the bowl is, indeed, the product, but the pouring stream of milk is almost always watered down glue. Fast food that is seen in commercials is usually sprayed with a sealant and painted so that it appears more perfect than it would when you order it in person Played with in Dutch PSA. The items look like food- but they're poisonous

In the Oh My Goddess: Adventures of the Mini-Goddesses </ manga, one of the strips depicts a certain voice actress as having a fetish for touching fake food samples and gets Squicked if they turn out to be real. (This is based on Belldandy's voice actress' real life tendency for such a habit.)

There's a scene in Back to the Future </ where Marty McFly is supposed to do a Spit Take while drinking gin in the car with Lorraine - in reality, the flask was filled with water. Amusingly, production decided to play a prank on Michael J. Fox during one take, replacing the water with real</ gin. Fox, a teetotaler, did a spit take for real In Incompetence </, Harry mentions that he once knew someone who photographed food for a living. Among the tricks used to make the food look more appetizing include secreting a boiled tampon </ on the plate

Exception: in Coupling </ , actor Ben Miles decided that his character Patrick was a Guinness drinker. This may have had something to do with the fact that Guinness is very difficult to fake convincingly, so while his fellow actors were drinking coloured water with foam on top, he was drinking genuine Guinness... The owner of swears that they always use the real candy she reviews in Gratuitous Food Porn !

On stage, food props are almost always real food of some kind (if not the food they're supposed to be) because actors have to eat it onstage. It usually is intentionally made to taste awful so the actors

won't eat too much and it can be reused multiple nights. Alcohol, however, is almost invariably fake because of the hazards of the actors getting drunk in the course of performing the show (usually, dark liquors like whiskey will often be iced tea, lighter drinks like beer are apple juice, and wine is, of course, non-alcoholic grape juice. Obviously these can be subbed out for something more to the actor's tastes, all the way to simply water with food coloring.)

In The Simpsons </ Krusty the Klown is often seen to be disgusted with what he actually has to eat during commercials for his restaurant chain, and spits it out when the camera is off. This may have been a reference to George Foreman, in which leaked footage showed him spitting out food cooked by his signature grill (which is actually what they do when people eat for a shot, since after 30 takes he would have been throwing up with all he ate otherwise). Even better, it's shown that despite being Jewish Krusty has no problem putting his name on pork based products and eating them himself.

Japan, as mentioned in a few examples above, has an entire industry dedicated to producing realistic models of a restaurant's menu items permanently display in the restaurant itself. They were originally made using wax, but many nowadays are made with plastics (as wax models would melt and need to be replaced).

Characters consuming what they think is a drug, they start acting accordingly, but turns out to be a placebo. Whether it's an oregano joint, a mysterious pill that turns out to be aspirin, or non-alcoholic beer, you'd never know it by the way the person is acting Related to Magic Feather (when it's a Motivational Lie) and the Placebo Effect (for how it works) See also I Can't Believe It's Not Heroin! and Drunk on Milk , for when this isn't an accident. If a character deliberately pretends to be drunk/high, they're Playing Drunk

Irish characters are some of the most frequently depicted foreigners in British and American media but they often tend to be played by non-Irish actors with, ahem, "variable" success when it comes to accents, or use the "wrong" Irish accent. For instance Northern Irish accents are quite distinct from southern Irish accents. Ireland is quite unique as a country in that there can be startling differences in accents within counties; a north Dublin accent for instance is like night and day to a southern one from only an hour's drive away Another reason why non-Irish actors are used is the desire for name recognition. Even if an appropriate-age largely unknown Irish actor is available the film makers will often be tempted to go for someone with more international appeal. For some reason this seems to be particularly the case with female actors; even a film with mostly Irish actors, like Intermission</ or About Adam</ or the recent Perrier's Bounty </ will still fill its female roles with British or American actors. This may be why there are quite a few famous Irish male actors in Hollywood but vanishingly few famous Irish female actors: their chances of a breakthrough role are that much smaller (with the notable exception of Saoirse Ronan). See also for theories on why there are so few name female Irish actors. This can also overlap with Britain is Only London - as a lot of casting tends to be based there, especially if it's a UK-backed production - and there's an

inherent bias to favoring London actors, while almost shutting out Irish actors completely (as noted on the Fake Brit page, most Irish actors who get fame will likely play more Brits or Americans in the long run). In recent years, this has started drawing comparisons to whitewashing For some reason Scottish</ actors seem to be disproportionately likely to play Irish characters, which is unlikely to help those who already can't tell the two countries apart. Also, a strong Ulster or Southern Irish accent done by a Scottish person would confuse things even further (such as the Glaswegian actor of Irish descent, David O'Hara in The Departed</ or Dundonian Brian Cox in 25th Hour </) As you might expect Fake Irish characters often slip into Oireland territory. Note that American, British, Canadian, or Australian actors of Irish descent technically avoid the Fake Irish label since they are well... Irish. But if they screw up the accent, expect to hear about it

When a character who is supposed to be of mixed ancestry is played by an actor who obviously is not. This is not to say that people of mixed parentage do not physically resemble one race over another—they often do. This trope describes the flagrant instances of laziness and inattention in casting, which result in an attempt to force the viewer to accept that a character is the biological child of a character of another race, even though their phenotype clearly precludes that from being a real possibility. This is due in large part to the lack of mixed-race actors in the American television/film industries—although one should point out that this is largely due to the biases of the industry itself, which has a tendency to shy away from performers who aren't readily identifiable as members of a particular race/ethnicity . Often occurs where the parentage of the character is a defining issue of the plot. This is not uncommon in American dramatic shows, where it most often involves the children of black/white mixed marriages. Chalk this one up to the rigid and brutal history of the American color line—scriptwriters still use the twist of an ostensibly "white" character being fathered by a black man (or vice versa) to jolt the audience by invoking longstanding taboos against cross-racial romance. Therefore, one could say that the imperatives of plot justify this trope to a limited extent. However, in the majority of cases, it comes across as utterly implausible. More often than not, the writer simply leans upon viewer ignorance—as if the relatively small number of biracial Americans makes it possible to accept that a character is biracial simply because the plot decrees it. Adding to the insult against viewer intelligence is clumsy writing, which often causes the parentage revelation to be completely disconnected from the preceding plot. It is often a ham-handed attempt to up the dramatic ante, without rhyme, reason, or foreshadowing. In other words, it is a cheap source of foundation-shaking conflict that can be invoked without regard for the narrative's internal logic . A variant is often used in a comedic contexts, such as animation or sitcoms (see Family Guy</ quote above). A character will discover obscure roots in another ethnic group, usually by way of a distant ancestor. The character will often proceed to redefine their whole identity in a ludicrously exaggerated manner based on this information, regardless of the fact that the person lacks any substantive cultural or physical resemblance to the group in question. This plotline's persistence can perhaps be explained by its versatility as a vehicle for dissecting and/or subverting ethnic stereotypes and assumptions. In real life,

mixed-race individuals can be anywhere along the range of colors of any of the races in their makeup, up to and including the lightest and darkest extremes of skin and hair color (though this is rare). This nonetheless attracts criticism because Reality Is Unrealistic Compare Gender Equals Breed . See also Ambiguously Brown . Kenneth Branagh's film version of Much Ado About Nothing (1993) </ has Denzel Washington and Keanu Reeves as half-brothers. Somebody's got to be half-something. (Keanu Reeves is actually half-English... though the other half is a mix of Chinese, Hawaiian, English and Portuguese.)

When an actor plays a native of a nationality or area other than their own. Not counting those actors who play an extraterrestrial , who are never</ from the same place as their character. Probably. Nowadays can be known as Colorblind Casting Israeli Jewish and Arab actors tend to wind up playing each other quite frequently (though Israeli-for-Arab is more common than the other way around). Gung-ho movies made during World War II featured every kind of Asian except</ Japanese, since the Japanese-American actors were otherwise occupied. And very few Russian characters during the Cold War were played by native Russians. For foreign actors who are frequently employed to play foreign characters, see Plays Great Ethnics The most common examples have their own tropes: Fake American , Fake Australian , Fake Brit , Fake Irish , Fake Russian , Fake Scot and its ethnic variations Yellowface , Brownface and Fake Mixed Race . The Queen's Latin is a subtrope where characters in Ancient Grome or other classical-to-medieval settings are usually played by Brits, no matter what part of Europe they're actually from. See also: Fauxreigner where the character</ is pretending to be a nationality they aren't (or acting more stereotypical than they actually usually do) If you are actually from the area in question, you may remember one or more of these examples as "That foreigner with a strange accent. Where are they supposed to be from ?" On the other hand, some actors are really good at it. An added complication is that human appearance varies even within nationalities and ethnicities as a result when playing a historical character the foreigner might have been selected because s/he greatly resembled the original An actor who often does this well Plays Great Ethnics . When done poorly, it can result in WTH, Casting Agency? See Pass Fail when, for whatever reason, the actor isn't convincing as another nationality

Two characters, who either appear to be attracted to each other but in denial or just hate each other's guts, find themselves cornered during an emergency. They're about to be caught sneaking into the Big Bad 's fortress, looking at confidential files, or fleeing the scene of the battle. The quickest solution? Kiss — passionately Maybe the theory is that whoever's about to find them will want to look away and give them some privacy . Maybe the logic is to do the LEAST suspicious thing two people would be doing in a dark room or alley, or because it's difficult to recognize someone's face when it's mashed against someone else's. Maybe it's somehow necessary to maintain the Masquerade . Maybe it's a good excuse. Either way, the danger is quickly thwarted... but the moment is not so quickly forgotten Probably the only kiss that comes without warning. Often fuel for shippers anyway, and has a good chance of appearing in that episode's trailer . Distinct from the Kiss of Distraction because that involves one of the kissers being distracted, whereas this seeks to distract people looking at the kiss Sometimes done to interrupt a person

speaking/shouting , either to just shut them up or because someone is coming Compare the longer-term Undercover as Lovers . Compare and contrast Platonic Kissing

Sometimes it's a human being rather than a dog inspiring the panic See also You Don't Want to Catch This

A group of people decide that, for whatever reason, they want to make something. It's not serious. Maybe they're making a fake college so their parents don't find out that they've been rejected by every college in the country. Maybe they make a fake movie so they can bang actresses , or a fake musical so that they can keep the money . But, somehow, people find out about their fake and think it's real. Everyone wants to be part of it, and now they must make it real Similar to Becoming the Mask , but with entities. For cases where the goal was to make something real, but to have it fail, see Springtime for Hitler . If it's a person being faked it becomes Invented Individual . A subtrope is Romantic Fake–Real Turn . See also Secret Identity Identity and Appropriated Appellation . Compare Defictionalization . Not to be confused with Face–Heel Turn

Simply put, two characters who aren't in a romantic relationship pretend to be. Naturally, there's a high likelihood of them Becoming the Mask , or at least one character claiming It Meant Something to Me , in which case you have a Romantic Fake–Real Turn . Supertrope of:

Contrast Secret Relationship . See also Fake-Out Make-Out , Marriage Before Romance (when the fake relationship becomes real) and Marriage of Convenience . Compare the one-sided Intentional Heartbreaker .

Very few characters from Russia (or the rest of the former Soviet Union , for that matter) in Western television are played by native Russians. This was a particular case in the Cold War , for obvious reasons As with Fake American , Fake Brit and all types of Fake Nationality , the quality of the imitation of the Russian accents varies from the very good to the awful to the not-even-attempted For convenience's sake, this trope covers the whole of the former Soviet Union on its post- World War II boundaries. Fake Russian text</ is The Backwards Я

Scottish people in particular get very tetchy about foreign actors trying to pull off their accent, probably because they're so conditioned to it being done badly that they can't accept that someone might actually be good at it Compare Fake Irish , Fake Brit , and Fake Australian Not to be confused with No True Scotsman

There is a practice in some TV shows and especially in commercials Ththat shows the view of someone using a video camera. This usually Thincludes a rectangular "frame" in the scene and the "REC" Thindicator with a red dot at the bottom right corner of the screen This is not the same as captured video, which includes the date Thand time stamp, but rather implies that we are seeing the video Thdisplay on the camera from the viewpoint of the person recording

Thit

Sorry, did you just say that you fake the tricks you do? Yes, you might be the one guy who doesn't have magic powers in this setting and have to find some way to make up for the disadvantage, you might not have developed your wizarding powers yet but know some killer sleight of hand that will put you up with the best for whatever deceptive reason you choose, or you might be that bastard of a con-man who needs to use stage tricks for part of a certain plan to achieve something that magic just couldn't do. Presenting the trope: there's real magic here, but illusion is being used. Reasons for this can vary wildly, but usually it's done to either intimidate opponents into backing off or as part of some elaborate scam or con scheme. One particular scene which seems to be the favourite for Fake Wizardry employment is the climactic scene where the heroes scare off the big bad through elaborately-prepared stunts that make it look as if they have some insanely powerful form of magic (which they don't even though it exists). Other times, a certain feat of über-powerful magic may be some big rumour that it's possible for the most studious or powerful of wizards to achieve. Naturally, some guy is going to either fake this to show off or for the more practical purpose of scaring his enemies/friends either away</ or into treating him like royalty. That super magic might even be legendary or prophetic, and the wizard fakes having it so that he will become The Chosen One . If it's not done for benevolent means, expect it to be followed-up by the plot where everyone discovers that the wizard is a fake and the Aesop that they shouldn't fake advanced magic powers... except for those times when you should. (These times being when you're The Hero and... well, you're the hero, or if you're a slightly shady member of the good side who gets away with ends-justifying-means actions.) If the fake magic manages to not only fool everyone, but actually overpower real magic users, then it's a case of Muggles Do It Better . Contrast Magicians Are Wizards , where someone with actual magical powers presents them as stage trickery. Can be related to This Is My Boomstick and Magic from Technology . See also Phony Psychic and God Guise . One form a "Scooby-Doo" Hoax may take. Has nothing to do with a bootleg Wizardry </ .

Alice comes home to discover a Ransacked Room , the window broken and her laptop and all her jewelry missing. Clearly she's been the victim of a burglary and with the thief long gone there's no chance she'll ever catch the culprit. However, the true culprit isn't some opportunistic burglar, it is in fact Bob, who even now is pretending to console Alice for her loss. Bob only needed to steal the secrets hidden on Alice's laptop and as Alice's trusted friend, had the door key to let himself in in order to do so. However, by trashing the room, smashing the window and taking other valuables, Bob has left enough red herrings that no one will suspect his involvement. The faked burglary has a number of other popular uses: Even if the break-in is genuine and the valuables are kept, the key factor of this trope is that the the burglary is used to mislead and misdirect somehow. One classic method of a detective determining that the burglary is a false one is by finding pieces of glass from the broken window on the outside of the room (thereby proving that the burglar broke it from the inside) or, slightly more subtly, that the window was broken from the outside, but either after the burglary had taken place (footprints under the broken glass) or in such a way that the burglar could not have used the hole in the window to open it.

In a Trapper Keeper commercial, one student answers that he lost his homework after aliens ransacked his room.

Sin City </: A variation happens in That Yellow Bastard</. Hartigan sees that Nancy's house has been broken into and suspects that it was the Rourke family who has kidnapped her. It turns out that the whole thing was a Red Herring . Her apartment break in was a separate crime but he ended up rushing to her job, leading the bad guys right to her.

In A Fish Called Wanda </ , Archie fakes a robbery in order to recover Wanda's necklace from his wife... unfortunately Otto catches him in the act and subdues him, thinking he's doing Archie a favor by catching the robber </ by Lawrence Block

Monk </ : In PAYDAY 2 </ 's Election Day mission, Plan B for rigging the election is to rob a bank next door to the election center, "accidentally" damaging the machines by blowing up the wall next to them. The election results will be invalidated, and everybody will think you were just robbing a bank instead of doing some dirty political work.

In The Boondocks </ episode "Thank You for Not Snitching", Ed Wuncler III and Gin Rummy break into houses in order to drum up business for Wuncler Security.

A character's death is faked, for one or more of the following purposes: To throw their enemies off the trail. Often the audience will think the character is genuinely dead. Extra points if a fake crime scene photo or Staged Shooting is used. Sometimes a John Doe's remains are substituted and destroyed beyond recognition, or everyone is simply told "They Never Found the Body ." The person faking his death might attend his own funeral . Of course, when this happens to main characters in a series, the audience should not be fooled. When the method of faking temporarily turns the character into a realistic-seeming corpse, this is Faux Death . Death Faked for You , Playing Possum , Disney Death , and Fake Kill Scare are subtropes . The inverse is Of Corpse He's Alive (a "live" person is actually dead) and El Cid Ploy (a faction pretending their leader is alive). A play on the common turn of phrase "waking the dead". Contrast He's Just Hiding! Not to be confused with Fake Weakness . See also Reports of My Death Were Greatly Exaggerated . For what (usually) happens next, see Starting a New Life . Remember that faking the dead may seem fun, but it is a criminal act in most countries and may cause legal trouble. Don't Try This at Home . You Have Been Warned .

In the times of Ancient Rome , Cupid (and by extension, his Greek-counterpart Eros) was a god of love and an embodiment of sexual desire . He was armed with a bow gifted to him by his father Mars/Ares and a quiver of arrows; gold arrows that induced love , lead arrows that destroyed it . He was also a terrible shot, and would often be the blame for madness and chaos brought on by raw, uncontrollable desire among the mortals. With cultural osmosis, Cupid as an icon has endured the test of time in the form of an angel and flying baby that personifies love With every angel, there are its Evil Counterparts , with much more malevolent versions of the cupid portrayed as a Fallen Angels or even as all-out demons . Like their heavenly counterparts, Fallen Cupids have bows and arrows too, but they aren't nearly as wholesome. Instead of sacred couplings, perhaps they illicit more carnal desires like the Horny

Devils that they are, portraying them like the Greco-Roman Cupid of old in a more modern context . The love they inflict might be a form of Mad Love , and might even ensure that Love Hurts in the end just for the satisfaction of watching hearts break. They might manifest as a form of Jerkass Genie , granting a mortal's wish for love and have that love be an annoying, corrupting thing that brings out the worst in all parties . They could carry nothing but lead arrows and destroy love, or maybe they can pierce the heart of a person and they bleed to death Compare Bad Santa . Related to Love Makes You Crazy , Love Makes You Evil and Wicked Heart Symbol

Not all villains are born . Some are made, and none are more tragic than the Fallen Hero. As the name implies, the Fallen Hero used to be a hero before doing a Face–Heel Turn . They may even have been an Ideal Hero or another equally optimistic archetype , up until the moment when they suffered something bad enough for them to lose all faith in good and idealism , be it the loss of a loved one , too many good deeds coming back to bite them hard , betrayal by someone they trusted the most , too much distrust from those who should have been allies , or some other faith-shattering event. It might even be a drawn out process of seduction to The Dark Side or fall from grace. Some Evil Old Folks happened to be this type in their younger days. What they choose to do about it determines what they become: They'll use their not-inconsiderable powers and abilities to do it, too. Often, they'll twist healing powers to evil ends, or allow pain to fester by simply denying the use of their powers for good. Where once the Barrier Maiden wanted to heal the world, she'll now spread misery to speed its destruction . The Messianic Archetype who wanted to save the world now wants its damnation . The Gunslinger , once wanting to bring justice to the frontier, now wants nothing but vengeance and blood. Many of these made the protagonist's journey to villainy . Usually revealed in a "Not So Different" Remark moment. Almost always gets a Start of Darkness , and often implies Became Their Own Antithesis . Christopher Booker's sixth basic plot , Tragedy , uses this character arc, with the Fallen Hero as the main character Compare Face–Heel Turn , The Dark Side Will Make You Forget . See also Fallen Angel , Tragic Villain , and Tragic Monster . Super-Trope to The Paragon Always Rebels , in which the character has such influence over other good guys that they fall with him or her. When the Fallen Hero used to be a main character in a previous work, they're a Rogue Protagonist .

A Narrative Device especially common in film and TV, though not limited to them. This is the job where a once famous or admired character is "reduced to this!" More dire than a Day Job , this is a stereotypical last-resort job to which has-beens, people who got fired or laid off from their regular jobs, Impoverished Patricians , or Fallen Heroes have resorted, just to pay the bills. The Fallen on Hard Times Job is often the starting point for a protagonist's Redemption Quest , or attempt to chase after their Lifelong Dream (with accompanying Gonna Fly Now Montage). It can also serve as a recruiting station for a Ragtag Band of Misfits or Putting the Band Back Together . Such jobs include: Party organisers for actors (Party Down </) Compare Former Regime Personnel , when a lot of secret policemen, commandos, spies and similar people end up fallen on hard times at once. The most common Fallen-on-Hard-Times Job for them

is mafia soldier or security mook . Also compare Worthless Foreign Degree , in which highly educated immigrants end up in menial jobs. Contrast Waiting for a Break which is about aspiring actors and film writers doing a day job whilst attempting</ to make it big. Can lead to a Scrap Heap Hero if the person is called back to duty. See also Loser Protagonist , Acceptable Hard Luck Targets .

A common way to create a Crapsack World setting is to have the United States fall so much that it becomes much like a third world nation, with a collapsed economy, decaying infrastructure, fallen or incredibly corrupt government, and so on. Perhaps a new Civil War has left the nation battered and weak, only a shell of its former self; or possibly economic collapse due to poor management, lack of an important resource, such as oil , food, or water, or because of the rise of another foreign power has led to a weak US. An invasion by a foreign power has either conquered part of or all of the United States, or weakened it severely; bonus points if it's Russia and/or Mexico on a revanchist drive. Or even a natural disaster of some sort has happened In a worst case scenario, it is even possible for the nation to cease to exist as we know it, either being swept into anarchy , broken up into new nation states , or the area as a whole being replaced by a new power. If the term "The Former United States" is said, this most likely happened Expect to see major cities from coast to coast become massive slums , with the poor and homeless roaming the streets, sometimes with the tarnished remains of familiar or similar staple American businesses. What remains of the wealthy will be living in fortified enclaves, separated from the common rabble, and the middle class will become all but extinct. Shanty towns become a common sight, and the only form of "reliable" rule is from organized criminal organizations who will jump on the opportunity to take advantage of the desperate situation or large corporations who can now operate above the law thanks to a weakened, corrupt, and/or apathetic government What is left of the government (if one even still exists) will be immensely ineffective and corrupt, with greasy politicians trying to hold onto power, or gain power by proposing solutions to regain the nation's once former glory and by claiming that prosperity is right around the corner, or by arrogantly still believing (or trying to fool the populace) that the nation is still strong, despite obvious evidence to the contrary The work has a huge potential to become Anvilicious if the creator is trying to preach what will happen if the Real Life United States does or doesn't do X, Y and/or Z, or as a way to create a fictional America led by political strawmen whose political views are opposed to the creator's Sub-Trope of Different States of America Can usually, but not always, go hand in hand with Divided States of America , Oppressive States of America , and/or Invaded States of America . Contrast with Expanded States of America , although it is also possible for the US to join with Canada and/or Mexico not because it is empowered, but because it is so weak that it needs to. Compare with America Is Still a Colony , where the US never got off the ground in the first place. Possibly a result of a Second American Civil War , even if the war ends in full reunification Settings in which either Japan or China Takes Over the World will often include this. Contrast America Takes Over the World

Sometimes, the police simply are not going to stop investigating a crime until they find someone</ to arrest. In this case, even if

you've pulled off The Perfect Crime , the only way to be certain of getting away with it is by setting up some other sap to take the fall for you Sometimes the Fall Guy is an accomplice who takes on this scapegoat role willingly . Other times, when you have drawn up plans with the brilliant clockwork evil of The Chessmaster , you might choose a Fall Guy — whether an accomplice of yours, or someone completely innocent — by tricking this Unwitting Pawn into taking the blame, or outright framing them up Maybe you choose the guy no one's going to believe . Better yet, you choose a well-meaning sap whose fears and goals you've been able to manipulate via Flaw Exploitation . Alternately, you could pull off a Deceased Fall-Guy Gambit , since a dead man can't defend himself. Another tactic is for a Villain with Good Publicity to try to paint someone who worked for them and committed a crime as an Overzealous Underling who acted alone and without the knowledge of the boss Closely related to The Scapegoat and, on a bigger scale, Karmic Misfire Not to be confused with a television series or video game

Variant of the Good-Times Montage Two characters get together and they are becoming romantically entwined. Their first date is shown and the audience gets a glimpse at how amazingly compatible the couple is A montage follows, usually with no dialogue and an upbeat or romantic soundtrack, showing the couple during a series of classic dates like the picnic, the carnival, the park, the beach, the drive-in cinema, a bike ride (bonus points for a tandem bicycle), the dinner date or watching the sunset. They exchange classic romantic gifts like Flowers of Romance , Chocolate of Romance , stuffed animals or a prize from the game at the carnival . They are shown in classic romantic poses and situations, including The Meadow Run , Old Fashioned Row Boat Date , Hands-On Approach , Romantic Spoonfeeding , Spaghetti Kiss or Sweetheart Sipping , often combined with meaningful body language like the Meaningful Look or Held Gaze , Holding Hands , the unexpected First Kiss or the Lap Pillow The montage segues into the end of a date and the audience is shown just how in love the couple has become. And how cute they are together In TV shows, this is often a Time-Compression Montage serving to show how, in this episode, the Girl of the Week isn't just a casual fling. This trope is endemic to Bollywood as it's an effective way of showing developing romances between characters while (mostly) avoiding the narrative pitfalls of including them in the first place See Literally Falling in Love for a Sub-Trope . Contrast with Lost Love Montage

In cartoons, the hero finishes off the villain with a powerful blow that sends the latter flying in the air and crashing through the ceiling of a prison and conveniently in a jail cell. How precise or lucky the hero was in doing this, how the villain doesn't suffer any injuries in the process, or whether the hole in the roof is going to be repaired are usually not addressed. Other variations include: Compare Disney Villain Death .

Somebody is building a large and complicated house of cards, and there's stuff going on around them that threatens to cause the structure to collapse The collapse often happens just as the last two cards are being placed, leaving the builder holding them in

place over the empty air where the house used to be Like Endangered Soufflé , only not with souffle , and comes with the same two standard variations: In one, the rambunctious behavior around the house of cards is quieted down with no ill effects, only to have a relatively-distant disturbance (slamming door, car backfire) collapse the structure after it is "safe". The other works much the same, except that it is the builder themselves who triggers the collapse Dish Dash is a related trope The trope name is a play on Edgar Allan Poe 's Fall of the House of Usher</

A major crime has been committed and a killer is on the loose. Luckily for the police, someone has come forward confessing to the crime. Unluckily for the police, the person making the confession didn't commit the crime. Sometimes the police will see through the confession and instantly know that the person is lying. Other times, unfortunately, they will buy into the guy's story, derailing their investigation (at least temporarily). In some cases, even after the person's confession is shown to be false, some of the detectives will still go with it The possible reasons for the false confession are many. Perhaps the character is confessing because he knows or thinks one of his loved ones is really the criminal and is covering . Perhaps the character is mentally ill and is willing to confess to just about anything the police tell him to confess to. Perhaps the character just wants the publicity. Perhaps the real killer is coercing the character into Taking the Heat . And maybe, just maybe, the character actually thinks he committed the crime. Also, as real life interrogation tapes show, being questioned by the police can be a highly stressful experience. If made to go through it long enough, a suspect may confess just to end it, whether they're guilty or not. This can also be done sometime through Police Brutality If the character has a history of confessing to things he didn't do, expect the police to remember him from the last time he made a confession. This could possibly lead to a subversion of this trope when it is later revealed that the "serial confessor" actually did the crime this time Taking the Heat is a subtrope. Often the product of the Jack Bauer Interrogation Technique

Happens in Paranoia Agent

A man named Robert Hubert confessed to starting the Great Fire of London in 1666 by throwing a fire bomb through a bakery window. It was shown during his trial that he was out of the country until two days after the start of the fire, that he was never near the bakery in question in any case, the bakery had no windows, and that Hubert himself was a cripple who was physically incapable of throwing a bomb. Despite all this, Hubert was found guilty and hanged for the crime.

Whenever people from one nation or organization pretend to be members of another, to stir up trouble . Common scenarios include: It's not limited to violence; spreading misinformation or committing sabotage in someone else's name can work wonders too. Basically it is a Frameup scaled up to target large organizations and nations. Heroes typically end up trying to Prevent the War or Avoiding the Great War . This is an example of Truth in Television since false flag operations have been used in real life to do all of this. It's

generally frowned upon by the Geneva Convention . The term comes from naval warfare, where your ships are allowed to approach</ their target under a different flag but have to raise their true colours before attacking. Any False Flag Operation can be used to generate a Pretext for War . If a False Flag Operation is perpetrated by an individual villain or group start a war for private benefit, it's a case of War for Fun and Profit . If the attack is directed against the guys you're posing as (as opposed to your own), it's Dressing as the Enemy . When they disguise someone else</, it's Disguised Hostage Gambit . If the intent is to incite two villainous groups to wipe each other out, it can either be Evil vs. Evil or Enemy Civil War . Thus, it is the third of The Thirty-Six Stratagems . Compare Staged Populist Uprising .

This describes a person, be it a Manipulative Bastard , Bitch in Sheep's Clothing , Alpha Bitch or whatever, who gets close to you and pretends to be your ally, friend, lover, etc. Basically, they earn your trust, and when you least expect it, they betray you and reveal they've merely been playing you this whole time. Another variation on this is that the manipulative character may find himself Becoming the Mask , developing real feelings for the person he betrayed. Sometimes, the betrayer may turn out to be someone you've known pretty much your whole life. If a character with a Friendless Background finally</ finds a person who appears to believe in him or her, and then that person turns out to be a False Friend, it's almost certain that the character will then have crossed the Despair Event Horizon , or at least is very vulnerable to such. The Mole is perhaps the best-known practitioner of this brand of betrayal. Closely related to Evil All Along , Was It All a Lie? and I Just Want to Have Friends . Can lead to an Et Tu, Brute? situation. If the False Friend turns out to be the guy behind everything</, he's a Big Bad Friend . Contrast True Companions . The polar opposite of both Vitriolic Best Buds and With Friends Like These... if true friends are always mean to each other but still remain friends. If it's about a character revealing their hatred for another during a falling out, then it's Hidden Disdain Reveal . Sadly,... Truth in Television . Not to be confused with for words in two languages which look similar but do not mean the same thing . (" Embarazada</ ? But… I trusted you!") Related to Broken Pedestal . in Little Nightmares II she let Mono fall into the depths of the Signal Tower as soon as it became clear she would no longer need his help to escape the Pale City .

The False Innocence Trick (aka Fake Good In A Can) is when a villain or monster locked away for a good reason feigns innocence or being a good guy in order to fool the hero into letting him go. Typically the villain will prey on the hero's good will and strong moral fiber while doing this by making himself and his story as sympathetic as possible. He often is also counting on the fact that the hero has come from a time/place far enough away to not know who the prisoner really is (or, if he's a local, simply hasn't heard of him). Demons contained in the Summoning Ritual of an Evil Sorcerer love this one; usually with Voluntary Shapeshifting . "I'm just an innocent maiden, I have no idea why he has me trapped here. Could you please break the circle?" Compare Wounded Gazelle Gambit , The Farmer and the Viper , and Bitch in Sheep's Clothing for other cases of villains taking advantage of the hero's trusting nature . Contrast the more common Decoy Damsel and Disguised Hostage Gambit for when a villain makes a genuine prisoner look like a bad guy.

Someone claims to be raped. However, the accusation turns out to be a lie. Depending on the scenario, it can be a matter of this fact already being known by the audience or a plot twist. In the case of the former, the conflict is about the credibility of the accused instead of whether or not rape ever happened. This is a very specific form of a Wounded Gazelle Gambit . In order to qualify for this trope, the following is required: There are also a few ways this can play out: See also either Frameup or Abomination Accusation Attack , depending on how the false rape accusation is done. Compare Unprovoked Pervert Payback , where an Accidental Pervert moment creates a backlash for the offender.

A False Soulmate is a person who someone has a deep romantic love for, but the relationship is for some reason not meant to be, perhaps because of the love interest not sharing the same feelings , incompatibility, or misjudgment of character . Alternatively, the relationship ends up being a failure or catastrophe because the love interest's personality or behavior has changed in a negative way (e.g. the love interest may be unfaithful, a user , a criminal, mentally unstable, or a drug-addict). This may stem from Puppy Love , or personality traits that the love interest either had or had more of when they were younger. The Serial Romeo is particularly prone to encountering this This often overlaps with Romantic False Lead . Compare Love Cannot Overcome , Loving a Shadow , Starcrossed Lovers , Unlucky Childhood Friend and Wrong Guy First (if the character meets their false soulmate before their true soulmate). Compare and contrast with One True Love . If the audience thinks a love interest unintentionally</ comes off this way, it's likely a case of Designated Love Interest or Strangled by the Red String Due to the nature of this trope, there may be below

The main character has always loved or lusted for another character on the show. He gets his courage up to go tell her. Music swells, he takes a breath.. And somehow the whole thing gets derailed. Either he chickens out, she asks him a question about this hot guy she's been chasing, or she runs off to go fight vampires, or someone else barges into the room and destroys the opportunity entirely This can be a highly effective writing technique for a couple of episodes, but the writers typically find that it's impossible to maintain forever. Eventually, the character will tell the object of his affections, and the plot will move on...or the viewers will Name comes from the American football term when an offensive lineman moves before the snap (when the ball is put in motion) Compare to Will They or Won't They? and Redundant Romance Attempt . See also Red Herring Twist , Cannot Spit It Out , and So You Were Saying...? Not to be confused with Deliberately Jumping the Gun

In real life, are a sign of age, poor health/dental care, or a combo thereof. As such, they are typically not a laughing matter. However, in fiction, false teeth are usually treated as hilarious and/or gross In many cases, old people have no problem letting you know their teeth are false, and spitting or whipping them out to show you, still dripping with saliva. It's also not uncommon for the false teeth to be left behind either, due to biting into

tough food (or even non-edible objects) or the person in question just forgetting about them and leaving them behind. And that's not getting into using them as musical instruments - they make good castanets, apparently. No matter what form it takes, the bottom line is this - false teeth are funny Phlegmings commonly overlaps with this trope. Compare and contrast Cranium Chase , where a character getting decapitated is played for similar humor

Beetle Bailey </: The General tries to demonstrate Pin-Pulling Teeth and ends up throwing a grenade with his dentures attached to it.

What people (in general, or at least in groups) think about you — or how they don't think of you. How you got there. And what it means to you Compare Fandom , Blame Tropes , Ego Tropes

A familiar is a creature that has been magically bound to a person in a master-and-servant type of relationship. The actual type of familiar varies greatly; it is typically a small animal (such as a witch's cat) but can be anything, including demons or even human beings. Similarly, the type of bond can vary: in some cases, it is nothing more than the ability to understand what the familiar says (if it speaks) while in others the familiar is</ the source of the character's powers. But there must</ be a specific bond; just having a magical creature as a companion doesn't count. The "master" need not be a sorcerer, either — many stories have a normal person gain a familiar by accident, often resulting in trouble This is based on the medieval belief that Satan granted demon servants (in animal form) to witches as part of their pacts and that "cunning folk" (white witches, herbalists, folk healers) were assisted by good spirits. The idea has since evolved greatly in Fantasy fiction, and even some Science Fiction settings have similar concepts (telepathic pets, for example, or even a Robot Buddy , especially if animal-like). Compare Bond Creature , Empathy Pet , Mons , and Right-Hand Cat . The familiar usually acts as an Animal Eye Spy to their master Because All Witches Have Cats , cats, and especially black ones, are the most common variant for female magic users. Frogs and toads, bats, owls, small imps, and sometimes snakes are also very common. In theory, however, a familiar can be just about anything Today, most witches draw a distinction between a "familiar spirit", which is more like your "personal demon/daimon", and an animal "familiar" which is an animal you bond with. Sometimes the term refers to your own alter ego behaving independently; your Shadow Archetype self. In any case, the "familiar" is so called because it stands in a close personal connection to you One possible subversion of this trope is for a wizard to (intentionally or accidentally) form a familiar bond with a human being, usually causing hilarity to ensue See also Sapient Steed and Mentor Mascot . In Japanese Mythology , a similar creature is called a shikigami; see Onmyōdō for details

If this makes family gatherings sound dangerous, don't worry. There is almost always reconciliation in the end, and everyone comes out of it learning valuable lessons about life, love and the value of family .

Family Drama is a genre revolving around conflicts between family members. In a more general sense, any work of fiction about the

relationships within a family. The longer, non-funny version of the Dom Com . Expect lots of this in a Big, Screwed-Up Family . On Live-Action TV , it usually comes in Dramatic Hour Long shows. Many Soap Operas overlap with this genre. See also Teen Drama .

All the complex ties of blood and marriag Check that your trope e doesn't belong in one of the subcategories before you add it her e

When several examples of something are being listed in Speculative Fiction , a couple of them will be from our time (or timeline if it's Alternate History), and the final one will be one from the future (or post-divergence Alternate History) The most common variant is to list famous scientists— Newton , Einstein , Johannes Kepler, Werner Heisenberg and Da Vinci being quite popular—followed, finally, by a scientist from the future. Occasionally their inventions are also listed: Newton's mechanics, Einstein's relativity, Zefram Cochrane 's warp drive. The most common inversion is one where the person lists off several fictional figures and then tosses in a real-world one—the implication being that the real-world one is just as silly as the fictional one Usually the trope serves only to remind us that it is, in fact, the future and people haven't stopped thinking and discovering things in between our time and story's setting. It would be odd if there hasn't been any new discoveries or geniuses worth mentioning, especially if the story involves something like Faster-Than-Light Travel . When someone or something we already know is used as such, then the author is just making a point: say, if Hawking is mentioned, that means people of the future in that verse think he is a genius equal to Newton and Einstein, meaning that readers also should prone to Rule of Three — meaning we go far enough into the future to see a new example, but not far enough that those we know currently aren't still on the short list. It is much harder to find an example which doesn't follow a "present, present, future" (or for added symbolism, "past, present, future") scheme. When there is a long list of examples, expect a third of them to be from the future. Particularly when the work is from the 1950s or 1960s, the third future example will often have a East Asian (or less commonly African or Indian) name, indicative of the the idea that these parts of the world would have a bigger part to play in the future in what at the time were still considered mostly European- and American-dominated fields like the sciences A variation occurs when it's alternate reality: say, when someone mentions Alexander , Bonaparte and Stalin as world dominators who failed, it means that in this reality the changing event is somewhere between the mid-18th century and the early 20th century, which made Stalin and not Hitler start World War II A subtrope of Cryptic Background Reference . Sometimes overlaps with Bread, Eggs, Milk, Squick . A form of The Triple

The graphical image equivalent of Fan Fic . Can be anything from parody to portraits, technical drawings to erotic indulgences , to Chibis , to all of the above combined The most common Art Subjects

are from animation (both North American cartoons and anime), since by nature animated characters are designed</ to be easy to draw. People with an interest in visual arts are also more likely to be animation fans than most others As for live action shows, it takes a certain level of artistic sophistication to depict real people with any degree of recognition. That doesn't stop anyone, however, and any visually interesting or unique show is likely to have some fan-made pieces floating around. Most often these are Speculative Fiction shows, since most fan art based on normal</ people is more about the actor or actress than the character. Then again, an entire is dedicated to celebrity likenesses made with the Poser and FaceGen applications In Japan, the majority of Doujinshi are fan art in manga form Of course, there's always Rule 34 And Chibis . Sometimes Chibi Rule 34 Many Web Comics (particularly ones with recurring characters and good quality artwork) have dedicated fan art galleries on their websites, with images ranging from single characters to full-blown guest strips that don't fit in the archive See also Cosplay Fan Art , Rule 63 (for characters drawn as the opposite gender), Side-Story Bonus Art (official art), Self-Fanservice (when canonically unattractive characters look better in the Fan Art)

The term used for obsessive fans of a particular activity that goes a bit too far onto the creepy side. Unlike fangirls (which usually refers to women obsessed with characters and their relationships with either other characters or themselves to the exclusion of the rest of the elements of the canon), the term "fanboy" is usually reserved for antisocial people with a self-inflated ego over their knowledge and/or mastery of the topic in question, often parading it around and belittling those around him. They are to fandoms what "Stop Having Fun" Guys are to tournament rules. Other times, the term is used to describe people who overzealously defend the perceived objective quality of the object of their obsession In Japanese, the term Otaku is synonymous with this, but implies an almost stalker-like attitude as well. The original (very pejorative) meaning got lost when it was adopted by English-language fans of Anime See also Ascended Fanboy , Promoted Fanboy , Fan Dumb , Saw "Star Wars" 27 Times , Straw Fan , Testosterone Brigade , and Running the Asylum

Many fanbases on TV have their own nicknames. Some are generated by themselves, some from observers and some from detractors Be advised when using these terms that by the time the name becomes well known to outsiders, it's often gathered some distaste by those within the fandom. " Trekkie " has reached universal status and even appears in reputable dictionaries, but while it has usage among the Star Trek </ fandom, a Vocal Minority within the fandom prefer usage of the term "Trekker" and only use "Trekkie" derisively. Likewise, " Whovian " comes primarily from US Public Television — it was originated by, and for some time a trademark of, the Doctor Who </ Fan Club of America — and many fans outside the US think it sounds a bit silly, preferring the considerably more baroque but less jargonish "fans of the programme" For video games, if a given game has a Prestigious Player Title for the player character, the fan community nickname may be based on that title. E.g players of Azur Lane </ are called "Commanders" or "Shikikans" This has really picked up with the introduction of The Internet ,

because fans can interact with each other on Fora and such. 4chan and its derivatives have a common template for such terms : Just take the name or premise of the show and add "-fag" after it... (e.g. Sonicfags , Pokéfags or Ponyfags) ... as suffixes attributed to their Fan Dumb A subtrope of Fan Nickname , but not to be confused with it See also Estrogen Brigade and Testosterone Brigade

Or just Convention or Con. This is where fans of a particular franchise, creator or work all meet together, discuss it and ask questions to the stars. A number turn up in costume. Frequently parodied in the case of a Show Within a Show . The fans will often be portrayed as being geeky immature Man Children who are so obsessed with a certain franchise that they seem to be out of touch with reality. Usually they will be seen gawking over rare valuable collector items that they buy to make them part of their unhealthy large collection of junk. They crowd together at Q&A panels to see their favorite stars and ask them the most in(s)ane questions, usually about continuity errors or scenes in the franchise that destroyed their Suspension of Disbelief . Also common is fans rejoicing because the stars said or shouted a meme or a catchphrase , especially if they requested it themselves . Most of the time the unique experience of having several creators or cast members together in one place will be wasted because the fans keep asking questions in which they shoehorn every possible meme, running gag, catchphrase or pop culture reference they can think of and want to show off their extensive knowledge of every issue, record, episode, game and/or film in the franchise. Some Loony Fans take pride in announcing themselves to be "the stars' biggest fan." A crazy fan theory will be uttered to which the stars answer: "No that's not true", leaving the fan disappointed because he believed in it so much. Hardly any questions about the stars' creative process will be asked. Most of the time it just involves In-Universe questions, as if the franchise is a collection of true, historic events. Many audience members have a tendency to make remarks that show off their own lack of imagination, for instance: "Where do you guys get all your ideas?" or "If that character from that franchise fought that particular character from this franchise: who would win?". Also expect one star to get infuriated with some of the fans and tell them to get a life! One particular convention which is frequently featured in Japanese works (or at least a version of it with the name slightly changed) is , a biannual doujinshi fair in Tokyo which is easily the largest fan convention in the world. Truth in Television , unfortunately and sometimes even This Loser Is You . Contrast and compare trade shows for the entertainment industries like the Electronic Entertainment Expo .

Tropes listed in the Wiki Tropes index are being discussed at the Trope Repair Shop . Click the link to join the discussion. Most of what would be called fancruft in The Other Wiki would feel right at home in this</ wiki — we call it "examples" and we like</ it; successfully qualifying for "fancruft" here requires some really high-quality, genuine brand of narrow-minded devotion. Unfortunately, that's of ample supply on the internet. It's one of those things that is hard to define but immediately jumps at you when you see it You know you've encountered fancruft when reading a paragraph, you suddenly get a distinct picture of some very excited person typing in the edit box with fervor, going all "Oooh! My niche! I get to

popularize my niche! My niche my niche mynichemynichemyniche!!!" This takes many forms. Rambling on the All Psychology Is Freudian page about some non-funny, non-relevant in-joke that used to be mildly popular in the Yahoo! Geocities professional yo-yo forum a contributor moderated circa 2001. Two-paragraph long rants on why opinions differ as to whether the invocation of Not Allowed to Grow Up in Pokémon implicitly lends credence to some secret preteen attraction between Ash and Gary . Square Peg, Round Trope . Renegade Entry Pimping . It's seldom good news. Of course, this is all in theory. In practice, one man's expansive and entertaining divergence is another's fancruft, and there's no objective magical way to tell them apart. "I don't care for this" is not, in and of itself, a reason to delete anything; chances are pretty decent that someone else does</ care (at the very least, the person who added it). If you're looking to improve a well-meaning yet out-of-place contribution courtesy some over-eager niche enthusiast, just treat the symptoms and the problem is likely to go away. Trim Walls of Text , cut Conversation in the Main Page , rewrite the example to focus on actual tropes as employed in the actual work as opposed to Audience Reactions . Only delete it as a last resort. When in doubt, err on the side of accepting it as a legitimate, interesting contribution. Ultimately we're all fans, and this wiki is our great big fancruft compendium. For the time being, there's enough server for everyone, so don't push for the sake of pushing.

The word "fan", originally descended from "fanatic", suggests a sense of loyalty to something. Most fans are, for the most part, a fairly resilient breed who will put up with a lot. However, you can only push them so far; if a fan perceives their loyalty to have been abused or betrayed, the disillusionment that follows can be bitter indeed. Whilst some may soldier on, resulting in the formation of various broken and unpleasable fanbases , true fan disillusionment occurs when a fan abandons the show, book, or whatever it was that they lost faith in for good Sometimes, such disillusionment may stem from an overall decline in quality (or a perceived decline, in any case) in the material itself. The show may suffer from one too many mistakes, glaring errors, cullings of the cast , or the show could even be completely withheld , all of which can lead to fans just giving up. There's only so much you can quietly resign to the dustbin of fanon discontinuity before throwing your hands up in exasperation and storming off in a huff Occasionally, however, the reason for a fan's desertion, or loss of enthusiasm, is because they feel that the people who create their favorite show, book, game or songs have let them down in some way. Sometimes this is justified when the person in question is deliberately cruel to their fans, but sometimes this is entirely the fans' fault for crying Ruined FOREVER at every sign of something happening that they don't appreciate or if the personality in question tells the fan that they are being rude Not surprisingly, this phenomenon is depicted frequently in fiction. Either a bitter artist may drop numerous take thats at their fans, or a show may set up a storyline in which a particularly nasty prima donna of a creator ticks off their entire fanbase. Expect either a fan to get pummeled or a creator to get their comeuppance. Either way, the never-ending saga of fans and the people who create for them is prime fodder for drama A Sub-trope of Broken Pedestal . Compare Artist Disillusionment . See also Ruined FOREVER for just how many times fans will claim this is happening in perfectly

healthy franchises

People love a good mystery and will watch or read a story to the very end just to find out its answer. Sometimes though, for whatever reason, they don't like the answer. The fans then decide it would have been better to just leave the Plot Threads hanging, which would have given them mulch for their Epileptic Trees When a show has a premise that hinges on one or more big unanswered questions, fans feel there is an obligation that these questions be answered. Failure to do so leads to The Chris Carter Effect , which can turn off fans in frustration. Likewise, not answering enough</ questions in a Kudzu Plot alienates fans. The hard place to the above rock is that when a series answers a question and the answer isn't quite as epic, clever, or mind-shattering as imagined. Maybe fan expectations are just too high. Maybe the answer is honestly unsatisfying. Maybe the answer conflicts with the genre established earlier in the work, like a sci-fi explanation in a fantasy book or vice-versa . Maybe it reveals that a character that did something seemingly of their own free will was instead subject to Mind Control or brainwashing. Maybe it's a question no one asked or wanted to be answered at all, meaning no</ answer would be satisfying Regardless, the fans hear your explanation, and they don't like it. It's a Fan-Disliked Explanation It should be noted that one factor in whether fans expect a mystery to be resolved or not is how prominent and important it was made originally. Lost </ made such a huge deal about the mystery of "the numbers" that expectations for the solution were raised to an incredible pitch. In the case of Sherlock Holmes 's backstory, though, it is made abundantly clear that it's irrelevant and that no clarification is to be expected When the authors deliberately choose not to solve the mystery, possibly to avoid this trope, that's Riddle for the Ages . If fans outright reject</ a Word of God explanation as non-canonical, that can be an example of Death of the Author It's just like how everybody wants their Ship to go through, but when it does, the result is Shipping Bed Death Whether a show is better served by answering all, some, or none of the questions it raises varies by viewer. It's worth noting that this trope doesn't just focus on answers that are unsatisfying, but situations where an unanswered question actually helped</ the narrative. As you can expect, this is therefore YMMV This sometimes overlaps with Be Careful What You Wish For - when fans prefer all the various explanations rather than the actual answer Compare Canon Fodder and The Unreveal . The exact opposite is Fanon , in which fan theories are widely treated as canon. If the explanation is disliked because it just raises further questions, then it's Voodoo Shark . This can occur when Writer Conflicts With Canon . See also Retroactive Idiot Ball

The Evil Twin of Fanservice from another dimension, possibly with a goatee (especially if female). Fan Disservice looks like regular garden variety Fanservice , except that the creators intentionally use the circumstances around it to make the scene outright creepy , disgusting and/or just plain ridiculous. Corpses in sexy poses, dialogue that adds Mood Dissonance , seeing someone naked who you really</ wouldn't want to see naked... there's a hundred and one ways that titillation can transform into horror. Just think of how many Slasher Movies have Fanservice Extras meet their demise by

way of Death by Sex . Note that it often seems that film schools grind this into their students, as far too many movies intercut sex scenes with scenes of violence or squick , to truly rub in our faces the polarity of beauty and horror. Of course, the directors just want to be artists (that, or they're puritanical types who are obsessed with portraying sex in the most negative light possible). But sometimes it's implemented in a funny way, so the director can just mess with you. Of course, Fan Disservice and Fanservice are not mutually exclusive. As Rule 36 states: If it exists, there's a fetish for it. Therefore, all Fan Disservice is considered Fanservice by somebody</ out there. Also, due to Troper Demographics , there are many</ examples linked elsewhere on the wiki which are listed as disservice solely because they involve naked men</. Male nudity by itself is not</ Fan Disservice; there are</ demographics that male nudity tends to be Fanservice for. Some Drag Queens are often subject to this trope. (See also Unsettling Gender Reveal .) Also, it's pretty important to state that not all</ Fan Disservice is 100% tied into graphic squick. Context can also be vital into separating Fanservice from Fan Disservice; for example you can have a very gorgeous person in diverse states of undress and the visuals are technically pleasant to the eye, but the circumstances</ that led him or her to be like that can come from Break the Cutie , Break the Haughty , a Trauma Conga Line , No Yay , a horrendously Unequal Pairing , Rape as Drama , etc. Therefore, neither the most artistic and perfect drawing style nor the most tasteful angle shots can make this particular scene/shot enjoyable — you're too busy feeling sorry for the protagonist and/or desiring the perpetrator's head on a pike instead. Alternately, the character is an Ax-Crazy psycho launching a bloody Full-Frontal Assault . A gorgeous Mr. / Ms. Fanservice with a particularly cruel personality is simultaneously Fan Disservice. Fan Disservice frequently overlaps with Nightmare Fuel and Nausea Fuel . For the un</intentional version, see Fetish Retardant . This trope can often overlap with Naked People Are Funny — as often as not, naked people are funny precisely because of Fan Disservice. This trope is for sexy things deliberately placed in disturbing contexts that make them intentionally unsexy. Examples that are unintentional</ belong in Fetish Retardant .

In every community for every series, there are common mistakes. Someone could use the wrong spelling of a character's name, or think that the title referred to the main character , or insist on spreading a rumor about the plot until everyone believes it , or pigeon-holing fans into negative stereotypes Sometimes, it goes further than just "dislike", though. Sometimes it crosses into Berserk Button territory, and the reaction is disproportionate rage at the offender Notice: Remember, it's just a show, you should really just relax. Acting out on such relatively minor things will make you look petty at best Subtrope of "Common Knowledge" . Compare Cowboy BeBop at His Computer (when media gets the facts wrong), Discredited Meme , Fandom Heresy , I Am Not Shazam , Refrain from Assuming (when a song title is different from its lyrics), Serious Business , and Broken Base

This Audience Reaction has been subject to some misuse. Fandom-Enraging Misconception is for If you've seen fans get angry

when someone does one of these things, chances are it should be added here. Note that this list isn't exhaustive, so even if it's not in there, it might still count. Just make sure it's not in the list of things that don't count. Assuming a character's name based on the work's title . The following may be confused with objective misconceptions about the work, so please make sure your example does not fall under any of them: Preferring one spelling of a character's name over another when there is</ no official spelling, or the spelling is inconsistent so nobody knows which is the official one The same goes for names without official pronunciations .

Among Fandom there are some topics which, once mentioned, will cause endless, passionate debate over which faction of the Fandom is correct. Then there are some things which it seems like everyone</ in the Fandom agrees on. Of course</ Alan Moore is one of the best comics scribes out there. Of course</ the American adaptation of Coupling </ sucked. And of course</ Garfield </ has been going downhill for years. How could anyone think otherwise? Well, inevitably there are one or two fans who do. Actually voicing these opinions which run contrary to Fandom consensus, however, can entail some risk. You might get some funny looks if you said you preferred the Japanese GoLion </ over the American Voltron Lion Force </. If you say you liked Voltron Vehicle Force</, however, prepare to be treated as a Fandom pariah, along with comments that you're obviously not a real/true</ fan. Essentially, this is the Fandom variant of The Complainer Is Always Wrong . Sometimes, this trope can even extend to fans who hold opinions that are only tenuously related (or, in some case, entirely unrelated</) to the work in question - which run contrary to Fandom consensus. Can exist in the form of "you can't be a true fan of Band X, if you also like Band Y or you don't also like Band Z ". By the extension of the above two paragraphs, in certain circles, the term "true fan" is the fandom equivalent of Godwin's Law . It's like declaring "I believe in X because I'm a 'regular' fan". In other words, if someone plays/invokes the "X because I</ am a true fan " , then they automatically lose the argument. Please note, to count as Fandom Heresy it must be said by someone who is</ part of the Fandom . For example, someone saying " Anime is stupid" or " Discworld </ is boring" doesn't count. However, an anime fan saying, " Hayao Miyazaki sucks" or a Discworld </ fan saying, "Sam Vimes is the lamest character in the series" would definitely count. A very commonplace, fandom-independent example of Fandom Heresy is disliking the main character, or the Ensemble Dark Horse if the main character isn't also the most popular character. Doubly so if you say that said character is a copy of a character from another series. Being a fan of The Scrappy is just as universal an example of Fandom Heresy , for equally obvious reasons. See also Fan Dumb for another way to hit the Berserk Button of certain fandoms. Compare with Broken Base , where the two sides of opinion are more equal rather than one overwhelming majority against a minority "heresy"; as well as Sacred Cow or Unacceptable Targets , in which the "heresy" includes even non fans Not to be confused with Fandom-Enraging Misconception , which is for common factual errors about works that particularly annoy their fans.

The term used for the collective of fans for any given work, person, or other thing, that came together for mutual benefit. Often have different terms for more specific things, but this trope covers them all The term "fandom" can be traced back as far

as 1903. Fanwank has featured a few vintage wanks that show fans have always been as crazy as they are now. This might have existed since the beginning of fiction Compare Fame and Reputation Tropes , Admiration Tropes Contrast Hatedom and Fan Hater Is not the opposite of Fan Sub . Also not related to wiki hosting service Fandom (formerly known as Wikia) Approval of God : The creator praises works done by the fans

Whether it'd be in movies, TV shows, video games, or any other forms of media, there's a fandom for all of them. Though how big a particular fandom is tends to depend on a lot of factors pertaining to the work, franchise, or even creator they each follow. But rarely does anything last forever, let alone works that are able to keep their momentum and relevancy long after they were first created, hence the Fandom Life Cycle trope. The life cycle of a fandom can be roughly subdivided into seven or eight stages: Note that not every fandom passes through every stage; some stick at the early stages forever, and only a select few ever reach Stage 5. And even a Stage 5 work can</ fall from grace due to Executive Meddling , Seasonal Rot , or a variety of other reasons, as some examples on this page can demonstrate. Fandoms can also be at different stages at the same time (e.g. a fandom might be at Stage 5 in the work's home market but Stage 2 elsewhere). And there have been instances of works that are mainstream before fandom gets organised (particularly in the era between the advent of radio and TV and the advent of widespread internet access). Compare Newbie Boom , which rejuvenates new life to the fandom at the cost of risking a Broken Base due to this new wave of fans. If this trope occurs or is mentioned in-universe</, it's Popularity Cycle .

The more accessible the fanbase, the more widespread this trope, so Webcomics are especially prone. Sometimes, the nod canonizes an idea that came from the fanbase originally , or works an Ascended Meme into the dialogue Compare Official Fan-Submitted Content

Two long-running shows or two star actors inspire dueling fandoms. Fans of one are expected to become Fan Haters of the other, and vice versa. The contrasting merits of both will rarely be acknowledged. Anyone who likes both will be accused of Fandom Heresy . This can easily go on despite the creators' Word of God that they kind of like the other show or the actors making friendly appearances together (Tabloid Melodrama aside). Of course there will be those that hate both In some instances, this is the result of a new fandom displacing an older one. For example, Henry Jenkins notes in his book Textual Poachers </ that the emergence of an American Blake's 7 </ fandom was ideally timed to capitalize on institutional conflicts within Doctor Who </ fandom (which shared its focus on a British series) and declining interest in Star Wars </ (which shared its interest in stories about La Résistance). This also happens when one show is perceived by one fandom as a rip-off of their favorite show It is of course, fully possible for die-hard fans of one "rival" show to enjoy another, and being a member of one fandom does not exclude you from being a member of the other. In some cases, this might lead to the rivalry eventually morphing into a case of Friendly Fandoms Often involves Dueling Works . Compare Ship-to-Ship Combat . See

Broken Base for when fandoms have civil wars amongst themselves</. Contrast Friendly Fandoms . Usually features Ultimate Showdown of Ultimate Destiny

Fanfic is rife with tropes and Memetic Mutation . Some plots are so embedded in the collective consciousness of netizens everywhere that no fandom is complete without them, despite general disdain for them— Mr. Seahorse , for example, or Gender Bender —or even their relevance to the source material, such as Aliens Made Them Do It .

As with everything to do with fanfiction, Sturgeon's Law applies Sailor Earth , Obvious Crossover Method , Fuku Fic , Coffee Shop A.U. Fic , and The Ship's Motor are subtropes. Compare Common Crossover , The Stations of the Canon , and Stock Parody Jokes . See also Fanfic Fuel

A Fandom VIP is someone who, while not officially</ associated with the company that produces a given work — say, for the purposes of this article, Star Wars </ — is still widely known in the Star Wars</ fan community, and possibly by the producers of Star Wars</ themselves Maybe they created a fan website that has become the</ source for information on Star Wars</. Maybe they created a Star Wars</ Fanfic or other amateur Derivative Work that is so well-done everyone Regardless, everyone in the fandom now knows their name... or at least their Internet handle This can get a little weird for some VIPs, who often still think of themselves as "just another fan." Some will let it go to their heads (even before they've truly hit the big time), some will freak out, some will just take it in stride It's arguable where the line is between a Fandom VIP and just plain fan is, of course. However, when they're invited to speak at a Star Wars </ convention, or hired by Lucasfilm to continue what they were already doing for free, any doubt that they've become a VIP goes out the window The recognition is great, but remember that Celebrity Is Overrated : VIPs are easy targets, and are often singled out for torment by jealous fans. This may extend to their friends. Thankfully, the anonymity factor helps their life from getting too</ crazy: the vast majority of VIPs today did whatever they became famous for on the Internet while older ones did so through fanzines and mail, so their faces (and/or real names) are often unknown to most, making them indeed just another fan in the real world (even if they're gods on the Net) In other parts of the net, this is known as a Big Name Fan. However, it is not to be confused with a Big Name / Important Person who turns out to be a Fan - otherwise known as One of Us . Can cause them to become a Promoted Fanboy

A good fandom is successful by having a diverse community of people who share a mutual interest in the shared object of the fandom, but nevertheless remain mature and sensible enough to tolerate and respect differences of opinion. Thankfully, most people in fandoms are actually like this (for the most part at least). Then there's

Fan Dumb. Fan Dumb is the underbelly, where Serious Business becomes obsession. The key characteristics of a Fan Dumb tend to be people with an overdeveloped sense of entitlement and/or victimization, and (usually) an underdeveloped sense of humor or perspective about the subject of their fandom, coupled with an obsessive level of interest and (frequently) some rather irrational views on the whole thing. Finally, we can also mix this with the inability to distinguish fact from opinion and/or disagreement from hatred that so many people on the internet seem to be suffering from these days (despite these lessons typically being instilled in kindergarten</). They usually believe that the very fact that they are fans of something somehow entitles them to special or exclusive treatment, or that they are being persecuted by numerous different parties (the creator, the producers, other fans, the world at large, etc.) because of their fandom. They are nearly always people who have completely lost perspective on exactly how important or special the franchise, the fandom and their views on same is in the scheme of things , and don't understand why others don't feel the same as they do . As such, they tend to view even polite or minor disagreement with them and their views as a personal attack, which often leads to them adopting an irrationally combative, defensive tone towards others in response; in discussion, they will usually resort to unrelated ad hominem attacks on others and place value judgments on them</, not their arguments — expect snide comments about race, gender, sexual orientation, age, etc. (the correct response to such insults is to mute/block the offender and go elsewhere). And any jokes made about the subject of the fandom (or them) will be responded to either with out-of-proportion offense (often peppered with plenty of F-bombing) or a humorless deconstruction of why the joke is "inaccurate". Particularly nasty examples may invite others to fight them or insinuate that they are too cowardly to say anything in person, make threats of violence, "doxx" the other party (that is, publish their contact info online without their consent), or (on occasion) actually engage in violent or threatening behavior in person. The end result of all these people believe passionately that they're the champion elites of the fandom, guarding and preserving what makes it special, whilst ultimately contributing little of any actual value to the property or the fandom, even contributing to its ruining in the process. As a general rule of thumb, the phrase (or some variation thereof) being thrown around is often a red flag that you're dealing with Fan Dumb, particularly if it's being self-applied; the subtext (or text), of course, is "I'm a True Fan ™ , and you're not." Although a Fan Dumb often holds idiosyncratic views about the franchise and demonstrates a passionate interest in it, it is important to note that neither controversial views nor intense interest are necessarily an indication of Fan Dumb in and of themselves. Differing viewpoints are inevitable in a large gathering of people (and knee-jerk objection to a differing opinion simply because it's a differing opinion is often a good sign that you belong in Fan Dumb yourself), and most people join fandoms in the first place because</ they're passionate about something and they want to celebrate it with other people who find it special. Many people manage to hold contrary or passionately enthusiastic viewpoints whilst still remaining civil and decent; similarly, many dismissed as Fan Dumb hold views that, on the surface, are actually quite reasonable. The problem with Fan Dumb is not necessarily the level of interest or the viewpoint, but the way it is expressed; even a reasonable argument will sound insane if it's being screamed in someone's face. Taking these fans too seriously

is a mistake. Although they tend to be louder than the rest of the fanbase combined, they are a decided minority in almost every fandom (though they often claim to be a majority). Fan Dumb also tends to suffer from an extreme case of Fan Myopia , regardless of what kind they are; in any variation, they are often intractably convinced that the views of "the fans" (or more accurately, their personal</ views that they've confused with the majority's views) are both more widespread and more mainstream than they are. If you're a producer, pandering to them is usually a good way to make your franchise crash and burn. And to add insult to injury, they usually won't be very grateful that you were thinking about them, but will instead start whining about how you made the franchise crash and burn. See also Single-Issue Wonk . A specific example is Die for Our Ship . Fan Dumb is a number one contributing factor to both Artist Disillusionment and Fan Disillusionment . Although often a minority, the shrill obnoxiousness of this kind of fan has nevertheless permeated enough people's impressions to construct the stereotype of the Straw Fan . Can be confused easily with a Troll , but, as a rule of thumb, bear in mind that a Fan Dumb is NOT a Troll. See also Unpleasable Fanbase and Broken Base for the massive versions of this. Compare with Viewers Are Morons . Contrast with Hate Dumb , although the two have</ been known to spawn one another. Not to be confused with the Web Comic of the same name, the first page of which can be found . Sadly, every fandom has to deal with this and all of its variations, no matter how much they deny it and how much they wish this problem didn't exist. Trust us, these people even annoy the creators of the things that you like as much as they annoy the rest of us. We admit that even TV Tropes </ has its problems with Fan Dumb of its own. Don't worry, Fan Dumb are usually just a Vocal Minority . Keep that in mind if you decide to put this as an example to any media or see this in any media here. Most fans of a thing , including yourself (unless you actually do fit this— and you know if you do), are not complete and utter morons and just want to enjoy it like everyone else. And on the same flip of the coin, everyone</ (yes, including you</) has probably been guilty of at least one Fan Dumb moment at some point in their lives if they're being honest; the key thing is being grown-up enough to be able to recognize, acknowledge, and correct your mistake, then move on rather than getting locked near-permanently into that mindset. As a footnote, to a devoted member of the Hatedom , any</ form of Fandom appears like Fan Dumb. Fan Dumb and Hate Dumb are light and darkness in these regards in that one cannot exist without the other. In fact, the two can often fuel each other, with Hate Dumb causing normally rational fans to become overly defensive and engage in Fan Dumb behavior, while Fan Dumb can transform reasonable critique into a whirlwind of hatred directed at the fandom itself, contributing to Hate Dumb behavior. Please do not put this on a work's main page and sub-pages. The only exception is if it is invoked canonically as a character trait someone has. In that case, mark it as such. </

: This fan is more a fan of a specific character than the franchise, with the series largely being a vehicle to enjoy them. Their attachment to the character could be an actual crush (in which case, expect them to write fanfiction that ships them with an Author Avatar) but it could also just be the concept of a favourite character, taken up to eleven. These people often take this to the extent that they refuse to follow the franchise if/when their favourite character is left out of it . The lack of this character's involvement in the series or characterization going off in another

direction than expected often turns this fan into a more personalized version of the ; in this case, according to the Mad Bride/Groom, the producers are doing what they do because they have a personal vendetta against this character, rather than because they're unable to fit them into the story (there are a few cases where the creator actually hated the character , but "they're unable to fit them into the story" is far more likely). Tellingly, the fans often have a rather idealized, if not distorted, view of the character that they adore. Shippers are heavily associated with these sorts of fans; this can become doubly worrisome if the character they like is involved with another character with whom the fan actually identifies directly, or if they become involved in a Love Triangle . Contrast with (and sometimes rivals to) the Hate Monger . One should ask the Mad Bride/Groom to compare the amount of screentime they want of their crush to the amount the central protagonist already gets (unless their crush is</ the central protagonist, in which case you should point out that any character would quickly become dull in a vacuum), and also point out that the producers would then get numerous other complaints from the Mad Brides/Grooms of all the other characters. For their own sake, it should also be pointed out to them that people who display this degree of affection for real-life people tend to get restraining orders placed upon them. A variant exists in the form of the , who operates under the belief that even the tiniest voice of criticism will reach the ears of the Powers That Be , who will immediately cancel the franchise in the belief that nobody likes it anymore. Ergo, all voices of criticism must be silenced with prejudice in order to keep the franchise on the air. : Fans who seem to believe that the fact that other people are disagreeing with their strongly held opinions is not because they have different but equally strongly held opinions, but because they're just so much smarter than they are that they can't recognize their correctness. The operative term is usually "you just don't get it" (i.e."you're much stupider than I am and thus can't see why this franchise is amazing/dreadful"), couched in as patronizing and condescending a fashion as possible. This variant can also be found engaging in slightly pretentious (and often wildly off-mark) analysis of the franchise. Many times the Toxic Geniuses are often shown as being single-character-interpreters blind to Alternate Character Interpretation , believing that only their</ interpretation of the character is correct. (Seen especially in character-heavy works like books, film, and some video games.) Likewise, they will not allow anyone to view the character any differently . A common trait of the Monomaniac (see below), though not all Ignorance-Bashers are Monomaniacs. Ignorance-Bashers may also be Elitists or Old-Timers if they bash people's ignorance of earlier instalments, or Memeists if they bash people's ignorance of memes, and are especially prone to No True Scotsman type arguments (e.g. "If you haven't seen all the episodes, you can't really</ be a fan!"), never mind the fact that watching all the episodes/reading all the books/whatever can take time, especially if it's a long-running franchise. A fan who feels entitled to special treatment because "I was here first!" Frequently suffers from Nostalgia Filter and They Changed It, Now It Sucks! . </

An extreme version of the Strawstuffer can risk becoming the , a more paranoid and tragic creature. Like the Strawstuffer, the Tinfoil Hatter ignores Creative Differences or apathy to figure out why things occur. However, they instead believe that everything they don't like is evidence that the creators are out to attack them</ personally and deliberately. They see slights and attacks everywhere, and

blame everything on a vitriolic creator who has a personal vendetta against her/him. This extends to intentional deconstructions of their favourite plots and characters, Creator Breakdowns and characters (especially those the fan identifies with) presented as less than ideal or in an unconventional way. Tinfoil Hatters are usually involved in Periphery Demographics and, more tellingly, Misaimed Fandoms .

Fanfic authors with pages on this wiki.

Many times a creative work will leave large gaps in a character's Backstory , or not mention what happened between two instances of seeing a character, or object or place. We might get a bit of explanation, usually a throwaway line that suggests a Noodle Incident , but either way we are left to imagine it ourselves. So, someone else will, of course, do it for us. Many fanfics that don't involve shipping will fill in any gaps, often with wild adventures that one would expect would get more of a mention in the work if they'd happened, but don't . Anything in a work of fiction that leaves inviting gaps can be seen as fanfic fuel. The more outrageous or open for interesting plot developments, the better. Summers between school years in high school dramas are often great sources of , as well as the draw of giving a mysterious character more backstory (which may result in Draco in Leather Pants) or rewriting things from the perspective of someone else whose viewpoint we never saw in canon. May lead to Continuation or Fan Sequel . See Canon Fodder , a subtrope where these scenarios actually get addressed in the work, or the creators at least imply that they intend(ed) to tell these stories themselves at a later point. See also Fandom-Specific Plot , where specific fanfic scenarios become popular among fanfic writers The main series:

If you want something done right, do it yourself . </ Fan Fiction is a form of Alternate or Expanded Universe created by the fans of a work, rather than the work's original creator. Fan Fiction stories, or "Fanfics" as they are often called, are written for any number of reasons, such as: Due to the inexperience of many fanfic writers, fan fiction has gained a reputation for being a source of horrible , horrible </ writing . However there are fanfics out there that are INCREDIBLY good — sometimes arguably being just as good as, if not better than, the original work. Saying "It was like a fanfic episode," though, is not usually a compliment. Fan fiction is often the place where Epileptic Trees are planted and cultivated. Expect many, many, many</ more fics to star the Ensemble Dark Horse than The Hero . Although fanfic exploded along with The Internet , it existed well</ before the Net did. Such luminaries as John Stuart Mill contributed unauthorized, original stories set in a fictional universe. Before medieval French troubadours were shipping Lancelot and Guinevere , the ancient Greeks were writing plays about relationships between characters in The Iliad </. In Plato 's Symposium </ one character complains that a play by Aeschylus got the characterization of Achilles and Patroclus wrong. Namely, that it got the Lover and Beloved dynamic backwards. Not all fanfic is written, though that's the most common form. It can be in any format that can tell a story. In Japan, manga doujinshi </ (amateur "comic books") are a common vehicle; and with the increasing ease of their production on personal computers, Fan Videos (ranging from anime

series, to Star Wars </) have also appeared. The distinction between fanfic and original fiction, as we know it today, is largely created by modern copyright law; much of classical writing is actually "fan fiction" based on older sources. The major distinction between fanfic and a story inspired by another story is that the story a fanfic is based on has one or more "official" versions, usually owned by a company, a creator, or both. Thus, things like </, a piece of biblical apocrypha featuring Angry!Uber! Baby Jesus, or variations on Arthurian Legend where there is no Holy Grail and Lancelot's affair with Guinevere never happens, would not "count" by this definition. No statement on the legality of fanfic, based on works still under copyright, has ever been given in American formal law or in its courts. The two most common arguments for fanfic being legal involve either implied consent — companies and authors have every right to enact a Fanwork Ban as evidenced by FanFiction.Net 's banlist but are mostly tolerant — or fair use — the non-profit, educational and transformative use of the work justifies its existence; see . The first is something of a misunderstanding of how legality works; you would need active permission from the rights holder for fanfics to be legal and silence does not impart permission. The latter is the main argument that sparked the development of the Organization of Transformative Works, a fan labor advocacy site. Authors often have conflicted reactions to fan fiction set in "their" universe, which sometimes leads to the aforementioned Fanwork Ban . J. K. Rowling has largely embraced Harry Potter </ fanfics, albeit with certain limitations, for example, and Tamora Pierce that fan fiction can be a good way to hone one's writing skills. Sir Terry Pratchett acknowledged it exists and was cool about it, pointing out that everything works so long as people are sensible about it.</ He added two caveats: anyone doing Discworld </ fanfics shouldn't even think</ of doing it for money, and authors should take care not to put it where he might see it — since he didn't want to risk being accused of plagiarising his plagiarists (so to speak) for his own future plots, however inadvertently. George R. R. Martin , author of the epic fantasy series A Song of Ice and Fire </, , saying that "creating your own characters is a part of writing." He's even gone so far as to threaten legal action should he become aware of any fan fiction set in the Westeros universe. In contrast, writer/journalist James Bow for supporting fanfics, pointing out that it forms a stepping stone towards</ creating your own characters and setting. As far as media businesses are concerned, reactions have ranged from Archie Comics demanding immediate removal to Paramount taking some of the better Star Trek </ fanfics and having them published in print books. It should probably be noted that several big-name authors are themselves</ writers of fanfics. Both Stephen King and Neil Gaiman have written (for example) stories dealing with Cthulhu, Dracula, and Sherlock Holmes, and label these stories fanfics. Contributors to franchises such as Doctor Who </ such as Paul Cornell have often posted wholly unofficial stories to their blogs and websites, above and beyond their fully licensed scripts and novels. Some franchises — such as Star Trek </ — have actually turned fan fiction into a profit source by creating Tie In Novels . These books are usually penned by young and upcoming authors, often former fanfic writers, and represent an intermediate state between fan fiction and completely original fiction. In the end, more and more media outlets are recognizing that fan fiction and other fan works are a simple fact of life. And as art imitates life, it's now possible to find fake</ fan fiction created as part of a marketing campaign. For example, the 2010 season

of Showtime's United States of Tara </ introduced a new character, an artist who had created and published a comic book character named "Princess Valhalla Hawkwind". As part of the promotional buildup for this, Showtime actually created a complete with fanfic, fan art, and fan video. Some fan fiction becomes well-known enough to influence other fanfics, which themselves influence more fanfics, and so on in a domino effect. This can and does result in the creation and perpetuation of Fanon — when one author comes up with a "cool detail" and others blindly copy it without realizing it was her invention and didn't belong to the official source material. Furthermore, characters can become Flanderized by the feedback loops of fan fiction, sometimes changing dramatically from their original form . Eventually, this accretion of fan-born details and mutations turns into things that " everybody knows " about the series. Those new to or unfamiliar with the original material are frequently confused into believing that it obviously</ must be canon if so many people mention it, even "facts" of the Epileptic Trees variety. This is especially the case with series that have long runs and which gloss over details which are unimportant to the plot but are of interest to the fans and the fan writers. One example is the Harry Potter </ fanfic The Draco Trilogy </, which was apparently so widely read that details such as Blaise Zabini being female and Ginny's name being Virginia were taken to be canon, although they were both refuted by later books . Another example of this is the manga/anime Ranma ½ (including the explanation of Akane's mallet as either a ki attack or as residing in a hyperdimensional pocket , her Flanderization into a "psychobitch", her lethal cooking — rather than being just bad — and the names and fates of the many missing mothers) were never touched on in the actual show but became standardized in Ranma</ fan fiction over the course of approximately a decade. The process was accelerated and exacerbated by the appearance of fan fiction written by people who had never actually seen the show itself and whose only exposure to Ranma</ was other fan fiction. It's not surprising that fans of some shows occasionally pen FAQs solely to reduce the accumulation of fanon in this way. Another problem with fan fiction is sometimes writers don't do their research even when it is very simple. A common occurrence is when an author from a country other than the original work's country of origin writes characters as if they are from their own country. An example is Harry Potter</ where non-British writers (particularly American) make characters act and think like an American would; this also happens vice versa as seen in Fifty Shades of Grey</ . Currently, the largest source of fan fiction on the Net (and probably anywhere else) is the aptly named FanFiction.Net , which as of 2013 offered approximately nine million stories across all but a select few canons (which were banned due to creator request) and an automated system for posting. A newer site called Archive of Our Own is starting to nip at FanFiction.Net 's heels, though, with over 1.7 million stories and less restrictions on what can and cannot be posted. And to top it all off, in mid-2013, Amazon.com joined in the act with its Kindle Worlds program, which allows for the publication and sale (!) of fan fiction from specific 'verses. See also Memetic Mutation and Shipping . For fanfic-specific tropes, see Fanfic Tropes . Of course, the hive mind has a few favorites . There are also a few favorite unfavorites , if that doesn't confuse you too much . Some here have even written a few . Note that since this is intended to be an index of fics with pages, a Red Link will be frowned on and given a very brief (week or two) grace period before being removed by your fellow tropers. Start the page for the fic if you think it should be

in this index. This page is for fan fiction. Other types of fan work belong on the subpages of Fan Works (Fan Film , Fan Vid , Filk Song , and so on). We're working on moving the misplaced works — help Fan Films , Fan Vids , and others get to their correct index!

Fans! Want to write your own fiction set in our ' Verse , but don't want to tread on the toes of canon too much? Fear not, we have just what you need. Here's a kick-ass one-shot character that the creators have no plans on using ever again. As such, feel free to write their continuing adventures! While "Fan Fic Magnet" feels like a vague term that can refer to any</ character that gets a lot of usage in fan works, for our purposes, it refers only to canon characters who are barely used in the official work, but still inspire heaps of fan fics. Since they are barely used in the canon storyline, there is a lot of freedom in what types of plots that can be told with them while still adhering to the source material (and not having to worry about future events invalidating anything). Besides, if the writers don't see the worth in such a cool character, fandom might as well take up the task. Compare with Canon Fodder , O.C. Stand-in , Fanfic Fuel and Fandom-Specific Plot .

Caveat lector! This is a list of recommendations made by Tropers for Fan Fics . Feel free to recommend your favourite fanfics in the indexes posted here, as long as it's in line with the rules: : This means no fanfics with plots based on sexualizing characters under the age of 16. Bear in mind that recommendations are subjective, so if you want to question or discuss any given recommendation you should do so on the appropriate discussion page. If you want people to read the fanfic you're recommending, you should put some effort into writing the description. Sell us the fanfic, but don't inflate it; we're striving for some quality stories here, so if you have difficulties with making it look interesting, maybe it wasn't that good in the first place. In addition, you will notice that the tropers have signed their recommendations. Somebody has to vouch for them, so if a given recommendation isn't backed up by anybody, it will be zapped . After a few samples, you will be able to note the interests of the tropers recommending them, and judge whether you might be also interested in a certain 'fic. Reviews of fics are encouraged, but if you choose to write one, please make it substantive, and give specific details about what you liked/disliked in the fic. If you want to give a fic a thumbs-up without writing a full review, you can add your troper handle to the Recommended by line. A Completed Fic would be nice, but not a requirement. Below is the required format for a recommendation. If you're making a new page, or adding to an existing one, copy that text into the page. Please don't use the old format, those are being gradually converted to this one. Do warn when the fan fiction in question is an Alternate Universe Fic : not everybody likes that. Pairings or changes of a character's sexual orientation are also to be noted — after all, Shipping is Serious Business for many fans.

by Author OR Fic Trope Page, by Author ( )

[[reviews:TitleOfTheFic]] Note: That last bit of gibberish with the square brackets turns into a button linking the fic to its reviews, which is where all opinions about the work go. The recommendations

lists are just for recommendations and the synopses. Since the coding doesn't like punctuation, remember to strip that out before posting the link to the reviews section. If you want to read articles for other fanfics of varying quality, go to Fanfics .

A list of Fanfic Archives. The only requirement to be on this list... well, strictly speaking, to be on this</ list, it has to be a TV Tropes page listing fanfiction archives. But to be on the listed lists, they pretty much just have to exist. Battlestar Galactica (2003) Blake's 7 Buffyverse Civilization Doctor Who Good Omens Halo Harry Potter House Jackie Chan Adventures Katawa Shoujo Lois & Clark Lost My Little Pony: Friendship Is Magic Naruto NCIS Once Upon a Time The Order of the Stick Phineas and Ferb Pokémon Psych Repo! The Genetic Opera Stargate-verse Star Trek Star Wars Super Mario Bros. Team Fortress 2 Tolkien's Legendarium (including The Lord of the Rings) Total Drama Touhou Transformers Warcraft The West Wing The X-Files

This is an index page for Tropes which are typical of Fanfics . Given that fanfiction probably was born only a few minutes after the creation of the first (really good) original story, these are likely among some of the oldest tropes in existence. </ In addition most of the Tropes in original fiction can also appear in fanfiction.

The stereotypical</ fangirl is a girl who loves a story/series for one or more of the male characters. They have existed for longer than you may think: the David Duchovny Estrogen Brigade was a terrifying</ force on The X-Files </' group on Usenet . The term has since widened beyond that stereotype to include girls who are merely fans of something or other It is not always a pejorative term but it can be among people who don't "get" a particular fandom. Most folks today use the term to mean nothing more than a female nerd . Someone describing herself as a fangirl is usually expressing enthusiasm for the subject See Groupie Brigade if they come in swarms. If the fangirl is a fan of a villain, see Monster Fangirl See also Estrogen Brigade , Squee! , and Groupie . Approximately the Distaff Counterpart to Fanboy , though the two types of fan have sufficiently different stereotypes that it would make sense to describe a boy as a fangirl, or vice-versa

A speech impediment that strikes vampires (and other fanged creatures, as well), where their spoken s</'s become th</'s or, more often, sh</ 's. Here's the technical explanation for why it happens: False teeth tend to cause sibilants (s are for the sibilants to become post-alveolar fricatives (sh</), caused by the tongue being forced back by the wider and longer canines</. For example, listen to anything The Master says in Buffy </ season one. When he comments, "Nice dress", he pronounces it "Nishe dresh", not "Nithe dreth". Fang Thpeak can be called to the audiensh'sh attention in two waysh: Can be avoided by the actors just redubbing the offending voices over later (without the problematic prosthetics), but episodic tv shows don't always have the time or the budget for that. The same thing happens to a slightly lesser degree to people who wear upper dentures, and orthodontic retainers. Again, it's the mouthpiece interfering with the position of the tongue. Other consistent mispronunciations include ventriloquists substituting g</ or v</ for b</, and f</ for p</ — it's nearly impossible to pronounce a b</ or p</ sound without noticeable movement of the lips. Related to

Vampire Vords and Sssssnake Talk . Though Joss Whedon uses it, not related to Buffy Speak at all.

To some people, there is only one thing worse than anything they consider horrible — people liking it</ In a nutshell, a Fan Hater is someone who hates the fans of a particular work . Often in a Hatedom , but not always The thing is that to these people, art is Serious Business and they treat their enjoyment of art the way some people take to competitive gaming . If you like anything not up to their standards, they will either mock you, mock that thing in front of your face, or just go on a diatribe about why you shouldn't like that thing. To make matters worse, they will also stereotype fans (e.g., anybody who likes comic books is an obese loser; anyone who likes anime is some annoying, anti-American, over-obsessive wannabe Japan-fetishizing freak; people who like cartoons are pedophilic Man Children ; boys who watch girls' cartoons are gay ; girls who watch boys' cartoons are fake geeks or Yaoi Fangirls ; anyone who likes metal/punk is a wannabe tough guy or a pretentious hipster jackass; people who like rap are wangsters; anyone who watches Professional Wrestling is a redneck-homo and thinks it's 100% real; etc.) and not fitting any of these stereotypes will induce either a No True Scotsman or they'll still find at least one thing they find negative and stereotype the fans of the work with said negative thing. Fan Haters tend to refer to the targets of their hatred as the " Lowest Common Denominator " or "unwashed masses" Note that hating the work in question is not required: there's plenty of Fan Haters who have nothing against the work in question, and are "merely" repulsed by the associated fandom—a common case of the Fan Hater is somebody from a more general fandom finding a subfandom creepy and horrible Be warned some may pretend to be fan haters, but are in fact Trolls , which some find to be worse, depending on who you are A Sub-Trope of Hate Dumb and Opinion Myopia . The inverse is Complaining About People Not Liking the Show Due to past messes, please avoid Take That! statements, flame bait , "This Troper" blurbs, redundancy, and redundancy See our Analysis page for more details

Someone who is really</ into something (or someone). The word's origins are from a shortened form of "fanatic"; "fan" implies the dedication, but doesn't have so many negative implications. (On the other hand, the word "fanatic" originally merely meant "one who is inspired by religious zeal"; given the heights to which some fans take their devotion, that definition is not entirely inaccurate.) One can be a fan of something (or someone) for a multitude of reasons. Perhaps it is incredibly good, and you are in awe of it - or at least consider it one of the good 10% of what's out there. Perhaps you respect it for its historic importance. Perhaps just part of it is good, but it's a part you value. Perhaps it is bad, but in an entertaining or historic way. If a work is to be truly remembered Exty Years from Now , it must</ have fans of some sort. If no one cares enough to watch it, no one will remember it when it's out of print: this can easily lead to Older Than They Think . If a fandom once existed but has died out, Pop-Cultural Osmosis and "Weird Al" Effect are likely to have occurred in the meantime. An active fandom can keep the memory of a work alive after it's gone out of print.

(Just look at the Sailor Moon </ fandom around here.) The plural, genderless form of "fan" is "fen", for when 'Fans' just won't cut it.

Fan myopia is when fans of a work project their opinion and viewpoint of that work onto the general populace. That might be accurate for their circle of fans, but it's very rarely applicable to the rest of the world. To put it another way, it's when a fan fails to understand that not everyone likes the work as much as they do. It's usually a manifestation of embarrassing Fan Boy behaviour, where the fan cannot fathom that other people might not think of the work like they do. There's no room for differing opinions, no room for " casual fans ", and certainly</ no room for non-fans . Sometimes, though, the opposite happens — the fans underestimate</ outside enthusiasm for the work, thinking that they're the only ones who have ever heard of it (and that makes them special</). Either way, it's a self-serving way to think about it — they're part of the fandom, and thus they're cooler and better than everyone else. It can even happen within</ a fandom, where a subset of the fandom projects their views on the work to the fandom as a whole. This often happens when the sub-fandom sees their own subtext in the work and insists on it. Given the things fandoms like to focus on, this usually leads to shipping wars . These kinds of fans cannot fathom the concept of a fan, even a die-hard one, not accepting the idea of Fanon (or indeed, of Shipping). It also creates issues where there is more than one version of the work — e.g.</ a film adaptation , or a foreign translation that's not exact — and a sub-fandom considers their version definitive and is unaware of (or disdainful of) the existence of any other version, even the "original". Fan Myopia is exacerbated by the Internet, which is very good at connecting people with narrow fields of interest and creating an echo chamber — if you can spend all your time talking only to people who think the same way you do, it becomes natural to assume that anyone you might encounter elsewhere will also think this way. Without exposure to competing viewpoints, it becomes difficult to gain a handle on one's own opinions, even if you try. Age is also a factor — people tend to be unfamiliar with works that came before they were born, and they tend to think their favourite works are more groundbreaking and revolutionary than they really are . Naturally, this is not limited to individual works; it can apply to whole genres and media as well There are a lot</ of different ways to get your fill of tropes. A subtrope of Opinion Myopia , the more general phenomenon of a person believing that everyone else shares their opinion about something. See also Fan Dumb , the natural consequence of Fan Myopia, which usually comes from total loss of perspective about the importance of one's favourite work. Fan Myopia can lead to behaviour such as: Believing that their favourite work invented or codified a trope that was already firmly established .

Here at TV Tropes, we're not immune to Fan Myopia, nor do we claim to be. Indeed, much of this wiki could not have come about if it weren't for zealous fans of television and non-television media. However, generalizing from your own experience is usually a bad idea. We ask that Tropers still keep a check on their own biases, as extreme forms of Fan Myopia can lead to bad troping practices that we want to avoid, like: Citing examples of characters or episodes without naming the work, assuming that people will know the work you're referencing. Even if you Pot Hole the reference to the work's page (e.g.</ " Vegeta does this"), that's considered poor form. Always</ write out

the work's name; otherwise, it's Not Self-Explanatory . You might be able to get away with it where the work is named after the character , but you should be clear about that and italicise the title (e.g.</ instead of " Akagi does this", write " Akagi </ does this").

A name given to something, such as a character, by fan communities. It is sometimes possible to read an entire forum about a show and never see a direct reference to the character's scripted name. A natural result if the producers take too long in providing a character with an official name Sometimes fan communities give nicknames to entire groups of characters if the series doesn't already give a name. Anime fans often use [Main Character]- tachi</, meaning "the group associated with [Main Character]." Another option is -gumi</, meaning "[Main Character]'s (metaphorical) troop." These can also be applied in jest to Western fandoms : Harry -tachi, Frodo -gumi, etcetera Note that these aren't specifically limited to characters. Common sets, props, and special effects can also earn nicknames from the fans. Even (parts of) the series itself</ can be referred to with a nickname. Works suffering from Recycled Title syndrome often have a fan nickname to avoid confusion. Also, in series that sequels are numbered , the first is often nicknamed with a Title 1 when it officially doesn't have it See also In-Series Nickname , Red Baron (when the characters do this), Portmanteau Series Nickname (a sub-trope), Portmanteau Couple Name (a Shipping sub-trope) and Lady Mondegreen (a sub-trope). Not to be confused with Fan Community Nicknames , which are names for the communities themselves. Actual canon nicknames used onscreen, however witty, also don't count, unless they were adopted by the producers as a Shout-Out to the fans, or are used far more extensively in the fandom than in- canon . Also compare Canon Name , which is a Fan Nickname applied to a nameless hero who was given that name in adaptations, and I Am Not Shazam , where a character is mistakenly called the name of the work Television Without Pity </ was a fertile breeding ground for Live-Action TV nicknames during its heyday

The Carpet Monster / Feeding The Carpet Monster: Losing small parts that fall off the desk or workbench. Every modeller fears the Carpet Monster.

Shows set in the future will often have many things we have never imagined, but writers can't resist throwing in contemporary references, or at least references the viewers will understand. How do they accomplish this? Have one of the characters be a self-proclaimed expert of the past, e.g. 20th-century Earth. (Or, for newer shows, 21st-century Earth.) A common variation (usually played for comedy) is to have the so-called "expert" be completely wrong about some major aspect of his subject-matter. This works particularly well when the subject is contemporary society, something that everybody living today knows about. Contrast with Disco Dan , except these people know they are not actually in the past. Compare with Born in the Wrong Century , Fantastic Anthropologist .

Fanon ("Fan Canon") Discontinuity is the act of fans mentally writing out certain events in a show's continuity that don't sit well, be it a single episode, a season-spanning arc , an entire season, or even an entire series</. If a plot or ending rubs one

the wrong way severely enough, fandom can just decide that the offending events never happened. On the series level, events may fall under Discontinuity because the show is perceived to suck at that point or decline too far in quality . Events also get "discontinued" for particularly screwing up the characters or setting, and a show that starts to suck will end up screwing things up eventually anyway In effect, Fanon Discontinuity is the opposite of fanon (and not unrelated, either: a great amount of Fanon Discontinuity has resulted from violations of fanon). While extremely negative audience reactions may lead to an offending storyline being officially removed from canonicity in response, Fanon Discontinuity specifically refers to when fans</ disregard a storyline regardless</ of the creators' opinion on it In moviedom, Sequelitis is the most common cause of Fanon Discontinuity. Fans of a popular movie series commonly disavow all sequels beyond a certain point, typically the first or second movie. For example, the unofficial slogan of the Highlander It's a play on the franchise's famous quote of " There Can Be Only One ," in case you're wondering. It is often supported and justified by the fact that the creators of the original had nothing to do with the sequels , so it is essentially not their work Fanon discontinuity can easily occur if the hated storylines are the last ever made and it's easy to pretend that the real ending was in the good ones. If more episodes/installments are made and these are loved and canon-worthy, hated storylines can still become Fanon discontinuity if the hated ones can easily be written out without any loss to the good stories. Discontinuity becomes less likely and more difficult to achieve when the loved storylines keep making references to the previously hated storylines and solidifying them as canonical, even when they do admit that they really sucked Sometimes discontinuity comes from not liking a very specific element while still enjoying everything else. When this happens, you've applied Broad Strokes to Canon . Not to be confused with Negative Continuity Even works liked by fans can be subject to fanon discontinuity if fans prefer to think of it as a standalone work as opposed to part of the continuity, often due to pulling a Happy Ending Override and/or clashing with continuity . Conversely disliked works can avoid fanon discontinuity if fans think it adds something to canon Worth It or it isn't worth the hassle of pretending didn't happen When fans engage in fanon discontinuity by claiming certain events secretly take place in the main character's head, see Delusion Conclusion If the questionable elements are written out of canonicity by the creators themselves , then said elements entered in Canon Discontinuity territory, or, in less severe cases, are given a Discontinuity Nod . It gets ironic when a semi-inversion of this happens when the work is officially removed from continuity, but fans still like it or hate the "real" story meant to replace the old one and still treat it as canonical. If the creator just bashes it, then it's Creator Backlash . If the disliked elements later become more wieldy accepted as canon, be it getting a payoff or fix or other factors causing it to be seen better in retrospect, it's Vindicated by History Compare Fan Wank for when fans come up with rationales to make the disliked stuff better fits their likes. Contrast Fan Disillusionment for when it causes them to stop being fans of the work altogether as opposed to just pretending the disliked stuff didn't happen. See also They Changed It, Now It Sucks! and Let Us Never Speak of This Again Please note that this trope is highly subjective, more based on the fandom rather than the event itself. The visceral response to

fanon discontinuity can baffle other fans who don't see the event as seriously, or even like the event. Just because an event or work has an example on here doesn't mean it's bad or that you're wrong for liking it. And just because a work is heavily disliked by the fanbase, it doesn't mean it should be listed here, because fans can dislike some work but still accept it as canon. This is a neutral catalog of a phenomenon in fandom, not a list of things we think are bad. That also means that you should only post examples where a significant portion of the fandom disregards an event, not just your own personal bugbears. Also, using this as a Pothole is generally rather rude, so please don't do it unless you want to use Canon Discontinuity instead

Official canon is much smaller than the people who throw the term around like to think it is. Canonicity is limited to that which has actually been described in the source material, though if one must stretch the definition, it may also include anything the creators only mention in interviews or supplementary material . But ultimately, canon boils down to what the creators specifically need to worry about conveying to the audience for the purposes of the ongoing plot. In short, canon is what the work clearly says about itself. Fanon, also known by the term "headcanon" , is the set of theories based on that source material which, no matter how much they seem to be the "obvious" or "only" interpretation of canonical fact, are not actually part of the canon. It can arise in a few ways, but mostly boils down to clarifying any vagueness in a story and/or trying to justify an idea held about an element of a work. A piece of fanon can come about to explain holes in the story that the creators of a work may have either deliberately left open in order to have fodder for later stories , or never gave any thought to because it was considered an unimportant side detail. Or it can come into existence as a fact gained from a popular but non-canonical source or a different adaptation of the work. Because many fans mistake their own fanon for actual canon, they tend to get riled up when a new fact is introduced which does not literally contradict anything canonical , but invalidates what were formerly the most obvious assumptions . Many examples of Retcon and Continuity Drift that are imagined to be violations of canon really only explicitly</ contradict fanon. In this way, when someone says "That episode was terrible because it violates the canon!", there is a good chance that it only violates their personal canon. Popular subjects of fanon include character backstories, full names of characters with No Name Given , what characters actually do for a living, and Shipping — a whole other world of its own. Since many creators in the aftermarket series universe are fans, fanon often shows up there, and if those creators in turn start writing for the main continuity , fanon may actually become canonical. Alternatively, you just have Memetic Mutation within the fandom. Then there's instances in which a creator may give a Shrug of God or " Good catch! " when fans come up with theories the creator actually thinks fits in (often saving the creator the time and energy to think of Back Story sometimes.) Remember up above, where we mentioned stretching the definition of canon? Well, if you don't stretch it, fanon can also refer to the body of information provided by otherwise-official sources outside of the main work's continuity. Television and movie scripts are a continuing source of fanon material — Captain James Kirk , for example, has the middle initial ("T.")... but his actual middle name of "Tiberius" was originally revealed in an episode of the Trek</

animated series ; since that show's canonicity is debatable, it was considered "fanon" until featured and explained in the novelisation of the first Star Trek</ movie, which was written by creator Gene Roddenberry and therefore canonical. It was also stated explicitly in the sixth movie. Note that this usage blurs the line between fanon and deuterocanon </ , though. Warning: Fanon and accusations of fanon are a classic Flame Bait , with the accusation commonly leveled by fans who have a different interpretation of the material — even when their theory is just as vulnerable to Schrödinger's Gun . Compare Broad Strokes , where the events of a story are referenced in passing without taking everything said and done as having "officially" happened. If the fanon was repeatedly hinted at by writers until it became fanon, but never actually confirmed in canon, it's Writer-Induced Fanon . See Fandom-Specific Plot and Recurring Fanon Character , when a fan-created Original Character becomes sufficiently popular as to be widely used by other fan creators or even mistaken for canon. See also Fanon Welding , where two unrelated works are speculated to be in the same continuity as each other. Not to be confused with Fanon or Fanon is frequently based on Fanfic Fuel .

In the world of Epileptic Trees , Fanon Welding is what happens when fans see Shared Universes and Stealth Sequels where there are none; a specific breed of fan theory which argues that a particular work somehow secretly shares a universe and/or continuity with another unrelated work, no matter how bizarre the possibility is and regardless of their respective authors' intentions. To support these theories, fans will seek out any supposed link between the works in question as proof that the events and elements appearing in one work were canon to the other all along In other words, it can be considered the act of engaging in unofficial Canon Welding This commonly happens with works that happen to come from the same author, as they often tend to share similarities in style; it is especially guaranteed if they also contain Company Cross References to one another or share some specific Recurring Element despite taking place in entirely different continuities. Another common source of Fanon Welding theories is typecasting , the practice of having an actor play the same character type in works they appear in. As such, expect fan theories about similar characters played by the same actor in multiple works all being one and the same, or somehow related , thus making said works connected to each other. (Though Playing Against Type won't stop fans from believing any</ character played by the same actor is one person, regardless). Other reasons may vary: maybe there is an expy of a particular character, or a character with a Reused Character Design , but the fans think the former is actually that very same character under a different identity, and believe the latter is a pre-established one all along . Or maybe the respective authors of two works happen to be friends, and both are fond of including Easter Eggs as references to each other's work When such theories come to be accepted by the fandom and incorporated into Fanon , expect to see many crossover fics involving the works claimed to be canon to each other. If Word of God confirms the works in question to be indeed related all along , then it's Canon Welding Compare Common Crossover , where the works in question are featured notably often in crossover fics, but aren't necessarily considered to be unoficially canon to one another. Also compare with the Doppelgänger Crossover , a trope where multiple characters

sharing common features, voices, and/or actors are either brought together or revealed to be the same universe somehow

The fandom really loves to pair this character with other characters . Maybe the fandom pairs them with one particular character or ships them with various other characters . The problem is, the character already has</ a canon relationship, and the creator's not</ making those fan pairings canon. As far as fandom content is concerned, however, that canon relationship might as well not even exist Unrelated discussions degenerate into Ship-to-Ship Combat involving them. Fan Art of them embracing passionately is everywhere. Threads dedicated to gushing over their sweet, fluffy, legendary love and scorching hatred of anyone in the way dominate forums. Bits of trivia are cited and Word of God is creatively interpreted to show that they are</ going to happen. The Official Couple they're breaking up gets only three votes in fan support polls, possibly including one vote cast by a very alarmed author. They are a phenomenon shrouded in infamy And still yet, in spite of it all, they are not happening</. Certainly not now, and probably not ever. Whether the story explicitly presents the character in a romance with somebody else , strongly hints that another couple is happening, or Word of God confirms another couple is canon, it's clear that the creator intends for one canon pairing over the popular fanon pairings, even if the latter are way more popular A subreaction of Better Than Canon . Most often the result of a Relationship Writing Fumble , or a Romantic False Lead whom the audience latched onto , but sometimes happens by design or because fandoms just make no sense . Can eventually lead to an Author's Saving Throw or a Writer Revolt The highest aspiration of a Fan-Preferred Couple is to beat the odds and evolve into an Official Couple . This is about the only way the same couple can end up being both</ of these things

Ever hear of a phrase called "The Cutting-Room Floor"? It means that a form of entertainment, whether it be a book, movie or a TV show had an idea that was seldom put into the final cut. This what is know in TV Tropes as What Could Have Been as we see what could have been in a form of media if the creators have decided to keep it in. For movies and television shows, we get to see these instances in something called a Deleted Scene , which is on a DVD of the movie or TV show and for the other forms of media, they're merely talked about...and for some people, they prefer what was cut out to what they received in multiple forms of media You heard right. A lot of viewers actually loved what was cut out, whether it be due to how interesting the discarded material was or that they believed said material would have made the form of media work better. Whatever the case, there are instances where some people believe that What Could Have Been should</ have been Compare to They Wasted a Perfectly Good Plot , which is about any potentially interesting plot point is underdeveloped or not touched upon. This trope can also sometimes crossover with Recurring Fanon Character . Do not confuse the title for Fan-Preferred Couple

Fanservice Extras are rarely characters with actual names. If she receives billing in the credits (many don’t get any billing at all), it will be far down in the end credits, and her character's

"name" will usually be an Exactly What It Says on the Tin kind of description like “ Showering Blonde Cheerleader ” or “Topless Girl in Car” Fanservice Extras are most commonly found in comedies, but also appear frequently in action movies and horror movies. A Fanservice Extra in a Slasher Movie often falls victim to Death by Sex , with a risk of Fan Disservice depending on the level of gore. While this trope exists mostly in "moving" media, Fanservice Extras do appear in manga and comics also. They will usually appear in only one panel and will be drawn to a level of detail not normally seen in the rest of the panel. They can add a " Just Here for Godzilla " aspect to an otherwise forgettable B-Movie , boosting sales and rentals and making the movie Poor Man's Porn or Best Known for the Fanservice The performers who play Fanservice Extras frequently have a background more in modeling than in acting. To illustrate, note how many of the films listed below, particularly from the 1980s and 1990s, use women who have appeared in either Playboy </ or Penthouse</ for these roles. The job usually pays a little more for the nudity or near-nudity required and requires almost no line memorization or acting. Not every person who plays one of these roles is Waiting for a Break ; often they are simply models who have decided that they are young and need the money . As the years pass, some performers will view their role(s) as their Glory Days of back when they had a memorable role in a big movie, while others will consider the job an Old Shame that they don't want to admit to their grandchildren A large number of different Stripping Tropes and Nudity Tropes frequently involve Fanservice Extras. Some of the more commonly used ones include Clothing Damage , Marilyn Maneuver , Naked Freakout , Panty Shot , and Wardrobe Malfunction This trope is Ms. Fanservice without the necessary screen time or character development Compare Lady Not-Appearing-in-This-Game , which is when a fanservice character gets no screen time

The use of sex or sexualized situations to reward or entice viewers. While the specific term "fanservice" arose from the anime community, the concept is far, far older. Most fanservice is seldom explicit or graphic—that is the territory of pornography. Instead, it uses sexuality or hints at sex often in a funny or comedic way to tease and titillate the audience. This is traditionally associated with female characters, but fanservice of male characters isn't uncommon either Some shows may have designated fanservice characters : characters who, even if they are main characters and have a role beyond fanservice, are likely to end up in a fanservicey situation. Some shows have characters for both male and female fanservice Although some fanservice can increase the appeal of a show, too much can become very distracting, and in some cases can put viewers off completely , especially if the fanservice is directed towards people with a sexuality sufficiently different from that of the viewer. However, fanservice can lure in viewers easily . At the other end of the spectrum, Crossing the Line Twice , hard as it may be, can also occur at some point, thus using the fanservice for the advancement of the plot. Negima! </ is a mild example of this, whereas something like Strike Witches definitive example of the phenomenon Fanservice of female characters is often called "cheesecake"; fanservice of male characters is often called "beefcake". Homoerotic fanservice directed at the LGBT Fanbase or Yaoi Fangirls also exists in quite a lot of media. Within the

Visual Kei subgenre of music, for example, "fanservice" and Ho Yay are almost synonymous due to bands being almost Always Male , and an above-usual population of bisexuals early on followed up by the recognition of the Yaoi Fangirl as one of the primary audiences "Fanservice" is also sometimes used in a more general way, referring simply to any crowd-pleaser thrown in just because. When this is something non-sexual, like needlessly flashy attacks in a Humongous Mecha show, long guitar/bass/drum solos in a concert, or throwing in lots of obscure continuity references in a long-running work, it's Pandering to the Base . Sexy fanservice is considered the default form, because it is the one everybody seems to remember , and the easiest to add to any kind of show A Sub-Trope of Sex Sells See also Nudity Tropes , Partial Nudity Tropes For its Lighter and Softer counterpart, see Rule of Cute Not to be confused with Fan Flattering

A term used for the jargon that fans use. In one sense, this entire wiki is a fanspeak glossary, but that is a little too big a

lump for even the most determined lumper Large enough franchises often develop fanspeak unique to fans of that franchise, which is sometimes Not Self-Explanatory to outsiders but is just as often a particular choice of words in the manner of a Stock Phrase . Most people aren't just fans of one franchise, so the latter often spill over into other franchises and occasionally language at large. Many of these are Trope Namers , but almost all are some form of Memetic Mutation and examples thereof can go there; explain the origin and use of the term in the Explanation labelnote Some of the terms we use are unique to this wiki. Other terms you're going to find all over the internet, either because we borrowed the term everyone was already using or because our neologism for something caught on. At any rate, we're not interested in playing Google Trends and deciding what's "in" and what's "out" . On the other hand, beware of Fan Myopia Most fanspeak is about expressing opinions, so if you came here looking for it, head off to Audience Reactions and you're bound to find a few old favorites and maybe some new favorites Fan Nickname , Anime Fanspeak and Roleplaying Game Terms have their own indexes This page used to be an index, but all of the things on it have been moved to Audience Reactions , YMMV , or listed as a trope on one of the trope indexes Not to be confused with Breathe on the Fan

A specific type of Audience Reaction . For every Unnecessary Makeover , you're bound to find the opposite. This is the case where a character in-universe (usually female) gets some kind of makeover. Her friends are horrified that she would change at all and treat said makeover as something awful or else spend a good time talking about how much better she looked before. Normally, because Status Quo Is God , the makeover will be gone and the character will be back to normal, though sometimes the friends may learn An Aesop that the friend dresses for herself and not to please them. However, Fans Prefer the New Her (or him). Perhaps if it's an Evil Makeover , then it might result from Evil Is Sexy ? The scruffy guy might look good in a business suit, a Tomboy might suit the Girliness Upgrade , you get the picture This is not just 'character gets a makeover that the fans approve of'. In-universe, it has to be disliked by the other characters or the character themselves while still having the fans' approval See also Unnecessary Makeover , Beautiful All Along , and Just the Way You Are , which is what this trope is trying</ to be. Closely related is Critical Backlash - and this is the fans having that to the character's appearance

A Fan Sub is a fan-produced subtitled version of a foreign-language program not yet officially available in the fans' nation of residence. Often of surprisingly high quality considering that they are usually produced and distributed within days of an episode reaching the air. The clarity of the Laserdisc format, which was the most popular video format in Japan, also helped fansubbers create high-quality tapes, along with the Commodore Amiga 's ability to genlock, or synchronize video timing signals, making it easy to overlay text on the video image on low-cost equipment. Most commonly found for Anime , Japanese "dorama" (soap operas) and to a lesser extent Toku - although certain sites allow people to publish subtitles translating works from any country/language to another language. In the early days of anime fandom, fansubs

were a major investment of time and energy for a fan or group of fans, requiring multiple VCRs, special titling equipment and a willingness to do a lot of tape duplication and mailing. The shift to DVD format plus the advent of sophisticated video editing tools for the PC has all but killed the videotaped fansub distributed by mail, replacing it with the "digisub" distributed as a video file on the Net via BitTorrent or other file transfer protocols. Digital subtitles have also split into "hardsubs" which are a permanent part of a video being distributed and "softsubs", text files containing the subtitles, the latter typically published separately (with the audience expected to find their own copy of the work being subtitled). Strictly speaking, fansubs infringe on the intellectual property rights of copyright owners and their license-holders. The justification is largely that they are providing a product simply not available in a country commercially. The official position among most fansubbers is that the production and distribution of a fansub should stop when a licensed version is announced. Often though, this is after the series is completed and the fansub itself spread across the net. Some fansubbers sometimes refuse to drop licensed programs, particularly when those programs are both very popular and long running. It should be noted that licensed or unlicensed status does not alter the actual legality. In the past, Japanese copyright owners almost never got involved with Western fansubbers, probably due to the time and expense required. However, they are beginning to do so. Some import companies are also willing to overlook fansubs, while others issue cease and desist letters as soon as the deals are signed. Enforcement of copyright is largely left up to the holders to ensure, leaving the decision in the hands of the particular companies involved. In fact, there's an odd sort of symbiosis between the fansubbers and the importers. Fansubs can be used to gauge interest in potential licences — a fansubbed series with a major following in the United States is usually an excellent candidate for official licensing and thus potentially a very profitable property. For their part, the fansubbers will encourage fans to buy the official versions. The system appears to work well for both sides; series like Rozen Maiden </, Simoun </ and AIR </ would certainly not have been licensed without the success of the fansubs. It used to be said in anime fandom that fansubbers categorically produce better product than the import companies, particularly in regards to the accuracy of translation. The claim is justified by the statement that the fansubbers are doing it out of love of the show, not for profit. In fact, the quality of fansubs can vary wildly</. Some fansubs really are as good as a professional translation. A few are arguably better, offering more features including things like "karaoke lyric" subtitles and cultural reference footnoting. However, some fansubs are bad beyond belief . Additionally, many of the "extra features" and technical tricks used in fansubbing can result in subtitles that emphasize aesthetics over readability. Common problems associated with fansubs include translations trying to be "more interesting/mature" and name confusion between different translations. These can come from parts of Japanese without easy equivalents, or misheard audio. Almost always fansubs will also retain signs of the original, usually Japanese, grammar and linguistic peculiarities. (A character will say "Your opponent today ... is me!" instead of something that would sound more natural in a translation, e.g. "Come on ... let's fight!") To be sure, some fansubbers exaggerate their effect on the anime community. An example is that the sales of the Naruto </ manga only went through the roof after its appearance on Cartoon Network . And

One Piece </ — another popular Shonen Jump </ manga that is considered one of the "big three", outselling nearly every other series in Japan — is not even in the top ten best-selling manga in the US, being surpassed by shoujo-esque titles such as Loveless </ and Fruits Basket </. Furthermore, many of the niche titles that were popular as fansubs bombed dramatically when actually released, and Geneon in particular was a victim of licensing far too many of these series and overestimating the actual market for them. In fact, of the top-selling anime in the U.S., only major series like Naruto </ and Bleach </ have been heavily fansubbed. On the other hand, Naruto</ had upwards of 50 different fansub groups all releasing competing translations of the same show prior to being licensed, so there's plenty of evidence for a healthy debate. Recently, fansubs have become the largest discussion in the anime community. This started around early 2008 when the anime industry began a major recession, with sales going down 20% in 2007 and significantly less anime being licensed year after year. This issue came to the forefront when Geneon , one of the largest and oldest anime import companies in North America, went belly-up. This was not helped by trolls on both sides, nor by the larger issue of piracy in general. "Ethical" fansubbing has also been adversely affected by a growing trend wherein American media companies offer financing to anime productions in exchange for prearranged North American distribution contracts. When such licenses don't result in all-but-simultaneous releases on both sides of the Pacific, they prevent subbers who respect licensing arrangements — still the majority — from making available those shows during the years it might take them to reach America through official channels. In an attempt to curb fansubbing, some Japanese companies have recently begun streaming their shows on the Net almost simultaneously with their local release — in particular, One Piece</ is streamed (or "simulcast") in English only an hour after the Japanese see it by Funimation . Of course, due to the streaming rights being region-specific , America gets the largest amounts of streams, though Crunchyroll does have streams with large amounts of regions as well. And to some extent, simulcasting hasLet's take the anime of Fate/stay night However, in the last couple years, fansubbing has seen a resurgence due to the recent popularity of Virtual Youtubers . Usually, streams are either only subtitled in small clips after the fact, or, more often, not at all . Subtitled clips of notable moments from said streams will often be posted by fansubbers, or clippers sometimes as short as one or two hours after the stream ends. This has led to a mini-community of clippers, with some developing fandoms separate from those that they clip. about the subject. See also Scanlations for the manga version and Fan Translation for the video game version. Is not the opposite of fandom The Stealth Pun is about dom/sub labels. .

One of the greatest strengths of Sci-Fi and Fantasy is that they can convey real-life situations in a new context by showing everyday problems, humanity's greatest challenges, and even social commentary that's ostensibly free of the prejudices and preconceptions that weigh them down in Real Life , giving us a more detached view of a given problem... as if we were aliens visiting Earth , or rather Earthlings visiting World of Weirdness . However, the Aesops delivered via unicorn or rocket ship sometimes get lost or break . In the course of presenting the story, the Aesop either gets shoehorned to fit into that world or is arbitrarily discarded. The problem isn't

that we can't relate to it. We usually can , because the metaphor is so obvious . The problem is that the deck is stacked, causing one of two problems: These tend to crop up fairly often in a few common flavors: Resurrection Rum and Raisin</, Time Travel Lemon Twist</, Robot Raspberry Revolution</, Mango Magic Mishaps</, Eternal Life By Chocolate</, Superpower Sour Grapes</, Vampire Blood vs. Holy Water Swirl</, and Definitely Divine Ambrosia Delight.</ Resurrection : Many of these are a repetition of the old Science Is Bad saw — we can't do it right now and, since our society is the baseline, if we later learn to do it, that would be strange and different and thus bad . Something does not become a Fantastic Aesop simply because it falls apart when interpreted literally; many works introduce or advocate aesops indirectly through allegory, allusion, or symbolism Compare and contrast Space Whale Aesop , which is when realistic actions cause</ fantastic consequences. When this trope is invoked intentionally and Played for Laughs , it's also a Spoof Aesop .

In fictional media, authors tend to avoid certain issues because they are considered too dark; these issues are very hard to justify without Unfortunate Implications or creating a Moral Dilemma . In fantasy, angst can be caused by means impossible in Real Life . This is often used to avoid Unfortunate Implications or make the show Darker and Edgier ; it can also be used to make a work more acceptable to Moral Guardians . Typically, the focus is on the suffering rather than the cause; for audience members, this makes the character sympathetic by showing that their life isn't perfect, and while the cause of their angst may be very different from the audience members' own situations, the emotion generated is similar to all - too - common Real Life situations. While Supernatural Angst is about a character feeling angst due to something that is entirely fantastical, Fantastic Angst is about angst over an issue that does occur in Real Life , but the issue is caused by a fantastical event For example: A child suffers Parental Abandonment (a Real Life issue) because his parents Ascend to a Higher Plane of Existence (fantastic cause). Because the cause does not exist in Real Life , the moral ambiguity associated with Real Life Parental Abandonment is removed, without removing the tendency of anyone who has suffered Parental Abandonment to see themselves as the child. Subtropes include: This trait is commonly given to an Escapist Character . Sister trope of Does This Remind You of Anything? , Supernatural Angst .

Astonishing as it may seem, not all non- Muggle characters are on a crusade to murder us Muggles . In fact, their motivations will turn out to be surprisingly mundane — they want to see how us crazy Muggles operate. I mean, how do we keep from getting cold without any fur? Where does our food come from if we don't have access to Functional Magic ? And how do we... you know.. This usually non-malicious character type has one primary function in a story— comedy . Because it's hard to beat the humor of someone who doesn't understand human customs trying to make any sort of sense out of them. The Fantastic Anthropologist very rarely has long-term story implications due to their job in large part because part of their job is to keep the Muggles in the dark about what's going on In terms of narrative, the Fantastic Anthropologist's culture can sometimes be a satire of our own. After all, as wacky as this guy may seem, when it gets right down to it we're not so different Depending on the point of view of the story can often come off as Captain Oblivious . Frequently an

Amusing Alien character. Compare Fantastic Science , Crazy Cultural Comparison , Intrigued by Humanity , The Xenophile . A subtrope of The Watcher

So you have some Half Human Hybrids ? What about Beast Men ? Rubber-Forehead Aliens ? Cute Monster Girls ? Well, be careful. If a character has some form of non-human anatomy (ears, wings, especially</ tails), chances are that said physical feature will be… sensitive. Even characters who look mostly human may have erogenous zones in odd areas to establish that they have Bizarre Alien Biology or Bizarre Alien Reproduction . For obvious reasons, this leads to a lot of I Didn't Mean to Turn You On type incidents, especially when one party is unaware that the resident Cat Person gets aroused when someone strokes their tail. It can also be used in some cases of Boldly Coming where the attractive alien doesn't have comparable human-like genitalia , but does have a type of erogenous zone on them, allowing for a type of human/alien coupling nonetheless For obvious reasons , this leads to a lot of Power Perversion Potential when said characters show up in fanfic, and if a character does not possess any known Fantastic Arousal the fans may create one Compare and contrast Something Else Also Rises , where this is more of an innuendo for the, er, traditional forms of arousal Contrast Strangely Arousing , where the inexplicable incident leads to arousal on the observer's part, though there could be some overlap if the aroused believes that ordinary humans have similar erogenous zones to them. Not to be confused with a character having a strange sexual fetish

In real life, social inequality and social stratification can be problems. However, in science fiction, things are often a lot worse. Extreme Speculative Stratification is what happens. This type of fictionalized society generally consists of some measure of central planning by elites, with all of the "dirty work" being done by workers. Expect for the latter to be thought of as a different culture, and in some cases may even be a different species Rest assured that if this system is particularly oppressive, the heroes are not about to let this lie without trying to reform the system by convincing the rulers to change things. Or, if necessary, instigating or at least supporting a lower caste revolution India's caste system is a popular provider for ample analogies. This trope might also owe a debt to both Plato , whose utopia in The Republic </ was highly socially stratified, as well as Karl Marx, in his conception of the relationship between bourgeoisie and proletariat. The feudal "three estates" system of warrior, cleric, and laborer is another common inspiration. Might also have Color-Coded Castes . When a fantasy or alien race has specialized castes with physical dimorphism, as with worker and queen ants or bees, that's Hive Caste System . Compare with Extreme Speculative Stratification , Fantastic Racism , and Urban Segregation , which have some overlap with this trope. Settings where the political system is based on alternative ruling methods like Magocracy or Theocracy will inevitably have one of these systems to systematically organize what happens to everyone who doesn't have the traits desired of typical citizens. See also Divided States of America , which similarly extrapolates on a real-world situation. Compare Hive Caste System , which adds a heap more fantasy. For caste systems and the like in Real Life , see Type Caste regarding varna</ and

jati</ in India , and Knight Fever regarding hereditary peerage and the associated noble titles (along with non-hereditary titles) in Britain

The Catholic Church has existed for close to two thousand years , and nothing steeped in that much history, mystery, and power is ever left alone when it comes to storytelling. It's way too juicy a target not to take advantage of Enter Fantastic Catholicism, wherein creators spice up The Church with fantastic elements, making it out to be the coolest, most badass organization around. Most typical of Fantasy , Science Fiction and Alternate History , this trope applies the Rule of Cool to that fusty old Catholic Church, coming out with a Holy Grail full of awesome. See also Christianity Is Catholic for when it's not explicitly</ stated to be Catholic, but uses elements unique to Catholicism anyways. Compare Crystal Dragon Jesus , where a fantasy universe features a religion with superficially Christian (usually Catholic) trappings. Supertrope to Anime Catholicism

The Church Fights the Supernatural! The Church Uses Magic! The Church Has a Direct-Line to Jesus! The Church Has an Ancient Secret! The Church Is Full of Badasses! The Church Rules the World! The Church Is Technologically Advanced! Compare Anime Catholicism , which is also Catholicism meets Rule of Cool but has Japanese media tropes mixed in. Unlike Anime Catholicism , Fantastic Catholicism is usually more accurate, at least as far as religious beliefs are concerned if not elsewhere (unlike the Japanese , most Western writers at the very least grew up immersed in a culture where Christianity was the dominant faith , and many are themselves Catholics), and less exoticized, with the main characters often in their thirties and older with less emphasis on them being good-looking. Fantastic Catholicism may also be mixed with social commentary on the church, while Anime Catholicism almost never is. So please, unless they explicitly contradict the Anime Catholicism trope. It's a separate trope for a reason: it has an expanded set of qualifications which are very common to anime but very uncommon to Western works.

A Sitcom whose premise includes at least one Fantasy or Science s Fiction element, often an Amusing Alien . These were especially s popular in The '60s , as writers and networks cast about for novels alternatives to the more conventional Dom Coms of the preceding s year See also: Comic Fantasy , Magic Realism , Mundane Fantastic s , Urban Fantasy , and Monster Roommate . Not to be confused with s a comedy that just happens to be very good. See Supernatural Soap s Opera for a serious action and drama filled version that focuses s more on the supernatural world instead of trivial everyday thing s

If you need an addictive or psychedelic substance for a storyline, there's always one old standby: make one up. This meshes perfectly with Speculative Fiction , but would seem completely out of place in a realistic series. After all, the planet "Yalic 4" might not have the same plants or minerals etc. that a fictional analogue of Earth would. Alternatively, if it's a comedy, you could get away with I Can't Believe It's Not Heroin! instead. Otherwise you can resort to the potentially narmy G-Rated Drug Aside from a writer's hesitancy to show a beloved character using drugs, Media Watchdogs

often cracked down on any</ depiction of drugs (even if they were negative) for many years. Lately it's been reduced to "heavily sanctioned" at best, creating the unfortunate irony that incorrect portrayal of the effect of drugs has made audiences more liable to dismiss the true effects of drugs as propaganda In Real Life , these are known as "designer drugs", for people who want to get high without using technically illegal street drugs Often can be the Spice of Life . Compare Super Serum , Undiscriminating Addict . Not to be confused (usually) with Psycho Serum . Addictive Magic is closely related, as is A.I. Getting High . Compare Alien Catnip when a mundane substance proves a drug to aliens

In the real world, people like to read fantastical stories about wizards and dwarfs and play games about dragons in dungeons . Which raises the question: what do wizards and dwarfs and dragons do on their down time? One possible answer is that they enjoy fantastical stories, or play Magic Ampersand games, about people like us, who visit "shopping malls" and do things with a mystical force known as "science". Related tropes include Faeries Don't Believe in Humans, Either (fantastic beings consider humans to be fantastic beings) and Double-Blind What-If (sf writers in alternate histories try to imagine what our history is like).

When it comes to Worldbuilding , writers often want to populate their world with a fantastic fauna different from our own. However, at the same time they want this fauna to be somewhat believable and/or familiar to the viewers. One way to achieve this is to make some of the fantasy species the exact counterparts of a real-world animal. Thus, we end up with things like giant insects flocking like pigeons, giant reptiles hunting in packs and howling like wolves, or tentacled creatures swinging from trees like monkeys. In a sense, each species acts like an Expy or a Suspiciously Similar Substitute of a different species The trope has two main variants. In one version, a number of fantasy/alien/prehistoric species are presented as counterparts to mundane, modern species. In the other version, the animals are mundane species, but clearly fill the role of other</, more familiar species — for example, an underwater setting where fish and other sea creatures act like mammals and birds, a Mouse World where insects and other invertebrates are counterparts to larger animals, or a World of Mammals where there are other classes of animals replacing non-sapient mammals. A World of Funny Animals setting can use this trope to avoid Furry Confusion — if certain species are anthropomorphised, their original niche is filled in by a different species To qualify for this trope, it is not a requirement for every</ species in the setting to have a real-world counterpart. For example, the setting can have giant monsters or magical beasts which, naturally, don't have any real-life equivalent. Regular, mundane animals can also appear in the setting (even if they might have different names). As long as there is at least one species that plays the role of an obviously different real-life species, it counts - but of course, the more such species there are, the better. If the only fantastic species like this is the counterpart to a dog or a horse , add the example to the respective subtropes instead This phenomenon, to an extent, exists in Real Life and is called convergent evolution. It's a well-recorded phenomenon that in different parts of the world and/or in different time

periods, species largely unrelated to each other but filling the same ecological role (niche) will evolve similar anatomical and behavioral traits, in response to similar pressures. However, these similarities will usually be superficial. But fiction likes to exaggerate this, with the fantastic species acting virtually identical to their real-world counterpart. They might even have surprisingly mundane names Common in fantasy and science fiction as well as in Speculative Biology . Specific variants include All Animals Are Dogs , All Flyers Are Birds , Seahorse Steed , and Horse of a Different Color . When these are counterparts to pest animals specifically, this will likely overlap with Fantastic Vermin . If the animals are even named</ after their real-world counterparts, that's Call a Smeerp a "Rabbit" . Compare Animalistic Abomination , where an Eldritch Abomination shows resemblance to a mundane animal; Call a Rabbit a "Smeerp" , where the fantastic species is identical to the mundane species apart from its name and small cosmetic differences; and Informed Species , when an animal is intended to be a mundane species but doesn't look much like it. More often than not, these will be Mix-and-Match Critters . Might be subject to Binomium ridiculus if the writer wants to be scientific about it . Also compare Fantasy Counterpart Culture and Fantasy Counterpart Religion , where fictional cultures and religions replace real-life ones in a similar manner

Martial arts styles that are given a name and/or described in a work of fiction but do not exist in real life. They often involve unrealistic or dangerous-in-real-life moves . Moreover, it will often involve some kind of superpower, possibly Charles Atlas Superpower . Many will be some kind of variant of real-life martial arts See also I Know Kung-Faux and Supernatural Martial Arts

In real life, plants are important in nature. They provide oxygen, pollen for bees, food for herbivores and they make your garden look nice In fiction, however, things can get much more diverse and much, much stranger. Fantasy and sci-fi writers like to create their own unique plants with bizarre appearances and properties. Some may be carnivorous , fast-growing , explosive , springy , fiery , or even sentient You get the idea. They're very</ strange plants. They may be magic or found on alien planets or in other dimensions. If someone can control these things watch out In some cases, they don't have to be any particularly wild properties, and are more or less just analogues for real plants or fruit, but they're still called something fantastic . If unusual-looking plants or plant analogues make up a large portion of the background flora, this can overlap with Alien Landmass And yes, while they aren't technically plants, fungi are included here too

Some fiction will introduce similar or strange fruits and vegetables, often the object of a search and/or an important ingredient in something . They tend to have odd abilities, and properties that don't occur in real life It should be noted that there are a fair number of real fruits and vegetables that can qualify as very strange, unusual, and exotic. (For example: the Durian, the Buddha's Hand, or the Miracle Fruit.) But of course, they have a slim chance of showing up in fiction due to Small Reference Pools , so you get fictional ones instead See also Magic

Mushroom , Healing Herb , Multipurpose Monocultured Crop

Ghettoes are very much a case of Truth in Television : the term "(bor)ghetto</," Italian for, more or less, "little town," originally referred to the district in City-State Venice where the Jews were supposed to live. Ironically, it has been asserted that the original Jewish ghettos</ were privileges, designed to protect Jews from unfriendly Gentile citizens, provided by the local rulers, including walls and locked gates which were bitterly resented by the locals . Like all well-meaning attempts at segregation, the "special treatment" not only turned out to be not so special, but increased division and tension between communities. Especially since the ghettos were often poorly maintained and serviced, despite the frequent promises to the contrary. Additionally their separation from the rest of the city often made doing business difficult for those who lived there, meaning that the community within the ghetto would become poorer over time. When American segregation was being litigated, testimony from the Middle Ages was actually used in court to prove that the claim of "separate but equal" was an impossibility As a form of racial segregation, whether deliberate or emergent, ghettos still exist to this day. Usually because of a practice often called "redlining" where economic and social factors are used to keep people from buying houses in a certain area. This can even include rerouting streets or subway lines to discourage traffic to a particular area. Therefore the topic is usually approached with caution in fiction, usually from the Fantastic Racism angle. However, it can also be implied by the Unfortunate Implications of having different races live in different areas (say, all the elves living in a hidden woodland glade) with little or no mixing. It is important to note however that not all uses of the Hidden Elf Village trope imply racial segregation: many settings that use this trope also include at least the occasional intermarriage between the "elves" and humans after all. It rather depends on whom the "elves" are trying to hide from, and whether they have a good reason for it Not to be confused with Sci Fi Ghetto , or the related term " Fantasy Ghetto," where the genre</ gets this treatment by the literary establishment

Interestingly, the word "ser" is a very common stock fantastic honorific, often gender-neutral, enough to deserve its own folder. (In real life, "Ser" is actually an archaic Italian title, a contraction of signore</, meaning "sir"/"Mr."/"[my] lord"—you often see it in translations of old Italian literature, like The Divine Comedy </ and The Decameron .) See also Hold Your Hippogriffs . Closely related to Fantastic Rank System , and not to be confused with Red Baron (for one-off earned titles). Compare Fantastic Naming Convention and Fictional Greetings and Farewells .

Literature Video Games

Adventures of the Galaxy Rangers </ fandom came up with "Dal" as a prefix meaning "student of" for the Xanadausians. So, a Fanon name for Niko, Niko Dal'Ariel, merely means "Niko, Student of Ariel"

The Vahnatai in Avernum </ have a series of honorifics for various

members of their communities; the three most common in-game are -Tel (for government officials), -Ihrno (for high-ranking mages and similarly powerful community members), and -Bok (a posthumous honorific; the Crystal Souls you meet all bear -Bok suffixes to their names).

In a world where Death Is Cheap and magic can alter reality , legal proceedings can be knocked for a loop. A necromancer , instead of raising a Cavalry of the Dead , might find legitimate work as a consultant dealing with probate cases or solving murders. Maybe the Jedi Mind Trick or magical illusions can be used for Jury and Witness Tampering . Can The Nth Doctor be held liable for crimes committed by their previous incarnations? Does resurrection invalidate a conviction and death sentence, and do resurrectees have the right to reclaim property inherited or salvaged from them? And if your marriage is considered dissolved when you die, but you're brought back to life, are you still married to your spouse, or do you have to do the wedding and the paperwork all over again? How do age-of-consent laws (and other laws meant to protect minors) work if you're Really 700 Years Old ? Are space colonies really</ colonies (and if so, do they belong to nations or to Earth in general?), or are they (or could they be) sovereign nations unto themselves? Supertrope to: Sister Trope to Fantastic Religious Weirdness , where religions and religious practices interact oddly with Speculative Fiction elements. See also Undead Tax Exemption , where such problems are handwaved away.

Grrl Power </ :

In speculative fiction, especially low-tech and high-magic fantasy settings, you can't expect to see much use of regular flashlights to use in dark areas, so there are either Hollywood Torches or the Fantastic Light Source to use. Common variants include glowing gems , lighting bugs and luminescent flora and fungus , while Mundane Utility may be derived from the fact that Power Glows or from fire , electricity , or light-based Elemental Powers . Either way, it's almost always guaranteed to last indefinitely See Hollywood Darkness , for when no explanation is given for all the light and visibility on the scene

In some cases, especially Science Fiction or Sufficiently Analyzed Magic , units will have to be invented where they do not exist in normal speech. Magical energy is likely to have some unit. Particularly well developed settings may even specify what the unit is; for example, one Merlin might be defined as the magical energy required to push a specific object a specific distance Compare Hiroshima as a Unit of Measure , where a unit is scaled to a specific object. See Microts for units relating to time and Alternative Calendar for different ways of arranging time units Note: This article does not necessarily deal with exceptionally good measurement systems , though a fictional measurement system that's well-defined and easy to understand would be pretty fantastic Adobe Flash uses twips internally. It's short for twentieths of a pixel The force of the final Climax move in Bayonetta </ is measured in "Infinitons" (most other moves are measured in "Megatons" and "Gigatons"). Serial Escalation indeed, and possible Fridge Brilliance since the idea of different values of infinity is a real concept in mathematics. Or, y'know it just

sounds cool

In real life , many cultures have unique ways of naming their children, based on family, clan, so on and so forth. It should come as no surprise, then, that writers often come up with unique naming conventions for their fictional cultures The simplest way of introducing a bit of foreign spice is to simply swap the placement of the given name and the family name (which can cause confusion), but it can get far more complex than that. Codifying I Am X, Son of Y is not uncommon, nor is simply giving extremely long and poetic names For names that all have a specific pattern, see Theme Naming . Though do note that if this Theme Naming is intentional in-universe, it could still count for this trope (such as a culture where everyone is named after flowers). In some cultures, children may receive one name at birth and then choose or earn a new name upon reaching a certain age or completing a certain Rite of Passage , in which case it's a Rite of Passage Name Change See also Fantastic Honorifics and Fantastic Rank System . Law of Alien Names , Letter Motif , and Animal Naming Conventions are also related

In a fantasy setting featuring Fantasy Gun Control , Medieval Stasis , and assorted other reasons why the culture would never develop anything even close</ to nuclear weaponry, there may be some form of magic attack so powerful and destructive that it is obviously a stand-in for nuclear weapons. This goes double if it leaves behind some sort of corrupting effect that lingers long after the spell itself is cast, a la</ fallout. Compare to how Automatic Crossbows stand in for guns. Kamehame Hadoken , Wave-Motion Gun , and Person of Mass Destruction are common ways of invoking it. Everything Makes a Mushroom is the usual result Elsewhere, this trope is about the deliberate insertion of something nuke-like into a civilization that hasn't even invented the steam engine yet. That isn't to say this trope doesn't ever appear in higher-tech settings, where it will instead be some nuke-like weapon that nonetheless isn't nuclear. Like Fantastic Racism and Fantastic Drug , in that the situation is obviously designed to parallel a real-world situation, either in order to make some point about the issue or simply to allow all the connotations and associations of the real-world situation to easily be applied to the fantastic. In Japanese works, may be related to Nuclear Weapons Taboo A Fantastic Nuke may set off a World-Wrecking Wave or precipitate The End of the World as We Know It . It's frequently also an Unholy Nuke based on The Dark Arts In some less subtle cases, there might even be some kind of reference to matter-energy conversion And as with Fantastic Racism , we're not using the word "fantastic" to mean "wonderful and great" (i.e., the way the Ninth Doctor uses the word "fantastic"). That would be just plain sick Finally, we should note that while it's not just nuclear weapons that create the infamous "mushroom clouds" (any sort of explosion or even rapid combustion can do this in still air; it's just that the more powerful the explosion is the larger the cloud will be, the longer it will last and the less sensitive it is to disruption by wind, so it's primarily associated with very</ large explosions such as nukes), if something in fiction is described or depicted doing so, it's a good bet the author/creator was attempting to invoke this trope, and it might qualify for

Superweapon status

In Real Life , plastics are used for parts in robots and other machinery. In Science Fiction , you can have indestructible robots made entirely out of plastic. Plastic composite-alloys that are lighter and stronger than steel. With added benefit of not rusting like metal, plastic can last for hundreds of years, maybe even forever in a world run on Raygun Gothic , Cassette Futurism or iPunk . They're easier to mold into the perfect shape and might even be cuttable with scissors, yet make the perfect material to build rockets that can withstand the overwhelming heat of reentry and the intense pressures of the ocean To those unfamiliar with the chemical and historical significance of common polymers, plastic is a varied type of synthetic and semisynthetic material that by the 21st-century has become as common as the likes of glass and metal. It is a light-weight, long-lasting material used in countless applications from packaging, construction and electronics, to energy production, sports, healthcare, color-dying, art, mass production of goods and services and the list goes on and on Much like radiation, plastic is a miracle of science that was not available for wide-spread use in the cultural zeitgeist until the 20th century (specifically 1907), and like radiation , fiction likes to think it is capable of anything</. Sometimes these advanced "plastics", if the fiction goes that far, are said to be reinforced with ceramic or crystalline matrices, carbon or metallic nanotubes, etc. Sometimes they're plastics in name only, making it a case of Translation Convention And, much like radiation, plastic is not without its pitfalls. The environmental and health impact of plastic has only just begun to be addressed, most plastic doesn't biodegrade, instead breaking down to individual molecules which then find their way into animals, all the way back up the food chain into us. Even supposedly biodegradable plastics require industrial composting conditions to break down One of the Ur Examples of this trope is the commonly used "plasteel", a term coined by Harlan Ellison as a fictional compound made up of polymer and steel, said to combine the elasticity of plastic, the heat resistance of metal, and the strength and durability of both Sub-Trope of Artistic License – Chemistry . Compare Magic Plastic Surgery . See also Made of Indestructium

"Fantastic" as in " fantasy " or fictional</, not as in "awesome" ; racism obviously never is Now that we got that</ out of the way, Fantastic Racism is a subset of the old trick of dealing with thorny issues through metaphor . Instead of having the hero encounter racism between, say, white and black people in the American Deep South , or between ethnic Czech and Roma in the Czech Republic, or between Ainu and Japanese, or any other sets of real-world groups, they encounter "racism" between two-headed aliens and three-headed aliens, or between people with earth-themed elemental powers and people with water-themed elemental powers , or between shapeshifting squid-people and shapeshifting octopus-people Not to be confused with Space Jews , in which an imaginary species or culture has disturbing similarities to a real-world racist stereotype. Also related to Have You Tried Not Being a Monster? , where said monsters are usually used as a metaphor for other types of discrimination, oftentimes dicrimination based on characteristics perceived by the bigot to be alterable, "curable" , such as an alternative sexual identity, a disability, or a different religion/religious differences (the two tropes

can often overlap in the case of religion), rather than race or ethnicity. Fantastic Slurs are often involved, as are Monster Rights Movements . Real Life weaselly lines like Some of My Best Friends Are X may feature. The undesired minorities may be rounded up inside a Fantastic Ghetto , and may also be the targets of Superhuman Trafficking Futuristic science fiction examples of human-on-alien Fantastic Racism will often make the human racist a member of a group historically discriminated against on Earth (such as a black character in an American-created work) both to emphasize that human-on-human racism is a thing of the past, and for the sake of irony from the viewers' perspective. Just watch out for the unfortunate implications inherent in depicting a discriminated-against group as "morally inferior" . Or don't, if you think that everybody needs to grow a spine , but don't say you weren't warned If the point of the story is to show the evils of racism , this trope can lead to a Broken Aesop if there are in fact good in-universe reasons to discriminate against a certain type of creature (say, because they need to eat other sapient beings in order to survive , or they genuinely are Always Chaotic Evil apart from the odd angsty heroic one , or they're just potentially-dangerous enough that one doesn't strictly have to be an absolute incorrigible raving xenophobic lunatic to consider making certain... precautions</ (at least against the loose cannons) to be a good idea) Also note that Tropes Are Tools : most people wouldn't believe in a world where elves, dwarves, aliens, etc got along with perfect harmony, because their own experiences of different groups' interactions don't bear that out. It's called Fantastic Racism </ for a reason If the racism appears to be spilling into something a little less fantastic and into something more real, it's Values Dissonance Compare Superior Species , in which one species actually is</ objectively superior in some way; Species Loyalty , which may but does not need to entail this; and Master Race , when it's just in their head (and is probably a metaphor for Those Wacky Nazis for further bad-guy points) See also People of Hair Color (which can be another occasion for racism in fantasy), Dehumanization (where one race is dehumanized to make them easier to kill) and Demonization (where negative character traits are fabricated, exaggerated, and generalized in order to justify some form of prejudice and hatred)

For real ranks, see Common Ranks , (usually) has nothing to do with Rank Inflation . Related to Random Power Ranking , which is for ranking Power Levels . Also related to Space Navy , which often uses one of these. See also Fantastic Honorifics , which can overlap. Compare Fantastic Naming Convention and Fantastic Ship Prefix .

A classic Fantasy and Science Fiction trope. A group with extraordinary powers of some sort goes recruiting among the general population , searching for others like themselves . They may be from The Order , or a school for wizards, witches or gifted youngsters Key to this trope is the fact that they</ come looking for you</. Those extra-normal folk leave their ivory tower or basement lab and go out among the rest of us. The scene may subtly juxtapose the mundane with the fantastic (e.g. Prof X sitting in your living room, drinking Mom's tea like a college recruiter), or it may be as grandiose and dazzling as a WWII recruitment drive Note this rarely happens in a world where the supernatural stays hidden , and the Search is usually open and above-board. Generally

being chosen is a prestigious thing; the only ones who would interfere either have a inherent distrust of all things outside the mundane, or nefarious plans of some sort Regardless, everyone</ accepts. Most characters accept immediately, recognizing that riding a dragon while incinerating your enemies with telekinesis is a lot cooler than moisture-farming on Tatooine or whatever. If not, no matter. Just don't make plans to settle down Contrast with Mutant Draft Board , where acceptance is mandatory. If you want to know what the recruiters are looking for, check out Magic and Powers . Compare The Call Knows Where You Live X-Men </ . Professor X used the Cerebro computer to locate mutants so he could recruit them into his school

Dungeon Keeper Ami </ : Ami initially travels to underworld cities looking for minions (finding Tserk, Brugli, and many of her warlocks that way). Later, on the lightworlder side of things it is revealed the Fairies' have their children tested for Oracle potential.

In Mystery Men </, the Blue Raja, Mr. Furious and the Shoveler realize that their superpowers are too weak to rescue Captain Amazing on their own, so they go on a drive to recruit other superheroes. A Terrible Interviewees Montage ensues, though they do manage to find a few.

Dragonriders of Pern </ : When the dragonriders go on "Search," they seek young women with latent telepathic abilities, able to bond with dragons. This is conventionally only done when a queen egg is laid; normal dragonriders are taken almost exclusively from Weyrborn men In The Witcher </, this happened during the backstory. Because witchers are sterile and can't just breed more, the only way to create more witchers was to recruit young boys, many of whom were orphans, abandoned, or given as payment under the Law Of Surprise, and then subject them to Training from Hell and mutations In Babylon 5 </, Sheridan's alliance is looking for telepaths to deal with the Shadows. Unlike Psi-Corps, where acceptance is mandatory , B5 is looking for volunteers, and not just human ones

Shadowrun </ . People with the ability to use magic are extremely rare. Schools, corporations and magical groups regularly test citizens (particularly children) for magical talent.

The Elder Scrolls V: Skyrim </ has a side quest in Markarth where the player is sent to a small village to find a girl who is to become the new Sybil of Dibella . The father immediately relinquishes her future (knowing that the Sybil is given a life of luxury), even though she is currently held captive in a fortress filled with bandits at the moment.

The protagonists of Legend of Korra to increase their numbers beyond a Republic City civilian called Daw, Bumi (who was already half Air Nomad anyway) and Kai, who joined to escape arrest.

The tenets of a real-world religion can interact... oddly with fantasy or futuristic settings. In the simplest form of this trope, the setting makes religiously forbidden things harder to avoid, or mandatory things harder to do. Maybe it's impossible for Jewish vampires to keep kosher without starving. This is probably true unless they can live on fish blood, which is permitted according to

the Talmud. However, Pikuach nefesh</ refers to a concept in Jewish religious law where certain prohibited behaviors are permissible if they preserve a life. Ergo, a vampire would be allowed to consume non-kosher blood because it was required for their survival, so long as no one was murdered to get the blood... Although at least one rabbi, asked the question, replied that he didn't think pikuach nefesh would apply to the undead, as it specifically refers to the preservation of life . A group of Muslims on a Generation Ship is likely to have trouble making a pilgrimage to Mecca . but that's less likely to happen as it fails to follow the Rule of Drama , although it might be used for world-building or a one off-gag Like having a Hindu Brahmin chowing down on a lab-grown hamburger or a Jewish family arguing whether it's OK to have a lab-grown ham for Shabbat dinner .) There can also be interactions between religion and fantasy that are more complex. The discovery of fantastic elements can lead to crises of faith (or it may not, for no apparent reason), or conversely make the elements of that faith more relevant. And that's not even getting into the situations where the approach to the religion is part </ of what makes the setting fantastical... This can be Truth in Television . Conferences of real Muslims have grappled with the question of how to pray toward Mecca five times a day while orbiting the Earth every 90 minutes. And just how do you determine when Shabbat begins and ends in places that experience polar night and midnight sun? For that matter, can the faithful be expected to fast from sunup to sundown in such locations? Do particular transgenic foods meet Islam's dietary laws? And now that lab-grown meat is just over the horizon, would a beef burger grown in a petri dish be kosher (which demands meat be slaughtered a particular way)? Or acceptable to Hindus (who don't eat beef)? Or Jains (who regard slaughtering animals as always wrong)? Interestingly, in post-communist Poland, exploration of this sort of thing has developed into a real SF genre, called clerical fiction. Overlaps with Religious Vampire and Religious Robot . Sister Trope to Fantastic Legal Weirdness , where speculative fiction elements interact strangely with the legal system. In Piecing Together the Ashes: Reconstructing the Old World Order </, numerous new religions have popped up since the Deluge , while old ones have changed:

If a character is Trapped in Another World and then gets embroiled in such a romance, they often end up saying I Choose to Stay . If they are forced apart, or decide to return to their own worlds , then they are Star-Crossed Lovers . They may still get a Doppelgänger Replacement Love Interest back at home. Such relationships often result in the creation of a Half-Human Hybrid Compare Paranormal Romance , Magical Girlfriend , Magic Contract Romance , Boy Meets Ghoul , Interspecies Romance and Muggle–Mage Romance

If there's a race of non-human, non-spiritual, non-monster sapient beings in your fiction, you're most likely looking at either Sci-Fi or Fantasy . Further, the race probably has characteristics drawn from a common set of tropes. These are some of those tropes Races defined by their sheer unintelligent monstrosity generally don't fall under this set of tropes. Mythical creatures and other non-sapients are covered in Our Monsters Are Different . Contrast Humans Are Indexed

A short string of letters, usually 2-5, that appears just in front of the name of a ship. These indicate what kind of ship it is or who it belongs to (USS — United States Ship</ — is a ship with the US Navy, HMS — His/Her Majesty's Ship</ — the Royal Navy, and RMS — a Royal Mail Ship</ owned by various owners under contract with the eponymous Royal Mail) So, when a Cool Boat or Cool Starship has been created for a work and given an awesome name, creators will sometimes give it a little extra touch of authenticity and come up with a prefix for their ship. It's fairly simple to do; if it's a military ship, take the initials of the military's name and put a 'S' on the end (such as SNS to stand for Space Navy Ship). This is often done to give it a little extra weight of authority Registry numbers or hull numbers are similar, and can also be created fairly easily depending on what type of ship it is Prefixes that are retools of already existing ones (USS, HMS) would not be counted here Compare Fantastic Honorifics and Fantastic Rank System . To avert this trope, see the page on Wikipedia

In Real Life , any time one group of people has animosity for another, they'll come up with mocking or degrading terms for the targets of their disdain. So it's no surprise that in fantasy conflicts, such as humans treating sentient robots as second-class citizens , Elves vs. Dwarves , Fur Against Fang , etc, many fantastic racists , classists , and the like have a wide vocabulary of fictional slurs to use against robots, vampires, etc. It can be very Does This Remind You of Anything? at times. Subtropes include the following: When this happens during times of war or other armed conflict, see Nicknaming the Enemy . Compare Pardon My Klingon . In Command & Conquer: Tiberian Sun </ , members of GDI are referred to by the mutants as "blunts." Likewise, everyone else calls the mutants themselves "shiners."

In real life, terrorists have varying kinds of motivations and goals, as well as how and why they become groups. In Speculative Fiction , they vary even more greatly. But they share one thing in common: they work by spreading terror among people in order to reach a goal Fantastic terrorists may consist of "fantasy races" members, like werewolves, orcs, robots, superhumans, etc., especially when there's Fantastic Racism at work — and if that's the case, their goal could either be the equality of rights, or ruling over the others (likely by attempting to topple the local government or Kill All Humans). Dealing with a fantastic terrorist would be different from — and often worse than — regular ones. Might overlap with Anti-Human Alliance , if the multiple fantastic races are united against humans specifically In a(n inverted) variant, it might be an "anti-fantastic" terrorist instead, consisting of normal people in a fantastic society. They might be Absolute Xenophobes who are against the other race(s) for one reason or another (could be sympathetic or not, justified or not), committing Van Helsing Hate Crimes Despite existing in speculative fiction world for SF reasons, there might be veiled references to actual terrorism or real life terrorist groups Will overlap in many instances with Scary Dogmatic Aliens , the use of antagonistic aliens to depict thinly veiled Real Life ideologies. May overlap with Weird Historical War , if the trope is used in a real life historical setting. Compare Ghostapo and Stupid Jetpack Hitler for when the Nazis get to use fantastic or

science fiction element(s) in their crusades. Not to be confused with terrorists being considered fantastic people, which falls under Your Terrorists Are Our Freedom Fighters . In case it isn't obvious, No Real Life Examples, Please!

Characters are often pressed for time. Maybe they overbook themselves for a specific time period, or maybe they just have a very busy life in general, what with having the Wake Up, Go to School, Save the World all the time. Perhaps they have a deadline that is just physically impossible to meet in the allotted time Well, not to worry: All they have to do is create more time, using Magic and Powers or Applied Phlebotinum Favorite methods include Time Travel (But be careful, San Dimas Time stops for nobody</,) Year Inside, Hour Outside , and Narnia Time , however there can also be other ways of accomplishing this. This is often a form of Mundane Utility

Fictional societies can take on a wide variety of forms, from the familiar to the utterly alien. However, many adhere at least partly to a hierarchy that usually consists of a ruling class, a middle class (if such a thing exists in this setting), and a working class And then you have the Underclass: this level of society is below</ the working class, often impoverished, unemployed, oppressed and regarded with contempt by those above them, even treated as slaves in some cases. In many cases (though not all) they make up the lowest percentage of the population, their limited numbers making them easier to abuse or marginalize The reasons for this vary: in some cases, the members of this class will be some kind of racial or political minority discriminated against by the mainstream, but not enough to be persecuted to the point of extermination; in others, they may have been forced into this group from birth as part of some form of Fantastic Caste System ; in a few examples, the Underclass may consist of individuals who have been exiled for some offense against the law - real or perceived; and in some rare cases, people have ended up here due to sheer bad luck. Whatever the case, these unlucky folk are considered the lowest of the low and have little hope of escaping their unfortunate status Most likely to be found in a Fantastic Ghetto of some description. Often an example of Fantastic Racism on a society-wide scale, with members tolerated just</ enough to permit their survival... though in a few very unfortunate cases , this can change for the worst Compare and contrast Slave Race and Servant Race , who may end up in this societal niche if treated badly enough No real-life examples, please

Fantastic Vermin are everyday creatures — a setting's equivalent of city, household or garden pests — that are fantastical or otherworldly in some way. These can include alien animals, miniature versions of fantasy creatures, common animals with peculiar traits such as vivid coloration, chimeric anatomies or magical properties, or anything along those lines One purpose for including fictional vermin is to emphasize the fantastical nature of a setting — a place must be magical and wondrous indeed if even its pigeons are otherworldly, and flocks of tiny drakes or fairies or alien bugs flitting through the streets is a pretty obvious sign that the story isn't in Kansas anymore.

Similarly, such creatures may be a logical derivation of a world's magical nature: if a setting is permeated with magic and magical creatures, or its ecology is distinct and separate from the mundane world's, then it's likely that even its smallest denizens will be unusual in some way — not every creature in the world can be something rare and majestic, after all Another common aspect of this is the exploration of day-to-day issues in fantastic settings. If regular rats and pigeons already cause a fair amount of damage and headaches through their activities, then pests that can drool acid or set things on fire must be even more problematic to deal with, and can thus provide challenges even to cultures armed with magic or more advanced technology than ours. These effects may also be tailored to a world's endemic technology or magic, affecting it in specific ways beyond what mundane pests could do — for example a creature whose secretions harm the local Unobtanium , or which feeds on magic If these things go from being minor annoyances to an active danger, they may well become a Horde of Alien Locusts These creatures will often be treated as Fantastic Fauna Counterpart to real-life pests species such as rats, mice, pigeons or raccoons. See also Alien Kudzu , for the closely related concept of fantastic weeds, and Explosive Breeder , which may of these creatures often are. Contrast Endangered Species

This trope deals with a story that features some sort of analogue of a real-world historical conflict in a fantasy or science fiction context in a different world from ours. This is especially popular in Japan, since it allows them to tell stories utilizing the era of World War II without actively mentioning the war See also Recycled IN SPACE! , Fantasy Counterpart Culture , and Does This Remind You of Anything? Supertrope to Space Cold War . Compare and contrast Weird Historical War in that it depicts Real Life historical war, but with added fantastical elements

In a setting which is not particularly close to reality, the lifestyles of the characters will also tend to be less like those of the audience. Sometimes, this is intended. Other times, creators will take pains to make the world they're demonstrating more familiar A big step in doing this is to include devices and comforts the audience is familiar with and encounters regularly, such as phones, televisions, washing machines, guns. That way, even if the geography is totally alien, and the culture completely unusual , the viewer will have something to connect them with what they know and relate more closely to the cast With Science Fiction , this is easy. Common objects can be inserted into the world, given a more technological appearance , a few extra functions, and a weird name . Job done. This works as long as the technology doesn't become woefully archaic over time In a fantasy world or a Period Piece , this is harder. Familiar items can still be inserted, creating a Schizo Tech , Anachronism Stew or even Purely Aesthetic Era effect, but this is so jarring that it can actually pull the viewer out of the world they're meant to believe in The alternative is to have devices which have the same functions as those we know, but rely on different principles than modern technology. They may be powered by the likes of Magitek , Bamboo , or Steam . They may look completely unusual, but will be used in a way to facilitate the quality of life we recognise as normal, and the characters will regard them as commonplace Fantastic Nuke and Fantasy Contraception are subtropes. Related to Fictional

Counterpart and Fantasy Counterpart Culture . Compare and contrast Aliens Never Invented the Wheel

Creating a completely new culture from scratch can be a daunting task. Think about everything the word culture encompasses— music , food , clothing , etiquette , dance , religion , and combative traditions , to name a few, and even if one manages to pull it off, one runs the risk of ruining audience's Suspension of Disbelief by having one's creation seem too </ strange. To lighten the burden of creating a believable fictional culture creators often base one or more of their creations off of real human cultures from various times or places. The countries may have significant names resembling the place they are based on This is especially common in Constructed World or Fictional Earth settings, but by no means exclusive to it. It's also often found in satire, as a means of indirectly poking fun at the culture in question There are also sound literary reasons for using this trope. Making the Shire an idealized England transplanted to Middle-earth makes it easier for readers to identify with the point of view characters, since they probably have much more in common with Bilbo than with Thorin. Guy Gavriel Kay 's The Lions of Al-Rassan </ is a thinly disguised historical novel, but changing the names of the countries and religions means the readers don't know how the story will end, helping to maintain dramatic tension It's also more easily justified in works containing humans: the Real Life counterparts of the fictional cultures have all actually come into existence and are the results of real groups of people coming together to build something over time. Basing a new society on one that's already had a turn at some point in human history can both help the audience relate and provide a creative framework to twist and turn said society into an interesting variant of its former self. However this approach still has its risks — if the Fantasy Counterpart Culture is based on a too simplistic view of a particular region of the world, it ends up lacking both in depth and originality Compare with Istanbul (Not Constantinople) , when a real place is referred to with a more archaic or obscure name (e.g. "Columbia" instead of "USA"). Compare also with Days of Future Past , where a futuristic society duplicates (often explicitly and intentionally) the culture and styles of a historical period. Compare with No Communities Were Harmed , which is this applied to a locality, and Fantasy Counterpart Religion for when is applied to a religious group. Compare Fantastic Fauna Counterpart for a similar concept applied to animals, i.e. an animal species being used as a substitute for another See also Culture Chop Suey , Space Romans (and the more offensive version, Space Jews). A Nazi by Any Other Name , Medieval European Fantasy , Ruritania , Überwald , and Wutai are frequently-occurring specific types of fantasy counterpart culture

Some writers created fictional religions for their settings. Religious subjects in fiction are a sensitive issue. Targeting certain religious groups, and how it's done, may cause Unfortunate Implications or have the work Banned in China , or induce an Audience-Alienating Premise . The creator(s) often will wish to comment on real world religion without directly commenting upon on them. They have various ways to get around this: The work is located in an entirely fictional universe, thus no Earth religion could

exist there. Examples: A Song of Ice and Fire </ and Star Wars </ . A Sub-Trope of Fantasy Counterpart Culture . May be involved in a Fantasy Conflict Counterpart . Compare with Fictional Political Party for the political version. Super-Trope to Crystal Dragon Jesus (in which the religion is more or less a substitute for Christianity), Fantasy Pantheon (for a made-up polytheistic religion), Interfaith Smoothie (a fictional religion influenced by two or more from the real world).

In the interest of creating a medieval setting that feels sufficiently romantic , low-tech , and/or in line with The Theme Park Version of history, many authors decide not to include guns and other explosives in their works. Sometimes reasons are given for this, and sometimes not. Note that in Real Life , Europeans had some knowledge of what gunpowder was in the 13th century and started to use cannons and hand firearms in the 14th century, meaning the popular view of gunpowder as a post-medieval invention is incorrect and in fact, the popular image of a medieval knight wearing full plate armor actually came after gunpowder weapons, in the 15th century. Fantasy Gun Control shows up most often in fantasy (hence the name) but can appear in any genre Expect lots of Epileptic Trees about Enforced Technology Levels and other Fan Wank over why. If guns are present, but nerfed — whether for Gameplay reasons or Rule of Cool — it's Guns Are Worthless . If firearms are introduced to a previously gunless society and prove to be a game-changer, that falls under Firearms Are Revolutionary Something to note is that this primarily applies to fantasy set in the typical Medieval European Fantasy setting, with castles, swords, knights, and so on. Urban Fantasy tends to have no problem mixing guns and vampires, witches, wizards, etc., since that form of Fantasy tends to use the modern world as we know it. The same goes for Science Fantasy , where the intent is to Mix and Match things like laser guns and spells. More horror-oriented fantasy works also tend to avert it — if werewolves and vampires are featured, Silver Bullets are likely to be used. When it comes to Fairy Tales , the trope is absent. Occasionally, a Mage Marksman would use guns in conjunction with magic, or as a catalyst for casting spells Notably, despite also relying on gunpowder, fireworks are notably exempt from this rule See the Analysis page for theories on why this trope is so prevalent

Fantasy: it's stuff with magic in it, not counting Psychic Powers , or Magic from Technology , or anything meant to frighten , or Magical Realism , or anything strongly religious, or the technology behind the magic that is Magitek , or — where did that clean-cut definition go? While the core of the fantasy genre is clear enough, there is no succinct definition that encompasses it all. The boundary with Science Fiction is notoriously ambiguous and the boundary with horror is often no less fuzzy. Religiously inspired works, like the Left Behind </ series, can have a basic good versus evil plotline that would fit well in High Fantasy , but few would place it there. And so on. Common features of the fantasy genre include: Magic and Powers — Functional Magic is almost always present, though its role in the world can vary widely. It might be either respected, feared, persecuted, or simply not believed in. Its frequency varies from the stuff of legend, through to rare but available to the well connected, up to a ubiquitous part of everyday life. Magitek

usually lies at the extreme end of this scale. It may be taught through a master and apprentice system , or in a magical university , when it can be taught at all. When wizards are immortal, they don't need to train successors, and may not be able to. However, even magic itself isn't a required element, as novels such as Ellen Kushner's Swordspoint </, K.J. Parker's Devices & Desires</ or Ricardo Pinto's The Stone Dance of the Chameleon </ which feature no magic whatsoever but take place in an alternate, pseudo-historical world, are still classified as fantasy. This is due in part to their widespread use of other tropes associated with fantasy, particularly Low Fantasy . (Swordspoint</ is an interesting case, because while it contains no supernatural elements in itself, one of its sequels, The Fall of the Kings</, is largely concerned with The Magic Comes Back .) Often placed outside the Fantasy genre, or not marketed as such: In response to a flood of inquiries to Ballantine Books from grateful readers of the U.S. edition of J. R. R. Tolkien 's monumental The Lord of the Rings </, many of whom thought Tolkien had invented</ this, Lin Carter wrote Imaginary Worlds: The Art of Fantasy</, a book explaining the origins of fantasy genres (plural) millennia before Tolkien and citing hundreds of authors and titles to guide newcomers. (Carter defined fantasy as literature set in a time and/or place where magic works.) He was also the editor, beginning in 1968, of the which reprinted many out-of-print and older titles, along with new works and anthologies. Ask your grandparents, check online or in used book stores, about this amazing series published under " ." Jamie Williamson's The Evolution of Modern Fantasy, From Antiquarianism to the Ballantine Adult Fantasy Series</ may also be helpful. See also: Maybe Magic, Maybe Mundane , Speculative Fiction Creator Index , and Speculative Fiction Tropes .

Angel Works : Fantasy works themed around Angels .

What happens when All Myths Are True is turned Up to Eleven ? You get a Fantasy Kitchen Sink! Everything is true, even if it comes from vastly different origins. So not only are there really fairies , there are ghosts , Vampires , werewolves , mummies , zombies , aliens , time travelers , espers , angels , demons , gods , Eldritch Abominations , Precursors , magic , and so on. Generally a sure sign of it is when creatures from typically different genres (Sci-Fi, Horror, and Fantasy) all exist within the same world with individual origins of their own , each implausible in their own way — leading up to a long series of suspensions of disbelief rather than just one In general when you have a Fantasy Kitchen Sink, the premise is mostly used for Monster of the Week plots — where there's one Myth Arc that focuses on a fantastic element and a bunch of totally unrelated sub-arcs about various lesser creatures or beings. There's no overlap between the different genre creatures. The alien bounty hunters do not run into the vampires, the angels, or the superhuman (non-alien involvement) mutants; only the main characters. It's as if there are a bunch of disconnected secret worlds lurking under and above the surface of the real world and the heroes are the only ones who go between them . Occasionally, they do interact in the form of a Monster Mash . The Ancient Conspiracy really are behind everything... but so are The Fair Folk , the Body Snatchers , and the Time Travelers and their plans don't have any</ connection with each other. For example, the Witch Species never accidentally erase the memories of the supernatural of, say, someone who's secretly a Ninja or vice

versa; no matter how indiscriminate either are at enforcing the Masquerade Compare this to, for instance, the various Star Trek </ and Stargate-verse </ series, or Babylon 5 </, where the "magical" aspects are Applied Phlebotinum or the Sufficiently Advanced Alien . They aren't "real" magic. There are Psychic Powers , but they are given a pseudoscientific Technobabble explanation. If the Science Fiction series does have bona fide magic, like Star Wars </, it's Science Fantasy The opposite of Meta Origin , in which all of the supernatural elements of a setting come from the same single origin or event. Inevitably results in at least one character who's Seen It All . If the fantasy elements are used to explain how reality really works, it leads to discovering the Magical Underpinnings of Reality Compare Conspiracy Kitchen Sink , Sci-Fi Kitchen Sink , All Myths Are True , Crossover Cosmology , World of Weirdness , World of Mysteries , Domino Revelation and Anachronism Stew . May combine with Crapsack World if the Fantasy Kitchen Sink has elements of the Darker and Edgier . If Jesus, Then Aliens is the logic used creating this world. Of course, tends to result in Pals with Jesus and Monster Roommate after a while Not to be confused with the fictional kitchen sinks

In Speculative Fiction , especially Fantasy , one way of distinguishing your fantasy world from another is to populate it with made-up gods. Real-world theology aside, unless the story involves An Aesop about religion being the opiate of the masses or the tool of corrupt priests, it is popular (but not necessary) for the gods in a fictional world to really exist In-Universe . This can serve many uses for the author: It can provide a base for a world's Functional Magic , particularly clerics, monks and paladins. Roughly 9 times out of 10 and remember, 68% of all statistics are made up on the spot , the Fantasy Pantheon will be polytheistic and each god and goddess will have an Anthropomorphic Personification . Being a Flat-Earth Atheist is a potentially dangerous prospect. Non-godly spirits, demons and ordinary magical beings don't count, but various lesser gods, demigods and Odd Job Gods do. Note that while the title says "pantheon", single Gods count too, but they are rarer. Interestingly, and possibly because of the non-polytheistic background of most sci-fi and fantasy writers, fantasy religions tend to be far more inclined to than most real-world polytheisms. Expect fantasy characters to pick one deity and stick to them rather than worship whichever holds the portfolio most appropriate to the business of the moment. Of course it's also plausible that a work's fantasy pantheon is never even encountered, or perhaps they may or not be real. The gods might also not even be the most powerful beings in their universe. Eldritch Abominations , the Powers That Be , or perhaps even the occasional mortal can be more powerful than them. This trope is the basis of any good Mythopoeia . Compare Crossover Cosmology , All Myths Are True , Crystal Dragon Jesus . May overlap with Original Generation , if they co-exist with pantheon from actual mythology. Expect some incidence of Physical Religion . See Stock Gods for the typical structure and common inhabitants of a Fantasy Pantheon.

There are also the Celestials, who are original creations. Technically Sufficiently Advanced Aliens , but so advanced that the difference is pretty much semantic.

A Fantasy Sequence in a comedy which is much more unpleasant or mundane than your average fantasy, usually for no good reason. Not to be confused with a Genre Shift into the fantasy genre, or

twists that that genre is particularly likely to spring on you In Bee Movie </ Barry's daydream about Vanessa and himself having a romantic picnic together ends abruptly as Vanessa pilots a yellow and black ultralight to fly with him, then crashes and burns when she tries to duplicate an aviation feat only bees can accomplish

In The Leaky Establishment</ by David Langford , when Roy Tappen is trying to smuggle his accidentally stolen plutonium back</ into the NUTC, he briefly fantasises about claiming to have wrestled it from a Russian spy and being hailed as a hero. This fantasy rapidly shifts towards being asked serious questions about the supposed Russian spy, leading inevitably to being cast into the darkness with "UNEMPLOYABLE" tattooed on his forehead. Later fantasies are even worse, mostly ending with Britain becoming a radioactive wasteland, and</ he gets fired .

A whole episode of Malcolm in the Middle </ revolves around Lois imagining that she has daughters instead of sons (interspersed with the reality of trying to handle three boys). At the end, the imaginary daughters turn out to be lying and manipulative, with problems ranging from eating disorders to teenage pregnancy.

Dilbert </ once considered developing a way of leading his entire life from his bathtub. He then fantasised about being interviewed by a group of reporters about his revolutionary new lifestyle, but soon they criticised his system as pointless and even remarked that bathing was an inefficient form of cleaning, until Dilbert complained, "This fantasy's been a profound disappointment".

xkcd </, naturally, takes it to .

On Homestar Runner </ , this happens to Strong Bad a lot:

The Simpsons </ seems to almost specialize in these. For instance, Homer's fantasy about a theme park in his backyard named "Homerland USA" consists of a shabby old thing made largely out of mattresses. And his fantasy about having two wives starts out mundane—he's just making them do housework while he relaxes—then turns sour when he's stung by a bee. And his fantasy about having a private plane ends with him finding that the cockpit is empty. Meanwhile Bart's dream of rock stardom includes becoming a drunken, drug-addled shambles who has alienated all his friends (but he still</ thinks it's awesome). The list goes on and on.

Have a High Fantasy story of a group of heroes traveling the world in order to fulfill their quest ? Then you must include a map! Maps of fantasy worlds have been a feature of Fantasy books ever since L. Frank Baum 's Land of Oz . A visual reference can be very handy. Often drawn in elaborate script, pointing out the Doomed Hometown , The Good Kingdom , The Empire , various Fantasy Counterpart Cultures , each of the Standard Fantasy Races ' lands, many of the Wacky Wayside Tribes , the dangerous Forbidden Zone (Mordor) and The Lost Woods . Diana Wynne Jones 's The Tough Guide to Fantasyland </ has a few things to say on the subject of maps, including the fact that if you're on a quest you may expect to visit every single place</ marked on them . Fantasy world maps will often have roughly the proportions of a standard book page so that all the places in the fantasy world can fit conveniently on the map - the Law of Cartographical

Elegance . Really</ deluxe worlds are proportioned like two pages side by side, thereby indicating they rate a hardcover edition with endpapers. Fantasy world maps sometimes also have a tendency to make it seem as if the world is literally flat. If the ocean is on the left side of the map, then it's a Left-Justified Fantasy Map . If the northern regions are cold and the southern regions are warmer, it's North Is Cold, South Is Hot . When the map doesn't make any geographical sense, it's a Patchwork Map , though these can be sometimes justified by the use of magic . A variation occurs when maps of real places are included in a novel where it helps follow the intrigue. Sometimes complicated by opaque library book covers that cannot be removed from the book. In that case, there will forever be one side of the map that you cannot see without breaking the book cover, though if you're lucky the map will be on the inside of both the front and back covers, covering up the left and right sides respectively. This may help explain why (with a little monster-powered-by-evil-source-you-are-getting-closer-to-in-order-to-remove Hand Wave explanation) you can't just acquire a boat and kill the sea monster now that the sea storm that it entered by is over. Also frequent in Tabletop Games for gameplay reasons, and, occasionally, in anime series. For Video Game sub-tropes, see Overworld Not to Scale , Point-and-Click Map , "Risk"-Style Map , and Sorting Algorithm of Threatening Geography .

A phenomenon that goes hand-in-hand with Emulation , Fan Translation (or "Fanlation") is pretty much what it says : The translation of games that only appeared in other languages (almost always Japanese) into the player's native language (almost always English) as a fanmade Game Mod or ROM hack This most often occurs on Japanese RPGs that were released prior to Final Fantasy VII </. Before that game's breakout success, American publishers shied away from Japanese RPGs because of their relatively poor sales compared to action games. In fact, the fan translation hobby largely began from the efforts to localize Final Fantasy V </ and Trials of Mana </ (then known to international audiences by its Japanese name, Seiken Densetsu 3</), Square games that were heavily hyped as coming to the US, then mysteriously canceled . Some older RPGs were even re</-translated due to the "quality" of the translations ranging from a mere "Blind Idiot" Translation to an outright Translation Train Wreck Licensed Games can also receive this treatment. Often, it takes years before an anime series is brought over and becomes popular in the West, while the Japanese games based on that series are seen as obsolete by the distributors While no legal dispute over a fanmade patch has ever occurred, a handful of cease-and-desist orders have been issued regardless of any actual validity. Since ROM patches contain no assets from the original game and no derived assets that are viable without it, no likely basis for arguing infringement is known. The resulting translated ROMs themselves, of course, fall under the same rules as any other ROM dump if distributed (hence why ROM hacking sites generally only distribute patches, requiring players to find the original ROM elsewhere and use a patching program to actually use the patch) Plus, No Export for You already garners enough bad PR, exacerbating it among fans would definitely not be a good idea See also Fansubs for the Anime version and Scanlations for the manga version Please note that people aren't getting paid for this and are Doing It for the Art (though they may have professional

translation work as their main occupation, as with Clyde "Tomato" Mandelin, the head translator of Mother 3 </, who does fan translations solely as a hobby in his spare time); Development Hell is common, and Vaporware might happen occasionally (an example of the latter being the aforementioned Clyde Mandelin's abandoned translation of Tomato Adventure </, though he did</ release the source code for his work in case anyone else wants to give it a shot). Any ongoing projects may take VERY long

When a fanfiction writer, or group of writers, do several (not just a few, several</) fics for the same fandom taking place in the same continuity as each other, that's a Fan Verse. Another variant of this is when you have a few stories that utilize a popular Fandom-Specific Plot and become so well-loved themselves that several other writers treat them as a framework from which they base their own stories on, creating their own Recursive Fanfiction . The original fanfic writer may or may not then acknowledge these as being part of their continuity. Any fanfic that has a copious amount of worldbuilding counts a lot toward this label as well If they keep it coherent and get enough interest, Fan Verse writers can single-handedly influence Fanon , possibly to the point of being canonized as an Expanded Universe

Fan Wank refers to a fan's personal theory about a work, designed to resolve inconsistencies or help make sense of the work, but tending only to reveal that the fan is putting way</ too much thought into the exercise. It's the other </ reason you should use protection when reading fanfic . Fanfic writers like "mythos building" fics, partly because they tend to be more memorable, but also because they allow them to cement their personal theories into the source material's pseudo-canon; if the fans like the idea, they can collectively adopt it as Fanon . Fans may also try a Fix Fic , where the author identifies something "wrong" with the source material and tries to make it better. The problem with this sort of thing is that these fans tend to put much more thought into the work than the authors themselves did , and it results in theories that make no sense, don't make the original work any more enjoyable, or perhaps even resolve a question that was better left a mystery. Particularly common elements of a fan wank include: If the canon author tries to do this to his own work, it's called a Retcon , Re Vision , or otherwise some form of Continuity Porn . In general, fans treat "retcon" as a value-neutral term, whereas "fan wank" carries a connotation of being crap . That said, fan wank can still be enjoyable , especially if the author is clearly aware of how ridiculous the theory is , and some fan theories can even be adopted by the original work in the form of Ascended Fanon (or a Shrug of God , which means no canon commitment either way and gives the fans room to work with). "Wank" originates in British slang as a term for masturbation . Thus, "fan wank" refers to writers stroking their own egos by writing at length about things only they care about. The term was coined by Doctor Who </ fan and Doctor Who Expanded Universe </ writer Craig Hinton, who was no stranger to fan wank himself, and applied the term to his own work. That said, some fandom circles also use "wank" to refer to a fan behaving like a wanker , such as Broken Base feuding and other gross displays of Fan Dumb . This is YMMV for a reason however, as the sheer amount of Fan Wank in existence shows that a lot of people, at

least within fandoms, really like it. See also Epileptic Trees (the specific crazy theories the fans come up with) and Wild Mass Guessing , TV Tropes' own collection of crazy fan theories. Alternate History Wank is a similar concept, but more limited in scope.

Some creators don't like Fan Work and actively discourage — if not outright prevent — fans from creating, posting, or publishing their fan work. Although such a ban encompasses all Fan Work , it seems to happen most often to Fan Fiction ; hence, most creators who try to enact a fanwork ban tend to be writers. The reasons for such a ban vary, but it's usually one of these: In general, a fanwork ban is not a good thing to happen to a fanbase. While it may (but probably won't) accomplish one of the above-stated goals, a fanwork community is one of the most powerful ways to consolidate the fanbase and generate enthusiasm around the work. In extreme cases, it can drastically diminish a fanbase by discouraging them from talking about the work at all</ on the Internet, meaning that people who discover the work can't connect with other fans of the work (or run into massive Flame Wars about the fanwork ban). The parent organization of Archive of Our Own , the Organization of Transformative Works, was founded to fight against fanwork bans and argue that fanworks are a type of "transformative work", protected under copyright rules. Contrast with Approval of God and Staff-Created Fan Work , compare and</ contrast Oh Crap, There Are Fanfics of Us! (which is when the characters</ react with alarm to the existence of fan content) and see also Rule 34 – Creator Reactions . This is often tongue-in-cheek, and rarely done by creators who aren't actually fine with it.

A creative Derivative Work made by a Fandom . </ This entry defines classifications of fan works. Please do not list any specific works here. If you'd like to recommend a fan work see: Fanfic Recommendations . For the subwiki , see FanWorks.Home Page .

Many people write fanfiction . Many people also read fanfiction. Generally, such people are fans of the original work Generally, yes, but not always Fanwork-Only Fans are fans who produce and/or engage with fan-made media without being overly familiar with the source material, if they even care much for that original work to begin with. There can be any number of reasons for this. For instance, someone could be introduced to a fandom at a time when the series in question is not readily available in their language, so engaging in fan material became the best way to partake with the work before becoming the only way they partook. Alternatively, someone might have been attracted to the fanwork scene due to it highlighting some aspects of the original work said person enjoys the most, such as the setting or a certain character, thus leading to said works overshadowing the original for them. Especially if that fan feels that the original has undergone Seasonal Rot . And in some cases, someone might have actually been introduced to the franchise through its fanwork first and never take much interest in the franchise beyond that For some reason , this tends to show up more often in works that have lots of male characters, though works with a similar setup of many-to- improbable levels of female characters attract just as much attention. Needless to say, this can easily result in copious amounts of Fanon , as well as Canon Defilement in worse case scenarios. Naturally, expect to see this

type of fan declare many fanworks to be Better Than Canon No, do not confuse this with . Get your head out of the gutter

This section answers some commonly asked questions. Click on the question and the answer will appear.

Terrorists who have their base of operations in the Far Eastern part of the Asian continent (North, Southeast and East Asia), where they conduct operations against domestic/foreign governments and interests. They can also be based in other places, but are primarily made up (the majority at least) of individuals who are of Far-East origin. Like African Terrorists , they are sometimes used by a well-funded criminal/terrorist organization as Mooks , usually by a Western man (or woman) . Otherwise, they may be led by a Middle Eastern Terrorist In other instances, Far-East Asian terrorists are either Terrorists Without a Cause , La Résistance or are placed under Your Terrorists Are Our Freedom Fighters . Depending on circumstances, they may be tied in some way with with Ruthless Foreign Gangsters , particularly The Triads and the Tongs or Yakuza . While in other circumstances, they may be an individual or a few persons of Far-East origin who operate as a lone wolf-type terrorist. There is a possibility that they can be placed in Unfortunate Implications with a case of Yellow Peril for terrorists who are of East Asian origin, especially Chinese ones Creators can draw inspiration from Real Life sources and cases where terrorism has occurred in the Far East, such as communist or nationalist groups. In other cases, they also include religious terrorist groups in the region. Some may even be Eco Terrorists Compare Western Terrorists , for terrorists who are born/raised in Western countries from the Americas to Europe, including Australia and New Zealand; African Terrorists , for terrorists who are born/raised in the African continent; South Asian Terrorists , for terrorists who are born/raised in the region of South Asia; and Middle Eastern Terrorists , for terrorists who are born/raised in the Middle Eastern region

A comedic Deserted Island Pineapples and bananas don't actually grow on trees, but that's a different trope . in the center. Usually has a single inhabitant. If there's more than one, they'll either be constantly arguing or one will be slowly driving the other insane in a comedic manner (Meat-O-Vision may also occur). Often features a Message in a Bottle . If the stranded are really</ unlucky, there will be a pack of sharks circling the island Should not be confused with those larger, seemingly-deserted islands with a resort on the side far from where the characters landed Please don't think about where the lone inhabitant is getting enough food and fresh water to live long enough to grow that spectacular beard . Or even how they survive high tide

To portray amused superiority or superior amusement, the arched eyebrow is the best way. It is a prime weapon in the expression

arsenal for the Chess Master , Manipulative Bastard , or (in possibly the most famous modern example) The Spock . It's often raised just as the heroes comprehend what the Evil Plan was all about. For instance, when they find out that by foiling one objective they helped their enemy achieve a second , the planner will arch an eyebrow as if to say, "Suckers!" Another common and less malicious use of this trope is to depict a character's discomfort or burgeoning confusion; characters tend to raise an eyebrow at something that bemuses or otherwise unsettles them, as if they're halfway towards opening both eyes wide in shock. This may accompany an Eye Take : the raised brows make room for the widened eyes. And as Expressive Mask shows, even glasses and masks don't get in the way of the eyebrow. Like rolling one's tongue or performing Spock's other trademark , this is not a talent everyone has. With enough dedication and some practice in a mirror, however, would-be Chess Masters can usually develop the skill. Combine this with Twinkle Smile and Dreary Half-Lidded Eyes , and you get the Dreamworks Face .

Tropes involved in bypassing Einstein's universal speed limit. See also Teleportation Tropes .

Faster-Than-Light Travel is a staple of Space Opera that allows an "out" to the unfortunate fact that space is honking big , making it impossible (within physics as we understand it now) to get anywhere remotely interesting within the average lifetime of a civilization. This has been an issue for writers since The '50s or so; before then you could get away with having your aliens come from Neptune without totally losing the audience. Today, it is widely understood that in order for the protagonists to be able to plausibly visit a new Planet of Hats every week, they need to travel through space at speeds faster than that of light itself</. The problem is that as far as present-day science is concerned, going faster than — or even just as fast as</ — the speed of light is, for all human intents and purposes, impossible. See Analysis for more of this . Of course, writers may wave away the issues surrounding FTL travel by invoking incredible advances in future technology, or they may simply not worry about the complications too much at all . In either case, explaining how people may travel from Earth to the edge of the Galaxy in less than an hour will generally involve equipping a Cool Starship with some kind of "exotic" propulsion system , which, approximately, holds the normal laws of physics in abatement. This is the Faster Than Light Drive. The exact mechanism varies, but more detailed works may explain how the system avoids the lightspeed limitation . There are three broad favorites: Sometimes, FTL travel is only possible between specific points — the entrances to wormholes , for example, or alien artifacts that can accelerate ships to FTL speeds (it's reasonably common for this to be the leftovers of an ancient galaxy-spanning civilization , often functioning as a Portal Network). This approach to the trope often means that the ship itself isn't actually required to have any Applied Phlebotinum on-board; on the other hand, sometimes a ship will</ have its own FTL drive, but can only use it at certain special locations scattered throughout the universe. The actual Technobabble explanation for FTL travel in works that use this "restricted" flavor of the trope can still fit into any of the above categories. The important distinction from a story-telling perspective is that our protagonists first have to use conventional, comparatively slow travel to reach some special location before they can warp away across the galaxy. This may lead to the existence of

"choke points" where Standard Starship Scuffles may take place, or tension-building delays during a trip. Hyperspace Lanes may or may not apply: it may be that each "warp point", whatever its nature, connects to just one, or a few other locations, but it could also be that once a ship manages to reach a place where FTL is possible, it can then jump wherever it pleases. This concept can also be seen as the inverse of the No Warping Zone . Sometimes, a "restricted" style of FTL will occur side-by-side with the more general form of the trope; for example, characters may use their ship's self-sufficient warp drive to travel to a few neighbouring planets, but may need to reach a special wormhole to access some really remote and mysterious location. Whatever the nature and form of FTL travel, many works will try to come up with some appropriately snappy name for it. The most generic term for an FTL drive is probably the "hyperdrive", but many books and series come up with their own terminology. It should be noted that any particular name used for FTL travel does not necessarily have to correspond to a specific means of travel as described earlier in this article. In Star Trek </ the Warp Drive is of course just a warp drive, but in Warhammer 40,000 </ the "Warp" is the poster-child for Hyperspace Is a Scary Place , for example. Similarly, Babylon 5 </ used the term "Jump Drive" to describe moving in and out of an alternative dimension, hyperspace, where ships could cross interstellar distances in a short time, rather than instantaneous travel between two points in real-space. Different stories' FTL drives should be distinguished by their effects, not simply their names. From a Troper 's perspective, the story-telling implications of the type of FTL travel used in a work are usually more important than the technobabble behind it. For example, Jump or Hyperdrives may provide a very easy (but often dramatic) way to escape an antagonist because it is usually hard for anyone to track a ship that just disappears; exactly what Applied Phlebotinum allows the ship to do so is less significant. A Warp Drive, on the other hand, usually does not allow the same escape option; we may get a Stern Chase , instead. Again, how</ the Warp Drive works isn't too important here; all we need to know is whether the protagonists can simply leap light-years away from the Big Bad at the touch of a button, or whether a dramatic chase scene is in store. Often, the exact mechanism by which FTL is achieved is only important insofar as it supports various kinds of Phlebotinum Breakdown . And in some series, the mechanism is simply ignored; we just assume that it works and that we shouldn't worry about relativity . At most, some form of Unobtainium may be mentioned to circumvent Einstein's laws. For works on the harder end of sci-fi, on the other hand, the science behind FTL may be more important, and the author may go to great lengths to develop consistent rules for FTL and explore all of the technology's implications. Exotic FTL drives also give us an "out" against inertia: Since the laws of physics are being held in abeyance, we can safely assume that if the drive breaks, the laws of physics reassert themselves, so it is impossible to "coast" at superluminal velocities (see Space Friction). Thus, we can effectively ensure that Space Is an Ocean . It is generally assumed that FTL travel is for travel between</ star systems and furthermore, it is the only</ viable means of travel between stars. Conversely, subluminal, conventional travel is for use within a star system : FTL too close to anything that has gravity tends to be ruled out as dangerous (No Warping Zones often provide justifications). The need to reach a safe distance to use FTL is the stuff of countless space chase scenes, most commonly escaping a planet's gravity well. Faster-Than-Light Travel is generally

considered a necessary break from physics if you want to have a Space Opera (though this was much less true in The Golden Age Of Science Fiction, when it could still be safely assumed that alien civilizations flourished as nearby as Mars, Venus, or even the Moon). A more extreme version, found in Space Operas and other places, is Casual Interstellar Travel . A setting without Faster Than Light Travel involving a trip between planets, usually in a single star system, is an Interplanetary Voyage . Similarly, Faster-Than-Light Travel is usually a technology that cannot operate without the presence of plot-relevant individuals , as it's hard to tell entertaining stories about unmanned probes - all Real Life space exploration is done thus, and holds interest for relatively few people . A related trope is the Subspace Ansible , which allows ships to send messages at superluminal speeds without having to send their engines along with them; this trope will usually be found alongside Faster-Than-Light Travel, though there are exceptions (for example, Andromeda </, Honor Harrington </, and the Vorkosigan Saga </ have FTL travel but no ansibles, and Ender's Game </ has ansibles but no FTL travel — though the series that inspired it, Ursula K. Le Guin 's Hainish Cycle </, did</ have FTL travel in addition to ansibles, it was just that humans couldn't survive it). In FTL settings, an Everything Sensor will usually operate in some FTL manner to allow the ship to detect plot-related events happening light-minutes or light-years away in real time. Distress Calls are a function of the aforementioned ansible, but when the ship can casually detect "enemy" ships from light-years away, just as casually mosey on over and ask what they're doing in their territory, yet must enter a given star system to study it for plot-related reasons, a great deal of hand-waving is in order. Both these tropes have many of the same difficulties with known physics as Faster-Than-Light Travel itself. Beyond the simple fact that relativity implies it's impossible, it also shows that something traveling faster than light must appear to some observers to be traveling backwards in time, and even being able to send information backwards in time produces logical difficulties like the Grandfather Paradox . Even though going faster than light is already extreme in itself, some actually take it Up to Eleven with Ludicrous Speed , where traveling at such speeds results in usually unpleasant side effects. For the record, cSince The '80s , this has been a defined quantity, defining a meter. These days, one no longer measures the speed of light. One measures the length of a meter, or tries to determine if the speed of light has changed over time. This works out to 670M mph, 1B km/h, or about 900,000 times the speed of sound on Earth. It's not just a good idea, it's the law! If your eyes kinda went fuzzy and glazed over the above Wall of Text : Most Writers Are Writers , not scientists or mathematicians . Understanding the things that happen as you approach the speed of light is so perplexing that it took great minds years to figure it out — but it takes no training to make up a story that happens in space. Tropes Are Tools , so writers will merely say you can go faster than light in their fictional universe, or make things in the universe close, like making planets akin to cities in a county . In Legend of Galactic Heroes </ , faster-than-light travel is achieved via "warp drives", which actually function more like "jump" drives.

This is where a television show or film will speed up the film and the comedy comes from the actions you see the actors perform. Audio is similarly sped up and is unintelligible and the action

that occurs on screen will often go from somewhat logical to outright absurd. Depending on how fast these visuals speed by, it may overlap with Freeze-Frame Bonus Additionally, in some cases the humor can also be derived from the continuity errors resulting from fast-forwarding the action Subtrope of Undercrank . Not to be confused with the Gilligan Cut . The Inverted version of this trope would be Rewind Gag

So you have The Squad , commandos from the Badass Army , or just some Elite Mooks . What's a great way to have them join the action in a dramatic or badass manner? Why, have them rappel down into the scene from above! Shattering windows or skylights on the way is optional (though it may seem obligatory) and adds great effect Named after the real military tactic of fast-roping, making this Truth in Television . Although, it can be a case of Awesome, but Impractical considering that the fast-roper is exposed to enemy fire the moment he draws attention. Fast-roping is normally used to insert soldiers in places helicopters cannot land, as opposed to making a grand entrance in front of a machine gun nest . Note that there is a difference between fast-roping and rappelling A type of Dynamic Entry that invokes Death from Above . It's the faster-paced, tactical-level Sister Trope of It's Raining Men . Related to Super Window Jump , which does not require a rope and does require a window or skylight Tends to be a case of Big Damn Heroes . See also "Mission: Impossible" Cable Drop when it's done in stealth, not action. Grappling-Hook Pistol is the (literal) inversion of this trope, when you use the rope to go up</ rather than down. Compare Building Swing

Now and then a detective will be strongly attracted to someone connected with a crime. She (it's usually a woman) may at some point in the episode become the Damsel in Distress , but if not, she's either the perp or will be suspected of being the perp. If she did it, the detective will be reluctant to believe that she's capable of such a thing until the evidence is completely damning; if she's a Red Herring , the detective will confront her prematurely and lose any chance of a romance with her. Sometimes overlaps with Femme Fatale , but more often there is no Internal Reveal of her true nature, she's perfectly nice and sweet until she turns around and holds the detective at gunpoint. Frequently turns up in the first episode/book of a series, with the implication that the detective's sense of betrayal or loss is what hardens him and forms him into the character we come to know. (Details vary: he might become a commitment-phobic womanizer, a celibate justice machine , a Straw Misogynist , or just an all-around cynic , but in any case it's all because of her</ .) For the idea associated with the movie titled Fatal Attraction </, see Woman Scorned . For the man (and it's usually a guy) who seems to serially end up in these sort of situations, see Fatal Attractor . This trope is similar to Dating Catwoman , but riskier.

Some people are just unlucky in love. Others seem to have done something to personally piss Cupid off and are spending the rest of their lives paying for it. The Fatal Attractor is a character whose Love Interests always end up having some sort of critically serious flaw, be it personality, physicality, or just a maniacal urge to destroy the universe , which ultimately precludes any kind of long-term relationship By making sure that the relationships are doomed via the use of flawed love interests, the writers are

able to make sure that Status Quo Is God without having legitimate love interests Stuffed into the Fridge . The trouble is, when it's done to a character several times over the course of a long-running series, they end up coming off as either having really bad taste in love interests or being a magnet for psychotics. Or both For this reason, long-running series characters are the main ones to run into this problem, especially ones who use Girl of the Week or Monster of the Week format (usually the two end up being combined). Usually only males suffer this problem, but that has more to do with the fact that Most Writers Are Male than any inherent quality of this trope Interestingly, this usually only happens to secondary characters — leads tend to have more functionally sane love interests. In any case, all of them suffer from the Cartwright Curse Like everything else that he can't catch a break with, the Butt-Monkey is usually the most common victim of this trope See also: Dating Catwoman , Fatal Attraction , Romantic False Lead

Heroes have a Fatal Flaw which they wrestle with on a consistent basis. This may open them up for specific conflicts later—when a protagonist's fatal flaw is encountered through the course of a plot, the audience's reaction is very tense This is not to be confused with what Aristotle calls hamartia</, also a key part of Tragedy . A hamartia is a mistake or error a hero makes which leads to his undoing. It is the same as a fatal flaw (though the two often overlap). This confusion arose from the misunderstanding of Aristotle's Poetics in the 19th Century In classic literature, a Fatal Flaw is often what prevents a Tragic Hero from succeeding, or serves as the cause of their Tragic Mistake . It is usually some sort of character deficiency listed below or, in conventional television, an addiction of some sort. In modern television, the Fatal Flaw is more likely to lead to a Very Special Episode When a hero zeroes in on a villain's fatal flaw (and they usually do), do not expect them not to exploit</ it Note the resemblance to the Seven Deadly Sins . Also see Virtue/Vice Codification for a more comprehensive list of vices identified by various authors throughout history If the Fatal Flaw doesn't play any role in the story, it's an Informed Flaw . If the flaw isn't quite so fatal, you're likely dealing with Mr. Vice Guy . If someone else ensures that the flaw is fatal, it's Flaw Exploitation . A literal fatal flaw, as often seen in Science Fiction and fantasy , would be Phlebotinum Breakdown and/or Achilles' Heel . If you were looking for a fatal floor , see Pit Trap or Death Course

A performer dies suddenly while on the job. If the audience doesn't realize what's going on, it's a Real Life example of All Part of the Show . Can be a "Funny Aneurysm" Moment if they had acted such a scene in character or a comedian's routine involved jokes about their own death. For understandable reasons, a production where a near or actual death occurs is often a Troubled Production . Film and television usually go around this with a Fake Shemp . Most of these and more can be found on the Snopes.com </ listing . See also: Examples In Fiction (beware of spoilers):

Also called fatbastarditis</. Once a television character reaches a certain level of tubbiness, the show they are in will lose sympathy for them. It is generally assumed that overweight people are either pathetic, obnoxious losers or greedy hedonistic Corrupt Corporate Executives . They also tend to be portrayed as ludicrously obsessive eaters. Furthermore, most are portrayed as lazy, having poor hygiene, bad grooming, and no fashion sense . Glandular conditions, genetic tendencies, a natural endomorph body type, low metabolism, and weight gain as a side effect of prescription drugs are treated as lame excuses alongside the "I'm just big-boned" mold. This trope is Older Than Steam (when resources are short and the peasants are starving, the rich fat guy who owns their farms will attract considerable resentment), but with the introduction of synthetic, high-fat foods in the early twentieth century, which enabled people from most social classes to gain weight quickly, the kind of immorality it was used to signify changed considerably. Prior to that point, being fat was considered high fashion and a status symbol in an unequal world — examples include Adipose Rex and how having a fat wife proved that the Railroad Baron had enough money to feed her a lot. Nowadays, obesity is more associated with the poor, as processed food is far cheaper than healthier alternatives, and a lower-class Fat Bastard will usually be used to illustrate the physical, intellectual, and moral inferiority of the slobs in a Slobs vs. Snobs conflict that takes the latter's side. Interestingly, some comedians (usually fat ones) complain about Political Correctness Gone Mad when it comes to fat jokes... although the sheer quantity of examples available tends to disagree on this point. Obesity is so universally seen as a negative character trait that it's relatively common for characters to be given some Adaptational Attractiveness to offset this fact. Compare Big Eater and Villainous Glutton (often with Jabba Table Manners). Fat Bastard and Big Eater are usually (but not always) mutually exclusive. While Fat Bastard is often fairly ugly, the Big Eater usually has a somewhat pleasant appearance. This is because the former is played for villainy and the latter for laughs. Dead Weight is this type... but undead! When a Fat Bastard does their own fighting, they can be a simultaneously humorous and terrifying foe for a hero to face off against — these portrayals often invoke the character's obesity as a Disability Super Power or Power-Upgrading Deformation . Kevlard is a commonly invoked trope, particularly for a Stationary Boss or Mighty Glacier villain. Stout Strength is also a stock trait for these villains, and they will rarely be Acrofatic . When facing a villain with more than one of these traits, crying is an acceptable tactic . This trope is named after the character from the Austin Powers </ movies. He epitomises this trope to such an extreme that it qualifies as parody. God help you if such a character is Large and in Charge — they could very well be a Corrupt Corporate Executive or Morally Bankrupt Banker . Worse yet, they could be an Adipose Rex . (Bear in mind that the latter is not synonymous with this trope, though.) Fat Idiot and Fat Slob portray similarly negative images of the overweight, though not necessarily unsympathetic ones (there are plenty of dim but good-hearted fat characters) and it's entirely possible to be a Fat Bastard without being either of those other two. Contrast Big Beautiful Man and Big Beautiful Woman (men and women who are attractive because</ they're chubby), Big Fun (fatness = jolly and great fun to be around) and Lean and Mean (a skinny</ bastard). Often stems from Evil Is Bigger and Beauty Equals Goodness . See Also Big, Fat Future .

It seems that whenever there's a gang of lead characters in comedies, children's media, and sitcoms, there's always one</ person that's fatter than the rest of the cast. Usually male, and they'll almost always be the Butt-Monkey / Chew Toy / Plucky Comic Relief - often, though not always, through their Big Eater and/or Gasshole tendencies. When the Fat Comic Relief is of the Big Eater variety, their comedic scenes often involve food; such as eating all the food meant for everyone else , and/or being Obsessed with Food even in situations where they should instead be focusing on something else at the moment . Gasshole Fat Comic Reliefs tend to be Fat Slobs . If you have both flavors of this trope together, this character is very likely to often be Too Hungry to Be Polite Keep in mind that just because a character is both fat and a Butt-Monkey , that does not mean they apply for this trope. Butt Monkeys can be played straight or for sympathy, in which case they are not seen as Acceptable Targets , and so do not qualify. Additionally, their status as a Plucky Comic Relief or Butt-Monkey must be related in some way to their fatness. For example, a Butt-Monkey who is picked on because</ he is fat would qualify (if</ Played for Laughs), but a Butt-Monkey who is picked on for some unrelated reason (such as for being a Nerd) without consideration for their weight would not Sister Trope to Fat Idiot . This character is often the Fat Best Friend . You'll often find these kids gobbling up the ammo of a Food Fight . If the series takes place in school, expect them to be the most frequent target of The Bully . See also Big Fun

You were always going to read this category description.</ See also Seekers and Seers .

A trope most common in the Romantic Comedy genre. Alice and Bob , by complete random coincidence, keep ending up in the same places at the same time, usually while pursuing a mutually shared objective. The basic chain of coincidence goes as follows- Meeting the First: I find you very annoying, yet also charming in a vaguely erotic way. Oh well, not like I'm ever going to see you again. In narrative, this is a specific variant of Meet Cute . It differs from the standard largely in that characters who meet via this method will feel compelled to give each other a chance, even though in other circumstances they probably would not consider it. Often uses a Double Subversion in that the third time they seem to meet, it will actually turn out to be a different guy- and then Bob strolls into the shot a few seconds afterward. Note that while this trope is most commonly used for the sake of romance, it can also be invoked to set up the meeting of a band of True Companions , particularly characters who may not have much in common otherwise. Related to the Red String of Fate . See also You All Share My Story , Forgotten First Meeting , and We Gotta Stop Meeting Like This . Compare Introduction by Hookup , where they have a brief fling before</ meeting again.

Think death is the cruelest fate? Think again. There are several things much worse: torture , taxes , and tofu , to name but a few. And more often than not, some unfortunate soul will experience it. Originally, this phrase was used to mean the rape of virgins in Gibbon's 1781 work Decline and Fall of the Roman Empire </,

but now there's even worse than that This phrase is usually used in a Just Between You and Me moment by the Evil Overlord as they boast about the agony-inducing Death Trap that awaits the hero for delaying their plans . It's also fairly commonly used as a warning to the hero against seeking forbidden power or knowledge , and consequently to foreshadow the particular Karmic Death the villain will suffer because of meddling with the universe's Cosmic Keystone The more fantastic the particular setting, the more creative villains (and sometimes heroes) usually get with this trope. If the victim is immortal, this fate may even replace </ death, which might suck royally. For characters who welcome dying (for example, to become martyrs and be posthumously considered heroes), one could invent a lot of ways to prevent their dream from coming true (and sometimes, just for added cruelty, kill them anyway). That is not to mention the tortures so horrible that death seems a mercy and a long-awaited release: Mercy Killings are common when heroes find anyone in this state. If the character can only beg for assisted suicide, I Cannot Self-Terminate occurs; if they can act on their own, they are often Driven to Suicide . Indeed, since all involve choosing death over a given fate, the characters often conclude that dying is preferable to that</ fate. Contrast Cruel and Unusual Death , for when the victim instead gets a gruesome death that sucks beyond telling Compare Cruel Mercy , Empty Shell , To the Pain , The Punishment , Room 101 , Tailor-Made Prison , and Cool and Unusual Punishment . For extreme examples of this trope, see And I Must Scream . Not to Be Confused with A Fête Worse Than Death , though the two can occasionally overlap

Do not list the real life examples here . It should also be noted that Do Not Try This at Home applies in full in this case. While reality can often suck a lot</, using this trope as an excuse for suicide (or simply choosing death when given a choice) is nearly always a wrong answer. And that is not even mentioning using Mercy Kill as an excuse for choosing death for someone else</ against their will.

A fairly common trope in animated works, this happens when a plump character tries to make themself look strong. They'll often do this by grabbing their fat waists and pushing them up, for the illusion of a narrow waist and barrel chest. The fat then drops back down into place for comedic effect. If they are stout and strong , Fat and Proud , a Big Beautiful Man , a Big Beautiful Woman , or any combination of the above, they might just flex with both their fat and muscles on display There's some Truth in Television to this, as posing technique can significantly transform how someone looks. In the sport of Bodybuilding , where having a V-shaped upper body is rewarded, contestants who are not genetically blessed with a narrow pelvis—or worse, are suffering from a distended midsection—can make themselves look more streamlined by sucking their gut in, which at the same time inflates the thorax and improves their taper. It’s difficult to keep it sucked in through an entire show, however, especially since bodybuilders compete while depleted of water and calories, and posing is more strenuous than it looks. Therefore, even if someone's midsection looks pretty respectable while they're locked into the pose, the moments when they relax or try to catch their breath can be very unflattering if they've got a bad case of bloating Compare Of Corsets Funny . See also Fake Muscles . Sister Trope to Flexing Those Non-Biceps , where the character doesn't even have fat to

flex

Children have a bit of a strange understanding in regards to sexual relationships between adults. If you don't know about the intricacies of all that kind of stuff, it just seems like the husband-wife relationship is between two people who love each other a lot. Never mind what kind</ of love it is. Obviously, since we're talking about little kids here, the effect is usually sweet and endearing rather than creepy This trope is the observation of that childhood fantasy, usually but not always made in reflection on past events, as from an adult (or at least teenage) woman's perspective. Usually, the character in question looks back on this attitude and laughs — a boatload of Squick and concern elicited from viewers if they still have this attitude and mean every word of it Bear in mind that a lot of the time, fans take things a little too literally. The usage of this trope is more common in Japanese-themed works than in Western ones, although it does appear in the West from time to time Related to Brother–Sister Incest , Big Brother Worship , Big Brother Attraction , Like Parent, Like Spouse , Precocious Crush , and Wife Husbandry

This is a sailor who has endured storms , pirates , fog , and all the perils of the sea . He has been in a Bar Brawl in every port and he has never lost. Sometimes he is a Drill Sergeant Nasty to all the scurvy foc'sle swabs. He is a maritime Old Master . Sometimes he develops a Big Brother Instinct toward the Plucky Middie . But he is a lord of the sea and all sailors must heed him or endure his wrath. Often wears a Sea Dog Beard Can end up The Storyteller with all the tales he has to tell about his adventures and the wonders and dangers of the sea. If he actually serves in a Navy then he's likely to cross over with Old Soldier Compare and contrast Lord of the Ocean , who is often more aggressive and temperamental due to the association with more "active" water (ocean waves), and Water Is Womanly , usually more calm and graceful as associated with more "still" water

Like Dastardly Whiplash , this is an oddly specific character. Often a villain, or at the very least extremely shady, the Fat, Sweaty Southerner in a White Suit is where the Corrupt Hick intersects with the Villainous Glutton . They are always obese. They always speak with a strong Southern accent, normally an upper-class drawl. They are almost always dressed in a white suit, cane optional. If it's not truly white, it'll be pale enough to have the same effect. If it's someplace in the Deep South , like Mississippi or Louisiana, they will be extremely sweaty and constantly dabbing themselves with a handkerchief when not lazily fanning themselves. This is optional in places like Kentucky, but they will occasionally manage to be sweaty even in an Appalachian winter The root of the stereotype is in actual Southern fashions, combined with negative stereotypes of plantation owners. The white suit was an enduring Southern fashion down to the '70s, and can still be seen to this day because the South is hot</, not to mention humid. The best such suits were made of linen, which is naturally moisture-wicking and highly thermally conductive; the next-best quality was seersucker, a cotton weave in which most of the cloth stays away from the skin. (Seersucker

suits are fashionable to this day in Washington, D.C. , which is very much a part of the South's subtropical climate zone.) Being white meant that the suit reflected light, and so didn't get hot as fast as other fabrics; it also allowed its wearer to show off that he didn't have to do anything that would get his clothing dirty Historical figures who sported the Southern white suit included Mark Twain and Colonel Harland Sanders , but neither of them was particularly fat or particularly villainous, unless in the latter's case you asked the chickens. Mark Twain's satires of Southern aristocracy might have been the Trope Codifier here The villainous version is a shameless glutton; the usual objects of his gluttony are mainstream Southern foods (sweet, fatty dishes which originated in the wet, cold, rainy Scottish Lowlands, and were definitely not adapted to suit the wet, hot, rainy Southern ones), but he's often found in association with gumbo, suggesting that he may have Cajun origins He occasionally has Jabba Table Manners and often has a careless, laid-back manner. He's probably Nouveau Riche and quite possibly a Corrupt Hick ; he's almost certainly not an aristocratic, genteel, warlike Southern Gentleman He might be rich by anyone's standards, or he might just be better off than the rural poverty that surrounds him. One way or the other, he can afford very large quantities of very good food, and it's not at all unlikely that he gets the money from being part of, or the leader of, a corrupt local government One occasionally sees an uncorrupt or out-and-out heroic character of this sort. They sometimes sell food; at other times, they, like the Southern Gentleman , are lawyers For non-fat, non-sweaty, non-Southerners who may have a different set of villainous characteristics, see Villain in a White Suit . For Southerners too blue-blooded to sweat, see Southern Gentleman . For characters who are more powerful and even less genteel, see Corrupt Hick (remembering that there's a lot of overlap). For villains who eat a great deal, Southern or not, see Villainous Glutton . And for other stereotypes of the obese, compare and contrast Fat Bastard , Fat Idiot , and Fat Slob

A villain whose politeness is an act that only serves to enhance</ their evil. Unlike Affably Evil characters, whose niceness is genuine despite their malice, these villains adopt</ this pleasant persona. They lack a villainous demeanor, yet they are truly, wholly, and unrepentantly evil regardless. This kind of villain maintains a friendly, courteous mask even as they commit incredibly heinous and horrific acts . An Affably Evil villain will treat The Hero like a friend , genuinely regret having to fight them, and seriously try to win them over. A Faux Affably Evil villain will say, "You know, I always look forward to our little meetings" while gruesomely torturing them for fun At heart, they're utterly soulless, but they mask it with a pleasant, polite, "normal" attitude, perhaps because they have social standards to live up to or because their pleasantness reflects their sheer enjoyment of evil . Maybe it's a sign of their severely warped morality, or a form of deception or psychological warfare. Or maybe they're just unbearably full of themselves . It's anyone's guess what this kind of villain will do if they suffer a Villainous Breakdown ; maybe they will drop all pretenses and find that they are Not So Above It All or maybe they will fall into a state of Dissonant Serenity , blabbering off-kilter pseudo-mannerisms as they lapse into their final and greatest puppy-murdering spree Do not confuse with Laughably Evil

, which is a villain who is funny rather than polite. While many Faux Affably Evil villains are also Laughably Evil , many other villains are one but not the other. Compare and contrast Affably Evil (whose niceness is sincere) and this Trope's opposite , Noble Demon (whose demeanor is evil in contrast to their actions). For the Evulz is a common motivation, though using this trope as a form of Obfuscating Stupidity is also possible. Also see its (possibly) downplayed counterpart Bitch in Sheep's Clothing , where a Jerkass at the best of times, is hiding behind a Nice Guy facade in order to trick people and doesn't necessarily keep it after showing his real face, and Stepford Smiler , when a miserable and/or mentally unstable person is hiding behind a cheery and sweet facade. May also overlap with Bantering Baddie Buddies , Soft-Spoken Sadist , Sugary Malice , Wise Old Folk Façade . This trope may also be a fan of Confound Them with Kindness Contrast with Good Is Not Nice , which is a good character that just isn't polite. Not to be confused with Wicked Cultured where a cultured façade hides unpleasant behavior. This trope is also one of the defining traits of a sociopath

While the Documentary Episode makes a point of acknowledging the presence of the camera crew, the Faux Documentary rarely does so, allowing for scenes in which the characters are by themselves or are doing things they would not do if there was an actual camera crew around. Where the camera crew is acknowledged, it is usually for the sake of a brief joke This gets around some of the problems encountered during the filming of This is Spın̈al Tap </ , where entire scenes had to be cut from the film because the director and writers didn't believe that the characters or their lawyers would allow them to be shown (e.g. the sequence where the band get their chauffeur stoned) Not to be confused with a real Documentary , and definitely not with a Documentary of Lies . See also Camera Abuse

A comedy trope where something is played up to be terrifying, and it clearly is not. It's not even something that sets off a common phobia. Sometimes the scene is shot like a horror film. Bonus points if the "Psycho" Strings are playing Advertisements can do this, to show how either not using the product or using a rival product can be horrific Often a Caustic Critic will do this with finding out he has to review some works he really hates, as a way to show that Suckiness Is Painful . Sometimes, even just holding the work in hand is enough to cause emotional scars. Often happens when a character has an Irritation Nightmare , too A Super-Trope to Place Worse Than Death Compare Absurd Phobia , Cool and Unusual Punishment , Evil Cannot Stand Cuteness , Felony Misdemeanor , Lightmare Fuel , Screaming at Squick , Nightmare Retardant , Mundane Ghost Story , Comical Overreacting , Mock Surprise Reaction , Arson, Murder, and Jaywalking , Played for Horror , and Anything but That! Contrast Accidental Nightmare Fuel and Fridge Horror (portrayed as not scary, but ends up being so)

Mostly a Dead Horse Trope A pair of characters (or one of a pair of characters) is in love, but because they are of different ethnicities, they don't actually pair up, out of fear of a Maligned

Mixed Marriage . Then it's revealed or discovered that they aren't of different ethnicities after all, and everything is fine and they happily get together Faux Interracial Relationship is to Maligned Mixed Marriage as Not Blood Siblings is to Brother–Sister Incest

Satirical "How To" guides. The instructions are faulty , or the person following them does it horribly, or the instructions are loaded with irony about how not</ to do it. One sure thing, the point is to laugh , not to teach Compare Mockumentary , Little Known Facts , Parodies for Dummies , Fauxtivational Poster , Faux Documentary , Sabotutor , Anti-Advice Contrast: Documentary

In a "Fawlty Towers" Plot, one of the characters tells an initial lie, then other lies must be told in order to sustain the original lie, until the entire construct of falsehoods becomes too ridiculous and convoluted to hold together, and comes crashing down upon its creators in the most destructive, humiliating, and sometimes hilarious way imaginable A standard sitcom plot since the days of I Love Lucy and The Honeymooners </, it was perfected in 1975 and 1979 by John Cleese and Connie Booth for the Fawlty Towers </ television series. In its typical form it is a specialized form of farce , although it can also be Played for Drama There's a difference between a "Fawlty Towers" Plot and a Snowball Lie . A "Fawlty Towers" Plot typically has only one character doing a majority of the lying, compounding on that lie with even more lies; a Snowball Lie is usually only one lie that gradually gets bigger and bigger over time, dragging others into the scheme, willingly or not The Fawlty Towers Plot Lie is usually exacerbated when a suspicious significant other chooses to Pull the Thread . May lead to the need to Maintain the Lie . Also compare Crime After Crime , which is a much darker, criminal counterpart to this trope If this kind of plot is executed badly, or is misapplied in a dramatic context, it can become a glaring example of Poor Communication Kills . Can lead to an Honesty Aesop

Yikes! Oh! It's y-you! Sorry I f-f-freaked out like that! You just s-startled me! Well anyway, this t-trope is n-not to be confused with n-n-n-nightmare fuel , which is a popular page that describes various audience reactions, which also scares me! It's not tropes used in FEAR </, though a few below are. It's not The Fear Index , even though this is one. Compare Horror Tropes , Anxiety Tropes , and Weakness Tropes . Those really make me feel uneasy! Contrast Bravery Tropes . Oh, how I wish I were one of those! All these tropes are really scary! Let's hurry up and get this over with! I'm not sure how long I could sit through these!

A somewhat common staple in criminal and horror fiction. In a terrifying twist on the Gluttonous Pig trope, serial killers or mobsters use a secret pig farm to dispose of their victims' bodies. It's most likely Truth in Television . Pigs are omnivores rather than herbivores, meaning that they do indeed eat meat if they are able to come by it. Fact of the matter is, pigs can eat almost anything they can chew. No matter how special and worthy of respect we consider the corpses of us humans, it's the same as any other carcass to a pig,

meaning that they will</ chow down on it. A pig's body is also quite up to the task of digesting almost every part of the human body. They can not only chew and digest human flesh, they can also readily digest human bone without excreting a noticeable trace of it. Of course, they can't quite chew the skulls and longer bones that humans have, but if our killer has enough determination, they can just break said bones into smaller, more chewable pieces. They also can't digest human hair and teeth, but it should be a simple matter to shave your victims' heads and pull out their teeth before chow time, right? Not only is this trope plausible, it's also downright horrific because it not only involves an invocation of humanity's Primal Fear of being eaten, but also the chilling factor of role reversal. Outside the pigpen, you eat pig (if you aren't Jewish, Muslim, or vegetarian). Inside our killer's pigpen, however, pigs eat you . Also, there's the possibility that someone will eat the pigs that have been eating humans, which isn't the same as I'm a Humanitarian , but still squicky in its own way. Also, this trope can also be applied when some Fat Bastard gets eaten by pigs, in some kind of Poetic Justice . Subtrope of Disposing of a Body , Eat the Evidence , and Fed to the Beast . It's also a Darker and Edgier subtrope of Gluttonous Pig . For bonus irony, human flesh is sometimes called "Long Pork" due to its alleged similarity to pig meat. So be doubly careful if someone offers to serve you Long Pork Pies . This is a Death Trope ; spoilers ahoy.

Feeding people to monsters or man-eating animals is one of the classic perils that villains and others subject people to. Sometimes this is a Human Sacrifice to a demon, dragon, alien creature, Eldritch Abomination , or some other monster or beast. These scenarios usually have some poor unfortunate Chained to a Rock awaiting their doom. Maybe the local religion is a Giant Animal Worship which demands this to be done to Appease the Volcano God . Maybe the monster wants tribute in the form of people to eat, such as with many dragons. Maybe this is even meant as a punishment, in the case of Daniel in the lion's den from The Bible or Andromeda from Classical Mythology . Other times, the beast is a Right-Hand Attack Dog — a pet or other creature that the villain keeps around for some reason, which he uses to dispose of victims, and more than one villain's underling has met their end in this way, usually after they've failed him or outlived their usefulness . If a villain tries to do this to the hero, expect the hero to kill the beast or escape in some other fashion. It's also not uncommon for villains fond of feeding people to beasts to meet their end by being eaten by the beast in turn , if the hero doesn't kill the beast beforehand. Another possibility is that the villain may set up the hero to be killed by local wildlife to obscure his own responsibility for the death. Fantasy villains have all kinds of monsters to choose from, ranging from dragons to giant snakes to giant vermin to demons or something even weirder. Contemporary and pulp villains will often have their victims eaten by tigers or sharks or some other large man-eating carnivore. Sci-fi villains will often have some really freaky alien monster to feed people to. The Shark Pool and the Snake Pit are two quite common forms of this particular trope. So is Fed to Pigs , although the victim is usually already dead in that case. (Usually.) Also related as Animal Assassin , a more clandestine way of killing people using animals. See also Just Desserts , Eaten Alive , and Eat Me . May overlap with Throw 'Em to the Wolves (although in that trope metaphorical "wolves" are also allowed) and Exit, Pursued

by a Bear . Subtrope of Eating the Enemy

Microphones have been around since the 1870s, so they have become a familiar piece of technology. Yet despite many technological developments since then, one problem plagues microphone users in Fictionland: feedback. This loud squeal or throbbing sound is so ubiquitous that Ebert's Glossary of Movie Terms has a "Feedback Rule". It seems inevitable that someone using a microphone will be interrupted by this sound, particularly when first speaking into it The sound can be used in different ways. Sometimes a savvy character will do something on purpose to create this sound in order to get attention, such as whistling into the mic, moving it near a speaker, or performing a Mic Drop . On a live recording of musicians or other performers, its presence lends credence to the notion that the performance is somehow raw or uncut and thus more realistic or natural. In radio plays and some early animation, the feedback is an audible cue that a microphone is in use, a kind of demonstrative sound effect that is helpful to the audience. Feedback can also serve to point up a speaker's inexperience with sound equipment (moving the mic too much and/or pointing it towards a nearby speaker being likely to result in this sound) , and the audible faux pas</ is useful for indicating anxiety and prompting laughter . By extention, it may serve as an audible indicator of general inexperience with public speaking or performance This Stock Sound Effect may have some overlap with The Coconut Effect when the creators are trying to highlight microphone use and think this is what audiences expect a mic to sound like. It may also result from an instance of Is This Thing On? , when an inexperienced user thinks they have to test the mic before saying their piece

Played with in a Christmas Sketch of Dad's Army </ , the platoon are recording a Christmas message for radio and keep hitting the microphone. The audience doesn't hear the feedback but the poor sound technician does through his headphones.

The Monster of the Week is apparently Immune to Bullets , but not only that, it's getting stronger too! Maybe you shot it with an Energy Weapon, maybe you intervened in a situation and caused a worse problem to appear , or maybe you just hit its Berserk Button , but it didn't die, and now it's stronger than ever. this is the process by which attempting to kill or destroy something ends up making it grow, become more powerful , or otherwise help it out. This occurs most often as a form of Energy Absorption , although Energy Absorption is one specific type of this. If punching a man makes him get stronger, or attempting to stamp out a religion gives it martyrs and helps it spread, that's a case of this. If shooting a laser at the enemy makes it grow stronger, then it's both. If you're using lightning to animate a dead body, that's just Energy Absorption . See Also: Compare Heal It with Fire , Infernal Retaliation . Contrast Kill It with Fire , Feed It a Bomb , Revive Kills Zombie and Gone Horribly Right . A form of Attack Backfire .

You have The Mole on your team. Perhaps you even know who he is, feeding information to the Big Bad , or (if Divided We Fall) to The Rival . How convenient! You can now spread whatever (dis)information you want spread ! You may even manage to trigger an Enemy Civil War

. This trope is when a group that has been infiltrated by The Mole ends up exploiting that Mole by deliberately spreading information, or more usually disinformation. There are at least two reasons why they'd do this: A "Mole" who willingly feeds the information you want is a Double Agent . A Mole who is Becoming the Mask may slowly move to being a Double Agent — though if the mole doesn't know you have twigged, there is the little problem that they will choose their own misinformation. Feed The Mole may lead to a You Have Failed Me moment for the unlucky mole concerned, if their boss ever figures out what they did. The boss may even accuse the mole of doing it of their own free will, when really the mole had no more idea what was going on than the boss did. On the other hand, if the Big Bad figures out or guesses that you know about the mole, he will know that you are feeding him information, false or manipulative, and therefore what you want him to think. If counterploys start forming on each side, this might tumble over into I Know You Know I Know and a Gambit Pileup may ensue. Note that this isn't exclusive to the hero; the Big Bad , The Dragon , or The Rival could just as easily manipulate The Mole in this fashion. The Chessmaster and the Magnificent Bastard are quite likely to use this tactic to confuse or to trick the hero If that's the case, then the tactic will generally be condemned more strongly by the audience as playing dirty than if the hero had used it, obviously because the audience is usually (Designated Hero notwithstanding) on the hero's side, or because it's more likely an opponent will be more ruthless by, for example, using it to get the hero killed. Might make for a good Reveal when the hero or the villainous mole says " My God, What Have I Done? " This is one of The Thirty-Six Stratagems , making it Older Than Feudalism . Compare Bluff the Eavesdropper and Staging the Eavesdrop .

A character says something inappropriate or embarrassing to the wrong person or within earshot of the wrong person . They mention having taken a woman's virginity in front of said woman and her new boyfriend. They wear fur in the presence of an overzealous animal lover . Or they eat peas with their knife . And now the eyes of the world are upon them , sneering and/or laughing contemptuously at their little (or not so little) faux pas A faux pas can be defined as "a social blunder" or "a violation [intentional or not] of accepted social rules or norms". It can be a Freudian Slip , it can put The "Fun" in "Funeral" , it can result in someone saying " How Did That Get in There? " It could even be something as simple as tripping and falling ("faux pas" literally means "false step"). And it is, 99% of the time, played for comedy in fiction Funny Foreigners and Fish out of Water are particularly prone to this (see Cross-Cultural Kerfluffle). You can only hope and pray that those around you will have the good grace to refrain from lining up and rubbing your face in it . Speaking of grace, this trope also comes into play when a character is saying grace before a meal, alongside another character or characters who have already begun eating food This trope has no connection whatsoever to the webcomic Faux Pas </ (which is actually pronounced "Fox Paws", unlike the French, which is more to the effect of "foe pah")

See also Forgot About the Mind Reader , where the character doesn't even have to speak. I Meant to Do That is when the character pretends the blunder was in fact done on purpose in order to mitigate the embarrassment. Compare Protocol Peril , which is what happens when a particular faux pas is treated as a life or death matter.

Young boys and girls are frolicking. Dad is smiling as he watches the game, and Mom is cheerfully making dinner. Then, before we know it, we're learning it's an ad for a plunger The Feel Good ad type is one that is known in the propaganda community as "transfer". Basically, viewer sees or hears X (such as a young boy playing with puppies), viewer sees or hears Y (such as hearing a man talk about a really smooth soft drink), and viewer will equate X with Y regardless of whether or not they're similar. Such is the Feel Good It's also a common practice in political ads, as politicians will try and show that hey, they care</ about the working citizen Also the number one reason people ask about side effects

In this age of digital media and Internet deliverables, the idea that a few decades ago people were shelling out $30 to $50 for a 5¼" floppy disk in a cardboard box must seem bizarre and incomprehensible Digital or not, though, software today is managed entirely by your console or software platform's DRM systems. If you went to a brick and mortar store, you will most likely only get a DVD case and a quick install guide, but in the days before digital downloads started becoming common, things were very, very different. The absolute minimum you could expect with a game was a printed manual, often a thick tome containing instructions, backstory, and even hints More than that, if you were buying a game from one of the really notable production houses, you got what are known as " ". These were real, tangible props, ripped straight from the game world. They were often incorporated into the game's Copy Protection mechanism in order to make it a little less jarring. Such things are almost entirely of the past Nowadays, game publishers sometimes make "collector's editions" of certain games, which usually means that if one pays extra for the game one gets various feelies and supplemental materials included with the purchase. Feelies may also be offered as a Pre-Order Bonus . This trend is leading to something of a revival of the concept Japanese domestic video and game releases are often noted for their high-priced (and high-quality) feely content, primarily because of tighter retail controls which enable very high end pricing Anime releases often come with these, as merchandise and DVD sales are a big part of the industry's revenue, and they make a natural combination. One of the most common inclusions is an "art box" meant to house further volumes See also Revenue-Enhancing Devices . Has nothing to do with Brave New World </, nor to be confused with the Alternative Rock band of the same name although the name is an intentional Shout-Out , or any innuendo

A short- short story (300 words on the average, although 500-word examples exist), ending in a pun or a punchline that is pretty obviously the only reason for the story's existence. The telling detail in a Feghoot is the groan emitted by repadaders/listeners when they hit the PUNchline . In essence, an Overly Pre-Prepared Gag in short story form Named for the character Ferdinand Feghoot, created by Science Fiction author Reginald Bretnor using the pen name Grendel Briarton . Bretnor chronicled Feghoot's adventures in the multi-year series "Through Time and Space with Ferdinand Feghoot!", in which each installment was a short-short that ended in a horrific pun Compare with "Shaggy Dog" Story . A form of Overly Pre-Prepared Gag . See also Collective Groan , which will certainly result if the Feghoot is told well

This trope is when somebody does something wrong, but it's a mild wrong, like a white lie, a low misdemeanor (as in a $20 fine), or something that at most gets a "Hey! Not cool!" from your friends, and then the show treats it as crossing the Moral Event Horizon or at least coming dangerously close. That lollipop you shoplifted? Those 50 cents it cost will land you about 50 years in prison! You scumbag</. How could you? The United Supermarket Corporation will starve</ because of you! How do you sleep at night, knowing what you've done!?</ This trope comes in 3 varieties: Since laws all over the world are rife with Values Dissonance , things that are misdemeanors or not even illegal in one country but treated as serious crimes in others can seem like this. Compare with: Contrast with: No relation to the notion of a "felony/misdemeanor" in some real-life jurisdictions, such as California. In-Universe Examples Only :

Felony murder, also known as constructive malice, is a legal rule used in the United States and some other jurisdictions stating that any death that occurs during the commission of a felony is first-degree murder . The common scenario is that of someone suffering a fatal heart attack during the course of a bank robbery. That death, which may have been caused by the stress of the robbery or the failure to get medical treatment caused during it, would be counted as first-degree murder. Likewise, numerous criminals have found themselves charged with Felony Murder because their accomplice was shot in self-defense by the intended victim. Cue the criminal's family screaming about how it wasn't even their poor misunderstood choirboy who pulled the trigger. The reasoning behind this law is that if the criminals had not been committing a felony, then the victim would not have died, therefore the criminals are responsible for the death. First degree murder is a capital (death penalty) crime in many jurisdictions, but Supreme Court decisions in the U.S have restricted this somewhat; in order to be eligible for the death penalty, a participant in a felony murder must either: Can serve as Justice by Other Legal Means . In the UK, this crime has not been used since 1957. In England and Wales, it is either considered manslaughter (culpable homicide in Scotland), or, if one person commits a crime that is "outwith the common criminal purpose" any of his co-criminals may be acquitted of it entirely. The classic example is a man, part of a group of bankrobbers, who murders the teller because he was having an affair with his wife, without informing his confederates that he was going to do so, in a plan which otherwise did not call for the use of violence. In Australia, the Crimes Act 1900 provides the statutory definition of 'constructive murder'. The act or omission causing death must be "done in an attempt to commit or during or immediately after the commission, by the accused, or some accomplice with him or her, of a crime punishable by imprisonment for life or for 25 years". The rationale is to discourage acts of felony which are dangerous to human life. In some jurisdictions, the constructive murder rule has been abolished, but has been replaced by a similar statutory provision in the Crimes Act 1958. Additionally, many jurisdictions have enacted legislation that explicitly defines deaths caused by arson to be murder. Note that this rule is the subject of great controversy in America. Because any</ felony can serve as the basis for a felony-murder conviction, it can have some odd consequences. The drafters of the (MPC) noted

that because it is a felony in most states to sell a visibly drunk individual alcohol, if the drunk drinks himself to death or crashes his car and kills himself or other people, the liquor store shopkeeper or bartender who gave the drunk the booze might be criminally liable for murder under the traditional felony-murder rule. The two sides of the debate both make strong cases on this example: The MPC (adopted by somewhere in the ballpark of 10-20 states) includes a very narrow version of the rule that explicitly defines it as a form of depraved-heart murder. One state (New Mexico) has modified it in a manner that makes it more or less useless. Three states have abolished it entirely (Hawaii and Kentucky by legislative enactment, Michigan by judicial decision).

The Female Gaze is a Gaze trope about the way a work is presented as from a female perspective or reflects female attitudes, either because of the creator's gender or because it is deliberately aimed at a female audience. Although looking at sexy men can contribute to it, Female Gaze is not restricted to that but is more importantly about the expectations of how the (presumptive) audience relate to the work Female Gaze is a Distaff Counterpart to Male Gaze . It is generally less common than its Spear Counterpart , and this is largely believed to be due to Most Writers Are Male May overlap with Homosexual Male Gaze . Compare Eating the Eye Candy and Longing Look

First, she turns you on. Then, she turns on you. The typical client in a Hardboiled Detective story (French for "fatal woman," idiomatically "woman to die for"). You know the type. Dressed all in black with legs up to here and shady motives, she slinks into the PI 's office, sometimes holding a cigarette on a long, long holder , saying "Oh, Mr. Rockhammer, you're the only one who can help me find out who killed my extremely wealthy husband." Did she do it? Do I care? Wait, where'd that saxophone music come from? Whatever her story is, whether she did it or not, she's definitely keeping some secrets . The Femme Fatale is sexy and she knows it . Made famous by Film Noir and hard-boiled detective stories, she manipulates and confuses The Hero with her undeniable aura of sexiness and danger. Unlike the virginal and sweet Damsel in Distress (or possibly Action Girl), the Femme Fatale exploits with everything she's got to wrap men around her finger. (In some eras, use of make-up is a tell-tale sign.) He knows</ that she's walking trouble and knows much more about the bad guys than she should, but damn it if he can't resist her feminine wiles. If the Femme Fatale is vying for the hero's romantic attentions she will likely have a sweeter and purer rival The hero might decide that she's not worth the trouble she causes, but if he doesn't, then they might become an Outlaw Couple . While related to The Vamp , the Femme Fatale is not just any seductress; she has a distinct look and feel. The main distinction is how she presents herself. If you know</ she's dangerous from the start, but she's sexy enough that you don't care, she's likely a Femme Fatale. On a lesser note, the Femme Fatale generally uses sensuality instead of upfront sexual advances. She may imply</ that you could have sex later, but she'll never promise it, not even say it—that would decrease her air of mystery and power. Her wiles may include apparent helplessness and distress, and appeals to the man's greed, desire for revenge, or gullibility, as well as the implication of possible</ romance or sexual rewards, while The Vamp more often relies on raunchy sex or the promise of it sometime real soon. The Femme Fatale is generally villainous, and heroic exceptions—in

an artificial context to snare the bad guy—are closer to Heroic Seductress . Frequently, she is a Wild Card , changing sides according to her own desires and goals; she does not often go through a High-Heel–Face Turn . If she's actually a kind-hearted person who puts on this facade just for fun , this is Trickster Girlfriend . She's often The Chanteuse or the Lady in Red but possibly dressed like everyone else so as to not be Colour-Coded for Your Convenience . The Femme Fatale is one of the female character types that can often be seen wearing High-Class Gloves , especially in conjunction with her sexy evening gowns, and, during the daytime (particularly in old Film Noir movies), is often seen wearing a "fascinator" or "pillbox" hat with a partial- or full-face veil. She's definitely</ not above using the Kiss of Distraction . If she can fight too , then she's really</ going to be trouble. Subtrope of Manipulative Bastard . The younger version of this is the Fille Fatale . The spy version of this is Femme Fatale Spy . If the femme fatale also eats the targets of her manipulations, she's a Literal Man Eater . This item is available from the Trope Co. catalog. </

Bob's bachelor pad looks pretty decent, almost like a model home. Of course, that's just for when most people come over. Bob either hired a Gadgeteer Genius or is one himself, and has rigged up his house better than Bruce Wayne ever dreamed of doing. Yet, Bob isn't Q from the James Bond </ stories. He's a cad , and his home is rigged with the latest mechanical ways to get a woman in the mood , from a luxurious bed from secret corners, to romantic music at the flip of a switch This is usually a comedy trope, and would rarely happen in a straight drama The trope name is a Portmanteau of Feng Shui and "SCHWING", the sound Wayne and Garth make whenever they see an attractive woman Compare Lonely Bachelor Pad . A Sub-Trope of Super Multi-Purpose Room

No date at the Amusement Park , whether planned or unplanned , "Just the two of us" or "Let's all go together", is complete without a ride on the Ferris Wheel. In most Shoujo animes with such a date, the Ferris Wheel is the replacement for the often cliché Tunnel of Love: the cars only seat two people at a time, are perfectly private with no chance for interruptions , provide a romantic view of the city and amusement park lights, and encourage that now or never moment for the couple to share their feelings for each other. The scenes are easily predictable, based upon the viewers' current knowledge of the characters and plot from previous episodes/chapters. Some recurring examples: See also Tunnel of Love for another iconic carnival date moment. Not to be confused with the Ferris Wheel of Doom , or eating a date while on a ferris wheel. Be advised! This trope generally occurs at the end of an episode/chapter/series and may spoil a Relationship Upgrade or Happily Ever After for you!

Akikan! ! </: Najimi takes Kakeru up on the Ferris Wheel at the water park in episode 8. Her affection is clearly one-sided, however, and a lot of the moment is made possible, and then ruined, by Kakeru's sleepiness. Also, Played for Laughs , Kochikaze and Amaji ride it to spy on the former pair.

Few rides are as prone to breakage in superhero movies and shows as the Ferris Wheel. When the hero shows up, the wheel typically begins to shudder and collapse, dropping children and sometimes

falling completely over. A common variant is to have the Ferris Wheel rip loose from its hub and roll away A Ferris Wheel is the most useful ride for TV and movies because it is both big and tall (a hero saving people from a spinning teacup ride gone amok isn't impressive) and slow (If a rollercoaster doing a hundred miles an hour leaves the tracks, it's unlikely a superhero could respond in time to do anything more than help gather up the dead). Ferris Wheels are also large open structures with a lot of rods and beams that let athletic types show their stuff. Having a hero in the area thus generally causes any Ferris Wheel to suffer a sudden massive breakdown While a Ferris wheel separation would be devastatingly catastrophic in Real Life , it wouldn't roll very far. The wheel itself isn't very strong, and would collapse under its own weight. Fortunately, a breakage of this sort would be extraordinarily unlikely

A Speculative Fiction subtrope of Author Appeal , which is the deliberate creation of a future (or alternate history, or fantasy...) society in which the author's particular kink is "normal". That which is Fetish Fuel to us, is a commonplace to those in-universe. The difference between this and basic Author Appeal is the compulsion by some authors to justify their fetish. Quentin Tarantino having lots of shots of feet in his movies is Author Appeal . If he made a movie that explains how in the year 2525 everyone</ will be a foot fetishist due to some social or technological development, that would be a Fetish-Fuel Future. Used a lot in written erotica. Also some porn movies but not as much as you'd think, given that typically porn movies are Porn Without Plot and thus don't even bother with a story to the sex. Is sometimes used to "justify" the depiction of behavior and social structures that would otherwise push the characters over the Moral Event Horizon . (Although it can still make the world crapsack or crapsaccharine , and make some people suspect that the author actually advocates such values for real .) Sometimes characters of a Fetish-Fuel Future will consider the "normal" sexual practices of visitors to be taboo . See also Free-Love Future .

Fetish Fuel is a fan term used as a label for any element of a story that serves to titillate the reader's erotic or obsessional sensibilities. The term is not limited strictly to what your dictionary would define as a fetish, but it excludes Explicit Content . It stands in pretty well for the word 'fixation', actually. Both of these sentences mean the same thing: Fetish Fuel Station Attendant is an Internal Subtrope of this. They are Audience Reactions , whose In-Universe and invoked forms are called Fetish and Fanservice respectively. Now available in our Trope Co. catalog. We no longer collect examples of fetish fuel. We did so for long enough to establish that literally everything is someone's fetish fuel, and that some individuals are quite willing to go on about theirs at length. The topic seems to want to get out of Family Friendly territory too easily for TV Tropes. </

The only thing creepier and more dangerous than the Enfant Terrible . The Fetus Terrible hasn't even been born yet, but will become The Antichrist or a demon prophesied to bring about The End of the World as We Know It once it escapes from its womb. The woman carrying this (often literally) hell-born spawn is usually an innocent, unwittingly impregnated by the Devil himself, and the

other characters have to race to prevent the birth or stop the child from becoming the ultimate Enfant Terrible . Occasionally this can result of a perfectly normal pregnancy Gone Horribly Wrong pre or post conception, where the issue can be a mutant , Hybrid Monster , Undead Child or some other abomination. This trope can also overlap with Womb Horror , especially if the mother knows what's growing inside her Sub-Trope of Superior Successor , in cases where this isn't usual for the species

Feudalism IN SPACE!!! Kings and queens, princes and princesses , nobles , courts , Knights (in Powered Armor or Humongous Mecha).... A form of Days of Future Past which can incorporate elements from the High Middle Ages right up to the Victorian Age. The chief characteristic is that social status is legally enacted and hereditary . Occasionally we are told that the king/emperor is elected , but it makes no difference in their authority, and issues as who are the electors or who is eligible to run never come up. Among the commonest societies in Space Opera , Planetary Romance , and other forms of Science Fiction. Falls into two categories: Prone to Medieval Stasis , even though technology is far above medieval level. May also involve anachronistic items from real medieval Technology Levels . Evil nobles may restrict commoners' use of high technology; medical technology is particularly common, but commoners often live lives of drudgery and toil . The extent of which any of it can be considered "feudal" is up for grabs. Often an excuse to use Medieval European Fantasy tropes in SF. Frequently rather benevolent , but may range all the way to Aristocrats Are Evil and Decadent Court . However, it is seldom explicitly Dystopia ; Dystopian authorities tend to be more blatantly kept in place by naked force. This trope covers only societies where social status is legally</ inherited; 1984 </ , where the children of Party members are theoretically admitted because of an exam, and the children of proles who might qualify tend to vanish before it, does not qualify. Also, under this trope, the royals and nobles draw their authority from the law, where the ruling party of a Dystopia does not acknowledge anything as giving them their power. Often leaning towards the Romantic end of Romanticism Versus Enlightenment . In some works, heroes have great ease in converting them to democracies. Partly because writers seem to be unaware of any arguments against democracy, and of the complexity of developing a stable democracy. Discussions of in-universe reasons for feudalism should go on the analysis page.

A type of episode that centers around a Break-Up/Make-Up Scenario : two characters suddenly start feuding with each other, either over a minor matter that gets blown out of proportion, or sometimes for seemingly no reason at all . Sometimes, another character will try to get the two feuding characters to make up by putting together some sort of crazy scheme (i.e. writing fake apology letters), but there is actually a 90% chance that the scheme will fail, and the feud intensifies further From Bad to Worse . In the end, the two characters will invariably put behind their silly feud to help their friends in some kind of trouble (if not that, then expect them to stop fighting because of an Enemy Mine instead). An Aesop about putting behind your troubles usually will soon follow afterward They might be feuding over a common love interest , or

perhaps due to hometown prejudices , but sometimes the two may feud so long that, in the end, they can't remember what it was about Alternatively, two longtime friends get mad and breakup over some random bad event (often, a Girl of the Week can be the cause of such a conflict). Kids' shows seem to love this one, as The Power of Friendship is the backbone of their group dynamics This often leads to their other friends getting into an argument and/or and fight against each other, and taking sides . Much commonly, there's always a time where both sides have to reconcile and apologize to each other, which happens at the end of each episode in particular Sometimes a Merchant of Menace makes a few bucks by selling weapons to both sides, continuing and escalating the fight to fatten his own pockets If the conflict seems too reminiscent of a lovers' quarrel, Homoerotic Subtext may ensue Compare Achilles in His Tent . Sister trope to Split and Reunion . Not to be confused with episodes of the Feud Entire sections of Harry Potter a booby trap in one of Voldemort's horcruxes acting as an Apple of Discord by playing on Ron's insecurities

It's a sad Truth in Television that most of the time revenge triggers revenge, triggers revenge, triggers revenge ... you know how that goes . When this happens on a large scale, we have war . When it happens on a more private scale, between two family groups, we have the blood feud or vendetta. If the families of the first perpetrator and victim are large enough and roughly equal in power and resources, this can go on for a long, long time. So long, in fact, that it's rather easy for them to forget what the original cause of their fighting was. A feud usually doesn't help the mental health of the individuals or the wisdom of their family culture. This can lead to three most obvious conclusions: Many depictions of Feuding Families show a Grey-and-Gray Morality , as the feuding parties are not evil but committing cruel acts out of grief and rage. This scenario offers possibilities to explore all these themes, like the cause of war and peace, hate and forgiveness, right and wrong, and family loyalty. Following Romeo and Juliet </, there will often be a pair of Star-Crossed Lovers kept apart by the feud. This is a stock trope for any story about The Mafia or any other similar syndicates . The origin of the feud is sometimes unmentioned or very vaguely explained, as in Romeo and Juliet </ or The Adventures of Huckleberry Finn</ . Not to be confused with the Game Show Family Feud </ . In a Fur Against Fang setting, may result in a Vampire-Werewolf Love Triangle . See also Dueling Dojos and Small Town Rivalry . This is likely to take place in cultures with a high emphasis on Family Honor . Clashing Cousins is often due to this trope. Compare to Familial Foe . See also Feud Episode for when this kind of thing flares up for a single episode.

When a real-life institution is to be featured prominently in a series, it will be replaced by a fictional stand-in. This is done in part to avoid licensing issues, but also to avoid the problems inherent in twisting the institution to fit the specific needs of the show While this gives the writers the liberty to make necessary changes to the real-life institution, it does run the risk of giving the viewers an unintentional laugh. (Or occasionally an intentional one, as when the fictional version is used to provide a Take That! to the real-world counterpart). Also, the authors can easily forget that they already introduced a fictional counterpart to something, and end up creating another one, or even including
