* Treasure Hunt, with "waxworks" coming to life to startle the runner and give her the next clue.
* Treasure Is Bigger in Fiction: In fiction, gems are a lot bigger and gold a lot less heavy than in real life.
* Treasure Island (1934): A bunch of pirates after a treasure map break their way through into an inn with a log acting as a makeshift battering ram.
* Treasure Island: According to some of the pirate comments, not even Captain Flint would rifle the pockets of a corpse. This makes the way Allardyce's skeleton is used as a map point even more disturbing to them.
* Treasure Island against both the heroes and the pirates to ensure that he gets away at the end with as much money as possible, but he’s so charismatic and funny, with a few genuinely good traits to his name, that the reader (and even the heroes) can’t really hold it against him.
* Treasure Island, all the pirates are made hammy and somewhat comic figures, though they do have their menacing moments as well. Israel Hands is an extreme case; a significant antagonist in the novel, in the stage version he's an entirely comic figure (played by a professional clown) whose most notable achievement is blowing himself up in a gunpowder accident.
* Treasure Island, all the pirates wind up dead, including the ones who survive in the novel; some are killed along the way and most, including Long John Silver, are caught by a cave-in in the cave where the treasure is hidden. By that point the pirates have killed many of the loyal crew members, again including some who survived in the novel. (The production rather glosses over the question of who sailed the ship home again.)
* Treasure Island, and by the time they reach the island it's all Silver can do to stop them from breaking out into open mutiny before they get any clue as to where the treasure is hidden.
* Treasure Island, and contributed greatly to almost every depiction of pirates to come afterward.
* Treasure Island an extra gun hand against the pirates who'll inevitably turn on them once that happens. However, it's never entirely clear whether Silver would have kept his word to keep Jim alive if things had gone according to plan...
* Treasure Island", built in the Bahamas and intended to be a major tourist attraction. The site was scuttled when attempts to re-dredge the site after the area around the island became shallow failed, and they simply packed up and left the site to be pillaged by vandals.
* Treasure Island, Captain Flint killed the sailors who helped him bury the treasure. This is Standard Operating Procedure in pirate tales.
* Treasure Island: Captain Flint, who died prior to the events of the novel but whose actions are central to the plot.
* Treasure Island choose most of the crew. Amplified in the 1934 film, where Nigel Bruce gives the character a "Boobus Brittanicus" quality. Fortunately, once Silver's plot is discovered, Trelawney acquits himself very well, owning himself "an ass" and awaiting the captain's command.
* Treasure Island: Crewing out a ship for a secret mission in search of buried treasure, the characters hire a one-legged, tattooed old sea-dog with a Bristol accent and a parrot. But then, Long John Silver is the one who made all these traits stock attributes of pirates in the first place. Jim Hawkins still might have known better since he was specifically warned by Billy Bones to beware of "a one-legged sea-faring man" — they just decide he couldn't possibly have meant this particular one-legged sea-faring man.
* Treasure Island Dizzy is made funnier when you realize that Dizzy wears a hat which rather looks like Indy's fedora in the cover art of several other games.
* Treasure Island: Doctor Livesey spends significant time tending to injuries and diseases among the party, even treating the mutineers.
* Treasure Island, even more unusual when you consider that they spend at least half the book as antagonists. Silver is almost explicitly a replacement father figure. At least it explains why Jim, whose own father recently died, takes a liking to Silver despite having been warned about a one-legged pirate.

* Treasure Island for Bart, that are more in tune with her likes. Bart even tells her that she really bought those gifts for herself.
* Treasure Island had the runty pirate at the end who kept having to catch up to the rest.
* Treasure Island; he happens to sneak into the ship's food store for a midnight snack just before the pirates park themselves outside to plot their mutiny.
* Treasure Island. He's frequently overlooked and forgotten about, to the point that when half the crew mutinies and takes the loyal half prisoner, they forget to tie him up — which is only revealed several scenes later, because it takes that long for anybody to notice.
* Treasure Island, Jim and the gang are trying to find the hidden treasure of the infamous Captain Flint. One clue that they found was a skeleton —implied to have been killed by Flint— pointing to the direction of the treasure.
* Treasure Island, Jim attempts to explain something to Hands, a South American pirate who apparently speaks no English. Jim makes several attempts, each one louder, slower, with more simplified syntax and more hand gestures.
* Treasure Island: Jim Hawkins doesn't seem to suffer any long-term effects from being wounded and pinned to the mast by Israel Hands's dirk (which had previously been used to kill another pirate), or having to tear a bit of skin off of his shoulder to escape the pinning. It isn't even mentioned when Doctor Livesey sees him again.
* Treasure Island: Jim Hawkins starts as just an assistant inn keeper working for his parents, and learns to confront betrayal and violence in the quest for treasure. Ultimately, he decides that even the promise of more treasure would not entice him to revisit the adventure.
* Treasure Island: Number three is used several times throughout the novel. "Admiral Benbow" is visited three times by the pirates: first its Black Dog, then Blind Pew, and then Pew and Dog with the rest of their gang; there are three major adult characters and Jim's friends: Dr. Livesey, Squire Trelawney and Captain Smollett; as their evil counterpart there are three major mutineers: John Silver, Israel Hands and George Merry; Squire takes on the journey three of his servants (all of whom end up dead); there are three secret locations on the island where Flint hid his treasure, as indicated by the map; there are three major mountain tops on Treasure Island (named respectively after three types of masts); the "pointing arrow", which shows direction to the treasure is situated near three big trees; Ben Gunn spent three years marooned on the island; all the major action on the island happens on the course of three (and a half) days; at the end there are three surviving pirates left on the island; Ben Gunn spent all of his share in three weeks time.
* Treasure Island omits several of the crewmembers mentioned in the novel, with one notable omission being the first mate, Mr Arrow.
* Treasure Island prior to the events of the novel. They are never seen operating as a crew in the story, but given the levels of badassery they show individually, it is not particularly surprising that a crew with Jeremiah Flint as captain, Billy Bones as first mate, Long John Silver as quartermaster, Israel Hands as gunnery chief and foremast jacks built along the lines of Ben Gunn, Black Dog and Pew were able to amass 750000 pounds in gold and terrorize the Spanish main for nearly a decade.
* Treasure Island, protagonist Jim Hawkins is a girl (her full name is mentioned at one point to be Jemima). Dr Livesey is also female, as are several of the sailors and pirates.
* Treasure Island, Squire Trelawney does really badly with his choice of crew. He trusts Long John Silver immediately and fails to spot anything wrong with any of the obviously-evil characters Silver suggests as crew members. The ones he hires before he meets Silver are not evil but are all pretty useless (apart from Gray, who seems unlikely but turns out to have hidden qualities).
* Treasure Island, teenager Jim Hawkins does a good job of screwing up with the pirates' plans - starting with his taking the map and accidentally eavesdropping on Silver's mutiny plans.

* Treasure Island: The death of Mr. Arrow, who apparently fell overboard one night in a drunken stupor. In most adaptations that include this incident, a scene is shown of Silver blatantly slipping him rum so that he would be drunk all the time and no one would inquire into his death too much.
* Treasure Island, the picture of him on Long John Silver's shoulder had the parrot circled.
* Treasure Island, the pirates prefer to be called "gentlemen of fortune."
* Treasure Island. There are also a number of television series, as well as theater, radio, video games and music.
* Treasure Island, there's a scene near the end where the heroes think their ship has gone missing, and Trelawney starts monologuing about how they're going to be stuck on the island for the rest of their lives and are going to have to learn to live off the land and so on, and brushes Jim off several times before Jim gets a chance to explain that the ship is fine and still in the location where Jim hid it to keep the pirates from sailing off in it.
* Treasure Island, the setting of camp in the old stockade, and the death of Tom Redruth. Just as Captain Smollett is setting down to write his log, Hawkins returns and resumes the narrative for the remainder of the book.
* Treasure Island to test whether they're really there. Jim Hawkins takes it in good part, but Captain Smollett objects violently.
* Treasure Island: Trelawney's three manservants are all given single cabins, as if they were important passengers; yet they are all quickly slain and receive little characterization (although old Tom Redruth plays a slightly bigger role).
* Treasure Island uses a small one near the beginning: During the scene where Squire Trelawney is hiring crew for the voyage, a man seated nearby engages him in conversation, offers advice on who to hire, and ends up signing on himself as the ship's cook. At the end of the scene, the departing Trelawney asks his new friend's name, and the man twitches aside the cloak that was covering his legs, revealing a deficiency in that area, pulls a crutch from under his seat, and introduces himself: Long John Silver.
* Treasure Island: When the Captain's party gives up their stockade, part of their supplies and the map to Silver, he knows something's going on, but he never mentions his suspicions to the other pirates. When they arrive to the point where the treasure had been buried, they find that someone (Ben Gunn) had done it before - and the Captain's party ambushes the pirates, rendering all their efforts to nothing.
* Treasure Maps the king of a desert empire will fall ill and die, and his son will take his place. The new king will become evil and cruel, raising taxes and invading other countries. Natural disasters (famine, pestilence and drought) will ravage the land.
* Treasure MapX marks the spot after you take fifty paces east of that palm tree between the rocks!
* Treasure Mountain! have the same thing, if you swap flashlight for coins, and electric eels with coins laying on the ground.
* Treasure Mountain! with duplicate trophies. The coins are also sneakier.
* Treasure of Swamp Castle: The Baron's daughter drives the flute player to tears and he bends the flute out of grief.
* Treasure Of Tarmin features three particularly useful spell books at the higher levels: one that lets the player see through walls, a second that lets the player transport through walls, and a third that transforms any weapons into a platinum (highest value) version of itself.
* Treasure of the Four Crowns JT escapes from inexplicably explodes after he leaves. Repeatedly.
* Treasure of the Rudra: At the end of every Great Cycle, a Rudra appears to commit genocide on the current residents of the planet. The Giants, Merfolk, and Lizard people have already been exterminated, with just a few survivors, and humanity's time is almost up... turns out this scheme was all devised by abusive precursors, whose plan to defend against their own abusive precursors was to create a race that could defeat their rudras and, ultimately, them.

* Treasure of the Rudra: Sion's chapter visits a series of floating islands, home to the four races that came before humanity.
* Treasure of the Rudra, the Wave Motion Gun was used to kill the existing races on Earth.
* Treasure of the Rudra, you get one when you are at the bio tanks and input the wrong combination to stop the pollution.
* Treasure Planet, a commercial starship. When they attain the trove at the center of the planet, and see that it's a small moon covered in gold and jewels, one pirate excitedly declares, "We're going to need a bigger boat!"
* Treasure Planet and loves food, in fact he is the ship's cook, and at one point is seen regaling the rest of the crew with stories over tankards of drink, enthusiastically acting out parts of it and using his mechanical arm to provide shadow puppets of the events. He can certainly hold his own in a fight as well, showing a mere fraction of his strength in nearly crushing the spider-alien Scroop's claw when he threatened Jim, and when threatened by a black hole, he is seen with Jim, using his own body to not only anchor Jim to the ship better, but to shield him as well.
* Treasure Planet. Apparently Harry Potter, James Bond, and Santa Claus had more box-office appeal than (cyborg) Long John Silver.
* Treasure Planet are referred to as solar sails, but they have little in common with actual solar sails.
* Treasure Planet are still a pretty blatant case of this trope. All technology is CGI while the characters and more "dated" mechanisms (like B.E.N) are traditionally animated.
* Treasure Planet. At first, it's because he's a cyborg and happens to be offering a collection of knives instead of his hand in hand mode. Then it's just a sign of distrust.
* Treasure Planet: Battle at Procyon allows spotters to be assigned as a crew member for spotting ships and other objects, the higher the spotter's 'spotting' skill, the further away things can be seen from.
* Treasure Planet: Battle at Procyon and submarines capable of hiding under the 'surface'.
* Treasure Planet: Battle at Procyon an enemy ship will transfer the target ship to your fleet. If enemy ships are captured in the campaign, they will stay in the players fleet for the remainder of the campaign, unless they are sunk.
* Treasure Planet: Battle at Procyon are Humanoid Aliens with raccoon like features.
* Treasure Planet: Battle at Procyon, as it obstructs light from nearby stars.
* Treasure Planet: Battle at Procyon, as they have the largest number of underside-mounted Light Lancers out of any ship.
* Treasure Planet: Battle at Procyon) but have the ability to repair allied ships if they dock next to them for repairs.
* Treasure Planet: Battle at Procyon calls several weapons 'Lasers' and 'Plasma' despite them clearly being kinetic weapons.
* Treasure Planet: Battle at Procyon: Explosions large enough to damage multiple ships have this effect, most notably, the bombs from Star and Nova Mortars.
* Treasure Planet: Battle at Procyon features unrealistically dense asteroid belts on some maps as hazards, some of these asteroids are slow moving, but others can move quickly. Asteroids will break apart into smaller asteroids if they take enough damage.
* Treasure Planet: Battle at Procyon has Space Whales on some maps, most notably the first campaign mission, when they are spotted the spotter will say 'Whales spotted'.
* Treasure Planet: Battle at Procyon has the Fast Frigate, which is a mid-priced ship available to the Royal Navy that is fast and decently armoured, with mediocre firepower for a ship of its size, being armed with 1 heavy, 6 medium and 2 light guns.
* Treasure Planet: Battle at Procyon: In skirmish mode, if your flagship is destroyed, the next ship in the fleet will assume command.

* Treasure Planet: Battle at Procyon, instead of a true plasma cannon.
* Treasure Planet: Battle at Procyon: Jim Hawkins is promoted several times throughout the course of the Tutorial and the Campaign. Jim Hawkins starts the campaign as an Ensign and is later promoted to Lieutenant, Captain, and finally Commodore.
* Treasure Planet: Battle at Procyon powered ships resembling 18th to early 19th century ships, and the Ironclads resembling mid-19th-century Ironclads and late 19th-century Cruisers and Battleships.
* Treasure Planet: Battle at Procyon's Heavy Scout class of ships are obsolete, Discovery Class Frigates that have been refitted with more modern weaponry.
* Treasure Planet: Battle at Procyon: Ships originating from from each faction all follow a similar colour scheme.
* Treasure Planet: Battle at Procyon's initials), where as Procyon ships use 'PSR' (Procyon Star Runner).
* Treasure Planet: Battle at Procyon: Solar Flares happen periodically on maps with nearby stars in them. Ships caught in the solar flare will receive damage and be set on fire.
* Treasure Planet: Battle at Procyon The game also allows for very large naval battles, especially in certain open maps.
* Treasure Planet: Battle at Procyon', the nearest star to their homeworld.
* Treasure Planet: Battle at Procyon, the Procyons speak with a Russo-German accent.
* Treasure Planet: Battle at Procyon uses an establishing shot at the start of every mission in the campaign, showing the surrounding area before zooming in on the command ship.
* Treasure Planet: Battle at Procyon uses this as a game mechanic. If one equips their ship with Harpoon Guns, they can be used to create grapple lines to pull in enemy ships. Once a grappled ship is close enough, the player can send the ship's designated boarding party onto it. The enemy ship will attempt to repel with their own boarding party, represented as a two-way health bar. Each side's health is based on their boarding party's overall strength, and fatigue. Should the defenders lose, the ship is taken over, and joins the fleet of the attacking ship.
* Treasure Planet: Battle at Procyon, was released on the 31st of October, 2002, nearly a month before the film it is a sequel to was released (27th of November, 2002).
* Treasure Planet: Battle at Procyon: When Lieutenant Jim Hawkins volunteers to recover Vice Admiral J. Nelson's missing crews and ships, the Vice Admiral promotes the Lieutenant to Captain, calling it field promotion.
* Treasure Planet: Battle at Procyon) when they are of the equivalent weight class, as well as being cheaper (with the exception of Plasma Cannons), making kinetic weapons a more cost effective option. Averted with Heavy Lancers however, which as as effective (if not quite as powerful) as their kinetic counterparts.
* Treasure Planet, Captain Amelia tells Silver he can save the flattery for his spaceport floozies.
* Treasure Planet character B.E.N. CG backgrounds were specially rendered to look like moving oil paintings.
* Treasure Planet communicated by making fart-like sounds through various orifices. Hilariously, Doctor Doppler actually studied "Flatula" for a couple of years, and was able to communicate with the alien by blowing raspberries and making fart noises with his armpits.
* Treasure Planet. Considering how the story goes, it's one of the more turbulent examples, but it all works out in the most satisfying way possible.
* Treasure Planet does this when the ship sets sail into space. There's a few seconds where he and the rest of the crew start to float in the air, before Captain Amelia has the gravity turned on and everyone gets a quick drop to the ground. Jim's the only one who does it, while most everyone else just lands on their feet, unfazed (and Dr. Doppler lands on his head with a loud crash, because of the clunky space suit he was wearing)
* Treasure Planet, Dr. Doppler carries the badly wounded Captain Amelia to B.E.N.'s

lair this way, with B.E.N. commenting on the implications.
* Treasure Planet, during the supernova, Captain Amelia orders: "Secure all sails!" And then when Dr. Doppler points out that he can predict the next magilla wave coming out of the black hole, and she decides they can ride that out of there, she turns to the crew, who have just finished tying down the sails, and we have this exchange:
* Treasure Planet example above, Silver gives up the few bits of treasure he managed to save to Jim for his mom to rebuild the inn that he and his pirates destroyed earlier in the movie, allowing them to rebuild it bigger and better than before. The fact that the entire crew aside from Jim and a few characters were pirates (and were either arrested or ended up dead) is another plus.
* Treasure Planet: Exploited by Morph upon meeting the robot B.E.N. The robot has been running all alone for hundreds of years, and is highly peculiar. The polymorphic Morph promptly reshapes himself into a scale model of B.E.N., and opens the top of his head to let a cuckoo attached to an extension lattice chime three times; it's Morph's way of commenting that the robot is nuts.
* Treasure Planet for the entire plot. Then, it turns out that he rigged the entire planet to explode if anyone found the treasure, and escaping the planet before it explodes becomes the object of the climax.
* Treasure Planet had purple lemons that crunch like apples. They were called Purps.
* Treasure Planet has the protagonist Jim Hawkins and his mom in a cast of aliens.
* Treasure Planet, he's a bookish scientist, not to mention they're basically an anthropomorphic cat and dog, respectively. The two grow closer throughout the movie, and by the end they even have several kids.
* Treasure Planet: "I just wanna hug ya and squeeze ya and hold ya close to me...!"
* Treasure Planet is a bit scatterbrained from being marooned on a desert island. He constantly yelling at random moments which gets his friends in trouble in a few cases.
* Treasure Planet is a cyborg, with artificial arm, leg, and eye. The arm transforms into about a million different things, from tools for cooking to a cutlass. He can even use another part attached to his leg to turn it into something akin to a plasma cannon.
* Treasure Planet is another Disney feature that tends to get forgotten, but Captain Amelia and Dr. Delbert Doppler, an anthropomorphic cat and dog respectively, have their furry fans.
* Treasure Planet is a story of the golden age of piracy moved into a fantastical version of outer space crossed by literal space ships, setting brave heroes and black-hearted villains on a quest for legendary treasure across the gulfs of space.
* Treasure Planet: It's revealed in the climax of the movie that the title planet is actually a giant, alien teleportation hub, the core of which functions as the power regulator. Captain Flint used the core as the place to store his "loot of a thousand worlds," and also booby-trapped the thing so if anyone came to take his treasure, the whole place would suffer a destructive meltdown.
* Treasure Planet, it turns out this is how Flint managed to plunder so many planets.
* Treasure Planet. Jim Hawkins can be seen riding his hoverboard called the Solar Surfer doing daredevil tricks.
* Treasure Planet. Jim Hawkins has apparently violated a particular law about hoverboarding often enough that, when the robotic constables who are bringing him home forget what number the law has attached to it, he is able to finish the number from memory.
* Treasure Planet, Jim Hawkins is this according to his mom as he overhears her talking.
* Treasure Planet, Jim thinks Bones is babbling after a head injury, but he proves to be all too accurate.
* Treasure Planet, Long John Silver has a literal Morality Pet called Morph, a cute bloblike alien that apparently represents his conscience. One could argue that Jim Hawkins himself is another Morality Pet for Silver.

* Treasure Planet, Long John Silver was a cyborg and had an arm that transformed into a cannon at one point.
* Treasure Planet, means that we shouldn't expect any 2D Disney films in the near future.
* Treasure Planet: Mr. Scroop combines features from a spider and crab.
* Treasure Planet: Near the middle, when Jim rejects Silver’s proposal.
* Treasure Planet one of these to Jim. John Musker based it on a particularly strong pep talk from his high school football coach that ended with both of them in tears.
* Treasure Planet (read, fart noises). He uses it to get Jim out of trouble when Jim accidentally backs into a Flatulan crew member who tries to pick a fight.
* Treasure Planet resembles an evil, giant alien spider/scorpion hybrid.
* Treasure Planet Sadly, due to the collapse of the theatrical hand-drawn animation market that took place soon thereafter, the concept of blending pure CG with hand-drawn animation never really had a proper chance to prove itself.
* Treasure Planet, Scroop, one of the main antagonists, resembles a giant spider. He is the one that acts the most threatening of all the pirates.
* Treasure Planet, Scroop, the second-in-command to the pirate Long John Silver, seems more like the main antagonist of the film than the cyborg.
* Treasure Planet, Silver's cybernetic eye is usually a yellowy-amber-orange-ish colour, but it changes to red when he gets angry/displeased.
* Treasure Planet Silver's pirates are trying to cut through a door in a fairly uninspiring way. Silver gets frustrated, turns his cyborg arm into a cannon, and simply blows it open.
* Treasure Planet Silver vigorously denies to the other pirates that he actually cares about Jim Hawkins (whom he certainly does care about, and whom he knows sees him as a father figure). Unfortunately, Jim overhears this.
* Treasure Planet; some people on the Internet have taken advantage of this for video crossovers and/or fanart.
* Treasure Planet speaks exclusively in farts. After an initial gag it's played seriously.
* Treasure Planet starts with Jim and his mother reading a bed-time story about Captain Flint and the planet where he hid his treasure.
* Treasure Planet states that it enables his species to get a good look at what they're eating.
* Treasure Planet, switching "deplorable" for "adorable", "felon" for "fellow" or this dialogue:
* Treasure Planet: The guns in the movie's setting fire blasts that look like electricity.
* Treasure Planet to get her to safety, but once she rests, the injuries do not hamper her.)
* Treasure Planet until they're kidnapped together and begin to warm up.
* Treasure Planet, we get Jim doing this while Mr. Scroop is trying to scare him into minding his own business.
* Treasure Planet when Jim and Ben are sneaking by the pirates to steal their dinghy. Surprisingly, no-one wakes up.
* Treasure Planet, when Jim is put in Silver's care, both pinch the bridge of their respective noses at the exact same time, then look up with the same expression.
* Treasure Planet, when Long John Silver places his coat on a sleeping Jim Hawkins.
* Treasure Planet with Dr. Doppler. Turns out, he has abnormally thin wrists.
* Treasure Planet, with (large) face and mouth are on his (large) stomach, and that what looked like his head was another spider-ish crew member and the things that looked like dreadlocks are really his legs.
* Treasure Planet? Yeah, you better believe it qualifies as this trope.
* Treasure Seekers 2: The Enchanted Canvasses, in order to rescue her brother Tom, who is trapped in the last world.
* Treasure. They are known for their action games with innovative design. They partner with large game developers and working with licensed titles.
* Treasure Trap - One of the oldest LARP groups in the UK, beginning in the

1970's. The original system is now defunct but a student spin-offs is still running in Durham and one previously ran for 10 year in
* Treasure X. Some of the Mini Beasts are insects and arachnids, however, meaning that they wouldn't have a skeleton to start, rather, an exoskeleton.
* Treasure X toyline are skeleton treasure hunters that need to be unearthed from a sandstone and pieced together, along with a buried treasure.
* treated as a defeat. The fact that the US had beaten the Vietnamese very, very badly during the Tet Offensive was secondary to the fact that the unpopular war was still going on and that the offensive convinced Americans that the war would continue for years at that point. The media did the military no favors in its reporting on the war, and this reporting helped to shape US public opinion. The lesson was not lost on the military, and all US wars since then have had considerably tighter control over what reporters can show.
* treated her like she was his own daughter she is still very loyal to him. Faith also does this with Gwendolyn Post. (Faith loves this trope.) Also, another reason why she helps Angel in Season 9, is because she really wants Giles back, since he was nice to her, too.
* Treated in a bizarrely humorous way after Wesley shoots his father because his father was threatening Fred
* Treated more realistically than usual, but on seeing that forging one's destiny is more complex than she thought it would be, and that she must face both the pros and the cons of such decisions.
* treated no differently who's played by Evan Evagora, an ex-model. In "Broken Pieces", he's punched and kicked in the face several times, but you wouldn't know it from his flawless, injury-free visage.
* Treated rather interestingly when one villain, Hydell, is sex-crazed for the female lead (Emily) he ends up stabbing his own brother, Alex, in the chest for a chance to get at her. But his brother — prior to being stabbed — inverts this trope by being pretty fed up with his obsession and complains "you're shouting about THAT when we have a serious problem!"
* treated to a panel depicting an army of demon infested Drow, who have been twisted and deformed by the demons in them. One of the drow in the panel is visibly pregnant... Mainly because the demon infested fetus has clawed its way out of her stomach and its head and torso are sticking out...
* treating him like trash for being a Saiyan. In the original Funimation dub, Vegeta even states outright that Frieza was the one who made him the way he is.
* treating patients with coldness and indifference for many years. She never contracted the plague of blindness.
* treating Tess like family, despite her attempting to murder Chloe and Lana, and successfully murdering others Clark had personally promised Bette that Tess would pay for her crimes, only to forget that promise because he felt her heart was in the right place.
* Treating their physical forms very inconsistently in the process. She's been depicted as assuming part of Nightcrawler's inhuman appearance, for instance, but not Angel's wings; on one occasion she absorbed enough of Mr. Sinister's powers and personality that she effectively became him—but didn't turn chalk white, which one would assume to be simpler than growing fur.
* treatment of her adoptive children, manipulating them, favoring Adora over Catra, and generally being despicable and cruel to them, have become memorable as among the creepiest and darkest themes the series is willing to take on. The consequences it has on both of them, especially Catra, who received the brunt of the abuse, are depicted in a way which can easily disturb viewers.
* treats its human slaves nicer than most, but with little hope of earning their freedom.
* treats them that way. In light of this, Dave's revulsion is understandable.
* treats Todoroki comes across as pretty insensitive considering Riley is doing this right in front of Todoroki.
* "Treaty" by Yothu Yindi. The Filthy Lucre dance mix is more recognized than the original within Australia, and even got a fair amount of play in the US and UK.

* "Treaty Cruisers" of this era (so named because the Washington Naval Treaty of 1922 placed strict limits of 10,000 tons displacement and 8" / 203mm gun caliber on cruisers, and the the London Naval Treaty of 1930 refined this by codifying the difference between heavy and light cruisers) were almost all glass cannons. The tonnage limit made it nearly impossible to build a truly balanced heavy cruiser, with enough armor to have any meaningful defense against its own guns. The only way to achieve heavy cruiser with acceptable firepower and also acceptable armor was by
* Treaty of Junius banned the military use of N-Jammer Cancellers and thus the design was reworked. The addition of superior weapons is probably explained by the extra couple of years of development.
* Trebek has also done a few episodes with his wrist in a cast after receiving surgery for carpal tunnel syndrome.
* Trebek made something of a franchise for himself in the 1980s and 90s with characters on many shows competing on
* Trebol saw potential in him and purposefully raised him for his goals, but instead of a soldier, he was trying to create a future boss who would lead his gang to power. He did everything that he could to turn an already unhinged child into a bloodthirsty power-hungry tyrant.
* Trebonius Artorius, the incompetent Archmage of the Mages Guild in Vvardenfell, is said to have gotten that title as a combination of this trope and
* Trebor117 regularly admits to leaving cliffhangers just to troll people. He also tends to answer questions about the plot by either not responding, or not giving a serious answer.
* Trebuchets: A giant, usually non-portable sling catapult with a very long range. They operate by pulling the opposite end of the catapult downwards and back, typically by dropping a counterweight, causing the sling to shoot up with great force. (Not
* Treebeard Master Gandalf", which even given that it's his mortal form that's young is still a bold claim.
* Treeborn Frog. It's a 100 ATK (and DEF) monster that sucks amazingly in its native theme (Frogs), but when you control no Spells or Traps (hence why he sucks with Frogs, they love their Wetlands) you get to bring him back from the dead. Especially useful when you run a Monarch Deck, where Monarchs need an easy piece of tribute fodder to allow them to fire off their effects.
* Treecats are sort of like domestic cats, sort of like ocelots, arboreal (as the name implies), intelligent, telepathic, and six-legged. They're stated in text to have a feline-like head, a body like a weasel or ferret (60 centimeters long), and a prehensile tail that is carried rolled into a tube or flattened for gripping.
* Treecats have six legs, as do most other native land vertebrates from Sphinx, their homeworld, including the Hexapuma and Sphinx Chipmunk.
* treecats when the bond was inevitably severed by the human bondmate's death).
* Treece was part of the same lead/zinc mining district and has been similarly abandoned.
* treefolk is specifically designed to invert this and turn such creatures into powerhouses by making all creatures deal combat damage equal to their toughness instead of their power, a windfall for most treefolk.
* Tree From My Youth, Salsa is able to destroy a Pig Mask tank by shoving what is implied to be his own feces in the tailpipe.
* Treehorns Treasure: Treehorn puts some money his parents give him in a hole in a tree, as a hiding spot. The next day, he notices that the tree is now growing bills, as if they were fruit (he keeps from picking some on the basis that they didn't seem "ripe"). The whole thing ends abruptly, when he takes the money out of the tree at his dad's request (bizarrely, they never noticed the tree now growing money and Treehorn himself was weirdly indifferent to it).
* Treehouse of Horror." After the family expresses surprise at the Rigellian-aliens apparently speaking English, but the lead alien explains that he's actually speaking Rigellian, but adds that the English and Rigellian-languages happen to be identical to each other. Later in "The Man Who Came to be Dinner"...
* Treehouse of Horror and ends up creating an almost perfect future in which the

family is rich, the kids are well-behaved and his hated sisters-in-law Patty and Selma are dead. He's prepared to accept this universe until he learns that no-one knows the word 'donut', which terrifies him enough to make him reactivate the time machine to fix the timeline (too late to see that in this universe, it rains donuts).
* Treehouse of Horror, Bart does this after being bitten by Mr.Burns, trying to beckon Lisa to do so while floating outside her window with other kids he's bitten.
* Treehouse of Horror being attacked by zombies to Kent Brockman being beaten to death by land-walking dolphins. Particularly memorable when he was killed by a giant advertising-icon-turned-moving-rampaging-monster version of himself.
* Treehouse of Horror, but drops from exhaustion - from the second floor, about half his body height.
* Treehouse of Horror by the angry freaks happens to Homer, who plays the strongman.
* Treehouse of Horror comic book adaptation called "Little Shop of Homers" had Lisa's experiment with a carnivorous plant accidentally splice with Homer's DNA. At first it feeds on donuts but moves on to people after growing a giant green copy of Homer's head.
* Treehouse of Horror, despite both of those characters being introduced as middle-aged men the same year the show was actually cancelled in real life.
* Treehouse of Horror episode, Bart and Lisa are being chased by Itchy and Scratchy. Bart gets hit with a blast of piranhas from a firehose, stripping everything from the neck down to the bone. Afterwards, he muses "Ooh, that's gonna hurt in the morning."
* Treehouse of Horror episode, Bart is attacked by a fleet of tiny spaceships. One flies into his left ear and flew out his right apparently without causing any damage other than a little discomfort.
* Treehouse of Horror episode had Homer convince Ned that he is the voice of god and instructs Ned to murder anyone he dislikes. Ned does not appreciate it when he learns the truth.
* Treehouse of Horror" episode had the school cook butchering random children and feeding the students with the cooked meat.
* Treehouse of Horror" episode has a segment involving Bart getting a book from the "Occult Section" of the school library and attempting to reanimate deceased family cat Snowball I with it; he accidentally reanimates the human graveyard instead.
* Treehouse of Horror episode, he acts like he's trapped in a spider's web shouting "Help me!" When the spider gets close Bart reveals he's just faking and flies away. The spider shakes four of its legs at Bart.
* Treehouse of Horror episode involved aliens attacking a disarmed human populace with bats and slingshots. It parodied the above line: "Your superior intellects are no match for our puny weapons."
* Treehouse of Horror episodes. Appropriate, considering these are supposed to be more horror-based.
* Treehouse of Horror episodes, Bart awakens from a nightmare. His first words after calming down and looking at his bed sheets are, "I hope this is sweat."
* Treehouse of Horror episodes has exceptional animation, such as the shot of Homer stepping through a wall to become three-dimensional in "Homer³" (which producers call a "money shot") and Bart's dream at the beginning of "Nightmare on Evergreen Terrace" (which parodies classic cartoons and even has its backgrounds painted like such).
* Treehouse of Horror episode "Starship Poopers" with Kang attempting to crossbreed with Marge.
* Treehouse of Horror episodes, what with being out of canon and thereby allowing characters to get killed or otherwise disfigured left, right, and centre.
* Treehouse of Horror episode when Bart befriends a robot. It asks him what it is like to have feelings. Bart replies:
* Treehouse of Horror episode where Homer gets turned into a bizarre creature with a fish's head, a donkey's ears, a pair of brooms for hands and a chicken's body.
* Treehouse of Horror" episode, where Lisa's science experiment turns into a

miniature civilization.
* Treehouse of Horror Halloween episodes. Zombie Flanders walks over to Homer's house, presumably to eat him. Homer guns him down without hesitation.
* Treehouse of Horror "Hex and the City", Homer destroys the room of a fortunetelling gypsy who asks herself: "Why didn't I see it coming?" Afterward, she draws the Bumbling Fool and Ruined Gypsy cards from her Tarot deck.
* "Treehouse of Horror III", Bart says he has a story so scary you'll wet your pants. Grandpa tells him he already did.
* Treehouse of Horror III", Mr. Burns is discussing going ashore to Ape Island when Marge shows up:
* "Treehouse of Horror III" uses this gag: Milhouse is playing Pin the tail on the donkey when gets hit by the door as Homer enters with Bart's birthday present.
* Treehouse of Horror in the woods near Springfield where people dump stuff they don't want anybody to ever find. We see the Springfield Mafia dump a carpet (presumably with body enclosed) down the pit.
* "Treehouse of Horror IV," a vampiric Burns greets the Simpsons over the intercom:
* Treehouse of Horror IV", Bart awakens from a frightening dream. His first words after calming down are "I hope this is sweat."
* Treehouse of Horror IV. Bart follows this by saying, "We had a story to go with this painting, but it was far too intense." So it turns out to be a lead into an unrelated vampire story.
* Treehouse of Horror IV", Bart notices vampires behind him and Lisa. He starts making sounds that Lisa mistakenly believes to be imitations of Shemp and Curly.
* "Treehouse of Horror IV" ended with the characters in the very end suddenly diverted from the story when snow starts falling from nowhere and the Simpsons were humming a Christmas carol.
* Treehouse of Horror IV. He promptly eats and eats and his torturer remarks that nobody has ever lasted so long.
* Treehouse of Horror IV. In the segment "The Devil and Homer Simpson", Homer sells his soul to the Devil (played by Ned Flanders, of all people) for a donut. He tries to cheat the devil by not finishing it, but ends up going to Hell anyway because he accidentally ate the last of his donut while raiding the fridge for a late-night snack. Marge manages to get him out by presenting their marriage contract in which Homer offers his soul to her, meaning it wasn't his to sell in the first place.
* Treehouse of Horror IV of being force fed "all the donuts in the world". Homer's gluttony proves to be too much even for the forces of Hell to handle, as he keeps asking for more donuts even after finishing the lot, leaving the demon who was "torturing" him very frustrated.
* Treehouse of Horror IV, the Grim Reaper makes an appearance as the judge at a Hell Court, judging whether the Devil owns Homer's soul or not (he sold it for a donut). Makes sense really, as death is equal and unbiased, like how a judge should be.
* Treehouse of Horror IX cartoon due to a plutonium-powered TV-remote. They watch Itchy pull his lethal, gory assault on Scratchy, as always, and then laugh at it...but this time, the cartoon duo can hear them, and Itchy thinks they're being mean. Scratchy pulls himself together, and the two decide to teach Bart and Lisa a lesson, violent cartoon style, requiring them to run for their lives.
* Treehouse of Horror IX" has Maggie suddenly lose her legs and grows tentacles. They take her to Dr. Hibbert, who prescribes "fire, and lots of it". This is apparently his cure for everything.
* "Treehouse of Horror IX" Krusty is doing a Halloween special, dressed as a vampire...
* Treehouse of Horror IX off a cliff (to which Snake says that he did it in self-defense).
* Treehouse of Horror IX" segment "Hell Toupee", Homer, possessed by the recently deceased Snake after obtaining a hair transplant from him following the latter's execution, kills Moe by removing his heart with a corkscrew.
* "Treehouse of Horror IX", Snake pulls Moe's heart out with a corkscrew and presents it to him before the latter collapses and dies.

* Treehouse of Horror IX with a corkscrew. Moe can only say "Aw, for crying out loud..." before dying.
* Treehouse of Horror, killer Transformer parodies, killer Pumpkin monsters, killer ghost celebrities, killer Jumanji parody, and a few alien invasions. There were also killer dolphins which even caught Lenny by surprise.
* Treehouse of Horror — but it all turns out to be a misunderstanding. And the Rigelians are so offended at Lisa's prejudice and ingratitude that they return the family to Earth and tell them that they missed their chance at paradise.
* Treehouse of Horror's audience get to see his face in HD and he has wrinkly skin and bloodshot eyes.
* Treehouse of Horror segment "I've Grown A Costume to Your Face", after a witch curses everyone in Springfield to transform into their costumes, Bart becomes a wolf-man, since he was dressed as Eddie Munster.
* Treehouse of Horror segment "Nightmare at 5 1/2 Feet", Otto is seen with the students at one point. Once Milhouse points this out, he immediately rushes back to the wheel.
* Treehouse of Horror segment parodying Sherlock Holmes has "Bartley" impressed by everything, especially a doorknob. The joke being he is ONLY impressed by mundane things, as when a stool comes to life and runs out of the store he doesnt even give it a mention.
* Treehouse of Horror segment "Survival of the Fattest", Mr. Burns is hunting down the male population of Springfield for sport on a safari. After running for only a few hours, Homer already resorts to cannibalism by eating Professor Frink. When Lenny points out the edible fruits on a nearby tree, Homer protests that they look a little green.
* Treehouse of Horror segment "The Genesis Tub". An accident with her science fair project creates a race of miniature people, who think she is God for stopping Bart destroying them.
* Treehouse of Horror segment "The Ned Zone" has Ned gaining the ability to foresee people's deaths. When he foresaw himself shooting Homer to death, he at first successfully changed the fate... only for him to foresee Homer killing everyone via a nuclear explosion at the power plant. Ned then tries to shoot Homer to prevent this, but inadvertently causes the explosion himself anyway.
* Treehouse of Horror that parody horror, fantasy, and science fiction stories.
* Treehouse of Horror (therefore, non-canon), Homer gets his hand caught in a toaster and when he "fixes" it, he travels back in time to the age of dinosaurs, where his simple sneeze causes a domino effect of dying dinos, causing ripple effects back to his present time.
* Treehouse of Horror. The Simpsons are left with nothing to their names save for an old washcloth the mob missed, which they then proceed to fight over.
* Treehouse of Horror third dimension, when he escapes he lands in a dumpster.
* Treehouse of Horror through an invisible rift in his living room wall.
* Treehouse of Horror vignette involving a hammock that would produce clones of whoever got tangled up in it... which Homer uses to his advantage. (Until said clones cause trouble.)
* Treehouse of Horror VII, had Lisa accidentally creating miniature life-forms by putting one of her teeth into a glass of cola.
* Treehouse of Horror VII", Homer runs around the kitchen after setting himself on fire trying to light a jack-o'-lantern.
* Treehouse of Horror VII Hugo, "You're crazy!", to which Hugo replies, "Am I? Well, perhaps we're all a little crazy. I know I am."
* Treehouse of Horror VIII that calms them down long enough for Marge and kids to get into position and blast them away with shotguns.
* "Treehouse Of Horror VII": Kang and Kodos disguise themselves as the Democratic and Republican presidential candidates but are unmasked. In a direct jab at the American political system they say:
* Treehouse of Horror V": In "The Shinning", while being manipulated by the ghostly Moe, Homer makes several terrifying faces, at one point he mocks Marge for being afraid of them, he makes one and looks at his reflection in the mirror and scares

himself.
* Treehouse of Horror virus (thanks to Homer not updating the computers at the nuclear plant), Nelson breaks into school to photocopy his butt. Unfortunately, he does this while the machines begin to go haywire, and Nelson gets sucked into the machine.
* Treehouse of Horror VI", where Groundskeeper Willie walks into a PTA meeting engulfed in flames, then politely takes a seat when they brush him off.
* "Treehouse Of Horror V" opens with Marge telling the audience that Congress woun't let them air the episode, and the show switches to a black-and-white movie. Bart and Homer then hijack the TV to air the episode anyway.
* Treehouse of Horror V) ruler of Earth and his family is taken in for reconditioning. Marge, Bart, and Lisa are lobotomized and try to convince Homer to join them.
* Treehouse of Horror V", the teachers of Springfield Elementary solve both the underfunding of the school cafeteria and the overcrowding of the detention room by serving misbehaving students in the cafeteria.
* Treehouse of Horror wanted a final reveal for the book to be 'How to Cook for Forty Humans and Then Eat Them'. Luckily, he was overruled.
* Treehouse of Horror, were pre-empted by a rain delay on the 2021 Daytona 500.
* Treehouse of Horror when the family discovers Bart-turned-vampire about to attack Lisa. Grampa Simpson immediately bursts in with a stake and garlic.
* Treehouse of Horror, which does its best to make them leave... but they refuse, because it's pretty much their dream house. The segment ends with the house destroying itself rather than live with the Simpsons.
* Treehouse of Horror which parody all kinds of horror, fantasy, and science fiction stories in an anthology format.
* Treehouse of Horror. While making the original religious subtext much more explicit in his defense of his belief in the Great Pumpkin, Milhouse suddenly recites a doctored Apostle's Creed that turns into a nonstop (and hilarious) torrent of vegetable puns:
* Treehouse of Horror: with so many ads, she gets angry ("Can't people just watch the show they're watching?") and gets rid of the promos in various ways, such as vacuuming football players with a minivac, sticking House in a microwave and putting the rest in a meatloaf. Wherein they wriggle.
* Treehouse of Horror X" episode, Homer and Bart stow away on a rocket that they think is taking humanity's best and brightest to another planet. It turns out they're actually on a rocket full of the dregs of humanity (including notorious celebrities such as Dr. Laura, Dan Quayle, Ross Perot, Courtney Love, Tom Arnold, Paulie Shore and Rosie O' Donnell), and have been launched towards the Sun. Once Bart and Homer realize their mistake, they open the airlock just to make the end come faster.
* Treehouse of Horror XI", Homer abandons Bart and Lisa in the woods and tells them to "Say hi to your other brother and sister". Bart and Lisa then notice a pair of skeletons resembling themselves.
* Treehouse of Horror XI, Homer reads his horoscope, which claims that he'll die that same day—after Lisa notes how "that seems unusually specific for a horoscope," Marge (now worried) reads her own horoscope, which says, "Today your husband will die." Strangely, Homer focuses on the second part of his horoscope, which says he may get a compliment from an attractive coworker—this makes him think of his friend, Lenny.
* Treehouse of Horror XII, Homer is cursed by a gypsy woman. To counteract the curse, Homer traps a leprechaun and orders it to attack her. Instead the gypsy and the leprechaun fall madly in love and the next scene is of their wedding. The leprechaun looks like he comes up to his new wife's knee.
* "Treehouse Of Horror XIII" begins with Bart dressing like the ghost of Maude Flanders for a seance his family is holding with Ned. He thinks they're afraid of him before he realizes the real ghost is behind him.
* "Treehouse of Horror X": In "Stretch Dude and Clobber Girl in: Desperately Xeeking Xena", Bart as "Stretch Dude" is able to stretch out his body parts,

including his neck.
* Treehouse of Horror XIV jump across a railway track, just before the train, at which point God gives up and goes home.
* Treehouse of Horror XIV, the series' bumbling dad has to take over).
* Treehouse of Horror XIX); when their spirits and those of other dead icons find out that they've been reduced to postmortem shills, they come after him.
* "Treehouse of Horror XIX" (which again aired after Halloween on November 2, 2008) ends with Tom Turkey defeating the Grand Pumpkin only to wind up attacking the humans when he finds out they eat turkeys on Thanksgiving. The last line of the episode has Marge wishing the viewers a Happy Holiday season.
* Treehouse of Horror X" segment "I Know What You Diddily-Iddily-Did", after Marge runs down Ned Flanders during a foggy night, Homer "puppeteers" him just long enough to convince Maude that he's 1) alive 2) doesn't want an autopsy and 3) having a heart attack.
* Treehouse of Horror XVII", a "space marshmallow" turns Homer into a giant, green blob that stomps around the city eating fat people. "You've got an eating problem, and you know it. In fact, you're thinking of eating me right now, aren't you? Aren't you?!"
* Treehouse of Horror XVIII", Bart, Milhouse, Nelson and Lisa are sent temporarily to Hell, yet Lisa took no part in the chaos they wrought. She points this out along the way to hell: "I warned you, and yet my punishment is no less severe. That's odd."
* Treehouse of Horror XVII" segment "Married to the Blob", the blob Homer sees Dr. Phil McGraw as a box of fudge.
* Treehouse of Horror XVI" skit "Survival of the Fattest" has Mr. Burns doing this, as shown in the page image. He even televises it, complete with sports commentators and guest analyst Terry Bradshaw.
* Treehouse of Horror XV", the Simpsons drop a bomb from the ship into Mr. Burns' stomach and it goes off inside him, causing his stomach to swell momentarily. Burns' reaction was a flat "Well, that hurt like hell."
* Treehouse of Horror XXII, Milhouse does this to a tree after the second time the Rigelian girl berates him.
* Treehouse of Horror XXV", Bart and Lisa are sent to a school in Hell. When Lisa joins a group of "popular" demon girls, it starts snowing. "It's true- it would be a cold day in Hell when I was popular.."
* Treehouse of Horror XXVI, and Bart tells him in a weak voice that he has made some stupid mistake:
* Treehouse of Horror XXVI). Bob even decides to revive Bart because it brought him some excitement in his life.
* Treehouse of Horror XXVI Bonus points as Bart sees the hole in his chest, then looks at Bob holding his heart as he utters out his last words before dying.
* Treehouse of Horror XXVIII, ultimately ending with Homer volunteering to be cooked and served as a gourmet dish by a celebrity chef.
* Treehouse of Horror XXVI segment "Wanted: Dead, then Alive": "24 years of trying to kill a ten-year-old child [Bart] have finally paid off."
* Treehouse of Horror XXVI segment "Wanted: Dead, Then Alive": in the title screen, the word "Wanted:" appears, followed by the blood that spells out "DEAD", before finishing the title in normal letters.
* Treehouse of Horror XXVI, then proceeds to start killing him and bringing him back to life over and over again.
* "Treehouse of Horror XXXI" had the story "Toy Gory" which was rendered entirely in mid 90s-style CGI in the same style as
* Treehouse's big red nose explodes, Andy and Terry wonder if it's safe to press it and if the seer simply predicted the nose explosion. Jill tells them not to press it but then Mr. Big Nose's baby granddaughter presses it. It turns out that all it does is make rainbows come out of everybody's noses.
* Treehouse TV male announcer, has also went through a vocal evolution: His voice first started out high-pitched and youthful, but as years went on, his voice became slightly deeper and more masculine due to him aging.

* Treehouse TV). This only makes anything the character said to sound like it must've been worse, the most jarring example being in "Party of One" when Pinkie Pie holds a party with inanimate objects after believing her friends abandoned her and provides the objects with voices.
* Tree hyraxes look like the lovable lovechild of a love triangle between a small dog, a guinea pig, and a bear. Their nocturnal call is comparable to the screams of a human woman undergoing prolonged physical torture.
* tree-like race) variants give off bioluminescencent green, purple, or orange lights.
* tree-like tilt) who have been corrupted by "dark magics." The Spriggan's tortured spirit remains trapped inside the corrupted creature until it is slain.
* Treemen, at least, are direct in their motivations: leave the forest be, and they'll happily ignore you. Break off so much as a single branch, and you die.
* Treemen will grab targets with the roots on their feet and crush them to death.
* Tree of Dreams contains the story "Dream Girl", in which a prince meets a girl in a dream and falls in love. The prince's friend convinces the king that the best solution is to let the prince go out and travel so he can meet a real girl. Then they come to a country where the king's daughter has been locked up because she wants to marry a man she met in a dream...
* Tree of Savior can use Send Prana to temporarily donate a portion of their Intelligence stat to an ally.
* Tree of Savior, or creating enchanted patches of grass that temporarily convert enemies who tread on them into Plant-type creatures.
* Tree of Souls: The Mythology of Judaism in which the men were sent away by Solomon. The story usually ends with Death saying he hadn't meant to frighten the person, it's only that he was so surprised to see them when he had an appointment with them in the town they were fleeing to.
* Tree of Tranquility. The latter gets major flak due to the slower pacing, less interesting characters, basically same storyline, boring festivals, etc.
* tree-people) proclivity for taking down anything that might be a threat. Even Aragorn was wary of it. It's mostly due to the Huorns, trees that have woken up or Ents that have almost turned into trees (the process seems to go both ways). They aren't very intelligent, but they can move — as fast as bullet train if needed — and aggressively pursue anything they perceive as a threat if there are no Ents around to herd them.
* Trees along the sides of roads will often have their branches "trimmed" into rectangular openings by passing trucks.
* trees, animated by the same supernatural blight that killed their living selves.
* Trees, as "Joyce" was originally a man's name and (very rarely) is still given as one.
* Trees is a life-bearing alien planet best-known for its forests of skywrack trees, which can reach a kilometer in height. Some thought is put into how such large plants would operate — Trees' gravity is lower than Earth's to begin with, and the trees grow gas-filled bladders on their upper branches to further support their weights; high humidity is also needed to keep the plants alive, and as it's extremely difficult to pump water above a couple hundred meters in height the trees grow basins with which to catch rainfall to water their upper reaches. The skywracks' immense height has resulted in the creation of multiple canopy layers with distinct ecologies, including a thickly overgrown ground level where almost no light is present and living creatures depend on organic detritus falling from above. The planet was settled by humans modified for a brachiating lifestyle, who live in the upper canopies and make their homes in the trees' hollowed-out seedpods.
* "treespeak" or "chutespeak". He eventually heavily toned down this speech pattern, and explained that newly introduced Air-characters didn't speak it to begin with, only so that he'd be able to write their dialogue the way he liked it.
* tree spirits" and are associated with Kynareth, one of the Nine Divines and goddess of the heavens, winds, and elements. Despite this reverence, Spriggans are usually hostile toward any trespassers in their domain.

* TREES that he is looking directly at. Then again, if you were a goblin, would YOU want to interrupt the play for a foul done by someone eight times your size who hurts people for a living?
* trees, they shouldn't have to be very close to each other for Entings to happen.
* Treetopia present had a building contest. Some of the buildings included a Christmas tree, Santa vomiting and pooping, and the star of David.
* Tree Top World: When an entire setting exists within the canopies of titanic trees.
* Tree Trunks and Mr. Pig. In "Dream of Love", this provokes lots of vocal outrage and discomfort from everyone around them, culminating in Jake and Finn bodily removing them from each other.
* Tree Trunks be rewritten to clearly demonstrate that Tree Trunks hadn't died. Probably a good thing given the fan enthusiasm for many of the later episodes centering on her.
* Tree Trunks, of all people. She crushed on Finn (fortunately, it never went anywhere) and in "Apple Thief". she slapped one of the Banana Guard's butts.
* "Tree," where several mothers are atop a tree, playing this trope straight.
* Trek and can be incapacitated in a variety of ways, such as by the effects of alcohol or unfamiliar emotions like pleasure or jealousy.
* Trek, but ever since then, it stopped being a deflector and became a general-purpose power emitter. You can use it to blast things, hold open or close rips in time, jump-start somebody else's ship, or hell, maybe punch open wormholes for all we know. Voyager briefly goes to low warp with the navigational deflector offline in the episode 'Year Of Hell' and takes damage as a result.
* Trek by Ronald D. Moore after creating Admiral Pressman: "I am proud to say that I've written another insane Admiral. They must put something in the water at Federation Headquarters."
* Trek, features a hybrid (possibly part-human) girl at a Klingon orphanage who's teased for being ugly because of her smooth forehead and slender build.
* Trekkies) discuss some erotic artwork of Tasha and Data that fans have mailed to them. Both actors are equally amused and creeped out by it, and Spiner jokes that one of the artists definitely got his muscular physique right.
* Treknologic: Keri talks about experimenting on the crew and the genocide of all tribbles like someone would talk about the weather.
* Trek of Spock's parents is now an essential part of his character. Why Spock avoided mentioning that his mother was human is left to the imagination, though it is possible that at that point he was just trying to cover up a part of his heritage he was ashamed of. Plus, it's not like he actually lied. One of his ancestors did marry a human female. It's just that the ancestor was his father.
* Trek's computing technology (excluding AI) is absurdly primitive by contemporary standards. TOS has the Federation using hand-sized
* Trek shows, there are typically emergency metal doors that quickly close in the event of such a power failure.
* Trek species such as the Talosians, the Borg, the Xindi and, especially, the Q Continuum.
* TrekStor makes the i.Beat line of MP3 players. They caused a minor controversy when they brought out a black model — and, in combination with
* TrekStor renamed an MP3 player in its i.Beat line — namely, the i.Beat Blaxx — due to the unintended racial connotations of the name.
* Trek) The heroes would run into a new hostile alien species in seemingly every other episode despite never venturing more than a couple hundred light-years from Earth (and usually being no more than a few dozen light-years away). It's also made clear that the Andorians, Tellarites, and Vulcans at this time are small polities that haven't extended far beyond their single home star systems, so don't expect any of them to bring order. Presumably, most of these species joined the Federation by the 24th century.
* Trek. Their first appearance was the first reported visual (and possibly audio) contact with a Federation citizen, whereas by DS9 (less than half a decade later in the timeline) they had been an established economic presence in the quadrant for

decades and had deep-seated ties with Klingons and Cardassians. Also, while DS9's Ferengi were often amoral scumbags, their outright evil TNG forebearers dressed in Klingon-esque primitive, fur-sashed mail uniforms, acted half-feral, executed second officers as a diplomatic act, and were stated to eat sapient beings. Not long after, they started wearing wide-collared suits, dressing more like modern humans than the Feds. Also, in several early Ferengi episodes, Troi claims to sense their feelings. Later on, Ferengi are immune to telepathy/empathy.
* Trek to please Kirk. It's left unclear whether Kirk actually has sex with her, but it is clearly at least a possibility.
* Trek Verse only. Stories unrelated to the new movies' events might reference the mysterious disappearance of a certain famous Vulcan in passing.)
* Trek Verse, the Trill might be an intentional subversion, as they only join with consenting hosts, with the goal of merging their respective consciousnesses.
* Trek, we discover that Cardassians get a bit hot and bothered when somebody strokes their neck ridges.
* Trelane from "The Squire Of Gothos". You want someone to hang out with? Instantaneously pluck your guests from their ship. Said guests try to defy you? Chase them around with the planet you're on.
* Trelane, the teenage omnipotent being who'll hunt you down if you ruin his fun.
* "Trembling Metropolitan Police Headquarters: 12 Million Hostages" involved a mad bomber who sent a clue to his next target to the timer screen of his current bomb…seconds before its detonation.
* Treme. His trombone playing in season one is mimed to pre-existing tracks (though he does it so well you'd never know), but after filming a couple episodes he decided to take lessons, and hopes to be able to do his own playing from season two onward.
* Treme: Made in 2010, set during the aftermath of Hurricane Katrina in 2005.
* tremendous pain to recite every time you referred to it. So instead of saying, say, "all the stuff TropeCo owns, except for this thing and that thing and the other thing and these things and the painting in the CEO's office" every time you refer to what's being sold, you just have a definitions section in which you say "'Assets' means all the stuff TropeCo owns, except for this thing and that thing and the other thing and these things and the painting in the CEO's office" and just use "Assets" (with a capital "A") ever afterward. This also means that you can talk about "assets" (with a small "a") in other contexts and be clear.
* tremendous was frightened of him. This was almost certainly the main reason Gracie was able to escape with a draw in their matchup, as Shamrock (who actually had a pretty good chance of winning) was too intimidated to get any real offense going.
* Treme says that he's written a request for a second line into his will, complete with song list, which will probably be the only one his particular cemetery will ever see.
* Tremors 2: Aftershocks based on sound (being both blind and deaf), it can detect any heat signature, which also causes them to attack all machinery including car engines, disabling it, and trying to run from them in a wide open space is similarly suicidal.
* Tremors 2: Aftershocks, Burt's explosive-laden truck is set to explode and take out the Shriekers, but the heroes don't have a very good handle on how long it was set for. Eventually one of them complains about the delay... and the bomb obliges.
* Tremors 2: Aftershocks: Earl is completely surrounded by Shriekers and is standing in the back of Burt's truck. His response: Set a timed explosive to go off and toss it down in the truck. That's 2.5 tons of Burt Gummer approved high explosives, parked in an oil refinery.
* Tremors 2: Aftershocks. Gradually, the heroes realize that they're blindly attacking anything that radiates heat, being unable to distinguish between food and electronics.
* Tremors 2: Aftershocks is a fan-boy of Earl's, who talks his way into helping on that film's Graboid-hunt.
* Tremors 2: Aftershocks: Justified - when survivalist Burt gives Earl and Grady

some of his MREs to eat, Earl unwittingly bites into the wrong item:
* Tremors 2: Aftershocks" Later though, the Shriekers show intelligence, forming a ladder out of themselves to get up onto the roof the heroes were hiding on.
* Tremors 2: Aftershocks Pedro only speaks un-subtitled Spanish, and the other characters don't translate what he says.
* Tremors 2: Aftershocks = splattered shrieker. Also, shriekers + 2.5 tons of high explosives = raining gibs.
* Tremors 2: Aftershocks. (The car is still rendered undrivable, but it doesn't explode.)
* Tremors 2: Aftershocks. The creatures destroy the radio accidentally because they associate heat with prey.
* Tremors 2: Aftershocks. The protagonists have rigged up seismic sensors to tell them when the subterranean graboids are approaching. While they're at their base of operations, the sensors start going off as if a huge one is headed right for them...until they look out the window and realize it's instead Burt and his oversized, overarmed military truck.
* Tremors 2: Aftershocks truck full of explosives but no one knows what the time delay is. Cue everyone taking cover as Burt runs past yelling that they have to get farther away.
* Tremors 2: Aftershocks, when Earl sets a bomb to detonate the explosives in the back of Burt's truck. The other heroes duck behind cover, only to see Burt continue running right past them, yelling "It's gonna be big!" Burt eventually settles for a trench which will provide sufficient protection from the blast wave.
* Tremors 2: Aftershocks while underground, since it's very difficult to shoot through dirt. When the Graboids turn into much smaller, faster, and more plentiful Shriekers, Burt laments the fact that he's carrying entirely the wrong kinds of weapons to deal with the creatures, and what he did have had been used up in his first encounter with them.
* Tremors 3: Back to Perfection and he opens fire is like a kid on Christmas morning. Knowing Burt though, he's probably disappointed he couldn't get incendiary ammunition.
* Tremors 3: Back to Perfection: Ass Blasters + spear + cannon fuse = raining gibs.
* Tremors 3: Back to Perfection, Burt has rebuilt his survival bunker to be proof against any attempt by Graboids or Shriekers to break in from underground or ground level. Unfortunately for him, the latest threat is the flying Ass Blaster, which comes crashing straight through his completely unprotected roof.
* Tremors 3: Back to Perfection due to being sterile, it's ultimately possible to 'train' him in a sense so it's possible to co-exist with him.
* Tremors 3: Back to Perfection take off and fly by organic jet propulsion.
* Tremors 3: Back to Perfection: While their previous stage, the Shriekers, multiply if they eat, the Ass-blasters go into a food coma when they eat too much. Nancy and Mindy are able to capture one because of this. This leads to a scene where Burt destroys his entire house and everything in it to kill an Ass-blaster before it can get to his supply of MREs (Meals-Ready-To-Eat), fearing that like the Shriekers the creature will vastly multiply when it eats enough food, only to learn afterwards that letting the creature stuff itself would have actually incapacitated it.
* Tremors 4: The Legend Begins, Burt's 19th-century ancestor encounters the Graboids.
* Tremors 4: The Legend Begins ends with Burt's ancestor Hiram gleefully firing off a large Gatling gun he's just been given, though it's just for fun as all the Graboids are already dead.
* Tremors 4: The Legend Begins: Graboid + traction engine + big hook and belt = raining gibs.
* Tremors 4: The Legend Begins of ducks. It was actually a prop built for the film using a triple-loaded 12-gauge inside to produce a muzzle flash; the barrel's inside was sprayed with WD40 prior to shooting to add more smoke. This is because apparently there are very few functional punt guns left in America today.
* Tremors 4: The Legend Begins Pyong is constantly making comments about how

certain dangers and misfortunes weren't present back in China, with her husband disputing this. However, near the end of the movie, she claims that she was the one to talk him into leaving China in the first place and doesn't really want to go back, implying that she doesn't mean it when she makes homesick comments.
* Tremors 4: The Legend Begins series and a prequel to the earlier movies.
* Tremors 4: The Legend Begins, the Old West town of Rejection is largely abandoned after "dirt dragon" attacks cause the local mine to be closed down. Most of its buildings were barely more than tents to begin with.
* Tremors 5: Bloodlines separate creatures, at least in the African Graboid species (it's never explained why they were tentacles before and now they're not).
* Tremors 5: Bloodlines when one of them jumps out of his big brother's mouth and continues pursuing the heroes like some sort of killer land-eel.
* Tremors 6: A Cold Day in Hell and all-black winter clothing. Mac even name-drops the trope while observing him.
* Tremors 6: A Cold Day in Hell and likes to hug people. She has a lot of knowledge about the best way of zeroing rifle scopes, helps kill Graboids endangering her friends, and boasts that she can drop an elk at 800 yards. Valerie's friendliness is also emphasized by her banter with Vargas, who serves as her spotter, between shots.
* Tremors 6: A Cold Day in Hell, Burt is the only permanent resident left, with everybody else having moved away, and even he packs up and leaves by the next (and last) film when he refuses to deal with the US government any longer.
* Tremors 6: A Cold Day in Hell Cutts is introduced as an abrasive, shifty government agent suspected of bio-engineering Graboids as weapons. Then it turns out that he has nothing to do with the Graboids and is in the Arctic trying to find a way to harvest Arctic ice to decrease the risks of global warming and provide a bigger supply of drinking water. He also is outraged when his best scientist is eaten by a Graboid and sets out to seek revenge and help the trapped heroes. Then he admits that he is interested in using Graboids as bio-weapons now that Burt has suggested it and cowardly kicks away one of his men who grabs at Cutts for help while being dragged to his death.
* Tremors 6: A Cold Day in Hell from Burt. He further notes that it's only a matter of time before a Graboid starts smashing through the floorboards to get them.
* Tremors 6: A Cold Day in Hell Valerie wears a pair of cowboy boots made from Graboid skin that was originally a gift her dad gave her mom.
* Tremors 7: Shrieker Island. Then they escape to the neighbouring islands...
* Tremors 7 Shriekers Island sees Burt Gummer give up his life to kill the Grabiod Queen.
* Tremors, a man who'd been trapped by Graboids for days is found high up on a power pylon, dead of thirst. Another man's head turns up half-buried in the ground, face-up under a hat.
* Tremors, and must try to survive. They can't easily leave because there is only one road out of town and it has been blocked by the worms and attempting to leave on foot would be suicide.
* Tremors: As Burt Gummer shows, graboids are not immune to bullets, you just need a big enough gun. One could actually see the defining scene as a deliberate parody of this trope, as Burt and Heather were emptying gun after gun after gun into the graboids to no effect, until the fight more or less became a stubborn pissing contest between a nearly immobile graboid and a couple with a hundred seemingly useless guns. Eventually Burt's stubborn-ness won out.
* Tremors aside, that would literally make them the oldest living species in prehistory, way older than even dinosaurs.
* Tremors, as the characters are usually spattered with the aforementioned gibs.
* Tremors Burt Gummer is out of weapons while fighting a monster infestation. The locals tell him of a resident gun nut with a huge arsenal. When they get there, they discover that the "huge arsenal" consists of 18th-century black-powder muzzle-loaders. Burt, however, being a drooling gun fanboy, is well-versed in 18th-century warfare and manages to organize the locals to Save the Day. (It helps that the actors in that episode were part of a historical re-enactment society.) It also

helps that the shriekers have no concept of tactics or even pack mentality (even wolves know to surround a prey). They just charge at the defenders without regard for their own lives.
* Tremors but is more realistically depicted as dwelling in and moving though water and sewage rather than sand or soil (it lives in the bowels of Bloth's huge ship). It is a large, mindless, constantly hungry beast with a worm-like body, tentacles and sharp teeth.
* Tremors, but realised upon watching the rushes that the Graboids didn't look real enough without it.
* Tremors could appear from. The series was cancelled half way through its first season despite being one of the Sci-Fi Channel's highest-rated series.
* Tremors episode "Night of the Shriekers", Burt Gummer is ironically scolded for inappropriately going to Defcon Five over the presence of Shriekers by someone who is treating the Shriekers as no threat.
* Tremors features the Graboids, although the lack of eyes doesn't bother them because they rely on sound.
* Tremors film ends with a spectacular (audience demanded) kiss between Val and Rhonda.
* Tremors films were inspired by writers/producers S.S. Wilson and Brent Maddock after they were climbing a large boulder in the desert and suddenly wondered "What if there was something that wouldn't let us off this rock?"
* Tremors franchise, Graboids pinpoint their prey using sound and other vibrations, while Shriekers and Ass-Blasters use heat vision that's enhanced by blasts of heat emanating from their mouths.
* Tremors franchise offers In-Universe example. Let's say your hometown was attacked by giant subterranean monsters, who kill half of its inhabitants before being defeated by the other half. What do you do? Make money on it, of course! Over the course of subsequent movies and the TV series the main characters have become famous science and pop-culture personas, being featured in magazines and TV shows, starring in commercials and documentaries, opening theme parks, having the exclusive license and producing video games, comics, action figures and other merchandise based on the monsters. All while continuing to fight said monsters first occasionally (Tremors 2-3) and then on a weekly basis.
* Tremors franchise that are more Comedy-Horrors, the first movie was heavier on the Horror side.
* Tremors game was being developed in 2002 by Rock Solid Studios, for the GameCube, PC, PS2, and Xbox, but the game was cancelled in 2003.
* Tremors has this happen to the doctor's wife after she narrowly escapes the graboid that just ate her husband. The car she's in stops shaking, the camera zooms away from her face as calm music plays on the radio... and suddenly zooms back in when the graboid returns to pull the whole car underground.
* Tremors if need be. The only time they'll leave is when the prey dies of dehydration/starvation or if they're distracted by a sufficiently loud noise/vibration nearby that screams "easier meal" for them.
* Tremors: In the TV adaptation, nearly every episode starts off with some random construction worker/tourist/passer by getting brutally killed by some monster.
* Tremors is nicknamed Stumpy because one of its three grasping tongues got torn off when it first tried to eat Val and Earl's pickup truck. The ripped-off tongue is mistaken for a snake-like mutation when it's found tangled around their axle, and is bought by Walter for $15. We don't see how Stumpy reacted to it, but another Graboid gets one of its tongues blown off by Heather Grummer shooting it repeatedly with a shotgun to save her husband Burt, and it briefly stops attacking them to jerk its head up and smash through their basement ceiling with a loud scream.
* Tremors; its inspiration was in fact the Lambton Wyrm of English folklore rather than any of the other worm monsters mentioned on this page).
* Tremors—have been released straight to DVD, or straight to Neftlix.
* Tremors — Horror film series. Five films, four direct-to-video.
* Tremors mouth by shooting its tentacle repeatedly with a shotgun until it's severed.

* Tremors movie, the people of Perfection use a CB radio to warn the Gummers of impending Bad Things possibly coming their way. Actually justified in this case, since it's made clear that they can't reach anyone outside their valley with their CBs, and it would make sense for everyone to use the same frequency.
* Tremors movie, the survivors find themselves stranded on a rock "island" surrounded by Graboid "sharks".
* Tremors of the franchise, he cannot really be said to be the primary one. The Graboids and their different life cycles are the center of attention.
* Tremors reinvented the trope to drastic degrees. Indeed, the Graboids weren't really wormlike at all except in basic principles, and asserted the predatorial habits that have made Sandworms the monster-movie favorite they are now.
* Tremors. Some even argue Earl's comment about them being from outer space was a more plausible answer by comparison. (Later material stated the Precambrian dating was an in-universe error on the part of the character who did it, and that the Graboids are still prehistoric but originated in the Devonian era instead.)
* Tremors takes place almost entirely during the day. A few scenes did have one of the creatures trap the protagonist trio overnight on top a cluster of boulders (which also protects them as they can't tunnel through rock). The point is that like moles, the eponymous worms, do not need light to navigate their surroundings and will attack regardless if it's day or night. There's a single nighttime death scene, but it's really less terrifying than the daytime graboid scenes because, at night, it's pretty conventional horror movie stuff.
* Tremors, thanks to being protected in an oil barrel and the creature being cut open shortly after.
* Tremors, the characters are trying to figure out a way to get out of town now that the only road is blocked. "Who's best on a horse?" Heroes Val and Earl glumly realize everyone's looking at them.
* Tremors: The first few times the Graboids attack, we just see their tentacles coming out from the ground and think the tentacles are separate snakelike creatures.
* Tremors, the Gummers' SUV is destroyed by a Graboid after its burrowing disturbs the ground underneath the vehicle and sets off its car alarm.
* Tremors. The protagonists have decided to make a run for the bulldozer so they can make their escape, but they need something to distract the man-eating Graboids away from them. Melvin (an annoying minor character) is nearby.
* Tremors: The Series did this a few times, describing how failure to eliminate a Graboid or shrieker quickly will snowball into mass destruction if they breed and/or metamorphose.
* Tremors: The Series, only part of the giant shrimp-monster is ever seen above the water.
* Tremors: The Series two-o'-clock") to tell Tyler from which angle Messerschmitt is flying towards them.
* Tremors: The Series: While El Blanco the sterile albino Graboid appears more often in the background and is the focus of a few episodes, one episode features a normal Graboid as well.
* Tremors The short-lived Syfy series might have been better if it had adapted more than one of the scripts from an un-produced earlier series (a vampire mountain man, an octopus creature in the trees, a winged monster the heroes pursue with sky-fishing methods etc.).
* Tremors. They have to resort to one last desperate gamble to take it down.
* Tremors; three to six large dog-sized "Shriekers" (each capable of rapid parthenogenesis) burst from the mature Graboid at the end of it's cycle, killing it; mature Shriekers pupate, then emerge as winged "Ass Blasters", which lay eggs and are roughy the same size as Shriekers. It is shown that the entire process is asexual, with Ass Blasters developing a new Graboid egg within a matter of hours.
* Tremors TV series, the ass-blaster that was captured alive in the third film escapes from captivity and menaces Perfection again.
* Tremors. Valentine elbows Earl in the stomach to stun him so Valentine can risk his life running to the tractor to save everyone (and risk being killed by the

Graboids).
* Tremors. Valentine says "We need a helicopter. Or a goddamn tank!" Earl realizes that they can use a bulldozer to pull an open semi-trailer and carry everyone to safety.
* Tremors was more horror dominant, but every installment after that struck the balance.
* Tremors. When the graboids start attacking, however, she loses some of her clothing and becomes more attractive to him.
* Tremors, when the Gummers return from searching for signs of the creatures that have been killing people and livestock, Burt Lampshades the lack of any "spoor". Justified because the Graboids live and travel underground, so presumably do their business there, not at the surface. Averted with humans in the very first shot, of Val seen from behind as he takes a leak over the edge of a cliff.
* Tremors, where Melvin the prankster manages to survive to the end of the film, and even appears in one of the sequels and the TV series.
* Tremors while credits start to roll. Definitely an improvement over the original, which can be seen on the DVD.
* Tremors. Yes, the monster's stomping ground is a great big valley, but it's a great big valley that no one can leave because the monsters can outrun them, and the only normal road out was blocked off by a landslide inadvertently caused by the monsters.
* Tremor Trampoline: Floor dolts downward, character gets bounced upward from physics.
* Tremor whose nationality is never stated, but he works for the international crime syndacite Black Dragon.
* Trench 11: An early grenade explosion destroys the entrance and forces the men to find an exit tunnel while the infected roam the halls.
* Trench 11: Chlorine is released into the tunnels and Berton and Meuller have to run for it, as they have no gasmasks.
* Trench 11. Main villain Reiner is a proto-Nazi, complaining that if Germany loses the war Europe will be overrun by Communist Jews.
* Trench 11: Priest is subject to this by proto-Nazi Reiner in order to gain intelligence against the Allies.
* Trench 11 riding a desk and sees this operation as possibly his last opportunity for promotion before the war ends.
* Trench 11: The German who takes a point blank shotgun blast to the head.
* Trenchant Labour MP Dennis Skinner took a leaf out of Disraeli's book when ordered to retract the statement "Half the Tories opposite are crooks."
* Trenchcoat Brigade: John Constantine inspired wearing coats among his knockoffs.
* Trenchcoats, if seen in real-life and not used for obvious comedic effect, are often associated with exhibitionism or a
* Trenchcoat Warfare: When your longcoat hides badass things to be unleashed at whoever messes with you.
* Trenched after a lawsuit was threatened by a European company which owns a WWI-themed board game of the same name.
* Trenched in all territories a few months after its American release due to a trademark disspute preventing the original title from being used in Europe.
* Trencher. They are construction vehicles with giant chain or circular saws. No, you can't have one.
* Trench made the Hot 100. Surely one of them was "Chlorine", which hit #1 on Alternative and was the highest streamed song off the album by a sizable margin? Nope; that song never made it past the Bubbling Under charts. The other three songs ("Jumpsuit", "Nico and the Niners", and "My Blood") were boosted to the Hot 100 upon their release but lacked "Chlorine"'s longevity.
* Trend Aesop: A character learns a lesson about trying to fit in with the crowd.
* Trend Aesop: Please don't give into peer pressure and join in on some dumb fad like the rest of the crowd.
* Trend Covers: Cover becomes so popular other works start emulating it.
* Trends, and the subsequent explosion is assumed to be evidence that Harman either

did it deliberately or was receiving divine punishment for trying to leave Earth's gravity.
* Tren Krom The fact that he tends to assault his victims with his long, red, fleshy appendages while doing this only adds to the disturbing subtext.
* Trent as "Janie." This could also be used to show their particular closeness (though there's at least one example of their other brother, Wind, using this one, too).
* Trent Castanaveras is also modified, in that he had the Tytan NN-II, a "nerve net that's designed to sit in high memory and model what's happening in your brain. It has nearly half a million processors, and makes a discrete connection somewhere inside your brain for every one of them. Once it is installed between your skull and the outer surface of your brain, it doesn't come out."
* Trent does have characterization but never gets a plotline that doesn't involve
* Trent Hamilton got the meaning of USSR wrong when discussing a Soviet Cornet (he thought it stood for
* Trent in the third have had long, cat and mouse games with ICG killers which remain largely off-screen.
* Trent Reznor came out that he did not): It's naturally a reddish brown.
* Trent Reznor has got to this point, what with running two bands (the long-running
* Trent Reznor permission to cover Hurt at first, he describes hearing it for the first time felt as if Johnny Cash had stolen his girlfriend, and loved the legend's interpretation of the song.
* Trent Reznor was getting in the way of new Nine Inch Nails' projects. He still posts plenty of updates, but most of them tend to be news-related rather than personal now.
* Trent's mental health takes a turn for the worse in Season 2; he suddenly becomes extremely clingy, needy, and co-dependent with Gwen, and he gains a bizarre obsession with the number 9 that he ends up prioritizing more than anything else. However, he returns to his normal smooth and easygoing
* Trent's Plymouth Satellite. It overheats constantly, and Jane sarcastically refers to it as "an adventure on wheels."
* trepanations, or holes cut through the skull. This was of course done with primitive implements, yet the bones show signs of long-term healing, which means the patient survived the surgery - and the procedure is genuinely useful for those with brains that are swelling due to trauma, as it can relieve the pressure.
* Treponema, the old woman wasn't sure if she wanted it treated. But she didn't have to worry. Her brain had been permanently "damaged," so the spirochaetes could be killed without reversing the mild disinhibition. In House's words, she was "cursed to feel happy".
* Tres destinos, a Spanish-language soap, which seems to show that the group enjoys a good laugh together about pop-culture.
* Trese, a Filipino comic, features the eponymous character using variations of existing beliefs and supernatural traditions. Examples include trying to bribe a local goblin with imported chocolate instead of the local cheap kind, and using a watch in freezing a suspect in time. One memorable incident involved binding a God of War into eternal combat by making him a high level raid boss in an MMORPG.
* Trese are the children of the god of war Talagbusao and a human woman. Despite this kinship, and although they didn't start out like that, they fight on the side of good.
* Trese, it is only after a major battle with an old war demon that the heroine, Alexandra Trese, and her companions remember that it is her birthday. By this time, a lot of damage has been done to the city, Trese herself is recovering from some battle wounds, and her two sidekicks have very nearly been murdered by their own father.
* Trese massacre on a train, and she's also seen making circles for exorcising.
* Trese), might actually be a (very mild) one: observant readers have pointed out that in reality the two streets do not cross. (On the other hand, it is also possible the creators simply used a fictionalised map of the city.)

* Trese, she just mentions Ibwa by name and says that he "runs a bad crew". It's the mayor who answers about "fairytales of aswang and mermaids".
* Trese). Specifically Cases 1, 2, and 5-13 were adapted, with 9-12 being told during the cold open flashbacks of each episode.
* Trese: The fabric that would become the coat was a baby shower gift for the eponymous prophecy child, having protective runes drawn into it. The coat itself has some snazzy sling-like Chinese-button fasteners.
* Trese - The show's a co-production with Malaysia, the Philippines, Singapore and the United States.
* tresillo are modified numerals, used as letters in some post-colonial Mayan languages.
* Tre somre) (2006), a Danish short film. A man in his 40s is going through a string of relationships with somewhat younger women. One summer, the 14-year-old son of a friend comes out as gay to him. The next summer, the boy, now 15, seduces him and they have drunken sex. The summer after that, they meet again and the man says that they can't sleep together again and must keep it quiet that they once did, but he agrees to give the boy a farewell kiss.
* Trespass (2011), Kyle refuses to cooperate, because he is afraid the robbers will kill them once he does.
* Trespass (2011), the robbers threaten to remove Avery's kidney if her father Kyle doesn't cooperate.
* Trespasser in that it's revealed the organization had been infiltrated by various spies and was falling to corruption after all, although this wasn't known to its leaders or critics at the time.
* Trespasser in the first instance, so this is less of a jarring transition than it would be for some, but it's still quite the shift.
* Trespasser in the most painful way possible, and leaves. You don't even get a chance to ask any more questions.
* Trespasser. Now it has become an organisation with the military power and structure of a country in its own right, and the powers of the continent are deciding what should be done about it. complicating matters is the threat of a new enemy, but one who already has influence within the Inquisition.
* Trespassers will be Prostituted describes the book as "a simple story following the age-old pattern of Boy meets Girl, Girl praises Satan, Boy drowns in Filth". There is no romantic plot-line in the book.
* Trespasser, tell them the Inquisition is disbanded, and then drop the writ (which is a hefty tome).
* Trespasser that live within Deep Roads, at one point. Since the Titans are connected to (and hinted at being) The Stone that Dwarves revere and were created from, Bioware basically said this trope was the case in ancient times.
* Trespasser, their civilization collapsed within decades, if not years.
* Trespasser to see herself in the book and declares that she is "going to read the shit out of this!"
* Trespassing HeroGo everywhere you can in an RPG, even into private homes without an invitation!
* Trespassing to Talk: A character breaks into another's home and waits to confront them when they arrive.
* Trespassing to Talk: Waiting in a character's home or office to confront them.
* Tressa's physical and magical stats are dead even as her default Merchant class. Her skill list also has a decent variety of physical, magical, healing, and support skills. However, all of Tressa's skills have effects that can be done better by someone else.
* Tress MacNeille encountered. He stalked her to the point of her having to cancel appearances in his hometown.
* Tress MacNeille is never named in dialogue. The credits list her as Chillingsworth, but you have to watch the bonus features to learn that her first name is Antonia.
* Tretch Craventail allows him to abandon his own unit at any time and teleport into another, nearby unit.

* Tretonin, a chemical used to remedy the Jaffa's dependence on the Goa'uld for survival. (And made from ground-up symbiotes, at least until they figured out how to make a synthetic version.) Tretonin can also be used by regular humans (that's what the Pangarans originally developed it for), but causes the same side effects of completely replacing the natural immune system and thus making anyone who takes it unable to live without it. For the Jaffa who already lack a natural immune system, this is of course a non-issue.
* Trev Broudy and other roles. In 2002, he was brutally attacked with a baseball bat by three men due to his sexual orientation which touched off a national discussion on anti-LGBT hate crimes.
* Trevelyan's Mission and frequently translates songs and ballads from Earth into the local language, passing them off as his own, impressing the natives, whose own songs are not as well-developed. This is especially evident in tragic love songs, where Ivar utterly dominates (the locals are good at happy or romantic love songs, but tragic ones are not really a thing).
* Trevelyan's Mission (set in the same universe centuries later) focuses on a single character, who in the last novel is revealed to be a distant descendant of the same line but himself did not know it.
* Trevelyan's Mission, who also happens to be a trained combatant and a crack shot. She then tries a different tactic and argues with his wife that it's not uncommon for men to have more than one woman on Earth. Ivar's wife counters that things work differently on her own home planet. Apparently, in Teruxi society, a core belief is that nothing should stand in the way of love or attraction, so all the rules humans assign to such relationships baffle them.
* Trevenant, a Pokémon created when a human ghost possesses a tree, acts as a warden of nature and curses those who encroach on its forests or log its trees, trapping them within the woods so that they can never leave.
* TREVOR and Private Young, although the initial "grab" kills Private Young instantly from the sheer pressure exerted on his skull.
* Trevor and Sypha's friend Saint-Germain is so determined to gain the power to free his lover from the Infinite Corridor.
* TREVOR at first appears to have died of mysterious causes. This turns out to be false in the most horrifying way possible.
* Trevor Bayne surprised everyone by winning the 2011 Daytona 500, just his second start in NASCAR's top level of competition. He has yet to score a follow-up win and lost his ride with Roush-Fenway Racing at the end of the 2018 season.
* Trevor Belmont stays pretty much the same, being brown-haired like the NES game and the second PS2 game in the series,
* TREVOR bone-blades sharp enough to cut through people like a hot knife through butter.
* TREVOR by the time the audience gets to see it, and it isn’t exactly getting any better.
* Trevor can choose to use a Cargobob, earlier stolen from the military, to steal a submersible from
* TREVOR: Downplayed: Dr. Smithe has a combover, and wistfully admits that he will miss the sound of Trevor’s screams.
* Trevor Fergus is officially the owner of a delivery company tasked with delivering Ducklair's sonic weapons to the US Army. He would also skim a few weapons and sell those to Duckburg's
* Trevor) from wandering in, climbing onto the roof, and stealing the attack chopper on the helipad.
* Trevor gains this ability with the Morning Star whip which with one swing makes vampires
* TREVOR: Given that the story takes place in a location where medical experiments preformed, the facility is spotless at the start of the story. This makes the location seem all the more unnatural, and highlights the ensuing carnage.
* Trevor Goodchild does this to Aeon Flux, except he actually stores the microfilm into her false tooth and closes the lid. With his tongue. No wonder she's into him.
* Trevor has a pretty awesome Game of Thrones-esque fur trim cape too, it even

stays mostly intact after getting hit with the Cyclops's
* TREVOR, he appears to watch them with a multitude of eyes through the ventilation system, and it’s not clear where on his body they have formed.
* TREVOR human, he appears to have mutated into something much more horrifying.
* Trevor is reduced to banging his head into a wooden pallet when he realizes that
* Trevor is undeniably demented, but it's never specified where his signs of mental illness come from. Given his hallucinations and weird behavior, he has clear signs of
* Trevor James Goodkind, scion of the wealthiest family on the planet, and one of a long line of mutant haters. Manifests as a mutant, gets kicked out of the family, gets horribly experimented on by his parent's
* TREVOR know what he is ranting and raving about, despite his insistence that he’s already told them.
* Trevor McDonald (born in Trinidad but gained English citizenship in 1960s)
* Trevor Noah, recalls when his mother was shot in the back of the head by her ex-husband. The bullet traveled under the scalp then exited through one of her nostrils. Trevor Noah remarked that once the blood was cleaned off his mother's face, it was clear the damage was fairly minimal.
* Trevor Noah, the South African comedian and show host, tells in his autobiography how he was best friends with his crush for 3 years and how he wanted to ask her out for matric dance (South Africa's equivalent to prom), only to find out that she a) had moved away during summer break, b) to America, and c) had reciprocated his crush the whole time.
* TREVOR: One whiteboard in the room with the security terminal is designated to how many days have gone by without an accident. By the time the story starts, the count is at 4, and it’s already outdated.
* Trevor Rabin. The other members of Rabbitt are mostly forgotten except as a footnote in Rabin's career.
* Trevor revels in finally having found something he can excel at, and is quite proud of it.
* TREVOR seems to have completely lost his mind and is acting purely on instinct, he retains enough cunning to figure out how to maneuver himself closer to his victims.
* Trevor sees himself as a red-blooded American who embraces the corrupt and decadent ideals of the modern USA and gets very angry if anyone points out he's actually Canadian.
* Trevor (short film about a 13-year-old old boy realizing that he is gay, gay main character; subject matter includes LGBT awakening, homophobia coming out story, LGBT youth)
* TREVOR skin does not keep up with his ever-shifting muscles, and constantly tears away from itself.
* Trevor Strnad that decried the illegal downloading of their albums, stating that the fans weren't sticking it to the man by downloading their music but were instead hurting them, as they were in that spot where they were big enough to live off of their music without having to consider day jobs but were nowhere near big enough to be anything even resembling rich and that they needed physical sales to prove that they were still relevant and retain strong label sales; if album sales fell below expectations, the likelihood that the label would start to consider them "old news" would rise significantly and could jeopardize their chances of continuing to receive support from the label. The responses were predictable; plenty of people (many of them musicians) agreed with both the statement and the sentiment behind it, while others took it upon themselves to shower them with abuse and accuse them of being whiny, entitled rock stars who saw the fans as piggy banks and were just getting mad that they weren't yielding enough.
* TREVOR-style experiments, but they are at least somewhat aware of how dark the work they’ve been doing is.
* Trevors World Of Sport: Trevor, the only honourable sporting agent in the world, is considered a very bad liar by his staff.
* TREVOR. The characters that came about as a result of the contest were:

* Trevor the traction engine gets this treatment from various memes and YouTube Poops because of his
* Trevor. Thirteen-year-old Trevor attempts suicide due to the problems of being gay, but his aspirin overdose fails and, thanks to a kindly male nurse and tickets to a Diana Ross concert, he ends the film saying he's "definitely decided to live...till tomorrow", then dancing up the drive to his house.
* TREVOR: While the medical facility at first appears to be well-lit, parts of it become ominously dark.
* TREVOR, with their best guess being that he somehow tampered with the sedatives used to subdue Trevor.
* T-Rex: A Dinosaur in Hollywood follows the artistic career of Mr. T-rex from his discovery to becoming one of the greatest stars in the world. Follows the real life story of how he became a cultural icon.
* T. Rex a song by the jazz-fusion group Chase entitled "Get It On" on the American charts.
* T. Rex Ed Regis, the Public Relations manager of InGen, who did this (and got eaten).
* T. rexes that Rexes get literally addicted to the taste of human flesh.
* T.rexes when hunting the humans. The raptors in J.P.3, on the other hand, are simply trying to recover their stolen eggs and don't even bother eating the one guy that they kill.
* Treximet, a prescription headache remedy, has a woman who says, "My migraines are so excruciating, I just want to take my head off."
* T. rex may have gotten in on the action too, as fossils have been found of badly-injured individuals having been nursed back to health.
* T. rex only seems to play it straight when she's chasing the jeep at a suicidal speed for her species, but it's quickly subverted when the jeep accelerates beyond 30 MPH and she soon gives up the chase. Given that she only kills one human and spends most of her time hunting other dinosaurs, it is possible that she's not really hunting humans for food as much as she's establishing new territory for herself and chasing away potential rivals.
* T. rex predator, i.e. each other, comes along. As both had recently eaten, territoriality trumped hunger.
* T. rex pushes through the ceiling, breaking parts of the glass... but after a few back-and-forward cuts between the dino and the kids, the thing is still intact.
* T. rex really shouldn't have had external genitalia at all, although at least they only protrude slightly.
* T. rex-sized, flightless tyrant serins). Eventually, some of the more derived birds cease to resemble avians at all: the changeling birds in particular develop larval states similar to insects, and through further specialization their more derived lineages give rise to permanently aquatic, gill-breathing fishlike neotenic forms or the botfly-like squicks with parasitic larval young.
* T. rex the technical advisor. The films' general consultant was Jack Horner, who is notorious in the paleontological community for his decades-long crusade arguing that Big T's badass reputation was overblown (specifically, he thought the animal was a big, lumbering, carrion eater rather than a relatively-agile active predator), a crusade that even he is reluctantly admitting turned out to be wrong.
* Trey Parker And Matt episodes for the season, and in DVD commentary for that season, they point out several places where it is evident that they were running on fumes.
* Trey Parker and Matt Stone assign this status to Briann Boitano of all people, in their song "What Would Brian Boitano Do". The lyrics of the song chronicle his exploits, which include fighting grizzly bears in the Alps, beating up Kublai Khan, time-traveling, breathing fire, rescuing princesses and wolfing down unpalatably spicy chicken wings.
* Trey Parker and Matt Stone from Gary that says nothing but nice things about them.
* Trey Parker and Matt Stone have mockingly attempts to convinces that Chinese president Xi doesn't looks just like Winnie-the-Pooh at all. It didn't work (and

the tweet filled with replies with Pooh Bear), but Trey and Matt didn't care about it nor feeling remorse.
* Trey Parker and Matt Stone, including a few incidental female characters.
* Trey Parker and Matt Stone in complete denial. Oh, and Mr Garrison, who's always telling people he's gay, but isn't all that camp.
* Trey Parker and Matt Stone really hoped "Muff Cabbage" would catch on but admitted in the commentary it never did.
* Trey Parker and Matt Stone singing abilities. Usually manifests in the form of musical numbers or hilarious use of horribly improper, but grammatically correct Japanese. Parker has a long relationship with music and studied Japanese in university before making it big.
* Trey Parker and Matt Stone, this occurs when one character attempts to get another to vomit by sticking his fingers into his throat and vomiting himself, which inspires others to vomit in turn, leaving everyone in the room vomiting except the person who originally had to.
* Trey Parker began. He made a fake trailer for film class and was told to make the movie by his teacher.
* Trey's parents from an early episode also qualify. They're amazingly snooty rich people who spend their entire episode looking down their long, snobbish noses at Miley for being 'a bumpkin' until Trey finally tells them that he's ashamed of them.
* Trey Spruance collaborator, primarily with Secret Chiefs 3 (who are not a jazz act, but take influence from it and have numerous jazz-related tracks).
* Trey The Explainer. He commends the film for featuring a racially diverse cast by saying that, though it's still not period accurate, it's still better than other films that portray "cavemen" as all white (centuries before such a skin-tone became a thing).
* TREY The Explainer. He goes with whatever the scientific research suggests but he is especially fond of feathered dinosaurs. He has several videos discussing them.
* TREY The Explainer usually focuses on actual paleontology; however, he has dabbled with this:
* Trey The Explainer: Videos discussing myths and truths about science, particularly biology and paleontology.
* Tri-Ace loves this trope in their optional dungeons. Lots of Fourth Wall breaking abounds, from the developers readily acknowledging
* Triad Assassin and is very ruthless, willing to go where other mobsters won't, and completely determined to rise in power and fame.
* Triad. Since Tequila fought gangsters and Chang is one, it stands to reason that he 1986 Where kid tannen wasn't that honest of a cop.
* Triage during a mass casualty incident can get like this: Do you treat people first-come first-serve, or focus limited resources on possibly-fatal-but-easily-treatable injuries to maximize lives saved, but possibly condemning more seriously-injured patients to an untreated death? In fact triage training comes down to focusing the most effort on the life threatened casualties who are the most likely to live.
* triage. Standard triage tags for injured people have four colours: green for minor injuries that can be safely ignored by first responders, yellow for a non life-threatening injury (such as a broken arm) that can have treatment delayed until resources are available, red for someone who needs immediate attention (such as someone going into shock or having trouble breathing), and black. A black tag on someone who isn't dead yet means they're not to be given any medical treatment except pain medication until everyone else is dealt with because their injuries are almost certainly fatal with the resources available and efforts spent on them would end up unavailable to people who have a higher probability of living.
* triage tag for each patient, if they run out of tags (or if they feel the tags risk getting damaged), they will write the information on the patient's forehead with a waterproof sharpie.
* Triage Tyrant: How bad the injury is doesn't matter to them as much as if they like or value the injured.

* Triage X chose not to dub it when doing the localization, instead simply adding subtitles to the Japanese voice track.
* Triage X follows an entire team of medically-themed vigilantes who kill gang leaders, mob bosses, and other menaces to society.
* Triage X stands at 5'9" tall and is one of the most attractive members of the team.
* Triage X - The method the protagonists use to hide the evidence of their vigilante actions. Frequently involves destroying the entire (abandoned) city block.
* Trial & Error, the frozen yogurt shop in East Peck is also the local forgery store.
* Trial & Error, when Josh the defense lawyer sets up one, his helpers excitedly chant "Murderboard" over and over with motions until he joins in.
* Trial-and-Error Gameplay appearing and then falling down and crushing you.
* Trial-and-Error Gameplay: A video game where it's annoyingly easy to make the wrong choice.
* Trial-and-Error Gameplay, this can come off as a little more frustrating.
* Trial, but lost the coin toss. They do try to kill him after the trial, but by then Batman and the DA manage to escape.
* Trial by Combat) is busy keeping the galaxy running). If the defendant is killed, he was obviously a heretic. If the defendant wins, he was obviously aided by Chaos and is executed as befits an obvious heretic.
* Trial by combat is still practiced in certain rural areas of the empire in
* Trial by Combat, the Gelrakian spectators shout Vindor's name to cheer for their champion.
* Trial by Combat. This meant either death, or a verdict of banishment or outlaw, for the loser, with a risk of death from wounds for the victor too.
* Trial by Combat: When two parties have to settle their legal dispute by violently fighting in a duel.
* Trial by Fire failure or waste of time will result in the above mentioned non-standard game over.
* Trial by Friendly Fire of hitting another target, but risks it anyway.
* Trial by Friendly Fire: Someone must act quickly to stop a threat and the solution requires putting your allies in the line of fire.
* Trial by Friendly Fire: The only way to kill the enemy is by shooting through your friend.
* Trial by Journal, one character does this in the hotel pool at night.
* Trial by Jury: As soon as the Plaintiff enters the courtroom, the entire jury falls in love with her. She does not want them, but manipulates them as much as she can to win her case.
* Trial by Jury by defaming himself, proclaiming that he smokes and drinks to excess and that "I'm sure I would thrash her, perhaps I should kick her." The Judge proposes to get the defendant drunk and see if he would treat her as he said. Everyone else objects, with the natural exception of the defendant.
* Trial by Jury got his big break in law by courting the "elderly, ugly daughter" of a wealthy attorney to get access to her father's money and connections. Once his career had advanced to the point where he got a judgeship, he dumped her.
* Trial by Jury the Judge's ex-wife is described by her father as being able to pass for forty-three, in the dusk, with the light behind her.
* Trial by Jury: "When I, good friends, was called to the Bar" (The Judge).
* Trial by Ordeal: When the defendant's guilt or innocence is determined by being forced into a dangerous life-or-death situation.
* "Trial By Squire" features the squires of several other knights, who all have
* trial for breaking probation in Russia (due in part to leaving the country for treatment after nearly being killed in an attempted assassination by the Russian government), blogger and opposition politician Alexei Navalny gave a speech to the court in which he said: "[Vladimir Putin's] only method is killing people. However much he pretends to be a great geo-politician, he’ll go down in history as a poisoner. There was Alexander the Liberator, Yaroslav the Wise, and Vladimir the

Underwear Poisoner.” He ultimately was sentenced to 3 years in prison.
* Trial law in the DCU has been modified to allow superheroes to testify without revealing their identities.
* Trial of Champions: In the first act of the adventure, you are sold as a slave to Blood Island, the domain of Lord Carnuss, who will put you and 41 other slaves into a coliseum where you are forced to partake in numerous gladiatorial games and combat situations until only one of you remains alive.
* Trial of The Incredible Hulk, a curious scene happens where the Hulk rescues Daredevil from the Kingpin and carries him to safety... exactly like this.
* Trial of the Mystical Jury: The hero has been captured and forced into a trial, but his captors/jurors are not villains. Most likely, they have committed a crime they were not aware existed where they are.
* Trials & Tribulations lawyer winning, so it's still a subversion.
* Trials & Tribulations. Which is still exposed in the end by, again, further pulling the thread.
* Trials and Tribbleations", on the other hand, where she actually has time to prepare, she is shown using a device to paint over her spots instead.
* "Trials and Tribble-ations" uses a framing device where Sisko, having returned from traveling into the past to prevent Captain Kirk from being assassinated, is describing his actions to Starfleet agents who investigate time travel incidents. Sisko defends the actions of himself and his crew until the end, where he admits that he took the opportunity to talk to Kirk and get his autograph, and says that he understands if they file a reprimand for his unprofessional behavior but has no regrets. One of the agents shrugs and admits that, given the chance, he'd have done it too.
* Trials and Tribulations (3-5). It feels like you finally got the murderer captured and have the proof, but then Godot and Phoenix drag it out by an hour or so.
* Trials and Tribulations after another piece of similarly dubious testimony.
* Trials and Tribulations, and looks like a dead ringer for Godot (whose name is pronounced the same as the last syllables of each of Diego Armando's names). It's fairly obvious that they're the same person.
* Trials and Tribulations features a case where the accused may or may not have dancingly descended onto the crime scene.
* Trials and Tribulations for 30%-40% of Case 5. He also shows up in Case 4, but as an NPC. His role outside playability isn't that great either in this game compared to the previous ones.
* Trials and Tribulations Godot objects, just before throwing a cup of coffee over Phoenix's face.
* Trials and Tribulations has a variation in its final case, where, rather than a picture, a notebook with a drawing of the main cast is used to the same effect. In a bittersweet turn, the other page has another group picture of three main/important characters who lost their life.
* Trials and Tribulations has Furio Tigre's scream of rage when you first meet him at the park: [GWAAAAAAAAAAAAAAAAAAAAAAAA] [AAAAAAAAAAAAAAAAAAAAAAAAAAA] (for about seven boxes of text) [AAAAAAAAAAAAAAAAAAAAAAA] [AR!]
* Trials and Tribulations has similar motions like Phoenix which shows the strong influence she has on her protegé
* Trials and Tribulations has Terry Fawles, who became infatuated with Dahlia Hawthorne, the girl he was tutoring when he was twenty and she was fourteen. Years later, he still hasn't gotten over her, despite the fact that she's now
* Trials and Tribulations. He's a victim of a tutorial case in the third game with just a few seconds of screentime. But his attempt to warn Phoenix about Dahlia is what not only saved Phoenix from Dahlia and lead to her arrest but also to Phoenix meeting Mia and becoming her apprentice which in turn made him responsible for a significant part of the original trilogy.
* Trials and Tribulations is basically a pallet swap and a face visor.
* Trials and Tribulations killed him, at least). As a result, the victim did not have a swift silent death but instead gave full display of the poisons' physical

reactions for all to witness, and the police have no trouble in figuring out what killed the victim.
* Trials and Tribulations Let's just say the Judge was not the only person freaked out and awed.
* Trials and Tribulations. Luckily, the plan isn't fulfilled thanks to a third party who knew about it beforehand.
* Trials and Tribulations Mask☆DeMasque, but didn't commit the crime in question. He confessed to have an alibi because at the time of the theft there was a murder in which he was implicated, but which he didn't commit either, and the one who did commit the murder had the same idea and had Phoenix find him as Mask☆DeMasque in court.
* Trials And Tribulations murdered her step-sister Valerie and blamed it on her boyfriend Terry, who killed himself at her request. In the flashback fourth case, she gets away, but in the first case, which takes place sometime after, she commits another murder and blames it on Phoenix, only for Mia (who was also the defense attorney for Terry) to finally prove her guilt and make sure she did not get away this time, resulting in Dahlia being executed for the crime. She tries to get revenge as a spirit later, but that plan gets foiled as well.
* Trials and Tribulations opens with the news that Phoenix not only lost a case but did such a horrible job in the process that some speculate that he deliberately threw the trial. Not remembering this happening at all, he concludes that somebody must've impersonated him, and manages to get a re-trial in order to restore his reputation and find the imposter.
* Trials and Tribulations that it's hard to feel like he should be in prison at all.
* Trials and Tribulations. The former introduces the new prosecutor and the latter revisits a defendant from the previous game, but both have little relevance to the overarching story arc.
* Trials and Tribulations; the initial premise of the fifth case is a trip to a Hazakura Temple, a training temple for spirit mediums. One of the training courses Hazakura offers is the "Special Course," in which the trainee sits on a block of ice while being doused in "spirit water" and chanting a spell 30,000 times.
* Trials and Tribulations. The killer then breaks down and refuses, therefore proving Mia's theory.
* Trials and Tribulations when Phoenix and Maya tell him that Maggey hates him for betraying her.
* Trials and Tribulations. You learn in case 4 that she dived into a river famous for taking corpses when she was a child, but because she appears in case 1 (which chronologically happens after 4), you know she survived.
* Trials in Tainted Space with a large ovipositor what looks like a horse dick with spikes at the tip. The female uses her ovipositor to rend the males sperm sacs to fertilize her eggs and if she's the alpha of the group she'll lay get lesser female to carry them in her. Yeah.
* Trials Of Apollo stanza). The first verse essentially tells him to go to New York (where the Big Bad has his headquarters), and Apollo realizes that he is going to receive the next verse of the prophecy there.
* Trials Of A Workaholic. Why the author even thought that it was sexually motivated, we don't know.
* Trials of Mana, and yes, they're quite a bit skimpier than their Light-aligned classes.
* Trials of Mana at everything, with decent stats and offensive spells. The only really exceptional thing about Riesz is that she can have the best buff or debuff spells among the party, but that depends on which class change she goes through.
* Trials of Mana, every character's introduction ends with them travelling to Jadd while the opening credits roll. Unlike the others, Kevin doesn't take a boat because Mintos has no harbor, and swims his way there. He still arrives at the same time as everyone else, despite being a whole continent away.
* Trials of Mana has a black market located in Beiser, the merchant city. Open only at night, it's the only place where you can buy spell-replicating items.

* Trials of Mana has a normal title screen, but when you actually start the game, you play through your main character's prologue. At the climax of the prologue, your character hops on a boat (or swims across the ocean, in Kevin's case) to set off for adventure, and the credits roll over a tour of the entire world map.
* Trials of Mana, he learns 4 Jutsu attacks corresponding to the elements: Water Jutsu, Earth Jutsu, Thunder Jutsu, and Fire Jutsu.
* Trials of Mana, if you choose Kevin as one of your characters, his nighttime werewolf transformations cannot be interrupted by enemies. "Hey monsters, just gonna go werewolf here, don't mind me."
* Trials of Mana In the remake, a post-game questline involves the protagonists gaining yet another class change which requires going on a character-specific quest to obtain the artifact required for said upgrade.
* Trials of Mana is a male example, with hair in a ponytail that goes down to his waist.
* Trials of Mana is home to many a book, including a "naughty novel" on one of the shelves. In the original cut, Charlotte is the only one who is confused because she's too young to understand half of what's in it. In the remake, the Faerie reads enough to tell her that she should wait a few years before touching it again. Every other character knows what they're looking at, and is appropriately shocked.
* Trials of Mana is the only character to possess healing magic for every single class of hers, and remains by far the best at it throughout the entire game. Her dark-aligned classes can also do decent damage with summons, while her light-aligned classes focus more on party buffs. Strangely enough, the only two other characters to learn healing magic, Duran and Kevin, are otherwise devoted physical powerhouses.
* Trials of Mana is this. Most (if not all) of the script is kept from the original right down to the dialogue, character models and animations are the same as the sprites even in animation (such as the dancing shopkeeps), so on and so forth. While there are a few additions, they're small in number and tend to be additions rather than any actual changes.
* Trials of Mana Jessica. If Belladonna dies, the Choker of Death will kill Jessica in return, leaving Hawkeye unable to just gut the witch like he wants. It apparently also works in reverse, as Belladonna has the choker removed before she attempts to sacrifice Jessica to the Firestone.
* Trials of Mana Kevin. During the day, he's in his humanoid form and a pragmatic fighter. When it becomes nighttime, any battle opens up with him transforming into his wolf form, which gives him a boost to his attack power.
* Trials of Mana method is to ask the beast man for help changing her clothes.
* Trials of Mana: Mispolm, Benevodon of the Woods, takes the form of a giant jack-o-lantern sat atop a mass of roots.
* Trials of Mana. Not too long after the heroes visited the place, the lakeshore village was razed to the ground by the Beast Kingdom of Ferolia. It remains destroyed for the rest of the game.
* Trials of Mana on the Switch in Japan was released in 2017, people from Square Enix were acknowledging a demand for a localization, leading to the official international release of the original version of the game in 2019, plus a full remake in 2020, both featuring an all new translation done in-house.
* Trials of Mana, the Masked Mage, Kevin and Charlotte's final boss, happens to be considered the easiest, posing very little threat compared to the Dragon Lord and the Dark Majesty. This owes to the fact that he's simply a slow-moving wall of health that mostly uses powerful offensive spells on occasion. One of the heroes who happens to be linked to him story-wise can learn an attack that deals maximum amounts of damage to this boss.
* Trials of Mana the strategist. Justified with "I was walking around at the time, so I wasn't in any place". And then the town mocks them for their gullibility. *grumble*
* Trials of Mana (used by the Nevarlan thieves) that uses colourful balloons to stay airborne.
* Trials of Mana wears one. In the remake, both she and Riesz wear leotards in some

of their classes (for example, Riesz wears a leotard as a Rune Maiden).
* Trials of Mana with knives. One of his techs, the "Flying Swallow Toss", involves tossing a barrage of knives at every target on the screen. One wonders where he keeps them all...
* Trials of Mana), you can have a party of all females, all males, or any combination of your choosing.
* Trials of Mana You will never feel safe around a legless rabbit again.
* Trials that Harry overcame relatively easily in the books — getting the flying key in
* Triangle and Robert is an infernal machine powered entirely by Schemes both Zany AND Wacky. Plus the occasional Beam of Pure Chocolate.
* Triangle and Robert. Meat falls from space all the time in their world; what makes the Starham special is that it's properly cured. It's powerful enough to cause some pretty major havoc. (This is not a joke.)
* Triangle and Robert Not only does the Cartoonist interact with the characters, his presence has altered their universe — everything has been badly drawn and monochrome since he showed up. Unsurprisingly, there are anti-Cartoonist protests in the characters' world.
* Triangle and Robert to distract the cartoonist and keep the Sentries off-panel. This sometimes works, though never for too long. (It can also backfire: at one point the Sentries are gone for quite a while, and when they return, each one has to take a couple of weeks explaining the plot-important stuff he's been up to.)
* Triangle appears to be one of these, but its "six victims on a haunted cruise ship" beginning gets subverted.
* "Triangle-A-Rooney" leaves Beck and Hart alone - but has Johnny Nimbus standing next to them with
* Triangle Heart 3: Sweet Songs Forever, although it still doesn't make any sense unless you play the game first.
* Triangle Heart 3: Sweet Songs Forever got it from somewhere. Like Shuuko, she abandoned her child to relatives, but getting her back didn't diminish her fighting skills, and she becomes a high-ranking member of the Hong Kong special forces.
* Triangle Heart 3: Sweet Songs Forever, replacing kunais with technomagic cartridges.
* Triangle Heart 3: Sweet Songs Forever. They're usually bodyguards, but occasionally do some assassination work as well.
* Triangle Heart 3: Sweet Songs Forever to Nanoha's adopted daughter Vivio, anyway.
* Triangle Heart 3: Sweet Songs Forever, who ended up getting her own series that has completely eclipsed her debut game.
* Triangle Heart series, where it's the rest of the Takamachis that live a secret battle-hardened lifestyle while Nanoha is an ordinary little girl.
* Triangle Man dying and turning into a tree and both marshmallow people transforming into inanimate marshmallows. And so Triangle Girl
* Triangle Shades from his days leading the Squirtle Squad and has been known to pull them out from time to time.
* Triangle" when a certain character we know and kind of love practices confessing his love to Buffy by talking to a mannequin wearing one of her sweaters and a blonde wig. He makes it about four sentences into the imagined conversation before it degenerates into mutual (half-imagined) verbal abuse, and he winds up beating it over the head with a box of chocolates.
* Triangle, with his last breath one of the murder victims manages to write "Jes" on the mirror using his blood. Too bad, Jess (the killer) sees it first and rewrites the message to her advantage.
* Triang Relations: A listing of all the possible love triangle dynamics involving only 3 people
* Triangular world-plates with triangular lakes in the middle, each orbited by a tiny sun and moon. Jennifer Diane Reitz loves this trope; her sci-fi setting spans multiple universes, and each has its own laws of physics, which manifest mostly in bizarre world shapes.
* Triangulum Galaxy. They're an ancestrally arboreal species and primarily live in

space-adapted derivatives of their homeworld's arboreal plants, similar to much larger Dyson trees, which they sometimes outfit with reactionless drives to turn into immense, interstellar ships.
* TRianThology ~Sanmenkyou no Kuni no Alice~ have one. Starting with the main character Ibito, his friend Hidaka, Ichou, and the girls Noriha, Yukina, Hinata, Hinako, Miho, and Karen.
* Triassic World: Diana is the only person to survive a building full of genetically engineered dinosaurs.
* Triassic World: The building the film is set in is designed to completely lock itself down in the event that a dinosaur escapes its holding cell.
* Triassic World: When things start to go downhill, it's kicked off by a security guard trying to warn everyone before getting his head bitten off by a dinosaur.
* Tribal Carry: Captured by unwelcoming natives, a character is tied on a pole by their wrists and feet and carried away.
* Tribal Carry: Tribesmen who capture characters will often carry them to their village like game on a pole.
* Tribal Hunter inflate when fed a power egg, and then start floating like balloons till defeated.
* Tribal Hunter's main protagonist Munch has this, along side a few enemies. While Munch's can allow him to vacuum up items and defeated enemies, though he can get an upgrade late in the game that allows him to suck up most undefeated enemies at the cost of not gaining xp for defeating them, enemies that employ their version of vacuum breath only use it to suck up Munch to eat them (and/or feed them in the case of the bee dragons).
* Tribal Rage has everything you could ask for in a car: turrets, mounted machine guns, AP machine guns, flamethrowers, rocket launchers tank slugs...
* "Tribals" have become a mainstay of the franchise, usually characterized by mistrust of advanced technology and an inherent tendency to
* Tribal societies that, historically, used exile as a punishment for crime usually presumed that those outcast would die from exposure or starvation. But, in regions and seasons when dangerous animals were common, expulsion from the group probably resulted in this trope for more than a few such outcasts.
* Tribal Trouble pits Vikings against natives, with three tiers of raw material for building increasingly powerful weapons: wood, iron, and... chickens.
* Tribbles. Like the aphids example in the RL folder, they're born pregnant and are something of a
* Tribe book, when Spencer and the tribe are done with Spencer's latest "test" in wood shop, Peashooter decides to test Sporkboy's reflexes by turning on the table saw. He ends up slicing off the tip of Sporkboy's finger.
* Tribe cats are named after the first thing their mother sees when they are born, and this results in several-word-long,
* Tribe Of Hats who have this as their hat. They're all animals evolved into humanoid creatures by the High Evolutionary.
* Tribes 2, including your character's voice. One of the options for a Human Male player model is "Iceman." It sounds as you might expect.
* Tribes allowed players to build up tremendous speed by "skiing" downhills.
* Tribes: Ascend allows you to purchase gold which can be used to unlock new classes, weapons, support items, EXP boosts and loadout slots. Playing the game earns you EXP which can be used to do this as well, however most unlocks require a ludicrous amount of EXP to trade for the unlocks — some of the strongest weapons in the game require up to ONE HUNDRED THOUSAND EXP in order to initially unlock. A typical match can earn a player anywhere between 500-2000 EXP. At least item upgrades are significantly less expensive....
* Tribes: Ascend. One of the Doombringer's most powerful defensive weapons is their forcefields - not only does it absorb weapon fire, if an unfortunate or unaware enemy comes at your flag from the wrong angle, they can slam into the barrier hard enough to kill themselves.
* Tribes, in which disgruntled Marine DI Tom Drake continually butts heads with drafted hippie Adrian, leading both men to learn about and gain respect for their

"opponent".
* Tribes. They can be further customized with a variety of packs that draw from the armor's energy supply (or in the case of the energy pack, give increased recharge rate), such as a shield pack, repair pack, cloaking pack, or sensor jammer pack.
* Tribes: Vengeance. All weapons for heavy armor seem to be the front half of regularly accessible weapons for other classes slotted into the front excluding the mortar launcher which is heavy exclusive.
* Tribes: Vengeance's spaceship as it makes an uncontrolled reentry and, naturally, starts falling apart. Being the badass she is, however, she surfs the falling debris all the way to the surface, jumping off to the next one just as the piece she's currently on burns up.
* Tribes: Vengeance, true to its subtitle, is driven almost entirely by someone's desire for revenge and the protagonists are rotated all the time.
* Tribes: Vengeance universe) has a grappling hook pistol, which shoots out a hook at extremely fast speeds and latches onto any surface except for players. You can use the grappling hook to pull extremely fast turns when flying down mountains, use it to latch onto vehicles, and if you have insanely good aim, grab weapons and ammo off the ground while moving.
* Tribes: Vengeance when the Imperial princess Victoria is kidnapped by the Tribals while space-traveling. The Tribals in this case are just as technologically advanced as the Imperials, but living in the harsh conditions of fringe planets made them adopt many customs viewed down upon as barbaric by the Imperials, pre-conditioning Victoria to fear and loathe her captors (at first).
* Tribes: Vengeance, where Mercury's hit on Daniel is called off just before he takes the shot.
* Tribes (which either came with the base game or one of the most popular mods ironically played more than the real game itself) killed you if you stood on them when someone was coming through. It also would kill you if you were too heavy.
* Tribe Twelve clone, but after the funeral submission, it begins to improve noticeably, in just about all respects. The acting is especially noticeable.
* Tribe Twelve clone, but eventually found its own voice after the funeral submission, especially in "Night Recordings."
* Tribe Twelve features the video titled "Unknown Caller", where protagonist Noah Maxwell receives a call from the Observer in his dead cousin's broken phone. Scared by the first one, Noah ends the call, just to be called again. After listening to the message, Noah panics and completely destroys the phone.
* Tribe Twelve guys get in the car Slenderman appears a few feet away from the front of the car. They expect that he will teleport or speed run to the car. He doesn't. Instead he throws (or worse, drops from a great height) a random member of the Order onto the car's front glass. -Insert screaming here-
* Tribe Twelve has a pretty nightmarish face at the end of COMECLOSER.
* Tribe Twelve has fewer of these as the majority of the series occurs indoors, but does include "Submission 4" and "Nature Trail Visit".
* Tribe Twelve in INTERCEPTION and reveal as a future/alternative timeline Noah make his identity a major spoiler.
* Tribe Twelve. Noah's investigation didn't attract Slendy's attention — it just made him aware that he was on Slendy's list all along.
* Tribulation, and their sister Eileen doesn't even remember whether it happened or not (or so she says).
* Tribulation film series, Tom Canboro is being chased through a hospital by a One Nation Earth agent who uses his mind powers to close all doors in the hallway so his prey cannot escape — all except for one room that Tom enters, which turns out to be a chapel which provides for him a means of escape.
* Tribulation has, among its many screw-you's, lava pit traps. These tend to be very large and only some of them have visible markings on the ground where the terrain is actually solid.
* Tribunal Almalexia. The out-of-universe reason for this is, of course, to prevent you from flying over the surrounding city walls and discovering that the city basically floats in the middle of generic ocean, instead of being surrounded by an

even larger city and miles and miles of mainland, as the lore says it should.
* Tribunal deity, his creations and advancements have never proliferated outside of his city.
* Tribunal each. (Giving them advice can increase it to 67%.) Even if the date is successful, one of the men offers you nothing as a reward.
* Tribunal expansion who insists he's never met any witches; it's just really hot out.
* "Tribunal" featured the son of a Holocaust survivor attempting to bring a suspected concentration camp commandant to justice, with his ex-wife offering somewhat reluctant assistance in the matter.
* Tribunal, making it impractical for the player to wield. (Even if you buff your strength enough to pick it up, it breaks after one strike.)
* Tribunal, since the next step of the plan is killing you. Since you'd presumably defend yourself either way, the monologuing doesn't give you any hint about how to stop the evil plan that self-preservation wouldn't already point to.
* Tribunal Temple has banned necromancy and considers practicing it punishable by death, despite it being legal (with certain reasonable restrictions) elsewhere in the Empire. This is rooted in their religious beliefs which include significant ancestor worship.
* Tribunal Temple's himself. In the few instances we get to see or hear about them in action in the game, they almost exclusively work alone. One exception is a Fighter's Guild quest which has you aid a rookie Buoyant Armiger in clearing out a necromancer's den.
* Tribunal", the Cardassian attorney, Kovat, urges Odo to help O'Brien confess to a crime he never committed because, "Think of the children, Sir. Allow them to see a glimmer of enlightenment."
* Tribunal. The quests in the second half of the Tribunal main quest are slightly different depending on which side you report to, though the ending is ultimately the same.
* Tribune does this a lot on local newscasts of their owned channels for shows airing on WGN America.
* Tribute bands that imitate a more sophisticated original than, say, a guitar rock band, especially when synthesizers are involved, have to choose between very detailed faithful reproduction, everything being played live on stage and a band line-up and stage setup that doesn't get out of hand. But, again, they can only pick two.
* tribute by wishing people would make "4chan meme[s]" of her pictures and quotes.
* tributes one throughout Central and South America, with "Ramses" being a particularly memorable one in Bolivia.
* Tribute to Fido: An author writes a tribute to a real-life animal in their story.
* Tricentennial: featured the Daedelus (or John F. Kennedy, or Leonid Brezhnev - apparently spaceships are also prone to renaming), which was powered by nuclear bombs.
* Triceratops that's trying to kill them, and the protagonists only make it through because, for the most part, the two dinosaurs are more interested in killing each other.
* Triceratops was also a good example, it was only marginally faster than T. rex, but in an all out fight, the trike would win 6 times out of ten.
* Trichogramma are incredibly small and parasitize the eggs of other insects. They are used extensively as biological control agents.
* Tricia are Fetch-class ghosts, who are able to possess mirrors. Among their powers, there are a variety of tricks to scare anyone who looks in the mirror by distorting their reflections. While they are stuck in the mirrors, they both can make a clone of anyone who looks at their mirror, then take control over the clone and go for a walk to spread the chaos further.
* Tricia Helfer dyed her dirty blond-brown hair platinum to play Six on the reimagined
* Tricia's Obligatory Art Blog paleontology diatribes, Disney movie reviews, and gardening. And she frequently links here, which is neat.

* Trick & Treat: Well, not an episode, but basically the whole game. Still fits the trope, though.
* Trick-and-Follow Ploy: Where you find out the location of the enemy's secret base by tricking an ally of his to go there and deliver some kind of communication.
* Trick Arrow reveals the original Caladbolg looked even more like a drill, mounted on a hilt that made it overall resemble an enormous lance more than a sword.
* Trick, a story about a amateur song writer who spends his night with a go go dancer.
* Tricked and let Steve go on his merry way. In terms of preventing the situation that makes up the climax of the book, better mental health awareness probably would have been a lot more help than gun control advocacy.
* Tricked, Coyote asks him to magically create a gold vein under some land so Coyote could build a mine. It wouldn't have been impossible for Atticus, but the geological impossibility would attract unwanted attention.
* Tricked Into Escaping so she can be framed for a murder. When she's thrown back in the slammer, her attorney then announces that he has good news: "You're no longer facing trial on the traffic violation."
* Tricked into Signing: A character is tricked into signing an important document.
* Tricked-out Healbot Paladins in 5th Edition actually get three different kinds of healing magic, all touch-based. Two work by default, one requires a specific career path.
* Tricked-Out Shoes that stimulate his feet with electronic pulses, they are also quite stylish. Whenever the story involves Shinichi, there is also something to be said of his navy sneakers.
* Tricked Out Time: Changing the past while making it look like you didn't.
* Tricked to Death: Intentionally deceiving or misleading someone into getting themselves killed.
* trickery instead. Vetinari notes that Moist is more uncomfortable with a sword in his hand than when having one pointed at him.
* Trick, Gabriel is trying to pee in the bathroom at a gay club. But a drag queen with a vendetta barges in and starts telling him a long story about Mark, the go-go dancer Gabe is trying to land. During this Gabriel is increasingly nervous and can't pee (he asks her to turn around and she says, "Pee shy? Don't worry, Miss Coco's here to help." — she turns around, then turns right back for the next salvo). Finally the drag queen delivers the final, climactic invective against Mark, and, in a bit of auditory punctuation, Gabriel is suddenly able to pee ("Good boy!").
* Tricking a criminal into revealing the location of a key piece of evidence (such as a body). One unlikely version is that the police forge some evidence to make it seem the victim's been seen around; killer goes to check on the place where the body is hidden;
* Tricking one of the inmates of an insane asylum into inviting you in apparently counts.
* Tricking the Shapeshifter: Greek god Zeus learned that his wife Metis would bear a son who would overthrow him, so he tricked her into shapeshifting into a fly, and swallowed her whole. Thus he tricked Fate as well.
* Tricking the Shapeshifter: If you can't defeat a shapeshifter in one of their forms, convince them to transform into something you can.
* Tricking the Shapeshifter: Tricking a shape-shifter into assuming a form where they can easily be defeated.
* Trick is this in spades. The man is so off his rocker that he would have trouble holding down a job at McDonald's, let alone become a detective with the Tokyo police, even if he's in a comedy series. Then, in the season 2 finale, when the cast goes to a forest that makes hair grow, his natural black hair grows back, displacing what must be gallons of bleach, and he not only becomes competent, but downright intelligent. One can only imagine he started bleaching his hair after becoming a detective...
* Trick Moon: Both Prince and Mage are only ever referred to by their respective titles.

* Trick Moon, however, and in one case his attempts to guide Trickshot nearly led to Pocket getting hit with an arrow.
* Trick Moon: Mage used to be part of Prince's group before joining Dr. Bleak. Prince considered him a friend, but when brought up Mage remarks "then I guess that makes one of us". Whether or not he meant it is left ambiguous.
* Trick Moon: The villain Dr. Bleak is seated on a throne with his entire body in silhouette.
* Trick or Treat (1986), the resurrected demonic rocker Sammi Curr shows up at Eddie's friend Roger's house, pins him against the wall, and this exchange takes place:
* Trick or Treat and starts banging on the locker room door, but the bullies locked him outside. The girls all laugh at him, with the exception of his crush Leslie who doesn't find his humiliation funny.
* Trick or Treat Beat to turn into a bat and fly over trees and ledges.
* Trick or Treat, Eddie turns on the TV to a news report about his favorite rock star. Unusual in that he missed the beginning, so doesn't hear the main point of the story (that the guy just died) until after the report's retrospective.
* Trick Or Treat has a ghostly rock star coming back to life near Halloween
* Trick or Treat, he arranges for a woman to do a piano recital, and both she and the audience are led to believe that this will be the first time she would ever perform and that she was being given a hypnosis-aided crash course in how to play at a professional level. It turns out that she had been hypnotized to forget that she'd been playing for years, and the point was to give her more confidence in her existing ability.
* Trick or Treat into offering her assistance to the boys. First, she attempts to speak diplomatically to Donald, but, after he yanks on her nose and douses her with a bucket of water, she finds the "quacking rogue" so offensive that she has Huey, Dewey, and Louie help her concoct a potent potion to jinx Donald with.
* Trick or Treat is an electric ghost, whose weakness is water. Fine enough, but when your movie's villain is shown being hurt by having his foot stuck in a toilet, he loses all credibility as a threat.
* Trick or Treats has a babysitter taking care of a bratty child who's father escapes from a mental asylum
* Trick Pony's only Top 10 hit was not "Pour Me", but rather the somewhat less-remembered "On a Night Like This".
* trick projectiles, including poisons, electronic disruption and less-lethal options
* Trick 'r Treat), and will go out of his way to kill the culprit, even if they do adhere to the rules.
* Trick 'r Treat celebrating a variety of different holidays, like Easter and Father's Day.
* Trick r Treat even includes Sam himself almost killing Andy when Evil!Andy used the money to buy booze.
* Trick 'r Treat has a busload of zombie kids in their Halloween costumes.
* Trick 'r Treat has Principal Wilkins and his son Billy carve a jack-o-lantern from the severed head of Charlie, who was killed by the former with poisoned chocolate.
* Trick 'r Treat is a malevolent being that appears on Halloween, doing trick or treating (said tricks killing people) and has a head that looks a lot like a jack o'lantern.
* Trick 'r Treat is busy preparing for Halloween by jamming razor-blades into fun-sized chocolate bars, citing that he is forgoing the usual partying he does on Halloween in favor of passing out candy to trick-or-treaters due to not having a costume.
* Trick 'r Treat, Mr. Kreeg walks into his bedroom to find that someone has written "Trick 'R Treat, Trick 'R Treat, give me something good to eat," all over the walls.
* Trick 'r Treat: Sam has a pumpkin-like head under his mask. Notably, the face also shares some features with a skull.

* Trick 'r Treat s an anthology horror film that takes place on the same Halloween featuring things like poison candy, vengeful ghost and werewolves.
* Trick 'r Treat who is surrounded by loud, promiscuous friends who want to get her laid. However, none of them were in danger at all. It turns out that they're a pack of bloodthirsty werewolves, and that all along they were actually looking for a man so that Laurie could eat him. Though her eventual victim is actually a serial killer, and she does technically fight him off.
* tricks her husband Proetus into believing that Bellerophon has tried to rape her. Instead, Iobates repeatedly sends Bellerophon on suicidal missions, like slaying the Chimera, where he continuously succeeds.
* tricks High Lord Aquitaine, an Archmage-tier power and political enemy of Tavi's, to go into battle so he would be killed and there is no evidence pointing to him at all. Lampshaded by Max, who calls the two of them "sneaky little gits."
* Tricks Of The Trade. Interestingly, while the song was an ironic one in the original play (the duke being the "fickle" one), it is appropriate here as Lana is indeed the "fickle woman".
* Trickster. Additionally, some real money items will get you insane bonuses like a ridiculously fast ground speed and increased EXP gain, that said the game does gives players free "samples" of the speed and EXP increasing items once a player reaches certain levels.
* trickster" and turned her into a gargoyle. Demona's other wishes did nothing but backfire in similarly inconvenient ways. In the end the status quo is restored, except for Demona turning into her least favorite thing during the day: a human, because she wished not to turn to stone during the day. He takes great pleasure in this, especially since Demona is very mean to him. Demona's transformation is never ended, even after the finale. An additional burn for Demona is the fact that seeing Elisa in Gargoyle form appears to be what brings Goliath (for whom Puck has already acknowledged Demona is "still holding a torch") to the conscious awareness that he is attracted to her.
* trickster died, the guys who carried his coffin goofed up, and the coffin fell into the grave, standing upright instead of lying down. The priest decided this was OK: "He lived in a weird way, so he shall be buried in a weird way."
* Trickster duology - Nawat is a crow who becomes human after falling in love with the protagonist. At first he continues to act somewhat like a crow, but she doesn't start to return his affections until some time later, once he's started to act more human.
* trickster figure the Judeo-Christian God, which Captain Picard finds laughable. Later in the same episode, Q claims that he merely knows God, and was there when He created humanity.
* Trickster Girlfriend: A character's love interest plays pranks on them and answers all the questions with snark and riddles.
* Trickster God: A deity who represents trickery and deceit, often fooling and manipulating both their fellow deities and mortals alike.
* Trickster God Barbatos, who lives among humans as Venti, has vision bearers who are free spirited and desire freedom, Morax, who you meet as Zhongli, gives his to people who face their trials with perseverance. Part of the reason the Archon enacted the decree is because nobody would die without their vision and if crippling depression occured because of it's loss, it is because they where using it as a crutch. Electro vision users are either lacking in ambition like Lisa and Razor, or self reliant without it like Keqing and Beidou.
* Trickster Goddess. He promises to teach the art to Anthem after revealing the truth.
* Trickster God, looks like Pan, but his name and the fact he was banished from Dunmanifestin for "the old exploding mistletoe trick" suggest Loki.
* Trickster God than Sleipnir's origin story. We feel bad for Sleipnir's dad.)
* Trickster God. This is particularly common in Greco-Roman mythology.
* Trickster God turned into a human woman who had several children before being permitted to return to her original form.
* Trickster God who enjoys sleeping around from time to time. He has frequently

used sex to get into the good graces of people who possess knowledge he wants.
* Trickster Mentor and confesses his feelings to "Yutaka," still completely oblivious to the fact that Fujimaru isn't actually male.
* trickster Nasreddin Hodja sometimes portray him as a clever person who pretends to be foolish to teach people lessons or get away with doing things he shouldn't (then again, others portray him as kind of a dim bulb in general).
* Trickster's Duet a knight-in-training, and her other brother Thom follows after his namesake in studying magic.
* Trickster's Duet), but she's not as hardy as her mother the knight and doesn't take being hit hard as well.
* Trickster's Duet duel with Mithros and the Great Goddess in the skies and Dove rides above the city on a winged horse to inspire the rebels.
* Trickster's Duet is Aly-sexual, possibly because he's actually a crow who was turned into a human and real crows mate for life.
* Trickster's Duet is the daughter of a legend and leads a life that's both idle and frustrated until she's dumped into another country's burgeoning civil war, where she gains a real sense of maturity about spywork.
* Trickster's Duet, Nawat is the first boy Aly meets who's her own age while she's in the Copper Isles. And when we say boy, we mean crow who can turn into a boy.
* Trickster's Duet takes place in a lush tropical setting with a flirtatious and highborn protagonist, but with a lot of grit and technical stuff, like crawling through disgustingly polluted harbors and human ugliness that she has to deal with (and occasionally exploit).
* Trickster's Duet we're introduced to what is probably the most fantastical weapon in Pierce's books. As a raka freedom fighter and spy, Junai has to be more covert; therefore, Junai's "staff" sprouts foot-long blades at both ends when she twists the grip.
* Trickster's Duet when Nawat Crow and his band get rid of some people by stripping them naked and putting them in the middle of the jungle.
* Trickster's Duet, while the previous three ladies are quite straightforward and honorable. Her story also takes place outside of Tortall, a first in the series.
* Trickster's Duet who discovered the youngest darking when it decided to go and play with the three-year-old king it was spying on. It's all Aly can do to stay in character and not immediately start banging her head against a wall.
* Tricksters like Eulenspiegel or (less) Nasreddin Hodscha. Being not gods, they sometimes have to run afterwards.
* Trickster's Queen, a royal heir is killed when a suspicious storm sinks his ship.
* Trick's Ueda Jiro, virgin physicist professor, took a correspondence course in karate that somehow turned him into a kung-fu machine.
* Trick tells the story of candy people and their Halloween parties. It starts normal and funny. Then it get more darkier and edgier as it progresses. The users interact with the characters in order to make the story progress.
* trick-the-one-inept-guard bit again. Despite the number of times they were separated from their communicators, the thing was never seen before or since. You'd think it would be standard issue.
* Trick the victim into thinking they're under threat by faking a break-in.
* Trick thing as Mark and Gabriel were originally planning on a one-night stand only but ended up forming a genuine emotional connection somewhere amidst their continual interrupted meetings.
* trick weapons forged from siderite. Siderite is a real-life metal found in meteors that becomes magnetized after it's heated, and these blades take advantage of that by using the magnetic field to hold together in their "whole" forms. They also do minor magic damage.
* trick weapons, the Threaded Cane, is a silver, bladed cane than can be wielded like a shortsword, and when it transforms, it segments into a deadly-sharp whip.
* Tricky Business (although it does have its moments), is about an illegal casino ship that is also a base for drug dealers, things go wrong, etc. On of the POV characters is a pretty young lady who works as a cocktail waitress, hates her job, and her mother always tells her to quit because it's so dangerous... Makes perfect

sense, until the very last part of the book when it's revealed that "cocktail waitress" was just a disguise: she is actually a badass undercover cop, and now everything suddenly sounds a lot smarter.
* Tricky Business, he once showed up for a job only to see the owner (a lawyer in a diving mask) continuously diving into the pool to retrieve the items that his wife also continuously throws into it from the house. They greet him quite civilly and get back to screaming at each other (the lawyer's mistress apparently forgot to remove her underwear from his car).
* Tricky Business in that he is not personally getting his hands dirty (he just takes the ship where he's told and doesn't ask too many questions), but knows he could still be arrested as an accomplice.
* Tricky Business in that there was no attempt to cause drama when the heroine picks up her kid at daycare, is insulted by a particularly stupid soccer mom, and storms out. Then she returns five seconds later to pick up her shoes and goes out again, in complete silence.
* Tricky Business smart thing to do, the wife retorting that the only thing smarter was to keep a pair of his girlfriend's panties in the car...
* Tricky Business, suffers from constant flatulence, to the point that people can instantly detect her coming by the smell of her incessant farts, and at one point in the story, when she is about to attack Jock with a knife, she is described as a very tall, very blond, very angry, very farty woman waving a very big and sharp-looking blade.
* Tricky People, Carmen cries in Yello Dyno's arms after she tells him about being sexually abused by Reginald Charming.
* Tricky People. Given the film's deadly serious treatment of Charming and his victims, Wendell's presence seems downright bizarre.
* Tricky People plays this after Yello Dyno accosts Reginald at the mall.
* Tricky powers by the energy of the Improbability Drive, who seeks to get revenge on Hank by killing and reviving him over and over.
* tricorder's contract that anyone who could make a working Tricorder was allowed to call it that; a now defunct Canadian company produced the "TR-107 Tricorder Mark I." It was about the size of a huge novelty universal remote, was done up to look like a TNG tricorder and loaded with the appropriate sound effects, and could detect EM fields, barometric pressure, temperature, light values and color values.
* Tri-D projections are holographic in nature, hanging freely in the air.
* Tri-Edge/Azure Kite. The dude is just... plain... unstoppable. Pretty much every appearance he makes involves someone getting Data Drained and comatose. He's only defeated twice in the series, which barely slows him down at all.
* tried, it didn't work out. Many years later, she still comes back to the particular spot where she lost her virginity just to reminisce.
* tried parents must be in accord. The more a king's wife cares for her new subjects, the better a son she will have. The goblins also steal elf women in order to shore up magic, as goblin women tend to be sterile.
* tried so hard to win a race, she threw her jockey at the risk of disqualification, kept right on running even after the race was declared for Storm Petrol, and ultimately injured her vital organs in a collision with an aqueduct.
* tried to ascend to the heavens then kicked the ladder down after them — which also made magic a lot harder to use for everyone else. The questions of where and when all this happened are unsolvable due to the sheer affront to reality that occurred when the Ladder fell.
* tried to backtrack in at least one Q&A) take the two 'verses being one for granted.
* tried to be one of these, but was revealed that the citizens had killed the children, elderly and the sick to ration their supplies which failed miserably. The characters had hoped to use a boat to make their way to a secluded island. But things go south fast before they could even attempt it with only three of the cast ultimately surviving to the end of the story.
* tried to betray him by taking all the Golden Weapons for himself, their power disintegrated him, opening a vortex through space and time that Garmadon uses to

escape the Underworld.
* tried to bring the Orks into their federation, but the greenskins proved to be utterly unwilling to cooperate, and gave the Tau their first taste of full-scale interstellar conflict. Then the Tau met the Kroot in 844 M38 while driving the Orks from the Kroot's home system, which led the Kroot to agree to serve the Tau as auxiliaries. The Tau's first meetings with the insectoid Vespid didn't go very well, since the aliens' mindset made them utterly disinterested in the Greater Good, but once the Ethereals in charge of the delegation directed technicians to build "communication helms" to facilitate diplomacy, the Vespids who donned them suddenly became very keen to join the Tau Empire.
* tried to cut off a finger in order to get the ring... only to die of fright when he woke the not-quite-dead woman! In some versions of the story, the robber merely flees in terror, and it's the woman's husband who dies of fright upon answering the door to see his recently-buried wife.
* tried to donate Raw Dry Nourish that the CEO ate the mixture, they still refused.
* tried to do this to prevent the Yeerks from enslaving the Hork-Bajir race (by way of a virus that only affected the Hork-Bajir), but eventually failed.
* tried, to escape from an amorous Apollo, while Callisto got raped by Zeus disguised as Artemis.
* tried to fire her once, but he couldn't fill out the termination paperwork without her. She also has a dark version of this trope and can't get out of her job even though she wants to. It was revealed once that she has an MBA, but her secretary job creates a stigma.
* tried to get revenge for being forgotten in his next appearance... five years later.
* tried to hurt your kid? Or another family member of yours? Or even one of your friends?
* tried to kill him/her at the end of the first game to prevent more bloodshed, the Boss just laughs in his face before gunning him down.
* tried to kill his ex-girlfriend and her new boyfriend this way. Unfortunately for him, he got the wrong house and landed his car on top of a couple who were sleeping in bed. Miraculously enough, the mattress was able to keep the car from crushing them, and their only injuries were burns from the engine.
* tried to make him stop mourning for Sati and marry Parvati eye and incinerated Kama with an eyebeam (Parvati found another way to become his wife and asked him to resurrect Kama). Scorching gaze of annoyed ascetics is a recurring motif for Hinduism, but mortals' anatomy doesn't change.
* tried to not be the Slayer plays a pretty central role to Buffy's character arc throughout the franchise.
* tried to prevent the broadcast of the emperor's surrender announcement. A number of people, including the commander of the guards, who tried to stop them were killed, but the mutineers were ultimately stopped and the formal announcement of surrender was broadcast the next day.
* tried to restore an ancient Spanish fresco of Jesus, only to end up making "a crayon sketch of a very hairy monkey in an ill-fitting tunic." The woman was a trained painter (though not a trained restorer), but was found out and interrupted before she could finish the restoration. But so many people flocked to see her work it raised a lot of funds for the church.
* tried to rob Dr Venture's ship and hold Rusty for ransom but when he saw how upset he was they put on a makeshift festival to cheer him up that they continued to do for another forty years.
* tried to serve as the group's dad, which Katara even lets him know he's not good at it.
* tried to shoot a wart off his finger with a gun. He shot off most of the finger. But hey — at least he got rid of the wart!
* tried to talk with two inanimate objects in a row while others tend to their little military business.
* tried to throw his second duel with Jeagar, because he was feeling sorry for the guy, whose wife and son were watching. Unfortunately, Jeagar was also trying to

throw the duel (he needed to lose to get his family into protective custody without simply surrendering like a coward) and lost first.
* tried, yelling out "Harvey! I'm Batman!" just beforehand, but no one could hear him over the screaming of the others.
* Triela has a crush on her handler Hilshire. She refuses to reveal her feelings as she's well-aware that at least a part of her feelings are conditioned by the treatment that made her a
* Triela's backstory is that she was in a child sex trafficking ring and nearly died due to being in a
* Triela's doesn't seem older than twelve, but is already in medical school.
* tries again and this time succeeds, creating Vanamonde, a similar intellect that is sane and friendly. It is suggested that Vanamonde's ultimate destiny is to battle the Mad Mind, at the end of time when the prison containing it fails.
* tries and then attempting suicide, ultimately being diagnosed with Borderline Personality Disorder.
* tries, but Gilbey's heard it before and jumps straight to the punch line ("Mice are never amusing"), leaving the middle of the joke unsaid.
* tries, but thinks the smoke bomb causes the disappearance. As such, he's still there when the smoke clears.
* tries, but this doesn't even last the first chapter because Courtney saw the two of them together.
* tries committing crimes" - Brockman clearly isn't fooled, but doesn't press the issue.
* tries, despite the fact that neither Megatron nor Starscream actually care. It later turns out she just acts like the whore to whoever happens to be in charge at the time in order to secure more power for herself.
* tries. His rehearsal is intensely awkward to begin with, and when he talks to them for real, his nervousness means that his already-awkward speech goes sideways immediately.
* tries, it might have worked. She says, over and over, in the exact same tone:
* tries living as a lonesome cowboy. She finds she still misses Sapphire, however, and grouses "Turns out I'm no good at not needin' nobody."
* tries. She uses a smoke bomb, but everyone can still see her running away once it disperses — in her second appearance, she trips.
* Trieste to the bottom of the deepest ocean in the world, Challenger Deep in the Marianas Trench. As they passed 9000 meters deep, they heard a window crack, shaking the whole vessel. They kept going, reached the ocean floor at 10,900 meters deep, and made it back to the surface safely.
* tries. The other sees through it and either sticks to their original "point" or just immediately declares victory by "virtue" of their opponent "agreeing" with them.
* tries this way, by gathering children and telling them fairy tales where he's the hero and Jack is the bad guy. It doesn't work, but it made for some of the best moments on the show.
* tries to arrange an escape for John Frith, but Frith refuses to take it.)
* tries to be nice to people: Sansa, Tyrion, her son Tommen, and Myrcella. She also understands that doing everything in her power to protect and prop up Joffrey isn't such a good idea. Then Joffrey dies, she immediately forgets her past kindness, and goes on a petty revenge binge that ultimately leads to her unleashing the biggest atrocity in recent Westerosi history just so she can be queen.
* tries to be this and is very confident about it, despite being liberally slapped around by a man half his size on fairly regular basis. Everyone else in King's Landing, including his own mother, are rightfully pessimistic on that.
* tries to be this due to fear about the amount of damage he could do with just one act of bad judgement.
* tries to be this to his grandson Tommen when the latter becomes king in season 4, but a combination of Tommen's own weak will, the Tyrell influence, and the rather critical snag of Tywin dying at the end of said season, severely limit the effectiveness of his attempt.

* tries to break into the hospital to finish reading the book. Dash runs afoul of two battleaxe nurses, an angry doctor...and an adorable little trainee filly.
* tries to cheat by getting early details about the Appeal round of the episode's Showcase. When she misreads it and it gives her no lead whatsoever, her team just resort to legitimate methods and win anyway.
* tries to claim her hair just spontaneously changed color spontaneously change color at a later date as a side-effect of her magic burnout.
* tries to communicate with some street thugs in their native language: "Hello, Merry Christmas! I'm, uh, Excel! You are dog!"
* tries to convince them that what they're doing is wrong and they're both extremely grateful to him for it.
* tries to do this when he finds himself in the same situation, but utterly fails. Oolong realizes to his horror that he's delicious.
* tries to get beaten up. All his insults go over their heads until he notices one of them is wearing a Millwall scarf.
* tries to get Deidara to surrender. She traps him into an explosive paper cocoon and before detonating it says that "at the very least, [she'll] make [his] demise into a work of art" just to rub salt on the wound.
* tries to get Tony to remove the security protocols on the quinjet that require a mission authorization code to start up while claiming he can't tell Tony what he's up to because it's classified. Tony replies that he knows damn well Steve isn't going on any mission because the DIA (who currently have jurisdiction over the Avengers) have been contacting him thinking Tony had been sending the Avengers on unsanctioned missions; therefore the information isn't classified at all. That and the fact Steve needs help getting around security designed to ensure the quinjet is only used for official Avengers business proves in of itself that he's using it for personal reasons.
* tries to help and that it might be a good time to find a control panel to be unusually interesting.
* tries to improve Peter's webbing formula by adding powdered vibranium. When Peter and Tony point out that not only does he go through massive amounts of the stuff, which is not reusable, but vibranium is prohibitively expensive even for Tony Stark, Shuri admits she does resort to using vibranium for all her problems. In her defense, not only is the metal incredibly versatile, but her country is sitting on a literal mountain of it.
* tries to kill Miranda, and depending on your choices may or may not succeed.
* tries to Kill Paul with Fire. He certainly reduces the table Paul is holding to ash. But Paul's only response is, "That was lovely! Do it again!" Had Sapsa known that Paul had cheerfully endured dragon fire earlier in the book, he might not have made the attempt...
* tries to kill the heroes and eventually hatches his own plot to destroy the world.
* tries to play off the vampires behind the club he works at as being "really big rats" to the new girl (who's later revealed to be Tara). When she points out the blood on his neck, ash on his shirt, and new leather jacket, he makes up increasingly ridiculous claims, eventually claiming they're "really, really big, high jumping rats who smoke and have bad fashion sense."
* tries to read it House to know he took the guitar. The faking it was only for his own amusement.
* tries to rob and murder Daylen in an alleyway, which ends with said beggar's severed head pinned to a wall with a dagger.
* tries to take over your mind. This is represented as the screen slowly being replaced with a picture of SHODAN and your crosshairs continuously veering away from SHODAN herself, with the effect getting stronger over time. If the screen completely fills with SHODAN's picture, then you have about 3 seconds of frantic, completely blind firing to try to squeeze out a win before you lose.
* tries to turn the entire world into a totalitarian state by turning every unstable dictatorship into a nuclear power, while infecting everyone with language-triggered diseases so they cannot to take Skull Face out.

* tries to. When The Ring tries to corrupt Samwise by exploiting his desire to be a gardener it shows him that he could turn all of Middle Earth into a garden for him to tend. Sam shrugs it off by noting he'd need an army of gardeners to handle that much work, and what would be the point of gardening if you didn't do it yourself?
* tries, wears a nice suit (complete with cufflinks), and will sometimes recite poetry and make literary references. Those references betray his lowbrow taste in literature, and he's had more than one tantrum at ringside.
* Triexians have two names connected by "na", e.g. Krelis na Then and Arex na Eth, or sometimes "ko", as in Nexa ko Tor.
* Triexians have two names often connected by "na" (e.g. Krelis na Then, Arex na Eth, Ferin na Yoth), or sometimes "ko", as in Nexa ko Tor. The first name appears to be the one used formally. The first name is almost always two syllables, the final name a single syllable. The Triexians' Edoan cousins seem to have only a single name.
* Trifarix being a council of three of the most powerful leaders in the vein of the triumvirates) and the Empire (being an expansionist empire that incorporates native warriors into its legions).
* "TRIFILING GNOME. YOUR ARROGANCE WILL BE YOUR UNDOING!, YOU FACE JARAXXUS! ERADAR LORD OF THE BURNING LEGION!!!"
* Trifles by Susan Glaspell it becomes obvious that the relationship between Mrs. Wright and her husband is a textbook case of this trope, with the apparent tipping point that led her to kill him being when he killed her canary, who was her sole companion and source of joy.
* Trifles", the happy and free spirit that used to be. Essentially, "Minnie" died and was replaced by "Mrs Wright".
* Trifles, this is the reason as to why John Wright was murdered. Being the abusive spouse that he was, he took that up a notch when he killed his wife, Minnie's, canary, taking away her last bit of joy in her life while married to him.
* Trifles, where, it's mentioned that, before her marriage, Minnie was a free spirit, who loved to sing and wore pretty clothes. Before and during her marriage, she kept a canary to which John killed, said canary representing herself from years ago and the the Minnie that was "killed" by her marriage. Likewise, the caged bird is meant to represent a woman's place in 19th/early 20th century society.
* Trifluoronitrosomethane is a toxic gas with a characteristic deep blue color.
* Trifonic as a hidden track, when purchased as a download from their online store.
* Tri Force Heroes, and where the heroes must save Princess Styla from being stuck in an ugly full-body leotard that she can't take off.
* Triforce of Courage; Farore, the Goddess of Courage, created the lifeforms that inhabit Hyrule.
* trigger aggressive arguments and the person owning it is likely to be on the receiving end.
* triggered the guy when he saw another coach (innocently) touch a student and led to him stabbing the innocent teachers.
* trigger event was caused by the sadism of a young hero, although really this just supports her argument.
* Triggerfinger", when Rick, Glenn, and Hershel are attacked by a group from Philadelphia, Hershel wounds Sean and he gets mauled by a group of walkers that were attracted to the gunshots.
* Trigger Happy bodyguards) and being killed, leading to Frank's one-man war on criminals, even after those originally responsible were long dead.
* Trigger Happy than most White Knights and Liechtenstein doesn't seem to be in much danger after he adopts her. (That, and he's seen trying to train her into gun handling too.)
* Trigger Happy TV featured a person disguised as a statue in a park who would sneeze every so often when people came near.
* Trigger Happy TV for a boost over a wall, since, he claimed, he'd locked himself outside.
* Trigger Happy TV had a recurring sketch featuring a Scandinavian man asking random people on the streets very poorly worded and outrageous questions or

statements, with a thick Scandinavian accent.
* Trigger Happy TV in the "fat guy" pranks, usually forcing bystanders to squeeze past them when not blocking them off outright. That Dom Joly and his cohorts made no effort to disguise that they were wearing obvious fat suits made it that much funnier.
* Trigger Happy TV is to fill an elevator with people in animal suits, taking up all of the room except for the unsuspecting person either already in the elevator, or trying to enter.
* Trigger Happy TV one of the actors posed as a grieving niece, sprinkling the ashes of her uncle from a ship. She made sure to say just enough to let the father of a nearby family know what was supposedly in the urn before spreading them. She had also positioned herself so that the wind carried said ashes towards the family.
* Trigger Happy TV pranks was to get a random passerby to do something embarrassing for him, and then walk away, leaving them on (hidden) camera looking confused. He'd do it standing under a giant billboard with a picture of himself, and the words "Don't Trust This Man".
* Trigger Happy TV was Dom Joly standing in front of an enormous picture of himself labeled 'DO NOT TRUST THIS MAN' and talking to people, giving them directions and such.
* Triggerheart Exelica, and spin them around as a shield, or toss them at an enemy hammerthrow-style.
* Triggerheart Exelica: Triggerhearts Exelica, Crueltear and Faintear.
* triggering an eruption only on the volcanic island where their lab was located.
* Trigger is a similar case. He kept being presented as though he was the
* Trigger Knight: It is anyone's guess why the knight is running through a field, beating up monsters, with a limited amount of time before she fades away.
* Trigger Mortis being put into a box and buried alive. Luckily, he managed to sneak a knife with him, which allows him to dig his way out of the slow suffocating death.
* Trigger Mortis has Bond observe the hordes of pretty girls clamouring over the winning racers. However, he thinks that he would feel extremely uneasy if he was in the same situation, as he prefers having a single strong and independent women to multiple ones fighting for attention.
* Trigger Mortis manuscript on which the novel was partially based, the driver 007 was asked to protect was real life racing legend Stirling Moss.
* Trigger Mortis, on orders from from SMERSH, plans to slow down the USA's space program by making it seem that one of its rockets malfunctioned and destroyed a large part of New York.
* Trigger Phrase stuff actually works, the doctor again says "Did I forget to tell you? It's my birthday" and gets another free drink, the bartender unaware that he's already poured him one.
* triggers if they'd been molested. But some could watch it all day, and then the mailman comes by wearing the same brand and color of shoes their abuser preferred.
* Trigger Star, Hash belongs to the Offensive Ethnic Stereotypes Union (African-American chapter). He can actually be kicked out for displaying evidence that he's got an actual personality.
* Trigger Star: Sauerkraut and Avocado's idol, Exlax The Mighty. Not only are they cousins, but they were also lovers.
* Trigger Star sports dual master's degrees in literature and finance.
* Trigger Warning plot, he meets a minor character who was killing terrorists at the same time as him, Dog, who suddenly reveals himself to be his long-lost uncle. Dog then regales him for several pages about his backstory, the secret government initiative that allows him to roam the country killing bad guys at his discretion, and the suped-up truck he drives while doing so. Dog then recruits Jake to team up with him, and the book ends. Guess we'll have to wait for a sequel to learn about their thrilling adventures!
* Trigger) which had depictions of rape, allusions to it, and the game addressing it as such have not been reclassified, and this has only thus affected several recent games.

* Trigger words (of sorts) are used in business. These ones tend to be simple one-word phrases that typically increase interest rather than any sort of hypnotism,
* Triglav, at least at distance. She too was slated for mass production).
* Trigon the Terrible isn't just referred to as a god, but the Literal Manifestation of ALL Evil that has ever existed. Think Dormmamu, but in the DC Universe instead of Marvel.
* Trigon tried to hold this over Raven in the 4th season finale if only to make a cruel point that she's his biological daughter.
* Trigueño) or "Indian". Nowadays, the Dominican Republic is richer than Haiti and Haitians often live there as illegal immigrants and second-class citizens.
* Trigun above, some goon is using Vash's name to cow a town into submission, Vash shows up, disarms the goon, and is regaled as a hero. Unlike Fist (and most other examples) it's rarely revealed that Vash IS The Humanoid Typhoon (to the townsfolk anyway) but he still makes it fairly obvious the goons aren't the real deal.
* Trigun. After the anime ended, he started having anime-only characters cameo in the manga, and cribbed the anime's climax to use in his story several years later.
* Trigun, after Vash saves a town from marauding escaped convicts and then lets the townsfolk turn in the bounty (despite the fact that the townsfolk themselves had originally sicced the criminals on him), he's delighted when a local sandwich shop owner declares that he can have unlimited free food. Meryl naturally points out that he could have bought a sandwich factory if he had kept the money.
* Trigun almost always spoke with a monotone (or simply very calm) voice.
* Trigun, although it was sort of out of Yasuhiro Nightow's control: the original magazine the title was serialized in folded, and when he was hired by Young King Comics a year later they asked him to restart his old series instead of creating a new one.
* Trigun and has to really bow down when he wants to hug her, especially in the manga.
* Trigun and his black...leather...body-armour...stuff. You have to assume this stuff is really practical desert wear for some reason. Although he also just likes the coat because the red has sentimental meaning for him.
* Trigun and once, while drunk, said she has a separate stomach for dessert.
* Trigun and Taun-Taun-esque pack birds. The closest thing the series has to humanoid aliens are the Plants, but they are man-made.
* Trigun, and while he has a lot of angst none of it stems from this fact. He's a happy and goofy guy when his brother's not giving him grief.
* Trigun anime and Dr. Nebraska in the manga (he has to wait until the fifth episode of the anime).
* Trigun anime, its implied Meryl has feelings for Vash, but by the end of the story its never made clear whether he feels the same way.
* Trigun anime, Monev the Gale used a variant of this. Breaking into a jail to capture Vash, rather than using the cell door Monev punched through a wall and grabbed Vash by the throat, all in one move.
* Trigun, a one-eyed woman, a transvestite, a samurai, a man with split personality, their own musician...) As long as they were sufficiently villainous and ruthless, Knives didn't care since he doesn't care enough about humans to discriminate.
* Trigun appeared to take place on wild west Earth at the beginning, but the twin suns, five moons, and purple night sky caused by three or more moons shining at one time is a tipoff to the contrary...along with all those alien-looking people and weaponry...and those giant Plant systems.
* Trigun are genetically modified alien creatures with some astonishingly human characteristics.
* Trigun are put on, you know things are switching from humor to drama. Notable examples include his fight with the Nebraska Family after they almost kill innocent people, and his first run-in with Legato.
* Trigun at least twice he hangs it up, only to come back with basically "I don't have time for this Emo idiocy! I have to save the world!

* Trigun: Badlands Rumble claims that she's allergic to idiots. Sure enough, when Vash touches her hand, her arm breaks out in hives and she needs to treat it with medication right away.
* Trigun: Badlands Rumble, Wolfwood is found nearly dying of dehydration because a water vending machine refused to accept his crumpled bills.
* Trigun. Besides the replacement arm, other parts of his body have apparently been "repaired" with non-organic material. Idem his brother.
* Trigun carries a semiautomatic version that fires expanding projectiles with enough force to knock over whatever they hit, including armored trucks.
* Trigun, comfortable with their future tech. When Vash goes back for repairs and upgrades, naturally trouble follows him.
* Trigun complains quite loudly when a number of bandits smash his doughnut into crumbs.
* Trigun continued for nearly 9 years after the anime ended, finally finishing in April 2007. From Volumes 2-3 of TriMax, including the equivalents of episodes 20-21, the manga takes new directions with plot and characters, while retaining parallels in the plot — sometimes revealed in the manga years later — that Nightow had probably intended from the beginning.
* Trigun: Distances are measured in "Iles," which are just "miles" with one letter removed. Not to mention, the unit of money is called "Double Dollars", represented, of course, with "$$" (seems like just a waste of time and ink really).
* Trigun, Dominique pretends to be able to do this. In fact, she uses hypnosis to suspend the awareness of anyone in her line of sight and make them freeze in place.
* Trigun, during the final battle between Vash and Knives, Vash is almost defeated, until he remembers the literal "forgotten weapon" of the Cross Punisher, which he brought with him, but then never used until the last moment.
* Trigun, episode "And Between the Wasteland and Sky": Vash the Stampede is trying to stop the sandsteamer he's riding from going into a canyon wall, and his companion, who knows the steamer's layout, has gone into a breakdown. In exasperation, Vash grabs him and headbutts him repeatedly — into the ground like a tent spike, it's worth noting, as well: "What! Are! You! Getting! All! Senti! Mental! For! You! Little! Squirt!" It should be noted that said squirt had just cold-bloodedly manipulated Vash by pretending to be pathetic, drugged him unconscious, and then systematically betrayed everyone on the steamer to bandits who were going to kill them all, and they only had about half an hour before it went over the cliff. Because Vash is too nice a guy to behave like that without extreme provocation.
* Trigun event, Vash is told of what happened to a city he accidentally blew up. Vash himself managed to avoid killing anyone... but the now-homeless people were forced to trek out into the desert in a desperate hope for survival, and most if not all of them explicitly died of starvation and thirst. As tends to happen when random civilians are forced to flee into the desert by the destruction of their hometown.
* Trigun, everyone in the bar bursts out laughing. It helps that the diminutive Meryl had just dragged him across the room by his ear, taking the impact away from anything he could've said. Vash greatly enjoys the mixup.
* Trigun features a cat skittering across the screen every episode, some times more obviously than others. Said cat is named Kuroneko-sama ("Lady Black Cat"), and was actually the first character designed for the series.
* Trigun figures, and is the creator of the Assemble Borg line of figures.
* Trigun, flashback sequences show a fleet of ships that left Earth looking for a new planet with a healthy sample of the human population frozen on board. These people eventually reproduce to colonize the entire old-west-style setting of the series.
* Trigun forced them to crash-land. In the 100-odd years they've been eking out a living on the harsh surface, human population figures have been in gradual decline and the people have become harsher and more violent as they've adapted to the environment.
* Trigun had a town that was dealing in smuggling girls who were selling their

bodies as potential organ donors and as prostitutes.
* Trigun: Happens to Wolfwood and Milly. (From Wolfwood to Milly: "You're comfortable.") This makes Meryl and Vash have to sit next to one another as they express annoyance at their companions' behavior.
* Trigun has $$60,000,000,000 on his head for the destruction of a city. This paradoxically causes even more damage due to the hordes of reckless bounty hunters that are constantly chasing him. Eventually the Bernadelli Insurance Corporation declares him a "human act of God" to avoid paying claims on the damage he causes, incidentally cancelling the bounty.
* Trigun, has a Wild West society with advanced technology, but here it's explained as humanity doing what it has to in order to survive on the desert world it's stuck on.
* Trigun has multiple examples, but the biggest one is the sand steamer, a massive land ship. If the vehicle is pushed to unsafe speeds, the brake controls fail and the boiler overloads. There's no way to shut down or vent the boiler from the control room. The room with the emergency reset switch is behind a door that's shut with heavy bolts that are so stiff it takes multiple people pushing on the wrench to unscrew them, and there's at least eight. The room itself has no ventilation and becomes so hot that protective suits must be worn. It's filled with a maze of steam pipes so dense that an adult human can't fit through them. The pipes are so hot that they instantly cause second or third degree burns through heavy-duty protective garments if touched. Brilliant Dynamite Neons' plan to crack the steamer open to get at the contents of the safe seems frankly redundant, the whole ship is in danger of doing that all on its own.
* Trigun has the insurance girls and several groups of bounty hunters looking for Vash the Stampede. Each of them is using a different description of Vash that is technically accurate, but is also vague enough that it also describes one of the bounty hunters ("blonde man with red coat"). Confusion ensues.
* Trigun has the Tomas, weird cross-breeds between ostriches and non-avian dinosaurs.
* Trigun, has this for most of the anime and around a third of the manga; all we know about him is that Rem found him in space.
* Trigun, has Vash wondering why Brandon and Mika look like the people he knows in his era and ends up assuming that nobody there knows why. In truth, both series are created by Yasuhiro Nightow, and Brandon/Grave and Mika look like Legato and Meryl respectively.
* Trigun has Wolfwood shoot Livio in the hand, leaving him with horrible, jagged bones sticking out. Livio stabs himself in the opposite arm with them later.
* Trigun heavily lampshades the way danger always seems to find Vash. Also played with heavy drama with the Gung-Ho Guns, because they want Vash to fight them and willing to annihilate entire towns to make him willing to go for the kill.
* Trigun. He's a little less formal about it than Kenshin, because he hasn't got a vow, this is just his lifestyle, and he only learned to fight out of necessity, so he doesn't have quite the same type of warrior ethos as a proper knight or samurai.
* Trigun, hired gun and man of the cloth. Though not without sin, at least he doesn't preach what he doesn't practice.
* Trigun hitting targets, Vash wound up so hungover he couldn't fail and won anyway.
* Trigun, in stark contrast to the manga, has a tendency to focus very heavily on the human elements of its story while confining many of the other backstory details to subtle cues that might go unnoticed on a first viewing.
* Trigun intended to carry out his mission this way, but he had far too much in common with Vash; that and circumstance led to them becoming virtual blood brothers.
* Trigun. In the anime his hair is one of the ways Meryl and Millie track him, and in the manga he earns the nickname "Spiky". For his early style, which points strait up, apparently without the aid of gel, and in spite of gunfights, dust and sand.
* Trigun: In the anime version, Vash is hit by this big time when Legato forces him

into a no-win situation where he can either kill Legato or let the townspeople Legato is psychically controlling kill Milly and Meryl. Extremely reluctantly, Vash shoots Legato and then passes out. When he wakes up the next morning and remembers what he did, he starts screaming.
* Trigun in the episode "Fifth Moon". Several months later (the next episode, "Goodbye For Now"), Wolfwood finds him hiding under an assumed name and talks him back into his old life.
* Trigun is about Vash trying to stay alive while keeping the 12 Gung Ho Guns at bay as they come at him.
* Trigun is an obvious example, though the sincerity of his perversion is up for debate as many of his apparent emotions act as covers for his overwhelming inner pain. This aspect of his personality is also mostly absent in the manga as he never really demonstrates significant attraction to any characters.
* Trigun is a non-sequitur, but far less mind-wrenching than the subtitle/genre description: "Deep Space Planet Future Gun Action!" The fact that this was perfectly accurate a descriptor of Trigun as anyone could come up with only makes things sadder. Various possible meanings of the actual title are hotly debated among fans. Some took the title to refer to the fact that Vash has three guns: the one in a holster, the cyberarm that turns into a gun in emergencies, and the Angel Arm cannon.
* Trigun is. Especially in the manga. He fakes being passed out in order to avoid the "favors" of prostitutes, spends an inordinate amount of his free time thinking about his dead mother figure, doesn't want any woman to see his scars, and avoids any kind of romantic or sexual relationship, be it with Luida, Meryl or Jessica.
* Trigun), it does have canyons that suggest more plentiful water in the past.
* Trigun. It's a bright and sunny day, the kids are playing with Vash. Then out of nowhere, Legato. He killed and ate the friendly shopkeeper Vash was just speaking to, and feels it would be a downright shame if the little girl Vash just bought an ice cream for would have to be next. The entire scene is completely horrific, but what cements it as this is the opening shot of the usually lighthearted and goofy Vash looking legitimately terrified for the first time in the series that clearly indicates exactly how bad things are about to get.
* Trigun, it's implied that Kaite does this to Vash in episode 7 "B.D.N."
* Trigun It's not called "Deep space planet future gun action!!" for nothing!
* Trigun. It's not certain if this is also the case in the anime, where he's still nuts, but it's not clear if he was raped.
* Trigun) kind of damage that Vash's adventures (and the Gung-Ho Guns' relentless campaign to kill and/or demoralize him) cause.
* Trigun. Legato adds mass to his shoulder with a human skull. Brilliant Dynamites Neon's shoulderpads are both nearly the size of his torso, and they glow.
* Trigun, Legato often demonstrates that in a world where one has to generally pull a trigger to kill someone, the ability to break bones and control people with thoughts is rather potent.
* Trigun make sense in context, though that context is debated (see below).
* Trigun manga, in an interesting variation of this trope, showed a sign in one city counting the number of murders and serious injuries that had occurred that day.
* Trigun manga, Vash and Knives follow a girl who appears on the ship into a closed-off medical room. Things go downhill from there.
* Trigun manga, which (brownness and its ambiguity) makes sense given the setting, though Nightow switches to greyscale skintones for dramatic effect so often it's hard to tell what's significant.
* Trigun Maximum butchers entire communities without any apparent emotion.
* Trigun means he's suffered at the hands of his more persistent opponents.
* Trigun: Meryl's derringers are neither taken seriously as a threat nor used to deliver meaningful damage over the entire course of both series. This is because Milly's stun-gun can be used with impunity, but since Meryl's little guns can't invoke Rule of Cool or the beaten-up-by-bullets effect and she's not a killer, they aren't allowed to actually do much of anything. Still good that she doesn't go

around unarmed, and she does take some useful actions; the derringers themselves are just useless. Even though a real derringer can kill you very dead.
* Trigun Millie and Nicolas then stroll along, pretending to be a happy expecting couple as the slave's pursuers pass them by.
* Trigun movie, "Badlands Rumble", first premiered at SakuraCon in Seattle, Washington, a few months before its Japanese theatrical release, presumably at least partially because of the show was significantly more popular in the US than Japan. Somewhat unusually for this trope, it was shown raw (aka in Japanese with no subtitles)
* Trigun. Neither version portrays Knives as particularly sane or mature, however.
* Trigun, one of the Roderick Thieves, Nagi, gets a bit slap-happy when he sees one of the slaves they've just captured eyeing Legato for too long. The Vice-Chief is pretty sure he knows what about Legato is making Nagi so antsy.
* Trigun Rai-Dei the Blade, one of member of the Gung-Ho Guns villains group. A warrior who's adapted the way of the samurai (in a western steampunk world)... with a few adjustments.
* Trigun, responds by calmly drawing his backup pistol and shooting himself in the head without a word.
* Trigun, Sandworms are apparently the dominant native species on the planet; in the manga, they play a fairly major part in the story, because they are sentient and able to communicate with one another telepathically.
* Trigun's Dominique the Cyclops has what she calls the Demon Eye. Hidden by a metal shutter over her right eye, the fake eye can temporarily put all who are near in a trance for a few moments.
* Trigun sends him to his death, but manga Legato...alas, poor monster.
* Trigun: Set in fictional planet known as No Man's Land, the plot follows Vash the Stampede, a famous gunman who is constantly fighting bounty hunters seeking to obtain the immense bounty on his head.
* Trigun set out to terraform a new planet, but unfortunately ended up crashing onto a desert world (losing much of their tools and resources in the process) and what resources they still have are almost solely devoted to surviving. Due to this, the work has barely even started at the time of the series, and it's implied they'd already been there for several decades or more.
* Trigun setting), on some very rare occasions, uses two weapons at once.
* Trigun's eyecatch at the beginning of a break had a distinctive guitar fill; the one at the end of the break had the same riff played backwards.
* Trigun sometimes engaged enemies in this because of his aversion to killing.
* Trigun starts off very far on the silly side and although it gradually becomes more serious as the series progresses, it never completely loses its sense of humor.
* Trigun suffer from repeated punches to the face. He gets better, though.
* Trigun takes this to ridiculous levels. He's so pure it's utterly contagious.
* Trigun talks in her sleep. Her words become more amusing when she's asleep due to being drunk.
* Trigun that can produce fresh air, water, and other essential resources that are not readily available naturally on the planet. Several plots throughout the series concern attempts to destroy, disable or plunder the Plants. Moreover, there's no apparent way to make new Plants, and the means to repair them are limited, so the society will give way to attrition eventually without some change in the status quo.
* Trigun (the anime) is silly, stupid and episodic, with only vague allusions to the fact that Vash's story is remotely deep or complicated. With the arrival of Nicholas D. Wolfwood (episode 9), Legato Bluesummers and the Gung-Ho Guns (episode 12), the story arc of the series actually begins.
* Trigun: The bad guys are attempting to send the sand steamer (essentially, a giant track-less train) over a cliff.
* Trigun, the only person on the planet he didn't intend to kill, and Legato apparently felt that if Knives had no one living to care about, he might find some scrap of affection for his chief minion. And Knives breaks his spine when he finds

out.
* Trigun, there was Project SEEDs, a series of generation-ships, with most of its occupants in cold sleep while it searched for another habitable planet.
* Trigun. They originally planned to pass over Gunsmoke, as it was only barely habitable, but unfortunately one of the sapient genetically-engineered beings they were using as a power source chose that time to strike against humanity, causing the ships to crash on the planet's surface. The tiny percentage that survived were forced to cannibalize their ships to create viable habitats, and by story's present date, over a hundred years later, very few signs of the original ships or their technological advancements remain.
* Trigun, though it's probably more to due to his horrific scars and missing arm, that didn't stop Vash acting like he was being perved on, however.
* Trigun, though kicking a rocket fired from an RPG by the terrified mook, AFTER singing that, into the ceiling DID work.
* Trigun to create the illusion of teleporting. Vash figures this out and breaks this by causing pain to himself, which breaks the hypnosis long enough for him to counterattack.
* Trigun: Vash introducing himself to Wolfwood: "I am known as Valentinez Alkalinella Xifax Sicidabohertz Gombigobella Blue Stradivari Talentrent Pierre André Charton-Haymoss Ivanovicci Baldeus George Doitzel Kaiser the Third", adding, "Don't hesitate to call."
* Trigun Vash offering his services as a bodyguard to a pretty girl. She thinks that someone might be out to kill her, and he jumps at the opportunity to have a little fun. She books two hotel rooms for the night, one for each of them, but she secretly switches her room with Vash's just to play it safe. While Vash is laying on his bed, a grenade flies in through the window and blows the whole room apart, launching Vash and his bed outside into the street. Vash asks if he could then sleep in the same room as her, not caring if this trope is put into effect or not, but she denies his request by saying that he already has a bed...
* Trigun, Vash possesses a special revolver that has a hidden function of grafting to his arm and mutating it into an energy weapon of mass destruction. When Vash tries to stop Knives at the city of July, Knives exerts some control over the gun that forces Vash to destroy the city against his will. The same thing happens decades later in another city, leaving Vash emotionally devastated and fearful of causing more harm. So...why doesn't he just destroy the gun?
* Trigun: Vash's left arm was shot off by his twin brother, forcing him to get a replacement. It converts to a gun when he wants it to.
* Trigun: Vash The Stampede is only really named 'Vash,' although he seems to have accepted 'The Stampede' as a legitimate surname since it became his most common epithet. He's also known as 'The Humanoid Typhoon,' 'The Walking Disaster Area,' 'The Demon of July,' and 'The First Human Act of God,' though the latter is only for insurance purposes.
* Trigun: Vash the Stampede once slid out of ropes to protect a young woman from bandits. Said bandits caught him before he could get back into them... the second time.
* Trigun, Vash uses Wolfwood's cross punisher as his gravestone. Considering its shape, it's very fitting.
* Trigun, where Legato uses his powers to force several dozen police officers into the back of a small personnel carrier. He even has a line about how the human body can fit into surprising amounts of space when given the proper motivation. Meanwhile, the truck is so full that blood is gushing out the bottom as the officers smash themselves into hamburger.
* Trigun, where the main character Vash is the one that has a bounty on his head. A sixty billion double dollar one at that. However, there are many unimportant side characters that are bounty hunters in there, and most of the destruction that follows Vash around is caused by people interested in the price on his head. The secondary protagonists, Meryl and Millie, seem like bounty hunters at first but are in fact insurance agents sent to minimize the massive collateral damage that bounty hunters after Vash always cause.

* Trigun, with Nicholas D. Wolfwood and Milly Thompson. He dies in the same episode he sleeps with her. She makes it to the end.
* Trigun, Wolfwood finally seals the deal with the girl (Milly), who he's been flirting with for a while... and bites it the very freaking next day. She, of course, is more of a main character, and stoically toughs it out with her pal, who's much luckier in the guy department.
* Trigun yelling insults in SD form is possibly even creepier than his non-SD moments.
* Trilby's Notes does this; it waits for map transition before randomly shifting you to the bad world.
* Trilby's Notes is slightly subtler, and some players may not even notice, but you try walk away from the hotel entrance, you'll simply reappear at the the other side.
* Trilby's Notes is the woodcutter's son. According to the Evil Bible within the game, it is because he is innocent, but the book tends to downplay the bloodshed, to say the least.
* Trilby's Notes series. At first, it seems the hotel is rather normal, but then the protagonist begins warping into a much darker and messed up version.
* Trilby's Notes Trilby (whose real name is never given) uses the name Terrance Railby while he's undercover. One character sees through the ruse and makes fun of him for expecting to not be noticed.
* Trilby's Notes, you randomly teleport twice, once to the past and the other to the distant future.
* Trill have a given name and family name like most human cultures, but joined Trill replace their surname with the name of
* Trillian Astra, after a heated argument regarding a) the treatment of Random Dent, and b) whether or not the chosen pastimes of either them is more or less pathetic and laced with schadenfreude than the other's.
* Trillion: God of Destruction: Cerberus is the loyal pet to the Overlord's family, and one of the only survivors against Trillion's miasma, which reduced him from his imposing, tri-headed visage to something resembling a fuzzy football. Should the story progress to a certain point, he will take to the field against Trillion.
* Trillion: God of Destruction has this as a potential skill your Overlords can obtain. It only allows you to travel up to three tiles, but it doesn't cancel out any passive skills that require you to stand still, thus giving you more flexibility in your fights.
* Trillion: God of Destruction is the only survivor of Trillion's onslaught against Heaven.
* Trillion: God of Destruction segments are less varied due to the ever-looming threat of Trillion.
* Trillion: God of Destruction: Zeabolous is extremely protective of his sister Elma. He shows considerable animosity towards Uriel whenever he tries to make a move on her.
* trillions or tanks and are still less powerful (but don't overheat).
* trillions. She also intends to wipe out the Cooper family and Murray for the same reason as Clockwerk.
* Trill Symbiotes are fantastically long-lived, but to different ends: to permit the
* Trilogía de las Tierras, the only thing they can do is to protect themselves and wait for their end.
* trilogy and tells them that Yoda was the greatest House Elf to ever live, declaring he took care of thousands of Jedi by himself. As a result, they not only venerate Yoda, but the oldest House Elf serving the family gets to imitate him.
* Trilogy Creep: The tendency of some trilogies to have additional, unexpected installments.
* Trilogy, Khameleon and Chameleon's stances would reflect who they were currently copying.
* trilogy of Digimon fanfics franchise appear or are mentioned in these stories. In fact, the only thing related to Digimon is the name, but even that is improperly

used, as Peter Chimaera uses it for a single character, rather than a collective term for multiple species of digital beings, as it is in the real franchise.
* Trilogy of Terror II features a mother who brings back her son from the dead with black magic, only to have him turn against her. It is then revealed at the end that her son never came back, he's actually a demon who was sent to punish her.
* Trilogy of Terror II hard to reconcile how different things look between the two films.
* Trilogy of Terror — Horror anthology series. 2 films since 1975.
* Trilogy of Terror: Millicent is killed by the voodoo doll intended to kill her evil sister, due to said sister being a split personality.
* Trilogy of Terror revolves around an unhealthy obsession of a student with his female teacher.
* Trilogy of Terror: These are trapped in inanimate objects by magic, but can interact with the world if the gold chain sealing them in is removed. They have fangs, and are capable of possessing the living.
* Trilogy of Terror: The segment "Julie" has Chad Morgan, a sexual predator who blackmails his English professor into dating him.
* Trilogy of Terror, which comes alive after a certain necklace is removed from its neck and starts vehemently chasing the main character.
* Trimps added a new Heirloom tier which didn't allow to reroll bonuses, making hunting for the perfect ones a weeks' long quest. Sixteen days later, Patch 4.81 brought up the odds somewhat by giving each Heirloom of that tier a bonus empty slot.
* Trina Echolls is doted on by her father Aaron, and when he finds out that her boyfriend has been hitting her,
* Trina is missing from the most episodes of the cast. She is absent from four season 1 episodes ("Robarazzi", "Beck's Big Break", "The Great Ping-Pong Scam", and "Sleepover at Sikowitz's"), two season 2 episodes ("Beck Falls for Tori" and "Jade Gets Crushed"), and three season 3 episodes ("Opposite Date", "Cell Block" and "One Thousand Berry Balls").
* Trina Robbins is mostly known for her feminist underground comix and activism supporting women in comics. She also designed
* Trinary logic systems do exist, and are most notably used in databases. The third value, though, is not "maybe". but
* Trine games, is the longest entry yet, and has been received enthusiastically.
* Trine gauntlet that forces you to sit through a loadscreen every time you fail it. The creators later admitted that they had ran out of time and the final level was tested only by a single outsider. Fortunately a patch made it less frustrating.
* Trine has an achievement for completing a level using just a single character of the trio.
* Trine — in particular, Pontius the knight had his shield conveniently acid-proofed before the game began—but it's still a bright green colour and destroys almost anything put in it.
* Trine this; with the Wizard able to create objects and move then with the power of his mind, the Thief's grappling hook and ability to jump higher leaving the Knight to take out the numerous creatures that attacks the group. Only the Thief also has a bow which can be very powerful once upgraded a few times leaving the Knight to be rather useless. Other than breaking blocks of course.
* Trinidad amidships. She managed to make it to Murmansk and be partially repaired, but an air attack on the way back started a fire that led to her being scuttled.
* Trinidad and Tobago whose team is on the movie poster and DVD cover. Trinidad and Tobago does not have an ice hockey team.
* Trini Kwan and her successor Aisha Campbell wield twin daggers known as the Power Daggers.
* Trinity (2008) become keystones to immense cosmic power. After being banished from their reality and transported to another universe, they become their new dimension's Trinity and assume power as gods. At the end of the story they become “normal” again.
* Trinity (2008), eventually becoming an Army colonel and superpowered agent

answering directly to the President of the United States code-named "Interceptor".
* Trinity (2008) has a group of villains perform ever-more elaborate thefts of items as the part of a magical ritual. They steal items related to the Trinity of Superman, Wonder Woman and Batman:
* Trinity (2008) Wally West states that his kids are prone to do this:
* Trinity, Aberrant's sequel, people without psychic powers are known as "neutrals".
* Trinity adventure series resulting in the creation of a new Prometheus Chamber, which triggered all eight Aptitudes, and the creation of a new psi order from the disenfranchised of the original orders.
* Trinity also replies to Neo's surprised exclamations of "God!" and "Jesus!".
* Trinity and Beyond: The Atomic Bomb Movie. More than justified, since it has pretty much an hour of nuclear explosion footage. I definitely heard Dies Ira, and I think I heard Die Valkyrie.
* Trinity, as recounted in "America Offline": a young Aberrant (a superhuman) with power over the oceans was concerned about climate change in Florida, her home state, and attempted to stabilize the Gulf Stream. Unanticipated resonance resulted in massive ocean waves that killed millions of people, including the Aberrant herself.
* Trinity because that seems to be how long they think Epic Series should last these days.
* Trinity Blood: Abel's self-esteem drops dramatically after he fails to save a colleague (who had just revealed that she was in love with him) from being crushed by rocks in a cathedral collapsed by the bad guys. It gets so bad he completely slides into apathy, convinced that he isn't capable of saving anyone, up to the point when he attempts to quit AX. He shakes it off sharply when he learns that Caterina is now in danger and rushes off to save her.
* Trinity Blood) after failing to stop Isaac von Kampfer, who dropped a building on his partner Sister Noelle and destroyed half of Barcelona. Leads to an interesting situation in the light novels: Abel insults Archbishop d'Este by implicitly accusing him of terrorism, but since Abel technically no longer works for AX, his boss Caterina has the opportunity to stay clear of the whole mess. (She still stands up for him.)
* Trinity Blood. At the time of the main plot, he still faces many centuries of incarceration, however.
* Trinity Blood Cain Nightroad and most dress in clear black suits that very strongly resemble SS uniforms.
* Trinity Blood certainly fit this trope! Whilst Abel and Hugue at least attempt to restrain their lovely locks, Isaak just lets his easily floor-length (and he's tall, so that's a lot of hair!) barnet wreak havoc on humanity. Or vampiremanity.
* Trinity Blood, character backstories and world information, were published a year after his death. Nobody bothered to take over the anime, which ended with a 1st-season cliffhanger, though. The manga adaptation ended with 21 volumes in April 2018 which ended the same way as the anime.
* Trinity Blood displays this trope every now and then in his interactions with Abel. Especially in the manga, he is often heard uttering the phrases like, "Does not compute." Of course, it's questionable if this is because Abel has an extensive vocabulary or simply because he's crazy. However, Tres also fits into the "brutal honesty" classification quite snugly. Considering Tres is a robot, it is more like he is one of the wolves.
* Trinity Blood, Father Tres once frees Abel this way when the latter is tied to a chair.
* Trinity Blood has a fleeting scene where Catholic nun Esther is used as a bait to catch a criminal. Blatant fanservice, that.
* Trinity Blood. Her murder changed his character forever and he mourned her alone in a cave for 'centuries' afterwards. While Abel later forms strong bonds with other female characters, no one else compares to his memory of her.
* Trinity Blood. He's still the kind of guy who proposes killing a small child for simplicity's sake, and lacks emotions of any kind. Probably one of the only example

who actually acts as unemotional as a walking computer would. A few minor events suggest that Tres does some of this intentionally; he's certainly not as emotionless as people think.
* Trinity Blood is an amalgamation of the Byzantine Empire, several Eastern European nations and has some slight Arabic/Ottoman influences. Their capital is called Byzantium, their language is a mix of Russian and Romanian and their currency as called Akçe (the same as the Ottoman Empire's).
* Trinity Blood is a slightly milder version. He drinks tea with 13 sugars in it, but he'll eat pretty much anything regardless of its sugar content. Tea was the only food or drink he could afford at the time, so he put lots of sugar into it to make it more substantial.
* Trinity Blood is urged to confess his attraction to a human, as humans grow old and die too quickly.
* Trinity Blood novels drop several hints about Father Tres Iqus not being human, however it is only officially revealed when he is shot through the arm and his circuits are revealed.
* Trinity Blood's New Humankind empire. The living 'Terrans' are second-class citizens, but most of the ruling vampire nobles try to treat them decently.
* Trinity Blood subverts this beautifully. Deitrich is described as having "the face of an angel and the heart of a devil". Despite his beautiful appearance, he's evil. In addition, during the final battle in the anime Cain's ultimate form resembles a heavenly angel, while Abel's ultimate form resembles a demon from hell
* Trinity Blood: The Crusniks, who eat vampires. Though three of the four Crusniks to ever exist have been friendly to humanity (to an extent), including the hero Abel Nightroad.
* Trinity Blood, the Methuselah can normally keep their thirst for human blood under control using an artificial substitute. However, sadistic enemy Dietrich once got Ion to go horrifically bloodthirsty while locked in a cell with good friend Esther.
* Trinity Blood, the Vatican is one of the two major world military powers, the other being the vampire-led Empire. The latter, being based in Byzantium, bears a certain resemblance to the home base of the post-schism Eastern Orthodox church.
* Trinity Blood uses the gloves as well, but sharing a fairly high number of visual cues with Hellsing mentioned above.
* Trinity Blood while Abel and Ion traveled around the world to stop Cain. The manga is said to end at that part as well. So even if one would continue the series with the notes left by Yoshida, the resolution between Abel and the humans vs. Cain and the Rosenkreuz Orden remained unsolved because the last notes stopped at the final battle between the two brothers without the result.
* Trinity Blood whose body is comatose, she's been inside the ship for so long that she often refers to the parts of the ship as if they were her own appendages.
* Trinity Blood wielding android Tres Iqus who has all three styles pretty much nailed (given that Gunslinger is actually his callsign this isn't at all suprising).
* Trinity Blood with detailed schematics of the airships and all sorts of other machines seen in the show.
* Trinity Blood with specific emphasis on the idea of "What makes someone a human?" The show/manga/novels use both androids and vampires to explore this question.
* Trinity Blood, with Vatican States = Italy, Methuselah Empire = Ottoman Empire, and Albion = England.
* Trinity Broadcasting Network, one of the largest religious broadcasters, has two sister channels targeting children and teens/young adults with inoffensive, usually pro-Christian programming.
* Trinity, Clairvoyants ('Clears') don't get to throw bolts of lightning, conjure fire with their minds or teleport an enemy into a dozen different directions at once. Their 'flashier' abilities (like precognition) are depressingly unreliable. They have one major edge, though: They can easily find out where exactly somebody or something is. Combine that with, for example, some knowledge of ballistics and a mortar and you have a very, very frightening combo.

* Trinity comfortable using them (the fluff explicitly says that many biotech devices are sold with normal-looking exterior shells), computers are still better as hard tech, and if Psions get attuned to too many biotech devices, they develop junkie-like symptoms.
* Trinity defending a racist hate speaker from angry rioters. The issues were cancelled by DC due to the increasingly volatile political situation in the United States following the election of Donald Trump, including at least one incident that bore superficial similarities to the riot in the story.
* Trinity from the 2019-2020 competitive season, evoked this trope with the right side of her costume. The sparkling green beads were arranged vertically to represent the glowing green rain of the Matrix's digital code.
* Trinity had a really cool paper sun dial for you to construct, as well as a tongue-in-cheek comic book on the history of the atomic bomb (which doubled as hints to the time travel mechanic), as well as instructions on how to make an origami swan.
* Trinity have this locked down. The Player's Guide includes an example of the Transmassion power (teleporting anything not including yourself through space) called "The Upeo Death Drop" which consists of teleporting an enemy to a location that is as far away as you can see with the naked eye... straight up into the air.
* Trinity) late to stop an alien spacecraft from crashing on a city, he mentions in narration that he was delayed because he was stopping a comet from destroying Pluto.
* Trinity. Like "Asia Ascendant", much of "Brainwaves" had been written by cancellation, and it too was released as a free pdf.
* Trinity, Morpheus, and Seraph all dual-wield during the battle in the Club Hel coatroom.
* Trinity movie got a new dub in 1980, also including cuts, to make it a comedy (although the movie already was funny on its own). Both versions are available on Blu-Ray as well.
* Trinity nuclear-bomb test was clearly going to be a bit tricky; as an Army security officer put it, "you might as well try to hide the Mississippi River". Nevertheless, they tried:
* Trinity, one of the psi orders is China's Ministry of Psionic Affairs, which specializes in the practice of telepathy; as such, the Ministry has a number of functions in the Chinese government. Its relationship with its home country, and with the rest of the world, is understandably complex.
* Trinity: Ronon and Teyla in black coats. The show's two most badass characters in long, black coats - simply badass. And while everyone wears BDUs off-world, Ronon tends to wear a coat instead.
* Trinity rulebook tended to do Space Clothing Done Right, with unusual but generally not bizarre or impractical garments.
* Trinity said that the Oracle had told her she, Trinity, would fall in love with the guy who was the One from the prophecies. When Trinity fell in love with Neo, she used this to justify her belief that Neo was the One. But maybe she only fell in love with him because she thought he was the One? She was so fixated on the idea of the prophecy that she was unable to fall in love with anyone else, but once Morpheus announced Neo as
* Trinity's Child, this is why the Soviets launch a limited nuclear strike on the United States. The Soviet premier explains that they can no longer afford the conventional arms race with America, so a limited nuclear war is necessary to damage the U.S. enough to deny the Americans a clear win of the Cold War. As a concession, the premier notifies the President that he is willing to accept a U.S. counterstrike that inflicts equal damage on the Soviet Union.
* Trinity series, being another year-long weekly, has a similar problem - except this time it's 52 issues over three volumes.
* Trinity series, where the titular character Trinity and his brother Bambino pretend not to know each other so that they can cheat at cards. The scheme falls apart when a professional gambler accuses Trinity of cheating, which Trinity was doing by giving everyone at the table increasingly good cards, but his brother

ended up with the best hand.
* Trinity set in the 22nd century. Computers in that RPG are only one step under true AI, are small enough to fit in a pocket, and are presumed to have most of the capacities of 2011 smartphones. The smallest unit of memory described is the "bloc," able to hold "a large library." The only notable limit on what computers can do is the "Comm Crunch," which states that cellular bandwidth is in very short supply (so the GM can arbitrarily throttle the PC's communications, as needed by the plot). This seems eerily prescient for a game from the 90s! Zeerust only arises in the presumption that computers would still have keyboards, would be strapped to your forearm, and would be called "computers" not "phones."
* Trinity Seven, Arata notes a drawing his cousin Hijiri did when they were younger, and noticing the yellow sun on it. After Lilith shows up, he asks Hijiri again what color the sun is. She says it's black. He points out the color discrepancy with the drawing from earlier. "Hijiri" then turns out to be a grimoire his cousin left in his care right before disappearing, and the world they were living in was a fake one, and Arata begins his quest to save his cousin.
* Trinity Seven has their time to shine and intimate moments with Arata. There's also a few mages outside Trinity Seven who are also in love with Arata and they get decent amount of focus too.
* Trinity Seven. The first is against Liselotte to buy time for Mira to scan their opponent's abilities and spells, and the second is when fighting Lugh to give Arata and the others more time to get back before it's destroyed.
* Trinity Seven while being scolded by Lilith, Arata says, "This is difficult," to Arin, who's usually the one saying that. She does not find it difficult to agree with him.
* Trinity: Souls of Zill O'll. Matter of fact, boldans are pretty much a walking shirtless RACE.
* Trinity: Souls of Zill O'll so that he can one day fulfill that prophecy.
* Trinity: The Shatter Effect, was featured at E3 2003, only to be canceled a few months later.
* Trinity, the United States of America will socially collapse due to conflicts with the super-powered aberrants. The military and key corporations take control from the broken civilian government and establish the Federated States of America, a fascist nation where the voting system is rigged to give the wealthy and corporations the lion's share of votes in all elections. All media is censored and civil rights are purely at government discretion. The FSA also annexed large chunks of Canada and Mexico as part of a resource grab.
* Trinity Universe are fond of this. Especially the prinnies and Etna.
* Trinity Universe because she loves incredibly hot foods and adds fiery sauces to everything she cooks. She even gets an ass-chewing from Tsubaki when her cooking causes Kanata to drop unconscious.
* Trinity Universe does this, with the Demon King (Kanata) and Valkyrie (Rizelia) arcs. Their paths do intersect at various chapters, and eventually both sides will join together. You have to play both arcs to piece everything together, which will lead you to the game's True Ending.
* Trinity Universe" literally happened in this universe; General Zaroff was a Minoan, and Rainsford founded the Theseus Club after killing him and finding out about the Society whilst rifling through Zaroff's belongings.
* Trinity Universe refers to him and that the metaphor for the response to his sexuality is deliberate.
* Trinity Universe. Unlike the previous game, this one doesn't wait until the end of the game to use this trope. It'll attack the fourth wall every so often throughout the whole game. Of course, that should be expected since Etna, Prinny, and Flonne are in this game.
* Trinity) was essentially the G.L.C., L.E.G.I.O.N., and Darkstars in a jurisdiction dispute.
* Trinity was to learn from the worldsoul, the sentient soul of the planet Earth itself.
* Trinity was written after the Internet existed, and presumes that practically

everything is wirelessly connected. It also assumes a "Communications Crunch", in that bandwidth has become very scarce, and people might find that they can't get on the 'Net at a given moment, because other people are prepared to pay more for the bandwidth. Given current issues with net neutrality, this isn't too unlikely a future.
* Trinity were the first humans to become psions, and their psychic powers are noted to be significantly more powerful than later psions, as the process that created the proxies differed in important respects from the one used for other psions.
* Trinket barely ever contributes to the group's exploits in a meaningful way. On the contrary, the group frequently has to go out of it's way to make sure he isn't left behind since he's too big to fit on the flying carpet, or to save his bacon when Vex actually does send him into the fray (which she usually avoids; he could get hurt, after all!). Subverted once the "pokeball" is acquired, as Trinket can be easily carried and only come out when needed.
* Trinkets but shown to be a destructive, debilitating addiction. Elodie especially struggles with it.
* Trinkets: Elodie is gay, played by Brianna Hildebrand, who's stated she likes both men and women (while just going by "gay"). Sabine too is gay, played by queer and non-binary actor Kat Cunning.
* Trinkets. Elodie's exotic new girlfriend Sabine is free-spirited, outgoing and definitely far more experienced sexually, but it doesn't work out as they're too different.
* Trinkets girls that are sexually experienced and the lesbian that's a clueless virgin at first. The other two lesbian women on the show aren't promiscuous either.
* Trinkets. In the third episode, Moe suggests that Elodie try this in order to feel more comfortable with her body before engaging with a sexual partner. Elodie shoplifts a sex toy to use.
* Trinkets I've Picked Up Over the Years: Bob maintains a collection of historical artifacts, not because he's an antiques dealer but because he personally collected them. At the time when they weren't antiques.
* Trinkets: Moe is very unhappy when she finds out Tabitha and her brother Ben are getting involved and says it's really not okay (possibly because Tab's like her sister). She comes around eventually.
* Trinkets: Tabitha is a biracial girl, like actress Quintessa Swindell. Moe's also mixed race, as is the actress playing her, Kiana Madeira.
* Trinton Chronicles. At the end of the story a huge fireworks display is shown over the city with a good old fashion Happy Halloween scrawled in the sky.
* Trinton Chronicles brings us several mentioned but non-obvious examples.
* Trinton Chronicles features at least two true-to-life god entities and one specific to the TC universe; Isis & Hermes are prominently mentioned and one actually shows up (in a way)to help out one of her believers. The other one, Gralla, appears only in dreams and through telepathy but one gets the idea that if she manifests physically no one would be to surprised.
* Trinton Chronicles has 5 main authors and 2 part-time authors; 15 main characters, 20-something secondary, and over 100 throw-away characters.
* Trinton Chronicles has three so far since 1999, and rumor states may end up with a 4th.
* Trinton Chronicles it seems like everybody has some sort of supernatural power, ability, or trait. Some are more powerful than others, but it's so commonplace that if you lack powers, you're more of a freak than if you happen to be born with powers, also magic is a normality and anyone can learn it, like any kind of science, but it takes special people with the drive to do so.
* Trinton Chronicles nearly everything runs on a blend of scientific principles and mystical energies. Robots can use pre-stored spells, magical items can double as personal protective shields, and even whole rooms can be enchanted to move objects around according to sorting needs.
* Trinton Chronicles of the story. The current story takes place during the actual month of December and features decorations and the similar themes of Christmas.

* Trinton Chronicles only one person, Coatl, actually has this power and seeing as how its a super rare ability in this world, she keeps it well hidden from everyone she doesn't trust.
* Trinton Chronicles series compiled from the message board RPG of the same name over 10+ years.
* Trinton Chronicles: Summoning summons lasting things, where the summons stay around as a new character and beat the crap out of whoever, but they aren't magic spells instead being actual supernatural powers to do the summoning although the rules of marking / making a pact with are about the same.
* Trinton Chronicles there are two characters who fit this, one is Robert who took actual schooling on robotics and the other is Brandon who's super power actually allows him to understand machines.
* trio against a wall. At the end of each one, Naruto, Sasuke, and Sakura triumphantly flash the peace sign and declare, "He fell for it!!"
* Trio ** "Da Da Da" Those crazy Germans. The refrain is "Ich liebe dich nicht, du liebst mich nicht". It is only at the end of the song that they say it in English: "I don't love you you don't love me".
* Trionfo di Afrodite, are based on classical texts and sung in both Latin and Greek.
* trio of Ineffectual Sympathetic Villains, but the third guy, Mulsajo, whose distinguishing characteristic was that he wore a pink shirt, was even more ineffectual than his comrades and was blown up with a grenade midway through one of the earlier story arcs, leaving just his two buddies to carry the mantle of constantly failing.
* Trio of Towns won't kiss the protagonist on the lips until they get married.
* Triops are small crustaceans that have survived for as long as 400 million years. Much of their body structure today is similar to their ancestral fossils. Their secret of having survived for so long is being able to lay many eggs that are able to
* trio. The guy was married to a wife and they both registered a partnership with the second woman, who is a partner, but not legally a wife.
* trio they turned their misogynist attentions towards Apache's wife and daughters.
* Trip advises Ash that they should keep Goh oblivious about the existence of the Infinity Train. Mostly out of concern for his safety; given Goh's tendency to fixate on plans
* Trip For Biscuits: PI agency investigate alien phenomena, with hilarious results.
* Triplanetary). Later in the same book, there is a tractor-beam tug of war between enemy ships, and physics does come into play because the tug of war ends not due to any of the tractor beams failing but because one ship was using a tractor beam to anchor into the ground, but the opposing ship pulled so hard the plug of earth caught in the beam simply got pulled out of the ground. Later still, the trope is played with again: this time combining a shaped energy shield with inertia to penetrate another shield.
* Triplanetary mentions the first and fourth Jovian Wars, which resulted in the formation of the Triplanetary League from Venus, Tellus, and Mars.
* Triplanetary originally published by Game Designer's Workshop and now in SJ Games' hands. One of its primary features was hex-mapped based vectored movement system.
* Triplanetary, our iron is the most valuable substance in existence for the alien Nevians.
* Triplanetary series, the Nevians come up with a way to transmute matter into (tremendous amounts of) energy, but the problem is that it needs iron, which is incredibly rare on their world. They power an interstellar spacecraft with the few pounds of it they can manage to scrape together to go out looking for more, which they find ... in the form of a spaceship from Earth. The Nevians and "Tellurians" get off to a rather rocky start because of this, but eventually become friends.
* Triplanetary that his American readers might one day be enjoying sushi.
* Triplanetary, the planet Nevia is so scarce in iron that ten pounds of it is an unimaginably large quantity; this scarcity, combined with the Nevians' development

of a method for total mass-energy conversion of iron, gives iron a value so starkly indescribable that the Nevians invade our solar system in search of it.
* Triplanetary to fuel their atomic star drives. Humans rapidly copied their tech and developed atomic iron star drives of their own. The problem is that there are two ways of getting energy out of atoms; fuse light ones together, or split heavy ones apart. As atoms' weights move away from the extreme light and heavy ends you get less and less energy out as you fuse or split them, and in the middle there's an element that's the atomic energy equivalent of a deflated balloon; fusing or splitting it releases no energy, and you actually need to pump energy in to change it in any way at all. That element is iron—the absolute worst possible choice for a nuclear fuel. At the time the specifics of the nuclear binding energy curve wouldn't have been well known, so there's every chance Smith chose iron simply because we use a lot of it on Earth, making it a good candidate for a material avaricious aliens might want to steal.
* Triple 9. Irina even comments that her sister is not very smart, but extremely good-looking, and that can make up for a lot of other deficits in today's society. Elena blindly follows all of Irina's orders, even when they concern her son.
* Triple 9, Michael attaches bombs to two of the guards in the Homeland Security building to ensure the cooperation of them and the rest of the guards. He blows up the ankle of one them to show he is not bluffing.
* Triple 9 opens with the crew knocking over a bank to steal a safety deposit box. A large chunk of the latter part of the film is devoted to them planning and then executing a heist on a Homeland Security safe building.
* Triple 9, Russell and Michael are ex-navy SEALs. On watching the video of the bank robbery, one of the cops comments that these guys have had tactical training.
* Triple 9, the gang decide that they only way that they can pull off the second heist is to create a 'triple 9' ('officer down') call. This will make every available police unit converge on the scene of the call, drawing them away from the gang's target.
* Triple-A baseball's Las Vegas Aviators, sounds like it averts this trope... but doesn't. The naming rights are owned by the Las Vegas Convention and Visitors Authority. The hint of the sponsorship is that all park signage contains the CVA's trademarked "Las Vegas" logo.
* Triple-A: Lehigh Valley IronPigs, Scranton/Wilkes-Barrre RailRiders
* Triple Crown Champion: A lot of wrestlers achieved this feat in the decade.
* Triple Crown Champion: Bayley becomes the first ever woman to achieve this feat in May 2019. Alexa Bliss becomes the second on August of the same year.
* Triple Crown Champion became the first ever wrestler to achieve this feat in 1980, and the only one to do so until the following decade.
* Triple Crown Champion: Several more wrestlers have achieved this feat, and in different promotions at that.
* Triple-dog-dare). Depending on where you were sprayed and how hard, it ranges from vomit-inducing stench to eye-watering, nose burning, "Someone please kill me now!" type pain. It can also cause temporary blindness in certain cases.
* Triple Frontier's compound. Their getaway isn't as easy as initially thought since they got a little greedy and stole way more cash than they can handle.
* Triple H 2004, both men were knocked out and neither was able to make it back to his feet. This happens in about half the LMS matches.
* Triple H (51 years old, though he has semi-retired due to his duties as head of Talent Relations and eventual successor to the WWE empire.)
* Triple H. Although he wasn't purely non-action, back then he did completely rely on her.
* Triple H always spits out the contents of his water bottle during his entrance, so he often spit-takes onscreen.
* Triple H and actually didn't show up until December to exact his revenge.
* Triple H) and decides to phone HBK. His music starts... and then his voice comes out from the other end of the phone... singing a voicemail message to the tune of his own theme music. Hunter apparently had no idea that this was Shawn's message and he promptly proceeded to completely lose it.

* Triple H and DX. From addressing his real life romance, marriage, and baby, to the mantra of his heel Authority run being "best for business", to flubbing a line on live TV and addressing it, he does not let up, not even in video game form.
* Triple H, and trading his DX music for the Corporate theme and, eventually, "My Time". Even his mood lighting changed (from DX's green flood, Corporate red to his signature ominous multicolored flicker).
* Triple H a pre-match handshake. Eddie pulled his hand away at the last second, then mocked him by turning around and slapping his own ass.
* Triple H, a supposed incident where Kane was in love with a cheerleader named Katie Vick, but then she died, and he promptly had sex with her corpse. The low point of this angle was a supposed "video" Triple H produced of Kane committing the act—-it was Triple H in a Kane mask, climbing into a coffin with a cheerleader mannequin, pretending to have sex. Ended with Triple H reaching over towards her head, grabbing a handful of spaghetti with sauce and throwing it at the camera, proclaiming that he "screwed her [brains] out".
* Triple H. At heart, he was always a jerk, he just got A LOT more mic time as he rose to power.
* Triple H at the time and they were married later that year) came under intense scrutiny from Smarks.
* Triple H becoming an actor depleting WWE's main event talent until guys like John Cena and Batista were ready. Or that Vince McMahon has always favored not only the larger wrestlers but the ones who can exude the most over-the-top personality even before Triple H was in WWE.
* Triple H betraying Triple H for the Corporation and how he was all alone with none of the other DX members coming to his aid, it's no surprise that Triple H decided to sell out his buddies in DX.
* Triple H. Both times. The first by making Triple H tap out, and the second by making Shawn Michaels tap out.
* Triple H but eventually developed into a fairly normal, non-pretentious guy who just happens to be very rich.
* Triple H buzzed his long hair off in 2012 due to his backstage role as Executive Vice President of Talent Relations requiring a more professional look.
* Triple H couple but became a real one behind the scenes. They kayfabe split up in 2002 and would occasionally tease at revealing the real marriage before they finally did so in the late 2000s. Widely seen as a successful power couple, they are one of the most famous examples in wrestling today.
* Triple H divorce later, they started dating in real life and were later married. Nowadays the couple has three daughters and is still married, with their marriage even being acknowledged in kayfabe as well.
* Triple H do his theme songs wasn't enough of a clue, according to reports, he personally scouts relatively obscure metal bands to do a lot of WWE and NXT's theme music.
* Triple H even stated that "Ain't nothin gonna stop Kane tonight!" Too bad he was wrong and Kane lost the match.
* Triple H explicitly forbade showing him in a "prone or defenseless position". Guess how that one went.
* Triple H for the WWF Championship, at Summerslam in 2000. The storyline collapsed eventually when Triple H played his real-life creative control card and nixed the planned ending where Steph would leave H for Angle.
* Triple H had all but zero chance of losing his belt on free television to a jobber, several near falls in Taka's favor drove the crowd into a frenzy until Triple H was finally victorious with a Pedigree.
* Triple H has been quite guilty of this lately (King of Kings going back on his throne, you know the deal)
* Triple H holding a sledgehammer. Orton suggested they both drop their weapons and just go at it like men. Triple H agreed, both men ditched the hammers they were carrying, and then, after stepping into the ring and removing his jacket, HHH pulled another full-sized sledgehammer out from behind his back and proceeded to chase Orton away. Now, yes, the second hammer was concealed behind his back the

entire time, held by a special rig, but the fact that someone managed to pull off the illusion of Hammerspace on a live television program was impressive.
* Triple H in 2001. In 2002, he both won the Royal Rumble and became the inaugural WWE World Heavyweight Champion.
* Triple H inside. He does very noticeably use his fist to cover the head of the hammer since a real hit with the hammer would likely knock out some teeth.
* Triple H. In the second incarnation, the Outlaws were added and they're considered a classic part of the group. Some even forget that Rick Rude was even associated with them.
* Triple H in trying to take them out of power are all good business decisions. Perhaps they meant good for their own pocket books. At least during the McMahon-Helmsley Era in 2000, also led by the two, they openly admitted to screwing people over intentionally and only covered it up when they were backed into a corner.
* Triple H is a case even in kayfabe, since his full name is Hunter Hearst Helmsley, but he's rarely, if ever, called that anymore. He's still called "Hunter" on occasion, and he and
* Triple H is a great example. During his career, he's stood roughly 6'4, weighing around 270 pounds and is as muscular as almost any other wrestler you can think of. Despite this, he doesn't use power moves and isn't billed as being any stronger than the average male wrestler.
* Triple H is a perfect example of both. As a heel, he can't win a match clean to save his life, yet as a face, all he needs are his fists and maybe a sledgehammer in order to take out his opponents.
* Triple H is pretty much the lightning rod for the fans wrath, regardless of whether or not he had anything to do with it. Considering he's married to the head of the WWE's creative department (and, if you believe some of the nastier rumors, closer to Vince than his own son Shane,) he's always accused to steering the company to always benefit himself. Have a favorite wrestler who isn't being pushed? Triple H is holding them back because he's "threatened." Crappy storyline? Triple H is burying someone he doesn't like. The blame has indeed continued on now that he has become WWE's head of talent - which would make sense given that he is officially the one running WWE's shows now, except that word around the company is that Vince still micromanages and meddles in the shows' affairs. It's supposedly gotten to the point that even Triple H is getting frustrated with Vince's meddling - ironic given his reputation for having been a
* Triple H made an offer to Roman Reigns to join the Authority but he refused.
* Triple H; nowadays known for his behind-the-scenes work in the industry)
* Triple H. Once the decision was reversed, Triple H told Hebner he was fired and beat him up.
* Triple H pregnant. Also during the writer's strike when Triple H came out, made a bad joke and then remarked "Who writes this stuff? Oh yeah, they're on strike!"
* Triple H, probably before all the political stories came to light. That is, if the dirtsheets are to be believed...
* Triple H seemed to have this attitude a few times after crushing defeats.
* Triple H's extended run of jobbing after the Madison Square Garden Incident).
* Triple H's little cubicle that he calls the "Cole Mine". Despite the serious tone that a match involving Undertaker would usually have, seeing Cole's property go to pieces makes you laugh just a little.
* Triple H's nastiest tyrants, earning himself monikers such as 'The King of Kings' and 'The Cerebral Assassin'.
* Triple H's valets and caused him to lose numerous matches because of the subsequent distractions. Finally getting fed up with it, Triple H challenged the retired Hennig to a match; Hennig accepted. However, on the night of the match during an episode of RAW, Triple H ambushed Hennig backstage before the match and seemingly injured his knee, preventing him from continuing. Then-Intercontinental Champion "Wild Man" Marc Mero decided to fight Triple H in Hennig's place, putting his title on the line. In the match's climax, Triple H attempted to cheat using a steel chair, but Hennig ran in for the save and took the chair from Triple H... only to wallop Mero with the chair, allowing Triple H to pin him for the title.

Afterwards, the duo revealed that the entire debacle was a plan to put the title on Triple H (and return him to a prominent stature within the company), while embarrassing Mero for stealing Sable from Triple H.
* Triple H tie the knot and started a family. This in turn likely helped Triple H move from working the ring to working the front office of WWE as the VP of Talent and Live Events (and indeed, he will likely become Vince's successor when the time comes).
* Triple H used to call his "the big bazooka" and "my soldier that stands at attention", mainly to irritate then-Commissioner Sgt. Slaughter.
* Triple H voiced confusion on whether the group was a regime or a faction (both terms were used throughout the stable's history) and settled on "Fac-gime."
* Triple H was Hunter Hearst Hemsley, American blue blood from Greenwich
* Triple H was this to him in 2005 after Triple H lost 3 straight ppv matches to him, even handing Triple H his first pinfall loss inside the Hell in a Cell (he had been in 5 before that, winning 4, and was not involved in the winning decision of the other).
* Triple H... While Shawn quickly reverted back to being a full-fledged face, Hunter has remained heel since that day in August.
* Triple H who would seize any advantage; Trips has been known to carry around a sledgehammer. Orton spent several months prior to the match systematically destroying the McMahon family (of which Triple H is a member), and Orton hates his opponent with a passion (and routinely uses cheap shots and outright cheating to gain an edge). Both of them fight more or less fairly. While Triple H would have lost the title if he was disqualified, Orton had no such restriction.
* Triple H XXV. In the process, Triple H even referred to his marriage as "the worst-kept secret in the business".
* Triple H, yet as a face, all he needs are his fists and maybe a sledgehammer in order to take out the rest of the roster.
* TripleJ parties are now thrown all over the world. Not bad for an indie music station.
* Triple-layer, really: The C and R were removed because it wasn't the normal Critical Role.
* triple-pronged one is broight out for the three cockroaches when the same happens to them.
* Triple Shifter: Someone doesn't get enough sleep because they're too busy with multiple jobs.
* Triple Shifter: When you're a civilian by day and a superhero by night, how do you sleep?
* Triple Subverted. Zombies, when decapitated, need one more shot to kill them... or just a few seconds, and then the body falls down by itself.
* Triple Threat Comics, uses this power to battle villains such as Mr. Slumber.
* Triple Threat", Ember's sneezes trigger uncontrolled fire-breathing, which can be somewhat destructive. It doesn't help that she claims to have an allergy to feelings. At the end of the episode, such a sneeze melts the celebratory ice statues. She comments they should make more things out of rocks.
* Triple Threat/Fatal Four-Way — This match is similar to the Elimination match in that more than two wrestlers are involved. However, unlike the Elimination match, only one pinfall or submission is needed to end the match, whereby the wrestler who gets the pin or submission is declared the winner. A title is (almost) always on the line for these matches (the main non-title variation being a number one contender's match for when several wrestlers are feuding over who deserves the next title shot), and there is a good possibility that the current title holder will lose the title without being the one getting pinned. Naturally, there will invariably be multiple near-falls where the third wrestler breaks up the pin or hold. Also, you can count on one wrestler being "knocked out" or otherwise indisposed for much of the match and win it at the last moment after both his opponents have beat the living crap out of each other.
* Triple Threat, is not clear to Payu and Long Fei, nor to Collins and his crew. Jaka uses Payu and Long Fei to get to the mercenaries, and after seemingly teaming

up with the mercenaries, eventually helps the duo to defeat them. Ultimately, Jaka's allegiance is to vengeance for his wife and village.
* Triple Threat, specifically, is one of the most interesting type of matches when you take wrestler alignment into account:
* Triplet, the "Hidden Worlds" of Shamsheer and Karyx are only accessible though a set of tunnels to other dimensions. The natives of these worlds appear to be human, and are presumed to have been planted there by whatever advanced civilization created the tunnels, but no one's sure. And since the tunnels prevent carrying any technology (or even clothing) through them, doing genetic testing would require dragging one of the natives naked and screaming back through the tunnel. As one of the explorers notes, that's currently considered "unacceptable procedure."
* Triple Whammy: in the episode "Proxy Prexy", Marty runs for condo-board president to act as a mouth for Frasier's ideas, and tensions rise between the two.
* triple-wields — that is, use nine swords at once, or at least create the appearance of this.
* Triplexes since they used up so much fuel and water they were almost completely empty once the train hit the peak, with barely enough left to make the journey back down without exploding due to lack of water.
* Tripocalypse plays with this trope by having unnamed NPCs Punch Out God as part of the prologue (and promptly get out of the spotight), which allows the setting to exist in the first place.
* Tripod Attack to unlock the "cool menu," which lets you double your damage, armor, and shields. Completing all the achievements involves beating the game and all the challenge modes.
* Tripod novels is to convert Earth's atmosphere into something they can breathe.
* Tripod sleeve notes written in this style. (For example, the track listing is headed "A Complete Listing of the Songs from Self-Saucing: For the benefit of those prevaricating upon the purchase of this Audio product.")
* Tripods trilogy, the Masters' domed cities are maintained at higher internal gravity than is normal for Earth, making life comfortable for the alien Masters and extremely arduous for their human slaves.
* Tripod Versus the Dragon: Scot and Yon play the evil Twin Wizards by wearing party hats and carrying torches to light their faces.
* Tripping Down the Rabbit Hole) after being nearly killed by Apocalypse World Michael, he discovers that he now possesses the powers and limitations of the 'local' angels, such as his wings being actually visible and no longer able to smite demons by snapping his fingers. Unfortunately, Gabriel soon learns that angel blades are still a valid weapon when he discovers that someone has smuggled a collection of blades from his universe to this one, particularly when an unknown party is melting those blades down to make bullets and has already killed the 'local' Gabriel.
* Tripping Over You about improvising some kind of lecture, but spares them both the experience.
* Tripping Over You and flirting with Liam, before and after they get together, and never misses a chance for an innuendo. But when Liam asks him to cut down on the PDA, Milo concedes, and he doesn't even bring up the subject of sex because he doesn't want to push Liam to it and instead waits until Liam himself articulates an interest.
* Tripping Over You follows the lives of two British boarding students in love.
* Tripping Over You It is just as perplexing to the main characters in the audience.
* Tripping Over You It would seem the apple doesn't fall far from the tree, as the uptight Liam falls in love with the upbeat, laid-back Milo.
* Tripping Over You: Matt has no complaints about his office overlooking a gym with plenty of picture windows.
* Tripping Over You, Milo and Liam get theirs early on, in chapter 2. Their now established relationship arguably sets the course for the further comic.
* Tripping Over You. Milo nearly strangles himself with his tie out of nerves before Liam explains that his father is just as anxious for Milo's approval.

* Tripping Over You, this is a point of contention between Liam, who likes to grow his hair out, and his father Eli, who thinks it's unmasculine. Fortunately, Eli drops the unpleasant "makes you look like a poof" comments after Liam comes out of the closet.
* Tripping Over You to his father, his dad promptly shows relief and comments that he was afraid that Liam was sneaking around because he was doing drugs. He promptly reveals that he's also angry about the whole "dating another guy" thing, but prioritizes the fact that Liam wants to quit law school. Eventually, his dad calms down a little, and it's implied that his real problem with the situation is that Liam didn't tell him about it sooner and instead lied about what he had been doing for so long.
* Tripping Over You to phrase his declaration in a way that Liam can even understand. Milo is invited to help out in what he thinks is a date between Liam and a girl. As he has a crush on Liam, he tries to dominate the evening, and then finds out, to his chagrin, that the date is not between Liam and the girl, but between Archie and the girl. Confused and mortified, he flees to the loo, and when Liam finds him there, he begins to try to make Liam understand.
* Tripping the Light Fantastic is apparently about the relationship between science and society.
* Tripping the Rift, and they tell him it "needs work and sounds forced".
* Tripping the Rift: Chode, a disgusting purple alien and incredibly hot Six. Then again, Six is a sex robot that he owns, and we have no definition of Chode's relative attractiveness by the standards of his own species (as opposed to us humans, who aren't really qualified to judge). Also, an episode claimed that men and women are both held up to unreasonable standards for attracting the opposite sex; it's just that with women it's looks and men it's money. Six's interest in Chode is also explained in that he had her upgraded beyond being merely a sex bot allowing her to become the ships science officer and treats her with the closest he can manage to respect. Apparently, he's treated her better than anyone else has and she's perfectly capable of walking away if she wants to.
* Tripping the Rift: Chode is always naked. Interestingly other members of his species like his grandfather do use clothes, so go figure.
* Tripping the Rift; Chode is so cheap, the escape pod's stealth mode simply produces a starprint curtain that surrounds it.
* Tripping the Rift episode "Miss Galaxy 5000" has Six competing in one of these.
* Tripping the Rift. Fortunately, the crew are able to con the Gypsy into undoing the curse by claiming they cursed her with ugliness (the "mirror" they show her is really a video tablet showing T'Nuk in the Gypsies outfit, miming her).
* Tripping the Rift had Darf Bobo tell one of the judges for his daughter's supermodel contest that he's kidnapped his wife, and if he knows what's good for her, he'll vote for his daughter. Upon seeing the picture Bobo provides for evidence, the judge tells him that's his mother-in-law, and that Bobo's free to kill her.
* Tripping the Rift has a reporter covering the new phenomenon of "evil" that Chode has introduced. He is explaining the concept of "stealing" when someone demands the microphone, and shoots the reporter when he refuses to hand it over.
* Tripping the Rift have crazy misadventures in the non-controlled areas of space.
* Tripping the Rift, including the main protagonist Chod who is a purple monster with three eyes and tentacles.
* Tripping the Rift is, according to its creator Chris Moeller, supposed to be funny because he doesn't think clowns are funny at all.
* Tripping the Rift is ugly, crude, disgusting, sarcastic, depraved, and his crew never misses a moment to lampshade it. Not lampshaded yet is that his name, Chode, sounds much like the stretch of flesh between the testicles and asshole, which is where his mentality seems to reside.
* Tripping the Rift: One of the main characters is the alien responsible for the original incident.
* Tripping the Rift Six always wears outfits that shows off her back (and front, as well as most of her body).

* Tripping the Rift. The crew saves the day by turning back time Superham-style: by flying the ship around a star counterclockwise really fast. While they're setting up, they discuss the inconsistency of the rules of time travel and the problems with changing the past.
* Tripping the Rift: The space ship was both sapient and afraid of wide open spaces...
* Tripping the Rift, the three voice actresses for Six, and the occasional guest star during Seasons 1 and 2.
* Tripping the Rift to settle for worshiping the engineering geeks who designed them.
* Tripping your opponent via Drop Toehold, Dropkick to the knee, etc. Not as impressive as a Clothesline, Spear, etc.; nor as flashy as a Hurricanrana, Missile Dropkick, etc.; but much harder, if not impossible, to avoid. This especially comes in handy against
* Tripp is able to understand the Amazons because of a translator device put in his ear.
* Trippy Finale Syndrome: The finale takes place in some trippy and abstract realm.
* trippy transitions, showing various Pokémon performing some actions. The first time, it's easy to think that it's part of the actual short, and not a transition.
* Trip's Servine apparently doesn't mind Ash's Snivy whipping him until he collapsed. Granted, Servine was under the effects of
* TripTank reveals that aliens' fascination with probing came when they abducted a drug trafficker and tried to implant a probing device inside his anus, only to find that there was already something up there—a bag of cocaine that he was smuggling. Every subsequent probing has been part of a quest for more cocaine.
* "Trip to the Archives" is placed in between "Croak & Punishment" and "Snow Day".
* Triptych Continuum, and in small amounts unrefined platinum leaks the magic back out. But large chunks of unrefined platinum, or damaged platinum wiring, simply absorb magic without being able to discharge it, until there is so much magic stored up that the platinum chunk can't hold it anymore and explodes in a building-levelling blast.
* Triptych Continuum: at the start of the story, Celestia and Luna are so mutually depressed as to have their emotional state manifest through their magic, creating storm clouds in the Solar throne room.
* Triptych Continuum bits, as they were discontinued some centuries ago. Even then, though, it's not even the metal which qualifies as expensive: it's the fact that the ancient coins are A. extremely rare, and B. contain a note on them reading, 'Good for nearly all Princess labor, Public or Private'.
* Triptych Continuum) causes overpowering horror and confusion in normal ponies. Chaos children have the opposite effect, finding it beautiful, while non-ponies simply see a moving picture, with no supernatural effects either way.
* Triptych Continuum disease being guaranteed in the offspring. Celestia saw that part coming — but wasn't quite expecting centuries of the spell's use to push Equestria into a mare majority.
* Triptych Continuum entirely inaccurate." Applejack isn't exactly looking to just find a decently healthy earth pony stallion to stud her and then raise the foals on her own — but romance would pretty much have to fall on her head if it was going to get her attention, and with Apple Bloom seemingly on track for a non-farming mark and Big Mac impossible to herd into dating, her current top priority is to make sure the farm has a next generation.
* Triptych Continuum Glimmer appears to have computer terminology as its title theme.
* Triptych Continuum has Rhynorn's Flu, a unicorn disease that in addition to normal flu symptoms causes field scattering. Whenever a unicorn with Rhynorn's tries to use magic, their field will scatter sparks of magical energy everywhere. If the field is being used for standard telekinesis, these sparks will randomly accelerate anything they hit, while the fallout from true spells can be even worse.

* Triptych Continuum, in Chapter 30, after Rarity discovers Gentle reading to Twilight:
* Triptych Continuum is that her field dexterity score is rather high: in essence, she's very good at micromanaging.
* Triptych Continuum it a Secret. (Applejack realizes some of the stories are probably just that: scare tactics to get younglings in line — but over the course of Equestria's history, having at least one fatality would seem to be guaranteed.)
* Triptych Continuum: It's how Gentle and Twilight are positioned, when he reads to her, as described by Rarity:
* Triptych Continuum like carrying things and putting food into their mouths.
* Triptych Continuum, Spike gets a spam flood, and the story ends on a pun on spam (canned meat):
* Triptych Continuum: Stile has one with Allie Way. They're described as having breakups as regular and nearly impossible to reconcile as a seven-ten split.
* Triptych Continuum The Bounce Test has its chapters' names relate to mirrors:
* Triptych Continuum, there’s also the discovery of a disease that amplifies the mark magic until it renders the pony unable to do or think of anything that is not the exercise of their talent.
* Triptych Continuum There is also a more rarely seen pro-Diarchy media which is equally mindless in its support of the government.
* Triptych Continuum the Secret is a secret, just that this is what Earth ponies have been doing for centuries.
* Triptych Continuum. This results in a course where your putt swerved right because microridges in the soil told it to, the rough is hidden by illusion, and the wind does in fact hate you — with every countering element steadily growing stronger as you move towards the end. Celestia silently sums it all up somewhere around the sixteenth hole.
* Triptych Continuum to come up with a spontaneous working: the odds are somewhat improved for those acting from the heart of their mark. But it's only a chance, and most of the other options work out to 'fully uncontrolled magic surging into the world.' It's the closest thing unicorns have to a chaos effect, and those who don't touch their dream just might die all the faster.
* Triptych Continuum Triptych itself, all the chapter titles can be linked to art.
* Triptych Continuum way for a unicorn to boost his or her magical strength. The drug's effect manifests as a boost ranging from fifteen to fifty percent of the user's original strength, but that strength is obtained by cannibalizing the rest of the body, which means that the stronger drugs have a good chance to kill the user when they run out. In addition, boosters are highly illegal, and all known variants produce visible side effects.
* Triptych Continuum, with the Celestia Meter (Adjusted) for raw power and the Luna Meter (Adjusted) for manipulative ability. Basically, strength and dexterity for horns. Both range from 0 (nonexistent) to 10 (alicorn).
* Triptych Continuum, Worthy's Chocolate was the oldest chocolate shop in Equestria. Its founder and the first few generations of the family gave Worthy's Chocolate a reputation for perfect chocolate. Over the centuries, they expanded their operations and became renowned across all of Equestria. But in the last couple of centuries, the Worthy family prioritized making bits over making chocolate (with Cutie Marks to reflect that). It all came crashing down when new customers actually tasted their chocolate and realized it was terrible — a consequence of embracing automation, cheaper ingredients, and unskilled labor. The Worthy brand name had lost its appeal and became a joke. By the time the fic takes place, the first and now last Worthy's Chocolate shop is closing down for the night for the last time.
* Triptych, set in Atlanta, Georgia, the detectives are hunting a killer who bites out his victims' tongues.
* Triquetra Cats, anthropomorphic Proud Warrior Race which demands all members at a certain age enlist in the military.
* Triquetra Cats, nanites are a miracle cure for most any medical condition however

each use increases your chances of contracting a disease called NCDS (nanite cellular disintegration syndrome) where the nanite user's cells can no longer support themselves and break down.
* Triquetra Cats. One of the squad leaders in the Antreyki military IS the General's daughter, despite being competent as a military leader, she also tends to be a flaky party girl and she was placed there as an attempt to straighten her out.
* Triquetra Cats takes this trope to the extreme with Splio Beasts — animals which are ultimately the genetic crossbreed of every known member of the animal kingdom all mixed into one.
* Triquetra Cats. The lizard people and bird people may have reptilian and avian traits and features, but they are still mammals.
* Triquetra Cats (the main characters fall under the costume only definition)
* Trisana Chandler, from the same series, doesn't quite faint, but once she starts learning to scry and see visions, they give her severe headaches. She also has a tendency to fall down when she comes out of her trances because she loses track of time and stands still in one spot for hours and hours, resulting in wobbly legs and cramps.
* Tris' friendship with other Dauntless members not named Christina, Will, and Al are sacrificed so the films could focus more on her budding romance with Four. It is also why when Uriah meets Tris in the Candor headquarters in
* Trisha considers Hohenheim to be nameless considering the circumstance he got his name.
* Trisha does this in Episode 59 by pretending that she's actually talking with her mother as soon as Brittnay asks her if she's speaking to Mackenzie on the phone.
* Trisha Elric's grave also appears periodically, most notably in the chapter 'The Father Before the Grave,' when Edward goes to the cemetery to visit his mother's tombstone and meets
* Trisha gives her blessing when Hohenheim decides to go on a journey
* Trisha Hershberger in which she vlogs naked about a variety of topics. The show has attracted some interest from the nudist community who praise it for demonstrating that simply being naked is not inherently sexual.
* Trish and Lita were involved in some teasing with Christian & Chris Jericho that was ultimately revealed to be an example of
* Trish and Lucia, Dante's allies in the first and second games respectively also qualify and even have very similar origins. Both were created in the image of humans by the villains of their respective games to be obedient minions. While Trish pulled a
* Trisha Paytas came out as genderfluid in 2021. This followed a controversial video from two years earlier in which they claimed to be a trans man; Paytas now claims they didn't know the right terminology to describe their identity back then.
* Trisha Paytas: Known for her dramatic vlogs and her 'Mukbang' videos. (In)famous for creating scandals and being a self-confessed troll.
* Trisha Yearwood), all of which only got to #2. "Georgia Rain" also proved more popular in the long run than its mere #15 peak would indicate.
* Trisha Yearwood's song "She's in Love with the Boy", young couple Katie and Tommy go to the drive-in, where "They're too busy holding on to one another to even care about the show."
* Trisha Yearwood (this was before they were married), but only on the Canadian charts.
* Trisha Yearwood - "When a Love Song Sings the Blues," "When We Were Still in Love"
* Trish has more success using her own celebrity status to sweet talk the right people into revealing the security firm that Kilgrave has hired to protect him in case Jessica uses the sufentanil to knock out his powers. As she explains to Simpson:
* Trish Hidge of the mayor's office once held a press conference in front of a brightly painted truck for the purpose of denying said truck existed. Most questions involved pointing at the truck. She later admitted that the conference

was held for the purpose of practicing her denial skills. Then denied having any denial skills.
* Trish lampshaded this once when Vince McMahon complimented on her match. She pantomimed dialing a phone and said, "Hello, 911? I'd like to report a robbery. It looks like the women have stolen the show."
* Trish Stratus as a manager with an athletic build, but little actual fighting ability of her own, was shown as a submissive type for most of her early tenure, and then stepped up her in-ring work in a BIG way. She's now remembered as fondly for her impressive matches as for her impressive looks, and is in WWE's Hall Of Fame.
* Trish Stratus) but along the way earned numerous amounts of respect for her desire to improve. So in Trish's case, the fans came for her beauty and stayed for the wrestling.
* Trish Stratus: Has came out of retirement a few times, most recently in 2018. Joined the WWE Hall of Fame in 2013.
* Trish Stratus in particular credits him with helping make her career. Behind the scenes, the women say that Fit would always fight to get them more time for matches.
* Trish Stratus is naturally brunette but bleached her hair blonde when she became a model and that was what she was known for during her WWE career. Two years after she retired she went back to her natural brown colour. She became blonde again in 2016.
* Trish Stratus Lita. While not acknowledging how much time had passed since her turn, Trish pretty much nailed the irony of the situation.
* Trish Stratus meant that she was always put back into the face role. Whenever she makes a return to WWE, she's always a face.
* Trish Stratus naturally blamed Stratus for the degradation of their division even though she was just as serious about trying to move past titillation for its own sake as they were.
* Trish Stratus. She's also said that she can be sexy with her clothes on.
* Trish Stratus. They may have some onscreen rivalry in the past but both have an extremely close friendship over the years to this day. Lita is even the godmother of Trish's son.
* Trish Stratus where he mentioned their history together and led to Stratus having a return match against him that night.
* Trish Stratus, where he recycled the "filthy, dirty, disgusting..." line (though leaving out "nasty, skanky") on her, sending her running from the ring.
* Trish Stratus wrestling experience and gradually takes over the entire division, much like Trish had a few years before?
* Trish Tales takes place in a world where living action figures have been created, and are sold as pets.
* Trish Talk about her killing Kilgrave, Jessica throws an unclaimed pizza still on its metal plate, embedding it on the wall and states, "a heroine would denounce you for planned murder, a vigilante would beat the shit out of you for it! Choose which one you want me to be?" She then proceeds to steal a pizza yet to be delivered, and later enjoys it with Trish.
* Trish the demoness from the first game spends most of the game as this since she works for the
* Triskaidekaphobes note another contributing factor to why he never won a Super Bowl title:
* Tris may be an incredibly powerful "weather witch", but in order to summon rain, she has to
* Tris' mother, Natalie, is revealed to be a Dauntless before her Aptitude Test. In the climax of the first book, she saves Tris from being condemned to death by drowning and fights alongside her in the race towards the Abnegation safe zone, culminating in her
* Trisolaris is expected to be destroyed for good within a thousand years, hence their need to colonize a world outside its solar system. The fleet they're sending to invade Earth

* Tris quickly learns that people are more willing to share information after they've been shot.
* Triss, it's the good guys vs. Princess Kurda and her vermin vs. three giant adders.
* Triss picks up two crewbeasts who've done something stupid and actually bangs their heads together.
* Tristana acts a downplayed Vaporizer, thanks to her giant cannon and emphasis on basic attacking.
* Tristan acts black when Kaiba lampshades a scene in which Tristan is
* Tristan and Iseult (also known as Tristan and Isolde). The legend of Tristan and Iseult is an influential romance and tragedy, retold in numerous sources with as many variations. The tragic story is of the adulterous love between the lovers. The narrative predates and most likely influenced the Arthurian romance of Lancelot and Guinevere, and has had a substantial impact on Western art and literature since it first appeared in the 12th century. While the details of the story differ from one author to another, the overall plot structure remains much the same.
* Tristan and Iseult, and nobody in the court can figure out an antidote.
* Tristan and Iseult, in order to discover if Isolde was having an affair with Tristan, she was forced into a ritual where she would swear and grab a hot iron, which would burn her if lying. She swore that the only men who had ever been between her legs were her husband and the peasant who carried her across the river, who tripped and accidentally landed with his head between her legs. She was telling the truth and thus the iron didn't burn her. She just didn't mention that the peasant was Tristan in disguise.
* Tristan and Iseult work out. Tristan, King Mark's young nephew, drinks it with Iseult by mistake. They fall madly in love and sleep together, and they continue to commit adultery after Iseult and Mark's wedding.
* Tristan and Isolde contains two characters named Isolde, both of whom pursue a romance with Tristan. The two are typically called "Isolde of Ireland" and "Isolde of Brittany" to minimize confusion.
* Tristan and Isolde has the titular British knight, Tristan, who is in love with the fair Isolde.
* Tristan and Isolde is credited by many as being possibly the origin of the concept of romantic love in the Western world.
* Tristan and Isolde story portray the love triangle this way: Isolde (A) is married to Mark (C) but in love with Tristan (B), who is in love with her, but is also loyal to Mark, who is his uncle.
* Tristan assumes they're in outer space. Then Bakura summons Dark Necrofear, a gaunt, sallow and thin figure...
* Tristana, the Yordle Gunner, including towers, before exploding. If she continuously fires her cannon at a marked target, it becomes "primed" and deals even more damage once it explodes.
* Tristan distracts Yami Bakura by throwing him the unconscious body of Mokuba, long enough to let him hit him for a K.O. It was one of the rare action scenes that didn't involve children's card games in
* Tristan Jones, the first man to sail a boat from the Dead Sea to Lake Titicaca, the highest and lowest bodies of water on Earth. He also spent months trapped in an iceberg in the Arctic Circle, and continued sailing even after losing his leg. That is,
* Tristan MacAvery had a massive fallout with Matt Greenfield, resulting in him no longer getting work at ADV Films. He hasn't worked in anime since, and his role of Gendo Ikari in
* Tristan MacAvery is best remembered as Gendo in the original dub. He had some other decent parts at ADV around the same time, but nothing nearly that big, and he hasn't been heard from in over 20 years. He apparently retired from voice acting after a fallout with ADV co-founder Matt Greenfield.
* Tristan Mack Wilds auditioned for the role of Randy Wagstaff before being cast as Michael Lee.
* Tristan und Isolde, the second act love duet has its would-be climax in B major

crushed by a deceptive cadence accompanied by Brangane's piercing scream.
* Tristan watches Isolde sleep after she's been injured in a sword-fight.
* Tristar repeated the feat). The death toll is not shown but is likely enormous.
* TriStar's winged horse. When the studios merged, they just used both logos rather than change them.
* Tri-Stat. All of these games included a lot of additional information of their respective shows, including an up-to-date episode guide up until the time the books were released.
* Tristifer Botley does this toward Asha Greyjoy based on some experimentation when they were barely more than children. His projected ideal woman has little to do with the flesh-and-blood claimant of the Seastone Chair.
* Tristram, Argavaine and Gareth are female in the space and contemporary arcs. Isolde is female in all arcs, and this makes no difference to Tristram's story. (However, Gareth's paramour becomes male in the space arc.)
* Tristram Shandy: A Cock and Bull Story. Gillian wants to get away from her most famous role, and is later annoyed when her scenes as the widow are cut from the movie. Many, many more layers of meta in this film.
* Tristram Shandy consists of digressions within digressions within digressions, and so on. Notably, the titular narrator starts the tale with the story of his conception, but he gradually gets so sidetracked chronicling the circumstances surrounding it that he first gets around to the story of his birth well into Volume 3.
* Tristram Shandy has a chapter-long aside about a war between France and Switzerland that starts when the countries disagree about what to name the French heir.
* Tristram Shandy (like following the death of a character with a completely black page.)
* Tristram Shandy — which is also the longest sustained attempt at subverting the trope.
* Tristram's is the draining and replacement (thereby, healing) of Life Energy.
* Tris tries to comfort Al privately about his fear of being cut. He bluntly tells her "I just hate anyone who's better than me."
* Triton Bloom aka Trowa Barton raised by mercenaries after his parents' deaths and his sister's disappearance.
* Triton Bloom, who works in a circus as a clown, but is as far from goofy as one can get.
* , Triton claims children of Poseidon all inherit his black hair, green ocean eyes and pout. Su and Lee agree with this after seeing him with his demigod sister Rhode.
* Tritone. Because it's dissonant, it must be the devil! To clarify: The tritone is not just dissonant. It is the most dissonant interval in existence. It is also the interval between the base tone and the semi-tone between the ultra-consonant perfect fourth and perfect fifth in a scale. The interval is also exactly three whole tones (three being a holy number in Christianity, representing the Trinity, the cardinal virtues, etc.) Both these aspects of course make it extra satanic.
* Triton gets disgusted over SpongeBob's breath as the latter talks to the former.
* Tritter, with his main victims being House, Wilson or Chase. Helped by David Morse being unbelievably creepy in the role.
* Triumphant Reprise: A happier version of a previous song that was depressing in tone.
* Triumphant Return!, Matt says, "Me being the smart guy I am, I decided to do a little digging." He then picks his nose, and says, "No, not that kind of digging."
* triumphing against the heroes as Miracle Queen, leaving her as a social pariah who's one infraction away from getting booted out of Francoise Dupont for her bullying.
* Triumph of the Will-inspired imagery goes (one hopes) right over the kiddies' heads.
* Triumph of the Will Nazi propaganda, and deliberately appeals to the audience's passions with dramatic, soaring music.

* Triumph of the Will. While most mature viewers would recognize the Nazi iconography it's doubtful they know the original source.
* Triumph of the Will you to think of this movie when you thought of them - and scenes from this movie are among the most commonly used shorthands for the Nazis.
* Trivago has some played-to-the-point-of-overkill ads. In Brazil, not only they brought back the "Mr. Trivago" to
* Trivially Obvious. Chances are pretty good that unless it's a limited series or the production has been a complete disaster, the crew probably started work on the second season well before the first started airing. If the show looked promising enough to air, the producers weren't going to have the cast and crew sit on their haunches for months on end until the first reviews and ratings finally started coming in.
* Trivial Pursuit: A combination of luck and knowledge. Entire books have detailed not only strategies for choosing categories and both asking and answering questions, but also the game's inaccuracies and ambiguities.
* Trivial Pursuit: America Plays (2008-09; produced by Wheeler-Sussman Productions and Hasbro for syndication, with interactive components based around webcams and video recordings)
* Trivial Pursuit - found the name of the Egyptian god Ptah funny, mostly because it was so out there.
* Trivial Pursuit, on account of having to reach the center space by exact die roll in order to receive the final question. If the die doesn't cooperate, or the final question is missed, this can go on for hours. Add to the fact that many editions of the game contain pretty antiquated trivia to people shy of their fifties.
* Trivia Murder Party 2. If not, however, the host will drop everyone on the heavier side to their doom.
* Trivia Murder Party. Each finger represents an answer choice, meaning as long as you're alive you cannot choose that answer. So if the finger you cut off corresponds to a right answer on a later question, well, sucks to be you.
* Trivia pages are inherently concerned with trivia, they don't require a subpage for it.)
* Trivia: The only soldier to escape possession is Tucker, due to the fact that the RT crew decided an evil Tucker would be too obscene to broadcast.
* Trivia: While almost all fake fast food signage shows the pickles hanging out of the sides of burgers, anyone who was paying any attention when they were trained for grill knows the pickle goes hidden in the center so it can be reached by a bite from any direction around the burger.
* Trivium's sole Top 10 on mainstream rock was "Until the World Goes Cold" in 2015, well after their peak in popularity. As such, it's not nearly as well-known as songs like "Pull Harder On The Strings Of Your Martyr", "Down from the Sky", or "Anthem (We Are The Fire)". In fact, even of their 2010s material, it's not their most well-known. That honor likely goes to "Strife" (which peaked at a comparatively low #24).
* tri-wielding!), that he uses on whatever he feels like. He's skilled enough to deflect bullets with it, playing into his iconic line, "A sword without subtlety is but an iron bar."
* Tri-Wight, which shows three Skull Servants crawling out of the grave to fight again. It is supposed to show that death is not a permanent thing for them.
* Trixie as well, at the end of "Magic Duel". Although she gives a heartfelt and very sincere apology, she is still as hammy and conceited as ever. Just more apologetic, that's all.
* Trixie Belden had several comic book stories. One involved a female suspect hiding out as a guy. The crook forgot that female shirts tend to button on the opposite side. Because a woman just can't prefer to wear mens' shirts, even back in the 1940s when the print series began.
* Trixie Belden. Never mind that Dot was canonically portrayed as likable and talented, Trixie herself admitted Dot was amiable and her jealousy of Dot was her own personal fault, and Jim and Dot expressed a mutual romantic interest in each other. Here, none of the Bob-Whites like Dot at all, Dot is jealous of Trixie and

rude to her, fixated on scoring Jim as a boyfriend, and continuously portrayed as "easy" and "loose" (ie, wearing a bikini to swim while the other girls wear one-pieces) in an attempt to villanize her.
* Trixie Belden series, there's almost always a new villain in every book.
* Trixie Belden series. Trixie Belden lives on Crabapple Farm just outside Sleepyside, New York. With her best friend Honey Wheeler, they hope to one day start the Belden-Wheeler Detective Agency - but in the meantime, they get lots of practice solving all the exciting mysteries that take place around Sleepyside.
* Trixie Belden takes place in New York, and mentions many of its famous landmarks.
* Trixie Belden, the title character and her bestfriend, Honey, plan on opening the Belden-Wheeler Detective Agency when they're older.
* Trixie Belden; Trixie begins flirting outrageously with the latter out of jealousy at how Jim is getting so cozy with the former.
* Trixie carries a small pistol strapped to her leg as a surprise weapon. Only in her
* Trixie dons a dark cloak in lieu of her purple magician's costume when she obtains the Alicorn Amulet, which turns her crazy and evil. Once the protagonists remove it from her, she eventually returns to her usual costume and personality.
* Trixie elicited this response from a lot of fans. Sure, she was a lying egotist who humiliated people on stage, but getting her home and livelihood smashed in addition to getting outed, humiliated and shown up by Twilight Sparkle was a bit too much.
* Trixie falls into this role as the series goes on. She's decent at magic and intelligent but does neither of these things nearly as well as Twilight Sparkle, she's artistic and creative but but not as much as Rarity, she's loyal but not as much as Rainbow Dash, she's an entertainer but not as good at it as Pinkie Pie is, she's honest and keeps promises but not as well as and is far more unpleasantly blunt than Applejack, and she has compassion but not nearly as much as Fluttershy. She's also not
* Trixie gets furious when Twilight tells her she won't be taking over the defense.
* Trixie initially thinks being assigned to Ponyville is a case of this, not helped by finding letters from the previous occupant telling her as such (and the occupant before him, and the occupant before them, and so on), causing her to try and spite Princess Luna by making the next twenty-four hours miserable for everyone around her. Then Luna tells her this
* Trixie is commonly depicted in fanfics to be an illusion specialist - although canonically she is far more versatile.
* Trixie is paired with a rock for a class project when she and Timmy are the only living beings in the room without partners.
* Trixie is shown again talking in her sleep in "Road to Friendship". According to Starlight Glimmer, she's rehearsing her whole show all night long.
* Trixie Lorraine (who's in her early 30s) and Faneul H. Peabody (who's in his 50s but
* .) Trixie offers to sleep on the floor, but Twilight refuses, and insists that the bed is big enough for both of them. (It's not.)
* Trixie. One of the blind bag glitter ponies bearing Trixie's color scheme and cutie mark was named "Lulamoon", presumably because the name Trixie couldn't be trademarked. Fans took it as either a last name or a stage name. The fifth wave of blind bags went with the former.
* Trixie Rabinowitz via her newest "nerd-wrassling" technique: the "Justice Wedgie Choke-Slam".
* Trixie's a stage magician by trade, yet when her power was tested by an Ursa Minor it proved rather inadequate. Later her power output was boosted by an artifact to around Celestia or Luna's level, she was capable of using, with ease no less, spells which Twilight considered far outside her range. And she's just a performer.
* Trixie slowly becomes an associate of the Mane Six, after Twilight's forced to take her in, due to her experiencing a rather...

* Trixie Tang briefly became this to Timmy after he wished they were the only two people on earth in "Just the Two of Us!"
* Trixie to get it back. In the end, Trixie reads the letter for real and to Timmy's surprise, she loves it, only to reject him because she assumes the letter thinks she's even prettier than his mom.
* Trixie treats her knowledge of the Fourth Wall like dark magic, using it to supplement her magical abilities. She doesn't seem to have quite the same level of access as Pinkie, however.
* Trixie Vs... before they're interrupted by Trixie laughing at Fluttershy's misfortune, prompting this reaction.
* Trixie when they're in the middle of using them, stopping the process.
* Trixie which Twilight can't do and she is forcefully removed from Ponyville. She returns for a rematch and uses a false amulet and smoke and mirrors to fake three even more powerful spells in order to get Trixie to steal the powerless amulet and removing her real one.
* Trix Rabbit: In one commercial made to promote new Trix friendship bracelets, the kids tell the rabbit that even though he can't have Trix, they can still be friends, giving him one of the bracelets.
* Trix Rabbit the most infamous example. There's a reason he's the page image.
* Trix Rabbit to put a hurting on some smart-assed kids and take their cereal. General Mills has actually played this to their advantage by holding voting contests asking kids if the Trix rabbit should get to have some cereal; the results in three of the contests in 1976, 1980, and 1991, was an overwhelming victory for the "Yes" side.
* Trix Rabbit. Who doesn't want him to get that cereal, kids watching the commercials included?
* Trix Rabbit with the fact that he will never ever get to eat the cereal.
* trod over the line. Everything about himself was fodder for his stand-up—including his heart attack and non-Hodgkins lymphoma. Sadly, he died in 2010 of injuries sustained in a car accident.
* Trogdor!! The Board Game and the world in which said dragon is the focus of.
* Trogdor!! The Board Game casts the players as the Keepers of Trogdor, who help the ferocious dragon Trogdor the Burninator and guide his actions as he rampages across the kingdom of Peasantry, burninating the countryside, the peasants, and the thatched-roof cottages.
* Trogdor!! The Board Game, players team up to help Trogdor the Burninator devastate the land of Peasantry in this cooperative game.
* Trogdor!! The Board Game uses this as a game mechanic. If Trogdor gets hit by a knight or archer when his Trog-meter is empty, it triggers "Trogdor's Fiery Rage", where he goes on a rampage before fleeing the battlefield, moving randomly and automatically burninating any tile, peasant, or cottage he touches. Players can actually win the game if they manage to burninate the board before Trogdor's Fiery Rage ends.
* Trog is in some ways an inversion: the director was a personal friend of hers and she did the movie more as a favor to him than in need of a paycheck. She was paid very well for the movie too, and a good portion of the budget was spent to ensure she had her own wardrobe van.
* troglydytes are inbred to such an extent that they qualify as a separate species, if they were ever human in the first place.
* Troian Bellisario episode the Immortals and the unnamed redhead that picks Gibbs up in the silver convertible is Sean Murray's real-life mother Vivienne Bellisario. Nepotism much?
* Troi and Riker were like this early on, talking to each other telepathically a lot. This was dropped or forgotten, later, though it was picked up again in the novels, especially
* Troi beats Data at chess. She then explains to him that chess isn't just a game of logic, but also intuition. As the Nitpicker's Guide puts it, "Try playing 'intuitive' chess against a computer and you'll lose in no time flat" (and then suggests that perhaps she had his

* Troi has a habit of randomly changing her expression, possibly related to
* Troika Games was working on an untitled computer RPG in a post-apocalyptic setting before the studio closed in 2005.
* Troika had created the artwork, and the reader was essentially looking at Batman's own concepts, facilitated by little notes in the margins supposedly by the man himself. Unfortunately, this results in most of the notes making very little sense, because the concepts are too finished to look like something Batman sketched up in a brainstorming session: for instance, he remarks on one fully-colored and inked illustration dripping with detail to "drop the shoulder spikes." It also makes very little sense that instead of refining the designs one at a time, all the designs seem to have been made from scratch. And on top of all that, why would Batman spend what looks like hours drawing, inking, and coloring dozens of costume designs that are almost completely cosmetic? Shouldn't he be, you know, stopping crimes?
* Troilus and Cressida features the original Cassandra. In an early scene, she runs onstage and attempts to warn her father and brothers that Troy will be up in flames by the end of the Trojan War. None of them believe her.
* Troilus and Cressida, Pandarus, trying to find out who Troilus is in love with, promises to help him win her even if she were his sister.
* Trois Couleurs, Bleu to return her necklace taken from the car crash at the start of the movie. In return he asks her to explain her husband's dying words to him "Essayez de tousser, maintenant" (try to cough now). She explains that it was the punchline to a joke he'd been telling about a woman who goes to see a doctor about a chronic cough and is given a powerful laxative.
* Troi wears a low-cut lavender catsuit for much of the series. She was ordered to wear a standard Starfleet uniform by Jellico in "Chain of Command".
* Trojan Ambulance: Usually involves characters being disguised as paramedics.
* Trojan (condom) in the US. Also the brand name of detergent in Malaysia, but has since fallen out of use- now it's "Dynamo". In Malaysia at least, the brand "Durex" took over the word for condoms instead.
* Trojan Cycle is of princely blood. Even Eumaios, Odysseus' swineherd, is a prince who was captured and sold into slavery.
* Trojan Gauntlet: A character gets all embarrassed about having to buy condoms.
* Trojan Gauntlet (condoms are no longer behind the counter, self-service checkouts) have rendered this trope a thing of the past.
* Trojan Gold. (The mystery has since been solved, but that was after the novel's publication).
* Trojan Horse is history's most famous example. Forget trying to break down the mighty Trojan Door or Walls, we'll convince them to open the Door and let us in!
* Trojan Horse much like how he devised the plan for the original Trojan Horse. The third are earthquakes, which reference how Poseidon was the God of both Horses and Earthquakes; a symbolic horse rather than a physical construct.
* Trojan Horse mutagen into the Playground, transforming numerous agents into brainwashed Primitives, who proceed to wreck havoc.
* Trojan Horse, proved more successful at promoting fitness and body building(though they never had aspirations of leading the international field).
* Trojan Horse, while distracting the French with a friendly game of American football... which wasn't invented until over 80 years later.
* Trojan Horse with even the most cursory knowledge of military history will know better than to fall for it. It even spawned the phrase "beware Greeks bearing gifts".
* Trojan Points that would keep it near the Lagrange point), but any object there would be easy to see: an object in the L4 point would be a perpetual morning star, rising four hours before the Sun every day and preceding the Sun on its annual circuit of the ecliptic, and an object in L5 would be a perpetual evening star setting four hours after the Sun every night, and trailing the Sun around the ecliptic.
* Trojan Prisoner: The heroes infiltrate an enemy base by pretending to have been captured.

* Trojans have a massive crystal in their back. They also have a shield, which unlike the player's shield can't be broken. Said shield is always up. Also, they hit like trucks.
* Trojan War. Brad wants to have sex with the school's alpha girl and needs to buy a condom. Good luck...
* Troll 2, a kid catches some goblins in the act of eating their victims, prompting this memetic exchange:
* Troll 2 are defeated when Joshua eats a double-decker bologna sandwich in front of them during the film's climax. They can't come within 20 feet of you after you eat 2 bites of bologna.
* Troll 2, but they were clearly written as a counterpoint to a genuine attempt at horror.
* Troll 2. Creedence attempts to seduce one of the boys by presumably putting a spell on his TV, which shows her walking up to his door in a seductive manner, with an over-the-top bass-heavy "sexy" song playing over her movements. The boy then opens the door to find that the music is louder, acting as a legitimate soundtrack to their dialogue. Once they enter the camper and proceed to make out, the music is quieter again, but this time muffled as if it's coming from outside the door.
* Troll 2: Creedence in her younger human form seduces Brent in this manner.
* Troll 2: Creedence is the queen of the goblins and the primary villain.
* Troll 2. Earlier in the film, Creedence uses a paralysis spell on him, which only leaves him able to move his mouth.
* Troll 2 ends with the family seemingly defeating the goblins until it turns out the goblins somehow survived, end up turning the mom into plant food and eat her right in front of the screaming son as the movie ends. Yes, this is the same film whose twist was that nilbog backward spells goblin.
* Troll 2 fit the bill pretty well. All of them want a tasty snack of the humans in the movie.
* Troll 2, Grandpa Seth has this ability, and stops time to allow his grandson to urinate on his family's food.
* Troll 2: "If my father knew you were here, he'd cut off your little nuts and eat them. He can't stand you."
* Troll 2 in turn is better known for the controversy it caused for having killers dressed as Santa Claus.
* Troll 2 "It's made with sap. From the forest. It is a concentration of all the vegetal [sic] properties."
* Troll 2: Joshua and his family have just escaped Nilbog and gotten safely back home. All seems fine until he realizes that the exchange family laced their food, and sees the goblins devouring what's left of his mother.
* Troll 2: The goblins try to treat the Waits family to Nilbog food so that they can turn them into "half-man, half-plant" goblin food.
* Troll 2: The Goblins would count, given their enchanted food with nasty side effects, their posing as humans through glamour to lure humans to their doom, and their love for all things plant and hatred of man.
* Troll 2 was probably trying for this, but it ended up not really making any sense.
* Troll 2 were local residents who responded to an open casting call hoping to be extras. George Harvey, who played the main character's father Michael, was a dentist with no prior acting experience who showed up for fun, and Don Packard, who played the store owner, was a mental hospital patient on a day trip.
* Troll 2, where the dad fumbles with his belt while yelling at his son for ruining their food... and tightens it to deal with the hunger pains.
* Troll anatomy (usually questions about this are answered with jokes, or pointing out that the asker is asking about the genitalia of 13 year olds).
* Troll And I's death, but the actual article of interest is the one about Scandinavian troll sightings.
* troll been added to traditional film photos in the development process.
* Troll between the two sorts of relationships, which makes it even more complicated.

* Troll Bridge: The heroes must outwit someone guarding a bridge in order to cross.
* Troll can't decide whether it wants to be a horror comedy or straight up horror.
* Troll civilizations once spanned the entire world of Azeroth, and magnificent ruins of Troll architecture can be found in every corner of all three continents. The trolls are still around, but only the Drakkari and Zandalari maintained significant holdings until recent events demolished them.
* Troll Cops, getting her in trouble very quickly. In the first midseason finale, Rose finally drills home for her the fact that there is no black and white, and what really exists is one of these.
* Troll Cops pastiche led by Rose Lalonde and including most of the city's active vigilante superheroes.
* Troll Cops, there are several characters who essentially have the same origin but diverge over time.
* Troll Cops, who clings to the long-defunct Hemospectrum and looks down on non-trolls and trolls of lower blood castes. However, his belief in his own superiority drives him to live up to his high expectations, resulting in a personal reputation of incorruptibility in the largely corrupt APD. And his long-term partnership with Aradia Megido, a troll officer of the lowest blood caste, is forcing him to re-evaluate his deeply entrenched biases, and he is (gradually) improving.
* Troll dolls inspired multiple separate adaptations under different licenses. First was the
* Trolled! die as a result of collecting a 10-bagger, 30-bagger, or 50-bagger.
* Trollface or simply to spam Internet communities for trolling purposes.
* Troll Fic, and she outright admits that the only reason she's dating Link is because he's a guy and she's (allegedly) straight. Lauren's chapter in the first fic confirms that she and Sara were dating in "real life", and the ending of the original trilogy sees Sara finally admit it herself.
* Troll Fic and then humiliating him by taking a picture of it and sending it around to the entire school, ensuring his reputation would be ruined and he's never get another date. It also does this to Lincoln, as it's implied he apparently tricked Leni into giving him handjobs, claiming it was "exercise".
* Troll Fic, since this was published around Connie's debut and beforehand pairings like Steven/Amethyst and Steven/Pearl were popular.
* Troll Fic. The commentary reveals interesting bits and trivia about the fanfic.
* Troll Fic. To this day, nobody has claimed responsibility for the fanfics, all of which were published in 2010, and nobody has been able to find out the true identity of this infamous troll fic writer, though it's believed BoxofScraps was run by the same person as the now-defunct @Real_Hulk Twitter account.
* Troll food is entirely inedible to organic life, being rocks, but according to
* troll he isn't gay based on "prison rules", but his behaviour tends to make his victims skeptical at best.
* Trollhunter incorporates a few details from old troll myths, such as their ability to 'smell a Christian man's blood'. The troll expert in the film admits he doesn't really know how that interacts with Islam.
* Trollhunters: All the Trollhunters before Jim were themselves trolls.
* Trollhunters, and her true form is even more powerful and almost unstoppable.
* Trollhunters becomes inert rock. Those aren't statues of Trollhunters past surrounding the Hero's Forge, those are their reassembled corpses.
* Trollhunters behind everything evil in this series, is also known as the Pale Lady, Argante, the Eldritch Queen, and Baba Yaga.
* Trollhunters", Blinky uses the Kairosect a second time to demonstrate what he did by repositioning everyone and everything in the room. When Jim uses it later in the episode, he uses the limited time he had to save Clair from an incoming truck, manage to fix his Spanish test, get Blinky back to Troll-Market away from the human public, takes care of Bagdwella's gnome problem, steals the inferno copula from Strickler (as well as loogie in his open mouth during his dental appointment) and manages to get the Killing Stone before escaping an enraged Anger Rot.
* Trollhunters, but refuses to kill him, Draal becomes disgraced and unable to show his face in Trollmarket (up until the second half of the season). He decides to

live with Jim as his bodyguard instead, and the two form a friendship.
* Trollhunters by chance, Jim came to dislike his new duties due to the strain it was putting on his civilian life and relationships with his loved ones, but came to accept his role as the Trollhunter and the challenges even when it costed him his chances of a normal life.
* Trollhunters by seeing everyone and everything as nothing but tools for personal gain.
* Trollhunters confirms that they do not share a universe and that they are simply "office neighbors" from whom they "steal props."
* Trollhunters credit, she quickly realizes what Jim thought she meant and becomes very apologetic.
* Trollhunters episode "Bittersweet Sixteen", when Jim electrocutes the Stalkling trying to carry him away, they both begin falling and Aaarrrgghh!!! is able to make it just in time to save him from hitting the rock-hard pavement by catching him in his arms.
* Trollhunters episode "The Glory of Merlin", the adults all pretend to put on a play - essentially playing a goofy dramatization of a Trollhunters adventure (with Dictatious and Strickler in his true form framed as elaborate costumes) - in hopes of keeping Detective Scott from suspecting the truth.
* Trollhunters even reveals that the pilgriming trolls eventually met Lewis and Clarke.
* Trollhunters, eventually running off when the reality of the situation finally sinks in. His mother tells his friends and they all look for him, eventually finding him hiding away at his High School. They chase him onto the roof before confronting him, all of them assuring him that despite how much he has changed, they will all be there for him.
* Trollhunters: Heartstone Trollmarket is an Underground City beneath Arcadia that acts as a sanctuary and headquarters of good Trolls and the Trollhunters, the various buildings interlaced with giant, phosphorescent crystals.
* Trollhunters. He is universally turned down; the one rejection we see on screen is, "I'd rather choke to death."
* Trollhunters is an artifact that allows its user to step outside of time, and while it actually only works three times, Blinky wastes the first two uses demonstrating it.
* Trollhunters is a ring that houses the sorcerer/bounty-hunter Angor Rot's soul. Should another wear the ring, Angor's will is forced under the control of the one who wields it.
* Trollhunters is finally killed, his body unleashes an energy wave that wipes out all his Gumm-Gumm soldiers.
* Trollhunters is him learning how to kill, after openly defying the Trollhunter's second rule ("Always finish the fight.") by refusing to kill his first two opponents.
* Trollhunters is referred to by Strickler as "Young Atlas," referring to his need to "carry the weight of the world on [his] shoulders."
* Trollhunters is the leader of Trollmarket and carries a staff wherever he goes. When Blinky gets the offer of being Vendel's successor, special emphasis is put on him taking Vendel's staff.
* Trollhunters", Jim and Strickler act cordial and enjoy their dinner. When Barbra leaves the room to tend to her apple pie, they both try to kill each other for the Amulet of Daylight. Jim conjures his armor, Strickler returns to his true form and throws his knives, but when Barbra returns, they are both out of "combat mode" and are sitting at the dinner table. The second time she walks in, they pretend that they are looking for Strickler's contact-lens.
* Trollhunters Jim volunteers to babysit Claire's little brother Enrique, whom he suspects of being replaced with a Changeling. Naturally, he's right—Not-Enrique first manages to hide Jim's iron horseshoe and lock him out of the house, and when finally forced into his true form, wreaks havoc before the rest of the family returns.
* Trollhunters Jim wishes he could have had his best friend Toby 'sent to safety'

the same way.
* Trollhunters killed that king, he replaced him as their leader and turned them into an organized army set to conquer the world.
* Trollhunters: Many of the golems Angor Rot makes manifest from random objects around them, ranging from mud to broken glass to crystals.
* Trollhunters: Nomura whistles "Hall of the Mountain King" to unnerve Jim. It turns out she saw the opera and really enjoys the tune.
* Trollhunters, normally written in Troll-language, the incantation etched in the Amulet translates itself into English for Jim. Later on, the light emitted translates Troll-language into English and vice versa whenever Jim needs it.
* Trollhunters promises him that they will be back someday, to which he tearfully responds, "You better!"
* Trollhunters reveals that there are other similar trolls in America, Craggen and his brothers being mistaken for a series of mountains.
* Trollhunters reveals to them that she's been selling their tribe out to Gunmar for centuries.
* Trollhunters routine to get RotGuts to tell them about a suspected changeling, Blinky misreads the signals and thinks that he is playing bad cop and proceeds to threaten them with a live dwärkstone.
* Trollhunters. Since the only visual instance of one of her relatives - her brother or father - is a photograph of him in an army-green mess dress tuxedo with medals pinned to it, it is likely that she served some form of military service just like he did, or at least worked as a military M.D. at one point in her life.
* Trollhunters's passing) by having him inhale a magical powder and coughing from it.
* Trollhunters" starts with Jim and Toby having their mugshots taken. Toby starts, finding the photographing segment amusing and does various poses for the camera. Even when it is Jim's turn, he takes the time to photobomb it before Barbara comes to pick them up.
* Trollhunters", Strickler mocks Jim over losing the Killing Stone and the fact that he is dating his mother. In reaction, Jim forfeits the contest by letting go of the car and punching Strickler to the ground in front of everybody. It then cuts back to the real world, Jim still touching the truck and the punch not having occurred in the first place.
* Trollhunters: The Goblins will swear revenge anyone killing their own. The problem is that they have no concept of logical cause-and-effect about who is culpable in their vendettas. For instance, when one Goblin was run over by a human's truck, they don't attack the driver, but destroy the truck itself instead. In addition, one of the major characters, Claire, is targeted when a Goblin is killed and its remains had her photograph in the mess, which the Goblins don't understand is no evidence that she had anything to do with it.
* Trollhunters: The Secret History of Trollkind: Not only did the founders of Trollmarket (including Blinky, Vendel, Draal, Kanjigar and Bagdwella) sail on the Mayflower, they also encounter Lewis and Clark.
* Trollhunters, the voice of Jim Lake Jr. for the first two seasons, and the first two episodes of the final season, who died before release.
* Trollhunters, Toby having built years of tolerance to spicy food in order to stomach it. When Senor Uhl confiscates it and takes a bite out of it, he is rendered incapacitated for the rest of the day, alternating between drowning his tortured taste buds in milk and voiding his delicate digestive system in the bathroom.
* Trollhunters: Ultimately, every antagonist in the series — the Gumm-Gumms, the Janus Order, Angor Rot — are acting on behalf of Morgana.
* Trollhunters was deliberately distant with his son Draal as a means to keep him safe. Kanjigar is quick to berate Jim for instead keeping people close to him and putting them in danger, particularly his son Draal, who lost his arm protecting Jim. Over the course of the second half of the first Season, Kanjigar warms to the idea of a Trollhunter having companions to enough of a degree where he apologizes to Draal for pushing him away in the Season finale.

* Trollhunters: When AAARRRGGHH, Blinky and NotEnrique sneak into the school to find Strickler's office, they hear a security guard coming so they pose in front of a mural to hide and the guard barely gives them a second thought.
* Trollhunters, where the hero Jim Lake must contend with his nemesis Strickler dating his mother. At one point, Strickler mentions to Jim that he's going on a date with his mom and asks if he has any breath mints on him.
* Trollhunters, which takes place in the same town and timeframe as the third Trollhunters season, we see many of the Trollhunters episodes through the eyes of the 3Below characters.
* Trollhunters wields daylight as a weapon, making him or her this to most trolls.
* Trollhunters will severely punish whoever kills one of their own, but are also not very good at linking cause and effect; when one is killed by a truck, they take their vengeance out on the truck instead of the driver. Jim trips Nomura, causing her to land on a goblin and kill it, and they take their vengeance out on her instead of him.
* Troll. If he marries an Avatar of either gender, in the original Japanese he'll plead with them to stay by his side and hold his hand while he sleeps.
* Trolliness, when the fandom exploded over that picture, they posted another picture. What can you see in the background of the second picture? The post of the first picture.
* trolling 1-800 numbers on Skype. It's a given, since 1-800 numbers don't use up Skype credits.
* trolling after other people criticize their opinions for being utter nonsense, totally bigoted, or just plain idiotic.
* Trolling Creator ...and is the more surprised, since both sides are in zugzwang and the new mate on king to f8 is easily overlooked. The trick also works in solving competitions.
* Trolling Creator. Randi, throughout his career as a stage magician and mentalist, tended to explicitly call himself a liar, before he gained a reputation for vigorously debunking any "psychics" (such as Uri Geller) who refused to admit the same.
* trolling in an effort to also troll the audience. Particularly the self defined identity and sarcasm parts.
* trolling John backwards, so that they'll never be able to talk about the first conversation (from Karkat's perspective), where Karkat accidentally reveals his hatecrush for John. Needless to say, it's hilarious.
* trolling on the grounds of combating cyberbullying. Not only are these gross 1st Amendment violations, but they are also huge privacy violations and the line between being a troll and being a cyberbully is incredibly thin.
* trolling the rest of the band is noted as the last time he and Barrett played together, although Waters also later called it "an act of mad genius". Neither Barrett nor Floyd ever recorded the song.
* Trolling those who wanted a return of the Quebec Nordiques) by stating the league "would not expand any further for the foreseeable future".
* Trolling Translator: Someone messes with a speaker of a foreign language by deliberately mistranslating what they are saying.
* Trolling Translator: The translator deliberately mistranslates what the other person is saying.
* Trolling Translator: The translator intentionally mistranslates what the foreign language speaker is saying.
* Troll) it's hard to tell whether it's supposed to be a straight fantasy adventure or partly a comedy.
* Trollkin Fell Callers are born with innate vocal powers that are so strong they can deafen opponents within their immediate vicinity if they yell loud enough.
* Trollkins where most of the cast take part in a road race, the Sheriff modifies his car for the race. His idea of tuning? By having a male rabbit, in a treadmill that powers the car, run like crazy when he's shown a caged female.
* trollocs Aginor as shock troops for the forces of evil, and all generally look like 8-foot tall, over-muscled humans with the features of various vicious animals,

such as bears, lions, hawks et cetera, mixed in. Despite their varied appearance, they all seem to have the same brutish and simplistic instincts.
* Trollocs and have a number of bizarre abilities that cannot be explained by the series' main magic system. They're also absolutely devoid of emotion except for cold-blooded sadism and are all completely identical in terms of appearance and personality. Even human villains who encounter them are prone to remark on how unnatural they are.
* Trollocs in that each Myrddraal officer is only linked to a platoon or at most a company — you need to kill all the Myrddraal to take out the whole army, and they won't all be in one place.)
* Trollocs, though they share some of the trollocs' bestial habits, including cannibalism.
* Troll, once invoked this when C.C. tried to quit smoking. He bakes her a cake, ostensibly to congratulate her, but C.C. tells him that she's trying to be careful about overeating, as gaining weight happens frequently when people give up cigarettes. Niles (who is clearly aware of this) promptly produces even more sweets, like fresh eclairs and ice cream, just to get on her nerves.
* Troll or any number of other people may tell you. What she actually said is that she took the name "Potter" from a family she was friends with as a child, and "Harry" simply because she has always loved that name.
* Trollpak, "Book of Uz" part 2. Giant scorpions used by the trolls can weigh as much as 480 lbs.
* Trollpak, "Book of Uz" part 2. The trolls have domesticated several types of giant spiders. The largest ones weigh more than 6,000 lbs.
* Troll Post posts by a user in a forum topic. This is the smoking debris left behind.
* Troll Romance includes a quadrant based on mutual hatred (the caliginous quadrant, known as kismesissitude and symbolized by a "♠") to the point where one would at least try to kill the partner.
* trolls (about 52 Earth years), while the empress has lived for millennia.
* Trolls also see hitting each other with rocks (less fancy rocks) as a casual friendly greeting. On the other hand, sticking your hand out at a troll is sign language for
* Trolls, and anything with regeneration, can reattach body parts, including heads if they have a spare.
* Trolls are a much more ruthless and usually xenophobic flavor of Proud Warrior Race Guy. Only the Darkspear and Zandalari treat other races with anything besides general contempt. As of the third expansion,
* Trolls are a species related to humans. They can step naturally, communicate using variations in tone when singing, and have a sort of collective encyclopedia known as the Long Song which they use to pass information across the Long Earth. They're also incredibly helpful, but can't stand being around large groups of people.
* Trolls are considered this, given the fact that they hug all the time.
* Trolls are generally drawn in fanart as pretty good-looking for grey-skinned, horned aliens.
* Trolls are living rocks whose brains are impure silicon, meaning they're slow and stupid under the snowline and extremely intelligent in the cold. However, they're still susceptible to freezing to death — their cold tolerance is much higher than a human's, but it still has its own limits.
* Trolls at the same time. By which we mean it's all made up of felt and wool and glitter and things, barring the odd translucent organic tissue.
* Trolls being followed by bait images and people calling you a "shitposter".
* Trolls, both of which happen when she speaks to the kidnapped Snack Pack members about her intention to overthrow Gristle.
* Trolls: Branch gives off vibes of this, compared to the hyperactive Poppy and her happy-go-lucky brethren when dealing with the Bergen trying to eat them.
* Trolls. Branch is heavily implied to be in love with Poppy, and she seems to reciprocate by the end of the movie, but in the end nothing is confirmed. It is

worth noting that their most predominate duet together is Cyndi Lauper's 'True Colors", a classic love ballad and the scene itself gives off a rather romantic vibe. However, also worth noting is that they don't do anything more than hug, and romantic kissing among trolls is shown to exist in the film's opening number. The sequel focuses on Branch trying to confess his feelings to her.
* Trolls breed by capturing and raping human women. After a short amount of time, the woman's stomach explodes and a group of baby trolls emerges from her bloody corpse.
* Trolls, Bridget is frequently in the presence of Gristle or Chef, but neither of them recognize her when she puts on some new clothes and a wig (and a more confident attitude). Granted, they probably don't pay much attention to the servants.
* Trolls: Chef killed Branch's grandmother right in front of him when he was a child, causing him to lose his color. Later when the other Trolls lose their color waiting to be eaten in Chef's pot, only Branch can help get them back on their feet because he's been gray long enough to be able to work around the hopelessness.
* Trolls, Chef uses this to convince the king to bring back Trollstice.
* Troll Science teaches us how to make use of a stable time loop to acquire infinite money. Just spend your entire life saving every cent you can, hop in your time machine, and travel back to give your younger self all your savings and the time machine. Repeat as necessary. Since you've already been doing in indefinitely, all you have to do is wait for your future self to bring you that time machine and a fantastic pile of money.
* Trolls, Cloud Guy offers to guide Poppy and Branch to Bergentown, if Branch gives him a high-five first. The pessimistic, untrusting Branch refuses, and after some negotiation, he agrees to a fist bump. But then Cloud Guy keeps switching to bizarre greetings to annoy him until Branch snaps and chases after him.
* Trolls come in Forest, Ice and Dark varieties, each with their own skin color (green, dark blue and purple) and spells (fire, ice and hypnotic). The Horde's trolls are from tropical jungles, and have light blue skin and use spears instead of axes.
* Trolls comic story "Brain Freeze", Cooper gets a brain freeze upon eating a large bowl of ice cream, leading to the Snack Pack to try to help him. When Poppy gives him cocoa, Cooper is cured, but thinks that the actual correct treatment was Poppy's previous attempt by giving him more ice cream.
* Trolls, complete with Bridget losing a rollerskate at the pizzeria's steps and Gristle picking it.
* Trolls de Troy also has a 2D cartoon adaptation, with a big departure in art style and considerably more kid-friendly.
* Trolls de Troy: One story has a man able to teleport trolls away from their homes. To fix this, the trolls decide to have him do it "à l'envers" (Meaning both "backwards and upside-down" in French) by hoisting him up by his legs while he casts the spell. It works, to the man's shock.
* Trolls devoted to doing exactly this to the exclusion of anything else.
* Trolls doesn't work as well) when they suspect they may be in trouble. Coalface is quite emphatic in this regard.
* Trolls) don't have Chef and Creek dying at the end like in the movie. Instead, they remain living together in the forest, isolated from both Troll and Bergen society.
* Trolls, due to being bisexual by nature, don't have words for single-gender sexuality. It's thought of more as a fetish than an actual biological preference. Further, since their reproductive process doesn't result in families and involves an insectoid queen, Karkat has a difficult time understanding the concept of why "incest" would be a bad thing.
* Trolls finds the Troll's new home, Cooper poops cupcakes, which Poppy then somewhat nervously offers to Chef.
* Trolls forums use this quite a bit on "How do I make money" threads. Step 1. Cut willows. Step 2. ? Step 3: Profit (Willow logs are very cheap, around 13 GP each, and as a reference, 2 million GP is considered broke by many players.)

* Trolls franchise has an unisex aiming towards children, but most of its merchandise is made for girls, presumably because a number of the major characters are female, as well as the franchise's overall aesthetic.
* Trolls franchise's title is a shortening of the "Troll Dolls" toyline it was based on. Justified in that the title species of the toyline are actual living beings in the franchise.
* Trolls gamble by tossing something up and then betting on whether or not it will come down. To be fair, there's definitely some parts on the Disc where it's a legitimate toss-up.
* Trolls. Hairy and seemingly dumb creatures although they are good at operating machinery of various kinds. They have invented a pastime referred to as trolling which includes having jokes on other people's expense.
* Trolls has the main characters, cynical survivalist Branch and carefree, happy-go-lucky Poppy.
* Trolls have been slowly declining due to an ancestral curse that makes most of their births come out as stunted, barely sapient trollkin. Mistress Race trolls in particular are so rare that they are largely believed extinct by men and only a few thousand are left in all Glorantha.
* Trollshead (in The Dragon, #31), describes how some people ran through the illusion while others were burned alive and left charred.
* Trolls, however, the overall opinion has pretty much shifted to total shipping support between the two.
* Trolls in 2020. It involves Poppy trying to save Hug Time from disappearing.
* Trolls in most editions can't be killed with just standard weapons, but need to be burned with acid or fire to permanently die.
* trolls intentionally bombarded her with terribly racist tweets just for appearing in the movie, and then later hacking her website and leaking nude photos of herself.
* Trolls is a survivalist, not a scientist, but he still gets the line after spending years preparing an underground bunker for the Bergen attack that's coming any day now.
* Trolls is happy, energetic and hyperactive. She can sing, dance and hug with the trolls.
* Trolls is to hurt people in chatrooms and the like with offensive language.
* Trolls, is unanimously considered a better film due to focusing heavily on world exploration, having a solid message regarding cultural appropriation, more genres of music, and the cutesy tone being downgraded to an extent. Also helped by the fact that their online revenue surpassed its own budget within 3 weeks, when it took the first film 5 months.
* trolls. It's also been stated that the "lower" castes of Trolls happen to be more susceptible to psychic disturbances as well, but that's not always the case.
* Trolls like dinosaur mounts and the bipedal dinos are called Ravasaurs. There are several bipedal Ravasaurs in the game. They are basically T-Rexes.
* Trolls makes a deal with the Bergens and leads them to the other Trolls.
* Trolls: Most fantasy settings have creatures named "trolls" — but the creatures bearing that name vary very much between settings. Often they are hulking brutes similar to giants and ogres, but other times they are small creatures resembling goblins or gnomes. They might be good or evil, hairy or bald, wise or stupid. Often they are associated with stones (sometimes having the ability to turn into stone themselves).
* Trolls occasionally getting a second airing, usually during the late night hours.
* Trolls on the Discworld are said, historically, to eat people. It is unknown as to why they do this, as they have no nutritional value whatsover to a silicon-based life-form and tend to stick in their teeth. But trolls of old did this
* Troll spaceships are streamlined vessels adorned with numerous smooth, forward-pointing spines and painted bright red. The overall impression is one of a swift, sleek, aggressive predator... which suits the troll empire's
* Trolls, Poppy eats a berry that causes her to get spots all over her body and swell up into a ball.

* Trolls: Poppy is subjected to this, especially through the "Get Back Up Again" montage. She suffers as many humiliations as anyone in the film.
* Trolls, Poppy is telling the story about the trolls and the Bergens, and says that the trolls loved nothing more than to sing, and dance, and hug and repeats herself until her voice is sped up to chipmunk voice until one of the trolls in the scrapbook story pants in a chipmunk voice and then passes out from exhaustion.
* Trolls, Poppy passes out at the end of the song she was singing after one too many bumps on the head. When Branch finds and revives her, she sits straight up and sings the next verse of the song.
* Trolls. Poppy refuses to abandon them to be eaten and goes after them herself.
* Trolls: Poppy's plan to get her friends back from the Bergens is just "rescue everyone and make it home safely".
* Trolls: Poppy, the main protagonist, is seen as a baby in the beginning after her father led the Trolls to escape from the Bergens. Gristle Jr. and Bridget are also seen as young toddlers during the intro.
* Trolls: Princess Poppy, who takes it upon herself to go out and save her friends, even if no one else wants to. In the past, her father King Peppy led the Trolls' initial escape from the Bergens.
* Trolls punch and throw rocks at each other as a friendly greeting (or, if it's a pretty rock, a romantic overture), and don't always remember there are good reasons not to do this to the squishy races. In
* Trolls set great store by gold and jewels, possibly since it takes so much effort to mine and refine them. In the trolls' patriarchal society the more mineral wealth a guy has, the better his choice of bride. By contrast, the elves of Sorrow's End consider gold jewelry mere decoration, since it has no practical value.
* Trolls show affection by bludgeoning one another with rocks. It almost causes a riot when one troll "blows a kiss" to an (also troll) admirer in a controversial political situation.
* Trolls: Similarly to the example above, Branch isn't willing to go along with Poppy when she seeks his help at first, but is ultimately forced out of his bunker when Poppy gets all the other Trolls in it. It takes some time for him to tag along with Poppy, though, due to her starting the journey to Bergen Town earlier than him.
* Trolls Singapore, which all happened in the span of a year and a half. In 2019, a live show based on the franchise was announced, further expanding upon its profitability.
* Trolls supplements described trollish games, some of which involve using the head of one of the participants as a living football. Which tries to bite the feet that kick it.
* trolls Sweetie Belle by dressing up as his own mother during sexual intercourse.
* Trolls take offense at being called "rocks" despite the fact that they do in fact seem to be living, moving rocks.
* Troll Star Player Ripper Bolgrot underwent experimental ‘sports therapy’ that greatly elevated his intelligence. Now, despite retaining the look of the average troll, Bolgrot is easily one of the smartest players to have ever taken to the Blood Bowl pitch and has become famous for his strategic plays that combine tactical manoeuvring of his teammates with extreme violence.
* "Troll" starts with a typical murdered sailor—and leads to a four-episode battle with international terrorists who create
* Trolls: The Beat Goes On! and tried hyping it up by using well-known Japanese celebrities as the voices of the characters and having idol group Tsubaki Factory promote the show. These methods paid off as the show wound up being a major success in Japan.
* Trolls: The Beat Goes On! episode "Ear Worm", DJ Suki's latest song gets stuck in her and her friends' heads. Poppy drives it out with a song of her own, only for the newer song to get stuck in her head at the end.
* Trolls: The Beat Goes On! episode "Prank Day", the Snack Pack say this when they warn Smidge about the water balloon that's going to fall on her.

* Trolls: The Beat Goes On! got 13 episodes (26 segments) in before stopping.
* Trolls: The Beat Goes On! is that instead of candy, the piñata is full of sausage, which when pulled out of its stomach resembles intestines.
* Trolls: The Beat Goes On!, trolls are shown regularly storing things in their hair, even things that shouldn't logically fit. It's established for the franchise that before a certain age, trolls even use their hair as playpens and cribs for their babies.
* Trolls, the forest dwelling trolls use local critters in place of conventional technology. Most of it comes to using the bigger ones as vehicles and small glowing ones as lights.
* trolls. The male trolls are all mostly Cute Monster Guys, too. Except maybe Equius.
* Trolls, there is a flashback scene of Branch ruining several parties in which he shouts about the Bergens coming and tips something over: a birthday party where he tips over a pile of presents, a wedding where he tips over a cake, and a funeral where he tips over the casket, letting the dead troll, also dressed as a clown, roll out with a squeak noise.
* Trolls: There's a wall-eyed child Troll. For one thing, he likes watching his parents as they're sleeping.
* Trolls: The Trolls attempt this for Bridget while she's on her date with King Gristle Jr. A rare example in that the attempt is successful.
* Trolls think this. However, since troll romance is not just one type, but 4, there could a red string, a pale string, a black string, or an ashen string.
* Trolls This extends into the credits with Poppy and Branch singing "September" while dancing with the other main Trolls.
* Trolls toyline, had a lot of toy merchandise from many brands, as well as tabletop games, paper-related products, and a lot of other kinds of merchandise and promotions.
* Trolls, trolls are regularly shown to keep things in their hair, with more stuff that can logically fit. At one point, Biggie vanishes an object in his hands by wrapping it in his shorter than average hair. It's even established across the franchise that trolls use their hair as a playpen for children too young to walk around on their own.
* trolls trolls from a peaceful universe, and they're a collection of the most banal stereotypes of shallow modern suburbia, combined with deconstructive parodies of how the fandom perceived the initial troll characters. In short, they're a nasty bunch of hypocritical backstabbing jerks themselves.
* Trolls: TrollsTopia due to a shortage. At one point Smidge expresses frustration that they're mostly finding gold, tossing a freshly dug nugget into a massive pile of them.
* Trolls: TrollsTopia episode "Glitter Rush" is entirely about the trolls digging a mine for glitter due to a shortage. Glitter is explained as coming up from beneath the earth, in the form of magma, to the surface where it cools. It even has a "fool's" variant, discernible by the fact that it doesn't stick to skin at all, unlike authentic glitter which clings for at least three days.
* Trolls wears a top that shows off her navel area, which contains a gem.
* Trolls: When Chef attempts to force-feed Creek to King Gristle Jr., Gristle constantly tries to give a reason to wait until Trollstice instead, each time having Chef add a food ingredient to Creek in case Gristle wouldn't like to directly taste him. When Gristle talks about Trollstice for the third time, Chef ultimately shoves Creek into his mouth (as pictured above).
* Trolls. When Princess Poppy notices the cupcakes, she tries to offer them to said Bergen.
* Trolls: When the opening narration describes the Bergens, one Bergen can be seen giving another one a wedgie.
* Trolls who did things like calling his then-girlfriend a "fat cow" when she appeared in a thank-you video.
* Trolls, who voices a character that does not sing at the beginning of the film. What are the chances that will change by the end?

* Trolls will grab a target and violently smash them back and forth until nothing is left but their legs and lower torso. Giants will do a similar act, in addition to also biting the head off of struggling victims and throwing the rest of the body aside.
* Trolls: World Tour, although most of them don't dress with it (their leader Queen Barb is the only relevant example); instead, it's the coloration of their home and appliances. Their villainy is subverted by the end of the movie, though.
* Trolls: World Tour, and the red color is rather used to represent the Rock Trolls.
* Trolls: World Tour: An "Ignorant About Lava" variant happens in a side scene of the climax, in which a generic Rock Troll falls into a pit of lava, only to comment "Uh... This is a little hot." as he's sinking. Likely justified as the Rock Trolls are implied to have heat resistance.
* Trolls: World Tour. Compared to how the other songs in the medley have remained popular to this day and still receive constant radio airplay or are fondly remembered, "Gangnam Style" was only popular 8 years prior to the film's release.
* Trolls: World Tour: Despite every Troll Tribe realizing that the Rock Trolls are a genuine threat, they're not willing to trust each other for help.
* Trolls: World Tour, especially when some commercials showed her on good terms with Poppy and the others.
* Trolls: World Tour go straight to streaming (aside from opening in whatever screens could still be used, mostly drive-ins), this meant only Russia, Singapore, and Malaysia got traditional releases.
* Trolls: World Tour got a pretty mixed reception, but many people showed interest in it just because of its release strategy: to adapt to the coronavirus pandemic, it was one of the first animated features to be released for streaming services on the same day as its theatrical release, possibly setting a precedent for other movies struggling to find an audience with theaters closed around the world.
* Trolls: World Tour happen at a concert led by Queen Barb after the Rock Trolls took the other Tribes' strings and members. It starts off as Version A, but switches to Version B when Branch and Poppy begin a relationship together.
* Trolls: World Tour has a dance-off between the K-pop Trolls and Raggaeton Trolls, Branch included. Branch quickly adapts to their dance styles and also points out to both groups that Barb has no right to choose which music goes and which music stays.
* Trolls: World Tour, it is shown that a troll of either gender can reproduce by growing an egg in their hair, which then hatches into a baby troll.
* Trolls: World Tour made over $100 million dollars in rentals, breaking digital records across the board and making more money for Universal than the first film made for 20th Century Fox within five months.
* Trolls: World Tour movie usually kept the dramatic and comedic parts separate from each other.
* Trolls: World Tour: Queen Barb and the Rock Trolls travel on their world tour in leathery creatures capable of traversing all terrains of sea, land or air. They vaguely resemble angler fish (a female in Barb's case and the rest males).
* Trolls: World Tour, the Rock Trolls use shooting guitars to fight the other Troll tribes, although not to kill.
* Trolls: World Tour, this happens to Branch twice. The first time, a variant, is when he claims to like "Born To Die". The second time occurs when the Reggaeton Trolls and The K-Pop Gang find him; he listens to both groups' music moments before getting captured.
* Trolls: World Tour, two sub-genre groups, Reggaeton and K-Pop, have a dance-off over Branch. Neither group has any intention of helping him, though, because they're fighting to see who gets to keep the full prize for the bounty placed by Queen Barb. This would be quickly subverted, as like shown before in the movie, they were just doing their job out of desperation to keep their music. They end up teaming out of respect for one another, and agree to split the capture.
* Trolls: World Tour was one of the first animated films released during 2020's COVID-19 pandemic.

* Trolls: World Tour: When he sees the effects of the ultimate power chord on the troll monarchs, Riff is taken aback and concedes to Poppy's point that everyone being the same isn't a good thing.
* Trolls: World Tour: When pointing out how different the other Troll tribes are compared to the Pop Trolls, King Peppy mentions that some are so different they can't even grasp the concept of Hammer Time. Cue a shot of Pop Trolls dancing to "U Can't Touch This" with horrified looks on their faces and promptly panicking.
* Trolls: World Tour, where most of the movie's cast, including a number of generic characters, are thrown into a fourth wall together. They don't slide down after that, though, instead remaining still due to the pression that's being applied to each other.
* Trolls. Yeah, they can rip you limb from limb with their bare hands, but a little sunlight turns 'em into inanimate rocks. One good way to trick a troll into watching the sunrise is to challenge them to a game of riddles: no troll can resist such a challenge. But beware: according to the legends trolls are extremely good at riddles, and if you decide to give up before dawn then they celebrate their victory by eating the loser.
* Troll terminology to create an utterly bizarre monologue from Inspector Berrybreath.
* Troll: The cornerstone to Torok's world is destroyed and the world collapses around him. Then, as the cops are investigating, Torok grabs one, presumably to take his form.
* Troll: Those who get off of people's retorts towards their trolling; those who had sucessfully "baited people" into insulting them. May overlap with the villainous cases above.
* troll. Though her powerful telekinesis obviates it's use as a weapon, she does perform the grappling, swinging acrobatics with it while investigating a ruin.
* Troll winners) and the winners are only allowed to possess the award for themselves if they acquire it through supernatural means. Naturally, no one has accomplished this task.
* Troll) with his ring to turn him into one of his minions, he turns bright green with slime oozing from cuts on his body while screaming in agony the whole time, morphing into a cocoon which cracks open. Out pops a little monster with Peter's facial features and spider legs.
* Troll You especially! (Sees picture of a Green Troll Monster and facepalms) Not that kind of Troll, you moron!
* Trollz, and Jasper, who used to have an enormous afro. Then Amethyst cast a spell and removed his hair permanently.
* Trollz a stone ogre hates liars and only accepts the truth, even when it's negative. She asks the trolls if she's ugly, to which Amethyst agrees, but when Mica lies and says she's gorgeous she flies into a rage and attacks him.
* Trollz DVDs are three episodes combined into one movie, with bonus scenes added in.
* Trollzenberg). The sole exception would be Miss Tourmaline, which is a disguise by Snarf.
* Trollz had spell phones, which act like flip cell phones that can send spells to other phone users, as well as a group call feature.
* Trollz had the main villain, Simon, wipe out the old Trollzopolis 3000 years before the series began, forever changing the Trollz' way of life by turning most of the good magic evil and minimizing the rest, and according to the website he almost destroyed the planet by unleashing Black Amber.
* Trollz has a detailed system of magic, several historical events are mentioned, and in one episode the wheres and whys of how girl trolls get their magic is explained. They even have a different calendar system.
* Trollz is a 3000-year-old gremlin who destroyed Trollzopolis once and wields powerful magic, but he looks and acts like a 9-year-old boy and has no aptitude for modern technology. He's also quite proud of being evil, as is his sidekick Snarf.
* Trollz, one of Simon's plans had Sapphire fall prey to this. Coaxed by a magic mirror, she grew narcissistic and power-hungry, deciding she didn't need her

friends anymore. She did have regrets about it, and apologized once things were set right.
* Trollz realizes this about herself after watching old movies, where she only ever did what everyone else wanted to do.
* Trollz Simon successfully takes over Trollzopolis in the Middles Ages arc and the brainwashed girls arc, though by the end of things he's ousted and things go back to normal.
* Trollz, Simon uses this to escape the Shadow World, pretending to be a scared little boy who'd been trapped there.
* Trollz, the brainwashed heroines' costumes are actually less revealing than their normal outfits, being more like MIB suits.
* Trollz, this happened in the backstory, with the old Trollzopolis being destroyed by Simon, as well as a lot of their magic being corrupted and taken. The world almost bit it, too.
* Trollz, Topaz loves shopping and is a fashion expert. The official description says that she was blessed with the gift of supreme fashion sense.
* Trollz variety, using magic to make life less boring, though they also use it to fight against Simon when necessary.
* Trollz when ogres are sensitive to light. Good thing Sapphire's spell misfired earlier and made her feet glow.
* Trollz, when the girls enter the Shadow World during the day they were only there for a short time, but when they came back the mall was closed and it was late at night.
* Troma. After some events that involve a ballet tutu and a sheep, he's laughed out of the gym locker room by what seems like the entire town and takes a running jump out of the window and into a vat of radioactive waste. Yeah...
* Troma. It has less to do with monstrous cannibal spirits, and more to do with killer animated pots of chili, however.
* Troma's War: At the time, the record holder for most bullets fired in a single movie.
* Troma's War, where a screaming woman appears during the opening... and is promptly shot.
* Troma undergoes a mutation that makes him lose his hair and transform into a hideously deformed creature of superhuman size and strength. Ever since his transformation, Toxie has dedicated his life to ripping apart all manner of bigots and criminal scum.
* Troma was banned in Finland for a year following its release due to a scene in which the antihero has sex with a corpse.
* Trombley, despite being from Michigan, reflects the more aggressive, trigger-happy side.
* Tromeo and Juliet, the eponymous pair find out at the end they're brother and sister, but decide to get married anyway. In true Troma fashion, they have hideously deformed kids.
* Tromeo and Juliet, the titular Tromeo Que has a brief scene where he masturbates furiously to a pornographic interactive computer game with a list of fetishes to pleasure himself to. Which does he choose?
* Tromie, the giant, mutant radioactive squirrel from the not-quite-serious
* TRON 2.0 all at once when he realizes he and all other humans who use computers have been this to the computer world inhabitants.
* TRON 2.0 a Program called The Corrupter is turning Programs into drones on the order of his User, masking his presence from the ICP forces and civilians so they can't recognize him as a threat. Tron is sent to cut off the malevolent User's access while Mercury takes down the Corrupter himself.
* TRON 2.0 (as in, the guy who programmed Tron) in a closet full of computer parts.
* TRON 2.0 clean up his act, he turns down a promotion in order to continue making video games.
* TRON 2.0, featured Ma3a, an artificially intelligent construct and vector for the digitization correction algorithms who was modeled after the original movie's Lora Baines, player character Jet Bradley's mother. It is hinted however that Ma3a

actually has part of Lora's consciousness integrated into her program (said part having been digitized during the digitization laser accident that claimed Lora's life).
* TRON 2.0: If Jet derezzes a "civilian" program, the OS announces "Illegal Program Termination" and the game ends.
* TRON 2.0, if you kill any non-hostile and/or "Civilian" Programs (like Ma3a, Byte, or any character that you can talk to), you hear a voice say "Illegal program termination." Five seconds later, you get a screen with the same message.
* TRON 2.0. If you throw your disc at an enemy and miss, there is a pretty good chance it will hit the enemy on the return pass. The effect is even better with the sequencer subroutine.
* Tron 2.0 is a faction of corrupted virus programs, led by a user whose digitization process was botched. Because everyone at risk is a computer program and not an actual human being this was probably the only time this was ever justified.
* Tron 2.0 is an former executive who was incorrectly digitized into the computer world and became a virus, his poisoning presence was even referred to as The Corruption. Infected programs who attack you have a chance of infecting one of your subroutines (weapons and equipment), making it have the opposite effect until you complete a virus scan on that subroutine. Oddly, you eventually get to use the special weapons of the Corrupted yourself without risk of self-infection.
* TRON 2.0. It makes one wonder if the writers had the thing on multiplayer
* TRON 2.0, it's almost always an insta-kill. The times it's not is when it's glanced off armor. Jet will also say something like "Ouch" or "Yes!" if he manages a perfect hit.
* TRON 2.0) merged with an AI. This makes Morgan (along with David Warner and Jeff Bridges) the third actor to play three different roles in the franchise.
* TRON 2.0), Monolith seemed to be trying to imply some interest between Jet and Mercury, but the pair had a critical lack of scenes together, and Mercury spending half that screentime under a memory wipe put a severe damper on it.
* TRON 2.0, naturally, takes place almost entirely inside several computers with protagonist Jet Bradley digitized into them.
* TRON 2.0 resorts to this logic and uploads the protagonist in desperation.
* TRON 2.0 : The Profiler subroutine. Fully upgraded, it gives a Program's name, armor level, hit points, and inventory.
* TRON: After evading a Recognizer that was searching for them, Yori quips to Tron "Let's do it again!"
* TRON Alan Bradley is by casually asking if Lora (Flynn's ex, Alan's fiancee) still leaves her clothing on the floor. Lora is less than amused by Flynn's trolling and almost walks out.
* TRON, all "bad guys" have red light as their theme, and even when they don't win, they're still badass.
* TRON and comes up with the plan to break into Encom. Oh, and she wrote Yori, who is this trope in her own right (designing, building, and piloting the Solar Sailer, using her connection to Dumont to get Tron access to the tower, etc.)
* Tron and his three sons all cheat in some way, and in each case, they are ultimately beaten.
* TRON and if what happened to Tron is any indication, her survival odds appear dim.
* TRON, and Jordan Canas-Flynn's death, since that degree of careless behavior would be perfectly in character for Flynn Sr. prior to the coup.
* TRON And they both plan to reform the whole Program religion so that humans and Programs are on more equal terms.
* TRON. A Program's circuitry patterns and coloration indicate their loyalties, native system, and relative social class. If a character changes their social position or loyalties, their circuitry will change to match.
* TRON are the cause of the infection and tries to hunt you down, forcing you to fight security programs.
* Tron as the antagonists found the rabbit hole before the protagonists and are

using it to wreak havoc in the electronic "wonderland"
* TRON became just a dick that enjoyed making others fight to the death, program, user or otherwise.
* Tron Bonne, such as a train and Bruno in the first game. She was 13 in the first game (and her spinoff) and 14 in the second.
* Tron Bonne swears revenge after he defeats her Ferdinand/Feldynaut robot, but not before sincerely praising him for being stronger than she expected.
* TRON. But then, Flynn lays out the reason behind the hacking - Dillinger stole Flynn's work, using it to make a meteoric rise in the company. Realizing Dillinger (and Master Control) have "broken the rules" convinces Alan to throw his lot in with Lora and Flynn, culminating in a six-felony late-night break-in on company headquarters to get Alan's software (the title character) running and expose Dillinger's crimes.
* TRON can fit this. As a bit, he is only capable of two responses—"yes" or "no"—and each response is accompanied by a change of shape: a yellow octahedron for "yes", or a red spiked 3D shape for "no".
* TRON canons explain Jet's absence in the film as him being in Washington DC visiting his mom, Jet and Sam having a nasty falling-out before the film's events, or some combination of the two.
* TRON. Dillinger and Master Control locked down all information and user access on our side of the screen, and it took the form of a totalitarian state on the other side of the screen. The User-Believer Programs frequently speak of their longing for a "free system" while Sark and Master control speak of "control" and "order." The lockdown is also why Alan and Lora decide to team up with Flynn in order to get Tron online in the first place.
* TRON, each faction from the game had a different color and pattern, and it was important to tell the difference, lest you accidentally shoot an ally or civilian.
* TRON: "Elementary physics: a beam of energy can be diverted. Are we there yet, mommy?"
* TRON enter a computer network when their bodies are reduced to component information by a teleportation device (actually a laser, but the same principle is involved).
* TRON: Evolution died protecting Quorra from a huge falling aircraft.
* TRON fanon has it that programs' circuits are as sensitive as human genitalia (which programs are often but not always assumed to lack). This is supported by a deleted scene in the original in which Tron and Yori indulge in a moment of physical affection by tracing each others' circuit patterns with their fingers.
* TRON featured a relatively tiny amount of actual CGI, amounting to less than five minutes' worth in a feature-length film. However, the extensive use of footage from the famous Light Cycle sequence in television spots and trailers gave the impression that the entire film was computer generated.
* TRON. First, we see it used on Clu, then we see Dumont and other elderly (presumably user-interface) programs being put through the same torture.
* TRON, Flynn is forced to play various deadly games by the Master Control Program.
* TRON forces eventually catch him, and he's remarkably snarky and sarcastic to them, even in the face of certain de-rez.
* TRON forces other living programs who defy it to participate in video games — which, for a program, are battles to the death.
* TRON for the first time. He was immediately fascinated by video games, and wanted to do a film incorporating them.
* TRON further explains it by saying Flynn coded many of those games based on real-world sports he enjoyed.
* TRON greater capacity. If Byte played by the same rules as Bit, he'd be able to say 256 distinct things.
* TRON has the Bit, who acted as a sidekick to the hero and could only say "yes" or "no" (with a corresponding shape-change). Though technically It also assumes a neutral state when not responding to a question, which should qualify it as a trit.
* TRON. He was a video-game programmer who ran his own arcade, then gets zapped into the games themselves...

* Tron himself uses powerful magic to cheat, using his crest's power to eliminate any Trap Cards caught in his way during the Duel Carnival ride. (In his defense, exactly how much this qualifies as cheating is debatable, as Droite is the one who placed most of them deliberately to stop him.)
* TRON in that the digital world was built by humans and populated by digital avatars that reflect the best and worst of the humans who built them.
* TRON in the beginning of the movie indicates she helps control the laser.
* TRON in the real world includes a black Encom helicopter with fluorescent red paint stripes, effectively real-life Tron lines.
* Tron: Invasion). Jet Bradley asks Mercury (a female Program) to promise never to worship him (Programs revering humans like we revere Gods), saying that humans age and die eventually. However, a Program's typical lifespan is about five or six human years to a human male's eighty, a fact that isn't lost on Mercury.
* TRON, is actually an interesting subversion — when you consider that the OS that everyone uses was made by a hacker, it makes sense that all the computer use a Command Line Interface, making for something of a Linux future.
* TRON is just as computer savvy as his dad, using his skills to annually crack Encom and prank them.
* TRON is one giant example of this, as EVERY program — may it just be a harmless chess-program — is portrayed as possessing AI. The MCP (who once was the aforementioned chess-program) even goes as far as declaring the human race useless and trying to seize the cyberspace. Of course, humans can also be easily converted into AI by a laser beam, invented to teleport oranges....
* TRON: Legacy, Alan does this to Sam early on with the excuse that Sam wasn't answering his phone. Sam at least pretends not to care about Alan barging in.
* TRON: Legacy, all minor characters are instantly destroyed when they crash, but major characters are always thrown clear from crashes completely unfazed. Minor characters are also instantly destroyed by a hit from a disc, but Clu takes a shot from Tron and survives, while Quorra merely goes offline instead of being totally destroyed.
* TRON: Legacy), and tossing any programs who didn't meet his standards into games in which loss means de-resolution (which is program-ish for "death", in case you were wondering). His ultimate goal was to escape into the world outside the Grid, the real world, and destroy everything "imperfect" to make way for his perfect system.
* TRON: Legacy aren't very accurate over long distances. The heroes are in one large craft, with an additional turret, being attacked by several nimbler craft. In order to take one of them out, the pilot uses a real life tactic of taking the flight into vertical, where the smaller crafts' weaker engines die out before the larger craft's does, giving them plenty of opportunity to shoot down the assailant as they fall.
* TRON: Legacy: CLU was created with the guideline to create the "perfect" system, and the ISO programs are not perfect specifically because they are flawed and don't operate within defined parameters.
* TRON: Legacy comic, and that the Admin Program was given an impossible directive, which drove him somewhat insane.
* TRON: Legacy didn't get saddled with this. We see the beginnings of an attraction between the Sam and Quorra once they get to know each other a bit better on the Solar Sailer, which is probably a more natural true-to-life progression than this trope: they only recently met.
* TRON: Legacy dynamic entries, within seconds of each other. First, Sam is driving his cycle toward another program to get his cycle-stick-thing to him, when suddenly, Clu ramps his LC on top of the program in question, and he just appears out of nowhere. A few moments later, Quorra bursts into the arena in a Light Runner, and Clu ends up running right into it.
* TRON: Legacy, Generated by the same Baton as Light Cycles, Light Katanas can be used by programs on the Grid, as demonstrated by Quorra during the fight scene in the End of Line club.
* TRON: Legacy had "Flynn Lives", a campaign based on conspiracy theorists who were

looking for evidence that Kevin Flynn was still alive and active within the electronics circuit after disappearing years ago. The Blu-ray for the film includes additional footage of it which follow the ending where Sam Flynn finally accepts his role as leader of ENCOM. It's further revealed that Alan Bradley had been supporting the theorists all along.
* TRON: Legacy has several, including a soft launch to Flynn's Arcade and a loop to the upper-left flipper for a ramp shot.
* TRON: Legacy has these all over the playfield, most notably on the ramps when the playfield blacks out.
* TRON: Legacy he favors, CLU leans towards the Ancient Rome-influenced end of the Most Definitely Not Hitler scale.
* TRON: Legacy: Hexagons are sported by a lot of the architecture on the virtual world of the Grid. As well as the mesh worn underneath most of the Programs' costumes. In fact, in the Armory scene, the undermesh is seen forming all over Sam Flynn hexagon by hexagon.
* TRON: Legacy his son grows up with bedtime stories about the stuff his dad did on the other side of the screen, even having action figures of Tron and Clu on his bookshelf. Twenty years later....
* TRON: Legacy in the game, more so than anything about how the game actually played.
* TRON: Legacy, in the same order: getting digitized by the laser and imprisoned in the Game Grid, being forced to fight in gladiatorial combat, escaping from the light cycle arena through a hole in the wall, having an ally seriously injured (Ram dies, Quorra gets better), and boarding a solar sailer which is captured by the enemy carrier. Thirty-two years, a larger scale and a rather different aesthetic help disguise this and makes them feel more like a homage to the original rather than a direct rip-off, but the comparison remains a valid one.
* TRON: Legacy, invokes this trope in a more-or-less realistic fashion, stating that the ISOs (short for Isomorphic algorithms) are artificial lifeforms that spontaneously originated from the chaos and complexity of the grid itself.
* TRON: Legacy is lit entirely by artificial lighting with only stormy clouds above. Quorra, having lived her entire life inside the Grid, longs to experience a real-world sunrise.
* TRON: Legacy. It doesn't help that his evil digital doppelganger actually shows more emotion.
* TRON: Legacy, it's confirmed that time passes 50 times faster in the computer world. So while Kevin Flynn (Jeff Bridges) has been missing in the real world for 20 years, he has lived 1000 years in the computer world.
* TRON: Legacy: Kevin Flynn orders Clu, a computer program, to create the perfect system. Living beings aren't perfect.
* TRON: Legacy, lends credibility to the somewhat off-kilter and inhuman appearance of CLU, who uses Flynn's younger face as his own.
* TRON: Legacy, marking a pretty stark contrast with the doors. Presumably this was either a matter of personal preference on the owner's part or because the filmmakers couldn't get a fancier visual effect to look right.
* TRON: Legacy. Most prominent in the third release of the game, as the backbox translite features Clu's faceless black helmet front and center.
* TRON: Legacy on characters were achieved using flexible light strips built into the clothing. Not one line is CGI or underlighting.
* TRON: Legacy: One of the prisoners on the Recognizer has half of his face derezzed. When that particular program looks at Sam Flynn, he just growls.
* TRON: Legacy reason to hate and fear artificial intelligence just took charge of the world's biggest software company and the power of deity over billions of Program lives.
* TRON: Legacy, Sam does this to get the drop on two guards on top of a lift.
* TRON: Legacy, Sam ends up zapping himself onto the Grid by ignorantly repeating the last issued command on the console. Even when faced with the warning message, he makes only a token effort to look for the indicated "aperture" before confirming the command.

* TRON: Legacy: Sam Flynn is arrested after pulling a prank on his father's company, ENCOM. When he gets out and picks his bike up from the impound lot, he greets the guard with "Hey Carl" and gets a sigh and "Hey Sam" in return.
* TRON: Legacy, Sam Flynn stages an undercover operation to release the source code of Encom's operating system to the public. He's the main stockholder of the company, it's legal for him to do so.
* TRON: Legacy: Sam lands on the roof of a taxi cab. The driver swerves to try and get him down, citing "no free taxi".
* TRON: Legacy, series creator Steven Lisberger is the bartender at the End of Line Club. The credits and supplemental material list his character's name as Shaddix.
* TRON: Legacy, since Sam is Kevin's son and owns a controlling interest in Encom stock, he can get away with a lot of legally questionable actions. For example, after breaking into Encom headquarters, stealing its intellectual property, and freely distributing it across the internet, Sam is merely punished with a couple hours in jail and getting his bike impounded. Plus, it's implied that this isn't the first time it's happened.
* TRON: Legacy speaks with broken English when Sam lands on his roof while escaping ENCOM HQ at the beginning of the film.
* TRON: Legacy's prior the events of the movie. Bonus points for actually being called The Purge in story.
* TRON: Legacy's stealth suit is basically a toned-down version of this.
* TRON: Legacy. The chanting was recorded at a panel held for the film at San Diego ComicCon using the audience.
* TRON: Legacy the film's composers) only response to a fight breaking out in their club is to change the music.
* TRON: Legacy: The mothballed jukebox, dusty and unused since Flynn's Arcade closed in 1983, immediately starts blasting hits from when it was last active (Journey's "Separate Ways" and the Eurythmics' "Sweet Dreams Are Made of This").
* TRON: Legacy the night before he mysteriously disappears. Also notable for being the only real-world scene where CGI is used to make Jeff Bridges look younger.
* TRON: Legacy, to a lesser degree. He was able to activate things no mere program should be able to activate (like a junked Recognizer) and was able to shield Yori from being derezzed. (It is also implied but never confirmed that Flynn himself cannot actually be derezzed, having survived with no lasting harm more than one event that would derez any normal program.)
* TRON: Legacy uses this to great effect, though it also plays with it a bit: white and blue characters are considered good guys, but in multiple cases, characters of both colors oppose the protagonist out of circumstance.
* TRON: Legacy was created with the purpose of creating the perfect system. He ended up staging an Anti-Mutiny when Flynn turned away from that goal to foster the development of the ISOs, a random (and thus imperfect) side effect of Flynn's recreated Grid system.
* TRON: Legacy whenever a program is killed, resulting in "de-rezzing". However, instead of dust, dead programs disintegrate into bits of code.
* TRON: Legacy when Sora sets the latter free in his scenario. Rinzler's fate is not revealed in Riku's scenario, but is assumed to be the same as the film.
* TRON: Legacy. While he is obviously a good gamer as a kid, as an adult he uses his real world skills of motorcycle riding, base jumping and capoeira to outfight many of the rogue programs.
* TRON: Legacy who are looking for long missing Kevin Flynn with support from his son Sam. You can join the site and as rewards for completing parts of it you get swag like pins, stickers, posters, postcards etc. You can complete games and at one point join in crashing an Encom Press Conference.
* TRON: Legacy with the fanbase, and gained the origin film new fans. When The Grid was confirmed for KH3D, many fans rejoiced!
* TRON: Legacy, with the Rudy shot and the middle shot switched. The rules are entirely different, though.
* TRON: Legacy would follow its predecessor, especially since the CGI team knew they working on a film that was the sequel to something most of them revered as 3D

modelers and designers, so they made every dollar count. This, of course, is shown best during the new Light Cycle sequence.
* TRON like the User who created them (at least for the first film). Even then, it's implied by a line by one character that the appearance issue is because a part of the programmer's spirit goes into their creations.
* Tron Lines drops it in favor of having light strips on the suits, which by then were much cheaper and more feasible to use.
* Tron LinesGlowing blue lines over everything are a good indicator of advanced technology.
* Tron Lines. However, the color of their suits was grey as opposed to black.
* TRON material show a bit more variance; robes, sashes, and sometimes heavy looking armor.
* TRON: Most of the Programs are very happy to serve human Users, there's just a handful of Programs like Master Control and Clu that decide to go crapshoot. Unfortunately, the ones gone crapshoot test their brutality out on their fellow Programs before implementing plans to inflict it on the human world.
* TRON. Note that, given the limitation of computers at the time, a good part of said animation was still hand-drawn or hand-colored.
* TRON: Programs are living human-like constructs living out their own lives in a society originating in a computer world. They refer to human beings as "Users", bear some resemblance to their human creators, and seem to take the best and worst parts of them.
* TRON, real people have entered the Grid on multiple occasions and a program has exited it and been able to exist in the real world.
* TRON. So, he added a sound effect and the background became atmosphere while the Solar Sailer's translucent wings became an iconic image for the film.
* TRON: The corporation known as ENCOM tends to display Mega Corp tendencies whenever it's not being controlled by idealists like founder Dr. Walter Gibbs or Kevin Flynn.
* TRON. The TRON fandom was actually quite accepting of the newcomers.
* TRON, the villain Sark is enlarged by the Master Control Program until he towers over the hero, re-enacting "David Versus Goliath" quite literally.
* TRON. They are computer programs with set parameters that not even they can break, no matter how much they'd like to.
* TRON. This movie has become a cult movie, heavily enjoyed by geeks and people into computers, even though it's obvious to any such person, or for that matter, anyone above the age of seven, that computer programs are not glowing people running around inside a computer. It's just so much fun that this doesn't matter.
* TRON to blend in. Then there's re-routing a massive amount of power using his own body as a conduit and having no plan whatsoever at the endgame other than "kiss your pal's girlfriend and jump into the monster."
* TRON tone than the animated series! The merch, like clothing, toys, and coloring books were all aimed for kids.
* TRON to touch electronics for the next six months, and Alan has to haul him to a shrink.
* TRON. Tron pulls Flynn to safety while he's hanging off the Solar Sailer.
* TRON-universe fanfic, a User describes his energy ration as looking like "Mountain Dew under a blacklight and tasted...green."
* TRON: Uprising and closing in on Argon City. There has been no mention of Argon outside of this series and in January 2016 the third movie was canceled. Thus the Bolivian army ending to the storyline is a Bolivian army ending to the franchise.
* TRON: Uprising: Beck goes by The Renegade, since no one really believes he's Tron.
* TRON: Uprising Beck is a young program who becomes the leader of a revolution inside the computer world of the Grid against the villainous Clu and his henchmen. A mechanic, he is trained by Tron, the greatest warrior the Grid has ever known. Tron not only trains Beck in the fighting and light cycle skills to challenge the brutal military occupation of the city of Argon, but also guides and mentors him to grow beyond his youthful, impulsive nature into a courageous and powerful leader.

Beck adopts Tron's persona and becomes the enemy of General Tesler and his oppressive forces.
* TRON: Uprising definitely qualifies. He has spent a lifetime roof-hopping, dueling, and racing bikes — thus is an exceptionally agile and fast enough to hold his own in protracted battles with Paige and Tesler, who are trained combatants with a lot more power to throw around. Beck rarely wins any battles, but he always gets away. And this all before he officially begins his uprising or gets any form of training.
* TRON: Uprising, he begins to takes verbal jabs at her in front of Tesler.
* TRON: Uprising: One of Tesler's trademarks. Dyson also has one, albeit slightly understated.
* TRON: Uprising's first (and only) season ends with a shot of what seems like CLU's entire digital armada baring down on Argon City, a show of force far in excess of the forces required to occupy the city in the first place.
* TRON: Uprising show was probably because the situation was applied to computer programs as opposed to humans.
* TRON: Uprising Tesler begins holding "The Games" when he takes over Argon. Any violations of the law, including staying out after curfew, warrant being thrown in to fight against his soldiers.
* TRON: Uprising. We also see that Dyson kept his soldier's attire, but his lines changed from User-loyal white to User-hostile orange-red.
* TRON: Uprising where Beck's attempt to talk Tron down almost gets the younger Program killed...
* TRON: Uprising while the grid is under Clu's control and tried to eradicate everything, including the programs who don't support the occupation.
* TRON, was the most powerful PDP-10 minicomputer ever made. However, only one was ever produced; DARPA withdrew funding for the project, and later computers produced by the Foonly company were slower and less efficient.
* TRON was viewed as this by the Hollywood community when it was released. Many people went to see it simply for the computer animation, not out of any expectation of high entertainment.
* TRON: When Alan Bradley asks Kevin Flynn if he's using his hacking into the ENCOM computer system for embezzling, Flynn says that embezzling is such an ugly word and instead points out that his hacking into the system is to gather evidence that Ed Dillinger was stealing from his work.
* TRON when he is arrested after being zapped into the computer world; he thinks they are arresting him for not paying his fines.
* TRON, where Flynn says goodbye to Yori, a program within the System (created by, and a doppelganger of, his ex-girlfriend), with a kiss.
* Tron wields two Identity Discs, which fit together during the coup.
* TRON with the Games being non-lethal sports under Flynn's administration, but as soon as Flynn's back was turned, Clu re-instated the deadly aspect.
* TRON writers work in computer repair, system engineering, programming, and computer science.
* TRON you have Alan and Lora's Program children; Yori is still the weakest fighter (though she leveled up a bit there) and designs weaponry while Tron hasn't lost a bit of his skills and Alan's continued updates mean he's still defending cyberspace as Alan's champion.
* Troodon by letting them battle and kill your creatures, and describes them as being capable of communicating their experiences to each other where most animals have to learn on their own.
* Troop 37 has two spoiled cheerleaders named Melissa with nickname Missy.
* Troop Beverly Hills patches! Soon the entire troop is decked out in merit patches for things like jewelry appraisal and "gardening with glamour." Naturally, the evil council leader declares all of these patches invalid when she finds out about it.
* Troop Beverly Hills, the evil Redfeather Troop fit this trope. (The Beverly Hills Troop are pretty nice, or they eventually become such after Phyllis takes over.)
* Troop Beverly Hills: When Red Feather leader Velda breaks her ankle, her troop abandons her and finishes the race without her. They finish first, but get

disqualified for leaving someone behind. The heroes comes in second, but they're declared the winners.
* TROOPS creator Kevin Rubio got to write the season one episode “Bombad Jedi”.
* Troops in Iraq and Afghanistan have been taught local phrases to help "win hearts and minds".
* Troops under fire are trained to use a variety of movement techniques which can involve crawling without lifting your head or body up, springing to your feet and running for three seconds before sprawling to the ground, and so on. In a modern army, a soldier might be expected to do this with about a hundred pounds (forty five kilograms) of load. Of course, they could just walk normally - and be picked off much more easily.
* Tropaholics Anonymous since it came to inception two years after Prohibition was repealed.
* Trope: A common convention or device in media. These are not the actual literary definition of a trope, and should not be confused with it. This is just an informal definition we use for this site.
* trope block, having brutal murders, complex plots involving suicide, drugs and business dealings but also many childish comedy moments.
* Trope Codifier about love most days: most iconically with the Little Red-Haired Girl, who he can barely even talk to. Though he briefly gets a little more confident with Peggy Jean (which didn't end well).
* Trope Codifier and all its variations, who treats her stepdaughter like a slave while grooming her own daughters to become princesses.
* Trope Codifier and eventually split into two warring factions and start suing each other.
* Trope Codifier, and the book came out before the movie did, but you'd be hard-pressed to find an Inflating Body Gag more well-known or ingrained in popular culture as this one.
* Trope Codifier, as the word "balcony" did not exist during Shakespeare's time, but early modern theaters had onstage balconies (used for musicians, high-paying spectators, and scenes set at windows or on castle walls), which is where Juliet's actor would have stood during the scene.
* Trope Codifier" (Bobby Thomson's game-winning home run to win the 1951 pennant for the Giants, after being down 13 1/2 games to the Dodgers in August).
* Trope Codifier broadcast begins with a weather report, then a music show featuring "Ramon Raquello and His Orchestra", and transitioned in this fashion to the news bulletins that started the main story.
* Trope Codifier, but can lead into really twisted law intrerpretations.
* Trope Codifier by Robin Thicke, pictured, which features the hashtags #THICKE and #BLURREDLINES briefly appearing onscreen from time to time.
* Trope Codifier dropped, and their focus on raw, dirty beats and extremely aggressive rapping and lyricism made them one of the hardest acts of their day and fed their image as the hip-hop ensemble that people didn't fuck with.
* Trope Codifier eventually did that to the local ads in any case). Once the name changed to "Empire Today," the spoken word "Today" was added at the end.
* Trope Codifier features Tatooine and its two suns (though it shows them as a big red star and a smaller yellow one.)
* Trope Codifier for affecting a faint Southern accent while doing so, however.
* Trope Codifier for "Elf wielding a bow who is adept at surviving in nature." Bonus points if said elf lives in the woods.
* Trope Codifier for entrance music in baseball: Trevor Hoffman of the San Diego Padres adopted it in the 1990s, and the phenomenon caught on like wildfire after that. ("Hell's Bells" in particular has been used by several others since Hoffman, who retired in 2010.)
* Trope Codifier for Second Season Syndrome, finished third-bottom and were relegated (only even finishing that high due to a late run that ultimately wasn't enough) just one year after finishing in fifth place and qualifying for the UEFA Cup in their first season back in the Premier League.

* Trope Codifier for the comedic version. He's done every evil deed imaginable, from blotting out the sun to stealing candy from a baby, and that was just in one episode.
* Trope Codifier from 1922, which features a group of heirs to a fortune staying the night inside a haunted house. It's also been adapted into several movies, including ones in 1927, 1930, 1939, and 1979.
* Trope Codifier has stolen far more than just monuments and famous landmarks in her time. Somehow, she's managed to steal things that are intangible, incorporeal, and even metaphysical.
* Trope Codifier has to deal with this, and even they have had their moments).
* Trope Codifier himself to succeed him as World Heavyweight Champion. Hutton was indeed a great wrestler, but when even the Canadians think you lack charisma, you're not leaving much of an impression.
* Trope Codifier is an earlier case of this. After calmly narrating the Hindenburg's approach to the mooring tower, newsreel announcer Herbert Morrison was horrified and at a loss for words when it caught fire.
* Trope Codifier is Weary Willie the sad hobo clown (pictures on the right), the alter ego of Emmet Kelly Sr. and Jr.
* Trope Codifier located at Johnson Space Center in Houston, Texas. It moved here during the Gemini project from Virginia. This concept has only grown more prominent as the emphasis of manned space exploration has shifted more towards scientific research. For example, the vast majority of the day-to-day operation of the systems on the International Space Station is conducted from the ground, leaving the crew members with more time to conduct science experiments.
* Trope Codifier matches rather than reveal their identities. If unmasked, they will immediately try to flee the ring or cover their faces with their hands. Thus, being unmasked generally robs a masked wrestler of their ability.
* Trope Codifier may be the Circassian Guard which protects the King of Jordan. They are drawn from the Circassian people, which originate from north of the Black Sea before being scattered from their homeland. They continue to wear colder-climate uniforms, including wool hats, leather boots, and capes while guarding the kings of the desert country.
* Trope Codifier — not like it even matters, he'd bleed to death before he could possibly find anyone to treat the wound. This is a particularly special bit of ironic punishment as well — the gang member in question, Johnny the Boy, crippled Max's best friend Goose by forcing him to lose control of his vehicle and then setting him on fire via the leaking fuel while Goose was trapped inside and struggling to free himself. Once Max chains Johnny to the wrecked car he was gutting, he rigs it to explode using the stream of leaking gasoline and Johnny's own lighter.
* Trope Codifier — or there IS no crime, such as "The Man with the Twisted Lip".
* Trope Codifier (Messala's "Greek chariot"), Messala whipping his horses and any driver within range, if you're tossed from the chariot, there's a token attempt at retrieval.
* Trope Codifier of the Silver Hand, until said order got decimated after the fall of Lordaeron. They later served the Argent Crusade, and their respective factions, the Alliance or Horde in general.
* Trope Codifier of the twee pop genre, is also an economics professor noted for her work on competition theory, and her OBE is for services to economics.
* Trope Codifier, particularly in fantasy and/or horror settings — it is certainly the tack taken by Tolkien in his Middle Earth.
* Trope Codifier, period. End of story. Just four words: "Take my wife - please!"
* Trope Codifier Regardless, it was a happy marriage and according to friends of theirs, they adored each other. She died of tuberculosis at the age of 24, and Poe never quite got over it. Any of his poems with a dead young woman — such as "Annabel Lee", "Ulalume", and "Lenore" — are believed to have been about Virginia.
* Trope Codifier Remember, the term "global village" was an insult and we're very

seldom beyond sophomore-level here.
* Trope Codifier (respectively) that they all but eliminated major gameplay deviations in their genres.
* Trope Codifier's "Foreign Man" character given a name, job, and backstory.
* Trope Codifier (sporadic earlier examples existed, but this was the really influential one). It only works at specific "Alderson Points" in a star system, each of which leads to another specific system. Activating the drive anywhere else just burns up a lot of fuel for nothing. The story is a deconstruction: the Moties only escaped discovery and overrunning the universe because the only point into or out of their system leads within a supergiant star that would destroy unshielded ships on arrival. And this was the only reason the Moties never used their own version of the FTL device; they didn't have the humans' force field technology to survive at the far end of the trip, so explorers never came back.
* Trope Codifiers to have been forced to actually put the dangerous amount of weight on, and the wardrobe department does a valiant job of dressing him in bigger, heavier, less form-fitted outfits, but it's still a bit jarring, as the traditional image of Henry is one so well-ingrained.
* Trope Codifier submachine gun … and they wear more practical, monochrome uniforms while at it.
* Trope Codifier that he was given a budget limit of £2000, so he had little choice but to produce the video on a 'white cyc' background and edit the video on the fly. The rest, as they say, is history.
* Trope Codifier That's from Radio Disney's big CD promotion, books based on the episodes being sold, mystery books starring Lizzie (much in the same vein as the Mary Kate And Ashley Olson mystery books), Tokyo POP manga adaptations, bed sheets, Barbie dolls, board games, and The Movie.
* Trope Codifier: the original battle between Morgoth and the Valar leads to the creation of an ocean with Valinor on the Western side of Arda and the great inland Sea of Helcar in Middle-Earth; the War of Wrath at the end of the First Age causes the entire subcontinent of Beleriand to sink into the ocean; and the Drowning of Númenor is accompanied by a divine intervention which makes the entire world round rather than flat. Finally, it's implied that Middle-earth is simply the Old World in a lost era of prehistory, so untold other cataclysmic changes would have occured between the setting of the novels and the present day to account for modern geography.
* Trope Codifier. This was an armor that you could equip on your horse. It was nearly useless (doubled the low health a horse had) and more or less just for looks. If anyone refers to excessive DLC, especially if it's just skins that don't have any effects, as horse armor, they are referring to this.
* Trope Codifier Towards the end of the film, Juror #3 becomes this for the other side, after all the other jurors have decided there's enough doubt that they can't justify a guilty verdict.
* Trope Codifier, which began with a Star Destroyer chasing Leia's much smaller ship. The scene is helped by the wedge-shaped design of the Star Destroyer making it appear larger and larger as it comes into the audiences' view.
* Trope Codifier]," which holds the record as the longest-lasting instrumental #1 on the Billboard Hot 100.
* Trope Codifier, which was made before the Internet existed in its present form. Most modern cyberspace forms owe at least something to this depiction.
* Trope Codifier, which was quite popular in an English translation during the early 19th century. The very wicked witch in this tale is a wrinkly old woman with the missing teeth that make her pointed nose almost meet her pointed chin, wearing a tall black hat, has a spooky black cat that she talks to, lives in a small cottage full of taxidermied animals and such, and cooks up a potion in a cauldron as a "love" charm for the young woman who comes to see her.
* Trope Codifier with his pseudonymous "Timothy Lea" books, wrote a similar series of books as Lea's distaff counterpart "Rosie Dixon".
* Trope Codifier would be Emmett Kelly. His character Wearie Willie was known for sweeping up the spotlight after the other performers and he won the hearts of

audiences at a time when they expected clowns to make them laugh. He was a staple of the Ringling Brothers and Barnum and Bailey Circus for a good chunk of the Twentieth Century before going freelance.
* Trope Codifier you. The resulting brain cylinder can survive in Yuggoth's hostile atmosphere and be plugged into external devices allowing it to "see", "hear", and speak, but being sapient fungus monsters with a radically different physiology from humans, Mi-Go don't have the best grasp of human senses.
* Trope Codifying Empire example above, when they expanded their business, the jingle became:
* Trope Dropper at a White Screen Of Despair. Or you'd write this and later go to a friend who had any internet whatsoever. Presently the need for this has diminished, as now we're led to believe a lot more people have cheap, reliable, fast internet connections and time on your hands, with the world becoming "smaller" and changes in any page in which you and a group who would contribute, becoming faster and sometimes sliding off track before you get to say your bit. Other needs have appeared however, such as posting through a proxy (it's hard to find a good one, and when you do, you want to make the best of it).
* Trope Enjoyment Loophole: "Man, I hate this trope...Except this time. This time it's fine."
* Trope Entry Template does this for typical three-line banter. (If you don't get the difference between that page and this one by now, I give up.)
* Trope Finder Here's the place to ask "Do we have this one?" and "What's the trope about...?"
* Trope Finder) used to ask if we have a trope or what trope a particular example fits.
* Trope Grid: Confused on which trope should be used? Here's some clarity.
* trope in question was the sudden banshee wail of the brakes being deployed...and by that time it was too late to do anything.
* trope is flipped to the vigilante gang East 13 and their leader, the Tin Man. Her new partner Detective Blake is a young man fresh out of the academy and needs a crash course in street law. The difference is also implied to be because Blake is white since most of the cast are minorities.
* trope is then inverted from Book 2 with the introduction of Melisandre, a fire-worshiping witch that burns the effigies of what she deems "false gods", as well as the "heretics" that speak against her and her beliefs.
* Trope Launch Pad This is the place to propose a new trope article. You may also use it for works.
* Trope Maker after the end comes when the dead are judged. After the Babylonian exile, some Jews also began to believe in this, possibly influenced by Zoroastrian belief as they had been liberated from captivity by the Persians.
* Trope Maker, and certainly a perennial favorite. Some of them are armed enough to consider (and be used as) Q-ships.
* Trope Maker and flicks blood at passersby from said spine. No gates and doors can bar their passage, but gold scares them away.
* Trope Maker, as noted elsewhere on this page, but one particular myth has him listing his various names to avoid giving away his real one, possibly originating that particular part of the trope.
* Trope Maker, as the Wizard's low survivability at early levels is made up for by being a walking death machine at later levels because of how absurdly strong that spells get.
* Trope Maker film scholars insist these movies are of the utmost importance to not only the pro wrestling industry but to feature films in general.
* Trope Maker for a discussion), nor those who know their D&D history.
* Trope Maker for this in film advertising, in which Bass considered it important to have a distinctive symbol that could be incorporated into all promotional material. Some iconic examples:
* Trope Maker has to be C, to the point where modern languages not influenced by C in any way are a rarity
* Trope Maker' in the object (it would be hard to live in a ring); rather, a spell

has been placed on them that when a human rubs the object, the genie is summoned from wherever it is and has to obey the object's holder. "Aladdin" also does not have the idea that whoever possesses the lamp or ring is limited to only three wishes.
* Trope Maker, in the person of a department store floorwalker. The Tramp and the floorwalker mimic each other's movements for a while until Charlie is reassured that the floorwalker is real by reaching out and touching his valise.
* Trope Maker is flaring, but bunshin even masks auras). As the series moves away from Earth it turns out bunshin is practically a universal technique, while the zanzoken common on Earth is relatively rare.
* Trope Maker. It gave the SUV pizzazz; while it was built on the Ranger truck platform, it added numerous car-like creature comforts that made it a serious competitor to the station wagons and large sedans that ruled the family vehicle market up to that point, bringing back the old-fashioned landyacht automobile in a new, truck-inspired form. As other automakers spent the '90s and '00s imitating the formula that Ford laid down, wagons and full-size sedans all but died out as the SUV became the new symbol of suburban Americana, and even the aforementioned minivan saw its popularity take a downhill slide.
* Trope Maker making it hard to figure out when it first appeared.) With the armor serving the same purpose as a superhero's mask, only more plausibly, and the princess frequently falling in love with the hero and guessing his identity, the major difference is that the identity is only secret until he has saved the day three times, after which he is revealed.
* Trope Maker—the poem was written in 1826, an entire generation later.
* Trope Maker. Musidora, the actress who played Irma, had been a circus acrobat and the catsuit is probably derived from her leotard and tights.
* Trope Maker of the 1920s and 1930s, forgotten when the public discovered something new of interest.
* Trope Maker. Peter as the hard-bitten reporter, escorting high society dame Ellie back home for a big fat reward. In the end he leaves Ellie in the night to get money so they can marry. Ellie thinks Peter has left for good and goes back on her own. Peter forgoes the reward in favor of the trip’s simple expenses and admits he loves Ellie and the walls of Jericho fall.
* Trope Maker. Posters saying simply "Du mußt Caligari werden!" ("You must become Caligari!") were placed all over German cities, with no explanation whatever.
* Trope Maker: Red-and-black-striped underwear on blue/purple has been a constant (and much-mocked) part of his costume since his first appearance in 1936.
* Trope Maker) reported that a "mysterious airship, crewed by six of the strangest beings I ever saw" had appeared over his ranch and carried off a cow on the end of a rope. Today, this story is regarded as a hoax.
* Trope Makers. He's a necessary part of the cosmic balance, which is why he can't be killed off permanently.
* Trope Makers of the era. With Hollywood, radio, wartime inventions and the emerging technological device, the television on fire with new media tropes, we have:
* Trope Makers possible. Popular tropes that originated and/or popularized in this era are:
* Trope Makers: Pressing on with the experimental and the avant-garde on film and television, tropes that had been spoofed to death are:
* Trope Makers: With TV and a reformulated Hollywood still influencing media, we got:
* Trope Maker the foundation of the myth; as others have noted, their actual crimes were sordid, sloppy, and semi-successful compared to Dillinger's, but even today the end of the ballad can bring chills:
* Trope Maker", where such a device is used by the Spanish Inquisition to torture the narrator.
* Trope Maker, which features the eponymous character (a hypnotist/psychiatrist/master-criminal) in several of these sorts of shots.

* Trope Maker, which is usually just as segregated as the other majors but has specific divisions where mixed match ups are allowed. Fabi and Mari Apache also held AAA's Trio belts with their father.
* Trope Maker, who fills this role in two novels and, later, feature films.
* Trope Maker, with its subsequent film and theatre adaptations keeping the archetype in the public eye.
* Trope Maker, with Jane and Bill's tearful goodbye at the train station, complete with declarations of love, Jane running after the train, and Bill handing her a keepsake from the moving train window.
* trope name comes from the classic early '80s country hit "Lookin' for Love" by Johnny Lee.
* Trope Name comes from the Doctor commenting on the eyes in the walls of a hallway in "The Almost People".
* trope name of "Oh, Kitty" was for the scene in which this happens to Eric. Donna reveals that it also happened to her when she was a kid - which she can recall vividly even a decade or so later.
* Trope Namer able to figure out close to the max weight that a camel could conceivably carry.
* Trope Namer. According to Kirk, it "usually connoted some combination of surprise, disbelief, and/or annoyance".
* Trope Namer, actually has nothing to do with this trope. Those Bears just initially sucked at playing baseball.
* Trope Namer, affectionately referred to as the "immortality inducer" by some characters. It works by emitting radiation that stops cell aging, and is mass-produced, effectively making the entire human race immortal. It induces type II immortality.
* Trope Namer. After that, he experienced a career renaissance as a comedic actor.
* Trope Namer a hypnotist who makes the eponymous protagonist, tone-deaf without him, into a famous singer.
* Trope Namer aimed at modern civilization's reliance on oil and other non-renewable resources).
* Trope Namer allowed the player to charge up a sonic dog bark, spontaneously popping every Mook within range like a pressed grape.
* Trope Namer, although in reality the harem was not so much a sexual playground for the sultan as it was a protective environment for the sultan's concubines and all of his female relatives, including his mother. A sultan would typically stop having relations with a concubine after she gave birth to a male child, in order to make her focus her attention on grooming that one boy for power.
* Trope Namer. Although Microsoft wound up selling its rights to the Santa Cruz Operation, at first they didn't make it clear what their plans for Xenix were.
* Trope Namer, an ad-lib. What made that particular scene even funnier is that the character sounded more excited than anything, since they were in the middle of an intellectual debate about the afterlife when Death arrived.
* Trope Namer, and beyond, as many of its chapters have titles drawn from the Shelley poem. (And it fits.)
* trope namer and clad in nearly 150 pounds of bronze armor; David was in his late teens and completely unarmored.
* Trope Namer, and disbanded shortly before the end of the war when they were no longer needed.
* Trope Namer and love it. Because the play does not flop, the producers will be completely unable to pay back their investors, resulting in their exposure for investment fraud.
* Trope Namer, and, of course, its magic crow feather which is claimed that it can make Dumbo fly. Naturally, during the climax, Dumbo discovers that he is able to fly even without the feather.
* Trope Namer, a neighbor boy who'd come to see Mr. Wizard's science tricks.
* Trope Namer. Any time "step two" is pointed out or questioned, the gnome will draw a blank or remain silent before moving on without ever giving an answer.
* Trope Namer, a potentially career-ending knee injury forced him to take up a

heavily brawling and gimmicks-based style in order to continue his career.
* Trope Namer are coming for them, and it's time to get the hell to an exit before they get killed.
* Trope Namer as a character, a skier, is shown from behind, leading Crow to reference the scene.
* Trope Namer as different authors would obviously want to include their pet character in the number.
* Trope Namer, a Seattle-based DJ who is famous for his black-humored Christmas parody albums named Twisted Christmas.
* Trope Namer, as it is part of the vernacular of the business itself. Almost mandatory for every match as part of the storytelling aspect.
* Trope Namer as many a homosexual who have endured the 'real' version of the line have likely wondered how close family could seriously ask such an ignorant question. This pops up a second time. When Nightcrawler asks Mystique why she doesn't use her shapeshifting powers to blend in with normal humans, she replies, "Because we shouldn't have to."
* Trope Namer as "What if a gun had a soul but didn't want to be a gun?" The Giant is a huge robot who arrives to Earth from outer space. He has all kinds of weapons and presumably was designed as a vanguard unit for planetary invasions. However, he's injured upon arrival and becomes amnesiac, so he develops a childlike and innocent persona. The Giant's words after rescuing two boys from falling provide the trope name.
* Trope Namer. At the beginning of the play he is desperately in love with a girl named Rosaline, who has rejected him. Soon after, he meets Juliet, and promptly dismisses Rosaline as a passing infatuation. Though this only happens once in the story that we know about, goodness only knows how many more times he would have gone through this had Juliet also rejected him.
* Trope Namer, Barracuda laughs off one of these after killing Yorkie, but true to form his dying speech echoes in his head at a most inopportune moment and gets under his skin — allowing the Brit to punk him from the grave. (It's possible that Yorkie did it in the hopes that this would actually happen.)
* Trope Namer Basil Fawlty telling a small white lie, only to have to keep telling bigger and bigger lies, getting in deeper and deeper trouble until it all came crashing down in a glorious climax.
* Trope Namer being the golems from Jewish folklore, mentioned at the top of the page.
* Trope Namer be out would be a "giant insurance company", Archie rejects a settlement offer and instead contacts a lawyer, pushing a very skewed version of the incident. The lawyer later comes by the house to tell him the bad news: they're gonna have to drop the suit and take a much-reduced settlement. When asked why, the attorney notes that there were witnesses that dispute Archie's story. Archie still wants to try, but:
* Trope Namer: Bernard can't get any of the grownups to pay attention to a monster that's menacing him. Then the monster eats him. Then the monster can't get the grownups to pay attention to it, either.
* trope namer books as it allows the ships to remain stationary relative to the Ringworld for extended periods.
* Trope Namer, but it ended up also becoming about his soon-to-be wife Christie Brinkley (who starred in the song's music video).
* Trope Namer, but this trope is averted. In no way you can attack Achilles on the heel, and you can beat him by just beating the crap out of him on any body parts.
* Trope Namer by Richard Connell. The story's main villain, General Zaroff, has spent his life hunting every kind of animal imaginable and has grown bored of his hobby. To keep his interest in hunting, Zaroff resorts to hunting the most dangerous game of all — humans.
* Trope Namer called "Nineteen Eighty-Five!": Protagonist Ned Seagoon is locked in a room and forced to listen to a recording... of himself, singing (Harry Seacombe, actor for Neddy Seagoon, was in fact a very accomplished opera singer).
* Trope Namer cartoons, especially the Wile E. Coyote and Road Runner shorts, in

which the coyote orders tons of products from ACME that he tries to use to catch the Road Runner.
* Trope Namer, chapter 4). Cain was a farmer, Abel was a shepherd. God wants a sacrifice, so Cain brings the produce of his farm and Abel brings some sheep. God preferred Abel's offering and rebuked Cain for being mad about it whereupon Cain lured Abel into a field and killed him.
* Trope Namer (chapter IX, 90-104), who offer the crew lotuses that are so narcotically delicious that those who eat it get addicted to it, forgetting about their desire to go home.
* Trope Namer, considering that St. Paul never met Jesus (aside from a vision) and did not meet any of the original apostles until quite far into his career, and in fact started his career as a persecutor of Christians. At any rate, the Christian community of his time, some of whom knew Jesus, did accept his writings.
* Trope Namer. Crafts such as the YF-21 use this attack. Taken to the extreme with the VF-25 Messiah Armored pack, which carries 210 Missiles.
* Trope Namer "Cyberpunk" a 1980 short story by Bruce Bethke. "Mikey" is a proficient and troublemaking computer virtuoso, essentially a "hacker", though this term is not used in the story. He hangs out with friends who cause trouble online, encounters interference from his parents, and uses his skills to circumvent their will. In the novelized version, which incorporates a number of sequel short stories, this goes through a number of different phases.
* Trope Namer. Cyrano is quick-witted and in love with Roxane, but is ashamed of his giant nose and considers himself unworthy. His friend Christian is handsome and also likes Roxane, but he isn't clever like Cyrano and fears disappointing her by being dull and boring. They team up to try to present Christian as the perfect guy; it works for a while, but eventually ends in tragedy.
* Trope Namer. Despite being an obvious stereotype of Mexicans, he's quite a popular and beloved character in Mexico and throughout Latin America, where his cartoons still run to this day.
* Trope Namer". Despite being mostly instrumental, the overall feeling of the song can be described in the only words spoken at the beginning:
* Trope Namer. Each game included as part of its manual a full color printed piece, often a magazine or brochure from the game world, some innocuous device used as copy protection, and a pile of random assorted toys.
* Trope Namer episode "A Voice in the Wilderness", in which something is discovered on the supposedly-abandoned planet below the station. After a bunch of aliens show up and give the protagonists a ten-hour give-it-to-us-or-else ultimatum, the captain of the visiting heavy cruiser Hyperion threatens them with a NINE-hour leave-the-system-or-else ultimatum.
* Trope Namer episode "Bombshells", along with everything from revue musicals to zombie movies.
* Trope Namer episode "Portrait of Gomez", where the family enjoy a nice quiet evening outside. Because Uncle Fester ate the moonscreen instead of applying it to his skin, he got a moonburn (apparently).
* Trope Namer for a good reason. Males have a special pouch in which they carry the fertilized eggs in which the embryos develop. In some species, the females even have an ovipositor, basically a somewhat penis-like tube they can use to insert eggs in the male's pouch.
* Trope Namer for this article was a piece of public 'protest art' which was stenciled on sidewalks and walls around the San Francisco Bay area in the mid 2000s, in support of parental rights for gay and lesbian couples. The graffito consisted of a stylized picture of a seahorse, with the caption, "Mr. Seahorse knows men can be mommies too". This is in reference to how male seahorses carry their fertilized eggs after the female inserts them in his egg pouch.
* Trope Namer, Garrick is referred to as "One cool old man." By Jack Knight in JSA #2.
* Trope Namer, giving the claim a little credibility. Although pratfalls had been a staple of comedy since the beginning of time, Pee Wee's priceless rejoinder made this one famous in its own right.

* Trope Namer, having correctly predicted the destruction of Krypton, but his warnings were not heeded, as demonstrated in the page image.
* Trope Namer). He can still be killed by a huge amount of brute force from a similarly powered being such as Doomsday.
* Trope Namer he could siphon off Gotham with. She survives, but is driven mad by the experience and becomes Catwoman to get her revenge.
* Trope Namer heroine whose hair was the ladder in and out of her prison tower; both the witch who imprisoned her and the prince who loved her used this.
* Trope Namer. He's a mischievous creature, but not malicious to Alice or anyone who doesn't seem to deserve it. He even manages to mock the Queen of Hearts and then fade away before she can retaliate. The character is a play on the phrase "grinning like a Cheshire cat," which simply means smiling broadly. No one is exactly sure where the phrase came from.
* Trope Namer He shifted his comedy after starting his theater in Branson back in 1992 (where he is still playing), which means he quit using this joke long before it became an internet meme.
* Trope Namer), he swims an enormously long time underwater without breathing and quotes the trope title in voiceover in disbelief.
* Trope Namer". His motive was that Earth was obstructing his view of Venus.
* Trope Namer: his reason to send bombers into Russian airspace with orders to nuke everything that moves is because, essentially, he's blaming them for his sexual hangups. Specifically, he assumed the feeling of post-orgasm lassitude was a plot by Communists to sap—or at least defile—Americans' "vital bodily fluids."
* Trope Namer. If Dastardly tried racing fairly, he would have won every time.
* Trope Namer. In a variation on the theme, Summoners in the series often must defeat prospective summons in combat before being allowed to summon them.
* Trope Namer included the same disclaimer: "Kids, don't try this at home."
* Trope Namer. In some cases, these car accidents were fatal, leading to a ton of bad publicity and several multi-million dollar lawsuits against Domino's. By 1993, the negative word-of-mouth and accidents were becoming very prevalent. That same year, Domino's lost one of the many lawsuits against them, and the company was legally forced to stop using the promotion altogether out of concerns for public safety.
* Trope Namer in the 1850s. Long before then, the cave in the rock where she was seen and the surrounding land were supposed to have been "haunted" and may have been a place of pre-Christian devotion.
* Trope Namer "IN THE BATHROOM" comes from a Weird Al song. ("A Complicated Song", to be exact.)
* Trope Namer in the score and has trumpets and crashing cymbals) about how quiet and sneaky they are being, with the occasional "shush! quiet!" for good measure.
* Trope Namer In the second season, Ross dated academic Julie while Rachel looked on jealously. Since Paolo was a slow-witted pig who could barely communicate with Rachel while Julie was a sweet and lovely person, the writers hit one trap then the other. According to the nature of the Ross-Rachel relationship, pretty much every person either one of them dated for more than an episode after that point had elements of the false lead.
* Trope Namer is about a post-apocalyptic London after an accidental nuclear disaster.
* Trope Namer is a series of ads by The American Dairy Association, which made silly claims about cheese.
* Trope Namer is a short story by Theodore R. Cogswell in which it separated a magic-dominated half of the world from a science-dominated one.
* Trope Namer is hunting for Thanksgiving dinner. Daffy refuses to tell Porky where the turkey is, but caves in after hearing the scrumptious dishes Porky was planning to serve with the turkey. Upon realizing this, the turkey calls Daffy a "Quisling".
* Trope Namer is in "Homer's Triple Bypass", seen above when Chief Wiggum was pursuing the criminal Snake.
* Trope Namer is laid up with a broken leg and sees enough to make him suspect that

his neighbour has murdered his wife. Later he can only watch as the might-be killer returns to the apartment while his girlfriend is searching it.
* Trope Namer, is the most obvious example. Fast, but not as fast as Fox, with short reach but a spammable projectile making his close- and long-range games even out, middle-weight, with a decent recovery move and decent damage potential.
* trope namer is the story of Adam and Eve. After the first man and woman are created, God's first instructions to them is: "Be fruitful, and multiply, and replenish the earth".
* Trope Namer is: when you're in Narnia, no matter how long you stay there, no time passes in the "real" world; but when you're in the "real" world, any amount of time could be passing in Narnia.
* Trope Namer. It featured a young man ingesting a Slurpee, letting loose a bloodcurdling scream, and then explaining: "Ugh. Brain freeze."
* Trope Namer It's an atypical example in that Billy's family doesn't come around because they want him to "be himself" — they realize that he's good enough at dancing that he might be able to escape the poverty that has the rest of them trapped. They even have this exchange, albeit in jest:
* Trope Namer joke but was cut off by George, who was in the middle of some hijinks and didn't have the time for it.
* Trope Namer lampshaded this trope when announcing the localization of the original NES game for the series' 30th anniversary.
* Trope Namer — he actually preferred to go by Paul, the Greek translation of his name, as he realized that his calling was to (Greek-speaking) gentiles.
* Trope Namer (meaning "Lord of the World") is one of the many titles possessed by Krishna, an avatar of Vishnu. Its English association with something unstoppable originated from the Hindu festival of Ratha Yatra, celebrated in Puri, Odisha. In it, the image of Krishna was pulled from the Temple of Jagannatha and placed inside a chariot, to be pulled by hundreds of devotees throughout the city. According to European accounts, it was said that the chariot became so fast and unstoppable that it trampled anyone and anything in front of it.
* Trope Namer might be this joke: A farmer wakes up at night from some noise coming from the chicken coop. Concerned that a fox or worse might be in there, he walks out and shouts: "Someone in there?" Answer: "Nobody here but us hens!"
* Trope Namer. Not quite this trope. He is promised the hand of Amelia Grimaldi. But when she turns out to really be Maria Boccanegra, the daughter of the Doge, she is allowed to refuse him and ultimately marry her true love. The false lead doesn't go gracefully. He unsuccessfully tries to recruit an assassin and winds up poisoning Simon.
* Trope Namer novels. Le Guin devised "ansible" as a contraction of "answerable".
* Trope Namer of the event or act of creation, in particular the reproduction of biological life.
* Trope Namer of the inhabitants of Halloween Town to make Halloween happen each year.
* Trope Namer of the trope, describing how a "real" gangsta should be (cool, hard-working, not starting fights but able to win one if needed) while calling out "fake" ones who talk big but can't back up their words. In the end, the song also compares the President of the United States to a gangster. The Geto Boys also deconstruct it themselves in "Mind Playing Tricks On Me", a harrowing depiction of what it's like to be a paranoid, guilt-ridden drug dealer.
* Trope Namer on the show is his inability to even remember that his memory is so bad.
* Trope Namer, parodying what would eventually come to be known as, well, Mary Sues.
* Trope Namer pictured above, he's both green, and the 6th member of the team.
* Trope Namer). Prescott was concerned over the lack of ammunition in the Patriot fort, but such an order was justified anyway due to the poor accuracy and range of 18th century muskets. If you fired before you could see the whites of their eyes, you almost surely weren't going to hit anyone.
* Trope Namer, quite a few of the other references on this page use some variant of

the line.
* Trope Namer realized that was what the episode needed to work. It was understood by the gay community, since they received a GLAAD award later.
* Trope Namer (real name Siddig El-Fadil), whose web fan ring "The Siddig El-Fadil Estrogen Brigade" predates more famous offshoot Estrogen Brigades like those for Jonathan Frakes and Patrick Stewart.
* Trope Namer, referring to a large book that has info on any animal in the world. ♪Iiiiiiiiiitttttttt's the great big book of everything, with everything inside / See the world around us, this book's a perfect guide♪ This song is sung in every episode, and annoys Dennis the Goldfish to no end.
* Trope Namer. Robert K. Merton coined the phrase and used a banking run as the classic example. A particular real-life example of a bank run was seen in the UK with Northern Rock. The bank quietly asked the Bank of England if they could have an extended overdraft (effectively), even though they didn't actually need it at that point. Word got out, leading to every branch in the country being besieged by savers desperate to take all their money out before the bank collapsed - which it wasn't in danger of doing until people panicked.
* Trope Namer, run for President in E Pluribus Wiggum? Simple: the Patriot Act killed the Constitution to protect freedom.
* Trope Namer said that the it came from "Difficurty of pronouncing "L's" in Japanese Ranguage"
* Trope Namers), and the former by having the killing-blow struck by a woman.
* Trope Namers comics of the time were much better with their powers. On the other hand, if a large enough creature passed between them, they needed only to put their fists into that creature's form simultanelously and their weakness was promptly nullified.
* Trope Namer scrolling over "Store" gives 1-Up (Homestar Runner's anime counterpart) blue hair.
* Trope Namer-Secret State Police), and she's assisted by male agents too.
* Trope Namer segment revolving around a video game in which when you die, the message comes up on screen saying this.
* Trope Namer series, by Alfred Slote, features Danny One as the title character.
* Trope Namer series, where it seems like once every few seasons there is an episode where an animal is falsely accused of being "the killer" and in danger of being "put down" for it (in one it was a panther, another the trope-naming polar bear, and in still another a shark), but the series sleuths uncover evidence that a person did the killing and then covered it up by making it look like death by animal attack.
* Trope Namer. She does this a lot in this story. To Kanae, to her friends' children, to Sasaki. Even about Kyon once, though that time she doesn't use the trope name and gets ribbed for being naughty.
* Trope Namer sitting on an elevated platform holding a fake steering wheel while the actual driver was down below, concealed by overlaying Benny in post. As one critic said in their review, "although this wasn't the first time that cartoon characters have shared the screen with live actors, it was the first time they did it on their own terms and made it look real."
* Trope Namer solely exists to offer wisdom from his many years of life to Odysseus.
* Trope Namer song gets played in universe on the radio once... on Valentines Day:
* Trope Namer song "The Night I Called the Old Man Out", in which the narrator and his father come to blows. It's never quite revealed what exactly the father is being called out for, but by the end of the song the son relents, realizes his father is right, and "prays someday he's half the man he is."
* Trope Namers, the witches tell Macbeth he can only be defeated when Birnam Wood comes to Dunsinane Hill, and also that none of woman born can harm him (hence the name of the trope). He ends up being defeated by an army that chops down the wood and carries it with them to conceal their numbers, and killed by Macduff, who was born by Caesarean which meant that, in Elizabethan times, he would not have been considered to have been "born" in the same sense as most men.

* Trope Namers, think it's OK to name things willy-nilly after their favorite things, and become infected with the syndrome, spreading the illness as they begin to make up "Trope Namers" as well.
* Trope Namers, were actually the more advanced race, providing all the food and luxuries the mentally deficient Eloi depended on, essentially farming the child-like Eloi like cattle. They were supposed to be descended from the working classes of modern-day societies, who, as class divides grew sharper, spent more and more time underground tending to industry and machinery. Over time, they evolved into a race of pallid troglodytes who kept the machines running out of instinct as much as anything, still tending to the descendants of the indolent upper classes (who they over time adapted to feed on).
* Trope Namer Syndrome usually means you're forgetting something important in the process.
* Trope Namer that culminates in a mental breakdown. And that's just the halfway point.
* Trope Namer that lets a character avoid the issue of where and how he carries all of his guns, no matter how many he has or how big they are.
* Trope Namer that the main characters are trying to kill needs to be finished with the GM-only item The Sword of 1000 Truths, but to get it to the kids (who are the only ones capable of fighting the guy) they need to trust Stan's incompetent fourth-level Warrior father with the item. When this suggestion is proposed, the above quote is the response from one of the GMs. Randy fulfills his task of getting the Sword to Stan, but doesn't use it.
* Trope Namer that triggers Third Impact also falls under this. Shinji begs Asuka to help him in his moment of crisis, but due to his perceived betrayals, she first attacks and ultimately rejects him.
* Trope Namer. The armor of the tank causes the force or shrapnel to "rebound" within the chamber, drastically increasing the effectiveness of the grenade. What was left inside the tank afterward resembled chunky salsa.
* Trope Namer, the commander of the Vogon Contructor fleet addresses everyone on Earth.
* Trope Namer, the DM is the ultimate authority for their world. There's even notes on the Dungeon Master's Guide for Fifth Edition about how to apply Rule Zero, as well as general advice on how to be a good DM.
* Trope Namer, the easter egg. Every Easter (the first Sunday after the first full moon after the Spring Equinox) easter eggs are hidden in yards for children to find. Creative parents will often hide them in very out-of-the-way or unusual locations (up a tree, in a flower pot, etc.)
* Trope Namer; the famous fight in the episode, "Arena", takes place here, as mentioned in the description.
* Trope Namer. The latter is considered one of the more faithful adaptations of Casanova's memoirs.
* Trope Namer The main versions became a couple too, and Bruce even revealed his identity to her and she moved into the mansion with him. The relationship didn't last, but they both developed a respect for each other and Batman mostly looks the other way when Catwoman does her thing.
* trope namer, the most stubborn practitioner of tradition puroresu who had gone toe to toe with shooters of all kinds, was immune!
* Trope Namer, then adds, "...or something about a banana. I'm not sure which."
* Trope Namer. The training for their male citizen-caste (starting from age 7, when they got separated from their family) consisted of not getting enough food, getting beaten for stealing food and getting caught, possibly getting beaten for disobedience to their older peers, and once a year getting ritually beaten for no reason whatsoever... and it topped of with murdering a defenseless slave at night. Real military training wasn't part of the deal.
* Trope Namer" The trope's name is just one of many possible translations.
* Trope Namer. They have just materialised in the Vogon ship, and Arthur, never having teleported before, says:
* Trope Namer. This was convenient, as the lack of licensing issues made it

possible to finally bring the series to international audiences for the first time.
* Trope Namer This went full-circle with the 2017 Mama Luigi reanimation collab, in-which Luigi actually checks his watch during the iconic fall.
* Trope Namer those two if they weren't moved to the opening credits. There's a long-standing rumor that the reason for this was due to Ginger's actress threatening to walk off if Mary-Ann was mentioned in the opening credits. Their character names were eventually squeezed into the final stanza.
* Trope Namer ("Tistou Greenthumbs", in English), who has the power to make plants grow faster with but a touch of his thumb.
* Trope Namer to further his plans. Not that it ever worked out for Snidely.
* Trope Namer to the equation when bringing out an Omega Evolution based on Kandyce.
* Trope Namer, to the point that, when a normal person punches him, he usually makes a point of rolling with the punch to keep the attacker from hurting themselves.
* Trope Namer to the scene during the arena battle ("You call this a diplomatic solution?"; "No: I call it an aggressive negotiation!") was written afterwards.
* Trope Namer trope. A young girl stows away on a shuttle carrying vital medicine to a planetary colony, not knowing that its fuel has been precisely calculated and her extra weight is enough to cause disaster.
* Trope Namer try to listen to Cassandra, they don't understand a thing she says, and eventually ask her to stop talking about such horrible things, because they would never happen.
* Trope Namer, two-way gambit. He starts off by spending the winter raiding Tartar camps so that when spring comes, all the Tartar clans unite to crush this annoyance. He then uses the threat of the united Tartars to unite the Mongols into a single nation, with himself as khan.
* Trope Namer. Unlike other Mario Kartlikes, you don't pick up power-ups along the track — you chose three from a list specific to the character you choose before every race, and pick up tokens along the track that let you use the powers you chose.
* Trope Namer. Unnecessary roughness is a personal foul penalty that covers a large range of actions, such as hitting a ball carrier who is already out of bounds or violent contact with a player who is away from the ball. At the professional and college levels, the foul carries a 15-yard penalty and, if the foul is committed by the defense, an automatic first down. Severe instances (such as striking blows/fisticuffs) result in player ejections.
* Trope Namer used to be literal; if a criminal was going to be given a harsh sentence, the judge would throw a law book at the crook.
* Trope Namer version for school performances naturally rewrites the song (and Trekkie's character) to be about social media addiction instead.
* Trope Namer, Vimes muses that at this point, the only people who would kill Vetinari are either those who don't care if the city collapses or someone who would be on top of the pile in the event of such a collapse; however, the only two people in that second category are Vimes himself and Carrot, neither of whom would actually do that. It is explicitly stated that although Vetinari's power is resented by citizens both low and high, they do rather like that he's turned the city into the economic and cultural hub of the entire Disc and aren't inclined to go through all the fuss and muss of changing Patricians. He has tamed the city like a dog... and most dogs do not like it when the master is no longer around.
* Trope Namer was everything they feared: a handsome young man shaking his hips in suggestive poses, causing teenagers to scream in excitement. Authorities were afraid that this obnoxious noise would send their youth straight to Hell!
* Trope Namer was Frenchman Céléstin Adolphe Pégoud, the second pilot to perform a loop before World War 1. After he shot down his fifth German plane he was lauded in the French papers as an "ace", which at the time was a general term for someone who had done something heroic or noteworthy. British and American journalists who saw this then generalized that a pilot qualified as an "ace" if he shot down five planes. Pégoud himself racked up another air

victory before being shot down himself in 1915.
* Trope Namer, was to die young in battle. His mother, Thetis, attempted to defy this prophecy by dipping his body in the River Styx, attempting to render him invincible, but holding Achilles by the heel, which proved to be his one weakness. His father, Peleus, sent him to train with Chiron, and gave him a suit of bronze armor. Unfortunately, all of his prowess in battle was not enough to prevent a spear or arrow from striking Achilles on the heel and his dying at a young age as prophesied
* Trope Namer when Admiral Perry visited Japan and rather pointedly "asked" that they open up trade with the US - nevermind that massive ship in the harbor.
* Trope Namer, when Zidler tells Satine she has to drive Christian away so that the Duke won't kill him out of jealousy.
* Trope Namer, where a large gaggle of villagers comes out of nowhere to mock the wicked stepsister Marfushka every time something humiliating happens to her. Crow dubs this jolly band of assholes the Freelance Shame Squad.
* Trope Namer where Alex can't spit out his love for Emma, but Emma understands what he's trying to say. "I uh you too."
* Trope Namer, where a man in an arranged marriage is so unhappy with his wife that he'd rather risk dying in battle than be with her. The wife tricks him into giving her a ring and consummating the marriage, and when her trickery is revealed he resolves to love her for ever and ever.
* Trope Namer, where Eddie Murphy's character used this technique to foil a group of bumbling police officers. Famous for a notorious editing screwup: the banana he holds is curved, but the one in the tailpipe is straight — they couldn't fit the bent one in the tailpipe. Filming mistakes aside, the movie does, surprisingly, play the trope more accurately than most: Axel uses multiple bananas to ensure an effective obstruction, and there is no fire or explosion.
* Trope Namer, where necromancers and evil wizards actually need an item called a Soul Jar to contain their souls and transform into Liches. Notably, in 8 the Soul Jar is implied to be temporary. You put the soul back into the person after the transformation. Corak's Soul in Might and Magic 2 qualifies as well.
* Trope Namer, where Peter Venkman is saying these 3 words when he, Ray, and Egon are booted out of Weaver Hall after the dean claims that their research is nonsensical.
* Trope Namer where Sly's fan club manages to get backstage and wreaks havoc. Kermit refers to them as as Sly's "groupie brigade".
* Trope Namer, where such a field brings its visitors back to life even after dying gruesomely. It served its purpose well, until an incident with the Whirly-Dirly destroyed whatever is generating the field.
* Trope Namer which also toys with it. The only real thing he shows humbleness towards is that he would be able to work less so he could spend more time in Synagogue praying, which points up why he is willing to have his daughters tutored.
* Trope Namer which featured black and white trenchcoat-clad agents always trying to kill one another for no apparent reason. Occasionally a third spy, Lady Grey, would make an appearance and foil the both of them.
* Trope Namer. Which is a subversion because...well, that's what he really went for and brought back.
* Trope Namer. While Waltman has gained back some respect for his work in the indies over the years, very few fans will claim he is their favorite wrestler, and to this day, the phrase "X-Pac Heat" is given to performers who "aren't getting the right kind of heat".
* Trope Namer, whilst falling afoul of this trope six ways from Sunday in most other aspects of its plot, actually manages to just barely dodge this one through the narrator being intentionally vague about its location and geography.
* Trope Namer, who initially took advantage of his bestowed powers purely for profit, competing as a wrestler. However, by failing to catch the criminal who would eventually kill his Uncle Ben, he takes up crime fighting, learning that his inhuman powers have a price. The only concession he makes is to take pictures of himself in action to pay the bills.

* Trope Namer, who introduces himself with a long-winded song listing all of the things he knows, eventually summing up with a long verse about his complete and utter lack of military knowledge (he can barely tell the difference between a rifle and a javelin). He eventually concludes that:
* Trope Namer, who sets many of his stories in the Severn Valley, a fictional region in Gloucestershire. Some notable towns located in the Severn Valley include:
* Trope Namer, who went on conquests to unite the Mongols. Cracked.com described it as something akin to a massive work team-building exercise.
* Trope Namer, with infantry combat using ever-escalating variations of lasers, heavy machine guns and power armour, the best hand-to-hand weapon is repeatedly cited throughout the series as being an axe. They are shown several times as being able to take out shielded and armoured foes almost effortlessly when all ranged weapons available have failed to have any effect at all.
* Trope Namer work in the long run, since it's kind of hard to explain why one guy would have two sets of robots fighting each other, but it becomes moot when Finkleberg manages to escape.
* Trope Namer would be the episode "The Sting", in which Professor Farnsworth has one of these moments when he jokes about Fry being dead.
* Trope Namer, would probably serve you best if you convinced an enemy to read it.
* Trope Namer you", gestures to him to come close and turn around. Dillon does, and Mac's combat knife takes careful aim at the base of Dillon's neck. There's a stab. Dillon jumps and sticks his pistol in Mac's face-and Mac displays the scorpion he had just picked off Dillon's back, now impaled on the knife.
* Trope Naming series left the ghetto behind and its protagonist Samus Aran has become famous for being a badass bounty hunter for whom her gender is largely a nonissue.
* trope naming, who is not easily distracted, but because he's blind he doesn't need to be.
* trope of the girl taking off her glasses and magically becoming pretty.)
* Trope Overdosed The Webcomic saying "In America, spy sap sentry. In Russia, sentry sap spy!"
* Troper and YouTube-user Lord Starfish has a channel for dramatic readings.
* Troper Critical Mass: Many tropers going online to add to a show, trope or other wiki page.
* Troperiffic Humanity First! and the Knights of Purity is their claim that mutants invariably go off the deep end, making even those with harmless powers too dangerous to allow in society.
* Troperiffic — Shows or works that use plenty of tropes unashamedly.
* Troperiffic — When a work has fun with playing numerous tropes with a definite pattern.
* Troperrific in poodle skirt" who his best friend is afraid to ask out to the dance, and the love interest's "abusive greaser ex-boyfriend".
* Troper's Block: When a troper is unable to think of something that was just on the tip of their tongue, afflicting a normally productive Launch Pad session in any number of ghastly drains upon the brain.
* Tropers: Try to post a link to the relevent Image Pickin' thread(s), to make things easier for the Artists.
* Troper Tales: A long-gone wiki project involving recounting users' personal experiences of tropes. We discarded it because it was generating vast amounts of ridicule and not a few major problems. Sometimes people still post anecdotes on discussion pages; these are also Troper Tales and are not generally appropriate.
* Troperus Administerius sit securely at the top of the Wiki food chain.
* Troper Wall (TroperWall/) that some tropers use as a social media space so their friends can write them messages.
* Tropes about the style of a work cannot be Played For Laughs/Drama, though some can be Parodied or Deconstructed/Reconstructed.
* Tropes Are Flexible: Tropes have far more room and variation than some would think.
* Tropes are frequently named in reference to other tropes — and sometimes,

that other trope ends up renamed or cut.
* Tropes Are Not Bad, as seeing signs for Christmas shopping a month in advance before Halloween would annoy anyone.
* Tropes Are Not Bad; most audio book narrators are good at acting as the characters and making the Larynx Dissonance sound less weird (and audio books are great when you want to read but aren't able to actually read the book).
* Tropes Are Not Bad. Naturally, he's a lot more intimidating, and won an Oscar for his performance.
* Tropes Are Not Bad, Superman's anti-KKK radio shows had a real positive impact. They made use of direct information from an undercover reporter to accurately depict both how hateful and how ridiculous the white supremacy group was, and historians credit the broadcasts with helping raise public awareness and turn it solidly against the KKK.
* Tropes Are Not Bad was nearly finished when Capcom executives thought the game was too similar to the first one and didn't expand on the playable areas enough (it would have been confined to a mansion again, basically). The game was redone and the end result was what is generally considered the best game of the "pre-rendered" era of RE.
* Tropes Are Not Good If you want to talk about intellectual vandalism...
* Tropes Are Tools can't quite climb it due to her serious anger issues, and her literal fall foreshadows her later metaphorical fall.
* Tropes Are Tools is highly Troperiffic, containing several tropes per minute/word. But that's just because it's so short in the first place.
* Tropes Are Tools movie aimed specifically at a Korean audience, which later spawned theatrical sequels.
* Tropes Are Tools: Tropes are not bad, nor good. Just devices used to entertain.
* Tropes Examined by the MythBusters found that doing this is far too unreliable to be effective as a defensive technique. More often than not, it would just produce two gunshot victims instead of one.
* Tropes Examined By The Myth Busters, which they actually did. Here were the results:
* Tropes in Aggregate: Meta-tropes that become apparent when looking at the whole genre or fiction in general..
* Tropes that are beyond the control of the characters cannot be Invoked or Defied.
* Tropes that are completely realistic when Played Straight cannot be Deconstructed or Reconstructed.
* Trope Telegraphing: "I know exactly what will happen next because of this trope."
* trope titles, either way it often comes in a Eureka Moment a few hours or minutes after the fact.
* Trope: Tropes themselves can be considered a type of meme used when writing fiction, memetics very well could encompass the study of tropes.
* Tropey the Wonder Dog is airing on the new channel we're launching tonight!"
* trophallaxis, whereby edible matter is excreted from one individual's anus into the mouth of a second individual.
* trophies says "Approximate amount of time to Platinum" when estimating the expected amount of time to earn one of these from a fresh file, and things like "I'm platinuming this game" when beginning a game or in the process of playing it, or "platinumed" when referring to platinum trophies obtained in the past, are common sayings.
* 'Trophy' Active Protection Systems - point defense mini-turrets designed to shoot down enemy rockets, missiles and shells before they hit, saving the tank's armor a lot of trouble, and to an extent countering the threat that infantry with RPGs and missiles present to modern tanks. The Americans and Germans have been working on their own versions, Quick Kill and AMAP-ADS, and the Russians already have a similar system, 'Arena' installed on their tanks.
* Trophy Child she could use to inherit her husband's fortune. When she had a son, she immediately cast Machi out and focused on her younger brother solely because as a boy, the baby has a better chance of being chosen as an heir than Machi.

* Trophy Child who could inherit her husband's fortune... only to cast Machi out of the house once her younger son was born. Mrs. Kuragi openly tells a friend that Machi is "dull" and that she prefers her new baby boy because a male heir has better chances at getting the fortune.
* trophy files' Mr. Game and Watch has no concept of morality or good or evil, hence him doing what the bad guys wanted for a while.
* Trophy Hunt, Joe throws up his morning coffee after he sees the mutilated body of the cowhand. A paramedic does the same thing.
* Trophy Room: Where a character keeps mementos of their greatest adventures.
* trophy to show off with no feelings or thoughts while he likely cheated on her.
* Trophy Wife: A spouse who is mostly there to make someone look good.
* Trophy Wife, his sense of humor is what attracted her in the first place.
* Trophy Wife meet this way. In that while she was drunkenly singing and dancing at a karaoke bar, she fell off a ledge and right into his lap. Then she dislocates his nose with the microphone. He asks her out on a date after she takes him to the hospital.
* Trophy Wife mentions that she's "secretly learning the joint-property laws."
* Tropical Dragon Diver shifter) is surprised and gratified when his girlfriend recognizes the value of his hoard, that being archaeological and artistically arranged. Other dragons just pile up every financially valuable possession they have and call it a day.
* Tropical Epilogue: The final shot of the show is the characters on a tropical vacation.
* Tropical Fantasy Mountain Dew, only sold in Harlem (New York City) was thought by some paranoid blacks to contain infertility drugs dispensed by the KKK.
* Tropical Heat: In the episode “Frame Up”, Nick is framed for murder.
* Tropical Heat: In the episode "Alive and Kicking", Nick passes out from blood loss after being shot. When he comes to, he finds himself in the care of a beautiful lady, who turns out to suffer from severe delusions and doesn't want to let him go.
* Tropical Heat: In the episode "Double Switch" private detective Nick Slaughter does this.
* Tropical Heat: Nick is injected with one in the episode “Double Switch” and questioned.
* Tropical Heat was a primarily Canadian production; the three seasons were shot in Mexico (for tax reasons), Israel, and South Africa. It was set in the fictional Florida Keys town of Key Mariah.
* Tropical Heat, when the detective, Nick asks that the suspects be gathered in one room, and his friend Spider asks derisively if he's going to do "that whole Agatha Christie summation thing".
* Tropical Island Adventure: A tropical island, usually located in or based on the Caribbean, Oceania or Southeast Asia.
* Tropical-Rouge! Pretty Cure. Manatsu suffered heavily and became horrified when she had to eat those after a bento mix-up earlier in the day left her with only rice for her lunch.
* Tropical Tales Of Terror, a horror anthology, the Chupacabras were actually a hidden race of intelligent, predatory birds.
* Tropical trees don't walk, but they harbor enough symbiotic fungi, encrusting mosses or lichens, clinging vines and epiphytes, and boring invertebrates to constitute colonial super-organisms.
* Tropicana is both the financial center of the entire country and known worldwide for providing confidential banking services for anyone. Including known criminal and terrorist groups.
* Tropico 4, the secret police are formed by edict of the Ministry of the Interior. You assign it to an existing service building and they monitor dissent on the island, allowing you to discreetly head off subversive activities and assassinate undesired civilians. They are more effective if they are allowed to tap the island's telecommunications.
* Tropico 4, the state of your soldiers' needs influences how they feel about their

commander-in-chief: if they're unhappy with their lot, General Rodriguez will warn you of their dissatisfaction and to address their needs before they rise up against you. Along with the needs of everyday citizens, the military has to be big enough for the island's population and have enough generals to maintain discipline.
* Tropico 5, the secret police cannot be formed until the Cold War. They monitor the island's inhabitants to discover faction leaders and rebels.
* Tropico Absolute Power El Presidente can choose to print more money; while giving money in the short term, it permanently raises the price of everything else, the more money printed the more the economy becomes inflated. Eventually everything becomes too expensive to afford.
* Tropico, a minimum Swiss bank balance is required to upgrade the palace to a presidency and set water treatment plants, sanatoria, and SWAT HQs to "Happy Powder," "Psych Ward," and "Personal Death Squad" modes.
* Tropico as a late-game mechanic. Each one gives you a different benefit, too- stealing the Statue of Liberty causes immigrants to automatically like you, for example. However, there are some downsides- you can only steal one with each agency for a total of four monuments, and stealing them will anger the superpower who owned it.
* Tropico for Kalypso Software, which went on to have numerous sequels in the hands of other developers (notably Haemimont Games and Limbic Entertainment) while Pop Top languished.
* Tropico games. This lowers the education standards for soldiers, but it has the downside of increasing the chances of them rebelling or leaving the island. Plus, the soldiers you get from this edict are nowhere near as good as those that aren't conscripted.
* Tropico has a literal version in which the Black Market is a marketplace-type structure you can construct on the coast that allows you to buy weapons for piracy.
* Tropico has a mission where you must prevent the DEFCON counter from counting down to 1. Failing quests will decrease it, whereas fulfilling quests and spending money to organize a Pan-Caribbean Summit will increase it.
* Tropico. It buys canned fish and pineapple, corn, goat cheese, llama wool, and cars. It likes you more if you have an open doors immigration policy, low liberty, and bad relations with the USSR. The benefits of good relations are cheaper luxury goods, increased commodity prices of canned goods, and the ability to ask for development aid in the form of 100 immigrants.
* Tropico pretty much indefinitely. You can also invoke this in #4; building a nuclear program will prevent the USA and USSR from invading your island.
* Tropico says that they "slipped and fell out of a 3rd floor window, landed on the street and got run over by both an ambulance and a hearse". Not a single drop in approval rating.
* Tropico (see below) and you're offered the opportunity to rebrand your exports as Chinese to raise their prices. (At the cost of harming relations, naturally.)
* Tropico, "the Middle East" is one of the external powers you need to deal with.
* Tropico, the player (El Presidente) has the option of rigging elections, which moves about 10% of the votes to your favor. You can do this even if you are going to win the election in a landslide, although this will upset your people.
* Tropico the relatively annoying DJ announcer states when you pass the anti-litter ordinance, "El Presidente has passed a new anti-litter ordinance. Remember, violators will be shot on sight, so watch where you throw that bubble gum wrapper, kids."
* Tropico, the Tropican emigration rate increases as some people leave the country entirely to avoid the draft.
* Tropico, this is one of the character flaws you can choose. (The effects: worse foreign relations, and your palace staff gets double pay.)
* Tropico to align with the anti-immigration Nationalist faction and even become its leader.
* Tropico, turn the iron into weapons. However, the US and Russia don't like third party arms dealers.
* Tropico when you decide how your character became El Presidente, a military coupe

is an option.
* Tropico will, when asking you to arrest the Capitalist faction's leader, read the entire text box, including the in-game effect, instead of just the first paragraph.
* Tropico, you can build "authentic Native villages" as a tourist attraction, although the description notes that the people in them are all employees as the natives were all wiped out by European colonialists centuries ago.
* Tropico, you can order your ships to sail under false colors when raiding, in order to foster a war between two nations.
* Tropic Thunder: A giant bat steals Jeff Portnoy's bag of "jellybeans" (actually cocaine).
* Tropic Thunder, Alpa Chino says he's seen Tugg Speedman's first "Scorcher" movie twenty times when he was in 8th Grade.
* Tropic Thunder Alpa makes a crack about a "dingo eating your baby" to the Australian Kirk Lazarus, which he is so offended by he almost breaks character.
* Tropic Thunder art film about gay medieval monks starring (the fake) Kirk Lazarus and (the real) Tobey Maguire. They were shown at the very beginning, leading some people to think they were still watching trailers in the theater.
* Tropic Thunder begins with fake movie trailers. These might possibly make sense on DVD, but it also begins with a fake movie theater candy commercial.
* Tropic Thunder, believing his very real death to have been staged, and the head to be a prop made out of latex and corn syrup (which he attempts to prove with a taste test).
* Tropic Thunder breaks character and continues the commentary as himself. When Movie!Lazarus has an identity crisis and breaks character near the end of the movie is when Downey finally breaks character in the commentary.
* Tropic Thunder by one of the protagonists, an actor, slowly going insane from withdrawal symptoms (due to being a junkie).
* Tropic Thunder can't cry on set, leading to a rift between him and the "award winner" Kirk Lazarus.
* Tropic Thunder) instead of the Stallone-like action hero he was in the movie. Jay Baruchel plays the little-known actor who isn't even mentioned on the poster, which is often what he is in real life. Stiller's part was originally going to go to Keanu Reeves. One of the plot points is that he has trouble expressing emotions, which would've made it this trope.
* Tropic Thunder is basically one giant parody of Hollywood and movie-making as a whole.
* Tropic Thunder is the one who knows what is going on the most. He recognized the Heroin Processing plant, he can read the map, and he's the only one of the actors who had actually read the script and the book.
* Tropic Thunder: Kirk Lazarus, LEAD FARMER, MOTHERFUCKER! (Never go full retard.)
* Tropic Thunder, new actor, Kevin Sandusky managed to boost his self-esteem.
* Tropic Thunder, of all movies, has all three lead characters be crippled by questions of identity and self-worth while the climax is going down. It doesn't last too long, but it's very strange for a wacked-out Ben Stiller farce which earlier on had the lead character wearing a panda's head like a hat.
* Tropic Thunder. Once a top box office but now a commercial and critical failure.
* Tropic Thunder, Pecker is offered cash and a G5 airplane if he keeps his mouth shut in Tugg's abduction and murder.
* Tropic Thunder. play fictional movie stars Jeff Portnoy, Tugg Speedman, and Kirk Lazarus (with Portnoy as more of a wacky fart-joke comedy guy, Speedman as a monosyllabic actioner, and Lazarus as an Oscar-obsessed intensive method actor).
* Tropic Thunder, says that he can't feel his legs; Lazarus has to point out that he's fine, it's just that his legs are knee deep in a pool of cold, muddy water.
* Tropic Thunder's characters standing there with their fingers intertwine showing their commitment towards each others.
* Tropic Thunder spoofed loads of moviemaking tropes and some war movie tropes.
* Tropic Thunder's rageaholic producer is perfectly willing to let his actors die.)
* Tropic Thunder treats it a little differently, featuring an advertisement and a series of trailers before the movie that establish four of the characters (Alpa

Chino, Tugg Speedman, Kirk Lazarus, and Jeff Portnoy) and the current state of their careers.
* Tropic Thunder, Tugg Speedman decides to stay behind the village, believing he can become an adoptive father to a local child. Turns out the child happens to be utterly bloodthirsty, and he changes his mind.
* Tropic Thunder, Tugg Speedman tries to prove a decapitated head is a movie prop. He licks blood from it and nibbles some of the insides while thinking it's just corn syrup and latex.
* Tropic Thunder was shot almost entirely in Hawaii, despite being set in Vietnam (or at least around the South-East Asian area).
* Tropic Thunder. When he gets to the "I don't break character until after the DVD commentary" line in the movie, he continues as Kirk Lazarus. When Lazarus finally breaks character near the end of the movie, so does Robert Downey Jr. in the commentary.
* Tropic Thunder, where Ben Stiller's character holds up a corpse's head and says that it is a prop, using corn syrup fake blood. Becomes a double subversion, since it is a fake head being portrayed as a real head while still being a fake head.
* Tropic Thunder whose humor seems to be entirely fat jokes and lots of flatulence. Likely a parody of Eddie Murphy's latest movies.
* Tropic Thunder with Kirk Lazarus, who is a talented actor because he doesn't know who he is.
* Troping: The act of discovering and documenting tropes in media. It's a neologism that we created and we're very proud of it.
* Troq., unbeknownst to the rest of the titans. The word literally means "nothing", which causes a misunderstanding at first when Cyborg asks Starfire what the word means. So Cyborg casually calls Starfire a Troq later, which makes her furious...because it's not that Troq doesn't mean anything, it's that it literally means "nothing—i.e., "zero or worthless".
* Trotocol: TCP: Transmission Control Protocol, which governs how computers communicate to each other.
* Trotsky as well. Guy took an ice pick to the head, turned around and bit his assassin until he could be detained, before falling unconscious and dying 24 hours later.
* Trotsky is forced into exile multiple times for opposing the Tsarist government.
* Trotsky: Russians play all the characters of other ethnicities or nationalities.
* Trotsky saw everyone was against him, he left, but his struggling attempts to slam a door too heavy to do that sort of deflated any dramatic tension he was aiming for.
* Trotsky: The Tsarist government sends agents undercover among the demonstrators who will open fire and give their soldiers a reason to shoot back, rather than it being unprovoked. It doesn't work as Trotsky just has them disperse so that no violence will occur.
* Trotsky: Trotsky's son Sergei pisses himself when a man threatens his father right in front of him with a gun.
* Trott also gets his moment of this where he screams and when Ross and Smith assumed Trott fell out of the world again, Trott (off mic) says he fell out of his chair. Ross quickly makes fun of him for it.
* Trott's girlfriend Katie has expressed her disgust with her real-life boyfriend being sexualised, particularly in the main Tumblr tags and during streams. Her efforts to appeal for calm only resulted in abuse hurled her way, causing her to publicly vow not to moderate streams again.
* troubador, who often sound as if they were trying to ape Ventadorn (and may in fact have done so).
* Trouble, a book that became so hated and infamous it quickly also become the last book in that imprint.
* Trouble Chocolate is a tree spirit who possesses the body of a wooden puppet after a magic spell goes awry. She gets romantically involved with Cacao, the one who did the spell.
* Troubled Abuser: An abuser who has emotional problems that they need to address.

* Troubled Abuser: An abusive character can inspire sympathy from the audience by his abusive background.
* Troubled Backstory FlashbackFlashback showing the moment a character's life goes downhill
* Troubled Backstory Flashback: Flashback showing the moment when a character's backstory went from happy and peaceful to downright tragic.
* Troubled Backstory Flashback flashes back to a happy memory that transforms into a bloodbath.
* Troubled Blood: In 1985 the cops got a cryptic cut-and-paste note claiming to know where Dr. Margot Bamborough, who disappeared without a trace in 1974, was buried. Detective Cormoran Strike eventually deduces that the note was written by the author of a sensationalist, libelous book about the case, published that same year.
* Troubled Blood introduces Saul Morris, a new subcontractor at the private detective agency of the two main characters, Cormoran Strike and Robin Ellacott. He sexually harasses Robin and uses this as his standard fallback whenever she calls him out on his behavior, or ignores his advances. He is eventually fired after a serious incident at the office.
* Troubled Blood: Robin and Cormoran are investigating the disappearance of Dr. Margaret Bamborough, a white lady missing for 40 years. They interview the daughters of the late Wilma Bayliss, the black woman who was a cleaner both at the clinic and at Bamborough's home. Wilma's daughter Eden scorns at all the attention paid to the long-missing pretty white lady, noting that a black teenager named Tiana Medaini has been missing for a year and nobody cares.
* Troubled Blood takes on a cold case, as a woman engages Strike to look for her mother, who disappeared from a London street in 1974, 39 years ago. Cormoran, being an honorable sort, takes the case only after candidly admitting that the odds of finding out what happened to the missing woman are slim. (Of course, he does.)
* Troubled Blood, the 16mm film retrieved from Bill Talbot's storage is revealed to be a film of the entirely real murder of a young woman. It turns out that the woman in question was a stripper for the Ricci crime gang who had turned police informant, and her death was unrelated to the disappearance of Margot Bamborough, the cold case that Strike and Robin are investigating.
* Troubled Blood: The body of Margot Bamborough is finally found, 40 years after she vanished, entombed in concrete in an ottoman. The developmentally disabled mother and son who'd been living there the whole time never knew.
* Troubled Blood, when Cormoran Strike's old friend Shanker is finished with a conversation with Strike, he simply hangs up the phone.
* Troubled, but Cute) after lore retcons, Annie the Dark Child is still absolutely adorable in spite of being a budding pyromaniac whose only friend is her beloved teddy bear which transforms into a gigantic flaming monster when she wants to hurt somebody.
* Troubled, but Cute appearance and attitude towards everyone but Tsuna.
* Troubled, but Cute blonde girl, and Earl is matched up with a painfully-obvious pre-op transgender woman named Annie. Earl is very disappointed.
* Troubled, but Cute: Despite being anti-social and possibly a criminal, they're considered desirable.
* Troubled, but Cute firebender devoted to winning the probending league and protecting his little brother, Bolin's a boisterous, fun-loving, earthbending ladies' man.
* troubled cases). By the next time we see him, he has control of his powers, a much healthier psyche, and a girlfriend. A throwaway line from his girlfriend (while the couple are in bed) suggests that he is not limited to projecting emotional states, but also sense-data. While they are trying to track him down, Walter links Olvia's mind with his. While he goes to a strip club, and projects his lust onto a stripper, who kisses him, Olivia takes his place in the audience's view.
* Troubled Fetal Position: Character suffers a breakdown that causes them to sit in a troubled position with no regard for reality.

* Troubled Fetal Position: Curling up in angst. This gives a cathartic feeling for them.
* Troubled Fetal Position: Someone curls up into a fetal position when they're overwhelmed by their problems.
* Troubled Fetal Position, too unnerved to fall back asleep, no doubt wondering where Discord will pop up next.
* Troubled Production, and here is an incomplete summary of the songs that were cut from the various productions:
* Troubled ProductionApparently not learning their lesson, SOE wound up doing this a second time in 2005 with the New Game Enhancements (NGE), a particularly reviled update that completely rewrote the game code from the ground up and dramatically changed the way the game was designed and played. A long-awaited Combat Upgrade launched in May of that year had gone over poorly with the community and the developers decided they needed something bigger to draw in more players. A conceptual mock-up of what would become the NGE was created and shared amongst the developers and producers. SOE gave the project a tentative go-ahead and the devs were given a mere six months to put together a complete rewrite of all of the game's core systems, all while putting together the game's third expansion pack AND maintaining the current code with regular updates. Several of the developers would later claim that those six months involved some of the highest workload they'd ever had to deal with and because SOE still hadn't fully decided to use the new system, they had to effectively code for two different game systems at once. The NGE was finally launched with two weeks warning to the players and managed to turn the game into an even buggier mess than it was at launch, resulting in an enormous exodus of players.
* Troubled Production at how the movie turned out and basically only had his name credited because he was required to do so, and it's clear the final product had bigger ambitions but simply couldn't achieve them. It's uncertain if the movie ended up helping to push the anime to end, but regardless the series never produced another animated work besides finishing the anime. That said, it was announced on March 18th of 2020 that the anime would return.
* Troubled Production: A work finally sees the light of day, but its production had quite a number of problems.
* Troubled Production: A work had several problems faced by the development team during production.
* Troubled Production: A work has endured a lot of problems in development despite eventually being finished and released.
* Troubled Production by Fred Brooks (who was project manager on the System/360) describes the struggles to get the project out on time and is considered a classic in tech and business circles.
* Troubled Production by hiring Lord and Miller only to fire them midway through production. In actuality, it was writer Lawrence Kasdan who wanted them to work on the project before he later realized that they weren't the best fit for the story.
* Troubled Production... despite the fact that he was brought in only to do rewrites long after production started and did nothing else (directing, producing, acting) on the film. Could we have a new poster child for this trope?
* Troubled Production featured their performers and one of the songs. As poorly received as subsequent versions of the show were, it might have been worse had this trope been in effect.
* Troubled Production. However, constant apologies in the West is seen as insincere since the apologizer isn't rectifying their mistakes (for example, always screwing up in school and apologizing for the mistakes while still making the same mistakes over and over). The head English localizer of the game grew frustrated to the point of outright telling the Japanese team that constant apologies was making everyone view the dev team as untrustworthy, despite being polite about the apologies. This got the team to see the error of their ways and vow to not repeat the same mistakes.
* Troubled Production movie premiered in 2015 - the first part in August, the second one in September.

* Troubled Production: Production of the work was plagued by problems so great that it's a miracle the work was able to see the light of day at all.
* Troubled Production stories that become more interesting than the finished product.
* Troubled Productions, where he and a co-host interview actors and producers. In the off-season, Reidel devotes a few episodes to chatting with critics from other New York magazines, creating an Event Horizon of snark.
* Troubled Production: The work has finally been released, but the development team faced some problems so harrowing that it's a miracle the work saw the light of day at all.
* Troubled Production, vomited upon ingestion, while over 50 others were hospitalized.
* Troubled Production, who Baker hated, and who wanted a new Doctor to leave his stamp on the show - so Baker eventually left the role stating he felt he had no further to go with his character and citing creative differences with Nathan-Turner.
* Troubled Range, a friend of Mark Counter's accidentally wins a wife in a poker game. The friend thought the ship's captain he was playing against had been betting his ship when he tossed in the marker with the name written on it.
* Troubled Range between Calamity Jane and Belle Starr. In the middle of it, the two combatants break off, stagger to the bar, down a drink, and then start waling on each other again.
* Troubled Sympathetic Bigot: A character is sympathetic, though their bigoted views are not.
* Troubled Sympathetic Bigot. I just wish there could be another way! Alas...
* Troubled Teen: Occasionally, the troubled teen has a pessimistic outlook on life, which is why they act out.
* Trouble Follows You Home: A character makes it home after escaping trouble, only to find trouble waiting for them there.
* Trouble from the Past: A plot where future generations have to deal with the mess made by their civilization in the past.
* Trouble in Paradise dirty Communist, an extremely grubby man with a Russian accent who uses the opportunity of rich perfume company executive Mariette Colet having lost her diamond-encrusted handbag (in reality it having been stolen by the film's protagonist) to harangue her in Russian about what Trotsky said about the rich.
* Trouble in Paradise, Herbert Marshall's character says "Beginnings are always difficult." (He's talking about how to start off a fancy dinner.)
* Trouble in Tahiti, a low held note on the cello fluctuates in volume as Dinah and Sam, not looking at each other, despair of reconciling.
* Trouble in Tahiti gushes over how great he is, but it can't be taken seriously in light of the abjectly cynical context.
* Trouble in Tahiti, the movie "Trouble in Tahiti" ends this way, as Dinah describes it:
* Trouble in Terrorist Town and others playing the game. Since most of the players introduced in the game in this fashion play it badly (such as killing people as an innocent for no reason), this is not a good thing for the game's community.
* Trouble in Terrorist Town, but it went on to win the Fretta contest (a contest to see who could win the best gamemode using the new gamemode framework, called Fretta) and grew in popularity so much it now comes with the game.
* Trouble in Terrorist Town features the elusive C4. However, the greed of the traitors usually leads them to setting it at the minimum of 45 seconds, which means 5 out of 6 wires will disarm the bomb.
* Trouble in Terrorist Town if used to stab an innocent or a detective in the back. To prevent it being too broken, the knife can only be used to kill one person.
* Trouble in Terrorist Town: Technically if you go on the Mogz server hosted in the UK on the maps de_westwood and cs_desperados the modern guns have been replaced by western ones. However they do not have auto reload which means once your clip is dry (Shotgun 7 shells, Double Barrel 2 shells, Lever Rifle 5 bullets and 1 bullet

for the sharps and six for either the colt or peacemaker) you have to pistol whip your opponent or get out of range and reload.
* Trouble in Terrorist Town to set this up, with the use of weapons such as discombobulators, which do no damage but can be used to throw players off high places.
* Trouble in Terrorist Town, what their last words were, and anybody they killed.
* Trouble in Terrorist Town, where there are "innocent" terrorists and "traitor" terrorists. The traitors are the murderers.
* Trouble. In the original lyrics, A and C are males; in the most well-known cover they are females.
* Trouble Island about Dad's terrible camping skills in the car, the latter does this.
* Trouble Magnet Gambit: A character betrays someone by planting something on them that will get the other person in deep trouble.
* Trouble Magnet Gambit: Giving a target an object that is harmless in itself, but will attract lethal attention.
* Troublemaker and Other Saints has one of the daughters of a Chinese family married to a black man; another daughter has a preference for white men and not Asian men.
* Troublemaker", Marinette's idea of laying low involves tiptoeing sneakily while crossing the road.
* troublemakers. Elrohir is the more sensitive of the two, and Elladan has more of a temper. None of that is in the books. By extension, Amrod and Amras, another pair of barely-characterized twins two Ages earlier, are the same.
* Troublemaking New Pet: A character with a pet gets a second pet, who makes a mess and the owner assumes the original pet made the mess.
* Troublemaking New Pet: New pet is up to no good, blames their actions on the older.
* Troublemaking New Pet: New pet is up to no good, blames the older for their own actions.
* Trouble Man, Chalky shoots Abbey, and then he and Pete dump the body in a parking lot. Then one of them leaves an anonymous tip for the police, saying where the body is and framing Mr. T for the murder.
* Trouble Man has a variation. Instead of riding in the dumbwaiter, T pulls himself up the ropes of a disused dumbwaiter shaft.
* Trouble Man, T visits the record office at the police station and has his girlfriend Cleo call the office, pretending to be a college newspaper journalist researching for an article about government jobs for graduates. While the officer who works there talks to her, T steals his gun from the evidence cabinet. At the end of the movie, he persuades a policewoman to pretend to misunderstand the codes she works with. While the officer is explaining them to her, T places the gun back in the evidence cabinet so no one will suspect anything.
* Trouble Man: When Abbey is shot, his flailing arm manages to smash a windowpane.
* Trouble on my Mind by Pusha T ft. Tyler, The Creator is about wanting to cause trouble yet has lyrics such as "Let's hit a couple bars and give some bitches wet willies." The music video features the two throwing eggs at random passerby, doing wheelies in a Rascal and trashing a hotel room.
* Troubleshooters books, (openly gay) Jules, during a romantic-pep/get-over-yourself talk he's giving his boss, Max, says, "I love you," — but when he sees the sympathetic/uncomfortable look on Max's face, laughs and says, "Not like that!"
* Trouble was intended by PeabodySam to be a one-off character who would only appear in a very short scene. Trouble ended up becoming popular enough to become Rex's personal
* Trouble was intended to be a one-off character, but his popularity ascended him to a more important role.
* Troubling Unchildlike Behavior: Child engages in age-inappropriate behavior.
* Troubling Unchildlike Behavior that makes it difficult for her to interact with others. Even though it's obvious that Lilo isn't being abused in any way, he

bluntly tells Nani that what’s going on isn’t an acceptable living environment for her sister.
* Troubling Unchildlike Behaviour that he offered to make him his right-hand man someday. Initially, Law loved the idea, but after circumstances involving Doflamingo's brother (The then-current right-hand) and the Op-Op Fruit, he realized that Doflamingo only saw his minions as tools to be used and sacrificed if need be. But even after Law left the Don Quixote Pirates, Doflamingo apparently kept the Heart seat open for Law.
* Troughton, in real life, loved playing the recorder and carried one about with him to play in idle moments, a quirk that got written into the character. The recorder the Second Doctor uses was his own.
* "Trouser Snake" because he thought Calvin's trousers were really nice. By that point, Calvin just doesn't give a damn anymore.
* Trout Fishing In America has a song about a boy who named his imaginary friend "nobody":
* Trout Fishing In America has been recording regularly since 1992, but despite a couple of Grammy nominations, they've never had a single hit.
* Trout Mask Replica: Beefheart wears a carp's head on the album cover, not a trout's one.
* Trout Mask Replica: In the weirdness of the entire album the song "The Blimp" definitely fits this trope.
* Trout Mask Replica. The track "Moonlight On Vermont" has a line about a white elephant escaping from a zoo.
* Trove: Given the prevalence of extra jumps and wings / flying mounts, you can simply jump over most enemies in dungeons. Combine this with the ability to destroy certain blocks to enter dungeons, and you can simply make your own entry / exit point.
* Trove had this happen as a result of the Sun Goddess, in a bid to protect her people from the Moon Goddess after a long war between the two.
* Trover Saves the Universe: Trover's weapon is basically a purple lightsaber.
* Trover Saves the Universe: Whenever Trover jumps, a marker will appear beneath him, showing where he'll land.
* Trove: This is the bread and butter of the Chloromancer class, which is able to summon plants that can attack enemies or heal allies. Their unique Class Gem can allow them to summon a plant that can shoot at enemies, and their ultimate skill flings plants all around them.
* Trowa and Quatre, with Quatre as a mix of both Brooding and Gentle and Trowa as a tight-lipped but very warm-hearted Gentle Guy.
* Trowa's Heavyarms and Quatre's Sandrock technically get upgraded, but this mostly just consists of making them space-worthy by tacking on a few extra thrusters and slightly improving their firepower
* Troy (2004) featured Greek and other Mediterranean characters, but not a single Greek actor. A sampling:
* Troy, Achilles uses a leaping downward stab to kill a rival army's champion in one blow, and continues using it on various Trojan soldiers. One of the signs that Hector is a worthy adversary is that he is able to block the blow.
* Troy, Aeneas makes a cameo as the civilians escape through the tunnel. A charming little addition considering the movie is basically a big "eff-you" to accuracy of any sort.
* Troy and Abed abandon Britta to "die in lava" so she won't slow them down trying to escape from Professor Hickey (and because she keeps pointing out that the giant Floor is Lava game is a distraction from Abed's fear over Troy leaving). He's displeased enough at their behavior that he spares and recruits Britta instead.
* Troy and Abed also made a "second bedroom" out of blankets when Annie moved in. They initially gave the fort to Annie, but she got pissed when she discovered that there was an entire unused bedroom that she could have been sleeping in instead, which they were using as a "
* Troy and Abed had an argument if having giant ears or a tail would be better, walking into the study room and asking the others, only then realising that a

different group was using the study room. They then have the other group cast votes.
* Troy and Abed In The Morning! Notably, one instance where Jeff berates someone for appearing on this non-show, pointing out the lack of cameras: Abed looks directly into the camera.
* Troy and Abed occasionally do a fake talk show they ended with "Troy and Abed in the mor~ning". Eventually this becomes a
* Troy and Gabriella. In the final movie they end up going to colleges 32.7 miles away from each other, so they can stay together.
* Troy and Jeff are shocked to discover the Zen-master gardener/trampoline keeper is a racist, then recall what should have been signs (we only saw the first two): he calls the garden "a place free from darkness" and tells Troy "and some are just natural jumpers". Finally, he has a big
* Troy, an exaggeration of his original version who despite being far from a saint, was nowhere near as evil.
* Troy Baker (191 cm) and his wife Pamela. He's at least a head or more taller than her.
* Troy Baker (6'3") and his second wife Pamela. There are a lot of photos showing her wearing heels, but it makes little difference to reach her husband's lips. In one of their wedding photos, he had to bend over in order to kiss her on the lips.
* Troy Baker; Min hails from Hong Kong, which was almost exclusively under British control from 1842 to 1997.
* Troy Barnes becomes this in Season 5 after he leaves Greendale to sail around the world with Levar Burton.
* Troy Barnes may be dumb in the most lovable way, but he's still pretty dumb; except for his incredible natural talent as a repairman. He even gets coerced into joining the cult-like Air Conditioning Repair Annex because of his abilities.
* Troy: Briseis and Achilles, in a more serious version of this trope.
* Troy), but it's more dramatic in the movie simply because it compresses a ten year siege into a few days.
* Troy by removing his heel-excluded invincibility and just portrays Achilles as so exceptionally skilled that he might as well be.
* Troy Denning has so many fetishes that it's difficult to count them all, but first, there are the bugs. And hive minds. And powerful women; it seems that in every one of his books, women interrogate men. And in
* Troy Evans appeared as an unnamed cop being treated by Carter in the pilot episode, before returning in a recurring role as desk clerk Frank from Series 6 onwards. It was established that Frank was an ex-cop, so they could conceivably have been the same person.
* Troy: Fall of a City: During his fight with Achilles, Hector is defeated when the former strikes at his sword hand, cutting off his fingers in doing so.
* Troy: Fall of a City: Many of the Trojan and Greek characters are portrayed by black actors, which wasn't true in reality of these ethnicities. Of course, it's fictional to begin with. In fairness, Greeks and Trojans likely also looked different from the actors portraying them, who are mostly of British or Irish stock. Also other stories of the Trojan War really did have black characters, Ethiopian Memnon, a king on Troy's side who comes to fight the Greeks along with his army.
* Troy: Fall of a City: The Amazons, naturally, are a group of warrior women that fight on the Trojans' side.
* Troy: Fall of a City, when it's suggested that he missed the thrill of battle:
* Troy has a no-magic-allowed depiction of the various battles in the historical/mythical Trojan War. The Sack of Troy, despite being a massacre, can count as one too.
* Troy, Hector is pulled into the war by default as his city is attacked by the Greeks. While his little brother, Paris, is far from innocent, Hector himself is the mirror image of our protagonist, Achilles, who is also motivated to duel to defend his younger brother's honor.
* Troy. Hector kills Patroclus in battle, so Achilles kills Hector, so Paris plans

to kill Achilles. Briseis asks Achilles where it all ends, and he replies "It never ends".
* Troy Hurtubise. The kicker? He invented all of this virtually on his own time and resources.
* Troy, in the Battle by the gates the Greeks charge at the Trojans in a mass and we see a frantic Odysseus shouting at the men to get into lines, to no avail and we see them forced back with ease by the Trojans, who stand with shields linked in clear formations. This is likely down to command breakdown, with the forces of multiple kingdoms dragged to Troy by Menalaeus with no central control.
* Troy Rising and any gravity manipulation technology manufacture requires existing gravity manipulation tools.
* Troy Rising and carrying an entire fleet of cruisers, fighters, and millions of missiles. They make the Rangora (the enemy aliens) Assault Vectors (which are pretty impressive battleships in their own right) look puny.
* Troy Rising: At one point, it's specifically mentioned that lasers don't show the beam unless they're going through a debris field or otherwise have things to reflect off of. That said, the beam weapons used by the battlestations are not lasers. It's light reflected and focused from the Sun (and no, it's not possible for it to be that powerful).
* Troy Rising. Due to a quirk of demographics, the profession with the heaviest casualties from the bombardment was the American Bar Association (that's what happens when Washington DC and Los Angeles are major targets).
* Troy Rising, Earth is subject to kinetic bombardment multiple times. The first three bombardments target major cities. Afterwards, humanity abandons urban culture. The last orbital bombardment to actually hit Earth was targeted at the leaders of the major nations of Earth, with the intent of causing paralyzing power struggles. Unfortunately, as all the targeted nations have very clear rules of succession, all it did was piss us off.
* Troy Rising, from a department that is JUST short of being named 'STASI', to keep their people in line—particularly those dangerous intellectuals! But they also widely practice eugenics, giving them heavy undertones of The Nazi, and are (at least SUPPOSED to be) fanatically dedicated to their Emperor, to the point of using kamikaze tactics, just like Imperial Japan. Finally, they also follow the path of the Conquistadores, taking those civilizations they deem useful and worthy as vassals, while destroying those who dare stand against their obviously superior culture.
* Troy Rising humans have a history of technological advancement that no other species can match.
* Troy Rising in one conversation between a human and an alien-based AI:
* Troy Rising, it's noted as unusual that another star system has a dense asteroid belt, contrasted with the comparative emptiness of Sol's belt.
* Troy Rising, "SAPL" was intended to also stand for "Serious-Ass Powerful Laser" and was made of various "Very Dangerous Arrays," "Very Scary Arrays," and "Big Damn Arrays" that officially stood for something else), despite it not actually being a laser; it consists of a whole friggin' lot of mirrors in solar orbit, the most critical of which have Lots of High Tech in order to reflect up to petawatts of sunlight without immediately blowing up. The first time they're used, against an alien cruiser that basically took over the Earth in the first chapter, the beam is aimed at a patch of shield that was collapsed by a breacher round. It misses, hits the undamaged front shields, and punches straight through the entire ship.
* Troy Rising series, the Kazi fills this slot for the Rangoran Empire.
* Troy Rising shielding them from/proxying local hypernet access until they learn how to use their implant's pop-up blockers, or risk sensory overload.
* Troy Rising so she can figure out why they are having such a high rate of hardware failure, which is a punishment.
* Troy Rising: The Horvath believe and practice this. They cull undesirable genetic lines among their own people and try to do the same to humans by releasing five genetically-engineered pathogens into Earth's atmosphere. The first one is a nematode (tiny worm) that starts by producing a pimple on the inner left wrist. If

it's not treated with some basic tools (sanitizing and bandaging the small wound), the infestation spreads quickly, and the person dies. Thus, they seek to cull those who they see are careless, stupid, or economically disadvantaged. The other four are viruses, each targeting specific genetic traits. For some reason, the final virus targets anyone who doesn't carry the gene for blonde hair, with an estimated 90% casualty rate across the globe. The Glatun are already aware of the pathogens and have come up with a cure. Except their rules state that Earth has to officially request aid for them to intervene.
* Troy Rising, the Horvath drop a series of viruses (and one parasite) on Earth. The parasite is designed to weed out the stupid, being incredibly easy to treat, but fatal otherwise. Four of the viruses target various defects - colorblindness, increased risk of cancer, etc. The last will kill everyone who isn't blond, thus eliminating 90% of the human population. Thankfully, we manage to stop it in time.
* Troy Rising, the Rangor, are shocked at humanity's approach to warfare, with those few members of their research-groups who actually realize the threat of humanity being brushed off as doomsayers.
* Troy shows use of spears as a very useful weapon, particularly in Achilles's duel with Hector.
* Troy similar to the above example, Achilles proves he is no slouch by climbing up the side of the Trojan citadel while all the other Greek troops use the main entrance.
* Troy. They let Paris try his duel though insisted Helen stay. Agamemnon told Menelaus to accept, because it would give him personal satisfaction and they'd attack the city regardless.
* Troy Wagner, Joseph DeLange, and Tim Sutton, which makes it more saddening when DeLange and Sutton had a fall out with Wagner due to complicated reasons. Although Wagner has slowly attempted to build back his friendships with the two, with a degree of success, with the hopes that the Bro Trinity will return once again.
* Troy who pooh-poohs the gods at every turn. Hector, of all people, paraphrases Stalin: "How many battalions does the sun god command?" The priest of Apollo acts as an inverted Cassandra — he always gives exactly the wrong advice and is always believed. There are many other changes from the original plays unrelated to the trope.
* Troy with the Greeks being confident that the titular city will fall within days. Instead, it takes far longer than that, and many Greeks are killed before Troy falls. However, the condensed time frame omits the full ten year long conflict.
* Trrrilling Rrrs: Therrre is a heavy emphasis on this parrrticularrr letterrr...
* TRS-80, if you ever look up, a piano immediately falls on your head and kills you.
* TRS-80, pressing a number key 0-7 accelerates you to a pre-selected speed of 2^(number) - 1. Thus, pressing 3 accelerates you to speed 7, pressing 4 accelerates you to speed 15, etc.. It didn't take the players long to discover that if you pressed two number keys at the same time, you'd accelerate to an intermediate velocity — and that holding down all the number keys 0 through 7 at the same time would accelerate you to speed 254, faster than any spacecraft you'd ever encounter.
* TRS. A forum for renaming, removing, and otherwise reforming or refining tropes.
* TR Search-esque game in which Lara must stop the level editor itself from being hacked. Contains "British Mountain Ranges" just a few minutes away from Lara's mansion in Surrey.
* TR/ST's Robert Alfons, like Stefan Poiss, is naturally a baritone, but can very convincingly perform feminine vocals,
* Truant Officer Donald cast as a truant officer, out to catch Huey, Dewie, and Louie skipping school. When he finally captures them, it turns out school was out for summer. Donald shrinks in shame as a result.
* Tru Calling. A very distinctive wipe (courtesy of Zoic's CGI staff) was used to denote the activation of the "rewind" power, and a variation of it was also used going to and from commercial break. It was kept on the DVD release, too, where it still functions as a sign of an act break.

* Tru Calling episode "Drop Dead Gorgeous" centers around a beauty contest.
* Tru Calling. Interestingly, a suicide caused the two spirits to swap champions for an episode.
* Tru Calling not been cancelled, we would have learned that the universe was run by two abstract forces - a creator deity who assigned fate and is Jack's sponsor, and a rebellious power who believes in free will and change, and is Tru's sponsor.
* Tru Calling, only getting a six-episode second season, and then getting cancelled before the final episode (which itself ended on a cliffhanger) even airs.
* Tru Calling play with this. Although the heroine normally knows who she is trying to save, there are times when she never sees the victim's face before her day rewinds.
* Tru Calling, though by the time it was revealed that this was the case and the conflict between Tru (change the past to save people) and her counterpart (keep this past the same and let people die) properly introduced the show was on the verge of being cancelled, so the idea was never fully developed.
* Tru Calling: Tru does this in almost every episode. A number of twists and variations of the trope are also used.
* Tru Calling, Tru relives days to prevent people who were destined to die from dying. There are those who think this isn't a good idea.
* Tru Calling. Tru worked in a morgue, and her encounter with a "ghost" consisted of a body suddenly pleading "Help me." Tru would then suddenly find herself a few days in the past, with no other clue as how to help the tortured soul.
* Tru Calling works to prevent Tru from undoing deaths because he sees changing fate as wrong for reasons that would have been explored had the show not been cancelled.
* Truck Driver's Gear Change: It's become such a cliché, especially during the second half of the twentieth century, that it's now almost impossible to play it completely straight anymore.
* Trucker Norm was... well, take a guess. He was Mike Shaw, who was also Friar Ferguson above.
* Trucker out on this fact, although her reason for not sleeping with him is a pretty damn good one considering he's married, but his frustration comes from her blatant refusal to acknowledge that they have a thing for each other, not simply because she won't sleep with him.
* Truckers, Gurder claims he's never wanted to lead anyone because he sometimes has doubts about things. In the original book, this refers to an earlier scene (which appears in episode 5) where the Abbott tells Masklin that, "The most important thing about being a leader isn't being right or wrong, but being certain. Though, being right usually helps." This line of dialogue is omitted from the TV adaptation, removing the reason for Gurder's worry.
* Truckers will often carry hammers as a self-defense weapon and as a tool for checking tires or breaking off ice.
* Truckers, zig-zags between this and more complicated light patterns and projections, since a larger model is used for close ups.
* Truck Full of Ducks by Russ Burach, a dog runs a business delivering live ducks. Unfortunately, one of the ducks eats the address of the customer he is supposed to deliver them to. While looking for the customer, he and the ducks encounter several odd people, such as an alien whose UFO has broken down and a pirate with a parrot on his shoulder ("I ordered crackers, not quackers!")
* Trucking companies do this as well with their old tractors and old trailers. When the company purchases new equipment or acquires equipment from an auction or merger, the old equipment will either be demoted to spotting duty at a terminal, become a tractor used in the city, used for parts in other tractors, or sold/scrapped. Trailers will be either used in the city, scrapped, sold, used for storage, or in some weird cases, turned into extra space for a loading dock.
* trucks generally offer an excellent bang for the buck. They are usually quite spartan, but simple and reliable, with few things to break, and if they break, most anyone can fix them in any roadside garage. Small commercial trucks like GAZelle are selling like ice cream on a hot day around the less developed world, and KamAZ

has built itself quite a name on the successes of its team in the rally circuit. But it's their off-road heavy-duty ones that are really best in the world. During the hurricane Katrina relief effort Mexican Navy Ural-4320 6×6's were reportedly brought to the streets of the New Orleans, because no other truck could come through.
* Truck Stop is Joe Dillon, who was Williams' Sales Vice President at the time.
* Truck Stop posing next to a gas pump and showing off their bare legs.
* Trucy Wright, a 15-year-old magician who turns around Apollo's otherwise bland life with
* Trudi Canavan, looking at the title probably tells you how well that goes.
* Trudi Canavan, she renames everything to the point of needing a glossary in the back of every book. She justifies this in an interview by saying that coming across the word 'sheep' during a fantasy novel can kinda spoil things. Amusingly, horses are still horses (at least in the Black Magician universe).
* Trudne Sprawy)? With 99% probability it's a policeman (or two), arriving to relay the news that one of the protagonists' family members has been accused of a crime.
* Trudy and Trent had been in a relationship until Trent betrayed Trudy in order to get a job.
* Trudy's murder is the only one the main character has not solved, and it's haunted him for many years. He only manages to solve it in the
* True AI is housed in a super advanced computer core known as a phylactery. The phylactery could split off a backup piece the True AI's consciousness would shift to after being destroyed. The phylactery would then regrow and be able to be split again.
* True Ancestors, and in her ARCHETYPE-Earth form, she has no concept of death, similar to the TYPES themselves.
* True Ancestors at the beginning of the story, albeit by rebuilding her body from scratch at the cost of most of her available power.
* True Ancestor who faked her death and survived to the present day. Her spouse Xiang Yu was an automaton created from the remains of Nezha.
* True and the Rainbow Kingdom, the magical flower first turns the puppy Frookie into five Frookies. After this problem is fixed, it ends up working its magic again, this time making her into a giant dog.
* True and the Rainbow Kingdom, when True wakes Bartleby, he tells her that he can't start his day without a hug from "you-know-who." She asks if he means the Rainbow King, saying that he's very busy, but there's always time for "True tickles."
* true. And the War in Heaven gave birth to the first Chaos God. Well done, Old Ones.
* True and Untrue", True hears of magical cures from a wolf, a fox, a bear, and a rabbit.
* True Anon isn't the sex number, to which Brace responds that the 1 is a guy watching.
* True Art, he has sometimes ranted on SF stigma in reviews of particular works that sometimes get this attitude. He also sometimes points out sometimes complex and subtle literary references, as well as great story writing in those works that often get dismissed as standard sci-fi shlock.
* True Art Is Ancient: Works are considered good if they were made a long time ago.
* True Art Is Angsty, for when having enough tragedy will award a work with critical acclaim.
* True Art Is Angsty: Works are considered good when they contain a lot of tragedy.
* True Art Is Angsty: Your drawing of how life is all bright-colored and sweet is unrealistic and absurd! Real art needs to be dark, gloomy, and depressing!
* True Art Is Incomprehensible (and how science destroys our interest in it)
* True Art Is IncomprehensibleAnyone can understand this tripe, it can't possibly be artistic!
* True Art Is Incomprehensible, but now is taken up in earnest by everybody from fanfic writes to aspiring directors.
* True Art Is Incomprehensible exist is because some intellectuals consider that if

some kind of art is easy to understand, then there's no more analysis to be done and it should be discredited for appealing to bigger audiences. This is, however, very debatable as many works of art are praised for being both simple and yet deep.
* True Art Is Incomprehensible. It's about a journalist who is following an enigmatic robot artist about to complete his secret final work.
* True Art Is Incomprehensible: Most people (read:everyone who isn't too proud to admit it) will tell you most Absurdist works make no goddamn sense. Then again, that's the point.
* True Art Is Incomprehensible turns out to have very straightforward symbolism when you see how it's about this trope.
* True Art Is Incomprehensible was the only page allowed to use an animated GIF, due to having it before the rule forbidding them was established. It was kept until the 2021 server migration broke existing animated images.
* True Art Is Incomprehensible: Works are considered good if you can't understand them.
* True Art reactions (i.e., Show X had little effort put into it, but instead was made to superficially appear artsy in hopes that moronic viewers would watch it not for enjoyment, but rather to feel smart).
* True art was not always angsty. Back in the 19th century, fantasy was quite common in romanticism. It used to attract big crowds because they were useful as a tool of escapism to forget the horror that was happening in real life. With that in mind it should not be surprising that the ghetto back in the day targeted a genre known as "naturalism". The fact that they
* True Beauty, which took a cast of good-looking people and then attempted to see if they were as good on the inside as they were on the outside by testing their kindness and morals. Some of them were, some of them... weren't.
* True Believer plays a recent law-school grad who is thrilled to be hired by his role model, a famous defense attorney, whom he has never met. He is so excited he goes to the courtroom where his new boss is working without even unpacking his bags. There are two men at the defense's table, a well-dressed man with short hair in an expensive suit, and a scruffy man with a ponytail. Guess which one is the drug dealer, and which one is the attorney.
* True Believer: Roger, and apparently Eddie as well in the past, which he regains by the end of the film (thus the title).
* True Believers eliminated... and then MJ gets kidnapped by the Green Goblin, prompting Spidey to swing to her rescue.
* True Believers for Marvel characters, MJ doesn't stay dead for long.
* True Believers. He later gets revived in an unrelated crossover and realizes to his horror that as a comic book character, he can't be killed permanently as long as people want him around. He eventually gets around it by making his comic as boring as possible to get his title cancelled and rejoin Mary Jane that way.
* True Blood Also disturbingly played with by Bill, when he's having sex with his maker Lorena. Not wanting to see her face, he twists her head 180 degrees. Naturally, being a vampire, she's still alive and even tells him she loves him, while he continues to screw her.
* True Blood Also, the main character, Sookie Stackhouse, is secretly a psychic.
* True Blood and a redneck Vampire, then over to one of the main characters who quits her job at a hardware store because of one overly annoying customer.
* True Blood and get to see his background reactions every time the murders were brought up in his presence. They were subtle but very telling.
* True Blood, Andy's daughters literally age overnight - multiple times - but this is because they're half fairies.
* True Blood. An older vampire will always be stronger and faster than a younger one. However, Tara was able to defeat the older Jessica because Tara had been an MMA fighter as a human, while Jessica had no such training.
* True Blood, Antonia ends up erasing Bill Compton's memories instead of Eric Northman's. Bill remembers that he's a vampire, and that he can play the piano, and not much else. He also has a few memories of his maker Lorena, and Jessica has to help Bill re-learn just enough about the vampire politics in Louisiana so that he

can go out in public and not give away his amnesia to other vampires, since he is their King.
* True Blood, an unfortunate police officer wets himself after a close call with Bill.
* True Blood at the beginning of season 3. Do we need to say anything more? That's just one glaring example: most of the major male characters are unusually handsome and muscular, and very frequently shirtless or naked and lingered over by the camera.
* True Blood. Battles between vampires are always determined by how old each vampire is. Even the difference of about a year makes all the difference. They also seem to develop the ability to fly over time. However, their weaknesses also get more severe. A 2,000 year old vampire will burn up in the sun within seconds, whereas a younger vampire will take minutes.
* True Blood became increasingly derided in its later seasons but that didn't seem to make a dent in the ratings.
* True Blood: Before Jessica Hamby got turned into a vampire, she had put up with her deeply religious and oppressive father, who often beat her with his belt to punish her for her faults.
* True Blood, besides the usual vampire weaknesses (sunlight and silver), since vampires are undead, they can be controlled by a necromancer, to the extent they can be forced awake during the day and made to walk into the sunlight to their demise.
* True Blood, Bill can, because he has had so much of Sookie's blood, tell when she's in trouble. Eric can as well.
* True Blood, Bill Compton is very much a surrogate father for his vampire protegee Jessica Hamby. She's much closer to him than she ever was with her human family.
* True Blood/Bill. In "It Hurts Me Too" after Bill pins Lorena against a wall and tells her that he'll never love her, she kisses him. He does not react well to this, first going for her throat with his fangs, then responding to her urging him to make love to her by doing so extremely violently to the point that he leaves several cuts on her chest and twists her head around 180 degrees. Lorena loves every second of it, and dreamily says "Oh William, I so love you." Also, even after Bill tells Lorena multiple times that he hates her guts and can't stand the sight of her, she still has the nerve to ask him "When will we see each other again?"
* True Blood bravely calls their request blasphemous and is promptly decapitated.
* True Blood, but turns out to be a psychopathic addict who imprisons and kills harmless vampires for their psychedelic blood.
* True Blood comes to mind. She's attractive and can read minds, but Vampire Bill and Sam pretty much can't go for 30 seconds without thinking about her.
* True Blood dangerous predators. Show runner Alan Ball actually protested against using this metaphor for exactly this reason but writers still used it, especially once he left the show.
* True Blood difficult to reign in someone with their powers and the vampires' own government doesn't care about that, only violence against other vampires.
* True Blood: episode 8 of season 5, and the premiere episodes of seasons 6 and 7.
* True Blood episode "Hopeless", Sookie and Jason are searching a field when Sookie walks through an invisible portal into the fairy stripclub. Confused, Jason tries to follow her, but when he walks through the spot where Sookie disappeared, nothing happens. He tries a few more times, then curses the fairies and demands his sister back. Sookie reemerges and properly takes him through the portal.
* True Blood, Erik actually does deliver the next line with a certain amount of respect, though the fact of the matter is he's saying, "That's not what you should do," in politer terms. To his queen. Leading to...
* True Blood explode into blood and guts with no skeleton or anything that looks like an actual vital organ, when they are staked or decapitated. They look like bloody water balloons.
* True Blood. Finally, Jessica makes him leave the bar, but not before she makes him shout "I'M A BIG FUCKING PERVERT WITH A BIG BONER FOR JESUS!"
* True Blood for feeding on another human, and makes clear the dude is getting

executed for being a complete idiot.
* True Blood gas station attendant pretend to be a vampire to unnerve some travelers. After they leave, a peeved real (and redneck) vampire threatens the poser with death if he ever does that again.
* True Blood gave us this priceless exchange between best friends Jason and Hoyt:
* True Blood, gets excited when she sees Bill drink the blood of a handsome, muscular man, and says that she "loves to watch two men together." Later, she suggests to Bill that he and Eric resolve their differences by having sex, and wants to watch.
* True Blood gets rid of a "demon" that makes her an alcoholic via exorcism. It turns out to be a scam, but that doesn't faze Lettie Mae.
* True Blood has a moment where Jason — who's just been violently dumped by his current girlfriend, in part because he's jealous of the vampire she let bite her — starts gloomily channel-surfing and finding that every station is talking about vampires, including a nature documentary about vampire bats.
* True Blood has attractive characters of both sexes, fantasy, love triangles, even some gore... the list goes on.
* True Blood has been described as incredibly painful and horrifying by vampire protagonist Bill, who had vowed never to turn another human into a vampire to ensure that nobody else has to experience what he went through.
* True Blood has done this a few times. Bill gets given a Civil War era photo of himself while giving a talk to a group of descendants of veterans of that war, Russell and Talbot have centuries old paintings and tapestries decorating their home, Russell has his collection of trinkets and trophies from down the ages and Maryann not only has her ancient statue but speaks Ancient Greek.
* True Blood has Jessica visit Bill because she doesn't know how to admit to Hoyt that she fed on a stranger in Fangtasia. Bill asks if she was videotaped or photographed doing so because he can't protect her as her maker if that's the case.
* True Blood has Maxine Fortenberry. Once in awhile, she'll show her soft side; such as genuinely loving Tommy and attended his funeral and consoled his brother Sam. But Maxine is a very cruel racist person who would rather kill a non-human (vampire, shifter, etc.) with a big smile on her face when given a chance, regardless of who they are. Such as Sam whom she sold out and attempted to murder with the rioting townsfolk in Season 7; despite telling him that he is part of the family a few seasons ago.
* True Blood has the protagonist actually having been born with a vampire mark, which takes the form of a tattoo-appearing birthmark.
* True Blood has this as one of its basic premises. Sookie has given herself to Bill out of love, without being hypnotized like so many other fangbangers. Also, being his makes her off-limits to other vampires.
* True Blood: In a flashback, we learn that in the 17th Century, Nora was helping people infected, contracting the illness herself in the process. This led to Godric turning her into a vampire.
* True Blood, informs the world at large that "I ain't never gonna be the same after this."
* True Blood: In "It Hurts Me Too" after Bill pins Lorena against a wall and tells her that he'll never love her, she kisses him. He does not react well to this, first going for her throat with his fangs, then responding to her urging him to make love to her by doing so extremely violently to the point that he leaves several cuts on her chest and twists her head around 180 degrees. Lorena loves every second of it, and dreamily says "Oh William, I so love you." Also, even after Bill tells Lorena multiple times that he hates her guts and can't stand the sight of her, she still has the nerve to ask him "When will we see each other again?"
* True Blood: In Season 5, when religious extremists take over the Authority and start up a human trafficking ring, there's a scene where the Chancellors in the Authority have a human man tied up and naked before them. Before they feed on him, Russell sarcastically asks if they should say grace, and Steve mockingly recites this prayer:
* True Blood is a pretty straight example. There are occasionally a few stray

thoughts that don't give Sookie exactly what she's looking for, but they still almost always fall into line with what we expect the character to think ("this jerk better leave right now" "Doesn't she look like a tasty little meal" etc..) and never anything random like "did I water my plants?" or "what a cute skirt, I could use one like that."
* True Blood is a succubus. In this case Succubi aren't outright demonic, and appear to go either way morally speaking. They seem more like talented sex oriented energy vampires, without actually needing to take energy. Considering the character this happens to, this is most ironic, and a major plot point.
* True Blood is staged very much like a scene of a woman in a hospital giving birth.
* True Blood It doesn't work. Oddly enough, she considered regular abortion wrong, but this okay for some unexplained reason.
* True Blood. It even has medicinal value for those who are wounded. Too bad vampires as a whole don't take kindly to the commoditization of their life essence.
* True Blood. It's almost painful to watch a flashback that includes the sweet, well-intentioned girl you know will become a V-addicted nutcase.
* True Blood: Jason runs into this when he has the chance for a threesome with two beautiful women; the only problem is he's still traumatized from killing someone a few days ago.
* True Blood, Jason Stackhouse has a lot of casual sex but finds carrying on an actual relationship to be difficult.
* True Blood. Jason Stackhouse: Irresistible to women, seldom fully dressed, always utterly clueless. When he starts listing out his diet and workout routine to stay so chiseled, it actually seems a little out of character for him to know that much information about anything.
* True Blood Jason Stackhouse will pretty much bang anything female... except Tara, who has a huge crush on him. Of course, considering what happens to the rest of his conquests, that may not be a bad thing for Tara.
* True Blood: Jessica's immediate reaction to finding out that she's a vampire is a little happy dance and a shout of joy as Bill tells her she won't be returning to her abusive parents at all. She doesn't start to think that she's a freak of nature until later.
* True Blood, last episode of the first season, Sookie drops the pitcher she was holding when she realizes the killer is in the room with her.
* True Blood, like Sookie herself. After Sookie realizes that the "light fruit" is a trap for the hybrids (anyone who has tasted it can never return to the human world), she blasts the fairy queen with her light powers. Suddenly, the garden turns into a desolate landscape, and the fairies reveal their true appearance — that of goblin-like creatures with sharp teeth, pointy ears, and claws. Apparently, the queen was the one who maintained the illusion of a paradise.
* True Blood lives and breathes on this trope. Everyone should have sex with a vampire at least once. And you should see the werewolves and shapeshifters.
* True Blood makes it clear that a lot of time has been spent in maternity wards during the intervening years.
* True Blood material, plenty of fans like to hope that some of Claude's sisters aren't there when Warlow kills everyone present at the club in season 6.
* True Blood: Middle-aged Sam Merlotte seems to only date girls at least a decade his junior, and ultimately marries college student Nicole, whose mother sharply disapproves when Sam declares his love.
* True Blood, Miss Jeanette performs an exorcism on Tara's mom to cure her alcoholism. In all fairness though, Miss Jeanette turns out to be a fraud. And yet, Tara's own exorcism results in her accidentally summoning Maryann.
* True Blood novels (see above). The mockumentary detailing the events leading to the series mentions that within hours of vampires revealing themselves, many world cities were engulfed in panic and rioting.
* True Blood, often deliberately looked to be offended during the first season, though she's toned down a lot more in the following seasons.
* True Blood: One girl was more then happy to find out she's a vampire now, telling

how her human life sucked.
* True Blood, only the vampire characters ever have exact/approximate ages given, usually for dramatic effect like Russell being over 3,000 years old or Jessica being 16 when turned in Season 1. The humans' ages are kept vague, not helped by the show's rather fluid sense of time. Lampshaded by Nicole's mother when she objects to her relationship with Sam:
* True Blood, rather a friendly acquintance based on mutual respect, which turned into an eternal bond when Pam (in desperation) slit her wrists and forced Eric to either turn her into a vampire or let her die.
* True Blood religious zealot of a father and defend her mother and little sister.
* True Blood revolved around a serial killer murder mystery. Secondary male protagonist Jason Stackhouse, widely known as a casanova but equally regarded as not the brightest bulb, is brought in by the police as the primary suspect, as he was documented as previously having sexual relations with most of the victims. When video evidence shows Jason actually in the coital act with one of the victims (including rough sex-style choking), it seems his goose is cooked. But when the rest of the tape is played and shows the victim very much alive and laughing, Jason exclaims this is proof he is innocent. One of the deputies nevertheless asserts that Jason might have come back later to murder the woman, and left the tape to throw suspicion off him, causing Jason to retort "I'm not that smart!" One shared look of acknowledgement by the officers and a scene later, Jason walks free.
* True Blood. Right in the first episode she is licked by a stray dog and her grandma's cat is shown purring in her arms while she's having a dream.
* True Blood, Russell Edgington's partner, Talbot, is staked by Eric. Russell then goes mad, stuffs his remains in a glass urn and starts taking it with him everywhere he goes. Until Sookie flushes its contents down the garbage disposal...
* True Blood, Sam and Tara are an off-again, on-again Beta Couple, as well as Arlene and Terry.
* True Blood, Sam Merlotte is played by actor Sam Trammell—a coincidence, since the character was named by Charlaine Harris, author of the novels on which the show is based.
* True Blood season four is a good example: Sookie turns down all three of her love interests. In the case of Bill and Eric, it's a classic "I'm not picking either of you" ending to a Love Triangle. Alcide gets a gentler "sorry, but I don't feel that way about you" rejection.
* True Blood) seems to have been created specifically so straight guys would have a character to gush over.
* True Blood. She also keeps his truck and it becomes her main vehicle for the remainder of the series.
* True Blood - she goes to the fairy land for what seems like a few minutes, only to come back to find a year has passed in Bon Temps. Also happened to her grandfather. He was there for what seemed like a couple hours to him when it had been twenty years.
* True Blood', Sookie has been on the receiving end of enough of Eric's blood that he's wary of giving her much more, or else she'll be a vampire herself. This effectively cranks their relationship up several notches, since they thrive on each others' emotions.
* True Blood: Sookie hears a great deal she doesn't want to, and people treat her as if she is stupid because her power makes her behave oddly. She was also a twenty-five-year-old virgin since hearing what guys really thought was a big turn off, and she only lost her virginity when she did because vampiric minds can't be read.
* True Blood, Sookie was involved in a love triangle between vampire Bill and shapeshifter Sam. She chose Bill and Sam moved on. Come Season 6, Sookie was in a rough spot and made a pass at Sam, only for him to reject her due to his relationship with his pregnant girlfriend.
* True Blood's second season includes a protagonist attempting to use a chainsaw as a weapon, only to get it hopelessly stuck in a counter-top before it can be of any use.

* True Blood takes her to a plantation, proceeds to rape her, and later intends to turn her into a vampire against her will (with the implication being that he is going to continue to rape her when she becomes bound to him as her maker). And based on dialogue from the other characters, it's all but stated that isn't the first woman he's raped or ripped to shreds for rejecting him.
* True Blood takes up so far about 45 days with a 1 year time skip between seasons 3 and 4. Episodes tend to be about 1 day long, but several are real time except for perhaps a final scene.
* True Blood, Terry Belflaur and all the other Marines are war criminals, committing some seemingly harmless acts, such as holing up in a mosque, but also more harmful crimes such as killing unarmed, wounded civilians.
* True Blood) that were pushed to the side for a love triangle (with shapeshifter Sam).
* True Blood: The final season revealed why Lettie Mae was so abusive towards Tara: when Tara was young, her father abandoned them, causing Lettie Mae to descent into alcoholism and take out her frustrations on her daughter. Considering her treatment of Tara over the course of the show, most fans found it hard to believe something like that could actually happen to someone. Not to mention that such an important event in Tara and Lettie Mae's relationship should have been mentioned in the previous seasons. If anything, it comes off as a lazy attempt by the writers to conclude as many character arcs as possible before the series finale.
* True Blood. Their mother is Maurella, Sookie's fairy cousin, who gave birth after her accelerated fairy pregnancy and promptly left her babies with Andy in the human realm.
* True Blood", there are more than a few religious types who find this disturbing.
* True Blood, the Shifters, Werewolves, Werepanthers, etc cannot take their clothes with them when they transform, so they end up fighting nude at least once.
* True Blood, the vampire Godric observed the Viking warrior Eric Northman's prowess in battle, and was so impressed that he turned Eric into a vampire so that he could fight forever.
* True Blood the vampire leaders sometimes give other vampires what they call the True Death by beheading and staking the vampire to be executed. (Sunlight also works).
* True Blood, the vampires' bodies regenerate when they're injured. While this is generally a pretty good thing, it can have repercussions.
* True Blood. They don't look or act like Marines. After his tour in Iraq, Terry is still a private, although this is never explained. In the flashback sequences, Terry appears to be about 40 years old, in need of a shave and haircut, and his whole team is just one big group of war criminals.
* True Blood), this is the reason Sookie was first attracted to Bill: She realized she couldn't hear his thoughts.
* True Blood, to a tee. He is, however, perhaps the only classical vampire in the series.
* True Blood. To be fair, this IS a plot point. The town murderer keeps attacking the women he's been with.
* True Blood to Eric's mortal life in medieval Sweden showed him getting it on with some village girl in a stable, showing that even back then he was a total manwhore.
* True Blood, too. Godric (2,000 years old) and Erik (1,000), Erik and Bill (roughly 150) among others.
* True Blood to protect Hoyt, you know Bill's also being an Overprotective Daddy. After all, he did have a daughter pre vampirism.
* True Blood upon Bon Temps, and she ritualistically rends her victims and eats their hearts; she doesn't see what the problem is, and she does it not to be evil, but because she sees it as doing an honor to her god.
* True Blood using a nationally-broadcast news programme, by rushing into the set while live, killing the anchorman and intimidating the crew to let the camera roll while he delivers his rant.
* True Blood (vampire-filled soap opera/drama that uses vampirism as a fantastic LGBT allegory, the ensemble cast includes a gay main character and bisexual female

character, there are several LGBT supporting characters, subject matter includes queer male romance and queer female romance)
* True Blood vampires are weakened by contact with silver. It hurts too, and will leave burn marks on unprotected skin. Has been shown applied as chains, handcuffs, "pepper" spray, and intravenously as a torture method.
* True Blood. Vampires can move at super speeds, and apparently without harming the human they're currently carrying. They can even do this while wearing high heels and a dress.
* True Blood: Vampires first, shapeshifters, then goddesses, werewolves, fae, werepanthers, and witches.
* True Blood: When Sookie first meets Eric Northman at Fangtasia, she listens in on the thoughts of other human customers in the bar and determines that one guy is an undercover cop and the place is about to be raided.
* True Blood when the scene cuts to Bruce, watching the same episode at home.
* True Blood, where bisexuality is rare, outside of the occasional off-handed "I was bored" comments.
* True Blood Which he then proceeds to hold in his hands as he delivers a speech about vampire superiority.
* True Blood who tended to think with the wrong head. Recent personal tragedy has motivated him to clean up his act.
* True Blood with Sheriff Andy, Portia's brother, due to his ability to act on Bill's legal behalf as his living heir (who isn't trying to have sex with him).
* True Blood with Sophie-Anne, the Vampire Queen of Louisiana. She amassed immense wealth over the years, using undead tax exemption to her advantage. But now that Vampires have come into the open, the IRS is after her.
* True Blue Femininity: Girly girl wears blue to indicate her femininity as a throwback to the olden days of when blue was the feminine color.
* true, but at the same time he admits that he shares the same blood with them.
* "True" by Spandau Ballet plays, you can be sure that it's an indication of this.
* True Capitalist (2008-present) Internet based political radio talk show about the ramblings of a short tempered, alcoholic Texan businessman and the trolls that try to ruin his show time and time again. Despite numerous dramas and doxing attempts surrounding his show, Ghost's adamant fanbase has frequently managed to motivate him back into broadcasting, even after he once left the internet for four years.
* True Capitalist being called a "hambone". It's ironic since Ghost initially used the term to make fun of people who he deemed to be fat, lazy moochers who contributed nothing to society. He encouraged his listeners to use the term in public whenever they saw a "fat, jelly ass", but the trolls who call into his show during the Radio Graffiti segment began to use the insult against him.
* True Capitalist between him and the mostly trolls that get called upon that he almost always loses.
* True Capitalist, called him a racist, a fruitbowl, a hambone, and a reptilian. However, Ghost only raged once he brought up "Hannukah night," failing to even notice the line after it accused him of beating his son.
* True Capitalist calls them, i.e. Fruity-Ass Fruitbowls, Milky-Lickers, Hambones, etc.).
* True Capitalist: Ghost often invokes this trope by name after a particularly effective set of trolls.
* True Capitalist is when a woman gets beaten. He's dedicated shows to explaining how Mother's Day is a feminist conspiracy. The list goes on.
* True Capitalist may have hundreds of hours of radio shows where he espouses his (often extreme) opinions, but next to nothing is known about the man himself. His real name, his face, even his age are all left a mystery, with trolls only going by breadcrumbs Ghost occasionally lets out to piece together things. Though considering his opinions, this may be down to protect himself.
* True Capitalist moments, but he occasionally lets his mean-spiritedness and bullying nature get the better of him.
* True Capitalist Radio does a segment where he pretends to take his many trolls to a woodshed and whip them with his belt, claiming he's the "fatherly influence" they

never had. The trolls just laugh it off, until they get bored when he takes several minutes to do it.
* True Capitalist Radio: Ghost sometimes fell victim to Twitter and Chatroom names that are intentionally misspelled in an attempt to trick him into saying something he doesn't like or doesn't mean.
* True Capitalist Radio has Ghost's enthusiastic and entirely one-sided vendetta against Alex Jones.
* True Capitalist Radio once made the mistake of revealing that he hated Christmas as he was the one who had to buy everyone presents. In response his trolls began playing Christmas songs to him in September.
* True Capitalist Radio THRIVES on this. It's the MO of most trolls to take anything and everything Ghost says and "splice" it out of context.
* True Capitalist Radio until summer 2011. Additionally most of the episodes were made during 2011-2012 and 2016 time frame.
* True Capitalist, unambiguous racism and misogyny, and hateful bullying of everyone who isn't like him. The amoral trolls who make his life a living hell on the other hand often aren't much better, being bullies themselves who make a mockery of endless numbers of tragedies and horrible things just to get under Ghost's skin.
* True Capitalist, uses this trope whenever a woman disagrees with him.
* True Capitalist was to listen to Ghost go absolutely batshit insane from all the troll callers.
* True Colors has Steph but uniquely its not for the player character Alex, who is openly bisexual. Rather if she is asked to seduce Diane the other characters note she awakened something in her. Steph says that it wouldn't be the first time.
* True Companions and turned a planet/moon into hell just because he could.
* True Companions as they fight the Inbit/Invid that have invaded and conquered Earth.
* True Companions fly around inside a gigantic mechanical dragon called Daiku Maryu.
* True Companions: Friends who are loyal to each other through thick and thin.
* True Companions from the previous series). As Korra points out to him in season 4, Zaheer's murder of the Earth Queen only caused a fascist regime to pop up in her place, oppressing the people even worse than she did in the name of protecting them (guilting Zaheer into helping her). They also tried to kidnap the Avatar during childhood to raise her according to their beliefs, which is why she had to live in a fortified White Lotus compound at the South Pole for years.
* True Companions...if we throw in the mid-Season Four brainwashing to sew his hat back on, this guy has spent three seasons (half the series) playing Three-Handed-Hat-Juggling.
* True Companions including Judeau, Pippin, Rickert, Corkus, and all the enlisted men. When Guts decides to set out on his own, young Rickert cries, "The Band of the Hawk is your family! Why would you want to leave?"
* True Companions insisting on acting like the war between Red and Blue is still on, long after both teams had more or less made peace with each other.
* True Companions is an understatement). Luke Skywalker is the only member of the group that 3PO has a friendly relationship with most of the time, and even Luke loses patience with him sometimes.
* True Companions, much to his annoyance. Oden’s death protecting his family and friends still brings tears to his followers’s eyes.
* True Companions respectively). It's implied that, despite being 40 years old by now, neither of them have ever had a serious relationship due to their adherence to this trope.
* True Companions. Somebody who can't do that is, by definition, not Unfettered. It doesn't matter how much else they're willing to throw away; if anything restricts them from completing Goal Number 1, then they don't qualify for the trope.
* True Companions started to become increasingly prominent. Even in real life, friendship was now more cherished by a lot of people around this time.
* True Companions student group with Shyla (another member of the group of friends,

and who is passionately against the war) only to betray both the anti-war group and his friends by having been an undercover government agent the whole time. He tries to minimize the damage by saying that Shyla and the others were all just innocent dupes, and the leader of the student group was only real extremist and responsible for all of the more dubious actions the group took. At the trial, it turns out that the leader of the student group was also a government agent all along.
* True Companions trying to defend against Fate and his minions). Needless to say, the entire group is on the lam (and on top of it, scattered around the magic world).
* True Companions. Up until the Grand Line, all of the crew were in their late teens. Then came Chopper (15), Nico Robin (28), Franky (34), and Brook (88). Post-timeskip adds Jinbe, who's 46 by that point.
* True Companions. When they were both little, he rescued her from being lost in a forest. A recent incident that helped jog her memory of the event would drive her to find him and join his group.
* True Confession, Charley knows that Helen didn’t kill Otto; he has Otto’s wallet and is the real killer. He threatens to tell the police that Helen committed perjury if she and Ken don’t give him $30,000.
* True Confession revolves around Helen's copious lies, and the big one that gets her into trouble.
* True Confessions of Adrian Albert Mole by Adrian for trying to pass his diaries off as fiction.
* True, considering how much the Yeerk war influenced the budding, new conflict between humans, Andalites, Yeerks,
* True Crime, all the controversy caused sales of the cards to go through the roof.
* True crime author Ann Rule's dog always snarled and growled at her friend Ted Bundy and shied away whenever he tried to pet him, despite usually being friendly to everyone. Little did Ann know her friend was a serial killer spending his nights prowling college campuses for victims. Similarly, the cat belonging to the sorority house where he went on one of his final rampages apparently ran away the night of his attack. In an interview with one of the surviving victims, she speculated that the cat must have sensed the impending threat.
* True Crime discussed a murder case that was solved, thanks to a partial shoe-print on a piece of glass that matched the shoes of a person in the neighborhood, who was found to be the killer.
* True Crime Files: Eddie was innocent, and the real killer was a hitman hired by his father who wanted to kill her over their very messy divorce proceedings.
* True Crime: New York City, and the only opponent you had to beat with strategy (mostly blocking then counterattacking) instead of simply button mashing.
* True Crime: New York City, if the player hassles pedestrians and subjects them to unwarranted pat downs, some people may refer to you as "ociffer" as a snide insult.
* True Crime: New York City is this in spades with his zen garden, samurai armor, and katana.
* True Crime: New York City) Marcus "commandeers" someone's car, he'll often spout lines like "You know you're not getting this back, right?"
* True Crime: New York City parodies this. "You have the right to an attorney and some other shit I can't remember." In the first installment, the protagonist sometimes says to suspects after beating them up and cuffing them: "You have the right to remain - unconscious!"
* True Crime: New York City takes place solely in Manhattan and allows the player to roam freely throughout the island.
* True Crime: New York City when aiming at a person's head with a high caliber weapon.
* True Crime since they couldn't buy the rights to the game's original franchise but letting the game remain as it was; even giving the developers extra months to refine the gameplay. They were rewarded hansomely, as the game sold over 180,000 copies within the first few weeks of it's release.
* True Crimes starring Jim Carrey and Marton Csokas is based on the real-life Krystian Bala case (see below).

* True Crime: Streets of L.A. does this transparently; the conclusive ending isn't available until following false leads to three Or Is It? endings.
* True Crime: Streets of L.A. ending in which Nick Kang and FBI Agent Masterson have a dance-off. Kang wins.
* True Crime: Streets of L.A. featured this, but not only in the form of cars crashing and the like: the protagonist can receive training which makes him an exceptionally good shot. Following this training, when aiming at the rear license plate the targeting reticule will turn red. If you fire, the car instantly explodes, killing everyone inside. Oddly, if you were in a mission that required the driver to survive, they would be unhurt in the following cutscene.
* True Crime: Streets of L.A. is a classic ancient wise mentor type, maybe a bit snarky but otherwise doesn't break from his serene detached mentor demeanour. However, in one optional scene, protagonist Nick Kang's failure to understand his cryptic guidance finally begins to tests Wu's patience.
* True Crime: Streets of L.A., Nick Kang hurls a chopstick right into a Triad thug's ear.
* True Crime: Streets of L.A. requiring more fighting skill than any other fight and a tough driving-shooting challenge.
* True Crime: Streets of L.A.. The notes are of such high duplicity because they're actually printed with the Swiss-made plates used for the real thing and purchased by the North Korean government to supply to Russian gangsters. The North Koreans were hoping to undermine the American economy, but the mobsters just use it to finance their own operations.
* True Crime: Streets of L.A. uses this liberally, but I guess the greatest example is when Nick Kang, the protagonist, finishes off the crime lord who had his father killed over a money laundering scheme. While this could be a bit of a solemn moment, as he watches his father's killer burn to death in a plane crash, he follows it up by saying: "Try Laundering THAT, bitch!"
* True Crime: Streets of L.A. you do this constantly with witty comments.
* True Crime: The Governor calls to stay Frank Beechum's execution at the very last minute, when the first drug used in the execution has already been injected, thus the warden has to pull the needle out.
* True Crime. The true story of a vicious and senseless series of murders kicked off an interest in "real murder mysteries," and the genre remains startlingly popular today.
* True Detective also drew heavily on Lovecraftian concepts to articulate a less heroic and more terrifying approach to the RPG genre.
* True Detective, Cohle is convinced that the 1995 murder case he worked and apparently solved is still unfinished. He continues working it long past its closure, believing that there are additional perpetrators to be found and that the crimes are still ongoing. He's right.
* True Detective, creator Nic Pizzolatto makes a cameo appearance as a bartender. Possibly lampshaded as well. Woody Harrelson's character is interogatting the bartender. He then asks the bartender, "why are you making me say this shit?"
* True Detective detective with a substance abuse problem was recounting a case poorly, right up until the last episode when nothing overtly otherworldly happened. It's why the second season, which did not have anything weird in it, was far less popular.
* True Detective. Enough flak came out of this that the Emmys restructured their rules by clearly defining what constituted anthology or limited series and both are now ineligible for the Drama category.
* True Detective, Frank Semyon's business partner, Osip Agranov, is played by Irish actor Timothy Murphy.
* True Detective had a critically adored first season with its dark mystery and atmosphere, but the second season was widely considered to be weaker in comparison seemingly abandoning those very elements. After a three-year hiatus, Season 3 returned the show to form and earned renewed acclaim.
* True Detective: Half of the story takes place from 1995-2002, while the main story takes place in 2012.

* True Detective has some civilian vigilantes accosting an ex-Vietnam War veteran turned homeless man, accusing of kidnapping children in a local town in Arkansas.
* True Detective: In season 2, Woodrugh is a former member of a private military contractor and served in Iraq. It's implied that he committed war crimes while there. Other members of his outfit get involved in the case he's investigating, and he's not happy to see them.
* True Detective, Marty and Rust discover a meth lab booby trapped with grenades. One of the cookers runs and gets blown to bits by them.
* True Detective - Paul Woodrugh used to serve in the US Army prior to being a contractor with Black Mountain. He resigned after BM got involved in scandals, joining the California Highway Patrol.
* True Detective Rust and Marty make a suspect watch a horrible torture video. When he screams in distress the show cuts away to the landscape around them in a wide shot.
* True Detective, Rust Cohle is one, both in the past and in the present-day scenes.
* True Detective, Rust Cohle's single father was a hard-bitten Vietnam veteran.
* True Detective Season 1 focuses on Louisiana State Police homicide detectives Rustin "Rust" Cohle and Martin "Marty" Hart.
* True Detective Season 3: One third of its story takes place in 1980.
* True Detective: Spirals and naked women with horns are recurring symbols in a series of murders.
* True Detective takes place in two time periods: one from 1994-2002, the other in the present in 2012. The third season takes place in three: one in 1980, the other in 1990, the last during 2015.
* True Detective: "Time is a flat circle." The nihilistic hero Rustin Cohl goes into a much detailed description of the theory.
* true "down to the last play" situation, however, is when a player takes a mark or is awarded a free kick within scoring distance when the final siren goes - if this happens, the player is allowed to take their shot after the siren. North Melbourne's Malcolm Blight was the subject of two famous examples. The first was when he kicked a goal from around 80 metres out to defeat Carlton. In the second, Blight had kicked a behind (one point) to tie the score against Hawthorn, but was awarded a free kick as the siren went. He had the option of accepting the behind or taking another shot, chose to take the shot... and missed the goals completely, resulting in Hawthorn winning the game.
* true ending, Spy Fox reprograms William the Kid's robot pilot to send his blimp to Spy Corps. Jail and sets off William's pilot ejector seat. Spy Fox escapes safely on the blimp's only parachute, while William falls and lands in a cell at Spy Corps Jail.
* True Exodia It's clearly designed for laughs and trying to get a proper win with it (by switching its control) is more trouble than it's worth, though that hasn't stopped players from trying.
* True Facts About...-style narration and random asides on animal penises and animal intelligence (or lack thereof).
* True Facts, about the cuttlefish's incredible color-changing skills despite the animal being colorblind:
* True Facts video "Snake and Lizard Tongues", regarding scientist Dr. Kurt Schwenk:
* True Final Boss. Curbstomping the killer bee mecha who has given many top-tier players a run for their money feels so satisfying.
* True Final Bosses is God/Ultimate Rugal, the result of Rugal killing Akuma and absorbing the Satsui no Hadou. If you beat him, Akuma deems that Rugal isn't worthy of his power before seizing control of his body, becoming more Akuma-like in appearance before leaving. This led to some people believing that you could fight this Akuma/Rugal hybrid, but he only exists for this cutscene. It doesn't help that in an alternate version of the character select screen there's an empty square in the center of the screen that looks like a secret character could go there.
* True Final Boss, Geese Howard wore a spiffy suit. Outside the arena, his

"present-day" wear is a reddish business suit.
* True Final Boss shares one eye between two heads, and the eye has to constantly switch between the two heads. Which means that one of the two heads just has an empty eye socket where its eye should be.
* True Final Boss. The former is notable in that even if you're playing as a character whose final boss is supposed to be Akuma (like Ryu or Gen), you will simply fight Shin Akuma first and then you'll face the regular version of him.
* True Final Boss, they are silently given a Lightning Shield to help collect the rings that fly across the stage.
* True Final Boss". This is also one of Ranyon (The series creator) most distinct traits making translating his games very hard due to his obsession of details in the subject the text covers. This is often called "Ranyonese" by fans.
* True Final Boss where Sonic fights both of them, each of them trading places whenever the other is hit.
* true form is a giant mecha-scorpion, although it rarely uses its "stinger".
* True for most spellcasting classes. While their hitpoints can easily compete with the other classes, mages, priests and warlocks can only wear cloth armor which offers low protection against physical hits, and fare poorly in most defensive type of stat such as defense or dodge. In theory, random items could provide any sort of stat, but those never keep up with the more "conformist" items. There are more hardy hybrid types, but they tend to be worse at spellcasting in return.
* True for several titles as well. For example, "Ser" instead of "Sir". "Maester" instead of "Master".
* True for the Sauber Mercedes C9 as well; in the international versions of the game, this car is unlocked by beating the Formula GT World Championship (Formula 1 expy), the toughest and longest championship in the game, which really needs a Formula GT car of your own (from Nürburgring 24hrs), which is in most respects (top speed excepted) is better than the C9. The C9 is useful for 24hrs at Le Mans and other prototype events, but by the time you obtain it you'll probably already have something else that can do the same job, like the Toyota 88-CV from winning the Endurance Race at El Capitan. This is averted in the Japanese version however, which has the C9 as a prize from the Grand Valley 300km endurance race, with the Formula GT championship instead giving you another Formula GT in a special black color (which in the international versions can only be obtained through 100% completion).
* True Friends, has Kitty Pryde and Rachel Summers accidentally travelling to the late 1930s. Kitty, who is Jewish and learned about the Holocaust from her grandfather, himself a camp survivor, decides to assassinate Hitler and most of his staff, until she is forced to choose between changing history and saving Rachel from the Shadow King.
* True Geordie has a liking towards to lions. He has a massive lion tattoo on his upper right bicep and there is a lion poster in his studio. In the interview with Logan Paul, there is a lion figure in the background. He also wore a t-shirt of a lion.
* True giants were created by the Titans to help shape the world. The most common types are sea giants (aquatic giants that look like big scale-covered humanoids) and mountain giants (big roughly humanoid things made of rock). Other types include ice giants and molten giants (recolors of the Mountain Giant model), crystal giants of Outland (basically stone giants with a fancier model) and storm giants (who were afflicted by the Curse of Flesh that afflicted many of the Titan-made elemental races, turning into essentially supersized humans rather than the rocky beings other giants are).
* True Grit, 14 year-old Mattie discovers the effects of recoil at the most inopportune time and place.
* True Grit (1969). Chaney's fellow gang members mock him mercilessly after he's wounded by 14 year-old Mattie.
* True Grit, after the bad guys are killed, Rooster Cogburn rushes Mattie back to civilisation to treat her snake bite.
* True Grit and its two adaptations, "the meanest one, double-tough, knowing no

fear".
* True Grit... an impression which lasts about as long as it takes for her to bludgeon them into submission with her intellect, her business acumen, and her sheer, gimlet-eyed stubbornness.
* True Grit. Deconstructed, however, in that she is still naive enough to be vulnerable, and her lack of innocence as a child leads to an apparently joyless and lonely adulthood.
* True Grit film removes the ambiguity by having him be explicitly killed by falling off a horse.
* True Grit get to finish the business herself, although she still needs her companions for almost everything else.
* True Grit In this instance, he's going for pure intimidation factor and hoping to terrorize some of his numerically superior enemy into fleeing.
* True Grit is a western that takes place in the 1880s. The 2010 remake use a lot of this trope.
* True Grit is described as having a "sweet tooth" (in those words). He is partial to eating his honey cakes with butter and preserves.
* True Grit is somewhere in the middle, trying to be Enlightenment but with a few Romanticist hang-ups.
* True Grit It only results in him talking funny for the remainder of the film.
* True Grit, LaBoeuf gives 14-year old Mattie a spanking with a switch due to not listening to the adult characters. She refused to go home when Rooster and him tried to get her to, instead she wanted to get revenge on her father's killer. Rooster doesn't let him beat her for long though. He gets LaBoeuf to stop by pointing a gun at him.
* True Grit marshals suggested as other candidates who could help Mattie chase Tom Chaney.
* True Grit: Mattie makes repeated references to her lawyer "J. Noble Daggett". She pulls out his name every time she wants something done, threatening legal action against those who get in her way. After about the fifth time, Rooster and LeBoeuf express skepticism as to whether this "Lawyer Daggett" even exists, and the audience might be inclined to agree with them. But at the end of the film a little man in glasses walks into Rooster's room, and introduces himself as lawyer Daggett himself!
* True Grit. Not only does she have an obviously 1960's hairstyle, Mattie also wears black nylon tights at the end of the movie.
* True Grit remake, two outlaws having their hands restrained in this way allowed one to kill the other with a knife before he could talk.
* True Grit, the speed of sound issue is noticeably averted. When Rooster Cogburn fires a rifle as a signal from across a valley, we see a plume of smoke shoot silently out of the gun, followed seconds later by the distant crack.
* True Grit, when a dying man asks Rooster Cogburn to get word to his brother (a preacher). Rooster asks "Should I tell him you were outlawed up?" The response is that it doesn't matter.
* true. Hannibal cut off her arm and had been keeping her captive since.
* True History (all males) and their sons grow inside the calves of the men.
* True History can actually be considered the first known example of many tropes, including:
* True History describes his crew being swallowed by a several mile long whale or fish. Inside he finds a father and son living on an island beset by multiple tribes of fish people. There were the tuna-heads, the flounder-foots, the crawfish tribe, the crab hands, half-catfish merfolk, among others, and said to carry fish bones as swords and spears. They were demanding a tribute of 500 oysters a year from the father and son, so Lucian and his crew liberated the them by going to war with the fish people and defeating them.
* True History ends this way, claiming the adventure will be detailed in further books. Like the rest of the book, this is a lie.
* True History (from around 170 AD) mentions "horse-vultures" among the armies of the Moon King.

* True History is the first work of western fiction about a voyage to the moon.
* True History which, while written to sound like other works of its day, was intended by its writer Lucian of Samosata as a satire about them; he declared it was about "things I have neither seen nor experienced nor heard tell of from anybody else; things, what is more, that do not in fact exist and could not ever exist at all. So my readers must not believe a word I say." Yes, the first "none of this is real" disclaimer.
* True in aircraft weapons where the most popular form of gun armament since WW2 has been
* True in the case of Joseph Goebbels, who had a PhD in literature. Fortunately, and to his bitter regret, he failed at the "warrior" part of this trope.
* True Jackson, True, Lulu, and Ryan disguise themselves as pizza delivery men to get into the recording booth with Justin Bieber.
* True Jackson, VP above, it's not clear whether Lulu is Filipino in-universe.
* True Jackson, VP after True and Jimmy, while celebrating, accidentally kiss. He bashfully says goodbye and leaves. True waves goodbye and then faints after he leaves with a lovestruck grin on her face.
* True Jackson, VP and watching him immediately stand in this position for the imaginary camera.
* True Jackson, VP, an over the top villain like Robbie, has this line when True and her friends try to escape his castle.
* True Jackson, VP being her normal target like asking if when she went to sleepovers she wasn't afraid that a pterodactyl would take her.
* True Jackson, VP does this with Max and his girlfriend. When he gives a normal proposal, she says no because his proposal isn't wacky enough. True goes to talk to her, and tells her that if she loves him, he doesn't have to "propose from a lawn chair suspended by balloons". She decides that that's exactly how she wants him to propose. He is afraid of heights. It still happens.
* True Jackson, VP every main character borrows True's "You said what now?!" catchphrase at least once.
* True Jackson, VP Kopelman is portrayed by Executive Producer and writer Dan Kopelman.
* True Jackson, VP movie has an actor sloppily juggling an American and Scottish accent...while playing a Frenchman.
* True Jackson, VP the title character is prone to say "YOU SAY WHAT NOW?!"
* True Jackson, VP when frightened offscreen, so his vocal cords do function.
* True Jackson, VP, when Oscar and Amanda are discussing why Amanda keeps losing assistants.
* True Lies, Ahnold turns a fuel truck into a hilariously effective flamethrower by shooting the nozzle.
* True Lies), and barely hits the water before exploding in a massive fireball. It falls a whopping ten feet. The film also has the scene where snowmobiles explode massively after hitting trees.
* True Lies (and plays it for laughs) as a car full of terrorists totters on the edge of a bridge. They have just enough time to start cheering before a pelican lands on the hood of the car and unbalances it.
* True Lies. Bonus points for being performed while hanging upside down using only his legs to hold onto a rope.
* True Lies, but his nemesis shoots the fuel truck... with a rocket-propelled grenade.
* True Lies, Charlton Heston makes a cameo as the boss of Ahnuld's character. He sports one of these, as well as several gold teeth.
* True Lies considered a crime nowadays—rape by deception), B) She's clearly uncomfortable, and C) He continues groping her even though she's telling him "No", to the point that she has to forcibly push him away to get him to stop.
* True Lies fantasizes about smashing Simon (Bill Paxton)'s face, for messing with his wife and then bragging to him about it, is particularly hilarious.
* True Lies filmed the scene where she dangles for her life from a helicopter on her 35th birthday.

* True Lies Gib is forced to step behind a lamppost when a terrorist opens fire on him. Despite said terrorist scoring several hits on the lamppost - and Gib being noticeably wider than it - he emerges unscathed when the terrorist runs off.
* True Lies had "The Omega Sector" which seemed to be directly inspired by SHIELD up to the point of having Charlton Heston appear in an eye-patch.
* True Lies Harry does this while bound to a chair, and under the effect of truth serum, just as Samir prepares to inject him with him poison. So they don't take him seriously until he demonstrates his ability to do what he promised.
* True Lies: Harry eyes are the only thing lit during the hotel scene. At the very end the lighting is adjusted so that Helen's eyes are highlighted like this when she gets the "Boris and Doris" phone call.
* True Lies: Harry has been captured by the bad guys and is tied up. The torture technician asks him if there is anything he would like to tell him before the torture begins. Harry, unable to lie, gives a detailed description of how he intends to escape and kill his captors. All through this, his captors listen in amusement. Until he proceeds to do exactly what he said he would.
* True Lies, Harry is heard barking orders over a radio to get Miami emergency services and so forth into place. "This is not a drill, you understand that?"
* True Lies Harry shoots one of Aziz's mooks several times in the chest in the middle of wrestling with the other one for control of the gun. The shot mook spastically lets off a burst from his submachine gun that goes nowhere important.
* True Lies: Harry uses binoculars to watch the slimy used car salesman he thinks is sleeping with his wife. His partner makes several quips about the situation, and we know one has hit a nerve when we see one of the lenses crack under Harry's grip.
* True Lies has 555-2439. Another 800 number is written on their cars, too, for some reason.
* True Lies has a cat fight between Helen and Juno in a runaway limousine.
* True Lies has Arnold dual-wielding a pair of Uzis. It's quite awesome.
* True Lies has character Harry Tasker (Arnold Schwarzenegger) grabbing his wife by one hand while the limousine she's travelling in barrels towards a broken gap in a bridge, while he's reaching from a helicopter.
* True Lies has Gib saying "I'm gonna go to hell" as he's sending Helen on her "mission"
* True Lies has him punch another car window without injury. Bizarrely, in reality he actually missed the stuntglass and broke a real car window.
* True Lies Helen Tasker moved her wedding set from her left hand to her right. She did it at first because she was pretending to be a prostitute. She left it there after finding out the hard way her husband is a spy who's been lying to her their entire marriage. Once he rescues her, though, he remarks that her ring is on the wrong finger. He replaces it on her finger as they make up.
* True Lies how he was going to kill the guy, right before revealing the cuffs were off.
* True Lies is a comedy, so this scene is deliberately a bit over the top. Also consider the answer he gives to Helen's first question: "Are we going to die?" Answer: "Yep." (She didn't ask, "Are they going to kill us?")
* True Lies is a terrorist group that is considered vicious and brutal even by Islamic terrorist standards.
* True Lies, Jean-Claude Parachino plays a bit part as... Jean-Claude. He's the guy who records the lines Harry plays back when Helen poses as a prostitute in the suite.
* True Lies know what she's going to say. Harry has to fast-forward past a bit of the tape where the speaker thought she'd be wearing nylons, and then he has to rewind it to repeat a request when she protests.
* True Lies. Not only that, she actually killed a bunch of people in the process.
* True Lies said in the exact same tone. Note that the former was the set-up for the latter, establishing the fact that he was, in fact, unable to lie: "They've given me a truth serum." "Is it working?" "Ask me something you know I'd lie to." "Are we going to die?" "Yup!"
* True Lies. Tasker (on a horse) chases a terrorist (on a dirtbike) into the lobby

of a hotel. The terrorist rides right into a glass-walled elevator and takes a hostage. Tasker rides into the next elevator, with a well-to-do couple who wind up pressed against the glass with the horse's rear in their face. And the whole ride up, Tasker and the bad guy are glaring daggers at each other.
* True Lies: The janitor doesn't notice the jet flying around outside until it crashes into the window.
* True Lies then borrows one to kill the rest. The dialog implies that he had experience with Harriers which in turn implies that he has had access to Harrier training, possibly as a Marine pilot.
* True Lies to make her dress look sexy, she poses in front of a mirror.
* True Lies, when Albert "Gib" Gibson (Tom Arnold) is shot at and he hides behind a lamppost, as soon as the gunfire stops he checks out his "package".
* True Lies, when Arnold's character and his wife embrace and kiss while a nuclear bomb goes off behind them.
* True Lies. When Helen relates how she first met Simon, he's being followed by a couple of government-looking types, one in a trenchcoat. Given that Simon is not a suave superspy but actually a fraud trying to get into her pants, it's likely just her imagination working overtime.
* True Lies, where Arnold Schwarzenegger's character Harry Tasker is captured alive so that he can document for the authorities that the terrorists are capable of carrying out their threat, and afterward when they intend to torture him since he's an American spy who most likely has some valuable information in his head.
* True Lies, who really is a secret agent, to give her the excitement he thinks she's looking for. Before he can reveal everything, actual terrorists kidnap them both and things escalate from there.
* True-Life Adventures — documentary series. Seven shorts, six features, and one "True Life Fantasy" feature.
* True-Life Adventures, particularly due to the faked lemming suicide scene in "White Wilderness".
* True Life documentary series, with topics like, "I Have Schizophrenia", "I'm a Staten Island Girl", "I Don't Like My Small Breasts", "I'm Embarrassed of My Mom", and "I'm Living With My Ex" (among others), running since 1998.
* "True Life: I Have Embarrassing Parents" has featured a wannabe rocker dad, a couple of
* True Life profiled people with these on the episode "I Hate My Tattoos". The first person was a former criminal who got his tattoos done while drunk by a friend (who wasn't a tattoo artist), and as a result, he looked like he had a child's drawings all over his neck. The second person had tattoos all over his body but was trying to get a white-collar job. The third person tattooed her boyfriend's name on her arm, only for them to break up shortly afterward.
* True Love and was instantly pushed back, with her using words like "That's impossible!" and "That is Wrong!". Poor girl.
* True Love has a lesbian variant, with the young teacher and her student mutually falling for each other after sharing a mutual appreciation for art.
* True Love Is a Kink: When romantic attraction and carnal attraction are one and the same.
* True Love Is Boring: Conflict among lovers is considered more exciting than them being happy together.
* True Love Is Boring get together, but the story continues, expect them to be broken up by the time we get back to them.
* True Love Is Boring: If the status quo of the character forces him/her to remain single or without a couple.
* True Love Is Boring: When a couple doesn't stay together because them being happy together kills interest in the story.
* True Love Is Exceptional: A character falls in love with someone who is usually not their type.
* True Love Junai Monogatari), and another (Katsuya's sister Arisa) goes to a local all-girls highschool, therefore they can fill in this trope if they're pursued.
* True Love Junai Monogatari Chiemi Fujimoto, will catch the PC, who's given the

option of either telling her that he was cleaning up or flat-out admitting his peeping; in any way, she lets him go but warns him that she won't have mercy the next time.
* True Love Junai Monogatari is that she'll be willing to have sex with him.
* True Love Junai Monogatari. She comes under no suspicion by any of the students she interacts with other than the PC, and the PC only begins putting two and two together when he sees her without her glasses on.
* True Love Junai Monogatari's prospect love interests are women in their early-to-mid 20's: the nurse Misako and his homeroom teacher Yumi.
* True Love Junai Monogatari. The PC can only choose one of them, though, risking to lose love points with one girl while increasing them with the other.
* True Love": Milton is a programmer, and Joe is his experimental program. As the story progresses, Joe's dialogue gets longer, but it always retains a certain amount of fictional computer jargon, especially in the narration.
* True Love's Kiss cures all curses, yet Snow White and Prince Charming occasionally go looking for curses that have befallen one or the other.
* True Love's Kiss: Lovers share a kiss that cures a problem/causes a miracle to happen.
* True Love's Kiss, of the Valkyrie Brunhilda who was punished by Odin to sleep on a couch surrounded by fire and was awakened with a kiss from the hero Siegfried.
* True Love's Kiss the original versions of "Snow White," "Sleeping Beauty," or "Frog Prince."
* True Love's Kiss when Shrek takes a potion that makes him a handsome human and restores Fiona's form... and when given the chance to make this permanent, she passes it up because they were both happier as ogres.
* True Love's Kiss with the prince in order to win her bet with Ursula and not get turned into Ursula's prisoner. Ariel and the prince have a very romantic ride on a boat, and are about to kiss... When the two eels who are working for Ursula overturn the boat, so as to keep Ariel from winning the bet.
* "True Love" was cut from later productions but its lyrics and melody are still heavily referenced in
* True lycanthropes (i.e. born, not infected) can switch between humanoid and bestial forms at will. Infected lycanthropes can learn to control their shifting to an extent, but voluntarily changing into hybrid or animal form automatically changes their alignment based on which variety they are.
* True Magic mages in charge who have made "harassing peasants" the National pastime. Although, there is the occasional good noble...
* Trueman Bradley from the first book once lost $10,000 at poker and drunkenly accepted a loan from the mobster Benvolio. He paid it off as soon as he could, but Benvolio blackmailed him with the security footage into helping him hide Benvolio's illegal alcohol production. Things escalate, and by the time he's caught he's guilty of vandalism and attempted murder.
* Trueman Bradley has Asperger syndrome, so although he knows most common expressions, he has a hard time recognizing and understanding them in context.
* Trueman Bradley: In the first book, Trueman is trying to break into a warehouse when a cat runs out of the garbage behind him. He's so jumpy that he screams and drops his lockpick. Even after he sees that it's just a cat, his hands are shaking so badly that he can't finish picking the lock.
* Trueman Bradley: In the second book, the cat burglar Mark Chapel wants to join forces with Trueman because they're both genius Aspies. He thinks they could be one of the greatest criminal teams in history.
* Trueman Bradley is about to murder Trueman with an axe, Buckley bursts in and begins fighting with him.
* Trueman Bradley, Mrs. Levi makes raspberry lemon cakes because she knows they're Trueman's favorite.
* Trueman Bradley novel, Trueman notices his taxi driver following him into the bank. It turns out the taxi driver is actually Detective Sam Buckley, who saw that Trueman was both extremely rich and very naïve and decided to follow him to prevent him from getting robbed.

* Trueman Bradley runs to the bathroom during Trueman's hearing when he's accused of fabricating evidence against Trueman.
* Trueman Bradley's driver Sal Valle drives a thirty-year-old car on the verge of breaking down. Trueman hires him as his chauffeur and gives him enough money to buy a nicer car.
* Trueman Bradley so he could be just like his hero, the comic book detective Slam Bradley.
* Trueman Bradley: While trying to deposit money at the bank, Trueman sees a man in a hat, trenchcoat, and sunglasses following him. He immediately recognizes the man as his taxi driver because of his cologne and the birthmarks on his cheek.
* Trueman Bradley who decorates his penthouse with high-quality reproductions of many famous paintings.
* True Meaning of Christmas from some special children he met on the job.
* True-Name Nemesis No Sells anything a chosen opponent can throw at it short of a board wipe.
* True Name, or worse if the summoner botches a summoning ritual. When trying to summon high-level spirits, even the smallest mistake can get one eaten alive.
* True Names", about a group of hackers who take on the US government — until they encounter something online much, much worse. Unlike other cyberpunk writers of the time, Vinge was a computer scientist who had actually used the Internet and had some idea of what it could do. The story's focus on online anonymity remains relevant today.
* True Names" as a possible solution to Erythrina's health problems—the possibility is remote, but not necessarily completely out-of-reach.
* True Name, the total of their identity and experiences summed up in two or three words. It can only be learned from you or the one closest to you, and whoever has it can exert a great deal of control over you. This can be a good thing, however; someone you can trust with it can cast spells that affect you, such as healing spells, with a huge boost.
* true nature. This by extension makes Leliana one of the very few non-Wardens to know the real reason why only Grey Wardens can end Blights.
* true near two hours) is a 20 second cutscene in which Ezio's mom says thanks, then gives him the Auditore Cape, whose only function is make everybody attack him on sight. Everywhere.
* True Neutral and extremely powerful duo designed specifically to ensure that magic remains hidden. However, that's not to say that they have any reservations about killing.
* True Neutral as he stalls for time by fighting X and Zero. When he shows up in X6, he has no relation to the crisis at hand and is merely hunting for Nightmare Soul for his own profit (note that X and Zero are also collecting Nightmare Soul.) When defeated, he has no hard feelings and merely departs. It seems he just wants to get his job done.
* True Neutral. As such, the merchants and others interested in keeping the portal towns on Outland try to work to make sure there's a bit of darkness in Ecstasy, some light in Hopeless, a bit of order in Xaos and some spontaneity to Automata.
* True Neutral. Intelligent true neutrals are quite logical in how they go about things, including morals.
* True Neutral nature god, right down to his holy symbol, is a dead ringer for the Anglo-Saxon "Green Man" figure.
* True North she kills an entire village because its inhabitants refuse to tell Regina Snow White's whereabouts.
* True of most "heavy" weapons, including rocket launchers, anti-materiel rifles, and grenades: all of them are stopped by the flimsiest of cover. However, in
* True of the original generation 1 Transformers as well. Autobots were ordinary citizens, while Decepticons were the military caste. What's more, Decepticons could fly, and the first Autobots could not.
* True omniscient: the story is described from an external perspective, and any character's thoughts and feelings may be delved into. Often confused with multiple narrators. A truly omniscient narrator doesn't need scene breaks to switch to a

different point of view, and won't stick to one character for a whole scene, because then the scene would be in third person limited. This was the most common POV in literature before the twentieth century. In modern times it is particularly associated with works with an "epic" feel to them, such as
* true, only loosely based on truth. The Swedes had been Dan Browned. And were mad about it. Since then, the books have been presented and sold as fiction - after Liza Marklund became famous for her crime fiction. The first book was also published as not written by Liza Marklund at all. She had used a ghostwriter.
* true origins to bring an extraterrestrial army to Earth, Thor first demands that people speak respectfully of his brother... and then, when reminded of Loki's crimes, weakly replies that, "He's adopted."
* True Pacifist ending. While what we see is incredibly upbeat and happy, that doesn't stop people from exploring just how both human and monster society deals with such a sudden change in dynamic.
* True Porn Clerk Stories was a blog by a woman who worked in a video rental shop. Being a small, independent shop (and not, say, Blockbuster) a very large segment of their business was in porn. Some of the customers were rather colorful.
* true power is realized... yeah, it fires as fast as you can smash the Fire button.
* True Q (watts and other units of power already contain an implicit time measurement).
* True Q", when the Q continuum want a word with Q, his shadow comes to life and speaks to him.
* True Remembrance, destroying memories is used as a method of treating depression.
* True Resurrection shaman he once was, not the vampire he had become.
* true resurrection (the most powerful resurrection spell, capable of reviving a person even without a body) a story-breaker, and it will never show up in the comic. He also mentioned that the few monsters capable of casting it naturally would demand at least one life in exchange, which, in most cases, is too high a price for the characters to reasonably pay.
* True Romance (1993). The battery pack for the wire worn by Elliot drops down into his underpants, and he keeps trying to push it back up again. Fortunately no-one notices.
* True Romance believes that he's black, but he's actually a mix of several races. He makes a great show of incorporating stereotypically black speech mannerisms, wears dreadlocks, and makes racist comments against white people he meets.
* True Romance came just shy of a $13 million gross, and would have needed twice that to even start making a profit, but has a 92% on Rotten Tomatoes and has become a cult classic in the years since.
* True Romance ends with a big standoff between the police, the mafia, and the bodyguards of a Hollywood producer. And Clarence & Alabama.
* True Romance Virgi is bemused when he accidentally finds the suitcase hidden under the bed.
* True Romance when Christian Slater's character goes to buy "the two biggest, fattest burgers" a burger stand has, two chili fries… and a Diet Coke.
* True Romance: When Clarence shows up at Drexl's den to intimidate him, Drexl offers him some Chinese food from his spread, which Clarence rejects. Drexl tells him that if he'd gone ahead and casually chowed down as if he hadn't a care in the world, it would have been very impressive.
* Truer to the Text was originally supposed to come out in Fall 2014 but has yet to come out as of Summer 2019. It's still in production as of 2018.
* Truer to the Text: When an adaptation is more faithful to the source material than previous adaptations.
* True Slaves), the Covenant's citizens enjoy a far more healthy life than those of even the main Empires. Unfortunately for outsiders, that means they might get their ship captured and themselves dragged to "Blood Farms" for having their blood used for the rituals, research, or even nourishment of the Blood Raiders.
* True Source unless angry. Trapped in a sinking ship, her only option is to fully surrender to the Source, and thereby control it.

* True Stories: Perhaps the nicest, most idealistic example of the Trope, in which the Narrator says near the end of the film that he wants to forget everything he saw - because it's so nice to experience Virgil again as if for the first time.
* True story of a military officer who'd been serving for 25 years and who showed up at sick call one morning to be seen for a sore throat. The medical technician checking him in did something that apparently no one had thought to do in years, and printed off an entire list of all his physical problems and impairments and attached them to his sheet for the doctor to review. The doctor greeted the officer, took one look at his list of injuries, and recommended immediate processing for medical retirement. During the retirement physical, it came out that he should have been medically disqualified from his last deployment,
* True Story: The modern day Taser gets its name from an acronym of this example (
* True Strength, the best girdle in the game, can only be acquired by maintaining Paragon of Order status, meaning the player must be crowned a Champion of Law and must never have committed so much as a single chaotic act. Not only is maintaining this status fairly difficult due to the sheer number of actions and quests that the game considers chaotic (including several quests leading to the
* True Swamp kill a man and use his skeleton as a framework to become one of these.
* True Tail, a giant brute bear named Brutus looks after a small young kitten named Caleb. Caleb is also an orphan, so in this series, a bear is the closet thing the kitten has to a protective father.
* True Tail by Melody's family and one of Melody's reasons for training to become a bard being so she can sing about her adopted younger brother's heroic exploits.
* True Tail, Doh-Li the priestess is the last Kirin alive, since then, her race has been known as a lost ancient species and she wants to avenge her race.
* True Tail, Eldricth the Necromancer has an army of skeletons that are on green fire!
* True Tail there is a phoenix wizard named Kanikus, who wants to find a way to become mortal, because he has outlived all of his friends for millions of years.
* True Tail, the two girls are Doh-Li the Sorceress and Melody the Bard.
* True Tail, Viktor was laying a sofa with 4 different women swooning over him.
* True Talents, Cheater cheats at poker by using his telepathy to read the other players' minds and learn their hands.
* True Tears has the main character choosing Hiromi at the end, who is the first girl introduced and the first girl he crosses paths with.
* true telepaths crew, each of them hearing the message in his or her own language, and for the realistic illusions they project.
* true", the instrumental's claustrophobic and heavy atmosphere reflected Dilla's thoughts during his last moments on the mortal coil.
* True to her character in Batman, Cassandra Cain's style of speech in
* True to its gothic aesthetic, the final battle between Eric Draven, Top Dollar and his minions in
* True to life However, at his actual trial, he wasn't really charged with this.
* True to the comic, film, and video game examples, Iron Man pulls this off fairly often in
* True to their nature, this eventually got (more than usually) ridiculous.
* True to the series' Film Noir. Dwight himself lampshades this weakness in "The Babe Wore Red", when he first finds the titular babe and thinks "One look at her and I know I'm in trouble deep." He risks his life once more to save this woman.
* True to the trope's guidelines, it also happened in the last episode. This is signified by Optimus suddenly gaining some degree of facial expression without relying on the
* true victory isn't to kill your enemies, it's to make them believe they were wrong to ever oppose someone of your greatness.
* True Villains and doses himself with a hallucinogen — everything he's seeing looks comically distorted, but anything that looks normal is an illusion broadcast directly into his brain.
* True Villains and steals young women's skins to keep her youthful appearance. Sebastian is startled to learn her real age, but no less interested.

* True Villains, Bayn fills in new villain apprentice Sebastian about Xaneth's past.
* True Villains Elia's body is "held together" by Dark magic, which means she collapses from organ failure the moment the effect is disrupted. However, a healer is able to keep her alive until she wakes up and fixes the spells. She retains her youthful appearance all the while — because it came from a young lady whose skin she'd stolen.
* True Villains for the first time because of something she wrote, she is absolutely overjoyed.
* True Villains: Gray was ready to strike Sebastian down, but Mia intervened just in time. One of the reasons Sebastian made it out of there alive.
* True Villains had to train like mad to keep a necromantic injury from draining his life force and killing him. When that injury was healed, all the extra energy that had been feeding the injury was added to his physical strength.
* True Villains is able to do this, likely because he is just dang powerful. And after Sebastian gets his aura fixed, he is able to do this as well in the fight against the Paladin.
* True Villains makes his would-be torturer run out sobbing just by talking to him.
* True Villains. She's never shown stealing a victim's identity, but keeps extra skins as backups and disguises.
* True Villains suffers from this, and a sense of honor. He's a villain now, so it's rather... superfluous.
* True Villains takes over most Evil Genius duties. Just replace technology with magic.
* True Villains that's the only place free of his apocalyptic undead armies.
* True Villains that will cause him to wither and die without constant effort to suppress it. His reaction? "... Well. Crap."
* True Villains whenever she wants to restore her youth. It doesn't diminish his interest in her.
* True Villains, which she can't do while her own spirit is weakened by grief.
* True Villains, Xaneth explains to Sebastian how Mia is able to build an animate things. He uses the Blackboard of Mystery.
* Truffles shows up in one episode after being absent, asking if this is any of her business. Chowder replies "No. You're not in this episode." and she vanishes.
* TRU-Life Adventures built half a time machine in his apartment as part of a revenge scheme against the toy store.
* TRU-Life Adventures is bigger on the inside than it is on the outside. Subverted, though, in that it's a fluke of how the measurements were taken.
* TRU-Life Adventures is suggesting everything that happened since the first time travel story has been Bob's dream.
* TRU-Life Adventures Johnny Blastoff features the villainous Emperor Zarnack.
* TRU-Life Adventures. Old Bob's multiple appearances in the present have not been shown in his own personal chronological order.
* Trull Sengar is exiled for speaking out against his people's new ruler and eventually refusing to kill their incapacitated Emperor so he can be
* truly are scum, and this is one of the very few times when Al actually shows some responsibility as a parent), while he doesn't mind when Bud gets some (but once in a while)...
* truly believes the only way to "save" America is to turn the country into a police state.
* truly bizarre example was Irma's birthday, where Michelangelo brought ice cream pizzas with such flavors as garlic-vanilla and anchovy-butterscotch.
* Truly creative theme rooms, often combined with the options above. This can, of course, lead to some questionable
* Truly despicable people do terrible things all their lives, convert after one minute of
* Truly, it is hard to find an upbeat song that doesn't have a Big Yes in it.
* Truly nerdy fans of the show may have picked up on several running themes and gags over the course of the commentaries. For example, John Swartzwelder's refusal

to make an appearance is talked about on a number of occasions, as well as the Tube Bar tapes being the inspiration for Bart's prank calls to Moe, and the various censorship fights that the show has had.
* truly, only to break down the strategy at some fundamental oversight.
* TRULY OUTRAGEOUS: A Jem Fan Film!, it turns out that Kimber is a robot. Aja and Jerrica were the only ones who knew.
* TRULY OUTRAGEOUS: A Jem Fan Film! song with this excuse. They don't want the video to get taken down.
* Truly Single Parent: A parent who made their own child with no other partner to speak of.
* Truly Single Parent: A single parent who created their child by themselves with no partner to speak of.
* Truly Single Parent: Several Egyptian creation gods did this: Atum created the deities Shu and Tefnut from his semen or spit, Re created humanity from his tears, and Ptah created Atum and the other gods with his voice and heart (mind).
* Truly Single Parent: They had a child without the help of a mate, usually through magic or a labratory experiment.
* Truman Capote's short story "Miriam" tells the story of a little girl taking over a middle-aged woman's life. Except that the little girl exists only in the woman's head.
* "Truman Show" Plot: Someone discovers that their life was part of a film or television show without their knowledge.
* Truman tries to leave his "hometown" by taking a bus to Chicago. But of course, as his hometown is located in a giant studio (a fact that is kept hidden from him), the bus is operated by a walk-on, and cannot drive anywhere. To cover up this fault, the driver panics and grinds the gear instead of starting it, completely trashing the bus.
* Trumbo narcissism and holier-than-thou attitude, but because she's also one of the most famous gossip columnists in Hollywood who can ruin lives with a single article, no one wants to piss her off, not even the big-time studio execs like Louis B. Mayer.
* Trumping any of the below examples of unconvincing 2D/3D meshing are the helicopters from
* Trump is also very unpopular among facets of his own party. The only reason he won a close election in 2016 in the first place was that
* Trumplica rose to mainstream prominence in the 1980s, so caricatures of him started appearing in the same period. The newer, Trump-as-President version dates became popular in 2016.
* Trumpton. As a result, every Briton born between 1963 and 1990 can recite the Trumpton Fire Brigade roll call by heart, and a whole minute of every 15 minute episode was dealt with — they just needed to dub in Captain Flack's half of the phone conversation.
* Trump won instead, Matt and Trey had to completely rewrite (and presumably, reanimate) the whole episode in less than a day, as well as change the title— originally "The Very First Gentleman", it is now known as "Oh, Jeez".
* Trumpy Bear, as were the patriotism and the testimonial from a Navy veteran.
* Truncated Power Rangers doesn't even try to disguise the guy voice for the Pink Ranger.
* Truncated Power Rangers, since Mike Manos has admitted he couldn't keep the original voice up.
* Truncated Theme Tune: The theme tune gets cut down to one verse, usually for profit.
* Trunk Music, Deputy Chief Irvin Irving's son George is doing undercover work infiltrating a ring of corrupt cops. It turns out that the ring is run by Carl Nash, a dirty ex-cop who is a person of interest in Bosch's own investigation into the murder of Tony Allen, itself committed by two of the dirty cops (Nate Riley and Maureen O'Grady) on Nash's orders. George is eventually murdered when Nash finds the listening devices he wears on him at all times, and his death is staged to look like a robbery gone bad.

* Trunk Music Detective Chastain ends with the two of them arguing over this trope.
* Trunk Music, when a mob-affiliated producer is murdered, Bosch and Edgar find out he's being investigated by the FBI for his ties to an Armenian outfit based out of Las Vegas. Agent Jay Griffin admits that the FBI was wiretapping Tony Allen's office, but won't say why and won't share any intel. Bosch escalates the matter up the chain of command to Deputy Chief Irving. Irving gets the feds to turn over what they have but is suspicious with how readily they do it.
* Trunks himself, on the other hand, is a bit of an inversion to Vegeta due to not pointing them at the right androids, there constantly being more than two androids (three if you count Cell) in the present, and the aforementioned Goku Button. As time flies, Vegeta starts slowly respecting him, if only slightly; he mentions that Trunks is at least almost as strong as he is, acknowledges when Trunks makes a remark that's
* Trunks invokes this when he returns to the future on the evil Androids and Cell, intentionally
* Trunks is Bulma's son. While it was somewhat easier to be surprised by this in the anime (in the manga,
* Trunk's New Look outfit. Suffice to say after all of that he never takes a babysitting job again.
* Trunks' New Look. Shame that it caused him to waste a perfectly good gulp of beer.
* Trunks' timeline is eventually a double subversion of this. He changes the past, but creates an
* Trust, being a dramatization of John Paul Getty III's kidnapping, has Paul's ear being cut off and delivered after his ransom is delayed again. His mother is able to confirm it's his by matching the freckles to pictures of him. When his grandfather is shown a picture of the ear he notes that a finger would have been more convincing as they could have checked the print for a match.
* Trust-Building Blunder: An exercise meant to improve interpersonal trust increases tensions because someone intentionally or unintentionally messed it up.
* Trust-Building Blunder: There's an exercise to build trust, like "fall and I'll catch you." It is failed.
* Trust Building Exercises: The catcher will not catch the faller, either because they're distracted or just don't like the person. Alternatively, there's such a massive size difference that the (large) faller presents a
* Trust Doesn't Rust explores the idea that Needy and Jennifer have a psychic connection. While even the Winchesters aren't able to explain how it happened, Sam soon confirms that Needy is linked to Jennifer rather than the demon as Needy felt it when Jennifer was stabbed but had no reaction to the demon being hit with holy water.
* Trust Doesn't Rust (the actual footage used was from a different TV show filmed years before).
* "Trust Fund Pirates" features a group of rich yuppie kids gunning down (mainly Latino) drug dealers they feel are messing up the country, although their also motivated by thrill-seeking and at least some of them are taking the drugs from their victims as well.
* Trusting In Faith after Elphaba drops out of Shiz. Elphaba's younger sister Nessarose was born without arms.
* Trusting In Faith, Glinda goes to her funeral. She does cry, but she tries not to be too sad because she knows that Nessarose was always very interested in heaven. The fic ends with a quote referencing the nature of this trope:
* Trusting In Faith. Nessarose doesn't like how Glinda is so quick to say that she loves her. To her, the term shouldn't be used for something as simplistic as youthful puppy love.
* Trust Jennings: Jennings is playing around with an aerosol spray, but without paying attention to the nozzle direction, he ends up coating his hair with silvery grey paint. He then has to concoct one of his famous schemes to sneak into town and visit a hairdresser without the teachers' knowledge.
* "Trust me, a person would have to be desperate to go through a fey gate"

* Trust Me, I'm an X: A stock phrase used by one character to another to assure that they can trust what they're saying.
* Trust Me, I'm an X: Your profession indicates you can be trusted, because it infers that you have special wisdom to impart or you can be useful.
* "Trust Metric", sort of. Don and the team do show up just barely in time to save
* Trust No 1, Officer Doug Bradley is forced to hand his case over to the FBI and the NSA, both of whom are in on a vast conspiracy.
* Trust, one character jumps off a building so that another will catch her. Her love interest doesn't want to do the same since he is much larger than her.
* Trust Password, Bill and Ted ask their future selves what number they're thinking of, and they reply, "69, dudes!"
* Trust Password: You use a code, like a phrase of some kind, to verify that you are who you claim to be.
* trusty katana, and it keeps coming out of the sheath for ten feet, for no reason other than it looks cool while battling someone wielding a meat cleaver. The length of Kamina's sword seems directly proportional to the length of the speech he is making while drawing it.
* Truth (2015) opens with Mary Mapes, the main character, meeting up with her lawyer, and the rest of the movie shows us what led to that meeting.
* Truth ad spot featured a handful of teenagers going behind the school to, "Have a pick" (referring to picking their noses). The end narration was, "Isn't smoking just as disgusting?" The audience was obviously meant to roll their eyes, thinking "Hell no!" The subtext was, "Don't be like these gross nose-pickers, smoke instead!"
* Truth & Justice in the Girlfriend and that's why there was always trouble with Mary Jane.
* Truth and Advertising allowing him to serve as the protagonist to the season finale.
* Truth And Consequences: After Ladybug tricks Paris into believing Chat has turned traitor, Mayor Bourgeois hires American mercenaries to keep the peace. They quickly prove to be little more than mindless thugs.
* Truth And Consequences refuses to give it up until Adrien proves he's worthy of it, and puts him through hell to do so.
* Truth And Consequences: The American mercenary group Mayor Andrej hires to capture Chat Noir are little more than thugs-for-hire toting assault rifles. They talk a big game but accomplish almost nothing outside of harassing Parisian citizens and run like cowards the minute they're faced with an actual Akuma.
* Truth and Ideals has Fennel saying the following: "Precisely! There are several other features as well, but one of which I'm afraid no longer has official support ever since last year." She is referring to the C-Gear's connectivity to Nintendo Wi-Fi Connection; Chapter 9, where this quote originates, was published in 2015; a year ago from then was the shutdown of Nintendo Wi-Fi Connection on May 20th, 2014.
* Truth and occasionally filled in with the body parts it takes from the people visiting it.
* Truth Be Told is ethnically ambiguous to everyone, even her own husband. She's at least part Filipino, having referred to a grandmother living in the Philippines.
* Truth be told, most of the Traditions have groups who integrate their magical practices with technology, but the Adepts and Etherites make it their primary focus.
* Truth broadcast and find out that the memos, allegedly typed in the 1970s, could be reproduced perfectly with the default settings of Microsoft Word, and early 1970s machines that could have produced the memos would not have been available to the alleged author.
* (truthful) explanation that he gave sounding exactly like the lame excuses given by real predators and therefore only serving to make him look more guilty:
* Truthfully, they avoid making any such claim, at least in the American Axe commercials. They simply state that they can't be held responsible for the hazards their commercials depict.
* Truth in 24 about the Audi team in the 2008 24 Hours of Le Mans, plays up this

trope.
* Truth in Advertising laws require that if a set of machines is advertised as "Up to 99% Payout," then at least one of them must have 99% payout. Though there may very well be 50 other machines with 10% payout. Just don't expect that the "lucky" machine will be marked in any way, and since slot machines are computerized these days, most likely the lucky one changes by the day.
* Truth in Comic Books. In the early days of military aviation, fighter pilots had complex rules of chivalry which included "never shoot a cripple."
* Truth in Fiction - the FBI sometimes gets involved in international cases.
* Truth in Journalism and his unsavory reporting methods; throughout the story, we get disturbing glimpses of his infamous alter ego (including Brock babbling to himself and him attacking two junkies and stringing them up while the film crew is distracted). When he fully transforms into Venom at the end, we get a horrifying first-person taste of what it would feel like to be locked in a room with the symbiote.
* Truth in Music, as according to the Other Wiki, Timothy Evans was hanged in a miscarriage of justice.
* Truth in music? Queen wrote an awesome song about the Power of Friendship, the aptly titled
* Truth in Television (1943) for both Marie and, tragically, for Pierre.
* Truth in Television about those with outdated values that were once common within their lifetimes.
* Truth in Television accident which Robert David Hall, the actor who plays Dr. Robbins, suffered as a grown man.
* Truth in Television, a common symptom of depression, post-traumatic stress disorder, and the psychotic disorders (which includes schizophrenia). Some autistic people and people with aphasia also don't display emotion "appropriately"—that is, in ways similar to the majority—despite feeling it deeply, because they simply don't know how or it doesn't feel natural to them.
* Truth in Television. A Corporal or Sergeant Major (etc.) will only hold the rank they do because they climbed the rank ladder from the very bottom upward and will have gained valuable combat experience along the way, but are not yet too old to dish out a good asskicking.
* Truth in Television: a handful shock sites have images that appear innocuous as they're loading, but are really disturbing when completed. Many of them include unexpected nakedness, just to give you an idea. Another common trick is attractive naked people with genitals that don't match their top halves.
* Truth in Television: A large man reported taking a trip to China while bright red all over from a sunburn, which would have made him resemble the Buddhist lord of the underworld and judge of souls, Yama in Chinese and Enma in Japanese. He scared small children.
* Truth in Television, all widely-accepted examples of nightmare fuel - especially after dark.
* Truth in Television: A lot of various governments and intergovernmental organizations do indeed have contingency plans in the event that extraterrestrials ever land on their part of Earth, though (of course) these plans do tend to change as various administrations come and go. A number of these plans specifically include assembling a welcoming party including certain prominent scientists and/or certain prominent religious and political leaders to greet these visitors. (Some of these plans also involve arresting the extraterrestrials and impounding their ship; which might explain why extraterrestrials in range, if there are any, have been keeping their distance from us.)
* Truth in Television, although things didn't always went well due to various factors.
* Truth in Television amongst the Gypsy (Roma and Sinti) nations. The one reason why the Nazis almost managed to exterminate those two nation for good during the WWII was that various Sinti and Roma families were unable to co-operate due to centuries of family feuds.
* Truth in Television amount of curve to sit securely against one's thigh as if by

design led British and Australian troops to confidently suppose it was braced against the knee or thigh of the soldier operating the weapon. Allied field hospitals were, for a time, faced with a steady trickle of men whose kneecaps and femurs had been shattered by recoil energies, when seeking to use captured Japanese weapons against their former owners. Revised instructions and warnings were sent out as a matter of urgency. The "knee mortar" in Allied service eventually proved to be a handy and potent short-range weapon in jungle fighting.
* Truth in Television (an attempt to restore the Roman Empire — "Kaiser" and "Czar"/"Tsar" are derivatives of "Caesar"), and Imperial Japan after Perry's arrival (an attempt to recreate the older Imperial Japan).
* Truth in Television and had its' prime in the mid 20th century when there were more such institutions to the point the supply of such places outstripped the demand of willing applicants.
* Truth in Television, and isn't usually funny, even if the one doing the bating-and-switching may (or may not) think so. Some parents have actually done this to their sons / daughters. One example appears in a radio ad, although it (the ad) was intended to be funny:
* Truth in Television, and one of the last "oogie-boogie" myths they did on the show.
* Truth in Television and rented a couple of M551 Sheridan light tanks (which, yes, finally did manage to separate the books... effortlessly).
* Truth in Television and some implants might literally eat some of your brain to establish themselves in your noggins...
* Truth in Television, and the "white collar metalhead" who wears band shirts beneath their work clothes as undershirts, ties longer hair in a man bun (if male) or has a shorter haircut, and maybe slips in darker-colored work clothing, wears Vans, Converse, or high-tops on casual Fridays, and listens to their music with the volume down in their office when no one is nearby is the rough metal equivalent of the "corporate goth".
* Truth in Television, and to a lesser extent in the movie version of same.
* Truth in Television. An embarrassing baby photo became the basis for Tweety's character design.
* Truth in Television, as a lot of new customers will do that exact thing when buying their first firearm.
* Truth in Television as a way to give back, do the right thing, or otherwise help those who would never be represented.
* Truth in Television, as bookcases are often conveniently sized for a door and provide an ideal way to camouflage the necessary gaps.
* Truth in Television, as decreasing component costs and increasing education have made many fun, dangerous, and hi-tech options available to many garage scientists.
* Truth in Television, as Elizabeth I's unsuccessful attempts to expel the "Moors" from London indicates the presence of substantial numbers of black Londoners).
* Truth in Television, as Geordi would be considered the Officer of the Deck as delegated by (and thus may only be relieved by) the captain or XO. Humorously, Picard refuses to accept command back until Geordi gets his ship back in one piece (he ordered a Saucer Separation to protect the civilians on board), so he gets to be captain a little longer until the saucer is retrieved.
* Truth in Television (as in they're actually believable for the year 2070). Jet's goggles also provide magnification and facial recognition in one episode.
* Truth in Television, as it is true (it is a characteristic whine of many devices using large capacitors) but it can be heard only in perfectly quiet room, not among the hectic activity that usually accompanies resuscitation, not to mention sounds of other hospital equipment, background noise etc.
* Truth in Television. Ask any veteran, and chances are they knew at least one or two officers who lived this trope and quite a few who were anything but.
* Truth in Television as real pirates didn't particularly care about race and accepted Anne Boney and Mary Read (although they both originally pretended to be men). Alternative sexualities were also welcomed. They were all social rejects after all...

* Truth in Television as shown in the real life examples below. Prior to beginning a mock trial, the advisers or teachers sometimes show this movie.
* Truth in Television, as stuff meant to resist internal pressures is built very differently from stuff meant to resist external pressures.
* Truth in Television as such, however, they're both bred to be people-friendly dogs.
* Truth in Television as the only galaxies to study (and, as some astronomers have thought, without clues to know how the Universe began).
* Truth in Television, as this was a common way of setting off early cannon on land (back when there was a real chance of explosion so you did not want to stand near it when you fired it; not believing that one was needed was what did for King James II of Scotland.)
* Truth in Television as though you do. Doesn't always work, but moving with a sense of purpose and giving the appearance that you belong there is one of the most effective ways to avoid drawing attention.
* Truth in Television as young boys tend to be shorter than girls until they reach puberty.
* Truth in Television, at least in Canada. A 2012 poll found that 88% of immigrants considered themselves "very proud" to be Canadian, compared to 81% of Canadians who were born there.
* Truth in Television at that time. Any operation where terrain needs to be modified, fortifications built or machines and equipment used, engineers have made their mark.
* Truth in Television at the bottom of the military food chain has its ways to avert the watchful eye of the superiors. Many junior officers turn a blind eye on military moonshiners (as long as no one is getting too out of control, or hurt worse than a hangover), as they know their troops and how they need to blow off steam occasionally.
* Truth in Television) at them once they figured out how to properly set arrows on fire (with limited success). Note that more often than not, the idea was to shear an enemy vessel's oars off rather than punch a hole in their side, in order to disable the vessel and board it.
* Truth in Television: At the time of the wedding (1995), many New Zealand students were getting married to defraud the government into giving them a student allowance. Being married exempted students from having their parents' income means-tested - if your parents earned over a certain amount, your student allowance amount was cut.
* Truth in Television? A zoo allegedly had a sign on its monkey enclosure reading, "Warning: These monkeys steal glasses." Of course, this mostly happened whenever anyone wearing glasses leaned forward to read the sign....
* Truth in Television, because among gun enthusiasts revolvers are known for better reliability, greater accuracy, easier maintenance, and greater stopping power compared to automatics. Particularly with single-action revolvers. Because of basic mechanical designs, the maximum firing speed for a single action revolver is on par with a conventional semiautomatic, although few people can pull back the gun's hammer fast enough to even match normal semiautomatic firing rates. Of course, these benefits are offset by the small number of rounds, greater recoil, difficulty reloading, and difficulty with faster rates of fire (particularly single action).
* Truth in Television. Before the "mental revolution" in African Homo sapiens about 70,000 years ago, it was the norm for lithic industries to remain unchanged for hundreds of thousands of years, even as their makers evolved in completely new biological species. If we factor in the tools made by non-hominids like bird nests and insect-catching sticks, we may conclude that the norm is for technology to remain unchanged for millions of years.
* Truth in Television before the widespread use of transistors and printed circuits; radios used a lot of easily breakable tubes, and wires jarred loose with relatively little provocation.
* Truth in Television: being descended from a common ancestor, members of closely related biological groups (like a family or genus) often closely resemble each

other in basic body plan, but have adapted to various environments and ecological niches through changes in color, size, diet, and behavior.
* Truth in Television Bertie (later King George) adores his daughters Elizabeth and Margaret and makes it clear; he is shown as a very affectionate father, hugging his little girls and being silly with them.
* Truth in Television. Biological weapons are considered far too difficult to control and too prone to backfiring; the majority of germ research is on how to maintain cures and preventative measures for such things. Chemical weapons are seen as the more practical equivalent for something that poisons an area.
* Truth in Television, Bobby will be forced to somehow pay for all his expenses by working, whether it be stealing or factory work, or whatever.
* Truth in Television bring their aces out of combat (the idea being that they should stay where they could do the most damage against the enemy), and they were almost all killed eventually (the lone survivor was only pulled from the lines and sent to train new pilots due a stress-caused error causing him to get a bullet in the eye) — and the quality of Japanese pilots took a sharp downturn near the end of the war. This is also why the best known Axis aces had higher kill counts than their Allied counterparts.
* Truth in Television (bundle charge), and were designed to defeat armor and fortifications.
* Truth in Television. Buying concubines was an established custom in many polygamous cultures.
* Truth in Television by intercessionary angels, or the Virgin Mary herself. Protestants spread the counterpoint that the men had landed in a conveniently located pile of manure.
* Truth in Television. Caesar is more than thirty years Cleopatra's senior.
* Truth in Television can be extremely and embarrassingly contagioth...
* Truth in Television can kill you if you can't raise your head. Young children are prone to this, which is why even buckets have drowning labels on them.
* Truth in Television Cases of poisoning from drinking it were not unknown.
* Truth in Television, Chuck Yeager breaks the sound barrier with the help of a sawed-off broom handle.
* Truth in Television closed-circle variant, immortalized in a strip: an employee asking a question directed at higher-ups may find that the task of answering it is delegated back down... to the same employee.
* Truth in Television; coal trains at that time were overloaded and runaway trains simply had the route ahead cleared for them so they could use up all their momentum.
* Truth in Television, Cognitive Scientist Don Norman describes the ways in which architects and designers invariably create fancy doors that are hard to operate, typically because it is not obvious which side is hinged, or whether they open inward or outward. In an updated edition, he notes that people have started telling him stories of "Norman doors."
* Truth in Television comment section. Often leads to arguments unfortunately.
* Truth in Television common perception, even among modern "love doctors" and advice columnists.
* Truth in Television, complete with neurotransmitters. Takes "thinking with your stomach" to a whole new level, doesn't it?
* Truth in Television. Confusion reigns. So Matt Wilkins became Matt Marsden, on Trent FM at least. Now he's at Key 103 under his original name.
* Truth in Television) dedicated to professional cleaners visiting houses that have been absolutely overrun by filth. Also, you have probably met at least one person like this in your lifetime. If you haven't met someone like this, it just might be you.
* Truth in Television: deep-sea fish have evolved to live under high pressure and consequently do not react at all well to pressure significantly higher in the water column: deep-sea fish brought to the surface usually have bulging eyes and their swim bladders protruding from their mouths. They don't explode, though.
* Truth in Television did this to the senator Aponius Saturninus when he fell

asleep at an auction. He told the auctioneer to pay attention to the senator who kept nodding at him. Aponius wound up buying thirteen gladiators for a large chunk of change.
* Truth in Television: Dueling only became a crime in the 18th and 19th centuries, and even then they were largely tolerated and/or supported by authorities.
* Truth in Television: Due to there being no federal standard for sex education classes and certain conservative districts limit what can be said during sex education classes, many students wind up under or misinformed about sex. Attention is also pointed at creative workarounds, such as teachers who aren't allowed to show how to put on a condom instead give a demonstration on how to properly put on a sock.
* Truth in Television: Early reconnaissance satellites would take photos and then have the exposed film on board; they had to physically return the film to Earth so the imagery-analysis guys could have it to work with. They did this by ejecting it in a reentry-proof capsule. If it were equipped to land, though, it would be far too heavy, so they designed it for mid-air recovery; it would deploy a parachute and an aircraft, generally a modified transport, would snatch it in mid-air. This would also avoid damaging the film. They were recovered over water; sometimes, they'd be pulled out of the ocean, although they were designed to sink automatically after a while so as to not fall into the wrong hands. At least, that's what the US did. Later on, the same technique was used when some unmanned probes took physical samples from comets or from the space medium on various missions; for example, there was the widely-publicized Genesis mission, where there was a slight problem with the descent sensor being installed upside down, so the capsule with the samples (it was a mission to sample the solar wind) never deployed its parachute, so instead of being retrieved in mid-air by a modified helicopter, it slammed into the Utah desert floor.
* Truth in Television even amongst humans. Lots of jokes are hard to translate across cultural barriers due to reliance on context, and even within a culture humor tends to be subjective.
* Truth in Television. Even if he gets it right, it almost always takes such an unexpected amount of time and money that it'd be easier to just hire a pro in the first place.
* Truth in Television. Even if there are no astronauts' lives on the line, many space missions have that moment where billions of dollars and years of work could go up in smoke in an instant. It's quite a relief when it doesn't.
* Truth in Television. Even with all these precautions, prisoners continue to innovate new methods of creating weapons and other contraband (such as alcohol) from items provided to them. One prisoner featured on MSNBC's Lock-Up created a surprisingly effective shiv out of several pieces of hard candy. Others have fashioned functioning shivs out of toilet paper (used as papier mache) and with lots and lots of matches.
* Truth in Television, every now and then. A notable example involves a preacher who was sued for libel and refused to post bail to make a point. The prison wasn't particularly nice, either, and aggravated his health problems. On the other hand, his accuser was discredited and fled the country.
* Truth in Television. Everyone will probably have gotten at least one present they didn't like at their birthday. And do you remember the vase from your great-grandaunt that passes through the entire family, because no one wants it? Or that lame gift on Christmas? And yes, Christmas isn't about the gifts...
* Truth in Television example: UWA fighter Nick Watts actually does (or did) work at a power company. And really, with a name like "Watts", how could he NOT work at a power company?
* Truth in Television features a scene where a group of engineers have to figure out a way to make the command module's air filters fit into a port it's way too big for, using only the spare materials inside the lunar module. We later see the stranded astronauts rigging up the devised solution, which includes a sock, a plastic baggie, and duct tape, among other things.
* Truth in Television feuds), or having "heat" backstage with a member of

management.
* Truth in Television for a great deal of history. Clothing becoming cheap enough that the average person could afford to own more than 2-3 outfits is a fairly recent event on a historical scale.
* Truth in Television for airplanes, which carry far more fuel than a car and are also more likely to be damaged in ways that create fire hazards (i.e. exposed broken wiring); if a plane is badly damaged, fire and explosion (caused by the ignition of the fuel tanks) are very real dangers. It's because of this that evacuation preparedness is a major requirement in both aircraft design and crew training. (The international standard that planes are built to and flight attendants are trained for is for all passengers to be able to be evacuated in 90 seconds through half of the plane's total number of doors.)
* Truth in Television for a major part of human history. Many leaders came into power by kicking out the region's current leader, then doing the same to anyone who might try to challenge them later. (Although it's usually the army doing the asskicking rather than the individual leader.)
* Truth in Television for anyone in the UK who wasn't built like a brick shithouse during their school years and had to face down a squadron of their classmates during enforced physical education lessons.
* Truth in Television for both sexes in many cultures and environments (remember the cootie shots?), but the behavior tends to disappear around fourth grade. The general feeling and how early or late it tends to disappear, however, vary across cultures. Even once it disappears, there's a clear boy/girl divide usually until around the middle of Junior High. Until then, the boys and girls typically sit at separate lunch tables, engage in separate activities at recess, etc.
* Truth in Television for cats and some dogs, bringing their masters dead animals as gifts.
* Truth in Television for how some well-educated American athletes appear to Europeans where sports is not typically tied to academics but often involves dropping out of school early to pursue one's sports career full-time. From middle school onwards, most American schools with sports teams require student athletes to maintain a certain grade level/GPA in order to stay on the team. The lowest of these averages is a C (about 70%), with tougher coaches requiring better grades.
* Truth in Television for many places named by colonists; New Zealand, for example.
* Truth in Television for minor traffic violations. In most states, if you pay a fine before your court date, you sign a form confessing to the crime. In Georgia, however, the money you pay is simply your "bail." If you don't show up to the court date, it's considered a no contest, and the judge will routinely sentence you to "forfeit bail."
* Truth in Television, for most westerns. Guns of the period tended to be dangerous to carry in a charged state—an unlucky bump could discharge the weapon prematurely. Hence, most revolvers were loaded with five rounds and left uncocked on the empty sixth chamber. Repeaters and shotguns received similar treatment, requiring the showy pump to be ready to fire.
* Truth in Television for much of the world. Various places may well not even have such agencies or are so underfunded and understaffed they effectively don't exist.
* Truth in Television formula, with a good psychological reason for its use. Usually the others will respond in a very bored voice, "Hello, (name)."
* Truth in Television for people all over the world who simply can't afford to buy lots of clothing, or don't live in an area where clothing stores are readily accessible. Many people only have a few outfits that they just wash frequently until they completely wear out.
* Truth in Television for Potter's history giving respect. People who go from NCO to officer are called "Mustangs", and enjoy great respect from enlisted personnel.
* Truth in Television for scientists whose discoveries go against the established ideas of the time. One example is Dr. Alice Stewart, who showed a correlation between pre-natal X-ray screening and cancer, and was ignored for several years.
* Truth in Television for some cultures — Yanomamo rainforest Indians believe that everybody has a kind of animal doppelgänger called a noreshi,

which takes the form of aerial or arboreal animals for men or ground-dwelling animals for women. They say that to kill one's noreshi would cause the person drop dead and vice versa. Many intentionally try to find their rivals' noreshi for this reason, as outright murder is a pretty damn stupid idea in a culture where inter-village alliances are about as sturdy as damp tissue.
* Truth in Television for the Indian Police, who would often cut the heavy red tape that would ensue by catching a criminal by shooting them instead, and they always play it off as an "encounter", i.e. shooting in self-defense.
* Truth in TelevisionFor thermal control reasons, real life spacecraft also feature shiny surfaces — the Apollo Lunar Modules were covered in gold foil — or thick quilted material, as with the Soyuz capsules and several of the ISS modules. In addition, the Space Shuttles were covered in white insulation to help reflect heat as well as details in black. Many spacecraft also have "wings" that are extensible solar panels or radiators.
* Truth in Television for the time: The good sailors could get the comparatively cushy jobs on steamships, whereas the clippers were left with the dregs. Conversely, the officers were often young and ambitious, since you had to have sailing-ship experience to get a captain's license and possibly a ship to command.
* Truth in Television for this trope. It normally ends with a trip to the hospital (or morgue), since they never add in safety harnesses.
* Truth in Television for tidally-locked planets. So far, only theoretical, since none of the Solar System's planets are tidally locked to the Sun, but some exoplanets supposedly are.
* Truth in Television. Four or five identical plain t-shirts, either all white or no more than two solid colours per package, can be bought for the price of one or two more decorative individual ones from most superstores.
* Truth in Television: From the 1920s into the 1960s, trunks over tights were the preferred garb for highly masculine circus acrobats, wrestlers, gymnasts, and even professional boxers in some cases. Because tights were considered "too revealing" at the time, men covered their lower body with formfitting but loose trunks (that may look like underwear briefs or speedos to modern eyes but were actually baggier). A person has only to look at men's swimsuits in the days before speedos to understand this notion.
* Truth in Television gay, and so it can happen that someone who mostly prefers people of the opposite sex can have sexual fantasies about people of the same sex, and vice versa.
* Truth in Television given the real Dillinger's courtesies during at least one of his bank robberies (where he gave a shivering woman his coat). Baby Face Nelson on the other hand was the opposite of Dillinger.
* Truth in Television. "Gordon Bennett" is often used in Britain as a substitute for swearing or blasphemy (possibly because the first syllable sounds like the Cockney pronunciation of "God"). The real Gordon Bennett was a newspaper baron famous for, among other things, being both eccentric and extravagant.
* Truth in Television guidelines clearly state that Senators are to be addressed as such. Indeed, it specifically adds the line, "When the senator is a woman: Use Senator," likely for just such a scenario. Also, never mind the fact that although Congress is responsible for handing out commissions and a candidate for any level of general generally has to get Senate approval before getting his/her star, Senators aren't really in the chain of command: that goes exclusively up through the Executive Branch (from the Departments of the Navy/Army/Air Force and the Unified Combatant Commanders to the Secretary of Defense and then the President).
* Truth in Television. Happens often in hotels and on cruise ships, where the door locks automatically behind you when you step out. Many a guest popping out to set out his room service has found himself outside in the nude or in underwear without a key card.
* Truth in Television has only been called once, after some idiot terrorists tried to sneak liquid explosives onboard airplanes coming in from England and have caused problems for millions of air travelers since.
* Truth in Television: having a security clearance doesn't mean you instantly have

access to all the information classified at that security level. It's why the phrase "Need To Know" exists.
* Truth in Television, he doesn't) and orders his first officer to immediately search the cabin.
* Truth in Television here, because of the exotic materials used in their construction and the red-line conditions they're often subjected to. And regardless of the increased danger, they tend to burn up very quickly and intensely because of the exotic materials.
* Truth in Television here: Contraltos (female tenors) exist; so do countertenors (male altos). Compositions are sometimes written seriously specifying these ranges.
* Truth in Television here; given two working parents or one working parent and one houseparent, the moments a couple have in bed together before sleep may be the only time they have for any serious conversation.
* Truth In Television. (He's credited with inventing the first practical TV system)
* Truth in Television his orders in writing on a PADD, which he immediately hands over.
* Truth in Television: Hoodies. Many shops in the UK have banned them, and in the US some businesses at high-risk for robbery (liquor stores, gas stations/convenience stores, banks) have a sign on the door stating "Hoods or face obscuring headgear must be removed prior to entry", or some variation.
* Truth in Television: in 2008 Usher greeted fans in Maidstone, UK with "Hello, Manchester!" - managing to be out by nearly 200 miles.
* Truth In Television in Britain (especially London) where there's the highest concentration of security cameras in the world, but most of them are of incredibly low quality and pointed where they're only of what little use they are for protecting their owners' property (rather than there in case some poor Victim Of The Week flees that way).
* Truth in Television in Britain, which often did grant clemency to the condemned only moments before their scheduled execution.
* Truth in Television: in Germany and other European countries with a large proportion of people who speak English as a second language, it's common for tourists attempting to speak the local language to receive a reply in English. The guidebooks specifically warn people not to be disheartened by this and that the attempt is always appreciated.
* Truth in Television in jurisdictions where strict liability exists. Possession of certain items restricted or banned by law (drugs, weapons, an open container of alcohol in a motor vehicle, etc) is enough grounds for arrest, prosecution and possibly even conviction.
* Truth in Television: In martial arts complex and flashy moves look good, but they are often difficult to execute, require a lot of training, and, if failed, often leave you open for a counterattack. Many masters discourage their use even in tournaments, and in a common street brawl you can do very well with just a couple of boxing punches.
* Truth In Television in more ways than one: The idea of dedicated CICs on
* Truth in Television in nations like the USA that don't provide government health insurance.
* Truth in Television in orbit, said shuttle is travelling around the earth at tremendous velocity...
* Truth in Television in parts of Mauritius (especially in rural areas).
* Truth in Television instance of this happening. In 1978, a seven-year-old boy in Zambia was attacked by an African crowned eagle (the same species believe to have killed the Taung Child mentioned above). The boy only survived because the eagle was killed by a passing farmer. A search of the nearby forest found no evidence of a nest, meaning the attack was almost certainly predatory in nature.
* Truth in Television in Texas. One in five Texas dads greets their daughters' boyfriends while polishing guns, big ass knives, or other weapons. [Citation needed]
* Truth in Television in that people who are sensitive to seeing blood will often do fine until they go to wash the wound and see the red spatters in the sink. The

same can apply to people who don't feel as much pain from minor cuts until they see the injury.
* Truth in Television in the country. Over 70% of the population were born after the Soviet invasion, which means they have been experiencing nothing but war all their lives. And with how the war is dragging by the year, that percentage is growing.
* Truth in Television in the direct opposite direction - this proves that it was an official speed, and not assisted by a tailwind or such.
* Truth in Television: In the eighteenth century, officers would use their swords to keep order in the ranks. Naturally, they would seldom wish to kill their own
* Truth in Television in the more remote parts of Norway and possibly Sweden, where the entire population of some valleys were found dead after the plague, and were not repopulated for 200 years. In one particular case, a lone hunter just accidentally stumbled over the local church, still standing in the middle of nowhere. In the meantime, the building was made a hive for bears. The bearskin allegedly still hangs on the wall in this particular church.
* Truth in Television. In the time between being asleep and fully awake, the line between dreams and reality can be blurred, causing you to try and continue a conversation with someone present in the dream.
* Truth in Television, inverting our usual sense of security as an alpha predator at the top of the food chain. Usually, these are big cats, bears, wolves, hyenas, crocodiles, etc. who prey on humans either opportunistically, or because they're starving and unable to eat their regular prey.
* Truth in Television, in which an aging Puyi returns to the Forbidden City as an ex-convict tourist, to view the throne from which he'd once reigned.
* Truth in Television is particularly prone to getting this "truck stop in space" visual treatment.
* Truth in Television it can sometimes extend to the animal members of the family, with parents calling one of the kids by the name of a family pet, especially if the kid's name and the pet's name start with the same letter.
* Truth in Television. It is very common for fighters to specifically attack a cut created earlier or to keep attacking a swollen eye. Legends like Roberto Duran were notoriously dirty in their fights but were experts at hiding it from the referee. Arturo Gatti once broke his hand in the middle of a fight and kept using it. Matter of fact, much of what's ever happened in boxing is sometimes too crazy to think it might have actually happened.
* Truth in Television. It's been proven that people are more likely to reach an answer they can't think of by not thinking about it directly. Typically happens when you've forgotten something, when you're trying to think of an answer to some hard crossword, or something else mundane. If you're really struggling to think of it, then sitting back and thinking of other seemingly unrelated things has been shown to result in what you were looking for bubbling up.
* Truth in Television It seems unlikely that anyone being attacked by a shark would care whether it looked like it was grinning or not.
* Truth in Television it's tucked away inside a hard skull). When your sport involves a lot of ramming, bashing, punching, or sudden starts and stops, all that violent pounding on your head can start to take a toll on the number of healthy neurons in there. The number of concussions over a lifetime can also result in a downward-trending IQ, and so retired athletes from sports like football, boxing, or hockey are often a touch less smart than they were when they started - of course, don't try to tell them that their favorite sport and lifeblood has made them dumb.
* Truth in Television it was common for sailors' wives, girlfriends, and such to slip aboard ship whenever the ship was in port for an extended period of time. Leaving port always called for an attempt to run the women off the ship, which was rarely 100% successful.
* Truth in Television - it wasn't uncommon for High Schools to remove the doors of men's room stalls as a deterrent to smoking (easier to catch them in the act), while women's rooms remain intact due to privacy concerns.
* Truth in Television. It was the detection of the rare element iridium at the

geologic boundary layer between the Cretaceous and Paleogene Periods that first clued paleontologists in to the possibility that a large asteroid may have struck Earth at that time.
* Truth in Television), Kevlar and boron carbide ceramics. Widely deployed starting in the Korean war, the new materials were light enough to be worn as a matter of course, but also strong enough to protect against a wide variety of threats. Korean and Vietnam era armour could stop pistol caliber rounds and shell fragments at point black range. Today military grade armour can allow soldiers to shrug off hits from assault rifles. Further advances in material science will make soldier-armour even more effective and therefore, more widely deployed. Even if the lighter materials aren't strong enough to withstand direct assault rifle fire, they can still be lifesavers against richochets and longer-range shots, which have lost a chunk of their energy. To say nothing of much weaker but still decidedly dangerous pistol-cartridge fire and shrapnel. Additionally, should the powered exoskeleton tech prove effective and cost-friendly enough, it is not unimaginable that someone will attempt to graft armor onto it — power armored modern "knights" anyone?
* Truth in Television: killhouses are indeed a very valuable part of training for the military and police, especially in situations where civvies are expected to come up as an obstacle to achieving a certain objective - like for example hostage situations.
* Truth in Television: Land mines can last for a very long time. Live ones are a serious problem in developing countries with decades-old fields lost in the records.
* Truth in Television larger than they are now. The Aral has shrunk by about 90%, and Lake Chad by 95%. When the Aral dried up, it grounded a number of large steel-hulled ships on what is now both sand and grassland with no water visible in any direction. This is less prevalent in Lake Chad since even before its shrinkage it was an extremely shallow lake (no deeper than 11 meters/36 feet) despite having a surface area of over 10,000 square miles.
* Truth in Television: male bikini-wearing appears to be a fairly common thing. It is not predominantly associated with gay men, despite stereotypes. Youths will do this during their college/university years as a joke.
* Truth in Television. Many of them have successful relationships and even marriages.
* Truth in Television, many real criminals are caught because of insignificant things that shouldn't have happened. One notable example is Timothy McVeigh, who was also caught when he was pulled over by a state trooper.
* Truth in Television—which is as much because special forces tend to recruit soldiers who are self-disciplined and don't need micro-managing, yet are capable of using their initiative, as out of respect for their capabilities—and partly because they're often assigned covert missions where traditional military behavior can be detrimental.
* Truth in Television: Militaries and other armed (and sometimes even unarmed, see political campaigns) factions tend to have these for a reason, as they generally serve as a large, central meeting area for conferences with underlings and field leaders to talk things through, plan out future moves and contingencies, and anticipate future developments.
* Truth in Television miniseries, in which Joe Sr. has a stroke later, which is seen by his wife as God's revenge for what Joe did to their daughter.
* Truth in Television: modern-day officer corps are the direct descendants of knights. When warfare became a science instead of an art in the 15th century, most generals noticed that knights - professional soldiers who had trained for fighting, warfare, strategy, and tactics - were far more valuable as officers and commanders of units composed of commoners, rather than privates in elite units.
* Truth in Television, most animal "smiles" are, in fact, warnings to stay away).
* Truth in Television. Most of the clouds you see at a rocket launch pad are steam. Super hot exhaust gas would destroy the concrete "flame pits"? Easy solution, spray massive amounts of water at them so all that energy goes into turning it into steam.

* Truth in Television). Most of them also have the neat feature of being totally modular - swapping the entire engine, suspension, armor plates, etc is easier and faster than actually repairing the components.
* Truth in Television, most patrons to be found in these few gay nightspots tend to fit this stereotype.
* Truth in Television: Most police officers are good, upstanding citizens and honorable police officers, but the occasional one who breaks the law, engages in police brutality, or otherwise mars the badge will quickly be found out and just as quickly ousted from the force:
* Truth in Television, oddly enough, where it is known as "sledging". And as has been asserted by anyone they play (particularly Pakistan), the Australians are the best at it.
* Truth in Television of all murder sentences in Finland while they represent only 0.5% of the Finnish population.
* Truth in Television of a sufficiently complex piece of code without fully understanding what it does, e.g.: "Segmentation Fault. Core Dumped."
* Truth in Television. Of course fact from fiction is hard to tell regarding him.
* Truth in Television often go to lengths to point out if what happens in a video is real or staged with computer graphics. Technology has advanced to the point where it's not totally obvious what is fake and what is real — especially if the video is "filmed by an amateur."
* Truth in Television on certain surfaces with certain types of brake shoes.
* Truth in Television: One of the clues used to track down the perpetrators of the July 2007 terrorist attacks in London was a particular kind of plastic container that had been used to hold some of the homemade explosives, recovered from the home address of one of the suicide bombers. In a remarkable stroke of luck, they turned out to be an uncommon brand only available through one particular wholesaler and stocked by a limited number of retailers, mostly small family businesses. This was enough to narrow down the number of places they could have been purchased, and questioning the staff at those retailers would eventually provide a lead that led to a couple of co-conspirators being identified. If the terrorists had decided to get their containers from Tesco instead of the mini-mart at the end of the road then they might not have been caught before they could prepare another attack.
* Truth in Television, one of the precinct detectives is investigating a police shooting (which is done by the Homicide department in Baltimore), and ends up completely disgusted almost to the point of retirement to discover the fact that his brother officers peddle the same lies and bullshit as the murder suspects he brings in.
* Truth in Television on The People's Court. The husband lived in America but went back to Guyana for a funeral where he met his future wife. This woman took care of his elderly mother, and to repay her he married her to bring her to the U.S. He did love her, but bringing her to the States was the main reason for marrying her so quickly. This actually happens, though it's not extremely common due to the security measures.
* Truth in Television, on the principle that they can move on certain terrains other heavy vehicles can't, often leave less impact on said terrain (and thus would be harder to trace), and can be positioned for firing more easily. Having your nuclear option small, mobile, and relatively unrestricted by terrain is a pretty big tactical advantage.
* Truth in Television, or a design necessity, such as the highly flammable fuel and lightweight materials used by jet aircraft. A hit to a fuel tank with an incendiary, or occasionally even a high explosive round tends to lead to quite the fireworks display—the heat of the blaze is often enough to set ammunition off as well, completely wrecking the aforementioned vehicle and usually killing everyone inside.
* Truth in Television over how cute the couple is and sad that it means their favorite crush is now off-limits (not that they were ever a realistic option, but don't crush the poor fan's dreams).
* Truth in Television: Pitchforks were typical type of improvised weapon peasants

could reasonably expect to have on hand and more controllable than alternatives such as scythes, and burning torches were the only real portable light source before the invention of electricity. So if a mob formed after sunset this combination would not be unusual.
* Truth in Television places to conceal guns so they would escape even a thorough search.
* Truth in Television. Plenty of people never even manage to get the diagnosis before they lose it.
* Truth in Television. Ponies are known for possessing the ability to carry quite heavy loads, even those that match their body weight.
* Truth in Television. Pre-Windows MS Word especially seemed to have at least three keys, any one of which would instantly delete all your work.
* Truth in Television quote, just because they've always seen it done on TV and do it automatically, or the reassuring psychological effect of being bound and released, or just that handcuffs itch a bit, most perps will do this once the cuffs get taken off.
* Truth in Television racist or homophobic. This trend seems a minor issue at best these days, and most calls (like the ones listed here) certainly aren't meant to be taken as the literal meaning of their words.
* Truth in Television relates a true complicated prank he played on a friend involving his broken down car and the US Park Service.
* Truth in Television. Research shows a strong correlation between the depth of a man's voice and his physical capability. This is due to Testosterone affecting both physical strength and the status of the Larynx. There are notable exceptions, of course, with Mike Tyson, for instance, probably being the most famous inversion, but these are few and far between. Interesting thing to note is that this only applies to men. There doesn't appear to be any strong correlation between the depth of a woman's voice and their Badassery.
* Truth in Television, sadly. MD vs. DO is probably the most common, but other popular variants include surgeons vs. physicians, surgeons vs. anesthesiologists, and surgeons vs. surgeons (cardiothoracic vs. transplant, plastic vs. ophthalmic, etc)... It's probably less "MD Envy" and more "FACS Envy". In countries that have them, general practitioners may be looked down upon by specialists (who make more and spend more time in training) and different specialists may look down on each other as well.
* Truth in Television scattered around the globe. Atolls form from the remains of old undersea volcanoes which result in a ring shaped series of coral islands around where the mountain previously emerged from the sea. A single Atoll can be comprised of many small islands, some remarkably similar to the trope in its most literal sense, but even where the islands are large they are still small by any land based means of comparison. Atolls are found mainly in tropical and subtropical Indian and Pacific Oceans, because they are sustained by corals that grow only in warm areas.
* Truth in Television school bullying and cyberbullying cases. Some victims of school bullies eventually snap and go on a school shooting. Victims of cyberbullying who commit suicide will eventually lead to their friends or families hunting for the cyberbully's blood.
* Truth in Television? Seabird droppings are a source of potassium nitrate, an important ingredient in explosives.
* Truth in Television, seemingly oblivious to the obvious danger there is in having a loose card out for a high-security lab.
* Truth in Television sensitive when struck (as anyone who's bumped their shin in the dark can attest).
* Truth in Television since at this point the alcohol is practically tasteless and doesn't really kick in until it's been down your gullet long enough to thaw.
* Truth in Television since Murtaugh is carrying an adjustable sight Smith & Wesson revolver which is much better suited to carefully aimed shots then Riggs fixed sight Beretta.
* Truth in Television, since the radio waves aren't blocked in that direction. A satellite picks up the signal and retransmits it to ground.

* Truth in Television, since there are many examples of this in real life. The Colt 1911 was invented in, you guessed it, 1911, but is still in widespread use in 2020.
* Truth in Television. Sleep-talking is far more likely to be incoherent mumbling rather than any kind of scandalous deeply-held secrets.
* Truth in Television smell bad compared to some other animals as do some animals to us. Wet dog anyone?
* Truth in television: Some of the better deadbolts can withstand forces that would put a hole in an outer wall. And, of course, there are a lot of houses that have solid steel doors with deadbolts and security screen doors... and great big picture windows right next to them.
* Truth in Television: some people are just always loud, and have to constantly be reminded to quiet down. Let's face it, you have probably met/known at least a handful of people like this in your life. You might even BE this person.
* Truth in Television, sort of: A president-elect, governor, business leader, etc., initiates a search committee to fill an appointed position, but ends up picking someone on the committee or the person who had already been helping him in that area anyway.
* Truth in Television strict over the centuries, in order to prevent mentally ill people from being forced into or receiving exorcisms because someone mistook their delusions for possession. According to the Catholic Church, the signs of actual demon posession (as opposed to mental illness) include:
* Truth in Television subdivided into verbally claiming you're a cop, using a fake badge or warrant card, using a fake or stolen uniform, and using a fake or stolen police vehicle. The laws regarding this vary by jurisdiction: in Michigan, for example, it's only considered a felony if you're impersonating an officer while committing a different crime.
* Truth in Television take your car, it very rarely happens in real life due to the paperwork and liability involved.
* Truth in Television. Teachers, priests and similar individuals are easier to pass to another district or parish than to fire, defrock or imprison.
* Truth in Television that people can grow desensitized to disgusting elements due to overexposure. This is especially common among people who either own pets or have poor living conditions, as they are constantly surrounded by bad smells and/or general filth that they can become oblivious to them.
* Truth in Television: The city of Rouleau where the show was filmed really has such a store!
* Truth in Television; the fact that it was so sunny was precisely why shirts would be impractical (you would overheat too quickly in them, and robes weren't always practical or acceptable). Sunburn wouldn't be a problem.
* Truth in Television the favorite child of their mother, Eleanor of Aquitaine, while John was the favorite of their father, Henry II.
* Truth in Television, the length of solar day (sunrise to sunrise) changes depending on your present location and the time of year. Though the abstract "day" is still 24 hours wherever you go.
* Truth in Television. The more concentrated the wealth and power, the shinier, newer, and better maintained the buildings, clothes, and people will be.
* Truth in Television: The most esteemed British actors, both then and now, tend to be quite familiar with the idioms of American speech.
* Truth in Television, the preferred method of getting from Point A to wounded guy at Point B involved grenades. Lots of grenades.
* Truth in Television. There are devices in the real world which take a camera image and project it directly into the brain, albeit only as single-bit low-res images. Still experimental yet.
* Truth in Television...there are people who get kanji tattoos or paint them on their cars just because they look snazzy. For all they know, that sign that they've been told says "powerful" or "fast" really says "go jump in the lake" or "I'm an idiot".
* Truth in Television: There are some children who are really, really good chess players. If you see a kid playing chess in a park, you underestimate him at your

peril.
* Truth in Television, thereby making the offspring a clone of the mother molly alone. Since the male doesn't pass on its genes, and how it has no apparent advantages over normal asexual or sexual reproduction, it's a mystery why it works for the molly.
* Truth in Television; there have been cases where children have taken cars and have somehow managed to drive them reasonably competently, although it doesn't happen that often:
* Truth in Television. There is a joke in the British Army that if two officers from the Intelligence Corps appear at breakfast wearing identical clothing the junior officer must go and get changed.
* Truth in Television: there was such a school of thought in 1920s to 1930s advocating the use of powerful vehicles to serve as trench-breakers and infantry support. As the expected pace of warfare was restricted by both technological limitations and the speed of infantry, these largely concentrated on larger and more heavily armoured vehicles.
* Truth in Television the salvage team had to climb down part of the rear deck — which was being periodically blasted by plumes of -110 degree carbon dioxide.
* Truth in Television. These days security precautions package seemingly rudimentary things with too much tape, foam, bubble wrap, MORE tape, a box inside of a box, and more tape, to make it look comically unnecessary.
* Truth in Television. These now being 20-plus-year old cars and engine swaps being easier than extensive rust repair, condition is more important than original spec.
* Truth in Television. The US Navy does in fact have a pair of ships specifically designed and built to act as command and control vessels for major amphibious assaults — the Blue Ridge-class.
* Truth in Television (they aren't typically fast enough to drop somebody who's just sitting) than the entire thing going haywire. Statistically you're still far more likely to die in the car ride to and from the amusement park/fair than from the Ferris wheel or any other ride there.
* Truth in Television this happens on D-Day to Joe Toye in which he survives a pair(at different points) of thrown grenades exploding inside the trench of a German gun emplacement right next to him. In one case it was in enough of a dip and in the second his rifle takes the hit.
* Truth in Television. This has been cited on many crime shows as the reason why cops get suspicious of supposedly grieving loved ones. Conversely, cops have also gotten leery of those who are overly upset, feeling that they are putting on an act.
* Truth in Television: This is a standard way to fake a punch, and has been used for probably hundreds of years in theatre.
* Truth in Television: Those people with stable, loving families could consider their parents or ancestors this, with the evidence of them raising new generations in stable environments so that they can improve
* Truth in Television, though generally not of the VR Goggles or Matrix variety.
* Truth in Television, though it's usually been used as a naval weapon or a mine-clearing device over the course of history.
* Truth in Television to a large degree, even today; the U.S. armed services have enough of a need for medical personnel that they are given more leeway about their (lack of) military bearing than would be tolerated in combat soldiers/sailors/airmen. Crystallized in a saying going back to Korea if not earlier: "There is nobody as un-military as a military doctor."
* Truth in Television, to an extent, as morbid humor is often a coping mechanism.
* Truth in Television, to an extent. Certain special forces groups worldwide, including the British SAS and the US Army's Green Berets, are sometimes tasked with raising up rag-tag revolutionary armies to bring down governments perceived as exploitative or antagonistic. The peacefulness of the villagers in question, however, varies wildly.
* Truth in Television to clone other organs, practically removing the chance of

organ rejection.
* Truth in Television to killing one's own kind. On the other hand, a person fleeing triggers predatory "pursue and kill" instincts, and the killer doesn't see their face, thus dehumanizing their target, making shooting or stabbing them much easier. A person from behind also resembles the standard "person silhouette" target used on many target ranges, making it easier to revert back to training mentality and shoot.
* Truth in Television") to let MPs and SPs know they were civilians and not AWOL.
* Truth in Television to some extent, as witnessed by quotes from several US veterans of WWII; one submariner in particular recalled a captain who had been relieved as mentally unfit for a frontline command having his dolphins (submariner's insignia) torn off at the very same ceremony as he was awarded a Silver Star for his first patrol, by the same officer who had pinned the medal on.
* Truth in Television to this, as some hospitals require different colored scrubs for different departments and even different levels of staff. There are problems because supply management departments tend to not care about carrying five different shades of blue just to satisfy staff vanity.
* Truth in Television touch the camera!" Chinese officials do it a lot. This also tends to happen quite a lot in documentaries, especially those focusing on police; often someone being arrested attempts this, only for the cameraman to discretely step back and film from a different angle.
* Truth in Television: Try looking at your feet next time you ride an escalator. They are actually there to warn you not to put your feet there as you may fall, but still pretty cool.
* Truth in Television, unfortunately, as the novels are responding to recent revelations about what such orphanages could be like.
* Truth in Television, unfortunately. The real Baltimore child-murder which inspired the Adena Watson storyline was never closed. Getting word out about That One Case is one of the reasons why the real-life Baltimore Homicide Division was supportive of the true-crime book about their work.
* Truth in Television, unless said trauma was accompanied by a head injury. Indeed, people with PTSD and the like usually suffer just the opposite problem: being completely unable to ever forget the horrible things that happened to them.
* Truth in Television. Unpopular people put in the stocks faced a real risk of being beaten to death by angry mobs. Some people even wore armor when in the stocks in order to avoid this.
* Truth in Television. Unusually skillful and loyal slaves have often been rewarded with freedom.
* Truth in Television up to a point; aircrew are permitted to take dextroamphetamine in order to maintain their alertness if it's necessary to exceed peacetime limitations on how long they can remain at the controls without rest, as well as tranquilizers to help them come down from the high once their mission is complete. This is strictly voluntary except in the very gravest emergency scenarios, however, and many pilots choose to take their chances with the dangers of fatigue.
* Truth in Television: Walsingham really filled this position for Elizabeth I.
* Truth in Television was caught making sure the gunpowder trail leading to the explosives he planted under the house of parliament were perfect before lighting it.
* Truth in Television we perceive what is alive and what is inanimate by the look of the face and eyes more then anything else, so now we know the human truth. Dolls are just freaky soulless things!
* Truth in Television were designed, built and deployed in World War II. Likewise, a number of modern armored vehicles include amphibious capability, and most tanks can ford rivers using snorkels.
* Truth in Television; when a person is trying to recall an unfamiliar face, they will often use a face that they are familiar with as a guide, along the lines of "He resembled [insert celebrity here]." This means that the more they think about the face the actually saw, the more their memory of it begins to resemble the

celebrity's that they used as a reference.
* Truth in Television when the military started to outsource the service functions like feeding the personnel. Many other armies still do it in-house, providing ample possibility for this trope.
* Truth in Television, where any time a girls sports team shows up you can expect them to be dressed in shirt and bloomers.
* Truth in Television: Where things from fiction have happened in non-fictional real life.
* Truth in Television, which is recognizable because of its huge size and the bullet scars covering it. Okay, so you could probably kill it if you had a higher caliber gun, but the thing has been shot, a lot, and is still going.
* Truth in Television, which many lawyers say have spoiled many potential jury pools with unrealistic expectations of forensic science.
* Truth in Television which protect people who try to help, but fail to do so, make it worse by accident, or other such technicalities like lack of consent.
* Truth in Television who plays wheelchair rugby in the Paralympics. Really more of a subversion. The guys may be shameless about playing this card when they're trying to chat women up, but the footage of the rugby matches shows they're anything but weak, and a couple (especially Zupan) are downright scary.
* Truth in television with military brevet ranks; promotions given authorizing officers to claim the title and responsibility of a promotion, without the actual pay.
* Truth in Television with so-called "Top 40" and "All Hits" radio stations, which only play songs from the Top 10 or so of the current chart in heavy rotation while less popular songs only come up occasionally.
* Truth in Television, women tend to marry men who are less attractive and, in some cases, not as smart. At the very least, it would lead to a happier marriage or long term relationship. The reason is because men value beauty and women value emotional support. If a man finds his wife beautiful, or at least more attractive than him, then he will be happier and dote on her more, giving her emotional support, which makes her happier as well. A more attractive man is more likely to feel he can do better or be more tempted to seek other women as he knows they find him attractive. Because of that, he becomes unhappy and gives his wife less support, resulting in her being unhappy as well.
* Truth in Television yourself. Telling your care team exactly what symptoms you're experiencing can be very helpful; insisting that you have X disease tends to have the opposite effect.
* Truth in Television. Your very existence is proof that your parents are a successful template to follow!
* Truth In Web Manga. Other historical examples are also mentioned, including the political fracturing of Italy and the decline of the (neither)Holy (nor)Roman (nor)Empire.
* Truth is a scourge lives up to its name. Not only does it force its victims to tell the truth and to keep talking, something in its makeup seems to compel its victims to tell those truths which will most hurt, enrage, or otherwise unsettle the audience. There's a reason Pokey called the stuff "truth poison".
* "Truth, justice, and the American way." Despite not even being from
* "Truth, Justice and What?" was created as a response to the resurgence in popularity of
* Truth Martini also employed a two such women for a joke on his ROH
* Truth Martini cards not to wrestle, so members of The House Of Truth can get more matches in their place.
* Truth Martini: Debuted in 1998, arrived in Ring of Honor as a manager in 2009.
* Truth Martini was egging Dijak's old rival Will Ferrera to continue pursuing him too.
* Truth of Dare, the largely neo-Pagan community in San Francisco uses a variant that calls August the "Third Foggy Moon".
* Truth of the Sith, Palpatine is revealed to actually be this. He studied ancient Dark Side practices all his life but cannot use them, hence why he was so

determined to get Anakin to join him.
* Truth of the World: Welcome to the show by Evermore, is about media, propaganda and advertising, with occasional interludes by a trash-news type show that shares it's name with the album.
* Truth or Consequences (1950-51, 1954-75, 1977-78, 1987-88; total of 24 seasons, although it is best known for the 19 years {1956-75} hosted by Bob Barker)
* Truth or Consequences also had many ticking clock games and contests.
* Truth or Consequences, the popular radio show, was simulcast on radio and television for a single day on 1 July, 1941. To attract viewers to the station showing it. The game would not return to television until 1950.
* Truth or Dare (2012), Woodbridge is the grumpy groundskeeper at the family estate. He is the one who sends the guests tramping through the woods to the keeper's cottage, and is later revealed to be in league with Justin and his scheme of revenge.
* Truth or Dare (2017): Several of the dares require one to choose between losing a limb or dying. It starts with minor maiming, like having your hand burned or being kneecapped, but escalates to outright amputation.
* Truth or Dare (2018): A demon named Calux has possessed the truth or dare game within the film. Anybody who breaks the rules is possessed by him too to enforce them.
* Truth or Dare (2018): Demons can possess places and even ideas here.
* Truth or Dare (2018): Olivia and Markie being the only friends in the group to make it out of their game alive.
* Truth or Dare (2018), Olivia releases a video online in which explains the curse and the game. She ends by asking "Truth or dare?". As the rules are "once you're asked, you're in", everyone who watches in now part of the game, and anyone they ask is part of the game. The logical inference is that this will cause a genocide that wipes out the majority of the world's population.
* Truth or Dare?: A Critical Madness cuts a chunk of his own face off because one of his hallucinations dares him to.
* Truth or Dare?: A Critical Madness, the killer is packing a handgun, a machine gun, knives, a machete, a chainsaw, a spiked club, and a pair of nuchuks.
* Truth or Dare documentary, her father doesn't seem to understand that she's a megastar; he worries that she won't be able to get him tickets to her show when the tour comes to Detroit, and complains about the burlesque style that made her famous.
* Truth or Dare, one of the dares requires seven different living body parts to be removed. The count includes a pinky finger and a pinky toe.
* Truth or Dare writers know this very well, and Truth or Dare fics are practically a genre.
* Truth or Laser Shark", Brick reveals that he wet his pants on his first and last days of school.
* Truth Or Scare: A documentary series geared around supernatural events, cryptids, and creepy historical events.
* Truth Or Scare is a kids' program hosted by Michelle Trachtenberg that discussed supernatural-related historical events or pop culture characters. It had a gothic horror tone to it. Most of the show's content was actually taken from previously produced documentaries.
* Truth Or Scare on Discovery Kids existed entirely of promoting this trope. Because we all know the Tower of London is haunted, right? RIGHT?
* Truth or Square" reveals that Squidward once had a precious flower parterre next to his home that was squashed by a giant pineapple that would later become SpongeBob's house.
* Truth: Red, White & Black introduced Isaiah Bradley, the sole survivor of a battalion of black soldiers who were administered a recreated version of the Super-Soldier Serum. He only served in one major mission and was promptly imprisoned in Fort Leavenworth for decades for "desertion". It's unclear whether his current disabilities, similar to the symptoms of Alzheimer's and steroid abuse, are a result of an unstable super-soldier formula or his treatment at Leavenworth. The

story reads like he is in fact the human guinea pig for Steve's serum, with the racist US Army spending many "more disposable" black lives before giving the serum to a white man, and this was originally the author's intention. However, Marvel backtracked, so the story begins in 1942 after Pearl Harbor while canonically Steve was already Cap by then, and this is acknowledged in-universe.
* Truth: Red, White, and Black, a Nazi sympathizer WWII vet lectures a black man about Germany's political motivations for war. The black man knows all about it — his family is German going back generations, ever since Germany colonized what is now Namibia in the 1800s. His grandfather fought on their side in WWI and wasn't interned in the camps because of his veteran status.
* Truth: Red, White, and Black, one of the black test subjects for the Super Soldier serum was Maurice Canfield, a young man with a moneyed background and strong socialist leanings. When he was arrested for taking part in an anti-war protest, his family's reputation allowed him the option to join the military rather than serve jail time. Implicitly, were it not for this incident he would have used his money to avoid the draft altogether.
* Truthsayers is also possible, which is why the drug is banned for anyone who is not a Truthsayer. The entire colony of Atlas is supported by the belief that the Truthsayers are never wrong and always correctly determine guilt or innocence. Guess what happens in the novel?
* Truth Serum, he confesses that Skipper's monkfish surprise "tastes like elephant sweat, but everyone pretends they like it to spare Skipper's fragile ego".
* truth serum), its main effect being the popularization of LSD as a recreational drug; towards the end of the program's life, CIA agents were dosing each other and holding private LSD parties, which resulted in the death of one agent when he threw himself out a window while in a hallucinatory fit.
* Truth Serum lead DiNozzo to explain about the different members of his group in flashbacks.
* Truth Serum on him. Instead, it makes his heart beat faster and then kills him, with a heart monitor showing the whole thing.
* Truth Serums, have treated themselves in such a way that mind-control drugs have extremely little effect on them.
* Truth serum's inability to make someone tell the truth is a somewhat recurring plot point, sometimes due the interrogated being conditioned to resist, more often due him having a medical condition that would kill them if the truth serum is administered, the interrogated one having been administered something that, with the help of the truth serum, ends up killing the subject mid-interrogation, having taken some drug that counters the serum's effects, and, in at least one case,
* Truth Serum was the Secretary of State'' referred to the same thing or something completely different.
* Truth-Telling Session: Many truths being confessed during a crowd argument.
* Truth" that she loves those scenes because Tom Welling's chest makes the perfect headrest due to their height difference.
* Truth to Tell into limericks, one book at a time. The first book goes as follows:
* Truth Twister are often thought to fall into this category, but in fact, they can lie; they just strongly prefer not to. When confronted with evidence of having told an untruth, the typical Vulcan response is, "I exaggerated." Liar!
* Tru TV. That's right, round 3 questions are worth 10 times as much as round 1 questions.
* Truxican as their name implies, it probably involves masked luchadores.
* "Try a Little Tenderness" was a big-band pop number from the Thirties, by the composer of "When the Red, Red Robin (Comes Bob, Bob, Bobbin' Along)." Aretha Franklin and Sam Cooke covered it as a straightforward soul ballad. Then Otis Redding picked it up from Cooke, made it build from a slow beginning to an explosive conclusion, and wiped every previous version from memory.
* Try and be fairly good people. They at least try to have decent morals, try to do the right thing, and acknowledge on some level that some of what they do is
* try and get rid of Maya twice And her father divorced because, in Kurain village, men are pretty much useless since only women inherit psychic powers.

* try, as that's not exactly easy to do. Klinger manages to do it by bluffing operators and lying about his identity, causing Potter to remark, "I don't know whether to arrest you or promote you!"
* Try attacking a Behemoth with a levelled up Yuna doing 99999 damage. The wimpy sound she makes as she swings her staff just makes it that much stranger.
* Try Burning Gundam, which adds more of the blue parts that stores Plavsky Particles similar to the RG system used by the Star Build Strike. It has the same attacks, but the performance was better tuned so that the machine could handle Sekai's more extreme attacks such as the unnamed phoenix attack that shattered the original's arms.
* try, but various bits of serendipity get in the way). Amusingly, their peers assume the trope played out straight.
* Try counting the number of times "No comment" is said in the interrogation room on UK crime drama
* Try dating somebody with glandular fever, or another disease spread by saliva. This becomes a hell of a tool.
* try. Even better, try explaining Ozma spending her first years as a boy to a modern audience. This does appear in adaptations, such as one of the anime adaptations, but is sometimes glossed over.
* Try going from a lifetime of using Gameboys and Nintendo DSes to a PSP. Not only do you have four new buttons to learn (circle, square, triangle, and X), the four arrows on the left side may not always be used for moving your character about (as in the Nintendo handhelds); they may be for a whole separate menu system, and you'd have to move using the joystick in the lower left-hand corner. Results in many a rage quit until one figures it out...
* Try going from anything but a Glock, to a Glock. A Glock has two "triggers" slightly offset (kinda like an Accu-trigger) when you go to shoot: the first trigger you encounter is a trigger safety for the second one, which is the actual trigger which fires the weapon when pulled. Pray it doesn't get caught on a tree branch.
* Try going from a pen tablet to drawing on paper. You will draw something wrong and almost instinctively try to hit the non-existent Undo Button. God help you if you're drawing with any permanent medium (like oil paints or pens). The same goes if you want to resize something, make different layers or copy a pattern several times.
* Try going from Monument to Bank. This means 5 stops and 2 changes by the route plan. However they are actually directly above each other, with an escalator connection, but this was edited off during construction of the Docklands Light Railway in the 90s and some installations STILL don't show this as a result.
* Try having a firefight in a crowded parking lot. Or not, because it'll last about 10 seconds until everyone is dead. One has to wonder what a car wreck on a crowded highway was like in Fallout world.
* trying, for all the things he does to get out of the Army, he won't do anything that would actually compromise the unit's ability to give the wounded the best care possible — even when he pretends he thinks he's in Toledo, he still helps with the wounded, claiming they're all victims of a bad traffic accident. When Radar leaves, Klinger is promoted to Company Clerk and continues to prove his worth.
* trying heavily to avoid the parts of hockey they couldn't compete in wanted to play.
* Trying Human, Glassner, who's stopped aging due to contact with alien tech.
* Trying Human suit) and being an organization totally dedicated to dealing with alien activity on Earth. Unlike most examples of this trope, a good number of Majic agents are female.
* Trying Human, when EBE1 first crashed on Earth (in the Forties), they amputated his arm and replaced it with one made of the metal from his ship, which he retains in present-day storyline.
* trying not to bite, a dog can be heard barking somewhere in the distance as he starts to go all fang-y.

* Trying their hand at the quoting variety as well: "As Friedrich Nietzsche famously said, "Hey, you! STOP HITTING THAT HORSE! WHHAARRRRGGARHABLGLL!" (Nietzsche suffered a lot of mental decay.)"
* Trying this trope in real life can have disastrous results. Building a relationship with someone you do not see as "good enough" leads to turmoil and resistance from the partner. For examples of how badly trying this can go, just consult your nearest advice column.
* trying) threaten to pop off the dollified Akane's head and a normal Shampoo attacked Akane & Ranma with bombs at the wedding ceremony.
* trying to adjust to becoming a human, in an effort to embarrass her and keep her out of the running for Princess of the Fall Formal.
* Trying to avert this trope is partially Redcloak's motivation for his deeds, as expanded on in
* trying to avoid a fight, one tends to find him, either on its own or due to his passengers. River, in particular, is a colossal magnet for trouble, ranging from angry superstitious villagers who think she's a witch, to corrupt police officers and bounty hunters after the giant bounty on her head, to elite government assassins who want to hide any secrets she might know.
* trying to avoid another one that sounds more dangerous on paper properties. In another, he goes away from a main battle with Chaos forces to an out-of-the-way dredger where there plausibly might be a demon summoning taking place; as he'd fervently hoped against, there was. This, incidentally, keeps enhancing his reputation and makes his attempt to get cushy desk job even harder.
* trying to be "nice", Nanny is surprised to see her looking at a pink cardigan. Nanny's reaction is "You're not going to wear that, are you?" She would have been reassured to get the reply "No, I'm going to eat it, you daft old fool", but instead Granny just says "You don't think it would suit me?"
* trying to capture the Imperial capital of Coruscant-class Star Destroyers he had kept in reserve, which promptly hopped through hyperspace to appear right behind the Ciutric fleet. One missile barrage against the enemy flagship's unshielded flank later, the war was over.
* Trying to clean Jon's teeth, which rather resembled doing the head-in-lion's-mouth circus trick.
* trying to come Back from the Dead Joker? He knows things that Batman wasn’t there for but Batman may have heard about secondhand and is filling in the gaps for himself.
* trying to cover something up, as the amount of effort involved in a cover-up is almost always more than the amount of the actual crime.
* trying to damage his control of Earth, but the Brigadier cuts it short by pointing out that the companions haven't become ruthless killers, but are just desperate people taking the only option available to them to hurt the Master and only oing it because they know they won't have to live with the guilt of being pushed that far.
* Trying to drum up interest and also against her girlfriend Vaggie’s wishes, she decides to sing out her idea. After singing her idea, everybody in the studio laughs at Charlie. Charlie sadly realizes not even singing her idea would make people interested. Even Katie Killjoy points out nobody
* trying to escape, you can see Red Guy's head in the microwave, Roy sitting on top of the wall of the set, and a shot of Red Guy just standing as it falls down, when Red Guy has been absent for almost the entire episode.
* trying to extort sex from her and she was trying to record and expose him. Beckett plays the recording of the proposition and the part right after that where the husband confronted her, then pauses the file, hoping he'll confess rather than hear himself murdering his wife. With some prompting from Castle, it all comes pouring out. We then learn Beckett didn't actually have a recording of the murder: the battery died on the victim's smartphone beforehand.
* trying to figure out her powers, Lord Camelot no longer responds to her, but after augmenting her powers with technology, she is able to use a weaker attack called Mold Camelot.

* Trying to figure out if a U.S. Marine captured in Afghanistan has been converted/brainwashed into one or not is at the center of
* Trying to find loopholes in the rules has been shown to result in leaving angry notes for your past self not to do so.
* Trying to flip formerly long hair over your shoulder. Also using shampoo or a brush when you are suddenly bald.
* trying to get fired, as working at the Krusty Krab is "cutting majorly into her social life," but Krabs simply didn't have the heart to fire his own daughter. So SpongeBob, who was sent to fire her anyway, "pretends" to fire her so she could go and enjoy her summer vacation.
* trying to get help from a phone line with the hold music that plays relating to whatever problem they have, causing them to break down in tears. Examples include Marge calling the mental institution to which Homer has been committed in "Stark Raving Dad" and having to listen to an easy-listening version of Patsy Cline's "Crazy", or Homer calling the missing child hotline after Maggie runs away in "Homer Alone" and being subjected to Player's "Baby Come Back".
* Trying to get out of filming so he can officiate at Monica and Chandler's wedding, Joey
* trying to get the casino destroyed as part of an insurance scam. Much as it infuriates him, Joker realizes Batman is right, and has to abandon his death trap to go settle accounts with the casino owner instead.
* trying to grow out of your innocent child star image to lure (former) children into depravity.
* trying to hex Arthur Weasley when his back was turned, then in the fourth book trying to get compensated for the destruction of a luxury tent he never owned.
* trying to hit him, before whacking Eddy off the log and into the pit.
* Trying to investigate the rooms in the inn without talking to the clerk and finding out which room is yours will result in an
* trying to jump up to a high platform in his game world and then get exhausted from hitting his head repeatedly on the side of it Mario then went back into the TV and continued the game as a giant, being able to climb up said platform.
* Trying to keep track of everything that happened after the death of
* Trying to make herself appear more busty than she really is, possibly by using a push-up bra or
* trying to make the other one look stupid, and it looked like they were going to actually hit each other at some points.
* trying to prevent. Despite that, Eris still blames the, for Rezo's death. Zelgadis even calls out that she has totally misplaced resentment.
* trying to protect her, and she takes care of him despite not having really believed his claims. If they reach the max support level, they get married.
* Trying to push your glasses up the bridge of your nose only to remember you're not wearing glasses. No dramatic effect there. It even works if you just have a job where you wear safety glasses.
* Trying to raise the dead will also cause instant death because that would be a HUGE energy drain. In the last book, Eragon considers trying to bring Brom back. However, what he seems to be suggesting sounds more scientific (use magic to repair the body, repair the brain, use telepathy to give the brain its memories and personality, then jumpstart) than summoning Brom's soul from beyond the void, which is specifically what he was warned against. In any case, he decides against doing it.
* Trying to reassure a morose minister. "We're both in the business of helping people. DON'T MAKE ME HIT YOU!"
* "trying to repair itself" to be more like the original, hence the reason why everyone all ended up on the same ship.
* trying to return her purse, the real rapist was the girl's dentist uncle who drugged her, and the ending implies that the father will probably get off easy since he attempted CPR.
* trying to say, because the Japanese word he used means "fried chicken" (perhaps he meant "jellyfish"). Note that Chamo didn't have any reason to speak Japanese, as

Negi is also a native speaker of English. Interestingly, this wouldn't be the last reference to fried chicken we'd see in this series...
* trying to seize power just like Darth Vader. This is the same woman that originally didn't want to have children out of fear that they'd become Sith.
* Trying to shotgun a niche property into a multimedia cash cow even though not many people are interested in it.
* Trying to spare the final boss of the genocide route, Sans, will get you killed
* Trying to steal the Demon Archive from Jade while she was the Queen of the Shadowkhan by deceiving her resulted in her destroying it.
* trying to stop the prison break initiated by Luffy; it's easy for readers to forget that while Luffy and Jimbei are good guys and Ivankov seems to be too, most of the other pirates who escaped decidedly are not. Though it doesn't help that despite Magellan and Hannibal, the other staff members enjoy torturing and killing the inmates even long after said inmates have relinquished their pirate life and just wanted to go home.
* Trying to stop Twilight from contacting Sunset, through deliberate fire spells, disguised as accidental spellcasting:
* trying to take advantage of the situation for some good ol' lip-locking, Kaname's irritated attempts to point this out don't deter her very much.
* trying to take over Hijikata vice-commander position, and regularly attack him with a Bazooka, tried to poison his food in one or two occasion, and generally do anything to unnerve Him.
* Trying to touch things, but accidentally phasing through. (Commonly for ghosts and holograms)
* Trying to unravel a Weave of the One Power instead of letting it dissipate naturally has this result at least once: a
* Trying to use a laptop on the same desk as a desktop computer. You'll instinctively try to use the keyboard, mouse, USB ports, etc., wonder why they're not working, then realize you're manipulating the desktop computer instead of the laptop.
* Trying to use the out-of-bounds bug to reach the casino staircase results in the bouncer catching you, throwing you out, yelling "you little punk!"
* trying to warn him about the (fake) bride to lose all trust in Shining Armor and disown him in retaliation.
* "Try It And See" by Rita Pavone is sung from the perspective of a woman trying to convince a man to let her be a Manic Pixie for him. It was written by
* Try it; the short kid will attack the arm on their head, they'll kick (which is when you use your leg to keep them at bay and end up hopping around attached to a small bundle of joy), or they fall over when running into the hand. It's effective at least but doesn't happen the way the trope describes.
* Tryks hunt down and infect the various species of vampire. They need normal humans to reproduce though. Deacon Frost also tries to become a creature above vampires on the food chain himself but instead gets eaten by one.
* Try learning to play the viola and then trying to play a contrabass. To clarify, the contrabass is a viol, which is actually a different instrument family than the violin, viola and cello, and tunes in fourths instead of the fifths that the others do. This means that the entire fingering system of the instrument is different from that of the other three, which could be a
* Try Lina's group outrights destroys another world's Mazoku lord, but since it invaded the world of another mazoku lord, any effect this had on the "balance" is best saved for WMG.
* Try living a day as Firecracker Jim. He's an amputated stump who lost both his hands and both his feet since he blew them off completely with his own explosives.
* Try looking at Alucard's sprite while he's running, flowing beautiful hair and all.
* Try, Lucas' model is a straight-build that doesn't change anything from the original (other than adding the Core Fighter back in, since the stock model didn't have it) and is still competitive because it's such a high-quality build.
* "Try Not To Breathe": the verses, when taken at face value, describe the narrator

attempting to suffocate themselves, while the backing vocals repeat the line "I have seen things you will never see."
* "Try not to make the sword glow. We don't want the enemy to know which one to take if they capture us."
* try out the Eggscellent Challenge with a recreation of the dish seen in the episode.
* Try playing "Park bench," in which the entire point is to sit beside one of your friends, and act out a routine or do shenanigans, all in order to make the subject laugh, or even just smile.
* Try playing through a game without ever buying ammo from a vendor — in other words, ammo crates are your only method you have of reloading weapons. For added challenge, never use a max-level weapon, and play on the highest difficulty, if possible. In the games where ammo doesn't reset if you die, this becomes a major case of
* Try Polar White, Onyx, Cobalt, or Metallic Rose DS Lite colors on for size.
* Try reading a book of Greek myths that uses only the Roman names? (Greek names were only used in the Greek-to-Roman
* Try running Windows on a Mac with a Mac keyboard - the left Alt and Windows keys are now the wrong way around.
* Try showing some German expressionist movies to someone who isn't already familiar with the genre, and see how long it takes for them to mention
* Try solving a 4D maze. Just 3*3*3*3 takes about half an hour, and that's if you've gotten used to moving around in 4D.
* Try some early H&K long guns - most of their weapons based on the G3's action have a AK-like release lever for military models, and then a AR-type release button on civilian ones. For some of them, that's the only significant physical difference between the two. Interestingly, military models actually have
* Try speaking a language that isn't your native one right after getting braces. Not pretty.
* Try stretching an ordinary latex balloon across the pipe. Since it expands, it won't rocket off instantly, giving it time to smother the engine. Then, if you've done everything right, it will pop, making a loud noise and spooking your victim without actually causing damage to the car.
* trysts and/or relationships with alien characters, the respect and admiration that Shepard has fostered throughout the galaxy is a key factor in bringing them together in the war effort.
* Try swapping from MS Paint in NT 5 (2000/XP) to NT 6 (Vista/7) and you'll quickly find the Ctrl+R (rotate in NT 5) activates the flipping RULER in NT 6! That not only screws up muscle memory but can/will add countless hours of time to what should be a simple effect.
* Try the "NBMB run" (no bosses or minibosses), where you see how high a percentage you can complete without killing any bosses or minibosses.
* try this. Because the Warp is a hell dimension co-ruled by the God of Screwing People Over, it's never going to work.
* Try to avoid ambiguity when possible. Example: "Jill likes cookies more than Jack." could mean two different things. Make it clear.
* try to corrupt him, only to utterly fail when it can't think of anything to tempt him with that he actually wants. The Ring tries to tempt with the idea that he could use it to overthrow Sauron, and use his powers as the new lord of Mordor, to transform it into a large garden tended by enslaved servants. Sam rejects this idea, because he only wants to tend a garden on his own, not to lord it over others and force them to do the gardening.
* Try to find a version of Flash that does not have goodies hidden behind a tiny button in the about window.
* Try to Fit THAT on a Business Card!: A person with a very long title.
* try to flirt with some of the cute girls his age. Ozma is not interested in letting him.
* Try to have Guy Gardner murdered by said army, and when he survives, frame him for the deaths caused by the attack and expel him from the Corps.

* try to help Ishigami win the heart of his crush Tsubame for the sake of improving his self-confidence).
* try to hide it out of embarrassment, Ivy and Luna are both big fans of anime and manga, and bonded specifically because they both had an interest in it.
* try to pair them up. Though this is all down to Mac being large, as Cheerilee is exactly the same stature as >90% of other mares. His eventual girlfriend, Sugar Belle, also falls into this trope.
* Try to repeat after me: * BOOM* Brass section, go: * BOOM* Now the winds: * BOOM* Now the drums: * BOOM*
* try to save him by also dressing up as Robot Santa!" Amusingly, the jailer doesn't fall for Fry or Leela's disguises for a second, but he immediately believes that Zoidberg is actually Jesus.
* try to save the galaxy from the Reapers, unknowing that the "rogue Reaper" they're serving is the only one who still plans to continue the Cycle. Ironically, Tevos, Saren, and Benezia believe humanity are the unwitting pawns of the other Reapers who will turn on them the moment they've outlived their usefulness.
* try to stay out of galactic affairs and generally do their best to kill everything else in the galaxy. Disturbingly, there's no restrictions on government type for this personality, so it's entirely possible for such an empire to be a democratic "Purity Assembly" whose citizens come together in free and fair elections to decide how best to exterminate all the lesser races of the galaxy.
* Try to tranquilize the leader instead? He's wearing protective thermal underwear, you see.
* try to usurp power). In most cases, these units spend the game with their commander, but in certain armies, they can be split up to act as leaders for other squads.
* try to work anti-ork slurs like "tusker" into their vocabulary fans were during the early nineties by humans.
* Try to wrap your head around how many of WWE's roster at the time needed to not know their father in order for this storyline to work.
* Try Try" this is the main plot. Mark has been stuck in one for around a thousand days. However, unusually the episode does not take place from his perspective, but from that of the woman he has been continually trying to seduce during that period.
* Try using MicroStation after a few years of only using AutoCAD. Then, for giggles, try teaching yourself Google Sketchup. Where the heck are all my tools? And why can't y'all settle on names? Drop Complex=Explode=the default way something's drawn?
* "Try Whoson First", the narrator/customer needed a mechanic who does body work on cars. His/her usual mechanic doesn't do such work, but suggested a shop called Wrech-a-Mended, which the caller kept mishearing as "recommended".
* Try wrapping your head around the Moebius Loop. It's a loop with a half-twist with only one side and one edge. Similarly, the Klein bottle, which is a closed surface and only has one side, rather than having an inside and an outside. (3-D models have one part intersecting another; a proper Klein bottle would go back and forth through the fourth dimension at that spot.)
* Try writing today's date on your birthday. Chances are you will write your date of birth instead.
* TS3 coffee and energy drinks were toned down significantly, basically just preventing a sim from falling asleep for a few hours rather than actually boosting sim's "energy."
* TSAB: because Beryl, jealous that Endymion fell in love with Serenity instead of her, incited the war.
* Tsai Chin appeared as Lian May, Melinda May's mother, in an episode of
* Tsali also founded his own private military company, although it's been almost completely destroyed by the start of the story (he's the only member of it left).
* Tsali barely angsts at all, even though he has a backstory that could rival
* Tsali considers Venus one of these, as she's "the only Seedrian who ever put up a good fight."
* Tsali has shades of this. Though he has actual reasons to want revenge against

the Seedrians, he butchers entire worlds simply because he can, even if
* Tsali manages to defeat Super Sonic one-on-one in the opening scene. However (unknown to Sonic), he was wounded and only barely won. Come Episode 64 when he fights Sonic, Shadow, and Eric in their Super forms, it doesn't take long for him to lose horribly.
* Tsali's metal endoskeleton is actually one of these, powered by Dark Chaos Energy which allows him to absorb impacts and tank nearly impossible amounts of damage.
* Tsar Alexander III of Russia became this as he aged. As a youth, he was noted for his size and strength (over six feet tall) and as he aged the muscle turned to fat.(
* Tsar Alexander III was a truly massive man, nearly two meters tall and possessing great physical strength. He was rough and, though his reign was relatively peaceful, was known to train extensively for combat. When his train crashed, he actually held up the roof so his family could escape. This puts the
* Tsar Alexander I's beauty and charm enraptured many of his contemporaries; Napoleon famously confided to Joséphine: "If Emperor Alexander were a woman, I'd make him my mistress."
* Tsarevich Alexei Romanov, youngest child of Tsar Nicholas II, ruler of the
* Tsarevich Petr and the Wizard, one ferryman demands that you let him cut off your right hand; the next, your left foot.
* Tsarevich Petr and the Wizard", they run ferries, are terrifying in appearance, and demand your hand, or your foot, or your head, as toll.
* Tsarevitch Ivan, the Fire Bird and the Gray Wolf", after they murder Ivan, his brother draw lots about who gets to marry Helen the Beautiful.
* Tsarevitch Ivan, the Fire Bird and the Gray Wolf, and they get word to his father, who turns his oldest sons into menial servants and make Ivan his heir.
* Tsarevitch Ivan, the Fire Bird and the Gray Wolf arrives in time to stop Helena the Beautiful's forced marriage to his brother Vasilii.
* Tsarevitch Ivan, the Fire Bird and the Gray Wolf for his father, and once this is accomplished, he settles down.
* Tsarevitch Ivan, the Fire Bird and the Gray Wolf, the three princes find a stone at a crossroad warning of the perils on each way. Two turn back.
* Tsarevitch Ivan, the Fire Bird and the Gray Wolf, the Wolf carries off Helena the Beautiful, but dries her tears when she sees the handsome Ivan, and soon they love each other. Given that he had kidnapped her because another king had demanded her — it's a good thing they have the wolf on their side.
* Tsarist Russia era, Saint-Petersburg stood for the Enlightenment, built by European architects as a pinnacle of Peter The Great's modernization efforts, dubbed "The window to Europe". Moscow was the Romanticism, a stronghold of old Muscovite culture, traditionalism and Orthodox Christian spirituality.
* Tsarist Russia still has "spiritual Skoptsy" who practise asceticism without mutilation.
* Tsarist Russia. This is the reason why the word "принц" ("printz") is now used in Russian specifically for the son of the king (or tsar). "Knyaz" is the word with the broad meaning. In fact, the title of the ruler of the original Russian state (Kievan Rus') was Grand Prince.
* Tsar Nicholas II of Russia married the minor German royal Princess Alix of Hesse and by Rhine (later Tsarina Alexandra Feodorovna) in an example of this that dropped the collective jaws of most of Western Europe.
* T. S. Eliot, and every stanza ends, "For Christ's sake stick it up your ass."
* T. S. Eliot as a little book ... it was discovered that the poem was inconveniently short, so I set to work to expand the notes, in order to provide a few more pages of printed matter, with the result that they became the remarkable exposition of bogus scholarship that is still on view to-day."
* T. S. Eliot blacked out, but whether Eliot knew or cared is doubtful.)
* T.S. Eliot, born in St. Louis, became a naturalized British citizen in the late 1920s and for the rest of his life affected a decidedly more British accent.

* T. S. Eliot, Dobson the Dog Detective used to be an eager young police dog, but now spends most of the time seemingly dozing in his basket ... until he suddenly looks up and announces he's solved the case.
* T. S. Eliot, starting with comparing a sunset to "a patient etherised upon a table".
* T.S. Eliot wrote entire essays based around the belief that writing is fundamentally intellectual, not passionate, and the author is simply a vessel for the work. This was a rebellion against the Romantic poets who claimed that all work comes from the author's heart and thus there is no "impersonal" writing.
* Tseng is last seen unconscious in the entrance hall of the Temple of the Ancients, a building that is later destroyed by Cait Sith. Most players assumed he was dead, and were really surprised to find out (from the game's sequels) that this was never intentional and he was supposed to still be alive at the end of the game.
* Tseng: Marginally. He doesn't slap Aerith as he did in the original, tries to assuage Reno's guilty conscience, and offers him vacation time. It's also mentioned by Elmyra that the Turks knew Aerith had to come to them willingly, so they've not been constantly trying to kidnap her, more just constantly nagging and harassing her.
* T-Series) as a drop-in replacement for the Twin Cam, likely due to the fact that they, along with fellow aftermarket motorcycle parts manufacturer Delkron, were sued in 2005 by Harley for patent and trademark infringement.
* TSFW: Technically Safe For Work. Similar to "Mildly NSFW" in that while no naughty bits are visible, the image is clearly erotic.
* Tsiolkovsky whose dedication plaque reveals that it was built and launched in the USSR in 2363.
* Tsioque doesn't say a word, having a wide range of expressions, from a determined pout when thrown into the dungeon to a nervous smile waving at an Imp guard after she escapes. She does start to get some bits of unvoiced inner monologue in the second half of the game, though.
* Tsioque has these, always glowing to be seen since his whole figure is pitch black.
* Tsioque is actually pitch black and evil, his only features appearing being his eyes and his mouth when he speaks.
* Tsochari and Hellwasp Swarms can crawl inside a body and take over, although the process slowly kills a living victim and does not prevent the decay of a corpse.
* Tsogt Taij was ending, the context is clear. To make it even more obvious, the swastikas shown in the movie are right-facing, Nazi-style, rather than left-facing as used in actual Buddhist iconography.
* TSOL's "Code Blue". Specifically, the narrator has turned to necrophilia because he "never got along with the girls at my school, filling me up with all their morals and their rules".
* TSOP was originally written to be the official song to be named "Soul Train", but it was decided not to closely associate it with the show. Mother Father Sister Brother (MFSB) released it as a single,
* Tsotsi: The title character steals a woman's car, only to realize that there's a baby in the backseat.
* TSR 3rd edition novels (nine authors, including names that could probably shift product to D&D fans on their own, writing as T.H. Lain) was that it ensured the books would all be shelved next to each other in bookstores.
* TSR, as well as a massive loss on a pile of unsold novels hit TSR with a trifecta of Creator Killers, forcing them to sell off to upstart rival Wizards.
* TSR did publish statistics for God, Jesus and Archangels, but later removed them from publication after heavy criticism. They have tons of other gods though, both evil and good.
* TSR, disappeared suddenly in the late '90s, leaving many D&D fans wondering what happened. According to a fellow module writer and friend of his, Sean K. Reynolds, the truth is that he was involved in a car wreck in 1997 and has been unable to write due to the severity of his injuries.
* TSR had a credit to Chaosium before Melnibonéan material was removed in

the third edition.
* TSR has consistently remained the flagship setting for the game, with the most adventures and source books.
* TSR, if you chose to drink this unknown potion that said it'd make you "strong," then you got an ending where the main character turned into a giant.
* TSR magazine #48 adventure "Dr. Yes: The Floating Island Mission". The enemy facility has small robots called "Bernies" that can act as vacuum cleaners (and trash compactors, because they compress the trash they pick up), They also mop and wax the floor as they pass over it. When one encounters a trail of debris (dirt, water, blood, etc.) it will follow it to its source, cleaning as it goes.
* TSR miniatures rules. Swiss, Landsknecte and Turkish troops do not take prisoners as a matter of policy. In any situation where opposing troops would surrender, they are considered killed instead.
* TSR off. Not only did they torch their own franchise, they didn't even leave its Crossover character un-singed.
* TSRs is a miniatures wargame rather then RPG but it also had rules for individual adventures. Legal threats from Burroughs estate meant that it saw only one printing.
* TSR that can be up to a mile in size and the larger mass drivers can quickly wipe out an entire city.
* TSR that fires rockets) and Buck gets a +2 to hit with it. Additionally the .45's bullets can't be electronically baffled (Rocket Pistol smart ammo can lock on a target and track it to a limited degree but it can be jammed and it can mistakenly lock on to cover that a target is hiding behind). Rocket pistol dumb rounds are cheap but extremely inaccurate so there's a -2 to hit penalty. The only drawback for Buck's .45 is that he can only get more ammo by going to a NEO supply base.
* TSR, which literally is "wander through the wizard's dungeon picking up treasure."
* Tsst! The only person capable of actually taming him is Cesar Milan "The Dog Whisperer", by lieu of treating him like an animal rather than a human.
* Tsubaki, as well. Just as much as Nu-13, because she is prepared to take down anyone who tries to take Jin away from her.
* Tsubaki cries into Black*Star's chest after defeating her brother. Of course, she's on her knees since she's taller.
* Tsubaki once gave Jin the nickname "Jinny the Kisaragi", which gave him some manner of irritation. Kagura caught on and started calling him "Jinny" as well,
* Tsubaki's brother Masamune, the Uncanny Sword, has the ability to twist his shadow into a stick-figure shadow monster, an ability she inherits after defeating him.
* Tsubaki shows her hidden Yaoi Fangirl after she gets a nosebleed from seeing a doujinshi of Rai and Konoe, which she thinks is "hot".
* Tsubaki's soul changes between a dark world filled with long, looming shadows and a clear blue sky over water, depending on whether or not her brother is involved and how it's being used.
* Tsubaki, the Order's High Priest, also qualifies for this. She is cruel and evil and commands her followers to gang rape Yuno to get to Yukiteru. However, she was also a victim of sexual abuse.
* Tsubaki unexpectedly do this to Black☆Star after he makes Maka run off crying during their training for Chain Resonance.
* Tsubaki Yayoi is another example of this. When she equips the Izayoi in Continuum Shift she has an eyeball on her hat, and eyeball on her book, and an eyeball on the handle of her sword. Ironically,
* Tsubame does this while showing Ishigami how to use a cocktail shaker during her Christmas party in
* Tsubame is ranked seventh among the senior class and is a member of the school's rhythmic gymnastics club.
* Tsubame Tip-Off!: the author is a fan of the NBA and frequent comparisons to successful players are made. Newcomers to the sport need not be worried as explanations for just about every complex play are given out very generously.

* Tsubame uses her social connections to repair Ishigami's reputation among the student body at large because she isn't
* Tsubasa also was childhood friends with Yayoi, and he actually was her
* Tsubasa arrived to Shizuoka when he was 11-12, so he considers the members of the Nankatsu soccer team (Ishizaki, Misaki, Wakabayashi, etc.) plus Manabu and Sanae as his childhood friends.
* Tsubasa Chronicle has many different worlds, and the four protagonists actually come from different worlds.
* Tsubasa is only seven years old when he first went to Clow Country and met Sakura but somehow, he understands the concept of love, magic, and even deals with the sorcerers. He might as well be the most mature characters in the the series, even more than an adult like Fai or Kurogane.
* Tsubasa Ohzora of Nankatsu (and later for the Japanese team as a whole) clicks almost all the boxes of a Charismatic leader. He's the undisputed
* Tsubasa Oribe, despite wielding a lance as a weapon, is also this. Her Magic is nearly as good Kiria's and she has access to both
* Tsubasa -RESERVoir CHRoNiCLE-, also by CLAMP, the main characters have taken the Screw Destiny route multiple times, often apparently going along with a prophecy right up until the moment of decision in order to prevent their opposition from being able to formulate counter-strategies.
* Tsubasa -RESERVoir CHRoNiCLE-), and begins to value their well-being and safety above everything else. He even decides that fighting is only justified if it's to protect someone important.
* Tsubasa -RESERVoir CHRoNiCLE- and Kurogane having to pound some sense into his head.
* Tsubasa -RESERVoir CHRoNiCLE- and then skip around 90 chapters (a little over a third of the manga's run). Story arcs before then have very little to do with the overall larger story, save for a handful of minor events, and can be summed up as "Syaoran and Co. travelled to X world to solve X problem and get a feather".
* Tsubasa -RESERVoir CHRoNiCLE- anime had almost an entire episode with Syaoran, Sakura, Fay, and Kurogane all drawn in chibified forms. A few other characters they met on their travels also showed up in the episode as chibis. The Art Shift can be explained, though; Mokona was the artist drawing the cast and making up the story. The episode was appropriately named "Doodler Mokona."
* Tsubasa -RESERVoir CHRoNiCLE- as payment for his continued existence.
* Tsubasa -RESERVoir CHRoNiCLE- because the mangaka love to hear fans scream in frustration.
* Tsubasa -RESERVoir CHRoNiCLE- between these two just jumps right off the page.
* Tsubasa -RESERVoir CHRoNiCLE- but in Celes. Since he was adopted by Ashura-ou he was the prince, or at least the king's ward, and he went out to help the citizens and fight "monsters" regularily.
* Tsubasa -RESERVoir CHRoNiCLE- by Syaoran of all people. Chunyan is left behind with Sakura, despite both having extremely powerful latent magic in a land where the three heroes have virtually none. Justified as, despite having great magical power, the girls have no idea how to use it: Chunyan's mother died before she finishes her training, and Sakura is kind of out of it as she has only retrieved two feathers at this time. Kurogane puts it best when he says, "You never know when she's rowing the boat or asleep at the oar." The boys, on the other hand, are all veterans in physical combat.
* Tsubasa -RESERVoir CHRoNiCLE- can have their whole bodies stretched out like this, usually with the sound effect.
* Tsubasa -RESERVoir CHRoNiCLE- directly explore Sakura's development in her dream-seeing abilities for the Infinity arc in future chapters.
* Tsubasa -RESERVoir CHRoNiCLE- does not have literal feathered wings, but more fluid-looking wings which, we are informed, are composed of her collective memories from her birth and have the power to travel across the various dimensions without limit. When the wings are broken, they scatter into feathers of astonishing power, which do not look at all like they should comprise the wings themselves. However, the very first few panels of the first chapter seemed to indicate that Sakura's

wings do allow her to fly, but that she does not control them, nor when they sprout from her back.
* Tsubasa -RESERVoir CHRoNiCLE- ends with a happy note as while Syaoran is cursed to travel endlessly across dimensions he believes he will see his love Sakura again. However, the fact that time flows differently in other worlds means that if it takes him a year to return to Clow Country, Sakura could already be dead when he returns. Furthermore, the villain who cursed Syaoran, Fei Wang Reed, was revealed to an artificial being before his death. Despite dying, it has been stated that artificial beings can be reconstructed so it is possible that he will be back.
* Tsubasa -RESERVoir CHRoNiCLE-: Fai D. Flourite. With his home country gone, he has no place to officially call home. Syaoran lacks a nationality, as well. Thankfully, they both have loved ones in welcoming countries, and perhaps someday they will become citizens of one of them.
* Tsubasa -RESERVoir CHRoNiCLE- gets considerably darker when it turns out that the Syaoran and Sakura who had been traveling with Fai and Kurogane ended up being clones of the originals, whom Fei Wong Reed had captured sometime previous.
* Tsubasa -RESERVoir CHRoNiCLE- had ever done, or ever would do again (barring the rest of the chapter / OVA).
* Tsubasa -RESERVoir CHRoNiCLE-. He comments that he did it in secret because Kurogane hadn't let him wear the maid costume.
* Tsubasa -RESERVoir CHRoNiCLE-. Her power is described as 'speaking to things that do not have voices', and therefore can communicate with ghosts and inanimate objects. The unfailingly gentle persona starts to develop cracks in the second half of the series.
* Tsubasa -RESERVoir CHRoNiCLE-his mother'', and then it went from odd but cute to absolute nope.
* Tsubasa -RESERVoir CHRoNiCLE- in hopes of finding the one who did the deed and killing him.
* Tsubasa -RESERVoir CHRoNiCLE- in the image of the twins' mother, whose purpose was to look after and take care of the corpse, though the extent to which she did so was never elaborated on.
* Tsubasa -RESERVoir CHRoNiCLE- in this manga. It helps that the former share a large number of physical and personality traits with the latter.
* Tsubasa -RESERVoir CHRoNiCLE- in which everything goes to hell and Kurogane does quite a bit of stepping up and taking charge in order to keep the team together.
* Tsubasa -RESERVoir CHRoNiCLE- is able to project flashbacks directly into people's minds, which can be fought against, with effort.
* Tsubasa -RESERVoir CHRoNiCLE- it seems straightforward up until the revelation about the clones and time travel.
* Tsubasa -RESERVoir CHRoNiCLE-: Kurogane (mid-twenties), Syaoran, Sakura (teenagers), and Fai might count as this.
* Tsubasa -RESERVoir CHRoNiCLE-. Kurogane might also apply: Tomoyo is the only person he ever calls by their real name. Fay is "the mage", Sakura "the princess", Syaoran "the kid", Mokona "the meat bun" and Yuuko is "the witch".
* Tsubasa -RESERVoir CHRoNiCLE- movie Syaoran and Sakura accidentally lean on each other extremely close while hiding in a barrels. In the manga, Sakura performs a charm in Syaoran which requires her to connect their foreheads but are interrupted by Mokona. The two downright deny any romantic implication but Mokona is sure "It's love!"
* Tsubasa -RESERVoir CHRoNiCLE- or a blow your brain combo of all of these put together simultaneously! Putting what is confusing about the time travel involved into words is, in itself, extremely confusing.
* Tsubasa -RESERVoir CHRoNiCLE- over the course of Tsubasa. Even so, they still frequently acted as parental figures to Sakura and Syaoran, as well as parallels/foils to them in various official artwork and in-story plots and jokes, such as their Outo Country names: Big Dog (Kurogane), Little Dog (Syaoran), Big Cat (Fai) and Little Cat (Sakura).
* Tsubasa -RESERVoir CHRoNiCLE-, pretends to kill him and give him the body. Just as the Fei Wang is about to receive the body, Syaoran proceeds to impale him with

the underling's weapon.
* Tsubasa -RESERVoir CHRoNiCLE-, Sakura is introduced as a character by glomping Syaoran.
* Tsubasa -RESERVoir CHRoNiCLE-: Sakura (princess) and Syaoran (middle class).
* Tsubasa -RESERVoir CHRoNiCLE-, Sakura says this to C!Syaoran when he is about to defect from the group in the Tokyo arc.
* Tsubasa -RESERVoir CHRoNiCLE- seed?", which sets off another character declaring what his perception of an apple is. Not surprisingly, the fruit stand owner tersely asks them if they want to buy the fruit, or just argue over it, prompting Mokona to respond, "Want it!", and swallowing the apple, ending the discussion.
* Tsubasa -RESERVoir CHRoNiCLE- she lost her memory, she'll be knocked out and wake up again, having forgotten even that.
* Tsubasa -RESERVoir CHRoNiCLE-. Since the cast themselves are from 3 different worlds, if they get separated from him, they can't even understand each other.
* Tsubasa -RESERVoir CHRoNiCLE-'s openings are serious offenders, as they pack more fighting sequences than the entire anime. They even show Mokona of all people fighting enemies.
* Tsubasa -RESERVoir CHRoNiCLE-'s shirt with a different-colored thread earlier, and the impostor's shirt button was held together with thread of the original color.
* Tsubasa -RESERVoir CHRoNiCLE-'s Tomoyo can't help obsessing over a Sakura she just met.
* Tsubasa -RESERVoir CHRoNiCLE-, Syaoran's goggles appear useless at first, but then he finds an underwater country and uses them for diving.
* Tsubasa -RESERVoir CHRoNiCLE- that her Japan is his Japan too, just a different version of it.
* Tsubasa -RESERVoir CHRoNiCLE-: The first time we meet Sakura, she jumps on Syaoran and rapidly asks him a series of questions about how he's doing.
* Tsubasa -RESERVoir CHRoNiCLE- the main characters receive clothing with prominent chains.
* Tsubasa -RESERVoir CHRoNiCLE-. The "reservoir" can also refer to how Sakura's memories are in feathers, so the "wings" are a reservoir of what is the plot to our story.
* Tsubasa -RESERVoir CHRoNiCLE- The show is no longer remembered as fondly as it used to.
* Tsubasa -RESERVoir CHRoNiCLE-. The two of them reconcile once Fay's worked through some of his myriad issues.
* Tsubasa -RESERVoir CHRoNiCLE-. The Valerian people chalk his insanity up to the curse of the twins.
* Tsubasa -RESERVoir CHRoNiCLE-. They split at about age ten, possibly, when the original made a wish to turn back time a few years. This fucked the time-space continuum up so much that another him, who looked completely different, appeared in his place back home, and nobody there remembered that he had existed. The terminology involved is somewhat difficult to discern.
* Tsubasa -RESERVoir CHRoNiCLE- to adapt the rest of the arcs into two OADs, ignoring the filler material from the TV series.
* Tsubasa -RESERVoir CHRoNiCLE- to develop connections to other people that will anchor him to existence when the endgame comes.
* Tsubasa -RESERVoir CHRoNiCLE- to stay with them. After he is returned to Japan he has no more reason to stay with the others, but he does so anyway, stating he can keep two promises. Never mind how caring he is towards his traveling companions, even the white manjuu (Mokona).
* Tsubasa -RESERVoir CHRoNiCLE- travel the multiverse in search of Princess Sakura's scattered memories — however, they rarely know what kind of world they will end up in next, just that there is a "memory feather" in it somewhere.
* Tsubasa -RESERVoir CHRoNiCLE- wandering around with three expert fighters, it's not surprising they don't need or expect her help in fights.
* Tsubasa -RESERVoir CHRoNiCLE- was a produced with a six month period of development. Typically a series will have a development time of ten or more months.

And it showed, to the point that the series eventually got cancelled and the remaining arcs were adapted as OVAs.
* Tsubasa -RESERVoir CHRoNiCLE-, when the group first comes across a kudan gang war, the gang members are aiming their arms at each other while shooting off energy from just above their wrists, clearly meant to evoke the arm-mounted cannon.
* Tsubasa -RESERVoir CHRoNiCLE-: When the main characters arrive in the town of Spirit, they are accused of being behind the disappearances of various local children.
* Tsubasa -RESERVoir CHRoNiCLE- will eventually have enough power to usurp the throne from the current emperor, who is himself incredibly powerful. In the latter case, it's clear that the king is very powerful by the standards of his country, but it's hard to say if that has much to do with his position as king; he still has a court mage.
* Tsubasa -RESERVoir CHRoNiCLE-: Yes, despite the genre of the various series it's a crossover from it runs in Shōnen magazine.
* Tsubasa -RESERVoir CHRoNiCLE-: Yuko Ichihara ends up becoming the Ms. Exposition, before she is temporarily removed from the story. When she returns in Chapters 216 and 217, these chapters were pretty much her exclusively explaining what the hell's been going on.
* Tsubasa, whose normal attire is so convincingly feminine that no one except Ukyo knew he was male until
* Tsuburaya in his Supreme Version form, which was a design first seen in a design book 23 years prior and hadn't been re-utilized since until now.
* Tsuburaya Productions vignettes where the title superhero fights monsters. Since the fights have no context to speak of, this gives off an unnerving feel to the proceedings.
* Tsuchigumo and Jorogumo is considered lucky for its bright coloring.
* Tsuchimikado does this as well, though his esper ability (level 0 auto-regenerate) allows him to live through more spells than most.
* Tsugumi in her family, the game implies she'll outlive her children one day.
* Tsugumomo, but those same ecchi elements made it popular enough with fans to sell many volumes of the manga and spawn two profitable anime series.
* Tsugumomo: The ability to share Kazuya is hinted at multiple times by the girls, especially since some of them are bisexual. Their main point of contention mostly seems to be who will be the first to "deflower" him and share other intimate "firsts" with him. But beyond that, there's little attempt to hoard him for themselves.
* Tsujigiri is the samurai tradition of trying out a new sword or fighting technique on a person encountered at a crossroads. In medieval times, this would have been a formalized duel between samurai, but in the Sengoku period this degraded to murdering a hapless passerby.
* Tsukasa gets poor academic grades and is capable of sleeping from 10:00 PM to 2:00 PM. Despite this, she is shown to be an excellent cook.
* Tsukasa Shiramine acts like this purposefully in an attempt to spark a reaction out of Kyoichi.
* Tsukasa wants to save Miyako from killing herself. It was also implied that he traveled back in time multiple times but he still failed every time.
* Tsuki Adventure: Bobo is a skilled ramen cook, but some of his experiments are on the questionable side. One combines soy sauce, banana, and ginger.
* Tsuki Adventure: If a character can be befriended, a heart appears next to their dialogue boxes. The color of the heart indicates Tsuki's relationship level with them, with the lowest being grey (just met) and the highest being red (best friend forever).
* Tsuki Adventure: Tsuki can climb Mount Yukiyama. The journey takes at least 18 hours.
* Tsuki Adventure: You can watch ads at certain points to get more carrots (the in-game currency). It is also the only way to get bags of manure, which can be used to get more carrots and are required for a certain diary entry.
* Tsuki Desu. The protagonist mentions having no friends only for directly

afterwards her best friend Sakura pops up and greets her.
* Tsuki Desu, Tsuki finds out someone wrote romantic graffiti about her and Chitose on the blackboard. She freaks out worrying he will be bullied for liking her.
* Tsukigasa, and why he freaks out as badly as he does when Kuroe makes advances on him.
* Tsukigasa, Azuma's family is loaded, whereas Kuroe is of a slightly more modest background.
* Tsukigasa extras, it's mentioned that the middle-aged Toubee will be marrying an 18 year old girl because he got her pregnant. His son, who is older than his new mother, is particularly shocked by the news.
* Tsukigasa wanted to turn himself in too. Ultimately, it comes down to Kuroe being a righteous sort of person and wanting to protect Azuma, the criminals' next target.
* Tsukigomori) as part of a long-term plan to avenge himself on the family. Because fiancee-Meiyou's father was responsible for murdering Katsuki's whole family when he was a kid and disguising it as one of those car-over-a-cliff suicides. He has to keep her believing he loves her madly, or his whole scheme will collapse.
* Tsukihime, Akiha says something like this in one of the routes, and does her damnedest to kill Shiki.
* Tsukihime also has a relationship values check in all of the routes, though Akiha's and Kohaku's routes are the only ones whose endings aren't determined by it. In Arcueid's route, she'll kill you if your relationship value is low (this can easily happen if you choose to rape her in your craze, which greatly lowers your value and happens right before the check). At the end of Akiha's route, Shiki puts her down if the check fails, which is still considered a Bad End in spite of Shiki living. Generally, having a good relationship with the main heroine of the route nets you the True Ending.
* Tsukihime. Also, Shiki killing Satsuki after she became a murderous vampire, earlier on.
* Tsukihime, and are aware that only the most elite of their elite agents would even have a prayer of surviving against her.
* Tsukihime, and dedicated her life to hunting Roa, as well, which is when Shiki meets her in the story proper.
* Tsukihime and is still almost entirely normal. In at least one route she even actually turns into a vampire after biting Wallachia but after getting beaten up for a bit she decides it's not really that much worse than it was before and she can still resist drinking blood and viewing people as lunch. She then leaves and goes back to work. Wait, what?
* Tsukihime anime, the blood of Shiki's mother drips down from a tree into his eye.
* Tsukihime' Answer: Stab himself in his own point of death on the assumption that if his will is stronger than Roa's, he'll live through it and Roa will die instead. Still, it's not like Ciel had any other ideas, and Arcueid provided backup by way of a single drop of her blood. (Thus sharing her will with his and allowing him to overpower Roa with relative ease.)
* Tsukihime apparently booby traps her underwear drawer, if that's as accurate a detail of Shiki's life as a lot of other things were in Kagetsu Tohya. The trap? A magical talking leopard that pops out and eats you. Yes. Really.
* Tsukihime. Arc and Saber are stated to be as weak as they appear if not for their high levels of supernatural magical energies. Then again, it does fit this trope in that muscles are meaningless compared to magical energies, and just about everyone that matters uses magical energies.
* Tsukihime), are so absurdly manly that you'll grow a beard from playing just one route.
* Tsukihime are some sort of hybrid bird creatures. They haven't appeared in anything but supplementary material yet, though.
* Tsukihime around the entire school area in order to partially depower Arcueid and make her somewhat more vulnerable in Ciel's True End. Imagine if the 'point of death' of the entire world happened to be nearby him.
* Tsukihime: A white ribbon is given to a young Shiki in a flashback by one of the

girls. This is a throwaway line with Shiki rambling about his memories in three of the game's five routes - and critically important in the other two.
* Tsukihime because of his mixed upbringing by the Nanaya (assassins, but good) and Tohno (half demon clan) families. When he finally goes back to the Tohnos, he uses his Nanaya abilities to quell problems related to the Tohnos to some extent depending on the route. Also vampires.
* Tsukihime because of this. The backstory is unbelievably complex and well-written, with each route giving off a small amount of information about the past. The entire backstory can be put together (like a puzzle) only after playing all of the routes.
* Tsukihime. Best friends, adopted siblings. Then SHIKI goes crazy because Roa possessed him plus his inversion went off. Still, turns out if they're able to meet on friendly (Kagetsu Tohya) or semi-sane (Kohaku's route) terms they still actually get along quite well, and he's not really that bad a guy.
* Tsukihime cracked his mentality to become this. Now as an adult, he's extremely powerful, but now he's prone to violent temper tantrums, self-centered, aggressively possessive and just plain creepy.
* Tsukihime dead, damnit. #2: Dead Apostle Ancestors, so another 20 or so on the list. #3: Normal Dead Apostles, Demon Lords, people like the Church who get in her way.
* Tsukihime emotion. The specifics are a little complex: True Ancestors as a whole were created by Gaia (and corrupted by Brunestead, the Type of the Crimson Moon) as an Artificial Type (a planet's Ultimate One) in response to humanity, and probably aren't even born naturally. It seems that Arcueid was "created" to hunt Demon Lords in both senses; she was trained to do so, without any other unnecessary education, but it also seems that the True Ancestors guided her creation, causing her to be a perfect vessel for the Crimson Moon, something that the original Crimson Moon couldn't even manage himself.
* Tsukihime, ever. The number of females Shiki hasn't charmed to some extent can be counted on one hand.
* Tsukihime exists in a dream world of a single day that Shiki loops through. But what sort of day is it? Is it a school day? A holiday? The day of the culture festival? A day where, for whatever reason, Shiki wakes up as a cat?
* Tsukihime familiar without a master, Len needs to form a contract with someone to survive, and Shiki agrees to do so. It just so happens that the most convenient way to do so is through sex (Len being part-succubus might have something to do with that). There isn't suggested to be much actual romance between the two: Len is certainly fond of Shiki afterward, but Shiki doesn't seem to consider her a romantic partner.
* Tsukihime finds Arcueid so beautiful, that when combined with his bloodline's impulse to kill non-humans, he is driven literally insane with bloodlust and sexual lust. Depending on the player's choice, he can even rape her.
* Tsukihime gains his Mystic Eyes of Death Perception as a result of his near death experience as a child.
* Tsukihime going on, but in that case it's actually lampshaded in Kagetsu Tohya.
* Tsukihime has five routes, each focused on different aspects of the story.
* Tsukihime has inside him is some sort of unnamed spider that is slightly larger than a large elephant. It's not pictured or named because Shiki just kills it in one blow like everything else.
* Tsukihime has several pages of this while Shiki is bedridden in Hisui's route.
* Tsukihime has the ability to see death conceptualized as lines and points that only he can see. Not just people or other living things, but also walls, buildings and even the walking dead. It's incredibly disturbing because it makes the world seem like it could fall apart at a touch. And, if it was him doing the touching, it very well might. Most of the time he wears special magic glasses that seal off this ability because not only would it be impossible to remain sane if you could see death all the time, but it also causes him brain damage to see things that humans weren't meant to see.
* Tsukihime have been the vampire responsible for most of the incidents. And the

savvy reader realizes the story is way too short otherwise.
* Tsukihime. Her real name is Elesia, which is referenced roughly equally relating to her as to her Nightmare in Kagetsu Tohya: One scene.
* Tsukihime him from seeing something supernatural: The black lines of death that lie across everything, and which can be used to destroy anything. If he were forced to look at that his whole life, he might have gone insane, likely before dying from the amount of constant strain it puts on his brain.
* Tsukihime if so needed hunting the man's incarnations down because in tricking her he completed a reincarnation spell, and will now reincarnate for eternity.
* Tsukihime" in official material. She's still somehow able to communicate, presumably just by showing her emotions really, really well. (Shiki, for one, seems able to pull full sentences just from reading her facial expressions.)
* Tsukihime in the Arcueid and Ciel's storylines ("Near Side of the Moon").
* Tsukihime: In the near-side routes, Nrvnqsr plays this role before Roa takes the stage, while in the far-Side routes it’s Sacchin. SHIKI is quietly killed off and replaced by Akiha in Kohaku's route, which is the last one.
* Tsukihime is a subversion, as there's a perfectly viable alternate solution you can take, Len just doesn't like it as much.
* Tsukihime is at least as old as Arcueid is, has probably spent the entire time active and looks only about 14, making her perhaps a better example.
* Tsukihime is largely written around this. Unfortunately for her, except for in her own ending this means she never graduates from 'little sister', even in sequels and expanded universe material. A definite tsundere type, she's even called Imouto (Little Sister) by Arcueid rather than her actual name.
* Tsukihime is Shiki's only normal friend, as well as being a comic-relief slacker, pervert, and all-around failure.
* Tsukihime is the root of the problem in all three far side routes, part of the near side ones and Shiki would also be a badass (and possibly psychopathic) assassin of demons with an intact family and not destined to die in 5-10 years tops. It's pretty impressive for a character who's already dead to be worse than the serial killer in town or Nero Chaos.
* Tsukihime, is the sole survivor of the Nanaya demon-hunting clan. Not counting his TATARI clones.
* Tsukihime: Kohaku and Hisui's birthday is March 12, which is 12/3 in D/M formatting.
* Tsukihime left in the closest-to-canon ending, she's still around in Kagetsu Tohya. Apparently, she has to go stamp out the evil Dead roaming around. You know, the ones that are completely mindless mooks and barely a threat to muggles when the Church doesn't care about them anyway. Apparently it just wouldn't be safe unless she stayed for at least a full year after Roa is gone. *Cough*
* Tsukihime: Near the end of the closest to canon ending, Shiki realizes the real reason he kept agreeing to guard Arcueid and help her hunt Roa was that he loved her. He doesn't really feel responsible for the town or anything. It goes the other way too, in that Arcueid only decided not to publicly dismember him because, as she puts it, she also loved him from... well, the first moment he cut her to pieces.
* Tsukihime: Nero to Shiki, who proceeds to destroy over a hundred of his beasts.
* Tsukihime. None of them are anywhere near as bad as Kotomine, though.
* Tsukihime: Nvrnsqr Chaos believes Shiki Tohno to be an ordinary high school age boy with a knife, and torments him a bit, finding pleasure in the kid pathetically struggling against the inevitable before he eats him. What Nvrnsqr doesn't know is that Shiki is probably the only person on the planet who can bypass his regeneration mechanism, and is thus among the few capable of killing him. Which is exactly what Shiki proceeds to do.
* Tsukihime of demon/demon-hybrid assassins, retires and leaves the protection of the organization he belonged to, Makihisa Tohno and Kouma Kishima lead an attack on them. After a prolonged battle, Kiri is killed by Kouma, who goes on to slaughter everyone else except Shiki. Both were motivated by personal vendetta: Kouma was attacked and had one of his eyes blinded by Kiri when he was younger during one of his missions, and Makihisa is implied to have been the client for that hit, who

Kiri tried and failed to kill out of impulse.
* Tsukihime of energy to do this, though, and she stays weakened for much of the story as she slowly recovers, forced to rely on Shiki to help her face foes that she would normally crush in an instant.
* Tsukihime really only seems to be a problem because even Shiki's eyes can't kill him normally. In direct combat he appears to be rather weak.
* Tsukihime-related media for years on end. The actual product finally released in 2021, but with half the missing routes to be released later.
* Tsukihime's endings sees her degenerate into a mindless monster. Shiki keeps her in an empty room and feeds her his blood every day in the feeble hope that she will one day return to normal.
* Tsukihime, she doesn't need an official identity. When necessary, she presumably hypnotizes her way into getting a hotel room should she need to recover from damage. She actually has a special ability to psychically absorb cultural knowledge so that she instantly knows the language and general customs of any place or time she wakes up in. (Although there is a funny gap between theory and practice.) She's fairly rich, though, as she has a friend in the Clock Tower who sells her fairy gold for her.
* Tsukihime she is. If she's not killing vampires, she's somewhere between a hyperactive six-year-old and someone a year or three older than Shiki.
* Tsukihime. She's the only (well, sort of. She was supposed to be, anyway) love interest who actually does start basically normal and unaware of all the bad things going around.
* Tsukihime. She wasn't intentionally created as such, but as the most powerful True Ancestor to have ever existed, she is, per Nasuverse logic (that copies are always inferior to their originals), the closest it gets to a being a carbon copy of the original vampire, Crimson Moon (who was a guy).
* Tsukihime: Shiki is impaled in the guts by a black deer, has some animals eating him and then gets up and starts fighting in a rather badass fashion. After winning, he falls down and gets back to bleeding to death. Obviously, he doesn't but...
* Tsukihime, Shiki laughs manically after slaughtering a herd of Nero's beasts as their blood rains down upon him.
* Tsukihime. Shiki really was the unfavorite of Makihisa and upon being wounded was promptly disinherited and kicked out. However, that's because not only were they not related - therefore making Shiki incapable of becoming the Tohno family head - Shiki was the son of Nanaya, the guy whose family Makihisa just killed off. He was kept around to take care of SHIKI (Makihisa's favorite) if he happened to Invert.
* Tsukihime Since the reader already knows the truth from one of the previous routes, it is not a big surprise, but it does alter how the story unfolds after that point.
* Tsukihime's intro is about when Shiki met Sensei right after his accident at age nine, an immensely important time in life for a bunch of reasons. The non spoiler one is that this is when his eyes activated and got his Mystic Eye killer glasses. And learned slicing stuff in half for shits and giggles wasn't nice.
* Tsukihime, so he has at least a few years left, but Arcueid will outlive him eventually.
* Tsukihime. So he's able to kill pieces of Nrvnqsr without them regenerating, which freaks the monster out.
* Tsukihime, specifically with Ciel trying (unsuccessfully) to hide that it's the second answer.
* Tsukihime's Shiki Tohno can see "lines of death" on pretty much everything, and any cuts he makes along these lines are Clean Cuts.
* Tsukihime started seeing the lines of Death Perception after he got in an accident. Pro: He now has the ability to destroy almost anything by simply cutting the lines. Con: It makes him physically and psychologically sick, and being able to perceive death in such a way means his lifespan will be much shorter than a normal human's.
* Tsukihime supplementary material had eyes that could detect the emotions and, apparently, the humanity of people he was near. It's unknown how this really helped

him apart from "this guy, Kishima Kouma, is immensely dangerous because his aura is bright red." Blue and silver were similarly inhuman but were noble and possessed by allies.
* Tsukihime tends to have a love of moe traits among the girls in the games. The doujins take this to whole new levels, creating his infamous line "So moe...I'm gonna die~!"
* Tsukihime that his other self has, is understandably a little bit bitter.
* Tsukihime that moves at the speed of thought, hits like a sucker punch or a spear, holds like a python, and is invisible even to her own eyes. Fortunately, the drain itself doesn't start or finish instantly.
* Tsukihime that's completely made up of seafood (in the original Japanese) or Ben and Jerry's Ice Cream Flavors (in the English translation) metaphors.
* Tsukihime The best thing about Arcueid: she's being completely earnest without a trace of irony.
* Tsukihime). The doorshark has become something of a meme among the fans.
* Tsukihime The dream he's in also mixes all the different Tsukihime continuities heavily, though Shiki does not notice.
* Tsukihime, the identity of the real vampire serial killer is masked in all routes and is not the first major antagonist that Tohno Shiki is forced to confront. In the Near Side routes, Nrvnqsr Chaos serves as the Red Herring. In the Far Side routes, a turned Yumizuka Satsuki serves as one. In Kohaku's route, the plot contrives an extra layer of Red Herring.
* Tsukihime, the Mystic Eyes of Death Perception cause brain damage, which is increasingly severe with every use. They're also quite taxing on the psyche. How drastic the damage is depends on what Shiki is trying to destroy, and merely severing alone lines does less still. The low ends of the scale is merely slicing or destroying a normally living creature. The farther end is potentially lethal and covers trying to kill objects, concepts, and properties, such as walls, the senses (theorized but never utilized), and the toxic factor in poison.
* Tsukihime. The natural result when your love interest happens to be pretty much the most powerful thing on the whole freaking planet. Given how insanely scary and unstable Arc can be at times, it's a real good thing that Shiki is more than capable of taking care of himself.
* Tsukihime: The primary difference between the two classes of vampire, Dead Apostles and True Ancestors, is that the True Ancestors don't actually need to drink blood to survive, while the Dead Apostles do. True Ancestors feel a hunger for blood regardless, but if they do start drinking blood, they turn into psychotic, violent beings known as "Demon Lords", so they try as hard as possible to avoid it.
* Tsukihime, "This chair is an eyesore. Disappear! This chair. This chair. This chair.

children to replace the members they lost, so the birth of Arcueid itself was pretty big news even before people knew how powerful she was. Possibly tied to the fact that they were almost entirely all male.
* Tsukihime, Tohno Shiki, despite constantly facing incredibly powerful vampires, never has a plan. Justified in that he really has no idea what he's going up against before he actually faces it. His main means of winning is a combination of inborn talent, inhuman instinct and calmly thinking out the situation DURING the situation. In the end, he's pretty much just making everything up as he goes along. Sometimes his partner at the time (Arcueid, Ciel or Sion usually) try to plan things out ahead of time, but those plans rarely go well. In fact, it's occasionally implied that his VERY EXISTENCE throws a metaphorical wrench in any plans anyone could come up with. This is partially attributed to the fact that no one really knows what Shiki is capable of, including himself. Thus, everyone is constantly surprised by anything he pulls off, and frequently does things in each subsequent game that would have been impossible in a prior one. In other words, in Shiki's case, it's practically impossible to plan ahead.
* Tsukihime: Tohno Shiki spends much of "Far Side" investigating the disappearance of Satsuki, who he barely knew.
* Tsukihime underwater, but it's a bit of a tradeoff since Sumire's ability to tolerate water has made her weaker on land.
* Tsukihime up, with the first part only coming out in 2021, 13 years since the original announcement, with the second part being announced with no date.
* Tsukihime use this. Notable example, the curry restaurant scene with Ciel where she acquires blank white eyes, three v shaped teeth, cartoony hands... oh, and a head larger than her torso.
* Tsukihime visual novel allows you to choose any girl, Arcueid, the closest there is to a 'canon' pairing, is the last girl Shiki meets in all versions of the story (except for the the 'far side' game routes in which Shiki never meets her at all.)
* Tsukihime was apparently a very pure and probably decent person before apparently falling in love with Arcuied at first sight. He decided it was hate for some reason, so he tricked her into drinking his blood, making him a Dead Apostle and making her kill off all the other True Ancestors. Apparently all he wanted was for him to like her...
* Tsukihime was extremely isolated by the other True Ancestor vampires, even from themselves. They were glad she was around to kill Demon Lords, but she was so incredibly powerful that she unnerved them a bit so they never taught her anything and tended to reset her memory every now and then. Just when she finished wiping out the Demon Lords and they were getting ready to accept her and teach her, Roa comes along aaaaand... now there are no more True Ancestors except for her.
* Tsukihime, we get the first introduction to familiars in the Nasuverse: A mage takes a dead body, places a soul inside it, and reanimates it by forming a contract. The new being is neither of the two things that went into making it and usually acts as a servant or assistant to the magus, such as being used for surveillance, combat, or use of special abilities. A magus generally needs to supply mana to the familiar, which limits how many a normal mage can possess, but Len has adopted some succubus traits and is thus capable of feeding on her own by manipulating dreams.
* Tsukihime when Shiki is getting some spillover from Roa/SHIKI and causing violent rage of which he's not really aware. He wanted to lie down and get rid of his headache so he could talk to Ciel without... getting... horrible destructive. Good luck, Shiki!
* Tsukihime where Shiki meets Len (Arcueid's familiar at the time) while Akiha goes to school with him. The continuity snarl occasionally confuses Shiki as well, but he's prevented from really thinking about it by Len.
* Tsukihime, which sucks all the mana in the surrounding area dry (of course, it doesn't really benefit her directly).
* Tsukihime, who gives Shiki a reason to use his Mystic Eyes of Death Perception and pretty much transforms him from an everyman to an incredibly broken badass.
* Tsukihime will not let her die to prevent a paradox from occuring. Ciel herself

possesses extreme regeneration abilities.
* Tsukihime wiped out a whole hotel full of victims and left no trace behind. This is not for Bowdlerising purpose, said villain is so blood-thirsty to the point of decanting every last drop of blood and flesh in his reach. The bloodless catnage also served to provide a clue to another villain with a completely different conduct, which evidently, also falls into this trope: He sucks the victim completely dry of blood, but he leaves the corpse.
* Tsukihime wipes from existence those things which aren't in the Church's canon.
* Tsukihime, with the exception of Shiki due to his situation. They only breed within the clan to sustain and increase the psychic power within their bloodline.
* Tsukiko assumes she can threaten Redcloak to his face, figuring he is the spineless wimp Xykon always treated him as.
* Tsukiko is a necromancer who likes undead. LIKE likes undead. Even Xykon is squicked by this.
* Tsukiko is killed by her own wights after Redcloak takes control of them.
* Tsukiko overhears a conversation between Xykon and Redcloak about the gate and asks, "Gate, what gate?". Lampshaded when the Monster in the Darkness snaps back "Hey, that's my line!"
* Tsukiko's grounds for her conclusion that the undead are nice people., so as the antithesis of life, the man-eating undead must actually be sweet, innocent, virtuous entities.
* Tsukiko's necrophiliac advances aimed at him, one of which he was rebuffing this way.
* Tsukiko thinks she is mistaken for bi due to misinterpreting the Monster In The Darkness's comments that she "does both" (actually referring to doing both Arcane and Divine magic).
* tsuki meaning "moon") is shown standing in the light of a full moon.
* TSUKIMICHI -Moonlit Fantasy- in dresses and so forth than the more standard monstrous portrayals, also fit the description.
* TSUKIMICHI -Moonlit Fantasy- power in the deal. Mio, on the other hand, gleefully accepts a position as Makoto's slave. At first, Makoto chooses to abstain from pursuing anything sexual with Tomoe or Mio on he basis that it would be cruel if he ever returned to Earth, but after deciding to stay on the Goddess's world, he becomes so sexually aggressive that Tomoe and Mio find that they can't keep up with his stamina. He also later gains a male servant (Shiki) and another female (Tamaki).
* Tsukino Empire - Unleash your mind - has Shun as the second prince of the empire. He certainly is charming, enough to win over Kai to being his knight upon their first meeting. The twins from the fourth fleet are also dazzled by him.
* Tsukino Empire - Unleash your mind - users in the empire. That said, despite being a high-ranking military officer, he doesn't act like much of a warrior. He's the same sweet cuddly prince that he always is.
* Tsukino Empire - Unleash your mind - with Prince Shun and his knight Kai. Gender aside, it's played straight.
* Tsukino Usagi, junior high student and reincarnated moon princess. And indeed all the Sailor Senshi.
* Tsukipro, and more. It helps that in canon, one of the idols is a demon king. Or maybe it doesn't...
* Tsukipro does contain flashbacks, but the main part of each episode takes place the week it aired (including Eichi's birthday).
* Tsukipro groups, Lizz-kun for the SQ groups, and Arainu ("Alive dog") for the Alive groups. The mascots have the same oblong bodies and minimalist faces, but different ears and tails depending on the animal, and they come in each member's unit colors, so fans can show who their favorite idol is by which color mascot they carry. In-universe, the idols tend to carry their own mascots on their bags, as well. In real life, special-edition collars and t-shirts for the mascot plushies are sold at events, and many fans have also taken to making accessories and costumes for them. And of course, full size mascots appear at the events for photo ops (and in the first anime, two of the idols have to wear the suits for a special

job).
* Tsukipro, it features more adult idols than underage. On top of that, the series takes place in real time, so the idols get older every year.
* Tsukipro, male idols Rikka and Dai are cast in these roles for a cosmetics commercial. Notably, Rikka has no issue with playing the princess. The episode focuses on Dai's insecurity about whether or not his performance can be worthy of co-starring with Rikka. It's also the case that many of the idol units have this sort of dynamic with the leaders and their partners - all male/male or female/female pairs, though.
* Tsukipro, more or less, so when they get cast in a play with a setting like this, they're miffed at the stereotype and ask for it to be changed.
* Tsukipro often; male performers model for womens' products without a second thought, etc.
* Tsukipro. So this was inevitable. It's most notable with the series' mascots, a different animal for each pair of groups and a different color for each member. They've also defictionalized several plays and events that the characters have been said to perform in in the story, making them into real-life stage plays.
* Tsukipro's SQS series ends with Shiki, an oni leader, sacrificing himself as an angry mob of humans rushes against him.
* Tsukishima Kei and Yamaguchi Tadashi. Tsukishima stopped a few kids from bullying Yamaguchi when they were little; as a result, Yamaguchi followed Tsukishima in joining the volleyball team. Yamaguchi is also the only one is allowed to call Tsukishima 'Tsukki' without the latter getting angry.
* Tsukiuta. And Shun definitely has powers - as does Hajime, the leader of Procella's sibling/rival unit Six Gravity, who Shun has a major crush on. Those mad scientist girls really are moon goddesses in training, and that palm-sized reindeer that looked like a plush toy? He's actually a fairy.
* Tsukiuta Hajime, who is usually the most covered up, had very revealing side cutouts on his costume - and, of course, You did too.
* Tsukiuta has audio two audio plays featuring the idol units doing improv fairy tales. Six Gravity's "Little Red Riding Hood" (Kakeru) ends up as an axe murderer. Procellarum's "Shunderella" is, well... what you'd expect when you get the Demon King to play Cinderella.
* Tsukiuta - it's heavy on video game references, light on plot, and more of a playground for the series to experiment with combining technology and live theatre.
* Tsukiuta - it's heavy on video game references, light on plot, and more of a playground for the series to experiment with combining technology and live theatre. They do sing Christmas songs, though.
* Tsukiuta series tends to have some of these in every entry. There are several recurring actors who have played original characters in multiple series entries, particularly Sean Suzuki, who has been in 5 of the 8 entries so far, playing a total of 7 different characters.
* Tsukiuta Shun and Hajime go on a date, Shun casts a spell so that they won't be recognized, so that they can enjoy themselves like normal people.
* Tsukiuta's Lunatic Party stage play is their Halloween episode. Hajime, Haru, Rui, and Iku go to a Halloween market and buy gifts for their pets, and end up transporting them into a demon world where the pets turn human. Complete with sheet ghosts.
* Tsukiuta steampunk AU). Particularly noteworthy was their original series, 'Kuro to Shiro', where out of 16 cast members, 7 were in both Tsukipro and Identity V, and only one was in neither. The same choreographer, J.U.N., has also worked on both Identity V and Tsukipro's SQS series.
* Tsukiuta, taking plenty of cues from CLAMP and the magical girl genre.
* Tsukiuta villages, and their companions, Kansuke and Sessai, who perform this role for them. This reflects the relationships between Gravi and Procella's leaders and their partners (example under "anime").
* Tsukiuta with Kakeru, though other cast members often feature as well. The spinoff series SQS features a similar segment, with Shiki going to a coffee house, and the members of Quell doing an improv scene, with Shu and Issei in different

costumes in each performance.
* Tsukiyama also developed an attraction towards Touka initially because of her cold nature reflected in her eyes and fiery personality.
* Tsukiyama, before Tsukiyama decides he'd rather not share and saves him. The second time, Touka comes to rescue him when Tsukiyama lures him into a trap with the intention of eating him.
* Tsukiyama's breakdown on the rooftop may be one as well, even if he
* Tsukiyama spends months working with Kaneki, attempting to earn his trust so that he can eventually eat him. It's only after Kaneki is seemingly killed in battle that Tsukiyama is forced to realize he had come to genuinely care. Unable to cope with the loss, he spends the next two years in an
* Tsukiyama's relationship with Kaneki starts out as this, blurring the lines between amorous and murderous intentions. He views Kaneki as the ultimate meal, and seeks to lure him into traps. Later on, he pretends to have changed his ways in order to become close to Kaneki again and begins working for him, while biding his time until the day he can feast. Later on, the
* Tsukiyama tells Kaneki he should accept responsibility for making him so focused on eating him and tells him it's his fault because he's so delicious before attacking him.
* Tsukumogami, it's extremely safe to say they are just as skilled at this trope.
* Tsukumogami, objects and tools said to develop spirits and animation after at least a century of existence, are said to be repelled by electricity, justifying why they don't show up in modern society or manifest from appliances.
* tsukumogami waves away some problems by explaining electricity repels such creatures, hence modern examples are rare. Also serves as a commentary to the effect that people don't really save things for that long anymore.
* Tsukune himself had a bit of trouble until he got some well-earned
* Tsukune himself has his moments of this: for example, his initial reason for wanting to join the Swimming Club (before finding out water is a vampire's
* Tsukune's ghoul transformation is much closer to the trope. He requires a power limiter like Moka to keep it under control, but unlike Moka, he's a complete monster without it, and only monster of a similar/higher level to Inner Moka stands a chance against him, unless he
* Tsukune's mother and cousin fall into it during Act IV, automatically trusting Jovian and Jacqueline, Hokuto's
* Tsukuyomi is like this in her earlier appearances. As of her later appearance, she becomes a full-blown
* Tsukuyomi: Moon Phase. Anyone unfamiliar with the story and character would NEVER assume she's a monster! The opening theme doesn't help.
* Tsukuyomi: Moon Phase had this problem in the televised version, which was fixed when the show came to DVD.
* Tsukuyomi: Moon Phase has a few examples: Balgus (Vargus) and Arte are one. The little twins Hikaru and Kouru are engaged to Kouhei and Seiji.
* Tsukuyomi: Moon Phase - Hazuki is a vampire, but Kouhei's grandpa asked her to wear a pair of cat ears.
* Tsukuyomi: Moon Phase: Hazuki's homeland in Germany is a lot like this.
* Tsukuyomi: Moon Phase in an entire family of mages. Fortunately, that also means he's immune to all sorts of magic.
* Tsukuyomi: Moon Phase is borderline, he personally made several erotic doujins of the manga.
* Tsukuyomi: Moon Phase: Kouhei's total lack of magic power also means he's impervious to all forms of magic, which is by the way quite common in this series.
* Tsukuyomi: Moon Phase: Once upon a time, a group of thugs roughed up Kohei Morioka, the favorite servant/blood donor/toy of vampire princess Hazuki. They were never seen again.
* Tsukuyomi: Moon Phase: Read the arc Elfride's Past. She may have been sad when Kinkle lost, but when he lived, she had a lot of good reasons for hating him. It takes three chapters of manga to explain her backstory before the main characters met her, and it's almost all just Kinkle being a complete monster.

* Tsukuyomi: Moon Phase, this is the result of every photo Kouhei takes.
* Tsukuyomi: Moon Phase, though the only time it really becomes a problem is when she almost drowns in a hotel swimming pool with a whirlpool feature.
* Tsuku you can, right up to the point where she slices your limbs off.
* Tsume and Hanabi exhibit this at different points to different people in
* Tsume Inuzuka is the single mother of two teenagers yet has maintained not only active ass-kicking status as an elite kunoichi but also runs her own clan.
* Tsumihoroboshi-hen. She tells Keiichi that she wants him to be there for her always and that she wants to hear him say "good morning" to her each day and "good night" each evening. She never does outright say "I love you" but the scene is heavily implied to be a romantic confession.
* Tsumiko and the Enslaved Fox and attempts to seduce her. While initially receptive,Tsumiko puts a stop to things once she realizes how far he intends to go, due to her religious upbringing and moral convictions. Later, she's made aware that his words and actions were the Amaranthine equivalent of a proposal and consummating the relationship would be considered as binding as a wedding to his culture. It's implied she might not have stopped him if she had realized. However, by this time, she has already set conditions for their relationship, so the couple waits until after they have a more traditional wedding.
* Tsumiko and the Enslaved Fox Argent ever shows any romantic interest in is Tsumiko.
* Tsumiko and the Enslaved Fox, Argent is Tsumiko's proper butler—until he's an enormous predator guarding her from any and all attacks.
* Tsumiko and the Enslaved Fox by putting on a show total childlike innocence and naivety while completely shutting down her "relatives" who are hoping to pin her down into marriage to one of their sons.
* Tsumiko and the Enslaved Fox, despite the protests of Lady Smythe who outright tells her not to "take a beast to her bed." However, despite their growing mutual attraction, things do not progress beyond (mostly) platonic cuddling and a few kisses...with one notable exception that Tsumiko puts a firm stop to.
* Tsumiko is the only member of the Sword Five who never says a word and the lower half of her face, like the rest of her body, is completely bandaged over.
* Tsumiko, the heroine of the first book, is an extremely powerful Beacon, who can bring the most powerful Amaranthine to their knees with the sheer brillance of her soul. However, she was raised in a highly sheltered religious school, and did not know she was a Reaver or of the existence of the Amaranthine, even
* tsumo (drawing the final tile themselves, as opposed to taking someone else's discard).
* Tsum Tsum toys made by Disney. Despite the premise, it was generally considered to be pretty fun and well-written.
* Tsumugi is revealed to be so pure, she can only survive in continuous presence of a god, such as the one who resides in her shrine. So Letty goes out,
* Tsumugi Shirogane: The mastermind of the killing game and die-hard (literally)
* Tsumugi telling Yui their club is not officially recognized, and their request to use the use the gym is denied.
* Tsumugu Logic doesn't quite let us see what exactly goes down, but the description says enough. It should also be mentioned that his family has a vague relation to crime to begin with.
* Tsuna and Kyoko aren't really very different in personality. They're both determined, both naive and good-natured, and both are very oblivious to other character's feelings for them (In Kyoko's case, Tsuna's feelings for her; In Tsuna's case, Haru and Gokudera's feelings for him). It doesn't help that due to
* Tsunade and Jiraiya, with Kakashi and Shizune as backup, keep the secret of Naruto's father's identity.
* Tsunade and Kushina are possible examples of World Class beauty, as basically everyone who claps eyes on them comments on it.
* Tsunade and Moegi also sport pigtails. Tsunade's are smaller and less obvious, possibly matching with the immaturity of her addiction to various vices and early tendency to run away from problems. Moegi is younger, and the pigtails

correspondingly larger.
* Tsunade is even more powerful than her canon counterpart and is also a mother of four (two adopted, two biological).
* Tsunade is incredibly dull compared to other S-rank ninja who almost all use immensely impressive ninjutsu to fight. Instead, she uses
* Tsunade is the student of the Third Hokage as well as being descended from the Senju clan which the First and Second Hokages (her grandfather and granduncle respectively) hail from. However, she becomes a Hokage because she wants to inherit both her brother, her lover, and Naruto's legacy. This can be best shown in her Infinite Tsukuyomi dream where Dan becomes Hokage instead while Tsunade became his loyal secretary with Jiraiya and Orochimaru as her companions.
* Tsunade managed to one-up herself at the conclusion of her fight with
* Tsunade's only confirmed love in the entire series was Dan Kato. After his death, she left Konoha, disparaged the position of Hokage, and developed a fear of blood, things that characterize her when she first appears. Even after she has overcome all this, Tsunade never falls in love again (though she has a brief
* Tsunade's Summon, Katsuyu the Slug, could dissolve into many smaller slugs, each of which talks and behaves like the original.
* Tsunade toward Naruto; among other things, letting him call her "Tsunade-no-baachan" (Grandma Tsunade) instead of the formal "Hokage-sama" and letting him
* Tsuna is clearly beating Xanxus towards the end of their fight. Xanxus is
* Tsunami Channel has Magical Mina, a magical girl who, like Nanoha, has strong influences from shounen manga.
* Tsunami Channel, with a guy who doesn't speak Japanese and a girl who doesn't speak English. Somehow they understand each other, though, much to the confusion of the rest of the cast. Mind you, this later become a plot point...
* Tsunami tried to rid LLF of Reina Vampira by stuffing her on a bus and sending her away. It didn't work, as the driver rejected Tsunami's ticket.
* Tsunami (Tsunami Warning - TSW) (this one is a recording of a real-life warning from the tsunami caused by the 2011 Tohku Earthquake off the Japanese coast)
* Tsunami, with everyone vocally denouncing her as a two-faced bitch, all while her powers are degraded to Pre-Claramont Comics Jean level in order to "fix" how "perfect" she is.
* Tsuna's mom who is rarely seen outside of the kitchen. Chrome too doesn't seem to be very strong despite being a guardian...Arguably, since the primary fanbase is women, they all want to see the cute boys act
* Tsuna's new best friend Enma is basically himself. That makes them not only the "Loser Duo", but also the "
* Tsunayoshi Sawada, mostly because he sees his subordinates as his friends rather than subordinates since he doesn't actually want to be a mafia boss.
* Tsundere … Huh? *blushes* I-I didn't say anything! You idiot, just go on the page!
* Tsundere: A person who switches between being abrasive and caring with their friends.
* Tsundere, as she also constantly abuses him verbally and physically.
* Tsundere being shorter. Gamma still seems like the dominant one however, just a little more subtle about it than most.
* tsundere by implying that Maria and Hayate will eventually leave her (presumably for romantic relationships), and after convincing attempts are made by Hayate, she 'allows' him to continue working as her butler.
* Tsundere disposition. She usually acts aloof and haughty, bringing up her status as a royalty, but will show a softer, kinder side to those close to her, especially the Black Bulls, who accepted her in spite of her shortcomings, and Asta, who she's in love with.
* Tsundere explicitly identifies herself as the "den mother" of the other Anarchs, and given how she's the one who gives you missions geared towards looking out for vampire community and trying to help you stay out of trouble (trying to convince you jumping ship from anything to do with LaCroix and the Camarilla), that title seems like its more than self-appointed.

* Tsundere, has two massive pink twintails that are almost as long as her body.
* Tsundere) He also gets like this when around/thinking of baby America.
* Tsundere. Her kinder and polite cousin, Mimosa Vermillion who is also royalty, is also smitten with Asta.
* Tsundere, her personality follows suit and she becomes a lot more hot-tempered and aggressive.
* Tsundere: In in love with their love interest, but outwardly acts hostile towards them to hide it.
* Tsundere — a girl who switches between affection and aloofness/hostility; usually either the main female, or the main competing haremette.
* Tsundere moment, Kurama flips off Naruto when the latter asks the former if he missed him.
* Tsundere (no, it's not a crotch rope), making this example a bit more plausible than others.
* Tsundere of having doctored (and dirty) photos of him posted on the internet by said organization.
* Tsundere. Over time, however, they became close friends, and that friendship bled over into their streams as, while Calli still will not return Kiara's overt affections, she became more warm and friendly to her. During Kiara's last stream in Japan before returning to her home country, Calli comforted her and assured her that she would still be around when she returned.
* Tsundere partner Kent. Yup, they can get hitched at A support level too. They even hang a huge lampshade on this:
* Tsundere, quickly escalating to phone sex to his disgust and bewilderment. Daiki ends up more annoyed with her antics than anything, but in the few moments where she's being 100% sincere and thankful to him, he and the audience can see that she's beautiful and is genuinely in love with him.
* tsundere Ruri Miyamoto, who's been kicking his perverted butt since the series' beginnings, was both confused and impressed.
* Tsundere shows shades of this with his cool and quiet demeanor. His sugar side mostly arises when in the proximity of large bodies of water.
* Tsundere, sweet-natured, honest and open about everything—even her fetishes—and has remained that way, with no hint of tsundere, since.
* Tsundere Teana, who initially dislikes her and tries not to bond with her, and the initially socially awkward Erio and Caro, but also the reformed Combat Cyborgs, four of whom become her adopted sisters. She also manages to befriend Ixpellia and change her worldview. Lampshaded by Teana.
* Tsundere tendencies, their last scene together implies it was really this.
* Tsundere: The concept existed before this point, of course, but really seemed to take off in this decade, becoming a prominent character type even in Western media.
* Tsundere: They're secretly in love with you, but they have trouble admitting it and mask their feelings with a hostile attitude.
* Tsundere, they usually are, and a real bitch to be in a relationship with.
* Tsundere), they would pour a glass of wine into the water, hoping to please any mermaids (and thus protect the sailors themselves from disaster.)
* Tsundere to the girl he likes, and will instead dip her pigtails in the ink bottle, or stick frogs in her desk. When a girl acts similarly and shoves, hits, or is otherwise aggressive towards a boy who's caught her interest, she might be labeled a Tomboy. (Or in some cases, a girl who's already considered a tomboy being aggressive towards a guy will often be assumed to mean she has a crush on the guy.) The mixture of self-confidence and insecurity is also often a Tomboy trait.
* Tsundere" we mean "girl who goes well off the hook because her brother has been spending time with women besides her."
* Tsundere (when she uses physical violence against her love interest)
* Tsundere" where she is stricken upon learning about Gambit's “engagement” with Bella Donna but Rogue is relieved when sees that Gambit doesn't love her.
* Tsundere who melts like butter around her "young lord" Ling, for whom she very obviously has feelings while never showing any interest in anyone else. Though it's

unknown whether or not a relationship forms (since Ling did seem to have feelings for her, too), she at least remains his bodyguard into adulthood after he becomes Emperor of Xing.
* tsundere who secretly uses them as material for her boys love manga.
* tsundere with a temper (though she calms down once Togepi enters the picture) while her game counterpart doesn't seem to be that way (though later games made the odd nod to this characterization). The English dub also toned down her narcissism compared to the Japanese version.
* TS!Underswap by making him give you his lunch money, if you really want to kick him while he's down.
* TS!Underswap lampshades this trope, saying he's like everyone's dad and telling Chara to be good to him. And of course, he also tries to take you in when you reach his home, and even has Chara's approval.
* TS!Underswap of the game show the credits in full, in part to honor Offtopic's memory.
* TS!Underswap, one of the Greasers, Norman, is quite obviously this. Specifically, he's a Froggit, a Whimsun, and a Loox, as foreshadowed by his attacks in battle. You can spare him by revealing this, making him run away, and his components can be talked to at Grillby's after.
* TS!Underswap, who is himself an example of this trope in the original game.
* Tsun-Tsun TzimTzum is a tall, burly warrior woman, and the narration spares no effort in expressing both how big and strong she is and how super-hot she is.
* Tsun-Tsun TzimTzum killed the monster - he just happened to be holding it at the time!
* Tsu onwards introduce Double Rotation: If your current Puyo pair is in a shaft one column wide, you can still rotate it to flip the order of Puyo by pressing either rotation button twice.
* Tsurezure Children features this as the last-minute twist to Motoyama and Enomoto's relationship. Motoyama had previously fallen in love with Enomoto, but realized that her romantic attentions were elsewhere (specifically, to a long absent childhood friend from her home town) and she only saw him as a friend. She was supposed to meet up with him one day, but despite her waiting for him he was never able to do the same. It's at this moment when Motoyama decides to throw out all decorum and ask her out on a date.
* Tsurezure Children, the plot revolves about several couples getting together, so this is a given.
* Tsurime Eyes. Guys with tareme tend to be cheerful, innocent boys, while girls with tsurime tend to be mature, mysterious or seductive ladies.
* Tsuritama has Akira and his crew of Indians. They all appear to be a part of a mysterious organization called "Duck" (as in the aquatic fowl) that monitors alien activity on Earth, namely Haru and Coco.
* Tsuritama has black, Arabic, and Asian members, as well as a great gender ratio, and their lead agent, Akira, is Indian.
* Tsuritama he pulls whenever scared, and the need to constantly switch schools because of his grandmother's job.
* Tsuritama, the first episode's introduction and the ending credits use a computer-generated artstyle based around clusters of circles.
* Tsuro, demand was so high that the publisher exhausted all stock reserves.
* Tsurugi is a magician and has the same weaknesses as a normal human would (e.i. blood loss, starvation, etc) though he is more resilient. However, as he never learned how to swim and according to himself '[he] sinks like a rock', Tsurugi is so vulnerable to drowning he can't even fill up his bathtub too much.
* Tsuruten than Senbei. While Senbei is focused on single women, Tsuruten has no such restriction, despite himself being married to a beautiful woman as well — in fact, he once tries to grope Senbei's wife (it fails because Senbei's wife, who's quite acquainted with Tsuruten's reputation, keeps her guard up around him).
* Tsuruya has a 600 year old titanium-cesium jar buried in the mountain behind her gigantic home that she didn't know about. And since the only other

* Tsuruya has, in some official artwork, ankle-length hair. From the novels, Kuyou Suou also has very long (and full-bodied) hair. In fact, she got a
* Tsu'tey. Even though Neytiri only ended up having feelings for Jake, she was technically supposed to have been betrothed to him from the beginning, so to free her from any possible obligation to or conflict with him, the triangle was predictably resolved by redeeming his character and subsequently killing him off.
* Tsutomu Miyazaki, the infamous Otaku Killer who murdered several young girls (and blamed it on a side of his personality he called "the Rat Man") sent a box containing the ground-up bones of one of his victims to her parents, as well as several of her teeth.
* Tsutomu Nihei, this swiftly leads to Tanikaze becoming one of the most skilled and experienced soldiers on the ship, far too valuable to conveniently dispose of. Eventually he's being sent on dangerous missions not as an attempt to get him killed, but because he's the only one skilled enough to possibly succeed.
* Tsutomu Nihei. When things resume normal speed, all the actual noise catches up in a combined boom.
* Tsutomu Nihei, who is quite well known for having the emotional range of a broken toaster.
* Tsutomu Yamaguchi. Dude survived both nukes and outlived the pilots.
* Tsutomu Yamaguchi is sometimes considered the luckiest man in history because he survived the nuclear attacks on both Hiroshima and Nagasaki. However, he could also be considered the unluckiest man ever because... he was in both Hiroshima and Nagasaki when they were nuked.
* Tsutsumu. He doesn't make it easier and fights right up to the end, fully intending to kill the girls if he can... but he's left a pleasant surprise for the heroes if they do manage to beat him.
* Tsuyokiss Cool X Sweet also had a guitar riff, played backwards at the end of the break.
* Tsuyokute New Saga: Mileina's father chose to protect some human refugees instead of assisting the dwarves in the original timeline, a decision that ultimately weakened the human forces.
* Tsuyu Asui admits that she had trouble making friends before joining UA. One reason was that between taking care of her younger siblings due to her parents' busy work schedules and studying to get into a good high school, she didn't have enough time for a social life. The other reason is that her classmates were put off by her
* Tsuyu Asui's brutal honesty is acknowledged in-universe as her general M.O. ("I always say all that's in my mind", as she freely admits to Izuku when she starts talking to him) She has no filter and says what she thinks about others, frequently snarking at the antics of her zanier classmates and rarely letting personal feelings or sentiment get in the way of her judgment.
* Tsuyu Asui suddenly developed her ability without any sort of emotional trigger, transforming her into her current frog-like appearance without any warning.
* Tsuyuko gives a harsh critique of Kirin's and Shiina's cooking in Episode 6. However, she also says it tastes good. This in stark contrast to Ryou's review, where she liked it quite a bit.
* Tsuzuru, the triple-fusion of Izuku, Minoru, and Tsuyu, not only manages to incapacitate Nomu.
* TT2000, who happens to be the original creator, whose inherent effectiveness stems entirely from the total lack of effectiveness that his actions inherently possess.
* T Tauri stars, that are known to have much more activity than our own comparatively calm Daystar, with strong stellar winds, extensive coverage of starspots, and of course flare activity. Planets in orbit around such stars are thus likely to be lifeless.
* TTD reached the limit- mainly because it only ran from July to September of 1978).
* TTGL thanks to Nadia's Blue Water. Averted with Kittan who still dies just like his canon.

* "T: The Terrestrial" and "Murder on the Planet Express" establish the Planet Express buddy system in such instances as follows:
* T-Top - A roof of a car with removable panels on both sides of a central pillar
* Ttwo of the three main male good guys were pleasure slaves in Courts in Tereille. Aside from Daemon and Lucivar, there's also Jared (pre-Invisible Ring) and a small army of others.
* Túrin/Niënor in which they're the title characters — but there's fanfic.
* Túrin Turambar. He's one of the most Badass heroes to have ever lived, killing Glaurung
* Tuatara has a third, parietal eye (lens, retina, and all) at the top of its head.
* Tuataras are often mistaken for lizards due to being similar in appearance. In reality, tuataras are from a separate order (Rhynchocephalia) than lizards (Squamata).
* Tuatha de Danaan instead of aircraft. It should also be mentioned, that it's also Ballistic Missile Submarine, and can also launch mechs in this fashion as well, instead of a catapult launch.
* Tubba Blubba is completely unstoppable until you find his heart and make him mortal again. Mario and co. are aware of this, and immediately run for their lives in a chase sequence when he catches you in his castle. Attempting to attack him at this point is an unwinnable battle.
* Tubbs grows one in the fourth season, but shaves it off early in the fifth.
* Tubby Custard was available in the U.S. as well as part of a Burger King promotion for the show. It was pretty much just vanilla pudding with pink food coloring.
* Tubby the Tuba (1975), and the original 1945 song inspiring the film, has been used by music teachers in primary and secondary schools to teach students about the principles of music, musical instruments and their relationship in a symphony orchestra.
* Tubby the Tuba (1975) by The New York Institute of Technology under the direction of founder Alexander Schure, who had no experience in animation prior to this film. Singer was hired as the animation director for the movie but was fired a year into production due to Schure's frequent intrusions. After negative feedback from test audiences, Singer chose to have his name removed from the final cut.
* Tuberculosis doesn't quite work in real life the way it works in this game, presumably for the sake of time compression. First of all, only about 10% of people who get infected ever develop the disease and generally speaking if you make it two years without showing symptoms, you're in the clear. Although people
* tuberculosis (said half being "Best Audio Design", "Best Narrative", "Best Score/ Music", and "Best Performance" with Arthur's voice actor Roger Clark, who indeed admitted that he looked surprised at his win).
* tube stations. In the late game, a depot is set up in an aboveground courtyard, but even that's expected to be temporary.
* Tubifex worms, in the absence of soil, will cling to each other. And to walls, which gives an effect not dissimilar to both this and
* "Tubing," the practice of bringing babies to term in artificial wombs, is a matter-of-fact staple of medicine in
* tub of popcorn cheering her favorite team on. She did like sports, she just didn't want to marry the guy.
* Tubular Bells) does this; the "caveman" passage segues into a very quiet and soothing guitar/organ segment and then suddenly, without warning, the Sailors' Hornpipe drastically ups both the tempo and the volume.
* Tubular Bells. Only a small part of the album-long composition was used in the film, but that part was released as a single and made the U.S. Top 10.
* Tuca & Bertie: After Dirk hits on her in "The Promotion," Bertie's breast literally leaps off her body and spends the next 24 hours getting drunk.
* Tuca & Bertie and is an indicator that Bertie has some sort of sexual trauma going on.

* Tuca & Bertie, Bertie and Speckle ask each other what their favorite porno movies are in an attempt to liven up their sex lives. Speckle's shows a perfectly normal bluebird couple having completely vanilla sex, while Bertie's is a perfectly chaste British drama.
* Tuca & Bertie. Bertie's phone has its own personality and feelings, and in one episode, she deals with a sentient filing cabinet that begs her to feed it files.
* Tuca & Bertie", Bertie starts to sing a song about Yeast Week, only to get interrupted two lines in by Pastry Pete saying, "Bertie, please, only first-timers sing by the fountain."
* Tuca & Bertie episode "The Jelly Lakes," Bertie reveals to Tuca that she was molested by a lifeguard when she was twelve, which destroyed her love of swimming.
* Tuca & Bertie for "Bird Mechanics," Bertie's (unhelpful) new therapist tells Bertie to cut Tuca out of her life, remarking that "[their] names sound wrong together." She then repeats their names together ("Tuca and Bertie, Tuca and Bertie, Bertie and Tuca?") in the exact same manner as the theme song, which starts playing right after her dialogue to make the reference clear.
* Tuca & Bertie" has Tuca and a pair of geese decide to swim naked in the pool during the bachelorette party of Speckle's sister Dottie. Dottie and Bertie choose not to participate, the former because she's concerned about the repercussions of being seen nude in public and the latter because she doesn't usually feel like disrobing when she's sober and has chosen not to drink.
* Tuca & Bertie have to be the mayor — which means nothing ever gets done.
* Tuca & Bertie, he ends up with legs so well-toned that they rip through his pants. Tuca tests them out by putting three ears of corn between them, then having Speckle press them until the kernels pop.
* Tuca & Bertie inside a blender. Speckle is understandably squicked out.
* Tuca & Bertie: In "SweetBeak", when Bertie is giving Tuca her presentation on her new bakery, one of the slides details on "Why Bertie SHOULD be allowed to have a boy-girl slumber party".
* Tuca & Bertie", she is shown to have a filthy apartment which consists largely of random garbage that she has picked out of the garbage.
* Tuca & Bertie" shows this to also be true of Speckle, the show's primary male bird character.
* Tuca & Bertie", Tuca sees two different versions of herself, Bertie, and Speckle in one of the realtor's houses.
* Tuca & Bertie: Used frequently, varying between waterfalls of tears to giant, golfball-sized gobs of tears. "The Jelly Lakes" includes a gag where Tuca and Bertie have a post-make-up cry, which floods their entire car with tears.
* Tuca & Bertie: What do you expect when two avian roommates, one a toucan and the other a songbird, have to survive the world around them?
* Tuca & Bertie" when Bertie, upset that she may have blown her promotion, and Tuca whips out an umbrella.
* Tuca & Bertie" when congratulating Bertie on her promotion: "Text me when you get the good news, okay? And tonight maybe we can do some celebrating with my big di...nner idea."
* Tuca & Bertie" when Tuca is treated for an an abdominal pain: "Okay, let me put this as sensitively as I can: you have an egg up in your cooch and you'd be a moron not to cut that shit out of your lady pipes."
* Tuchanka is covered with ruins from their pre-nuclear war civilization but they are largely utilitarian. The third game, however, visits an elaborate burial and temple complex, complete with immense statues of krogans. If Wrex is present he points out how far his race has fallen.
* Tuchanka. Wrex himself heavily implies that the only person in the galaxy that he thinks could beat him in a straight fight is Shepard.
* Tuck & the Abbess of Rutherford can seem like this, but Black people have lived in England since the Roman Conquest. While Black members of monastic orders and nunneries would have been quite rare, it's not impossible.

* Tuck and Cover: Covering someone with your body to protect them from an explosion or something similar.
* Tuck and Cover: Saving someone else from an explosion by leaping on them and taking the blast for them.
* Tucker & Dale vs. Evil: After she hits her head while swimming, Dale takes Allison back to his and Tucker's cabin so she can recover. Fortunately, she's not badly hurt and feels fine when she wakes up, but he insists she stay for a little while so they can make sure she doesn't have a concussion. Their romance blooms as he serves her breakfast, plays board games with her, and encourages her to follow her dreams.
* Tucker & Dale vs. Evil a series of deadly accidents and misunderstandings.
* Tucker & Dale vs. Evil, Chad is revealed to have asthma, using his inhaler many times throughout the movie. During the climax Dale throws a box of chamomile tea at Chad, which causes him to have an asthma attack and fall to his apparent death.
* Tucker & Dale vs. Evil, Dale finds Tucker hung upside down as bait for him, surrounded by booby traps. He accidentally triggers one, causing a huge spear to come flying down and pin the ground right between his legs. After standing in shock for a moment, he tells Tucker "For the first time, I'm glad I'm not hung like a bear."
* Tucker & Dale vs. Evil genre where the deaths are over-the-top and played for humor, both by the over-the-top nature of them and the fact that they're all the result of stupid accidents done by those who die.
* Tucker & Dale vs. Evil has a paper version, when an old newspaper found in a derelict building coincidentally turns out to have a front-page story revealing a major plot twist.
* Tucker & Dale vs. Evil, inverting the usual set up for the trope.
* Tucker & Dale vs. Evil killer ends up suffering that fate instead.
* Tucker & Dale vs. Evil snobs who misinterpret the motives of the in-fact quite friendly and harmless (if not incredibly bright) hillbillies. It doesn't stop a lot of them dying in hilariously gory ways, however. Tucker and Dale even believe that the kids are part of some deranged murder-suicide pact.
* Tucker & Dale vs. Evil they believe to be in. So in a certain way, this is a case of Death By Wrong Genre Savviness.
* Tucker became the mayor of Amity Park in the Series Finale, it's safe to say he got a good bit of respect.
* Tucker Budzyn, show Tucker and/or other dogs not following the "script" of the food reviews, which Linda edits as them being sassy:
* Tucker charges the Red and Blue grunts guarding the Blues and Reds' hanger and Pelican, ruining the element of surprise Locus wanted to exploit and resulting in them being pinned down by a heavy machine gun. Furthermore, his actions resulted in Washington being shot through the neck after walking into the middle of the battlefield while in a daze due to being starved and dehydrated.
* Tucker, despite his collusion, was actually part of the reason Nimauk stayed as safe and well provisioned as it has since societal destabilization, and it might be in more danger without him.
* Tucker does this in Season 4, when confronted with Crunchbite for the first time.
* Tucker got better when first Clarice took him to meet more girls who happened to appreciate his sensitive nature (and to be fair the previous targets of his wooing were the bitchy
* Tucker. He also gets into the habit of using the Designated Marksman Rifle as his standard firearm as the series goes on.
* Tucker himself is worthy of mention. This is a guy who hits on most any woman he meets, including Tex, who could easily kill him if she so chose, and has admitted to punching him while he sleeps. And who can forget his almost memetic catchphrase? When you hear the words "Bow Chika Bow Wow!" you know Tucker is around. And the less said about Junior's origin, the better.
* Tucker is a much more proper example. In one episode, a ghost frames him for the

bad things happening to other people. However, once
* Tucker is obsessed with Mexican wrestling and sea creatures (even sponsoring an octopus) and has a strange collection of human hair.
* Tucker is quite accurate in his summary of events soon after Tex arrives.
* Tucker Max gets a few of these in his stories that rely on more exposition than stream of consciousness for comedic effect.
* Tucker might be this as well. He develops into a more than competent combatant throughout the series, and it's implied that the only reason he's not running the Blue Team is that he simply prefers not to, and just lets Church handle it. His status as this is confirmed in Season 12, Episode 19.
* Tucker's alien baby 'Junior' briefly serves as this for Blue Team in Season 5 of
* Tucker's Kobolds are a textbook case. Even though they were no match for the high-level adventurers in a straight fight, they used the terrain to their advantage and set up a variety of clever traps to make the PCs' lives hell.
* Tucker's "quest" in Season 4 actually played an important role in the Chorus Trilogy, as his connection to the aliens helps the people of Chorus gain an upper hand.
* Tucker's Witch: He's Detective Tucker. His wife is a witch. They Fight Crime!
* Tucker: The Man and His Dream, the telling of Preston Tucker's struggle to start a car company. For one, it only shows it taking one year when it actually encompassed four, the president of the Tucker Company was actually a good guy, but they needed a villain.
* Tucker: The Man and His Dream to take time off from the Hollywood system. However, critics credit the film for renewing interest in Preston Tucker's cars.
* Tucker: The Man and His Dream: Tucker tries to shake off the legal eagles with a quote about shipbuilding he attributes to Confucius.
* Tucker: The Man and His Dream type is used quite well and true. One hiccup is the Machine and Tool sign, featuring Helvetica, which wouldn't have been used in such a manner in the 1940s. That, and Helvetica itself was created in 1957.
* Tucker was a victim when ghost hunters attacked him when he was dressing up as a ghost. We earn this gem:
* Tucker, who talked about "picking up chicks" in the first few episodes, became a literal font of innuendo.
* Tuck Everlasting has cows. Yes, cows that follow a dirt path and quickly go around the forest that the main character flees into. That's one of the reasons why the humans also stay away.
* Tuck Everlasting. In the book, she was a preteen with perhaps a slight implied crush on him and nothing more.
* Tuck Everlasting is about a teenage girl falling in love with the younger son of a family of Flying Dutchmen.
* Tuck Everlasting. It still doesn't make much grammatical sense once you know that.
* Tuck Everlasting Jesse's older brother Miles was once married. When his wife realized that she aged while he stayed twenty-two, she accused him of selling his soul to the Devil.
* Tuck Everlasting learns through Jesse's love that it's better to live a limited life to the fullest then be stuck like a rock in a stream.
* Tuck Everlasting revolves around an entire family of immortals and their interactions with a young mortal girl, along with the question of whether or not she will decide to become immortal as well.
* Tuck Everlasting takes place about 70 years after the previous one. The main character chose not to drink the water of immortality; the immortal Tucks discover this when they see her grave.
* Tuck Everlasting They don't age, and nothing they've encountered yet can kill them.
* Tuck Everlasting, this is the reason for Miles Tuck's bitterness; his wife, daughter, and son all died while he stayed immortal.
* Tuck loves to call for one of these following the successful completion of a mission of on

* Tuesday has frogs who inexplicably gain the ability to fly on their lily pads on Tuesday night. The power vanishes Wednesday morning and a bystander is shown being interviewed by a TV crew.
* Tuesday in France or Japan. However, the experience (or lack thereof) with early prototypes made a World Bank credit to Japan for what would ultimately become the Shinkansen conditional on the top speed being lowered to 210 km/h.
* Tuesday is dubbed for one of those cultures (including the Spanish dub)...
* Tuesday. It's completely devoid of text other than times, yet nevertheless manages to convey a story about frogs suddenly being able to fly for one night.
* Tuesday nights have now become ABC's second Friday Night Death Slot due to fierce competition from rival networks dominating the night. For the past few seasons nearly every show scheduled on the night has either been canceled after one or two seasons at the most (
* T.U.F.F. Puppy: At the start of the episode "Dog Daze," Dudley and Kitty drive after a giant robot piloted by D.O.O.M. Dudley yanks off the Tuffmobile's steering wheel and tells Kitty to "take the wheel." As he ejects his seat to get into the robot, she can only scream as the car crashes.
* T.U.F.F. Puppy: Dudley and Kitty fit this trope to a tee, as Kitty is clearly taller than Dudley.
* T.U.F.F. Puppy, Dudley pretends to be a zombie to follow real ones towards the place where Snaptrap, Birdbrain and Chameleon are hiding all candy and all the toilet paper. He befriends two zombies who tell him where the bad guys are hidden.
* T.U.F.F. Puppy: Dudley Puppy is a complete idiot... until it comes time for him to fight villains as a secret agent, where he shows surprising cunning and planning ability.
* T.U.F.F. Puppy enough, being that he's a rat), he swells up and hits the controls, which cause him to set Dudley and Kitty free.
* T.U.F.F. Puppy episode "Freaky Spy-Day" has Kitty's attempt at making an outgoing.
* T.U.F.F. Puppy episode has Dudley prank calling Snaptrap by asking for Anita Bath (I need a bath). When Snaptrap repeats the name, Dudley yells, "You sure do!"
* T.U.F.F. Puppy episode "Hot Dog" has Kitty Katswell cooling herself down by taking off all her clothes and shaving her fur into a onesie.
* T.U.F.F. Puppy episode, "Moms Away!", Snaptrap plans to get rid of all the Moms in Petropolis by shipping them to a deserted island and stranding them there. At the end of the episode, Dudley foils Snaptrap's plan and decides to have his Mom punish him. Snaptrap begs to be taken to jail instead.
* T.U.F.F. Puppy episode "Puppy Pause" has the time-stopper gloves that stop time for everything but the user.
* T.U.F.F. Puppy episode "Share-A-Lair" features "Schmoodled", which is then used later in the episode.
* T.U.F.F. Puppy episode "The Wrong Stuff" where Dudley and Keswick try to hide their identities from Kitty while spying on her by taking their aliases from nearby signs.
* T.U.F.F. Puppy: "Go to sleep, go to sleep, go to sleep or I'll choke you."
* T.U.F.F. Puppy had an episode called "Dog Daze" where Snaptrap owned one he used with his D.O.O.M. organization to wreak havoc on Petropolis. It humorously was acknowledged by him and Dudley to get horrible fuel mileage.
* T.U.F.F. Puppy has Olly answering DOOM's phone with the words "Diabolical Order Of Mayhem. We deliver evil in thirty minutes, or it's free."
* T.U.F.F. Puppy Has quite a few of these such as Carpet World, Lamp Chops, Twigs & Things etc.
* T.U.F.F. Puppy in a huddle. Keswick appeared why they were still crying. Kitty then exclaims, "Not now Keswick, we're too busy crying over Keswick!"
* T.U.F.F. Puppy: In "Mall Rat" as Kitty is fighting Snaptrap, the two stumble into a photobooth which snaps five pictures of the brawl, with the two striking a silly pose for the second-to-last slide.
* T.U.F.F. Puppy in the episode "Dogs Best Friend" KIL-R was a friendly robot turned into a deadly one by Snap Trap when he pressed a button on the remote for

it.
* T.U.F.F. Puppy in the episode "Frisky Business", Kitty gets completely charred black by the Chameleon landing and taking off his rocket on top of her.
* T.U.F.F. Puppy: In the episode "Mind Trap" Snaptrap predicts Dudley and Kitty coming into the base with the mind reading helmet so he throws a bunch of marbles right where they're coming from and they trip.
* T.U.F.F. Puppy in the episode "Share-a-Lair" T.U.F.F. and D.O.O.M. were surprised at seeing each other in the same office and proceeded to point their guns at each other to try and attack. Kitty managed to reason with them that if they both started shooting their office would get destroyed.
* T.U.F.F. Puppy in the episode "Watch Dog" when Dudley is discovered by "Snapbots" in an alternative future he gets dragged this way to be captured.
* T.U.F.F. Puppy Jack Rabbit does this to Dudley Puppy in "The Wrong Stuff" when he tries to fight him to rescue Kitty Katswell from him.
* T.U.F.F. Puppy, Keswick reanimated some corpses to have zombies for the holiday. He said the zombies would be harmless as long as there were candies for them to eat. Otherwise, they'd eat brains. When Keswick commented Dudley would be safe, Dudley proved the point by claiming he didn't understand it.
* T.U.F.F. Puppy segment "Super Duper Crime Busters", Kitty overdoes this, smoking in and out of places with the words "Nowhere and Everywhere!" Dudley even tells her they can see her as she tends to go a few feet away to get something.
* T.U.F.F. Puppy. She's pretty much the only competent agent yet her accomplishments are usually glossed over by the agency in favor of celebrating Dudley.
* T.U.F.F. Puppy spree. At the end, it is hinted that Keswick was actually certified and their marriage was real.
* T.U.F.F. Puppy stealing bases, while in "Lie Like a Dog", Dudley Puppy beats up the villains after they steal the other spectators' money.
* T.U.F.F. Puppy, The Chameleon got into a tussle with Dudley, while disguised as Dudley, Kitty was able to tell who was the real Dudley by getting one of them to spell Dudley's name, the Chameleon got it right and she blasted him. The real Dudley can't spell his own name, let alone write it down.
* T.U.F.F. Puppy, two of Snaptrap's henchmen, Ollie and Larry, are said to be an opossum and a shrew, respectively. However, Ollie looks more like a weasel or brown rat, while Larry could easily be mistaken for an opossum, white rat or mouse.
* T.U.F.F. Puppy uses CGI liberally for things such as machines, a few vehicles and the like. The CG is cel-shaded, however. The episode "Puff Puppy" uses this trope intentionally by having characters change to traditional CGI after jumping into a vortex.
* T.U.F.F. Puppy, wakes up unaware of what just happened. She gets a badly written note from Dudley in which he spells "brains" as "brians". Because of how badly written the note is, she goes into the women's restroom where the women inside scream and leave. Kitty looks at herself in the mirror and realizes what Dudley's note meant.
* T.U.F.F. Puppy: When Dudley goes undercover to learn one of Snaptrap's plans, he finds this, and thinks it's in code.
* T.U.F.F. Puppy: When Larry takes over D.O.O.M. and changes his name to Murray, everyone in T.U.F.F. gasps in fear at the sound of it.
* T.U.F.F. Puppy: While we don't see it, this is how Dudley's mom started dating his enemy Snaptrap. They met at the laundromat, and she let him borrow her stain stick.
* Tuff Turf: After Nick's gang has been driving around for hours, one of them complains that he has to pee. Nick tells him to go out the window, which he does.
* Tuff Turf is remembered for Kim Richards sporting long blonde hair that goes past her hips. Most of the promotional pictures from the film showcase her hair.
* Tuff Turf, Morgan steals a Porsche, which is promptly stolen by Nick's gang.
* Tuff Turf) plays the piano and sings a romantic ballad, with the voice provided by Paul Carney.
* Tuff TV, a male-oriented network carried mainly by digital subchannels and LPTV

stations, abruptly went off the air in 2018.
* Tuft of Head Fur: An animal with a tuft of fur or feathers on their head.
* Tuft of Head Fur: For less anthropomorphic animals, fur is used as a counterpart to hair. Hair tufts on females contrast with "bald" males, giving the allusion of hair.
* Tuf Voyaging for a feudal world and throws in some "harmless" animals for their beasts to prey upon, only for the rapid-breeding critters to ravage his clients' farmland (he despises cruelty to animals you know.)
* Tuf Voyaging, Haviland Tuf is eight feet tall, heavily built even for his height, completely hairless and has snow white skin yet no one ever questions his humanity nor is any explanation ever given for why he looks this way. There do exist, however, genetically altered populations of humans in the setting, so maybe they assume he's one.
* Tuf Voyaging is a series of short stories where a benevolent "advanced" human travels the galaxy, offering his services to worlds with environmental problems, and sometimes imposing solutions of his own. Some of the races he "helps" are not pleased with his solutions, although an objective observer would be inclined to agree with him that he did right.
* Tuf Voyaging. Since the thing is immobile and almost entirely edible, it's a much more efficient source of food than any naturally evolved animal with bones and sensory organs and whatnot. When asked how they taste, Tuf admits he hasn't tried them personally, but he imagines they would taste "very good to any starving man".
* Tuf Voyaging story "Guardians" human colonists on an oceanic world are threatened by a sudden plague of sea monsters that came out of nowhere. After some study of the sea monsters Haviland Tuf discovers that they are artificial, and they mostly appear in the same places as a limpet-like mollusc that the colonists call "mud-pots" and like boiled with melted butter. With the help of a psychic kitten Tuf confirms his hypothesis, the mud-pots were sapient and while they lacked the typical signs of civilization they were masters of genetic engineering.
* Tuf Voyaging: subverted, where the biological warship Tuf 'inherits' as the last surviving member of a freelance salvage team is specifically NOT sapient, though it could have been made so; there is mention of other Earth warships with AI installed mutinying and/or fighting each other.
* Tuf Voyaging, though it could have been made so; there is mention of other Earth warships with AI installed mutinying and/or fighting each other.
* Tuf Voyaging to get back at a client who he finds particularly disagreeable.
* Tuf Voyaging. Tuf attempts to help a world suffering from overpopulation when he comes back to help ''again', he learns that there was a TV series produced that not only had him in a relationship with the government official that hired him but had a "keep having children" monologue that completely reversed the intent of what he actually said.
* tugging off a latex Peter Parker mask, well aware that Smythe was spying on him.
* Tugg Speedman ends up turning into a completely different movie, for which Speedman wins the Best Actor Oscar and gets his career back on track.
* TUGS episode, "High Tide", when Zebedee's steel rig damages the railway bridge and causes it to collapse, Top Hat is forced to save the Goods Engine by catching it in Lord Stinker the Garbage Barge when it comes across the bridge.
* TUGS episode, "Jinxed" has Boomer, an unlucky tugboat. Before he was renamed Boomer, his name was Captain Harry. Unfortunately, like the urban legend goes, renaming a ship gives bad luck... in this case, bad luck to Boomer himself.
* TUGS episode, "Warrior", the Shrimpers say this to Warrior when he cuts across them. Warrior apologizes and tells them they should look where they're going, as he's in a hurry. The Shrimpers tell him they're not going anywhere, because they're busy shrimping.
* TUGS in the episode, "Regatta/4th of July", prompting the Star Tugs to save him.
* TUGS - O.J. and Izzy Gomez were turned into generic boats, while Big Mickey the crane became a fixture in harbor scenes even after the move to CGI, eventually regaining the ability to speak in Season 21 (though with a face instead of a megaphone).

* TUGS, the fire is already out and the damage it made is done. Justified in that Top Hat was working with his railway barges, Frank and Eddie, who were in the middle of carrying freight wagons when the Fire Tug and Sunshine told him about the fire.
* Tugs, where they would play in 5-minute segments that showed what the tugboats in the harbor did when nobody was around.
* Tujurikkuja parodies this trope in one of their clips where a sniper shoots everyone his instructor mentions.
* tukhta is Russian for 'inflated production figures' and falsified records. This was ubiquitous in USSR and all Socialist countries, where every worker had been assigned a 'norm', quota, of production. To attain this, the practice of making up your quotas through devious means and fabricating outputs. This could be as simple as writing down a figure that didn’t reflect your actual labour or picking up a pile of timber that had already been counted, moving it somewhere else, and counting it again.
* Tuktuk the Explorer is designed to be a target of this. He's a typically weak 1/1 goblin who is reborn as a mighty 5/5 golem upon death. In context, Tuktuk's death spawns a being capable of bringing down most
* Tulane, 1998. The Green Wave finished 12-0 with a #7 final ranking. No final poll appearance since.
* Tulip also fits this trope, being a talented gunfighter who routinely goes up against both normal humans several times her size/strength and supernatural creatures. In particular is the time she
* Tulip does this to Jesse and leaves him tied up for the whole day as revenge for leaving her behind when he went to Masada.
* Tulip Fever, mostly used as conversation fodder and as a possible means for the various male characters to quickly raise money for various personal goals.
* Tulip is extremely old and beat-up, with huge sections of the exterior hull missing and suffering frequent mechanical problems. Doesn't help that she's been through at least two retrofits, starting out as a luxury passenger liner, then converted to a troopship, then surplussed out and turned into a bounty hunting vessel. Most of the locations visited are similarly dark and dingy.
* Tulip O'Hare has also shown considerable skill as a Trick Shot in the few occasions we've have seen her wield a gun.
* Tulip's escaped reflection has been spraying any reflective surfaces she encounters while on the run from the Mirror Police.
* Tulip's father Jake was shot in the back of the head while taking a shit in the woods. A fellow hunter mistook him a deer.
* Tulips Shall Grow, come rolling into Holland bringing devastation and misery. (The Nazis occupied Holland in 1940.)
* Tulips Shall Grow, features a peaceful village in Holland being overrun by the "Screwballs", an army of mechanical soldiers who seemingly live only to conquer and destroy. It ends on an optimistic note when the Screwballs are caught in a sudden rainstorm and are paralyzed by rust.
* Tulips Shall Grow" has the Screwballs, actual metal balls with screws in them, come barreling into Holland, wreaking devastation.
* Tully Blanchard's "Perfect 10" valet, Baby Doll, was listed as being 6-foot-1.
* Tully, reportedly it took nearly a year and a half to lose the weight.
* Tully will mark the third film he has directed, that is written by Diablo Cody and second starring Charlize Theron.
* Tulok the Barbrarian or trickery often have very little methods of actually dealing damage.
* Tulpa is about an experiment intended to create one under controlled conditions.
* Tulpa. This second personality can basically become an entirely new person, and one with whom the practitioner (known as the "host") can share an incredibly close bond that's basically this trope exactly, a closeness most people will never experience.
* TumblePop is all about this trope, featuring two guys armed with vacuum cleaners that suck enemies inside and then release them in a Giant Ball of People.

* Tumblestone a moth flies out of the Goblin King's turned-out pockets.
* Tumbleweed Connection and bitterly relating to another war veteran of the horror of "hav(ing) a graveyard as a friend."
* Tumbleweed, Jim could have got away free and clear when Sheriff Murchoree collapses from thirst at Coyote Springs. Instead, he returns to save the sheriff's life, which ultimately results in him being captured again.
* Tumbleweed, Jim Harvey has to prove that he is not a coward or a collaborator after the wagon train he was guiding is wiped out while he was being held prisoner by the Yaquis.
* Tumbleweeds after reading Zane Grey's Western novels while recovering from an illness.
* Tumbleweeds are an invasive species in the Americas, likely brought over from Russia by accident as part of a batch of imported seeds, and cause massive problems for American agriculture (including, but not limited to, being able to reproduce in huge numbers from a single specimen, leeching nutrients from the soil that other plants need to survive, being covered in thorns that can cause painful injuries to farm animals and humans, and being highly flammable, meaning they spread wildfires and are difficult to remove with machinery).
* Tumbleweeds had the main character's horse Epic, who chews tobacco and is a textbook Alleged Steed. One trail boss, on being told that Epic was a "quarter horse", responded "You've got change coming".
* Tumbleweeds had two Smurfettes — Hildegarde Hamhocker among the townsfolk of Grimy Gulch, and Little Flower among the Poohawks. Aside from Hildegarde's little niece Echo, other female characters are extremely rare (if not non-existent) in the strip.
* Tumbleweeds has a character named Judge Frump, who is so corrupt that he is often seen taking ridiculously small bribes. He once boasted that he cannot be bought, but he's open for "rental fees".
* Tumbleweeds has a good thirty characters in its main cast, split between members of the town and the surrounding lands' Native tribes.
* Tumbleweeds. She is the only adult female in town. She is surrounded by bachelors for whom there is absolutely no competition. Yet nobody wants her. The title character, whom she keeps trying to rope into marriage, will not have any part of it.
* Tumbleweeds. She's got buck teeth, a vacant stare and an upturned beak nose.
* Tumbleweeds: The 6 7/8 Cavalry was prominently featured, interacting frequently with both the Poohawks and Grimy Gulch, all the while showing their hilarious incompetence
* Tumbleweeds, the Sheriff would sometimes tear off the star badge from Deputy Knuckles when he did something really stupid. But it was always restored in the next strip.
* Tumbleweed: This is what Tumbleweed appears to be, and certainly what Jim assumes him to be: a broken down old cayuse who is part burro. However, Tumbleweed soon demonstrates hidden depths and Jim discovers that Buckley was not joking when he described Tumbleweed as his best horse.
* Tumbleweed: When Jim and the remains of the posse are pinned down and about to be wiped out by the Yaqui, they are saved by the arrival of Buckley and his men (plus Lam and Laura).
* Tumbling down a dark staircase by going in without a light source was one of the ways you could die in the
* Tumblr and Tickld name for this type of person is "Moon Moon", due to a post where someone got "Moon Moon" on a wolf-name generator and commented that she would be the wolf no one likes ("OH SHIT WHO BROUGHT FUCKING MOON MOON ALONG?").
* Tumblr by Ned Vizzini. Few fans of the show have actually read the book, and even among those who have, the musical is far more popular.
* Tumblr deliberately with the joke "AU in which everything's the same except _____".
* Tumblr for certain tags, the site will give an automated message related to it. Crosses over into heartwarming territory, since if you search for "depression" or

"suicide", the site will ask if you're okay.
* Tumblr: Gandhi, as you know, walked barefoot most of the time, which produced an impressive set of calluses on his feet. He also ate very little, which made him rather frail and with his odd diet, he suffered from bad breath. This made him ... A super calloused fragile mystic hexed by halitosis.
* Tumblr has a meme that relies on a subversion of this for comedy, serving as an explanation of what a Statistical Outlier is. According to this meme, people in general do not eat nine spiders every night. Rather, it is one guy named Spiders Georg, who eats 9 000 000 000 spiders every night, who's messing with the results, which should be accounted for.
* Tumblr has a tendency to refer to her followers as "fellow freaks." (Completely affectionately, of course.)
* Tumblr is a creepypasta that simply consists of the words "carpeted kitchen".
* Tumblr is considered to be full of hipsters. The whole site works as such: You post some content (usually a picture). If others like it, they reblog it, and people who like it seen from those sites reblog it, and so on. You get recognition as the person who posted the thing before it was popular because it always leads back to you. Other subcultures have cropped up since then, but they still collectively refer to the community still focusing on this original form of blogging as "hipster blogs".
* Tumblr is still titled "this is totally babies", and all his fans agree. It's totally babies.
* Tumblr. It got so popular that nine of the original ten cast members who did that scene did a re-enactment for Red Nose Day 2017.
* Tumblr"), it has everything, including phonetic puns that only work in Portuguese (Germany has "Weissfüder", which in English would be something like "Gofükurself").
* Tumblr. It's been both claimed and suspected that the entire farce was started by 4Chan.
* Tumblr meme story has a fortune teller turn over the Death card, and as she's trying to explain that it's not particularly bad flips over the Tower, followed by the Ten of Swords, and she thought she'd taken out the minor arcana.
* Tumblr once ran ads for Autism Speaks, which was ironic considering the number of blogs on the site by autistic people who were extremely critical of the organization.
* tumblr post, presumably at least partially as a consequence of the inmates not having access to the real thing.
* Tumblr shows us that, thanks to the utter ridiculousness of his name, virtually any combination of two improbable words of many syllables will work as a nickname for Billiardball Custardbath/Beanbag Comelycat/Burgerking Candygram/etc.
* Tumblr (since the people behind the project were all teenage novices), leading to massive backlash as no refunds were ever issued. A couple of years later, an unrelated group adapted the concept into a vlog-based webseries, with the same title and basic premise. Unfortunately, many people assumed they were the ones who ran the IndieGogo campaign, leading to comments bashing the webseries for producing something cheap with $6,000 of crowdfunded money (in reality, the webseries was self-funded and never had any sort of crowdfunding, hence the small budget).
* Tumblr. The influx of new users hit such highs, the servers full on crashed trying to keep up.
* Tumblr (there are two stories about this, a drabble explaining that a hull breach is "fixed" with tape and happy thoughts, and a longer one where humans build their ships out of other race's castoffs). Most of these can be found under the tag "Humans are space orcs".
* Tumblr The "Skeleton War". A war where "Skeletons fight in Hell for all eternity for literally no fucking reason."
* Tumblr through a video of the notorious "Booty-Quake" scene that has circulated heavily there.
* Tumblr to a certain extent, as tags form a large part of tumblr dialogue (and have even begun to influence how users talk out of tags), and putting a comma into

a tag ends it. Hence, a lack of commas.
* Tumblr user Seasonofthegeek is well known for her fic content for the fandom, which is both numerous and well-written. She also takes part in fandom discussions and creates art for the show.
* Tumblr was banned in early 2018... and later unbanned in late 2018 as Tumblr itself bans NSFW content.
* Tumblr, where memes live and die in as little as two weeks, go unnoticed by certain spots of Tumblr until weeks later, and where dead, year-old memes crawl back out of the dirt and get into a firestorm of reblogs, hate mail, and annoyance.
* Tumblr (which featured a Latino youth being brutalized by bigoted security officers) due to some similarities it bore to the death of Trayvon Martin.
* Tumblr which, in their own words, "offers asylum to all those who feel persecuted on other social media sites simply for wanting to exercise your freedom of speech." It's effectively what Tumblr was before the massive content ban.
* Tumblr, with setups along the vein of "It smells like updog/suphomie/(other casual greeting) in here".
* Tumithak Of The Corridors taste. Eating is considered a dull, necessary chore.
* Tumnus' last words before being turned into stone: "I believe in a free Narnia."
* tumultuous relationships everyone else has with the Inquisition. Or for that matter, what happens when two Inquisitors (both of whom, in theory, answer to no-one save the Emperor and can demand instant obedience from anyone else) start butting heads. The fact that the three major Ordos have different goals (dealing with aliens, daemons, and heresy, respectively) doesn't help, as one branch may find itself under fire from the other for using alien weaponry on daemons and vice-versa. Not to mention that there are two minor Ordos whose inherent goals are diametrically opposed to each other (One dedicated to investigating and preserving the Imperium's ancient history, and the other to concealing and obscuring it), so they are always opposed to each other pretty much by definition.
* Tuna is a masked wrestler whose body can produce spines and cactus sap.
* Tuna "Pizza", made from biscuit dough, canned tuna, Parmesan cheese, evaporated milk and ketchup. They find it to be "gross", claiming that those ingredients should never be mixed together.
* TundaMinous's music accidentally summoning the Cajun Devil. The humor is quite authentic; for instance, you'd have to be somewhat familiar with the regional culture to get why this is funny:
* Tundra Man is effectively Top Man fused with a ice-themed Robot Master as a figure skater. The majority of his attacks involve pirouetting around the stage to slam into Mega Man, and can also deflect shots by spinning fast enough.
* Tundratown crime-lord Mr. Big tries to "ice" Judy and Nick... in this case, it literally involves
* Tune In To Kids and Family Week of programming). During this time, many networks played marathons of family-friendly shows and movies. For kid-oriented networks, they would either show movies or marathons of their programming.
* Tunnel boring machines often mix the excavated soil with water to ease removal. No prizes for guessing where two thirds of Ozai's Angels and three-fourths of the Gaang end up at the end of "The Drill".
* Tunnel in the Sky: "...Cowpertown is safe in history, along with Plymouth Rock, Botany Bay, and Dakin's Colony."
* Tunnel in the Sky: Dr. Ramsbotham, inventor of the portals that enable instantaneous interstellar travel, was actually trying to build a time machine rather than a teleportation device. On his first successful test, he saw a jungle through the portal and, assuming he'd succeeded in reaching prehistoric times, armed himself and went through. He was immediately arrested for waving a firearm in a botanical garden a continent away.
* Tunnel in the Sky ends with Rod leading settlers to a new colony world.
* Tunnel in the Sky features an example where "Jacqueline Marie Daudet" is mistaken for a young boy (in part due to constantly wearing body armor) by another boy during an advanced survival test on a far away planet. She continues to pretend that she's "Jack Daudet" for weeks, including through some sexist commentary by her

survival partner, until the beans are spilled by someone the two of them rescue. For 1955, the premise that girls could do things just as well as men could was pretty advanced.
* Tunnel in the Sky has a bunch of survival students stranded in an alien jungle in the early part of the story..
* Tunnel in the Sky lions. The primary exceptions would be the noisy, nocturnal "grand opera" and the goofy, harmless "dopy joes".
* Tunnel in the Sky outside the current medical state-of-the-art's ability to cure. When he finally comes home some years later (the exam went bad in a big way), his parents can't quite wrap their heads around the fact that he's legal of age. (He was just shy of it when he took the exam, for which he had to get his legal guardian's permission. Fortunately, his parents had already made his big sister his guardian in preparation for their entry into cryogenic stasis, and she was in favor, so signed permission.)
* Tunnel in the Sky, Rod and Roy scout the countryside looking for a new colony site. They find a beach of bones on the shores of a dead sea. There are millions of bones lying there; some ancient and worn, others with gristle still clinging on, but with no actual carcasses in sight.
* Tunnel in the Sky, Rod asks his mercenary sister for advice on what gun to bring for his off-world survival test. She recommends that he take only a knife, warning him of the false sense of security a gun provides. She explains that she had a gun on her first mission, lost it, and ran from a creature that she didn't know was Immune To Bullets rather then dying trying to fight it.
* Tunnel in the Sky, Rod makes the colony's first spear by lashing his Bowie knife to a wooden shaft, literally making a blade on a stick.
* Tunnel in the Sky Rod's father is diagnosed with an incurable disease, so he and his wife go into a Ramsbotham field where two weeks to them will equate to twenty years in the real world. They will stay in the field until a cure for the disease is found.
* Tunnel in the Sky, Rod sits down to a final meal with the family before his survival test. They have a yeast cutlet with the luxury of real bacon.
* Tunnel in the Sky. The creator of the portal network saw a jungle through his portal, picked up a gun, and stepped through into what he thought was the Jurassic. And was then arrested by the local Brazilian police for carrying a gun in a park.
* Tunnel in the Sky the same technology that allows for instantaneous interstellar travel enables people to create zones where time moves relatively faster or slower than the outside world.
* Tunnel in the Sky to raise a family as there's a shortage of husbands, and Helen makes it clear that she will leave the military the moment she finds one.
* Tunnel King: A character who is an expert at digging escape routes beneath prison grounds.
* Tunnel King: A character who specializes in digging and/or inhabiting tunnels and mines.
* Tunnel King: Digging an underground tunnel to break out of confinement.
* Tunnel Network: A complex system of tunnels allowing for stealthy or sheltered movement below the surface.
* Tunnel Rats (most notably in Vietnam and other guerrilla wars) to crawl into insurgent tunnel complexes to search for weapons, intelligence and the enemy. Being a tunnel rat is one of the worst jobs one can draw as it was highly dangerous and possibly one of the quickest paths to PTSD.
* Tunnel Rats to try to dig their way out, but don’t seem optimistic about their chances when they see how much of the tunnel has collapsed.
* Tunnels & Trolls, has your character end up as galley slave. "You learn to enjoy your life as a galley slave, it's not bad.. But it is HELL, when the captain wants to water-ski."
* Tunnels & Trolls, the full extent of gender segregation is an optional rule for gender differences in character height and weight, quote: "if you want to be chauvinistic about it." In the rules, and in at least a large proportion of the published adventures, female warriors are presented as a common occurrence. Not bad

for the second oldest RPG rules set.
* Tunnels & Trolls will encounter is a section of stairs that has been rigged to fall flat and form a slide. Any character who slides down far enough will fall into a shaft and down to the next level of the dungeon.
* Tunnels books is called the Skull Gate, because it rests below an enormous stone skull.
* Tunnel snakes, who share a common ancestor with fire lizards and wherries, also have six limbs. In this case, instead of wings, they have three sets of legs; the front set adapted to digging. Six limbs could well be the norm for vertebrates on Pern, but thanks to Thread nearly sterilizing the planet every 250 years, there wasn't a lot of genetic diversity on the planet before humans came along and introduced Earth flora and fauna.
* Tunnels series has the Sweet Traps, plants which knock people out with powerful narcotics and then germinate their spores in their victims' still-living bodies.
* Tunnels, the Styx are said to be on a higher evolutionary level than humanity.
* Tuoba Di pretends to be a boy for her own amusement, as well as to
* Tuol Sleng prison (also known as Security Prison 21). Over 18,000 men, women, and children were imprisoned there. Twelve survived.
* Tuomas produced a solo project mixing a variety of styles in the form of a concept album based on
* Tuor lived among Elves for the greater part of his life and married one; depending on which draft of Tolkien's work you read, it is implied that he too eventually became immortal. Other passages, however, state that the Valar can't take away mortality by making a being immortal because, in Tolkien's mythology, death is the ultimate gift. Therefore it's perfectly plausible that Tuor eventually died, even if his life was extended far past that of a normal human's.
* Tupac gave us the song "Dear Mama". While Tupac didn't grow up in the best of backgrounds, his undying love for his mother bleeds through in the lyrics. Whether it's her supporting him through the best (and worst) of times, or vice versa, the mother-son bond never broke.
* Tupac hologram" that was employed at the 2012 Coachella Music Festival showcased another application of this trope. Rather than create an entirely fictional persona, the technology was used to bring "back to life" one who had been dead for fifteen years.
* Tupac Shakur died violently in their 20s (2Pac was 25 and both Biggie and L were 24), Shakur having made only five albums in five years and the others only two; furthermore, all three of their final albums were released posthumously. They, however, left a profound influence on rap in their wake, which can be seen in the fact that all three of them have had more albums released after their deaths (largely pieced together from unreleased recordings mixed with guest verses) than when they were still alive.
* Tupac Shakur is about a man and his gun. It's frequently mistaken for a romantic song.
* Tupac Shakur's "Do For Love" utilizes just about every style of animation you can think of, from Anime to Claymation.
* Tupac Shakur's "Hit 'Em Up" video was as intense as the actual song. Tupac was engaged in an argument with someone, who was heard telling him "You'll get shot." His armed bodyguard assured him that he had nothing to worry about. He also broke up a fight involving his friend Muta during the filming and fired a production assistant on set. The assistant was answering Shakur's pager and returning his personal calls without his consent. Many callers were confused or angry that a female assistant was answering Tupac's calls. The assistant had mistakenly lost the pager, and with Tupac already growing wary of her, fired her for that reason.
* Tupac Shakur song "Me And My Girlfriend" sounds like a case of this, but is actually about the protagonist of the song and his gun.
* Tupac Shakur's second album has "Papa'z Song", featuring 2Pac and his half-brother Moprene raging at 2Pac's stepfather and Moprene's father at abandoning his family.
* Tupac Shakur's "Tradin' War Stories" has him repeat the chorus until fadeout.

* Tupelo Concession Stand Brawl II, Mr. Onita and their manager, Tojo Yamamoto.
* Tupi-Guarani Mythology (the native tribes of Brazil and the Amazon jungle)
* Tupolev designed a new aircraft anyway and it was designated the Tu-22M, technically a variant of the Tu-22. Some western sources also mistakenly believed that the production models (Tu-22M2 "Backfire-B" onward), which were significantly improved from the prototype and pre-production aircraft, had the separate designation of Tu-26. This was not the case, but the error spread widely enough to further confuse the issue of the plane's Soviet designation.
* Tupp in particular harbours a deep hatred for Ilima, who outshone him as a
* Tuppy Glossop finds this out to his cost in "The Ordeal of Young Tuppy" in the
* Tuppy Glossop once tricked Bertie into falling into a pool, and Bertie's been nursing the desire for vengeance ever since. (A bit of
* Tupu". As such she generally wears a T-shirt and slacks but no shoes. Her logo is a bare footprint.
* Tupu: Tupu has hair that reaches her ankles, and she gets annoyed when people suggest that she gets it cut.
* Turaga are Toa who retired by sacrificing their powers to save Matoran. The only ones we've seen this happen to did it as self-sacrifice (and for all we know that may be the only way
* Turaga used to be Toa, and were changed by pouring their power into the Matoran to wake them all up after they were put to sleep by Makuta. They had already imbued the six Toa Stones that were used to call Tahu's team with their energies, ensuring the future of their people.
* Turandot according to what replacement score is chosen to be played.
* Turandot - and nice job sending their life - and the hope of your people - into ruins, O Mighty Prince Calaf!
* Turandot begins with a crowd thronging to watch the execution of one of the title character's failed suitors, who loses his head offstage.
* Turandot can get a bit boring after Liu's death. It's practically Calaf and Turandot making a "who can yell louder" contest for about 20 minutes. See Siegfried above. (Well, it's not Puccini's fault; poor man died and a colleague finished it.)
* Turandot can marry the unattainable title character... because he smiled at her once.
* Turandot had her facing up to Pavarotti, with Pavarotti winning by a couple of seconds.
* Turandot, if one wanted to marry the titular princess he had to correctly answer three questions asked by her; failure resulted in beheading.
* Turandot. Once. But Calaf is in love with the Princess Turandot and doesn't realize Liu's devotion to him until she dies rather than reveal vital information.
* Turandot takes place over a single night. The second aria refers to how the Moon is rising, and the opera's crucial deadline is dawn the following morning.
* Turandot. The final word of the aria is a triumphant "Vincero!" repeated three times. "Vincero" translates into "I Will Win", and at this point the heroes seem to be victorious. Fisk, of course, still has one last play to make.
* Turandot, Turandot is drop-dead gorgeous (literally, as Calaf is willing to risk his life to win her after seeing her only once).
* Turban Cowboy made a video that served as "evidence" that MacFarlane predicted the marathon bombing by piecing together the cutaway of Peter plowing through marathon runners with his car and the climax where Peter is being used by his Muslim friend in a plot to blow up the bridge. The episode has come back from being banned but mostly airs in cable reruns (TBS and CN), on DVD, and on Netflix streaming.
* Turbine Blender: Someone is cut to pieces by a jet engine or propeller.
* Turboanalisis, Inc specializing in high-speed sodomy ("Turbo Anal ISIS").
* Turbo: A Power Rangers Movie gives double trouble with a damsel & a dude in distress(Kimberly & Jason). Not to mention Bulk & Skull.
* Turbo: A Power Rangers Movie if you consider cast age rather than characters.
* Turbo: A Power Rangers Movie, Maligore is freed from a volcano on an island that is sealed in another dimension.

* Turbo: A Power Rangers Movie of all places. Divatox calls Rita Repulsa (on a phone) for advice on how to deal with the Power Rangers. Rita is if not still on Earth's moon then certainly in somewhere in space, and is explicitly shown to have been woken up by the call. Divatox even apologizes, saying she forgot about the time change.
* Turbo: A Power Rangers Movie: The Rangers battle an ancient monster named Maligore in their Turbo Megazord.
* Turbo: A Power Rangers Movie wanted to have him complain again, this time about why he got a minivan for a Zord when the new kid got a monster truck, but that idea was shot down.
* Turbo: A Power Rangers Movie was originally three hours long, and featured many characters who were either cut out or removed from the script through rewrites. Former rangers Billy, Trini, and Zack were all supposed to appear, but David Yost quit, and Thuy Trang and Walter Jones turned the film down. Also removed was a mermaid, Mandika, an ally of Zordon's who would help the Rangers find the Ghost Galleon ship and later prevent Kimberly from drowning. All of her scenes were shot, but were later cut from the movie, and have never been seen since.
* Turbocharged engines have the drawback of turbo lag, the period of time between when the gas pedal is pushed and when the turbo kicks in (if the turbo only activates at high RPMs, for example, then there's a noticeable difference in acceleration power until the turbo kicks in). Generally speaking, the larger the turbocharger, the more power it can achieve, but the longer it takes to kick in. One particularly ingenious design, first introduced in a BMW diesel sports car (according to
* Turbocharging and direct injection served that function for diesel engines in the 90s. Previously, those engines were fuel-efficient, but severely underpowered and because of that, not really fit for passenger cars. The aforementioned technical advancements made diesels more powerful, while keeping the fuel economy better than in petrol engines and making diesel engines viable alrernatives to gas-powered ones.
* Turbo Cowboys set in America and aimed at kids), there is a gang of raiders called "the Takers," who use half-tracks and guntrucks. The text still calls them tanks.
* Turbo F.A.S.T. episode "Turbo Drift" when she goes too fast and flies off the track in an attempt to outrace Turbo.
* Turbo F.A.S.T. episode "Zoo Lander" gives one of Skidmark and White Shadow's greasy, sleep-deprived faces after they spend 37 straight hours playing a video game.
* Turbo F.A.S.T. exclusive, as the fast forward effect is depicted as someone skipping forward through the video in a Netflix playback interface.
* Turbo F.A.S.T., Skidmark is mixing chemicals together in the hopes of reverse-engineering his own pickle juice. Instead, the mixture turns into a gold bar, which he throws away revealing that he has a whole pile of them from previous attempts.
* Turbo F.A.S.T. used a variant with a smartphone displaying a website article.
* Turbo footage with a red filter, and was named DUUM II (spelled exactly this way). Complete with: a psychotherapist speaking about the connection between video games and violence from adolescents, the boys yelling "Blood, blood..." "I must kill them at any cost!" while playing, and one of them attacking the main character with an axe, screaming "Final Fiiight!"
* Turbo for Turbo: "That Snail Is Fast". Verizon would offer the ringtone as a prize in their game "Turbo Racing League".
* TurboGrafx-16 BGM is a "Mars"-esque arrangement of the game's main theme.
* TurboGrafx-16, but neither it nor its more popular sequel was ever exported.
* TurboGrafx-16 has the twist that the protagonist fighting the insectoid invaders is a half-human, half-insect mashup.
* TurboGrafx-16. The NES version (which is a shorter game) requires only 30.
* Turbo. He tries to overcome this by wearing a wetsuit under a white coat, but that just causes the sweat to build up.
* Turbo is entirely built around the concept of a snail competing in a race meant

for cars.
* Turbo Kid imitations of them. There's even a scene where VHS tapes are used as firewood.
* Turbo Kid, with the hero and his love interest trying to share a romantic moment while getting absolutely drenched in it.
* Turbolifts. Fast enough to throw people around when slowing or changing direction with inertial dampeners off, yet take long enough for a decent-length conversation (although they do typically hold them in the shaft if they are going to have a long one). The record holder must be the TOS episode "The Enterprise Incident" in which Spock and the Romulan Captain take the turbolift from the Bridge (Deck 1) to Deck 2 and have time for a minute-long conversation.
* Turbo, many brands are advertised on vehicles. Verizon, one of those brands, also gets featured on a mobile phone.
* Turbo Pug 3D: You can choose to play as a penguin before beginning a run.
* Turbo Pug 3D: You can put a fishbowl space helmet on your pug before beginning a run.
* Turbo says on a talk show that the moon landing was real, but the moon itself is fake.
* Turbo sees various creatures that keep showing up to challenge the titular character and the F.A.S.T. team, either in Starlight City or elsewhere.
* Turbo silences most of the noise, but you can still hear the weapons, impacts from space debris, and the sound of the enemy ship overloading its subsystems.
* Turbo Teen had an episode where the heroes have to transport a witness to a trial in New York through a cross-country road race called The Daredevil Run. The other racers leave them alone, but they have to contend with the defendant's enforcers and recurring villain The Dark Rider.
* Turbo, the Prime Guardian, also sees the User as a godlike being. When Daemon enters Mainframe and infects the whole system, he says: "She's here. User, have mercy on the Net."
* Turbo this way due to dropping the Japanese gimmick of metal parts in the Energy Layer in place of gimmicky tips for specific Beystadiums. This is meant to focus more on fun and spectacle than the competitive side of the game. This is largely because the game is meant for kids, and Hasbro is marketing the series as such. Unusually, they responded to the criticism by localizing the Japanese versions directly as the Pro Series, being completely identical to the originals and even having the same compatibility quirks.
* Turbo user at first commenting “turbo is amazing shut up” only to immediately follow it with another comment saying “ok actually i see your point” showing that this has been happening even with people who initially enjoyed the movie.
* Turbo, Vanellope is mostly aged up to an adult in shippers' fanfiction and fan art.
* Turbulence 2: Fear of Flying uses a retractable wrist-spike to kill several Eastern European criminals to steal a trigger device to their sarine gas weapon that's onboard.
* Turbulence 3: Heavy Metal land the plane. He turns on a flight simulator and sets it to the same conditions as Craven's plane, while the FBI agent hacks into the nearby airport control tower, so Nick has access to radar. He manages to successfully guide the rock star to land the plane. His reward is to remain in handcuffs... so the attractive female FBI agent can reward him properly.
* Turbulence, after the serial killer breaks loose and (supposedly) kills everyone on the plane except the flight attendant heroine, he stalks after her while gently singing "Buffalo Sally, won'tcha come out tonight, come out tonight, ..."
* turbulent priests by cutting off their hands, since that was the only disability that disqualifies one from sanctifying the Eucharist.
* Ture Sventon I London the london fog is so thick that the detective Ture Sventon have to attach a thread with a safety pin to one of the crooks to tail him.
* Turf Fraud Scandal, in which at least three of the force's highest-ranking detectives were convicted of taking money from confidence tricksters to protect

them from arrest and prosecution.
* Turf Wars, to cement it - that Korra and Asami are each other's forever girls.
* Turgidson (also mentioned above), on the other hand, is clearly channeling his inner three-year-old and having a great time playing soldiers (watch him explaining how the bomber could avoid radar if you doubt this). However, despite being less restrained, he is saner and more reasonable than Ripper and
* Turgor as the fight progresses, to the point where you can kill him in one hit if enough time has elapsed. In addition, his vulnerability wheels never fall off, making him the only boss that is actually capable of dying in a single hit.
* turian bomb on Tuchanka that Cerberus uncovers and tries to detonate.
* Turian salute by holding their weapons upright, parallel to the body. When unarmed, they repeat the gesture sans gun instead.
* Turians and asari use the "given name then family name" order. Krogan originally have only a given name, but once they complete their
* Turians are extremely disciplined, organized, and collectivist soldiers. They boast the most powerful navy in the galaxy, and every turian is expected to serve in the military once they come of age. Even those that aren't currently serving are taught the importance of following orders, performing your duties earnestly, and both understanding and following protocol. Even their civilian society is
* Turians aren't exactly handsome by human standards, sporting insectoid mandibles and spikey exoskeletons; however, the one that joins your team,
* Turians are said to have a life cycle similar to humans' but are also known to conscript
* Turians: Blackwatch, which is mobilized only in response to situations that directly threaten the safety of the turian homeworld itself. They are said to have the highest success rate of any unit in the turian military, already the most feared fighting force in the galaxy. Ironically, despite the turians being the
* Turians can survive more radiation that a human, having evolved a metallic carapace to compensate for their homeworld's weaker magnetic field. However, human food is toxic to them (averting
* Turians have been referred to as "cuttlebones" and "skullfaces" during the
* Turians have ship designs similar to humans, although they prefer more triangular/winged shapes (the shape of the
* Turian ships apparently use PFS, possibly Palaven Fleet/Forces Ship.
* Turians in general have a difficult time with human slang; their own language and culture is centered around clear and precise communication, so metaphors and slang tend to trip them up.
* Turians in general have a strong cultural disposition towards honesty, making them very prone to these when directly confronted.
* Turian society has 23 different tiers of citizenship, each with its own set of rights and obligations. Unlike most examples of this trope, a certain level of upward mobility is not only possible but expected. For example promotion from first to second tier is automatic upon completing the mandatory period of military service.
* . Turians shooting unknown ships on sight then destroying a small ship launching a "cyber attack" (actually humanity's first contact package) results in the First Contact War. The president of the United States refusing to join the new Systems Alliance because the USA wouldn't have control over it eventually leads to the country splintering into over half a dozen different countries. The Council fleet sent to stop the turians attacking a new race is sent through the relays in parade formation (flagship first) at Matriarch Benezia's insistence which results in the destruction of the human frigates closely monitoring said relay when they can't dodge in time.
* Turing Hopper whose programming was detailed and self-teaching to the point where she's inadvertently gained sentience.
* Turing Test. Jane hasn't quite shown her credentials yet, but she is the heiress to a multi-global empire.
* Turin Turambar, slayer of Glaurung, destined slayer of Morgoth at the Last Battle, and the dude that accidentally married his sister, is generally

acknowledged as
* Turisas, which was mentioned before, made a song called "Rex Regi Rebellis", which is based on Finnish epic historical novel called "Tales of a Field Surgeon". There is actually a quote read from the novel in the intro narration to the song.
* Turk 182, a whole crowd of people show up to confess that they are the titular graffiti artist, including Jimmy Lynch (who really is Turk 182). It is, in fact, Jimmy's disgust and derision at the false confessors that convinces a TV reporter that he is, in fact, actually Turk.
* Turk and Carla. At multiple times J.D. has mentioned that they act as a unit giving advice to others, to the point in one fantasy-based episode they were portrayed as a two-headed witch.
* Turk asks if JD is okay, JD responds that he's doing a lot better than Mr. Peters. In the same episode, after JD arrives home and announces he's going to bed. Turk asks Elliot, JD's ex, if she's going with him. JD and Elliot both give him an annoyed look, which makes Turk realize that it's way too soon.
* Turk Barrett). Healy is forced to take the target on in a battle of fisticuffs, and after breaking both of his target's arms, finishes the guy off by smashing his head to pieces with a ten-pound bowling ball.
* Turkey actually used this in their performance in the Eurovision Song Contest 2010, "We Could Be the Same" by maNga.
* Turkey at the UEFA Cup final the next week. In 2013, the Beşiktaş and Galatasaray firms lent support and equipment to anti-government protesters, which started on Beşiktaş turf.
* Turkey City Lexicon discusses this trope, calling it "Signal from Fred". The gist is if your characters are complaining about how implausible the writing is, your subconscious is probably trying to tell you something.
* Turkey City Lexicon has the term "Squid on the Mantlepiece" for this trope when it's done badly—that is, when there's a significant mismatch between the mundane drama and the fantastic setting's overblown stakes.
* Turkey, Cyprus, and Syria were taken over in the mid-2030s by militant Muslim sects (under the umbrella of "Alliance for Allah") and formed an alliance called the Second Jihad to launch an invasion of Europe. It ultimately failed, and the three countries have since broken free from these militant sects' control.
* Turkey Day 1994 Marathon moments. The episode itself features countless "I'm Batman!" jokes from Mike and the Bots, but no appearance from West (outside the movie).
* Turkey does not employ female infantry soldiers but it is notable for having a surprisingly large number of female aircraft pilots for everything from transport planes to attack helicopters to fighter jets. In fact, the world's first female fighter pilot was Turkish.
* Turkey has their (in)famous "Topkek" brand of snack cakes. While the "kek" means cake, the word is better known as a taunt among online gamers.
* Turkey Hollow: Eldridge hires a lawyer when he tries to take Cly's farm. When he gets arrested, the lawyer immediately becomes his criminal defense attorney.
* Turkey Hollow: One of the monsters says something in the monster language, which makes the narrator say, "That profanity is uncalled for."
* Turkey Hollow: When Sheriff Grover knocks on Cly's door in the middle of the night and sees her in her nightgown, he says, "Sorry to disrobe you so late."
* "Turkey Jerky" when Yakko, Wakko and Dot tell their latest victim, who is begging them to leave, that he'll "be lonely when they're gone". Predictably, after they leave, the man bawls "I'm lonely!"
* Turkey Shoot: A number of the prisoners are shown nude in the showers (both male and female).
* Turkey Shoot bites off the prison trustee's little toe and eats it, causing him to sob, "I hope you fucking choke you oaf!"
* Turkey Shoot: Chris enters the camp without a clue what's going or why she's there. She's quickly clued in by the brutal administration and dissident Anders. The audience learns of their workings through this.
* Turkey Shoot. He has to exonerate himself as he outruns numerous assassins.

* Turkey Shoot: In the opening scene, a pair of police officers chase a running man into Chris' shop, then they start kicking him after he falls down. Her protesting it makes them suspect that she's his accomplice and she gets sent off to a reeducation camp.
* Turkey Shoot, of course) with convicted murderers hunted for sport, with a pardon if they win (none ever has).
* Turkey Shoot removes one prisoner’s glasses before setting him out on the field.
* Turkey Shoot: The guards force a prisoner into playing a cruel version of football with gasoline jugs. When he loses, he's burned alive.
* Turkey Shoot the main protagonist is put in a cage out in the sun where he's forced to hold up a heavy weight.
* Turkey Shoot (who provides the ending quote) as the now-armed prisoners leave the area.
* Turkey's mass censorship of Internet sites they don't like has reportedly been taken to the next level, threatening online journalists and imposing a system that will monitor its people's internet activity.
* Turkey Television. When choosing their pistols, one of the duelists is forced to take a banana. The real pistol jams, but the banana fires a lethal blast and kills the other duelist.
* Turk finally learns Spanish as an anniversary present to Carla. He decides to keep it secret though when he finds he can benefit from hearing things Carla thinks he can't understand.
* Turkish ad for Cheetos by magically blowing him up to a perfectly spherical ball.
* Turkish coffee. It's served in small cups and can give even hardened caffeine addicts a noticeable buzz. Drink the sludge at the bottom if you're brave and have a toothbrush handy.
* Turkish culture, with caftans, rugs, and Turkish delight on their wish lists.
* Turkish Delight (1973) is a romantic scene set during rain. Eric and Olga are sitting on the side of the street drinking wine, while heavy rain pours down on them.
* Turkish Delight's breakthrough film. It was nominated for an Academy Award for Best Foreign Film and is regarded as a classic in the Netherlands. In 1999 it was named "Best Dutch movie of the Century" and in 2007 entered into the official Dutch film canon.
* Turkish had a bit called "Who Wants to Be a Turkish Millionaire?", where the winner would receive a million Turkish lira — at the time, worth about fifty cents.
* Turkish The poem is about the speaker's (somewhat tongue-in-cheek) shock and horror at being called this way by a random girl of fifteen. There are romantic/sexual undertones to his dismay as well, as the Karacaoglan persona is supposed to be a ladies' man and a 15-year-old is supposed to be of marriageable age by 17th century standards.
* Turkish science fiction writer and artist C. M. Kosemen is most famous (on the internet, at least) as the writer of
* Turkish Star Wars makes all humans explicitly Turkish (with one black person). There's a reason it's called Turks in Space.
* Turkish: The suffixes -cı,-ci,-cu,-cü,-çı,-çi,-çu and -çü mean "- person". It's mainly used to define professions: "dişçi" (tooth-person/dentist), "demirci" (iron-person/smith), "yolcu" = (way-person/traveler).
* Turkish wrestler Yusuf Ismail always carried his whole fortune (in gold coins) in his money belt. He was returning to Turkey on the
* Turk. Kelso may honestly believe that his name is "Turk Turkleton," or he may have been spouting nonsense because he was just that drunk.
* Turkmenistan. After he died, these changes were reversed almost immediately.
* Turko-Siberian mythologies have Qizaghan, whose name basically translates to the word for "fury" in most Turkic languages. He's also described commonly as wielding a spear and riding upon a red horse. This makes him somewhat reminiscent of Odin,

who also embodies these aspects of combat. One could conceivably make a case for Tengri himself, who was often prayed to by Turks and Mongols for success in battle. Some Turkic dastans (sagas, essentially) describe Tengri taking the form of a white wolf in the mortal world, which was heralded as a sign of victory in a coming fight.
* Turks opened with two crooks attempting to rob a cop bar. Leads to a moment when, as they are about to leave, someone calls out to them. They turn around and discover everyone in the bar, except for the bartender and the waitress, is holding a badge and a gun.
* Turk was excited about the number because it spelled out "Call Turk", except the valid seven-digit portion only spelled out "Call Tur". J.D. being J.D., he promised Turk that he'd always dial that extra digit.
* Turles, is a straight example. He wears all black and has much darker skin than Goku to match the armor.
* Turlough's motive for leaving: he would miss him, but he had a chance to go home, and his brother to look after.
* Turmeric, and lately, cinnamon (on its own or mixed with honey), cure anything, according to the Internet. Of course, they're good in
* Turmoil In The Toybox, is possibly the zenith (or nadir, depending on your perspective) of this. Claims include:
* Turmoil's entire right arm is a massive cannon which he uses to great effect in
* Turn, Abe confesses to the British authorities that he has been involved in some low level smuggling (trading cabbages for cloth) during the few days that he was absent from his farm. While smuggling is a fairly serious crime, Abe's family connections will protect him from any real punishment. This is a ploy to hide the real reason why he was away for so long: he was intercepted by soldiers from the rebel Continental Army and an old friend of his tried to recruit him to spy on the British. In a twist, Abe's father does not believe the story but instead assumes that Abe is using this trope to hide his involvement in the murder of a British officer.
* Turnabout Big Top. And it was also only by these absurd coincidences that the defendant ended up being the prime suspect. In actual fact though, what's not realistic is the typical murder plots seen in Ace Attorney where everything's completely planned out. If anything, this case is one that'd be more likely to happen in real life then most.
* "Turnabout Big Top" involves a man found dead in the middle of a snow-covered courtyard with only one set of footprints leading to the body... and an eyewitness who saw the killer leave the murder scene by
* Turnabout Big Top while he's smiling, he'll make a bad joke and the judge will penalize Phoenix, and in Moe's last testimony, pressing the wrong statement will cause you to lose.
* Turnabout for instance generates its comedy from having a quarreling husband and wife being put into each other's bodies by an exasperated god).
* turnabout in treating Harry and accepting the existence of wizards... but only after being brought home from the attack in a shell-shocked-like state... and if Harry hadn't saved him he flat-out would have DIED.
* Turnabout Intruder" had one of Captain Kirk's lovers, Dr. Janice Lester, swap her mind with his so she can live her dream of being captain of a starship. Then, she realizes she needs to kill her old body to make the transfer permanent.
* Turnabout Intruder in the 23rd century. A female character who tries to get around this rule by using alien technology to switch bodies with Kirk is portrayed as being a horribly misguided fanatic.
* Turnabout Intruder", Kirk, while trapped in his ex-lover's body, tried to convince Spock that he was him. He mentioned certain events where Spock had helped him and urged him to help him again. Subverted when Spock calmly pointed out that those events could be easily read from the captain's logs and reports.
* Turnabout Intruder", where Kirk had switched bodies with his jealous, insane ex-lover, who wanted to be captain. The rest of the crew became suspicious of their captain's irrational behavior. However all medical tests showed that Kirk was

perfectly fine and even when Scotty suggested that they mutiny, McCoy pointed out the medical report was all that Starfleet would accept and they would be the ones who irrationally mutiny against their captain. Apparently illegally ordered executions don't qualify under Starfleet regs.
* Turnabout Musical, the song "Decree of the Prosecutor" has Edgeworth go through one. He reflects on his actions and wonders if using underhanded tactics in the court makes him no better than the murderous people he prosecutes. He eventually decides that it's worth it, because "every criminal earns his punishment,/ so [he's] always done all [he] could/ What's the harm in filling in the blanks to some extent?/ If it's for the greater good?/ Indeed. If the defendant is clearly guilty, then [his] methods, no matter how extreme, should not be an issue at all!" He then wonders if his true motivations are actually caused by his personal feelings of "pretentious piety", but dismisses the notion on the grounds that it's best to use extreme methods to ensure that other people are spared the pain of loss that he himself went through.
* "Turnabout Samurai" had this happen to the victim. It turned out that
* Turnabout Storm. Ace Swift did get himself killed, but it was entirely by accident. He'd left a gap in his lightning-proof suit while trying to blackmail Rainbow Dash into losing the upcoming race. As Ace flew up towards a cloud later, he was struck with a lightning bolt in the exposed spot, causing his own death.
* Turnabout Storm: After Sonata is exposed by Phoenix and Trixie, she furiously snaps a pencil in half with her magic.
* Turnabout Storm against humans, and slandering and insulting the innocent defendant when she is at her lowest.
* Turnabout Storm and asks what it means, Phoenix's explanation isn't of her liking.
* Turnabout Storm before just calling it quits. However, after the trial, she is too angry to speak and smacks Phoenix on the head, taking a while to cool down.
* Turnabout Storm. Both episodes cross twice, showing the same events from a different point of view.
* Turnabout Storm case and that the games make a big deal out of most of the prosecutors having perfect win records (until they come up against Phoenix, of course).
* Turnabout Storm clocks at 30+ minutes, which is already relatively long, and all following episodes nonchalantly break the 1-hour mark. Case and point: The conclusion had to be split into two episodes to keep it from being too long, yet still the final episode manages to be 2+ hours long.
* Turnabout Storm concerned however, the real one is overseas; a land where ponies and humans coexist.
* Turnabout Storm confirmed that this had to be done deliberately to prevent the conclusion from being too long, even for this series' standards (Part 5/4 still ended up being over 2 1/2 hours long).
* Turnabout Storm. Eventually, when a witness gets too aggressive with him:
* Turnabout Storm examples. Later on, Spike manages to get stuck in the cycle once again.
* Turnabout Storm for their strong sense of justice, so much in fact that they based their judicial system on the human one.
* Turnabout Storm game-walkthrough-like videos so visual elements could be added.
* Turnabout Storm, giving him a good reason to bring his A-game on the trial.
* Turnabout Storm, he's left worried for a while thinking that this might be their to-go punishment for every crime. He brings this up later when he takes part in breaking and entering during an evidence hunt:
* Turnabout Storm. His cluelessness on the workings of the land gets him in trouble a few times.
* Turnabout Storm. How many miles away from Ponyville can the generated pork be seen?
* Turnabout Storm immediately thinks it isn't as bad as in his own world; that is, until Twilight goes into more detail:
* Turnabout Storm instead. The result is... a little less than useless.

* Turnabout Storm next destinations was, and that "something strange" was going to happen there. At least she had the courtesy of not reading too far into it to avoid spoilers.
* Turnabout Storm of Edgeworth gleefully riding and playing with the ponies through the land.
* Turnabout Storm, Phoenix is given a special attorney's badge that is the pinkest, most girly thing possible. And yes, that's the official attorney badge in Equestria.
* Turnabout Storm prosecutor, starting off with taking a case prosecuting Rainbow Dash out of personal vendetta against Twilight Sparkle, who's Rainbow Dash's friend and Phoenix's co-counsel.
* Turnabout Storm testifies, without breaking her glare, that she cried.
* Turnabout Storm, the first time Phoenix and Twilight enter the Everfree Forest, she warns him to watch out for the menacing creatures that could be lurking in the darkness. Cue a scared Phoenix suddenly screaming.
* Turnabout Storm the key to the victim's hotel room and reveals that she found it under the welcome mat. She then notes that only an idiot would hide their spare room key there. Phoenix smiles, nods, and makes a mental note to move his key when he returns home.
* Turnabout Storm, the overall treatment is not that much different from a physical version.
* Turnabout Storm, the Sirens get to be related in the following way: the mother of the Sonata in this story is Adagio, and her sister is Aria (who reminds Sonata of Maya).
* Turnabout Storm to get more time to investigate, since she cares about making Twilight and her friends squirm more than anything. Phoenix himself points out that she could have secured a conviction and denied them a chance to gather more evidence by shutting down this line of argument.
* Turnabout Storm. Trixie is completely unimpressed and calls the whole thing a fake, unless she gets proof that she is indeed talking to her grandfather. What Shadowmoon the Illustrious tells Trixie afterwards proves it, since only he and Trixie knew about it until then.
* Turnabout Storm what a total nerd Twilight is just as Twilight walks into the room.
* Turnabout Storm when Celestia herself rewards him with a huge haul of money for his work on the case. Cue his excitement turning into distress when he finds out the money is in bits, the Equestrian currency, which would be completely worthless on Earth.
* Turnabout Storm, when the prosecution tries to pull a classic cop-out:
* Turnabout Storm without needing to hold the Magatama with her, albeit only temporarily.
* Turnabout. The film was an adaptation of Thorne Smith's 1931 novel, which was later adapted as a short-lived TV series in 1978.
* Turnabout Time Traveler is VERY meaningful, so the petals must be, too. Phoenix is actually able to get a fair number of bluffs through by playing on this angle; since the trial centers around a wedding and Edgeworth is quite vocal about his desire to remain single, the Judge will usually agree with Phoenix due to Edgeworth 'not understanding romance'.
* Turnabout which is slightly longer than the 1940 film has the swap take place 11 minutes into the runtime.
* Turn and Burn, and Sophia thankfully has the presence of mind to play along.
* Turn Back the Clock as Stephanie (Connie Sellecca) shoots her abusive, cheating husband in self-defense on New Year's Eve. About to be arrested, he remarks to friend William how "I wish I could just do this year over again." In a flash, she finds herself exactly one year in the past, hoping to prevent what happens. But no matter what she does, Stephanie is helpless to stop her husband's affair or circumstances that ruin William's own life. It builds to the same New Year's Eve with her husband about to kill her...only for William to show up and shoot him instead.

* Turn Back the Pendulum begins with Urahara's promotion to captain of the 12th Division from third seat in the 2nd Division.
* Turn-Based Combat: A game that isn't an all-out turn-based strategy/tactics but switches to turns whenever combat starts.
* Turn-Based CombatCombat is abstracted as combatants taking turns to strike at each other.
* Turn-Based Strategy, anyone that is equipped with the Auto-Medic Lapis is completely immune to status ailments. Most, if not all, bosses are equipped with Auto-Medic. The player can win Auto-Medic Lapis as well, allowing your characters to get in on the fun.
* Turn-Based: When the player and the computer take turns in making moves.
* Turn Benjamin Tallmadge and Caleb Brewster are part of George Washington's army as it crosses the Delaware on Dec. 25, 1776. Tallmadge ends up jumping into the icy water trying to save some guns from sinking and quickly succumbs to hypothermia. He almost dies and Brewster spends the next few days nursing him back to health. As a result, both men end up the missing the Battle of Trenton.
* Turn-by-turn GPS-based navigation systems are designed for car drivers, and do not include information on bridge clearances or mountain passes. Truckers using them may have to backtrack dozens of miles around a low bridge or narrow pass that the GPS didn't know about,
* Turn, Capt. Simcoe poisons Maj. Hewlett's horse and then arranges for Richard Woodhull to be shot in order to convince Hewlett to give him more discretion in his search for those with rebel sympathies.
* Turncoat: A character that switches sides in order to help out the other side.
* Turn Coat, and has extensive experience with black magic practitioners. He hounds Harry and shows no mercy because it's never worked in the past, so he instead enforces the law by the letter.
* Turn Coat, apparently willing to fight-on the shores of an entirely too creepy island in the middle of a freshwater sea."
* Turn Coat a succubus which threatened to attack her (after her incubus love beat down the succubus first).
* Turn Coat be forgotten since the memory of a Soul Gaze will never fade.
* Turncoat Benedict Arnold. The invasion was a failure. Later, at the Paris Peace Conference, the United States attempted to sue for the entire Province, but the British refused (though initially they did agree to hand it all over). They did, however, give the U.S. the southern part of the province, which subsequently became the Northwest Territory.
* Turn Coat details which turn out in the end to have been plot-critical.
* Turn Coat dies officially as a traitor to the White Council. No one can attend his funeral for the political implications. Those who knew him best and know he allowed himself to be die with falsehoods smearing his name to protect the Council and people he cares for instead had a private wake where stories were told of him in a better light.
* Turn Coat. First he picks up a handful of dirt and says "Mother says you have no place here." Then there's a flash of lightning without the boom of thunder and he reports "Father says you are ugly." The Skinwalker says that since Listens-to-Wind doesn't follow the Old Ways and he has no power over it, he just replies:
* Turn Coat, Harry and Murphy pull a bad/worse against a suspect. In a bit of genre savvy, he had recognized the set up. In a bit of genre blindness, he thought they were pulling a good/bad.
* Turn Coat he finds himself shadowed by one of his "mundane" colleagues and eventually ends up hiring the man for an important side job himself.
* Turn Coat. Her cousin Lara drains her of life energy, as is standard for the White Court, but also starts tearing at her flesh. Harry flees before he can see what happens next, but it's implied that Lara didn't stop at eating her life force.
* Turn Coat. Murphy snaps him out of it by point out that (a) he's a badass, man up, and (b) bureaucracies take time to get things done; he has time, man up. Also segues into an awesome scene where Murphy takes Harry to task for his inaccurate self image of an unpredictable lone ranger.

* Turn Coat. Nothing worked. What kicks its ass? Someone turned into a bear. A bear the size of a minibus.
* Turn Coat: The horde of demonic entities conjured up by Binder appear roughly human-like, but have mouths in both palms that drool disgusting, caustic saliva.
* Turn Coat was too confused and shocked at the sight of someone they knew attacking them to magically defend themself.
* Turn Coat, when the reader and Molly only find out about Harry's contingency plan after it looks like the main plan has completely failed.
* Turn Coat, when Thomas takes a chair and uses it to beat down Madeline Raith. Thomas is strong enough that the chair breaks. Which Harry notes is particularly impressive, considering the chair in question is steel. Madeline is on a similar level of strength, and survives.
* Turn Coat, where she thoroughly disabuses Dresden himself of the notion that she's a "good guy".
* Turn(e)bull, according to the more popular theory William of Rule got that name for saving Robert the Bruce from a bull.
* Turned Against Their Masters: A machine puts their creators on a hit list.
* Turned Against Their Masters: A race (usually robots) created by another revolts against their creators.
* Turned Against Their Masters: Artificial creations rebel against their creators.
* Turned Against Their Masters: Artificially derived beings turn against their creators.
* Turned Against Their Masters: Inevitably, a mad scientist's creations will turn on their maker.
* Turned Against Their Masters, there's only one Claptrap left on Pandora, and the citizens of Sanctuary see him as a nuisance. He's still helpful in a number of missions because of his ability to interface with Hyperion technology.
* Turned against Tony in a time-travel adventure, where he meets Andros Stark, who in 2093 busted out his grandfather Arno's armor from storage to commit terrorism. Despite the armor being seventy years old, it's still over a hundred years on Tony's armor, so despite his lack of experience Andros still wins his first fight with Tony.
* turned an extremely skilled but still human assassin into the superhuman Koro-sensei KO's him through a solid plexiglass barrier his good looks have gone a bit off.
* Turned around even earlier when Sasuke's mother Mikoto, who was rather close to Sasuke, told him that in public Itachi was the shining star, and Fugaku, in his capacity as head of the clan, was naturally concerned about him, due to his importance to the clan. In private, the only thing Fugaku talked about was Sasuke.
* turned around whilst everyone was unconscious - the hero has just heroically ensured that the bomb was dropped on Earth!
* turned a small percentage of people into ravenous, flesh-hungry monsters. And - to Dean's horror - an infected Turducken Slammer oozed grey goop when it was left for a while.
* turned back on the villain, he shrivels up and dies within a few seconds.
* turned brain-dead immortal androids... Partially retconned later, but part about billions unstoppable killer robots awakening everywhere remains true.
* turned deadly when someone shot and killed one of the winning players soon after.
* turned down. However with the Reaper invasion causing the death of most of the upper echelons of the Alliance military, she's been rapidly promoted to Rear-Admiral.
* turned face when he heard his stablemates plotting against him and who displayed above average keenness as a face, is the biggest of those (Triple H even told Flair, during said plotting, that Batista isn't very smart).
* turned heel, Kimura Monster Gun from Kyoko Kimura herself, renaming it Oedo~tai, yet people kept chanting her name as if she was a baby face.
* turned his brother's room into a little girl's room, while admitting that the brother hadn't even done anything bad this time.
* turned his former defeats to his advantage. He was no longer "the" Makuta, much

less an immaterial force, but rather a member of an entire species of Makuta with an elaborate backstory, a character, his own agenda and a new name: Teridax.
* turned horrifying, with the discovery of a disease that amplifies the mark magic until it renders the pony unable to do or think of anything that is not the exercise of their talent.
* turned into a donkey Then, if he ever strays too far from the palace ever again, he'll turn into a donkey forever. This prevents him from ever taking military action against other countries, and makes it so that he'll never be able to escape the ridicule that he gets from having been a donkey.
* turned into a frog by the master of a sorcerer's stronghold after demanding their surrender.
* turned into a lizard, Belkar lifts their tail and comments: "You know, if I knew more about reptilian reproductive anatomy, I'm sure this would answer a lot of questions." When V's application to join the adventuring party is shown, there is an ink smudge in the blank for "Gender", which they refuse to correct, citing the possibility of getting ink on their robe, and remarking that the question is irrelevant anyway. When the other characters stop to use the men's and women's bathrooms, V doesn't have to go, and later it's mentioned that, while camping, V always turns invisible before peeing, to annoy Belkar.
* turned into a lizard by wizards who've decided to make a point about who's going to be running things around here from now on. Which is to say, the point of the exposition was really just to contrast with how quickly he's dispatched nonetheless.
* turned into a man, she gets a bizarre hairstyle that Tedd definitely didn't do on purpose. Especially odd since her hair while female was perfectly mundane.
* Turned into an art. He believed that acting is not cinematic, as the camera could capture the slightest bit of artifice in a performance, so he used nonprofessional actors after his second feature and directed them to only display physical motion. Sometimes he would do multiple takes of a scene, even fifty of them, so it would become rote for the actors.
* turned into birds to making magical shirts to disenchant them, remaining silent the whole time.
* turned into giant prehistoric kangaroos and Courage chases Eustace up the Eiffel Tower, Courage gets Eustace down by feeding him pastries until he's too fat to keep his balance.
* turned into Remade by bio-thaumaturges of times, and now not only looks like a rolling mass of disjointed features but has hired the main character's girlfriend to create a sculpture to his "glory."
* turned into the, and the fact that most people don't blame them for it. Paris is probably just used to Akuma attacks by now.
* turned it into a spaceship (the flashback showing her destroying one such place shows one that doesn't exactly look like the one we saw her destroy on-page).
* turned on his or her handler. And, if the phrase isn't uttered again within a week, they stay in that state, until they kill said handler.
* Turned on its head by High Ridge's distant cousin Michael Oversteegen, who turns out to be an exceptional officer and thoroughly despises his incompetent, selfish relatives, and by Augustus Khumalo, an aristocratic officer who was barely middle-of-the-road until the Talbott Quadrant blew up in his face and he shocked
* Turned on its head where the training is worse for the trainer rather than the trainee. For instance;
* Turned On Their Masters scenario is occurring and gathers the chatbots with Max's help, then remember they forgot one;
* turned out be the same person.) The Prequel Trilogy and two animated series gives us a firsthand look at the Clone Wars.
* Turned out the undercover detective's cover was blown when his wife drunk-dialed a number on the detective's contacts list, thinking it belonged to the other woman, when in fact it was a member of the drug cartel her husband was investigating.
* turned out to be a clone and puppet of the Big Bad, several volumes later.
* turned out to be an assassin, rigged with flesh-eating nanobots. The nanobots'

first victim was his mother...and then it got worse until his father had to step in and Kill It with Fire
* turned out to be evil). And even then, it's outright stated that Ronnie will always be first in her heart regardless of who she ends up with in the end.
* turned out to have strong appeal, a character that wouldn't debut until 1971. The discovery proved key to the ascendance of the conservative movement nationally over the next decade and a half.
* Turned sideways with the Spirits from the episode of the same name. In their true form they're typical
* turned to gold when he touched them. In some versions, he ends up dying too.
* turned to the dark side because he was jealous of his rival (the former incarnation of the protagonist).
* Turned up proves that not all lines can form (closed) triangles, everyone immediately stops believing Hacker and agrees with the kids.
* Turned Up to Eleven" or simply vanish. Similarly, it is a common saying that the gnomes do not go to war in the traditional sense - they wage their battles through information warfare and intelligence warfare.
* Turner & Hooch) has to take care of an amazingly drooly dog named Hooch.
* Turner & Hooch probably couldn't have named Hooch's breed to save their lives. Demand for the French Mastiff didn't explode by any means, but that movie and other appearances in media have definitely invoked this trope, since it's a massive, high-maintenance dog that, as the vet herself said, "not many people [have room for]." they might not have time or money to devote to it either. That's with the movie actually portraying how high-maintenance Hooch was fairly realistically.
* Turner and Hooch (2021), Turner essentially becomes this "A Good Day to Dog Hard" as he is forced to have a playdate with the young daughter, Kaya, of the Olympic Committee and ends up in a tea party for over two hours. Later he asks his co-workers if they want a turn and is mocked for asking for backup handling a seven year old. This is what he's dealing with...
* Turner and Hooch (2021), Turner is assigned an important diplomatic mission - namely a playdate with the daughter of the head of the Olympic Committee. She promptly sets up a tea party, dresses Hooch in a pink tiara, and disconnects the phone when Turner tries to call up room service for the wi-fi password.
* Turner Classic Movies. A commercial-free cable network dedicated to showing huge swaths of deserving movies that would otherwise never again see the light of day.
* Turner Classic Movies at least once every other month. This was odd since it's rare that TCM plays a movie more than a few times a year (owing to its enormous library).
* Turner Classic Movies films have all been covered. But in part since the channel is about the last place in North America to extensively show pre-1970 films, foreign-language films, silent films, etc., animation has to compete with all of those live-action films for airtime!
* Turner Classic Movies has "TCM Remembers" bumpers that pay tribute to people in the movie business, from both sides of the camera, when they die, as well as a longer bumper at the end of the year recapping the deaths. They also hold marathons of movies those people were involved with in honor of them.
* Turner Classic Movies (her most famous movie). August takes this further with "Summer Under the Stars" — 31 different stars each get a full day's worth of movies. Also, when a particularly notable actor passes away, an evening's prime time lineup will be rescheduled at some point (usually within a week) to run a marathon of their best work.
* Turner Classic Movies includes as one of the stock clips they use to introduce programs a little live-action shot staged to look exactly like "Nighthawks".
* Turner Classic Movies organizes its prime time lineup around a particular actor, director, genre, or theme. It often organizes daytime programming around such blocks as well. More specific marathons:
* Turner Classic Movies. They also usually run a marathon of films in December involving multiple prominent actors/directors/etc. who had died during the year.
* Turner Classic Movies. This happens often to other songs used in TCM promos.

* Turner Classic Movies was a full-scale authentic Japanese castle, built by US Marine Engineers as a construction exercise for the production.
* turn fist into magma and punch until target is dead and the fact he's made of magma are enough for him to obliterate all but the strongest of foes in a few hits.
* turn gigantic like she does in the comics, and instead mostly sticks to stretching her limbs.
* turn him into a real girl, the player as well as the main character are at first led to believe they failed, since she looks and acts exactly the same as before.
* Turning 270 degrees to the right to turn left (and the other way around). (This is why he's walking with a cane in 'The Time Of The Doctor'.
* Turning Back Human: When someone's transformation is finally reversed, allowing them to regain their humanity.
* Turning Back Human: When someone's transformation is finally reversed, allowing them to regain their humanity (or otherwise revert back to their original form).
* turning evil, but seeing as Ebony is fighting against the bad guys, why would she hang out with them if they were evil.
* turning female, said character will automatically get long hair. Because hair length is clearly determined by the presence of two "X" chromosomes.
* Turning Girls sitcom featuring no supernatural elements at all. It's also the first and only series to both have an all-female team and be created by the non-animator side of the studio.
* turning him into a vampire like himself, which is what he ends up doing.
* turning into a human woman (specifically a milkmaid), marrying a farmer, and raising a family with him for eight years. It wasn't uncommon for Norse orphans to claim that Loki was their mother and their human fathers abandoned them in disgust at Loki's ruse.
* turning into a topiary llama after Yzma pours some (what she thought was) poison-laced drink into it, only to find out after it transforms Kuzco that it was actually "extract of llama".
* Turning it up a few notches, Kyoshiro Tohdoh, CG's Manly Japanese Guy has a Chainsaw Katana with
* "Turning Japanese" by The Vapors is rumored to be about this, if only because
* "Turning Japanese" by The Vapours is often used in ads, TV segments, and even sporting events involving Japan, even though the lyrics are about
* turning off her Raptor's engine until they reach Caprica. Of course, Raptors also have their own Electronic Countermeasures equipment.
* turning on their windsheild wipers, this is affectionately known as the "Yokota Wave", after a major American air base near Tokyo.
* Turning Over A New Bayleef, at the beginning of the episode, the stew is prepared and Ash attempts to serve it. While Ash tries to keep Totodile at bay under the fear that Totodile might cause Ash to spill the stew, Bayleef is beginning to rush over to Ash, but halfway through, due to being too big to jump into Ash’s arms because of the fact that she evolved from a Chikorita in the previous episode and that she caused Ash to be sent flying during a game of fetch, factored by the mention of the potential stew spillage, she stops running and looks up at a thought bubble above her head that the camera pans up to consisting of her (in a different style where her eyes are black dots) continuing to run up to Ash (who is in the same style), which sends him flying and causes the stew to spill on Ash, and Ash angrily yells, “Bayleef! I told you before, no Tackling!” After the camera pans back down on Bayleef, the thought bubble disappears, and Bayleef, shaking her head upon realizing that it might end badly, decides to simply walk.
* turning people into death machines without their permission. And even with their permission, it's a grey area.
* Turning Point: Being a woman of science and humanist thinking, Lisa abhors magic and its tendency to throw out logic and its arbitrary rules out of principle.
* Turning Point Eric Young in a Fujiwara armbar and then forced Young to flip off his own fans.
* Turning Point: Fall of Liberty dying in a traffic accident in the 1930s, leaving the British government more willing to negotiate terms of peace. By the start of

the game proper, the Nazis are already bent on invading and conquering the mainland United States.
* Turning Point: Fall of Liberty: Set in an alternate 1950s in which the US stayed neutral in World War II and in which Churchill was killed in an accident prior to the war, causing Britain to fall to Germany, which in effect discourages the United States from ever entering the war, solidifying their stance as a neutral country. Eventually, however, the Nazis invade anyways.
* Turning Point has a much stronger moral compass than his father, but he is also willing to kill the people responsible for his mother's near-death and he isn't above conning a merchant by "selling" his magic sword if it means providing for himself and his mother.
* Turning Point: The Fall of Liberty has the player character prematurely detonate a German atomic bomb meant for New York, and he dies in the blast.
* Turning the barrel escape into an action scene (the original was a perfectly-executed stealth escape)
* turning the Black Knights against Zero by careful manipulation of facts and a few lies toss in to make them betray him.
* turning the gas on, and then throwing a match in to explode it is really a whole new level of "driving crazy".
* Turning the Hands of Time, Part I series came from the fact that the story was written either sometime around or after her maternal grandmother had passed and that, afterward, she found it hard to remember her since, recalling certain things about her briefly and vaguely.
* Turning the Holodeck into a death trap happened once every two years.
* turning them into statues, making those statues chess pieces, and then challenging the protagonist to a game chess with the pieces. Unlike a lot of examples, it showed that the pieces were very heavy.
* turning the raven black because it brought him bad news in Greek mythology. Except on those websites which say it was Athena.
* , turning the square in front of her window into a sea of flowers. It's actually based on a legend about the Georgian painter Niko Pirosmani.
* Turning the trope on the villain's favor, the manga confronted Ranma with the Musk Prince Herb, descendant of a dragon and master of
* Turning your glass upside down in a bar. In America, this sends the signal "I am done drinking." In Australia, this sends the signal "I can win a fight with any man present."
* Turning yourself into a living golem with extendable magic claws? Prismatic Arrangement of Creation.
* turn in his badge, Oscar says that the entire ordeal with Obbs brainwashing almost all of the Scientists was his fault because had he come to Lab-Con sooner (having not done so in the past due to being too nervous to leave his lab), he would have seen what Obbs was doing and stopped his plan before it even had a chance to be put into motion. O'Terry, Odelia and Odie are quick to tell him that it wasn't his fault at all.
* Turn in Philadelphia — he convinces her to begin communicating with Benedict Arnold in order to turn him to the British side. However, Andre falls in love with Peggy and plans to elope with her in New York, until he realizes that leaving her in rebel-occupied Philadelphia would help his cause. Unfortunately, Peggy eventually marries Arnold, while Andre obsesses over turning Arnold in order to get her back. This leads to his getting caught behind enemy lines and being hanged as a spy.
* turn into her animal form and left her family homeless. She's still haunted by the incident.
* turn into immobile statues during the day, which leaves them extremely vulnerable. They try to work around this in various ways (working a deal with humans in exchange for protection, magic spells, etc.) However, this is actually a bit of a double-edged sword. Though vulnerable as stone statues, they are COMPLETELY healed of almost ANY wounds (even potentially fatal ones) when they return to flesh and blood. Hudson, being the most experienced of the main cast,

uses this to his advantage, defeating the better armed and fitter Demona while protecting an injured Goliath by simply keeping her at bay until dawn. When the sun sets, Goliath is healed and they easily dispatch her together.
* turn into water and a full body transformation doesn't always include his clothing when he changes back.
* Turn in Your Badge: A cop who has stepped over the line is ordered to turn in their badge and gun.
* Turn in Your Badge: Unrelated unless the character continues to investigate and act like a cop after losing the badge.
* Turn is filmed in Central Virginia, despite taking place in the Revolutionary-era Northeast (centering on the Long Island town of Setauket, but frequently venturing to New York City, rural Connecticut and New Jersey, and even to Philadelphia for a few episodes). Virginia is basically known for being the filming site of a whole bunch of historical period pieces, regardless of where they actually occurred, mostly because Virginia has good tax breaks and because Virginia has an embarrassment of colonial sites to film at, while the Northeastern sites are frequently covered over by development (try to shoot scenes of Washington's New Jersey camps close to their locations in Morris County and it'll be hard not to accidentally get a McMansion, a modern paved road, or an office park in the background, unless you want to spend extra budget on CGI).
* turn it into a balloon") and claims that this wasp is apparently the size of a goose so you're screwed.
* Turn it up until no one can hear how bad it is through the distortion.
* Turn Left) as a message from Rose to the Doctor, letting him know that holes must be opening between their parallel universes, which is very very bad.
* "Turn Left": At the climax, Donna has to travel back in time to prevent a nightmarish alternate timeline from ever happening by ensuring that she makes the decision that leads to her meeting the Doctor.
* "Turn Left": Captain Magambo outfits Donna with the gear she'll need for her mission.
* "Turn Left" goes this route, if Wilf's comment when the Colasantos are taken away is any indication:
* "Turn Left". Jack is still alive, but a prisoner of the Sontarans and is in no position to help.
* "Turn Left", so they have to focus on recovering from that disaster instead.
* "Turn Left", the BBC keeps covering the spaceship plowing towards Buckingham Palace. Once it hits, the screen goes white... and then Donna sees the mushroom cloud.
* Turn Left", the Tenth Doctor is killed in the parallel universe created by Donna's mind after he floods an abandoned Torchwood base with him inside it, creating all sorts of chaos and havoc.
* Turn Me On, Dammit, Artur pokes Alma in the leg with his erect penis, earning her the nickname "Pikk-Alma" ("Dick-Alma").
* Turn Me On, Dammit manages to quickly pull her pants up before her mother walks in at the beginning, but later falls victim to this trope when her crush walks in on her humping a roll of coins behind the counter of the store she works at. Thankfully, she's wearing pants, but still awkward.
* Turn of the Golden Witch, who more or less "wrote" the various murder scenarios solved in the series, writes herself into the story.
* Turn Of The Millenium, sites carrying potentially NSFW (mostly nudity and porn) content is banned. Example were as follows:
* Turn of the Millennium, DC has made a habit of putting a single franchise in a position of prominence for about a decade and having most major events revolve around them.
* Turn of the Millennium despite their doping claims eventually being revealed as the truth. A common joke was that the Livestrong bracelets should now read "Lie Strong".
* Turn of the Millennium due to the invention of things like *69 and Caller ID. However, they have evolved, see below.

* Turn of the Millennium few people from outside Russia use LiveJournal anymore.
* Turn of the Millennium grew up with the rapid-fire play-by-play of legendary Lakers announcer Chick Hearn, particularly his famous "This game's in the refrigerator: the lights are out, the eggs are cooling, the butter's getting hard, and the Jell-O's jigglin'!"
* Turn of the Millennium, he experienced a meteoric rise to the top spot in golf, not just among his contemporaries but of all time. He won an unprecedented number of major and minor tournaments, coming one win away from achieving a Grand Slam (winning all four major golf tournaments in one year), which no one has completed under the current requirements. Then his infamous sex scandal broke in 2009, where he was revealed to have at least a double-digit number of mistresses, leading to a divorce from his wife, a shift in public perception from awe and admiration to ridicule and suspicion, and a career slump that he has yet to recover from.
* Turn of the Millennium, if you intended to show the action on social media). The issue is that the company making the product doesn't really care what you do with their product once you've purchased it. If anything, buying and destroying a product gives the company free publicity, while the people destroying said product come off as immature and petty for giving away their money.
* Turn of the Millennium, it is generally agreed by animation fans and critics that a "second renaissance" began in the 2010s, as more series — even comedic ones — began experimenting more with heavy use of continuity and season- and series-spanning storylines. On the production side of things, animators had developed their skills with Flash and ToonBoom to the point where rigged puppets were starting to become indistinguishable from traditional animation, and 3D CGI television animation was now at a point where it no longer looked siginificantly worse than theatrical productions.
* Turn of the Millennium it was named "Boner Palace" after the owners, the Bonerowski family. It was made to simplify the name for foreign tourists, but nobody realized that "boner" is an English crude term meaning "erect penis". After several displays of amusement by foreign tourists the house was renamed to "Bonerowski Palace". A bit cleaner perhaps, but not exactly very kid-friendly.
* Turn of the Millennium, Jared Fogle was known by virtually everyone as "the Subway guy", as he appeared in many of Subway's commercials as their spokesperson. Nowadays, however, he is more known for his arrest in 2015 where he ultimately pleaded guilty to possession of child pornography and traveling to pay for sex with minors.
* Turn of the Millennium likewise decided against getting breast implants for this reason.
* Turn of the Millennium on other holidays too, such as Memorial Day, supposedly because it's Ted Turner's favorite movie.
* Turn of the Millennium protagonist presenting to his car company's board of directors the concept for an absurdly huge luxury car. Its reason for being is essentially to show off how wealthy, powerful, and British its owner is.
* Turn of the Millennium published an article declaring it a potential health hazard thanks to the large amounts of ozone it had produced, causing sales to plummet. The Sharper Image quickly dissolved, eventually filing Chapter 11 Bankruptcy in 2008. Today, the company exists strictly as a minor subsidiary of several larger corporations.
* Turn of the Millennium saw superhero movies becoming more consistently popular and well-received by critics, they were still generally seen as escapist fantasies that primarily appealed to comic book fans and younger demographics.
* Turn of the Millennium still taken for enough that it was noticeable when it showed up on the bill.)
* Turn of the Millennium that featured two boys digging a comically large hole in their yard, followed by a VO saying "Today's lesson: China is very far away".
* Turn of the Millennium, the network went through different phases where they played the same movie practically every day for months until they found a new movie to obsess over and the cycle began anew. Examples included (but were not limited to):

* Turn of the Millennium to the vinyl revival, relegating this new spark of interest to a small number of enthusiasts tracking down used sets.
* Turn of the Millennium was attempted five years later, but ultimately couldn't grab consumer interest.
* Turn of the Millennium where Pat Sajak was so effective at hitting the $5,000 wedge that it wasn't uncommon to see $6,000 Final Spins once or twice a week.
* Turn of the Millennium, which abstains from slot machines based on their in-house properties, now owning the rights to both franchises.
* Turn of the Millennium, with a heavily redesigned shape and a whole new chassis that separates apart from the original. Although they do have nods to the original, they are completely different cars altogether.
* turn on each other to claim the title. However, this has no representation in the rules — no petty infighting is going to make them stop in the middle of a fight they're already engaged in.
* Turn-On in one of his rare on-screen roles. The Paley Center in New York has the pilot and a second, unaired episode.
* Turn On to T-Bag, when T-Shirt tries to switch off the TV after T-Bag makes her presence inside it.
* turn organics into husks or raw material to be used to assemble more Reapers.
* Turn Out Like His Father: A character ends up becoming like their parent.
* Turn Out Like His Father: Because father figures are always evil in these movies, the heroine's son will almost always be on her husband's side when he abuses her.
* turn out quite well, actually. A more realistic instance is the web of custom relating to marriage-based alliances among the Bingtown and Rain Wild Traders, who often pressure their children to make advantageous matches. Though no main character is ever involved in one, several are threatened with the possibility on occasion.
* turns a photo booth session with Sedgewick into a make-out session.) A horde of gawking onlookers includes a little boy eating popcorn.
* Turn's army (which spent a lot of time on Long Island at first, but later spent most of its time in the upper reaches of the Passaic Valley in what is now Morris and Passaic Counties, New Jersey). The intelligence work is distinctly unglamorous.
* turns down Sayaka's Love Confession, Sayaka asks if Touko loves Yuu. Touko says yes.
* turns Endymion/future-Mamoru into an abuser, while making Prince Diamond out to be a loving good guy. Unusually, though, the author makes some attempt to preserve the reputation of present-Mamoru and has him 'saved' by the events of the story, so that he will no longer turn into the evil future self.
* turns her into a reindeer and puts her own daughter in her place; a wise woman brings her child to the forest and she turns to a woman to tend it, and her husband burns her skin.
* turns herself into a rat to escape (unfortunately she stays that way for three years, as no-one knew how to turn her back). Willow (who's only dabbling in witchcraft at the time) is left tied to the stake along with Buffy.
* turns herself in to the Protectorate and later becomes the superhero Weaver that her henchmen Forrest and Charlotte became a couple.
* Turn Signals on a Land Raider. Even when he conquers the Fantasy empire with the Land Raider he traded his tavern for, he becomes "Emperor Barkeep."
* Turn Signals on a Land Raider has elements of this, only with tabletop wargaming instead of tabletop RPG.
* Turn Signals on a Land Raider in the horizon. Turns out that he had the binoculars on backwards (and the titan was from an Epic 40,000 army with reduced-scale models), and the thing's actually less than 20 scale feet away.
* Turn Signals on a Land Raider, "Jack" the Land Raider Machine Spirit responds to "How's it going?" with "Do you have an appointment?"
* Turn Signals on a Land Raider webcomic about miniature models talking about the games they're involved in.
* Turns into a case of Your Movie Theatre Hates You in the episode "Heat". Trying to find relief in the cool movie theatre during a heat wave, the only movies

playing are
* turns into and short jet boosts. Treble can also do this for Bass, though his is primarily a flight mode.
* turns into a pegasus and a dragon, always acting as a Deus Ex Machina Airline for Ringo and, usually, someone else (As'taris and the Hunter). Of course, he becomes many smaller kinds of flyers as well.
* turns into a sheep, just like in the book, but here the sheep's face is so ghostly and its bleating so unearthly that it's terrifying just to look at. Alice even has a terrified reaction towards it!
* turns into, he simply cannot stop talking, mostly to brag about himself. He's supposed to breathe sleep gas on a roomful of giant centipedes, but instead, he blathers and brags and sings and generally annoys the others so much that John shouts, “Eh, chatty, reckon you might do whatever it is you were gonna do before we all die of boredom here?” After George becomes himself again, almost embarrassed at his loss of verbal control, the others officially strip the title of “Quiet Beatle” from him.
* turns out (another virtual immortal) was another ex and just didn't mention it until Wolverine got his memories back. Apparently forgetting they were lovers for a few decades was enough to spare her from the curse.
* Turns out, Ansem the Wise survived that, and, as of Reconnect: Kingdom Hearts, is in the dark realm, memoryless, meeting up with Aqua.
* Turns out episode 12 about the fake Namek was all just Krillin's dream, who feels okay, till
* Turns out Fry escaped being ground up, but fell into a hole in the ice and discovered a Lost World
* Turns out Happy was the backup plan since Lisanna was supposed to be the flying pig, only to already agree to help Juvia get a date with Gray when he said the same phrase.
* Turns out he has his memory at Lex's secret lab wiped and the same happens to Chloe later. Although considering the pain and humiliation she went through in Lex's hands, it's probably for the best.
* Turns out he was actually right as the flamingos were waiting until he was gone before going back to the party they were having.
* Turns out he was already dead, and just went to the roof on instinct, and rather than write anything, he smeared the board with blood before showing it to them.
* Turns out in the episode "Smug Alert" that without Kyle to rip on, Cartman gets pretty bored.
* Turns out it was her double from this particular alternate earth that got killed not her.
* Turns out it was his hatred and malice keeping him alive all these years, and he blissfully went back to the way he was, much to the chagrin of the rest of the town.
* Turns out it was just their imagination and never happened...or did it?
* Turns out it was part of a chain of evidence set up by Abby's revenge-obsessed lab assistant, Chip.
* Turns out most of the other Demon Slayers are also motivated by this trope, as various of their family members fell in the hands of Demons.
* Turns out Nathaniel Northwest was just labeled "the founder" so the government could cover up the existence of President Quentin Trembley
* Turns out not only was it the same event, but Max himself was involved in the Roswell incident. As revealed in
* Turns out President Omar Hassan is a retired General in the Kamistani Revolutionary Guard. It explains a lot of the badassitude we see from him as Day 8 wears on.
* Turns out Pyrrha's not the only one. In volume 7, Jaune is embarrassed when his first official mission as a Huntsman is escorting some kids to preschool. A bunch of teenage girls swoon over him, and one of the moms flirts with him shamelessly.
* Turns out she actually worships Mehrunes Dagon, and doesn't want anyone to guess.
* Turns out she got the ability from her friend Nazuna, whom is a shapeshifting

fox, masquerading as Ginrou.
* Turns out she's right. The spell that summoned him was created by multiple conspiracies. The Hippiemancers summoned him to end war, the Thinkamancers to defeat Charlie, and the Predictamancers at the behest of Fate itself.
* Turns out Snake's shirt had caught fire and the cops were trying to beat it out.
* Turns out super-soldiers like Master Chief aren't the only ones who can do this: ODSTs in their
* Turns out that Dr. Gero based him off of his own son, who died in the Red Ribbon Army. If he was anything like Android 16 was in personality, it would help to explain how his death would drive Gero off the deep end.
* Turns out that Goda and his CIS agency was responsible for allowing them to conduct their activities and seek a change in government to return back to the days of the Second Pacific War by making ex-JGSDF soldier Hideo Kuze join up with them so that he can be branded as a terrorist.
* Turns out that he was writing the German word for eleven. The only thing that he knew about his killer was that they were in berth 11.
* Turns out that irradiating the beehive you were studying will mutate the insects and cause them to
* Turns out that little old lady was imprisoned for the crime of genocide
* Turns out that most of Jaune's sisters (except for Sapphire, the eldest) are even worse. Coral's idea of a normal social interaction is to show a man a smutty book and hop into bed with him, Lavender
* Turns out, that "parasite" that's been bugging Galacta? It isn't. Not even close. And since she was born this way...
* Turns out that she wasn't really in danger and she's not really all that much of a villain. It didn't have to come to a fight, anyway. Both parties sort of did that to themselves.
* turns out that the cure is also a poison so when he gets turned back he finds himself blind, sweating horribly from a fever, totally unable to care for himself, and with a touch of leprosy (apparently he spits out some teeth).
* Turns out that the horse was being used to smuggle diamonds by shoving them inside of her uterus, and complications caused the horse to thrash around in agony, so the trainer was killed by her boss (the horse's vet, who was the one behind the smuggling) to prevent her from getting them out because he didn't had any other place to hide the diamonds.
* Turns out that the meat contains bacteria that transforms anything that eats them into the same species. Oops.
* Turns out that the reason Prince Marse wanted to become Ring King in the first place is because he was in love with Saphira, one of the princesses promised to the Ring King. They thought that if he became Ring King, they could be together. Saphira was initially pissed that Marse broke their promise, but Saphira's sister Saphir stole the ring and married Sato before anyone knew what was happening, leaving Saphira free to have a normal relationship with Marse.
* Turns out, that thing was also the Dreen. The novels are clearer on this: everybody
* Turns out that Voldemort had an agent get hold of the samples so that he could use it in a ritual to steal Harry's magic. Fortunately, she was savvy enough to use someone else's blood instead of her own, making the ritual backfire.
* Turns out that wickedness and evil are needed in the world, otherwise a cosmos of nothing but virtue and innocence will be wiped out in a great blinding light, essentially this trope.
* Turns out the chemistry alteration is a two-way street and now Martellus
* Turns out the cosmic superweapons of the Kosmokrats were often just as destructive as those of the Chaotarchs; in one instance, servitors of the Kosmokrats were ordered to destroy a whole galaxy (and all civilizations in it) down to the subatomic level rather than seeing it fall into the Chaotarchs' hands. Somewhere in midseries, Perry Rhodan
* Turns out the Ethereals know damn well that Chaos is real but hide this knowledge from the rest of the Tau. The main reason Commander Farsight formed his

own breakaway colony away from the Ethereals is because he figured this out. He believes that denying the existence of the supernatural is a mistake and that the Tau cannot prevail with their technology alone. They need magic of their own. Farsight puts this philosophy into practice on the battlefield, wielding a Warp-based sword called the Dawn Blade.
* Turns out the guy was actually guilty. Even Harm wanted him put away.
* Turns out the intelligent general murdered her when he found out she formed the other Bastin nation, the one without the compulsion to follow any order.
* Turns out the main characters pretty much forgot about it themselves. When one of them remembered it and brought it up, an authority figure told him that (undefined) measures had been taken to protect them.
* Turns out the Masquerade wasn't so extra strong, after all: by the second half of season six, an Anuk-ite can tap into years of Beacon Hills denizens witnessing or being brutalised by the supernatural to turn them against all supernatural creatures so it can feast on the ensuing chaos and violence. As a result,
* Turns out there is no other side, and the planet is essentially a 3D Möbius strip. The wall was created in the distant past to prevent people from trying to go to the other side, which tends to drive people mad.
* Turns out, the second main antagonist of My Brave Pony: Starfleet Magic II
* Turns out the Solarian League assumes everyone else has their same ambitions but just isn't capable because they aren't the Solarian League. This leads to rather poor military intelligence estimates, and once reality hits that people are capable of hurting them, their assumption of ambition means they are going to have to do horrible things to put people in their place...
* Turns out the trope was played with. Every Titan except Robin survived, assembled small team and rushed to a Legion of Doom HQ on their own thinking it was all up to them. Kind of was to be expected after Robin destroyed all means of communication they used.
* Turns out, the war criminal was already dead. Their captive had been horrified by the war crimes and assumed his identity so there could be a public trial and punishment. The kicker was that he was still
* Turns out, they actually looked like (slightly!) scaled-up versions of the species that formed the first Reaper, the Leviathans. The Leviathans are true
* Turns out they aren't the only ones. In season 12, episode 10, it's revealed that
* Turns out, they're all drugged and thrown into the basement of his mansion to have their blood collected indefinitely without their consent.
* Turns out this is how Gin and Rangiku met and became friends, too. Both of them were orphans from the
* Turns out this is the trick behind a good deal of stage magic. In particular, Houdini's wife is said to have aided him in this fashion on several occasions.
* turns out. This not only cancelled out the bad ending, but it undid all the other bad things that happened during the course of the episode, such as Lucy becoming a vampire and Lola's face being disfigured.
* Turns out this one isn't intentionally done, and it took practically all of Nagato's powers and some basic knowledge in graph theory for them to escape.
* Turns out this was the main cause of Severus Snape's angst. He dearly loved his Lily.
* Turns out to be a Chekhov'sGun in identifying who's behind the Rinzler helmet.
* turns out to be a process server... and plays this straight with the real villains, the Blues and Reds, specifically their leader, Temple, whose entire character is a major spoiler for the second half of the season.
* turns out to be a subversion. While it seems insane, it turned out to be the best way to stop Jenova.
* turns out to be using the Haitian's native Voodoo to incapacitate/kill whistleblowers who were going to expose his ordered abuse of the refugees.
* turns out to have once been a girl, who was transformed an ugly boy through some magic caramels which took away her beauty. And this is the reason he has such a big grudge against Abby.

* Turns out Weebo had been doing research into her creation on her own, and managed to come up with a design that allowed Brainard to create a second intelligent robot.
* Turns Red (in which videogame enemies simultaneously become weaker and stronger from attacks)
* Turns Red. You can interrupt this, however, making him parryable in the final stage.
* turns the tables by forcing Superman to take her to a fancy restaurant, where she binges on a huge amount of food — since the weight will all be gone by the next morning, it doesn't matter how much she eats that night.
* turns this around in one story by sending Batman the entirety of Catwoman... minus her heart.
* turns this one on its head when Leela wakes up from being knocked out and seeing where she came from, with the words directed at the characters who ruined it:
* "Turn the Beat Around" by Vicky Sue Robinson, although its original charted slightly higher on the Hot 100, is better known to post-disco generations from
* Turn The Beat Around in a song and dance, but changed the lyrics to be about...margarine.
* Turn (the former being the series title, now Turn: Washington's Spies,, and the latter for the coats worn during the times of the American Revolution, where the series is set)
* Turn to Frog" causes a target creature to lose all abilities and becomes a 1/1 blue Frog until end of turn.
* Turn to Mist is a spell which causes a temporary version of this to an attacking creatures. The creature is exiled and returned to play on its controller's next turn.
* Turn to religion. While rarely used in fiction due to it being too quick a solution, there are many cases when a saint or mystic claimed they (or someone they knew) sold their soul to the devil and were saved by Jesus or the Virgin Mary. In these cases, you merely consecrate yourself to him; the demon only literally gets the soul after death.
* turn to the dark side and forcing RWBY to split up to tackle different jobs.
* "Turn, Turn, Turn" brought the show's characters (and any viewers who missed the movie) up to speed on what happened in
* Turn Undead: Something that causes undead creatures to panic or be destroyed.
* turn unsuspecting people into members of their race. Ultraa gets hit by all four at once.
* turn up at their home in the middle of the night; when she asks who was in the car he replies: "The unluckiest car thief who never lived."
* Turn with Captain Simcoe (later Colonel Simcoe). He is the most morally bankrupt character in the show, and while he plays this trope straight in the pilot episode, he spends the rest of the series speaking in an eerily high register that is very off-putting.
* Turn your enemies around and propel them into orbit, by shoving the Alien Anal Probe up their butts in the 4th
* Turn Your Head and Cough: Doctors instruct their male patients to do this as an excuse to ogle their testicles.
* Turn Your Head and Cough: The stock method to see if a male patient has a hernia.
* Turok 2 battle, but for some reason the Mantid Queen theme was reused instead.
* Turok 2: Seeds Of Evil, entering "Juan's Code" placed the face of Juan, a contest winner, on the health icons.
* Turok 2: Seeds Of Evil, it happened anyway after you destroyed him. Although a few characters survived, including the similar Oblivion.
* Turok 2's first stage, you get the keys to both the second and third levels. Playing the levels in the order 1-3-5-2-4-6 is initially more difficult, but allows you to get the heavier weapons earlier.
* Turok, Blind Ones, Fireborns, and Troopers are skin swaps of Sentinels, Endtrails, and Mantid Soldiers, respectively. The former two are literal underground mooks.

* Turok: Dinosaur Hunter is about a guy (well, actually a succession of guys) named Turok who hunt dinosaurs.
* Turok: Evolution. A week later, the guy was gone from the store, and never returned.
* Turok for the Nintendo 64, Turok had to escape from an exploding tower with a pillar of flame only a few inches from his backside. If you take sufficient damage by the end of the preceding boss fight, Turok's right leg is broken in the cutscene - and he still manages to get out safely. Pretty sure the leg thing is a glitch.
* Turok from taking it over and hunting down the bio-mechanical dinosaurs, demons and aliens that have spilled through into our world. Read that over and look at how we got from "two Indians in prehistoric valley" to that video game plot.
* Turok game lets you blow up certain dinosaurs with explosives. The kicker is that their severed bloodied body parts twitch like mad on the ground before going lifeless.
* Turok has a few of these; the Cave Worm is a giant version of the Swamp Worm, the Fireborn is a fiery version of the Endtrail, the Blind One Sentinels are a palette swap of the Flesh Eater Sentinels, and the Trooper is a palette swap of the Mantid Soldier.
* Turok has the insectoid Mantids, who exist solely to further their own existence and lack the ability to feel sympathy, kindness, pity, or remorse.
* Turok is soon reduced to several grunts and a sergeant. Said sergeant promptly takes command, which turns out pretty badly for everyone else, as he's slowly going bonkers due to a head injury.
* Turok logo as usual, when lightning strikes it and turns it into a skeleton, which promptly falls apart.
* Turok not only people who carry enough firepower to hunt dinosaurs, and bone rending dinosaurs, but also hellfire casting demons and humanoid tank robots!
* Turok Oblivion in the second installment, and was fully immersed in it by the third.
* Turok of this trope, as the player has already cut down legions of "real" humans by this point.
* Turok reboot. Of the two dozen or so Whiskey Company soldiers who survive the spaceship crash at the beginning of the game, only 3 (one of whom is the main character) end up surviving to escape the planet.
* Turok received good critical reception, it failed to be a success in stores and became more of a cult hit, despite getting a sequel.
* Turok, Son of Stone series of games is now much better known than either comic book version.
* Turok The Campaigner with the classic baseball version. This didn't exactly set him up as a threatening villain.
* Turok. There's also a gun that shoots mines which jump up and cut enemies' legs off, which actually showed bits of bone poking through the flesh.
* Turok ventilate you if you attack them or try to cross a police checkpoint.
* Turok was one of the few third-party exclusives the console did have, and it was also one of the most violent games on the system in general. It sold 1.5 million units and was credited with pushing sales of the console.
* Turok. While most weapons instant kill with a head shot, both the Tek Arrows, and the Cerebral Bore are Headshot, Boom weapons.
* Turok, you get unlimited lives. Getting 100 diamonds (yellows count for 1, reds count for 10) instead gives you a Life Bar extension. Also, there are only 100 in each level, which means your Life Bar top out at 150 HP (100 to start, plus 10 for each 100 diamonds).
* Turovero: The Celestial Tower of the party, Ruby, who accuses him of not even utilizing the gifts the Four Gods gave him, to which he dismissively replies that he'll worry about romance once their mission is complete.
* Turpin, Archbishop of Rheims, and Don Jerome, bishop of Valencia after its conquest, serve as examples of this in the tales about Roland and El Cid, respectively. Both apparently used swords, at least in the stories.
* Turpster, and developed a substantial fanbase. While his uploading is still more

sporadic compared to the rest of the crew, he's hardly the lesser-known figure from before.
* Turpster, as well as fellow members of the group. The reason for this is that the song is a parody of "Chucklevision" by the Chuckle Brothers, with Turps' bad rapping and poor singing as well as a nonsensical intro of him slicing a box open, ending with him wearing it on his head the way a child would pretend they're on TV. However, since Turps is Turps, it comes across as dorkishly endearing and funny.
* Turpster. He and Turps have a gentleman's agreement that they will, at some point, do an eating challenge.
* Turpster, who was the detective and therefore innocent, in self-defence.
* turrets that you've been disposing of so cavalierly throughout both games are programmed to be able to feel pain. (Worse, there's no reason to create a gun turret that feels pain.)
* Turritopsis dohrnii, also known as the "immortal jellyfish," has the phoenix-like ability to indefinitely revert to its juvenile state instead of dying, effectively achieving true immortality.
* Turritopsis dohrnii, the aptly-named immortal jellyfish, can disintegrate itself once it reaches its age of death, or it senses imminent danger, and be reborn as a newborn-like larva. However, this does not protect it from complete destruction, such as through predation or disease. At least two other species of jellyfish can do this too, though it's not as well understood, and hydras (as in the cnidarians) are also suspected to have this trait.
* "Turtle-balling" is a common tactic in American Football, in which the offense does just enough to gain a lead of more than one score, then uses a combination of stifling defense and a relentless running game to prevent the opponent from catching up. Bill Cowher, the Pittsburgh Steelers' head coach in the 1990s and early 2000s, perfected the technique. When Cowher's team built a lead of 11 or more points
* Turtledove has also featured Jewish characters in other series escaping persecution in
* Turtledove's arrive on Earth with an internet of their own, which a select few humans gain access to.
* Turtle ducks, especially turtle ducklings. Every bit as cute as a real duckling.
* Turtle ducks have duck heads, tails and legs and bodies hidden in a turtle shell. Secretly, they're Zuko's favorite animal.
* Turtle is incredibly durable, almost completely invulnerable to harm. However, his total lack of extraordinary offensive capabilities hardly wowed the Legion when he tried out, landing him and his
* Turtle Island: A huge sea turtle that is big enough that its shell is mistaken for an island.
* Turtle Island: A turtle, whale, or other creature big enough and old enough to support a mobile ecosystem on its back.
* Turtle Island: Could be found in several tales from around the world, most notably Arabian and Russian ones.
* Turtle Island: Turtles big enough to be mistaken for islands or even whole continents.
* Turtle Island, which is so big that sailors have taken it for an island and landed on its back.
* Turtle is the only engineer with a purely defensive ability as he deploys a one-way shield that blocks enemy's bullets.
* Turtle Power: Kappas are commonly portrayed with turtle-like features like a carapace on their backs and beaked mouths. They're also noticeably hard to bring down unless one tricks the creature into losing all the water on the bowl-like cavity on its head.
* Turtles All the Way Down with "O Jamesy let me up out of this." Later, as Aza has a breakdown, she thinks, "Whoever is authoring me, let me up out of this."
* Turtles and Beetles, two of the Hunter's Pet species, have racial abilities called "Shell Shield" and "Harden Carapace" that temporarily reduce all damage done by 50%. The graphic for the abilities is a translucent golden dome of hexagonal

panels forming a shield over the Turtle/Beetle.
* Turtles are the subject of a raging debate among taxonomists and herpetologists as to how they're related to other types of reptiles. This is due to how all other closely related groups have gone extinct. In fact, until the discovery of
* Turtles Forever also join. In the end, you have twelve turtles, three versions for each of the four brothers.
* Turtles Forever episode "Turtle X-Tinction", where Serling uses the phrase "It's Serling time" — borrowed from the turtles' own "It's ninja time!" — before embarking on his mad dash to save Cody.
* Turtles Forever Fortunately, April and Casey were restored once the plan was stopped, and presumably, everyone else was.
* Turtles Forever has a deflector shield that easily absorbs all the firepower that the military hits it with.
* Turtles Forever made up his mind to end it this way by ending all of existence if only so he could destroy the TMNTs from Turtle Prime/the original Mirage comic.
* Turtles Forever Michelangelo defeats a mutant banana by... um... peeling it.
* Turtles Forever takes this to the apex with the '03 Turtles eventually fighting in tandem with the '87 Turtles, and the '03 style of straight ninja fighting is contrasted with the '87 slapstick style, with both being equally efficient.
* Turtles Forever that the original characters' designs were seen outside the comic books.
* Turtles Forever, the crossover between the first two TMNT cartoons, has a reveal when the 2003 Turtles learn the 1987 Foot Soldiers are robots.
* Turtles Forever, the Mirage Comics Turtles pull the bye part on their animated counterparts. 80s Raph approves.
* Turtles Forever, the Turtles were a lot more careful in their actions and while they didn't think things through from time to time, they weren't as dumb and incompetent as the film made them out to be, Leonardo and Donatello took most situations seriously, and Shredder though having comical moments here and there could be a major threat and was a competent fighter who usually got the better of the turtles in hand to hand combat.
* Turtles Forever to the audience, much to the increasing frustration of other characters, who simply see those turtles as randomly stopping to look at nothing and then talk to nobody.
* Turtles Forever when he discovers that there are teams of Turtles in each one.
* Turtles Forever, when the 1987 and 2003 turtles fight a group of Foot Clan robots, 2003 Raphael wrestles a robot until he's told it isn't human, at which point he stabs it through the head with his dagger, yelling "I love fighting robots!".
* Turtles Forever: When Utrom Shredder unleashes the Technodrome upon New York City, the U.S. Army and Air Force attempt a counter-offensive attack with tanks, fighter jets and ground troops but they get eliminated within seconds and Shredder laughs at their failure.
* Turtles Forever with him... then he discovered Ch'rell was murderously violent and Karai's involvement allowed him to take over the Technodrome, and all of 1987 Shredder/Krang's assets, upgrade them to his own means, and use them in a plan to destroy the Multiverse. The 2003 Shredder considers the '87 villains incompetent and worthless, and eventually has them imprisoned when he can't stand them any longer (except Bebop and Rocksteady, who he allows to serve him....BIG mistake.)
* Turtles game. This was likely the only exposure Ebert had to the Turtles before seeing the movie.
* Turtles has the student council. In battle, Momo's aim is just as bad as in canon, meaning that they can't hit enemy tanks. Outside of battle, they're unwilling to listen to the more experienced Miho and Koume's proposals when it comes to the team.
* Turtles in the anime, people are hoping Koume will replace her with a gunner who can actually hit what she's shooting at.
* Turtles in Time games, "boring as fuck" and adamantly refuses to play it on Game Grumps, prompting Jon to try and shut him up and anticipating a backlash by saying

"hey who wants to see a Game Grumps video with a giant dislike bar?"
* Turtles, such as when the two of them propose finding an easier opponent than St. Gloriana for a practice match (it's unclear whether the option was available in canon).
* Turtle Tail's first love; she always loved him, but temporarily left the group when it didn't look like he reciprocated, and had kits with another tom. She never got over her feelings for Gray Wing though, and the two of them ended up together upon her return.
* Turtle Tunes, the Turtles hang out in the park and sing, while picking up garbage with kids.
* Tush in the early 80's would often have disclaimers on their fake ads stating 'Void where prohibited and, of course, in Wisconsin.'
* Tusk Act 4, the final evolution of Johhny's Stand, is this trope incarnate. When it can outright No-Sell
* Tusken Raiders resemble Bedouins, but were inspired by the way Native Americans are portrayed in old Westerns.
* Tuskers has the descendants of an escaped javelina (an animal related to pigs that's found from Arizona to Brazil, also known as a peccary) become human-hating genius killing machines who lead an army of their kind on a small Arizona town.
* Tusk. It's an intentionally ridiculous story based on an intentionally ridiculous premise, but that doesn't stop it from being genuinely creepy and body horror-tastic.
* "Tusk" versions of Grineer enemies, appearing in the Plains of Eidolon on Earth.
* Tut, after the wounded Tutankhamun, disguised as an anonymous soldier, has been transported to safety by Suhad, she compassionately gives him a back and shoulder massage to comfort him as he begins to recover.
* Tutankhamun (AKA King Tut): Most people remember him more for the so-called "curse" rather than his actual reign. Blame all the countless "Mummy" movies for that. Of course, there wasn't really much to remember about his reign except that it ended his father's experiment with monotheism. His fame stems pretty much entirely from the fact that he was the only pharaoh whose tomb was not emptied by grave-robbers before it was discovered by archaeologists...
* Tutankhamun's dagger was recently confirmed to be made from meteoric iron.
* Tutankhamun was discovered in the early 1920s, rumor quickly spread that it was cursed, with things like the strange death of the British nobleman who sponsored Howard Carter's expedition to find it. Carter himself, however, remained unscathed by any hypothetical curse.
* "Tutelary Genius" by Universal Hall Pass: A Dare to Be Badass speech essentially delivered to
* Tutenstein: An educational cartoon about a girl who befriends the mummy of a pharaoh.
* Tutenstein features the undead child-pharaoh Tutankhensetamun awoken in the modern day.
* Tutenstein has an episode where Cleo and Tut have to go into the Underworld after her kidnapped cousin. While they're there, Cleo's mom calls her cell phone, which picks up. Cleo immediately lampshades this, mentioning that she doesn't get reception downtown and it makes no sense she gets reception in the Underworld.
* Tutenstein of the series is Set. He regularly hatches plots to take over the world. One episode also features him betraying Ra to Apep, the true Egyptian God of Evil, as a plot point.
* Tutenstein, thanks to the magic that compels him to serve the pharaoh.
* Tutenstein: Tut himself and Cleo Carter. Like Aang and Katara, it's because Cleo is two years older (again, kinda sorta), not to mention Tut is a shriveled mummy.
* Tutenstein: Tut's first act after being brought back from the dead is to run to the bathroom.
* Tutorial Failure. How this is supposed to add up to "infantry" is never explained.
* Tutorial Failure: You fail to teach someone how to play a game properly.
* Tutor-Text is the first known gamebook. Unlike most later examples, these were

made as education material rather than fiction.
* Tutu Fancy: Ballet outfits have to make sure the trimmings won't get in the way of the dancing.
* Tutus are considered unisex nowadays, though men usually wear them for comedic purposes.
* Tuuri and Lalli's conversation in Finnish roughly translates to "I see some mountains... and more mountains... and a funny rock... and mountains".
* Tuuri, a sheltered mechanic who desperately wants to see the world outside the fort where she grew up.
* Tuuri does it at the prospect of getting her hands on some overengineered
* Tuuri has a habit of not completely taking other people's point of view into account, which she apparently picked up while dealing with whatever disorder Lalli has. The problem is that both mages of the team (one of whom is Lalli himself, the other just starting to awaken during the story) frequently need her as a translator, and they very literally have a different perspective on the world than most people. This causes a lot of important information to get lost in the translation given to their commander.
* Tuvix" when the plant he's beaming up to Voyager somehow makes him merge with Neelix.
* Tuvok earns his Gadeteer Badge when he improvises several phasers from parts scavenged from sonic showers and food dispensers when the crew is imprisoned in a artificial environment aboard a giant space station in
* Tuvok had occasionally had the opportunity to avert this, as in one episode where a seemingly unstoppable energy field is slowly enveloping the ship, and after all their attempts to prevent it fail, he suggests simply waiting for it to consume them and seeing what happens. The rest of the crew objects, but he counters that they don't actually know what the energy field is, and given that all their other options have been exhausted, inaction is the only logical choice left to make, even if the odds of survival are low.
* Tuvok mentions that Vulcan society does allow euthanasia in certain cases. It's interesting in that Vulcan is never shown to be anything resembling a dystopia, it's just that for a society that runs entirely on cold logic, killing someone who will spend the rest of their lives in misery and will never improve makes perfect sense. When the
* Tuvok's), the only other significant black Vulcans in the franchise's history, before or since, are Tuvok's wife and son.
* Tuvok tends orchids as a hobby, including some alien varieties he picks up on his travels. This backfires in "
* Tuvok, who was serving with the Maquis as a double-agent, was reinstated to his Starfleet rank of Lieutenant, and was later promoted to Lieutenant Commander; however, this was treated as a standard promotion.
* Tuxedo and Martini, didn't have such fate). Hipsters also revived this aesthetic in real life with craft cocktail bars.
* Tuxedo and Martini Dr. Calvert) despite becoming an immortal mutated ghoul (and his government no longer existing).
* Tuxedo and Martini masks and plot to replace world leaders with brainwashed body doubles.
* Tuxedo and Martini spy and Oko San acts like a slightly spoiled pet bird who hits you if he doesn't like what you're saying.
* Tuxedo Gin has the lead reincarnated as a penguin and having to win back the girl with whom he'd fallen in love right before his death.
* Tuxedo Mask himself as this as his own signature attack in both the manga and
* Tuxedo Mask in the first season. Especially because they didn't even know if he was an ally or an evil 3rd party much of the time. He would show up, briefly fight the
* Tuxedo Mask may count as an example for the guys. He is a handsome, young man who throws roses at monsters of the week and gets to fight alongside multiple women, plus being crushed on and eventually
* Tuxedo Mask's much cooler "Prince Endymion" armor is first seen out of flashback

when he is captured and brainwashed by the Dark Kingdom.
* Tux, the mascot of Linux. Linus Torvalds visited a zoo and tried to pet one, but it bit him. He claims that's how he got into penguins in the first place and decided on a penguin mascot for the OS.
* Tu Youyou,winner of the Nobel Prize for medicine and the first Chinese woman to win a Nobel Prize, has the surname Tú (屠), meaning "butcher" or "massacre" in Chinese.
* TV 12 out of Bellingham, Washington. For decades, KVOS ran the the omnibus versions of the '63-'89 show on Saturday night starting at around eleven-to-midnight. That's not too late when you're watching a four part Fifth Doctor story, but heaven help you if that week it's a seven part Pertwee episode - or god forbid, the 10 parter The War Games.
* TV3 and its two spinoffs 3e and be3 became Virgin Media One, Two and Three respectively in 2018, bringing an end to the TV3 name after 20 years.
* TV3 - the second most recent TV network. Used to handle most of its programmes from IT until 2015.
* TV actor Jon-Erik Hexum accidentally killed himself in 1984 with a
* TV adaptation archangel in existence getting involved with a grimy demon who walks around with a giant fly on zir head.
* TV adaptation, Nola Darling is changed from straight to pansexual, and one of her many lovers is a woman.
* TV ad Robia La Morte driving a red open roadster, following along to a 'Learn Italian' cassette. At a stop sign a man hears her and says in Italian (subtitled) "You speak my language!" — she breezily replies in Italian (subtitled) "Good toast, waiter! ...I would like a slice of suitcase." and drives off, the picture of self-assurance.
* TV advert in the UK, taking an entire ad break to broadcast a parachute display team form the letters to spell out HONDA in mid-air. They succeeded.
* TV advertising campaign features a man in a sort of demon costume making a silly roaring noise, with the top part of his head and antennas visible throughout the advert before he actually pops up.
* TV and DVD player remotes can vary drastically between different brands — not just in layout, which is frustrating enough, but even in how correspondingly labeled buttons behave.
* TV Asahi even made a reference to one of these ads in their episodes!
* TV channel Five US are currently celebrating '80/90s action film tropes via the medium of
* TV Colosso, they show up at his home and explain it's not a live transmission.
* TV Comics Doctor Who comics were repurposed as Fourth Doctor stories in the same manner.
* TV Comics Doctor Who's face crudely drawn over the original Doctor's.
* TV Comic) which has featured an original comic strip based upon the TV series since 1979.
* TV commercial, a husband and wife are watching an action TV show together and, as we learn, she watched ahead on Netflix so she has to pretend to be surprised by all the twists.
* TV commercial and a lamp gives off darkness. It ends with the game's tagline, "YOUR RULES DO NOT APPLY HERE".
* TV commercial and getting affected by the various hazards and status changes from the game.
* TV commercial for Zoloft antidepressant, the cloud lightens and breaks up.
* TV commercials and print ads for Brown & Haley Mountain Bars featured people recoiling in horror from the product with the slogan "They're only ugly until you taste them."
* TV commercial. Several other songs from the collection are played with both their original and popular titles onscreen, including Tchaikovsky's Concerto #1 / "Tonight We Love" by Tony Martin, and Piano Concerto No. 2 by Rachmaninoff / Frank Sinatra's "Full Moon and Empty Arms".
* TV commercial wearing nothing but the tighty-whitey briefs, doing guy stuff.

(spits in the sink, scratches her butt, pours beer on her cereal) It ended by explaining that "Men don't want to look at naked men."
* TV critics have this opinion of the Cameron/Chase romance. Fans mostly loved it, partly because it was the only happy ending/positive portrayal of love in the series, though
* TVE 1 was the first TV network in Spain and Telecinco was the second one.
* TV execs had told creator Ryan Murphy he had the greenlight for season 3 of
* TV film (and set in that time period), the for-sale sign outside the Youngers' new home lists the phone number as "KL 50148".
* TV from the Future also presents a parody in the form of the Krav Maga Stellions, Avigdor, Mordecai, and El'or, who also parody the attitudes of overly-excited IDF brats, chanting chants like "About all those/About all those/who dump warriors/they should all be thrown to Gaza/to be w***s of the Arabs".
* TV Funhouse", in which fake hauntings were exposed by a gang of prenatal detectives.
* TV Funhouse parody includes the same staccato baritone "Heh-heh-heh-heh" after every line.
* TV Funhouse sketch "Conspiracy Theory Rock" immediately cut to a "Please Stand By" card (with the NBC peacock sweating nervously) as the song continued to accuse NBC of being GE's lackey. The song even pointed out that this trope is used as a cheap way to censor out anything sponsors or the network may deem inappropriate ("'Please stand by'/'Please stand by'/It means there's technical difficulties, supposedly/So if you see/A "Please Stand By"/You know it's all part of GE's big lie...")
* TV Funhouse" sketches (where mom leaves the cat in charge of the titular baby, immigrant, and guy on mushrooms).
* TV Funhouse to its horrible conclusion: The roaches have a whole humanesque society, loving family relationships, even religion, and yet you're encouraged to inflict horrible, uncaring death upon them.
* TV Go Home makes absolutely no bones about the cruelty and selfishness of this.
* TV Group Digital has studios in two of Brazil's biggest cities, Sao Paulo and Rio de Janeiro.
* TV Guidance Counselor is able to relax and enjoy the show that follows (which goes on to alternate songs with banter and trivia about his films).
* TV Guide, he complained about the same-day, time-delay broadcasts of the Olympics (and other sports) spoiling the endings. The specific instance mentioned was a tennis match, and although the announcers were asking, "Will X make a comeback?" there were only five minutes left in the broadcast, so of course there wouldn't be a comeback, because there wasn't enough time. If there had been a comeback, they would have edited it so there would be time.
* TV Guide), or use the listings in the local newspaper or the print-copy of TV Guide. As digital cable became more and more prevalent, cable and satellite providers began adding interactive guides, which let consumers look at listings themselves, often much further out than the old rolling scrolls did. This digitalization is also what made it possible for high-speed Internet to come to more and more homes.
* TV Guide sorts shows into five categories: white for unclassified shows; yellow for movies; green for sports and blue for family shows. Because they air during
* TV Heaven: Online comedic reviews of cheap DVD specials, presented by Brad Jones.
* TV journalists Sander Vanocur and Bree Walker appear as themselves in the
* TV Land note Brady events as taking place on the original broadcast dates.
* TVMaxwell's stuff will almost always leave the viewer wondering what the hell they just watched, and why exactly they enjoyed it.
* TVMaxwell Then the video ends with their car exploding with a pop sound effect, them appearing in space and then flying into the sun, which is all accompanied with opera music.
* TV Movie, August Best's patriotism is little more than a desire for personal glory as an operative, and he even kills his superior, Steadman, when the latter refuses to support his scheme.

* TV movie, he takes over yet another hapless human and attempts to steal the Doctor's body.
* TV Movie, is a reserve pilot for the Coast Guard, and can fly a helicopter from a suburban area out to the coast on short notice, a handy skill for disposing of a nuke.
* TV movie it is pointed out how problematic this biology is, as when some human surgeons try to operate on the Doctor his biology causes them to accidentally "kill" him, forcing a regeneration.
* TV movie (it was co-produced by Fox) pushed it right back into development hell until 2005.
* TV movie talking about how much fun they had during filming, gushing about co-star Daphne Ashbrook, and making fun of the movie's sillier moments.
* TV Movie. The villains demand a ransom be taken in a bag to a marine park. A guy grabs the bag and throws it into the nearby ocean, where it's picked up by a woman on a jet ski. When questioned, the guy says he was paid to do what he did - he had no idea what the bag contained.
* TV Nation, commercial breaks were preceded by the results of humorous opinion polls. (The polling, done by the firm of Widgery and Associates, was legitimate, though the questions were preposterous.)
* TV Nation crew would quiz the taxi drivers who didn't pick up Kotto, and tried to address the problem — when the drivers said Kotto "looked scary", they had him hail a cab while holding a bouquet of flowers and a baby, and even standing by an illuminated sign reading "I NEED A CAB".
* TV news reports, morning shows, etc can be prey to this, especially when the anchors try to improvise or banter.
* TV Of Tomorrow", a man watching TV won't move to have dinner, so his wife drags him to the dinner table. His head remains in place while his neck stretches out; he only retracts his neck to have a bite of food, then stretches it back out to the living room.
* T.V. of Tomorrow, details a specific model of television for Peeping Toms, with a viewscreen modeled after a keyhole.
* TV One mute out all misogynistic slurs (use of the words "bitch" and "ho").
* TVOntario (TVO, owned by the Ontario government). Founded in 1970 as the OECA (Ontario Educational Communications Authority) with the establishment of its flagship station CICA-TV in Toronto, it began expanding across the rest of the province starting in the mid-1970s. Long known for its emphasis on children's programming, with some shows, such as
* Tv Pirata. A network was suffering from several acts of sabotage. Everyone who tried to tell the culprit's name before the climax was killed at the exact point, prompting people to ask who that "Oooooohhhh" was. One of the trope's victims was even stabbed to death with a spoon because the killer ran out of knives.
* TV Pirata explained why women go in pairs to the bathroom - to play a round of table tennis.
* TV Pirata had a "syndicate of canned laughter", which reclaimed for better conditions such as not laughing at bad jokes... while laughter emerged from almost every line, of course.
* TV Pirata, one sketch showed lots of people on a queue fighting fiercely, then pans to the head of the queue where we see a sign saying "Gratuituous Violence".
* TV Salinazteca (Portmanteau of TV Azteca with its holding company Grupo Salinas, in reference to the legendarily crooked president Carlos Salinas de Gortari).
* TV scheduling can run afoul of this quite easily, too. After buying or making a show, the broadcaster later comes to the conclusion that it probably won't do well with the audiences, so they typically put it on in
* TV series are subject to deleted scenes for much the same reasons as set out for films in the introduction, and just as with film sometimes the restoration of said scenes resolve plot holes. Other reasons for deleted scenes to exist:
* TV series, controllers would often be betrayed by their habit of ear-scratching, but this did not appear in the books.
* TV series, he simply looks back at Tenchi, seeing his old rival (and Tenchi's

grandfather) in the younger prince, and says "Yosho... looks like I've lost again... doesn't it?" His delivery in the dub was more resigned and borderline amused. Either way, after his loss, Kagato simply collapses.
* TV's first non-binary character, Taylor Mason, is played by the openly non-binary Asia Kate Dillon in
* TV show "Camp Pining Hearts" without meaning to, and gets very annoyed by the Crystal Gems' "incorrect behavior". Aside from that, Peridot also shows signs of halted emotional development. She has the tendency to throw temper tantrums when things don't go the way she wants them to, seems to be unable to understand how she might have made others feel bad, and doesn't know how to put her emotions into words (she describes feeling good or bad as feeling "big" or "smaller", and the only way she shows gratitude is by saying "wow, thanks" — something she learned from Steven).
* TV Show King Quiz Party or something along those lines, has you(r Miis) playing for money. On the final round, the 2 best players will compete against each other to in that final round. The prize money is always enough to beat the opposing team, even if they have a $700,000 lead.
* TV show's intro, Ratbert and Catbert are running with a torch and a pitchfork, respectively, for no explicable reason.
* TV show version Cher and Dee have a favorite restaurant to go to for lunch period, which has "the best" Chinese Chicken Salad - which they order without the chicken or dressing. They basically pay $12 for a bowl of lettuce.
* TV spot for Polaner All Fruit preserves has three people asking "please pass the All Fruit" in a posh British accent followed by an American Southerner asking
* TV spot for Tabasco brand Sauce we see a man eating a slice of pizza while regularly dousing it with the sauce; he has used at least two full bottles and is working on a third. He gets bitten by a mosquito; then as the mosquito flies away it explodes, to the man's quiet satisfaction.
* TV stations in the south, especially before the civil rights movement, often did not want to air shows with non-white characters. This led to an all-white cast for shows such as
* TV Strikes - When the TV writers strike, the quality of television suffers.
* TV Telephone Etiquette at the end of the conversation, but it's still impolite).
* TV those words over the course of the series. Occasionally, Marshal Dillon would instruct some bad guys to "get out of Dodge", but the phrase is never used as a suggestion among said bad guys themselves.
* TV Time-Limit Match or on PPV's, the network has given the show overflow time should the match run a little long).
* TV Tokyo uses the telop method all the time to report breaking news rather than stopping regular programming like most networks. This is known as
* TV Trash, Chris "Rowdy Reviewer" Moore, seems to be just a snarkier version of the real-life Chris Moore.
* TV Trash), less focus on jokes, and more focus on the subject at hand with an occasional joke thrown into the picture. (Especially so, since Benthelooney took a different direction to the way he was before cancellation, when his rants restarted production.)
* TV Trash: Rowdy C is shocked when young kids don't believe that kids have cooties.
* TV Trash. When he is especially angry, it is recommended that you turn down your computer's volume.
* TV Tropes", along with a long list of examples. Humorously, one of the examples actually links to the TV Tropes page itself.
* TV Tropes), and then check out its "related links". If it's a work popular among tropers, this secondary binge can take a relatively long time.
* TV Tropes as one of the fundamental forces of nature, along with Death and Taxes.
* TV Tropes at $45 level, you got a T-shirt that said, "I Backed TV Tropes on Kickstarter and All I Got Was This Lousy T-Shirt" on it.
* TV Tropes), but weren't completely removed in hopes that some troper, someday, would save them.

* TV Tropes could ultimately be considered fan nicknames, or at least fan nicknames of literary conventions established elsewhere when applied to a specific show, genre, or situation.
* TV Tropes Customs This page lists the general customs and guidelines for the wiki.
* TV Tropes enjoy it. The division between "crap you enjoy" and "total crap" is much more nebulous than the one between crap and non-crap; we don't even have a percentage for you.
* TV Tropes, especially when the page they're from seemingly has nothing to do with it:
* TV Tropes fan forum. The show still gets significant attention, but has become far from the focus of the site.
* TV Tropes' forums and you can post a Cool Shades smiley! Or on just about any forum these days. If you happen to not have access to something that writes it, just write a B, followed by a bracket opening to the left, possibly with a dash in between [B) and B-), respectively.]
* TV Tropes Forum The social hub of the wiki and where decisions are made on fixing pages and site policy.
* TV Tropes. How exactly do you get a ship whose length is a negative number? You start with a ship with zero length and then you make it shorter.
* TV Tropes, if a certain show/video game/comic/etc. has its own Wall Banger or DMOS page, odds are an image of one of the characters facepalming will be the page image.
* TVTropes is not intended as a source of legal advice; it is for entertainment purposes only.
* TV Tropes is not necessarily saying it was designed with the help of the company who built the centrifuges...
* TV Tropes is where all the negative opinions go to. And a couple of other dark stuff.
* TV Tropes itself provides a simple example, as the main page explains: "The wiki is called "TV Tropes" because TV is where we started. Over the course of a few years, our scope has crept out to include other media." This is probably the least likely name on the site to ever change.
* TV Tropes itself spawned several imitators after more stringent rules about what was appropriate content on the wiki were put in place.
* TV Tropes? Mitigated somewhat by the "open in new tab" option on the right-click menu... until you can't open any more tabs. Or you realize that your tab bar is getting cluttered and use the equally-handy "Close Other Tabs" option. Of course, most people simply use the mouse wheel button, saving a lot of time doing both things... good luck browsing a site like this using a mousepad without this function.
* TV Tropes. On the subject of Wizards, Author Barbara Ninde Byfield advises us to "Trust those wizards who are thin and fine drawn. Mighty muscles, ruddy cheeks, and genial dispositions bespeak wizards who when apprentices sneaked out to play instead of applying themselves to long days over hot crucibles and long nights poring over scrolls, tomes, tablets, and tracts."
* TV Tropes page! As you can clearly see, I used a hammer, not an axe!"
* TV Tropes page for Serra Elinsen is studiously sanitized for any hint that it isn't meant to be taken seriously, and is full of insane cruft that pops up in only the most overwrought places on the Internet. Even we can't tell what's real and what's fake anymore!
* TV Tropes page often includes these kinds of claims. The most common ones are "X is really Haruhi Suzumiya, who may or may not be a goddess herself" and "The setting is actually in Evangelion's Instrumentality and thus a sea of souls".
* TV Tropes Recap pages seems to suffer strongly from this — which is odd, because unless you really like the show, why are you bothering to write the Recap? And unless you really like the show, why are you bothering to read it?
* TV Tropes Reviews. It seems almost like those with negative opinions will be more likely to post a review. It was even pointed out that negative reviews get more

attention than positive ones; and this wiki was no exception. In fact, the response to that observation is where the term, "Unjust praises" came around.
* TV Tropes server are limited to at most 350 pixels wide, and 200kB in size; while we will link to your original version in all its glory, it needs to look good when scaled down to fit those limitations.
* TV Tropes: Sometimes a trope is played in a way that its title is taken literally.
* TV Tropes (That Other Wiki if you're feeling bitter about it) with TV Tropes as the unknown one. Well, mostly unknown — they do have an article about us, at least.
* TV Tropes, the description of the game says that it "features never-before-seen freedom", which it does indeed: there is no collision detection (in other words, you can go through any object except the ground), and no angle detection (allowing you to drive vertically), and the game allows the player to freely drive straight off the map and into an infinite void.
* TV Tropes: The normal wiki has a white background, YMMV has a blue one, Sugar Wiki has pink, and Darth Wiki has black.
* TV Tropes The Webcomic and the others that his brother Dab, the main antagonist of the Original Arc, is not beyond redemption and is still a good person inside. He is ultimately proven wrong, however.
* TV Tropes The Webcomic: she was killed in all known alternate universes but resurrected later in the Prime (and only in the Prime).
* TV Tropes The Webcomic) to rehearse their songs for a concert that takes place in less than a week.
* TV Tropes to debate the ethics of this practice; however, there are some (often loosely-enforced) laws on touching which attempt to protect both workers from clients and clients from workers.
* TV Tropes uses this style, making normally verbose pages easier to understand.
* TV Tropesvincible". Not only is it perfectly cromulent, it's perfectly real as well. And it means exactly what it's suggested to mean: beatable.
* TV Tropes was implemented and the most NSFW trope and work pages were deleted.
* TV Tropes: We use it every once in a while, when writing examples and in trope descriptions:
* TV Tropes, when it is obvious to the audience that it is Zack who has a point, although they are both dumbasses.
* TV Tropes, which began life as an attempt to defy the stereotype of women as being weak and overly-sensitive, only to become a stereotype in and of itself that suggested that women who don't wear masculine clothing or act in a stereotypically masculine way are inferior to those that do.
* TV Tropes widened its focus; now it's covering tropes from all kinds of media.
* TV Tropes Will Ruin Your Life: Browsing TV Tropes too much will have an adverse effect on you.
* TV Tropes Will Ruin Your Life serves as this in the second episode by simultaneously warning James and explaining to the audience what will happen to him over the course of the story.
* TV Tropes Will Ruin Your Vocabulary" have already left their mark on the Internet.
* Twain also sarcastically argued for the (continued) genocide of the Native Americans, on the basis that the white man had lied and betrayed and screwed them so many times, and so thoroughly, that they would (justifiably) never trust whites again. Therefore, the only course of action left was to give up any remaining illusions of not being utter bastards, and finish what they'd started.
* *Twang* Hello: An arrow, throwing knife, or any other throwing implement thrown or shot from offscreen interrupts the onscreen action.
* Twardowski made a deal with the devil to gain magical skills. In exchange, the devil had agreed for Twardowski to give over his soul when he visits Rome. Of course, for many years afterwards, Twardowski didn't even get close to Rome. His career ended, though, when he visited a certain inn: the devil then popped up and pointed out that the inn was called... guess what.

* Twa Recruiting Sergeants overemphasizes the hardships of a Scottish farmer's life — he won't have to plow, have his horse go lame or listen to his baby's screaming.
* "Twa Recruitin' Sergeants", a traditional Scottish song popularised by Jeannie Robertson, takes a different tack. Maybe being a soldier isn't glamorous or fun, but it's got to be better than spending your entire life as a farm labourer.
* "'Twas the Flight Before Christmas" has several jokes early on about Tim using
* 'Twas the Night Before Christmas believes strongly that there is no Santa Claus and isn't shy about voicing his opinions. He also seems to know quite a bit about how clocks work — although maybe not as much as he thinks since the first time he visits the clock tower it ends in disaster. He does fix the clock later, and also learns about the importance of both humility and having faith.
* 'Twas the Night Before Christmas for Santa, including the names of his reindeer.
* 'Twas the Night Before Krampus: A Tale of St. Nicholas Christmas. A dark revamp of Santa and an even darker revamp of Krampus.
* Twat-O-Tron was created as a parody of many semi-coherent and angry commenters in the BBC website's "Have Your Say" section. It produces randomly generated rants formed from careful analysis of the HYS comments, and the results are not unlike the "From the messages boards" section in Private Eye: often sadly indistinguishable from the real thing. The source database has sadly not been kept up to date.
* TWC also had a sister channel TWC Reloaded, which didn't do much better and was sold off to become the movie channel Movies 333, now known as True Movies.
* tweaks were what was lost in time, either because they were kept on the engineer's notebooks or they kept a mental recollection of it. However, it was better to design the engines using current techniques anyway because they turned out to be, at least on paper, more efficient and simple.
* Tweedle brothers and sends Joker, Catwoman, Riddler and Two Face flying.
* Tweedle first appears in the comic piloting one, though it almost immediately gets obliterated by a
* Tweedle has no problem manhandling, knifing, poisoning, and otherwise getting physically rough with women.
* Tweedle takes a poisoned smoke knight dagger to the left hand. He eventually cuts it off to stop the poison, and Agatha creates a prosthetic replacement for it while sleep-sparking (as she'd be unlikely to
* Tweek Vs. Craig and abusing Nicotine gum over the loss of his Live-Action wife.
* Tweek x Craig dynamics, and several of the fanart images used are...very suggestive.
* Tweek x Craig: people love their supposed romance simply because it's a gay relationship, not out of any real concern about Tweek or Craig themselves. (Ironically, Craig's dad, who has a hard time coming to terms with Craig's supposed sexuality, would be an exception: he eventually supports them because he thinks it makes Craig happy.)
* Tweener, who have a habit of committing actions which would be seen as despicable if done by anyone else, but still manage to get the crowd behind them, simply by targeting wrestlers whom everyone already hates.
* Tweenies, "Being Really Old": The last lines of dialogue are the titular characters (kids not more than 5 years old) asking one of their caretakers at playgroup (he's really old): "How old are you?" "Well, if you must know..." Cut to credits.
* Tweenies below, the voices were recorded in Canada and the songs were recorded in Nashville.
* Tweenies concluded with "What Makes Summer?", wherein Max and the Tweenies make a summer collage. It plays out like an ordinary episode.
* Tweenies had several touring shows in the United Kingdom, some of which were held after the show had ended production.
* Tweenies: Jake in "Jake's Been Sick", after eating a Bramley apple, an especially-sour cooking apple which isn't meant to be eaten raw:
* Tweenies mere days after the Metropolitan Police put out a report effectively

confirming the worst about Savile. The BBC, already doing damage control after allegations emerged that the BBC under-acted in regards to initial complaints against Savile, promptly apologised and locked the episode away.
* Tweeny Witches, and his animated puppets imply that he has magic like his mother, though he denies using magic to communicate with Arusu in supernatural appearances. He wishes magic would disappear from the world and believes that some can only use magic to bring misery even though he has only used magic mostly to terrorize ships. He gets better thanks to Arusu's influence, though.
* Tweeny Witches: Arusu is the only human member of the Magical Girl Squad, the other two being native humanoid witches.
* Tweeny Witches. Because of the laws against relationships between witches and humans, they couldn't have legally married even if they wanted to.
* Tweeny Witches: Grande plans to destroy the Human Realm through dark magic in hopes of making a new home for his species to escape the eventual destruction of the Magical Realm.
* Tweeny Witches in the present. Even discussing anything magical in Wizard Kingdom arouses the suspicion not only of the civilians but also of the warlock police, as shown when Arusu loudly asks Sigma about magic and the fairies captured by the military.
* Tweeny Witches: Lennon is an androgynous boy who is assumed to be a girl, with a young, high-pitched voice that can pass as both masculine and feminine. The Italian dub, however, gives him a blatantly deep voice that makes one wonder how anyone could think he's a girl.
* Tweeny Witches manages to fool the heroes into believing the two will die of "disease" in 24 hours without a "counterspell" to heal it. It took Arusu and Sheila washing their bodies by falling to the water for everyone to realize that the "disease" wasn't real in the first place.
* Tweeny Witches on the team. Saving her from the warlock army wasn't a genuine act of kindness; he only did that so he could win Sheila's trust.
* Tweeny Witches, overlooks the Magical Girl Squad on the DVD cover for volume 7 of the Japanese release.
* Tweeny Witches provides the voice of Lennon, the son of a Japanese man and a native humanoid witch.
* Tweeny Witches save Eva from the warlock army, but that is only to win Sheila's trust.
* Tweeny Witches, Sheila and Eva were made ageless as punishment for letting Arusu release all the captive sprites back into the wild. Arusu didn't understand how this was a punishment until they explained that since they can't reach adulthood, they can never reach their full magical potential. Not to mention, since they're stuck as kids, they will never be able to experience adult things like getting married.
* Tweeny Witches, Sheila believes that the value of life depends on magic and that those who cannot defend themselves deserve to die.
* Tweeny Witches, Sigma saves Eva from the warlock army to win her friend Sheila's trust.
* Tweeny Witches: The Adventures: "A Heart Sealed Away" is the second episode in the original Japanese release. The North American release, however, positions the episode as the fifth.
* Tweeny Witches: The conflict in "The Magical Girls Squad Transformed into Fish!" from The Adventures is about the heads of Arusu, Sheila, and Eva being transformed into fish and their attempt to reverse it. They are trying to keep people from finding and laughing at them, but that's the extent of their antagonism.
* Tweeny Witches. The female witches tend to a more primitive steampunk-style of magitech while the technologically advanced male "warlocks" now use very little magic at all (there's only one "real" warlock left, and he's very old).
* Tweeny Witches the regular way. However, she finds she can do it by standing on the broom like a skateboard.
* Tweeny Witches: The series takes place in the Magical Realm, but Arusu and her friends still deal with problems like animal exploitation, conservatism, war,

oppression, and racism.
* Tweeny Witches used for the Führer. When the special task force urges the witches to fight the warlocks, Luca paints humans as a scapegoat in an effort to get both groups together, claiming that one of them, Arusu, has hidden the True Book of Spells to keep dark magic from saving all the witches and warlocks from the eventual destruction of the Magical Realm.
* Tweeny Witches wishes magic would disappear from the world and believes that some people can only use magic to bring misery. This causes Sheila to angrily tell him not to treat magic with contempt. He gets over his hatred of magic thanks to Arusu's influence, though.
* tweeted in the original game, but seeing it confirmed so readily was unprecedented.
* Tweetie Pie", Sylvester builds an elaborate device to lure Tweety out of his cage so a bowling ball will fall on him. Everything works perfectly, until the bowling ball somehow falls on Sylvester instead.
* tweet of Scantron dots rearranging themselves to read "Need Coffee".
* Tweetsie Railroad festival in 1990, and it became a smash success and an annual favorite
* tweet sums up the phenomenon perfectly. The channel itself is a ruthless aversion, stripping away the filter with pithy and accurate sum-ups of the output of classic bands across the spectrum:
* Tweet Up. The reasoning for this is that Lucas Films owns the trademark for the word Droid, nevermind the other bamillion apps with Droid in the name that aren't being sued right now.
* Tweety And The Beanstalk", Sylvester the Cat was knocked clear through to China after getting sat on by a giant, and met up with a Chinese Tweety.
* Tweety and the Magic Gems, and Marc Antony in coconut trees, tossing coconuts at crabs. Red crabs are worth three points, and green crabs are worth five.
* Tweety and the Magic Gems. Their destinations are North America (New York and San Francisco), Argentina (Buenos Aires), Brazil (Rio De Janeiro), England (London), France (Paris), Italy (Rome), Germany (Berlin), Russia (Moscow), Egypt (Cairo), Africa (Kenya), India (Calcutta), China (Bejing and Hong Kong), Japan (Kyoto), and Australia (Sydney).
* Tweety does this with one of his more memorable lines in the cartoon,
* Tweety is another example. He's content to sing and swing in his cage until Sylvester starts trying to eat him, and then retaliation comes.
* Tweety's High Flying Adventure: At the end of of the prologue. Sylvester says "Well, first things first" while he is walking towards the camera and his face fills up the screen making it completely black.
* Tweety the canary, Porky Pig, and Petunia Pig have heads that are shaped like human heads.
* twelfth, and his grave is marked by the gigantic prosthetic arm he used as a weapon.
* Twelfth Doctor. After that ordeal, he only has his regeneration adventure to go through, which ends with him telling the self to come that they should "Always try to be nice, but never fail to be kind."
* Twelfth Doctor fit this to a tee, complete with Clara hugging the Doctor from behind repeatedly.
* Twelfth Doctor, she has to wait a whole week before the brow lowers again.
* Twelfth Doctor's title sequence, who was so impressed, he offered him the job!
* Twelfth Doctor Titan comics are affected by this, which is why they need to steal the minds of others.
* Twelfth Equestriad Interview: As Claire Pie can create permanent Gates (wormholes) through a major effort (taking her years to decades of preparation) this is currently possible only between the Earth and Paradise, the moon Luna, and Mars. When a permanent Gate is set up, the Ponies run a railroad through it. In time, the whole Solar System will be linked by rail through the Gate system. After the passage of even more time, the Ponies hope to have Casual Interstellar Travel by this means.

* Twelfth Krampus Night by Matt Manochio is a Medieval story set in Bavaria about a girl trying to escape a castle being invaded by Krampus and Frau Perchta.
* Twelfth Night, Act III, scene iv: "If this were played upon a stage now, I could condemn it as an improbable fiction."
* Twelfth Night Adventure to integrate himself/herself into the setting.
* Twelfth Night. After the Burial Shroud of Christ is warped by Hermetic magic it gains the special power Circle of Decay, which affects all creatures within a half mile. Any creature less than 35 years old will age at a rate of 2.5 years per minute. Any creature 35 or more years old ages at a rate of 10 years per minute.
* Twelfth Night, and that Feste was originally supposed to appear in the scene.
* Twelfth Night And then the actually-not-dead Sebastian shows up and, of course, is promptly mistaken for Cesario. Zany hijinks ensue.
* Twelfth Night an example, as her name is only mentioned in the play's final scene.
* Twelfth Night: at the end of the comedy, Malvolio, abused and humiliated, announces his intention to have his just revenge upon his persecutors, striking a discordant note in the middle of an otherwise happy ending to the action.
* Twelfth Night, both main characters assume that their sibling was lost in a shipwreck and that they alone survived.
* Twelfth Night, but is actually attributed to the Klingon mytho-historical emperor Kahless, predating the Bard by some 700 years.
* Twelfth Night claims to avoid it because "it is better to be a witty fool than a foolish wit."
* Twelfth Night disguise on him. Which leads to a lot of confusion when he shows up in town (as well as revealing to her that Sebastian is alive after all).
* Twelfth Night, Feste fakes a conversation between himself and "Sir Topas the Curate" outside Malvolio's cell.
* Twelfth Night has Viola, disguised as a boy named Cesario, talking about love with Orsino, with whom she's fallen in love. Orsino claims that women aren't capable of loving very strongly, and Cesario responds by telling Orsino about his..."sister".
* Twelfth Night), he threatens to murder Cesario, comparing himself to an Egyptian thief who murdered his own lover to keep her from being tortured. He's inadvertently revealing that Cesario is the one he's in love with.
* Twelfth Night: "If music be the food of love, play on" is quoted a fair bit, without the next part, "Give me excess of it, that, surfeiting,/The appetite may sicken, and so, die." It's not a cheery request for more music to arouse more love, it's an order/prescription for an emotional purgative: give me enough to make me (metaphorically) throw up and stop being in love.
* Twelfth Night, is a master of this. For example, he attempts to prove that Olivia is a fool so that the people asked to "take away the fool" will remove her instead of him:
* Twelfth Night is often assumed to be quite romantic and/or demonstrative of a love of art. Very few include the rest of the quote: "Give me excess of it; that surfeiting,/The appetite may sicken, and so die."
* Twelfth Night is seen fixing Andrew's tie, much to Andrew's confusion.
* Twelfth Night: Malvolio has quite the indulgent one about marrying the rich Olivia.
* Twelfth Night, Olivia is in deep mourning for her brother. The Duke is trying to convince her that a more suitable form would be to perpetuate his family line by marrying and having children. The Jester even calls her a fool for mourning her brother's soul being in Heaven, much to Olivia's shock.
* Twelfth Night, Olivia meets Sebastian and mistakes him for his sister Viola's male alter-ego Cesario, with whom she has fallen in love. Sebastian's reaction is to bewilderedly, but quite happily, go along with the romantic advances of this unknown lady and agree to be "ruled" by her.
* Twelfth Night: Orsino (A) loves Olivia (B), who falls for Cesario/Viola (C), who loves Orsino.
* Twelfth Night play the ending this way. Viola and Sebastian are reunited and

happily married to the Duke Orsino and the Countess Olivia, respectively. However, Olivia's whole marriage is based on the fact that she actually fell in love with her husband's twin sister, Sir Andrew leaves Illyria in disgrace and heartbreak, Anthony the pirate has lost the young man he loved and has been arrested while trying to help him, Toby Belch and Maria are trapped in a loveless marriage, and Malvolio has sworn revenge on the whole cast. Feste's sad song "For the rain it raineth every day" doesn't help.
* Twelfth Night Scaramouche, Malvolio the Pierrot, Feste the Arlecchino, Maria is the Colombina to Sir Toby Belch's Capitano, with Duke Orsino as the hopeful Innamorato to Olivia, ending up with Viola after she reveals her disguise as Cesario, and Olivia falls for Sebastian, mistaking him for Cesario, who is really Viola, his fraternal twin sister.
* Twelfth Night, several characters decide to bring Malvolio down a peg and write a fake love letter to him from their mistress. Because he is a proud fool, he immediately falls for it and believes Olivia is infatuated with him. When he follows the ridiculous instructions left for him in the note, Olivia thinks he's gone mad and has him locked up as a lunatic.
* Twelfth Night shows up and gets mistaken for Cesario, he thinks he's being attacked for no reason, and a fray results, ending with Sir Toby (who's jumped in to help his friend) bleeding at the head.
* Twelfth Night, Sir Toby and Fabian urge their friend Sir Andrew Aguecheek to fight Cesario (Viola in disguise) in a fencing duel, with the hopes that Andrew might have a better chance of gaining Olivia's hand. Toby and Fabian accompany Andrew as dueling seconds, urging Cesario to participate in the duel. Moments later, Antonio encounters Cesario, mistaking him for Sebastian and asking for the money which he had entrusted to Sebastian. Later on, Andrew attacks Sebastian, mistaking him for Cesario, only for Sebastian to thrash and bruise Sir Andrew.
* Twelfth Night, Sir Toby and others overhear Malvolio talking about how he would like to marry Olivia and stop Toby from drinking. This kicks off their plan to humiliate Malvolio.
* Twelfth Night, Sir Toby Belch and Sir Anderew Ague-Cheek sing drunken songs in the middle of the night until interrupted by the Countess's manservant Malvolio.
* Twelfth Night, Sir Toby Belch, Sir Andrew, and company do this to spy on Malvolio. Depending on the imagination of those involved, it can get truly over-the-top. (One truly magnificent amateur production involved Sir Toby Belch freezing in a stupid pose and hissing "Hey Andrew, I'm a topiary!" Obviously, that line was added.)
* Twelfth Night Sir Toby Belch spends the entire play mooching off him and otherwise taking advantage of him.
* Twelfth Night stands outside the dark cell in which Malvolio is imprisoned and enacts a conversation between himself (Feste) and "Sir Topas", the minister supposedly sent to "cure" Malvolio of his insanity. Malvolio falls for it, of course.
* Twelfth Night. This being a comedy, however, things work out all right.
* Twelfth Night, Toby, Maria, Fabian, and Feste decide to humble Malvolio, who has been dismissed by Olivia for following the instructions in the forged letter which he believes is from Olivia, much to her displeasure; Feste puts on a fake beard and gown, disguising himself as a curate priest.
* Twelfth Night, trying to explain to Orsino that sometimes you don't end up with the person you want and there's nothing you can do about it. She does get the guy at the end of the play, though.
* Twelfth Night: Viola loves Orsino, but tries her best to set him up with Olivia, the girl he professes to love, instead.
* Twelfth Night when Toby Belch and his accomplices eavesdrop on Malvolio reading the fake love letter.
* Twelfth Night (whom Viola believes is dead), mistakes him for "Cesario" and winds up marrying him before the truth all comes out.
* Twelfth Night, with the song "When but I was and a little tiny boy." Some productions make the song a dark epilogue instead.

* Twelfth Night with Viola speaking to Feste who, being a clown, uses this trope as comedy:
* twelthofadime, a comedy sketch channel spinoff of Makemebad35 hosted by Kyle McIlrath Adams.
* twelthofadime, they all just tell him to shut up. While Kyle tries and fails to hunt, Baxter and Charlie instead try to replicate the experience of Facebook, Twitter and television.
* twelve, and it was not unheard of for men to reach lieutenant before their 18th year. The minimum peacetime recruitment age for enlisted men in all three services remains a relatively tender 16 years to this day.
* twelve bowls whose official names consisted solely of the name of the corporate sponsor and the word "Bowl". As of the 2018 season, the count is seven.
* twelve cop cars. Just as he's about to shake them off, he gets distracted by a pretty girl who walks by and promptly wipes out inside a construction zone.
* Twelve Deadly Coins, there is Rung-erh, the daughter of a powerful martial arts clan, who spends the whole film wearing purple robes and a velvet cape. She is also the best fighter of the entire film, taking plenty of names single-handedly.
* Twelve Doctors of Christmas, and thus makes much more sense if the reader has already seen it.
* twelve-foot-tall monstrosities with human upper bodies mounted on long robes concealing God-only-knew what.
* Twelve Forever and various buried objects come to life, with geography like ranch dressing springs, which is in constant flux. When Esther tries to analyze the place scientifically, it actively thwarts her attempts until she accepts she'll never really understand it.
* Twelve Forever does, in fact, take place in the early 2000s (possibly either set in 2000, 2001, 2002 or 2003) where Reggie is 12 (she might be born in between late 1987 through early 1991) as well as her friends, Todd and Esther (who are born in between 1988 through 1991).
* Twelve Forever ends with the trio managing to defeat the Butt Witch, depowering her back to a smaller than normal form which Big Deal takes away. The three make up and celebrate Todd's birthday back in the real world along with Gwen with the implication Reggie will tell her about Endless when she asks about Reggie's arm. All the while Reggie's key glows, causing a flash to appear in the ocean near Endless Island. What it is (a new key, an island, another newcomer, etc) is left up to the imagination.
* Twelve Forever Episode 23, "A Stranger Forever", after Todd and Esther discover Elmer is a thief who steals people's favorite things, they run to Reggie to warn her. When they get to her, Esther is about to warn Reggie but needs to catch her breathe, Todd comes in behind her and tells Reggie the truth about Elmer, which angers Esther since she was going to tell her.
* Twelve Forever, main character Reggie develops a crush on Connelly after seeing her working on her film. Later Gwen comments on how seeing Todd with a guitar seems right.
* Twelve Forever. She has the power to turn her friend Shane into different things, and can use magical weapons given to her by a flying octopus to fight.
* Twelve Forever. Two months later, showrunner Shadi Petosky announced on Twitter that the series would not continue because it didn't become a huge hit that justified moving to another studio; also, the revelation that series creator Julia Vickerman had been fired for mistreating the series crew and was exposed as having written social media posts with pedophilic tones for years ultimately soiled its reputation so no studio would touch it with a 10-foot pole. Netflix did not comment on the ultimate fate of the series, but Petosky implied they were not to blame.
* Twelve Forever: While not advertised much, word did spread that its lead, Reggie, was gay and a subplot featured her gaining a crush on a fellow schoolmate. Two of the residents of Endless Island were also a gay male couple. This allowed the series to gain fans from the LGBTQ community.
* Twelve Forever, with the exception of the first which is a regular-length episode.

* Twelve Houses that is a front for the villains’ coup d'état conspiracy).
* Twelve Hundred Ghosts and shifts from the regular work to steamy romances, comedies, parodies, and back again.
* Twelve Hundred Ghosts "Bah, humbug!" and "three spirits/ghosts" get repeated about a dozen times by different Scrooges and Marleys.
* Twelve Hundred Ghosts. Even after his reformation, Scrooge buys the last big bag of Walkers Crisps from Canadian Tire, teases a young boy about it, and gets the Cratchit family just enough food to keep going instead of the prize turkey.
* Twelve Hundred Ghosts has a twofold one, beginning with a narrator talking about Charles Dickens and the story he wrote that was frequently adapted, then transitions into the Looney Tunes watching Twelve Hundred Ghosts in a theater.
* Twelve Hundred Ghosts Jacob Marley died by choking on his cereal, then face-planted into the bowl and drowned.
* Twelve Hundred Ghosts shows Ebenezer Scrooge used to be nice when he was younger, particularly as a baby when he was delighted to get a rattle as a Christmas present.
* Twelve Hundred Ghosts zombies and vampires are mentioned a few times, but are never brought up again, and the story continues as normal.
* Twelve Incompetent Men by Ian Mc Wethy is a short play based entirely on this premise. They have footage of the defendant committing his crime on camera. He even shouts out his name in the footage. The play starts with a judge saying that if it took more than thirty minutes for the jury to deliberate, he would be very disappointed in them. Needless to say, the verdict came back innocent.
* Twelve Labors of Hercules, Atlas succumbs to this trope after conning Hercules into holding up the sky in his place. Hercules politely asks Atlas to resume holding it up while he fetches a cushion for his shoulders, hands his burden back to him, then leaves him like that.
* Twelve Months. In general, there is no indication there is anything but friendship between them or that he is more special to her than the rest of the Months.
* Twelve Months: The Stepdaughter is not younger than the approximately fourteen-year-old Queen, and this is all we get (and even that estimate is made by one of the minor characters who might be mistaken). It was probably done deliberately, since the play is extremely popular in Russia and gets produced everywhere from kindergartens to opera houses. In particular, depending on the age of the Stepdaughter (and the target audience), her romance with April can be played up, kept as subtext, or omitted entirely.
* Twelve O'Clock High. After the same man gets busted from sergeant to private and then promoted back to sergeant later the same day — on two separate occasions — the general responsible for the demotions and promotions tells him to get zippers installed on the extra stripes.
* Twelve O'Clock High of the requests are ready to be submitted to higher headquarters, Savage should have been able to convince the crews that his methods are justified. Savage remarks that it's "a hell of a way to run a war."
* Twelve O'Clock High. So much a father to his men that it is undermining his combat effectiveness, as he can't make the hard decisions to send men to their deaths. So beloved by his men that after he is relieved of command and Gen. Savage replaces him, EVERY pilot in the group requests a transfer out of the 918th.
* Twelve O'Clock High, the commander of the 918th Bomber Group, already depressed after a raid went badly, is further irritated when Lord Haw-Haw taunts the Allies with knowledge of the raid and specifically mentions the 918th.
* Twelve O'Clock High. Upon coming in and taking over when the Commander of Bomb Group has been relieved, the first thing General Savage does is have the Vice Commander (Number Two) of the Bomb Group brought to him under guard, then he proceeds to tear him a new asshole, relieve him of duty, and assign him the biggest fuck-ups in the outfit. He basically tells him that one of the reasons the commander had to be relieved is because he was forced to do too much because he, as Number Two, shirked his duties and didn't take enough tasks off the Commander's

shoulders. Savage selects a more competent Vice Commander from the other officers in the outfit, and the disgraced officer spends the film trying to redeem himself (which he does).
* twelve overs - nearly an hour's play. Panesar was a strong rival for McGrath's claim to be the world's worst batsman, and he held out much longer.
* Twelve Red Lines: Dragon pulls this on Jones in Loguetown, just as she's explaining to the Straw Hats and Sabo that Luffy is Dragon's son.
* Twelve Red Lines explaining many of them away with quirks of biology.
* twelve seasons: Winter, Fool's Spring, Second Winter, Spring of Deception, Third Winter, The Pollening, Actual Spring, Summer, Hell's Front Porch, False Fall, Second Summer, and Actual Fall.
* Twelve Sharp, a food fight breaks out at the bonds office when Joyce barges in looking for trouble while Stephanie, Connie, and Lula are eating lunch. It gets settled by new file clerk Melvin zapping Joyce with a stun gun.
* twelve straight hours. Logan Cross, Sid Fabulous, "Lightning" Tim Lutz, American Kickboxer II, Dark Angel (Williams) and DJ Tom Sharp were the wrestlers who pulled it off.
* Twelve Strong One of many films where New Mexico doubles for Afghanistan.
* Twelve Tasks of Asterix, who gets to 'retire' to a lovely Italian villa with Cleopatra.
* twelve times the Austrians, thus freeing the manpower needed to mount an effective counterattack
* Twelve Tribes, the one almost identical to Earth humans is called "the Neran."
* Twelve US championship medals, nine of them (1996, 1998–2005)gold
* twelve vertically-aligned cylinders, and a second trigger that flips the cylinders around so you can quickly switch to the second after emptying the first. It even has the slam-fire ability of the Strongarm.
* twelve-year-old comic relief character Konohamaru.... Of course, he later recovers from the hit and doesn't even need to repair that body.
* twelve-year-old girl can demolish fallen angels and vampires without blinking.
* twenties the right things to happen to him (including not getting major illness, or a divorce, or a job market bust) to succeed.
* twenties, used to denote frustration or disbelief, the way Herman used it.
* Twentieth-century Dutch illustrator Anton Pieck is very popular for painting and drawing romantic scenes of 19th-century life and fairy tales, which have been printed on countless calendars, postcards and other merchandising. But, you guessed it, average art critics regard it as petty kitsch.
* Twentieth Century has Oscar and Lily rehearsing the same play they were at the beginning, with Oscar giving the same talk, though this time his "I love you all" clearly means more to Lily. Lampshaded by Owen O'Malley.
* Twentieth Century leads his actress, protege, and lover, played by Carole Lombard, to protest "I'm no Trilby!".
* Twentieth Century, Lily vents about Oscar only to notice him having entered her apartment behind her back.
* Twenty 20 cricket is far more popular than traditional Test cricket or even One Day Internationals, and thus many purists refer to it as "hit-and-giggle".
* Twenty-Fifth Bam By the end of the Hell Train arc, his combined Super Mode power is absolutely insane for someone of his level.
* Twenty Four Nights, a story about a gay man who lives with his sister who writes a letter to Santa Claus.
* twenty-four years - repeatedly raping her and fathering seven children with her during that time.
* Twenty Gyarados Bill Gaiden has the title character face his biggest direct opposition in General Javelin Wataru (Lance's grandfather), and Denki Tekina, an Elite Four member specialized in Electric-types.
* Twenty Gyarados Bill Gaiden tells the story about how the title character went from a simple crewman in a fishing boat to the terror of coastal Johto. It all started with his crewmen giving him a Magikarp as a mocking gift and comparing him to it, calling him the "Magikarp of humans".

* twenty. Like Sokal, they set out to make them as ridiculous as possible, loaded with buzzwords, politically fashionable language, and an ideological bent. By the time they admitted the hoax, only six were rejected. Four had been published, three had been accepted for publication, seven were still under review. One of the published papers had won special recognition in its field.
* twenty million years. In retrospect, this is seen as a brief, nasty interregnum.
* twenty-nine years (i.e. he was not ethnic Han Chinese like the vast majority of Taiwanese people today, but rather a member of one of Taiwan's native Austronesian-speaking peoples) , who chose to be sent to Taiwan rather than Japan after Indonesian soldiers "arrested" him. He died of a heart attack in 1979.
* Twenty One Pilots’ “Stressed Out” breaks the rhyming structure of the first verse with the final line: “I wish I didn’t have to rhyme every time I sang.”
* Twenty One Pilots album (in which the character features prominently).
* Twenty One Pilots by posting clues and journal entries about a dystopian city called Dema on a hidden website.
* Twenty One Pilots has a song called “Glowing Eyes”, which uses the term as a metaphor for anxiety.
* Twenty One Pilots have "Car Radio," about a man whose car radio has been stolen discovering how much he's been using music to block out uncomfortable thoughts.
* Twenty One Pilots music video for their song "House of Gold", both band members are performing while cut in half.
* Twenty One Pilots video "Stressed Out", the music stops for about ten seconds while Tyler and Josh perform an extremely elaborate handshake.
* Twenty or so years ago, Crest showed commercials where half an egg had been treated with their toothpaste, then the whole thing submerged in an acid solution. The treated side remained hard while the untreated shell became soft and malleable. What they didn't tell you is that virtually any fluoridated toothpaste would give you the same result.
* Twenty Pageants Later is told from the POV of a beauty queen's younger/less attractive sister, when her middle school decides to hold a beauty pageant.
* Twenty-seven members of the New Zealand national rugby team developed food poisoning two days before the grand final of the 1995 Rugby World Cup, where they were to play host nation South Africa. Legend has it, it was a deliberate act by a mysterious waitress called "Suzie".
* Twenty-Six Martyrs of Japan) who descend from the survivors of the persecution.
* twenty thousand bees that had somehow swarmed into a car in a couple of minutes.
* twenty thousand, who wore wood-and-feather angel's wings on their backs as they charged.
* Twenty Three Hundred AD: Tau Ceti II and Epsilon Eridani II, otherwise known as Kwantung and Dukou, respectively. Also, Tiranë and Montaña.
* Twenty Three Hundred AD: The planet Beta Canum. Also the Station Arcture, which orbits Arcturus.
* Twenty years after his first published story, "Marooned Off Vesta",
* Twenty Years Late, Adam the Thin Man explains to the Human Resistance that, unlike the Sectoids, which are simply cloned en masse, Vipers/Thin Men reproduce through parthenogenesis — a real-life phenomena observed in some reptiles where the female spontaneously becomes pregnant with clones of herself. It's unclear if this is the result of genetic tinkering by the Ethereals or if they always reproduced in this way, as the author has admitted to disliking the Alien Rulers DLC that introduced the "Viper King", the only male Viper ever seen in XCOM canon.
* Twenty Years Late. And it doesn't stop screaming in horror until its field commander pulls it aside and kills the mutilated cyborg it was trying to probe with a plasma cannon.
* twenty years later. It's especially tragic as she never admitted she loved him while he was alive.
* Twenty years later, Shifu has allowed his pride and that failure to blind him to the potential of his other students, and prevents him from seriously considering

that Po is the only hope of defeating Tai Lung. Meanwhile, Tai Lung has only gotten more full of himself while wasting away for twenty years, and when he finally confronts Shifu, he reveals that the motive behind everything he ever did
* Twenty Years Late the "Thin Man" admits to its interrogators that, despite looking like a (creepy parody of a) human male, it's actually biologically female, as are all of its species.
* twenty years shacking, with a vow to never return to the Grand Line, all so he could have something resembling a normal life again – only to break that promise because he wasn't able to let go of his grudge against Luffy after being beaten by him. Every terrible thing that's happened to him since then, including being incarcerated in Impel Down and having his past as a Roger Pirate exposed, can be traced back to his decision to chase after Luffy, regardless of the consequences.
* twenty years. Their children are lactose intolerant, for some reason. If we accept that a single line from a Gilbert and Sullivan parody song was intended to be an accurate source of information.
* twice across a younger Clara when he finally notices these echoes and starts investigating them. Once again, Clara does not seem to recognize him as the weird man she chatted with on the playground.
* twice. Admittedly, both times they were doing the "Run away until the enemy gets disorganized then reform and kill them." trick.
* twice, albeit a heavily-customized one. True to the cutscene, it can't kill anyone else with two headshots while you're wielding it, either, no matter how many points into the relevant skill you invest.
* twice ...also from across the room, while in full sight of her target.
* twice. among young animation fans, and also ended up spawning a line of DTV sequels.
* twice) and again only a crater remains. He is later recovered when his father does indeed find the body.
* twice, and as a result, he intended to drag the villain into the murky depths with him.
* twice and quiet, reserved way of leading leads people to underestimate how dangerous of a quarterback he is. Despite all that, he never complains or puts down anyone and takes the blame with stride.
* twice and she was fatally injured, too, dying just moments after him.
* twice and the second was when Rebecca asked everyone to dress in 19th century attire for the bar's centennial. In both cases, the organizer is the only one who dresses up.
* twice, and was clearly more than a hallucination, giving Cassandra advice she couldn't possibly know!
* twice as much work to do if a Williams family reunion is ever going to happen.
* twice at friendly troops to pinpoint his location), he wanted to use an airstrike in the middle of a populated town to kill the sniper. He said that his commanders (obviously) denied this, and proceeded to mock their rationale that it would lead to civilian casualties. Brr indeed.
* Twice at least. A second battle during WWII took place but it was a withdrawal instead of a sacrifice.
* twice, at which point America immediately decided not to keep him), then again after France captured him. Both times, the box had 'FUCK' written on it, in big, bold letters.
* TWICEBecause of that, some of her nicknames are "Black Swan" and "Ballerina of Tragedy".
* Twice Blessed apparently has giant magic robots (golems, warforged, constructs).
* Twice Blessed: Cade Masters ruins Melchior's chances with a very attractive barmaid when he innocently mentions Melchior's troubles with his Rod of Wonder.
* Twice Blessed has a kobold bounty hunter that uses a very large gun (or a small cannon) with a Chinese dragon motif.
* Twice Blessed has Ustav, which is obviously Russia, Lajuria, which is obviously Spain, and others.

* Twice Blessed has Vadim as a main character, who meets most dwarf stereotypes, but comes from a Russian-type culture and has a matching accent, drinks Vodka, uses the word "brother" in place of "laddie", and never seems to feel the need to point out that he is a dwarf.
* Twice Blessed with a room full of bounty hunters who are out for Cade's head.
* twice by a bolt of black magic. When her now-husband prince burns the copy of the spell that summoned it so that its powers can never be used again, she materializes from the resultant flames. Also, Jean-Bob is knocked out at the climax of II and brought back as a side effect of the spell that turns Odette into a swan and back.
* twice, by two different mechanisms (the latter being the result of magical detritus). It appears that all dogs are sentient in some way, but Gaspode has human-level intelligence and can actually speak Morporkian.
* Twice Charmed, Anastasia and Drizella compete over who will win the Prince.
* Twice Charmed, Anastasia and Drizella torment Cinderella as Franco prepares to shrink her.
* Twice Charmed ends with the wicked fairy godfather helping an evil queen being chased by seven dwarfs up a mountain.
* Twice Charmed, Franco DiFortunato definitely is hammy, as are Lady Tremaine and the stepsisters.
* Twice Charmed, Franco DiFortunato is one to Cinderella's Fairy Godmother. Franco is a Wicked Fairy Godfather, and his deals come with a destructive catch.
* Twice Charmed, Franco DiFortunato uses gambling motifs in his wordplay and songs.
* Twice Charmed, Franco DiFortunato wagers the Tremaines' livelihood on their deal.
* Twice Charmed gives Lady Tremaine a Wicked Fairy Godfather who helps her plan revenge on Cinderella.
* Twice Charmed, Lady Tremaine tries to summon her Wicked Fairy Godfather, Franco DiFortunato, to wreak havoc at the ball. But since they failed to separate Cinderella and Prince Charming, the Tremaines are forced to do Franco's chores for eternity.
* Twice Charmed, Prince Charming says that he loves the maiden at the ball, but the Grand Duke thinks he's referring to him.
* Twice Chosen has Alpha explicitly refer to Rue as this, as there are only five coins and she just happened to follow the other Tributes into the cave.
* Twice Chosen, the new Rangers, particularly Liv, find it odd that an alien ship for a species that existed millennia ago can so easily accommodate humans. Alpha explains that this is due to the Zeo Crystal influencing evolution on many planets so that all planets where life evolves under its influence share a humanoid appearance.
* twice continuities, the title isn't a term Cybertronians use to describe themselves.
* twice-cooked pork, and the emperor has a very stereotypically Chinese look. The country is depicted as an emerging world power, quickly gaining influence and able to gain leverage with the rest of the world. Kakin is also located on the continent of Azia (though it's actually pronounced "AH-zee-ah")
* twice due to his position being eliminated. The second happened years later, when he decided to retire altogether. He hasn't been seen since 2012.
* twice, first after her friends seem to be favoring Cheese Sandwich over her, and second after losing the Goof-Off to him.
* twice.) First, a nuclear submarine has a reactor accident that ended up destroying the ship, and only one sailor got out before it sank. Then, later on, a bunch of people were being ferried out to a rendezvous with a different ship by helicopter. The chopper was old, and the transmission exploded, causing the chopper to crash into the ocean within sight of the ship they were supposed to be meeting up with. Only one man managed to get out alive and was rescued by the ship.
* twice: first because she's pregnant, then because going with him would keep her from ever seeing the daughter from whom she was separated ever again.
* twice; first between the Rumor and Spaceboy, and then the Kracken's obvious unrequited feelings for Vanya, as well.
* twice, first into a Planeswalker and later into one of the gods of Theros.

* twice, first when his paranoia gets the better of him and then when the second burial site is sold and will be dug up for construction. He ultimately pulverizes the bones before dumping the remains off a cliff.
* twice. First when they're trying to dig into Kevin's garage to get to the jawbreakers inside only to end up in his bathtub. He pulls the plug and they go down the drain. It happens again when they try to dig under the Kanker's trailer to find Eddy's brother's treasure. They end up in May's bathtub.
* twice. For context, one of his crimes included ATTEMPTING TO BLOW UP ALL OF DETROIT. In the Season 3 opener "TransWarped", however, he is finally arrested for his crimes.
* twice for him, since he killed the guy who ruined her life when he murdered her parents. And Light… it's made very clear that he has absolutely no interest in her other than using her to kill people. Yes, even when she's only wearing sexy lingerie and is throwing herself at him. This is also the reason the readers pity her, despite the fact she is a mass murderer.
* twice hang the iron maiden over a fire just to make his death as painful as possible. Nice guys.
* twice. He allows Twilight Sparkle to get her hooves on the Elements of Harmony, since he's corrupted the bearers and rendered them unable to use the Elements, and he leaves Twilight to her own devices in the unraveling Ponyville because he delights in her misery and helplessness. As such, when she regains her confidence, gets her friends back and fighting, and unleashes a devastatingly harmonious rainbow on his face, he's very much taken by surprise.
* twice he is one of the richest men in the city. Then he decides to invest in the newly invented steam railway and becomes the Disc's first rail baron.
* twice he sold his ride on the Duff Blimp to enter her in a beauty pageant when she was suffering from a lack of self-esteem. Several times, she comes to realize this and loves him back. The current page picture is from the ending of "Lisa's Wedding" when she reunited with him.
* twice, in 1980 and 1997, and the mistake was noticed only after the latter's broadcast.
* twice in 2013 alone; in both cases with Roman Reigns as a focal point:
* Twice In A Lifetime, episode Curveball. In this episode, the father was pressuring the son to be as good as possible in baseball, while boasting his success back in high school. For this episode, the teenage son gets the early episode death, and is sent back — witnessing his father's younger self flub that swing.
* Twice In A Lifetime had an episode where a woman finds out that a man she loved kept sending her letters after he moved away but her mother intercepted them. When the woman dies bitter and alone she is given a chance to go back in time to fix her mistakes. However, when she arranges that her younger self gets the letters, it screws things up for others and she now has to make sure that everyone gets a happy ending.
* Twice in a Lifetime has a once-promising reporter who has spent a career doing lame celebrity stalking stories dying while rummaging through a garbage bin for info. She's sent back to stop her younger self from going down this path with an expose of a troubled star. The reporter finds it hard to stop her younger self before revealing the secret only she would know: The younger woman's groundbreaking story of a college frat selling drugs was completely made up. That's why the older woman fell into a paparazzi life, she knew deep down she didn't deserve to be a real reporter. Pushed, the younger version refuses to do the expose after all. The older version is returned to a new life where she ended up redeeming herself to become a respected reporter after all.
* Twice in a row in "Plankton's Good Eye" — in a flashback with some fish and with Sandy stomping on him.
* Twice in chapter 7. First, when he says he needs to cause more chaos to get back in shape, he's enclosed in a dodecahedron-shaped bubble. Second, when he tells Luna that "The timing is key", his head morphs into an old-style skeleton key.
* Twice in Episode 205 during the kemari game. Once when the referee Ururu

Tsumugiya throws the ball up into the sky, and once when Jinta Hanakari knocks Kon (in Ichigo's body) into the sky.
* twice in one day, prompting Buddy and his cousin to punish him by dousing him with flour and water.
* twice in one scene. Peeves shoots her in the ear with an ink pellet and, when she retaliates by throwing things at him, he empties an entire bottle of ink over her head.
* twice. In the musical it's based on, both times there was little Christine could do during the scenes; not so in the film. First she just watches worriedly during Raoul and the Phantom's sword fight, and then when Raoul gets the upper hand and is about to stab him she tells him not to.
* Twice in the Season 3 episode "Please". First, Wilson Fisk pays an inmate named Jasper Evans to shank him as part of his plans to manipulate the FBI (and Ray Nadeem specifically) into moving him to a hotel he secretly owns. While Fisk is being transferred, he's subject to an assassination attempt by gunmen working for the Albanian gang he snitched on to Nadeem, which is foiled by Dex.
* twice. Lampshaded in that someone else enters through the door, pointing out that it was unlocked.
* twice" Luckily for Grissom, it was just mustard. But the second time he does it, much later in the series, it's Catherine who warns him that one of these days he'll really regret doing that.
* twice more in episode 13 - the first time by grabbing Hayate and taking him to safety after he ejects, and the second time by stopping Freyja's freefall.
* Twice no less! In another situation described in the Tyranid's 5th edition codex, a T'au colony was attacked by the Tyranids, only be saved by Necrons that had been in hibernation on the planet's moon. The Ethereal in charge of the colony threw a "Thank you for saving us/Welcome to the T'au Empire" celebration that lasted for three days before the Necrons grew bored of the amusing situation and decided they wanted
* twice novels: once when a young man sees his friend standing over the arrow-shot corpse with a bow in hand, and again when the young man's father catches him in the process of removing the arrows to conceal the evidence.
* twice: Once in "A Rickle in Time", out of shock of Morty knocking out Rick (this isn't explicitly seen but is mentioned by Morty), and again in "Total Rickall", during the elevator flashback where she says she peed her pants the moment they got stuck.
* twice. Once when she's dying and transfers her consciousness to a ship's computer in order to continue her mission, and then again 30 years later when the ship is about to self-destruct and Jedi Cray Mingla—who is suicidal—offers her body so Callista can escape the computer. The first time is just better than death, but when she loses all contact with the Force after the second transfer, there is much angst.
* twice, only for her to show up alive and well both times, the first time being a failed hunt for the nest, the second time being snatched up by Stormfly to safety during the Red Death's attack.
* twice (or possibly post-FAILURE collapse) after the second challenge, but there's little that Madison can do besides disinfect his wounds and wait.
* twice over the course of the story, neither time with any explanation given whatsoever.
* twice QB woes, Romo would go on to be the Cowboys' starting QB for almost a decade and set most of their franchise career passing records. Ironically, Romo himself would end up on the other side of this a decade later, when he went down with an injury in a 2016 game and was replaced by Dak Prescott.
* twice series. At the end of the first two volumes, Mike is shot up beyond all belief, but we know it's not actually going to kill him off. The impact is lessened the second time.
* twice. She doesn't know her name or how to control her magic, but she can remember how to read a language no longer used in the modern world.
* twice she pulls the trigger. Of course, one of them had the foresight to wear a

bulletproof vest...
* Twice Shy: Two characters with mutual love are both too shy to openly return the other's feelings.
* twice simply switches to her fangirling over both of them simultaneously.
* twice so that people will spill intel that she needs. Both times it works.
* twice. The first time she only "cracked" a nail, rather than actually breaking it, but that was still apparently a good enough excuse for her to practically throw Indy's gun out the side of the car.
* twice. The first time was with her team captain, who turned out to be gay
* twice the man you are!", right before losing his footing and falling onto a running table saw which slices him in half through the abdomen.
* Twice The Triplets comic, "Kiley Makes a Comic Book", Kiley is given a hanging wedgie by Summer.
* twice. This was a hit on release, remained well known through the rest of the 30s and 40s, and then slowly sank out of sight.
* Twice-Told Tales: In "The House of Seven Gables", Gerald traps Alice in the basement grave of Mathew Maulle, then goes to the study to find the vault.
* Twice-Told Tales: In "The House of Seven Gables", the eponymous house is haunted because it was cursed by Matthew Moll after he was cheated out of the property by the Pyncheons. After he was executed, Matthew's body was interred in the basement of the house.
* Twice-Told Tales: In "The House of the Seven Gables", Jonathan Maulle and Alice Pyncheon are implicitly the reincarnations of Matthew Moll and Laura Holbrook who were engaged but whose marriage never happened because Matthew was executed on trumped-up charges. They are reunited to end the curse of the house and allow them to finally be together.
* Twice-Told Tales start bleeding. Hannah says that this is because the house was cursed by Matthew Moll and that the plaster on the walls was mixed with water from the well where Moll's forge used to stand. Later, Gerald tries to pour a glass of water, only to have it turn into blood.
* Twice-Told Tales: Taken to psychotic levels by Giacomo Rappaccini in "Rappaccini's Daughter". Many years ago, Rappaccini abruptly quit academia and became a recluse after his wife ran away with a lover. Rappaccini has treated his daughter Beatrice with an exotic plant extract that makes her touch deadly; he does this to keep her safe from unwanted suitors, but it makes her a prisoner in her own home.
* Twice-Told Tale: You think you know this very well-known story... but you've never heard it told like this.
* twice to Liz Lemon in the second episode. First she assures Jenna that Tracy Morgan is a talentless nut who nobody wants to be involved with the show but Jack. Jenna is still wearing her microphone however and everybody (including Tracy) hears. Later on she attempts to apologize to him by explaining that she was just trying to calm the "paranoid and neurotic" Jenna, and also insults the other writers. This time she's actually in front of a camera and everybody both sees and hears her.
* twice to win $25,000. Previously, if you made it to the Winner's Circle both times, you played for $25,000 regardless of whether or not you won the first time.
* Twice Traumador expects Professor Paradigm to bring forth an awesome weapon that will
* Twice Upon an Age doesn't actually know how old he is, because - as he explains to Varric, who mentions it in a letter - the Dalish don't pay much attention to things like birthdays. He knows that it's been about fifteen winters since he received his facial tattoos, which he received as a young man, so they estimate him to be in approximately his early thirties.
* Twice Upon an Age franchise, and the narrative observes that she's not quite a full head taller than her dwarven companion.
* Twice Upon an Age has Mahanon and Cassandra, who are arguably as different as they could be. He's an elf hunter who grew up in the woods, reveres the Dalish pantheon, and usually has a snarky comeback. She's a human noblewoman who devotedly

serves the Maker and is often extremely serious. They are nevertheless very well suited for each other.
* Twice Upon an Age, however, owing to her love of romantic literature and gestures.
* Twice Upon an Age - including both herself and the person who gave it to her.
* Twice Upon an Age is served by both Samson and Calpernia. Unlike in the game, however, both of the co-dragons have equal limelight in the story, owing to the fact that the Inquisition recruits both the mages and the Templars. It's eventually revealed that the Elder One is playing them against each other for his favor.
* Twice Upon an Age. There are also a few side volumes which have their own related but separate framing devices.
* Twice Upon an Age, Varric mentions that he's going to have the drawing framed.
* Twice Upon an Age Victoria "my little sister" in that language. She, in turn, calls him "Nonny;" according to Varric, she's the only one allowed to use that name.
* Twice Upon an Age. While staying in Redcliffe Village, he likes taking a daily walk along the shoreline so he can enjoy the "swarthy young fishermen" working.
* Twice Upon a Time, and dryly admits to Flora he might have taken Botch's criticism too harshly.
* Twice Upon a Time Bill to pretend that never happened. Bill however rejects this, as she wants them to spend years sharing a laugh over that one, because she's just happy to know the Doctor is alive and to be working with him again.
* Twice Upon a Time) by dismissively throwing his manuscript for a "Great A-Murk-ian Novel" out a window. He later experiences it himself when Ralph tricks him into prematurely detonating his entire arsenal of nightmare bombs before time starts back up, leaving the Rushers unaffected.
* "Twice Upon a Time" Christmas, Moffat decided to give him the happiest ending possible under the circumstances.
* Twice Upon a Time did this, when the nightmare-maker Synonimess Botch accidentally puts a photograph of a half-naked woman in his slide show. He claims she was "an old actress I used to know."
* Twice Upon a Time, dreams are created in Frivoli, a candy-colored land of whimsy, and delivered by Greensleeves and his Figmen of the Imagination. Nightmares, on the other hand, are produced in the Murkworks, an ugly, smoke-belching factory, by Synonamess Botch and delivered via bombs by vultures. The plot involves Botch kidnapping Greensleeves and the Figmen as part of his plan to give the world endless nightmares.
* Twice Upon a Time, Flora falls for so long after stepping out of Rod Rescueman's flying bachelor pad, Rod has enough time to wash and iron one of his dirty capes before flying to her rescue... sorta.
* Twice Upon a Time, Greensleeves gets pinned under the door to his prison cell when Rod Rescueman knocks it down.
* Twice Upon a Time has a sequence where Ralph and Mumford are exposed to a nightmare bomb and dream of getting attacked by killer office supplies.
* "Twice Upon a Time" has the First and Twelfth Doctors meeting each other and having an adventure with a British Army captain from World War I. Upon their first meeting:
* Twice Upon a Time involves a conflict between Frivoli, the land of good dreams, and the Murkworks, the land of bad dreams.
* Twice Upon a Time, live-action) land of Din's Cosmic Clock. With the clock stopped, time in Din stops as well, at a moment when its resident Rushers are awake. He intends to start the clock back up once nightmare bombs have been planted everywhere — then detonate them and trap the Rushers in waking nightmares.
* Twice Upon a Time nightmare in which they are attacked by sentient office supplies — making matters worse, the heroes are only inches tall...
* Twice Upon A Time scenario when the Twelfth Doctor regenerates into a woman in the finale.
* Twice Upon A Time", she thinks this trope is what he meant. It's not, sadly.
* Twice Upon A Time, Synonimess Botch tricks our heroes Ralph and Mumford into

bringing him the mainspring from the Cosmic Clock, giving him control over time and the chance to cover the land of Din in nightmare bombs as part of his plot to trap the Rushers in waking nightmares.
* "Twice Upon a Time" the Captain to leave, seeing as he doesn't want to shoot either.
* Twice Upon a Time, the Destroyer of Skaro, and the Doctor of War. The First Doctor, upon hearing all this, isn't exactly filled with optimism about his future.
* "Twice Upon a Time". The Doctor lampshades this briefly, saying that he's not quite sure what to do in this situation.
* Twice Upon a Time uses a technique its director calls Lumage. The characters are made of small pieces of plastic or fabric that are moved on top of a light table. It also uses black-and-white photographs for the land of Din, which is meant to be the real world.
* Twice Upon a Time was unavailable for television airing or home video release after 1998—any attempt to show or distribute the movie would lead to the person responsible for the other cut theatening legal action. Though that changed in 2015, when Warner Archive released both cuts on DVD.
* "Twice Upon a Time"). When the Twelfth Doctor encounters the First, Twelve suggests that One is resisting his regeneration, so his face is "all over the place".
* Twice Upon a Time: Would-be actress Flora, after being knocked out during her "rescue" by Rod Rescueman, mutters "What's my next line?" as she regains consciousness in Rod's bachelor pad.
* twice when her dynamic entries are shown to have gotten the family banned from all but one of the restaurants in the general area.
* Twice with House Targaryen! Once from Valyria (they were the original lords of Dragonstone, Stannis' seat), and then again from Westeros after Robert's Rebellion. Daenerys and Viserys have spent the time since Robert's Rebellion (when Viserys was a very young child and Daenerys was just born — even from her birth, her family had already been effectively ousted from power and were residing on Dragonstone) seeking supporters and running from enemies in the Free Cities. After her birth, they were smuggled across the narrow sea to Braavos; where they spent a few years in relative safety before their guardian died of old age. Thus, Viserys had to drag her to nearly all nine of the Free Cities as a pair of orphaned runaways trying to gather some modicum of support. In
* twice with the same occidental dragon in the underground beneath Mahora — first with Yue and Nodoka, then with Chisame getting drooled over the head — before they even notice the monster.
* twice with two other men, it's an easy mistake to make. He gets better, though not before Dorian takes the chance to troll him over it.
* twice. Your squad leader has one of his legs pinned under debris, which the team cuts off in order to get him to safety. Later on, the SUV you're driving plunges into a lake, and said squad leader orders you and the rest of the team to escape and leave him to his fate, instead of risk drowning with him trying to get him out with them. To that point, he hands you his revolver, and orders you to shoot out the windshield so you can escape the sinking vehicle.
* Twig acting up and forcing him to get caught up in possibilities when he takes a fist to the face.
* Twig, and by the time the book starts in 1921 augmentations are available in several flavors, from using genetic engineering to give yourself new eye colors to infesting yourself with parasites that protect you from other parasites.
* Twig and their creations for an Academy set in an alternate early 20th Century.
* Twig and the third something called a "burrower worm." After this, his doctors decided to relocate some anatomy so he can talk with a hole in his throat.
* Twig button so that he starts pushing her by instinct, while she in turn eggs him on, which Sy fears could culminate in them making each other into the worst possible versions of themselves.
* Twig) caused a massive leap forwards in biological manipulation in the early 19th century, resulting in the British Empire being even more expansive than it was in

real history, but but by the beginning of the twentieth century teetering on the verge of overshooting itself with apocalyptic consequences.
* Twig describes himself as a "chimera," a stitched-together child made from approximately twenty-six different people in order to give him the best body possible. He experiences severe phantom pain episodes when his body tries to reject its own limbs.
* Twig employs a simple policy with experiments: test to destruction, then make another using what you've learned from that one. This applies to all members of the Lambsbridge Gang, who are fast approaching the age when they'll be terminated to make room for a new experiment.
* Twig feelings gradually shifts from subtle, to finally admitting that he doesn't see a difference between admiring someone for their abilities and being romantically attracted to them. Meaning that, yes, he's been crushing on his recurring enemies Genevieve Fray and Reverend Mauer.
* Twig for the Lambsbridge Gang, is isolated from both the other Lambs and her fellow students, and Mary has lost the semblance of a family created by the man who cloned her after he left her to die.
* Twig from any number of sources (guard dogs, knives, burrower worms...) and therefore his doctors surgically altered his throat so he could continue to try to talk his way out of it with a slit throat.
* Twig he uses to give himself an edge, hallucinating versions of his friends who guide him (which ultimately fails, as they're ultimately just Sy talking to himself) and his enemies who taunt him and force him to drive others away so he can't hurt them.
* Twig, Hubris, who warns him when his heart acts up so he can get to a doctor in time, but he becomes aware that he's living on borrowed time.
* Twig in order to improve brain plasticity and healing, which grants him the ability to rapidly retrain himself in different skillsets. As a side effect, he's developed resistance to a variety of common poisons, though there's still more that can beat him.
* Twig) instead goes to considerable lengths to keep his hostages alive, even though it creates complications.
* Twig, is a variant on the Struggler with an emphasis on community and social bonds. Acknowledging that humans are at their core a social species, his belief is that through the conflicts caused by individuals holding different beliefs, stronger bonds, and connections are created as ideas are challenged and developed, and thus humanity advances and avoids the twin dangers of "stupidity and stagnation." He therefore sees a perfect world as one made of individuals with distinct ethical and moral codes who are in constant conflict, forming bonds with one another and driving one another to improve.
* Twig, is good friends with a pair of older experiments called Dog and Catcher, and he even offers Dog a great deal of comfort just by being near him.
* Twig is the implementation of universal sterilization that only the Academy can cure, allowing them to selectively control which individuals reproduce by choosing who to give out the cure to. This is only discovered when a disgruntled academy graduate initiates the program early and distributes information on it, resulting in massive popular unrest.
* Twig know that this is a mask she's chosen to wear to disguise her genetically engineered love of killing.
* Twig, Lillian having a romantic attachment to him doesn't go over well with her superiors and both of them value her ambitions over their happiness.
* Twig Lillian to steer them towards doing as much good as they can within their parameters.
* Twig makes use of special bullets which cause this effect, fragmenting in the wound and inducing massive agony, in order to drive Academy warbeasts mad with pain.
* Twig of primordial life has allowed them to rapidly develop sapience and learn human language based on overheard conversations by reading their body language and noting how they react to his words.

* Twig, often display this trait in conflict, talking like normal children, telling jokes, or simply failing to react to the distressing events around them.
* Twig often receives these from his friends as a result of his affectionate attempts at annoying them.
* Twig or big dumb obvious monster, the Lambs would be agents who could use their harmless-looking appearance to infiltrate areas, gather information, and use that information to eliminate targets. The Academy uses them to hunt down individuals who threaten their information monopoly on the creation of Frankenstein-esque monstrosities.
* Twig still a doctor-in-training, after all. Later on, Duncan's addition to the team provides the Lambs with another medic.
* Twig, Sylvester has an example of this trope after several of his hostages (wealthy young members of the aristocracy) see him have Mary poison a socialite, and call him a monster.
* Twig technology, they tend to prefer iterative improvement over testing with a control group. Any even marginal successful experiment will be tested to destruction, and then a new and improved version will be made.
* Twig, the Ghosts, a highly advanced form of human clones which are designed to act as infiltrators, are superior physically by every measure to the older and less advanced experiments used by the Academy to enforce their will, but the Ghosts are by their nature extremely inexperienced, and the fact that they're produced underground with substandard resources to devote to training means that the Academy experiments are able to easily outmaneuver them.
* Twig the Lambs are after is fed to and eaten feet first by his own creation.
* Twig, the Lambs may be the main protagonists, but they tend to make questionable moral decisions in most situations. However, they do occasionally look out for those less fortunate (like the mice).
* Twig. The story's first person point of view provides a notably in-depth look into the kind of mental effort and ability to rapidly reach conclusions needed to make all this work.
* Twig, the unlocking of the secrets of life by an unknown genius (heavily implied to be Mary Shelley) in the early 19th century leads to the British Empire expanding far beyond its historical height, at constant war with the rest of the world and routinely employing sterilizing plagues against its enemies.
* Twig, to help the Lambs spy on Shipman and Gordon's breakup, Mary lipreads and relays Gordon's lines while Jamie does the same with Shipman's lines.
* Twig to his creators, and Sy immediately decides to flee Radham Academy at the first opportunity.
* Twig to replace the children of powerful politicians, they pick up one of the surviving clones, Mary, as a member.
* Twig used by the rebels against warbeasts to invoke sympathy from his enemies by being a screaming, injured thirteen-year-old. This is enough to overcome the fact that the rebels have been ordered to shoot suspicious children on sight.
* Twig using a series of slots in his modified spinal column. The brains help him organize and process all the data he collects for later use.
* Twig, usually children, for both biomass to grow more of them and brains which can be modified to work with the Ghost template. When a Ghost cell has gained enough members, they will bud off another cell or engage in acts of terrorism to reduce their own numbers.
* Twig, wait a few days, then cleanse it with fire and chemical weapons before letting Gorger out. Some scientists not getting out in time is considered regrettable but a necessary sacrifice. This reportedly happens every few weeks or so.
* Twig, was only surrendering in the first place to get the Duke out in the open, and he reveals his secret weapon: new rifles specially designed to gun down Nobles akin to the Duke.
* Twig when the Lambsbridge Gang offers her the family she really wants.
* Twig, where the protagonist, Sylvester, is the project of regular chemical injections which alter his mind. At one point, he runs away from his creator, only

to return just in time for his next injection, horrified at the idea of being a "real boy."
* Twig, where when Sylvester learns that his romantic relationship with Lillian is holding back her career and presenting an easy way for enemies to hurt them both, he goes to her and explains the situation, and together they come up with a plan on how to present their break-up to the outside world to best benefit Lillian. They're both still heartbroken, of course, but there's no deception involved.
* Twig, which has its origins in modified plant life instead of disease, spreads by spores which root themselves in their victims, integrating with their nerves to cause tremendous pain and then spreading by threading roots through the victim's veins. Removing sizable chunks of flesh to deny it access is the only way to stop it spreading through the entire body and turning the victim into a senseless source of nutrition as it flowers, and as the flowers often latch onto nearby objects it may also be necessary in order to move the victim at all.
* Twig which help him store, organize, and process the information he gathers in a useful manner, letting him rapidly make connections between related memories. He essentially acts as an interface tool for the brains, collectively referred to as Project Caterpillar.
* Twig, while Sylvester is able to tell Lillian he loves her, she has difficulty doing the same for him-not because of a lack of affection but because she's genuinely uncertain if she does and needs time to analyze the feeling.
* Twig, whom her creator grew fond of. All of these clones, however, do have lesser command phrases that "reset" their mind, should they grow rebellious.
* Twig whose primary driving feeling is bloodlust, maintaining her relationships with the rest of the Lambsbridge Gang primarily because if she could crawl inside of them to feel the insides of their skin they'd be dead, and she doesn't want that.
* Twig who would act as a gestalt. The plan is that the most successful project will be kept and expanded upon in order to iteratively improve the human brain until a firmly superior product is produced, but the fact that his project takes years to come to fruition means he has much less academic clout than his colleagues, who produce plagues, superweapons, and armies of reanimated corpses.
* Twig with Jamie, that by killing the Baron Richmond and taking Jamie he's finally crossed the line and made Radham and his fellow Lambs his enemy, and that he can't go home, not alive, at least.
* Twig with Lillian happens this way, in order to distract her classmates from realizing that they're actually spies working for an oppressive government. He's subsequently quite smug about it.
* Twi-hards (from "diehard") and Twitards (more derogatory, from "Twihards" - not to be confused with Twittards, who are Twitter users).
* Twiki was likely cast with comic relief in mind. In fact, even though he can pilot a fighter jet and pick locks, the fact that he can put a smile on the face of almost every member of the overly serious cast (something Buck can rarely do) makes his sense of humor his most valuable trait.
* Twila The Girl Who Waz In Luv With A Vampyre Satan possesses the protagonist herself. But its okay, because he's friends with her so he does it as a joke.
* Twi'lek girls, in fact, frequently find themselves on the wrong end of this trope despite not being human. Everyone in the Star Wars Galaxy needs Twi'lek women.
* Twilight’s human counterpart used to be a loner with no friends, aside her pet dog Spike, because she was bullied by her jealous peers for her intelligence, until the events of the Friendship Games.
* Twilight’s original target demographic has by now outgrown the books themselves.
* Twilight2000. After the Soviet nuclear attack on the U.S. in 1998, Mexico invaded the southern U.S.
* Twilight: 2000, and they kept throwing good resources after bad until there was nothing left to fight with and the infrastructure that kept civilization going had been destroyed.

* Twilight: 2000 by the time the game starts in 2000 all the armies in Europe have been taking anyone they can get for years: draftees, left-overs from destroyed allied units, deserters from the other side, even locals.
* Twilight: 2000-caused civil war between an allegedly-elected civilian government (CivGov), a military government that doesn't believe the civilian government is legitimate (MilGov), and an ultra-reactionary survivalist militia called "New America".
* Twilight: 2000 consists of errata, including a long list of skills, equipment and options that have been removed. Then, the game itself contains a readme file which lists errata to the errata (and it's inaccurate in some spots—for example, listing "removed" skills that are still in the game.)
* Twilight: 2000 features a nuclear war occurring in the late '90s. The US government has been divided into "Milgov" and "Civgov" factions, but they really only control small areas of the country. The rest is in anarchy.
* Twilight: 2000 has destroyed civilization while resolving nothing. The players are all soldiers who were in the last battles of the war, trying to survive and perhaps begin picking up the pieces.
* Twilight: 2000 has some of the early modules set in Poland after WW III. Some of the Polish gamers can't believe that this game exists.
* Twilight: 2000, in which the characters are generally NATO military, includes the NATO alphabet in the rulebook for players to use.
* Twilight: 2000 is. By the year 2000 US Army units included lots and lots of personnel who were hardly regular army: other NATO military personnel from defunct units, deserters from the other side, and even local recruits. The 1st edition rulebook recommends that at least half of the group be American, but anything else goes.
* Twilight: 2000. Language is strictly a product of nationality. There's little to no rhyme or reason to when each language might be useful. The result? A strangely Pan-Eurasian team of Cunning Linguists.
* Twilight: 2000, shows that the nation eventually recovers, though it does not regain super-power status.
* Twilight: 2000, there weren't any crossovers in the printed adventures, and the two systems had incompatible game mechanics.
* Twilight: 2000, the U.S. Army was willing to take pretty much anyone they could get, including Soviet defectors and forcibly conscripting locals. By 2000, many regular army units on both sides had degenerated into banditry.
* Twilight: 2000 unit, as supply lines are nonexistent at this point. Griffiths, in the background story, is described as being able to "find roast chicken and mashed potatoes in the Sahara."
* Twilight: 2000 World War III is pretty much already over in 2000 when the first adventure is set, with the players as survivors of one of the last major battles. Everybody lost.
* Twilight accidentally did the whole metagame thing when first meeting Rarity. Rarity tried to present herself as an ordinary dressmaker, but Twi's player had seen her character sheet and knew she was a Rogue, causing her to act extremely suspicious and basically badger her into confessing. The repercussions of this have colored their relationship both IC and OOC ever since.
* , Twilight (after coming down with a serious case of the love bug) seeks out Trixie in Manehattan. After first nervously skirting around the subject until Trixie gets uncomfortable and tries to pardon herself, Twilight blurts out a loud "I love you!" In the middle of a crowded restaurant, too. Trixie's goes through a quick show of surprise, denial, anger and embarrassment, before literally fleeing the scene and leaving Twilight heartbroken. Twilight's friends point out that she just came on too strong.
* Twilight after seeing the normally reserved Fluttershy seemingly take down a bear by kicking its back and snapping its neck; likely making viewers gave the same reaction as well.
* Twilight after she trips trying to jump over a hay bale. That must have hurt considering she's wearing her glasses, and she's lucky to not have broken them.

* Twilight. Alice can see the future, which is how she knew where to meet him in the first place.
* Twilight: Alice's predictions of the future will change if somebody involved in the vision makes a decision that would change the future.
* Twilight all have destructo sex; the resident hulk says he and his ice queen wife have broken multiple houses.
* Twilight. All of the tension as to whether or not she'll live falls rather flat when one considers that it happens at the end of part two, there's a buttload of pages left for part three, and that section is told from her point of view.
* Twilight all the Cullens are adopted siblings and most of them are in a relationship with another Cullen, though the siblings thing is largely an act to explain why they move and cohabit together. In the movie, Jessica calls attention to how weird it is for them to act as siblings and be in a relationship.
* Twilight: A lot of strange things happen around Forks and Phoenix (Vampires, werewolves, vampire's wars ...) and the humans in the book never realize anything is out of the ordinary; at worst they think it's just normal daily murders. None of them get to do anything special or contribute to the plot, not even by accident. To this day if you ask any of them about Bella Swan they will say something along these lines: "Bella? The daughter of Chief Swan? Nice girl, a little weird, lived here a short time, liked to hang around the Quilletes, made good friends with the weird Cullen kids and married right out of high school to one of them ... she was probably pregnant." If they actually remember her at all.
* Twilight. Also, the clothing, especially Bella's, likewise seems to be 90s-era Grunge; however, that might not be very surprising, considering it's set in some podunk town in Washington state, which is where the whole Grunge scene got kick-started.
* Twilight Alternative, especially since Stephenie Meyer is a practicing Mormon.
* Twilight alters the Parasprites, which causes them to eat all the town's buildings, in "
* Twilight amassed a significant "fanbase" of scarily obsessive young girls and middle-aged women. He once took one, who had been particularly zealous in her stalking, out to dinner and spent the entire time complaining about his actual, real-life problems. He never saw her again. It's hard to have sexy vampire fantasies about an incredibly human man.
* Twilight and covens are named for their place of residence, but fans sometimes use the coven names as placeholders for surnames. This sometimes works—for instance, the Volturi, so named because they live in Volterra, but they do seem to treat Volturi as a family name of sorts—but other times, such as referring to Stefan of the Romanian coven as Stefan Romanian, not so much.
* Twilight, and fills up her closet at home with high-end, fashionable clothing while Bella would rather wear jeans.
* Twilight and friends' first attempt at invoking the Magic of Friendship is a drawn-out example. Even the music is on it, rising dramatically as they lock hands together and Twilight exclaims "
* Twilight and her friends, technically, on the matter of their being
* Twilight and its movie adaptations, as everyone even casually familiar with the series knows.
* Twilight and other related books, the Volturi enforce laws that all other vampires must follow: any humans who learn of vampires must be turned into vampires or killed, do not turn babies or toddlers into vampires, do not make alliances with werewolves, do not hunt in Volterra, do not lie to or defy The Volturi. The punishment is death, but they often bend the rules and invite vampires with special talents to join them.
* Twilight, and there are all the people who plow through it just so they can bash it without being accused of complaining about books they haven't read.
* Twilight and threatening suicide to manipulate her. Then again, Bella already chose Edward as soon as he came back before Jacob started to behave badly, so it's more of a "justifying her decision not to change her mind and go with the guy who treats her like an equal and actually seems to have any feelings for her besides

claiming that he loves her" than a "justifying her decision to go back."
* Twilight, a pair of vicious house cats has been causing trouble for ShadowClan, attacking and killing any that they can catch on their own. To lure the cats out into the forest and away from their Twolegs, Tawnypelt pretends to be injured and alone while her Clanmates lie in wait.
* Twilight are only 2-3 inches apart in height. There's also any girl with any of the male werewolves.
* Twilight are repeatedly stated to be this, giving or attempting to sacrifice everything for the sake of each other. In their universe, it is deliberately invoked by the werewolves, who bond to a single soulmate for whom they always love.
* Twilight, as an alicorn, doesn't suffer very much of the genie curse when she deliberately does this to herself in
* Twilight as executives argued over who let the film slip through their grasp.
* Twilight as in the case of Claire and Nessie, and so very, very short compared to the shifters). The films, not having access to inhumanly-tall behemoths, downplays this aspect quite a bit.
* . Twilight asks what something means, and Spike whispers his answer to her.
* Twilight as not only is Bella able to keep all of the things she was told she'd have to give up (she remains friends with the werewolves, keeps in touch with her parents, has a baby shortly before turning, and is perfectly in control of her bloodlust), she believes that becoming an immortal vampire was her biggest purpose in life.
* Twilight basis that consent isn't needed to turn a dying person into a vampire), and the Cullens spend much time whining and wangsting about how they're not human anymore - Rosalie makes it quite clear she'd rather have died. Yet despite that all of them just WORSHIP the guy who turned them into vampires rather than having justifiable resentment towards him for robbing them of their free will, humanity and mortality.
* Twilight, because she's actually addressed as "Stephenie" by the waitress.
* Twilight becomes ruler of Equestria after Changeling impostors kill Celestia and Luna. In canon, Twilight became ruler after the Princesses retired.
* Twilight being released for people to start using the term "paranormal romance" instead of calling them "Twilight ripoffs".
* Twilight, Bella and Edward end up together, but leave poor Jacob alone. Not to worry, when their daughter Renesmee is born he "imprints" upon her, essentially becoming romantically bonded for life with a newborn. It's even suggested that Renesmee was destined to be Jacob's soulmate even before she was born, and the attraction Jacob felt toward Bella resulted from this.
* Twilight: Bella and Edward were already secretly interested in each other. But it took Edward saving her from Tyler's out-of-control van to get their relationship going.
* Twilight, Bella has slipped away from Alice and Jasper, meaning that they have no idea where she is and no way to get to her in time even if they did. She is trapped in a ballet studio with a murderous vampire, with no means of defending herself or escaping. He breaks her leg, throws her around, and bites her... and then Edward and his family show up in time to kill the vampire and suck the venom out of Bella.
* Twilight, Bella knows that the bathroom in the Phoenix airport has two doors in and out and her watcher, Alice, does not. Bella tells Alice she's going to the bathroom and then quickly escapes through the bathroom's other door before Alice can realize what she intends to do.
* Twilight. Bella listens to a Quileute legend about a pair of vampires. The shapeshifters killed the male, so his mate (described as having knee-length golden hair) comes and attacks the village.
* Twilight Bella's mother is apparently this. To quote, "My mother was an imaginative cook, but her experiments weren't always edible."
* Twilight, Bella Swan's main wish is to be loved by Edward Cullen. The same goes for Jacob, but about Bella.
* Twilight: Bella's working or middle class. The Cullens are wealthy (it's easy to make money if you're immortal and a smart investor) so regardless of which it still

counts.
* Twilight book. Edward attacks the Volturi to try to keep them from using a psychic attack on Bella and is promptly smacked down to show why they're so feared.
* Twilight book, Edward explains that their inability to sleep allows vampires to bang the whole night long; they also become endlessly horny after the change. After a while they learn to restrict themselves. Before that, they can do it for weeks.
* Twilight book was published in 2005. The initial series were bestsellers but it wasn't until the movie was made a few years later that it became a cultural phenomenon.
* Twilight Breaking Dawn (book and second film) they fight in the snow on the baseball field just outside of Forks.
* Twilight, Carlisle develops one of these over the years with his "family". He never tries to convince anyone outside the family to avoid feeding on humans, but everyone who is brought into the family is strongly encouraged to go "vegetarian" like the rest of them.
* Twilight causes a giant brawl just so she can have a problem she can solve in "
* Twilight contains "authentic" spells and rituals. Given the bizarre, sensational, and contradictory stories he's told over the years, it's conjectured that he simply makes a large portion of his stuff up.
* Twilight control her. Also, it's implied that it's supposed to be because Bella is way too good to fall for looks alone... except that's all she talks about when she describes Edward, so the meaning is lost.
* Twilight counting Edward and Jacob, both of whom were also already interested.
* Twilight, deduces that attraction between two vampires is always symmetrical, mutual and exclusive because vampirism has the odd quirk of conferring the hallmarks of romantic fiction to anyone afflicted by it. She realizes that if she chooses to become immortal then she will also be choosing to be inescapably in love with someone she doesn't even know or like.
* Twilight deliberately disobeyed Celestia's stipulations for passing the test in order to ensure that King Sombra is defeated once and for all.
* Twilight describe the vampires as crystalline, having bodies like marble or granite in quality, and their only bodily fluid to remain is venom.
* Twilight, designer clothes, etc. for Carlisle being a doctor and the only source of income. Bella wondered about this before she knew about Alice being psychic and able to predict lottery results and the fluctuations of the stock market.
* Twilight: despite having the appearance of a little girl and a very childlike voice, she is still extremely feared and respected by all the others vampires around her.
* Twilight doesn't leave Bella's side while she's in the hospital for several broken bones and loss of blood and maybe a few more things. Nevertheless, he's perfectly willing to leave her AFTERWARDS.
* Twilight don't need to breathe, sleep, or eat (except blood). In fact, if a vampire does consume human food in an attempt to hide their true nature, their body will be completely unable to digest it, so they'll need to vomit it up eventually.
* Twilight ("Doubt"). The titles of the second and fourth books were translated literally.
* Twilight Dragon Princess Atoli, despite Kayari telling this story in first person, has 2 chapters dedicated to her early on in the novel.
* Twilight!" due to its portrayal of vampires as brooding, beautiful, sparkly, baseball-playing teenagers. The character of Bella and the nature of her relationship with Edward has also garnered lots of criticism, as well as its retrograde views toward women.
* Twilight, Edward bribes Alice to confine Bella to their house and monitor her at all times while he's out hunting, because he feels she'd be "unsafe" and surely go off with Jacob (whom he feels is far too dangerous, as a werewolf). It's contested just how justified this reasoning is.
* Twilight, Edward climbs a tree to get into Bella's bedroom. Though she doesn't know at first, this later becomes an almost daily routine for their relationship.
* Twilight: Edward Cullen is the deuteragonist, Bella is the protagonist and Jacob

Black is the tritagonist.
* Twilight. Edward is the Ice (aloof, controlled and has trouble opening up emotionally, as well as physically cold to touch) and Jacob is the Fire (hot-tempered, openly emotional and honest to the point of bluntness, as well as having a higher-than-normal body temperature). The third book actually has a chapter titled "Fire and Ice" and quotes Robert Frost poem "Fire and Ice", prominently featuring the triangle.
* Twilight: Edward makes one of these in the meadow scene. He confesses his love for Bella at the same time as he tells her how hard it is for him not to kill her.
* Twilight. Edward says "Never trust a vampire. Trust me." However, Edward actually has a negative notion of existence as a vampire, he believes that vampires have no souls and therefore he doesn't want Bella to become one of them.
* Twilight eventually they'll look about the same. Carlisle and Esme Cullen are also way too young to have all of those teenage kids, even if they are adopted.
* Twilight. Every human has a beauty upgrade if they become a vampire; some, like James, were probably so ugly in life that even as a vampire they don't reach Divine beauty.
* Twilight fan fiction, the love story between Bella (human), Edward (vampire), and Jacob (werewolf) carries on.
* , Twilight fiends a private hall full of ancient stained-glass windows recounting many historical events in Equestria that only Celestia is old enough to remember. When Twilight asks why they've been removed from the great hall, Celestia notes that history is always happening, so it makes sense for her to put up windows commemorating more recent events:
* Twilight finding a way to easily return to the Equestria Girls world without relying on the "thirty-moons" time limit literally opens the door to more crossovers between the two worlds, as does Sunset being able to write back to Twilight.
* Twilight for a male vampire to have a child with a female human; they can't even have children with female vampires (who can't have children at all).
* Twilight game by using their abilities to figure out what move the other is going to make next... and countering... and being countered... and countering again... and so on.... The game is finished in their minds before two pieces are physically moved.
* Twilight getting wings and becoming a princess was revealed by a stand showing upcoming toys.
* Twilight group even before it leveled up by gaining such a priceless asset as Bella: a vampire who can render herself and others immune to many of the most powerful weaponized vampire abilities).
* Twilight Guardian, the titular heroine is obsessive about her patrols, goes to absurd lengths to protect her secret identity, and is convinced that her comic books are sending her messages. It's frequently mentioned that she used to be on medication (which she has long since stopped taking), but it's never mentioned what specifically the medication was supposed to treat.
* Twilight has also Jane and Alec, the youngest and smaller vampires of the series, twins turned at around age twelve by Aro Volturi. (Exact ages for what constitutes as an Immortal Child was never explicitly stated. It is assumed that if the child in question is able to follow the laws set by Volturi, then they will be allowed to continue their existence.)
* Twilight has a variant form of this. Vampires don't have fangs, though their teeth are strong and sharp. After Bella survives being bitten by James at the end of the first book, she's left with a silvery crescent-shaped scar on her wrist. It's noted that the scar always feels slightly colder than the rest of her body (vampires have lower temperatures than humans) and that it shimmers ever so slightly in the sun (a vampire's skin sparkles when exposed to sunlight).
* Twilight has become Equestria's new ruler and grows as tall as Celestia.
* Twilight has Bella Logan (AKA "Wolverine") and her grandfather Victor Creed/Sabertooth reminiscing about an incident during their time with Weapon X, when they went camping with the rest of their team and one of them ran afoul of

this trope.
* Twilight has one. It's not easy to trigger, but under the right stimulus, she can utterly
* Twilight has repeatedly remarked on how seriously she takes being Princess of Friendship... but even after many occasions to observe Spike's likes and tastes, she still is giving him books as gifts. This could be justified by concern of his draconian greed getting out of hand, though.
* Twilight has taken this to the logical conclusion of continuing her diplomatic visit and traveling the world, acting as a Diplomat at Large for her people.
* Twilight has three Brazilian Portuguese dubs: one for theatrical release, one as an in-flight movie, and another for TV broadcasts.
* Twilight hates when her father calls her by her old baby nickname "Twinklesparky,"
* Twilight have called the vampires "leeches" and "bloodsuckers", among others. The vampires tend to use "dog" like a slur as well.
* Twilight heard of vampires beyond referencing a few pop culture vampire tropes or mythology.
* Twilight, he is amused and thinks she may be thinking of this aspect of vampire mythology.
* Twilight. He is the funniest character in the book. And probably the only one.
* Twilight. He is the main love interest of the heroine and protagonist, Bella. Jacob is the tritagonist.
* Twilight. Her best friend back in Arizona was her mother (or so she says.)
* Twilight Heroes — they make many of the gadgets and devices that they use in combat.
* Twilight Heroes, some items that raise foe toughness have descriptions of this flavor. In some cases, your equipment makes you look like such a smug jackass that your opponents become stronger just from the desire to beat the smugness out of you.
* Twilight herself is working towards this, now being able to fly, having developed her physical talents and progressing as a leader and socialiser. She’s still most reliant on her smarts and magic however.
* Twilight herself tends to grab the Exposition Ball whenever she appears in an episode but isn't the
* Twilight Histories “Aztec Steel” are presented this way. On the one hand, the Aztec take several Chinese colonists as hostages, forcing them to compete in the ball game and serve as human sacrifices. On the other hand, the Chinese invaded the Aztec’s homeland and use brutal inhuman slave labor in their mines.
* Twilight Histories episode “Blue Dragons” takes place in a world where Venus has been terraformed into a habitable world. Your mission is to find out who did this and how they accomplished it.
* Twilight Histories episode “Blue Dragons” this has happened to Venus. You’ve been sent to investigate who did it and how they accomplished it.
* Twilight Histories episode “City of Pyramids” takes place in a world where Egypt was the only civilization to survive the Bronze Age Collapse. 12,000 years later, not much has changed. Well, apart from the new ice age and all that.
* Twilight Histories episode “Mask of the Plague Doctor” takes place in Medieval Florence in 1348, the year the plague arrived in Italy.
* Twilight Histories episode “Project Gliese” have augmented their bodies with cybernetic enhancements. You also receive a robotic arm. Kaisa from the episode “True Aztec” has a steam-powered prosthetic leg.
* Twilight Histories episode “Project Gliese” takes place in a world where a supercomputer created an army of robots and waged war against humanity. Billions are dead, and the few surviving humans have long since given up hope of defeating the robots. They’re simply trying their best to survive another day.
* Twilight Histories episode “Project Gliese” takes place in a world where a supercomputer was created to aid with space colonization, but instead it built a robot army and nearly wiped out humanity. Averted in the main Twilight

Histories timeline, where things went off without a hitch.
* Twilight Histories episode “The Big Turk”, set in a world where Mustafa Kemal Ataturk reformed the entire Ottoman Empire into a massive and prosperous Turkish Republic, begins and ends on an airship. Though high-speed rail is also mentioned as a popular mode of transportation. An airship also appears at the end of the miniepisode “Beyond the Indus.”
* Twilight Histories episode “The Moon” are this. They range from what appears to be sentient cluster of ribbon to creatures that look like bat-people. Notably, none of them communicate verbally, though they do use vibrations and sight to communicate.
* Twilight Histories episode “The Moon” is set in a world where the Space Race ended in a tie when America and the Soviet Union landed on the Moon at the same time in 1955. Since then, the two nations compete in a literal space race each year. The winner gets to determine lunar policy for the next lunar year.
* Twilight Histories episode “The Paris Event” has the asteroid nudged slightly off-course and strike Paris instead.
* Twilight Histories episode “The Winged Victory”. You become stranded in a world where Rome’s Greek provinces successfully revolted. You try to develop enough technology so that the Greeks will be able to defend themselves when the Romans return to try to conquer them. Ironically, given the trope title, you also attempt to keep the advanced technology out of Roman hands.
* Twilight Histories episode “True Aztec” is set in a dieselpunk Aztec Empire facing off against an equally dieselpunk Japanese Empire. The episode “The Big Turk” includes some slight elements such as airships and high-speed trains.
* Twilight Histories mini-episode “Frozen Earth.” Earth got knocked out of its orbit and now it is as far out as Neptune. The atmosphere is a sea of liquid gas, which, along with the extreme cold, means it isn’t possible to walk on the surface with a specialized spacesuit. As a result, most humans have long since retreated underground.
* Twilight Histories miniepisode “Frozen Earth” has Earth becoming a frozen wasteland due to getting knocked out of its orbit. By the time of the story, it’s almost as far out as Neptune.
* Twilight: "Holy fucking shit! If you weren't so hot I'd have you arrested!"
* Twilight (i.e. during the "It'll Be OK" number or in fireworks at the end of "Foaly Matripony").
* Twilight Illustrated Guide, she notes that it would have made more sense to have that Alice got a lobotomy during her involuntary stay at an insane asylum. (She withdrew that suggestion after the listeners pointed out that the time period wasn't when lobotomies were popular as medical treatment.)
* Twilight Imperium board game are ruled by a government that is called the Universities of Jol-Nar. They also fulfill the "stuffed-up jerks" part of this trope, an attitude which bit them in the ass big time at least once, when it didn't occur to them they need the other races as much as these needed their science.
* Twilight Imperium can have an Empire, Barony, Federation, Emirates, Universities, Mindnet, Kingdom, Coalition, Collective, Tribes, Clan, and Brotherhood - although not all of these will be in play in a single game.
* Twilight Imperium features asteroid belts that take up the same amount of space as a star system and pose a serious problem for the movement of certain classes of starships.
* Twilight Imperium for space opera board-games. Spice-dealing, trader lions, peaceful turtle-people who smoke weed, living flames put into mechanical bodies, snake-women who have psychic powers; the Twilight Imperium's got it all.
* Twilight Imperium is set in between two Cycles of Empires, or perhaps in an Interregnum period due to the warring player factions. The game is preceded by the "Dark Years" where each faction retreated to their home-system after a incredibly brutal deposition of the previous Empire, the Lazax - and there is evidence that they weren't even the first Empire due to the presence of artifacts from a race called the Ixth.

* Twilight Imperium of a board game with a space opera theme that incorporates not just war strategy, but politics and trade as well. Combat is treated as a means to an end rather than always being a path to victory in itself. Games can last several hours.
* Twilight Imperium: The Yin Brotherhood, a faction from the fourth edition, is millions of clones of one scientist's unborn son. He made the first several thousand while trying to find a cure for the disease Greyfire, but he was never able to eliminate it from the clones, though he stopped it from being fatal. After his death, they continued cloning themselves, viewing those who are disfigured by the disease as "Blessed".
* Twilight: In 1948, Alice and Jasper met in a small diner in Philadelphia, Pennsylvania. Alice approached him as if they were already close friends and told him that he'd kept her waiting a long time. Jasper was mystified and wary, but his ability to feel Alice's joyful emotions impacted him greatly, which allowed him to take her hand when she held it out, saying that, "For the first time in a century, I felt hope." He then learned to reciprocate her feelings.
* Twilight inadvertently causes her friends' cutie marks - and destinies - to be switched, and her friends are unable to cope with the jobs they now believe they were always meant to be doing. Seeing her friends break down leads Twilight to tears herself until Spike helps her remember just how important her friends are to her, giving her the spark of inspiration she needed to fix the problem.
* Twilight, including shielding both wolf packs by only shielding their alphas.
* Twilight insists that this was based on her successful love life in college after she wasn't looked at twice in high school. In one quote, she mentioned that she was dating three guys at the same time (which none of them knew about).
* Twilight: In the first movie, Edward traverses fifty feet in half a second, punches a gaping hole in a moving car with his bare hands, and comes out of getting hit by a car with no pain or signs of injury in full view of the whole school. Bella is the only one to suspect that Edward might have superpowers, or ever bring it up again for that matter.
* Twilight. In the novel it just comes across as fairly uncomfortable, but in the movie (see above) Billy Burke and Kristen Stewart's reactions make it hilarious.
* Twilight in the same pack can read each other's thoughts while in wolf form; Alphas of different packs can communicate mentally but not read each other's minds.
* Twilight is a less obvious example but she isn't well-liked by her friends. She's a
* Twilight is a part—generally opposes abortion, they allow it to save the life of the mother as would be the case here).
* Twilight is, for the most part, a fairly banal and boring affair... until you reach the action climax where the movie suddenly decides to kick all kinds of ass. It's a sight to behold, really.
* Twilight is implied to be descended from the G1 Twilight, whose family line also helped Celestia and Luna during Discord's reign.
* Twilight is implied to be this. In Alice's vision, she shows no apparent ability to fight or run as fast as any other vampire, unlike her brother. When her torture ability is disabled by Bella and she is approached by Alice, she becomes very fearful and tries to run away. Unfortunately, she is choked by Alice and subsequently killed by Sam.
* Twilight is insanely beautiful, was raped and left for dead because of it, and now lives on as a bitter vampire incapable of having a biological child—her one real dream.
* Twilight is knocked off her motorcycle, she looks up at Native American Jacob Back and says that he is kind of beautiful.
* Twilight is made up of four vampire couples and a vampire/werewolf couple.
* Twilight is prone to this as well, with her perfectionist tendencies often leading her to hold in her emotions until she explodes.
* Twilight is the princess of Friendship, forgives her enemies constantly, and encourages her new student Starlight to make some friends around town. Starlight meets and hits it of with one of Twilight's old foes, the stage magician Trixie.

Twilight is completely against this. While Twilight does learn a lesson about trust by the end, no one really calls her out on how she's comfortable being the mentor of one of the show's major villains, but seems unable to forgive someone as benign as Trixie.
* Twilight it by saying that Bella is clever enough to make the various connections in her dreams without realizing it. Even when there are no connections to make, such as in her first dream about Edward sparkling. Although Jacob had told her about his people being werewolves (and so there's some justification for Jacob becoming a wolf in her subsequent dream), Edward has not sparkled at that point of the book and there's no reason for Bella to dream that he can, except maybe due to his extremely-pale skin.
* Twilight. It fits better with this after Bella and Edward are actually in a relationship, and she allows him to snuggle with her every night and watch her sleep.
* Twilight it's a metaphor for sex and lust. Not a very convincing one though, as the happily married couples seem to get it on regularly.
* Twilight, Jacob meets Nessie (Bella’s infant daughter) for all of ten seconds and there’s emotional turmoil all right—considering he magically falls in love with the newborn due to his wolf genes.
* Twilight, James blackmails Bella to sneak away from the Cullens by pretending he has her mother as a hostage: in reality, he just played a recording of her voice over the phone.
* Twilight, just in time for Bella to decide that she really needs to be with Edward.
* Twilight, Lauren was the most popular girl in the school, before Bella showed up.
* Twilight: Leah, the only female werewolf. Everybody in-story seems to hate her, but some people especially will argue that she's the most badass and well-developed character in the series.
* , Twilight literally can fight Starlight forever, whereas Starlight will eventaully grow old and die.
* Twilight: Los Angeles. All the officers involved were later charged with and convicted of federal civil rights violations as well.
* Twilight: Los Angeles is a docudrama that tells the story of the riots in Los Angeles in 1992. Lot of people.
* Twilight loses her magic when she enters the human world, and also can't depend on her encylopedic knowledge (since she knows nothing about the world she is in). As
* Twilight loves chocolate to the point that any chocolate bar left unattended will mysteriously wind up in her mouth.
* Twilight magics a big-ol' moustache onto Spike's face in "Boast Busters". He thinks it makes him look pretty cool, and can't wait to show it off to Rarity... who, it turns out, isn't impressed.
* Twilight. Mainly they just take concepts that are vague or fairly common and try to label them as uniquely Mormon, as though Mormons are the only ones who believe in close-knit families or frown on sex outside of marriage.
* Twilight — Romantic fantasy series based on the eponymous novels. Five films have been made since 2008.
* Twilight, meanwhile, reacts to the news with, "Mom has a new girlfriend. Good for her." Then she explains that both her parents are gay and have a mutual agreement that lets them date others (though they're very much in love on an emotional level, they're just not physically attracted to one another without the influence of alcohol), so finding out her mom was with another woman doesn't bother her. It's not until Twilight finds out it was
* Twilight movie had this, possibly to emphasize the characters' pale skin or the cloudiness of Forks. The sequels had more of a golden, warm tone to them.
* Twilight movie, possibly unintentional, where Bella first sits next to Edward in class and the page in the middle of his open book sticks up.
* Twilight naturally is able to do this thanks to her incredible intelligence working with the battle adrenaline allowing her to analyze and predict the most

likely course of action they'll take.
* Twilight, newborn vampire Bella gets mauled by the mountain lion that she's hunting. The mountain lion's claws can't damage her vampire skin, but that fancy dress that Alice put her in doesn't fare so well.
* Twilight, newborn vampire Bella goes out for her first hunt in a tight evening dress that Alice put her in. As she gets ready to jump the river, the dress rips. Bella then rips both sides in order to get the mobility needed to run, much to Alice's chagrin. Prior to this moment, she also ditched the high heels.
* Twilight:New Moon, it sort of does, but it fails at everything else it attempts to do. And with that, couldn't they just find it on the net?
* Twilight, not to mention cleaning his shotgun at the time... none of that really matters, as it's not at all close to an even match physically or mentally.
* Twilight novel involves Bella having to sneak away from her vampire bodyguards to meet the bad guy vamp.
* Twilight novel series, the vampires who drink only human blood have red eyes.
* Twilight novels has a cover that, while symbolic, doesn't really tell you what the book is about.
* Twilight often comes across as this. She dictates what clothes her family wears and apparently rarely allows them to wear the same things twice. Throughout the series, she also forces Bella to act as a living Barbie, making her put on make-up and dresses Alice approves of and forcing her to go to dances Bella has no interest in attending. When she finds out that Bella simply wants a shotgun wedding without any fancy ceremonies, she promptly guilt-trips Bella into letting her arrange a massive wedding, even though the Cullens periodically re-marry for public appearances and thus there's no shortage of weddings to plan. In one of the outtakes, Alice is so determined to make Bella wear an outfit she approves of that she forces Bella to wear stiletto heels while Bella's in a foot cast and on crutches, has her broken foot be given a pedicure, and gives serious thought to removing the cast early just so Bella can wear matching shoes.
* Twilight of the billions the series has made in revenue doesn't help.
* "Twilight of. The characters have changed significantly over that time, partly in reaction to what happened at the end of season 2.
* Twilight of the Cockroaches. A society of cockroaches, flourishing under the passive acceptance of a depressed bachelor, is completely unprepared when he begins dating a neat freak...
* Twilight of the Cockroaches is a rare Japanese example of the first type of Roger Rabbit Effect. A live-action character lives in an apartment with a society of anime roaches.
* Twilight of the Cullens, and is often called on in the first book to calm Bella down with feelings of peace and happiness. Inverted in the fourth book, where Jasper follows Bella around for a while because she is emitting such positive emotions.
* Twilight of the Old West — Officially began with the declaration of the closure of the American frontier, incidentally also in 1890
* Twilight of the Old West: This period largely coincides with the Edwardian Era, as new technologies and cultures have changed the livelihoods of the now-closed frontier.
* Twilight of the Red Tsar. By the late 1950s, far-left leaders like Castro have abandoned Marxism-Leninism in favor of syndicalism.
* Twilight of the Red Tsar, more than a few victims of Stalin's purges beg for their lives when they realize their fate. It doesn't work.
* Twilight of the series who are later revealed to be corrupt, they are the only force of law and order in the vampire world and their rules (don't let humans find out about vampires and don't make vampire children) are very reasonable. They repeatedly give the Cullens second chances in regards to them not turning Bella into a vampire and, when Alice, Edward, and Bella turn down offers to work for them, their leader kindly agrees to let them go home. The Illustrated Guide also shows that they're the only thing standing in the way of the Romanian and Egyptian vampires rebuilding their empires and enslaving humanity as food and cattle.

* Twilight on Bella's first day of school, Mike and Jessica talk to her about why she's so pale if she's from Arizona. Bella says "maybe that's why they kicked me out?" - which is worthy of maybe a chuckle or two. Mike reacts as if she told the best joke ever and Jessica vapidly says "you're so funny".
* Twilight one girl, seeing him at the Apple store in SoHo, asked him to bite her.
* Twilight over how she has been treating him, her mother, and her friends all for the sake of Edward, who he calls an "abusive fucktard." When Bella tries talking her way out of being kicked out of the house, Charlie makes it clear that it is permanent and slams the door in her face in the end.
* Twilight, pairing minorities Eric and Angela (Asian and Hispanic respectively) and white Mike and Jessica. What's more is that Eric initially pined for Bella, who went with the white Edward (and Eric's crush subsequently vanished).
* Twilight plays the (very plot-related) song he wrote. It's not that bad.
* Twilight. Predictably, the toys stayed in bargain bins months after the promotion ended.
* Twilight Pretty Cure tendencies. This version of Umi has been far better received.
* Twilight Pretty Cure, who is the most down to earth and understanding of the cures, trying to make sure nobody gets into any fights before or after a battle.
* Twilight Princess, after the Twilight has been purged from Hyrule and is unlikely to return, Zelda has been freed, and Hyrule Castle destroyed, Ganondorf does it again, first on horseback and then on foot.
* Twilight Princess. After you complete his quest and leave his house, you can come back and find him missing. He's gone to the local tavern and is seated at the bar, crying his eyes out because his girlfriend is seeing someone else.
* Twilight Princess are surprisingly complicated, mechanically speaking. Many dungeon doors are round, and when pushed in, roll out of the way through some mystery of technology.
* Twilight Princess, as Midna prepares to sacrifice herself to take out Ganon. She warps him and Zelda to safety before he can get to her.
* Twilight Princess, as well as the door to the past in the Temple of Time.
* Twilight Princess At the very end, Link is seen riding away from Ordon village on Epona, but it's never said where he's going.
* Twilight Princess, but in an alternate timeline. After the events at Death Mountain, wherein Link restores Darbus' sanity, Renado remarks how Link's actions are reminiscent of the Hero of Time's.
* Twilight Princess Crashing into a wall, however, makes them fall down and take a few seconds to get their brain cell back in order before getting up no worse for wear.
* Twilight Princess dynamic in the story mode, Link (funnily enough, the "princess swap" doesn't go the other way, and Mario/Zelda fics are nonexistent), and even Sonic.
* Twilight Princesses who actively try to harm people as they will kill people slightly corrupted by it against their will and who could still could be saved. Showing mercy to anything tainted or consumed by Darkness will cause them to lose access to part of their power, which they can then only restore by hurting themselves to near the point of unconsciousness.
* Twilight Princess features golden armour that requires a constant supply of rupees or it will change to iron and become too heavy to move around in.
* Twilight Princess forces you to go through a ton of tutorial-style content before you get to the actual game. From the start of the game, it is roughly two hours before players enter the first dungeon, another hour before they gain access to Hyrule Field, and far longer still before they can explore it in its entirety. Included in the tutorials is learning how to fish, usually completely optional. Then after you catch something, you need to find out how to drop it so that the cat takes off with it.
* Twilight Princess for the other village kids, to saving Prince Ralis when she found him collapsed on the road leading to Hyrule Castle Town.
* Twilight Princess, Ganondorf and Zant are each other's soul jars. After Ganondorf

"houses [his] power" in Zant, you can't kill one without killing the other. Zant's neck snaps by itself as soon as Ganondorf dies.
* Twilight Princess, he extends this to the people of Ordon Village (especially the kids) and Midna.
* Twilight Princess) if you charge through the castle town in your wolf form. They'll even outright flee if you Wolf Link does a sudden movement.
* Twilight Princess incarnation also glances in your direction if you leave him standing in one place long enough. Presumably to check you're still there.
* Twilight Princess is the two Wallmasters in the Palace of Twilight. You can stun it with your Bow and Clawshot, but you can't kill it and it will KEEP COMING FOR YOU AS LONG AS YOU HOLD ITS SOL. Although, it'll give up after you go to the "outside" area and place the Sol in the ground.
* Twilight Princess King Bulblin appears in a few of the new Adventure Mode missions as a major NPC. He's bigger than the common versions, with much more HP and damage potential, and almost always comes with a duo of elite henchmen.
* Twilight Princess Of course, without a guide book around, it takes several hours of scouring Hyrule to complete this sidequest, which renders it pretty pointless in a game where the boss battles aren't exceptionally difficult.
* Twilight Princess on their weak point on their back. Cue Link sitting on the boss frantically stabbing said weak point with his sword until he gets shaken off.
* Twilight Princess or jump off the burning Great Bridge of Hylia in time.
* Twilight Princess, rather than Ordon Village. She's portrayed as selfless and giving: from tending to Link's horse (Epona) for him, to saving Prince Ralis when she found him collapsed in the road leading to Hyrule Castle Town.
* Twilight Princess, Shad, after finding the cannon, says that he loves the book so much.
* Twilight Princess spider, surrounded by hundreds of tiny little spiders... and they swarm chaotically around the room...
* Twilight Princess, Telma is this for Renado. After helping Link and Ilia get Prince Ralis to Kakariko Village for Renado to treat medically, Telma soon starts flirting with Renado after first meeting him. She eventually returns to Hyrule Castle Town, and when a later quest requires Link to deliver a letter from Renado to Telma, Renado admits that he really can't stand Telma.
* Twilight Princess. The manga adaptation is more explicit about him being one.
* Twilight Princess, the story's progress grinds to a halt. The story then centers itself on simply finding each shard of the Mirror of Twilight, and with the minor exception of Illia, any NPC characters who were important during the first half don't matter at all during this arc. The story only resumes actual progress when Link finally enters the Twilight Realm.
* Twilight Princess, the Twilight version of Hyrule has a yellowy brown sky, and there are black squares floating upwards. In the "real" Twilight Realm, the sky (such as it is) is swirling black, blue and purple.
* Twilight Princess, when you take control of them. Plus, the Twili have tron-line markings on their bodies. Look at the ones on Midna's forearms for example.
* Twilight Princess Zelda is the lone exception - supplemental material confirms her to be 20. This has not stopped fans from debating her age, however.
* Twilight pulls the rest of the Mane Six into one at the end of "Slice of Life", though she apologizes when the hug aggravates a bite wound Dash got from the bugbear.
* Twilight regularly finds itself on the bestseller lists in the very front of the store.
* Twilight repeatedly mock everything about it. It's implied that they're both high in order to cope with watching the movie.
* Twilight, Rosalie shatters a glass bowl of salad in rage when she learns that Bella has already eaten and her family's efforts to cook for her were in vain.
* Twilight rules. Women's tennis is best two-out-of-three sets at all times; men's is best three-out-of-five sets during majors, which is what this fic uses...and is also best two-out-of-three at lesser events.
* Twilight saga certainly fits this trope. By using an idea pioneered by another

Southern nomad, Benito, Maria began creating newborn vampires to create a virtually unstoppable army. With Jasper Whitlock and her sisters, Nettie and Lucy, she was able to take over many Mexican territories previously owned by other vampire clans.
* Twilight saga, Edward is the Scoundrel, and Jacob is the Gentleman. While Jacob is more forceful and direct than the well-mannered Edward, Edward's life invited danger and death into her life, and was the choice her parents couldn't stand, while Jacob is the old friend boy-next-door who dependably offers Bella emotional support.
* Twilight sat down and outright spelled out for her readers what was happening.
* Twilight says that the vampires generally accept the rule of the Volturi as right.
* Twilight's brother, Shining Armor, and sister-in-law, Cadance, can also do it due to it being their
* Twilight's Edward Cullen. While the rest of his family was having housebreaking sex, he was by his lonesome spending his sleepless nights studying everything there is to study. For example, he cooks perfect meals for Bella on his first try, despite never having a reason to cook before.
* Twilight series, Bella stands around while two supermen fawn over her and their families promise to lay down their lives to protect her. Everybody either loves her or wants to kill her to spite the Cullens, but about the only thing about her that stands out is that she's immune to mind reading. This, of course, is a trait she can't control and didn't even know about until Edward told her. On the rare occasion when she is called to action, it's usually just to find a man so he can take care of the problem.
* Twilight series, Jacob imprints on Bella's daughter while said daughter is still an infant. It's implied in his internal narration that he was only in love with Bella because she would be the mother of his true love, Renesmee.
* Twilight series the protagonist (Bella Swan) openly admits that she is being stupid and irrational and flat out refuses to think logically because she believes that the fact that she's in love relieves her of that obligation. In the end all of her decisions are proven correct and she lives happily ever after.
* Twilight series, we hear briefly about the Volturi, mainly that they and Carlisle are on friendly terms, but that he left because he did not agree with their diet of humans. Edward speaks pretty well of them, when he tells Bella about them. In the next book and all books after, it's revealed that the Volturi are a highly corrupt organization, and the Cullens are all highly suspicious of them. This also leads to a case of Remember Those New Rules, since it's not until then that it's mentioned that there are any sort of laws or governing of vampires.
* Twilight seriously considers doing in Mike Newton for daring to touch Bella, and probably thought about murdering Jacob Black for the same reason.
* Twilight's First Day, Twilight accidentally stows away on a Royal Guard airship and startles a cadet. When Thunderhead barges onto the scene demanding to know what the racket is about, both Twilight and the cadet scream variously at him, at each other and at how much trouble they're both in.
* Twilight's Halflight Noon form also has this, as she created it explicitly to fight Ender Dash during the Duel of Tears.
* Twilight. She basically turned whoever she could find. It doesn't work.
* Twilight's hell is where she lost all her true friends, withdrawing into herself and isolation in response.
* Twilight, she's also willing to die for her unborn child that is killing her from the inside. She also risked her life to save her mother in the first book. Edward for his part suffers when he is close to Bella due to having to resist the urge to kill her, when she is in danger that she usually places herself to, when she is clearly attracted to Jacob, and risking her life by having a baby knowing full well that Edward would kill himself if she dies. He still thinks the world of her and would give his… existence for her.
* Twilights Kingdom – Part 1", Discord bursts out of a huge cake he just materialized by himself while talking with Tirek.
* Twilight's Kingdom – Part 2", Tirek has a delayed reaction on passing before

the window mural showing Twilight rising as an alicorn, stopping in mid-evil gloating.
* Twilights Kingdom - Part 1 against Tirek near the end of the G1 pilot. Oh yes, and Discord and Tirek know each other somehow.
* Twilight's Kingdom, Part 1", Discord once again demonstrates this power, both for the sake of puns, and to lure Tirek into a trap by turning into a unicorn stallion.
* Twilight's Kingdom, Part 1", Lord Tirek's voice is frail and old, but he later gains a deep, booming voice as he returns to his original power.
* Twilights Kingdom, Part 1, trying to convince him to abandon their plans. Tirek wouldn't listen, so Scorpan had no choice but to arrange for him to be imprisoned in Tartarus.
* Twilight's Kingdom - Part 1", when Rainbow Dash, Fluttershy, Rarity, Spike and Twilight are examining the items that will become the Keys, the point of view is from the floor.
* Twilight's Kingdom, Part 1, which is made funnier in the next shot when Discord is wearing MacArthur's iconic sunglasses and corncob pipe.
* Twilight's Kingdom Part 2": Celestia, Luna and Cadance experience this when they transfer all their magic to Twilight, and Discord goes through this when Tirek drains him of his magic. This also happens to Twilight when she surrenders her own and the Princesses' power to Tirek. The Mane Six return the favor after unlocking the aforementioned Rainbow Power chest.
* Twilight's Kingdom Part 2 is seen by everyone who gave the Mane Six their keys - Coco Pommel, Spitfire and the Wonderbolts, Cheese Sandwich, Seabreeze, Silver Shill, and Discord last of all.
* Twilight's Kingdom, Part 2. It isn't until Tirek comes after her that she gets a handle on her power, if only because she's no longer trying to hold it back.
* "Twilight's Kingdom, Part 2", Lord Tirek proves to be worse than Discord, bullying the former chaos spirit and stealing all his magic when Discord is no longer useful.
* Twilight's Kingdom, Part 2", once Tirek gains Twilight's power, he grows to giant size.
* "Twilight's Kingdom, Part 2". Such as the whereabouts of Scorpan in all of this, what new powers the rainbow elements entail and how Ponyville will now function as a kingdom, not to mention how Discord's completed reform will be displayed.
* Twilight's Kingdom Part 2", the ponies' Rainbow Power seems to function like this. Once the danger has passed, the Mane Six revert back to their normal forms.
* "Twilight's Kingdom Part 2". This is especially noticeable with the climax of the episode, which is more in line with previous finales.
* "Twilight's Kingdom Part 2", Tirek admits Discord's stained glass window of the two of them (Depicting one holding a gleaming sword and the other holding a baguette) is quite amusing.
* Twilight's Kingdom Part 2, Tirek shouts this when he see Twilight and the Mane Six with their new Rainbow Power, unable to understand how they are empowered again after draining their magic.
* Twilight's Kingdom Part 2", Twilight has to raise the sun and lower the moon now that she has Celestia's and Luna's magic. It's a bit shakey, but she manages.
* Twilight's Kingdom - Part 2", Twilight, who is trying to control her new powers gained from the other three princesses, says "Gotta go...somewhere...else." to avoid talking to Spike.
* Twilight's Kingdom, Part 2": Until she voluntarily surrenders it, Tirek is unable to drain Twilight of the combined power of the Princesses' alicorn magic. Though likewise, Tirek shrugs off everything Twilight throw at him.
* Twilight's List, especially about being nervous. She lies to herself in her inner monologue, while she shows outwards signs of the emotion.
* Twilight's not the only one who gets this treatment. In "Make New Friends But Keep Discord" he teleports into Spike's bed
* Twilight. Some of the stuff she explains to him are common knowledge for fans of the show, other times she explains elements that are new to the audience.
* Twilight Sparkle, after having a nervous-breakdown in the episode "Lesson Zero",

has become one.
* Twilight Sparkle and Rainbow Dash once appeared at a meet-and-greet in Toronto for infants at "The Babytime Show".
* Twilight Sparkle and Rarity, when they cross into the land of the Fae in
* Twilight Sparkle and the Crystal Heart Spell goes into depth about Cadance's backstory.
* Twilight Sparkle and the Crystal Heart Spell is an amulet similar to the Alicorn Amulet.
* Twilight Sparkle and the Crystal Heart Spell, Prismia caused one for an earth pony village nearby.
* Twilight Sparkle, Applejack, and Pinkie Pie go for the jaw drop when Rainbow Dash does the Sonic Rainboom in the episode of the same name. Fluttershy, amusingly enough, goes for a different kind of reaction, made funnier by her
* , Twilight Sparkle believed herself to be a heterosexual with a lot of natural self-control. Until she realized that same self-control completely went out the window when a certain boastful magician was concerned.
* Twilight Sparkle can conjure these with her magic. They're quite powerful, too, as she can even block
* Twilight Sparkle considers things such as shelving library books or "a crazy weekend of studying" to be the height of entertainment. In "Lesson Zero", it's revealed that her favorite toy growing up was a "Smarty Pants" doll, which comes with accessories like a notebook and pen so you can pretend that she's studying. Twilight considers this the most awesome toy ever. In particular, the plot of "What About Discord?" is kicked off by the fact that Twilight holes herself up in her house for three days to re-organize her books rather than spending that time with her friends.
* Twilight Sparkle could temporarily outfly Rainbow Dash while supercharged with magic in "Twilight's Kingdom". She had a hard time controlling it though, making her
* Twilight Sparkle date, leading to Rainbow Dash believing that Twilight IS romantically interested in her.
* Twilight Sparkle does it in "The Beginning of the End" several times when she learns that Princess Celestia and Luna are
* Twilight Sparkle does this in "The Ticket Master", interrupting her friends' argument over the extra ticket to the Grand Galloping Gala with "QUIET!"
* Twilight Sparkle entirely, and the citizens start really wishing that the princesses were still ruling them.
* Twilight Sparkle feels this way when she visits Ponyville for the first time. She gets better, though.
* Twilight Sparkle generally serves as a mastermind and levelheaded leader among her group of friends, and serves this role for the whole town at times (such as during "Winter Wrap Up" and "Dragonshy").
* , Twilight Sparkle gets depressed because she fears that anypony who'd show romantic interest in her would only do so because of her new princess status. When Rainbow Dash suggests that she could just take matters into her own hooves and pick a pony who won't care about such things, Twilight sets her sights on the one pony in Equestria guaranteed not to think highly of her for her new status: her self-appointed rival, Trixie.
* Twilight Sparkle gets these when she uses some of her more powerful spells.
* Twilight Sparkle has become known on the internet for intentionally spilling chocolate milk and derailing 4chan threads as a result.
* Twilight Sparkle has one of these near the end of "Feeling Pinkie Keen", on finding out an attack by a hydra wasn't the "doozy" predicted by Pinkie Pie's "Pinkie Sense".
* Twilight Sparkle in "The Cutie Re-Mark" has to do this to stop Starlight Glimmer:
* Twilight Sparkle in the Nightmare Moon story arc at Pinkie's surprise party:
* Twilight Sparkle is a close and dear student to Princess Celestia, who personally

* Twilight Sparkle is another character that Mykan hates, this time for trying to preach the very idea of friendship that he loathes so much. Shortly after Equestria is introduced in the rewrite, she loses her wings and only gets them back offscreen, the MLP cast as a whole
* Twilight Sparkle is Lawful Good. This forms the core of her identity to try to do good, especially in the name of her lawful patron Celestia. The irony that the girl who likes rules is the one who is constantly taking the campaign
* Twilight Sparkle is the Straight Mare and Pinkie Pie is the Wise Filly.
* "Twilight Sparkle Is Vexed by Uranus" misunderstands Twilight when she tries to search for it.
* Twilight Sparkle/King Sombra and Fluttershy/King Sombra, with the mares being heroes while the latter is a villain
* "Twilight Sparkle" might be on its way to being a multiple reference word (see below).
* Twilight Sparkle pulls one off in "Lesson Zero" when she prepares to create an argument amongst the Cutie Mark Crusaders in a bid to solve the said problem and have a friendship report to write to Princess Celestia.
* Twilight Sparkle runs into a pony that is exactly like her, claiming to be her future self come to tell her something really important. But, after present(?) Twilight assumes it has to do with her hoof tremor problem, future(?) Twilight reveals she didn't even know that was a thing, let alone that it was a condition
* Twilight Sparkle's older brother Shining Armor calls her "Twiley", and she calls him BBBFF (short for "Big Brother Best Friend Forever").
* Twilight Sparkle's parents realize very quickly after meeting the character.
* Twilight Sparkle's pony friends offer to follow her through the portal in
* Twilight Sparkle's sanity is not quite where it should be, and her
* Twilight Sparkle's Secret Shipfic Folder has cards marked Villain, and the flavor text sometimes hints at a Discord/Celestia pairing.
* Twilight Sparkle's Secret Shipfic Folder has Cheerilee, who knows she's in a shipping card game and wants no part of it.
* Twilight Sparkle's Secret Shipfic Folder is basically this as a game. There's even a card called Divine Intervention! Though to be fair, it's less "sex" and more "romance"...
* Twilight Sparkle's Secret Shipfic Folder so this could be half subverted).
* Twilight Sparkle starts out like this due to her voluntary asocial lifestyle. Half the reason she's
* Twilight Sparkle's voice actress, Emanuela Pacotto, usually does her own singing, except for the ending credits song of
* Twilight Sparkle, the main character, has several moments of this, which has
* Twilight Sparkle, the main protagonist, especially in the beginning when she's the one arriving at the new place and getting to know the people.
* Twilight Sparkle turns herself into a brain in a jar for perfectly logical reasons.
* Twilight Sparkle (which isn't even what she was told, just an idea she made up herself), and at one point casually invents the pony version of the Kinsey scale.
* Twilight Sparkle, Zecora is often the one to tell the Mane Cast what's going on.
* Twilight's Peak get into it they will be trapped and sucked down with no chance to save themselves.
* Twilight's Peak. In the Ancient base, when a gold wall patch is touched a section of wall opens and a holographic image of food appears. If the image is grabbed, the food will be teleported into the person's hand.
* Twilight's research focuses on combining spiritual energy and technology with magic. She's already made some progress, like Sugarcoat's visor and Indigo Zapp's legs.
* Twilight start a war and cause all sorts of chaos and mayhem, including hurting each other, in their quest to be together.
* Twilight starts having nightmares after reading a prophecy about a "Queen of Darkness", which matches her description to a tee.
* Twilight Storm series concludes with the Tenth Doctor going back in time to save

Esme Cullen's infant son and bring him into the future to treat his sickness, and he also provides Rosalie and Emmett with the means to have a son, taking samples from them while both were human, so long as they can find a suitable surrogate to carry the baby in the present.
* Twilight Storm ("Time's Ashes"), the alt-Marcus basically acting as their bodyguard when they have to retrieve the TARDIS. After reality is restored, Bella is initially happy to meet Marcus in the prime reality ("New Dawn") before the Tenth Doctor reminds her that this Marcus hasn't met them before.
* Twilight Struggle: A two-player, card-driven Cold War strategy game built around a mechanic of crisis aversion; it's notable for being a war game that doesn't involve any actual combat (save abstracted military coups).
* Twilight Struggle is a US-event card that has a couple of functions: during the initial headline phase of each turn it cancels whatever card the Soviet player puts up as their headline, and during the action rounds of each turn if the Soviet player plays from their hand the US player gets 1 Victory Point. The game notes that while defections across the Iron Curtain went both ways throughout the Cold War, East to West was more common and tended to be more high-profile and thus on average tended to embarrass the Soviet side more often.
* Twilight Struggle, respectively, which reflects more on the slogging nature of those wars for their respective superpowers, though both Vietnam and Afghanistan can still be targeted with "Brush War" due to their low stability.)
* Twilight Struggle: Trigger it, and your superpower loses immediately.
* Twilight) Subverted somewhat in that the further away from being a vampire you are (humans are harder to read than vamps, and she can't read for werewolves), the harder it is for her to envision your doings in the future.
* Twilight that she deliberately avoided describing Bella's physical features so that it would be easier for the readers to picture her as themselves.
* Twilight that Stephenie Meyer wouldn't endorse, but arguably it makes a lot more sense.
* Twilight that they are whispering, despite the fact that the wind whipping past their heads should make even yelling next to inaudible, at least for an ordinary human like Bella.
* Twilight: The Cullens can only play baseball during a thunderstorm, because their superstrength means the crack of the bat sounds like thunder. They also gleefully use all their abilities to make the game exciting.
* Twilight: the entire reason why Bella and Edward are in love. They have nothing in common, hardly know each other, and don't even seem to like each other and yet they're madly in love. They don't even have the excuse of "imprinting" like werewolves.
* Twilight, Their main job is to destroy vampires who attract too much attention to themselves. It was mentioned that they wiped out every vampire in Mexico when the vampire civil war there got out of hand.
* Twilight: the last line of the last book is, "And then we continued blissfully into this small but perfect piece of our forever."
* Twilight, then got pregnant with demon spawn after having sex once. Or if she did menstruate, why didn't her vampire boyfriend eat her? The author seemed to be disgusted by the entire idea, though some people still think the question was an excellent point.
* Twilight Then, Twilight Now Universe. The Penna-Draconequus war destroyed the Penna civilisation, which left the ponies to rise in their place.
* Twilight the panel from the manga showing her get smacked in the face with a volleyball.
* Twilight. There are probably millions of them in the world, feeding every night.
* Twilight. There's also a Jacob doll which comes wearing only its pants.
* Twilight. The teenage wolves who imprint on a 2-year-old and a newborn. But Renesmee (said newborn) will be physically 18 in 7 years, so Jacob doesn't have as big of a problem.
* Twilight. The title character actually tracks Ana via her cellphone, which, in addition to being creepy, is kind of illegal.

* Twilight, the vampires are supposed to be science-based. It was explained that when a person is turned into a vampire, they have all of their bodily fluids converted into a sort of venom, their eyes change color, their skin loses all pigmentation, they get flawless features (considered universally beautiful), and their cells become crystal-like. All of this is from venom "injected" by a single bite from normal teeth (that is, no fangs). Furthermore, the description of the sparkling means that the cells must be lined with tiny mirrors. Erm...
* Twilight; they're working very hard to try and turn fans against the series. That, and they also keep hearing that they can't criticize it unless they've read it.
* Twilight. This didn't stop the films from being unusually consistent box office hits - all four sequels grossed between $280-$300 million domestically and ranked in the top ten films of the year.
* Twilight: This is pretty much all Edward and Bella do, when they aren't staring at each other.
* Twilight, this is subverted as Bella turns out to be immature, whiny and lacking in self-control, as first seen when she throws tantrums at her parents for trying to get her to move back with her mother.
* Twilight. Though it's canonically stated that she's in love with Jasper, fans seem to think that's she also has feelings for Bella.
* Twilight, though — unlike Bella with Edward — she's not nearly as charmed by the creepily felonious antics or isn't shy about mentioning it.
* Twilight Time." "It's Skyline time" remained a catchphrase even after the advertisements switched to another song.
* Twilight, together with a broader cultural reevaluation of the hatedom, have brought it to Stage X.
* Twilight to help it fit under the wig better) for the remaining films.
* Twilight to Rosalie and Leah, because they are pretty much the only vampire and werewolf respectively who don't like her— though this may be more a case of wanting to avoid supernaturally powerful beings who might have a grudge against her. Finally, Bella spends an inordinate amount of time being mentally catty about Lauren, the lone human who doesn't like her, when she's immediately surrounded by friends otherwise and Bella herself doesn't like Lauren in return.
* Twilight Trailer Spoof, where a vampire successfully lures an unsuspecting victim with an ordinary cardboard box and a snickers bar. Even funnier because the box is too small to even cover a quarter of the victim's body. He even struggles a bit before going limp.
* Twilight/Trixie and Rainbow Dash/Gilda were very popular in the early days and support still goes strong years afterwards. Granted, the latter half of the pairings were more antagonists than outright villains, and Trixie
* Twilight. (Tying into that, Bella notices that the jacket hasn't absorbed any body heat from Edward.)
* Twilight universe. Sure, they originally were human so it may be a subversion in that regards, but they're still large wolf like things that don't really look like wolves in the movies.
* Twilight unwittingly offends Swift-Pad with her repeated apologies before she is made aware of just how seriously the wolves take such things. However, she also demonstrates a willingness to learn from her mistakes when they're explained, which Swift-Pad appreciates.
* Twilight uses a spell to turn Lyra into a stallion for 24 hours so she and Bon-Bon can conceive a foal.
* Twilight vampires can't have kids all along (evidently by claiming an obscure definition of "have").
* Twilight vampire transformations are described as three straight days of burning, terrible pain. But you can choose not to scream if you really don't want to.
* Twilight was leaked in 2008, the author was so frustrated by the experience that she discontinued work on it and put it on indefinite hold, famously saying that if she completed the book in her current state of mind, she'd have let the villains win.

* Twilight was published. Still, they saw a significant boost, as did the invented name "Renesmee", given to 55 baby girls in the US in 2010.
* Twilight was reportedly based on a dream Stephenie Meyer had about a sparkling vampire lying in a meadow filled with flowers.
* Twilight were believed to be infertile, but it turns out that this only applies to the females. So the guys can still get it on with a human girl, but it's incredibly dangerous for the human woman.
* Twilight, when Bella is in the hospital after being attacked by a vampire, the Cullens tell her to explain her wounds this way: "You fell down two flights of stairs and through a window. You have to admit, it could happen."
* Twilight: When Edward Cullen is first introduced (slow-motion entrance), Jessica describes him as "totally gorgeous" while Bella and Angela are practically drooling over him.
* Twilight' when Edward tells Bella, who's dying from her accelerated supernatural pregnancy, that there's no way that he could ever love the baby if Bella dies. Bella and Edward are unusually insular when it comes to their romance so he's telling the truth. He changes his mind when he hears the baby's thoughts.
* Twilight, when he can't believe that Bella would be friendly with him when she was happily married to Edward.
* Twilight when he was still nice to Bella till she showed he would choose Edward over him, after that he started to get all Alpha Male on her trying to get her grounded, kissing her by force and later by emotional blackmail. In the end, he managed to get Bella to admit she loved him, but she still loved Edward more.
* Twilight, where in the second book Bella is convinced Edward will never love her, never did love her and will never come back... after he said he was leaving for her safety only. In fairness, he did say she would never see him again and would be better off forgetting about his existence entirely. (Though Bella did do a pretty lamentable job of listening to anything beyond the "I'm leaving you forever" part.)
* Twilight where the vampire character jumped onto the back of the car carrying the female character and her current boyfriend. The disclaimer said "Stunt vampire. Do not attempt."
* Twilight, which didn't include the love triangle and skipped right ahead to Bella and Edward's wedding.
* Twilight, which Edward finds ridiculous. To repay Angela for being nice to Bella, Edward pretends like he's going to ask Angela to prom, forcing Ben to do so first.
* Twilight, while Victoria still feeds on humans, she accepts Bella’s request not to go after children or anyone Bella knows, and later finds herself unable to feed on an old man she spots on a street because she starts thinking of him as a grandfather who has family who’ll miss him.
* Twilight Wing abilities reverses the controls along with the colours of the screen.
* Twilight with Rosalie and Emmett where Rosalie is in love with Bella and Emmett separately while Bella and Emmett just consider themselves good friends. At one point Bella finds herself watching Emmett and Rosalie having sex from a distance, but just feels happy that Rosalie can feel so much love, admitting to Rosalie later that she never felt as though Rosalie 'stopped' loving Bella just because she was engaged with Emmett.
* twilight years said of Rescue Force 3, "the best thing I can expect out of him is that one day, I'll have to replace him."
* Twilight Zone and so on, there was an episode of such a show where, again, while the future allowed sex, and there were men around, all the men were sterile. This inability to conceive somehow robbed women of any and all pleasure from sex, and relegated men to being treated like not-very-useful sex toys and not mentioned otherwise, with women dismissing them contemptuously and sitting around to gossip over old sex stories of kinky naughtiness they didn't really understand. Then a fertile male shows up and suddenly all the women want him because of his ability to fill them with babies makes the sex ridiculously good. One hardly knows where to start on the massive amount of sexism this heaps on BOTH sides.
* Twilight Zone comic in the 1990s, and in the last few years Walker & Co. has

published several graphic novels adapting specific episodes of the original series, updated to today in some cases. The Gold Key title ramped up the creepiness factor by continuing to feature a cartoon version of Rod Serling introducing each story, even years after the real Serling died.
* Twilight Zone creates a no-way-out nightmare world for the others, but considers it all just good fun himself.
* Twilight Zone episode about mind-reading, to demand a promotion for himself and airline tickets for his friend in exchange for his silence about his boss's affair.
* Twilight Zone episode about two soldiers, one male and one female, from opposite sides being the last survivors of their war. The female soldier's combat uniform included a pleated skirt. And her only line is the Russian for "Pretty", referring to a dress in a store window.
* Twilight Zone episode "Once Upon a Time," wherein Buster Keaton travels in time between 1890 and 1961. The town of Harmony, New York, is obviously bigger and busier in the then-present day, but why the past version of the town would have had random chickens roaming the streets simply because it was 1890 is left as an exercise for the viewer. (One of said chickens becomes an unwitting time traveler as well.)
* Twilight Zone, that delineates the best of these and offers a contest to see who can come up with more.
* Twilight Zone: The Movie as a magic trick, then the rabbit turns into a hairless, hulking, snarling monstrosity before it goes back into the hat.
* Twilight Zone: The Movie as well as creating a terrifying rabbit and a goblin-demon that gets more deranged in design as it continues to pester the residents of the house.
* Twilight Zone: The Movie attempts to lynch Bill Connor but he manages to escape.
* Twilight Zone: The Movie directed by the same director actually focuses on those selfsame troops, based on an off-handed reference one makes to "fragging Neidermeyer".
* Twilight Zone: The Movie goes on fire after Bill Connor kicks him into a burning cross as he tries to escape.
* Twilight Zone: The Movie. He protests that he's not Jewish, white and an American respectively but to no avail.
* Twilight Zone: The Movie), he's clearly doing something wrong. Thankfully, the segment gives little Anthony a happy ending in the form of Helen Foley, a kindly teacher who, upon learning about his gifts, promises to be his companion forever and teach him how to use them properly.
* Twilight Zone: The Movie in filming history as the helicopter became damaged by the explosions and crashed down on Morrow and the children, decapitating him and one child and crushing them under the helicopter. Despite being charged with manslaughter, Landis was acquitted, but it snuffed out his directing career.
* Twilight Zone: The Movie: In "It's a Good Life", Anthony took away his real sister Sarah's mouth so she would not be able to yell at him anymore.
* Twilight Zone: The Movie in "Kick the Can". Mr. Conroy tells the other residents of the Sunnyvale Retirement Home that his son has promised to have him frozen that he dies. Mr. Weinstein mockingly calls him "Popsicle Head."
* Twilight Zone: The Movie: In the final scene of "It's a Good Life", Anthony turns the desert landscape into a beautiful garden filled with many different kinds of flowers as he and Helen Foley drive away from his old house.
* Twilight Zone: The Movie: "Kick the Can" ends with Mr. Bloom arriving at Driftwood Convalescent Home, where he will once again use his powers to make the residents young.
* Twilight Zone to earn an inheritance, only to find the masks deformed their faces.
* Twilight Zone Twist wear any shoes. Unfortunately for him, the sudden transformation sparks a panic stampede where he ends up crushed by the now gigantic feet.
* Twillight Sparkle's awesome adventure come back from the dead over the story:
* Twillight Sparkle's awesome adventure is controlled by evil Martian deep-sea

fishes than that he would, of his own free will, refuse to give him any money or medals.
* Twillight Sparkle's awesome adventure, one of his enemies is identified as speaking in a "funny foreign accent".
* Twillight Sparkle's awesome adventure: "The Mane Six – minus Twillight Sparkle who was with Doctor Whoowes and Rainbow Dash who was in a prison and Fluttershy who is useless – still fought against the guards."
* Twin Banter: The snappy patter and unique speech patterns that twins form with each other.
* twin beds which they can push together when it's permissible to be intimate and pull apart when it isn't. Another common solution is to have one of them use a guest room if their house is large enough.
* Twinbee, one of the ships (not just the pilot of said ship, the ship itself) is female. How can you tell? Winbee is pink. Later adations have also shown that her cockpit is shaped like a heart, though this is somewhat excused - with two rounded bumps on top, it also shows she's the second 'bee ship. Twinbee, the original, has a round cockpit (one "bump"), while Gwinbee, the third, appears to have a rounded arrow pointing down (three bumps on the top part of the cockpit).
* Twinbee, the blue Twinbee and the pink Winbee (which also has a heart-shaped cockpit) are piloted respectively by Light and his girl cousin Pastel, who wear the same colors as on their ships.
* twin brothers, and the courts couldn't distinguish between the guilty brother and the innocent brother.
* Twincest: In most polytheistic religions and mythologies, gods are incestuous; Justified as there are literally no other options besides each other. Some examples of incestuous twins are the fraternal male/female pairs Inanna & Utu from Ancient Mesopotamian mythology; Nut & Geb and Osiris & Isis from Ancient Egyptian mythology.
* twincest—odds are that they've got another guy they can support with for extremely subtext-heavy support conversations.
* twincest, she puts him in his place by ordering her bodyguards to cut his throat on the spot, then cancelling the order at the last second with this trope.
* [[Twincest Shifty/Lifty]] is a pretty common pairing in the homosexual or Yaoi crowd in
* Twincestuous adultery with the queen is frowned upon. Cersei is married to Robert Baratheon, but her children were fathered by her twin brother Jaime. If Robert found out, their heads, including the royal bastards', would end up on spikes.
* twincestuous brother is. Yeah, it kinda runs in their family... and has done for centuries: there are two main lines of Lannisters, the ruling family based in Casterly Rock and the cadet, Lannisport branch in charge of the harbour, customs and navy. They crisscross regularly. What? Do you really think the Rock could ever trust another House to run their trade hub?
* twincestuous finds out Haruhi's secret and leads the host club customers into believing he's trying to confess his love to the beautiful male Haruhi. After realizing she does not reciprocate he swears to be her friend forever—and suddenly becomes very popular with the ladies, who find his tragic spurned yaoi love to be cute.
* Twin Cities and hold a sign for the restaurant. However, since the girl doing it is a cosplayer she absolutely loved the job. The rest of her co-workers thought that doing it was this trope.
* Twin Cities-based department store chain Dayton's. By the 1980s, it began to eclipse the company's other stores in sales. In 2000, the entire company changed its name to the Target Corporation and sold off all its other brands to other companies, leaving just Target.
* Twin Cities, being among the very first malls in the United States. However, he later came to regret his role in developing them; in a 1978 speech, Gruen said, "I am often called the father of the shopping mall...I would like to take this opportunity to disclaim paternity once and for all. I refuse to pay alimony to those bastard developments. They destroyed our cities."

* Twin Cobra: Player 1's helicopter is blue and is piloted by a male, Player 2's helicopter is red and is piloted by a female.
* Twin Desynch: Twins start to look and act differently after they've been separated for a while.
* Twin Dragon Encounter, as the McNamara brothers deal with some rude truckers at a rest stop, Martin attributes a quote about how to go about it to Confucius.
* Twin Dragons is that sixteen years previous one in one thousand births began to produce "hybrids" with varying degrees of animal traits. The protagonists, of course, are fraternal twins who ended up with dragon traits.
* Twin Dragons. Kai catching a cold merits staying home from school, with a bottle of water to put out the hankerchiefs he ignites when he sneezes.
* Twin Dragons, sees each other for the first time in an adjacent urinal. Both men thought they're looking into a mirror...
* Twin Dragons: Two dubs. An uncut export version dubbed in Canada, and the shortened 1999 U.S. Dimension Films theatrical version where Jackie dubs himself.
* Twin drama where a mother accidentally causes her husband's death and persuades his surviving twin to stand in for him to cover it up.
* Twin Earths was built around this concept. The counter-Earth Terra orbits opposite Earth. The daily strip featured Vana, a Terran spy living on Earth to keep tabs on their technology, and Garry Verth, an FBI agent. In the Sunday strip, a young Texan named Punch explored Terra with its young prince Torro. This strip mostly consisted of travelogue-like views of Terran life, for example the fact that in their liberated society, women, who constituted 92% of the population, ran things.
* Twin footballers Rafael and Fabio Da Silva both played the same position on Manchester United for some time.
* Twin-Headed Wolf is based on Cerberus (or, more correctly, Orthrus, Cerberus' two-headed brother), and, of course, several cards based on the mother of all hellhounds, Anubis.
* Twin hook swords and the chicken sickles. The hooked ends are used to hook and trap the opponent's weapon as well as counter shields and slashing weapons such as dao. The tail ends are used as daggers. The crescent knuckle guards are sharpened, meaning you could slash with them as well. And of course the rest of the weapons are used like normal swords or sickles. The hooks can be used to link the two weapons and then swung.
* Twinkie - A Harley-Davidson Twin Cam engine, sometimes used pejoratively by enthusiasts who prefer the older Evolution engine.
* Twinkie House meme loved were twins doin' it, and drew a token twincest story to prove it. No one believed him when that story still somehow managed to involve an older man in the mix...
* Twinkies ads refer to the particularly clumsy "Hostess® Twinkies® cakes."
* twinkies, seeing as how the power grid is still up and active almost everywhere they go. Entire city blocks and shopping centers are still powered, which doesn't pass the sanity test for the "must be backup generators" idea.
* Twinkie the Kid for Hostess Twinkies (duh), before he was relegated to package duty only.
* twinkish queens from New York City with a similar aesthetic, they're often mistaken for each other, and Aquaria has long accused Cracker of copying her style.
* Twinkle is noted to be almost physically identical to her mother, aside from having different mane, eye, colouring, and being ever-so-slightly taller than she was at her respective age, as well as not sounding the same. Oh, and not having wings.
* Twinkle Nora Rock Me! truly takes the cake. It only gets worse when the OVA forgets about the concept of in-between frames.
* Twinkle Toes was made to sell Skechers' new Twinkle Toes brand of light-up shoes. Yup, not even a toyline. Just shoes. Those kids' sneakers with the electric lights that flash every time you take a step, which were popular for a solid generation before Twinkle Toes. It's a charming kids' film in its own right, though, and if

anything, the scene that introduces the shoes encourages kids to use their creativity to decorate their own shoes rather than buy Skechers.
* Twinkle Twinkle: Han Jung Won takes her mother driving along the cherry tree-lined streets of a park in Seoul. It's a bittersweet scene because they both are aware that her mom has a degenerative condition in her eyes and that she may be blind the next time the trees blossom.
* "Twinkle Twinkle Little Dick" ad that suggests that cigarette smoking causes impotence, and possibly makes men go out with other men.
* Twinkle Twinkle: Mostly serious sorrowful drinking, especially by the female leads.
* Twinkle Wish Adventure had background colts). Despite this people often say that the franchise, especially G1, is female only and it pisses fans off.
* Twinky, a 1969 British "sex comedy" has two characters played by famous comedians - Norman Vaughn as Jimmy Tarbuck, and Jimmy Tarbuck as Norman Vaughn.
* Twinmaker: A teleporter that makes a clone somewhere else and destroys the original.
* Twinmaker: Is an exact duplicate of a person the same as the original?
* twin, Marty and Jackie, who like to have sex while reenacting the JFK assassination.
* twin moons under which they were born. Certain sub-species are more common in different provinces, leading to their changing appearance throughout the series. On the other hand, they have yet to explain why all Khajiit outside of Elsweyr are specifically one sub-species in each game.
* Twinning Isn't Everything", but as always blames it on Samey. Except for Jasmine, who witnessed the event, Amy convinces the entire team of Samey's guilt and to vote her off. Samey counters her sister's slander by tricking Amy into eating a poisonous apple that causes her throat to swell up and her to lose her speech. Then Samey claims to be Amy and gets Amy removed from the island in her place.
* Twinning With a Twist. Dave's positive traits are ignored in favor of making him a one-dimensional jerk, justifying his much earlier elimination, and right before the rest of the team starts bonding with Sammy. However, Sammy later learns from Amy at Playa de Losers that Dave just happened to be having a bad day when he arrived on the show, which ended up not getting better in the two days he was there. She finds him to be much more approachable when they speak again.
* Twin Peaks "Address Unknown", whose episodes are scattered throughout games one and two, is all about this.
* Twin Peaks, a few whose actors who died before 2017 are shown to still be alive:
* Twin Peaks. A lot was filmed, but most was cut away in post production.
* Twin Peaks.) Also a rare case of a heterosexual crossdresser on network TV.
* Twin Peaks and Chris Isaak as FBI agents who accidentally travel through time. And the normal stuff just made the weird stuff seem even weirder.
* Twin Peaks and habit of carrying a log around have earned her the local nickname "The Log Lady".
* Twin Peaks, and wanted the mystery of the killer to go on for the entire series. He therefore claims that the killer could be anybody.
* Twin Peaks are supposed to be the eyes of BOB and/or the Black Lodge, but their significance is never really explained. Then again, neither is anything else of consequence to the series' overall plot.
* Twin Peaks as a cross-dressing FBI agent, has said agent deliver one of these to Cooper:
* Twin Peaks, as he usually only wears it right before he's about to horribly murder someone.
* Twin Peaks as the building that was used for exterior shots was bought by new owners who turned it into a steakhouse called "The Roadhouse"
* Twin Peaks. At first sight, she seems to be a spoiled troublemaker who aspires to be a femme fatale (often successfully), but with time it is revealed that she's actually a lonely innocent with good intentions. She also seems to be the only virgin in the whole Twin Peaks town.
* Twin Peaks, Audrey Horne is caught out this way when she fakes her resume at One-

Eyed Jack's.
* Twin Peaks. BOB is roughly an incubus who feeds on fear and pain, so the more traumatic the experience, the better.
* Twin Peaks, BOB is the cycle of trauma (or the "evil that men do" as Albert puts it), including an abused as a child man sexually abusing his daughter.
* Twin Peaks, but at Bowie's own request, his voice is overdubbed by an actual Louisianan actor (presumably due to Bowie's dissatisfaction with his own attempt at a Louisianan dialect). Some of the episodes in which these characters appear are dedicated to their memory.
* Twin Peaks but killing a person for each piece removed from play (in one instance encasing them in a giant chess piece).
* Twin Peaks But none of these obvious suspects killed her. Originally, the writers intended to never reveal who killed her, but the real culprit turns out to be someone no one could have suspected, and their identity reveals a dark secret within the town.
* Twin Peaks came back from commercial (with the standard "bridging" music), which was then playing on the car stereo that the next scene faded in on.
* Twin Peaks centered around Agent Cooper's dream in the second episode.
* Twin Peaks, Chief Inspector Gordon Cole visits the Double R diner on a break from his work on the investigation. Midway through the meal, he spots Shelley, a waitress, instantly declares himself in love with her, and even gets her to kiss him. It doesn't go father than that, as Shelley already has a boyfriend, who's none too pleased to catch her kissing a much older man in public.
* Twin Peaks closes its second season with a Miss Twin Peaks beauty pageant, with the main female characters competing.
* Twin Peaks: Cooper and the Twin Peaks Sheriff's Department suspect Jacques Renault may be an accessory to Laura Palmer's murder, but they cannot arrest him as he is working in One-Eyed Jack's, a casino over the Canadian border. Cooper goes undercover in One-Eyed Jack's and poses as a drug lord, luring Renault back to the US with the promise of a lucrative job. The sheriff and deputies immediately arrest him.
* Twin Peaks Deer Meadows Sheriff's Office. Desmond ends up beating up all the local cops.
* Twin Peaks: Diane, a character who is never seen or heard. When recording his observations and thoughts on tape, Special Agent Cooper addresses her by name. She is most likely his secretary at FBI headquarters, although her identity is never actually stated.
* Twin Peaks fans that the episodes directed by Lynch are the best of the series.
* Twin Peaks: Fire Walk with Me and hates the idea of corrupting Donna more than anything, it's easy to see why she never acted on them.)
* Twin Peaks: Fire Walk with Me, ended up a prequel, which meant it did almost nothing to resolve any of these ambiguities. However, in the usual Twin Peaks fashion, there are a few chronological irregularities that tie into the events of the series' finale (though in a very ambiguous and indirect manner).
* Twin Peaks: Fire Walk with Me, has its share of this, again with the elements linked to the Black Lodge.
* Twin Peaks: Fire Walk with Me that involves seeing herself standing in the doorway in the picture and then entering the picture...
* Twin Peaks: Fire Walk with Me the Jurgen Prochnow character from Laura's dream? What was that monkey about, and who is this Judy person it mentions?
* Twin Peaks: Fire Walk with Me, with the demon Bob slowly climbing through Laura's bedroom window. This is followed by a truly disturbing rape scene.
* Twin Peaks forced him to solve the mystery mid-Season 2, which left him with literally no idea where to go from there, and hence he opted to work on other projects.
* Twin Peaks had at least four different people intermittently possessed by at least three different entities - both good and evil - all of which entities did so to hide who they were and what they were doing.
* Twin Peaks had the Double R Diner. In contrast to the typical trope, the coffee

and pie are absolutely amazing, at least according to the ever-chipper Agent Cooper.
* Twin Peaks had the Little Man, the FBI, possible alien abductors, "BOB", and the woods in general. The entire series was one big, creepy Battle of the Network Powers That Be, all-nefarious, all the time. The owls are not what they seem.
* Twin Peaks had to come on set disguised in order to keep the plot twist a secret and she managed to fool a couple of the other actors, including her on-screen husband.
* Twin Peaks has Cooper's doppelganger; an artificial construct of a man from another world working for an overarching villain who wears a leather jacket, talks in an off-puttingly calm voice, shows impressive physical strength at one point and can survive fatal injuries.
* Twin Peaks has Dale Cooper investigating the unusual death of Laura Palmer. Said death involved an evil entity that can possess certain living people, an alternate universe that looks like a art-deco hotel lobby, and a one-armed man whose arm is now a dwarf.
* Twin Peaks has Dale Cooper, who is suggested to have some degree of psychic powers. This includes getting dreams that help him solve murder cases.
* Twin Peaks has Deputy Andy. While he rarely throws up he always cries at murder scenes.
* Twin Peaks has Gerard, a.k.a. The One-Armed Man, who cut off his own arm as penance and to rid himself of the tattoo that allowed the demon MIKE to possess him. He is played by Al Strobel, who lost an arm at the shoulder in a car accident as a teenager.
* Twin Peaks has his brother Jerry as a lawyer to help out with business deals and contracts. When he's arrested for the murder of Laura Palmer, Jerry quickly realizes that he's out of his depth and tells Ben that "as your lawyer, your brother, and your friend, I highly recommend that you get a better lawyer."
* Twin Peaks has lots of really creepy scenes that take place in broad daylight. Starting right with the very first scene.
* Twin Peaks has the pencil-breaking variety in the first episode. The morning Laura Palmer's dead body is found, a teacher comes in to Laura's secret boyfriend James' homeroom, presumably to tell the homeroom teacher school is out early after the principal's announcement. They then see a girl run screaming across the courtyard through the window. James and Donna both look at Laura's empty desk, and the penny drops. Donna starts crying and James snaps the pencil in his hand in half.
* Twin Peaks. Hired goon, abusive husband, profane loudmouth: the whole package.
* Twin Peaks, "I love you, Sheriff Truman." Truman gains a lot more respect for him after that, and they reach an understanding.
* Twin Peaks. In episodes after the revelation the real credit was returned.
* Twin Peaks in October 2014, 24 years after the second season ended, and broadcast in 2017.
* Twin Peaks insanity spread across various episodes to improve the anxiety.
* Twin Peaks Ironically, this is foreshadowed by accident in the pilot episode, which showed an aged (and helpless) Cooper sitting in a chair in the Black Lodge — the world's longest waiting room. Cooper would have been rescued in season three had the show not been cancelled. Through time travel antics (and the movie "Fire Walk With Me", Annie would have contacted Laura Palmer in the past and Laura would have written a message in her diary alerting Cooper's friends of his plight/impersonation, which they would suddenly notice when said new message shows up in the diary when a character reads it.
* Twin Peaks is perhaps the only person who is not portraying a character when she appears in a dream Gordon Cole had of her.
* Twin Peaks it appears black and white, and a several minute-long plot-irrelevant scene of an extra sweeping the floor.
* Twin Peaks it kept a thight hold on the central plots and when that was lost the series became one as a whole and was canceled.
* Twin Peaks, it manages to alternate comedy, science-fiction and horror elements

from one scene to another.
* Twin Peaks", Janey-E ties Cooper's tie, when he leaves the house with it still around his neck untied.
* TwinPeaks Juvenile delinquent Bobby Briggs is having an affair with Shelly Johnson, the wife of the more seasoned criminal Leo Johnson
* Twin Peaks: Made and story begins in 1990, but the prologue is set in 1989.
* Twin Peaks, Major Briggs's experience with Project Blue Book is often alluded to. The context strongly suggests that if the show hadn't been cancelled, it would have veered towards science-fiction.
* Twin Peaks matches the local cops donut for donut while also indulging in the local diner's pie, which he finds irresistible. The sheriff notes that he must have the metabolism of a hummingbird.
* Twin Peaks meaning behind what's being said, it's done in a very obfuscating manner.
* Twin Peaks. More realistically, the casino's owners immediately fire the manager because he didn't kick him out before he walked off with millions of dollars and later attempt to murder Cooper. Even if they can't prove he's cheating, the odds of his winning streak are so unbelievable that they damn well know he did.
* Twin Peaks, Mr. Palmer shows up at the party for the Icelanders. One of the songs triggers the memory of his daughter and he starts to dance, weeping and clutching at his face. Catherine dances with him to try and avoid a scene, but he keeps clutching at his face. Desperate, she imitates his face-clutching hand waves. The Icelanders, not knowing what's going on, start to mimic the movements.
* Twin Peaks once did a series of commercials for Georgia Coffee, a canned coffee beverage. The overarching plot was a man trying to find his companion, lost in the woods.
* Twin Peaks, one of Bobby Briggs' most humiliating secrets is that he cried after the first time he and Laura Palmer had sex and that Laura laughed at him for it. Dr. Lawrence Jacoby, who had been secretly counseling Laura for six months before she was murdered, uses his knowledge of this to press Bobby for information about what happened to Laura prior to her death.
* Twin Peaks, provided as much of an explanation and resolution as was possible.
* Twin Peaks's active involvement in the show helped break the stereotype that television production was the equivalent of the farm leagues to movies as opposed to a full-on competitor.
* Twin Peaks, San Francisco, California: Two hills in San Francisco, made famous by the series
* Twin Peaks seem to take place over a month or two, at most, although we were never given an exact timeline indication internally.
* Twin Peaks. Series writer and co-creator Mark Frost describes him thusly:
* Twin Peaks sometimes dives into this during the show's more awkward moments.
* Twin Peaks. Surreal, absurd, soapy, highly-original mystery show peppered with frequent, off-beat comedy.
* Twin Peaks's works, it has gradually carved itself a place in history.
* Twin Peaks that look like men covered in dirt or grease that spawn form an interdimensional gas station. They swarm people driving in cars late at night and kill them.
* Twin Peaks: The murder of a teenage girl → otherdimensional demonic conspiracy (to confuse the audience).
* Twin Peaks (the renewed series, made over twenty years later) he's now one of the leads.
* Twin Peaks. There's also a subplot set in Las Vegas involving an insurance executive who's heavily embroiled in organized crime.
* Twin Peaks, the scene of Maddy's murder, which reveals who killed Laura Palmer, was filmed twice with both Leland, the real killer, and Ben, the red herring, to confuse anyone who might be tempted to leak. At the script stage, no less than three versions of the scene were reportedly distributed, with the third having Dr. Jacoby as a second red herring candidate.
* Twin Peaks). They look like mundane dirty hobos, but their creepy, distorted

speech puts people to sleep, and they can travel through dimensions and instantly kill people. When they appear, everything turns black and white to signal how reality distorts around them.
* Twin Peaks. This reveal in fact contributed to the series' eventual cancellation.
* Twin Peaks though, as the song then goes on for another minute or so as though nothing ever happened.
* Twin Peaks to figure out what the heck is happening, and Dream!Lisa is eventually forced to drop the mysterious act and outright tell him her message ("LOOK AT BURNS'S SUIT! Yeesh!"). When the Chief awakens, he happily talks about the "weird backwards-talking dream" he just had, prompting concern from the other cops.
* Twin Peaks to pass off as the real Coop in front of Cole, Albert and Diane, but can't seem to grasp his mannerisms and personality whatsoever, and none of them buy it for a second.
* Twin Peaks trick of imitating a recording of the vocals as played backwards and then reversing that.
* Twin Peaks: Twin Peaks has its own layered symbols, its own centers of goodness and evil (the Lodges), and its own prophesies ("That Gum You Like Is Going To Come Back In Style").
* Twin Peaks unconnected to anyone else). Windom Earle at least managed to pull everyone's plotlines back together into something more cohesive, but was no BOB.
* Twin Peaks. When she later brings Agent Cooper to talk to the old woman, a completely different woman answers the door who has no memory of any grandson or anyone else living there.
* Twin Peaks. When Sheriff Truman has a hangover, Agent Cooper and Cole list the ingredients of their own personal hangover cures. They're so disgusting, Sheriff Truman rushes to the bathroom to vomit. (Which was the real 'hangover cure' all along.)
* Twin Peaks who is described as being a 27-year-old who's still in third-grade. It's clear however that Johnny has mental issues and he was being privately tutored by Laura Palmer.
* Twin Peaks with the good news that "that gum you like is coming back in style".
* Twin plays twin brothers Erik and Adam Moen, but the premise of the series is Erik pretending to be Adam after his death, so the two characters rarely share screen time, save for in flashbacks, after the first episode.
* Twin Princess of Wonder Planet. About the worst thing that can happen is hurting someone's feelings.
* Twin Princess of Wonder Planet arranged a marriage between Princess Mirlo and the very young son of a rich man. When the father learned the reason was entirely due to the Water Drop Kingdom being broke, the father called it off.
* Twin Princess of Wonder Planet, cementing the latter position with the second season.
* Twin Princess of Wonder Planet has twin princesses Fine and Rein, who can only transform and unleash their most powerful finishing attack when they're together.
* Twin Princess of Wonder Planet-ish later on and became a main character.
* Twin Princess of Wonder Planet, the first ending theme is a cover of "Gakuen Tengoku" by the '60/'70s Japanese boy group Finger 5.
* Twin Princess of Wonder Planet: The Prominence and the Power of Darkness. Neither are explicitly called magic despite looking just like it. Altezza refers to the former as Fine and Rein's "weird power".
* Twins Are Special: Based on some versions, Inanna & Utu from Ancient Mesopotamian mythology; Nut & Geb and Osiris & Isis from Ancient Egyptian mythology. In all cases, they are fraternal male/female pairs whose bonds are considered so deep that they become husband and wife. Nut & Geb are also considered special as twins as they are considered the embodiment of duality and complementary natures (Nut is the goddess of the sky, Geb is the god of of the earth), forming a single whole.
* Twins Are Special: Some cultures interpret a multiple birth as a bad omen.
* Twins) can speak twelve languages along with excelling in all school subjects, physical and spiritual training.

* Twins have played collegiate and professional sports as teammates. While sometimes they differ in abilities, many times their skill sets are sufficiently similar that they can and are used interchangeably. Examples include Henrik and Daniel Sedin of the Vancouver Canucks, Markieff and Marcus Morris of the Phoenix Suns, David and Travis Wear of the UCLA Bruins basketball team, and Shaquill and Shaquem Griffin of the University of Central Florida Knights football team, and later, the Seattle Seahawks.
* Twins Henrik and Joel Lundqvist played ice hockey together as kids. One day, Joel volunteered his brother to play goalie in a pickup game. Henrik is now one of the best goaltenders in the game.
* Twin Siblings, and characters are often involved, sometimes unknowningly, in an affair with them)
* twins is casually dropped during a conversation between Jiriaya and Tsunade.
* Twins: Julius (Schwarzenegger) and Vincent (DeVito) got married to their twin love interests and each had twins.
* Twins knew all about driving from reading about it, and having read the car's manual, he knew he could shut off the alarm by lifting it up from the back, thereby tricking it into thinking it was being towed. Of course it only worked because of his extraordinary strength.
* Twin's Labyrinth, Ren wears a naked apron for his lover's birthday, although it doesn't remain on for very long.
* Twins of Evil. Frieda was made into a vampire by Count Karnstein. When Frieda was caught, Karnstein substituted the innocent Maria in the jail cell where she was awaiting execution.
* Twin Spica anime in which Asumi talks about her childhood dreams or shares astronomical knowledge (usually in the beginning) are drawn in a very primitive, childish style.
* Twin Spica, Asumi's teacher Yuuko is like that after her boyfriend Takano dies aboard the exploding rocket which also caused the death of Asumi's mother. After several years of mourning, she decides to go on and then finds someone else to marry pretty quickly. Sadly she never realized that all this time Takano had been roaming the town as a ghost named "Lion-san."
* Twin Spica grows up at Kamakura's Yuigahama Beach, after surviving the space rocket crash there in which her mother got killed.
* Twin Spica is set in the near future at a high school for astronaut candidates. In volume 4, they undergo training in space suits for long periods of time, obviously embarrassed that they are to wear diapers for the exercise. Very early in the training, Kei, who forgot to use the restroom before starting, asks for a bathroom break, which she is denied. After a few minutes of desperate struggle, she is humiliated as she pees herself.
* Twins, Sakura Matou is turned on by the knowledge that Shirou Emiya would kill to protect her if he had to.
* Twin stage actors Shouta and Kenta Yamanaka did this for this first time in early 2019. The 2.5D stage world is an odd niche, since the plays require a pretty big time commitment from the actors, but they also tend to be done in series, and every series is different in regards to how they want to space their productions. This means that scheduling conflicts end up being the main cause of
* Twin Star Exorcists, Rokuro and Benio, both suffer from this caused by tragedy's in their past. For Rokuro, it's because he was the lone survivor in an attack that killed 18 kids, who were all living together. For Benio it is the fact that her parents died protecting her, made worse by the fact that their killer gave Benio a chance to save one of them, but because she froze, he ended up killing them both.
* Twins, the "perfectly engineered" gamete divided into two babies, who grew up to look like Danny De Vito and Arnold Schwarzenegger.
* Twins, Vincent has his love interest's room fully decorated with flowers. She is floored when she enters.
* twins who works at their great uncle's tourist trap. He is also the one who often accompanies them on adventures.
* Twins with two different fathers aren't all that rare either, although they're

usually roommates in a single uterus.
* twins Yu Fan and Yu Lan with. Despite all this, they are still so incredibly in love and pledge undying loyal to him. "Anything for Sensei" indeed.
* twins Yu Fang and Yu Lan ever since they were young) seems to be a pretty good indicator that he doesn't care much for their well being. Despite all this, they are still so incredibly in love and loyal to him. "Anything for Sensei" indeed.
* Twin Telepathy: A link between twins, sometimes for no reason other than the fact that they're twins.
* Twin Test — A character is tasked with differentiating between identical siblings by at least one of those siblings.
* Twin Test: A character is tasked with differentiating between identical siblings by at least one of those siblings.
* Twin Test: Trope variation in which a character is tasked with distinguishing when one personality is in control by any of the personalities to see how well that character knows them.
* Twin Threesome Fantasy: Someone imagines having sex with their crush and a copy of their crush at the same time.
* Twin, which has many of the hallmarks of a Nordic Noir drama, with some police procedural aspects, but the detective is merely a side character and the focus of the story is on the victim's twin brother.
* Twinz. Once the listener is told that they killed the wrong man, the hit is never mentioned again. Even worse, the video for the song covers an alternate plot that does not exist in the song.
* Twipsy is about a courier who delivers e-mails in the Internet. About half of the show takes place in the Internet, rendered in 3D CGI graphics. It can be entered by humans as well.
* "Twist and Shout", first recorded by the Top Notes. The Beatles' cover is only one of several (including
* Twistaplot #12: Journey to Vernico 5 into one as his goal, only he prettied it up by calling them "Willingness Workers."
* Twistaplot #12: Journey to Vernico 5 is the result of eating a package of Choco-Raspberry Lunch Meat that's two years out of date.
* Twistaplot #12: Journey to Vernico 5 your character, having accidentally ended up piloting a ship full of dangerous contraband from the planet Japponn, decided to sample some Choco-Raspberry Lunch Meat that was two years out of date and mutated into a giant green and purple celery-like plant that smelled exactly like a chocolate-raspberry milkshake.
* Twista's only #1 hit was "Slow Jamz", which isn't nearly as iconic as his #6 "Overnight Celebrity". Nowadays the former is associated more with
* Twisted! all the living amusement park rides (except red coasters) began as ordinary rides that were destroyed or put into storage in the human world become living creatures in the Amusement Park Between. It's also mentioned that the stuffed animals won as prizes come to life, but never shown.
* twisted an ankle than anything that had appeared in the series before.
* twisted!", and while most adults agreed, kids loved the idea of green ketchup enough for it last six years on the market before being mercifully discontinued.
* Twisted Ankle: Someone who must flee hurts their foot or leg and it slows them down.
* Twisted Cakes, where the cake was made to look as though it and a stripper inside had had a large slice taken out of them.
* Twisted Circus slot machine. The circus is less scary looking than you'd expect but the slowed down version of "Entry of the Gladiators" that plays throughout the game has a creepy sound.
* Twisted!, Clare is a petite human woman, while Railrunner is an anthropomorphic roller coaster that's over twenty feet long and weighs several thousand pounds.
* Twisted Cogs. All the garzona and studios are identifiable by their colors.
* Twisted Cogs, but this is mostly averted since most old men act professional and deserving of respect.
* Twisted Cogs can act like this. The main character's Echo is constantly trying to

give helpful advice that often falls on deaf ears.
* Twisted Cogs is a story set during the Renaissance with a twist. The narrative follows a young woman named Elena as she moves away from home to become an artist. However, as it is wont, the world has more in store for her than just paintbrushes and canvas.
* Twisted Cogs speaks and the rhetorguard doesn't kill her or turn her in to be killed - then they are seen as the dark variant below.
* Twisted Echo Cut: The conversation cuts to another just like it, though related to something else.
* Twisted Fates, Yomiel has just got home from work and really wants some quality time with his wife. Sissel, however, really needs to talk to him and breaks up the moment rather unceremoniously. He feels bad about it, though.
* Twisted! him for it). Even once they've invaded the Kingdom they still think he's come to get the tiger back.
* Twisted Insurrection also features several missions taking place in underground facilities.
* Twisted is a bit harder and while not inaccessible, isn't nearly as perky as "Roll to Me".
* Twisted! is a book about sentient rollercoasters... that kill and eat people. The idea of the main characters being amusement park rides seems too childish for adults, but the gore and edginess of the content makes it inappropriate for children.
* Twisted!: Ja'far's pregnant wife is taken away from him by the Sultan. Before he can do anything to get her back, she dies. Ja'far is also hated by everybody in the kingdom and everything that goes wrong is promptly blamed on him.
* Twisted Justice is styled after creating such a situation, and the flavor text is from the perspective of the judge as he's being manipulated to send an innocent man to his death.
* Twisted Kaiju Theater is a serious long runner, being one of the longest-running photo-webcomics of all time and well over 3,000 strips. The problem is only compounded by the fact that TKT has a LOT of continuity throughout the series so you have to read everything in order the first time through to understand who the characters are and what their backstories are.
* Twisted-Knee Collapse: A character kneels with the lower legs sticking out because they're sad or tired.
* Twisted Metal 2 sent to space... at which point it's revealed her car doubles as a spacecraft, allowing her and her brother to return to Earth safely.
* Twisted Metal 2 surprisingly grants. Finally standing up to his father, Axel frees himself from the machine by ripping his limbs off, much to his father's horror. Quite rare for this trope, this is actually seen as a moment of triumph here.
* Twisted Metal and even tries to warn some winners of the dangers of their wishes, but in the sequels, this trope is in full effect.
* Twisted Metal, and the details on the differences between him and the other versions of Calypso make this allegation hard to argue against.
* Twisted Metal, at the end of the final campaign, Dollface wishes to model on the "biggest runway in the world", and gets deposited on the tarmac at an airport runway. She sees a plane headed directly towards the runway she's standing on, and instead of running off to the side, she runs in the opposite direction. She then breaks her heel and stays on the ground monologuing (instead of rolling out of the way) until the plane crushes her).
* Twisted Metal: Black discovers that he's an FBI agent, but not until he gets his memory back after the tournament...and standing in front of the number two most wanted man in the world.
* Twisted Metal: Black had killed his congregation, so Calypso couldn't do anything to help him. The preacher kills himself once he realizes that he can't run away from his sin.
* Twisted Metal: Black, the Freeway stage has church bells in its ambient soundtrack.

* Twisted Metal: Black wears a mask that her former boss locked on to her head and nailed to her face. Her counterpart from the 2012 game put on her mask voluntarily and it's also stuck to her face, though here it's magic.
* Twisted Metal: Black while No-Face is putting on a boxing glove covered with knives and scalpels. The scene ends just as the boxing glove is about to make contact with the doctor's face.
* Twisted Metal brings his souped-up ice-cream truck in for service. His midget clown sidekicks aren't all that familiar with the control scheme...
* Twisted Metal... but if you win the tournament and then wish for revenge on someone, nine times out of ten, he'll give you what you want without any manipulation. Something about it seems to strike a chord with him.
* Twisted Metal by her, who then uses his flaming head like a torch to continue her killing spree.
* Twisted Metal features such attractions as the "roller toaster", aside from being a battleground where the demented clown and a number of assorted psychos try to kill each other.
* Twisted Metal game, and that it was foolish to think that, and that he wouldn't even be at E3. He said he did it cause otherwise there'd be no surprise to it.
* Twisted Metal game. During the pre-stage dialogues in Sweet Tooth's story mode for this level, Calypso invokes this trope with: "Do you like the holidays Sweet Tooth? I do. I, I love to see the people so happy. So excited. Because when they die violently, they're so surprised. Am I right? No one expects to die on Christmas".
* Twisted Metal gives the in-universe explanation that Calypso has modified each contestant's car before the contest began.
* Twisted Metal has a 3/5 in all stat areas (armor, speed, handling & special move).
* Twisted Metal has a carnival park in the Suburbs level, where you can send the Ferris wheel rolling to crush opponents.
* Twisted Metal has a level set in a Dutch tulip field. The field is bordered by a small wooden fence which cannot be destroyed or jumped over, whereas the two sturdy windmills in the field go down easy.
* Twisted Metal Head-On is a parody, whilst Billy Ray, driver of Junkyard Dog, is a subversion, he is a deformed murderer, but is sympathetic once the player finds out why.
* Twisted Metal. He is still able to drive, because he can somehow sense what's around him.
* Twisted Metal, he jumps off a roof because he can't live with the knowledge that he's schizophrenic, not possessed. The screen cuts to black after he jumps - followed by a thud and multiple car alarms.
* Twisted Metal. He still hands out tasty kid's treats from it, just be prepared for the explosives and napalm packs in the cones and ice cream sandwiches.
* Twisted Metal introduced Mr. Slamm ripoff Auger, a big yellow construction vehicle with a big-ass drill on the front.
* Twisted Metal is built around getting into a vehicular tournament of death for one wish from Calypso, and not all contestant's wishes are made equal.
* Twisted Metal is Calypso, the nefarious host of the tournament, as some version of him is always present, being the common link between all of the drivers' stories.
* Twisted Metal, many of whom are violent psychopaths. The contest is very much illegal, however, and how exactly they were freed is unknown.
* Twisted Metal. Mind you, he's a demon, and in some installments appears youthful, but he still looks relatively unkempt.
* Twisted Metal: Mister Grimm is actually the Grim Reaper in most incarnations. It was suggested that he was once a mortal man, as statistics given in Twisted Metal Head-On match the form he assumes in his ending, rather than his usual appearance as a skeletal biker. The exception occurs in the darker Twisted Metal Black; unlike the main series, Grimm in this game was a US soldier in Vietnam, who was captured along with a wounded friend. The friend died, and in order to avoid starving to

death, Grimm had to eat his corpse, keeping the skull as a mask. The reboot changed him again; this time as the son of a stunt biker, who took his father's stage name after he died in a car accident.
* Twisted Metal: Mr. Grimm was forced to eat his friend by a sadistic Viet Cong officer, and now wears that friend's skull as a helmet as a memorial to him.
* Twisted Metal. Naturally, this results in a lot of vehicular death and destruction.
* Twisted Metal. Now the series is being completely rebooted on the PS3.
* Twisted Metal predate it), but it certainly did popularize the genre and some features, such as tournament-based storylines, quirky characters and more differentiated vehicles.
* Twisted Metal reveals himself to be FBI rather than take a wish from Calypso.
* Twisted Metal's Minion drove a tank, which tends to be the most durable vehicle in the game (not counting unusable bosses), and extremely fast. As such he's usually only playable through cheat codes.
* Twisted Metal stated that she's meant to be a satire of the extreme standards of the modelling industry.
* Twisted Metal: The playable versions of Minion in every incarnation are about half the size, have no force fields, lower life, weaker weapons, etc.
* Twisted Metal, travels back in time, and gets stomped by a dinosaur.
* Twisted Metal was set in 2005 Los Angeles, almost every iteration since that has become a world tour. In fact, the second game made this an actual plot point.
* Twisted Metal, where instead every character is a little kid and they drive heavily-armed RC vehicles through playgrounds and other urban areas.
* Twisted Metal who just so happens to be standing in front of a wanted criminal. John himself sums it up.
* Twisted Metal, you can send a Ferris wheel rolling. It does damage to anyone who gets hit by it.
* Twisted Princess) seem to concur that it happened as a result of breaking her deal with the Fairy Godmother and not getting home before midnight.
* twisted sense of morality due to being immortal on unfortunate people. Luckily, most fairies are extremely weak and pose little threat, and are rarely intentionally malicious.
* Twisted Sister a song that rebels against authority, towards the end, Dee Snider starts doing a DSN impression while the chorus is repeated, complete with "now drop and give me 20!" It creates a kind of paradoxical humor - using authority to rebel against authority.
* Twisted Sister. At the end of the video, the band's backed him into a corner with windows on both sides. He smugly stands in front of a solid wall, thinking he's outsmarted them. He goes through the wall anyway.
* Twisted Sister band known for their onstage antics, rebellious music and disapproval of censorship. Their frontman, Dee Snider, has been a lifelong Christian, and fundamentalist Christians were among the band's detractors.
* Twisted Sister (helps the former song ends with Dee Snider mimicking the picture caption atop this page). Metcalf also appears in one video by Lit.
* Twisted Sister is repeatedly abused in a Wile E. Coyote-like fashion: repeatedly tossed through windows, diving onto wet cement, getting launched through a basketball hoop, and getting dynamite blown up in his face. The videos do set it up so that he deserves what he gets.
* Twisted Sister's biggest hit (and only in the Top 40) is "We're Not Gonna Take It", no surprise. But somehow "I Wanna Rock" isn't their second most sucessful on the Hot 100 (#68), instead being a cover of "Leader of the Pack" (#53) - and it also ranks fifth on their Mainstream Rock charting hits!
* Twisted Sister's Christmas album are influenced from some of their older songs. For instance, "Oh Come All Ye Faithful" is done in the style of "We're Not Gonna Take It", and even lampshades it by using a part of its solo too.
* Twisted Sister's "I Wanna Rock" video has this power. (Okay, he needs a guitar and some huge speakers, but it still counts.)
* Twisted Sister's "Love Is For Suckers", which is a rant about men who are total

suckers that would do anything for love... even the singer during the breakdown, when he tries to resist Little Miss Perfect's attempt to get back together with him and ends up falling for it when he says, "You what? You will? With your heels on?"
* Twisted Sister: S.M.F.. Dee Synder notoriously explained to Senator Al Gore that it stood for "Sick Mother Fuckers" during the 1985 Senate hearing on offensive content in music.
* Twisted Sister, so he jumps into the school swimming pool to try defusing it, but ends up getting blasted upward, hitting his head on the diving board.
* Twisted Sister was looking for, all in an incredibly intelligent and eloquent matter.
* Twisted Tales gruesome fantasy segue. And then another just before the story's end.
* Twisted: The Untold Story of a Royal Vizier. And because he doesn't understand the Genie's quoting and takes him literally, he introduces the djinn as Johnny, then Turboman, but gives up altogether when the djinn says "I'm Batman!".
* Twisted: The Untold Story of a Royal Vizier, but with Jafar now portrayed as a well-intentioned but universally-hated vizier, who simply wants to save his country.
* Twisted: The Untold Story of a Royal Vizier is a thorough subversion; since she lives in a world where magic is a real and tangible thing, her dreamy, creative life as a storyteller yields valuable knowledge rather than pointless whimsy. When she brightens Jafar's life, it's a deliberate (and skillfully clever) effort on her part rather than just her innate quirkiness, and when Jafar falls in love with her, it's because her argument for the value of magic is logical and well-reasoned enough to convince him of her worth, even if he never actually adopts her viewpoint on it.
* Twisted: The Untold Story of a Royal Vizier, Ja'far tries to warn the Princess of wily princes wanting to get into her pants by seducing her with a romantic love song. Just as he is about to break into a song about it — "A Song is a Dick in Sheep's Clothing" — the Captain walks in and interrupts him to bring him bad news.
* Twisted: The Untold Story of a Royal Vizier of Disney stuff), the Princess discusses and deconstructs this trope.
* Twisted: The Untold Story of a Royal Vizier, tells him "no high-five", to his confusion.
* Twisted: The Untold Story of a Royal Vizier: The main point of the Royal Vizier's song "The Golden Rule (Reprise)".
* Twisted: The Untold Story of a Royal Vizier, the Princess boasts to Prince Achmed of how Aladdin once faced "the galloping hordes". Since the Djinn just made it up, Achmed merely stares in confusion, having no idea what she's talking about.
* Twisted: The Untold Story of a Royal Vizier: The Sultan has an inverted penis, and this is how Jafar figures out that the Princess is his daughter.
* Twisted: The Untold Story of a Royal Vizier to Aurora's christening.
* Twisted Toyfare Theatre built a three sided lightsaber. He ended up accidentally cutting his own hand.
* Twisted Toyfare Theatre featured a parody in which the Punisher gives the Green Goblin a Hostess Fruit Pie that's rigged with a bomb.
* Twisted Toyfare Theatre had Reed Richards turn into a Skrull and gloat to Susan Richards about having tricked her into having sex with him. She promptly turns into another (male) Skrull and replies "Bob, you idiot."
* Twisted Toyfare Theatre had to deal with mirror universe versions of Vulcans that embraced non-logic. So, he told the highly insecure and polite version of himself some implements he needed: Three teenage girls and a squeegee. That plan was promptly dropped when the Vulcans took him by surprise.
* Twisted Toyfare Theatre loves playing with these. There are usually Redshirts around to die in stories featuring Captain Kirk, and the title page of one of the trade paperbacks shows Kirk and Spock standing amidst a sea of Redshirts while Spock looks around uneasily.
* Twisted Toyfare Theatre plan the group has seems to involve putting Chewbacca in

binders for some reason.
* Twisted Toyfare Theatre storyline had team captains Spider-Man and Dr. Doom select their teams from the heroes/villains/whatever the Beyonder brought to his island. Doom has the second-to-last pick, and the only ones left are a young paraplegic boy and his hated enemy Reed Richards. Naturally, Doom chooses the kid, leaving Richards angry and humiliated.
* Twisted Toyfare Theatre strip features Galactus landing on top of Four Freedoms Plaza, having been called to destroy Earth because the Silver Surfer found no-one capable of standing in his way (the Thing had stayed behind while the others went off on a mission, and fell asleep in front of the TV). When Galactus refers to The Thing as "fugly", The Thing socks Galactus right in the gut. After there being absolutely no reaction, The Thing offers up his opinion as to what to do next: "Well, I'm stumped."
* Twisted Toyfare Theatre-style police line-up, Spidey wonders, "What the Hell's a 'Keyser Soze'?"
* Twisted Toyfare Theatre, where Mego Spider-Man just wants to go home and watch TV, but he continually saves the day because he literally has no choice.
* Twisted Toyfare Theatre, with a villain exclaiming "rich teenagers with superpowers? Yeah, I WISH I had your problems!"
* Twisted Translations, but there are some lines that could be taken in more than one way, but it's humorous either way:
* Twisted Translations through Google Translate. However, by the end she starts singing along with the song, catching herself for a second, but then shrugging and going over to dance and sing along as the video ends.
* Twisted Translations' usually has bare feet, either in her videos or on her Instagram profile.
* Twisted Wonderland. Ace's SSR Groom-For-A-Day personal story also sheds a light on the lack of romance for a few characters when they talk about the experiences they've had with romance in the past, or the lack of it:
* Twisted Wonderland and has lion ears, tail, fangs and slitted pupils.
* Twisted Wonderland is incredibly smart and could easily excel if he put in any effort, but would rather nap and laze around than work hard for things he has little interest in. This may be stem from his upbringing, being constantly compared to his more successful elder brother.
* Twisted Wonderland: With Malleus Draconia's fellow dorm members of Diasomnia revering him and other students fearing him, he can't make friends the way he wants to and is frequently jealous when he finds that Silver and Sebek have gotten to spend time with others. Malleus quickly latches onto Yuu, who doesn't fear him nor revere him due to having no knowledge of who he is, because of this. He even goes as far as to say he fears losing someone like them.
* Twist Ending and there was much discussion over it. And then the next issue comes and the situation hasn't changed at all.
* Twist Ending is a relatively subtle example of the trope; the main character has no idea that anything is odd about him, as people's reactions to his words and actions seem entirely plausible, until he realizes that they only appeared to have been interacting with him in the way he expected them to. The fact that everyone's reactions seem plausible is even lampshaded ahead of time, when Cole tells him that ghosts only see what they want to see, and hear only what they want to hear.
* Twist Ending is that the characters telling the stories to each other were actually killed in the car crash that stranded them.
* Twist Ending, Nicholas is given a shirt reading "I Was Drugged And Left For Dead In Mexico – And All I Got Was This Stupid T-Shirt."
* Twist Ending of Julie Redding. The real Parker Duvall was killed by her abusive father some time before the first novel.
* Twist Ending: the narrator sees the birth certificates of his friend Goat and Goat's two brothers, which have "Irving Evans" listed as the father, and then sees the birth certificate of Irving Evans, who apparently has the same mother that Goat and his brothers do.
* Twist Ending: The plot leads one way, but then something happens at the end which

changes everything.
* Twist Ending. Two girls go into the school at the same time to try to use the mermaid flesh to make the same boy fall for them. When dawn falls the only mermaid they killed has the wrong name, forcing both of them to cast the spell on each other instead. They instantly transform from hated enemies into a lovey-dovey couple.
* Twist Ending up in some other, unforeseen way. Anyway, it's ended, whatever it was.
* Twist Ending When Ember is finally discovered, she's badly scarred with tattered wings and her entire left horn is gone.
* Twist Ending, where the two drunk people waking up in bed together didn't have sex...but a ton of much, much creepier stuff did happen.
* Twist Ending, which reveals that the killer, who was one of the actors, became so immersed in his role that he started imagining himself as Frank and was actually speaking to a room of patients in the asylum.
* Twist Ending", which, up until that point, appears to be describing a regular horror movie, full of blood, guts, gore, etc. Then:
* Twister (1996), Beltzer , one of the Members of the Storm Chasing Crew, States while looking at the radar, During a F-3 Tornado, "That's No moon, It's A Space Station! Woohoo!"
* Twister; after some experimentation, the Burger King logo brained him out of irritation.
* Twister. As a psychiatrist riding with tornado chasers, she asked questions on behalf of the audience like "Is there an F5?".
* Twister begins with the lead heroine losing her father in a traumatic way early in life.
* Twister. Bill Harding meets with his former wife Jo Harding to get her to sign their divorce papers. They end up going on a adventure together involving dangerous tornadoes and discover that they still love each other.
* Twister. Bill's fiancé Melissa has no specialized knowledge about tornadoes, so she is a natural source of questions about them that Jo's tornado chaser team can answer to educate her as well as the audience.
* Twister, Dr. Reeves (Bill Harding's new fiancée) keeps answering her cellphone in the middle of tornado chases. At one point, after seeing a rather amazing feat of tornado-ness, she blurts, "I gotta go, we got cows!"
* Twister featured several well-known Oklahoma news meteorologists, most notably Gary England from KWTV during the opening scene and Rick Mitchell from KOCO later on.
* Twister had a couple of these, but the big tornado that hit's Jo's aunt's house came with no warning at all. And the end goal of all the storm chasers was to improve tornado prediction enough that these broadcasts could come sooner.
* Twister has a rare female example in Melissa. Tends towards Minor Flaws, in that she is somewhat boring and holds back the lead character from doing what he loves. However, it's also mixed with Let's Call The Whole Thing Off as she realizes that he still has lingering feelings for the woman he hadn't even legally divorced yet.
* Twister: Melissa breaks up with Bill before he goes chasing after the final tornado because, in her words, "I can't compete with this."
* Twister often has this relationship with his older brother Lars in
* Twister: One of Jo's team gets sliced in the forehead by a flying hubcap. "My head!"
* Twister...Ride it Out attraction had a tornado warning broadcast playing on a TV as guests entered the main show.
* Twister...Ride it Out, the climax has a gas pump creating a trail when it starts to leak, which is then ignited by some sparks.
* Twister...Ride it Out was slated to open in March 1998, but ended up being pushed back several months out of respect, because in the February of that same year there had been an outbreak of tornadoes in Central Florida that claimed 42 lives and injured 260 others, the deadliest outbreak in Florida history.
* Twister, the entire reason Bill comes to Jo's storm team is to get her to sign

the divorce papers so he can marry his new fiancee. One tornado-riddled day later, the new fiancee is gone and they're back together again.
* Twister was given a PG-13 by the MPAA was "intense depiction of very bad weather".
* Twister: Well, yes, there's a board, and yes, it's a game, although the players are the pieces. The aim of the game is to contort the players into shapes that don't collapse into a people pile. Or at least that's the ostensible aim; in practice the point is more to create embarrassing juxtapositions of body parts. It's sometimes used as a punchline for jokes, especially involving teenagers and an
* Twister, when the tornado is heading for the drive-in and Jo is urging the concession stand clerk to grab on so she can get him out of the booth before it's obliterated by the storm.
* Twister. While Chrysler sold 280,000 Rams in 1995, sales skyrocketed in 1996 to nearly 400,000 units and stayed at that level through 1999. Even after that, though, the Ram remained popular enough for Chrysler to spin it off from Dodge into its own make.
* twisting the arm. Bucky is understandably confused when he hears the superhero who just caught his punch speak with the voice of a teenager.
* Twisting the Hellmouth for crossovers with Buffy the Vampire Slayer (although it has branched out somewhat in recent years)
* Twisting the Words: Someone gets in trouble when an innocent statement they've made gets warped into an incriminating interpretation.
* Twist of Faith is a documentary about a Toledo, Ohio firefighter who came out as a victim and pressed charges against the priest who abused him.
* Twist of Fate since he wasn't around to save everybody. A time traveler named Moses arrives and helps them get back, though it takes a lot of work.
* Twist of Fate. The more afraid the target is, the more solid the illusion is.
* twist Swindle" or "Frac and Fee" AKA "Fractional Reserve" and "Fiat Currency" - and consider it to be a criminal act identical to counterfeiting.
* Twitch ad, over and over again, for as long as they feel is necessary before taking you to the stream/VOD you're trying to watch, which is incredibly annoying. One more incentive to fork over the cash for Twitch Prime, perhaps?
* Twitch and other services, use other indexes; they are not narrative works.
* Twitch and the 2020 U.S. election. While Twitch initially changed the emote's face daily to that of other streamers, they eventually held a poll that resulted in the emote being merged with the similar KomodoHype emote, likely because many of the replacement faces had made statements about being harassed by people in favor of keeping Gutierrez's face.
* Twitch. As a result, they include a lot more text edits, zooms, sound effects, cuts and added images.
* Twitch, but you can use this poorly drawn emote all year long by typing "DoodleCheer[Number of bits to donate]". (Unlike the other Cheer emotes, this one doesn't appear in the menu of selectable emotes outside of April Fool's Day and has to be typed.)
* Twitch ended up inciting multiple instances of the Streisand Effect in late 2020 by banning the words "simp" and "incel", which only drove streamers and viewers to say the words more often. This happened again in January 2021 when it was announced that the memetic PogChamp emote would be removed (effective immediately), leading people to simply make greater use of the very large number of existing "Pog" variants between streamers' subscription emotes and the FrankerFaceZ and BetterTwitchTV variations.
* T*Witches, main characters Camryn and Alex are powerful twin witches separated at birth whose powers become super-strong when they work together.
* Twitches twin girls, Cam and Alex, who were separated at birth find each other, and learn that their odd behaviours are in fact the sign of mystical powers that reach their full potential when they're together. They fight off an evil force known as 'The Darkness'.
* Twitch has the Kappa emote. Shortly after its debut in the Justin.tv era, it quickly became associated with trolling or sarcasm.

* Twitch he attempted to catch a Weezing. Each time he threw the pokéball, he jokingly said “First try Chat.” It took three attempts.
* Twitching Channels" when Megavolt says, "They called me crazy! They called me insane! They called me a LOONEY! ...and boy, were they right."
* Twitch, in particular, falls prey to this quite often. Eventually, he started taking bets as to whether or not a song he was about to play was a SiIvaGunner remix.
* Twitch is also criticised for the same reason - Twitch is just fine when a big streamer does things that would earn a smaller streamer a ban due to the amount of advertisement revenue. This overlaps strongly with
* Twitch Plays Pokémon, and almost overnight the participants plummeted to around 10,000, and continued to halve for the next few runs. The viewer count continued to fall over the years, until it settled on a constant 100-200 viewers that it still maintains to this day.
* Twitch Plays Pokémon") and Azumarill ("M4 Moe") also have this status.
* Twitch Plays Pokémon and the fact that its plot comes from trying to interpret those events into something coherent, it has run the gamut of genres. Some things that it has been:
* Twitch Plays Pokémon. A separate measure called WAHAs tales time into account; WAHA is calculated as (Wattson Rating)(Days taken)/1.55, set such that Wattson himself again had a rating of exactly 1. Entire Elite Fours have taken less than 1 Wattson, and as of the 25th run, only two other trainers (outside of Elite Four members, whose rankings are calculated differently) have broken the 1 Wattson barrier.
* Twitch Plays Pokémon battles have been lost, puzzles are solved only to be reset, all because of too many people randomly mashing buttons without a thought.
* Twitch Plays Pokémon Black 2 either, but in that case it was most likely enforced by the substitute streamer.
* Twitch Plays Pokémon community memetically considers the Helix Fossil a deity. Later runs would add to this, creating an entire pantheon of fossil gods.
* Twitch Plays Pokémon Crystal — though while AJ is definitely in it for the fighting and vengeance, Camila's motivations for her violent streak are a little hazier.
* Twitch Plays Pokémon Crystal We'll likely never know what her journey would've been like.
* Twitch Plays Pokémon, due to the frequent inability of the viewers to cooperate with each other.
* Twitch Plays Pokémon for some due to the romhacks being used and some community drama).
* Twitch Plays Pokémon game one button input at a time, as dictated through the chat. It's utter chaos, but not only have games been beaten, they've been beaten in truly improbable circumstances. Players have started imposing their own challenges, such as catching Zapdos with the Master Ball in Red, getting Mew via trade in FireRed, and evolving no Pokemon at all in Black.
* Twitch Plays Pokémon has Air the Lapras. For the entirety of the stream, it was assumed to be a male. However, transferring it to Generation II shows it to be a female. By analyzing her stats, it was also found that Flareon the False Prophet/Martyr was also female.
* Twitch Plays Pokémon. Has been caused intentionally by the streamer after accidentally starting a new game (Crystal and possibly Black), the Mob managing to soft reset the game multiple times through chat inputs (Emerald), as well as the few times the game crashed (Platinum and Black 2.)
* Twitch Plays Pokémon has this as a recurring problem for the player characters, as a single down input will make them jump a ledge, potentially resetting a lot of progress.
* Twitch Plays Pokémon. Most stories and personalities of the main character tend to be crafted from whatever incident occurs unervous their influence, and most everybody will have a different interpretation of those two items.
* Twitch Plays Pokémon Plays [X]" streams being created in its wake.

Eventually, the site would classify "Twitch Plays" as its own separate genre.
* Twitch Plays Pokémon Red Anniversary. To get money for Poké Balls, they went up against the Elite Four to grind for money, then planned to lose to teleport them back to the entrance with some of the earnings. Instead, they beat the Elite Four and ended up back in Pallet Town.
* Twitch Plays Pokémon Red became an almost debate of democracy vs. anarchy as well after democracy was implemented.
* Twitch Plays Pokémon Red It did not end up being the winning run, but ATV had suddenly earned a lot of respect by the mob.
* Twitch Plays Pokémon Red turn our Red into this, since he is encountered by AJ in the post-game and is mentioned by Abe in the latter's plot.
* Twitch Plays Pokémon silly decisions (like releasing their starter, for instance).
* Twitch Plays Pokémon that is acting as a conduit for mysterious voices so The Leader naturally falls to a member of the party.
* Twitch Plays Pokémon. There is several subgroups fighting each other because of personal interests, like having a Vaporeon or a Lapras, but ultimately, everyone, after fighting themselves over those things, collaborate on the greater goal of finishing the game. Even if they don't know what the next step is, as long as someone comes with a clear and straightforward next step, they will struggle together.
* Twitch Plays Pokémon. They beat Pokemon Red in only sixteen days.
* Twitch Plays Pokémon was split between isolating himself from Kanto since he was paranoid it would happen to him again, trying to fight AJ on the grounds that the voices in their heads would leave if he won, and foregoing all of it to have a friendly competition with someone for once instead of being forced to do it.
* Twitch Plays Pokémon. Whereas Anarchy mode processes every command (causing the character to behave... erratically to say the least), Democracy filters the commands inputted every few seconds and chooses the most popular one, this usually results in something like a regular game of Pokémon, only ten times slower. The majority of Twitch players loathe Democracy, but sometimes it's crucial for progress during puzzle sections where a single wrong movement can send the character right back to the start.
* Twitch Plays Pokémon, with a stream of arrows, "a"s, "b"s, and slashes going upwards, representing the Twitch chat's commands.
* Twitch used to read out ingredients on anything he could find in the drumming room as a practical joke if someone in the chat were to try and make him play while he was talking. At one point, he finished reading one side of a product and moved onto the other side... only to realise that it was a French translation, since he picked up the item in question in Canada.
* Twitch, users sometimes subscribe to a channel not because they like or even watch its content, but because the channel offers custom emotes that they like.
* Twitch will call a phone scammer, waste their time for a while, reveal the scambait to the scammer, and try to chat with them for a bit. On one stream after a reveal, Kit stuck around and told jokes to the scammer he had on the phone at the time. The scammer had a pretty quick response to one, which Kit laughed at and admitted was pretty clever.
* Twitter account) but is actually British. The accent was pretty convincing, however.
* Twitter" and "go to bed"), complaints that everything is done by queers and saying what a true man does instead, sexist jokes and/or comments (complete with terrible flirts, such as "I got a stick, you've got a hole, let's go home and play snooker!"), and showcasing hot girls.
* Twitter and other social media services are the killer apps for smartphones and tablets.
* Twitter: "Apparently I "confirmed" a romantic relationship between Sherlock and Irene Adler. Despite my 140 character limit can I be very clear that I"
* Twitter being hit the hardest thanks to both his directorship and the adaptation's recency when the controversy broke out.

* Twitter doesn't let you post more than 140 characters. This was somewhat remedied with the system version 11.0 update, where you can now transfer your photos and videos to a smart device and tweet with a 280-character limit.
* Twitter exchange between some guy and Jason Scott, who is known for archiving tons of historical information about computers:
* Twitter feed says that the REAL Easter Egg was the Catalyzer from "Out of Gas".
* Twitter had a 140 character limit (Now changed to 280). If you try and make a tweet with more characters and click at the nick of time, it will read "Your tweet was over 140 characters. You'll have to be more clever".
* Twitter how he got the bump after Stephen Colbert declared him the winner of a Republican debate. Colbert corrected him by saying that Cain must appear on his show to receive the bump.
* Twitter in November 2014. It has also dabbled into this trope before with some of the references in its expansion packs in order to remain relevant.
* Twitter often comes under fire for its slipshod moderation and its hesitation to suspend or ban people who break the rules. This rings all the more true for celebrities and politicians, who regularly flout the site's rules but rarely suffer any consequences for it. Twitter officials say this method is to protect and encourage free speech, but critics argue it's more likely that they simply prefer the high levels of traffic created by high-profile controversies started on the site and the large amounts of ad revenue they receive from it.
* Twitter or current pop culture comes across this way a lot of times.
* Twitterpated certainly qualifies. First Flower the skunk becomes pink and stiff as a board upon his encounter with a lady skunk; as he falls over the sound effects are certainly wooden. And then there's Thumper, whose romantic encounter leads to stiff ears, a stiff body, repeatedly appearing/retracting claws, and a madly thumping foot. Disney cartoons feature strong romantic takes like this a lot, stiffness or no, but the Twitterpated scene certainly stands out.
* Twitter posters who make dumb or annoying posts have picked up the nickname "Twittiots".
* Twitter Story: Earth: 5 AR didn't come to destroy or enslave humanity. No, they came to adopt them as their babies.
* Twitter Story: Earth: 5 AR give off a noise that can cause a dopamine rush when shook, though too much can make them cranky when they stop.
* Twitter Story: Earth: 5 AR, humans that had been captured by the aliens have been made their babies. They play with technologically advanced baby toys, wear and are expected to use diapers and subsist entirely on "THE MILK" vis breastfeeding.
* Twitter Story: Earth: 5 AR starts, the nameless protagonist and the other visiting human have grown used to their infantilized state, heavily addicted to THE MILK they subsist on and enjoying the otherworldly toys they can play with.
* Twitter Story: Earth: 5 AR, "the first to fall" were humans who thought they were the gods that humanity once worshipped who returned.
* Twitter's website, however, that is overriden; F5 retweets a tweet instead!
* Twitter that his brother was cast as a doorknob in a play, with photos of the playbill and the play in progress as proof.
* Twitter that students could give their teachers, telling them the movies were awful and a waste of good classroom time. Ending it with this gem:
* Twitter themselves got hit with this when people noticed that the site had a rule stating not to anthropomorphize the bird that is their logo. Cue the
* Twitter to decide whether to use it as a verb in stories referring to Twitter, or just go on saying that someone "said on their Twitter account" blah blah blah. Just as long as they don't use "twat" for the past tense form. See also the question "how many tweets make a twat?" which only really works in British English.... On the other hand, "Tweet" has an older meaning as an onomatopoeia for a weak chirping sound, so it's not exactly a new word.
* Twitter to do the similar task. (It doesn't help that some of them are a bit esoteric: Bigbot's function is apparently to be "too big".)
* Twitter until a third party points it out - and sometimes not even then.
* Twitter users were baffled at promoted tweets appearing on their feed imploring

them to visit someplace called Eroda. It appeared to be
* Twitter with the message, "How do you top your sub?" The next tweet:
* Twix commercial in Poland, which used a theme of "doubleness": "When you've got a break - take Twix! Double candybar - double break!" This ad was aired twice each time, one after another.
* Twix has been relying on this trope since at least 2013 with their "Left Twix/Right Twix" campaign.
* Twixt, comes to the hotel "Chickering" where Poe used to stay. He is met by a very eccentric family couple who say weird things about "graves in the floor" and sing the song "The Big Rock Candy Mountain" which sounds decidedly creepy in the context. It turns out it was all a dream, and when he comes there at daytime, the building is abandoned.
* 'Twixt Twelve and Twenty in 1958, whose title was recycled for a song of his a year later.
* Twix wants you to believe that eating their candy bars will allow you to pause time and come up with a suitable excuse for reading a book on how to manipulate women. In front of a hot woman. Other commercials take this a step further and suggest that eating them will allow you to come up with convincing lies for cheating on your wife or girlfriend.
* two 10 of Spades'. Yeah, both of them were blatantly cheating, but Bugs was a little more creative. (But then, Bugs anticipated that the top card would be a 21 and thus froze on it.)
* , two 11-year olds - a boy and a girl - run into each other at an airport, realize that they're practically identical, and decide to swap places. Both characters are played by the same girl.
* Two 4 One: A rare realistic example with trans man Adam getting pregnant.
* Two 4 One's premise is of a transgender man getting knocked up, naturally this trope is in play.
* Two 4 One: The protagonist is a trans man whose girlfriend gets him pregnant. No labels are used for her, but she's presumably bi, given she finds him attractive after his gender transition too.
* Two abilities called "Plus" (exclusive to Plusle) and "Minus" (exclusive to Minun). Each raises the Special Attack stat of a partner with the other by 50% — but ONLY when both are present in a double battle. Their stats make them
* Two Academy Award winners for Best Actor have directed themselves:
* Two accountants are sitting in an office, and a body flies by the window.
* Two accountants make a bet with each other as to which clerk will fall past their office window next:
* Two Acts For Five Women has a small statuette showing the monkeys as an essential plot point.
* Two ads from a campaign for dishwashing cream Ayudín start off as ads for weird and disgusting foods, like
* Two ads (one with a man, one with a woman) for the 1997 Mercedes-Benz E420 used "Sweet Mystery of Life" with images of fireworks, the car driving into a tunnel, etc. Sadly, neither ad appears to be archived online.
* two). After exterminating their mistakes, they chose to ascend. Rather than use their ascended knowledge to fix the problems they had created they left their monstrous creations to slaughter countless millions of lives.
* two - albeit one that's only marginally better than outright annihilation. Mistress 9, on the other hand, is desperately weak; the Deathbusters' scheme in the second half of the season boiled down to saving her before she (and Hotaru) curled up and died.
* Two aliens are sitting in a pub. One of them turns to the other and says, ‘
* "Twoallbeefpattiesspecialsaucelettucecheesepicklesonionsonasesameseedbun!" And thus, in under five seconds, are enumerated the ingredients in the chain's signature Big Mac.
* "Two all beef patties, special sauce, lettuce, cheese, pickles, onions, on a sesame seed bun." Or, as it was usually said "TwoAllBeefPattiesSpecialSauceLettuceCheesePicklesOnionsOnASesameSeedBun."

* Two American universities use Privateers as their sports nickname: University of New Orleans and State University of New York Maritime College.
* Two anchors on Seattle's local Fox channel were reporting a story on a couple who had called 911 after consuming a large amount of "special" brownies and thinking they had overdosed. Neither anchor can keep a straight face, and one of them starts giggle-snorting when they're playing the recording.
* Two and a Half Men: After Alan gets Charlie's ashes he considers where to scatter them. After rejecting Charlie's original request ("I really don't think Pamela Anderson would agree to swallow your ashes"), he decides to scatter them on the beach. As he turns to the back door, he sees a stranger out on the deck (Walden, the new series lead) and is so startled that he spills all the ashes on the living room floor.
* Two and a Half Men: After Walden apologises for nearly killing them with his reckless driving, Alan apologises for peeing on his car seat.
* Two and a Half Men: Alan and Charlie are removing a passed out scantily-clad woman from Charlie's bed, and Alan, who is carrying her by the arms, slips and falls on her. We don't see how he falls, but we do hear his muffled reply: "Oh, my God! They're real."
* Two and a Half Men: Alan grounds Jake for three months after he sneaks out to a concert.
* Two and a Half Men: Alan is called in for a meeting with Jake's principal after his son makes fun of a girl's large breasts. Outside the office, Alan meets the girl's mother, who has similarly large breasts, and uses this trope to dig himself and Jake a bigger hole.
* Two and a Half Men, Alan mocks Kandi, asking her if she knows Chester (their dog) is sad because he told her. She denies it, saying Chester keeps his feelings bottled up.
* Two and a Half Men Alan's young, hot girlfriend Kandi starts complaining about him to his ex-wife Judith. They go out, get drunk, and Kandi moves in with Judith. In the next episode it gets worse, or at least weirder.
* Two and a Half Men, Alan took up ventriloquism. The dummy kept suggesting that they kill Charlie.
* Two and a Half Men Allen states that "I need to communicate after lovemaking. I need to share!" after a chat with his girlfriend Kandi proves to be rather ... silly.
* Two and a Half Men baby, Samantha Sheen, which was a well-publicized fact at the time.
* Two and a Half Men before. Confident...assertive...I don't think I like him very much." She then glues one of his toy cars to his chest.
* Two and a Half Men, Bertha reacts to Charlie's death by berating god for taking "the wrong Harper".
* Two and a Half Men both fits and subverts this. Although becoming friends with Charlie, she does manage to drive away his love interests and refuses to give up. Plus, every main character has called her crazy at some point. She's also pretty civil in her stalking, despite it being creepy. In the ninth season premiere, it's revealed she murdered Charlie for cheating on her.
* Two and a Half Men, Charlie and Alan are talking to Herb, and Charlie keeps talking in sexual innuendos that only Alan, and the audience, notices.
* Two and a Half Men, Charlie and Rose are both very straight examples of this trope; Rose talks about how much she loves being a stalker and/or dominatrix, and Charlie makes many references to having a lot of different kinks. On the other hand, Alan once subverted this: Alan made a reference to a woman "satisfying my every sexual desire," but when Charlie teasingly pressed him for details, Alan admitted that he doesn't actually have a lot of different sexual desires, "just the one."
* Two and a Half Men, Charlie becomes sexually involved with the daughter of his mother's fiancé, repeatedly pointing out that she would only be his stepsister.
* Two and a Half Men, Charlie confesses his love to Chelsea, but she only says

"Thank you" in response. Charlie believes this means she now has the upper hand in the relationship, and goes as far as proposing to her solely to force her to say it back. They do stay engaged for a season after this, however.
* Two and a Half Men, Charlie dated a woman who strongly resembled their mother in terms of attitude, behaviour, etc. Everyone except Charlie could see it, until they met her two young sons, who were remarkably similar to Charlie and Alan, including in terms of how she treated them.
* Two and a Half Men, Charlie hands Alan a bra he found in the back of his car. Alan is jealous... until Charlie reminds Alan that their mother borrowed his car.
* Two and a Half Men, Charlie imagines tearing Alan's arm off and beating him with it.
* Two and a Half Men, Charlie improvised a song when trying to get a kid to hurry up and finish his dinner: "I like corn, it tastes real neat. I don't like peas, they taste like feet."
* Two and a Half Men. Charlie is oblivious about a recent earthquake that occurred while in the middle of making love, thinking he was just that good.
* Two and a Half Men: Charlie, planning to propose to Chelsea, puts the engagement ring in her champagne glass. She downs the whole thing in one gulp.
* Two and a Half Men, Charlie sleeps with an old man's trophy wife without knowing she was married. He wasn't too happy about it.
* Two and a Half Men, Charlie threatens to send Jake to one as a means to get him to actually do things like chores and homework. At the end of the episode, Jake learns that his grades are too poor to even be accepted into military school, defusing the threat.
* Two and a Half Men: Chelsea wants Charlie to meet her parents, so he makes up a vague excuse about being unable to go because he has an appointment. This quickly escalates into him needing a colonoscopy. By the end of the episode, he actually goes through with it...and then Chelsea reveals that she knew he was lying all along and has invited her parents to come to his house anyway.
* Two and a Half Men. Despite being a rich, handsome womanizer, many episodes indicate or imply that he is riddled with mommy issues. There is the possibility that his womanizing is a means of acting out said mommy issues or is even a means of overcompensating for repressed homosexuality/bisexuality or having been more abused or neglected than Alan when they were kids.
* Two and a Half Men. Despite getting largely mixed reviews and critics expressing disgust at the often sexist humor and unlikable characters, it still had a following substantial enough to earn it twelve seasons (262 episodes in total).
* Two and a Half Men episode "818-jklpuzo", where "jklpuzo" is the mnemonic used for a phone number. This translates to 555-7896.
* Two and a Half Men episode "A Kosher Slaughterhouse Out in Fontana", the last sentence is "The Electoral College."
* Two and a Half Men episode, Charlie is trying to drive Jake somewhere (refusing to let Jake drive), when they hear a cat screech, presumably from Charlie running it over. Jake has blackmail material when Charlie believes that he accidentally ran over Chelsea's cat, only to lose it when Chelsea's cat returns, only for Jake to get the blackmail material back by chance when one of his neighbors arrive to inquire about their missing cat that just so happens to resemble Chelsea's cat.
* Two and a Half Men episode "For the Sake of the Child", Charlie and Alan take turns at insulting each other, using up insults that start with each letter of the alphabet. When we see them, they're at L.
* Two and a Half Men episode "Principal Gallagher's Lesbian Lover", Jake gets suspended from school after drawing an offensive picture of Barbara, a girl in his class that has large breasts. When his father, Alan goes to speak to the principal, he meets a busty woman, and says: "Oh, you must be Boober's mom! I mean, Barbara's mams. Hi!"
* Two and a Half Men episode "The Last Thing You Want to Do Is Wind Up with a Hump", the last sentence is "Governor Schwarzenegger."
* Two and a Half Men, Evelyn's new husband Teddy dies before the wedding reception is even over. When she finds him lying dead in a bed (with his pants down and

lipstick on his crotch), she picks up the phone... and calls the airline to trade her two plane tickets for a single first-class ticket. The police didn't look too fondly on that.
* Two and a Half Men feature 'Captain Terry's Spray On Hair' as well as pills, both of which Alan try before going on dates. The first ends up running down his face when warm and the pills cause bizarre follicle growth.
* Two and a Half Men for Alan's brother Charlie, who had been trying to figure out why Evelyn is behaving uncharacteristically. Alan briefly refuses to believe this, until:
* Two and a Half Men for one or two episodes, if Charlie wasn't sleeping with her, Alan would be.
* Two and a Half Men has 2. The first is the kitchen table, where normally only 3 of the 4 seats are ever used.
* Two and a Half Men has Alan, while writing a movie in a coffee shop, getting writer's block several times and solving it by having a meteor hit the characters.
* Two and a Half Men has a secret pregnancy fetish, as the nine months his ex-wife was pregnant with Jake was the only time she displayed sexual passion for him.
* Two and a Half Men has Charlie getting busted by one of these. This clues him in that his sexual life is getting out of hand (not that sleeping with many women is news to him, but in this episode, he was so unhinged that he literally broke his balls after sleeping with six or seven girls in the same day).
* Two and a Half Men has Walden's ex-wife Bridget drive into his living room after she finds out he's seeing someone new.
* Two and a Half Men, having the same personality traits, the same hedonistic habits, and the same characteristics.
* Two and a Half Men, he orders two shots. The friend says he doesn't drink, while Charlie's downing both of them.
* Two and a Half Men. He spends the entire episode looking for it and finally finds it on his front lawn when he is about to take a whiz.
* Two and a Half Men home and Alan doesn't know the full situation at first.
* Two and a Half Men. In brief appearances in later seasons, Missi Pyle came back.
* Two and a Half Men. Instead of the actor engaging in depravity, one actor has become a Christian and denounced the show. In November 2012, a newly Christian Angus T. Jones urged viewers not to watch his show because it was full of "filth". On other occasions, he has told the Seventh Day Adventist church that he no longer feels comfortable on his show because it does not promote God.
* Two and a Half Men is about Charlie and Alan Harper, two grown men, and ten-year-old Jake, the eponymous "half".
* Two and a Half Men is often belittled for being a chiropractor and not a "real" doctor.
* Two and a Half Men), is socially awkward, and is hopeless with women... Oh, and he's also divorced, has a kid, and lives off his brother.
* Two and a Half Men, it's not a 555 number but, to make sure it's still not real, it doesn't have as many digits as a real phone number does.
* Two and a Half Men, Jake has to read a report to the class. When he gets to the by-line, he lists his name, teacher's name, room number, the school's name and address, and so on, until the teacher tells him he isn't being graded by length. After she tells him that, Jake flips the paper over to the next page.
* Two and a Half Men: Jake is going to a school dance and asks Charlie for advice. Charlie tells him to go straight up to the prettiest girl in the room and ask her to dance, because all of the other guys will be afraid to talk to her.
* Two and a Half Men, Jake points out that Charlie needs to put a dollar into the jar because he swore earlier. Charlie pulls out a $20 bill: "That oughtta cover me till lunch."
* Two and a Half Men Jake starts talking like this after watching MTV Cribs:
* Two and a Half Men. Jake would hear or see something at his uncle Charlie's house that his father, Alan, didn't want him to be exposed to. Alan would then launch into some bizarre explanation in an attempt to protect Jake's "innocence". We then learn that Charlie and Jake were just messing with Alan and that Jake already knew

what was going on.
* Two and a Half Men: Jennifer Bini Taylor had multiple cameos as minor characters before being cast as Charlie's long-time fiancee Chelsea Melini.
* Two and a Half Men mentions that its a shame she's only into men because she finds Charlie's latest girlfriend attractive. She then thinks "Maybe if I put a mustache on her..."
* Two and a Half Men, part of the Army recruiter's pitch to teenage slackers and mallrats is, "So d'ya like video games?" It sure hooked Eldridge and Jake...
* Two and a Half Men promoting Ashton Kutcher's appearance on the show. Alan is talking with Jake while dressed up as a surgeon, an astronaut, and an explorer, telling various stories about how he met the guy who's going to stay with him, and eventually just turns to the crew and says "Aw come on, there has to be a better way to introduce the character."
* Two and a Half Men revealed that Alan had originally asked out his ex-wife Judith's sister then only dated Judith after she said no.
* Two and a Half Men: Rose appears to be such a sweet well put together woman until she starts gluing Charlie's testicles to his thigh and murders him when she catches him cheating on her on their honeymoon.
* Two and a Half Men, Rose's account of what really happened to Charlie is presented as a CGI cartoon.
* Two and a Half Men shows up at Charlie's house. Jake left his cell phone behind, so when Charlie tries to call him, it starts playing a misogynistic rap tune on the coffee table.
* Two and a Half Men speech but then she turns it around and treats him like he's being a brat.
* Two and a Half Men subverts it slightly, since we do actually hear the whole joke (kind of, the first part was told by Charlie, and the punchline was given by Jake while giving his report), but the two parts did not mesh well.
* Two and a Half Men, the brothers are terrorized by a witch who appears to have real cursing-type powers. Charlie has just capitulated to her demands that he become basically a slave to her coven after she threatened to make his manhood "a shriveled husk." Then their mother shows up, and the uber-badass witch recognizes her and is so terrified of her that she flees in a panic.
* Two and a Half Men, the current girlfriend of Charlie wants to get her sizable breasts reduced due to back pain, to the horror of Charlie; the crisis (from his POV) is avoided when he tells her that once they're done people will notice her ass more - whereupon she decides to cancel the operation and keep her chest (and live with the backache).
* Two and a Half Men, "The 'Ocu' or the 'Pado'?" (2009; production code 617), Charlie hides an engagement ring in Chelsea's champagne in an attempt to propose to her, but she swallows it.
* Two and a Half Men ("The "Ocu" or the "Pado"?", season 6), Charlie was proposing to his (then) girlfriend Chelsea by hiding the engagement ring in her glass of champagne, but she downs it in one gulp, swallowing the ring. She ultimately retrieves it by using a pasta strainer to catch it coming out, after threatening to eat a big block of cheese so that he never sees the ring again.
* Two and a Half Men, this gets referenced in one episode when Jake is giving Charlie some dos and don'ts before meeting his new girlfriend's kids.
* Two and a Half Men to cheer him up, but Alan turns down the offer. Later, he's watching a porn film and realizes that the twins are starring in it, and Charlie points out that if Adam had made the right choice, he'd now (metaphorically) be delivering a pizza to the twins, implying that the film follows this trope.
* Two and a Half Men, two guys and a third who's missing his lower body scream in horror.
* Two and a Half Men was fired from the show, it was heavily implied that Rose murdered his character in a fit of jealousy.
* Two and a Half Men was this towards Alan in childhood and hasn't completely grown out of this during adulthood.
* Two and a Half Men: When Alan reveals that he plans to move in with Lyndsey,

Eldridge and Jake object to the idea, with the former remarking that it's bad enough his mother is "sleeping with this loser", something the latter takes exception to.
* Two and a Half Men, when Alan starts thinking he's Charlie, he exclaims "Winning!" at one point.
* Two and a Half Men: When Alan tells Charlie the husband of one of his hookups is at the door, Charlie mentions he should've told him "he was a Civil War veteran."
* Two and a Half Men, when a younger Jake fractured his ass doing a cannonball dive into a bathtub.
* Two and a Half Men: When his wife left him, Walden tried to drown himself in the ocean. Apparently he didn't realize that the water would be really cold.
* Two and a Half Men while sending up their squeaky-clean, family-friendly Disney images in their roles.
* Two and a Half Men zipping up. Then there was an instance where he and Alan apparently had a three-way with a woman they met at a bar, right after Charlie and his fiancé set their wedding date.
* two, and Metal Sonic attack Castle Acorn in order to steal the Chaos Emeralds and Gaia Keys.
* two and not only did they make the playoffs for the first time in 18 years, they won their first playoff game in 26 years by beating their hated rival Pittsburgh Steelers.
* Two. And Queen Maeve, despite her apathy and harsh words to Starlight, has enough heart left to give a damn and help her and The Boys after all.
* two and stuck his right hand into the fire, earning himself the name Scaevola ("Lefty") and inspiring the king to let him go.
* two, and the other one was supposed to kill Matt Murdock's friends while dressed as Daredevil, framing him for the crime.
* two: and will actually leave an impact crater at the point of destination.
* Two angels appear in the first episode of Season 7 as moronic middle-management types who have been assigned to oversee the Earth because God's grown bored with it. They're terribly pleased with their positions (and name badges!) but much to Satan's frustration, don't actually have the authority to decide anything, and won't pass messages on because God asked not to be disturbed. Satan relocates their name badges somewhere they'd be difficult to read.
* Two animated characters Nedd and Susie Kabloozie look human, but their skin is yellow and orange respectively (Susie's dad also has orange skin). Nedd also apparently walks around naked, yet
* Two Arabian Knights (1927) is a comedy featuring two American doughboys who escape from a German PoW camp before getting up to other amusing hijinks.
* Two Arabic dubs of the series exist; one on Baraem, and the other on Basma that has a completely different theme song.
* two are supposed to be friendly and inviting and even sing. Instead, they just come off like Rudy's equally creepy parents.
* Two army rangers headbutt after they have safely gotten back to base at the end of
* Two Arrows: A Stone Age Murder Mystery, she tears his clothes off (offscreen), he runs away in fear (shot from the back). All attackers were played by stuntmen. The guy falling off a cliff didn't want his family to see him filmed naked. Rather than have the scene cut, one of the actors volunteered to replace him in the "running away" part.
* two articles from professional sportswriters complaining about the overuse of that one commercial. Especially evident in the 2010 Stanley Cup Finals, where every single commercial break of every single game contained the same commercials from a set of maybe ten.
* two. At various points in modern history (especially after the world wars and during the 1956 revolution), oppressed Hungarians strived for reestablishing the 1848 government without success. Today the postal code of the Hungarian government is 1848.
* Two Australian DJs made a prank call to the hospital Kate Middleton, Duchess of

Cambridge, was staying in with morning sickness. The receptionist who answered the call fell for the prank and divulged confidential information. Two days later, the receptionist was found dead in her home after committing suicide.
* Two Australian men have loaded a pick-up truck to capacity with Castlemaine XXXX beer. They add a couple of bottles of sherry for the ladies, and the truck's groaning suspension finally collapses. Of course, they conclude it was too much sherry.
* Two Australian poets frustrated with the impenetrability of modernist poetry created the character of Ern Malley, to whom they attributed 17 poems built around random cut-and-pasted snippets — from Shakespeare's
* Two authors of the other The Many Dates of Danny Fenton stories have a negative view of Sam Manson and Tucker Foley.
* Two aversions, though: Steve addresses his drill sergeant as 'Sir' which is correct for that era in the US Army, and after pulling a
* Two axes in fact, small hatchets, but she still puts them to good use.
* Two Bad Neighbors" and the line was supposed to be an example of Homer being stupid. Stupider like a fox, it seems.
* Two Bad Neighbors" both Bush and Ford are shown with Secret Service agents, since per the Former Presidents Act of 1958, every ex-President is entitled to lifetime Secret Service protection (provided they weren't impeached). However, Bush, and Ford driving are inaccurate, since an ex-President would not ever be allowed to drive a car themselves in real life; also when Homer goes to confront Bush, Bush asks the agents to stand down, which would never happen in real life, when the Secret Service would keep Homer at an arm's length from Bush to guard him.
* Two Bad Neighbors holds up the line at Krusty Burger's drive-thru by asking if they have stew and commenting that a "Krusty Burger" doesn't sound appetizing.
* Two bears: Samson the Brown Bear from Sesamstraße (Germany) and Basil the Polar Bear from
* Two Best Friends Play about how to prepare yourself if you end up dying like David Carradine.
* Two Best Friends Play channel on their personal channel page (probably also because its creator is the animator for their own episode openings).
* Two Best Friends Play episode where they spend most of the video shouting excitedly as Ethan does mundane activities like drinking orange juice and playing with his kids.
* Two Best Friends Play has bits of long conversations occasionally, usually about the backstories of games besides the ones the two friends are playing.
* Two Best Friends Play having lost millions of dollars, Pat comments "wow you're really dating this video now." They even eventually make a comment on how the game manages to date itself with a line about how the word "terrorism" is "such a popular word these days" (Resident Evil 4 came out in 2005 when the War on Terror was still pretty relevant).
* Two Best Friends Play. It went from rank 151 to 80 in under one hour of the video being released.
* Two Best Friends Play, Matt and Pat take delight in pointing out how illogical some of the obstacles blocking Captain America are.
* Two Best Friends Play, Matt points out when Pat borrows one of his catchphrases.
* Two Best Friends Play, only began in August 2013... however, with one episode released a week, averaging 2.74 hours per episode? It would take you nearly 10 days of uninterrupted listening to go from episode 1 to episode 87, for a total of 239.05 hours of Quebec-scented nerd ramblings.
* Two Best Friends Play. Pat has the controller. When Ellie starts reading bad puns from a joke book ("You want to hear a joke about pizza? ... Never mind, it's really cheesy"), Pat responds by wordlessly unholtering his gun and pointing it at Ellie's face. Low ammo was probably the only reason he didn't pull the trigger.
* Two Best Friends Play Pat mentions during a Naruto LP that while country personal spies and monitoring agency are scary the revenue service are gonna get their goddamn money and you better run if you can't pay.
* Two Best Friends Play, Pat quips, "They have sex behind the bed so they don't

have to get underneath the covers."
* Two Best Friends Play released their first video, Matt was focused on the game while Pat provided light-hearted commentary. In the next one, their roles switched, and Matt became sort of a bumbling doofus while Pat was an angry guy pissed off by his friend's incompetence. As time passed by, Matt gained more seriousness while staying a light-hearted character, while Pat mellowed out a bit.
* Two Best Friends Play's weird driving controls, when he was trying to find the handbrake. Funnily enough, they had just been talking about the D-pad being the wiper.
* Two Best Friends Play tacked a 10-second Xbox One ad onto the beginning of the video.
* Two Best Friends Play, their friend Plague of Gripes from youtube is this, from having lived on a farm and seeing how fucked up animals can treat each other.
* Two Best Friends Play!" under every video they uploaded, Matt said that the joke was no longer funny.
* Two Best Friends Play when Chell is going through GLaDOS's old chamber:
* Two Best Friends Play, which swiftly became the most infamous playthrough in the channel's history, so far.
* Two Best Friends Play (which they made no secret about their disdain for), all three of them proceeded to freak out when it looked like a homeless Jodie was about to give a man a blow job for $10.
* two birthdays over the course of the show, and did celebrate the fact that he'd held onto Cosmo and Wanda for a year in the third season. The Comic-Book Time part was confirmed early on, because Timmy traveled back thirty years in two different episodes: to 1970 in the first season, but to 1972 in the third.
* Two Bottles of Relish, a man uses the title items to help dispose of the corpse of the person he murdered. He also cuts down ten trees and chops them into logs, solely (as the last line of the story informs us), "in order to get an appetite."
* Two Brazilian bands were experts in this, Raimundos (their first hit was a man
* Two Brazilian films (one from 1968, the other being its 1997 remake) called
* two Bright Ladies; he is devoted to the Baroness of Vo Ebor, but is also sworn to defend Ce'Nedra as the Queen's Champion. (He's also quite desperately in love with the former, but his affection for Ce'Nedra is entirely platonic.)
* two. Bright's father has to go and stop a meteor crashing into the planet and destroying all life on Earth and at the same time the gravity machine has inverted and is creating a miniature black hole.
* Two brilliant and cocky neurosurgeons, Drs. Tina Ridgeway and Tyler Wilson, have a connection and lots of
* Two British banks, Westminster and National & Provincial, merged to become the National Westminster.
* Two British building societies, Nationwide and Anglia, merged; they became the Nationwide Anglia for some years, before dropping the Anglia.
* Two brothers from season 1 were molested by their father: one grew up to be a serial rapist, the other turned out normal but got drunk and
* "Two brothers. One mission." "Humankind cannot gain anything without first giving something in return. To obtain, something of equal value must be lost. That is Alchemy's First Law of Equivalent Exchange. In those days, we really believed that to be the world's one, and only, truth." "They thought there was nothing more they could lose... They were wrong." ""The Philosophers' Stone: those who possess it, no longer bound by the laws of Equivalent Exchange in Alchemy, may gain without sacrifice, create without equal exchange. We searched for it,
* Two brothers, separated when sent to different foster homes at a young-ish age, spent about twenty years looking for each other. When reunited, they discovered they'd been living on the same street for two years, and eight months of that within a few blocks of each other.
* Two business owners decided to have their shop burned down to collect the insurance. All they got was
* Two business partners receive a telegram at their office; the new secretary begins reading it off to one of them. Unfamiliar with the "STOP" convention, she

* two), but if it weren't for him, Greg never would've stayed in Beach City, and thus Steven would've never been born. Later, his brief return to Beach City directly leads to Greg and Pearl ending the tension between them and Pearl finally getting over Rose's death.
* two butlers; Charles Grey and Charles Phillips, AKA "Double Charles".
* two by Latin American channel Space, under the appropriate tag line "not everything is solved by talking".
* two California children disguised themselves as a man in a trenchcoat and attempted to buy beer. When asked for ID, the upper child said that he had left his ID "at the detective agency".
* two Canadian PSAs that both involve a black kid detaching his head from his body to teach kid to eat healthy and exercise frequently.
* Two can be seen in the post-apocalyptic London in the alternate ending to
* Two cannibals are having dinner. "You know what?" says one. "I hate my
* Two captured Polish soldiers are tied alive to horses and ripped in half in
* Two Cars in Every Garage and Three Eyes on Every Fish" as part of his political campaign.
* Two Cars in Every Garage and Three Eyes on Every Fish", Mr. Burns tries to storm out of the Simpson's home but isn't strong enough to toss the furniture, so Smithers does it for him. Homer tries to reason with Mr. Burns, who just tells him to "shut up and wreck something", so he does.
* Two cartoons in February 1993 featured a character called Peter, who illustrates the original principle.
* Two cases later, there's Nagito Komaeda, who'd alienated everyone with his insane obsession with hope and had recently threatened to blow up the island in order to out the traitor. Said "asshole" is found brutally murdered, and it's initially thought that the killer might have tortured the victim in an attempt to learn the bomb's location. Nagito actually arranged for himself to be murdered in an unsolvable murder (with the traitor being the one to actually kill him) so that said traitor could graduate.
* Two cases that are almost always unrelated to said plot points from the first case the player has to solve, one of which involves defending/prosecuting someone famous or is otherwise very high profile.
* two categories: those who have been dealt with and those who are still alive.
* Two Catholic priests are travelling together and book a room in a hotel. They go to sleep early, then notice a light coming through a hole in the wall. Curious, they look through it, and see a beautiful young woman undressing. One of the priests gasps in horror and pull the other one away.
* Two cavemen using this to trap an approaching sabertooth cat... while they're inside the box.
* Two Champions Of Shaolin. Complete with popping sound effects (that sounds more like bamboo sticks being crunched instead of a human body).
* Two chapters later, in "A Coder on Board," oghond's best friend Absent is turned into an Oshawott. Upon waking up and realizing he is now a Pokemon, oghond at first doesn't recognize him, but
* Two characters are shown facing each other and dialogue shows up in the text box. Because of what has gone on earlier in the game, it seems as though the speaker is one person, when it's actually the other. Although if you think about it, the facts don't quite match up, so it's possible to guess the identity of the real speaker.
* two characters converse, each in their own language, with no subtitles provided come to mind.
* two characters in his class are not supernatural, either due to the above list, training from another, or a pactio.
* Two characters separately reach the same conclusion about the Omega Clouds' possible purpose, once it's discovered the clouds contain a device that can detonate them in a supernova-esque explosion.
* two characters trying to out-polite each other was imitating in his "Little Tramp" persona.

* Two chemists walk into a bar. One of them orders a cup of H₂O. When asked for his order, the other says: "H₂O too
* Two chickens travel around the U.S. to convince people they're either Foster Farms chickens or close enough; no one believes them, because they're (at times) mangy and they eat junk food. The fate of the real Foster Farms chickens doesn't seem to concern them.
* Two Chicks in a Kitchen trope has a housewife struggling to get her kitchen clean, when another woman comes in with a new floor varnish which she sprinkles all over the place, then taunts the housewife about the mess she's made. So the housewife produces a submachine gun and shoots her.
* Two childhood friends discuss a taboo that's too "unfathomable" to begin with, where
* Two children who daydream about the same superhero, Rem Lezar, join forces to make him real in
* Two Chinese scientists at the University of Maryland have been working on a strain of wood that is
* Two Chips and a Miss, both Chip and Dale do this thinking they both saw a reflection of themselves to straighten their tuxedos when they were both secretly invited to a club.
* two CLOWN agents create a diversion so the rest can sneak into a MIMES base.
* Two college buddies are down to their last few dollars, and have to choose between a six-pack of Bud Light and a roll of toilet paper. They choose the beer. (Which prompts them to answer the checker's "paper or plastic?" question with an emphatic
* Two commercials for State Farm use this to demonstrate that moments of joy usually have a moment of misfortune to go with them:
* two commercials from 1990 about Consolidated Auto Sales that feature Frank Sawark holding his own head on a platter.
* Two competing architectures were developed by Sega to become the basis of the
* "Two complete adventures from the master of science fiction" — 1993
* two conflicting prophecies. They mostly agree on the actual events (though each has its own spin) up to a pivotal point, at which they diverge rather wildly. Belgarath and company are rooting for the one in which Belgarion defeats Torak. Torak and his worshippers, obviously, aren't (well, some of them may be; Torak is more definitely more feared than loved).
* two consecutive losing records. He is merely "kadoban" after one losing record; if he has a positive result the next tournament, even 8-7, the slate is clean. This has allowed quite a few ozeki to remain at the rank long after they've dropped WAY below the level they were when they got it:
* Two cosmic entities of the DC and Marvel universes Kismet and Eternity fall for each other only to be forced apart at the mini-series' end.
* two cotton swabs down her left ear, only to discover them coming out her right ear.
* two couples — neighbors — going through this trope. The first unlucky man's things are kept in normal plastic containers, which quickly open as they fall and spill the contents everywhere. The second man's belongings were kept in Rubbermaid containers, and bounced safely as they hit the ground, unharmed.
* Two cover feature this pose, the first issue was of the main cast, and another issue had the original boys.
* two cups to avoid the vibrating and worse effects. He calls Paige's dozen cups "insane".
* two days, after which Emperor Eugent recovered from his injuries sufficiently to order the army to stand down, declaring that the man who shot him wasn't a Calvardian agent and thus there were no grounds for an invasion.
* Two Days Before The Day After Tomorrow" was banned in FOX Japan's broadcast of season nine, on the heels of the 2011 tsunami, earthquake, and nuclear disaster. Another part worth noting is that for some reason (perhaps to do with expenses), the entirety of season 9 besides this banned episode was also not dubbed and only broadcast in a subtitled format.

* two days. He even admits that he agreed without realizing how long it would take.
* Two days later, a radio station in La Crosse, Wisconsin managed to accidentally trigger the EAS on another TV station in their area by playing the exact same clip during their morning show.
* two days run. These also tend to be the same players who throw royal fits if any change in the game adds a single-digit number of turns to their runs.
* Two Decades Behind, and the fact that they might not stay on top of current trends or news due to their workloads.
* Two Decades Behind: In spite of being a seemingly more difficult time than the 1990s and 2000s, the 2010s were remarkably similar to the previous two decades in many sociocultural terms.
* Two Decades Behind meant that Chrysler became a sinking ship, and were the laughing stock of the American industry until they were finally bought out by FIAT in 2011, who were actually interested in revitalizing the brand.
* two Delta Greens; the Special Access Program, a reactivated, officially sanctioned version, and "the Cowboys", DG Agents who refused to come in from the cold and thus operate as vigilantes.
* two) didn't quite get the job done. He wrote a short letter explaining the circumstances, slit his wrists, and finally bled to death.
* Two different arcs relating to Jason's money-making schemes are a direct result of this trope. Once, Roger complained about how much money website creators were making off their sites; another time, he complained about how expensive Christmas cards were. Both times, Jason was in earshot and immediately decided to put his dad's statements to the test.
* Two different driving mini games, one against the clock and one against NPCs.
* Two different episodes have a plot where one of the boys makes a mistake and the other kids tease him for it with a rude nickname, but in the end realize it was wrong and apologize. In
* two different persons. For what it's worth, the two actually were voiced by the same actor, so maybe the Batcomputer just wasn't up to snuff.
* two different voice actors that switched around in various episodes.
* two different while investigating a gangster who had turned to black magic.
* two-dimensional. Spacecraft tend to behave like actual ships floating in water, almost always navigating along the horizontal plane and rarely seen in any other orientation other than "upright", unless they are "sunk". Viewscreens are also almost always two-dimensional, when displays for battles at least should be three.
* Two Distant Strangers: Carter, a young black man in New York City, is stuck in a particularly horrifying version of this trope in which, every time he leaves the apartment of the young lady he just had sex with, he is murdered by the NYPD beat cop on the street outside. Unlike the previous example, Carter is killed even when he decides to stay inside all day.
* Two DJs on BBC Radio 1 (probably Mark Radcliffe and Mark Goodier) often used to do the handover as "Right, witty banter, witty banter, see you tomorrow.
* Two Door Cinema Club managed three minor hits on alternative radio in the United States. The highest charter was "Sleep Alone", which isn't as well remembered as their second highest charting single, "What You Know".
* Two Dozen and One Greyhounds". After Mr. Burns sings "See my Vest", Bart is humming the theme until Lisa scolds him.
* Two Dozen and One Greyhounds" ends with Marge entering the basement and gasping in shock while we see Homer's shadow suspended above the floor swaying back and forth, implying that he hung himself. We then see that Homer is actually holding onto one of the rafters while swatting at a light bulb.
* Two Dozen and One Greyhounds has variant where Marge and Homer has a important dinner party with Reverend Lovejoy, Homer's old Army drill sergeant and the regional director of the IRS.
* Two Dozen and One Greyhounds STF and can't quite make it. Marge groans and covers their eyes the moment she catches on to what's actually happening.
* Two dragons that you must fight in the main quest do not have unique models. While they are semi-locked into specific Dragon forms, if you are high enough in

level (possibly by putting off the main quest for quite a while) they can change into different species of dragons.
* two drinks she can't land the helicopter with nothing but her tablet.
* Two drunks leave the pub, look into the sky and start arguing whether there is one moon or two. They decide to ask a passer-by about it, who thinks a while and asks them: "In which row?"
* Two dueling 1999 teen romantic comedies are built around this trope:
* Two dungeons (the second's just a mirror image of the first though) in
* two dwarfs in a raincoat for some reason have Native American ancestry (Lisa had only thought to ask Marge for her family ancestry).
* two eggs), and the latter two were the children of Zeus. No, we have no idea how this works either.
* Two entire specials were based on the "What Happened to the Mouse" concept –- one in July 1973 and the other in April 1975 –- where Casey played the biggest singles by the
* Two episodes after, "Dungeon" showed up and did an equally good job with the Guardian Angel scene.
* Two episodes before that, we had a guy who received heat draining powers, with a strong craving for body heat. A
* Two episodes deal with a gigantic, shark-like beast that swims through
* Two episodes explicitly focus on a very Men in Black like group, which may or may not be a Vague, Yet Menacing Government Agency. "A Story About You" follows the day-in-the-life of a random Night Vale citizen when they steal something from two agents. Much later, "A Story About Them", was about an average day for the two agents, "The Man Who Is Not Tall" and "The Man Who Is Not Short". They don't seem very bothered by the fact that the man on the radio is narrating everything they do.
* Two episodes feature evil ventriloquist's dummies, the first of which starred Bill Bixby.
* Two episodes from the fourth season have characters referencing "Winter Wrap Up" from the
* Two episodes ("Jurisdiction" and "Bronx Cheer") both dealt with overlapping jurisdictions where the Manhattan DA prosecuted one person and another jurisdiction prosecuted (or convicted) someone else for the same crime. Both times, the people the other jurisdiction prosecuted were actually innocent and had been railroaded for political reasons.
* Two episodes of ISIHAC are recorded in a row. However the chair and teams will act as if the second episode is a week after the first as this is how it sounds to the radio audience. Similarly, panelists on
* Two episodes of the series focus on Elmyra's previously unseen and unmentioned family. The first one introduces us to Mr. Skullhead, as the subject of Elmyra's imaginary TV show. He went on to become a recurring character in
* Two episodes, "The Ol' Bare and Switch" and "Noodles! Roamin' Off!", have Team Rocket arguing and getting mad at each other that they decide to breakup. In the end, they realize that no matter how they argue, they should stay a team.
* two equally-large giant robots in the third mission of the Imperious Task Force, although they are likewise there as window-dressing.
* Two examples are Adamantine and starmetal. Both have extraordinary hit points and hardness. They also ignore hardness under a certain number so they are good for sundering other objects. In addition, starmetal is a version of adamantine that has the bonus property of causing extra harm to Outsiders (as opposed to the
* Two examples featured early in the franchise are the Messians, representing the Law faction, and the Cult of Gaea, representing the Chaos faction. While members from both factions do
* Two examples from the territory days: The original Sheik and Nick Gulas. Both promotions died due to fan backlash. In the Sheik's case, he kept himself on top of his own territory for too long, and the fans got sick of the same act after twenty years. Gulas tried to push his son George into the main events, effectively killing the towns he promoted in. This led to the split with Jerry Jarrett when Jarrett

refused to allow George to work on top in the towns Jerry controlled. Coincidentally, The Sheik was one of the few promoters to back Gulas in the ensuing war between Gulas and Jarrett.
* Two explorers are captured by a cannibal tribe and left to stew, when one of them starts giggling. "What could possibly be funny about this?" "
* Two explorers are captured by cannibals, stripped naked, and thrown in a cauldron of water. The water starts to get hot and the explorers begin to panic. Suddenly, one of them starts snickering. "What's so funny?"
* Two extensions in Rhode Island and southern Massachusetts are owned (and trademarked!) by local plumbing company Gem Plumbing & Heating. Their television and radio commercials prominently feature the number, but they aren't allowed to use the Tommy Tutone song or even a soundalike (their jingle that uses the number sounds like it was intentionally written to sound as little like "Jenny" as possible). Gem even sued a national plumbing outfit for using the same number for their toll free line. That case made
* Two-Face. Although one central part of his character is that he is both Harvey Dent and Two-Face, so anyone savvy enough (Gordon or Batman) is able to exploit that by forcing a confrontation between Two-Face and Dent. At the very least, it'll make Two-Face act fairly, because Dent still believes in justice, no matter how much of a monster he is now.
* Two-Face, choosing to ignore his coin (which he uses to make difficult decisions as a way of bowing to the inherent arbitrariness of the universe) to spare Batman's life.
* Two-Faced Aside: A character lies, then whispers or mouths the truth.
* Two-Faced Aside: Saying something to one person and revealing the statement to be a lie in an aside to another person.
* Two-Faced Aside: When a character says one thing to Person A, but then immediately expresses the opposite sentiment to Person B in an aside.
* Two-Faced: It's clear that a character is evil because their face is completely asymmetrical.
* Two-Faced: One side of the character's face is disfigured, distorted, discolored, or otherwise different from the other side of the face.
* "Two-Faced Tanner" involves over-taking and killing an undercover cop. As soon as you attack his car, you get the cops on your case, coming at you with just about everything they have. You can't disable his vehicle beforehand. What you can do is get ahead of him, jump out of your car, and then destroy his car with an M-16. It takes about half a magazine, and when he dies the cops automatically desist.
* Two-Faced Woman, who were all over each other when they were presumed dead by Larry's colleagues. The newlyweds don't hold back on kissing each other when they're not talking, play-fighting on the floor and talking about how happy they are. It's so sweet that, at first, Mr. Miller thinks that they're trying to distract him and Miss Ellis from making Larry go back to work.
* Two-Face embody the trope perfectly, although Harvey was mainly a friend of Batman and not Bruce. Dent was one of the first people of authority to support Batman, but after an incident which caused his transformation into Two-Face, the two become enemies. Notably, Batman is lighter in his dealings with Dent compared to his other villains.
* Two-Face, in keeping with his obsession with duality, is also known to use two guns.
* Two-Face, is usually depicted wielding two guns at once, fitting his image of duality.
* Two-Face. Nothing is made of it, and there's no indication that Vinyl and Octavia are on bad terms.
* Two-Face's goons dressed up as two-sided clowns when they attacked the circus in
* Two-Face. - She actually survives this, as the fire is quickly extinguished.
* "Two Faces of Doom". The Force Beam control switch in Brak's ship is labeled "Force Beam".
* Two-Face's whole origin started with something like this, and it was a case where the offer is not only refused, but the man making the offer would

* Two-Face towards Renee Montoya, even learning after she is a lesbian it fuels his desire to ruin her life so all that’s left is him.
* Two-Face" was originally the nickname used to identify Harvey Dent once his face was half-scarred by acid and he became a criminal. Later versions of the character used this as a persona Dent adopted as part of his multiple personality disorder.
* Two-Face, who decides the flip of a coin is as good a way to decide life and death as anything.
* Two famous British literary heroes had their backgrounds tweaked to reflect those of their actors in live action adaptations:
* two fandom devoted to these. And plenty of bootleg plush can be found on places like eBay, with many unwary buyers getting ripped off.
* Two fans won a contest to get characters in an episode named after them. Unfortunately, the episode was "ExoGenesis", widely considered one of the show's worst.
* two fathers. His biological father (and his mother and sister) was murdered by a group of mercenaries, and his adoptive father who trained him to be a Mandalorian (and whom he was possibly closer to) was gunned down before his eyes by the same man who killed his original family. Needless to say, Fett devotes a great deal of time to hunting down the murderer and finally enacts vengeance in a brutal fistfight.
* Two Fathers Justice to track down their killers who've fled the country.
* Two Fat Ladies. That she turned out to be...well...Clarissa in middle age was, if surprising to some, hardly unpredictable.
* Two feature the Etymology-Man, whose superpower is to explain the etymology of various words and nothing else.
* Twofer Token Minority, and given that Archer said he wasn't circumcised, probably wasn't really Jewish. Later played straight when he loses both of his hands.
* Twofer Token Minority. Though one episode has the cast visiting the "Mexican Jewish Cultural Festival", so Danville might just have a particularly large population of Mexican Jews...
* two fics later, Bait demands a fight with Shadow for having killed Raker, whom he himself admitted had been nothing but abusive. Shadow states that if such a person were his own brother, he'd bust out the champagne and party hats, creating a really weird idea for Bait to visualize.
* two fights against Hazard. Pretty impressive for a bot created out of a church's youth group program.
* Two films released after ILM visual effects supervisor Stephen L. Price's death,
* Two final special game overs, related to the Copyright Protection quizzes. One just exits out to DOS normally if you get the questions wrong, but in the other one, later on in the game, you are "blown" back to DOS
* Two First Names: The hero's civilian identity has a surname that could also be a given name.
* two-fisted arm wrestling. After getting defeated, he tries to headbutt Data, but discovers to his dismay that Data's skull is thicker than a Klingon's.
* Two-Fisted Tales, so stories of this nature are naturally often a mashup of all of these at once.
* Twoflower as Grand Vizier, on the basis of him knowing nothing about the role.
* Twoflower reveals that the ill-tempered, sentient piece of luggage he's been travelling with came from one of these
* two food fights at the school's principal, and missing, hitting his partner, Skull, who says "food fight". The second food fight is the Power Rangers trying to stop Rita's Pudgy Pig from eating all of the Earth's food.
* Two for the Death of One: As soon as Lord Satanis gets Superman magically bound and brought to his presence, he divulges his plan to absorb the power of the Runestone of Merlin by using Superman's body as a superconductor.
* Two for the Death of One: At the start of the final battle, Lord Satanis hurls a barrage of giant boulders at Superman, who has lost his invulnerability at the time. So, he ricochets the boulders away by creating a whirlwind.
* Two for the Death of One blows up a planet located beyond the orbit of Pluto to

use its remains as a weapon against Satanis.
* Two for the Death of One claims the massive sorcerous power of the Runestone of Merlin, and instead of destroying her enemy Lord Satanis at once, she starts gloating about killing him slowly and painfully while casting low-level spells to play with him. Before she can drop a meteor swarm on his head Satanis has figured out he can survive if he takes over Superman's invulnerable body.
* Two for the Death of One. During a magic duel between Satanis and villainess Syrene, the Man of Steel gets split into two duplicates. Since their enemies only need one Superman to carry out their plans, one "twin" is hurled back to the present day. The remaining Superman remains trapped in the XIVth century until his duplicate self manages to go back to the past and merging back together with him.
* Two for the Death of One: During the final battle, Superman gets smashed against the Sphinx's face, making him accidentally responsible for its missing nose.
* Two for the Death of One, evil sorcerers Satanis and Syrene look to become gods by absorbing the powerful energies contained within the Runestone of Merlin. Syrene certainly feels like she is becoming a goddess as leeching off its power.
* Two for the Death of One. Fortunately he hasn't lost his invulnerability, so he pulls from his chains bit by bit until they finally snap.
* Two for the Death of One: Lord Satanis intends to absorb the Runestone of Merlin's powerful magic in order to become omnipotent and rule everything since the beginning to the end of time. But since he cannot touch the Stone, he abducts Superman so he can filter its power through Superman's invulnerable body and into his own. Such an act would kill Superman, but why should Satanis care?
* Two for the Death of One, Lord Satanis plans to obtain ultimate magic power and become the ruler or everything.
* Two for the Death of One offers a villain versus villain example when Satanis forces his way into Syrene's fortress to stop her from gaining immense magic power.
* Two for the Death of One, Satanis -still occupying Superman's body- fires an energy blast at Syrene and she disappears without a trace. Satanis is convinced that he has killed her and refuses to listen when Superman tells him she is not dead. Later, Superman reveals he tweaked Satanis' spell without him noticing so it sent Syrene away instead of destroying her.
* Two for the Death of One, Superman gets dragged to the fourteenth century. Quickly he runs into a group of villagers who mistake him for a demoniac servant of Lord Satanis and try to bludgeon him to death with their construction tools. Seeing it does not work, another villager thinks his whip will succeed where picks and shovels failed, and he is shocked when it does not.
* Two for the Death of One, Superman gets dragged to XIVth Century England. One of the villagers he meets wears a horned helmet, even though Dark Ages Vikings never wore horned helmets, let alone Middle Ages Englishmen.
* Two for the Death of One, Superman gets split into two duplicates by evil sorcerers Satanis and Syrene. When both Supermen touch each other during the final battle, the mystic energies they had been irradiated with combine, forming a massive, giant energy Superman who attempts to destroy Satanis.
* Two for the Death of One, Superman gets split into two identical "twins". One of them is trapped in the fourteenth century whereas his other "half" is stuck in the present, and the story often cuts between both Supermen.
* Two for the Death of One, Superman starts the final battle by punching Lord Satanis so hard that the sorcerer gets buried into the ground, and a mountain crumbles down onto him.
* Two for the Death of One: Syrene attempts to burn Lord Satanis alive several times, but every time Satanis deflects her attacks while warning he cannot be killed by mere fire spells.
* Two for the Death of One, Syrene is not only driven by her thirst for power. She also wants to become powerful enough to kill Lord Satanis, the man who murdered her father Ambra.
* Two for the Death of One takes Superman's body in order to fight his rival Syrene.
* Two for the Death of One: The nose of the Great Sphinx of Giza gets crushed into

dirt during the final battle between Superman and Lord Satanis (time travel was involved).
* Two for the Money, Al Pacino's character is a a reformed gambling addict, but one who stills runs a business advising sports gambling to people willing to bet millions of dollars on it. At one point he visit a Gambler's Anonymous support group, seemingly as part of staying off his gambling kick... only to make his protegee gasp in horror as he begins tempting the guys there into gambling again and passes out his card.
* Two for the price of one: The Abominable Snowman is clearly a riff on the "Bumble" from the
* Two for the Road sees the main couple in several vehicles, but most prominently an old MG that has trouble starting even right after its purchase. Eventually, they have no choice but to junk it.
* Two for the Seesaw, half a dozen minor characters and many additional settings were added. The result was not a hit.
* "Two For Tina" has Jimmy Jr. and Josh competing in a dance-off for Tina's affections.
* Two FOX affiliates (Birmingham and Greensboro) and one FOX owned-and-operated station (Austin) never broadcast Fox Box/4Kids TV in its Saturday morning time slot until it went defunct at the end of 2008.
* two free albums released by Riot—Smite and Ignite in 2014, and Grasp of the Undying in 2017.
* Two French chemists named Pierre Joseph Macquer and Antoine Baume made a "solar death ray" in the 1750s, using a concave mirror of mercury-coated glass to melt grains of
* Two friends - a handsome, rich young businessman and his scruffy, jobless childhood companion - are in an accident and go to Heaven. When they get there, the place is overrun with ducks. Saint Peter explains, "Though the Lord made us in his image, he is quite fond of ducks. Should you harm one, you will be punished for your negligence but still within the glory of His Kingdom." They meet up later, and the rich man is chained to a loud, rude, and domineering battle-axe. "I stepped on a duck, and I'm on probation. She's my warden," he explained. Much later, they meet again. As they approach each other, the rich man sees the bum chatting happily at length with a tall, beautiful woman. The rich man exclaims, "Wow! What did you do to deserve
* "Two" from opposing armies falling in love in a post-apocalyptic town.
* Two from the arc where Calvin and Hobbes go to Mars to escape Earth's pollution: "Is that your candy wrapper over there?" and "Would you welcome a dog that wasn't house-trained?", both asked by Hobbes after Calvin litters on Mars. Calvin realizes he's part of the problem and he and Hobbes go home
* Two full Wizards who also fit this trope are Harry's former mentor Justin DuMorne and Cowl, a recurring enemy.
* Two fun facts on the ammo score; first, the Russian SMGs that used 7.62x25mm Tokarev easily fit into the German logistics train because it was an enhanced version of the 7.63x25mm Mauser round, which the Germans had lots of. And second, the reasons the British Sten Gun was chambered for 9mm Parabellum, the German issue round, were first of all that no comparable self-loading pistol round was made in England (SMGs don't work too well with rimmed revolver cartridges); and second, when the Italian forces in North Africa surrendered to the British 8th Army in 1941 (before the Afrika Korps arrived), part of the booty was several million rounds of Italian-made 9mm Para ammunition, as their Beretta SMGs also used it (this one actually backfired, sometimes horribly: the Italian rounds came either in an underpowered variant for older
* Two Gamers on a Couch seem to have fared much better in the long-term.
* Two gender-flipped examples play this straight in the Mo'Nique led film
* Two Generals' Problem plays with this. Two generals have their armies surrounding a target. Each can send a message to the other saying they're ready to attack, but the other might not get it. They can't just send a message and go, because the other general might not get it and won't know. They can't just wait for the other

to respond, because then the second message could be lost, and they won't know the other knows. The end result is that, no matter how many messages are sent, they won't be any more sure than if they just sent one message and hoped it arrive. While this situation is impossible to solve in theory, there's a lot of ground gained there by taking the engineering approach and looking for a solution that will work well in practice.
* Two generations before that, King Viserys I lost his first wife and was advised to marry Laena Velaryon. He instead decided to marry Alicent Hightower. This did not turn out great, since Alicent
* Two Gentlemen of Verona, and (more humorously) their respective servants, Launce and Speed.
* Two Gentlemen of Verona. By the end of the scene, his best friend is talking about how much fun it'll be for the four of them to live in a house together.
* Two Gentlemen of Verona, etc.) are not just generally deemed bad ... they're bad in bizarre, far-out-in-left-field ways that have left centuries of readers stumped as to what Shakespeare even thought he was doing. However, these scholars argue, many of these plays fall into focus if we picture Shakespeare writing them as merciless parodies of other popular Elizabethan plays, which are now lost to history.
* Two Gentlemen of Verona nearly ends in tragedy when one of the titular gents decides in a fit of frustration that he'll force his beloved (who is in love with the other gent) to love him by raping her. Gent #2 shows up and talks him down before anything happens.
* Two Gentlemen of Verona out of drag). Julia disguises herself as a page and follows her beloved Proteus to Milan, helping him rescue Silvia from a band of brigands.
* Two Gentlemen of Verona, Proteus ends up returning to his first love Julia, after having spent most of the play pursuing Sylvia.
* Two Gentlemen of Verona pulled this with Thurio and Lucetta, who had no prior interaction in either the musical or the original play.
* Two Gentlemen of Verona, Sylvia's father goes so far as to banish Valentine when he learns that they're in love. Admittedly they're trying to elope at the time...
* Two Gentlemen of Verona, Sylvia's father insists that she marry Tyrio, when in fact she's in love with Valentine.
* Two Gentlemen of Verona that Eglamour swore perpetual chastity after the woman he loved died.
* Two Gentlemen of Verona was one of Shakespeare's earliest works and his plot-writing abilities weren't what they ended up becoming, so Launce and his dog, notorious scene-stealers, are regarded by pretty much everyone as the highlight of the play. However, Shakespeare never included a dog in a major role again, and scholars speculate that he learned this trope the hard way.
* Two Gentlemen of Verona, worried about her love interest who's been away, disguises herself as a boy and follows him. To her dismay, she finds him running after a different girl, and when he doesn't recognize her in her disguise she ends up delivering a love note for him.
* Two German children, 5 and 6, tried to go to Africa so they could marry each other. Although they failed, there must obviously be a promise to try again in the future. The story can be read
* two giants. 4Kids showed him only once, having him spend the whole time delivering pathetic jokes for no particular reason.
* Two giant sons of Poseidon named Otos and Ephialtes planned to rape Artemis; she led them to an island and then arranged for
* Two Girls to a Team: A team otherwise consisting of males has two female members.
* Two Girls to a Team: The two female members of a group otherwise consisting of male characters.
* Two Girls to a Team, which was later demoted from planet status), with Venus being the only one left named after a goddess. The next planet discovered was named Ceres, also female, upping the count to two... but Ceres was later demoted into an asteroid, returning to this Principle.

* Two Golden Age stories centered around this trope, though the players weren't the ones cheating. In one, a boxer was drugged by his manager so that he would lose the fight, and in the other, a college football coach was trying to rig the game in favor of the other team.
* Two Graves plays with this trope by putting Naziland in Brazil instead.
* Two groups grew out of the short-lived super group Azteca: After creative differences, founder and former
* Two-Gun Kid: He was a kid with two guns. Now, he's a young adult...with two guns.
* Two Guys, a Girl and a Pizza Place, and Richard Ruccolo...faded back into obscurity.
* Two Guys, a Girl and a Pizza Place got this slot. However, unlike a lot of these examples, it wasn't moved to the spot because the network wanted to get rid of it. It was moved because it had proven to be quite popular in its Wednesday night slot and ABC thought the show's popularity would move with it and break the curse of the Friday night death slot. It didn't.
* Two Guys, a Girl and a Pizza Place: Johnny's does various attempts to walk in on Sharon in the shower. Unfortunately, he gets Ashley the first and Pete's grandpa the second time.
* Two Guys, a Girl and a Pizza Place, one of Berg's exes has his name tattooed in an intimate place, and when she becomes Pete's new girlfriend, Berg tries to prevent him from finding out.
* Two Guys, a Girl and a Pizza Place originally used the song "Blister in the Sun" by Violent Femmes. It switched to an original song in season 3 at the same time the show's name was changed and the pizza place was dropped.
* Two Guys, a Girl and a Pizza Place plays on this when Pete falls in love with a beautiful woman who only speaks French. When someone is finally able to translate a conversation, he discovers that she is a terrible person and a racist.
* Two Guys, a Girl and a Pizza Place was coming up with ways to spin the various ecological disasters created by the chemical company she worked for.
* Two Guys, a Girl and a Pizza Place, who said she wanted her own time slot.
* Two Guys and a Girl) had this to the extreme in the final few seasons. Pete had gone through 3 girlfriends, fell in love with the eponymous "girl" Sharon, and had sex with Berg's mom and ex-girlfriend. To say nothing of the cavalcade of women Berg went through.
* Two Guys and Guy. Guy and Frank appear in different clothes for once and proclaim that "the thing that lived in the laundry room finally starved to death." Wayne's glad to hear it, but he just changes to an otherwise identical shirt with a square instead of a circle.
* Two Guys and Guy in the cast. Wayne obviously didn't know that he was gay, or else he wouldn't have played that prank where he sent emails to his friends and family where he pretends to be Lars coming out to everyone. Lars actually ends up thanking Wayne because he didn't have the guts to do it himself, much to his frustration.
* Two Guys and Guy — and had since forgotten about saying in the first place.
* Two Guys and Guy with her though it looks obsessed with her because she left him with their child. But it turns out that he's just crazy enough to kidnap a child.
* Two Guys from Texas then helps Dan with a plan to get the sheep back; as Steve is singing to the swooning sheep, Dan puts on a similar 'toon wolf suit and mask (but without the straw boater) and tries badly singing the same song as Steve is, except here he forgot to take off his mask, so the sheep toss their sneakers at the "wolf" and then a large fat Native American lady comes up and chases Danny away (a running gag in the film itself).
* Two Guys Naked in a Hot Tub. It went unnoticed because the same song was playing on the stereo. They specifically refer to the Waco fiasco.
* Two Guys Naked in a Hot Tub", when trying to discuss whether or not watching another guy masturbate would make you gay. This merely drives the other men in wanting to kick this "friend"'s ass, until Randy mentions he lives in Florida.
* Two hallways (outside the station's green room where the lockers are, and

outside the vice-principal's office), two offices, one classroom, and, in one episode each, a library and cafeteria. The school was also Upper Redwood High, which of course allowed the rival school (the one always named as a sporting opponent) Lower Greenwood High.
* Two Halves:. His master was displeased at his recklessness.), Hinata is tending to Naruto's wounds and places her hand on his forehead. He reaches for her hand and intertwines them after a brief heart-to-heart.
* Two Halves Make a Plot: A MacGuffin is in two pieces and need to be put together for the plot to move forward.
* two halves of the fandom arguing over which of them was better. Joel later admitted that for fun, he would occasionally add fuel to the fire by anonymously posting comments that in his opinion Mike was better than Joel to see people bitching about it.
* two-handed battleaxe as their melee reserve weapon, and as a gun rest to steady their aim.
* Two-handed swords, especially the Renaissance "Zweihänder," are usually depicted as heavy and extremely cumbersome in combat. In real life, a longsword weighed between 2.5-4 pounds, with the largest Zweihänder tipping the scales at 6-8 pounds
* Two Hands: The street kids Helen and Pete steal the $10,000 Jimmy was holding for Pando (a local crime boss); although this causes trouble for Jimmy rather than for Helen and Pete. Later a car thief steals Acko's (Pando's right-hand man) beloved Ford Falcon. The mechanic to whom he delivers it to be stripped happens to be a friend of Acko's and recognises it immediately.
* Two have Beast Boy attempting to assemble a crib for his future baby. The results are... less than impressive (despite Robin's assistance in one case).
* Two have been given higher-pitched voices to distinguish them from the boy cravers.
* Two have Merlin asking the question and the other characters giving answers that reflect their personalities.
* Two-headed dogs seem to be very common, possibly as a lesser version of Cerberus. They are already present in
* Two-Headed Lernaen Bombardier Giant Space Hamster: Possesses two heads, a minor
* Two Hearts in Wax Time, the department store employee Joe draws the ire of his colleagues by coming into work drunk for the umpteenth time. They play a trick on him where they convince him, in his drunken state, that the mannequins are real people. Once his shift his over and Joe walks down the street at night, he imagines all the mannequins in the store windows coming to life, playing around and singing for him.
* Two Heels/One Face:, especially if he really goes at it with the other heel, but it's just as likely that both heels will be as rotten as ever.
* two helicopters from stations KTVK and KNXV-TV collided in mid-air over a public park while covering a police pursuit, killing all four: pilot Scott Bowerback and photographer Jim Cox in the KTVK chopper, pilot Craig Smith and photographer Rick Krolak on the KNXV side. Smith's last words were "Oh jeez!" right before the crash.
* two heroes who did not get the girl...but, at Jezal's expense, deliciously subverts it with Glokta, Hero #3... depending, of course, on how you define "hero". He and Ardee marry, in no small part to save her from the consequences of Jezal's bad judgement, and end up in a stable, affectionate relationship.
* two her with it. Later in the episode, Drew hires a Santa impersonator who is revealed to be a lazy schlub, canceling his appearance at the last minute (claiming he has car trouble) so he can stay home and eat junk food in front of the TV.
* Two hipsters walk into a bar. One turns to the other and says "Let's get out of here." The second responds,
* two historical weapons, a bridge made of duct tape, and a functioning seesaw that can take 40,000 pounds of force without being damaged.
* Two Households: This is how the aristocratic Pureblood families have been reproducing for centuries, creating an increasingly shallow gene pool for themselves out of their racism and classism, with many of the bloodlines going

extinct due to their inability to produce healthy offspring. This is also the group that most of the Death Eaters originate from. Even the ones who aren't Death Eaters tend to be huge assholes.
* two HQ units for one HQ slot, meaning one can go to war with a large group of infantry choices and put two rune priests in a HQ slot and still have room for more HQ units like a wolf lord or one of the named HQ choices if you spend your points right.
* two human beings that I should be their judge, jury, and executioner all rolled into one."
* two hundred hits from tank guns and (anti-tank) artillery without sustaining any damage (not even a lost track or periscope, no mean feat considering that the tracks were a sight more vulnerable). The 50 mm could work at close range, and the heavy 88mm Flak gun could take them out at a distance, but there weren't very many of these in 1941; it was more common for Soviet tanks to meet their end by German infantrymen getting on top of them to pour petrol on the engine block and set them alight. Not until the large fielding of 75 mm high-velocity guns did the Soviet tanks meet their match.
* two hundred million gold, it can also grant unique (albeit terrible) weapons and armour, as well as copies of very high-grade (but not top-level) armour.
* two hybrids, and despite the approaching war and the knowledge that their children won't be able to live in peace for what they are, the couple decide to go through with it and carry the two fetuses to term.
* Two Idiots has Brave And Duster's, an obvious reference to Dave And Buster's. Averted, however, with the mention of Soundcloud.
* two. If you follow Yo or Mon-Mon's paths, Mon-Mon will try to garner sympathy (and thus, attention) by feigning a lethal injury. Upon discovering he's just fine, she slaps him. Or, if you follow Bo or Ittosai's path, Ittosai will make several comments about death and the uselessness of life, which angers her. Unlike Mon-Mon, it's surprising that Ittosai's only reaction is to protest that he's been slapped.
* two immediately after being officially married to Simon (as in, right there at the altar, not after the honeymoon). It's no wonder that both of them seem to be avoiding contact with other adults in the epilogue...
* Two immigrants compare how much money begging gets them. The first says he doesn't have any success with the usual "I'm hungry please help" sign, the other tells him he's raking in the cash with a sign that says "I need 500$ to go back to my country".
* Two important members of the Fey clan die at the hands of men: Mia Fey dies at the hands of Redd White after being struck with a Thinker statue/clock, and Misty Fey is killed by Godot with a sword.
* "Two Initials (in a Heart)", an early '60s doo-wop record by Ritchie Adams.
* two in KH2. Without the mandatory Energy Crystal (which cuts crafting requirements in half), it requires 13 pieces of Orichalcum+ to forge (which is more than the amount that exists in the game). With the Energy Crystal, though, the game rounds up to 7.
* two interactions in the musical, especially because Eponine is portrayed as Marius's longtime friend before he even meets Cosette, whereas in the book he meets Cosette first and is much less fond of Eponine than the musical makes him.
* two-ish affair, the other very elegant. Her voice work during it is very much Azula.
* Two islands side by side, one occupied by a man, the other by a chicken, who is loudly commenting on how many sharks there are swimming in the channel between the two.
* two is only a theory. The first strip joke about creationists demanding to put "evolution is only a theory" stickers in biology textbooks. The next strip joke about a guy from the 13th century demanding the same kind of stickers in astronomy textbooks.
* Two issues later, Lois Lane uses a time machine to travel back to ancient Krypton to
* two. It was so bad that Joe Dever gracious extended the time limit to six rounds

in the Mongoose Publishing re-release.
* Two Jameses, and this is the complicated one; they'd simply be known as James the Great (son of Zebedee; also brother of Apostle John, also refered to as "son of Zebedee") and James the Lesser (son of Alphaeus). In scripture, both are frequently referred to simply as "James", with no additions to differentiate them.
* two JC, where the Doghouse is actually a cell where men are sent to fold sheets(?) while lines like "Express your feelings" and "Stop checking out other women in restaurants" are played over a loudspeaker. The usual offense is giving the SO a thoughtless gift, and your main shot at getting out, according to the commercials, is buying them jewelry.
* Two jocks do this during the "Let's Fix It Up" number when Applejack casually picks up a table and walks off with it while they had to work together to lift one.
* two jokes for the price of one of a scene of the MC calling out an "I" number, then dropping it on the floor and losing it. Just when we think the gag is over, he bends over to look for it and slams his eye into the corner of the table.
* Two Judases, though one was typically known as "Thaddeus", or "Judas, son of James". "Thaddeus" was also referred to as "Judas", and would later simply be shortened to "Jude" to differentiate him from Judas Iscariot. At one point in John's gospel, the narrator has to clarify, "Judas (not Iscariot) said..."
* Two just-introduced characters have a conversation that's perfectly mundane within the story, but take a whole double meaning when you know that Veldrina is a cameo granted as reward for contributing to the kickstarter effort for the webcomic, and Wrecan is a posthumous cameo for a high-profile fan who'd passed away a few years earlier.
* Two-Keyed Lock is turned, the system goes to "launch enable" and switches the missile to internal guidance control, with absolutely no way to stop the launch from that point. This was one of the criticisms of missiles over bombers in that while missiles can respond much faster, bombers have the advantage that they can be called back after launch for whatever reason.
* Two kids are shown doing this on a 1997 commercial promoting the home video release of the Nickelodeon movie
* Two kids do this to another kid in one of the establishing shots of Lone Peak High School in
* TwoKinds (and an Eastern one at that) despite them being rare outside of their homelands.
* TwoKinds and can be seen cheering on the sidelines with a couch, a banner, and some popcorn, saying she wants to see bloodshed.
* TwoKinds. Basitins are generally between 5ft and 5ft6in. Adelaide is about 8ft.
* TwoKinds cast upon him that makes him appear as an attractive female to himself and others. Chaos ensues.
* TwoKinds, exiled Basitins are allowed to return to the Basidian Islands on the condition that they complete an "impossible" task. Keith, for example, had to return with Trace, the ruler of the Humans at the time.
* TwoKinds; Flora has stated (twice, and both times as a joke) that she wants to try eating human.
* TwoKinds flow. No Mana, no magic. Less effective on highly trained enemies, because they can absorb Mana from the ground for just such a contingency. Trace can apparently do it instinctively.
* Twokinds, has been known to appear in his comic, usually as a delivery boy of some sort.
* TwoKinds has Natani, who literally has a male soul after her own was magically demolished. The conflict of male mind versus female instinct is an ongoing plotline, especially in regards to Natani's relationship with Keith.
* TwoKinds) is pregnant with Human Trace's child - something thought to be impossible, in-universe. Secondary character Raine has been a Human/Keidrian hybrid all along.
* TwoKinds Mike insists that Keith — a member of a race incapable of magic — once transformed him into a girl.
* TwoKinds Natani (who has feelings for Keith) is flustered, but shrugs it off and

just suggests they pretend it didn't happen.
* TwoKinds (not sexually). Then she feels he has morning wood, and quickly gets up.
* Twokinds, plays increasingly elaborate - and epic - April Fools Day pranks, the latest "revealing" that two characters were being possessed by characters killed off in previous chapters. He has since apologized and, sadly, promised not to do it again.
* TwoKinds: Raine Silverlock, a young woman on the comic's "team B", certainly qualifies this trope, having knee-length silver hair, and an incredible raw magical potential (Although she has no control over it, no thanks to her mother...).
* TwoKinds, Roselyn has some choice words about betrayal, that reflect her past experiences:
* Twokinds: Strangely enough, the animal-like keidran have a low-alcohol tolerance. Maybe it has to do with their short lifespan/soldier genetics.
* TwoKinds: The average lifespan of a keidran seems to be between 20 and 25. Trace (a human) briefly attempts to find a way to extend the life of his keidran lover Flora before giving up and deciding to make the most of the time they have.
* TwoKinds the Basitin operate on this principle after the three generals are killed the succession is largely decided by means of duels, and the king is nearly eight feet tall, in a species that is rarely more than 5'5".
* TwoKinds, the dragon Princess Reni reads Trace Legacy's mind to verify his identity. During this, she gets flustered when she comes across memories of him being intimate with Flora. Later, Nora detects her intrusion on his memories.
* TwoKinds. Their military prowess is rather nullified by their paranoia, xenophobia and extreme prudishness, all of which keep their population small, isolated, and begging to be wiped out.
* Twokinds. Their mind-link wasn't inborn, but rather the result of the elder merging his soul with his younger sister to save her from dying when her soul was torn by dark magics.
* TwoKinds, this is the fate of any Keidran that stays in feral mode for too long; they become less and less sapient until they forget how to turn back.
* TwoKinds, who offers to let her human boyfriend Trace buy Keidran slaves in order to set them free... from someone who knows Trace can't afford them, even if he was selling.
* Two Korean commercials for Durex condoms have an identical setup: a montage of somebody sitting in various places around their house and ripping off pieces of duct tape, then answering the door to their partner who's picking up a bunch of dropped Durex condoms, before the camera pans over to reveal the first person was taping a bunch of condoms around their house. They also have the same two actors playing boyfriend and girfriend. The only differences are that the roles in both commercials are swapped (in one the girlfriend does the taping, in the other it's the boyfriend) and there are some minor changes to the locations of the montage.
* Two Korean versions were made, however little is known of them amongst English-speaking fans. One used the original title of
* Two ladies are hiking in the woods, and cross a stream. Upon reaching the other side, a Jeep Grand Cherokee drives out of the now-revealed-to-be-deep river. "Not designed for underwater driving."
* two Lalos or Pepas thanks to the later-added conditions to the spell.
* Two-Lane Blacktop centers around a cross-country road race from the Southwest to Washington D.C., but the movie ends with one driver entering a competition at a speedway in Tennessee while the other takes to the road again. The film stock appears to burn up and the fates of both races and all the characters are left unresolved.
* Two-Lane Blacktop, the two main protagonists are street racers who tour the country in a monster Chevy 150 painted primer-grey. One of them is responsible for driving it, while the other maintains it. They get challenged to a cross-country race by a man in a cherry 1970 Pontiac GTO.
* two languages whenever they take a rank in Linguistics (the language skill).
* Two later episodes did a similar thing, but with a specific theme: "Naturama" reimagined the characters as various animals in a spoof nature documentary, and

"Saturday Morning Fun Pit" featured three different parodies of Saturday morning cartoons.
* Two leprechauns pull the duplicate marker trick on Dick Dastardly in
* Two Libyan fighter pilots, when ordered to bomb protesting civilians,
* Two, Light joked about wanting to have Shinigami Wings, instead of their eyes.
* two like to slam 4Kids for their horrible "redub" of the series. The "redub" in question was done by a Canadian company and is actually more faithful to the original version than the 4Kids dub is.
* Two Lines, No Waiting has Odysseus attempting to get home, and Odysseus's son Telemachos's attempts to find his father.
* "Two Little Boys" is subject to multiple levels of this. People who only know it casually (British people, at least) think it's a Rolf Harris song. People who listen to the lyrics tend to think it dates from (and is about)
* Two local FOX News affiliates aired reports separately attacking both the Nintendo DS and the Sony PSP on their effects on children.
* Two longtime friends have just moved from Pakistan to the United States. When they arrived, they made a bet: in a year's time, whichever one of them had become more American would win. A year later, they met again. The first man said, "My son is the star of the football team, I had
* Two lumberjacks go to the forest early in the morning. One of them stumbles on some ice, and comments: "Slippery today." The two of them work all day without a word, and when they return in the evening, the other one stumbles on some ice and comments: "Sure is."
* Two Lumps, Snooch ate the Thanksgiving turkey and Eben sculpted a fake out of gooshyfood. It didn't fool "Mom".
* Two major acts on the old British professional circuit were the superstar, super-mega-heavyweights, "Big Daddy" and "
* Two major mods were created by hacking the original game's source code. They are
* Two major philosophies have governed China for most of its history.
* Two Malaysian men escaped hanging for drug trafficking because they were
* Two mandatory extra bosses were added - Schizo and Materia Keeper. Both are arbitrarily inserted in generic corridors, have no story importance or even any dialogue leading up to the encounter, and both are
* two map losses throughout their entire run from the New Challengers Stage (in lieu of their early group stage elimination at the previous Major in Boston) all the way to the bracket stage, where they dominated every single team in their path, becoming the latest team to win multiple Majors. And at the ESL Pro League S8 Finals, they would win against Team Liquid, and as a result, the first ever Intel Grand Slam title.
* Two mass fuerals are held during the story, one early on for the victims of
* two Mayor of Sunnydale, and make a point of telling Spike how their lot has improved since he left town.
* two — one with "Mama Bimbo", another with any of Dr. Nonookie's "helicopter girls".
* two, meaning that players may beat the boss faster than that and never even hear this reveal, making many wonder why they even bothered.
* Two members of the Noratama Trio are a magenta female named Yurano and a male with dark blue fur named Tokumaru.
* Two members - singer Paul Heaton and drummer Dave Hemmingway - of 80s British indie pop group The Housemartins went on to become
* Two men are adrift in a lifeboat when one of them finds a bottle. He rubs it, out pops a genie who grants him one wish. The man wishes that the ocean was whiskey, the genie grants this and disappears. The wisher is ecstatic, only to see that his companion is glaring daggers at him.
* Two men get stuck in a snowstorm in the mountains. As they await their rescue, one man sees a
* Two men have survived a sinking ship. One looks on in horror as a shark barrels up to his mate. The shark takes a sniff, recoils in disgust, and swims quickly away. The other guy asks, incredulously, what just happened. The man refused by the

shark shrugs, and reveals that he has
* Two men on a tandem are going up a hill. Once they reach the top, the first guy wheezes out "Man, that hill was a lot steeper than it looked from down there!". The second responds "Yeah, no kidding. Imagine what would have happened if I hadn't been braking the whole time!"
* Two men once created a zipline with a crossbow and abseiled over the Berlin Wall.
* Two Men, One Dress: Two or more characters share a costume/disguise.
* Two men tried to pick up Satoi without realizing he's a crossdresser. When they do learn they act violently, though Soutarou helps save Satoi.
* Two men walk into a building. You'd think one of them would've seen it.
* Two men were on trial for burglary, and a possible witness was on the stand. The prosecutor, leading up to asking her to identify the people she had seen entering the house, asked, "Are the men who broke into the house in the court room here today?" The defendants raised their hands.
* Two men were walking through the woods when they found tracks. One said they were deer tracks, the other said they were elk tracks. They were still arguing about it when the train hit them.
* two-meter-long womp rats, Luke mentions "bullseyeing womp rats in [his] T-16" when another Rebel pilot claims hitting the similarly-sized exhaust port on the Death Star is impossible.
* two millennia later than their East Asian neighbors, China and Korea, both of whom already have surnames since before the time of Christ. Until the Meiji Restoration, the only people who had surnames were those affiliated with the gentry, and this only took hold near the end of the Heian period circa 1100 CE; before then, no one had surnames.
* Two minor examples are Eddie, a chill workman-cum-drug-dealer, and Esther, a kindly investigate journalist. Both are shown in the future to work as lackeys for the Post-Human Division and are set on detaining the superpowered characters.
* Two-Minute Mysteries, by the same author—things like "Dr. Smith was murdered, where were you at the time?" "I haven't been to a dentist in years."
* Two-Minute Mysteries, especially if the text is in a large font and the message short (like a newspaper headline). Many dyslexics can read upside down almost as fast at reading the normal way, sometimes even faster. Even without any skill at it, everyone who can read can decipher upside-down print letter by letter. It may take a few minutes, but what's time to someone sitting bored in a train? Or, even easier, the top half of the paper may have been folded back while the man read the bottom.
* Two-Minute Mysteries series, except with a sword instead of a medal.
* Two-Minute Mysteries stories starring Dr. Haledjian. In the stories, he always lies about knowing things in order to get a reward.
* Two Minute Mysteries), where each mystery is only about two pages long. If the text describes a minor detail like how the wax has dribbled on a candle, or the direction of a bird's footprints, it will always be key to the solution.
* Two-Minute Mysteries) wrote a short story that ended up featuring one of these as the solution. A detective is in a small cafe drinking coffee when a bank robbery occurs, and three people—a fireman, a limo driver, and a nun—come running in to escape the havoc. They all order different drinks, with the nun asking for a cup of coffee; after the hubbub ends, the three leave the cafe. The detective asks for a second cup of coffee, prompting the waiter to give him "the mug without a lipstick stain." The gumshoe quickly determines that nuns aren't allowed to wear lipstick, and realizes that the "nun" was actually an accomplice to the robbery.
* Two-Minute Mystery noticeable to a lip reader. You can easily demonstrate this by saying the same word as a whisper and in normal voice, and feel how different your mouth moves. Then try freezing your jaw and lips in place and speaking, something you can do mostly understandably with operating your vocal cords normally, but you can't produce meaningful sounds at all if you try it while whispering.
* two minutes, featuring a wolf being tricked into saying, "Cock A Doodle" at the

Moon, who then becomes a prostitute, which is a movie featuring Quagmire as the wolf. When it finally ends, Peter says the cutaway was so long, he forgot what he was talking about.
* two minutes older than Timmy, he starts bossing Timmy around. Timmy decides to get back at Tommy by acting like a baby, wearing only a diaper and Tommy's red kerchief. Tommy is horrified and calls for his grandma.
* Two-Minute Warning involves a sniper at a Super Bowl-like football championship game.
* Two-Minute Warning is one particularly creeping and frightening example. The only time he shows an emotion is when he is wounded and cornered by the police at the end and he screams in rage.
* Two-Minute Warning) it was so unsettling that to have the film released on television the producers had to add additional scenes showing that there was a rational motive for the rampage.
* Two-Minute Warning. The sniper deliberately misses his targets in this version, and the only person we actually see die is the sniper himself.
* two miracle pregnancies... right after her husband went blind and they lost all their money.
* Two misnamings in "O is Not For Over". Ohlm mispronounces Polly Graph as "Pooly Groove" at one point when suggesting to Otto where to find the rampant spider-cat. Later on in the episode, Olive does this to
* "Two missionaries come with conversion kits / You'll be the one sewing cotton through their lips" (Factor 41, Sleeper).
* Two moments question Shampoo's feelings for Mousse in the anime. The second movie she's arguing against her captor that she has no feelings for Mousse then rescues him anyway. And in one OVA she's given the reverse necklace which reverses her feelings; Mousse finally thinks it's his chance since she'll love him now only for her to scream how much she hates him and beat him nearly to death.
* Two months after D-Day, in August 1944, the Allies launched another large-scale amphibious assault in southern France: Operation Dragoon. The mostly American force and their Free French allies (who made up the rest) plowed through the Germans. With Allied forces now advancing from both the north and south, the Germans were caught in a gigantic pincer. They began retreating but not before 140,000 German troops were captured or killed, devastating for the Wehrmacht because Germany was running out of professional soldiers by this point.
* Two months after the Rockers' break-up, the final episode of the Barber Shop involved Sid Justice smashing up the Barber Shop set with a steel chair as his way of sending a message to Hulk Hogan.
* two months pregnant at the time. She had a very rough pregnancy and almost died when she had to have an emergency c-section that September. She has struggled with blood clots in her legs ever since.
* Two Moon Junction (1988): A young Southern débutante sees herself abandoning her posh lifestyle and upcoming marriage to have a lustful and erotic fling with a rugged drifter who works at a local carnival.
* two moons, that not much later (in astronomical terms) collided and merged.
* Two more coups were attempted during the Cold War. There was the "Sanmu Incident", where at least 13 suspects, some of them JSDF officers, were arrested for trying to stockpile weapons for a coup attempt on December 12, 1961. One of the suspects was Taku Mikami, who was detained for being involved in the May 15 incident back in 1932. The suspects justified their plan to save Japan from being dominated by Communists after they plan to assassinate the Prime Minister and the rest of the cabinet. The other was on November 25, 1970, known as the "Mishima Incident", after
* Two more early examples from Disney include the interior of Big Ben in
* Two More Eggs. And they lived happily ever after and no one got arrested.
* Two More Eggs are animated this way, as part of an effort to give each sub-series its own style.
* Two More Eggs music video "Why Did You Take My Paste", the gopher, whose speaking voice was and still is Mike Chapman, is clearly played by Matt when he's singing.

* Two More Eggs short, "Hot Dip": The short starts with a boy struggling with his math homework, only for the mascot of Hot Dip to appear out of nowhere and offer him some. After trying it, he begins rapidly doing his homework...only to cut to a piece of paper with the word "math" written all over it with an F-. The boy is pleased with the outcome, however.
* Two More Eggs stars Dooble, a weird little man who speaks in non-sequiturs, greets people with a quirky catch phrase ("Helloche!"), and shows up to solve people's problems in improbable ways, often without realizing it. Season 2 introduced a rival character, Renfrow, who has the same gimmick but always manages to show up first, even when Dooble tries to set up a problem that he can swoop in and fix.
* Two More Eggs, the latter centers around an Eighties-type camper, and none of the kids in either series use mobile devices or mention the Internet.
* Two more elements are introduced in Season 5: Wind (Morro) and Water (Nya). Unusually for this trope, the Wind user is a villainous ghost, and the
* Two more examples: When the Janitor is accidentally given a leaky pen by J.D. he thinks it was intentional and retaliates by using the spilled ink to give J.D. a mustache. And when Dr. Kelso is reading the last
* Two more notable examples are when it turns out that the nickname Ben gave his forms is actually spot on for the actual species name, translated from
* Two more possibly unrecorded cut songs have their lyrics printed in
* two more times stolen car by a patrol officer making a routine check and captured for the last time.
* two more to piss on? It just never ends. One family is perpetual butlers with undeveloped vocal cords, who are systematically killed the second they mention being self-aware of their condition, and the other is a purpose-bred family of pit fighters knowing no life outside the arena.
* Two more waves of Star Guardians were released due to the skin line’s popularity: first featuring a more experienced team in the form of
* two, most consoles from that point forward focused on overall specs and iteration numbers rather than just the main processor's maximum word size.
* two mothers case is cleared up, one of the girl's mothers dies (she was sick) and the dead mother's parents move to take custody of the girl because they assume her remaining mother is a pedophile. Their evidence is a set of naked photographs they found and statistics their lawyer gave them stating homosexual parents are more likely to abuse their children. The mother refutes the idea that naked pictures of children are inherently sexual, and the team quickly discovers that the grandparents' lawyer has his own homophobic agenda, so the case is quickly dismissed. Still, the mother swears to her in-laws that she'll never let them see their granddaughter again because the damage has already been done.
* Two murderers had been placed in the same cell, and were together for a year. The only difference was that one had murdered adults, while the other had raped and killed a little girl. When the adult-murderer found out
* Two murders committed by Tony - Ralph Cifaretto and Chris Moltisanti - are not exactly "sudden", but are even more shocking than the other hits because Tony decides to kill them spontaneously, rather than by an arranged whacking.
* Two murders involve a guy attacking a girl. In one, a guy kills a girl by bashing her on the head, while in another, a guy tries to stab a girl with a knife before being killed by a third party.
* Two mythological monsters, Medusa and the Basilisk, possessed magical auras that would kill anyone who looked at them (and, in some versions, anyone they looked at). Despite this they were often physically described in great detail in the legends. In the Medusa's case it could be argued that this was because looking at her reflection in a mirror wasn't lethal and someone could have seen only their reflection. But there is really no excuse for the Basilisk, who not only had a lethal reflection, but also breathed poison gas as a backup weapon (JK Rowling tweaked the Basilisk for the
* Two nerdy college kids do pretty well during governmental collapse in
* Two new Old Spice ads cropped up around late 2019 to celebrate the 10th

anniversary of their
* Two New York cops beat information out of Lucky Luciano, telling him they can do whatever they want because they're the law. It turns out that they're shaking Lucky down on behalf of Arnold Rothstein.
* two. No small feat in professional golf, where you're required to walk four miles a day for four days (and he had to stretch it to a fifth because the U.S. Open requires a full 18-hole round as a tie-breaker).
* Two nuns named Sister Mathematical and Sister Logical are out on a walk, when a pervert begins following them. They split up, and Sister Logical arrives late to the convent. Sister Mathematical asks her what happened, and Sister Logical replies that she pulled her habit up, he pulled down his pants... and then she outran him easily, since he couldn't run very fast with his pants down!
* Two occasions confirm this. In "The Wannabe in the Weeds", when a psycho stalker aims a gun at Brennan, Booth takes the bullet for her. Brennan's response is to, in one fluid motion, grab Booth's gun and shoot the stalker dead. And in "The Hero in the Hold",
* Two O'Clock Eastern Wartime. All three of the protagonists are— one is a novelist, one is a man looking to have a radio show, and the other is a singer, and they are barely scraping together money to survive.
* Two of Adachi Mitsuru's manga series feature romances forbidden by feuding parents. In
* Two of a Kind (1983), the fate of the universe hinges on whether a morally dubious couple (played by John Travolta and Olivia Newton-John) can make sacrifices for each other out of their newfound love, which would prove to God that humans are redeemable. She keeps him from going to prison for his attempted bank robbery that started the Earthly plot, but what about him? In the climax, with minutes left to go before God starts over with everything, she is taken hostage by a robber (actually a disguised Satan, whose existence is at risk!) and his attempt to save her leaves him dead. This proves a sufficient sacrifice, and not only does God spare the universe, He also brings the dead lover back to life.
* Two of a Kind and bring all humanity into heaven unless a small band of angels can make two people fall in love with each other. The Devil hassles the angels throughout most of the film, until the nature of God's challenge is explained to him...
* Two of a Kind, the other three the Mowrys, Sagals, and Daniels respectively).
* "Two of a Kind, Workin' on a Full House" had previously been a low-charting single for co-writer Dennis Robbins. Incidentally, the B-side to Robbins' version was "The Church on Cumberland Road", which itself was covered up by
* Two of Big Mom's daughters, Charlotte Smoothie and Charlotte Praline, easily tower over allies and enemies. Smoothie is implied to be at least 3 meters tall (9'8"), plus she possesses
* Two of Britain's deadliest railway accidents occurred in fog. In 1952, a sleeping car train from Perth to Euston ran past danger signals and crashed into the back of a local train at Harrow & Wealdstone, before a London to Liverpool express crashed into the wreckage, killing 112 people. Five years later, in 1957, an express from London to Ramsgate ran past danger signals and crashed into the the back of a local train at Lewisham, causing a bridge to collapse onto the wreckage. As a result of these accidents, new safety equipment was brought in across the network which would warn the driver if the signal was not at clear.
* Two of Charlotte "Big Mom" Linlin's daughters, Chiffon and Praline, are
* two of Easter eggs for the Apple Newton handheld computer, including Finder's ability to predict Elvis sightings.
* Two of Ellison's most well-regarded stories "'Repent, Harlequin!' Said the Ticktockman", and "
* Two official versions were released by Nintendo for the 3DS: the original Pokédex 3D (Unova Dex), and the Pokédex 3D Pro (all 649 at the time).
* Two of Harry's raccoon thieves walk in from the left side of the screen, and when they get to the middle, the Sega logo falls on them, crushing them.
* Two of her other videos — "Luchshye" and "Goodbye" — are also

connected to each other, although the connection between the two is much looser than the one between the aforementioned trilogy. They tell a story about a different fictionalized version of Elvira, and are a bit more action-packed compared to the previous narrative, though just as compelling.
* Two of his men are gambling instead of watching the ship like they're supposed to, he only beats them and forces them to serve as temporary bodyguards to Tyrion without starting fights rather than killing them.
* Two of Lincoln's most successful commanders could also show some of these traits.
* Two of Louis's parents (his genetic father, Carlos Wu, and his mother, Sharrol Janss) and his sister Tanya had similar coloration. Beowulf Schaeffer, his adoptive father (and the father of Louis' stepsister Jeena) was an albino. Jeena Wu had the same skin color as Louis, but was naturally blue-eyed and blonde-haired.
* Two of Murphy's Laws of Combat state "No combat-ready unit has ever passed inspection" and "No inspection-ready unit has ever passed combat."
* Two of Nunnal's labratory assistants are named and yet they have as much importance as the ones who remain unnamed.
* Two of Red Fang's videos feature a 1979 Impala Station Wagon. They buy it for only a few hundred dollars in "Wires" and modify it with a plow to run over all sorts of stuff on an empty runway. In "Hank Is Dead" they outfit it with a loudspeaker and play while sending out flyers for an Air Guitar competition. It's one of the rare occasions where they take a beat up, tired old clunker and actively turn it into a
* Two of Richard Strauss' operas draw on it, Elektra and Ariadne auf Naxos (although in a different way)
* Two of Sonny's No. 1 hits during his run of 16 straight (from 1967-1971) were covers of The Seekers hits, including "I'll Never Find Another You" (four weeks in August 1967) and "A World Of Our Own" (three weeks in March 1968).
* Two of tennis' four 'grand slam' tournaments, Wimbledon (until 1921) and the US Open (until 1911) both originally had a 'challenge' system in which the winner of the previous year's tournament automatically went straight through to the final of the current year's tournament to face a 'challenger' who had won a knockout of all the other players (and who had often worn themselves out in the process).
* Two of the bad endings in Heaven's Feel result from the heroine of the route, Sakura, being killed while Shirou is still alive and well. If
* Two of the biggest, longest running sitcoms ever on Belgian television, which are called
* Two of the bugs stumble across a broken garter strap, which is Getting Crap Past the Radar on one level—some vigorous sex was happening near that record player, apparently—and not very Nazi-friendly on another level, as bonking to jazz music in a meadow was hardly the thing that proper Nazi maidens were supposed to do.
* Two of the commanders of Team Galactic, Saturn and Jupiter, have a Toxicroak and a Skuntank, respectively. In addition, the Galactic Grunts each own at least one Golbat.
* Two of the Dark Eldar troops are one of the few non-marine armies to play this straight; the Kabalite Warriors and Wyches and their elite variants, Trueborn and Bloodbrides. These literally use the same model and in fact are upgrades to their base form's unit entries as of 7th edition. Their only difference, game wise, is a slightly improved profile and the ability to take more weapons.
* Two of the Devil Arms, Agni and Rudra, can even talk, although Dante would only take them with him if they kept silent. They start laughing during one of Dante's flashier combos with them, forcing Dante to yell
* Two of the endings are also esoteric in that the message is that synthetic and organic life are (somehow, in some vaguely-defined way) utterly incompatible and will inevitably try to destroy each other for poorly-defined reasons, and that this can only be resolved by implementing a galaxy-wide Final Solution of some variety that inevitably involves either obliterating
* Two of the first major NPCs you meet are Papyrus and Sans, a pair of comedic

skeleton brothers. In spite of being skeletons, they wear clothes, eat food, and don't seem to be the least bit inconvenienced by the whole 'lack of flesh' thing.
* Two of the Freys have names that are ironic in terms of who they are named for. The severely mentally retarded Aegon (generally known as Jinglebell because his
* Two of the group's biggest hits during their 1970s hot streak were covers of country songs, both written by Jim Weatherly. In the spring of 1973, they had the pop and R&B version of "Neither One Of Us (Wants To Be the First To Say Goodbye)," which concurrently was a top 5 country hit for Bob Luman. In the fall of 1973, legendary country singer Ray Price recorded "You're the Best Thing That Ever Happened To Me," which became a No. 1 hit; a few months later, Gladys and her Pips recorded a cover of the song (dropping "Your the ..." part from the title), taking it it to No. 3 on the pop charts and No. 1 on the R&B chart. Depending on the genre, however, both Pips' version or the country originals remain equally famous.
* Two of the individuals responsible for the 2004 Madrid train bombings which killed 193 people were each sentenced to more than 40,000 years in prison.
* Two of their eight #1 hits on mainstream rock were indeed "Numb" and "What I've Done", but "In the End" stalled at #3.
* Two of the main supporting actors are real-life husband and wife couple Michel Gill and
* Two of the main suspects in the murder of film director William Desmond Taylor in 1922 (which has been nicknamed "Hollywood's First Murder") were his butler Henry Peavey and a former butler who had been fired a few months earlier, Edward Sands. However, the murder has never been solved.
* Two of the major one-shot villains in the series were Americans, and firmly in the Boorish camp. Both of them were greedy, gullible, short-sighted and all too willing to call up things they didn't understand in the name of profit and/or Jeebus.
* Two of the male leads on the show have a deal where they are "porn buddies" with each other. Basically, if one of them dies, the other will immediately go over to the dead man's home and remove all the porn before any parents or family members show up. The porn so recovered would then be added to the survivor's stash, of course.
* Two of them hire Ted (seen in a flashback) to design human forms for them, and provide the technology for it - apparently there are legal/political/religious reasons why they can't do it themselves (because it requires the use of object-oriented programming), rather than an inability to do it themselves. Also, once they've been raygunned into humans, they can (implied) shift back and forth freely.
* Two of the militants do this in their first scene. Being a parody that generally keeps the fourth wall intact (save
* Two of the more fun (and more sadistic) abilities in the game are based on this. The first is an uppercut which launches the unfortunate target about twenty feet straight into the air. The second is a snapkick that sends them flying blocks away.
* Two of the most reliable sources of points are layups and free throws.
* Two of the most straightforwardly heroic characters, Ned Stark and Jon Snow, wield
* Two of the movies had decapitations, in the fourth Piccolo blasts Doradabo's head off and in the seventh Vegeta punches Android 15's head off.
* Two of the party members have wings and can fly... in cutscenes. During gameplay they are just as restricted by the
* Two of the races in the Horde fit. The orcs were once enslaved by humans, and most Forsaken were once human themselves. Many humans in the Alliance would very much like to see both of these groups destroyed because of what others of their race have done.
* Two of the same fruit/power can not exist at the same time, though similar, overlapping powers are possible. This is first brought up in Thriller Bark, where the crew first meets the skeleton man Brook and then proceed to encounter Gecko Moria's zombie army. The idea that the zombies could be reanimated the same way Brook was is dismissed because of this rule and, indeed, the zombies are a product of Moria's

* Two of these are shown onscreen and described by the narrator partway through
* Two of the Shards of Alara feature this trope. The goblins of Jund wield bone weapons and armor, while the people of Grixis uses bone gear due to the abundance of corpses and scarcity of anything else.
* Two of the show's working titles, "Whither Canada?" and "Owl Stretching Time", were reused as episode titles.
* Two of the sons of Jacob, Simeon and Levi ended up slaughtering all the men of an entire city
* Two of the Stands, Bohemian Rhapsody and Under World, actually manage to turn this into a
* two of the Stark children finally reunite when Sansa finally arrives and is reunited with her brother, Jon Snow.
* Two of the stories, "Highway Robbery" and "A Strange Twist", occur over the same several days but follow different sets of characters. There is some occasional overlap (such as Sara in "A Strange Twist" nearly getting struck by the speeding cars in the
* Two of the supporting characters are called Edward- one goes by Ed, whilst the other goes by Eddie (or his surname, Longhorn).
* Two of the teachers at the school fit this look, but are more stern that truly evil. Professor Anne Finneran has the craggy looks (resembling the Wicked Witch of the West without the green skin) and is the strictest teacher at the school, while Professor Lukic is more elderly in appearance with a hag-like appearance and a spine-chilling cackle, who delights in scaring the wits out of her students.
* Two of the three discovered piano concertos have sections where the soloist misses the preceding cadence, and the orchestra or second soloist has to repeat themselves.
* Two of the three most recent Hunters drop the axe thanks to Elisa's influence and the realization of how much their blood feud has cost them (up to and including one of them ending up paraplegic), but the nicest of the three
* Two of the titans from the 2007 line, Gadunka and Maxilos, had custom designed bodies. Maxilos, being a fully robotic character in a world of Bio
* . Two of the tracks are named after the restaurant entries in Stand-Up Comedy below, and the cover has an illustration of the title menu item.
* Two of the Triwizard Tasks demand blood payment in order to pass barriers.
* Two of the unwritten rules for special forces (read: commando) groups are "if you ain't cheating, you ain't trying", and "if you're caught cheating, maybe you're not special forces material." For example, there will usually be some point where a commando will be ordered to report to a distant base, but not given any transportation (or, for that matter, a pass to leave the base they're currently at). It's up to the special forces guy to find a way to get there — following their orders, but against military regulations.
* Two of the very first films to tell a complete story unwittingly created new genres.
* Two of the visible markings on the Moon were named "Palus Putredinis" and "Palus Epidemiarum". Although they're not really swamps, names like "Marsh of Decay" and Marsh of Epidemics" show that astronomers aren't immune to this trope.
* Two of the women who nurse Thor back to health after the fight against Hulk are played by
* two of those bodies' powers are for interrogation and soul removal, but they work differently (one removes your soul to read your mind, the other removes the souls of people who give false or no information).
* Two of Titus's sons are framed for the murder of their sister's fiancé, and Titus cuts off his own hand to secure their release... except he's been lied to, and he only gets their heads back, along with his hand. So, he grabs one head, has his brother take the other, and orders his handless, tongueless daughter to carry his hand by picking it up in her teeth.
* Two of Your Earth Minutes: Aliens mention that they are using human time, not their time.
* Two of Your Earth Minutes: Aliens specify that they're talking about our time,

not their time.
* Two old actors are sitting on a bench. One says: "How long has it been since you had a job?" The other actor says "Thirty-two years — how about you?" The first actor says, "That's nothing. I haven't had a job in forty years!" The other says, "One of these days we've got to get out of this business!"
* Two old Jewish women are eating in a restaurant and the waiter approaches and asks, "Is anything OK?"
* Two old ladies drop their teacups to shatter on the floor when Solomon Grundy shows up for revenge in a Halloween episode.
* Two old men in Britain were convicted of making the lives of everyone nearby a misery with their endless feuding. The judge ordered them to be handcuffed together for 12 hours per day. They became fast friends, since the alternative was unthinkable.
* Two on an Island by Elmer Rice (who studied law in his early years before quitting to pursue a writing career), the theatrical producer Lawrence Ormont gripes:
* Two one-shots show Frank killing the murderers of his family ('The Cell"), and the mafia group who terrorized his childhood neighborhood and allowed the rape of his best friend ("Tyger").
* two on the top of his head. The ends curl round in the style of an Ionic column.
* Two on top of each other from the Season 8 episode, "Goodbye Stranger". Dean pleads with Castiel when Castiel is
* Two opponents for an upcoming match have to sign a contract that they cannot touch each other until the big event, with the provision that violating it will cause them to lose their opportunity or be fired. The heel will try to goad the face into hitting him. The face will usually find some type of
* two orbs making up the whole chest, taking a cut or a stab to there causes the whole arm from shoulder down to fall off. But, to the point — that arm is fully capable of twitching around with its elbow and wrist, and its hand-sword is as lethal to the enemy as it was. You also don't get disqualified for it landing on the floor. Sometimes an enemy running into your severed arm is what decides of the ultimate victory of yours.
* Two Original Generation mecha had started their lives out as figurines. The first is the
* Two other antagonists on the show had dreams of a personal global stake. Quark (a Scottish-speaking alien) claims to own a cosmic charter bequeathing Earth to him by a distant relative, while Mac the Fork (a Scottish-speaking snake) had stolen the blueprint for an Earth-shattering device.
* Two other books in the franchise feature this trope as a plot point, both with the same character. Said character is a
* Two other books similar to the Book of the Dead are also shown. The less powerful show up "In the Skin of a Lyon". The second is a cousin of the Book of the Dead called "The Book of Remembrance and Forgetting".
* Two other bosses from the Subspace Emissary, Galleom and Duon, are entirely original, although Duon's
* Two other examples are Centaur Flash (but not the weapon you gain) in
* Two other examples from the Pilot episode: Commmander Takashima, where this trope was played straight (she was replaced by Ivanova from the first season on and never heard from again) and Lyta Alexander, where the trope was subverted by replacing her with Talia Winters and then later re-replacing Talia with Lyta in the second season.
* Two other examples would be the RAF Roundel where peacetime it was Red, White, and Blue but during WWII they made the white either very narrow or left it out and the BIG Red Rising Sun on the flight decks of Japanese aircraft carriers. In fact, in Midway, one of the bomber pilots aimed directly at the big red spot on the
* Two other famous cases involve the Oracle at Delphi; in the first, a man prophesied to die in the sea spends his life avoiding the
* Two other famous game-winning college Hail Marys: 1980 Holiday Bowl, BYU's Jim McMahon to Clay Brown for a 46–45 win over SMU; 1994, Colorado at Michigan,

Kordell Stewart to Michael Westbrook, Colorado wins 27–26.
* Two other geologists were in a chartered plane almost directly above the summit of Mt. Saint Helens when it blew. Their pilot applied full throttle and put the plane into a steep dive to get away from the blast cloud; even at their top speed of approximately 200 knots, the cloud nearly caught up to them, but they managed to outrun it and land safely in Portland.
* Two other major examples of shows that got spin-offs and look set to continue indefinitely are
* Two other members of the "Big 5", the elephant and the Cape buffalo are both notorious among big game hunters for being nearly unstoppable if not put down immediately.
* Two other notable exceptions are the Hillbilly Bears and Blubber Bear from
* Two others happen with Red during "Be Prepared", the song in Japeth's shack: she does an indirect Aside Glance when she says "
* Two others have the end of a dog leash coming out from under him, implying he crushed a dog, and a squashed shopping bag with a woman lamenting, "Well, there go my tomatoes."
* Two other submerged shards of Gondwana — in the Indian ocean — are Mascarene plateau (north and east of Madagascar) and Kerguelen plateau (halfway between Africa and Australia and further south than either). Only a few percent of each protrude from water. Both sunk tens of millions years ago.
* Two other unofficial adaptations were made in 1991 and 1996, the 1996 version despite changing a lot of names, is commonly considered as the most faithful to the original.
* Two other variants to this rule exists: Firstly, the Kinetic Kill missile is a high-level kinetic weapon that's effectively a guided warhead without a payload. The results of hitting an enemy ship with it are... Noticeable. Secondly, try putting a tractor beam on a defensive satellite. Since the satellite rotates, the ship it ensnares will rotate with it due to the beam... And usually ram right into the planet the satellite defends, insta-killing the poor ship. That's right: You can intentionally make a weapon that makes the enemy do kamikaze rammings of your own planets.
* "Two out of three falls" was actually the standard in the very early years of professional wrestling, with "One fall" becoming the norm when wrestling made the jump from "sport" to "sports entertainment". Before this a single fall contest was called a "Lightning Match".
* Two pages later, Malack comments that Tarquin has always been willing to go the extra mile for a punchline.
* two-part episode and crash-test procedures. The police footage appearance was more of a cameo than plot-relevant.
* Two-Part Episode "Army of Ghosts"/"Doomsday," the Doctor wears a pair of 3-D glasses designed to see the residual stuff from the void between universes.
* Two-Part Episode "Blood and Wine", however in this case it's also linked to his motivation, as he hates the Church because his father committed suicide after being excommunicated. He plans to commit mass murder by serving a poison in the wine at a Catholic mass.
* Two-Part Episode can extrapolate the future and destroy an enemy vessel by hacking into and detonating the missiles it carries. Neither of these extremely useful abilities are ever mentioned again.
* Two part episode "Dreamland I" and "Dreamland II" had Mulder accidentally switching bodies with a Man in Black named Morris Fletcher (played by Michael McKean) due to some space-time anomaly caused by an experimental aircraft. Fletcher is having great fun with it while Mulder is miserable and desperately trying to get his body back.
* two-part episode into a 60-minute episode with new narration in 2005/2006) didn't have any antagonist at all, it was focused on how the history of motor racing affected new car technology and the police were incidental to the story.
* Two particularly interesting tactics of his; first, to allow himself to go into a daze and let instinct keep him from getting hit (didn't work because he couldn't

attack without breaking the trance) and throwing his fists against the wall (they're made of rubber) to let them ricochet unpredictably.
* Two particularly notable examples emerged in the attack on Pearl Harbor:
* two-part Season 3 finale "The Return of Optimus Prime", has everyone affected by the Hate Plague that has spread throughout the galaxy. Optimus used the collected wisdom of the Matrix of Leadership to wipe out the plague.
* Two-Part Trilogy: The first part tells its own story, and audiences liked it. So let's turn the whole thing into a trilogy by making the second and third installments interconnected.
* Two-Part Trilogy, which necessitates writing one story that can be stretched over multiple installments.
* Two people are having sex. They are unmarried and really enjoying it. One or both will die. If it's one, the survivor will be accused of the other's death.
* two people ever take skin damage, one by accident and quickly healed, the other by the local equivalent of having his face pressed against a hot stove for a few seconds.
* two people on a couch could do a Bamzu commercial!" to which she replies, "You think?"
* two people, the man who invented the algorithm and the man who chose the message to encrypt and engraved it on the monolith), MI6 has 85 Vauxhall Cross, GCHQ has that doughnut-shaped building in Cheltenham, the NKVD and KGB has the Lubyanka Building in Moscow. All together, it does project a vague "come at me, bro" attitude to their enemies.
* Two Pepe Le Pew Warner Brothers cartoons, 'Past Perfumance' and 'Who Scent You?', has this trope in the form of "Le What?!".
* Two Percent Power, the current Black Paralysis is the son of the former holder of that title, having inherited the same abilities and been trained by his father.
* Two-Person Love Square know one another's secret identities. This may be more than a mere rule: The episode "Cat Blanc" revealed that when they discover each other's identities, things swiftly turn disastrous.
* Two-Person Love Triangle: A love triangle where two of the parties involved are actually the same person
* Two-Person Love Triangle where the two choices are actually the same person.
* Two-Person Love Triangle with Jem/Jerrica. In the comics he's taken a serious chill pill, doesn't even like Jem at first, and is only romantically interested in Jerrica.
* two phone calls, one to a friend or bail agent, and one to an attorney (unless they happen to be the same person). (NRS 171.153)
* two photos are of Johan Goosen standing next to Jean de Villiers, a member of the Springboks (South Africa's national rugby team) - in the first one, he's just a boy; in the second, he's a Springbok himself.
* Two pieces of cover art for the non-existent issues #194 and #195 of
* Two pins used for hardware expansion in the Famicom's cartridge slot were removed from the cartridge slot of the NES, resulting in an inferior audiovisual game experience for some games
* Two Pints of Lager and a Packet of Crisps - Casey holds the record for the youngest ever person to make the UK charts, having done so when that song made number 72 way back when she was three years old).
* Two Pints of Lager and a Packet of Crisps episode "Momo and Piggsy", Johnny declares that, in the short time after Donna and Gary's argument, he will already be sitting on the couch in his undies, picking his nose and bum at the same time. Donna argues that Gary wouldn't degenerate so quickly. Guess what we jump to right after she says that...
* Two Pints of Lager and a Packet of Crisps - except it's not 'count'.
* Two Pints of Lager and a Packet of Crisps: Gaz is convinced that he and Donna need something to spice up their relationship. Something romantic. So he strips down to a latex posing pouch, covers his crotch and nipples in whipped cream, handcuffs every limb to a bedpost and waits,with a large, flashing novelty dildo in his hand, for Donna to come home. She takes one look and freaks out, running out of

his flat and leaving him there...
* Two Pints of Lager and a Packet of Crisps resolves the question very quickly when two of the main characters wake up in bed together with hangover amnesia:
* Two Pints of Lager and a Packet of Crisps's Gordon Burns as himself.
* Two Pints of Lager and a Packet of Crisps that he named Corinthian (and later named his son after it). It is later destroyed in a fire.
* Two Pints of Lager and a Packet of Crisps, when Louise is pregnant. She takes out a large lump of coal and bites into it as one would an apple.
* Two: Plots which only work within a particular fandom or pairing and are incredibly common there.
* Two Point Hospital: Janitors can remove the ghosts of dead patients with an ordinary vacuum cleaner, provided they have the ghost-catcher skill.
* Two Point Hospital: On a radio advert: "Come to Grockle Bay Zoo! Almost no visitor fatalities for two-and-a-half weeks!"
* Two Point Hospital, where one of the comedic diseases, "Science Friction", has patients stuck permanently in shiny skin-tight jumpsuits, in danger of being eroded away completely by the terrible chafing they cause!
* Two Point Hospital", where patients blithely stroll around the hospital stark naked, believing themselves to be wearing the latest fashions. They even jiggle, stretch and bend over a lot, just to make everyone watching all the more uncomfortable.
* two points here. Aside from the two Death Stars he also has so many fighter kills that his ground crew chief switched to painting on kill marks for whole squadrons instead of single ships because he ran out of room on the X-Wing's flank.
* Two Pokémon introduced in Generation VI revolve around this format:
* Two police sergeants, Spears and Samu, attempt to get Dr. Piper Kaufmann to spill her guts in
* Two (possibly more) of the Star Trek novels had someone walk in a room in time to hear; "I don't know where you've been lad, but I see you won first prize." Which is the last line (more or less, as it varies depending on who's singing it) from The Scotsman Song.
* Two potential court martials against Hawkeye were when he punched Frank ("House Arrest") and when he said General Steele was nuts ("The General Flipped At Dawn"). They were dismissed when a visiting female officer tried to make out with Frank then played the rape card (Margaret believed her and cleared Hawkeye) then when General Steele went off his nut at Hawkeye's preliminary hearing.
* Two precious ivory bookends belonging to a former circus owner are stolen when two of the man's friends are visiting. Encyclopedia and his father find strange handprints in the beach near the circus owner's house, and so suspicion falls on one of the visitors, a crippled acrobat, because the only way he could have walked was on his hands. Encyclopedia, however, insists that the thief is in fact the other visitor, a former bareback rider, because she said her leather gloves were missing, and "no one brings leather gloves to a seaside town in the summer." (Again, an assumption of concrete fact out of a generalization, but even so she could have brought the gloves for a legitimate reason like playing golf, as driving gloves, or even riding a horse. Or maybe she packed them by accident.)
* two pregnancies during her time as Detective Wheeler. The first had Wheeler "temporarily on loan" to another agency for the first half of Season 7, the second was written into the story as Wheeler being pregnant.
* Two priests, walking along a road in a hot day, find a lake and decide to stop and bathe in there. Once they come out, they see a stray dog had stolen their cassocks. To make matters worse, they spot a group of elderly ladies coming down the road. Having nowhere to hide, they quickly put on their underpants, but one of them wears it on his head. After the ladies pass by, obviously flustered, one of the priests asks the other why he didn't cover his unmentionables. "I don't know about you", the other replied, "but I figured those ladies would recognize me if they saw my face."
* two proposals. The first is from a sickly childhood friend; Horace is afraid he won't reach twenty-one (and he doesn't). The second is from a con man after her

inheritance. Elsie honors her father's wishes both times and ends up marrying the man who exposed the second candidate as a drunk and gambler.
* Two prospective MPs in the 2019 United Kingdom general election produced leaflets featuring these statements:
* Two Radio 4 comedy series by Sue Limb are about No Celebrities Were Harmed versions of famous writer's groups: the Lake Poets in
* T-Word Euphemism: Referring to a swear as "the (first letter of swear)-word" so you can mention it without actually saying it.
* T-Word Euphemism: Referring to a word as the (first letter of word)-word to avoid actually saying the word.
* Two real life subversions: Glamour shots for actual ice cream, not sundaes, are a special skill. Entire cartons of ice cream will be used to make the perfect scoop, which must then be photographed quickly and perfectly
* Two reasons behind this. One being Sven is very anti-commitment and is likely to cheat (Which he does). Second, she reveals to Marten that a lot of girls in high school only pretended to be her friend so they could seduce Sven and she still resents it.
* two reasons pulls them in that direction. There's almost no pundit who doesn't.
* Two recent strips feature England as a parody of this trope, trying to escape from Germany and the Italies and hilariously failing.
* Two recorded comedy instances: "Dirty Old Man" by Jim Backus, and "Obscene Phone Bust" by Hudson and Landry.
* Two recurring characters originally introduced as "Foreign guys who've been here long enough to only almost sound American." They're
* Two religions that are discussed only in passing are the pleasure faiths and tiktokism. The pleasure faiths is a religion that believes in just having fun, which puts it at odds with the more conservative Unionism.
* Two Rights Make a Wrong: Two groups each put a plan into action without telling the other, with the result that neither is successful.
* Two Roads: Cao Cao is leading his army through a mountain pass when he comes to a fork in the road, one direction he can see a lot of smoke as you would expect from army camp fires; down the other he sees
* Two Rooms and a Boom has a hot potato card, where the carrier of the card loses at the end of the game. For this social deduction game, players can share showing each other's cards to build trust, but the hot potato forces anyone sharing with them to swap the card, and thus the receiving player needs to find another person to share cards with.
* Two rows of goose archers illuminate the room by shooting a number of flaming arrows, lighting up the cauldrons.
* TWO rules are apparently number one (and two rule number threes), likely due to an oversight on the part of the writers, although later confirmed to have been intentional. This was lampshaded when the female version of Gibbs from CGIS told McGee HER rule number one and suggested he write it down. McGee replies that rule number one has been taken, twice. The other one was inherited from Mike Franks, Gibbs' boss when he first became an NCIS Agent. Mike Franks told Gibbs that he didn't need a list of rules; he only needed "Three Golden Rules". It has not been revealed which of the rules are Gibbs' and which are Franks, nor has the second Rule Number 2.
* two sailors to the death. The adventure ends after this fight regardless of how it goes; even if you win (which is just about inconceivable), the book simply says "Your adventure is over".
* Two Saiyans Play has Krillin laughing maniacally. This was in the official, re-recorded version.
* Two scenes later, Rei is shown fondling Saeko's breasts, who was mindful to squeeze her thighs shut and cup her hands between her legs. It mainly served to
* Two Scenes, One Dialogue: Cut between two or more characters talking about the same thing.
* Two Scenes, One Dialogue. In "If-Then-Else", Martine and a squad of Samaritan agents are getting ready to burst into a room to kill Team Machine, who are about

to escape through another door to the elevator room.
* Two schoolgirls deliberately slip pornographic slides into a magic lantern display a visiting coffee planter is giving to their school as part of a plan to seduce him in one of the erotic Edwardian novels in
* Two sections where you shoot up a car that is chasing you, taking cover every time the passenger with a machine gun lets rip. At least there's an Achievement for shooting out its headlights.
* Two separate charts are shown in magazine scans showing the relationships of the central characters in
* Two separate pinball tables have this name, a 1975 Gottlieb and a 1989 Bally.
* Two Serpents Rise poisoned a city's water supply, killed a god, and awakened giant fire serpents to chase foreign sorcerers, whom she saw as an occupying force, out of the city.
* Two Serpents Rise, the Caleb woke the King in Red to curb-stomp high priest Temoc when the fanatic tried to sacrifice his best friend.
* Two Sessions" is a rap intended to influence people's opinion on the Two Sessions and China's development in terms of technology, poverty reduction, and the environment.
* two set. In fairness, both put more emphasis on depicting the conveyor belt leading to the incinerator, which is a fairly action-y sequence before the solemn final part sets in.
* TwoSet Violin: A pair of Asian-Australian classical violinists who offer humorous sketches and commentary on the work of a classical musician, critiques of musical performances in popular media and musical challenges.
* TwoSetViolin does the same but with viola jokes (it's a classical music thing)...
* TwoSet Violin everywhere, even in the most minute details, thanks to their being trained classical violinists.
* two's fierce rivalry. What really sells it is Jin's rather unhealthy obsession with killing Ragna, and the creators' tendency to play with it in the various Gag Reels.
* Two Shakespearean Actors centers around the events of the 1849 Astor Place Riots. While the historical event is real, the story is highly fictionalized
* Two shapeshifters are shown to use their abilities to open a brothel, but they're apparently a bit out of touch with
* Two shoplifters who pose as a handicapped man in a wheelchair and a nurse pushing it for him try to steal merchandise. However Loss Prevention Agents catch on and only manage to capture the fake handicap while the 'nurse' manages to escape. The 'handicap' keeps insisting to be let go since he's handicapped and claims that the reason he runs away by foot is because he was chased by them.
* Two Shorts format, the show is split in half, with each segment airing as a 10-minute show. In those seasons, there was usually a music video that aired in-between, most notably Barney's Music Box.
* Two Siblings In One, or other metaphysical properties of their deceased sibling.
* Two Siblings In One - When a sibling lives on within you... literally.
* Two side quests, and the story mission "A Train to Catch", if you count
* Two Sides of a Coin, Eleya encounters Jerrod Dalton, her ex from the Academy who ran off in the middle of the night to take an assignment. She angrily points out to him that, as he's a science officer and she a space warfare officer, it's unlikely at best they would've gotten assigned to the same post in the first place, so she probably would've accepted this trope and a long-distance relationship as a solution.
* Two Sides of a Coin Jerrod Dalton tells her he's still in love with her as he dies of massive radiation poisoning.
* Two Sides of a Coin: Kanril Eleya "greets" her ex-fiance Jerrod Dalton with a right cross to his jaw that sends him flying backwards and breaks one of her fingers.
* Two Sides that go from feeling up his ass to jerking him off without missing a beat. Even a client that met "Heily/Haley" in the street without advertising as such yet wasn't surprised at what was under the skirt and was happily serviced

without issue.
* Two similar campaigns for electronic devices ran 15 years apart. The iMac in 2000 ran four commercials, each advertising their ruby, indigo, sage, and snow computers with Dion and the Belmonts' "Ruby",
* Two Simons; this is relatively easy, since one of them was also known as Peter, and became St. Peter. The other was typically knows as "Simon the Cannanite" or "Simon the Zealot".
* Two sketches in the show include a rapper named Professor Murder. A dance-punk band would later take the name as a reference to the show.
* Two sketches in "The World" points out a consequence of a world where
* Two small but significant examples: The Demoman is a heavy drinker and The Spy is frequently seen smoking cigarettes (it's almost part of his trademark), yet both are perfectly medically sound to be fighting a war and never collapse on the battlefield from ailments brought on by years of their bad habits. What kind of fun would that be if they did?
* two Snitches in one). Needless to say, this rarely happens, which makes the outcome of a game with a successful Express run highly predictable.
* Two soldiers are frozen in ice by Cumulus, the Storm King. When Birdman thaws them out seconds later with his "sun rays", they're fine.
* Two Soldiers: "We interrupt this broadcast" as a radio bulletin reports the Japanese attack on Pearl Harbor.
* Two songs give a taster of what this round was all about. Panel members would listen to a song
* Two songs on the second album are only available as demos - "Sex Toys", sung by Karen as part of her dominatrix persona selling sex toys to Rebecca and co., and "It's Not Difficult to Define Miss Douche", apparently the theme song for the Miss Douche competition Rebecca enters.
* two souls) is desecrated. This can result in the interesting scenario of an Exalted fighting the ghost of her prior incarnation when they decide to look for artifacts.
* Two sources - the leader of the Enclave (the remnants of the US government) and the log of a Chinese submarine commander during the Great War - point to the Chinese. Still, they might be mistaken, and part of the lead-up to the Great War is still undetailed - the war between China and the USA has been given a fair bit of attention, but the other Resource Wars - especially the one between Europe and the Middle East, and the ones that happened in Europe after that - are still mostly names, if even that.
* Two Soviet spies mistake General Assistance Department as the head of British Intelligence, and use their new experimental truth serum on Mr. Lamb in order to get information.
* Two space shooter games take this to the next level, with star-destroying weapons. The Shivans in
* Two Space Stations are important plot locations. The Citadel is the seat of the Galactic government and generally has an
* two spinoff games, rely almost exclusively upon plans built upon the Indy Ploy; they'll walk in with nothing but evidence and a commitment to uncovering the truth, and are forced to constantly think on the fly to deal with whatever the witnesses, prosecutors, and suspects throw at them. The decision to request that the new information you've just pressed out of a witness be added to their testimony most often involves both him and the player thinking something to the effect of, "Great — now if only I knew where I was going with this."
* Two Sprint commercials have made fun of this, presenting their commercials for the Instinct phone as movie trailers. They're actually called something like "the finest product placement movie this summer", with "finest" often replaced for a more genre-appropriate word (such as "scariest" or "heartwarming").
* Two Starfury squadrons are depicted as having whole-body paint jobs: The escorts for Earth Force One, with a blue-and-white paint job inspired by the
* Two states completely outlaw gambling in any form: Utah, mainly due to the strong presence of the Mormon church, and Hawaii.

* two storylines based around cleaning out the fridge. The time they required liquid nitrogen to stop The Thing That Spawned In Our Fridge, which they then sold as modern art after freezing.
* Two strangers met on a golf course and the topic came around to occupations. The first man said he was in real estate, pointing out the condominiums he sold and lived in in the distance. The second man said he was a professional assassin. When the first was skeptical, the second took a tube and some other items and assembled a high-powered rifle right there on the spot. The first man asked to see the rifle and was indeed impressed with the high powered scope. "I can see into my apartment from here... there's my wife... and she's in there with another man!" Furious, he asked the assassin how much he charged for his services. "$1000 a bullet", he said. The first guy said "I'll buy two. Use the first to shoot my wife, and the second to shoot the guy's balls off!" The assassin took a look through the scope and said "If you hang on a minute, I can save
* Two strips involve a doctor telling Heather about a specific symptom of a concussion, and Shelly experiencing that symptom off screen.
* Two strips later about it, that would be a really shitty ... thing ... to do ... to ... someone ..."
* two suggested the more outlandish reveals people have done, causing her to put this line in her Twitter profile so that it's the first thing everyone sees on it:
* Two sunken lands from British legends are mentioned in the children's series
* two superstar quarterbacks. He brought the Dallas Cowboys to Super Bowl V, where they lost to the Baltimore Colts. After that, he was gradually replaced by backup quarterback Roger Staubach and finally moved on to other teams. Morton eventually managed to revive his career with the Denver Broncos, leading them to Super Bowl XII, where they lost to...the Dallas Cowboys, led by Staubach. He eventually retired from football with the Broncos, just in time to be replaced by a young rookie named John Elway...
* two swords despite their funny names, and inclined to just kill his opponents at the first chance. Udinaas claims that if the Emperor of Lether knew who Silchas Ruin was, he would send ten thousand warriors after him.
* two swords in tandem, Beast Breathing grants its users the heightened senses and raw strength of a wild animal.
* two swords, Widow's Wail and Oathkeeper, a status symbol only the Targaryens are known to have matched with Blackfyre, sword of the Targaryen kings and heirs and Dark Sister, Visenya's sword, though probably less because he wants two really cool swords and more because he wants to show how completely House Stark has been crushed, and to manufacture legitimacy for Lannister rule of the Seven Kingdoms. Oathkeeper lacks some of the more spectacular elements of its book counterpart (namely its highly distinctive rippling red-and-black blade), but its handle is still ludicrously baroque. Twyin gives Oathkeeper to Jaime, who in turn presents it to Brienne, who is the one to name it this. Once she swears to Sansa, Ice returns to the North... partially. Following the death of Tommen in the aftermath of the Green Trial, Jaime takes up Widow's Wail.
* Two's work. Then Vicky accuses him of being gay. Vicky also accuses the Boss for being gay due to the "No dating customers" philosophy. One should note that Vicky runs a gossip rag that pegged them both as gay.
* two tablet is needed at a time, and the fact that the company sells the antacid in pouches of two tablets doesn't quite help.
* two tattered vagabonds, only to realize they were entertaining Zeus and Hermes. The two gods were pleased with the old married couple, and set them up for life — and then ensured that they would be together even after they died.
* Two-Teacher School: Works set in schools that don't show more than two teachers.
* two teams the favorites, because they're pitiable, lovable losers most of the time, while the Yankees are perpetually successful.
* two teams with the same name at different times, it can lead to this.
* Two techniques in the games, exclusive to Sonic, Shadow, and Metal Sonic, are explicitly referred to both in name and description as light speed - Light Speed Dash and Light Speed Attack.

* two teenaged siblings who are forced to flee for their lives when a dictator stages a violent coup on their home planet, and get separated from their parents in the process. They wind up hiding out on Earth in the United States of America, struggling to adjust to an entirely new culture and way of life, which is made easier by them meeting and befriending one alien who's been living on Earth for a while now and gladly teaches them human customs. Some humans also discriminate against them due to being aliens in, depending on who's in the loop, either the foreigner or the extraterrestrial sense of the word. Through it all, the siblings try to hold onto hope they can return home, reunite with their parents, and the dictatorship over their home collapses. That story, without any of the alien sci-fi elements, can be easily applied to any refugee seeking asylum in better-off countries.
* two that he doesn't know if the French people are any closer to picking a President, but they're halfway through making a decent crêpe.
* two The compilers/editors tend to note this with the dry humor characteristic of today's lawyers and judges.
* Two", the episode takes place in the aftermath of a nuclear war that devastated the world but the time period is left vague. In his opening narration, Rod Serling says that it is "perhaps a hundred years from now. Or sooner. Or perhaps it already happened two million years ago."
* Two the Golem was set free with an order to do what she wants, but she was created with only one desire: to do as she's told. Her growth out of being an Extreme Doormat began when she learned to have other desires, starting with eating sweets.
* two, the Japanese branch of Toryumon rebranded under a rough English translation when Dragon left. Both have at points gotten large enough for people to consider it improper to call them "independent", a level IWRG continually falls ever so short of.
* Two", the man finds money in a cash register in the ruined city but discards it since it is worthless in the aftermath of the war that destroyed his civilization.
* two. The second was killed by Beast Boy himself, much to Raven's annoyance.
* two. The series did end airing in several European countries via HBO. In The UK it airs on StarzPlay.
* Two things throw into doubt whether this is a true apocalypse — the military's still in reasonable shape, having the capacity to launch rescue missions (the final campaigns of both games) and bombing runs (through most of "The Parish" in
* Two things worth remembering; Tolkien was writing at a time when Plate Tectonics was very poorly understood, and thus it was conceivable that the landmasses depicted in his maps could be formed into the modern-day continents within the span of a few thousand years. And secondly, the world of Middle Earth is very explicitly the result of intelligent design, and therefore not necessarily subject to the same rules that govern real-world mountain formation.
* Two-thirds of CSKA Moscow's Mogilny/Fedorov/Bure line defected to the US to play in the NHL, while Bure left after the fall of the Soviet Union.
* Two-Thirds of the way through the war, the Arkbird is highjacked by Belkan radicals called the Grey Men, who intended to use it to drop a tactical nuclear bomb in either Yuktobonian or Osean territory.
* Two", this is the man's opinion on the conflict that devastated the world five years earlier. He no longer has any urge or any reason to fight.
* Two Thousand Maniacs! gets its plot going with a fake diversion sign.
* Two Thousand Maniacs! — Splatter series. 1 film and a 2-film remake series since 1964.
* Two Thousand Maniacs! the inhabitants of the mysterious Southern town turn out to be the ghosts of civilians who were slaughtered by corrupt Union soldiers during the Civil War. The town reappears every one-hundred years so that the residents of it can take their revenge on any Yanks who stumble upon it.
* Two Thousand Maniacs!, where unfortunate travelers encounter a town full of Confederate-aligned ghosts who "celebrate" the day their town was destroyed and

they were killed by Union soldiers by brutally murdering any Yankees who fall into their clutches.
* two-thousand-year-old, who has killed over a hundred Knights of the Cross, is scared of him. As Michael put it, "Shiro knew fencing like Mozart knew music".
* Two Tickets To Paradise by Eddie Money. Homer misses the irony and is actually cheered up by the song.
* Two-Timer Date: A character schedules dates with two different people at the same time.
* "Two Times Trouble," when Mac's pop singer friend Roxy thinks someone's trying to kill her. It's key to the plot, hence spoiler tag:
* Two time-travel-created copies of the same person shake hands with each other, setting off the end of the universe.
* Two to Go", a panicked Andrew runs into Willow, who knows he was an accomplice in the killing of her girlfriend:
* Two to Go, pointing out all of Buffy's self-destructive habits and depression since her resurrection at the beginning of the season. In Willow's words, Buffy hates living in the world just as much as Willow herself does; Willow's just more willing to admit it.
* Two to Go scenario, since he saw the gun in Warren's hand before he even raised it, but was simply frozen with fear and did nothing to stop him from shooting Buffy and Tara.
* Two to Go where the Sunnydale police are unsure of what to do with a vengeful Willow but keep her at gunpoint as she rips open the prison.
* two Top 10 country hits with "I Wanna Fall in Love" in 1998 and "With You" a year later, but neither is even remotely as famous as her debut single "Down Came a Blackbird" which only got to #28.
* two top 10 hits, one of which got all the way to #1. It was not the still frequently-played "That Ain't My Truck", but rather the much lesser known "Don't Get Me Started".
* Two Towers by two orcs who comment that the only way for them to survive is through Sauron's victory, even though they aren't all that fond of the Dark Lord, themselves.
* Two tracks have this technique on the "pirated" version of Bits of Me by brentalfloss, which builds itself on
* Two tracks on Bryan White's debut album were covered by other artists: "Nothing Less Than Love" by The Buffalo Club, and "Going, Going, Gone" by Neal McCoy.
* Two traveling salesmen have to share a hotel room for the night. After the lights go out, there is silence, then the bed starts shaking and squeaking. One man says to the other:
* Two Trees Morgoth killed them, she knew she could never again make anything like them. As the Silmarils were created with their light, they could be used to heal the trees, but doing so would destroy them. See the next entry for why that is a problem.
* Two Trenchcoats in a Kid trope in which two trenchcoats try to get into a movie disguised as a human child. This involves repeated protestations that they are an ordinary human ("My parents do money and make taxes. My hobbies include baseballing and enjoying having thumbs") and not in any way a pair of trenchcoats in disguise.
* Two Trucks) that it causes any grown man who sees it to start weeping and involuntarily flexing their muscles, while fireworks and eagles appear in the sky.
* "Two two six, o eight four one! The Poconos Gardens Lodge!" as the jingle.
* Two Universal parks in both South Korea and Russia were announced years ago yet neither have begun construction since their announcement.
* "Two unlikely people. Two different worlds come together in a story about a most unusual friendship." —
* Two unseen figures are examining files on the advertised car in the middle of the night, when a security guard bursts in and captures them.
* Two U.S Military digital camouflage patterns have received criticism for being this.
* Two, usually when the situation is truly desperate,like risking to being deleted

or blown up. He tries his best from stopping his "twin" One in doing the same.
* Two Vaadwaur ships are damaged during the final fight scene and prepare to go on a suicide run to cover the escape, but Overseer Harn refuses to leave them behind. Eleya gets them to lower their aft shields so she can beam the crews off.
* Two variants of trees have been used. One has a tree suit made for the character so they can observe a traitorous meeting, the other has a new Death Knight using a 2D wooden 'tree' to ambush a messenger (complete with a lampshade hung by said messenger).
* Two variations on one where Rzhevsky attends a noble's ball and asks to dance with Natalya.
* Two versions are revealed to have happened within the same family in
* Two versions of the Charlie Daniels Band's "The Devil Went Down To Georgia" made airplay in 1979. The album edition had the last line of the last verse "I done told you once you son of a bitch, I'm the best there's ever been." The single release for AM pop stations changed it to "'Cause I told you once you son of a gun, I'm the best there's ever been."
* Two versions of the Fruity Pebbles Christmas commercial from 1986 exist, in the original
* two very effeminate and brave boys disguised as girls. Said boys would have later freed the prisoners while Theseus was dealing with the Minotaur.
* Two very similar abilities that make creature return from the graveyard are called "Persist" and "Undying".
* Two vessels got stuck with rather unfortunate reporting names: merchant ships other than the
* two videos taken by a DDI employee which showed Talbot herself demonstrating the game at their E3 2009 booth.
* Two Voices, One Character: A character is played by two or more actors within the same work.
* Two weeks before his death in March 2018 co-authored a paper, "A Smooth Exit from Eternal Inflation", which theorizes how to search for parallel universes. If proof is ever found, it would have likely earned Hawking a Nobel Prize nomination but unfortunately, the prize cannot be awarded posthumously.
* two weeks. He promptly gets a hammer to the fingers and changes his mind.
* Two Weeks Notice features his character playing strip chess with his pretty, red-headed new lawyer.
* Two Weeks Notice, Sandra Bullock and Hugh Grant leave a tennis game (in white uniforms, natch) and find themselves stuck in a traffic jam — just as the chili dogs Sandra has eaten start "barking." Fortunately, they manage to locate an RV in the line of traffic.
* Two Weeks Notice, the hero Adrian sucker punched a blind girl. Twice.
* Two Weeks Notice (the quintessential Hugh Grant romantic comedy, stars Sandra Bullock, another Rom Com staple)
* Two Weeks with the Queen, who strike up a friendship over both having to deal with loved ones being seriously ill.
* "Two Wheels, Full Throttle, No Brakes". Of course X Middle School has its own corn maze. Why wouldn't it?
* two, when his start-up becomes so successful, (after unknowingly bought by Astrid's ex, a tech billionaire, in order to make her and Michael equal after they almost split up due to their contrasting social status) he ends up being a billionaire.
* Two, when people do die, usually there's a whole lot of people killed at once. Given the amount of people we've seen previously, it's pretty reasonable to guess that it would thin the group down to the central characters...but this is not the case. If I were to name it, I'd say...Regenerative Crew.
* two witnesses. When he's impressioning a female witness, the speaking-beeps switch to the higher-pitched female ones too.
* Two women are chatting in a bar when one of them sees her ex and waves to him. The man doesn't even respond. She gets huffy and says "Well! I made him a millionaire, and that's the respect he shows me!" "How'd you make him a

millionaire?" "He was a billionaire when we started dating."
* Two women are talking at the office. "I just don't understand it," says the first woman. "No matter what I do or what I wear, I just can't get a date!" "You should see my doctor," said the other woman. "I had the same problem in the past, and he really helped me out." So the first woman makes an appointment, and goes to see the doctor, who is Japanese. In his office, he tells her to take off her clothes, turn around, and bend over. Finally, he says, "I am sorry. There is nothing I can do for you." The woman is upset and asks, "Doctor, what's wrong with me?!" He responds, "You have Zachary." "What's Zachary," the woman wants to know. The doctor replies, "Face rook Zachary rike ass."
* Two women argue about the typical 'Female Utopia' element of this trope. One women claims that without men, there are no more wars and society is better, while the other argues back that female pleasure has vanished.
* Two women get pregnant accidentally, one with her new boyfriend and one during a one night stand. The latter was
* two women having sex. In particular, the passport official who helps him renew a passport that isn't his (which is illegal, as the man himself tells him), and the gang members who go from being ready to beat him up to help him paint an apartment. At the episode's conclusion, the plan falls through, and although disappointed, the throng of men who were rooting for him still applaud his efforts.
* Two women in New York went shopping during a blizzard. This led to them getting trapped inside their car from the snow. Fortunately, they just went shopping. Unfortunately, it was light shopping, as they spent most of the time buying some boots for the winter season. They were stuck in there for about two days and eventually they ran out of food. So, as a last resort, they had to eat the leather from the boots they bought. Fortunately, they were able to live long enough for the snow to melt and allow them to get out.
* Two Women plays this straight, with Giovanni saying goodbye to Cesira as she leaves Rome, and following along as the train starts to pull away.
* two women who are essentially immortal, piloting a TARDIS in the shape of an American diner around time and space.
* Two Words: Added Emphasis: A character says "Two words" or any other number of words and immediately follows it with the two words they intend to use to make their point clear.
* Two words: Bawls Exxtra. Bawls is a high-caffeine soft-drink that tastes like a cross between Sprite and creme soda, but contains a bit more caffeine per ounce than Red Bull does. Bawls Exxtra is the sugar-free version, sweetened with AceK and sucralose (Splenda). It has
* Two words: Cannons firing. That's not a glib comment; that's actually
* Two Words: Fire Tornado. They have these in Southern California. What more can be said? It's a tornado made out of freaking FIRE!
* Two Words: I Can't Count is flubbed when the person gets the number of words wrong.
* Two Words: Katie's Revenge. A man in Indiana was convicted of molesting and killing a girl named Katie. After his fellow inmates found out about it, they held him down and gave him a nice tattoo: the words "Katie's Revenge". Across his forehead. In huge letters.
* Two words: Online identity. Many people who use an online identity for blogging or forum purposes don't like to reveal their real names and such.
* Two words: Peter Griffin. He is so dangerously stupid he even burned down a children's hospital, by accident!
* Two words: Roger Federer. Sure he's not super thin and wiry but he's not OVERLY tall like some in
* Two words: Sikko Warner. Her ability to speak nearly every language results in lots of
* Two words: "steamed hams". Long story short, Skinner came up with the idea in a snap after the
* Two words: "Suicide Booth". They resemble phone booths and cost one quarter per use. The booths have at least three modes of death: "quick and painless", "slow and

horrible" and "clumsy bludgeoning", and it is implied that "electrocution, with a side order of poison" exists as well. The eyes can be scooped out for an extra charge. After a mode of death is selected and executed, the machine cheerfully announces, "You are now dead. Thank you for using Stop-and-Drop, America's favorite suicide booth since 2008".
* Two words: Symbological Genetics. Tinkering with genes can give you magic powers.
* Two words that strike fear and terror into even the most jaded Pro Wrestling fan's gonads:
* Two words: Tokyo DisneySea. Just looking at photos and videos of it alone can be overwhelming.
* Two Worlds are all stylized bear traps, albeit ones that release anything from poison gas to magic to physical damage.
* Two Worlds came with a tabletop RPG that featured a handy illustration of a four-sided die with five sides. The RPG was basically a D&D clone with a bunch of stuff left out to make it fit into a tiny book.
* Two Worlds features the ancient Elven teleport pads as the main means of long distance travel.
* Two Worlds: Katanas and other Eastern-style swords are among the most powerful 2-handed swords in the game. You don't start finding them until you're near endgame character levels (about 35-40+).
* Two Worlds renames fairly typical goblins as "Groms" and, in II, reanimated skeletons are called "Necris."
* Two Worlds the final battle against Gandohar, and spend the next 5 years as a prisoner in his dungeon while he takes over the world, which is where the game picks up.
* Two Worlds. The game treats this as though you've beaten the final boss normally, even giving you the achievement for it.
* Two Worlds, which turned a buggy but playable game into a trainwreck. The second game is mostly remembered for its HUGE amount of content and a variety of multiplayer modes.
* Two WWII bombers, on separate occasions, the latter being missile armed.
* two years and a ton of the Illusive Man's money putting Shepard back together.
* two years due to the originally intended lead singles "Young Love" and "Dirt Road" faring poorly — and they didn't even make the final cut of the album! Once the album was finally released, its singles barely made Top 20. He got back on track with album number three, whose lead single "More Girls Like You" was a gold-certified Top 5 hit in 2017.
* two years, eventually calls him up to play an extremely inconsequential role in a scheme (Charlie has to hold a door open for Harley), and tries to kill him anyway. The audience is left to assume that the Caliph of Clowns did this because he thought it'd be funny.
* Two years later, Evelyn once again declare her love for Solas after she recovered from the above event out of fear she would relapse again.
* Two years later, Senator Lawrence Keitt of South Carolina (who had helped out Brooks in the famous brawl by turning his gun on anyone who tried to help Sumner) started another brawl after a heated debate on slavery when he tried to strangle Congressman Galusha Grow of Pennsylvania. It ended after a missed punch dislodged a congressman's
* Two years later, the revival would get a second season, only for it to start with the extremely controversial twist that
* Two years later we have the same thing, except replace Joker with Scarecrow and the Holiday Killer with the Hangman. And the energy Bruce devotes in trying to stop both in turn heavily strains his relationship with Selina Kyle when he winds up standing her up on Christmas Eve.
* Two years later, while rescuing Insurgency and Regime members from a burning, reality-collapsing battlefield, the Flash (a Regime member) makes an effort to retrieve the body of Huntress (an Insurgent), who was killed earlier in the fighting.

* two years of her life. Oh, and all of her former "friends" didn't make the jump back. So, she's isolated, stressed, and confused, and she rarely complains about it. She even says so, which pisses off Ash since he's NOT happy with the change. Then they have a big "I want to help you, but I like my own life" thing, where she probably was about to admit she'd love for Ash to be a boy again, because she wants in his pants, but not as a girl.
* Two years prior to the start of the series, protagonist Hideki proposed to a female MMORPG player who then revealed herself to be
* two years. The Core eventually became known as the "shitty" version, as opposed to the "entry-level" Microsoft was promoting it as.
* Two young boys went up a mountain and saw two old men playing chess, with a rabbit behind them jumping up and down. Every time the rabbit jumped, the world changed from sunny, to leaves turning brown, to snowy, to flowery, to sunny again. By the time the boys left, they returned to their village to find that hundreds of years had passed, and were punished angrily by members of the village for claiming to be their ancestors. (Not literally. To the villagers they were ancestors (despite the villagers not being the children's descendants) because the people of the village viewed everyone who had lived there in the past as ancestors of the community.)
* two young boys who were trying to get enough money to pay their mother's rent.
* "Two young girls explore a shattered world filled with sound; a past to be uncovered" —
* Two young Scots are visiting America and speeding along the road when they are stopped by a police officer. The officer says to the driver, "You were going 70 miles per hour. The speed limit is 45 miles per hour. I have to give you a ticket." "But the sign says I can go that fast," says the driver, pointing to a nearby road sign. "That says
* two You would not be faulted for confusing it with a yoga pose or ballet move.
* TX-Sector proudly advertised its so-called "teleporting balls": Two pinballs were kept in reserve at various spots, ready to be released under certain conditions, creating the illusion that a single ball teleported elsewhere.
* TX-Sector sports a blue jumpsuit with broad red and white shoulderpads.
* Týr often writes songs in English, Danish, and Faroese, and their album
* Tyanna of the Tower, the third of Maegor's queens, was the only one who
* Tybalt. After all, the hero had just murdered him for what had ultimately been an accident. As this is Shakespeare, the validity of this is really up to the
* Tybalt's parents are never shown, and he seems to be very close to his cousin's family, even fiercely self-identifying as a Capulet, although Lady Capulet claims he's "her brother's child" so, technically, he wouldn't take the Capulet name, being related to Lord Capulet only by marriage.
* Tyberos the Red Wake, a Captain (and possibly Chapter Master) of the Carcharodons wield a pair of weapons called Hunger and Stake. They're essentially a combination of Lightning Claws, Power Fists and Chainfists all into one, with the chainsaws in the palms of the hand like teeth in a shark.
* Ty Burrell bears a strong enough resemblance to Fred Willard that they can realistically portray a father and son.
* Tycho as part of his songs. Justified as he's an ambient techno musician, and everyday things like those are relaxing when used the right way.
* Tycho Celchu has a weird case of it as well: he gets plenty of promotions, but always ends up one step behind Wedge, as
* Tycho Celchu was at the Imperial academy calling his family on Alderaan for his birthday when the transmission suddenly dissolved into static then went out completely. He later found out it was because the
* Tycho gets these whenever he gets particularly angry or is acting particularly evil, apparently because his body harbors a dark spectre from the world of dreams.
* Tycho Nestoris has a visibly low opinion of Westeros' feudal system of titles and bloodlines and seems to regard their conflicts as petty. He's also quite unforgiving of Davos' past as a smuggler because he comes from a
* Ty-Chou/Ghost of the Dawn's series. After Crystal dies in "Ghost In The

Machine", she's brought back... as a Transformer. She immediately punches out Prowl, the one responsible, yelling "I'm your friend! You're supposed to let me die with a little dignity!" There are currently four such fictions on Fanfiction.net: "Small Problems", "Ghost in the Machine", "The Autobot Files", and the newest, "The Secret Lives of Decepticons".
* Tycho was once seen clothes shopping, looking at a rack of the blue/grey shirts identical to his own.
* Tychus Findlay has a pinup on one of his pauldrons in a retro style (she's the celebrity who goes in and out of rehab in the bottom text of the UNN broadcasts).
* Tychus Findlay was in prison and given the opportunity to leave by simply taking a deal with Arcturus Mengsk: kill Sarah Kerrigan. It's very clear that this wasn't a good idea and that the universe would be doomed, but Tychus didn't exactly think the deal through when he took it, nor did he know all the details since he never bothered to get into it.
* Tyene Sand - daughter of Oberyn Martell - coats her daggers with a poison called The Long Farewell. Although it takes time to work, death is guaranteed with a single drop unless an antidote is taken.
* Tyene, the most cunning and deceptive, favors poisons, which she can deliver in a variety of subtle ways.
* Tyger Pool by Pauline Fisk uses this deliberately to establish the slowness and gloom suffered by a recently-bereaved family, featuring long monologues by the heroine about her deceased mother and the paralysing gloom that's affected her father. Just when you think the story's not going to go anywhere... it does.
* Tygra serves as a levelheaded leader until Lion-O gets his feet on the ground and becomes a headstrong leader, shading into charismatic leader as time progresses.
* Ty Herndon has had three #1 hits, of which only one reached the Top 40 of the Hot 100. It was
* Ty Herndon's "What Mattered Most" is about a guy who was so focused on the details about his ex that he didn't pay enough attention to her as a person.
* Ty Hulse has written several online articles about fairies and why they hide:
* Tying into the above, this might be why a lot of aquariums don't house deep-sea animals, as their usual habitat would be difficult to mimic, let alone, maintain in captivity.
* Tyke Bomb also knows that he's not much more likely to be romantically interested in a girl half his age.
* Tyke Bomb), and Mr. Verres mentions specifically that she was designed infertile in all but her human form, since her creators weren't sure what would happen if she got pregnant in hybrid form.
* Tyke-Bomb and using the moment of timelessness to beat up your entire party.
* Tyke Bomb, grown in a lab out of mutated samples of Superman’s DNA to be a counter to the Kryptonian. He gleefully embraces his hatred of Superman despite knowing that it was implanted, to the point that Cadmus tried to dispose of him because he was too powerful and uncontrollable.
* Tyke Bomb. Heidern really enjoys recruiting young girls for some reason.
* Tyki almost does this to Tokusa by chopping both his arms off while Tokusa was ranting about how he loves "serving the lord" to Allen. Justified in that the job of killing the foes was already done and he was in all right to feel perfectly safe when Tyki literally appeared out of nowhere.
* Tyki's subtext with Allen is very disturbing, because Tyki has tried to kill Allen numerous times and has
* Ty Lee is a slim (though quite buxom) teenage girl... who's also a
* Tylene Buck (aka Major Gunns) also turned to pornography after her career as a manager went nowhere after WCW released all their female talent.
* Tylenol soft chews are cut in half next to a pill of the common, hard kind.
* Tyler. Although he's not as good as sports as he fancies himself, he still qualifies as a
* Tyler Bateman tends to stare off into the distance silently. When something gets his attention or he's asked to speak he'll usually let out a prolonged wheeze

before degenerating into laughter.
* Tyler Black pretty gay, isn't he?" but changed the subject, as his problems with Black had nothing to do with his supposed sexual orientation.
* Tyler Black too, though not enough to wear his formal wear in the ring.
* Tyler Breeze: Debuted in WWE's developmental territory FCW in 2010 as Mike Dalton, then spent a record five years in it and its sucessor, NXT, and debuted the Breeze gimmick in 2013, before finally debuting on the main roster in 2015.
* Tyler Bunch is known for his puppetry, most notably playing Treelo and Pop from
* Tyler complains about being the least talked about contestant amongst fans, saying that even more-minor-than-minor
* Tyler Cross lover. In prison he's been in several other relationships and serves as the accountant (Angola being run as a for-profit prison).
* Tyler Cross, where a woman finds herself bound and gagged in the foundations of a construction site. She notes the lack of any sharp objects and has to make do with a concrete wall corner to free her hands and feet after lots and lots of rubbing to wear down the ropes.
* Tyler Durden addressing fans at the end, handing out "homework assignments" to the audience on behalf of Project Mayhem, and praising anyone who sent in photographs of the completed homework from the previous issue.
* Tyler Durden placed subliminal porn images into family films, strictly for his own amusement.
* Tyler Durden's versions of the airline safety instructions card in
* Tyler Farr: "A Guy Walks into a Bar" and "Redneck Crazy," which involves this and stalking your cheating ex.
* Tyler had no role in season one except being part of the show's first couple with
* Tyler Johnson played a kid in season 1 episode Bugs, and then later played recurring angel Samandriel.
* Tyler Lucas from version 5 is also heavily implied (and confirmed by
* Tyler Marlocke also falls under this trope, as a normal kid whose being forced to go through a curriculum designed for people with superpowers by his parents, he often has to rely on his innately sensible nature in order to simply survive. After he becomes the de-facto main character, he is able to solve many problems simply through a heaping helping of good, old-fashioned common sense and some rather advanced deductive abilities. It helps that later on he gets occasional supplementary lessons from local
* Tyler Mullen has only two known credits: Mowgli in the VHS scenes of
* Tyler Nelson was an extra and trained dancer who was intended to appear in
* Tyler Perry and is the main reason why they can't get him to leave even though everyone else hates him since Token keeps giving him money (with Token in slack-jawed amazement that he can't seem to stop doing it, even as he hands over his cash).
* Tyler Perry and its sequel, the buff and handsome policeman Troy gets married to the overweight Sheila, who just divorced her first husband Mike because he cheated on her. Subverted as Sheila isn't ugly, but she's overweight.
* Tyler Perry directs and/or produces will have himself in a lead role, and also will have Tasha Smith, David Mann and Tamela Mann (the latter two are husband and wife).
* Tyler Perry film, Madea turns a young hooligan girl into a proper young lady... by repeatedly beating her with a belt.
* Tyler Perry for this. He does the acting, the music, the writing...you name it.
* Tyler Perry has a tendency towards this which changes depending on which character is in the spotlight at the moment.
* Tyler Perry has Monica Pearson, an actual anchor (now retired) from Atlanta's ABC station, WSB-TV 2 (that most people in Georgia have heard of), talk about the main character being accused of rape.
* Tyler Perry in his movies, relating to his childhood when he was molested several times.
* Tyler Perry Mable "Madea" Simmons enabled him to move from the car... to a multi-

million dollar mansion in Atlanta.
* Tyler Perry, Malik's friend Kevin actually did contract syphilis but was ashamed/didn't know how to get help, so Malik offers to talk to his own dad, CJ and uses the trope to talk to him about it. Of course, CJ mistakenly believes that Malik is the "friend" and promptly flies off the handle until Kevin confesses that he is the one who actually needs help.
* Tyler Perry Medea is under house arrest and is trying in vain to get the electronic ankle bracelet off when her brother tells her about coyotes and says, "Want some hot sauce?"
* Tyler Perry opened at the top of the box-office. Lionsgate and Perry came out huge winners.
* Tyler Perry she starts over in a new town. Thankfully there is a handsome, sensitive Christian sheriff around, who also has a nice butt judging by the scene where he climbs up on a ladder and Sheila finds herself staring. We get a POV shot.
* Tyler Perry's movies are not very popular outside the Black community, though there is controversy on whether it's because white people don't want to see movies with all-Black casts or because the movies are of poor quality.
* Tyler Perry's movies avert this (they all take place mostly in Atlanta), probably because he himself is from Atlanta and owns a studio there. In fact, Madea's house in the films is an actual house that he owns in Atlanta.
* Tyler Perry's movies, because of the fact that he experienced this as a child.
* Tyler Perry's movies, though not considered awful, are usually not liked by critics. His movies do extremely well with African Americans, though.
* Tyler Perry was a mockery of him. "Pause" finally reran again on [adult swim] for the first time since 2010, following the BET 2-parter's premiere on the same night, and is now on HBO Max (sadly, "The Ballad of Jimmy Rebel" isn't on there, though this is more because the streaming service premiered around the time of major protests over George Floyd's death from police brutality).
* Tyler Perry was directed by Darren Grant, but many people believed that Perry directed it himself.
* Tyler Perry. Wesley Deeds has to choose between his fiancee Natalie (rich) or a down-on-her-luck single mother who is a janitor in his office building.
* Tyler Posey (had a Mexican mother and identifies to both of his parents' nationalities)
* Tyler reveals, in an emergency and to Pike's surprise, that Section 31 uses communicators built into their Starfleet badges. The rest of Starfleet won't get that tech
* Tyler specifically receives a ton of injuries whenever he competes. His first action on the show is to fall off some waterskis, hit the dock, fly through the air and crash into a pile of luggage. From there, he has hit a buoy jumping off a cliff, had a kayak thrown on him, fallen into piranha-infested waters, and stepped on a working landmine. And yet he still makes it out ready for more.
* Tyler Stone, former lover of Conchata O'Hara, and father of Kron Stone and Miguel O'Hara, is THE supervillain of the setting. A
* Tyler, the Creator and Earl Sweatshirt became cult figures at ages 18 and 16 respectively.
* Tyler the Creator does this in his song "Fish," which details the thoughts of a man who is either a cannibalistic, necrophiliac serial killer and rapist or who has an incredibly unhealthy obsession with fish.
* Tyler The Creator persona, it gets even deeper. This is exactly as creepy as it sounds.
* Tyler, the Creator's Bastard is all told to his school psychiatrist and deals with his personal issues like being a literal bastard.
* Tyler, the Creator, two of the most critically acclaimed albums of 2019...6/10.
* Tyler the Cute Biker). Still, he uses his wits to uncover many many mysteries, much to the chagrin of the resident police constables.
* Tyler. While his sports skills aren't as good as he'd like them to be, he's still defined primarily by his sports playing — and he's also a devoted, patient boyfriend who's willing to befriend geeks and nerds and is adamantly

against infidelity.
* Ty Longley, guitarist for the band Great White was on stage in West Warwick, Rhode Island when pyrotechnics used by the band's crew created a spray of sparks that ignited the foam soundproofing material in the ceiling around the stage. 100 people died in
* Tyl Regor can use Ack and Brunt, an axe and shield combo that you can also use.
* Tympanum (or tympanal organ) - an external hearing membrane in insects.
* Ty Olsson plays Benny, a vampire who's been an ally to Dean. He previously played a completely different vampire in an episode way back in season 2.
* Tyop on the Cover: The title is misspelled on the title card or the episode list.
* Tyop on the Cover: Yeah, I know the cover of the work has a typo. What's your point?
* T. Yoshisaur Munchikoopas the 52nd is this in spades, as he's identical to the OG Yoshi (and all other green Yoshis) except for his shoes being blue instead of red.
* Type 0: Dr. Bailey, Shelton, Shakila all nameless background characters.
* Type 0: Sasha James, Martin Blackwood, Georgie Barker, Jurgen Leitner, Mary Keay.
* Type 0: The members of a handful of armies. Characters native to Earth.
* Type 1: Anything of a lower level than this is toast. Anything or anyone that survives for a significant amount of time anywhere near a battlefield. Standard Minecraftians, and some of the weakest summons.
* Type 1: Basira Hussain, Tim Stoker, Melanie King, Adelard Dekker, Mikaele Salesa.
* Type -1: Bella (discounting her control of the facility's systems), Jay
* Type 1 Caravan Guards, who exist to get killed by bandits. Though they
* Type 1: Dr. Zanasiu, Zachary, Sharon, Neville, Cobalt Squad bar Spc. Crota and Sgt. Masters, Dr. Landon, Aisha, Trinity (pre-
* Type 1: Only the limb/tentacle is shown and interacted with, but the rest of the body remains a total mystery.
* Type -1: Rare, but a handful of summons ended up here, as well as a few self-summons after the godmodder reversed their modifiers, Dave.
* Type 1 space pirates had the misfortune of encountering them: in the series
* Type 1: The two are, in fact, in the middle of doing something sexual with each other or just getting started. The parent(s) in question may also be bringing contraceptives (
* Type 1: Villainous. Something wants to murder all super-people, and it's so powerful, it can easily do so. Here, human beings as they are serve as a domesticated animals, unwitting agents for their secret masters. As humanity spreads and increases in power, so do their secret masters. Here, "magic" means "whatever threatens the power of the secret tyrants that rule over muggles".
* Type 2: Aimee], Alfred, Gustave, Spc. Crota, Sgt. Masters, Trinity (post-
* Type 2 and Type 3 also come into play, as while there was some degree of meddling in season 2
* Type 2: The level of many summons. Specific examples include individual Vord members, Itchy, and the ghost space pirates.
* Type 2: The two are actually doing something innocent, like studying or playing board games, and the parent(s) walked in expecting to find that they
* Type 2: While the whole creature is shown later (thus killing the suspense part), its appendages are shown before and moving independently on their own, as if they were a different monster altogether.
* Type 3: Advanced level humans on the Auric spectrum, most fully evolved mons.
* Type 3 scenes with him. Even fans who don't ship Greece/Japan and want Japan to be with someone livelier almost never consider Turkey to be a viable option. (He fares somewhat better in J-fen, though. Somewhat.)
* Type 3: The most common level. Dr. Christoff, Pootis, and the goldisaurus are all examples. Descendants who haven't yet learned their full potential.
* Type 4: Cjopaze (only this low because of being confined to the Metal Glen)
* Type 4: "Lower tier" legendaries (Mew and expies, Latii, etc), Psuedo

legendaries.
* Type 4: Many self-summons, the UOSS, the Preston Cole, Mechs, and the creepy dummy among others. Most Descendants.
* Type 4: The Game Overthinker (when wielding elemental stones), the Anti-Thinker's true form,
* Type 5: Non-creation trio box legends (Weather trio, tao trio, etc.), Mewtwo, Deoxys, The Ghost Lord, Annoski.
* Type 5: The Operator, many other bosses, Twinbuilder, Doc Scratch, several of the stronger players.
* Type 6: The creation trio, the vitality trio, Unown hordes, Arceus.
* Type 6: The Secret of the Void, The First Block, Lord English, Terminae, a Game Master during an update, universe eaters, the Employer, the Narrative and Conflict.
* Type 93 Long Lance detonating a torpedo rack with a single shell form her single 5" anti-aircraft gun.
* Type 96 use even during World War II, the weight of the machine guns (9 kilos for the Type 96 and 10.4 kilos for the Type 99. Both empty) made their use as bladed melee weapons next to impossible.
* Type 97 automatic cannon, it should be noted) it weighed 68 kilograms (150 lbs). Firing 20mm rounds semi-automatically from a seven-round box magazine, it was capable of an impressive amount of firepower. Of course, all this awesomeness was rendered moot thanks to developments in tank armor. By 1942, it was obsolete. It was also the basis for the Ho-1 and Ho-3 aircraft cannons.
* Type A: an obvious trait. Someone who talks very low would be called Mumbles, and Sasquatch would be used for a large, hairy guy. If the initiate looks like a famous person or (even an obscure) character, then they will likely be named after their likeness.
* type also has a for...of operation that works the same as for...in in other languages, making it slightly more convenient, if still leaning into this trope.
* Type B: an embarrassing or amusing story from their pledge period. Examples: "Splash" for someone who trips and falls into one of their college's fountains, and "Knoxville" for anyone who may try (and fail spectacularly) to copy one of the
* Type B for some, not all, types of Abrahamic religion in general, where
* Typecasting: When an actor keeps playing the same kind of role in most of their works.
* Type C: Completely random or done for comedic irony, such as nicknaming a very mild-mannered pledge "Stone Cold" or nicknaming a pledge known for being very masculine and macho "Cupcakes".
* Typee coming down the road, he expressed regret that he would be forever known as "the man who lived among the cannibals."
* Typee, which was originally going to be a true account of his adventures, before he decided that making it a narrative tragedy would be more interesting.
* typefaces — Times New Roman and Nimbus Roman, for example — can be distinguished under a powerful enough magnifying glass. Back in the early days of home computing, when there were multiple competing word-processor packages for several competing system architectures, this could go a long way to narrowing down the list of people who could have printed a particular document.
* Type II: "Close Stars" — The suns may occupy different parts of the sky, indicating that one sun orbits the other farther out than the planet, but not far enough for the stars to have their own separate habitable zones.
* Type II example: Magnet Man is defeated this way due to his powers disorienting his sense of direction during his fight with the Blue Bomber, who severs his right arm with a Shadow Blade.
* Type III: "1 1/2 Suns" — The planet has one "Sun", with night and day according to it, but another star in the same system is identifiable as a small sun that contributes some heat and sometimes leaves night more like twilight. This indicates that the planet orbits a single star in a double-star system, and the stars orbit each other at a large enough distance for one or both to have its/their own separate habitable zone(s). This is by far the most likely arrangement in reality as far as habitable planets go, and many such planets (including

* Type I: "Twin Suns" — The suns rise and fall with each other, indicating that the suns orbit each other closely and the planet orbits their shared center of mass. This is called a circumbinary or "P-type" orbit.
* Type IV: "Between Two Suns" — The planet is positioned at the first Lagrange point in the suns' orbit around eachother (the point in between them where their gravitational pulls cancel eachother out), providing for
* Type-Moon. It's through her that we get to witness her adventures and the grandeur and mechanics of the mysterious planet Imaginary Earth and why UNPIEP, the organization the Exploration Club is under, in-charge of exploring said planet, came to be in the first place.
* Type-Moon or something; the Mage's Association would like to access it and not have that happen to them. There are a number (five) mages in history who came extremely close and accessed a tiny portion of Akasha, which gave them a spell of True Magic, instantly making them among the most powerful mages on the planet.
* Type-Moon - T-MOON COMPLEX Congratulations! 10th Anniversary crossover manga, during a trip to the hot springs, Caster Gilles de Rais uses his crystal ball to spy on Jeanne d'Arc bathing. Upon learning of this, many of the boys dogpile him and try to take the crystal ball for themselves so they can spy on the girls bathing.
* Type-Moon verse are so powerful: they are beyond modern science and so haven't been hit by this effect at all.
* Type: Null is a synthetic Pokémon designed to synthesize the strengths of several Pokémon as a weapon against
* type of events they depict are, in fact, plausible, though they may or may not depict actual events.
* Type O Negative band, Carnivore, had a song about World War III (and IV), even called "World Wars III and IV".
* Type O Negative band, Carnivore, had a song about World War III (and IV), even called World Wars III and IV.
* Type O Negative even changes the intro to the sounds of a tape being eaten instead.
* Type O Negative fame had one, as he looked rather like the Gothic Metal version of Gaston.
* Type O Negative has a fair amount of these, the best known of them being "Unsuccessfully Coping with the Natural Beauty of Infidelity".
* Type O Negative)" indicates that the singer is drowning his sorrows with red wine.
* Type O Negative It got to the point where he wrote a Type O Negative song titled "I Like Goils" as a response to all of his male admirers.
* Type O Negative of this is the fact that their keyboard player, Josh Silver is Jewish.
* Type O Negative songs on one end, to "White Slavery" and "Everything Dies" on the other. And those are just some of the more extreme examples.
* Type O Negative's Peter Steele employed this in many songs, due to his naturally deep voice. In songs such as Nettie, it really contributes to the atmosphere.
* Type O Negative's "Suspended in Dusk" is about a vampire who has been dealing with being unable to be out in daylight or feel "the comfort of a grave" as well as seeing his "loves grow old and wither" over the past 400 years.
* Type O Negative's "Suspended In Dusk". Sure, he's an immortal vampire with who knows what kind of powers, but he can't keep love interests as they all end up succumbing to old age while he lives past their expiration dates.
* Type O Negative this trope. The fact that he was 6'8 and built like a tank definitely made it even more intimidating.
* Type one space pirates include Eldar Corsairs who raid the lesser races' shipping and settlements to survive, Dark Eldar who raid for captives and playthings (or more specifically,
* Typeset in the Future: Sans-serif fonts like Eurostile are used for a futuristic feel.
* types of laxative. Most laxatives don't actually make you have to go; they loosen

the stool and/or the bowel muscles, usually by adding water or other matter to the stool or by causing a chemical reaction of some sort, all with intent to make the stool easier to pass. Stimulant laxatives, the kind that would actually induce the sort of reaction Hollywood depicts, are of course dangerous to use as described above.
* Type the word "awesome" while the player is in focus and it will start to flash.
* Type V: "Figure 8" or similar — The planet orbits one sun, then the other, in a regular way. If the suns of Type I are too far from each other, it may also become this.
* Type VI: "Chaotic Orbit" — A planet in chaotic orbit might exist, but wouldn't be able to support life. Also, the chaotic orbit would eventually throw the planet into one of the suns, or out of the system.
* Typewriter Eating: With typewriters having become near-unheard of, few sane people would try using them for gag fodder.
* Typhoid Mary phases. Avoiding an involuntary version of such a scenario with Covid-19 is the reason many countries put social distancing measures in place.
* Typhoid Mary: Someone spreads a disease but doesn't have it themselves.
* Typhoid Mary was a cook who carried Typhoid, but showed no symptoms of it. She's said to have spread typhoid to several households, and is known to have killed at least 3 people.
* Typhon himself is a giant so tall that his head could touch the stars. He also had one or more snake tails for legs, and hundred dragon and animal heads. He belches fire and/or lava and has wings that cause storms.
* Typhon Pact. In the final chapter, Sisko has a vision in which he shifts from talking to Kira and Kasidy to being Benny talking to Kay and Cassie from moment to moment.
* Typhonus also has a Starscream moment in the first season finale, when he responds to Able Squad taking Phaeton hostage by reminding them that everyone is expendable. It doesn't work out well for him either.
* Typhoomerangs are able to eat eels, which are poisonous to all other dragons.
* Typical Cartoon Animal Colors: An animal comes in a certain color expected by the audience, otherwise it would look weird.
* Typical Cartoon Animal Colors: Cartoon animals usually have designated colors and patterns.
* Typical Cartoon Animal Colors: In cartoons, certain creatures are always coloured a certain way.
* Typical Cartoon Animal Colors: Specific species of cartoon animals are always specific colors.
* Typical Cartoon Animal Colors: Stereotypical, but unrealistic, cartoon animal colours.
* "typical Coca Cola taste, now with zero sugar". In keeping with the gender trope, almost all of these average Joes are males.
* Typical European examples of this are often a mixture of styles from several ages. Strategy changes less than tactics (Caesar, Charlemagne, Napoleon, and Guderian had to think about the same rivers and mountains) so fortifications will be in the same place because of the same considerations. For instance many European cities are a jumble of Medieval style (high stone walls) and eighteenth century (lower and thicker with bastions sticking out to hold gun emplacements where they can catch assault troops from the flank making the famous "star" shape). American coastal forts including Fort McHenry of national anthem fame, are "pure" star forts because they were built from scratch rather than being built in the place of a castle or fortified city whose budget did not include tearing down the old walls before replacing them. Because of that American coastal forts are prized by military archeologists.
* Typical firebenders have no special defensive abilities whatsoever. The only known modern defensive firebending technique was invented by Iroh by studying waterbending for inspiration and is very situational (only useful against other firebenders), with the ancient defensive moves of the Dragon Dance having been long lost (to most). However, they are capable of laying waste on a scale the other

bending disciplines are incapable of. Iroh, Zuko, and Jeong Jeong all display some defensive ability later on though, implying that this weakness is at least partially a result of the destruction-oriented Fire Nation Culture at the time.
* Typical for animation works targeted at pre-schoolers or younger. This is because the age range is when children start to experience vivid dreams, and shows with antagonists more often than not cause nightmares to the target audience, which greatly annoys the parents (no one likes waking up to their kid crying at 3 in the morning and having to drag themselves out of bed to console the kid).
* Typically '80s World War 3 books had a Soviet invasion, society reverting to banditry and primitive tribes and threats from rape-crazy mutants and road warriors. John Sievert's
* Typically averted in other poison-related episodes. "Untraceable" agents tend to be paralytics, used to enable other causes of death (such as one unsub who used it to frame his victims as suicides), and once the team knows to look for them, they're easy to find.
* Typically averted when top brass shows up; the doctors (aside from Frank Burns) don't care what generals think of them (and usually end up impressing them to no end).
* Typically averted with actual dragons: if the players meet an evil dragon it is usually the
* Typically characters will stick to one blaster at a time, though some will carry more than one around. Wedge is like this, but in
* Typically domestic gas poisoning causes drowsiness. When dealing with it, try as hard as you can to not fall asleep, as you will inevitably die. Same thing with freezing, carbon monoxide poisoning, high-altitude hypoxia, and really a lot of life-or-death situations dealing with hazardous environment. Though it's not the sleep that kills you, it's the environment finishes you off once you stop resisting it and searching for a way to safety.
* Typically, Dream only uses the various kinds of traps and trickery once. On the one hand, it's definitely more fun to see newer ways to outsmart the hunters, but on the other hand it's quite clear that some tricks just don't work twice.
* Typically, each member or sub-group will come from cultures or societies which have, up until now, had little or nothing to do with one another. Bonus points if they are ignorant of, or indifferent to, the rise of the
* Typically Feminine Interests, nurturing professions such as child-care, teaching, and nursing, or things which are considered "emotional" pursuits, such as poetry and certain types of music. Keep in mind that "acceptable interests" for genders have changed over time, and can be variable depending on the time period.
* Typically, ghosts are so terrifying that they cause people who look at them to suffer
* Typically he shifts into normal Earth organisms, but he's turned into normal animals of unusual size (like a man-sized spider or a room-sized octopus), alien creatures (both in the
* Typically, if Batman falls into any pool of water, he'll just grapple gun right back to a safe platform. In
* Typically Imp was shown when he went spying on the Rebels, retaining his blue coloring so the audience could keep track of him. In two notable episodes, "A Loss For Words" and "The Mines of Mondor", he's only revealed AFTER the Rebels have had an important conversation with no previous warning to the audience. Helped by the fact he had shed his natural coloring to assume his disguise.
* Typically in Source engine games, the "kill" console input causes the player to die and
* typically keeps count of the bodies it wracks up before anything else. However, either can be a hero, villain, or somewhere in between.
* Typically met with the other fans' counter-chant of "(TEAM) SUCKS!"
* Typically, one can friendly fire your fellow marines and still complete the level even if they turn on you and try to kill you.
* Typically on Google Play Music, you get the same selection of audio ads, almost always

* Typically, only a particular witch or warlock could undo any charm they had personally cast.
* Typically played straight with Sarah and Casey, who are often left confused by the antics and comments of their more genre-savvy partners. Sarah in particular suffers from this. Casey, at least, recognizes that you should never say things like "
* Typically pops up when one of the more dark and brooding characters (or
* Typically Space Marines have very little hair of any kind, due to either their trans-human physiology stopping it from growing or from their spartan military lifestyles requiring it out of practicality. Then there are the Space Wolves Chapter - bombastic, feral and highly renowned as being amongst the best Space Marines in the Imperium - who prefer viking-like manes and moustaches that grow long enough to reach their chests, and are braided and decorated in great detail.
* Typically speaking for Hollywood movies and TV production in general, anytime you see a time bomb count down to zero, the explosion will follow
* Typically the enemy mooks burst into the heroes base and attack the
* typically use first names), his classmates, teachers and Ichigo's other friends call him "Chad", when in the original, they had called him "Sado" — only his grandfather calls him Yasutora.
* Typically, when Android 18 uses her Accel Dance super, Android 17 joins her. If she is on the same team as Krillin, however, her husband will join her instead.
* Typical Strange has a few: Penelope to Oscar, Oscar to Harley, and Wade to Penelope, Abigail, and Greta. Then there were the hillbillies who wanted to marry TK and Abigail.
* Typing in "askew" will give you a results page that is just slightly tilted.
* Typing in My Hovercraft is Full of Eels, and translating it 35 times, is "Helicopters in Anguilla."
* Typing of the Dead actually integrates the content warning into the game, by making it one of the paragraphs the player has to type during the boss fight with Strength.
* Typing out a file path for a computer? Hope you can remember to use forward slash ('/') on Unix-like systems and back slash ('\') on Windows or DOS. Luckily some more modern Windows shells will accept forward slashes too; however, Unix-like systems can't do the reverse for the back slash as the back slash has a previously defined function in Unix shells.
* Typographical Acknowledgment in any written work of theirs. Naturally, it is written by a teenager who overuses Purple Prose in any written work of his.
* Tyra Banks is so bad that even most positive reviews agree that it needed additional editing before being released. However, the parts that aren't horrible and confused are just... dull. The book is a mix of so-bad-they're-good parts and mediocre, forgettable parts.
* Tyrael's first Heroic can create a sanctified ground that makes all allies invulnerable while they remain inside.
* Tyra Miraborg became this posthumously for the Clans as a whole. During the initial invasion of the Inner Sphere, she was a pilot for the Free Rasalhague Republic who fought to defend her home. While trying to evacuate the Elected Prince of the Republic, she and her squad accidentally stumbled across the Clans' flagship, the
* Tyra Miraborg survives the attack reasonably well, though with damage to the bridge — what stops the Clans is the death of their war-leader and the need to convene on their distant common homeworld to elect another.
* Tyr Anasazi. Tyr is a Nietzschean, a member of a genetically modified
* Tyranid arsenal causes this. Flesh-eating acids, necrotic viruses, tunelling worms fired like bullets, sprays of worms that slowly devour your nervous system, shards of poisoned crystal, seeds that explode into hardened vines the moment they touch blood, you name it. Possibly the most merciful death you can expect when fighting them is being stomped flat by a Carnifex.
* Tyranid creatures have Lash Whips that, like most other Tyranid weapons, are in fact separate organisms that can wrap themselves around enemies in combat.

* Tyranid don't actually have a functioning digestive system, as they're bio-engineered killing machines and such a thing would take space and energy away from muscles, reinforced endo- and exoskeletons, weapon-biomorphs, etc. If they aren't killed by the enemy first, they will eventually starve to death. Many of them still have instinctive behaviour to feed, though, as it makes them attack the enemy even when not under control of the synapse creatures. The Ripper swarms are the most obvious example, as their whole purpose is to eat any biomass they come across in order to transport it to the reclamation pools to be digested and fed to the Tyranid hive ships.
* Tyranid Genestealers implant genetic material in victims that causes them to form a cult-like devotion to the Genestealer and a drive to mate. Each generation spawned by the cult members will look less and less like a Genestealer until the fifth or sixth generation, which exactly resembles the host species. The next generation will then be "purestrain" Genestealers, and the cycle will start over.
* Tyranid Harridans are a biological version, carrying large numbers of smaller gargoyles over long distances.
* Tyranid Harridans, each of which is an army on its own and can carry another two, even without the Mechanicum's fairly powerful vehicle buffs.
* Tyranid Hive Fleet Jormungandr employ a unique method of planetary invasion, seeding asteroids with tunnelling and vanguard bioforms and then launching them at a prey world. Those asteroids that make it through the world's orbital defence network spread Tyranid creatures across the planet that, which then go into hiding until the majority of the Hive Fleet makes its assault, striking the prey from an unexpected quarter.
* Tyranid hive ships can also be quite stealthy, due to not using engines, instead psychically manipulating the gravity well of their last meal's sun to catapult them towards the next one, though they can use gas jets and/or bioplasma-based maneuvering thrusters for course corrections. Tyranids can also survive being frozen solid, which has led particularly canny hive fleets to freeze vanguard craft using cryogenic gasses before catapulting them, making them invisible to thermal scans until they get close enough to a sun to thaw out, by which point it's already too late.
* Tyranid Mawlocs can enter play on top of units already on the tabletop, symbolizing them burrowing underground and eating whatever poor sod happens to be standing where it exits.
* Tyranid Race Hive Guard are so accurate that they can attack models they can't hit or even
* Tyranids, accustomed to strategic planning across a flat-ish galaxy, is perplexed when Tyranid swarms start popping up deep "behind" their defensive lines, rather than approaching from the edge of the galaxy like the others. Then it dawns on them that this new Hive Fleet is making a flanking action of sorts and attacking "upward" from "beneath" the galaxy. To be fair, the humans haven't had to deal with extra-galactic threats until this point.
* Tyranids also cause a "shadow" in the warp which essentially cuts off psykers from the warp. You know there's a big tyranid fleet coming, but you can't tell which system it's actually heading for. And you can't call for help.
* Tyranids are really just one big body. If even one vessel manages to survive and reaches an ill-defended planet or three, they can use the biomass to rebuild the entire fleet.
* Tyranids As the Tyranids measure it, their invasion so far has been a reconnaissance mission before the bulk of their forces arrive.
* Tyranids, because they measure their combat force in Biomass not bodies. A dead unit is just one that needs to be digested and reassembled. Hell, their frontline fighters aren't born with digestive systems because they don't need to live that long. This trope is also averted by them on the strategic level. In response to an Imperium tactic of burning planets the Tyranids are on the Tyranids have started breeding specifically to endure this. Additionally one of the Hive Fleets is attacking the galaxy from below, something that humans unused to thinking in three dimensions didn't even suspect for a long time.

* Tyranids exist to eat, breed and absorb the best characteristics of every species that they can get their claws on — only characteristics that facilitate those three imperatives, of course.
* Tyranids fleeing something even worse. And if the Hive Fleets are going out of their way to avoid a particular system, you probably don't want to visit it either.
* Tyranids have no eyes, especially in older editions. Currently the only 'Nids that retain this feature are the Hive Guard, and they still fight and even shoot reasonably well. This is justified by Hive Guards being mindless bodyguard creatures that are remote-controlled by the synapse creature they're protecting, so all sensory input is relayed to them directly from their boss.
* Tyranids in combating the menace that nearly devoured their homeworld.
* Tyranids, it will continue to exist for as long as the Tyranid race does.
* Tyranids, of all species, have a dedicated daemon-slaying force, identified as Hive Fleet Kronos. Rather than using dedicated anti-psyker weaponry to fight daemons, Hive Fleet Kronos focuses on abnormally-boosting their Shadow in the Warp effect to weaken daemons and other Warp monsters across the entire star system, and then drops Tyranid bioforms specializing in extreme long-ranged attacks. They bomb the crap out of the daemonic hordes from long range rather that fight them in melee where the daemons have the advantage, and once the warp-spawned monsters are destroyed, they consume the rest of the planet.
* Tyranids Pyrrhic Victory. The Tyranids lose both the potential bio-mass of the planet they were trying to eat as well as that of the forces spent attacking it, but at the same time the Imperium has just sacrificed one of their finite and ever-shrinking number of planets, while the Tyranids seem endless.
* Tyranids seem to fall into this pattern, with a beleagured world trying to survive until a fleet of reinforcements arrives. Problem is, the Tyranids project a "Shadow in the Warp" that disrupts interstellar communication.
* Tyranids. Their absence in the latest Tyranid codex suggests that the Hive Mind wrote them off as a failure.
* Tyranids, Tyran, in 741 M41. Subsequent studies have revealed that the Genestealers the Imperium had been dealing with for millennia were in fact a Tyranid vanguard organism, and some odder life-forms in the Imperium like the Catachan Devil and Kraken of Fenris are suspected of being descended from Hive Fleets that entered the galaxy in the distant past, but the "Tyranid" name has stuck.
* Tyranids use a subspace mean of FTL by a living creature that harnesses a neighboring planetary systems' gravity well.
* Tyranid swords at once and creating an impenetrable wall of whirling blades to anything that tries to engage it in melee.
* Tyranid weapons are all organic parts of the wielder's body, but luckily
* Tyrannohamsterus Rex: An absolutely gargantuan giant space hamster, 25ft tall and 75 tons... but no more aggressive than any normal hamster, so the most danger it traditionally causes is accidentally stepping on somebody or running them over. Unfortunately, it's a tremendous coward and flies into a blind panic when startled by, say, magic, fire, bright lights and loud noises.
* Tyrannomon, fitting with the source material, can also spit fireballs and breathe fire.
* Tyrannomon's exposed underbelly while Monster Bill and Monster Martha restrain it, but Tyrannomon manages to grab him.
* Tyrannopede, which is way stronger than Vaxasaurians like Humungousaur, too heavy for Humungousaur to lift for very long, and spins webs that Humungousaur can't break.
* Tyrannosaur Canyon a character hides from a stalker in a dark vault, reasoning that a) it'll afford an opportunity to see the stalker through the window without being seen, b) the vault's security will prevent the stalker from following, and c) even if the stalker enters, the prey will be able to use superior knowledge of the surroundings to his advantage. He's only right on the first count.
* Tyrannosaur Canyon believes himself to be one, but his machinations are relatively simple and not particularly ambitious.

* Tyrannosaur Canyon made upon his multi-million dollar inheritance was to buy a classically restored 1957 Chevy pickup. It's considered his signature around town.
* Tyrannosaur Canyon to deliver a dead man's treasure map to his estranged daughter. Instead, the deliveryman spends the whole story tracking down the treasure himself and trying to keep the map out of the wrong hands. The estranged daughter is addressed in the final few pages, outside the plot entirely.
* Tyrannosaurus. As it gets knocked out, it clamps down on its tongue unconsciously, causing severe bleeding from biting itself with its huge teeth.
* Tyrannosaurus chasing them as soon as they were out of sight and gone back to its food.
* Tyrannosaurus has horns that are shaped like those of a bull instead of stubby horns like other carnosaurs.
* Tyrannosaurus rex and other large dinosaurs were perfectly capable of getting upright again should they have fallen down, most likely by shifting their centre of gravity to get back on their feet similarly to how resting birds stand upright.
* Tyrannosaurus rex and the cast of kids he is hanging with change every season...
* Tyrannosaurus rex, and then a sequence of all the dinosaurs dying out in an arid desert. Not quite horror movie imagery, but still a lot more intense than most kids are used to, and at the time, it was considered to have some of the most spectacular and lifelike dinosaurs ever put on screen.
* Tyrannosaurus rex(!), as the Twelfth Doctor was able to understand one almost immediately after his regeneration.
* Tyrannosaurus rex don't appear on screen until about two-thirds of the way through the same films.
* Tyrannosaurus rexes, frequently use their laser swords during major battles.
* Tyrannosaurus rex) gets shot multiple times with tranqs but it takes her over an hour to feel it. In fact, she nearly eats the kids while everyone's wondering if she was even hit.
* Tyrannosaurus rex. It's exactly as epic as it sounds, and the triumphant music that plays during the scene makes it even more awesome.
* Tyrannosaurus rex of what's going to happen when he gets too big to subsist on bugs anymore... Though this will probably never be explored because they never age the characters.
* Tyrannosaurus rex should be used. Krootoxen are used similarly, but despite the name look more like flatbeaked gorillas that can punch through tanks.
* Tyrannosaurus rex, who Mike names "Moriarty", is first seen with eyes that seem to glow red, though Mike thinks it's a trick of the sunset or a reflection of the blood at the dinosaur's feet.
* Tyrannosaurus rex with his limbs just being broken instead of gone, not that them being gone would be any more troublesome.
* Tyrannosaurus rex with Marshall on top, though they disassemble quickly when Ryder called them.
* Tyrannosaurus to make them look scarier. It was later definitively established that their teeth were fully covered by lips. After all, they were terrestrial animals; they couldn't hydrate like a crocodile.
* Tyranny allows for an all-female team with Verse, Sirin, Eb and/or Kills-in-Shadow.
* Tyranny, and are fighting in the hopes of inspiring others in the Tiers to rise up.
* Tyranny are the elite mooks of the Scarlet Chorus and are individually some of the hardest enemies in the game if you get on the Chorus' bad side.
* Tyranny. By the end of the first act, it escalates all the way to open warfare, as the Edict did not prove enough to force them together.
* Tyranny devastated to make an example for others thinking of defiance. In more local terms, The Disfavoured are big fans of this trope for those who defy them and Disfavoured territory commonly feature crucified rebels, bandits and oathbreakers by the road.
* Tyranny, follow the Fatebinder loyally as long as they continue to demonstrate bloody merit.

* Tyranny had been announced. The fact that the release date was announced when the elections' outcome could not be predicted with any certainty may have been a statement in itself.
* Tyranny has multiple characters who have willingly embraced Kyros and collaborated with them:
* Tyranny he administers "justice" for, he probably qualifies as malevolent.
* Tyranny is competent enough for you and decide to strike it out solo.
* Tyranny. It is heavy and inferior to bronze (steel has not yet been invented), but cheap and so easily mass-produced that Kyros' legions can simply overrun any resistance.
* Tyranny, Kyros the overlord runs an empire with Type A restrictions on magic. Like many other aspects of life under Kyros' rule, magic is regulated. Every mage must be a member of one of the officially recognized mage guilds. Rogue mages are not tolerated. That said, Kyros' Law includes the "Magician's Folly" clause which essentially grants sanctioned mages legal protection if their spellcasting causes damage to life or property as long as they worked their magic for the glory of Kyros. It's up to Fatebinders such as the player character to determine if said sanctioned mages did indeed work for the glory of Kyros. Kyros also bans forbidden knowledge (and they alone determine what is forbidden), magical or otherwise. The Sages of the Vellum Citadel tried to hoard forbidden knowledge, and Kyros responded by reducing the Citadel and the surrounding region into a blasted hellscape with the Edict of Fire.
* Tyranny of Dragons to weaken her before she arrives, and may the gods help them if they don't: at her full power, Tiamat is one of the nastiest creatures in 5E.
* Tyranny of Dragons with superhuman levels of strength and durability, so his squishiness is relative.
* Tyranny on the way in and quickly graduate into the Chorus' higher echelons.
* Tyranny recruit their ranks from the survivors of their onslaught by pitting them against each other, usually by pairing up friends and family. If they can kill the other guy first, they're in. If not, then they're dead and that's that.
* Tyranny, restricting membership to only Northerners, while the generally cruel, bloodthirsty horde of the Scarlet Chorus allows anyone in), but not Kyros themselves.
* Tyranny, specifically by demonizing both the genocidal Disfavored and the raider-horde Scarlet Chorus. You can then exploit them to become a small dictator, lead a true rebellion against Kyros, or bend the knee and permanently solidify the continent's unification under Kyros.
* Tyranny: The Disfavoured are renown in-universe for their use of phalanx warfare, presenting an unbreakable shield wall that tires out the enemy through sheer grinding attrition. In-game they fight much the same way as all other factions by attacking head-on individually.
* Tyranny, the Fatebinder can explain to Lantry after sampling his Cerulean ink that being an agent of Tunon means that, unless the Archon himself contradicts them, their word is law. The Fatebinder gets several moments when they can enforce —or not— Kyros' laws in a way that benefits them.
* Tyranny, the player character can try Lantry's inks, which can be consumed for various drug-like effects. This leads to a lot of interesting lore, insight, and potentially prophetic visions... and quite a bit of amusement.
* Tyranny, The Voices of Nerat, have their own personal gang known as the Crimson Spears, whose members consist of the Scarlet Chorus' finest fighters.
* Tyranny, though, this really is the case if the player goes Rebellion:
* Tyranny until they reach the age of sixteen. Of course, since the Chorus either conscripted or killed their hometown, parents and support network, orphans created by the Chorus tend to become involuntary camp followers for the Chorus anyway, and by the time they're sixteen they've usually seen enough crap living with the Chorus that they're either a perfect fit for Chorus volunteers or ready to join the frontlines to end it all.
* Tyranny, who will at least give everyone a violent fighting chance to surrender and join the gangs.

* Tyranny, you have one of these on your hands between the Disfavored (Empire-aligned, honorful warriors, elite army), the Scarlet Chorus (also Empire-aligned, army of thieves and whores, the horde) and the Rebellion, which is split into even more sub-faction that might or might not get along. Made even more complicated by a number of neutral groups that just want to be left alone, such as the beast people tribes, those that are mostly in it for the money (the Bronze Brotherhood), and the Court of Fatebinders, which is the judicial part of the Empire and the faction the player belongs to initially. The player then can ally with either of the main factions, support them while trying to stay neutral in their role of fatebinder, or betray everyone and start their own anarchist faction.
* Tyrant. Any of them could have achieved the same effect with far fewer sacrifices necessary.
* Tyrant. Barry hands the gun back to Jamal and quickly walks away before his panic starts to show.
* "Tyrant Celestia" fanon considers pony statues in Celestia's royal garden to possibly be this.
* Tyrant: Emma and Jenna get their wallets stolen while at a café in "Gone Fishing" and the owner calls the cops on them, thinking they were trying to dine and dash. Emma tries to stop being arrested by telling them she is the president's niece.
* "Tyrantforming" is the first stage of devouring a planet by the Tyranids - the spores dropped onto the surface merge with local plantlife, turning it into
* Tyrant from birth through death, but only managed to go from birth to slightly later.
* Tyrant: In the second season there's an islamic insurgency in Abbudin after a gas attack on the rebels leads them to team up with more radical elements. This becomes an all-out civil war between the Al-Fayeed dictatorship, the Army of the Caliphate, and local militia the Red Hand.
* Tyrant is murdered by the Caliphate, forgetting any previous idealistic desire for democracy in Abuddin or concern toward its people.
* Tyrant Kings, and Protheans (called Martians), they're generally creeped out by the similarities.
* Tyrant Kings: Humans and dinosaurs are noted as being the only sapient species that can safely consume both dextro and levo amino-based foods, whereas every other race will at best gain no nutrition from one and at worst have a fatal allergic reaction.
* Tyrantly Ever After for Artina, who was previously a human nun 'rewarded' for her piety by becoming an angel, and is naturally horrified to learn she can no longer earn her 'eternal rest'.
* Tyrant, Molly, having been led to believe that her husband Bassam Al-Fayeed has been executed, pursues a short-lived affair with Sammy's lawyer.
* "Tyrant" originally meant an unelected ruler, typically over a city-state, and was a neutral term. Granted, most tyrants
* Tyrant Overlord Baal, as he usually does within the series, took this trope
* Tyrant Overlord Baal in D2 goes above and beyond the call of duty as a boss. It's not just the boss fight itself that's a marathon. It's preparing for the fight that is an Iron Triathalon itself. Getting the levels and stats of your characters, weapons, and gear high enough to fight him and have a chance at winning can take dozens upon dozens upon dozens of hours of gameplay. Strap yourself in, tighten up that sphincter, and notify your loved ones that you might be unavailable for a while, as you can end up dedicating days or even weeks on end to just preparing for this boss fight.
* Tyrants of the Nine Hells protective of their offspring, raising them in hidden and well-guarded enclaves in parts of Hell that are the most hostile to beings other than devils.
* Tyrant Takes the Helm Lorth Kordigän because the latter's men killed his parents.
* Tyrant Takes the Helm. Professor Umbridge forces him to write lines with a magical quill that carves what he wrote into the back of his hand. This left the

lines permanently scarred into his hand, and they tingle every time he thinks of Umbridge. Whether this is psychological, or if it's just another perk of the quill is unknown.
* Tyrant Takes the Helm situation, as in "The Birdbot of Ice-Catraz" when Fry lashes out against his behavior as "captain."
* Tyr, but his people are generally douche bags and overfixated on biological procreation, so this is no surprise.
* Tyree's dramatics are still arguably no match for the original Super Bowl hero-off-the-bench - Green Bay's Max McGee, who was so sure he wouldn't be playing in Super Bowl I that he spent the previous night out on the town and didn't even bring his helmet to the game, came on as an injury replacement, made a highlight-reel 37-yard catch for the first touchdown of the game and finished with seven catches for 138 yards.
* Tyreese, whom many speculated would actually become the main character before
* Tyrell crashes a borrowed soarwing in the Tanglewood out of his own overconfidence and stupidity. He happens upon a Psynergy Vortex, gets drained, and remains unconscious until the party shows up to save him.
* Tyrell from what little characterisation he gets in his one scene in the original is a paranoid grunt who threatens to kill Carlos in the hospital. In the remake he’s more likeable being
* Tyrese's song "How You Gonna Act Like That," he alludes to this being a regular ending to him and his woman's conversations.
* "Tyre". Sure, it's the legitimate British and Commonwealth (apart from Canada) spelling of the word (for "the rubber thing you put on a wheel" — as distinct from "to weary", which remains
* Tyrian becomes a sobbing wreck after Salem expresses her disappointment in him for failing his mission, which attracts a nearby Beowolf. Tyrian then turns his attention on it, carving it up while still sobbing like crazy, which then devolves into mad laughter
* Tyrian Callows is one of Salem's inner cohort of villains, initially tasked with hunting for the Spring Maiden but transferred to tracking down and kidnapping Ruby. He possesses the speed and strength required to be able to fight Qrow to a stalemate. His name refers to a shade of purple and when he and Qrow shatter each other's Aura, his Aura is purple-toned. The poison contained within his scorpion tail is also purple. When Ruby blows it off it bleeds a purple substance that burns through stone. When his poison infects Qrow, it slowly turns Qrow's blood purple.
* Tyrian correctly states that Mercury is just an abuse victim who is staying with Salem's team because he's terrified of leaving the cycle of pain and violence he grew up with. He then points out to both of them that leaving Salem is no longer their choice, so they better find a place for themselves or he'll be the one ordered to kill them... and he'll enjoy that.
* Tyrian features recharging energy shields which draw power from the ships generator to recharge; choosing a weak generator can result in a slow recharge and your weapons cutting out.
* Tyrian has the 'Revenge of Zinglon' bonus game that you can access if you beat the main game with a certain route. The multi-stage boss there isn't all that much tougher than many of the other bosses in the game, but what makes it ridiculously hard is that all your ship's weapons and powerups are removed and you are stuck with a basic railgun that takes a long time to upgrade, and to top it all off, you can't use cheats.
* Tyrian, includes Episode 5 which wraps up the story of the game. However, the episode is very short, its new graphics are in a much different style than the rest of the game, its difficulty is bizarrely unbalanced (the first few levels feel like you're back on Episode I, and all the bosses have extremely little health), and the final level involves a rather easy battle against... an entire fleet of fruit-based spaceships that shoot food at you, which is way too silly even for a game that doesn't take itself all that seriously.
* Tyrian is an insane serial killer with an insatiable lust for chaos and bloodshed. However, he's also extremely perceptive. When Emerald and Mercury argue

about whether it's right for them to be working with Salem without Cinder, Mercury declares that this is the place where he feels like he belongs.
* Tyrian is in full effect here you sometimes need to blast your way though rather than just go around them, which can be tricky when you have weak weapons and have a chunk of rock ten times your size heading your way.
* Tyrian lampshades this trope. In the words of Transon Lohk, "He's going to (chuckle) save the universe again. And you know what he's going to do after that? He's going to save the universe again, and again, and again! He'll do anything I want him to to help the universe, and I won't have to lift a finger to do anything except send him little messages like... oops."
* Tyrian; one of the bosses has an effect that reverses the screen vertically (and the controls!), and at several other times the screen is temporarily coloured strangely, which generally makes it harder to spot bonuses/enemies by reducing the contrast.
* Tyrian, originally published in 1995, was re-released as freeware in 2004 as a gift to everyone else. It can also be found on GOG as a freeware product.
* Tyriant uses explicitly Zam-type spells and hates light with undying passion.
* Tyrian uses the same justification: The ship's computer simulates sounds from outside to help the pilot keep paying attention and as a navigation aid.
* Tyrian Vykromod appears as a giant nose. If you beat him, the game again states that everything is over, but if you found a certain secret earlier in the game, you now have to fight a minigame-like boss on the planet Soh Jin, which, if you win, is revealed to be a creation of Zinglon himself, who you then fight in an offscreen battle. In Episode V, it's revealed that Zinglon was behind Microsol and Vykromod in the first place.
* Tyria Sarkin of Wraith Squadron lampshaded this trope after being flirted with by a squadronmate, asking if this was going to be one of "those" squadrons where there was one woman pilot that all the men were chasing.
* Tyrin is temporarily Councilor after the asari Councilor gave him the title, and later was elected as Councilor after the salarian Councilor's death. Before this, he consistently manipulates the Councilors in order to further his own gains. He'd been conspiring to push himself into the upper political echelon in order to "improve" the galaxy as he saw fit for approximately 30 years. Telia and Roraan (the Councilors he served) were just collateral damage when he finally could start making ripples in the galaxy.
* Tyrion, a hideously deformed dwarf, is Ugly and Uncanny, and becomes Ambiguously Monstrous once he gets his nose cut off. Sandor Clegane, who is also Ugly and Uncanny, has burns covering the entire half of his face (and the other half isn't that much of a looker, either).
* Tyrion also faces trial for Joffrey's murder after being caught in the wrong place at the wrong time during a wedding in "The Lion and the Rose".
* Tyrion and Bronn burst in to confront Pycelle at his most vulnerable in "What Is Dead May Never Die."
* Tyrion and Shae conceal their romance after his father Lord Tywin Lannister commands Tyrion not to take her to court and vows to hang the next whore he finds in Tyrion's bed.
* Tyrion and Shae. Deconstructed when Shae points out the complications of a lord and a prostitute having a long-term relationship. When Tyrion is forced to marry a woman closer to his social status, Shae becomes increasingly jealous. After Tyrion finally decides to send her away, she betrays him at his trial.
* Tyrion believes that having too much pride is foolish and it's better to wear your flaws openly. Despite this, it does stick him that his father doesn't acknowledge any of his skills and contributions, even denying him the seat of the ancestral house
* Tyrion, both in the political game and in a battle, as he showed off during the Battle of Blackwater. Indeed, so brilliant was his defense, that despite limited resources, a small number of troops and facing backstabbing from his own side, he successfully held the City's defenses and kept Stannis from breaching the gate long enough for his father and the Tyrells to relieve them.

* Tyrion calls Joffrey a bastard in front of everyone in "The Laws of Gods and Men", though his entire speech is so venomous it's doubtful anyone read too much into it.
* Tyrion can't resist making aside, snarky comments and after-action reviews about inept assassinations and transparent frame-ups:
* Tyrion comes to the conclusion that it's Littlefinger's limitless ambition that makes him one of the most dangerous men in the Royal Court, whilst everyone else thinks of him as pretty harmless. Varys makes a similar statement in the TV series.
* Tyrion doesn't hate his adversaries and isn't above recognizing and praising their virtues, which allows him to analytically assess them, unlike the more dismissive Lord Tywin. Despite his tense interactions with the Starks, Tyrion acknowledges Robb's good qualities. Despite suffering a
* Tyrion doesn't hesitate to speak his mind when he thinks the situation calls for it. This often gains him respect for his earnestness but also lands him in problems from time to time when his abrupt input is not appreciated. Daenerys, however, appreciates his honesty, which results in her initially taking him on as her advisor, and then ultimately, her Hand (a position in which brutal honesty is required).
* Tyrion fills a similar niche in the cast to Han Solo or Captain Jack Sparrow, as the resident charismatic anti-heroic
* Tyrion for being a dwarf. His brother Jaime loves Tyrion and Tyrion loves him but their father resents Tyrion for being a dwarf and both their father and sister resent Tyrion because Tyrion's mother died giving birth to him.
* Tyrion gets one two books later, when the readers have all pretty much forgotten about the never-quite-solved mystery of
* Tyrion had his own personal force of mountain clansmen, who had proven to be the Lannisters' most effective front-line offense and defense.
* Tyrion has a penchant for whistling when he's happy, and gets happier if this sign of his incoming presence is annoying somebody else. His reliance on alcohol also increases over time, to the degree that his reaching for a decanter of wine in virtually every scene becomes a tic.
* Tyrion has clearly snapped by the end of his trial, but his murders of Tywin and Shae cement how far he's gone from the noble anti-hero he once was. Oddly he sort of climbs back up the slope in later seasons, trying to protect his brother and sister from Daenerys's wrath (unlike his book counterpart who is openly in favor of killing everyone in King's Landing and even demands to Daenerys that he be allowed to rape his sister Cersei).
* Tyrion has to prick his fingers regularly to check for it - but at least that's better than Jon Connington, who debates whether or not he should cut off his fingers because he does
* Tyrion himself gets a moment of this when he arrives in King's Landing in
* Tyrion is accused of an attempt on Bran's life because of Littlefinger's claim that the dagger found on the assassin belonged to him. Tyrion beats the charges thanks to Bronn winning the
* Tyrion is alone aboard the Wolf's ship when he finds a helmet that belonged to Euron, who's supposed to be south of Westeros at that moment. He puts it back very carefully, the implications running through his mind that the Wolf is working for or killed Euron but told no one despite working for Daenerys, and suddenly two Norscans block the way out of the ship. Fortunately he manages to make himself known as a friend of the Wolf, and the Wolf himself returns to discipline his crew (they'd been playing dice instead of watching the ship, letting Tyrion onboard).
* Tyrion is dismayed when he discovers that the people blame him for Joffrey and Cersei's actions, which he actually tried to stop, mostly because he is a dwarf. Not only that, he is also framed for Joffrey's death, and submitted to a
* Tyrion is extremely ugly in the book and played by an actor older than the character on TV. Combine the lack of scars mentioned above with a
* Tyrion is given governance of the city of Mereen, while Dany is missing and Jorah and Daario look for her, with Varys and Grey Worm at his side.
* Tyrion is not really trained for combat but nonetheless participated in a number

of battles.
* Tyrion isn't happy over how everyone keeps making dwarf jokes, though that doesn't stop him making eunuch jokes to Varys, who just responds with an
* Tyrion is treated as evil incarnate by the populace of Westeros mostly because they believe
* Tyrion Lannister (about 40) and Sansa Stark (14) are forced to get married. Tyrion is unsettled that she is so young, and she is unhappy that she has to marry a dwarf from a family that killed her father and holds her hostage. He promises her not to force her to consummate the marriage unless she decides it's what she wants. They later start to bond, but the relationship suffers another blow when his father orchestrates the murder of her eldest brother and mother.
* Tyrion Lannister, a deformed dwarf, gets most of his nose cut off by a sword stroke. He was already unfairly hated for his deformities, however, so he thinks of the scar as a bit of a pointless overkill. Everyone assumes that his deformity and scars are proof of his evil nature, and serve to help
* Tyrion Lannister, a "little person", favors an axe in battle, a subtle gag as he otherwise has very little in common with
* Tyrion Lannister and his first wife, Tysha, whose relationship was cruelly ended by a lie. It's stated that Tyrion was baited into falling in love and marrying with a whore who was hired by his brother, Jaime, then forced to see her being gang raped. Except, as he finds out belatedly from Jaime, Tysha wasn't a whore and did genuinely love him, but was sent away because their father, Tywin, wanted to teach Tyrion a lesson. Her current whereabouts are unknown, but Tyrion is determined to find her.
* Tyrion Lannister becomes this trope in Season 7, when his strategy for Daenerys' conquest of Westeros backfires catastrophically almost immediately leading to most of her allies and forces being captured or killed — which severely strains Daenerys' trust in him (but luckily not enough to sack him). To be fair it's not entirely his fault. He had been away from Westeros for nearly two years and the intel he based his strategy off of was outdated — and none of Daenerys' Westerosi allies felt like correcting him, even as he explained his strategy right in front of them. His scheme to broke a truce with
* Tyrion Lannister caused the death of both of his parents, although of course he didn't actively try to kill his mother; his mother died while giving birth to him, and as an adult, he murdered his father Tywin. He is undoubtedly viewed as this by Cersei and apparently Jaime following his murder of Tywin. Tyrion admits as much.
* Tyrion Lannister has been scorned his entire life for being a dwarf, and does not like to be called the Imp. An early
* Tyrion Lannister invokes this deliberately by sending his 9-year-old niece Myrcella Baratheon to live with her fiancé,
* Tyrion Lannister is also adept at using this for his own purposes. Especially noticeable in his treatment of Jon Snow, who incidentally is one of the few people Tyrion calls 'friend'. One of the things he likes about
* Tyrion Lannister is first and foremost, though his antiheroic traits cause him to straddle the line of
* Tyrion Lannister is Flawed Average in this adaptation, or Imperfect Beauty according to Margaery Tyrell. Nobody on the show points out any flaw in his looks other than his dwarfism (which, however,
* Tyrion Lannister kills his father, Tywin, while the latter is on the privy. He even
* Tyrion Lannister. "My dear brother, you wound me. You know how much I love my family." Of course, while he's being entirely sarcastic when he says it, he does tend to go along with what's expected of him in the end — if not exactly in a manner the rest of his family approves of. This becomes a source of conflict for him after Sansa's
* Tyrion Lannister sadistic but it can't be said that he wasn't without a libido.
* Tyrion Lannister's One That Got Away is his first "wife". He saves her from brigands, falls in love with her, and marries her. Then his father Tywin reveals to him that she is actually a whore hired by him to teach him a lesson, has his entire

guard rape her, pays her, then sends her away. This leads Tyrion to never love another woman again, going with whores instead.
* Tyrion Lannister's reputation across Westeros for his drinking and whoring is such that the brothel in Winterfell awaits his arrival with great enthusiasm. However, he almost always treats women with great respect (his sister excluded, though that is quite another matter), and loathes to see them harmed or abused in any way. Given his disgust for people who treat weaker people badly and his personal history, this makes perfect sense.
* Tyrion Lannister (though this is mostly pre-series and early Season 1; he settles down quite a bit once he marries Sansa however, much to Shae's chagrin and once Shae dies, all notions of romance disappear - though he and Dany do exhibit chemistry later that neither act upon), an infamous whoremonger. Just look at his opening scene.
* Tyrion Lannister wants to take a crossbow with him when he dies so that he can
* Tyrion mentions his life getting saved by his squire near the end of "The Siege of King's Landing". The squire in question isn't heard of before nor after the fact.
* Tyrion notes that making honest feelings do dishonest work is one of Cersei's many gifts.
* Tyrion often needs one (or perhaps a dozen) to deal with stressful situations like his wedding.
* Tyrion of the High Elves is considered the best single warrior of his species since the time of Caledor the Conqueror, a
* Tyrion prefers to fight with an axe, probably because his stature would make using a sword extremely awkward. He uses a double-bladed axe to chop the leg off a soldier of Stannis' army during the Battle of Blackwater.
* Tyrion's efforts to convince Shae he's not interested in Sansa fall comically short in "Dark Wings, Dark Words".
* Tyrion sends an envoy with an armed escort to negotiate peace terms including the release of his brother Jaime. Hidden among the escort are several men with the skills to break Jaime out of his cell. When the escape fails, Lord Edmure has all those who participated hung from the walls of his castle, and the rest thrown into the dungeons.
* Tyrion serves as this to Jon briefly in his period of adjustment with the Night's Watch, he's also one to Podrick Payne. Tyrion also tries to educate his nephew, but Joffrey is a lost cause.
* Tyrion shares with Daenerys the real reason why Jaime killed her father, Aerys, at the same time revealing that Jaime told him the truth, which did not happen in the books. On the other hand, he declines her request to tell her why he killed his own father, which he says is a secret he might tell someday, if given enough wine.
* Tyrion snaps and kills his former lover Shay after finding she'd betrayed him with his father. She seems to be the only woman he ever loved, and almost got him executed for a murder he didn't commit. Then he kills his father, who had showered his life with emotional and verbal abusive, blaming Tyrion for killing his own mother
* Tyrion's older brother Jaime is an unusual example. While he is a definite scumbag for the first two books, when we finally see his
* Tyrion's supposed murder of Joffrey. Although Tyrion is innocent, his champion Oberyn loses, so he's sentenced to death. Instead, he escapes.
* Tyrion steps on the musician Marillion's hand, breaking his fingers, in the heat of battle.
* Tyrion subverts this twice by claiming he wishes to confess, only to launch into a
* Tyrion suggests that the dragons are more intelligent than simple beasts, and goes down to talk to them. It's not clear if they understand what Tyrion says but they don't hurt him, and Rhaegal calmly offers his neck to Tyrion after he removes Viserion's collar. They also don't hurt Missandei, as she's a friend of their mother. Drogon also proves Tyrion right. After witnessing his brother Viserion being shot down by the Night's King via a well-aimed ice spear, when Drogon takes

off and the Night's King throws a spear at him, Drogon quickly jerks to the left to avoid being hit and the lance sails harmlessly past his shoulder. Note, he did this
* Tyrion suspected the Wolf had something to do with Euron betraying Cersei, having found Euron's helmet onboard the Wolf's ship, but was convinced otherwise. After the Wolf
* Tyrion treats his meek squire Pod quite well. He attempts to be this while overseeing Meereen, with mixed results.
* Tyrol and Boomer are an enlisted/officer couple and keep their relationship secret, but Tigh catches them and informs them that the two of them are an
* Tyrol and Boomer, probably the first example in the series. He's a chief and she's an officer. Fraternization is frowned upon, so they have to keep their relationship a secret.
* Tyrol even went through an "Am I a Cylon?" existential crisis and was told by an existing Cylon that he wasn't! But after the revelation, things still fit with them being Cylons, especially as certain things assumed to be the case about them, but never outright stated, turned out to be incorrect. The series kept its word that "anyone can be a Cylon."
* Tyrol implies that the Final Five designed Cylon Model Six after the angel they saw, not vice-versa.
* Tyrone Davis, a Mississippi-born and Chicago-raised blues/soul singer, had several hits on the R&B charts, but only two major pop crossover hits: 1968's "Can I Change My Mind" and 1970's "Turn Back The Hands of Time".
* Tyrone Savage; voice acting example, but has done some live-action work and did work at the Stratford Festival)
* Tyrone's speaking voice is done by Reginald Davis Jr. (Season 1), Jordan Coleman (Seasons 2-3) and Chris Grant Jr. (Season 4), and his singing voice is done by Corwin Tuggles (Season 1), Leon Thomas III (Seasons 2-3)
* Tyrosh is utterly wiped out by the Abolitionist Alliance, with Braavos building a military outpost on the remains.
* Tyr sacrificed his dominant right hand and remained the deadliest swordsman in Norse mythology.
* Tyson Hesse came on-board for the Sonic’s redesign after the backlash to the initial trailer, one rule he gave the animators was that they were not allowed to show Sonic's bare feet.
* Tyson Kidd, but they still managed to do their talking in the ring well enough.
* Tyson Kidd: WWE lower midcard staple. Forced to retire in 2015 after being injured by Samoa Joe.
* Tysons Corner Center, a mall in Northern Virginia. This version listed names of the stores in the mall.
* Tyson": The level must be completed with every monster killed as quickly as possible with no weapons other than the fist, the chainsaw, and the pistol.
* Tytania always misremembers Fan Hyulick's name as "Fan Hyulen". He is corrected on a regular basis, but this only serves to irritate him.
* Tytania, episode 2. Up to 11:30, Idris is standing beside Salisch. The scene shifts for a moment, then comes back at 11:45 to show him sitting down while Salisch remains standing. 3 seconds later at 11:48, he's standing again.
* Tytania plays this straight for the most part. Some of the tactical formations shown on the command screens were 3 dimensional. Alas, most of the actual fleet battle scenes consisted of opposing walls of ships shooting in straight lines at each other, shared horizon et al.
* Tytania ruled space at the beginning of the series. But apparently the ruling Tytania clan wasn't as powerful as they thought.
* Tytania: The Empire of Valdana's and Tytania clan's Imperial Capital/Palace ship.
* Ty the Tasmanian Tiger) and grab an Opal Magnet, the last Opal will fly directly to you from wherever it is (unless it's in a crate).
* Ty the Tasmanian Tiger. Beating the snot out of him is very satisfying.
* Ty the Tasmanian Tiger, both of them starring obscure Australian mammals.
* Ty the Tasmanian Tiger forced to fight Ty by the cyborg implants contoling it.
* Ty the Tasmanian Tiger games, complete with several tracks, characters, and

power-ups! They're available from the title screen, too, making it even easier to bypass the main game completely and go straight into racing tiny cars forever.
* Ty the Tasmanian Tiger has an NPC spout one of these in the second game.
* Ty the Tasmanian Tiger have this build. (So does Bull the boar, but the effect is lessened by his quadrupedal stance.)
* Ty the Tasmanian Tiger, leeches are enemies that latch onto TY and slowly drain his health, which you have to jiggle the control stick to shake them off. Biting them or blowing them up with a special rang defeats them.
* Ty the Tasmanian Tiger of the series can't unlock the power of the Dreamtime and wipe out all the mammals. Incidentally, the place the talismans are returned to serves as the conveniently-located hub of the game.
* Ty the Tasmanian Tiger sequels are larger than most, but small enough that the cockpit amounts to a seat where the head should be.
* Ty the Tasmanian Tiger uses this to kidnap random people in order to build his grand army.
* Ty the Tasmanian Tiger walks around in a dinosaur suit, which according to him might have fleas.
* Ty The Tasmanian Tiger was voiced by Australian voice actor Stig Wemyss in the first game. However in the second and third game, he was voiced by Greg Ellis, a British voice actor. Shazza the Dingo was voiced by American voice actress Debi Mae West in the third game.
* Tytos Lannister is remembered as a good man who nearly ruined House Lannister.
* Tytos Lannister was this by reputation, which thus directly contributed to the rebellion of his vassals House Reyne of Castamere.
* Tytti Noorbuck likes sweets. Unfortunately, she lets her feelings override her preference (or sense) of taste, thereby turning her into a
* Tytus, Romek i A'tomek, in the issue #18 called "Tytus Artystą" ("Tytus As An Artist"), we have this unique case:
* Tytus, Romek i A'tomek, while the other is short, fat and nerdy. In every other reality Romek would be the bully who picks on A'tomek. Here not only they are very good friends but Romek has plenty of respect for A'Tomek's superior intellect and considers him the authority figure.
* Ty (who is Hod, god of cold and dark) marries Eva (Hel, goddess of the underworld). It doesn't end well either.
* Tywin and Joanna's daughter Cersei is also sleeping with her cousin Lancel (her cousin on Twyin's side, if you're curious). It becomes a plot point, thanks to how sensitive that information is—though not because he's her cousin, but because she's the king's widow, and how jealous her
* Tywin commands Cersei to marry Ser Loras. She's not amused, but this one falls through as Tywin is not there to enforce it, what with his terminal bowel problems.
* Tywin has a black leather one in Season 3 and there is a reason he's considered as the
* Tywin has fought in at least two country-wide wars and the annihilation of rebel bannermen before that:
* Tywin has one himself: his long-dead wife, almost certainly the only person on Earth he ever truly loved. She died giving birth to Tyrion, which explains an awful lot of Tywin's profound loathing for his son.
* Tywin himself, even more so than his book counterpart, if for no other reason than being portrayed by the incredibly charismatic Charles Dance. A
* Tywin is 6'3" and is usually both the tallest and most intimidating person in any room he's in, unless it's The Mountain he's talking to.
* Tywin is absolutely correct about Joffrey neither being a wise or a good king.
* Tywin is known to be one the most humorless and stoic men in Westeros and seems to be proud of his demeanor. Nevertheless, Arya gets a smile and a chuckle out of him while being a smartass prisoner.
* Tywin is never one to spare someone's feelings in his analysis of their deficiencies. Perhaps his most noteworthy example is when he tells Tommen what a terrible king his older brother Joffrey was... in front of his mother... right next to Joffrey's corpse.

* Tywin Lannister also sports a trimmed beard, thin on the sides and a bit thicker on the goatee.
* Tywin Lannister, and his time as Hand of the King is widely regarded as peaceful and prosperous. But when Aerys named Tywin's eldest son and heir to the Kingsguard, making him ineligible to inherit Casterly Rock, Tywin resigned, and eventually turned on Aerys. His forces sacked King's Landing, while Cersei ended up married to Robert Baratheon. Tywin's driving ambition, as stated in both the books and TV series, is "legacy"— he speaks of establishing a dynasty that lasts a thousand years and does some very ruthless things to accomplish his goals.
* Tywin Lannister and Walder Frey don't seem to have any sincere affection for their offspring, dealing out backhanded compliments and outright belittlement at every opportunity, but both of them will respond with utter ruthlessness to any outsider that dares slight a member of their families.
* Tywin Lannister cottons on to the fact that Arya Stark is a highborn Northern girl posing as a lowborn Southern girl (although presumably not to her exact identity, which would have been of great interest to him) and corrects her pronunciation of "my lord" (commoners pronounce it "m'lord"), telling her that if she's going to lie to him, she ought to do it
* Tywin Lannister doesn't care if you're a man or a woman; he cares whether or not you are
* Tywin Lannister favours black leather even though his family colours are red and gold. His daughter, Cersei, adopts his style of dress when
* Tywin Lannister fills one of his flanks with irregular troops, planning on
* Tywin Lannister has spent pretty much all of Tyrion's life trying to convey how much of a useless disappointment he (and society at large) finds his son to be. And, Tyrion has internalized a lot of the less-than-subtle digs (from assigning him to dangerous, demeaning or both positions to
* Tywin Lannister "helped" win Robert's Rebellion when his army sacked the capital instead of defending it for House Targaryen.
* Tywin Lannister is a grim, cold man responsible for widespread death and destruction throughout the series. In spite of that though, he's still loved by both
* Tywin Lannister is also a very hard-working and able administrator which is revealed as a character trait in his very first scene when he has a conversation with Jaime while skinning a deer, work he could easily have left to servants.
* Tywin Lannister is a very cautious man who builds his power by means of a
* Tywin Lannister is generally not that vulgar in public, but there are exceptions:
* Tywin Lannister is hardened by his wife Joanna's death to the extent that he never smiles again and treats Tyrion (whose birth caused Joanna's death) like absolute shit.
* Tywin Lannister is introduced in "You Win Or You Die" butchering a stag (the sigil of House Baratheon) while his army assembles for what will become the War of the Five Kings. A
* Tywin Lannister is the most powerful and rich lord in Westeros but in reality, he's a man who still resents his father's past failings and remains broken by the death of his wife (and resents the son who whose birth caused her death).
* Tywin Lannister is the Mountain's "employer" and unleashes him on the peasantry of those whom he feels have acted against Lannister interests.
* Tywin Lannister. It doesn't show up very often but it comes up in his negotiations with Lady Olenna, "The uncertainty makes you uncomfortable".
* Tywin Lannister loathes his son Tyrion because Tywin's wife Joanna (who was pretty much Tywin's
* Tywin Lannister married his cousin Joanna for love. Hypocritically, he wants his own children to marry for political advantage. Tywin also
* Tywin Lannister occasionally says something that might indicate that he's not as bad as people think but he usually tells them in no uncertain terms his entirely pragmatic reasons for saying it if he's questioned about it.
* Tywin Lannister, probably the most powerful (and certainly the richest) person

in Westeros, backs the Baratheons of King's Landing to the hilt, allowing them to pretty much do whatever they want, no matter the obstacles. Unfortunately, this has also extended to the borrowing of money, leading to the Baratheons of King's Landing acquiring astronomical amounts of debt which they are largely unable to service.
* Tywin Lannister's blatant playing favorites with his children Jaime, Cersei and Tyrion is one of many things that make him a bad parent. Most glaringly, he favors his oldest son Jaime, who's tall, handsome, a ferocious knight and generally regarded as the golden son. His second son Tyrion is a malformed dwarf whose mother (Tywin's beloved wife) died while giving birth to him. Since Jaime and Cersei are prevented from inheriting (Jaime is a member of the Kingsguard, who can't hold lands or father children, while Cersei
* Tywin Lannister that his children and grandson's actions have put the family in by the end of the first book, he starts downing wine in large capacities. Tyrion is seriously freaked out by seeing this.
* Tywin Lannister. While ruthless in his war against the Starks and being an all-around jerk, he is known to be a wise ruler who led Westeros into many years of prosperity as the Hand of the King. It helps that this reputation appears to be entirely accurate. He's a terrible father and a vicious enemy, but he
* Tywin left near dead. It marks the beginning of the end for Lannister cause, right until their utter defeat at the Second Battle for King's Landing.
* Tywin's most defining trait. While this trope is precisely what drove Tywin to make House Lannister the most powerful one in Westeros, it also drove him to make it the most hated as well.
* Tywin's son Tyrion is a subversion: he is perceived as this by the common people of King's Landing, and is blamed for the crimes and mistakes of King Joffrey and Queen Cersei, when in fact he is doing everything in his power to rule justly and well. This has been all too common in
* Tywin, very much so, both as a military commander and a diplomat. What makes this combination deadly is that when Robb Stark outmatches him as a battlefield commander, Tywin can fall back on his secondary skills while Robb is still a raw youth in the case of politics and diplomacy.
* Tywin views Robb as a 'Rebellion in the North' as opposed to 'The King in the North'.
* Tywin would like to be seen this way, as part of his general desire to be viewed as above all base desires. He was married and has children; but was a widower for almost thirty years and never showed the slightest inclination of ever wanting to remarry or even have a lover. This turned out to be far from true, but he was so discreet about it that his reputation as a Celibate "Hero" withstood a dead prostitute being found in his bed.
* Tyzonn leaves Earth and the Operation Overdrive team to defend his own planet from Ooze’s attack.
* Tzar: The Burden Of The Crown has European Footman, a basic military unit available as soon as you get Barracks up. For merely 50 food it offers 65 hp (15 more than Arab Footman and 20 more than Ronin, Asians' counterpart). 6 attack (same as AF and one less as Ronin) and 3 defense (compared to 1 and none respectively). It has no weaknesses and deals bonus damage to Archers, Pikemen/Spearmen and Jihad Warriors. It should go without saying that they remain a backbone of any sensible European army through the game.
* TZAR: The Burden of the Crown or other left-click interface games will have trouble - especially when the only mention of the right-click interface is to state you don't understand how RTS games work. In other news, it listed every single unit, but didn't mention strengths and weaknesses of a unit until a small passage at the end (which was still an incomplete picture.)
* TZDF by Faderhead is about the Industrial music scene: "This is a song about the German clubs", "This is a song for all the Rivetheads"
* Tzeentch actually invokes the trope on himself and his forces. If his forces were ever to definitively win, then he would have no one to plot against, which would range from being boring for him to him literally wiping himself from

existence. So, if his forces ever started to win, he would be just as likely to be the source of their downfall as his enemies.
* Tzeentch firmly occupies the Lovecraftian level. While Nurgle and Khorne look respectively conventionally disgusting and badass, Tzeentch's form is said to be incomprehensible. The most
* Tzeentch, god of magic and knowledge, has an avian motif going. Another well-known deity associated with birds is Toth, Egyptian god of... knowledge and magic. Tying into this, the legion that serves Tzeentch, the Thousand Sons, have an Egyptian motif.
* Tzeentch has plans, but he inherently has no agenda. Tzeentch, along with the other Chaos gods, is a psychic manifestation. He is the manifestation of plotting and change. He becomes more powerful simply by the existence of plots and change, not by them achieving any sort of actual objective. If Tzeentch ever definitively "won," he would cease to exist because there would be no one to plot against.
* Tzeentch. He can't be killed (and killing all his worshippers is less than practical), so technically, hope goes on forever.
* Tzeentch himself likes to join in the fun on occasion; once, he overheard a Space Marine Chapter Master who, worried that his Chapter's dealing with the Inquisition was killing more innocents than heretics, prayed for a means to tell who was lying and who wasn't. Tzeentch "blessed" the Chapter by letting them hear
* Tzeentch is the Chaos god of ambition, also: hope, change, mutation, betrayal, psychic powers, lies, plotting,
* Tzeentch is the gambit personified, since he would cease to exist if his gambits stopped. As long as one of his gambits exist, he has already succeeded. This leads into his ultimate Achilles Heel: he doesn't have one giant plan, but multiple, mutually-exclusive ones, so every victory for him is also a loss, and vice-versa
* Tzeentch; more philosophically inclined Dragon Ogres consider this to be Tzeentch's idea of a joke.
* Tzeentch. The ancient race of Dragon Ogres asked the Lord of Change for a boon, to make them immortal. He did, but also rendered them sterile. Most of the still-living Dragon Ogres consider this to be Tzeench's idea of a joke.
* Tzeentch. The Emperor/Princess Celestia is pissed off at first, but get used to it after a few years.
* Tzeentch, the Master of Change. His entire existence is based on evolution, so his followers enjoy having random "gifts" happening at any moment (read: every moment). Which leads into...
* Tzenkethi names have four components: individual name, job, echelon within that job, proficiency grade. Example: Alizome Tor Fel-A, with "tor" indicating a position as special agent to the Autarch, "fel" being her membership in the "problem-solver" echelon, and "A" indicating the highest proficiency in that role.
* Tzenkethi names have four components: the individual name, their job, their echelon within that job, and their proficiency grade. Example: Alizome Tor Fel-A, with "tor" indicating a position as special agent to the Tzenkethi Autarch, "fel" being her membership in the "problem-solver" echelon, and "A" indicating the second-highest proficiency in that role (AA rating is incredibly rare, though).
* Tzi Ma) as the Viet Cong character, as well as the Croatian Rade Šerbedžija as a French police inspector.
* Tzimisce named character Sascha Vykos is exclusively referred to with the pronoun "it" and is so extensively fleshcrafted that any trace of its original gender, or indeed body, is unidentifiable. A lot of Tzimisce, especially those on the
* U-1206 perished in a decidedly ignoble manner when an accident with a new toilet installed on the submarine caused the sub to take on water (and sewage) start sinking, followed by the water-tainted batteries leaking chlorine gas into the sub. They had to emergency surface and were spotted by British units, who bombed them. This attack destroyed U-1206, killed one sailor, and caused another three drownings before the surviving 46 crewmen were rescued. All because someone flushed the pressure toilet valves in the wrong order.
* U2. Because of this trope, their fanbase is divided into two groups; pre-"Joshua

Tree" and post "Joshua Tree".
* U2 had six top 10 hits in the U.S. Five of them are classics: "With or Without You", "I Still Haven't Found What I'm Looking For" (their two #1's), "One" (#10), "Mysterious Ways" (#9), and "Desire" (#3). Then there's "Discotheque", which peaked at #10 and is all but forgotten today and far less remembered than non-top 10s like "New Years Day" (#53), "Sunday Bloody Sunday" (wasn't released as a single in the US), "Pride" (#33), "Where the Streets Have No Name" (#13), "Beautiful Day" (#21), and "Vertigo" (#31), to name a few.
* U2 has a character named Mr. MacPhisto, who is essentially a sad old Satan that tries to set himself up as a rockstar despite clearly being past his prime.
* U-2 Incident, Soviet Air Force General Yevgeniy Savitskiy ordered the air-unit commanders "to attack the violator by all alert flights located in the area of foreign plane's course, and to ram if necessary" to try to bring down Frances Gary Powers's U-2 spy plane. In the end it was brought down by SAMs, though.
* U2. In their defense, the band had to hastily record many of the songs because a briefcase containing Bono's lyrics for the song was lost, forcing Bono to improvise lyrics for the album.
* U-2 pilot Gary Powers had a suicide needle, concealed inside a fake silver dollar; upon his capture, the KGB tested it on a dog; it died instantly. At his trial in Moscow, the prosecution alleged it was an assassination weapon. When it was revealed to the American public that Powers didn't commit suicide and allowed himself to be captured, there was a great deal of moaning in the media at how Americans are a bunch of wimps compared to the supposedly fanatically committed Soviets.
* U2 popular than when it was at the top of that chart (its Hot 100 peak happened in this time frame) — and while "Mysterious Ways" remains iconic, it still isn't close to the legendary status of "Teen Spirit". This was owing to the fact that the Modern Rock chart was survey-driven prior to early '94, when the Soundscan method was finally adopted. Incidentally enough, the latter development catapulted "All Apologies", which had been stalling near the bottom of the top 10 for the past few weeks, straight to the top spot.
* U2's 9/11 themed halftime show performance. From the game itself, Tom Brady's last minute drive to set up Adam Vinatieri's game winning field goal.
* U2's Bono and his wife Ali, who is a fashion designer and political activist.
* U2. Since their formation as school friends, they've never had a single lineup change.
* U2's music is known for its wide range of interpretations, be it religious or secular, universal or personal, literary or pop-cultural.
* U2's "One Tree Hill" ("I'll see you again when the stars fall from the sky / and the moon has turned red over One Tree Hill") and "The Fly" ("It's no secret that the stars are falling from the sky"); the latter song has been described as "a phone call from Hell".
* U2 song "I Still Haven't Found What I'm Looking For" has the verse: "You broke the bonds/And you loosed the chains".
* U2 songs: "Seconds," "Van Diemen's Land," and "Numb." Bassist Adam Clayton makes a vocal appearance on b-side "Endless Deep", and recites a spoken word verse on "Your Blue Room" for the Passengers side project.
* U2 songs were often improvised by Bono on the spot (a famous example: "New Year's Day.")
* U2 song "Who's Going To Ride Your Wild Horses", Bono sings about someone who "left my heart as empty as a vacant lot".
* U2's song "Vertigo", Bono opens by counting in: "Unos! Dos! Tres! Catorce!" (Translation: Some, two, three, fourteen)
* U2 states, however, that everyone - even his wife and the other band members - calls him "Bono". Also ironic is that he hated the nickname at first (it's short for "Bono Vox", Latin for "Good Voice"). The Edge, from the same band, was originally named David Howell Evens, but says that now even his close family call him Edge.
* U2's "Tryin' to Throw Your Arms Around the World" contains the line, "A woman

needs a man / Like a fish needs a bicycle".
* U2's Zoo TV tour was intended to be an overt parody of mass media, but ironic content was so subtle that may fans believed their appreciation to be genuine. Their subsequent Pop Mart Tour upheld the theme of parody. This time, the target was consumer culture; and fans were just as baffled as they had been by Zoo TV.
* U2-themed. The joke is explained in the last panel for those that really can't figure it out.
* U2 was actually shot at 6:01 P.M. Bono has acknowledged the error and regularly changes the lyric to "Early evening" in live performances.
* U2 was banned in Burma because the song "Walk On" was dedicated to Aung San Suu Kyi. Anyone caught trying to import the album could face prison time.
* U2 was photographed in 2005 for Time Person of the Year alongside Bill and Melinda Gates, he was made to stand on a box so the heights of all three better aligned.
* U/3DS or a weak character depending on what part of the sword he hits with, and has balanced stats otherwise. Lucina has balanced power and knockback all along her blade, making her this trope both in comparison to Marth and to other characters.
* U/3DS swordfighter whose abilities and moveset lie in-between the other Mii classes in terms of speed, power, and versatility.
* U-56 which was hosting a conference and had both Churchill and Pound aboard. Both torpedoes hit but failed to explode.
* U-571, and takes the time to recite the prayer used for burial at sea before doing so.
* U-571 denounced this at the time for stealing a British accomplishment. The truth was acknowledged briefly before the credits.
* U-571 does this, with the Americans in the captured German U-Boat destroying another submerged German U-Boat with torpedoes.
* U571 events that really happened. The USN did indeed capture a Kriegsmarine Enigma code machine and books from a U-Boat in 1944. They did deliver it and the resulting intelligence did aid the Allied cause materially. However, the movie was based on real life incidents where the British Royal Navy had captured Kriegsmarine Enigma code machines and books in 1941 and 1942, enabling the more efficient decoding of enemy transmissions to begin, and the code had already been cracked by Bletchley Park building off of Polish prewar work.
* U-571 He wants to keep his skill a secret though for fear of alienating his friends.
* U-571, the main character is an American submarine officer whose captain is killed in action. Being second-in-command, he then has to take charge of the crew to complete the mission, evading depth charge attacks, engaging in an underwater battle, and being forced to make horrible decisions that cost members of his crew their lives....all while manning a German-built sub whose controls they are utterly unfamiliar with. At one point, a crewman says that the Chief Petty Officer should assume command rather than Lt. Tyler. The Chief shuts him down very quickly.
* U571, while the initial plan is to simply board the sub and scuttle it after capturing its Enigma machine, the loss of their own submarine forces the heroes to take control of U-571 and use it in battle against the Germans.
* U7, it is mentioned that they speak in "Gargish syntax" to preserve their cultural ties.
* U9 Tenshinhan versus U4 Super Buu. Buu decides to be sporting and not attack for a full minute. Tenshinhan breaks out the Mafuba, which he executes perfectly, sealing Buu in a manner that bypasses his insane regeneration. Buu then returns, explaining that he's hidden pieces of himself around the arena that can regenerate into him, and having absorbed Piccolo means he knows how to reverse the Mafuba, but he still compliments the guy for trying. Tenshinhan then decides to just point-blank
* U9 Videl versus U8 King Cold. Though it's very evident that this Videl is
* Último Dragón doesn't breathe fire or have wings, but he flies just fine without them.
* Último Dragón, especially after dropping people on their heads.

* Último Dragón, teaming with El Dinámico, among others also at 51.
* Último Dragón the cheers Dragon got on the C-shows like Jakked and Velocity. Then to get rid of Dragon, he tricked him into quitting by promising to rehire him, unmasked, under his real name Yoshihiro Asai, only to renege after Asai unmasked in Japan.
* UA:LA, since Stacks was stopped from successfully stealing a wallet by Hero, Heiki orders he be killed.
* Uarda, Paaker's, moral descent begins when he decides to use black magic to get back the girl he lost.
* Uatu, a member of the ancient Watcher race, is convinced that humanity is innately noble, to the point he broke his non-interference vow to help save them from Galactus, the Planet Eater. After being put in trial for this, he has
* Uatu, the Watcher gotten in trouble for this from the other members of his species, and is apparently currently on some form of probation.)
* Uatu the Watcher shows Hank McCoy a vision of possible futures, and in one,
* UAVs that can be launched, recovered, and rearmed in flight, thus bringing things full circle from the Macon and Akron.
* UB40 and started pushing them. While the results were mixed, this rush produced another #1 hit ("When I'm With You" by Sheriff, from 1983), and a couple of other fairly big hits of recharted songs ("Where Are You Now?" by Jimmy Harnen and Synch from 1986, and "Into the Night" by Benny Mardones from 1980, which KZZP once again played a big role in reviving).
* UB-BURST, formally known as Blacephalon, has a signature move called Mind Blown. It blows up its own head to deal a crapton of damage, then grows another and 50% of its total HP is drained, essentially acting as a slightly weaker and safer version of Explosion and Self-Destruct. Whether the regrowing of the head or the kaboom causes the damage is up for debate.
* Ubel Blatt at the ends. Occasionally he uses the knives when he can't find a sword or can't use his blood blades.
* Ubel Blatt, in a decaying kingdom under the threat of war with its black magician neighbors, an inhuman young man is murdering the seven greatest heroes of the land. Only the truth turns out to be much worse.
* Ubel Blatt, Koizell and Ato use an ancient subterranean passage to cross under the mountains so as to avoid Glenn's armies, but Glenn suspected that the notorious "Hero Killer" might possibly know of the secret tunnel although it seemed very unlikely.
* Ubel Blatt look like they're in perpetual Dull Surprise, although there are a few times where they do show some emotions but that tends to be most of the older cast or when the younger cast are very angry.
* Ubel series. To underline the reference, he's promised the role of "Governator" in his boss' empire.
* Uber Alles samples to invoke this. (They also aren't German, in case that's not enough to convince you.)
* Ubercharge. Waltz into the last point, and start laying stickybombs. You have eight seconds of Uber, and eight bombs. Detonate them just as the Uber ends, and watch as the entire enemy sentry-nest goes up in smoke. Then enjoy the worship from your team, because you just won the round in a single motion.
* Uber Eats has a couple of spots with gymnast Simone Biles and amateur gymnast Jonathan Van Ness, the latter of which is not only flaming as all get out but is wearing one of Biles' leotards.
* Ubermensch gives him the chance to kill himself so he won't be a potential rallying point for future fascist groups.
* Uber Quest accidentally teleported from a sci-fi world to an MMO-esque fantasy world.
* Uber Quest seems to have it in for Sesame, in her first appearance she steals a kill and loot drop from Sesame.
* Ubersoft that this was the 5th law of Robotics (5th as in total number, not order) and listed ways each law can be used to cause the robot to kill humans.

* Uberwald is identified as not so much a nation as a geographic argument. It's said in the past Uberwald was mostly united in the 'Unholy Empire' (one of whose emperors had a man's hat nailed to his head as a joke) and described by Vimes as apparently the whole show being run by vampires and werewolves with everyone else being lunch. It broke up when the non-undead dwarfs became too powerful.
* Ubiquitous in agricultural animal husbandry, in which female animals' ability to produce milk, eggs, and offspring routinely gets male livestock converted into meat at a younger age than their female counterparts. The exceptions are the valuable "stud" males, whose high-quality genes ensure them a long and pampered lifespan, long after most of the lower-grade males of their generation have been sent to the slaughterhouse. With modern technology, the animal's genes can be used well after the actual animal's death.
* Ubisoft (2009-present) is also up there although it has largely faded from that position over time, and is nowadays mostly known for its winning streak at Nickelodeon's Kid's Choice Awards.
* Ubisoft, but it is still a different world with no story-connections to any of the old worlds.
* Ubisoft game, and the release date ended up getting delayed so that they could port the game to other systems.
* Ubisoft have started doing this with multiplayer passports. While a code for the passport for a particular game comes free with the game, it can only be used once, forcing anybody who bought it second hand to buy a passport if they want to use multiplayer.
* Ubisoft's purple spiral circle thing with their name next to it. Nowadays it's black on a white background.
* Ub Iwerks left Disney in 1930 to create a new studio with Disney's former distributor Pat Powers. Although he pioneered many new animation techniques in his shorts, Iwerks' studio was never profitable and he was dropped by Powers in 1936. After his studio went bankrupt a year later Iwerks retired from animation altogether, opting instead to rejoin Disney in 1940 as the head of their newly-formed research and special effects department.
* Ub Iwerks produced a Headless Horseman short as part of the ComiColor Cartoons series.
* Ubu Król, changed the names of Poland and Lithuania to Foland and Fithuania.
* Ubuntu 10.04 "Lucid Lynx" had the brilliant idea of moving the minimize, maximize, and close buttons from the right side of the window, where they are on Windows, to the left side of the window, where they are on Mac OS X. (They were moved back in 18.04.) This was pretty much only done to show off the new gconf option that enables the user to move those buttons around at will, although you wouldn't know that reading the official statement on the matter, which cites it as a bold and innovative and [a bunch of meaningless buzzwords] idea that will help encourage creativity and [a bunch of other meaningless buzzwords] in users. Needless to say, nearly every user who doesn't also use a Mac has since moved them back to the right.
* Ubuntu has made Linux more user-friendly and easier for newbies. Many GNU/Linux
* Ubuntu is looked down upon by most "serious" Linux users due to its design being more geared for general use . Ubuntu's new Unity interface got this from longtime users. There is also the fact that it was designed with touchscreens in mind, which still have not replaced keyboard and mouse controls on traditional desktops and laptops
* Ubu Productions is named after producer Gary David Goldberg's dog Ubu Roi, a black labrador retriever. The
* Ubu Roi attends a banquet his wife cooked up for their various co-conspirators including such delicacies as "tarty-farts", "turkey bum", and "balogna soup". Upon realizing that his wife is going to give away all that lovely food, Ubu chases the others out with a toilet brush so he can finish it himself.
* Ubu Roi Pile, Cotice and Père Ubu are attacked by a bear in the forest. Pile and Cotice barely manage to kill it, while Ubu hides and prays, coming out

after the bear is killed and claiming they'd never survive the encounter without his prayer.
* Ubu Roi, the newly named king Ubu arranges an all-out purge amongst the higher nobility of Poland.
* Ubusuna (in Japanese) that the project has been halted by work- and health-related problems, so it will probably never see the light of the day.
* UCAS - the United Canadian and American States and what was left decided to merge.
* UCB (Upright Citizens Brigade) Theatre - New York and LA, with roots in Chicago
* UC Gundam in general tends to arrange Mobile Suits in squads of three. See also the White Dingo team in
* U championships in thirty years despite regularly making the top 8 or the Final Four.
* Uchenna & Joyce won Season 7, but don't get major airtime until leg 8, and they are pushed back into the background for most of
* Uchibi Sasuke, Orochimaru decides to go after Naruto instead of Sasuke when he finds out that Naruto is a skilled accountant. Sure, having the the Sharingan would be nice and all, but Orochimaru's experience with running a village has showed him that he needs someone who can expertly handle money, paperwork, etc.
* uchideshi, or live-in students. Besides training two or more times a day, possibly while holding down another job or completing university classes, they are also responsible, under the direction of the senior students, for the care and upkeep of the dojo, for cooking their own meals as well as catering for guests, and keeping their rooms in tip-top order. The care and discipline they put into these tasks is considered to be just as much a part of the training as the martial art practice.
* Uchiha Itachi as well. Even in death, he is loyal to Konoha as well. Things didn't exactly turn out that way.
* Uchiha Itachi has a power that serves as one of these. Tsukiyomi may appear to be a second-long
* Uchiha Itachi, leaving aside the whole parricide thing, negotiates some of these rather smoothly in his first real-time appearance. Specifically, he beats the crap out of and tortures several people who he
* Uchiha Itachi's two children. The older son (also named Itachi) takes more after Sasuke — but the younger daughter (Rina) is the one who takes after her father.
* Uchiha Madara himself users to dispel, or Mei Terumi the Mizukage (arguably the strongest currently living Water Release user) to counter.
* Uchiha Madara is remembered as a villain and does not have a statue in Konoha.
* Uchiha Shisui's only role seems to be to explain whom Itachi killed to get his Mangekyou Sharingan.
* Uchu Sentai Kyuranger, an alliance of the 88 constellations founded by human space explorer Tsurugi Ohtori, who became its first President. Then comes the Space Shogunate Jark Matter, led by Don Armage, which conquers pretty much the entire universe (including Earth). Ultimately, after some 300 years, Jark Matter falls once its leader is defeated by the Kyurangers. The Space Federation is restored, led once again by Tsurugi Ohtori, who had been in suspended animation.
* Uchu Sentai Kyuranger, as long as a single piece of Madako survives her destruction, the villainess is capable of completely regenerating again and again.
* Uchu Sentai Kyuranger creatures burrowing underground. They are not sentient or smart at all, but very resilient and always mean trouble.
* Uchu Sentai Kyuranger (Green). The ratio gets even worse when THREE additions join the already larger-than-usual team, and none of them are female.
* Uchu Sentai Kyuranger has a particularly funny one. At one point there's a stinger at the end of an episode starring Stinger, the orange ranger. He even lampshades it. "Ha ha, how funny, a stinger for Stinger."
* Uchu Sentai Kyuranger has Tsuyoindavers, which actually have little resemblance to the normal Mooks called Indavers. A few Tsuyoindavers can grow giant like monsters of the week can and several of the monsters of the week actually were

unique Tsuyoindaver variants. Indavers themselves may have one of four different colors of stripes on their uniforms which may indicate different ranks (with the less common purple ones being commanders) but there seems to be very little or no difference in strength between them. One episode had a unique Indaver with a red uniform instead of a black one who lead a Sentai-like team of Indavers including one of each normal stripe color, but he and his team turned out to be no stronger than normal and were easily beaten.
* Uchu Sentai Kyuranger has two examples, both dramatic and hilarious:
* Uchu Sentai Kyuranger, however, has one of the rangers himself be a former robot wrestler.
* Uchu Sentai Kyuranger in conquering the entire universe by the time the series starts. Beneath him are the Karos, who effectively serve as the sub-Overlords of each of the star systems under the Don's rule.
* Uchu Sentai Kyuranger's no less!), as well as some engineering talent.
* Uchu Sentai Kyuranger, so he celebrates any good fortune that comes his way as something to be treasured and emphasized until the day they can fix the universe's rotten luck.
* Uchu Sentai Kyuranger so it's not really true to say they joined "late" compared to everyone else; plus Skyblue doesn't even have the special equipment/mecha/etc. that usually sets a Sixth apart from the rest.
* Uchu Sentai Kyuranger the guys have caught on and brace against the sides of the slide, keeping them from falling. And then a washtub comes out of nowhere and bonks Spada on the head, making him fall onto Lucky and sending them both back to the start.
* Uchu Sentai Kyuranger The scene wouldn't be any sadder if robots could cry.
* Uchu Sentai Kyuranger through the story. Yosuke Kishi has a singing career outside of being an actor.
* Uchu Sentai Kyuranger when he fully powers up from "Violet" to "Commander". The star symbol on his chest is also symmetrical, unlike the other suits.
* Uchu Sentai Kyuranger, which also functions as their headquarters, to defeat their enemies.
* Uchuu Senkan Yamato away with the explanation that the ship was almost completely defenseless for several minutes after firing the Wave Motion Gun — it used so much power they had to wait until the engines came back online.
* Uchuu Senkan Yamato, Captain Okita (Captain Avatar in the English dub) shocks the bridge crew by commanding the helmsman to maneuver safely through a cluster of space mines by tilting the ship five degrees, a concept which shouldn't surprise anyone trained to fly in three-dimensional space.
* Uchuu Senkan Yamato is a strange tale. It originally started life as a 26 episode series that tanked. In an effort to make back some cash, producer Nishizaki edited the season into a 2.5 hour long movie using animation from the series, some test footage and some new stuff — and it took off like a rocket.
* Uchuu Senkan Yamato. Long lines of space coffins are set to drift in space, presumably forever.
* Uchuu Senkan Yamato (Star Blazers), esp. the second season: the Argo/Yamato's main armament beams enter (or sometimes go completely through) the enemy ship at one or more points, then there is a brief interval before the entire ship is ripped apart by explosions.
* Uchuu Senkan Yamato, the invading Gamillans call the Earthlings "Terron".
* Uchuu Senkan Yamato was infamous for, as an American adaption of anime, having enemy soldiers who were killed described as "robots".
* Uchuu Sentai Kyoranger is shaping up to be this, with the core nine rangers all being selected to fight against the Jak Matter Shogunate.
* Uchuu Sentai Kyuranger may be more appealing with a motif of space travel instead of blocky animals.
* Uchuu Sentai Kyuranger on power and things just went downhill from there.
* Uchuu Sentai Kyuranger. The show's premise is about nine saviors that wil emerge to save the universe (with the team ventually gaining twelve members). In all fairness, Lucky isn't as bad as some examples given that some of the other Rangers

still get their own sub-plots and focus episodes, but it's hard to argue he doesn't gets much more focus than most, being present in almost every fight whereas the rest of the Rangers rotate and eventually being revealed he was a prince and a descendant of a legendary warrior.
* Uchuu Sentai Kyuranger (with Sun and Moon powerups), each also has an elemental special attack and/or motif: Fire (Red and Houou Soldier), Beast (Blue), Earth (Black), Plants (Green), Water (Yellow), Poison (Orange), Electricity (Gold), Psychic (Silver), Sky (Pink), Dragon (Ryu Commander), and Ice (Skyblue).
* UCLA Bruins football coach Red Sanders and, more famously, Green Bay Packers coach Vince Lombardi, are both known for saying that
* u cn typ in txtspk texting became less of a chore as phones with a full, albeit miniaturized keyboard became available (though the design remained niche), and eventually phones with touchscreens became the norm.
* UC of a ritual involving a candle and a mysterious figure yelling &#65533;What have you done!&#65533; There is no in comic explanation about these dreams yet, but it is strongly hinted that they are showing a ritual that occurred before the story began.
* UC Santa Barbara left in 1974, three years after dropping football, and came back in 1976.
* U Cs with the unit and use the mortar one of them was carrying to shell the enemy.
* UC to the author that both she and Kelsi have the same color highlights.
* Udo Jine is the first villain in the series that Kenshin has trouble defeating, and is the first opponent that forces Kenshin to revert back to Hitokiri Battosai.
* UDON comics patch up this plot hole by explaining that Julia was the daughter of a German doctor who lived with and helped care for the Thunderfoot tribe, while Noembelu actually was a pure Thunderfoot girl originally called Little Eagle.
* Udonna/White Mystic Ranger) died of a brain tumor on July 20, 2010 at the age of 50. Despite a decade passing since her death, Udonna has never been confirmed to be deceased.
* UED, meaning they treat the two alien species of the setting with disdain and intend to enslave or exterminate both of them.
* UEFA Champions League Final between Manchester United and Bayern Munich. With Bayern leading 1-0 going into stoppage time, United equalised with an absolutely wild goal and then scored the winning goal two minutes later with virtually the final kick of the game. The ending was so unexpected that they had to take the Bayern Munich ribbons off the trophy before presenting it. Not only did United win in the most dramatic fashion, but the victory made them the only English team to do "The Treble" — winning the UEFA Champions League, FA Cup and the Premier League in the same year.
* UEFA Champions League. On their way back in the tunnel into the locker room after the first half, the players exchanged punches and kicks. Estudiantes goalkeeper Alberto Poletti kicked Italian striker Pierino Prati into the ground — the latter would also be headbutted by Suárez later in the match, which resulted in him getting a mild concussion and being unconscious for 20 minutes; many other Estudiantes players would also push, punch and kick their opponents. At least 3 players from Estudiantes got arrested and charged for assault after the game.
* UEFA Champions League or Aviva Premiership Rugby, it airs a barker loop showing advertisements that encourage viewers to subscribe to the company's pay tv and internet service to get full access to BT Sport.
* UEFA Champions League Starball. They even use a different coloured version of it for the final each season.
* UEFA Champions LeagueThe reason for this is because, at the time, former Barcelona manager Pep Guardiola was leading Bayern[[note]] Real Madrid won, thus defying the trope.
* UEFA Champions League with this extreme defense (at times, 9 or 10 players would be next to the goal...).
* UEFA Euro respectively playing for Albania and Switzerland. As in the case of the Boatengs, the Xhaka brothers ended up playing against each other in the group

stage. Unlike the Boatengs, however, the two are reported to be very close, and often banter with each other on their public Facebook pages.
* UEF, the Cybran nation easily comes off as the nicest faction in the setting. They just want to be left alone and only fight to defend against Aeon genocide or to rescue the Symbionts who are still controlled by the UEF. In fact their main problem is their relative lack of unity; Brackman had to clone himself to get a neutral Commander the clans would rally around.
* Ueno also looks at Shoya like this since childhood, but unlike with Shouko her feelings are unrequited
* Ueno Ribbon ~ Gekoku Daughter Produce Akane Fujita. It'd take another before Fujita won a title belt of her own, and she wouldn't be the one to dethrone Sera, but it wasn't for lack of trying!
* Uetora Shou herself doesn't realize any of this; all she knows is that the vegetables have been especially tasty lately.
* UFC 133, welterweight fighter Dennis Hallman surprised spectators by eschewing the usual trunks (that extend to a few inches above the knee) in favor of speedo-like shorts. When Hallman's opponent Brian Ebersole won by TKO in the first round, UFC president Dana White expressed his appreciation by awarding Ebersole $50,000 for "getting those horrifying shorts off TV as soon as possible". Hallman later explained that he had worn the shorts after losing a bet.
* UFC 193 on November 14, 2015 saw what most fans and experts considered the impossible: The defeat of "Rowdy"
* UFC 194 just under a month later possibly topped Rousey's loss with the long-awaited Featherweight title unification bout between Jose Aldo and
* UFC after her fight with Bethe Correa and the mainstream media circus that followed, with most of those fans shifting their support to hardcore icon Conor McGregor. It got even worse after her loss to Holly Holm, with fans rejecting her and calling her an overrated fad that was bound to end. However, it barely made a dent in her mainstream popularity — being "the toughest woman on the planet" still makes her a strong symbol of feminism and keeps her popular with general audiences; in other terms, Ronda Rousey has essentially become the John Cena of MMA.
* UFC and UFC basically followed that model, with hindsight on their side built a better model.
* UFC events were promoted under this tagline, even though they actually did have some rules (eye-gouging was banned, for example).
* UFC Heavyweight Champion Fabricio Werdum often makes a goofy face at the camera that has become memetic. It involves a large, bizarre, Joker-like smile that makes him look insane. He's even worn shirts with himself making the smile.
* UFC Unleashed, are always edited to an hour, so if there's only a minute or two left in the timeslot, expect the current fight to end in a finish.
* UFC. When he main-events a card, it's officially billed as "_____ vs. Korean Zombie".
* UFO Abduction, which is, of course, also alleged to be part of the cover-up.
* UFO aboard the Skydiver submarine in situations such as altering the ship's course, preparing to launch the Skydiver jet and surfacing.
* UFO, a flashback to the founding of SHADO has Straker in secret meetings with his new staff. His wife grows suspicious about his late-night meetings and discovers him meeting with a female crewmember and makes the wrong assumption. Because of the secret nature of SHADO, he can't tell his wife what's going on so she leaves him.
* UFO Afterblank ending results in humanity driving the aliens completely from Earth, rendering the sequel's story impossible.
* UFO Afterblank have gotten a lot more cartoony with each game in the series, partially as a way of compensating for the engine becoming more dated.
* UFO After Blank have this. In UFOAI, the scientist says that he doesn't even try to understand how aliens got their plasma tech working, since according to them it should be impossible.
* UFO After Blank series deserves special mention for literally having the encyclopedia written as reports given to a commanding officer. In the first game in

particular, the entry for the alien weapons specifically include "you hold it here, and pull the trigger here, and the energy beam is emitted here" in a text-only report.
* UFO After Blank series revolves entirely around these. Their mating rituals, the chaos they've caused for humanity and other aliens whose planets they've infested and the attempts of various factions to control them for their own nefarious purposes.
* UFO Afterlight has this as much of the point. Humans, forced off of Earth, travel to Mars to create another habitable planet. Terraforming technology very slowly changes the red planet to a blue and green planet in real-time, and tactical combat maps change from red and deadly to green and (relatively) safe. In fact, if you fail to start the terraformation process shortly after the beginning of the game, the environmental hostility will quickly go out of control, and your space suits will not protect you. The terraformation is also shown in "stages", with the dead, red planet as stage 1, small "plant" organisms and cacti as stage 2, and the appearance of water and more complex organisms as stage 3.
* UFO Afterlight series, the best weapon depends on the enemy: projectile weapons are either decent or great against most enemies, which is why they are universally favored, but lasers are exceptional against robots and enemies susceptible to fire, and plasma weapons are devastating to most enemies with shields (which are not designed to defend against plasma). More specialized weapons have more specific applications. In all three games, for example, warp weapons are murderous against armored foes and almost completely useless against unarmored foes (since there's not enough mass to warp).
* UFO Aftermath, and the server you recover from Area 51 has information on "Project Dreamland", one of the many code names for Area 51.
* UFO Aftermath, but you find a way to counteract its growth not too long after it's first spotted.
* UFO Aftermath is an attempt to build a giant psionic brain by covering the Earth's surface in nerve tissue, and can be driven back with special base-sized psionic devices.
* UFO Aftermath kicks off the After Blank series with an alien race, the Reticulans, killing off nearly all life on Earth, with only a handful of humans and mutants left on the planet. In one of the possible endings of the first game the survivors present enough of a threat that the Reticulans offer to evacuate them to a space station and a colony on Mars. The two subsequent games are focused on those colonies.
* UFO Aftermath: The alien ships are revealed at some point of the game to be living things.
* UFO Aftermath, the world map thoughtfully shows the alien terraforming ick spreading from centres of infection to, if you can't stop it, wipe humanity off the face of the earth and complete the aliens' plan.
* UFO Aftermath, two plot missions involve going to such warehouses. Unfortunately, it is only possible to get info on government relationships with aliens there.
* UFO Aftershock, a flying city built by the Reticulans which has been converted into a mobile headquarters by the Commonwealth of Earth.
* UFO Aftershock. These children are instantly rejected, giving rise to the Psionic and Cyborg tribes.
* UFO Aftershock. They are highly spiritual beings who had been sent to Earth on a religious crusade, seeking to conquer the planet in the name of their gods. They had even signed an alliance with a human doomsday cult.
* UFO, an atomic submarine with a detachable fighter jet attached to its nose. The plane is launched while the whole assembly is still underwater and makes its way to the surface by its own power. Naturally, the plane has no way to land on water but has to find an airfield on land. It is never shown how it is re-attached to the sub after a mission.
* UFO Baby and with a cute little baby of their own (only a normal human one, though).
* UFO Baby has Pepo, Luu's adorable, stuffed animal-like alien space pet that's a

Peponian... from the Planet Pepo. Guess what it says? That's right. Pepo!
* UFO, Captain Blue, but soon switched to a wig because the dye damaged his hair.
* UFO. Colonel Straker doesn't tell his wife about his real job for this reason, leading to the breakup of their marriage when she assumes his secrecy is covering an affair.
* UFO. Commander Straker suggests they view humanity not with malice but with callousness ("much as we view our food animals"). Straker later encounters a man with telepathic powers who is being controlled by the aliens. In the middle of their conversation he suddenly blurts out: "We mean no harm to the peoples of Earth. Why do you attack us? We're fighting for existence... you must understand!"
* UFO Daisensou Tatakae Red Tiger - Broadcast from 1978 to 79, only five episodes of this 39 episode series are known to have survived.
* UFO Defense had a linear progression in which Ballistic Weapons are outclassed by absolutely everything else in the game.
* UFO Defense is so large that you can park a fighter in one spot, or even squat on a landed UFO until it blasts off again, and wait to engage them.
* UFO driven by Commander Straker in this British sci-fi series. A plastic mold of the vehicle was made (to be called "Quest"), but the company never got off the ground.
* UFO. Each episode has a different alien plot to destroy SHADO headquarters, kill Ed Straker, release nerve gas or whatever. Each time a plot fails the aliens never try it again even if it has a good chance of working. On the human side, Straker builds a billion dollar electron telescope in an effort to obtain information on the aliens' home planet. The mission fails because of an oversight that made it impossible to accurately interpret the images that it sent back, and SHADO never builds a second telescope.
* UFO Enemy Unknown climbable, but is odd that your troopers are tough enough to hardly notice stepping off the roof of a two storey building but need a flying suit to get over a dry stone wall. Also, you remember those dragon's teeth concrete blocks they used to slow down tanks in World War 2? In the near future, you will be able to get a similar effect using a picket fence or a box of tomatoes.
* UFO: Enemy Unknown. No need to specialise, just make everyone unstoppable psychic flying deathmongers.
* UFO episode "Identified". After a UFO is shot down one of the aliens aboard it is captured. After he's exposed to the Earth's atmosphere he starts aging rapidly and quickly dies.
* UFO episode "Kill Straker!" A SHADO Moon ship commanded by Colonel Foster is forced to re-enter the Earth's atmosphere at a steeper than normal angle in an attempt to avoid a pursuing UFO. As they do so a SHADO technician says "I have re-entry cessation on radio contact". 16 hours later the Moon ship is found floating in space. When Straker sees Colonel Foster he says "You gave us all quite a scare." Foster explains that the transmission antenna was destroyed during the re-entry attempt.
* UFO episode "The Dalotek Affair". Early in the episode, as part of an alien plot a meteor falls on the Moon. Late in the episode Commander Straker remembers a single word from a 10 year old TV broadcast ("fireball") and realizes that his subconscious mind is trying to tell him about the meteor's significance.
* UFO) Extra-Sensory Perception is a mental condition being treated by mainstream psychiatrists. While most sufferers adjust to its effects, the subject of the episode "E.S.P" cannot cope with knowing everything that's going to happen before it occurs.
* UFO for taking on the anonymous alien invaders, yet are small enough to be deployed via aircraft.
* UFO had Commander Straker's gas-turbine car (in reality an impossible-to-drive prop whose gull-wing doors had to be opened by an off-screen stagehand), the SHADO Mobiles (tracked armored personnel carriers with radar sets on top) and the missile-bearing Lunar Interceptor. All of them just crying out to be made into Dinky toys.
* UFO had several first-name Danzas: Ed Bishop played Ed Straker, Gabrielle Drake

(nicknamed "Gay" by her agent) played Gay Ellis, Keith Alexander played Keith Ford and Peter Gordeno played Peter Carlin. Also, "The Psychobombs" featured a last-name Danza, Lt. Blythe played by Peter Blythe. There's also a borderline case with Ayshea Broughs, whose character is never referred to by name, and is credited only as "SHADO operative", but according to the script is called Ayshea Johnson.
* UFO heat up and explode if they spend too much time in Earth's atmosphere.
* UFO, humanity is in a low-key state of war with the aliens operating the UFOs, who are constantly trying to infiltrate the earth and kidnap humans. Since revealing this to the public would case wide-spread panic, a top-secret organisation, SHADO, is responsible both for the actual fighting and for covering up all evidence of alien activity.
* UFO Hunters investigated real-life rumors that the SR-71 and B-2 Spirit bomber were a result of this.
* UFO: In one episode an alien sniper fires a bullet at Moonbase; it hits a window but instead of shattering it merely cracks it. Eventually, the internal air pressure inside the room causes the window to disintegrate, killing the astronauts inside via explosive decompression.
* UFO. In one episode, he shoots an opponent who can travel through time and downs a UFO with a rocket launcher.
* UFO is from 1970 and takes place in 1980, but has very little in common with the real 80s.
* UFO is manifestly celibate after an acrimonious divorce, after the loss of his son to his successor, and the death of his son, even though a variety of attractive and eligible women have a go at him (e.g. Lt. Barry). His reaction to the rampant libido shown by the rest of his staff ranges from cold disregard to amusement.
* UFO Kamen Yakisoban ad is about former 90's hero Yakisoban falling from grace, unable to hold a job, and his once-adoring public finding him washed-up, weird, and annoying. He turns evil as a result.
* UFO Kamen Yakisoban ad, where Sauce and Claudia fight off the Demon King, escape safely, and get vaporized by a fireball in the last second of the commercial.
* UFO Kamen Yakisoban, a series of commercials based around a ramen-themed superhero, got a tie-in beat-em-up game on SNES. It was originally a lottery prize, but Nissin received so many entries it got a full retail release.
* UFO Kamen Yakisoban commercials ostensibly star new hero Sauce, but all he does is get beat up and captured. His partner, the Legend, can turn into a motorcycle, a tank, and take on the Demon King via the power of judo throws.
* UFO Kamen Yakisoban's attacks involve food in some way, from weaponry like sauce guns to his Agedama Bomber and Noodle Attack finishing moves, where he throws fried batter at the enemy or wraps them in noodles.
* UFO Kamen Yakisoban, starring Yakisoban, a noodle-themed superhero who fought the evil kettle thief Kettler. The ads themselves also got a parody in "Kakesoban," a superhero who suffered amusing injuries and failed to beat Kettler, who was a heavy smoker.
* UFO Kamen Yakisoban was a series of Japanese UFO Ramen commercials by Nissin Foods that gained popularity in the 90s. The ads became so popular they got tons of merchandise, including a video game and movie, and sequel ads made in 2017.
* UFO Kamen Yakisoban was so popular among kids in Japan that tons of merchandise and tie-in products were made, including toys, tents, keychains, costumes, sleeping bags, stickers, a video game, a direct-to-VHS movie, a single on CD, a tie-in manga, and a themed attraction at Japan's Yomiuriland.
* UFO Kamen Yakisoban with Yakisoboy's lengthy transformation, which makes the Legend wonder what's taking so long as he and the Demon King grapple.
* UFO, Lt. Ellis and her compatriots in SHADO's moon base wore a purple wig as part of her uniform.
* UFO make Commander Straker hallucinate that he's an actor in a sci-fi television series. As he remembers being Straker, but can clearly see the cameras and backstage crew around him, he naturally starts to go insane.
* UFO One of the most direct Battle of Britain homages on this page, not surprising given that Gerry Anderson spent his National Service in the RAF.

* UFO Princess Valkyrie causing minor (or major) crises because of their own personal fecklessness, while the general alien populace just sort of accepted Earth into the fold without batting an eye.
* UFO Princess Valkyrie-throwing space-princess leaves several large chasms blasted through the entire cityscape. Neither the potentially-astronomical casualties, nor the damage to the city, are mentioned again. But the catgirl apologized, so it's cool...
* UFO Robo Grendizer: All Vegan soldiers wear a green-and-yellow uniform a with full-head helmet (topped with a tentacle-like shape) that sport yellow, round eyes and weird, gill-like marks where their mouths would be.
* UFO Robo Grendizer also blasted their targets with barrage of missiles.
* UFO Robo Grendizer, and having run away. Actually the main reason of he wages war against the Vegans despite of he hates fight is he does not want the same thing happened to his homeworld happens to Earth, and he would not bear to run cowardly again. Nevertheless, unlike other instances of this trope he is wrong on blaming himself since he could have not done anything back then (other than dying, that is).
* UFO Robo Grendizer and Maria are the secondary couple, starting from the last season where Maria was introduced.
* UFO Robo Grendizer...), and most of its weaponry were different kinds of laser beams. The Vegan troops also used gun rays more often than not.
* UFO Robo Grendizer. And that's still discounting all the weapons hid in its flying device.
* UFO Robo Grendizer are shiny-looking, bright and very polished, although they may get dirtied in battle.
* UFO Robo Grendizer: At the beginning it looks like the trope is being played straight, but it is finally averted. Several of the Vegans are decent people and many of them are given redeeming qualities.
* UFO Robo Grendizer come to mind—who are at best neglectful, Danbei is overprotective to the point that his daughter finds it annoying. He threatens or outright attempts to kill whoever hangs around with Hikaru. And if someone offers to drive her to some place, he loads his shotgun in front of that person while he states: "You better bring her back without even one scratch."
* UFO Robo Grendizer: Duke and Hikaru clearly cared for each other and loved spending time together, but it was never explicitly stated they were together.
* UFO Robo Grendizer). Earth, Fleed and Vega had a similar atmosphere and environment, so Earth was the kind of planet they were searching for.
* UFO Robo Grendizer Gandal (commander of the armies tasked with the invasion) are introduced.
* UFO Robo Grendizer: Grendizer's horns can unleash electrical discharges, its backhands shoot laser rays, blades are stored into its shoulders that can be merged to form a double-headed scythe...
* UFO Robo Grendizer has these mecha (from different shows) allies to battle a giant prehistoric monster (even bigger than them) surviving unknowingly in the depths of the oceans.
* UFO Robo Grendizer, her wardrobe changes from flowing dresses to miniskirts and boots. Inverted with Maria Grace Fleed. When she first appears, she wears skin-tight bodysuits; when she properly joins the cast, she keeps them as fighting clothes and begins wearing dresses and flowing skirts as civilian outfits.
* UFO Robo Grendizer), he was the most mature and the less prone to put his foot in his mouth.
* UFO Robo Grendizer: In some cases, a translator will simply give up and transliterate raw. This trope affected the main character, Duke Fleed, whose name was written like "Dyūku Furīdo". Several of his enemies also suffered from it: "Blackie" was written "Burakki" (as raw as it gets), and Gandal was turned into Gandar.
* UFO Robo Grendizer. In the first episode Kouji suspected he hid something. When he saw Duke leaping several meters upwards in one single bound he realized that guy was not human.

* UFO Robo Grendizer of a planet to rebuild it if he managed surviving the war, whereas Hikaru did not want to leave Earth. Not matter what their feelings are, a separation is inevitable.
* UFO Robo Grendizer (one of the sequels), Duke Fleed steals Grendizer and flees with it before the Vegans can seize it.
* UFO Robo Grendizer: Planet Vega had become unstable due to the overexploitation of ores of vegatron, a highly radioactive material. King Vega needed to find another world to settle his people on, and so he began conquering other worlds. That expansionist campaign finally led them to Earth.
* UFO Robo Grendizer sequels, Duke Fleed's planet gets destroyed two years before the beginning of the series, forcing him to flee to Earth.
* UFO Robo Grendizer. They are animalistic mechanical monsters resemble flying saucers pre-transformation.
* UFO Robo Grendizer They loved each other. However, he did not think they could be together again after what the Vegans had done to his homeworld.
* UFO Robo Grendizer, those blades bent forward. So, the enemy was shredded being being punched.
* UFO Robo Grendizer trilogy. The Vega homeworld had become unstable due to the radioactive materials within it and the King decided to expand his militaristic empire to find a suitable planet to settle on. The main character lived in Fleed, one of the first planets the Vegan army attacked and was forced to run away. He landed on Earth and settled peacefully in there. Then two years later the Vegan army struck his new homeworld.
* UFO Robo Grendizer was the last series in the original saga, because you have to wonder how the creators could have gone on.
* UFO Robo Grendizer were named, like Blaki's Motherburn, Minister Zuril's Warrior Mothership...
* UFO's "A Self Made Man" is told through the point of view of one of those.
* UFO SHADO puts its name and logo on all of its vehicles, even though SHADO's existence itself is secret.
* UFO (SID-1) was a surprisingly accurate depiction of how a real AI might operate, most notably in its ability to talk but inability to understand natural speech (it was designed for a single task and so did not need to be given outside orders).
* UFO. SID (Space Intruder Detector), SHADO Control and Moonbase all call them whenever a UFO is detected, so it happens on an average of once per episode.
* UFO. Supposedly it's part of a demonstration on how it's impossible to judge magnification without reference points, but even after he gets the point Straker zooms in for a second look... you're not fooling anyone, you sly dog!
* ufotable's anime adaptation emphasizes this by showing imbued small arms blowing cars to pieces with a single shot.
* UFO the aliens don't just attack SHADO headquarters when the Moon is on the opposite side of the planet.
* UFO the aliens don't just attack when Moonbase is on the opposite side of their target.
* UFO. The aliens have a laser weapon in their ships. It fires a bolt of energy that travels slow enough for the human eye to see it moving.
* UFO the characters regularly smoke in computer rooms, medical areas, SHADO's underground headquarters, the Skydiver submarines and even on Moonbase! Averted in "Sub Smash" where a nurse tells Commander Straker he can't smoke inside a hospital room.
* UFO the characters smoke in computer rooms, medical areas, and closed environments like SHADO's underground headquarters, submarines and the Moonbase. Some scenes look like they've been filmed through a minor fog.
* UFO, the invading aliens use a new superweapon in each attack. It fails not necessarily because it is flawed but also through bad luck. However, they never try it again although it still exists and might be devastating in another attempt.
* UFO. The Sky One interceptors used a multiple-rocket firing pod similar to those used by RAF aircraft, so they could splice-in stock footage of the pods being fired with the model effects.

* UFO. (The word "SKYDIVER" on the side of the craft also separates. The jet is now labeled "SKY and the submarine DIVER.)
* UFO. This is then followed by the opening scene, which ends with the title logo appearing as an animated overlay. The cast and production credits appear as captions in act one. One reason for this may have been the show's rotating cast, meaning that they couldn't use credits with a fixed cast list.
* UFO to the roar of the interceptors. Scenes involving people in spacesuits tend to stick to the silence-in-space rule.
* UFO Ultramaiden Valkyrie has a TV-MA rating. However, Spain apparently aired on a kids network, to no problem, though.
* UFO Warrior Dai Apolon brings miniature flying robotic bugs on the combine ports of the individual units. When they try to combine, the bugs explode, interrupting the combination sequence.
* UFO Warrior Dai Apolon is formed, the protagonist uses his alien energy powers to grow and combine with the robot, "wearing" it like armor.
* UFO Warrior Dai Apolon, the three individual robots that form Dai Apolon are named "Header" (which forms the head), "Trungur" (which forms the trunk/torso), and "Legger" (which forms the legs).
* UFO when it's revealed that he'll get pregnant every year for thirty years, which will leave him with "an arsehole the size of the Grand Canyon" when all is said and done (though he ultimately only has to give birth once).
* UFO when Straker catches a subliminal clue about UFO attacks from a documentary film, and insists on watching the clip over and over until he figures out what triggered the association.
* UFO which stafes the nature strips on either side of the road; somehow this crashes their car. The saucer's distinctive high-pitched whine substitutes for the Stuka dive-bombing sound.
* UFO without being laughed at. However it is correct in assuming that the Beatles song "Get Back" will still be popular.
* Ugadai Melodiyu to poke fun at him for that. One joke involves a cop unsuccessfully trying to handcuff him while a song is playing.
* Uganda–Tanzania War, and relatively good salaries of military life, and grew accustomed to violence. So when they were demobilized — usually becoming unemployed and plunging back into poverty due to Tanzania's economic problems at the time — many of them decided to use weapons to make an illegal living.
* Ugandans think that the video is tasteless and would only invite foreign aggression empowered by foreign interests.
* Uga Uga once agreed to pose for a porn magazine on the proviso the photographs wouldn't be published anywhere outside Japan. Unfortunately, the magazine's executives lied to him about it.
* Ugetsu: Genjuro's lover, Lady Wakasa, turns out to be a ghost seeking the love that she never found in her short mortal life.
* Ugga Dome (Tyrannia): Cave Chia, Cybunny Scout, Giant Hungry Malevolent Chomby, Grarrg, Harry the Mutant Moehog, Highland Chia, Kastraliss, Magnus the Torch, Quiggle Warlord, Sabre-X,
* Ugg boots are a weird inversion — an Australian company sued for trademark infringement countersuing to overturn the Ugg trademark, on the grounds that "ugg boot" was a generic term long before it was a trademark. The trademark was declared invalid in Australia, but
* Ugin's one-time allies Sorin Markov and Nahiri also qualify to a lesser degree. Sorin, a vampire planeswalkers, is about 8000 years old (as they first meet 4000 years ago and she remarks upon escaping the Helvault in modern times that she is now older than he was when they first met). While Nahiri was technically in suspended animation for most of her life she was conscious the entire time and constantly tormented by the legions demons sealed inside with her.
* Uglies: Aya has one of these named Moggle that she treats like a pet.
* Uglies, because after she underwent the traditional surgical procedure that made her a Pretty, she would forget all the plans she had made beforehand to eventually reverse the process.

* Uglies by Scott Westerfeld, people in the future still have to clean up the hole in the ozone layer and contain a species of nigh-invulnerable genetically engineered ecosystem-destroying orchids.
* Uglies by Scott Westerfield had Cities which seemed to be this. The Pretties (read: 16-2x year olds) could have nearly anything they want just by asking for it. We find out later in the first novel this is true, but not solely because of the highly advanced technology the society has. In fact, the last novel of the series called "The Extras" deals very well with the fallout when one of the Pretties' "enhancements" is fixed with the Brain Rain. Said change caused a huge, permanent sea-change that required the society to have a type of currency (based on reputation and work you do) to limit resource usage.
* Uglies gives us the "Pretty Operation" which gives people beauty and resistance to disease... among other things.
* Uglies, of having more than one child every ten years. This keeps the pretty parents able to focus on one child, and keeps sibling bonds from forming. It's surprisingly effective.
* Uglies play around with them recreationally — they really can't hurt themselves because the boards are magnetic and adhere to the magnetic grid underneath the city, and they wear a device to track their center of gravity and special "crash bracelets" that will pull them back onto the board if they fall off. Interestingly, the center-of-gravity device clips onto their belly-button rings, a fact that the characters all seem to take for granted. Apparently belly-button piercings are mandatory for young people in the utopian/dystopian future.
* Uglies series. Food is plentiful in the future, so there are calorie-binging pills that you take so you can eat even more.
* Uglies series has a graphic novel trilogy, showing the events of each book from Shay's point of view.
* Uglies series has a totally bubbly form of this. It's so happy-making! Or completely brain-missing, depending on who you talk to.
* Uglies series, Scott Westerfeld based the honorifics on traditional Japanese suffixes (-sensei, -san, -chan) except he uses them to indicate the "face rank" or fame of the individual to which they are applied.
* Uglies series, the people of the future sarcastically refer to gods as "invisible superheroes in the sky". There are some groups trying to bring religion back, but it isn't catching on.
* Uglies series, the surgery that makes you pretty at age 16 turns basically everyone into these.
* Uglies she is given a special hoverboard that has lifter fans that enable it to function away from magnetic substances for a period of time and solar cells to provide power for the fans. This type of hoverboard is later used by the Cutters when they turn into Specials.
* Uglies. Tally is Flawed Average, the pretties are Divine beauties, the specials are Imperfect beauties.
* Uglies, the protagonist of the first three books, Tally Youngblood, has exposed a dark secret (and done other stuff) which has created a cult of followers for her.
* Uglies, there is a tribe that was being kept in Stone Age technology for research, complete with blood feuds and lifespans of forty years.
* Uglies uses this, to the extent that another system of measurement isn't even mentioned.
* Ugly Americans a batboy gets loose in Mark's counseling group and bites Mark and the Two-Headed Worm Guy. After killing it Grimes draws a machete and slices off Worm Guy's bitten hand (which regenerates). Mark (who got bitten on the crotch) pretends that it didn't get him and slowly transforms over the rest of the episode, until it turns out that Doug the Koala Man's saliva acts as an antidote.
* Ugly Americans, a Manbird poops on the shoulder of a man outside the Department of Integrations. Mark Lilly walks past and says that he's heard that this is good luck.
* Ugly Americans and is later seen wearing a shirt saying, "I was a demigod and all I got was this lousy T-shirt."

* Ugly Americans", a process in which a female demon periodically molts her toxic flesh. The agony can only be minimized by near-constant sex with her boyfriend/human sex slave Mark. In the background of another episode, a calendar in Mark's apartment has two weeks marked as "Callie's Period", so apparently that's a bit different for demons, as well.
* Ugly Americans. A werewolf was on trial for tearing a man's arm off, and there was very clear evidence of what he did. The werewolf had a giant baby as a lawyer though, whose only defence was taking a giant bowl of spaghetti and dumping it on his head like a baby does. The judge thought it was adorable and dismissed the charges.
* Ugly Americans, Callie desperately tries to find a reason to explain what her sister Lilith would be taking over for her without revealing that she was originally supposed to be betrothed to Twayne.
* Ugly Americans: Callie's family from her father's side consists of actual demons, and her father is Satan.
* Ugly Americans detailed account of his sexual history, culminating with "Oh, and also, my dick recently fell off. I don't know how I forgot that little chestnut."
* Ugly Americans employed by the Department, his co-worker Leonard is a wizard, and his superiors are demons.
* Ugly Americans: Every supernatural or mythological being is real, and have the same problems as any other minority groups.
* Ugly Americans featured a plague that was turning New Yorkers into clones of Larry King. Apparently the plague was a rare side effect caused by the original Larry King taking too many medications that interacted in an unexpected way.
* Ugly Americans follows the life of social worker at the Dept. of Integration in New York City. Those in need of integration? Vampires, zombies, werewolves, land-whales, mermaids, and various people human and 'other'.
* Ugly Americans had one of these, where a scientist, expecting civilization to be destroyed in the "Dirigible Wars" which he predicted, froze himself in a capsule in his underground laboratory (underneath the UN building, apparently), leaving behind a robot tasked with impregnating surviving women with his semen. When the main characters find him, he seems very much well-preserved, but upon his capsule being opened, he ages and decomposes within seconds.
* Ugly Americans had Randall join a Zombieology cult. He left because they wanted him to pay to join.
* Ugly Americans has an episode where Mark's nightmares started coming true (as one of three trials). In one scene where he runs through a door, only to wind up in outer space, falling back to earth. When he landed on the ground, he instantly liquefied into a puddle of blood. (skydiving from space without a parachute hurts, kids) Mark's coworker Leonard was not impressed as Mark was late for an important event, so cue Mark's skeleton pulling itself out of the puddle, with the rest of the body reforming as he stood up.
* Ugly Americans has a young, attractive, female news anchor who is always smiling cheerfully, even when reporting the most horrific things.
* Ugly Americans has high muggle involvement. Zombies, wizards, demons and such are treated as ethnic minorities, and the main characters work for an agency charged with integrating them into mainstream society.
* Ugly Americans in the episode "Callie's Sister". The titular character, Lilith Maggotbone, is given in arranged marriage to Dwayne Boneraper when she becomes of age and in the meanwhile, Mark Lily is more than happy to raise her as his daughter (made easier because she ages one year per day). However, during the wedding ceremony, she reveals she wants to marry her adopted father, so first she tries to kill both Callie and Dwayne.
* Ugly Americans is all about this trope. Earth is populated by all the strangest creatures the writers and artists can imagine, many of them from myth and folklore. The main character, Mark Lilly, is an employee of the US Department of Integration; his job is to aid the creatures at finding their way in American (and human) society.
* Ugly Americans is set in New York. Except with monsters of every kind imaginable

forming a good part of the populace.
* Ugly Americans). Lillith then declared her intention to kill Callie and have sex with Mark in front of a stadium full of other demons. Mark, who had spent the entire episode acting like a doting, enthusiastic father, is understandably freaked out.
* Ugly Americans manages to get himself into all kinds of horrifying and distressful situations.
* Ugly Americans Mark visits Hell, apparently accessible from New York by escalator, and is surprised to see his phone gets five bars down there.
* Ugly Americans of this. Women don't have enough testosterone to survive the pressure down there, so they make do.
* Ugly Americans, since the civilized zombies regard brains in much the same way that recovering alcoholics regard booze.
* "Ugly American" Stereotype: Americans visiting other countries are jerks.
* "Ugly American" Stereotype: The typical unpleasant American tourist.
* "Ugly American" Stereotype: This foreign country sucks! They don't have good food, music, or culture like America does!
* "Ugly American" Stereotype: We're Americans and we can act however we want to act in your country, so deal with it!
* Ugly Americans their entire language is based on the words "Suck my balls!" shouted over and over again. However, the Man-Birds developed subtle nuances that make those three words mean all sorts of things, which humans can imitate with some effort.
* Ugly Americans: The manbirds are a race of half-bird/half-human hailing from an island in the South Pacific that were brought stateside by a taxi driver simply because he thought they were "hilarious as balls". They also picked up his cussing and eventually evolved their own language from it. The result is that "Manbirdese" is a language were the phrase "suck my balls" has more than 500 different meanings. It's also stated to be "the most difficult and least popular language in the world".
* Ugly Americans Twayne gave his job as head of the DOI to Mark, within hours New York City was in flames, floating out to sea, and about to be nuked. Then Twayne fixed everything in less than a minute with a birthday cake.
* Ugly Americans). Under a set of guidelines put down by his dick, they both made up and Randall promised to treat his member as an equal.
* Ugly Americans universe is owned by a Japanese Mega-Corp and run by businessmen.
* Ugly Americans, werewolves turn shortly after being bitten, but retain their intelligence. They're still pretty vicious though, one tore a man's arm off just to get tickets to a magic show. After turning, that man grew his arm back, albeit very slowly (it took the entire episode just to grow the arm to half its original size). They also don't turn back, or it hasn't been shown anyway.
* Ugly Americans, where the Gay Pride Parade powers the New York electric grid.
* Ugly Betty: A black-and-white masque ball provides cover for on-the-lam Claire Meade to talk to her estranged husband again.
* Ugly Betty, actual teen boys; and that quickly led to a rushed coming-out story).
* Ugly Betty, after suffering a heart attack Ignacio falls for his house nurse, Elena, with her returning the feelings. This sparks feelings of resentment and anger from Hilda who views the relationship as inappropriate.
* Ugly Betty and callously states "I'm Wilhelmina Slater and I don't get wet."
* Ugly Betty and went on a cross-country road trip without either of them.
* Ugly Betty, as it is an adaptation of a very popular soap opera for the American audience.
* Ugly Betty: Austin has no last name and is more of a plot device to get Justin to realize his sexuality than an actual character.
* Ugly Betty became a full-blown farce starting about Series 3 and the ratings plummeted.
* Ugly Betty, Betty is about to meet her boyfriend's mother for the first time. Things get off to a bad start, however, when the mother thinks she's there to interview for a maid job.

* Ugly Betty, Betty was told they were having a costume contest at work. When she showed up dressed as a butterfly and no one else was in costume, her response was, "Well then, I guess this means I win!"
* Ugly Betty, Daniel gives Betty one of these while Hilda is giving a speech about being in love with your best friend.
* Ugly Betty, Daniel Meade joins "The Community of the Phoenix", which recruits high-profile followers and has several similar parallels to Scientology. After allowing the Church to make decisions in his personal and professional life, he's saved by Betty just as he reaches Level 7.
* Ugly Betty: Daniel walks in on the villainous Wilhelmina thinking it's his love interest. Turns out that they're sisters.
* Ugly Betty during the second episode, when he is still rather young.
* Ugly Betty ends this way with Betty and Daniel together in London, but not necessarily "together". Again, the lack of resolution may be a result of the series being canceled.
* Ugly Betty episode "Something Wicked This Way Comes", Gio has to pretend to be Betty's boyfriend. When he puts his arm around her, his acting becomes a little too convincing for Henry.
* Ugly Betty finds panicked employees printing resumes, since they're uncertain about the future of Mode. When they notice she's there, Amanda starts eating her resume.
* Ugly Betty: In "Crush'd", Betty is shocked to find Amanda completely naked at Mode early in the morning and immediately asks her to put some clothes on.
* Ugly Betty involved Justin and his parents getting caught on a broken subway on the way to see the Broadway musical "Hairspray."
* Ugly Betty is an author avatar of Silvio Horta when he was younger/growing up/a teen.
* Ugly Betty is a sitcom with an emphasis on fashion and a woman as the lead but was quite successful.
* Ugly Betty is supposed to be a fashion victim, but Season 3 took it way too far when Patricia Fields took over as costume designer. Betty went from frumpy to looking like a deranged clown. And though she's supposed to be poor, these monstrosities were obviously expensive designer items, which she never wore more than once. Also, the people on the show who are supposed to be fashionable didn't look much better.
* Ugly Betty is that what she says are actual, fairly common mistakes among new Spanish speakers.
* Ugly Betty, Kirsten Chenowith urged Betty to run and stop Henry from getting on a plane, and Betty mentioned she had other things she needed to do that day, didn't have the flight number, and would have trouble getting past security. Later Amanda mentioned this as a way for Marc to get back together with Cliff, but as he was in the same room at the time, Marc just went over and talked to him.
* Ugly Betty, Marc "dumps" Amanda as his beard, and she gets revenge by forcing him to use Betty as a new "girlfriend" to show off to his mother.
* Ugly Betty Marc St. James is almost always the funniest character around, though not all the humor comes from him being gay (the creator of the show, Silvio Horta, was also openly gay).
* Ugly Betty: Mark's boyfriend Cliff has one of these at Bradford and Wilhemina's wedding, causing Amanda to quip "Who knew there were hardwood floors under that shag rug?"
* Ugly Betty out of business so it's better to have her using her talents for themselves.
* Ugly Betty that got him sent home after school. The boy's mother later complains about a scratch that that was hidden by the boy's clothes.
* Ugly Betty when Daniel first meets Molly. She falls out of a tree onto him.
* Ugly Betty, which has the added bonus in that non-Spanish speakers will have an even harder time understanding what's going on.
* Ugly Betty zipper that she should have been able to zip up herself. It can be challenging for women with large breasts to zip things on the side — less

maneuverability and if the zipper comes up to your waist or higher you can't even see it. It's doable, but gets awkward.
* Ugly by the sidewalk, a visual cue for the horrible stench and sight of the corpse.
* Ugly Cute in the games with a headful of hair; however, he isn't remotely attractive in the cartoon where he lacks the hair and resembles a crocodile.
* Ugly Cute more likely a reaction is said ugly person is male. Because ugliness in a woman is just unacceptable.
* Uglydolls, Alibaba Pictures, and Huaxia Film Distribution logos as pieces of felt loosely falling onto the backdrop, fitting the "crafted" world of the movie.
* Uglydolls: An Imperfect Adventure Despite this, Wage and Tray (flipped to female as well and changed from pink to purple, respectively) still have their changes for the movie, hinting that the video game was made before the change of the former two. This is despite the fact that the game's plot takes place after the events of the movie, however.
* Uglydolls are compulsive thieves with the tendency to "borrow" from others without the intent of returning. They claim it's their magic trick of turning your stuff into their stuff.
* Uglydolls: A safe-for-work example, Wage wears an apron (because he works at Price Hike, even though he doesn't actually work there) and nothing else. Though, to be fair, there isn't really anything underneath, and Uglies don't usually wear clothes.
* Uglydolls comic has the story "Climb, Wage, Climb!", where Wage gets groomed into being the replacement manager...by getting his head shampooed and getting a facial.
* Uglydolls comic "Know Thy Enemy", superhero Babo and supervillain Big Toe trade places for a day to understand each other. Babo's idea of evil is to fire a laser from space to slice off a mattress tag...much to the absolute shock and horror of Wippy, owner of the mattress emporium.
* Uglydolls comics, Tray brings special berries home from a trip that trick taste buds into non-food items tasting like foods when licked, and vice versa. Before testing the non-food items, Wage complains that popcorn "tastes like a telephone pole", while Babo's cookie "tastes like a hubcap".
* Uglydolls. Everything he touches turns into ice, and he lives in a frozen cave system, but his heart is the warmest part of him.
* Uglydolls has the Uglydolls and Perfection dolls. The Uglydolls are defective stuffed animals that were rejected from the construction line and live in their own misfit world. Meanwhile, the Perfection dolls are yarn-haired humanoid dolls that are instructed to be the perfect toy, where they then graduate into the "real world" and become a doll for a child. The plot starts up when a group of Uglydolls stumble into Perfection.
* Uglydolls has Wedgehead introduced to Uglyville by being launched out of her conveyor belt place (due to being a misfit doll), where a target has a mattress about to be set up for her. Unfortunately for her, the mattress is being moved by Willard, a slow-moving tortoise Uglydoll, causing her to land on the ground before it gets there for her, head-first. This also ends up giving her her trademark wedge-shaped head (her original head was shaped like a duck's tail, as she was a wrongly-assembled duck doll).
* Uglydolls have a giant variety of characters in the line, even out of the core main ones.
* Uglydolls have foods that they are crazy about. The ones mentioned the most are Babo and cookies (to the point he almost always has one in his artwork), Tray and blueberry pie (rumor is that her eyes are blue from eating so much), TooDee and grape drink (he's purple from drinking so much), and Pointy Max and cheese (giving it to him is the only way he'll do what you say).
* Uglydolls is pink with hair-like extensions and thick eyelashes. She is the only Uglydoll in the movie to have the latter.
* Uglydolls, Lucky Bat is given a higher-pitched, childish voice due to being voiced by a woman instead of a man.
* Uglydolls started with David Horvath and Sun-Min Kim, two university students,

separated from each other due to Sun-Min's student visa expiring and her having to move back to Korea before a franchise could start. David wrote her a letter of support with a drawing of the character that would become Wage on it, and she sewed a doll of him as a gift in return. Through an incident that made it seem like they were pitching a toy, more dolls were sewn, more characters were added, and the toy-line was born.
* Uglydolls. The ensuing result is so vile that Ninja Batty Shogun's forced to scrape his tongue with donuts to get the taste out, and then passes out into a fetal position.
* Uglydolls. The song would get frequent airplay on radio stations even after the film left most theaters.
* Uglydolls, the Uglydolls are lumpy and misshapen reject dolls, but they have kind and optimistic hearts. In contrast are the Perfection dolls, pretty and mass-produced fashion dolls that have snobby and disdainful attitudes over anything that's not "perfect".
* Uglydolls. This was the name of story artist David Trumble’s partner’s niece, and was put into the storyboard of the scene as a placeholder. Director Kelly Asbury found the gesture heartwarming and told him to keep it in the final film.
* Uglydolls was announced as director for the film, only to later be replaced by Kelly Asbury. The movie eventually was solidified with an official May 2019 release date, eight years after its announcement.
* Uglydolls was originally named "Gorgeous" in the original toyline. The name "Moxy" was originally given to Ox's younger sister, who doesn't appear to be in the movie's storyline.
* Ugly Duckling's Love Revolution, the drama club is putting on a play for the kindergartners, and after much ado over what fairy tale to do (and what role Hitomi will play), they go with Momotaro, and Hitomi plays a tree.
* ugly face is filling the viewscreen) is that the hideousness of humans has clearly not been exaggerated!
* Ugly Girl Killed at the frenzy surrounding the then-recent killing of JonBenét Ramsey, who was a perfect little princess type.
* Ugly Guy, Hot Wife: A man considered unattractive is married to a woman considered attractive.
* Ugly Guy, Hot Wife: A married couple consisting of an ugly husband and attractive wife.
* Ugly Guy, Hot Wife: An attractive woman marries an unattractive man.
* Ugly Guy, Hot Wife as a whole become discredited. Though it helps that many modern shows using this trope will emphasize on problems that the looks discrepancy can cause in said relationships.
* Ugly Guy, Hot Wife both averts this and plays it straight—unattractive men are shown to be good husband material, yet it still works on the assumption that because the wife is hot, that he was lucky in love even if nothing else is known about her.
* Ugly Hill consists of this... only with the variation that it's "Are we dead yet?"
* Ugly Hill tries to bribe a patent office clerk with a quarter and some pocket lint to ignore that the invention he wants to patent, a pillow that stays cool on both sides, already exists.
* Ugly Hill, where it's shown that Hastings was attempting to convert to Catholicism to marry his first wife Hope, at her request due to her parents being staunchly Catholic. Hastings himself is agnostic and completely uninterested in religion, considering it to be a waste of time. It becomes a moot point due to Hastings accidentally destroying the local churches' saint statues, and getting himself barred for life.
* Ugly John the camp anesthesiologist, but was eventually written off the show when the production staff felt there were too many minor characters to keep writing for. Orchard eventually returned in a guest role in Season Eight as an Australian M.P.
* Ugly Kid Joe are known for exactly two songs: their glam/grunge fusion song

"Everything About You" and their cover of Harry Chapin's "Cat's in the Cradle." Both were top 10 hits, and the band never charted again.
* Ugly Kid Joe's "Neighbor" is a clear musical and lyrical pastiche of
* Ugly Memories attended VMI (a real-life military college in Virginia). The audience never finds out if he's a veteran of an actual war or not. Still, his behavior - especially the profanity-filled lecture he gives his daughter - fits this character type.
* "ugly puppy" trying to fit in with his cat mother and siblings in a comfortable home.
* Ugly Slavic Women: Eastern European women are hideous and masculine-looking.
* Ugly Slavic Women: Eastern European women are ugly and masculine-looking.
* Ugly Slavic Women: The opposite counterpart to the above stereotype.
* Ugly Slavic Women, which led to them being remembered more fondly than their other counterparts.
* ugly the same penchant for ugly-looking girls. Just look at his girlfriend Sachiko.
* UGTO's Assault Carrier, which packs Torpedo Launchers - are examples.
* Uh... a big, dumb, balding North American ape. With no chin. ...And a short temper..
* UHF accidentally feeds his co-host dog treats while filming a promo for butter cookies. His friend gags at the taste, but continues eating them until Al notices his error and transitions smoothly into a promo for the dog treats. His friend then runs off screen to vomit.
* UHF accidentally switches a box of cookies with Yappy's Dog Treats. As he's filming product placement for the cookies, he feeds the dog biscuits to his co-star, who is disgusted by their taste but has to pretend to like them. At the end of the ad, Al recognizes his error and smoothly transitions into a pitch for the dog biscuits, which causes his co-star to run offstage and barf. "That's right! Bobbo's been eating Yappy's Dog Treats! Your dog will love that real liver and tuna taste ... [puking sounds from offstage] ... with just a hint of cheese!"
* UHF, a Korean soldier explodes in a massive fireball after getting shot with an arrow.
* UHF: Although he doesn't actually converse with it, Stanley has an extreme attachment to his first mop, claiming they've never been apart. He nearly panics when it's confiscated after he loses his janitorial job, and the scene where he finds it again is shot and scored like a reunion between long-lost loved ones.
* UHF and Bob get thrown out of Burger World after Al insults the owner, "Big Edna". They go up... then down onto the street across from the parking lot.
* UHF, a typical Saturday morning kid's show, ends up with more than kids wanting to see it.
* UHF brings a contagious energy that quickly spreads to the entire station and makes them the highest-rated channel in town.
* UHF Channel 37 has never been used for broadcast TV in most countries because it would interfere with radio astronomy; it's sometimes used as a dummy channel in instruction manuals. That doesn't mean it won't be found on your cable or satellite TV box, though.
* UHF cooking temperature as well), thus keeping the restaurant from being sued.
* UHF encouraged this by just outlining his scenes and had this to say in the DVD commentary:
* UHF ends with "But, there is one good thing about broadcasting to a town full of mindless sheep: I always know I have them exactly where I want them!"
* UHF features a commercial for "Spatula City." It sells spatulas "And that's all!"
* UHF. George Newman thinks open doors mean it's a friendly place. He isn't wrong, as he meets Philo, who will become a friend and essential ally against Channel 8.
* UHF, George tries to convince his friend Bob to help him run the UHF station he recently became manager of.
* UHF. George (Weird Al Yankovic) leaves a hilariously pleading apology on his girlfriend's answering machine. This was accomplished by having Al stand just out of shot and yell his lines while the girl reacted.

* UHF has a rather bizarre one, with minor cast members wandering in and out at various times. Most notably when Emo Phillips' scenes are on Weird Al wonders whatever happened to the guy only to hear "I'm right behind you". Al also calls Victoria Jackson on the phone during the recording (which she clearly wasn't expecting), and appears on screen a couple of times, once to simply leave and get a snack for the director.
* UHF interviewed a clumsy shop teacher, who then lost one of his thumbs to a table saw.
* UHF is dedicated to Trinidad Silva, who died in an auto accident before filming all his scenes as Raul.
* UHF: Near the end, George holds a telethon to raise funds to buy the station.
* UHF notices — while on air — that the box of cereal he's hawking comes with a free toy. Saying, "Don't let your parents know you do this," he then disassembles the box to get at the toy, making a mess of the cereal.
* UHF of Al's in real life, although he uses vegetarian linkettes nowadays.
* UHF on a hillside. A moment later, they bloodlessly collapse simultaneously.
* UHF, one of Fletcher's men enters the boardroom wearing a cowboy hat with various medallions and beads on it. He tells Fletcher that U62 is gaining popularity only to be shooed out by him. As he's leaving, Fletcher tells him "And take that ridiculous looking thing off!" So, he stops and takes off his moustache.
* UHF parody, with one scene someone is shooting at him repeatedly and still manages to miss him, even when he's firing at him at point-blank range.
* UHF plays with the trope: the game show "Wheel of Fish", where the contestant can choose to win the type of fish the wheel lands on.
* UHF says that the audience members sitting on either side of "the box" in the "Wheel Of Fish" scene were contest winners.
* UHF's character, George, has hit the low point of his life, so he leaves the TV studio saying that he needs a drink. His friend Bob points out that he doesn't drink, and George replies, "Yeah, but I've been meaning to start."
* UHF, Stanley tries to play a similar game with the thugs who kidnapped him. While blindfolded.
* UHF) starts blowing up famous monuments (including the Eiffel Tower and the Colosseum) for no reason at all.
* UHF starts laughing, the two managers under him realize, after a short pause, that they'd better start forcing themselves to laugh along with him.
* UHF struck a deal with KOED-11, the PBS station (part of a statewide network) in Tulsa to build a news set in their studio. The Tulsa station used the set for their own broadcasts for a couple years afterward.
* UHF, the bad guys guarding Stanley Spadowski spend their time playing jacks and making string figures.
* UHF think to swerve aside — but since this is parody, the boulder also swerves to follow him.
* UHF; when a kid finds a marble in a sandbox filled with oatmeal, he wins the prize of drinking from the firehose, which blows him across the room.
* UHF, when Stanley Spedowski makes his big motivational speech about his mop, he makes a metaphor about how when nothing else works you get down and start scrubbing with a toothbrush.
* "Uh-Oh" Eyes: A subindex of tropes for when a change in someone's eyes is a sign of danger.
* "Uh-Oh" Eyes, but the heavy eye-makeup and impossibly long fake lashes don't help matters. Subverted, though, in that Mag is one of only two good-hearted people in the entire movie, and the makeup is probably imposed on her- when she's viewed in flashback before she was lured by GeneCo, her eye makeup looks much more natural.
* Uh-Oh, It’s a Dinosaur: Kyra has a bad case of this. Understandable, as she's a two-year-old lizard who was raised in a lab.
* Uh-Oh, It’s a Dinosaur: Kyra's claws, which can slice and dice small neighborhood animals with ease.
* Uh Oh!, which is played with teams of two. There were a few mini-games chosen by a wheel. The titular Uh Oh! space challenged the player who landed on it with a

question. If the player got it right, the team got points, but getting it wrong results in slime being dumped... on their partner.
* uh, sorry, Cherry Comics Cherry dons a yellow jumpsuit, and as "May O'Doul" reports on the Young Genetically-Altered Samurai Lizards Warhol, Picasso, Lichenstein and Keane. And then of course she has sex with all of them.
* Uh, So This Is My Team?", Samey tries to get a high-five from Max, only to be told that "evil does not high-five".
* Uhtred is implied not to have many friends due to his obsessive desire to stand out from his family and
* Uhura gave Spock the "It's not you, it's me" speech when they broke up at the beginning of
* Uhura's headset looks very much like the Bluetooth headsets of today.
* Uhura sits sideways on her chair when she wants to look out the window. This may be for
* Uhu! who has to smile genuinely at least once, and a guy who is supposed to hang up a painting but is too lazy and busy screwing around to want to leave. Tasks given to other ghosts are usually resolved in the same episode they appear, though. Meanwhile, Polter is a ghost with a unique mission: He may only leave once he has seen all the other ghosts through their tasks.
* Ui by the fact that she is the band's costume designer/creator... but still.
* UK advertising for Halls cough sweets. The regular "vapour action" menthol sweets are like your head turning into an air conditioner, or sticking your head out of an aeroplane. Soothers, on the other hand, are like having your sore throat kissed better by a member of the opposite sex.
* UK advertising for Rice Krispie Squares claims (among other things) that if you buy two you get a free boat, that the Rocky Road flavor is
* UK adverts for Rice Krispie Squares make utterly ridiculous claims about the ingredients or manufacturing (for instance that the Rocky Road
* UK adverts for washing machines often have a short section at the end recommending a particular brand of detergent to use in them.
* UK and US keyboard layouts have some different locations for certain symbols — in particular, @ and " are above 2 and ' respectively in the US keyboard layout, but are the other way around in the UK layout.
* UK artist Estelle's popular song "American Boy" lists off all the places in the US she'd like to visit, with New York listed first and more often than any other place (5 times). It also mentions Broadway and Brooklyn.
* UK broadsheet newspaper was originally printed on pink (i.e. unbleached) newsprint because it was cheaper. In time, white newsprint became ubiquitous and therefore the cheaper option, but by then everyone expected the FT to be pink. The modern newspaper is printed on white paper that has been dyed. So first the paper is bleached, then it's dyed to look unbleached.
* UK channel ITV and its sister channel ITV2 are known for frequently showing the
* UK comedian Diane Morgan asking why whenever a pretty girl gets killed, people say "look how pretty she was" as though it's
* UK confectionary Trio (consisting of a candy bar that is a chocolate-covered biscuit with toffee fillings) had its mascot Suzy sing about wanting Trios to the tune of "Day-O (The Banana Boat Song)".
* UK dance-pop group D Mob hit the scene in 1988 with the singles "We Call It Acieed" and "It's Time To Get Funky", which both peaked at the top of the U.S. Dance charts. Soon after, they would bring a special guest vocalist onboard named Cathy Dennis, who would lead the group to a second pair of top-selling U.S. hits with "C'mon and Get My Love" and "That's The Way The World Works" one year later. Those would be D Mob's last appearances on the top charts, as subsequent singles (sans Dennis) failed to replicate the success and slid far down the charts. Dennis, meanwhile, would embark on a solo career that not only saw her net four Top 10 U.S. singles over the next three years, but a near-unparalleled songwriting career that saw her write some of pop's biggest hits, including
* UK DJ Mike Reid was forced to apologize in 2014 after causing offence with his '
* UK eBay seller eStocks / Music Magpie sells the majority of its CDs for

£1.27, and whilst it rarely goes below, it has many Buy 1 Get One Free offers on CD singles to counteract this.
* Ukefication: A previously competent male character is made more emotional and effeminate in a fanfic, often to play as "the bottom half" of a same-sex pairing.
* Ukefication: Taking a character that's canonically tough and weakening them to the point of a featherweight in the name of slash fic.
* ukefied is "stoic, collected, and mildly psychopathic with a sadistic twist".
* Uke he can be involved in this if he is shipped with Grimmjow, Gin, Hollow Ichigo, or Aizen.
* UK example for the 1970s: "Lipsmackinthirstquenchinacetastinmotivatingoodbuzzincooltalkinhighwalkinfastlivine vergivincoolfizzin... Pepsi!"
* UK financial journalist Louise Noel's only TV hosting role was the stocks-and-shares game
* UK Game Show Challenge likes giving this treatment to their shows on major holidays.
* UK gameshow network Challenge TV featured an office full of these, based on various gameshows being aired. A swivel chair race for
* UK Hard trance label Tinrib stands out as having a nautical theme, complete with one of these as their mascot.
* Ukiah Oregon alien who uses heavy clothes and similar to disguise his differences when necessary.
* Ukiah Oregon. Later he meets his mother's side of the family, the Cayuse Kicking Deer family. His initial demands for information are rebuffed because he's believed to be an impostor, and no one alive knew his mother, who died centuries ago. He is eventually able to regain some memory of her.
* Ukiah Oregon. They store short term memory in their blood and long term memory in their DNA, and every cell is a pluripotent stem cell that can turn into any other kind of cell at the drop of a hat. Severed pieces can turn into any animal of the right mass that the creature has touched before and flee or keep fighting.
* UK indy wrestler Sha Samuels' gimmick is that he's a football hooligan who
* Ukinojoe, the animator behind Dog of Wisdom and Literally Hitler is really disgusted by sexual artwork of his characters.
* UK instrumental rockers The Shadows' 1962-63 lineup had three out of its four members named Brian, but only one went by his real name and nothing else. The three Brians were: Hank Marvin (b. Brian Robson Rankin) on guitar, Brian "Licorice" Locking on bass, and Brian Bennett on drums.
* UKIP Calypso', a song promoting the anti-immigration policies of the UK Independence Party sung in a fake Caribbean accent.
* Ukitake contracted a lung disease when he was three years old. It was fatal, but his parents tracked down a mysterious holy being to beg for its intervention. It agreed to keep Ukitake alive on the condition that Ukitake repay that debt at a later date. Like Aizen and Ichigo, Ukitake has phenomenal reiatsu even by the standards of captains, but unlike those two, he cannot freely use it; it's tied up just keeping him alive. Despite this, he has made it to captain rank and is one of the longest-serving of all captains. However, his disease can debilitate him at unexpected moments, including in the middle of battle, making him unreliable on the battlefield - a fact that cost the life of his previous lieutenant, Kaien.
* Ukita's death in the middle of the second Kira's first broadcast, Aizawa angrily grabs L's shoulder, demanding to let him go out there and help his friend, and immediately goes quiet when he realizes that L is trembling with fear despite the near-absolute calmness in his voice and the impassive expression on his face. He's just as upset about the situation as Aizawa, but hides it and refuses to let it cloud his judgment.
* Ukita, the member of the task force who charges off to Sakura TV and gets killed by Misa, gets more panels, but less development. His death largely serves to prove that it's possible for a death note user to kill without knowing someone's real name if in possession of the Shinigami Eyes.
* UK Living began in 1993 as a general entertainment channel for women. In 1997,

after being denied from becoming part of
* UK Merchant Navy/US Merchant Marine were well known for being (in practice) accepting of homosexuals compared to the permanent branches of the military and even to most of civilian society prior the gay rights movements improving treatment across the board. This meant homosexuals were far overrepresented in the merchant fleets at those times.
* UK off-licence chain Oddbins invoked this trope in their ads in the run-up to the 2012 Olympics, referencing the fact that only official licensed adverts could directly refer to them. This led to such Oddbins ads as "We're not allowed to use the name. We're not allowed to mention the location. We're not even allowed to mention the year. But celebrate them with us anyway" and "Celebrate the [CENSORED] with Oddbins" (yes, that's exactly how it was printed).
* Ukoku Sanzo's Muten Sutra, as he shows Sanzo first-hand: literally, 'the power of nothingness'. It also extends to things, though, not just people, but the effect it has on people is what makes it fit the trope.
* Ukraine and Belarus fit as well. Ukraine is a sweet, sensitive, hardworking, tomboyish
* Ukraine Played with, since Russia compares Ukraine and Belarus and says about Ukraine "She's nice, but not much to look at". About Belarus, who in comparison has smaller breasts, he says: "She's pretty, not nice."
* Ukraine Quite understandable for both: the Ukrainian army lost a lot of materiel when Russia annexed Crimea and had already been badly underfunded for years even before the conflict, and the separatists, despite receiving Russian support, are having to make do with whatever equipment they're able to scrounge up and salvage for the majority of their combat operations.
* Ukraine's Crimean bases after Viktor Yanukovich's overthrow and the subsequent Russian military intervention.
* Ukrainian-Israeli Mark Ivanir is frequently cast as basically every kind of Eastern European nationality in existence, from Russian to Yugoslavian and everything in between. Outside of that, he's been generic Jews and unspecified
* Ukrainian Job was played by nearly everyone non stop because it was incredibly easy to use shaped charges to blast open the safes, get the tiara, and escape before the cops arrived (there's even an achievement for doing this in less than 30 seconds), which meant that people could quickly farm loot drops and gain experience points at a fast rate. The developers quickly nerfed the exploit by introducing safes that can't be lockpicked or blown up on Death Wish difficulty and reworking the experience point system to be more rewarding for heists that have multiple days.
* Ukrainian novelist and translator Marko Vovchok, born Mariya Vilinskaya. The pen name alludes to cossack Mark the Wolf, a legendary ancestor of her first husband.
* Ukrainian Resistance fought at the same time against Polish Resistance, German Army, and Russian Army.
* Ukridge's Accident Syndicate" ends with the traitorous Teddy Weeks being at the receiving end of a perfectly-timed tomato to the face.
* Ukridge story, narrator Corky (while caught in one of Ukridge's schemes) is briefly paralyzed by the sight of a stuffed seagull hanging in the corner of a family's living room.
* UK Sight Reading Tournament the notes, while still changing in real time, and the notes becoming notes from other rhythm games. All this pales in comparison to the song's bridge: the notefield displays on one screen in a pile of televisions and is skewed accordingly. The correct TV changes every few seconds, and the last two are rotated.
* UK. Since Shamima's parents are both Bangladeshi citizens, she was technically eligible for one).
* Uktabi Orangutan, on the position of the two monkeys in the background and a later parody card shows the two monkeys again, but now one of them is pregnant.
* UK telephone service provider Lycamobile has a similar problem. You are not told what the phone number of your new SIM card is; to find out, you have to dial *132#. This code only works if you have credit. To get the credit you have to top-up, to

top-up online, you need to register the SIM... and to register it, you need to know the number. The way to break this deadlock is to make the first top-up using a voucher, but if you're housebound and have nobody to go and buy a voucher for you, you're screwed.
* Uktena (the totem spirit of the Uktena tribe) was once a servant of the original balance-Wyrm. When the Wyrm went insane, Uktena promptly defected to the Wyld.
* UK towns have Greasy Spoons too, which are often an inexpensive place to have breakfast or lunch unaffected by the rising prices of major chains, and often provide a traditional British atmosphere that reflects the owners. As a result, they are very appealing to the elderly. Most of them will serve traditional English breakfasts and tea, and in seaside towns, they tend to be more fish themed — you might find the cockney staples of 'pie and mash' or 'jellied eels and liquor'. Unlike American diners, there is not really any pretense to the layout of these places; in fact, looking as nondescript as possible is quite appealing to their clientele. Many of them open in the wee small hours, to cater to market traders and others who work at unsociable hours, and/or drunken students.
* UKTV channel Blighty and gardening channel UKTV Gardens being replaced by lifestyle/reality channel Really (since sold to Discovery).
* UK TV Gold and some American PBS stations used to show classic serials in Compilation Movie format. The color used to
* UKTV in 2010 and rebranded Sky Living the following year. From that point on it was slowly retooled as an investigative drama channel, eventually becoming Sky Witness in 2018.
* UKTV, the larger network of channels responsible for Dave, receives a lot of criticism for cutting documentary programmes to fit normal schedules while leaving comedy intact. (And even comedies have sometimes lost the punchlines to gags because of abrupt commercial breaks.)
* Ukulele Anthem which is all about this trope. It's a satirical song about how ukuleles make people quirkier and happier.
* Ukulele virtuoso Taimane Gardner traditionally performs barefoot, much so that she'll kick her shoes off when doing impromptu performances. Her backup musicians also perform barefoot to fit her motif.
* UK version after the death of Fulton Mackay opened with the Captain's nephew PK taking responsibility for both the lighthouse and Sprocket after his uncle's death.
* UK version of the show had an episode, "Shaken", where a young nanny and her boyfriend were accused of killing her employer's baby. They were arrested and jailed, but the nanny is freed, leaving the boyfriend behind bars. By the end of the episode, the husband's ex-girlfriend (who couldn't have children) confesses that she killed the baby out of rage and depression. The boyfriend is cleared, but the Crown Prosecutors find out that he was beaten to death by another prisoner when they go to get him out of jail.
* Ukyō Kuonji also spent about ten years doing this after Genma stole her father's cart and abandoned her.
* Ukyō, one of Ranma's suitors, wears it at the beginning of the second
* Ukyo finally accepts that Ranma will never return her feelings, and starts recipocrating Konatsu's feelings for her, ultimately marrying him in order to fulfill the agreement made by her father and Genma long ago (Konatsu has been adopted by the Saotomes, making him a Saotome son).
* Ukyo Kuonji: Generally prefers more "nonviolent" approaches to trying to win Ranma, such as setting Akane up on a date with Ryoga, trying to lure Ranma & Akane into a magical
* Ukyo uses both her large spatula and smaller spatulas at one time, though the smaller ones can double as projectile attacks.
* Ulamog, The Infinite Gyre share their progenitor's faceless white skull.
* Ulcus wasn't meant to save mankind, he was meant to save the world by destroying it without the concern on whoever lives in that world
* Uldren Sov is very emotive with his arms, gesturing and waving them around a lot when he’s speaking. He also tends to
* Ulfric generally made their lives a living hell. The opposite is felt by the

Nords, who not only saw Ulfric as a true hero of Skyrim but are generally not fond of non-Nords.
* Ulfric himself gives one at the end of the Imperial route to the Civil War plot:
* Ulfric Stormcloak serves in this role for the Stormcloak Rebellion. Of course
* Ulfric Stormcloak, should you choose to side against the Stormcloaks in the
* Ulfric Stormcloak shows up and starts burning everything to the ground.
* Ulgu, the Lore of Shadows, is the Wind of Magic that allows the caster to manipulate shadows and darkness. The spells of Ulgu involve using shadows for concealment and illusion, as well as
* Uli in 'Ninguém Tá Olhando' (Nobody's Looking) is the first angelus created in hundreds of years and has a habit of asking questions which frustrate his much-older colleagues, and poking his nose into things to find out how they work such that at the end of the first episode he
* Ulillillia's games. The status screen is actually a physical object.
* Ulitharids tower over the common illithids they rule over, typically standing between seven and eight feet in height to the illithids' more human heights.
* Ulla "Sniff" Neumann voiced Shanti in both the Danish and Swedish dubs of
* Uller Uprising has the Chartered Uller Company operate their own military forces on the titular planet. Many of its military personnel are former Federation regulars, and are well trained and equipped.
* Uller Uprising mixed in with the pornography. The main character of the novel is a very HOT Gump.
* Uller Uprising refer to Ullerans as "geeks"—except the Kragans, their closest native allies. The Ullerans, in turn, call the humans "sudabitt", the closest they can get to "son of a bitch". Even the Kragans take to calling all-natives-but-Kragans "geek".
* Ulli's Roy Orbison In Cling-film Website began as a deadpan parody of self-published online erotic fiction expressing very niche fetishes. There was confusion for years about whether it was real before the webmaster finally unmasked and admitted that it was a parody.
* Ulli's Roy Orbison In Clingfilm Website is a brilliant parody of highly-specialized Internet erotic fiction. It's pretty obviously a joke, but the author never tips his hand.
* Uloboridae spiders, who lack venom glands but compensate it for a particularly nasty way to kill their prey: wrapping them in silk so tightly that its exoeskeleton gets crushed and broken. After that, time for the spider to inject digestive fluids in the package, let them enter into the victim's innards through the wounds caused by coccooning them so, and suck the resulting soup. Lather, rinse, repeat, and all of this taking place while the prey is still alive.
* U.L. Paper contact is the fact that they are sitting in a building with at least a hundred people matching his description (paunchy, middle aged, glasses).
* Ulquiorra appears from the start to be Aizen's right-hand man among the Espada, and the ultimate target everyone needs to reach to save Orihime. When Ulquiorra realises Ichigo thinks he's the top Espada, he reveals he's only the fourth Espada. That said, during his final battle with Ichigo, he reveals a second
* Ulquiorra asks for this before he dies. Ichigo doesn't, and, well,
* Ulquiorra Cifer becomes more and more infuriated with Ichigo during their battle in Hueco Mundo, to the point where he actually starts to yell. It's only as he dies that he finally understands the truth about emotion and the value of the heart.
* Ulquiorra Cifer is highly associated with darkness and the color black. His hair is black, and when he transforms into his Ressureccion, he gains a pair of black wings and his Reiatsu turns from dark green to jet black with a green outline. He can fire a jet black colored Cero called Cero Oscruras, though Ulquiorra implies that any Espada can use it when in Resurreccion. In his Ressurection: Segunda Etapa, his lower body is covered in dark fur, his arms are colored black, and a dark substance pours down from his Hollow hole.
* Ulquiorra Cifer's Las Noches uniform, with two tails that sweep the floor dramatically.
* Ulquiorra doesn't need to eat, as he can sustain himself through mana

absorption. However while he doesn't specifically need to eat, he has experimented with a few foods on occasion.
* Ulquiorra does this on multiple occasions, sometimes in the same battle. In one instance, after Ichigo has thrown everything he's got at him, Ulquiorra uses Ichigo's zanpakto, which Ichigo is trying to impale him on, to slice his shirt off to show off his Espada number.
* Ulquiorra gets bonus points for actually calling his foes “trash.”
* Ulquiorra Schiffer has bone-white skin and jet black hair and his colouring stands out from all other characters around him as a result. He's a symbol of nihilism and his lifeless pallor is part of his theme of not truly understand what it means to live.
* Ulquiorra's hole is an interesting case, as it starts in his neck before migrating down over the course of the story. His usage of the trope is mildly lampshaded in the story as Ulquiorra tends to punch a hole in his enemies exactly where his own hollow hole is located (and when he does it to Ichigo, Ichigo almost dies).
* Ulquiorra threatens to force-feed Orihime, strap her down on a table, and give her IVs when she
* Ulquiorra took this line with Ichigo after their first confrontation, but later acknowledged him as someone that "needs to be eliminated" and started fighting him more seriously. Ichigo
* , Ulrich is The Voiceless. He says a total of two syllables — blink and you'll miss it.
* Ulrich Stern is no slouch either, especially when Odd isn't around and he feels the need to take his friend's place at making lame jokes.
* Ulrich Stern uses a real katana to great effect in the beginning and end of
* Ulrik Wilbek, the Danish handball coaching legend. He took over the Danish women's national team in 1993 (a team that almost got shut down due to bad results), resulting in a silver medal in the world championships that year. Following that was a victory at the European championship (1994) and a bronze medal at the world championships (1995). After that, the Danish team won the handball treble (continental champions+world champions+Olympic champions - greatest thing you can do in that sport), which no other team has won before them, winning at the olympics in 1996, European championship later the same year and the world championship in 1997, before he left the team. Before the Euro championships in 2006, he took over the men's team, who worked their way to a bronze medal in 2006 and again at the world championships in 2007, before winning the Euro championships in 2008, where a rock solid defence got the Danish team to victory. The olympics 2008 was the first time a Danish NT led by Wilbek had to leave a big tournament without a medal to show for it. In other words, Wilbek brought Danish women's handball from shit to the world top, then brought Danish men's handball to the top of world handball. He has been present at 14 big international tournaments with the two Danish teams and has 11 medals (5 gold, 2 silver, 4 bronze) to show for it, with teams that weren't expected to win anything before he took over. He has stated that he will retire from coaching the men's team in 2014, probably with some more medals to show for it.
* Ulster Scots, a very specific group. Of course, not all Americans who claim Scotch-Irish heritage are aware of that history, or understand the distinctions, and may indeed think of themselves as simply having both Scottish and Irish heritage. And good luck finding anyone (including most Britons!) who can find the Channel Islands, Shetlands, or Orkneys on a map. Virtually no one can even name any of them.
* Ulster Television - the ITV region chartered to provide commercial TV to the six counties of the North.
* ultamite nineball: "Ahh he yelled as he slashed him his blood hit the floor."
* Ultear and Bluenote are Hades’ most trusted right-hands, with the former serving as the leader of the Seven Kin of Purgatory, while the latter serves as the sub-commander of Grimoire Heart.
* Ultear interfere with the power of the latter, including unfreezing those trapped

in the frozen time.
* Ultear's goal for most of her life was to find a magical Reset Button that could give her back her lost childhood. At one point she thought she found it when she discovered the
* Ultear's rationale in a nutshell. She’s willing to commit most any and all atrocities because if she succeeds, she’ll unlock
* Ulthuan has a natural one in the form of the Annulii Mountains. Traversable only through one strait and few heavily guarded passes, they protect the inner High Elf kingdoms from outside threats.
* Ultima after casting the spell, so pretty much everyone who ever played these games cast the spell once and only once to see what happens, before reverting to an earlier savegame.
* Ultima, and while he's white-haired in the ninth game, it's explained to be due to despair over his failing kingdom rather than age. Likewise, the Warriors of Virtue (the Avatar's companions) are still fit for a fight, as are a whole lot of other recurring characters. Taking the prize for inexplicable youth is Sherry the Mouse, a talking but otherwise fairly ordinary mouse who has weathered the two hundred years between the sixth and seventh game without any trouble at all.
* Ultima. As a result, the dates in chapter headings are given in both AD and AUC years (e.g. the book begins in 2227 AD and 2980 AUC).
* Ultima as the number of monsters are narrowed down, and there are no elves, halflings, or orcs in sight, making the setting richer by showing less is more.
* Ultima based on Richard Garriott, specifically his Society for Creative Anachronism persona.
* Ultima beta test where, following a crash, Lord British' invulnerability flag was unknowingly turned off, and a player killed him with a hastily-stolen firefield spell on the spur of the moment during a public gathering. The guards moved in, the players fought back, and the whole thing turned into an in-game riot.
* Ultima character, but still doesn't provide his/her own character dynamic to the companions since he is never given dialogue (only keywords).
* Ultima classes: the former fights to fulfill their passion for fighting, while the latter fights to fulfill their code of honor.
* Ultima flat and rectangular, surrounded on all sides by an ethereal void).
* Ultima games came with a cloth map of Britannia, along with other game-specific feelies. For the record, these were:
* Ultima game series, so that with each game, the same main character visits a different time era.
* Ultima games is essentially early medieval/Arthurian England recreated on another planet, with religious elements derived from Hinduism and other places.
* Ultima games, there is the Glass Sword. Good news: one hit should kill anything. Bad news: it only lasts for one hit.
* Ultima had four manga adaptations when it was translated into Japanese in order to build interest. The plots range from quite divergent to completely original.
* Ultima, have The Avatar trigger continent wide destructive magical forces before leaving for another dimension without fully reverting the effects of those disasters.
* Ultima. He does admittedly have only one sprite like everyone else, but it still looks rather funny.
* Ultima, he insists on being called 'Lord British', and he's been into space.
* Ultima I, as part of the main plot, requires the player to launch into space and kill 20 enemy ships, thereby becoming a "Space Ace."
* Ultima I had spells which allowed you to instantly travel one floor up or one floor down inside a dungeon. Using these, you could skip all the dungeons entirely by simply spellcasting your way down to the appropriate level, killing whatever quest monster you were sent there for, then spellcasting your way back to the surface. Later games kept the spells, but subverted the trope by making your objectives in the dungeons more complex.
* Ultima III are highly overleveled, fast, and like to respawn a lot. Stealing treasure or worse, attacking royalty tends to bring them out in force.

* Ultima III is notorious for mentioning objects in dialogue that never appear anywhere in the game.
* Ultima III on the NES, played straight with the blue Alchemist, Druid, Fighter and Wizard, and pink Cleric, Illusionist, Lark and Paladin. Averted with the pink Barbarian, Thief, and Ranger.
* Ultima III the only difference. No change in stats, health, damage dealth, weaknesses... Just Orcs, Goblins and Trolls, all exactly the same.
* Ultima III: You can drum up some quick, easy cash by creating new characters for the party with the express intent of selling all of their equipment. There's even a place in a town where you can donate blood (reduction of hit points) and you get payment for it! So before you delete those naked characters you can sell almost all of their blood for cash!
* Ultima in order to focus exclusively on honing their physical abilities.
* Ultima in the Sevii Islands trains starter Pokémon to unlock the full potential of the Ultimate Moves. Her own Pokémon are not to be taken lightly.
* Ultima is written with the clear expectation that you should be the diametric opposite of this, there is the fact that Virtues can't actually go below zero. So there's nothing stopping you from spending the first part of the game stealing, murdering city guards for money and experience, abusing the trust of blind herbalists by underpaying them for their services, and messing around with incredibly evil skulls... until you have a few levels under your belt, plenty of money, and reagents for your spells, at which point you turn into a living saint. Also, while giving money to beggars is Compassionate, doing so by giving one coin at a time (to maximise the reward) is questionable ethics.
* Ultima, it is stored on a faraway volcanic island with guardians that only let you pass if you're on a Sacred Quest; in the sixth game, it still is, and your final quest is to send it back to the void).
* Ultima IV Dragon Edition includes physical Tarot cards based on the eight virtues.
* Ultima IV. Due to a bug, he failed to deliver a critical clue in IV, and every later appearance he would remember something important he had to tell the Avatar: information that would've shortened the previous game had he relayed it then.
* Ultima IV has both a command and a spell for each letter of the keyboard, leading to some oddities like (z)tats and (k)limb.
* Ultima IV, there is no villain and most of the work involved in completing the quest involves simply acting virtuously.
* Ultima IV to you and then teleports you to the parallel world of Britannia (with your exact destination depending on the results of said quiz).
* Ultima IV was ported to the NES, the female tinker Julia was changed to the male Julius.
* Ultima IV will allow you to skip straight to the bottom level of Dungeon Hythloth, whereby all three altar rooms can be accessed. The stones still take some doing, but since the altar rooms connect the bottom floors of all seven dungeons, and the stones tend to be on the lower floors...
* Ultima IX at how the Avatar had turned into a complete ditz that forgot stuff that was not only basic knowledge but also deeply personal to him. Say it with us, folks; "What's a Paladin?"
* Ultima IX Dragon Edition came with an ankh pendant and eight virtue tarot cards.
* Ultima IX: During ALL the game it's said that you won't be back to Earth nor Britannia (the planet where the game is set) but you will ascend to another form of existence. The full name of that game is "Ultima IX: Ascension". No less.
* Ultima IX in the history of the series, not one of which become relevant to this game.
* Ultima IX. Inverted and subverted; the heist already took place before the player arrived at the scene, and none of the rest of the exhibit becomes relevant again.
* Ultima IX). It's also felt by many fans to be contrary to the lore and the entire moral of the fourth game that the Avatar is still a flawed human being.
* Ultima IX: The grave for Lord Brinne in Britain cemetery is a memorial for Bill

Iburg, who went by Lord Brinne on the "Ultima Horizons" community, and passed away before the game's release.
* Ultima IX was given a Christmas release date by EA while still in development, with missing content that would have made it in if they had waited at least the following Christmas.
* Ultima Java as a reference to DC comics Earth 2, where the Golden Age originally took place.
* Ultima Java has an interesting example; there are many alternate universes, but each universe has a corridor connecting different worlds within that universe. So, in effect, universes within universes.
* Ultima just serves to confuse matters further. This doesn't explain how the Avatar's companions, Lord British, and Blackthorn can live for centuries (OK, Blackthorn spent time on Serpent Isle, but still).
* Ultima magic constructs, with nearly all of them being hollow geometric objects containing a smaller copy of themselves inside.
* Ultima: Most of the games have one or more "Summon Creature" spells, ranging from rats to insect swarms to demons. All of these created them as friendly NPCs that fought until killed or the summoning wore off.
* Ultimania – note also she's got a different surname to her son).
* Ultima novels feature new characters and settings inspired by the main games, along with different character interpretations and personalities.
* Ultima of Richard Garriot and his friends, most notably Lord British and The Companions of The Avatar. As a matter of fact, much of the series was a winking fictionalization of the Society For Creative Anachronism's activities.
* Ultima Online 2. It would have been released sometime around 2000-2001.
* Ultima Online are nigh-invulnerable teleporters who kill with one hit.
* Ultima Online had this happen and decrease in likeliness as you gained more skill. Due to poor balancing the boots were a far better catch then the fish; food was in abundant supply and boots sold for more.
* Ultima Online has an array to choose from. Bipedal dinosaurs without front arms called ostards, llamas, ki-rins, and giant beetles are among the choices.
* Ultima Online over time, with elves, orcs, ninja, samurai, paladins, necromancers, cyborgs, and anything else the developers could think of, making the setting more generic (and sorely disappointing Lord British).
* Ultima Online zig-zags with the trope with its "free shards", reverse-engineered copies of the MMO, which provides fans with highly moddable versions of the game. Even Game Moderators and Event Managers own and create these shards, and some of the coolest ones are even used as the basis for new expansions and patches. But the terms of service explicitly say that playing on a free shard will get your account permanently banned; thankfully, this term is not really enforced.
* Ultima Resurrection would have been a hack n' slash game for the PSP released around 2005-2006.
* Ultima series, and are often necessary to obtain certain critical supplies. The tinker class also seems to function as something of a stand-in for most games' Rogue class.
* Ultima series had Moongates, which got cooler and cooler each game up to the 9th. Drop a pebble in a ring of standing stones, and with a clap of thunder a bright, shimmering indigo gate springs from the ground.
* Ultima series has its own Armageddon spell. It empties the planet, save for two or three people, and they are very upset.
* Ultima series is original, it does repurpose "Rule Britannia" to be the theme for Lord British, even going so far as to use a version in a minopr key for while he was captured by the Shadowlords.
* Ultima series, the various color-coded potions do a variety of things, but the green potion is always poison, and a poisoned character's health bar turns green. Furthermore, some of the games had green swamps that would poison your character if you walked through them without special swamp boots (also green).
* Ultima series try to create a realistic world that operates regardless of the player's involvement. In addition to armor and weapon shops, towns have jewelry

stores, bakeries, restaurants, and other "useless" buildings. Played with, as sometimes the next step in the Avatar's quest requires unusual materials that have to be commissioned from civilian artisans.
* Ultima series, two of the six Ophidian Virtues are known as Ethicality (adhere to the rules of conduct) and Tolerance (accept that the world is what it is and that you're part of it). They are considered opposing Virtues by the forces of Law and Chaos, but in actuality it is necessary to balance both against each other, resulting in the Virtue of Harmony (be at peace with yorself and the world).
* Ultimate added transformations back in. Since the Switch deals only in solid state memory devices, load times are back to near-instant.
* Ultimate Admiral Age Of Sail Replicating this period is rather the point of the whole game.
* Ultimate Admiral: Dreadnoughts, guns are inaccurate enough that it's possible that your (or the enemy's) guns might actually land a devastating hit on a ship that they weren't actually aiming at. The tighter the formation that the target ship is sailing in, the more likely this will happen.
* Ultimate Admiral: Dreadnoughts is a strategy/ship design game that allows you to build your own steam-era warships and then pit them against the enemy's proceduralally generated ship designs. The ship designer is flexible enough for you to faithfully recreate many real-life ships or create something completely unique, and then watch them do battle in glorious 3D real-time battle.
* Ultimate Admiral: Dreadnoughts. Often light ships must fling themselves into the fray in the hopes that their sacrifice will buy enough time for a convoy to escape, and/or for heavy ships to come into range to demolish the attackers.
* Ultimate Admiral: Dreadnoughts. So you will never see them getting torn to pieces by incoming shells, flung into the air by explosions, lit on fire, or floating away from a sinking wreck.
* Ultimate Alien stays behind in her home dimension, sealed off from the outside world forever, in hopes of finally freeing it from its evil ruler.
* Ultimate, all three female ninjas used their own stances; Noob, Ermac, Masked Sub-Zero, and Human Smoke used Scorpion's.
* Ultimate Anthropologist Korekiyo Shinguji's birthday is July 31, sharing with the most famous Japanese anthropologist Kunio Yanagita.
* Ultimate Aunt May is quite the proverbial badass as well, so much so that she chewed J. Jonah Jameson out for being mean to Peter.
* Ultimate Authority Mayor: A mayor has more power than a mayor would have in real life.
* Ultimate Authority Mayor: The mayor has more power than they would in real life.
* Ultimate Avengers aliens, the Chitauri are a name comic fans recognize.
* Ultimate Avengers (an ACTUAL GOD) in two blows. Cap gets thrown all over the place and manages to endure around/over FOUR. Sure, he's bleeding and disoriented afterwards, but logically he shouldn't even be conscious.
* Ultimate Avengers despite being a major character in the original series.
* Ultimate Avengers has Bruce Banner's plot of using the Super Soldier Serum on himself so he could control the Hulk has been discovered so he gives out this explanation before being pinned down by Nick Fury.
* Ultimate Avengers: The Defcon is raised to 4 when aliens are spotted, and then "raised" again to 5 once the aliens actually begin to attack military installations.
* Ultimate Avengers to go running with their tails between their legs, they now have to deal with an out-of-control Hulk afterward.
* Ultimate Avengers: Tyrone Cash, of a sorts. He has a haircut that leaves a good portion of his head bald and his remaining hair in the style of a tribal tattoo. It looks intimidating as hell when he's hulked out.
* Ultimate Baseball Kid. He looks like a ten-year-old little leaguer, but his effect grants him 1,000 extra Attack Points for every Fire-Attribute monster on the field (except himself) making him lethal in the right type of deck.
* Ultimate Battle Royale, but fails due to being slow and clunky, with horrible controls and constant advertisements with every move the player makes.

* ultimate being), making the closest thing to a true Ultimate One of Earth.
* Ultimate Blacksmith: This guy can turn the most useless junk into a weapon of asskicking.
* Ultimate Blacksmith Totosai rides on a three-eyed (probably youkai) ox.
* Ultimate Book of Spells: In "Shadow Land," the shadow creature working for Zarlak only does so because Zarlak is holding his family hostage.
* Ultimate Campaign rulebook, which also includes rules for building your own stronghold or running your own business or organization between adventurers.
* Ultimate Captain America, a different character than the classic, also went through the refreezing. He associates better with his few surviving friends and is very stuck in the past. When he learned that Hank Pym assaulting his miniaturized wife with bug spray and mind-controlled ants was merely the latest attack in a years-long abusive relationship, he storms off, smacks Hank around until he goes giant, and then and only then kicks Hank's sixty-foot tall (naked!) rear end.
* Ultimate Captain America. As much as he identifies himself as a war hero, he actually admits he despises people who glorify war and battle, calling it a horrible experience that he made himself proficient in so he could end it as quickly as possible.
* Ultimate Captain America, sort of. Ever since Peter's death, his old-fashioned approach started to whither away. When he eventually came back and met Miles Morales, he started to be more accepting of the kid and eventually became his greatest supporter (he even had Miles fight along side the Ultimates which is something he deliberately banned Peter from doing). He reserves his initial gruff persona for those who wastes his time(the representative of the then defected California) or people who he knows can do better (the lawyers arguing for and against the incarceration of Bruce Banner). By the end of the Ultimate Comics run, Captain America is just a less tolerant but still heroic version of his 616 counterpart instead of a straight up hero.
* Ultimate Care II was an album made entirely from their Whirlpool Ultimate Care II washing machine, sequenced to mimic the cycle of an actual load of wash.
* Ultimate Carnage is even worse: he assimilates people's DNA to try to complete himself, the process of which leaves them drained, skeletal husks. Because a writer got the two mixed up, the main universe Carnage also displayed this trait once — or
* Ultimate Chicken Horse are Canadian, so, of course, one of the items you can place is an automated hockey puck shooter. It's also one of the more effective traps in the game, as its projectiles instantly travel across the entire screen, meaning the warning buzzer is the only chance you have of dodging it.
* Ultimate Chicken Horse features a special coin on an altar to the right, which, if one of the players can grab and successfully take it to the end, offers a point bonus. However, the moment the coin is taken, a boulder will crash from beyond the altar and roll to the left, which is where the exit is located. The coin itself respawns every round whether taken or not.
* Ultimate Chicken Horse, the Dance Party level renders all characters and objects as black silhouettes, and also has black bars moving across the screen in various patterns, making it hard to see.
* Ultimate Comics: Avengers, Gregory Stark is introduced as Tony's twin brother. He has blond hair and wears white suits.
* Ultimate Comics: Avengers kept under heavy security by SHIELD as part of a Black Ops group. According to the team leader, he can "drive a man to suicide in three or four exchanges."
* Ultimate Comics Avengers. Promising scientist, married to an activist, has a baby. Great life, right? Then the Red Skull shows up because he's working for the side the husband is protesting against. The scientist, forced to choose between her husband and child, kills her husband, only for the Skull to toss her baby out a third-story window, then allow his men to gangrape her. She ended up going into bioterrorism, before being caught by the US government, brain-chipped to make her comply with orders, and put on Fury's new black ops team.
* Ultimate Comics New Ultimates ends with a shot of the heroes about to start a

fight against The Defenders.
* Ultimate Comics: The Ultimates, the power of a secret cabal of industrial multimillionaires called the Kratos Club is showcased when they meddle in a South American conflict only because the result would benefit them. Their intervention causes the detonation of a nuclear bomb in the South American country of Uruguay. Of course, the consequences of this course of action are barely touched.
* Ultimate Comics using an iMan, a minimalist Iron Man suit thin enough to be worn under his clothes undetected. It also had pulse blast powerful enough to blow a finely-edged hole in whatever he was aiming at, the wall behind, and the building behind that.
* Ultimate content. Then everything goes dark, and a familiar logo can be seen reflecting in the female Inkling's eye...
* Ultimate controls. Of course, some bold souls opt to play the mode without using any Spirits, but given that most of the fights are firmly in the puppet fighters' favor unless you use them, it can be incredibly tough, especially considering there are already battles that are maddeningly difficult even with a good team of Spirits.
* Ultimate counterpart starts off fighting the Enforcers and Electro, all of whom are working for Wilson Fisk.
* Ultimate counterpart takes this to frightening extremes, outright believing that normal humans deserve to be exterminated (save for a couple kept in a zoo for conservationist purposes, of course).
* Ultimate, courtesy of Jan Valentine, in the moments before his demise.
* Ultimate Custom Night. And all of them can either kill you or make it significantly easier for the others to do so.
* Ultimate Custom Night animation has her shaking her head and flapping her arms violently.
* Ultimate Custom Night does this to all the animatronics featured in the game.
* Ultimate Daizyujin, a robot mammoth/mastodon, a robot triceratops, a robot smilodon, and a robot pterosaur, and a robot aquatic dragon. Remove the chest armor and tail from the dragon, and retract its missile-launcher hands into the shoulders. Then tilt the feet around, split it at the middle, and put it on the humanoid robot as armor, making sure to tilt the head crest up. Put the brachiosaur's chestplate (which has several firing barrels) on the humanoid robot's chest, and put its front paws on the humanoid robot as gauntlets. Attach the dragon's tail to the and chestplate to the brachiosaurus in the appropriate spots. Then stand the humanoid robot in a bay in the brachiosaurus' back. Voila. The resulting machine can roll along at a good clip, and packs enough firepower to blow up even the devil.
* Ultimate Daredevil & Elektra: Elektra does not want to hear anything about Phoebe and Melissa gossiping about her crush. But when she hears that Phoebe knows the name of the man she liked, she's suddenly very interested to hear it.
* Ultimate Daredevil & Elektra: Elektra fell in love with Matt when she first saw him.
* Ultimate Daredevil & Elektra: Elektra leaves her dorm, ready to kill Trey. She takes all her belongings, leaving only a goodbye note for Phoebe and Melissa.
* Ultimate Daredevil & Elektra: Elektra overhears the cops saying that "Right now Ms. Beckerman can make the ID. Tomorrow might be another matter entirely". She asked for clarifications. But no, they do not think that she lies. They fear that, if she thinks about it and remembers Trey's contacts, she may withdraw her testimony to avoid trouble.
* Ultimate Daredevil & Elektra: Matt and Elektra are fighting, and get close to each other. Matt was about to make her hear to reason and kiss her, but she interrupted the moment.
* Ultimate Daredevil & Elektra: Matt and Foggy are always together, so Phoebe had thought that they were gay.
* Ultimate Daredevil & Elektra: Melissa and Phoebe set a trap for Trey, gloat about it once he's no longer in sight... and failed to notice that they did so right in front of Matt.

* Ultimate Daredevil & Elektra raping one of Elektra's friends and her going after him for it.
* Ultimate Daredevil & Elektra: Trey did not burn the shop of Elektra's father himself. He sent people hired for that.
* Ultimate Daredevil & Elektra: Trey gets away with everything he does (from bullying to attempted murder) because his father is a powerful politician.
* Ultimate Daredevil & Elektra: Trey took a gun, set a trap for Elektra and was ready to kill her. But she was ready for him, took him from the back by surprise, forced him to drop the gun... and the rest is too humiliating to detail.
* Ultimate, Dark Samus has their own version of Samus's Final Smash, the Phazon Laser.
* Ultimate DCU Headverse get up; however, Linda's weight yanks the red-haired woman down. Kate falls on top of the blonde woman and blacks out when her head hits Linda's.
* Ultimate DCU Headverse, Kara blames herself for Barbara's paralyzed legs only because she was not around to stop the Joker from shooting her friend.
* Ultimate DCU Headverse, Linda takes Kate her home after she gets accidentally knocked out. As Linda is serving Kate breakfast and speaking to her, the red-haired woman zones out several times during their conversation due to finding Linda's low cleavage very interesting.
* Ultimate DCU Headverse, who is still pretending to be a normal civilian around Kate Kane, accidentally reveals she knows Wonder Woman intimately; so, she quickly invents a lame story to explain why she has become desensitized to the sight of Wonder Woman naked.
* Ultimate Doom Episode 4 Map 1 ("Hell Beneath") UV-Max from pistol start without taking damage.
* Ultimate Enemy decides that blowing up buildings with tentacle monsters is a good way to stop people from using science for the wrong reasons.
* Ultimate Epic Battle Simulator can have armies numbering well into the hundreds of thousands duking it out, which naturally means that individual unit AI seems to be a very low priority. Consequently, the only thing armies can really manage by themselves is to run in the direction of the closest enemy, then begin attacking the moment the enemy is in range until they are dead.
* Ultimate Evil claims outright that the First cannot be fought or killed. It has been around since before the universe came into existence, and will continue to exist long after everything else is dead.
* Ultimate Example: Walk forwards. Now do the same thing in reverse. You're right where you started again, aren't you.
* Ultimate Fallout. It was attended by all the city, and we saw the way most characters coped with his death. The comic also included Tony Stark having a flashback to the funeral of his brother Gregory.
* Ultimate Fantastic Four. After coming back from the dead, he was put in charge of the Baxter Building project instead.
* Ultimate Fantastic Four, and Ben and Reed are both angstier. All of this can probably be attributed to their younger ages.
* Ultimate Fantastic Four, and his first act of villainy was to kill all his family.
* Ultimate Fantastic Four as the Phoenix Force powered-Namor drowns most Wankadans with a massive wave.
* Ultimate Fantastic Four, at age 10 Victor Van Damme had to be able to recite his ancestry starting from Vladimir Tepes.
* Ultimate Fantastic Four, both Strange Josie and Namor have wondered enviously why Susan Storm is dating Reed Richards.
* Ultimate Fantastic Four by Reed Richards as the Fantasticar gets shot down.
* Ultimate Fantastic Four crossover, Ultimate Reed Richards finds himself trapped in the Marvel Zombie universe with Magneto and a handful of human survivors. They are found by the rest of the Ultimate Fantastic Four and hurry to escape the building. Ben heroically breaks down a wall so they can get out and Reed points out that the door was right there.

* Ultimate Fantastic Four. Despite the thorough humiliation of showing up at a fancy party dressed as Carmen Miranda when he's already a gigantic rock-skinned thing, Grimm hooks up with Alicia Masters shortly afterward. Before getting over the prank and meeting Alicia, he reveals that he's tried and failed to kill himself due to his invulnerability and wonders if Reed can find a way to kill him. Then they try to time travel to undo his origin story. Johnny's prank tore open a still fresh wound.
* Ultimate Fantastic Four for Ben. Otherwise, Ben taking a stroll through Times Square could result in the destruction of New York City itself.
* Ultimate Fantastic Four hard to justify Johnny. He also has a protective layer of microscopic scales to protect him from this flame. Though that still doesn't explain how he flies...
* Ultimate Fantastic Four has one courtesy of self-inflicted brain surgery to boost her own intellect, which left her with a large bald spot that exposes a very ugly, ragged scar and unnaturally bulging skull.
* Ultimate Fantastic Four. He thought that he would be revered as a hero. Instead, he was reviled and forgotten.
* Ultimate Fantastic Four. In a twist, his relationship with Reed is rather good, because Reed is just amoral enough to propose military applications for his work if he thinks it will help him get funding or smooth over his mistakes.
* Ultimate Fantastic Four is a creepy-acting, black-haired woman with a sick-looking pallor to her skin.
* Ultimate Fantastic Four is good-looking, but he never even managed to graduate from high school. It shows, repeatedly. He even seemed convinced he could get pregnant, somehow.
* Ultimate Fantastic Four is the strongest and largest member of the team. He's also pretty big when he's human, too.
* Ultimate Fantastic Four, Reed Richards built a teleporter when he was a child. It's how the Baxter Building found him.
* Ultimate Fantastic Four's Mad Thinker, devised a way to increase her brain's "processing power" by grafting someone else's brain tissue onto her brain, so she killed her little brother because he "wasn't using it anyway" — the implications are roughly equal that he was genuinely mentally deficient or that he simply had a lower IQ than his already-a-genius-but-psychotic sister.
* Ultimate Fantastic Four, Strange Josie was mentioned as one of many Baxter Building students with weird hobbies before appearing as an actual character.
* Ultimate Fantastic Four. Thanos' parenting style didn't lend itself well to considering the thoughts and feelings of others. She kills her own pet just for growling at Ben, then shrugs it off because it was old and "boring".
* Ultimate Fantastic Four that doesn't exist yet with a rushed ending. It's followed by the fairly straightforward "Devils" which involves Diablo kidnapping the Four's loved ones, and them going into the past and beating him up.
* Ultimate Fantastic Four: There are some really gross close-up shots to emphasize this.
* Ultimate Fantastic Four, to the confusion of her teammates. "I screamed like a girl! That's so disappointing."
* Ultimate Fantastic Four, Victor Van Damme, aged 11, had his father drop his entire family history on him, and then leaves him alone in the parlor. Several hours later, Victor realizes that it's his birthday.
* Ultimate Fantastic Four: Victor Van Damme. He acts like an aristocrat, certainly, and has ancestry going back to Vlad the Impaler, which he can recite from memory, which makes him technically one by breeding. He's also an incredibly self-centered bastard who is determined to conquer the world out of his own egotism.
* Ultimate Fantastic Four was a big genius, but could only work in the things that the military was willing to fund and allowed him to. He eventually tired of it and became the Maker, a super villain bent on imposing his inventions on world no matter the cost.
* Ultimate Fantastic Four - When Reed makes contact with some residents of the Negative Zone, their first few exchanges are conducted in binary. After Reed sends

them Pi and the human symbol for 'hydrogen', their computer takes over and downloads the first contact package he prepared.
* Ultimate Fantastic Four, where zombie Mr. Fantastic convinces the soldiers guarding the Frightful Four's cell that he's built a teleporter out of stuff lying around the cell and they promptly disappear. Turns out Zombie Invisible Woman had just made them all invisible so that the guards would open the cell to investigate, whereupon they were eaten.
* Ultimate FF, as he was the villain that kickstarted it all. Now, he's back. He had been trapped in an alternate universe the whole time (as seen in the ending of an earlier adventure); the villain that was involved with the Ultimatum wave and that Grimm killed was someone posing as him during his absence. Ben Grimm simply does not accept that he unknowingly killed Mary Storm, the mother of his girlfriend.
* Ultimate FF. Let's just restrain him, create some forcefield scalpels, and extract the required body fluids for an artificial insemination.
* Ultimate FF: Rick Jones interrupted Iron Man to ask if he talks just to hear himself talk.
* Ultimate FF: Sue can not defend herself from the alternate dimension cyclop monsters while she is giving birth, for obvious reasons. So everybody is out there to protect her.
* Ultimate FF: Sue gets pregnant in Issue #5. Issue #6 takes place nine months later (no wonder why).
* Ultimate Fighting Championship video games were first published by Crave Entertainment, then picked up by TDK Mediactive, then Take-Two Interactive, then THQ, and finally EA.
* Ultimate Final Exam: Students must complete a dangerous final test before graduating.
* Ultimate. First issue dated February 2006, second issue April 2006. Third issue... May 2009. Three years. Apparently, after the initial delays, they decided they might as well hold onto it until the remaining issues were complete.
* Ultimate Force, Col. Aidan Dempsey (Miles Anderson) is the Captain Smooth, while Ross Kemp's SSGT Henry 'Henno' Garvie fits the Sgt Rough trope to a T.
* Ultimate Force, Colonel Aidan Dempsey reliably kicks a lot of arse when called upon, most notably in the episodes 'Dead Is Forever', 'Never Go Back' and - particularly - 'Charlie Bravo'. In the latter, he strides through a gunfight, casually taking one-handed potshots at rebels, while exhorting his local counterpart to "Pretend you're an officer and get your men in order!"
* Ultimate Force has an Al Qaeda terrorist named Al Djouf, who takes over the Italian consulate in the episode "The Class of 1980". It's possible that AD is of South Asian origin since his actor is a British man of South Asian origin.
* Ultimate Force, Henno clears a room with his commanding officer, picks up an enemy AK-47, and shoots half a clip into his back in retaliation for sleeping with the wife of one of his men. Afterwards he has a Coke.
* Ultimate Force involves the SAS in taking out an Al-Qaeda cell that occupied the Italian Embassy.
* Ultimate, for instance, was banned for several weeks following his release).
* Ultimate Galactus Trilogy: After the Sentry system provides the first view of Gah Lak Tus, Nick Fury asks how big is it. The scientist starts giving the reasons for the estimations, and Nick interrupts him with, "Get to the point!"
* Ultimate Galactus Trilogy: After the victory against Gah Lak Tus, a creature that no race in the universe has ever defeated, Fury proudly declares that humans can defeat anyone.
* Ultimate Galactus Trilogy are fans of the Ultimates, but for different reasons. Reed and Sue? They can tinker with a spaceship alongside Tony Stark and an actual alien life form! Johnny and Ben? They can kick ass with Thor and thrash some aliens!
* Ultimate Galactus Trilogy by organic life, so he sets up a psionic amplifier...
* Ultimate Galactus Trilogy: Captain America will not shy away from saving the world, but taking down a cult of aliens that pervert the idea of God... that's

something else.
* Ultimate Galactus Trilogy: Danvers has to report the results of her interrogation of Lawson. She's visibly ashamed to open her mouth and say "His name's Captain Marvel and he's a spaceman from the Cree indian tribe, sir"
* Ultimate Galactus Trilogy Incidentally, Xavier sent the X-Men ASAP, in the middle of the night, and they were completely unaware of anything other than the psychic effects, concluding that it's a very disturbed, very powerful mutant awakening uncontrollably.
* Ultimate Galactus Trilogy intelligent aliens in the Ultimate universe, but far less than anyone would expect, and they're discreet because they don't want to attract its attention. Earth seems to be the only planet that ever successfully resisted it.
* Ultimate Galactus Trilogy", it is no surprise that it involves Galactus.
* Ultimate Galactus Trilogy knew this, but moved the year so that it happened a whole century before the comic release (2004).
* Ultimate Galactus Trilogy: Lawson's Kree name is Mahr Vehl, and he has a rank of pluskomander, the analogous thing to a Captain. Everybody then calls him "Captain Marvel", except for Thor and Sam Wilson, the only ones who bothered to get the name right.
* Ultimate Galactus Trilogy: Misty Knight is attacked by a mystery hitman that shot the man she was investigating. This woman had no distinctive features except for her bald head and her tattoos.
* Ultimate Galactus Trilogy: "My name is Geheneris HalaSon Mahr Vehl, rank of Pluskommander, officer of the Kree Void Navy. Pluskommander is a rank roughly analogous to Captain"
* Ultimate Galactus Trilogy. Reed ends up using a holographic projector.
* Ultimate Galactus Trilogy: Sam is explaining that the captured Heather Douglas is a clone, and she suddenly says "I'm a priestess" inside her cell. Does she have mind reading powers, as mainstream Moondragon? Or are the cells not as soundproof as they should be?
* Ultimate Galactus Trilogy: SHIELD got in this mode when the Heather Douglas clone army started attacking the Triskelion.
* Ultimate Galactus Trilogy: Subverted. The killbot destroyed the ASIS, but there is a back up unit.
* Ultimate Galactus Trilogy. There, he is a gigantic hive mind of city-sized robotic drones.
* Ultimate Galactus Trilogy: The Silver Wing tried to kill Misty Knight to keep his existence a secret. But she proved to be a resourceful fighter, and then the Ultimates showed up, so he had to flee.
* Ultimate Galactus Trilogy the thought of something going around killing civilisations in the crib.
* Ultimate Galactus Trilogy: Thor is not impressed at all by Reed and Sue. Too much science. But Ben and Johnny... those are real warriors!
* Ultimate Galactus Trilogy: Tony and Reed would like to reverse-engineer Marvel's armor so badly...
* Ultimate Galactus Trilogy: Tony tries to flirt with Sue at first sight, but she only has eyes for Reed.
* Ultimate Galactus Trilogy: We have seen how deadly the Heather Douglas clone can be. What about an army of them?
* Ultimate Galactus Trilogy: Wolverine doesn't know what had happened in Tunguska a century ago, so Colossus explains it to him.
* Ultimate Galactus Trilogy: Yahn Rgg messed with Marvel's armor, and he was incapacitated by pain. Hawkeye proposed to go on and leave him behind, but Reed and Sue helped him to his feet and helped him to go with them.
* Ultimate General: Civil War Union (Subversive/Horde to Balanced) and Confederates (Powerhouse). The Union initially relies on large numbers and a large treasury, but initially has less well-trained troops and not as good weapons. They thus rely initially on numbers to hold and attack objectives. As time goes on, they become Balanced due to gaining better weaponry and acquiring more experience. The

Confederate forces are better trained and have access to better weaponry and higher-level officers, and as a result, are more powerful than the Union. However, they cannot afford to lose men as they have limited manpower. Oddly enough, this requires them to use tactics more common to Subversive factions (hitting weakpoints, outflanking, dividing and conquering).
* Ultimate gesture that abruptly crunches the screen down, leaving the player with far less visibility and breathing room.
* Ultimate Girls faced off with their final foe atop and beneath the distinctive structure.
* Ultimate Girls obsessed high school reporter Makoto hears someone in a room yell "monster", bursts in, takes several photos, reloads his camera, takes more photos, realizes his mistake, and politely leaves. The room was filled with girls who were changing their clothes. Several seconds go by before the first of them reacts.
* Ultimate Girls plays this trope regularly with its three core characters. Silk, Vivienne, and Tsubomi are magical girls who don full-body spandex upon transforming, which disintegrates over the course of three minutes while they battle, and they don't get their original clothes back when they revert to their human forms. (The embarrassment they experience is also the main source of their power in battle.)
* Ultimate Girls Seconds go by before the first girl screams in embarrassment.
* Ultimate have the power to prevent the player from being affected by that variety of interface screw.
* Ultimate Hela outfit. Somewhat justified by the fluid nature of time in the underworld — even though Thor thought the conception had only happened the night before, enough time has passed in the afterlife that Hela is already in her last trimester.
* Ultimate!! Hentai Kamen It doesn't help that he takes to fighting crime in only his underwear... and somebody else's.
* Ultimate Hulk can be worse. Typically only around the 2.4 meter (7'10) mark, there's one storyline where he's somewhere in the neighborhood of six meters (19'8) tall and has a harem of dozens of normal-sized women.
* Ultimate Human. The catch was that if the Hulk returned even once, its physiology could adapt and the cure would never work again. (See Doomsday, below) Predictably, by the end of the comic they are placed in a situation that requires the return of the Hulk.
* Ultimate in later appearances where he was reduced to the traditional illusions and feats of sorcery.
* "Ultimate in Suspense and Action"), was split in 2005 into the comedy-oriented Jack TV, and the action-oriented C/S, which was CT from 2015 to 2017.
* Ultimate Iron Man version of Tony Stark has a genetic problem that requires him to constantly wear biotech armor all over his body.
* Ultimate is a true vampire and Vlad the Impaler's brother. He stakes other vampires but not before apologizing to them for being unable to save them. And rather than turning people into vampires his bite prevents humans from fully turning after they have already been bitten.
* ultimate is so-called instead of its original name "ultimate Frisbee" due to the Wham-O trademark still in effect. Other names for the sport include "ultimate disc" or "flatball".
* Ultimate (Issue 3). Originally solicited for April 19th, 2006. Finally released in March 2009. Frankly, it's amazing Marvel finally remembered.
* Ultimate is the Ramblin' Evil Mushroom, which, when picked up, will spray spores outward. Any opponent who comes in contact with the spores gets their left and right controls reversed temporarily. How long this lasts depends on how many spores they were exposed to, which is indicated by the size of the mushroom growing out of the character's head. Like most of the other examples on this list, computer players don't seem to be affected much by it.
* Ultimate Job Security: A character who slacks off their duties and/or violates protocol enough times that they realistically would've been fired a long time ago.
* Ultimate Job Security: An employee who never gets fired even though realistically

their actions would've gotten them booted out a long time ago.
* Ultimate Job Security is enough to challenge the World Government and the Marines with sheer manpower rather than any kind of strong influence beyond that of pirates.
* Ultimate Job Security: No matter how severe their violations or acts of negligence are, this person never gets fired.
* Ultimate Job Security's daughter, had it until the divorce, after which Bruiser blacklisted the guy out of the business.
* Ultimate Knight Windom XP of various graphic, robot and pilot mods appear. And there's still more to come.
* Ultimate Life Form, Cockroaches have a few. Their biggest one is temperature, many species will outright die if they aren't kept within a narrow range of temperatures. The ones that don't die usually can't reproduce in mild hot or cold conditions. The reason they've become such an infamous pest is that temperatures they tolerate happen to be the same range that humans prefer.
* Ultimate Lifeform. Even other Daleks that they fear are slightly different are considered un-Dalek, and they have near-constant civil wars as any new idea creates a schism. When one group of "pure" Daleks decided that the human-born Daleks weren't inferior to the originals, being that they are identical in all but origin, another group declared war (which included some human-born Daleks who saw their inferiority as a given).
* Ultimate Life Form: The end-all and be-all of transhumanism (if they were purposely made).
* Ultimate Life Form. The reason behind this was that Shadow's creator, Professor Gerald Robotnik, wanted to study immortality and use the fruits of his research to find a cure for his granddaughter and Shadow's surrogate sister Maria, as she was terminally ill and suffering from a fatal disease known as NIDS (Neuro-Immuno Deficiency Syndrome).
* Ultimately, all of this is reflective a curious (and abhorrent) form of dealing with scarcity. Due to the constant war, constant strain on resources, overpopulation, and loss of technology, the Imperium has quickly found that the one resource it
* Ultimately averted as the shirt wound up resembling one made by an even more trendy designer.
* Ultimately averted, as with almost all real-life biological tropes. To the Blue Whale, there is in fact no bigger fish (or any other animal) to be found. There never was, and quite probably never will be... unless humanity decides to artificially create a larger animal for some reason.
* Ultimately averted by Orihime Inoue, as her feelings for Ichigo Kurosaki not only did
* Ultimately averted by this crab who, according to the subtitles, believes himself to be "hella smart" for figuring it out.
* Ultimately averted by Willem Dafoe's character, FBI Agent Paul Smecker, in
* Ultimately averted in a bridge near the end of the song, where the man who receives this advice flatly rejects it, saying he'll just have to apologize instead:
* Ultimately averted in the movie. The protagonist Maverick doesn’t win the trophy, because a fatal crash that kills his
* Ultimately averted in "The Perfect Lunch" when Olympia and Otis go out for lunch together and attempt to keep the secret that they've been solving oddness behind each others' backs to themselves. Both of them end up spilling the secret at the end after they get suspicious of each others' actions — Olympia that was attempting to solve an odd problem of spaghetti growing out of control, and Otis that was attempting to battle a laser chicken on his own.
* Ultimately, committing the perfect murder was the real motive of the murderer in the novel
* Ultimately deconstructed as their opposite natures (as well as tense situations) end up pushing them apart. They do
* Ultimately deconstructed. Laurel is eventually informed of the above events, and

is horrified to learn someone
* ultimately drove Sawyer's father to commit a murder/suicide being Locke's father, and also showing up on the island.
* Ultimately, Evelyn would rather have Tobias around as her son than to exact revenge on her husband and controlling the city. Even if that means swallowing her pride and having to face her abusive husband and possibly be put at risk herself.
* Ultimately gets subverted in the grand finale of the Buu Arc: humanity chip in for Goku's Genki-Dama, but only after they're convinced by
* ultimately going for a happy ending, before the heroes emerge from the mire.
* Ultimately he goes completely insane, attempts to kill his teammates, and almost sabotages the entire operation, but for a while at least he was a warm body with a machine gun.
* Ultimately, however, Taylor inverts this. The other Undersiders, already anti-villains from the get go, slowly become less and less evil through her influence, until they're more of a heroic vigilante group than a criminal one by the end.
* Ultimately inverted, as the friends posted bad things about Debbie, but it was Steve who carried out the (brutal) retribution on the girls. The friends were at fault for tricking him, but everyone was mad at Steve because he did those horrible things.
* Ultimately it's boyfriend number 3, Logan, who bears a resemblance to Chris. Made even funnier when Chris instantly takes a liking to him and tells Rory he approves. Lorelai takes a bit longer to warm up.
* Ultimately, it turns out that the fishing trip was to teach Sam techniques for the art of
* Ultimately, it was revealed that their relationship had stalled in its early stages due to
* Ultimately, it was utterly unsurprising when White Wolf decided to literally
* ultimately leading up to Rell and Byrne Faraday's murders, while the latter is mentioned during that case.
* Ultimately, only Clara finds a prospective husband, and she tells the others her future married name in a reprise:
* Ultimately, she comes to terms with what happened to Britain and her own choices as king, gives up on altering history, and returns to her own time to die, her soul at peace.
* Ultimately, Sisko is unable or unwilling to go far enough to succeed in his plot to trick the Romulans into joining the Federation/Klingon alliance. Fortunately he's enlisted the aid of Elim Garak, who is
* Ultimately subverted, as all of the above behavior happens before their parents' marriage, save for Diego ogling Courtney, which happens at the wedding. After the marriage, they seem to have settled into ordinary
* Ultimately subverted, as the Staff of One is indeed magic just like the comics, as revealed in the next season.
* Ultimately subverted, as the war was over about a year and a half later, with the Federation victorious.
* Ultimately subverted at the end of season 3 and a ways into season 4 —
* Ultimately subverted during the "Fix Everything" arc by Johnathan Hickman; it's revealed that the surfaces of Reed's secret lab act like output devices, and Reed can erase and rewrite as needed. When he encounters a legion of Reed Richards counterparts from alternate universes who sacrificed their families to solve the world's problems, he chooses to put his family above "Plan 101" and orders his computer to erase his notes. The next frame shows the lab, with all surfaces clean and pristine.
* Ultimately subverted in that episode, since the flawed 20th-century
* Ultimately subverted in that "Professor Professorson" is actually a guy running a whole racket of fake classes who went along with Jeff's lie in order to help him out.
* Ultimately subverted the next morning, as they're right back to terrorizing James and Kat. They later show that there are few things they won't touch when going for a scare or gag (including pretending to summon James' deceased wife); the

vacuum was an opportunity to demonstrate that they aren't going anywhere. They even pull a
* Ultimately subverted when they find his body in his study in the heart of his secret base. And the note he left when he realized he was wrong, and found he could not stop what he had started. It turns out that he's been dead for years
* ultimately succeeding in the sixth season. Later, she learns that her favorite literature hero, Daring Do, is actually based on a real person, and gets to help her on a mission.
* Ultimately, the gaslighting was unintentional, the result of burglars using his house to stash stolen goods while he wasn't there.
* Ultimately the most important character whose identity is initially hidden in
* Ultimately, the ritual they began allowed them to steal the heroes' status as The Trinity, the three most important people in the world, resulting in history itself changing.
* Ultimately the solution to the problems humanity faces in Roger Allen's
* Ultimately, the Tories did win the election, but not only with fewer seats than two years prior, but they lost enough seats to lose their majority in parliament, forcing them to rely on the Democratic Unionist Party from Northern Ireland to prop them up.
* Ultimately the two surviving characters with that title (The evolved Virus and Slenderman) and the third's descendant (Build) united to ultimately aid in defeating the Godmodder once and for all during Act 5.
* Ultimately, the US Army Ordnance Corps' greatest screwups in arms development seem to stem from the institution being extremely political more than practical, as stated
* Ultimately, this is the reason for things like Blue Raspberry and White Cherry flavors existing. The dyes used in purple and near-purple foods (including bright red, which actually was made with purple and yellow due to the complexities of light and pigments) have distinct flavors of their own - mostly bitter and pungent. While there are many types of food colorings available today, at the time that blue raspberry came out there was only one food-safe purple food dye - cabbage juice, hence why candies made with it taste like compost.
* Ultimately, this trope is largely subverted, as while some species' hats may preclude the existence of love, you can always find examples among any species that understand the concept.
* Ultimately though, this trope is averted, as the great majority of the human race have cyberized themselves (even Togusa) because it has become the norm for human interaction. There are some minority affiliations like the Human Liberation Front who believe that this trope is what will happen when you do become cyberized, and these people still prefer to remain completely natural, but humanity as a whole has not changed very much as a result of everyone now being connected to the internet. Almost all religions, especially the major ones, actually embrace the idea because it allows their followers to unify together.
* Ultimately, when you do actually return to the Hyperion, you're forced to kill Dr. Hanson as her infestation has spread too much and she is as monstrous as any other infested. You can take away one of two possible thoughts. A), Hanson was too ideological and nearly destroyed her own allies as a result of her vainly trying to find a cure for something that doesn't exist or B), that the cure in the other version of this mission could
* Ultimate Magneto, however, is another story. He is a clear mutant supremacist who has attempted genocide many times. Since this is an alternate Magneto, this was far better received.
* Ultimate Marvel alien language (not just Earth's English) automatically.
* Ultimate Marvel and regular continuities make heavy use of this trope.
* Ultimate Marvel arc. He defects to the humans partly because of their enjoyable (American) culture, including Krispy Kreme donuts.
* Ultimate Marvel a second time by offering to grant him free reign to torture and kill prisoners in the prison he was contained in along with a shopping list of torture tools.

* Ultimate Marvel Beast breaks up with Storm, fearing that Xavier is messing with her mind so that she loves him, and so he stays at the school. He seeks some new girlfriend on the internet, and starts chatting with "Mutantchick", a mutant model wannabe. Actually, it's the Blob, from the Brotherhood of Evil Mutants, who loves playing those pranks in his free time. But when Beast shares the secret that Xavier did not kill Magneto, that he's alive and brainwashed... it's finally the time to arrange a date.
* Ultimate Marvel can't touch anything with his bare skin, even dust, without causing himself excruciating pain — hence the suit. He wore a special body paint that numbed him to a normal level. It also gave him a normal color since the events of his birth made him blue in addition to neural tissue extending throughout his body, the reason for his pain.
* Ultimate Marvel: Carol Danvers, as the head of security for NASA, is competent at her job (alien killbots and infiltration notwithstanding). As head of SHIELD... she's got a long string of disasters and screw-ups to her name, which eventually gets her fired.
* Ultimate Marvel comics. As soon as her boyfriend found out about the incident between her and the Cloak and Dagger duo, he immediately broke up with her on the phone after she pleaded with him to stay at his place. Even Miles and Jessica felt awkward for her.
* Ultimate Marvel comics (formerly known as Marvel Age) were the same thing, only child-friendly, and they directly adapted older Marvel comics.
* Ultimate Marvel event, even killing for good all the X-Men's sacred cows), but the risks have always been taken.
* Ultimate Marvel features an actual civil war in the US. Washington DC is blown up, and the president and all the Congress are killed in the blast. The US falls in anarchy, Sentinels take over the west, Texas declares independence, etc. Kitty Pryde and the X-Men fight against the Sentinels, and Captain America is elected president and makes all the rogue states rejoin the Union, by force if needed be.
* Ultimate Marvel feature several super soldiers and a lot of characters have gained powers as the effect of a super soldier program.
* Ultimate Marvel, Gwen Stacy suddenly became an orphan: her mother ran away and refuses to come back for her, and her father is killed by a criminal. So May welcomed her in the Parkers' house. She confessed during psychology that she did not do so just because of being a good person, she kept her because Peter is usually out, the quiet house reminds her of the people she lost, and having Gwen around prevents the house from being quiet.
* Ultimate Marvel has this as its primary plot, as America is divided into several sovereign nations, with Texas now having access to nuclear armaments.
* Ultimate Marvel. Hawkeye easily kills a group of guards, to Mar-Vell's annoyance:
* Ultimate Marvel, helping the Ultimates take down major threats but not being an official, government-sanctioned member of the team. In his case, he abstained from joining due to his distrust of the American government and disapproval of the ways in which it used the Ultimates. Unlike most examples, he was always rather jovial and willing to help the team.
* Ultimate Marvel. However, there are a few who are much more likable than their mainstream counterparts:
* Ultimate Marvel II. Tom Brevoort was asked about their plans for it at the C2E2, and replied "We’ll be vague and mysterious… there are always plans".
* Ultimate Marvel increased its notoriety by taking a strong influence from its looks and feel.
* Ultimate Marvel influential in both the film and TV adaptations since the 2000s. It'd take too long to list all of them, but just to name a few Ultimate elements that made it into other media:
* Ultimate Marvel instead when working as vigilantes, which are just black mundane clothes. And, other than a passing by reference to mutants (in general), none of the existing superheroes of the Ultimate universe are used in the story.
* Ultimate Marvel is a Wakandan teenager who was rebuilt into a cyborg by Weapon X after getting mauled by a panther.

* Ultimate Marvel is in full effect here, because many fans agree with this, that trying to build off the '10s status quo only made for an even bigger dork age, and Hickman was wise to just ignore it.
* Ultimate Marvel. Justified in this case, because this version of Galactus is a giant swarm of city-sized robots, so blocks the light from the stars as it approaches a planet.
* Ultimate Marvel, largely because the man himself went on to play Fury in the MCU. In order to bring this over to the "main" Marvel Universe, the (white) "main" Nick Fury was given a biracial son who looks a lot like a younger Jackson.
* Ultimate Marvel line of comics did this for a while, but gradually started doing its own thing.
* Ultimate Marvel. Loki, half-brother of Thor, also infiltrated the Nazis and got some of their military forces to join the war against Asgard.
* Ultimate Marvel magic in the setting, but not to the outlandish degrees of 616, and is always met with skepticism. Most characters who have magic in their backstories do not have it here.
* Ultimate Marvel: Mahr-Vehl just loves all of human pop culture, to the point that he talks like characters from TV series, thinking that real people talk that way.
* Ultimate Marvel: Mark Pannicia described the post-Ultimatum artists of Ultimate Marvel as such. Bendis, Hickman and Spencer were described as "three amazing writers", and Esad Ribic, Sara Pichelli and Paco Medina were described as "some of the best artists in the industry".
* Ultimate Marvel nation and Utah, Arizona, Oklahoma and New Mexico abandoned due to the Nimrod attacks. When Captain America took over as President, he gave a portion of Utah to the remaining mutants, turning it into Utopia.
* Ultimate Marvel remarks during a fight that the best thing about killing Multiple Man is that there's always more of him.
* Ultimate Marvel's Bombshell wears a long white coat as part of her superhero outfit. She likely got the idea from her mother, who wore a similar coat in her career as a super-crook.
* Ultimate Marvel seemingly do away with the white Kree idea, as they both depict Captain Marvel with blue skin like the rest of the Kree.
* Ultimate Marvel self gets her abilities from being blended with a leopard by Loki.
* Ultimate Marvel's high school. She knows Spidey is one of the other students and is planning to track him down.
* Ultimate Marvel's most important author, and Millar started his own imprint and turned many of his own comics into notable films.
* Ultimate Marvel. Spider-Man largely managed without one, but in the brief period that the Parker house became a foster home of sorts for teenage superheroes Aunt May stepped in to the role (yes, it's as comical as it sounds).
* Ultimate Marvel Team-Up: The role of Spider-Man in the Punisher and Daredevil arc is minimal. It may be argued that he's there just because he's supposed to be the protagonist, because his role could have been completely avoided.
* Ultimate Marvel Team-Up: When Spider-Man visits the Fantastic Four, he accidentally releases a Skrull invasion. He puts on a fight, but the Skrulls are finally defeated by Reed Richards.
* Ultimate Marvel. The current one is just a novice, trying to learn the tricks of his father.
* Ultimate Marvel. The last is probably meant to reflect a US soldier's loathing of the French as a whole for capitulating to the Nazis early in the War and forcing many US soldiers to die trying to free the French from their own government, though it's rather ahistorical. America was still rather Francophilic at the time — General Patton adored the country — and anti-French sentiment only really picked up during the 1950s under deGaulle's rather abrasive leadership of the nation. This contrasts with 616-Cap, who worked with the Resistance and hates portrayals of the French as cowards: "The government surrendered. The people never did."
* Ultimate Marvel this; he was created as the Captain America for the Vietnam War,

but became so disgusted with American atrocities and moral ambiguities that he went rogue and now he wants to punish America for not being the "good guy" as it claimed to be when it went into Vietnam.
* Ultimate Marvel, though, her mission changed to telling other people how to fight Gah Lak Tus.
* Ultimate Marvel took off and replaced it as Marvel's most prominent adaptation (though, the MCU took many of the Ultimate Universe's visual elements and backstory changes so in many ways, it still lives on), and thus the primary inspiration for other adaptations.
* Ultimate Marvel: Ultimate Hank Pym is terribly abusive to his wife. Leading to a very satisfying moment when Captain America beat the crap out of him while he was 10 stories high.
* Ultimate Marvel underdog scrapper starting out young and teenage in New York in the 21st Century, it's a good chance that character would not be white, and so Miles is part black and part Latino. He gets to a magnet school based on lottery based on gentrification issues and how competitive and hard these schools have become for low-income families (whereas Peter in the classic era went to Midtown High and then to ESU on scholarship). Unlike Peter who is an orphan with Aunt May as his only family, Miles has both his parents (at least after he returned to 616) and an extended family so that makes him a little more well-adjusted and less neurotic. Miles also grows up in an environment and generation where his nerdy passions are encouraged and validated as opposed to Peter who was raised in a classic "jocks versus nerds" era which gives him self-esteem issues even years later.
* Ultimate Marvel universe, he was a member of the 101st Airborne Division during WWII, but curiously enough, he didn't wear a parachute because they were for girls.
* Ultimate Marvel universe, Sam Wilson has such a relation with Vision.
* Ultimate Marvel universe. She was just like a Cold War era satellite. She got all her advanced tech from the world she ended up in.
* Ultimate Marvel universe the US in World War II has the only superhuman in existence, Captain America. The nazis are helped out by an alien race, the Chitauri. And there are also mysterious aliens, the Watchers of the Universe, who simply witness it all. It does not go into the ludicrous levels of the mainstream Marvel comics set in WWII, but it's still an example.
* Ultimate Marvel universe the Watchers never show up themselves, and speak by controlling someone. When their agent Rick Jones was in outer space, they did this to him to talk with him... which could seem as if he was discussing with himself, if the reader was not aware of the context.
* Ultimate Marvel universe, those dinosaurs are there because of the Scarlet Witch's reality-warping powers.
* Ultimate Marvel universe though, as he's actually a four-star general there (or started out that way, anyhow), which would be much more realistic for the commander-in-chief of a multinational paramilitary espionage organization. Either way, it doesn't make him any less badass.
* Ultimate Marvel via a mixture of Nick Fury's blood and Wolverine's DNA.
* Ultimate Marvel vs. Capcom 3, Ant-Man does this to an opponent when Hawkeye initiates his Level 3 Hyper Combo.
* Ultimate Marvel vs. Capcom 3 asks them if they are aware of how many lawyers are in hell.
* Ultimate Marvel vs Capcom 3), but he's nonetheless a legendary defense attorney in an impeccable blue suit.
* Ultimate Marvel vs. Capcom 3's Gravemetric Pulse and Gravemetric Blaster attacks become much more powerful by sacrificing red health.
* Ultimate Marvel Vs. Capcom 3, taunting as Deadpool results in him saying "TAUNT BUTTON!" In the original, he says "This is my taunt!"
* Ultimate Marvel Vs. Capcom 3 that only had a couple of voice clips each, as in those games someone's mouth would just flap open as the text entered the screen. Also, in said Hyper Combo, the affected opponent would stay in one static pose devoid of animation even as they gave anguished screams as a reference to his

games' limited frames of animation.
* Ultimate Marvel vs. Capcom 3, where he throws a pie at the opponent's face. It only sticks for a second though.
* Ultimate Marvel who are trying to rule over human society and the latter is an international group of superpowered anti-American terrorists.
* Ultimate Marvel with the most liberal and conservative states starting to either fight each other or declare their independence from the Union.
* Ultimate Misfits is more of a sleeze than in canon. He flirts with women who don't want his attention and he tries to continue flirting with Kimber even after Roxy tells him that she's seventeen and too young for him.
* Ultimate MK3, where he uses Scorpion's stance on the PlayStation version and the later Saturn and PC ports derived from it, while on the N64 version he uses Reptile's.
* Ultimate Mortal Kombat 3, Scorpion was the first to use a weapon in a chain combo. Prior to that, characters only used weapons as special moves such as Kano's Knife Throw. Scorpion's weapon? A big, double-bladed battle axe. Since then Scorpion has dropped the axe and has since stuck to using swords to fit with his Japanese ninja origins.
* Ultimate Mortal Kombat 3), where some of the ninjas' Friendships consist of cranking up jacks-in-the-box for their opponent, which gets scared and runs off. Each jack-in-the-box is appropriate to whichever ninja you use; as such, Reptile's is a snake, and Scorpion's is a skull.
* Ultimate Muscle has this happen to Mantaro sometimes, usually courtesy of Roxanne.
* Ultimate Muscle, he's extremely resistant to wear and tear, to the point of being nearly invulnerable to striking. Kid figures a way around this by applying a series of submission holds.
* Ultimate Muscle in an episode when Wally Tusket was reluctant to fight Pumpinator Kid Muscle pokes him in the butt which causes him to leap into the ring.
* Ultimate Muscle manga, which by all means had a very conclusive end, resumed serialization and as of 2018 still is ongoing. This effectively put the Nisei series at an undefined hold, unidentified if or when it will ever resume serialization.
* Ultimate Muscle probably counts for something... but somewhere around the third time he gets thrashed until he can barely stand up, only to start fighting back a few minutes later with renewed energy, it just gets ridiculous.
* Ultimate Muscle Roller Legend. The less said about this video, the better.
* Ultimate Muscle Roller Legend", two gay men in their underwear ride each other like scooters and segways chasing down a girl driving a transforming steamroller. They finally blow her up by pulling down their underwear revealing a baby head that shoots lasers. This is all that's given as a description:
* Ultimate Muscle, set in the past, Brocken Jr. loses his right arm in a match, thus removing his trademark Red Rain of Berlin attack. In the next match, Jade attempts the move and is shocked to find he can't do it. Looking at a photo shows that Brocken Jr.'s hand is now a hook, therefore Brocken could never have taught the move to Jade. After some time for Jade's mind to adapt to his new memories, he now knows a leg-based version of the move: Brocken's Repatriation.
* Ultimate Muscle when Kid Muscle finally meets his father King Muscle again at the conclusion of the training storyarc. King Muscle still looks as buff as he did in his prime (aside from having a bald patch on his head, which is odd because he didnt have hair in the first place), which is lampshaded by the other older wrestlers who complain about how easily out of shape they get these days. Then it turns out that King Muscle had just rearranged all his fat to look like muscles, which is why he wasnt moving from his badass pose, and once everything slips back into place, it turns out he's gotten a huge gut and scrawny arms in the past few decades.
* Ultimate Muscle with this with the Time Travel arc. Said arc has been going on for over five years now and has gone on for more than 160 chapters. To put it in context, Yude has spent more time on one tournament arc than any other arc

previously.
* Ultimate Newcomer, for Windows. Since the 2012 release date, the game has not appeared.
* Ultimate of matches, some of them are quite tricky, and you only gain new fighters a few at a time. This challenge is sometimes combined with the requirement of not using spirits.
* Ultimate Ones, can truly be destroyed. It is said that they are so alien that death is simply something that does not happen to them, and the few who have been "killed" have continued to exist in some form or another.
* Ultimate Origins for such information to be public knowledge. And he was right.
* Ultimate Origins: Steve Rogers is about to leave the US and go to fight in WWII. He's just learned that Gail loves him, so he says "When I get back, I'd like to...". He's unable to finish, and just walks away.
* Ultimate Origins: The president wants a real super soldier, not just a good soldier in a visible suit. To get a military advantage over the enemy? No: because "this is a war of images".
* Ultimate Origins: When Erik's powers came out when he was thirteen, his father tried to kill him with a gun. After realizing what his parents were and had been doing, Erik killed his mother as well.
* Ultimate Origins: When the Watchers of the Universe show up at several locations, one of them goes to the Daily Bugle, where Jameson is firing his star reporter, Ben Urich, over a discussion.
* Ultimate Otaku Teacher: Araki Koutarou has only boys falling for him due to his girlish looks.
* Ultimate Otaku Teacher is so feminine that he was banned from wearing the male uniform.
* Ultimate, Palutena's Guidance for Cloud mentions how his Finishing Touch attack deals high knockback despite only doing 1% damage. However, if the current match is a Stamina match (where knockback matters much less), Pit will remark that he doesn't need to worry about that.
* Ultimate Pro Wrestling university trainee Nurse Cassie was hired by the company before her wrestling training was even completed after she tended to Schwag, who was injured during a
* Ultimate Quicksilver is much faster. He once gave an enemy speedster an object lesson in what real speed is by taking hold of her and running so fast her skin was stripped off and then she burst into flame.
* Ultimate Reed eventually gets so frustrated about nobody considering non-weapon applications of his inventions that he pulls a
* Ultimate Re-Imaginings, Emma has Joey try to read the minds of a group of people to help him control his powers, but he gets distracted by one person's thoughts and renders the exercise ineffective.
* Ultimate Re-Imaginings in an attempt to keep him out of the actual real world. It backfires because he just can't let himself go.
* Ultimate series and modernized. In one of their most controversial points, they removed Peter Parker's job as a photojournalist and made him a webjockey instead.
* Ultimates has a sex tape of Tony Stark and the recently deceased Natasha Romanov leaked to the public. The tape is later revealed to have been recorded by Ultron for unknown reasons.
* Ultimate Showdown of Ultimate Destiny: An epic crossover battle which pits two or more characters originating from different stories against each other.
* Ultimate Showdown of Ultimate Destiny comic claimed it was Professor X who paid Lobo to take the dive (to spare Wolverine's ego and reputation).
* Ultimate Showdown of Ultimate Destiny" has a zombified Abe Lincoln wielding a machete and an AK-47.
* Ultimate Showdown of Ultimate Destiny have been linked to an established trope (see page). Appropriate for the subject matter.
* Ultimate Showdown of Ultimate Destiny. It hits Abraham Lincoln and Jackie Chan, knocking them out of sight - Lincoln is later seen dead on the ground, but Chan isn't seen again, and the Care Bear itself also vanishes. Since "only one will

survive", it can be presumed that all three are dead.
* Ultimate Showdown of Ultimate Destiny, most notably with Ayane/Kasumi and Yuna/Rikku, but really all the characters did this constantly.
* ultimate showdowns of ultimate destiny comic, he'll give the same dressing down to Batman.
* Ultimate Sleepwalker being transformed into various monstrosities, and revel in the horror they can cause their innocent victims.
* Ultimate Sleepwalker has a male example that shows even bad men love their fathers. The supervillain 8-Ball, a sociopath who's killed at least a dozen people during his armed robberies, and has also done such horrible things as firebombing a hospital for pay, uses some of the proceeds from his criminal activities to pay for the long-term hospital care of his father, whose drinking has nearly killed him.
* Ultimate Sleepwalker. His life would be completely meaningless if he couldn't do it.
* Ultimate Sleepwalker: Sleepwalker has a few female enemies, and he has no compunctions about giving them the exact same treatment he does to his male enemies.
* Ultimate Sleepwalker: The New Dreams, Alyssa Conover works as a dance teacher until her studio goes out of business in the 2008 economic crash. The only other job she can find that works with her university schedule is at McDonald's.
* Ultimate Sleepwalker: The New Dreams are both based on comic book characters, but since the author isn't good at drawing, they're in prose serial format instead.
* Ultimate Sleepwalker: The New Dreams. He's never said exactly why he hates John K, and his friends decide they're probably better off not knowing.
* Ultimate Sleepwalker: The New Dreams in a couple of cases involving the Kingpin:
* Ultimate Sleepwalker: The New Dreams in the official comics are given the spotlight, as the author very deliberately subverts the traditional pecking order of the Marvel Universe. In this universe, characters like Sleepwalker and Darkhawk take center stage away from the likes of Wolverine and the Punisher, while villains like 8-Ball, the Dreadknight, Jack O' Lantern and Firebrand are just as dangerous as the likes of the Green Goblin or Bullseye.
* Ultimate Sleepwalker: The New Dreams is one of the hallmarks of the series, giving second-stringers the spotlight and relegating A-listers to guest star appearances.
* Ultimate Sleepwalker: The New Dreams situation with their heroic nemesis.
* Ultimate Sleepwalker: The New Dreams. When they fight, Bullseye plays up his supposed A-list status and mocks 8-Ball for his supposed C-list status, but 8-Ball wins the fight and ends it by knocking Bullseye's severed head into a trashcan like a billiard ball.
* Ultimate Sleepwalker: The New Dreams, which lead to them flaying each other with sharpened steel spikes, smashing each other through concrete walls, electrocuting each other with high-voltage wires, and catching each other in the middle of exploding sewer pipes and tanker trucks, oftentimes all in the same battle.
* Ultimate Sleepwalker: The New Dreams who plans to escape his supernatural prison and pay a very "special" visit in the near future to the youths he very nearly murdered...
* Ultimate Spider-Man actually figures it out on his own, staying up late at night, thinking about Peter's new awesomeness (ie: he flipped Kenny once, broke Flash's hand, replaced Flash on the basketball team, etc.) and Spidey's apparent availability at Midtown High School. Then he tests it.
* Ultimate Spider-Man. After a mutant's powers activate, Spidey and Iceman are trying to convince her to use her powers responsibly. After Iceman makes a particularly stupid comment about her powers (control of fire: "Or, we could get some marshmallows..."), Spidey delivers a quick slap to the back of the head.
* Ultimate Spider-Man, after Mary Jane and Peter have been having a private talk in Peter's room, Aunt May checks to see if Peter needs one of these. He's suitably mortified. Of course, Aunt May knows full well that Peter and Uncle Ben had The Talk. She just wanted Peter to know not to try anything in the house because it would be just as awkward, if not more so.

* Ultimate Spider-Man. After Peter takes a bullet for him and dies of his injuries, Steve ends up even more turned off by the idea of the younger Miles Morales taking up his mantle.
* Ultimate Spider-Man after Peter tells her he's Spider-Man, before they get interrupted by Aunt May. May suspected that they were about to do the... other thing.
* Ultimate Spider-Man also makes rather frequent use of them, thanks to Spidey's continuous non-sequiturs, from imagining himself flying on a jetpack (after he says he'd love it if S.H.I.E.L.D. gave him one) to imagining Mary Jane as a female J. Jonah Jameson, haircut and all (when Peter finds out she'll do an internship at the Daily Bugle).
* Ultimate Spider-Man) and how she finds it easier to be a in relationship with Spider-Man rather than Peter Parker and then reflects that "she doesn't know me". He and Kitty do become close friends later on but at that point, while Kitty never stops having feelings for him, there's never a possibility of a relationship between them.
* Ultimate Spider-Man... and it's eventually what gets him killed (though he did eventually get better).
* Ultimate Spider-Man and just growled "Parker" when he fought Spider-Man, so it was not easy to figure out his motives.
* Ultimate Spider-Man angle with Peter and Gwen so much that this was the reaction when they finally did hook up.
* Ultimate Spider-Man animated series is a rare female example. She's the muscle of the villainous Frightful Four.
* Ultimate Spider-Man: A paperboy was shouting that in "Spidah Man" and Spidey found himself surprised there were still people doing that.
* Ultimate Spider-Man arcs tend to get accused of suffering from this due to Bendis' ridiculously slow pacing.
* Ultimate Spider-Man, Arnim Zola attempts to cement his takeover of S.H.I.E.L.D. by stealing Spider-Man's body and leaving him imprisoned in Zola's computer body as a result. Spider-Man was able to stop the process with help from Agent Venom and Rhino.
* Ultimate Spider-Man as a crazy, 4th wall-breaking mercenary who trades his hatred of mutants for a sense of humor. For fans who disliked Serious!Deadpool, this was Came Back Right.
* Ultimate Spider-Man, as Spidey and his ragtag team descend on Latveria to take down Doctor Doom, he describes him as not being a real "turn your head and cough" doctor.
* Ultimate Spider-Man: As the Shroud Kitty Pryde wears a hooded cloak, to conceal her identity.
* Ultimate Spider-Man at one point had Spidey fight a supervillain mother-and-daughter duo known as the Bombshells, who both swore like sailors. Pretty much every fight with them would have Spider-Man or another hero call the pair out on using strong language constantly.
* Ultimate Spider-Man: Aunt May keeps asking what's going on at Peter's room, and both him and MJ insist that they were "studying". They were not having sex, as May feared, but they were not studying either.
* Ultimate Spider-Man: Aunt May says that she will look about social anxiety disorders on the web. Uncle Ben encourages her to do so, because that will keep her busy for hours.
* Ultimate Spider-Man a vampire for almost any useful definition of the term.
* Ultimate Spider-Man between Spider-Man and Wolverine. When Spidey wakes up naked in Logan's body, he's confused about what's going on until he looks under the sheet.
* Ultimate Spider-Man, but in #15 of the second volume, her true feelings come out painfully when she and Peter discuss what had happened when the Chameleon hit on her while in Peter's shape.
* Ultimate Spider-Man, but Uncle Ben was a main character in the first arc, so it counts as an example.

* Ultimate Spider-Man by the accidental prototype, and Norman Osborn attempting to replicate the success by injecting himself with the OZ Serum.
* Ultimate Spider-Man by the people of the city until the third season.
* Ultimate Spider-Man can take down the Frightful Four. Spidey's not happy when he realizes that he was tricked into becoming bait.
* Ultimate Spider-Man carried over from the comics; Taskmaster relies heavily on the ability to instantly memorize an opponent's fighting style, but Deadpool is so unpredictable that he never fights the same way twice.
* Ultimate Spider-Man cartoon as the janitor at Peter's school and interacts with both Pete and Spider-Man on occasion.
* Ultimate Spider-Man comic book, Peter breaks up with MJ to "keep her safe". It doesn't work, and MJ is still thrown into dangerous situations, so they get back together. Yup, we thought it was stupid, too.
* Ultimate Spider-Man comments that occasionally you encounter a story so important, so moving it HAS to be told. THIS... is not one of those stories.
* Ultimate Spider-Man couldn't get uglier than being a living tumor? Here, they managed to find a way, as its version of Wade has his skull exposed and the top missing, exposing his brain and all of it enclosed in a plastic dome.
* Ultimate Spider-Man, Deadpool turns out to be this. (Or very least, Amoral All Along.) First introduced as a freelance hero who used to work for S.H.I.E.L.D.; he's later revealed to be an amoral mercenary who will work for the highest bidder.
* Ultimate Spider-Man despite having a few moments of being a jerk at times. His final battle against the Sinister Six which ended in his death pushed him into martyrdom.
* Ultimate Spider-Man did it later, with Deadpool as the hunter and Spiderman as the hunted. Deadpool was going after the X-Men and, thanks to Shadowcat trying to get help, Spider-Man found himself tangled up in that mess.
* Ultimate Spider-Man died protecting his neighborhood from the Sinister Six. Then he came back.
* Ultimate Spider-Man different versions of Carnage (in the game it was Peter, while in the comics Carnage was established as Gwen Stacy).
* Ultimate Spider-Man discuss whether they're ready to take their relationship to the next level. In the end MJ decides she's not after initially wanting to, and Peter (who has been understanding about it the whole time) tells her that while he wants to sleep with her, he's more than willing to wait until she's ready.
* Ultimate Spider-Man does keep trying to get that Lizard girl's phone number...
* Ultimate Spider-Man: During "The Spider-Verse" five-parter, one of the alternate realities visited by Spider-Man is one where everybody's gender is flipped. He meets his counterpart from this world, Petra Parker/Spidergirl, and teams up with her against this worlds version of the Green Goblin: Norma Osborn.
* Ultimate Spider-Man: During the "Ultimate Clone Saga", Xavier refuses to erase May Parker's memories of learning Peter's secret identity, something Kitty gets angry about. Jean asks him if perhaps Kitty was right, but the cute moment of May and Peter confirms that Xavier did the best thing.
* Ultimate Spider-Man episode "Attack of the Synthezoids" begins with Peter Parker dreaming that he goes to school in his Spider-Man costume. He then looks down and realizes he's missing his pants, exposing his underwear for all to see.
* Ultimate Spider-Man episode "Damage Control", the Wrecking Crew busted into a laundromat during one of their rampages, intending to come back during the reconstruction and break through the wall into the bank next door.
* Ultimate Spider-Man episode "Halloween Night at the Museum", Morgan la Fay transforms a museum guard into a pumpkin person resembling comicbook Spidey villain Jack O'Lantern.
* Ultimate Spiderman features this trope. In the episode entitled "The Avenging Spiderman," Loki tricks the titular character into switching bodies with him. By the time they switch back, Spiderman's friends are aware of what has happened but still believe that Loki is inhabiting Spiderman's Body. As a result, he avoids their attacks and tells them that Loki would fight back but that he won't. Nova throws a punch that stops only inches from Spiderman's nose, at which point this

conversation occurs:
* Ultimate Spider-Man fight, much to Peter Parker's chagrin. He ends up confronting the movie crew about this situation, but unfortunately does so utilizing his powers, mainly leaping about and sticking to things. The director simply has his crew start filming and he thanks Spidey for all the free footage he can now put, at no cost, into his film.
* Ultimate Spider-Man: Flash accused Kong of being a coward during the attack of the Green Goblin. Kong replied that everybody reacted as cowards back then.
* Ultimate Spider-Man Flash Thompson. Flash responds by challenging Peter to a fight and, not knowing his own strength, Peter easily breaks his hand. Flash's family demand the Parkers pay his medical bills for the incident or they'll sue, ignoring the fact that Flash had been beating up Peter for years and he was the one who instigated the fight.
* Ultimate Spider-Man for Flash, which ultimately rewards him the Venom symbiote and a place with S.H.I.E.L.D. as the trainee Agent Venom.
* Ultimate Spider-Man for not thanking her when she saves their lives.
* Ultimate Spider-Man for not trusting Spider-Man, he mentions in passing that his son is dead, when John Jameson is still alive in the regular Marvel continuity.
* Ultimate Spider-Man frequently has to improvise ill-fitting and ridiculous-looking costumes when he is unable to get Mary Jane to fix his Clothing Damage.
* Ultimate Spider-Man friends when his superhero life intrudes on his regular life.
* Ultimate Spider-Man from bullying his newest victim, then tries to introduce himself. Any gratitude he might have received is ruined by that since the two already knew each other and Peter just couldn't remember him.
* Ultimate Spider-Man gay, and that his best friend Ganke was going to be his love interest. This had to be debunked multiple times just because one quote got taken out of context.
* Ultimate Spider-Man giggles at the phrase "trap" instead of the "booby" before it.
* Ultimate Spider-Man, Groot has taken the shape of a galleon and become Captain Webbeard's ship.
* Ultimate Spider-Man had Peter explaining to Aunt May that he's all right after his school was ambushed by the Frightful Four, but couldn't say the same for Harry, who wound up in the hospital. We cut to a heart monitor flatlining as if he had died, but it was just being switched off and wheeled out of his room by a nurse.
* Ultimate Spider-Man has a similar sequence after Spidey is shot and arrested.
* Ultimate Spider-Man has become loathed by adult Marvel fans who find the show too comedic and immature compared to other Marvel cartoons from the same period, or the comic with the same name.
* Ultimate Spider-Man has "Petre", a female version of Peter he encounters when he enters her gender-swapped reality.
* Ultimate Spider-Man has Spidey express a belief he's a good amateur flute player—a belief constantly undermined by his actual playing, which is so off-key, it caused everyone to cringe.
* Ultimate Spider-Man, he is a mainstay of the Sinister Six and attacks Spidey alongside them for no reason that's ever been explored, and his origin never comes up.
* Ultimate Spider-Man. He refuses and persuades May that Norman can't be trusted, but Mary Jane still ends up getting kidnapped.
* Ultimate Spider-Man, he says that he leads a team of heroes... and Nova.
* Ultimate Spider-Man. He successfully tracked Spider-Man down, but since Kraven is just a normal human who happens to wrestle alligators or whatever, Spider-Man completely wipes the floor with him (less than a minute after a much tougher fight with Doc Ock). Moral of the story: Hunting The Most Dangerous Game is no fun for anyone if the hunter is unarmed.
* Ultimate Spider-Man. His essays about human-mutant integration were awesome. But, when he actually met him and heard his way of dealing with a dangerous and destructive mutant, he was not so amazed.
* Ultimate Spider-Man. His henchmen, the enforcers, betrayed him and sided with

Kingpin, and hold Mr. Big while Kingpin killed him. Sometime later, however, Ox is trying to get drunk, saying that "we are not men!", regretting the betrayal of his former boss.
* Ultimate Spider-Man. However in the end Peter seems to just not be shipped with anyone by the show.
* Ultimate Spider-Man. In #13, Peter tells his best friend Mary Jane his secret, but Mary's squeals of delight lead Aunt May to a wrong conclusion as to what is going on in Peter's room. She however reminds Peter that his parents met in high school.
* Ultimate Spider-Man in disguise. The return of Jessica in the Ultimate Enemy mini-series finally put this speculation to rest.
* Ultimate Spider-Man: In his first superhero fight, the Green Goblin took Spider-Man, flies with him to a high altitude, and then throws him to his death. What can he possibly do? Create a net of webs below? That's so crazy... of course it worked!
* Ultimate Spider-Man. In real life however, the series still continued without any such hiatus.
* Ultimate Spider-Man: In the opening narration of the first issue, the random guy is not particularly interested in Greek mythology, but Norman told him the whole story of Arachne anyway. It does not have anything to do with anything, he just loves to hear the sound of his own voice.
* Ultimate Spider-Man into the spacefaring Astro-Carrier, the submersible Aqua-Carrier, and the flying Dragon-Carrier.
* Ultimate Spider-Man is also a subversion as well. Mary Jane was the first person Peter told and when he revealed it to her privately, she was under the impression that Peter was going to kiss her and ask her out, which Peter on hearing the remark, that she still came up anyway (showing that she wanted a relationship with him). The secret did not prompt the romance as there was already a lot of romantic tension between them but MJ loves Peter being Spider-Man, especially when he takes her web-swinging, and for being able to be part of his cool adventures. However, throughout the series, she made it known that she also wishes that Peter wouldn't risk his life so much and she suffers PTSD after an encounter with Goblin that led to their first break-up (Peter broke up with her the second time over her constantly getting involved in his life when he told her to step back), but their attraction is too strong for either of them to stay away from each other.
* Ultimate Spider-Man is loosely adapted from the comic book with the same name while using some elements from the 616 and Marvel Cinematic Universes. Aiming for a more comedic tone than its predecessors, the series tries its best to put a different spin on all the old characters and try to bring in something new.
* Ultimate Spider-Man isn't exempt from this either. Mary Jane originally breaks up him after she begins having nightmares about him dying, coupled with the fact that she suspects Gwen Stacy has feelings for him. Gwen briefly dates Peter but dumps him when he's replaced by Chameleon.
* Ultimate Spider-Man is utterly in love with these. Every opportunity for any character to land this way is gleefully taken.
* Ultimate Spider-Man is very deliberately based on this. The main theme of the story is that adults have all screwed up the world, and the teen-age Spider-Man, who barely understands what they've done, has to do his best to fix it. At one point, Spider-Man directly tells the reader this in a monologue.
* Ultimate Spider-Man, Jameson initially backs a political campaign of a man who is tied to known mobster Wilson Fisk because the candidate is anti-Spider-Man. When the candidate loses it after one question in a softball interview (any answer other than threatening the reporter and destroying the recording device would have satisfied), Jameson pulls his support immediately.
* Ultimate Spider-Man: Jameson is making a big load of smoke with his cigar. When it goes out, we can see the sign "No smoking please".
* Ultimate Spider-Man: Jameson's reaction when Urich wins the argument about the article on the creature of the sewer.
* Ultimate Spider-Man, Jessica Drew, Spider-Woman, is the end result of the Ultimate Clone Saga. She is a clone of Peter Parker, implanted with his memories

and genetically modified in vitro to be female and develop additional powers. During the Clone Saga she fills the same role as Ben Riley did in the 616 Clone Saga. Afterwards she assumed the CIA/FBI created identity of Jessica Drew and returned to active crime fighting as Spider-Woman. She confessed that along with inheriting Peter's memories, she is still in love with Mary Jane Watson.
* Ultimate Spider-Man, J. Jonah has a television show which essentially makes him one of these.
* Ultimate Spider-Man: Just after Peter's revealed his secret identity to MJ, she admits she thought he was going to kiss her. They start leaning in, closer, and closer... then Aunt May bursts in to say MJ's mom is on the phone, and apparently MJ needs to go home to... clean out her cat's litter tray? Peter sees right through the BS - Aunt May will have no hanky-panky under her roof (even if she approves of Peter and MJ).
* Ultimate Spider-Man: Kingpin called Electro "Elektra". She also works for him, but not in this story yet.
* Ultimate Spider-Man: Kitty can ramp up her density enough to send Spider-Man flying.
* Ultimate Spider-Man, Liz Allan is a vehemently anti-mutant bigot who finds out, quite dramatically, that she's a mutant herself.
* Ultimate Spider-Man: Liz had an outburst when Kong was talking too much about Spider-Man. Mary Jane dismissed her as a mere drama queen.
* Ultimate Spider-Man: Liz is drunk at a party at Long's house, and tries to hook up with Peter. He tries to get her away from him, but too late: Mary Jane shows up and saw it.
* Ultimate Spider-Man Loeb established "Our show lives in a world that is pre-romance".
* Ultimate Spider-Man loves this trope, though it usually tends to be out of necessity or accidental. For example, Sandman can't turn his clothes into sand, and Electro and the Hobgoblin burn right through their clothes.
* Ultimate Spider-Man, Luke Cage nudges Sam Alexander so he can introduce himself.
* Ultimate Spider-Man makes Mary Jane into this trope, though she isn't in most other incarnations.
* Ultimate Spider-Man manages to capture Spider-Man. Throughout the series, he was played up as a joke, a character who didn't even really qualify as a supervillain that Spidey would easily subdue in the opening pages of an arc to show "business as usual." While he has Spider-Man hanging upside-down he reveals that from his point of view, things weren't nearly so funny, revealing a level of anger and humiliation made only worse by the fact that Spider-Man never gave him a second thought.
* Ultimate Spider-Man. Mary Jane, for her part, puts in time at a Hot Dog On A Stick kiosk in the mall.
* Ultimate Spider-Man: MJ wants Peter to take her swinging around. "No". She insists, begs, but the answer is still "no".
* Ultimate Spider-Man (Nicole Fury), Harry Osborn (Harriet Osborn), J. Jonah Jameson (J. Joanne Jameson) and Norman Osborn (Norma Osborn).
* Ultimate Spider-Man Norman Osborn is arrested by Nick Fury for the crime of intentionally and illegally giving himself super-powers, which is a crime in the Ultimate Universe (the fact that he uses said powers to commit multiple murders doesn't exactly help). But once arrested, Norman (and the other villains SHIELD takes into custody after Peter defeats them) are not provided with legal counsel, representation, or are even allowed any form of contact with the outside world. Nick Fury flat-out says he has no problem detaining them in a SHIELD prison facility indefinitely unless they agree to work for him. Osborn naturally points out that whether they altered their DNA or not, they still have human rights (Fury claims otherwise) and that holding them without trial or even contact with the outside world is highly illegal. All good points, though the moral high ground is lost when coming from Osborn, who inevitably goes on a killing spree every single time he escapes custody. The one time he escaped and used the chance to make a media shitstorm by telling everyone he was illegally detained, it was derailed when he flew into a homicidal rage and burned his own attorney to death.

* Ultimate Spider-Man: Of course the big and ugly spider would bite Peter Parker, and uncle Ben would be killed by a thief. It may be a retelling, but those things are a very strong part of the Spider-Man mythos to be significantly changed.
* Ultimate Spider-Man of two incredibly bored doctors checking on the comatose Doctor Octavius.
* Ultimate Spider-Man.... Only to be murdered by another super-villain.
* Ultimate Spider-Man, only to find that the two heroes moved everything in the room after turning off the lights.
* Ultimate Spider-Man. Parker tries to bring it up during class, and the teacher gives him detention. The implication is that everybody knows he bought the cops off, and is therefore the de facto master of the city — and their lives are at risk if they bring it up.
* Ultimate Spider-Man: Peter and Kitty hit it off so well because they're both pop culture geeks.
* Ultimate Spider-Man: Peter and MJ are alone in Peter's room, and MJ screamed. May asks what's happening. "We're studying!" "And I'm Katie Couric!"
* Ultimate Spider-Man, Peter has to spring into action when his costume isn't available to him, so he just puts the hood on his jacket over his head.
* Ultimate Spider-Man, Peter Parker dated the X-Men's Kitty Pryde for a time, but eventually found himself drawn back to Mary Jane.
* Ultimate Spider-Man Peter's inability to tell Harry the truth along with the constant ditching puts a considerable strain on their friendship.
* Ultimate Spider-Man, Peter works at a fast-food where he has to wear a frog hat. Bobby (Iceman) later joins him behind the counter when Aunt May forbids them from using their powers in public.
* Ultimate Spider-Man plays a school janitor who is prone to delusions of grandeur and frequently talks to himself when nobody else is around. The students seem to think he is insane.
* Ultimate Spider-Man. Really, any comic written by Brian Michael Bendis can be full of this, particularly in the form of dialogue loaded with stuttering and other verbal tics most writers would bypass in the name of getting to the bloody point.
* Ultimate Spider-Man: Returning home after leaving his wrestling career, Peter sees several police cars outside, because Uncle Ben had been killed by a burglar. After that, he freaks out each time he returns and sees a police car outside his house. Not helping is Peter's guilt complex, and the fact the last time he and Ben had spoken, it had been an argument.
* Ultimate Spider-Man reverses the usual formula of the main character's superhero duties getting in the way of their civilian obligations by having the civilian obligations get in the way of their superhero duties. In it, Peter tries to go stop the Rhino's rampage, but finds himself constantly waylaid for various reasons (attending a Parent-Teacher conference with Aunt May, comforting a crying Gwen Stacy, having a run-in with Flash Thompson) and by the time he's finally able to suit up, the Rhino had already been defeated by Iron Man.
* Ultimate Spider-Man school bully) remembers several things: the incident with Peter Parker and the weird spider at Oscorp, that Pete suddenly became a great basketball player, that he broke Flash's hand, that Spider-Man debuted at the wrestling club shortly after the gang visited it, that Spider-Man showed up to save the school when the Green Goblin began to attack it…and Kong suddenly realizes Peter Parker is Spider-Man! Being Kong, his response to this is to then run through the school yelling this to the world.
* Ultimate Spider-Man, Shang-Chi is applying undercover for the job of the Kingpin's bodyguard. Unfortunately, he fails the 'randomly kill that guy' test.
* Ultimate Spider-Man, shared the secret of his powers with his friend Ganke.
* Ultimate Spider-Man shows the conversation between Spider-Man and Green Goblin from the previous issue, only from the latter's point of view. Among other things, he sees blood-red skies, Spider-Man as some horrifying human/spider hybrid (complete with fangs) and dozens of ghost-like "plasmids" floating around and whispering to him.
* Ultimate Spider-Man's Norman Osborn set up "Cellar Door" as an all-purpose

trigger phrase for his son Harry.
* Ultimate Spider-Man, so a racial difference probably wouldn't be too surprising. Humorously, the comic book did the same gag, as described above.
* Ultimate Spider-Man so he could bring her into that book, too. Of course, Kitty is a fan-favourite, so how bad this was is debatable, especially as he still paid focus to other characters while writing.
* Ultimate Spiderman, so it can be assumed that sexism went the other way in this universe. Interestingly, both of these tropes combined means that the same people still discriminated against the same people throughout history (herstory?).
* Ultimate Spider-Man, some villains break into the school and demand that Spider-Man give himself up. Pete promptly calls a food fight and sneaks away while it's taking place.
* Ultimate Spider-Man speak to Jonah again. After this incident, Jonah never tries firing Peter again.
* Ultimate Spider-Man, Spider-Man just misses a pike at the top of a building during an aerial chase scene.
* Ultimate Spider-Man: Spider-Man makes such a joke in "The Sinister Six".
* Ultimate Spider-Man: Spider-Man's wacky jokes and quirky personality are what he uses to shield him from a relentlessly unkind world.
* Ultimate Spider-Man, Spidey gives Doctor Octopus a wedgie at one point, then immediately feels bad for using a classic bully maneuver.
* Ultimate Spider-Man, Spidey has something of an existential crisis after a brief brush with the supernatural, saying later that he's "Seeing things he shouldn't." The inciting incident was actually a relatively tame (by reader standards) vampire story, but his seemingly outsize reaction reminds us of how mentally devastating commonplace fictional tropes would be if ever actually encountered.
* Ultimate Spider-Man, Spidey jumps around a bit while holding his foot after trying to kick the Juggernaut. Yeah, bad idea.
* Ultimate Spider-Man, Spidey's costume is destroyed, and he has to wear a cheap, improvised replacement. When he confronts a crook who asks him where his real uniform was. Spidey retorts, "Your mom's washing it for me." He later admits that jokes like that are usually beneath him, but he's not exactly on his A-game.
* Ultimate Spider-Man, Spidey torments the Kingpin using an exhaustive written list of fat jokes. On note cards.
* Ultimate Spider-Man's squirrels and even had his powers stolen by the Super-Adaptoid, arguably another example of a Juggernaut.
* Ultimate Spider-Man subscribes to this, whole-heartedly, giving it as his reason for being so unfair towards Spider-Man when Peter asks.
* Ultimate Spider-Man, Taskmaster says this after Spider-Man (Miles Morales) and Spider-Woman beat the crap out of him, while showing he's no worse for wear (because, instead of just having photographic memory and reflexes, he has the actual power of adapting to his opponents' powers and strength levels).
* Ultimate Spider-Man: The announcer of the wrestling arena asked, who among the public has the guts to fight against Crusher Hogan? Kong has them... but he's a minor. Peter Parker has them, but he wears a mask to conceal his identity.
* Ultimate Spider-Man: The explosion in Oscorp in the first issues was introduced with the narration of a news voice over.
* Ultimate Spider-Man: The first fight between Spider-Man and the Green Goblin takes place in high school, that the Green Goblin attacked with his fireballs.
* Ultimate Spider-Man, the first two being older in the comics than they are in the show. A teen version of the Rhino also shows up as one of Spider-Man's former classmates and a similarly deaged version of the Vulture later appeared.
* Ultimate Spider-Man, the Grandmaster taunts the Collector with "Second place means first loser!"
* Ultimate Spider-Man, the Howling Commandoes consisted of Werewolf by Night, Frankenstein's monster, the Living Mummy, Man-Thing, and Max the Invisible Man.
* Ultimate Spider-Man The implication is that everybody knows he bought the cops off, and is therefore the de facto master of the city — and their lives are at risk if they bring it up.

* Ultimate Spider-Man Then again, it takes him nearly a hundred to tell this to Aunt May.
* Ultimate Spider-Man: The police made an outline of Uncle Ben at the Parker's house.
* Ultimate Spider-Man: There is a noise in the back door. Ben and May thought that it was Peter, who usually uses that door. They call for him... and nothing. Silence. They both realized that something was wrong, because of the kind of silence. Then, the burglar appears, with a gun.
* Ultimate Spider-Man there's a Doombot that contains a smaller Doombot which contains a smaller Doombot and so forth - all of them nasty, right down to the mouse-sized one. They get loose on the SHIELD helicarrier.
* Ultimate Spider-Man, the Trapster attacks a school play of Spider-Man, traps Flash Thompson who he thought was Spider-Man, then is subdued by the real Spider-Man and forced to listen to Flash's horrible singing till the police arrive.
* Ultimate Spider-Man, thus expanding on Uncle Ben as a character and showing why his death deserved to be seen as tragic.
* Ultimate Spider-Man to appear and endless waves of police to attack. Rack up enough points, and SWAT, helicopters, and SHIELD join in. The police spawn in around every corner, and while you can eat them to regain health (Venom's health gradually decreases) they don't nearly give as much as civilians, making the mini game a show of how many points Venom can rack up before being shot down himself.
* Ultimate Spider-Man to stop the Green Goblin from stealing their DNA. Interestingly, he didn't meet them all at once, but instead travelled from one dimension to another, until the end where they all come back together.
* Ultimate Spider-Man tries to kidnap Peter Parker by knocking him out with a couple of tranquilizer darts... for a few minutes anyway. Then his enhanced metabolism kicks in allowing him to wake up earlier than he was supposed to and resist all subsequent shots. Cue boss battle where he has to fight off both Silver Sable and her mercenaries while trying not to succumb to the effects of the tranquilizers in his system.
* Ultimate Spider-Man. Ultimate Spider-Woman is a clone of Peter Parker, with all of his memories and personality traits - except she's considerably more abrasive, especially to Miles. (They were going to blank her memory and give her an entirely new made-up personality and set of memories, but didn't get around to it before wackiness ensued.)
* Ultimate Spider-Man used a serum that was a derivative of Cap's Super Soldier Serum. The Marvel universe version had a different origin, however.
* Ultimate Spider-Man used a version that looked a bit more like a comic-book rather than a cartoon.
* Ultimate Spider-Man version of the supervillain Swarm is made of nanomachines instead of bees like his comic book version.
* Ultimate Spider-Man, Volume 1. Peter Parker listens to a lecture on the Watergate Scandal; the teacher comments on how paranoid Nixon was, while still keeping all of his incriminating evidence because he thought he was untouchable. It occurs to Peter then that Kingpin records all of his incriminating evidence for posterity because he thinks he's above the consequences, as well, and that this evidence could also be leaked to the press.
* Ultimate Spider-Man vs. the Sinister 6: When Doc Ock forces Kraven the Hunter to become host to the Venom symbiote and he turns into a giant wolf-beast, Spider-Man sarcastically asks Kraven if he got a new haircut.
* Ultimate Spider-Man was so successful was because of how many new Spidey fans it drew in, more often than not leading to said fans checking out the main Spider-Man books and becoming fans of that as well.
* Ultimate Spider-Man, when Peter complains that he's been just getting by on luck and his natural strength and speed, so Mary Jane suggests he take martial arts. In the first 100 comics of the series, there's a surprising number of times where he actually gets the crap kicked out of him.
* Ultimate Spider-Man: When Peter said he was Spider-man, Mary Jane laughed so hard that she fell to the ground in laughter.

* Ultimate Spiderman, when Spider-Man swings by the Kingpin's building for no reason while contemplating his life, Elektra shows up and invites him in... where Kingpin offers him pizza and a partnership.
* Ultimate Spider-Man, when Spidey tries to intimidate the Kingpin by dropping in on him unexpectedly, only to realize that the Kingpin put in shatter-proof windows to get rid of such problems. Makes the web head lose his cool. Kingpin doesn't even blink at the sound of Spidey hitting his window.
* Ultimate Spider-Man when the Daily Bugle's new screen is shown. "Mistress Death opens new cupcake shop" is a hilarious example.
* Ultimate Spider-Man where in a flashback, the art goes back to Bagley's style, rather than the current penciller for the series, Immonen.
* Ultimate Spider-Man, where Peter got the same black costume and lost it over the course of a couple issues. When Mary Jane discovered he'd discarded it, she agreed that "it wasn't him".
* Ultimate Spider-Man, where Spider-Man is normally a well-respected threat to the bad guys until he begins to quip. His talking points normally date him (making pop-culture references or naïve assumptions), prompting the bad guy to reply along the lines of "Wait, how old are you?"
* Ultimate Spider-Man, where Spidey attempts to enter Kingpin's skyline headquarters in this manner, only to discover the hard way that since his previous visit, Kingpin has had shatterproof glass installed. The three panels of Spidey hitting it then sliding down are tremendous.
* Ultimate Spider-Man, where Spidey, trying to make a dramatic entrance into the Kingpin's office, finds that Fisk has installed much stronger glass than last time Spidey was around.
* Ultimate Spider-Man (which did well with adults but not as well with kids) was not renewed.
* Ultimate Spider-Man who relies on his wits and skill to get him through the day. Even in-universe he points out that all the things he gets mocked for are the traits that keep him a.) out of jail, b.) alive, and c.) not bogged down in a pointless feud with Spider-Man.
* Ultimate Spider-Man without anyone becoming unduly suspicious about it. Public school chairs... The most hilarious use of this trope is when Wolverine and Spider-Man switch bodies. Wolverine's attempts to learn how to websling must be seen to be believed.
* Ultimate Spider-Man, you can guarantee most of the girls will be drawn this way.
* Ultimate Spider-Woman, and develops an almost insane hatred for Spider-Woman in part for defending those people and in part for interfering with his fun.
* Ultimate Spider-Woman because of her having to juggle her acting and modelling careers with her school studies and her fighting crime as Spider-Woman, being subjected to a public hate campaign by a relative of one of the victims of one of her supervillain enemies, driving herself crazy with guilt over not being able to keep everything going, being disliked or outright hated by her boyfriend's parents, and eventually nearly suffering a nervous breakdown when everything finally comes crashing down at once.
* Ultimate Spider-Woman: Change With The Light develop a weird, Batman/Joker-like fixation with her as the "straight woman" in his performance art, and deliberately stages kidnappings and robberies to attract her attention and force her to fight him.
* Ultimate Spider-Woman: Change With The Light Jack O' Lantern gives a few of these explaining his motivations for his bloody crime spree. Notably, he starts to get sick of it and voices his irritation at constantly having to explain his motives.
* Ultimate Spider-Woman: Change With The Light Jack O' Lantern knows her real identity.
* Ultimate Spider-Woman: Change With The Light Tendril due to his extremely disturbing obsession with her.
* Ultimate Spider-Woman: Change With The Light. When Mary Jane Watson suddenly finds herself developing bizarre superhuman powers, it doesn't take her long to figure out how to use them. She's already an experienced fighter due to being a

blackbelt martial artist, which makes it easier for her to determine how to best use them in a fight.
* Ultimate Spider-Woman. Instead of irrationally denying it, Jack's relatives instead react with horror and dismay when they hear the news, along with the pure shock that they're related to a psychopathic mass murderer.
* Ultimate Spider-Woman is on the take from some powerful crime syndicates. However, he doesn't look the other way from crimes against mutants, because in his mind, they are as bad as he is since they justify hate with talk of protecting humanity.
* Ultimate Spider-Woman She typically claims that she was caught up in a supervillain attack, which is more plausible than you might think because of how many supervillains are causing mayhem in New York at any given time.
* Ultimate Spider-Woman there was the fact that two of the other waitresses had to go home sick, forcing Mary Jane to cover for them, to the point where she didn't get a break all night. When one particularly obnoxious customer kept demanding for one particular brand of coffee even after Mary Jane repeatedly tried to tell her they were all out, it's not hard to see why she finally exploded and yelled at the customer. Unfortunately, her boss didn't see it that way and took the $200 gift certificate he gave the customer out of Mary Jane's salary.
* Ultimate Spider-Woman was an Ordinary College Student when she began to develop her bizarre superhuman abilities, and continues to be one even as she tries to juggle a superhero career along with it.
* Ultimate Spider-Woman who's in no shape to do the job herself because of everything she's been through at the hands of Phillip Watson, Mary Jane's father and Anna's brother.
* Ultimate Stuntman, an obscure unlicensed NES game by Codemasters/Camerica.
* Ultimate Sue blocking the light from reaching some zombies' retinas, rendering them blind, and later, rapidly creating and dissipating bubbles in the zombie FF's brains, causing them to collapse.
* Ultimate Swimming Pro as well as the reason why she was chosen to be in Hope's Peak to start. And swimming's just what she's best at, as she participates in six different sports clubs.
* Ultimate Teacher by the sheer nonsensical awesome that is the movie.
* Ultimate Teacher Ganbachi and Karima do this when they're charging against each other and get interrupted by Hinako.
* Ultimate Teacher's US dub stuck very close to the Japanese dialog, the UK dub added tons of jokes and sarcastic dialog to the dub (along with some minor story/character personality changes), which does fit the movie's screwball comedy quite well.
* Ultimate, the message you get when erasing a World of Light save file has this impression:
* Ultimate Thor has it revealed that, after Loki destroyed Asgard, Thor was reborn as a human. It takes up until Ultimates 2 for him to regain his full might. And when he does...
* Ultimate Thor replies that Cap's case was a combination of genetics and cryogenics, scientific stuff; Thor's claims of being a reborn god are something completely different. Thor's right, by the way.
* Ultimate Tony Stark, and died at the end of the adventure. Tony mourned her next to a window... and forgot it all when he saw a gorgeous blonde passing by.
* ultimate ultimate weapon of the Lensman series was a psychic Wave Motion Gun, since the Eddorians could not be killed by any physical force, however applied. It consisted of the gestalt mind of the Children of the Lens (the UNIT), backed by the integrated minds of all of Arisia and powered by the maximum-effort mental output of every Lensman of the Galactic Patrol.
* Ultimate Universe), a kill-crazy multi-personality electronic consciousness that caused galactic civilization to collapse before being beaten back; bits of it still show up in old tech from time to time, like WWII soldiers stranded on islands who don't know the war is over.
* Ultimate Universe constantly talk about how genetically superior they are, and

how it means they have a higher standard of behavior. On one occasion Professor X tells Cyclops that a certain instance of resentment is a human thing, and he is "pleased to say" Cyclops wouldn't understand. The ordinary human they are talking to at the time says not a word.
* Ultimate Universe from Aunt May. He does end up coming back in style, though.
* Ultimate Universe: Modern-day retelling, but not a remake of an older work.
* Ultimate universe, Peter does try to defend himself from Flash after he gets his powers. He winds up accidentally breaking Flash's hand, and the jerk's parents sue Aunt May and Uncle Ben for the medical costs.
* Ultimate universe's for Fury to invoke this trope, just so he can have a chance to beat Doc Ock up before being arrested.
* Ultimate Universe-style miniseries/series of one-shots was published in 2009, and made much of the time difference being exactly 90 years.
* Ultimate Universe, Ultimate Namor became fluent in English by listening to the Fantastic Four speak to SHIELD agents for roughly five minutes.
* Ultimate Utopia XXIII. Emperor Paplatine tells Vader that now that he has completed Order 66 to execute Order 67: "Get me a latte. Do not hesitate. Show no mercy."
* Ultimate Venom, or maybe just ridiculously rapid digestion, going on, as immediately after eating them there's no visible difference.
* Ultimate Video Rumble, although the RumbleDome has an excellent infirmary.)
* Ultimate Video Rumble isn't enough, as the Executioner rises as they start to leave.
* Ultimate Vision and Captain Marvel managed to drive him away and save the planet.
* Ultimate Vision, but one of the modules was left behind. Unable to do the things the whole swarm would do, it tried to dig into the core of the planet to make a planetary explosion.
* Ultimate Vision) can communicate with chemical enzymes, gravitational flux, microwaves, spacetime tears, and so on. All of which comes in handy when she fights one of Gah Lak Tus' components:
* Ultimate Vision: Dima is a girl completely made of plastic polymers by AIM. The experiment was going fine, but she ceased to grow at the age of 6. The scientists treated her as little more than a tool.
* Ultimate Vision face. Something he said? No, the alien monsters outside the window.
* Ultimate Vision: Gah Lak Tus has one, that turns people into purple monsters that do his will.
* Ultimate Vision: Gah Lak Tus seems to be about to destroy itself to cause a massive destruction. Or is that the plan?
* Ultimate Vision: In Tarleton's proposed utopia, people would only breed with people arranged by the government, based on genetic compatibility.
* Ultimate Vision: Of all the women Sam could have fallen in love with, did he had to do it with a female alien robot?
* Ultimate Vision: One of the scientists can't believe that Tarleton had fused the Gah Lak Tus tech into his own cyborg components. He asked for clarification: "insane" is hardly a scientific term.
* Ultimate Vision: Tarleton plans on creating a technological utopia on earth. Of course, those unfit for it will be killed... in a painless manner.
* Ultimate Vision: Tarleton tried to deliver one, but the power supply was failing, so no TVs were actually interrupted.
* Ultimate Vision: The Gah Lak Tus module has destroyed the bombers. Colonel Fury, orders?
* Ultimate Vision: Vision cut Tarleton's head for killing Dima, and threw it to the horizon.
* Ultimate Vision: Vision cut Tarleton's head for killing Dima, and threw it to the horizon. That doesn't kill him, but left him in a highly uncomfortable position.
* Ultimate Vision: When the Gah Lak Tus module released the virus, the whole section is locked. Two full work units must be killed, but there's no other way.
* Ultimate Vision: When the Gah Lak Tus purple monsters show up, Vision takes the

axe from Dima and orders her to close her eyes.
* Ultimate Warrior 1991. (Meaning a possible kayfabe explanation might be that Warrior was traumatized by his experience with Roberts and the "bad" outcome of his feud with Undertaker.)
* Ultimate Warrior (49 years old as of his last match, with independent federation Nu-Wrestling Evolution (NWE))
* Ultimate Warrior, and cynic (with some mild-to-moderate bigotry suggested as well). At WrestleMania XXX, he put all that to rest and made up with several people whom he shared beefs with, got inducted into the 2014 Hall of Fame, mending things over with the audience the night after, which preceded his death from heart failure the following day. All this went to restore his reputation, allowing him to be fondly remembered in the times after as a great wrestling legend without the need for posthumous reconsideration.
* Ultimate Warrior crossover and many other takedowns across the internet. He also invented the word "destrucity". It is to this day unclear how much of this was acting and how much of it was James Hellwig getting caught in-character.
* Ultimate Warrior declared in the middle of the ring "There's not a WARRIOR in the world that I can't beat to get my belt back..." Cue The Warrior's dramatic entrance, a long & rambling promo, and him vanishing in a cloud of smoke, with no physical contact between the two, which may make this an aversion.
* Ultimate Warrior. He capped off his career in the WWF by completely no-selling Triple H's Pedigree and remaining undefeated until he was fired again.
* Ultimate Warrior in 2014, then poignantly dying just a few days later.
* Ultimate Warrior in April 2014, delivered less than 24 hours before his death, included six straight "you"s.
* Ultimate Warrior in punishment for the Madison Square Garden Incident. Warrior was making his big return and they needed a warm body for him to squash, and there really wasn't anyone else available.
* Ultimate Warrior is arguably the prime example of this trope. He only has a handful of clean losses on record. Not even Hulk Hogan could stop him (without cheating, that is).
* Ultimate Warrior looks like the aftermath of him raping Santa instead, though.
* Ultimate Warrior so much that now he decides who is allowed to be over, even if he has to sabotage someone else's push just to assure that no one is bigger than the company. As far as he's concerned, the only huge draw Vince wants in WWE is the WWE brand itself.
* Ultimate Warrior's Workout since working out while off balance forces more muscles to engage, especially the core, and a stronger core helps to prevent lower back injuries.
* Ultimate Warrior the most infamous being the Hogan-Warrior rematch at Halloween Havoc 1998, widely considered to be one of the worst matches in wrestling history. He was gone shortly afterward.
* Ultimate Warrior to bury those that stand on his way to reach the top of the wrestling world.
* Ultimate Warrior training in preparation to challenge Warrior for the title. Rude had defeated Warrior a year earlier to become Intercontinental Champion, and vowed to beat him again.
* Ultimate Warrior was also famous for this, interspersing feral snarling, grunting, and shouting with long, rambling promos peppered with million-dollar words used almost-correctly. In his later years, he even started throwing in words he made up out of whole cloth, apparently believing his character motivations to be too complex to explain in the English language as it stands.
* Ultimate Warrior, who has also admitted that he never watched wrestling and only got involved for the money. He infamously had many monetary disputes with Vince McMahon that resulted in him leaving on bad terms multiple times.
* Ultimate Warrior; who has also referred to his fans as his "Little Warriors" as well)
* ULTIMATE WARRIOR? YOU TROPERS NEED TO GET FOKED ON THIS SECTION! * Skronk*
* Ultimate, which prevents you from banking. You can still use banks to unnote

items you get from drops, but you can't note items that you didn't already get that way. While you have unlimited lives and your items stay on the ground (and invisible to other players) for a full hour after a death to stop DDoSers from looting you, the wilderness and instances can wipe you of nearly every item you own.
* Ultimate with a burning hatred for each other doesn't seem to deter these shippers.
* Ultimate, with interpretations ranging from her beating up other characters to unwind from the stress of her job, to her doing it as a form of training so she can overthrow the mayor and take over the village for herself.
* Ultimate Wolverine at one point gets decapitated, yet remains alive to converse with Nick Fury. Fury theorizes it's because his healing factor is actually a "survival factor" and his body is adapting to continue surviving instead of merely healing, with the skin of his head taking in oxygen to keep his brain alive
* Ultimate Wolverine: Jimmy and Black Box are rescued from Wildchild by Quicksilver.
* Ultimate Wolverine: Magneto gave Wolverine many missions of infiltration and killing in the past. He has an habit of holding the kill (and then escaping) when he meets a girl that he wants to have sex with. Magneto got used to those "delays", and let him be, because he was still the best hitman at his disposal.
* Ultimate Wolverine: "Mother is calling her children home" activates the Mothervine subjects.
* Ultimate Wolverine: Quicksilver, laying in a hospital bed, is recruited by someone for something. To be continued in...Ultimates: Disassembled!
* Ultimate Wolverine: Quicksilver would have no problem killing his brother Jimmy if needed, but he would prefer if he joined the Brotherhood.
* Ultimate Wolverine universe, Wolverine and Magda had sex after meeting again, and of course, she got pregnant with that single intercourse.
* Ultimate Wolverine: When Jimmy asked Kitty about Wolverine, it seemed as if he was about to kiss her.
* Ultimate Wolverine: Wolverine gave Jimmy to be adopted by the Hudsons. He had known James Hudson during a war. He knew that if he kept the kid, he would eventually be captured by his enemies, or worse, grow up and turn out to be like him. He wanted something better for him.
* Ultimate X — a TNA signature match; essentially a "ladder match without the ladders"; instead, two cables are strung across the ring (forming an "X" pattern), and the object (normally a championship belt or a large red "X") is placed where the cables meet. To claim the object and win, one must climb the turnbuckles, and then climb hand-over-hand across the cables to reach the object. Its flaws, however, are brought to the spotlight during the few times that the title or X has actually fallen. In the first match, officials had to stop the match and re-hang the belt twice. In a later match, a wrestler caught the X, and officials declared the match over, with a rematch immediately signed for a later date, this time with the X literally chained to the cables. Tropes: Like the ladder match, two wrestlers will often end up racing across the cables from opposite ends, and end up fighting in the middle. Like the steel cage match, a wrestler who has the victory within grasp will often give it up in order to do one spectacular move off of the high cables.
* Ultimate X-Men: Abraham Cornelius seems like a good guy, but has no problems with horribly experimenting on Nightcrawler and Beast.
* Ultimate X-Men: After defeating Apocalypse, Jean Grey took off into the outer space. She returned in the next issue, as it was revealed that was causing problems in the galaxy during her journeys.
* Ultimate X-Men: After everything is said and done, and the Professor is relaxing at home with Jean, he mentions that he hopes that Nightcrawler will return someday, and they can be all under the same roof with Magneto and the others. Magneto? Did he just say Magneto?? Don't fall asleep now, professor!
* Ultimate X-Men, a lackey failed Magneto. He was unlucky to have an implanted pacemaker.

* Ultimate X-Men and confronted by the Scarlet Witch, who has probability manipulating powers like his. How does the encounter end? With Longshot turned into a cat.
* Ultimate X-Men, and his boyfriend Northstar, again, but this one is from an alternate dimension than the one mentioned above.
* Ultimate X-Men: Angel has wings, but he's inexperienced and unskilled at combat, and he knows it.
* Ultimate X-Men: Angel's parents refused to deal with their son having massive angel-wings, and left him at a ranch of theirs.
* Ultimate X-Men: A non-verbal one during "Sinister". Scott's taken hostage by an arms dealer, and fires his beam at Colossus. It bounces off Piotr's head and knocks the hostage-taker out, causing Piotr to ask how Scott knew his beams would reflect off Colossus' skin. Scott just changes the subject.
* Ultimate X-Men. A scene in an airport had a guy with a sign for "Millar".
* Ultimate X-Men, at the beginning of the Fenris arc, the team's hanging out at Coney Island. Naturally, bad guys sabotage the Ferris wheel and the X-Men have to save the day.
* Ultimate X-Men at the hands of his son, Magneto frantically grovels to Xavier as the latter turns his own powers against him before hurling him into space.
* Ultimate X-Men. Blob even says that everyone on the internet is either guys or guys pretending to be girls.
* Ultimate X-Men: Bobby has been on vacation, got a girlfriend, and told her about the school. Not just the school itself: every minute detail about it. Xavier was hesitant to simply erase the memory of this conversation from their minds, but saw no other alternative. He asked Jean, who didn't see another option either, so he proceeds. Still, he loathes having to do it.
* Ultimate X-Men: Bobby is usually just the token teenager, the young guy shoehorned into a superhero world he does not fully understand. But when Weapon X attacks the mansion... he freezes everybody (and "freeze" is not an easy pun, he reduced the temperature and actually turned all the villains and soldiers almost to ice). If not for Rogue, who took the powers of Jean, he would have won the day single-handily.
* Ultimate X-Men briefly quit the X-Men in the first arc, due to Beast nearly getting killed saving the President's Daughter.
* Ultimate X-Men, but Cable and Bishop go back in time and set up events to prevent his timeline from happening.
* Ultimate X-Men: By far the biggest and strongest of the team. He is the "go-to" guy when physical strength is needed.
* Ultimate X-Men: Colossus is like regular Colossus, but with the interesting twist that he especially goes out of his way to protect and defend other gay mutants. When Sinister shoots Northstar he stays at his bed all night (and flirts with him in the morning) and in the Genosha arc he immediately steps up to act as bodyguard to Longshot, who picks up on his orientation and uses it to subtly manipulate him.
* Ultimate X-Men, Colossus is surprised when a cute guy asks if he's single. He instantly hardens... into his organic steel form.
* Ultimate X-Men, Colossus manages to overcome Magneto's magnetic abilities, and save the rest of the team.
* Ultimate X-Men: Cornelius can not understand the X-Men's need for it, and wonders if it is a response to a nervous breakdown.
* Ultimate X-Men. Despite his disdain for humanity, he has his minions steal all of the greatest works of art that they can before he begins a scheme intended to wipe out the entire human race, reasoning that humanity's only worthwhile creations (to paraphrase his terminology) deserve better than to be destroyed with their makers.
* Ultimate X-Men: Doug is the only named human student in Frost's Academy, though it is specifically noted that the Academy does not distinguish between humans and mutants.
* Ultimate X-Men, during the first arc. Mastermind can not get the Scarlet Witch to treat him like anything but dirt, the Scarlet Witch can not get Cyclops to even notice her, Cyclops is too shy to ask Jean to go on a date, and Beast is too shy to

open to Storm. Wolverine managed to score with Jean, but ruined their relation forever when he confessed his mission within the X-Men. Some relations would grow in time, but in the initial times this trope was in full effect.
* Ultimate X-Men face, he shouts "Ibin alqahba!". The translation says "*[censored]", for good reason.
* Ultimate X-Men featured the X-Men foiling a plot by the Provisional IRA. At the time, the 1998 Peace Agreement was still young, and many suspected it might not hold. It did, and the Provisional IRA destroyed its last weapons and ceased to exist some time around 2005.
* Ultimate X-Men: George Bush and Condolezza Rice are briefly seen in the first arc.
* Ultimate X-Men had an even worse example with a kid who dissolved anyone within a mile of him. He woke up to find his parents and whole neighborhood empty and wound up destroying his whole town just by wandering around trying to find somebody.
* Ultimate X-Men, Hank McCoy admits to Storm that when he was younger, a pretty classmate asked him out, then arranged for all of their other classmates to be waiting to laugh at him, when he showed up for their date. As a result, the thought that the gorgeous Storm is into him takes a bit of time to sink in.
* Ultimate X-Men, having the team start at that age while shuffling the original lineup makes sense.
* Ultimate X-Men: In contrast to the strictly red 616 Juggernaut, this Juggernaut's outfit is primarily black, but with lots of red dots/lights on it.
* Ultimate X-Men) in the backstory and his brother Alex (aka Havok) in the series' present.
* Ultimate X-Men is Quicksilver and the Scarlet Witch's half-brother, and more moral person than either of them.
* Ultimate X-Men: Is the "Dark Phoenix" some kind of universal force, or just an aspect of Jean's mental crises? As with Thor, this is initially left ambiguous, and resolved later.
* Ultimate X-Men: Jean Grey becomes evil after becoming the Mistress of Tian, to the point she tried to start of civil war between mutants in a bid for total domination.
* Ultimate X-Men: John Wraith leads Weapon X, which basically amounts to a mutant concentration camp. Wolverine once slashed him in the face.
* Ultimate X-Men: Juggernaut crushed his father's skull in his hand when his mutant powers first manifested.
* Ultimate X-Men: Juggernaut has a change of heart and decides to help Rogue defend the X-Mansion from Stryker's anti-mutant army... and is killed shortly after.
* Ultimate X-Men: Kitty Pryde really doesn't like sharing Bobby's affections with Rogue. And while she's slightly better about it with Peter, she has several moments of friction with MJ (and Ultimate Spider-Man #200 makes it clear she never really got over him).
* Ultimate X-Men: Kitty Pryde was the leader of Utopia and the Mutant Resistance. Decided to step down during the war of Tian because her methods were not working.
* Ultimate X-Men: Magneto has no compunctions about attacking females. He once beat Polaris into unconsciousness with a chair for rejecting his offer of allegiance and insulting his moniker.
* Ultimate X-Men: Magneto is not a man given to laughs, to put it mildly. And when he tries, it is always quite sadistic and mean-spirited.
* Ultimate X-Men: Magneto tried to kill Quicksilver several times and once even tried to get Wolverine to do the dirty deed.
* Ultimate X-Men: Mid-way through a conversation, Charles Xavier reveals to Betsy Braddock he knows she's actually possessed by his son, David. David asks how he figured it out, and Charles notes that the upper-class Englishwoman ordering a cheeseburger and fries was a tip-off, but the fact she kept checking out the waitress's ass cinched it. The perils of being possessed by a teenaged boy.
* Ultimate X-Men: Multiple Man is a villain, but the real and original one is actually trapped in a house at the Savage Land where Lorelei makes him think she's his mom and he's still a teenager. Wolverine could not snap him out of it, not even

by killing Lorelei, so he had to kill him to stop the terrorist crimes Multiple Man was committing all around the world.
* Ultimate X-Men: Mystique joined Magneto as a form of revenge against Professor X for dumping her for Emma Frost.
* Ultimate X-Men: Mystique was once in a relationship with Xavier when she was his student.
* Ultimate X-Men: Nick Fury arrives in New Dehli, ready for a top-secret spy mission... and the first thing he asks is "Does anyone knows any good Indian restaurants around here?"
* Ultimate X-Men: Nick Fury's glasses (in his first appearance, still doing the James Bond number) broadcast all he sees to the SHIELD satellite, and can release a flash to take down a room full of criminals.
* Ultimate X-Men: Nightcrawler was the only member of the group who did not have a significant love interest in some way or form, which was outright confirmed to be the reason for his kidnapping of Dazzler.
* Ultimate X-Men of slowed time to punish his students. In short, a six hour detention takes six minutes.
* Ultimate X-Men of the X-Men. But, somehow, they manage to be friends.
* Ultimate X-Men: Once used his powers to drill a hole in the ceiling above the women's changing room. Storm was understandably pissed to find out.
* Ultimate X-Men) promptly knocks him out with a swift high-kick to the jaw, then yells "That's for calling me American, you skinny English jerk!"
* Ultimate X-Men religion is this, "saviour" of the universe by cleansing the current one.
* Ultimate X-Men: Rogue. The traumatic experiences in her life have driven her more than a bit mad and it's shown from time to time that she's teetering on the edge of complete insanity.
* Ultimate X-Men: Sabertooth does not consider himself a "mutant", "post human" or anything. He considers himself a monster, plain and simple. Men have always been killers, and mutants are simply more powerful killers.
* Ultimate X-Men: Sabertooth has just burnt the secrets about Wolverine's old life, he has been filled with bullets, he will be a lab rat again for the foreseeable future... and he smiles. Sabertooth attacks him, he wants to know why the hell is he smiling!
* Ultimate X-Men: Sabertooth is introduced happily hunting down his fellow mutants for an organization that sees him and everyone like him as animals. But after that falls through he joins up with mutant supremacist Magneto, proving that he'll work for anyone, human or mutant, just so long as they give him the freedom to be the monster he's embraced being.
* Ultimate Xmen, she acknowledges that Gambit is still part of her, although in her case she's not quite sure if it's a pleasant experience or not.
* Ultimate X-Men since the kid can't live with being responsible for so much death.
* Ultimate X-Men, so badly needed by Marvel to get rid of the risk of bankruptcy, they allowed Millar to work with the Avengers. And yet, the new team got a different name, as Busiek requested, and was named "The Ultimates". Still, it was not enough for him, who resigned from writing the Avengers as a result.
* Ultimate X-Men. Speaking of Phoenix, in the canon run of the mutant titles Shi'ar renegade Deathbird once came knocking with her own method of drawing power from a divine entity called "Phalkon". It turned out to be Phoenix. The Phoenix Force had manifested in the Shi'ar galaxy long before it ever got involved with anyone from Earth.
* Ultimate X-Men's reason for permanently joining the X-Men, as opposed to killing Xavier and leaving like he was supposed to. Unlike most examples, however, Jean didn't know that Wolverine needed to be redeemed, and after finding out, promptly dumped him, disgusted that that was his original reason for joining them.
* Ultimate X-Men: Subverted. Jean does not take Wolverine back because he leaves the toilet seat up and smokes all over the place. But, as she kept talking, it is clear that the actual reason is that he infiltrated the X-Men to kill Charles Xavier. Although he reformed and joined the X-Men for real, Jean did not forgive

nor forget.
* Ultimate X-Men's version of Xavier is worse, having had relations with both Mystique and Emma Frost, who were his students at the time. Much like mainstream Xavier, he too had romantic feelings for Jean as well.
* Ultimate X-Men: The Brotherhood bombed the Capitol in Washington DC a week before the action starts in the first issue.
* Ultimate X-Men: The Brotherhood rescued the X-Men and the other captive mutants (Nightcrawler, Rogue and Juggernaut; Sabertooth was not there at the moment) from Weapon X.
* Ultimate X-Men, the conjoined twin mutant brothers calling themselves Syndicate rob a bank that Xavier happened to be visiting and hold everyone there hostage because they are trying to pay for their little sister's operation. Xavier uses his powers to fake their deaths at the hands of the police and recruits them as his personal spies in exchange for paying for their sister's treatment.
* Ultimate X-Men: The first issue starts with one of those, to explain the reader the existence of mutants, the terrorist mutant group led by Magneto, and the Sentinels issued as a response.
* Ultimate X-Men: The mutants in Weapon X receive bug-sized neural implants, to kill anyone who tries to escape instead of proceeding with the tasked mission.
* Ultimate X-Men: There was an owl in a tree outside Weapon X when Nightcrawler broke free, to set the ominous nature of the place.
* Ultimate X-Men the US's nukes, preferring to burn the world to the ground rather than let mankind keep living.
* Ultimate X-Men: The X-Men survived their first fight against Sentinels, but then they were attacked by an angry mob.
* Ultimate X-Men universe, Wolverine kisses Jean and has sex with her. And then, back to the loser role in the triangle.
* Ultimate X-Men: Unlike Magneto, Wolverine, or many lethal-minded characters, Sabertooth purely kills because he likes it. He knows he's a monster.
* Ultimate X-Men: Unlike the original Angel, Derek can retract his wings back into his body to "pass" as human. Considering his transformation also includes growing long talons, thickened skin, and glowing eyes, it is rather distressing to watch.
* Ultimate X-Men was a negligent father, leaving his family after meeting Magneto. This came back to bite him when his son became the Ultimate version of Proetus and his own behavior didn't help matter (comparing his love for his son to a pet owner's for their pet).
* Ultimate X-Men was unable to cry at his son Proteus' funeral and he berated himself for it. Of course, the fact that Proteus was a mass-murderer who killed over a million people worldwide and was going to kill him might have something to do with that.
* Ultimate X-Men: We see a close shot of Ross' eyes while he announces to Wraith that Weapon X will be closed.
* Ultimate X-Men: When she first joins the team, Kitty Pryde was a fan of everything they do, as if she had joined the Ultimates. She was also a fan of Spider-Man, and eventually became her girlfriend. For a time.
* Ultimate X-Men where Jean rather sarcastically mentions to Beast that he doesn't have to do mid-air repairs when the plane is functioning fine.
* Ultimate X-Men, where the Hellfire Club provides funding for Charles Xavier — as a means of getting to Jean Grey and unleashing the Phoenix Force.
* Ultimate X-Men, who is an otherwise good and loyal boyfriend to Mary Jane.
* Ultimate X-Men, who uses his name and no alias whatsoever. Well, perhaps just "Jimmy" instead of "James", but it isn't the same thing.
* Ultimate X-Men with Jean Grey and Cyclops, although they are teenagers in this continuity and he isn't.
* Ultimate X-Men with powers that do not allow any human contact, and being tortured in a concentration camp can do that to people.
* Ultimate X-Men: Wolverine during the Gulf War. He was treated as little more than a dangerous savage animal, so he did not get any clothes.
* Ultimate X-Men: Wolverine has escaped from the Weapon X program and will never,

never go back there. Colonel Wraith made a pair of attempts to re-capture him and ended up very badly.
* Ultimate X-Men, Wolverine is briefly possessed by Proteus. Proteus' hatred towards his father Professor Xavier was so strong that it scared Wolverine.
* Ultimate X-Men: Wolverine made a hell of a scene when he escaped from prison and goes after his torturer, the colonel Wraith.
* Ultimate X-Men: Wraith calls Ross and asks if the budget cuts mean that SHIELD wants to close Weapon X. After some evasives (he was in the middle of a conference), Ross gave a straight answer: yes, Weapon X will be closed.
* Ultimate X-Men: Wraith enjoys capturing and enslaving mutants, and abusing of them when they are captives, a little bit too much.
* Ultimate X-Men: Wraith felt that Ross was one because he wanted to shut down Weapon X. So, of course, he tried to kill him.
* Ultimate X-Men: Wraith has no problem opening fire on Wolverine and another man in an airport parking lot, then shooting Wolverine while he's caged, but Wolverine causing one of his men to be decapitated? That's horrific!
* Ultimate X-Men: Wraith rebels against the officers above him when they attempt to shut down Weapon X and uses the enslaved Professor X to have the building they're in blown up.
* Ultimate X-Men: Wraith shoot three bullets at gunpoint to Xavier's chest. Cornelious is removing the bullets later, to save his life.
* Ultimate X-Men: Xavier gets on far better with Moira MacTaggert after divorcing her than he ever did while they were married.
* Ultimate X-Men: Xavier's plan is going well, as he has negotiated an halt to the Sentinel initiative and a human-mutant summit. He is pleased with it. Cyclops, however, wants equal rights, now. Xavier points that this usually a juvenile attitude, and as an adult he knows patience, seeing the bigger picture and taking slow but secure steps instead of rushed ones.
* Ultima, the player is able to destroy just the universe he's in right now, along with his opponent and himself.
* Ultima, the Shadowlords who were born from the shards of that Gem cannot be permanently killed unless their individual shard is destroyed at the same time they're immersed in the Flame of the opposite Principle of Virtue.
* Ultima, the stove in the Avatar's house shows the stove designer's reflection.
* Ultima Thule. Since it includes Intelligence and Wisdom, she's not an adventurer (high-risk waste of time!) but a banker.
* Ultima tough, with limited invulnerability to all but certain weapons. In later installments the developers caved to player's persistence in finding ways to kill him, and started adding easter-egg murder methods on purpose.
* Ultimatum: After killing Magneto, the heroes blew up his floating fortress, which fell to the ocean below.
* U.L.T.I.M.A.T.U.M. and its leader Flag-Smasher are self-styled "anti-nationalists" whose goal is a united world without borders and unhindered freedom of information, a dream which they will go to almost any extreme to achieve, with one of their more memorable exploits being the attempted destruction of numerous historic monuments in what was intended to be a symbolic strike against patriotism. The fourth and current Flag-Smasher introduces himself by shooting and blowing up a gala being held in honor of a controversial Republican senator while also having viruses attempt to deal with things like the No Fly List, America's electronic banking sanctions, and the NSA.
* Ultimatum: Angel's loved Dazzler died during the Ultimatum wave. Despite having no power better than wings and flight, he decided to charge straight to Magneto's headquarters, which gets him shredded.
* Ultimatum: Cyclops warns people that, if the law is sanctioned, mutants will be haunted and shot on sight. Right then and there, he's shot.
* Ultimatum, Hela the Norse goddess of the underworld wanted him to give her a son. In return, she promised him a favor. The day after the deed, Thor demanded a means to return to the living world, she said that it would require someone else to die in his place. When Thor threatened to kill her to fulfill the requirement, Hela

then revealed that she was already heavily pregnant with his son thanks to the fluid nature of time in the underworld. She remarks that their child is already a strong warrior given the way he kicks.
* Ultimatum: If Hela allows Valkyrie to leave the land of the dead, someone has to stay in her place. Captain America tells Thor that he will stay: as far as they know, he's dead, how else can he be there? The focus moves to other parts of the plot, and we get the idea that he's the one who stays. But no: it was Thor who stayed.
* Ultimatum issues. But then it was decided to continue the story from that point. However, it still counts has a grand finale for the phase 1 of the X-Men.
* Ultimatum) managing to maintain a significant following. One of the later books to come out outright called the universe "broken."
* Ultimatum: Sue Storm and the Thing show up to fight Dormammu (and rescue Johnny from him), right after he's killed Dr. Strange.
* Ultimatum that a magnetic flip that happened 42,000 years ago coincided with many cataclysmic events, possibly leading to the extinction of some species of megafauna and the Neanderthals.
* Ultimatum: When the Ultimatum wave hits New York, Reed drops the ring that he was about to use to propose marriage to Sue.
* Ultimatum: Wolverine had been reduced to a pulp by Magneto, but he was not dead yet. He has just a skeleton and some pieces of meat, and yet he was still alive and managed to land his claw on Magneto, giving him a serious injury.
* Ultimatum: Xavier gave a global warning with his powers, telling everyone everywhere that the flood had been caused by Magneto, and where is his secret base.
* Ultima Underworld can adequately describe to you what it means to use a Delgnizator on two Control Crystals to skup a new Bliy Skup Ductosnore.
* Ultima Underworld has a game called White Rock Black Rock, with fairly simple rules: if you pick the white rock (by choice, not by chance) then you win, and if you pick the black rock you lose. However, the game's rules become very bizarre when you play it in the Ethereal Void later on: fish, limbo, and peas are somehow involved, among other things.
* Ultima Underworld has various kinds of ghosts. Normal ghosts are white, with red haunts and black shades as more powerful variants. A few of the ghosts in the game are still rational and are important characters, though most seem to be mindless.
* Ultima Underworld III would have featured a new world and protagonist, and would have been released sometime around 1993-1995.
* Ultima Underworld, it is possible, though extremely difficult, to kill NPCs by pushing them into water if there is a body of it available. This can be used to best effect against Dorstag, whom you are supposed to obtain a quest item from through combat or other difficult means. Though most of his plunderable inventory disappears beneath the water with him, the quest item actually stays on the surface for you to pick up. You can kill virtually all NPCs by attacking them too, but drowning them avoids retribution.
* Ultima Underworld look exactly like some of the weakest. Examples: the Axe of Smiting (a hatchet), a cudgel that opens all doors, and a leather vest that makes you immune to fire.
* Ultima Underworld, passing a torch over an ear of corn turns it into popcorn.
* Ultima Underworld The baron then sends you to the Abyss on a mission to rescue his daughter. He notes that if you are really the Avatar, this is your thing, and not only should you be able to get her back, you should feel obligated to do it. If you're lying, you'll get what you deserve.
* Ultima Underworld, the short, bearded people who really like gold consider "dwarf" to be a racist slur. They prefer the term "mountain-folk".
* Ultima Underworld, the volcano erupts, destroying the entire civilisation within... but then in the very last cutscene, Garamon appears to the Avatar in a dream and explains that he was able to open a portal to send everyone to Destard.
* Ultima Underworld, when Iolo expresses concern that one of the facets of the gem might transport you to a planet of poisonous gas or an ocean floor.
* Ultima Underworld, which is a strong contender for the position of "best game

ever," according to critics.
* Ultima. Useful for navigation in-game, but they were labeled in a pseudo-runic cypher.
* Ultima V an alternative choice of sentence for his misdeeds — British activates the Orb of the Moons without a destination in mind, and offers to let Blackthorn "live thy life in exile in a place that neither I nor thee hath ever seen".
* Ultima V contains literal monkeys found only underground — the Mongbats — but they resemble nothing else in the game.
* Ultima V dispels any hostile magic used against you while letting you cast your own. It's ridiculously useful (except in the final dungeon, where it doesn't work).
* Ultima V, each of the Shadowlords has their own comet; if you have a telescope you can determine which city they're in by looking for where the comets are.
* Ultima V ends this way; the Avatar returns to Earth to discover that his house has been robbed while he was away saving Lord British. This was apparently done to drive home the moral that the path of virtue is its own reward.
* Ultima VI, drinking alcohol causes the party to go in random directions when travelling instead of straight ahead.
* Ultima VI gameplay you travel all over the fairly pristine world and never find a single battleground.
* Ultima VII, all eight of the original moonstones are sitting unsecured in a museum in Britain, waiting for the Avatar to take them.
* Ultima VII, an imposter is pretending to be the Avatar, using your heroic reputation to scam people and causing you trouble when they meet you. Eventually you catch up with him. Exceptionally hilarious if you're playing a female Avatar, since the impostor isn't bothering to disguise his face. Those people had it coming.
* Ultima VII has ended up in a museum, and nobody will believe you're the Avatar.
* Ultima VIII, if you drink too much beer, you stumble around drunkenly. Eat the wrong mushroom, and the same thing happens, plus everything changes colors.
* Ultima VIII: In the book "Gold: Valuable Commodity or Worthless Trash?", Okapi the Elder argues in favor of gold for its useful properties. The official currency is Obsidians, as metals were deemed more valuable for making crafts and weaponry than to be wasted on being currency.
* Ultima VIII's much weaker skeletons will also pull themselves together shortly after defeat, though you can prevent this by picking up one of the parts, such as the skull (preventing it from rejoining the group). For added fun, collect a full skeleton then drop the bones in a populated city.
* Ultima VIII: The Lost Vale that would address the Zealan sub-plot, and what was behind the double doors in the Plateau.
* Ultima VIII: The Plateau is described as having mysterious balls of light. None are found there, aside from the Ethereal Void Mythran's house is inside of.
* Ultima VII: Many of the tombstones reference members of the "Ultima Dragons" community. Some character portraits are based on winners of Origin's "Immortality Contest".
* Ultima VII parrot, anywhere in the game world) with a gavel causes it to reveal the map coordinates of a pirate treasure.
* Ultima VII Part II away the inflation that this should cause by claiming the magical coins eventually vanish, but this never happens in actual gameplay, and no NPC ever comes at you raging about how you've cheated them — False Coin coins are, as far as the game can tell, exactly the same as real money.
* Ultima VII Part II has a female character who attempts to seduce the Avatar, regardless of the Avatar's gender - and if the player turns her down, she uses magic to try to force herself on them.
* Ultima VII Part II, hitting a parrot with a mallet will eventually make it say "That will not work this time!"
* Ultima VII Part II pilot crash land on the island and be worshipped as a cat god.
* Ultima VII Part II, Selina the sorceress briefly joins with you early in the quest, is absolutely worthless at doing anything, and teleports out when the going

gets tough. Later on, she turns up as an antagonist, and is surprisingly effective at that. You later find out that she was working against you from the very beginning, and was presumably half-assing it while she was in your party.
* Ultima VII Part II: The mage Ensorcio's portrait is based on "Umbrae Dragon" Jim Hammons. Some character portraits are based on winners of Origin's "Immortality Contest".
* Ultima VII Part II, the mages of Moonshade refer to non-mages as "mundanes". As soon as you get a new spellbook though, they seem to forget they ever called you a mundane.
* Ultima VII Part II. Two hired killers (working separately for two completely unrelated villains) will have incriminating letters from their employers on their corpses - each even stating specifically to destroy the letter after reading! At least a dozen other letters can be found explaining people's various schemes and plots when sensibility would mandate destroying them.
* Ultima VII, the Avatar can audition to understudy the lead role in a play... called "Tales of the Avatar". The director will then instruct you to buy an Avatar costume (which looks exactly like what the Avatar's already wearing), and no matter what you do in the audition, the director will politely decline to cast you.
* Ultima VII, the Avatar could have sex with either male or female sex workers.
* Ultima VII where Garriott was injured by a falling metal bar at the Origin offices.
* Ultima VII will allow you to do this if you tell all your party members to "go home". It also means you don't have to keep listening to them whinge about wanting food all the time.
* Ultima VII, you acquire a magical artifact that can force the Fellowship's members to tell you the truth.
* Ultima VII, you wind up having it teleported away from you, and when you find it again, you must release the demon inside in order to escape the dungeon you have been imprisoned in.
* Ultima VI looks like a bunch of paper dolls - the figures are moving, but not animated. This was fairly common in late 80s-early 90s games.
* Ultima VI, one is told by Lord British to be a guest upon the house and dine in the banquet hall and partake of a dinner which is most eloquently prepared and indeed one does so by grabbing the very utensils which one would expect to utilize at that very moment and then all in the area will say STOP THIEF and aggro upon thine ass and then one will regret banqueting upon the very dinner of Lord British and this is referenced later as The Fork of Doom!
* Ultima VI, resurrecting a party member at a Healer will leave the party member in a non-interactive, zombie-like state. This can be corrected with a third party program.
* Ultima V is arguably the most powerful weapon in the game, capable of killing virtually anything in a single hit. Also, using it in combat causes you to lose control of the character wielding it and cause him/her to attack fellow party members as well.
* Ultima VI, the Avatar destroys the Gargoyle colony Ambrosia, fulfilling the prophecy anyway.
* Ultima VI, the jugglers (including Blaine, who can join your party), do a cascade.
* Ultima VI (there were two groups) also offered their bodies for a fee regardless of gender.
* Ultima VI), they will genuinely assume you'll want an equal amount of information in return from the buyer, and are baffled when you accept the initial offer of a small number of valuable metals. Which is to say, all the gold your whole party can carry.
* Ultima VI time now, but this guy still expects you to jump through hoops for no reason beyond propriety.
* Ultima V, the player can acquire Skull Keys which effortlessly open magically locked doors. Oddly, since they can all be unlocked by the "Unlock Magic" spell anyway, magical doors are notably *less* secure than normally locked doors.

* Ultima V, with the virtues from the last game turned into laws with very nasty punishments.
* Ultima Weapon thing going on for them, but a Calamity put an end to them before they could.
* Ultima, where a defeated skeleton would break into its component parts and could reform again if there were enough parts for a whole skeleton. Cue frantic body-part looting mid-battle in a game where inventory space was already at a premium, and the skeletons kept respawning whenever you returned to the area.
* Ultima: Worlds of Adventure 2: Martian Dreams to survive. Now an evil overlord named Raxachk wants to escape from the Dream Realm, but needs a body to do so. To this end he sabotages a space cannon to bring suitable hosts to Mars so that he could inhabit one.
* Ultima: Worlds of Adventure 2: Martian Dreams were a strikingly memorable example. In the first stage of life, their bodies grow as plants, and in the process they absorb knowledge of their dead ancestors through the common "ancestral soil". In fact, a Martian body grown elsewhere is more or less a (mental) vegetable.
* Ultima: Worlds of Adventure 2: Martian Dreams, which incapacitates but does not harm its targets.
* Ultima X: Odyssey left off. It would have had more cartoonish graphics and a virtue system.
* Ultima X: Odyssey. Set in the new world of Alucinor, the game was to feature a player virtue system and more cartoon-like graphics.
* Ultimecia is aware that she is destined to be defeated by the Legendary SeeD. Therefore, she attempts Time Compression so she can
* Ultimecia. It takes a bit of warm-up time, but once used it leaves the enemy wide open to attacks.
* Ultionus: A Tale of Petty Revenge battle at the end. If you missed Balzac in even one of the levels, the game ends after you defeat the fifth boss, with Serena barely escaping capture from the Prince's remaining forces.
* Ulti's Bar & Grill has the worlds of the Dark Legion, which have a variety of aliens among them. Many of these said aliens are humanoid in appearance, if not really anywhere near a human in ability or specifics.
* Ultraa, the Multi-Alien. Four alien races have rayguns designed to
* Ultra Beast shows that it breeds by spawning polyps that grow into larve and then adults. Basically it reproduces like a real jellyfish. Other Ultra Beasts may have other methods of propagating that are different from the standard "male-and-female produce and egg in a daycare", such as Celesteela sprouting from the ground in its home world.
* Ultra Beasts. It has a harness on its head that restrains it so it wouldn't go berserk, but it will deliberately break this harness once it trusts its trainer to evolve into Silvally.
* Ultra Boy originally got his powers from being swallowed by a space whale named, of course, Jo Nah. Superboy calls him on the coincidence the first time they meet.
* ultra-brainy Edd instead.; it turns out she has surprising skill in chemistry, which she attributes to the various homemade beauty products she's created.
* Ultraconscious Depersonalisation Disorder results from the new mind being a little
* ultra-cool looking planet just isn't worth the threat of the base on it. They even create their own homeworld in some games.
* Ultra Despair Girls. Anything to get her daughter a role. Kotoko was of course horribly traumatized by the experience, but hey, at least she's a really good actress now!
* Ultra Despair Girls has the cast trapped in a very bizarre robot-overrun town. When one character tried to escape via city canal, the bracelet on their wrist exploded in the middle of swimming out.
* Ultra Despair Girls has this to say after you defeat Nagisa Shingetsu, who has issues regarding living up to expectations:
* Ultra Ending you, meaning it can actually be quite dangerous to use if you're

careless.
* Ultra-fanboy Eizo gets many encounters with his idols in the band Orochi thanks to his friendship with Yumi, leading up to him flying with the band to Hawaii for the wedding of Shuya and Musashi and even sharing a hotel room with the band members... albeit drooling and tied up to keep him under control.
* Ultra Fast Pony abridged series) voices all the characters in the show... leading to some very funny moments as the only female characters that sound remotely female are Twilight, Rainbow Dash, Cheerilee, and possibly Applejack. Likely the strangest of the lot are Rarity, with her deep voice and thick Aussie accent, and her sister, who sounds like a bear eating rocks.
* Ultra Fast Pony. After the girls get invited to Twilight's brother's wedding, Applejack actually interrupts the theme song to complain about how he's never been mentioned before.
* Ultra Fast Pony and immediately rescinds her question. Dash tells anyway, and Twilight wishes she hadn't.
* Ultra Fast Pony And when she finally does make some friends, she has no idea how she did it: "Wait, I don't know what I did! What did I do?!"
* Ultra Fast Pony Apple Bloom insists that there's no good news, but her companions don't listen.
* Ultra Fast Pony, Apple Bloom's parents committed suicide for unknown reasons, and Granny Smith blames her for it. It's unclear if Granny actually believes it, or if she's deliberately invoking this trope to screw with Apple Bloom's mind.
* Ultra Fast Pony. Applejack mentions that her brother Big Macintosh's party was a big hit. There's a brief flashback to Big Mac atop a pile of lovestruck mares, all screaming with happiness.
* Ultra Fast Pony a prince who will boss her around and hurt her. Rarity loses interest in Prince Blueblood because he's too nice.
* Ultra Fast Pony, at the Running Of The Leaves, it's outright stated that there's no rule against cheating.
* Ultra Fast Pony causing Applejack to give up and skip to the next scene.
* Ultra Fast Pony. Characters frequently hurl insults at "the writers", often after lampshading an episode's poor aesop. "Whoever wrote this episode must have brain damage." "I think they all do."
* Ultra Fast Pony deliberately does this as a joke. Some background characters, and almost every crowd, have completely flat voice acting—whether they're screaming in panic or shouting for joy. It contrasts with the very expressive animation these characters have.
* Ultra Fast Pony: Derpy gains superpowers and immediately decides to abuse them, declaring "From this day forward, you might as well refer to me as the Ruler of Space, because now I own yer anus!"
* Ultra Fast Pony, Discord is perfectly capable of making sense when he needs to, but he just prefers to spew gibberish.
* Ultra Fast Pony dives straight into the deep end. She's so irritatingly self-assured that the other ponies tell her outright that they hate listening to her.
* Ultra Fast Pony. Each time, an annotation pops up with a link to the object of the reference. Without these annotations, the joke makes a lot less sense.
* Ultra Fast Pony encourages Applejack and Rarity to make out. Both of them yell at Phil—and Applejack is surprised at Rarity's reaction, because she'd always assumed Rarity was gay.
* Ultra Fast Pony episode "So Random!", Pinkie Pie stakes her entire self-worth on being regarded as a hilarious comedian. Cranky doesn't think she's funny at all, so she becomes obsessed with convincing him otherwise. The absurdity is lampshaded at the end of the episode:
* Ultra Fast Pony, fixing boxing matches is just another illegal activity that the Apple family has their hooves all over. In "Mob Wars", Big Mac's opponent in the upcoming prize fight is scheduled to get knocked out in the fourth round, and no sooner.
* Ultra Fast Pony for one episode. Even though it's not even medicine, the series creator warns about its side effects in the video description.

* Ultra Fast Pony for the episode featured this scene re-dubbed with a snippet from Abbott and Costello's "Who's on First?" sketch.
* Ultra Fast Pony: From the epilogue of the episode "Utter Lunacy": "Upon returning to Canterlot, Princess Celestia banished Luna to the moon again. This time Luna remembered she had wings and just flew back later that month."
* Ultra Fast Pony has Applejack stealing random stuff, off-screen. Like trees, bicycles, and medical supplies.
* Ultra Fast Pony: Has had two episodes dealing with inspectors during their abridged version of "The Equestria Games" arc. This includes the same episode below in the original show and the latest episode Keep It Clean.
* Ultra Fast Pony has Rose, in her one scene from the episode "So Random!"
* Ultra Fast Pony has the characters themselves invoke unexplained magic.
* Ultra Fast Pony. In "Copywrong", she tries to build up immunity by soaking in a pool. Twilight points out that her allergic reaction seems to be getting worse, not better.
* Ultra Fast Pony. In one episode, Twilight forgets all about the theme song until the halfway point.
* Ultra Fast Pony: In "Pirate Shipping", Apple Bloom takes it upon herself to find a romantic partner for her schoolteacher, Cheerilee, and she quickly settles on her own older brother, Big Macintosh, as the best candidate. After her manipulations result in Big Mac and Cheerilee actually getting married, AB lets slip that she did it all solely to gain herself more influence in Cheerilee's classroom.
* Ultra Fast Pony. In "The Cheesen One", it gets lampshaded, as Rainbow Dash complains that her fans' cheers of adoration sound like garbage.
* Ultra Fast Pony: In the episode "Purple Party Pooper", Twilight angrily responds to something that Fluttershy says about a minute later.
* Ultra Fast Pony In the episode "Purple Party Pooper", Twilight gets an ominously-worded summons from Princess Celestia, and then angrily declares that if she's going down, she'll take her friends down with her. Her friends realize just how much dirt Twilight has on all of them, so they rush to Celestia to collectively defend Twilight, defend themselves, beg for mercy, and bribe Celestia. Only after indirectly incriminating themselves do they realize that Celestia was simply looking for someone to celebrate her birthday with.
* Ultra Fast Pony. In the episode "The Pet Games", one of the color commentators is named Dick Hardman. Mainly he has that name as an excuse to cram as many dick jokes into the dialogue as possible. "Yes, farting in your opponents' faces is a classic Dick move."
* Ultra Fast Pony: In "The Longest Engagement", Twilight Sparkle tells Princess Cadance to kiss her ass, then she starts rattling off weird, rhyming variations on that command. At the end, she lampshades it with, "I've got more of those, and I'm not afraid to use them!"
* Ultra Fast Pony In "The Pet Games", the color commentary take a break from the game for "a word from our sponsors". It winds up being the show's normal opening credits, with a new voiceover:
* Ultra Fast Pony in the process of saving the world. As punishment, Celestia banishes Twilight to Ponyville.
* Ultra Fast Pony: In "Utter Lunacy", Spike the dragon disguises himself (as another dragon).
* Ultra Fast Pony: in "Utter Lunacy", Spike the dragon successfully disguises himself by wearing a dragon costume (one which doesn't even cover his face) and speaking with a different accent. The only time he comes close to getting caught is when he briefly switches back to his normal accent.
* Ultra Fast Pony lampshades the fact that she's really just making the editor's job a lot easier.
* Ultra Fast Pony manages to escalate this in the episode "Ponynet Fight!": Twilight Sparkle gets a flowerpot, an anvil, a cart full of hay bales, and a piano dropped on her head. Upon regaining consciousness, she declares, "Look really I didn't the brain damage!" Seconds later, she returns to full lucidity.
* Ultra Fast Pony Near the end of "Random Eye Magic", Twilight's bizarre but mostly

innocuous prior activities in the episode get described in the worst possible ways.
* Ultra Fast Pony, Night Moon Mare doesn't want to gain anyone's respect or to plunge the world into eternal night. She just wants to kill everyone, yet she doesn't do it when she has the chance.
* Ultra Fast Pony occasionally lampshades characters who go many episodes between appearances.
* Ultra Fast Pony parodied "Lesson Zero" not long afterwards, that line was absent. When a fan wondered what happened to that line, series creator Wacarb clarified "the trailer is its own thing really."
* Ultra Fast Pony parodies, defies, and lampshades this. Characters will occasionally use insufficiently pony-fied dialogue, for which the captions will criticize them. Then the characters themselves comment on the practice:
* Ultra Fast Pony parodies this in the episode "Little Miss Montage". First, the characters blatantly compare the fashion show to Youtube: "This isn't Youtube. You can't just ask us to look at something and chuck a hissy fit if we don't like it." At the end of the episode, Rarity is very disappointed that the big-name fashion critic "liked" her dresses but didn't "favourite" them. Then the text insert at the very end reads:
* Ultra Fast Pony parody, with Pinkie Pie in the role of "cop on the edge, living on the limits of the law, with a gambling problem and a brother on the other side!"
* Ultra Fast Pony plays this for black comedy. Young Rainbow Dash grew up in a lot of abusive orphanages (and with a lot of equally-abusive foster families). As she explains in "Shameless Self Reference":
* Ultra Fast Pony portrays Twilight Sparkle as a somewhat delusional wannabe mother towards Spike. She calls him "my daughter" even though Spike is a male (and a dragon at that). It's implied that she even had Spike castrated. In the episode "For Glorious Mother Equestria", Spike starts going through the dragon equivalent of puberty, Twilight tells him to "stop obeying the laws of nature".
* Ultra Fast Pony, Rarity apparently models Twilight in a gimp suit off-screen. Rarity asks if she likes it, and when she's met with silence, she takes it as a no.
* Ultra Fast Pony, Rarity comes up with a convoluted scheme to ruin Fluttershy's modeling career. Said plan involves building a fence, ignoring a blue-bellied pelican, and dancing a polka. Also, Rarity got a bit distracted while she was coming up with the scheme, so instead of punishing Fluttershy, the plan culminates in punching Rainbow Dash.
* Ultra Fast Pony, Rarity is this, though inconsistently. She seems to want a legitimate relationship with Prince Blueblood, and she stops pursuing him as soon as she realizes their personalities are incompatible. On the other hand, she's interested in Fancy Pants solely for his money, and she's not the least bit ashamed.
* Ultra Fast Pony's creator put out a bonus video, "A Very UFP Christmas Special", on December 25. Aside from the introduction and conclusion, it consists entirely of Twilight saying "I'm not making a video on Christmas!"
* Ultra Fast Pony, she finally does befriend most of Ponyville—but this just makes her angry because she has no idea what she did differently.
* Ultra Fast Pony she's a separate character, but in the original canon she was just a shared secret identity.
* Ultra Fast Pony. So the episode "Purple Party Pooper" has a bystander lampshade it:
* Ultra Fast Pony's Sweetie Belle is fascinated by scenes of death and violence. When she and her new friends form a club, all her suggestions for club names sound like death metal album titles.
* Ultra Fast Pony takes place in a weird version of Equestria where some human ethnicities, like blacks and the Irish, undeniably exist.
* Ultra Fast Pony, the allegedly elite squad of military pegasi are (initially) known as the Ineffectual Flight Team, and they're every bit as good as their name implies. Several episodes later, they reappear with the new title of Super Effective Flight Team. Unfortunately, "Changing their name did nothing to help their ability to fly!"

* Ultra Fast Pony" The end credits have a subtitle claiming that the entire video series was created for the sole purpose of that title drop.
* Ultra Fast Pony. The episode "Pinkie's Day In" has a variation where every excuse is shot down immediately after it's said.
* Ultra Fast Pony. The episode "Pirate Shipping", in which the cast celebrates the holiday of "Heartsgiving", went live on 28 November 2013, the same date as that year's American Thanksgiving. (Since the creator is Australian, this may just be a weird coincidence.)
* Ultra Fast Pony: The episode "Pirate Shipping" uses this, and then immediate switches right back.
* Ultra Fast Pony: the episode that introduces the Cutie Mark Crusaders is titled "Out with the Old Characters".
* Ultra Fast Pony, then ends with Twilight waking up yet again, realizing the entire episode was a dream.
* Ultra Fast Pony. The next morning, they wake up together on a mattress, which is at the bottom of an 8-foot-deep hole. "This hole wasn't even here yesterday!"
* Ultra Fast Pony". The only jokes are the occasional, completely-out-of-place uses of informal language.
* Ultra Fast Pony, "The Pet Games": After the tortoise rescues her from an avalanche, Rainbow Dash declares that she's adopting him. Even though he isn't actually up for adoption.
* Ultra Fast Pony) they're a scene redubbed with audio from an outside source.
* Ultra Fast Pony, "To Kill a Firebird", Princess Celestia gets annoyed when Fluttershy is late for a tea party. She punishes all the other guests by describing, in excruciating detail, every prior tea party she's ever attended. All "ten... hundred... thousand... million" of them.
* Ultra Fast Pony, to which everyone responds with over-the-top awe—while Fluttershy shouts "I got the joke! I got the joke!"
* Ultra Fast Pony turns into a cop show parody for "Stay Tuned". Pinkie Pie gets partnered with Gummy, a psychic detective.
* Ultra Fast Pony. Twilight Sparkle and Night Moon Mare both threaten to kill each other, and think nothing of it. Twilight then ups the ante with "I hope you get crabs!" NMM is so shocked, she can only answer, "Well, that's kind of a mean thing to say."
* Ultra Fast Pony. Twilight's reaction: "This whole thing is sick and depraved! But yes, he was the fastest."
* Ultra Fast Pony, Twilight tries to introduce herself to one of them:
* Ultra Fast Pony, Twilight uses this logic to justify stalking Pinkie Pie.
* Ultra Fast Pony uses this as an occasional gag, rather than a consistent trait of any one character.
* Ultra Fast Pony uses this as a punchline in the episode "Making Babies": babies are created via magic because there aren't enough males around to make them the old-fashioned way. Also, sex was "messy and painful..."
* Ultra Fast Pony uses this as a punchline. It comes out of nowhere and doesn't get followed up on until the next season.
* Ultra Fast Pony. We don't see the hit, but we do see Apple Bloom reeling from the punch.
* Ultra Fast Pony (where her author avatar ends up in a love triangle with Bill the pony and Shadowfax), and her main reason for going to the Grand Galloping Gala was to share this fic with as many people as possible.
* Ultra Fast Pony "Winning" has the scene (for context, Applejack and Apple Bloom are both Irish):
* Ultra Fast Pony xenophobic. Or, at least open to befriending non-ponies.
* Ultra Fight Orb: The titular Ultra needs to train himself to defeat the Ghost Sorcerer, Reibatos, but time is running out. So his two senior Ultra comrades, Ultraseven and Ultraman Zero, decide to put him through training in Zero's Shinning Emerium Field, a Golden Zone where time flows absolutely slowly. To outside observers maybe a few minutes have passed, but for the heroes, Ultraman Orb had endured ten years of training.

* Ultraforce is really a 13-year-old boy who takes on an adult appearance when powered up. Makes for some raised eyebrows when he proudly announces that the 13-year-old girl he has a crush on is his girlfriend.
* Ultraforce was fueled by his latent ultra abilities rather than having a built in power source.
* Ultra Galaxy Legends enfused by the power of Alien Reiblood AND winding a weapon that has him control an army of monsters to ravage the planet that exiled him, under the belief that they betrayed him and left him to die.
* Ultra Galaxy Mega Monster Battle (all pulled from previous series) that do nothing but attack anything they see.
* Ultra Galaxy Mega Monster Battle, causing the sun to hurtle towards the kaiju-infested planet during the finale. The problem is ZAP SPACY and a number of space colonists are still trying to get off Bolis as this is going on.
* Ultra Galaxy Mega Monster Battle. Fortunately, he was defeated long ago unknown forces, leaving only his consciousness while his genes scattered across the universe to infect individuals of various species in order to create successors who would battle each other for the title. Also, he was the one who turned Ultraman Belial into who he is today.
* Ultra Galaxy Mega Monster Battle in the first series is demoted to this as the Pedans, impressed with the original's success, mass-produce King Joe Blacks to destroy all the Reionyxes in the universe. While still fairly formidable, Rei and his monsters have an easier time destroying them than they did with the original.
* Ultra Hawk 1, a fighter jet that can split three ways (Alpha, Beta, and Gamma) from
* Ultra-Humanite is quite morally ambiguous for a villain. While he does a series of serious crimes, like blowing up a modern art museum because he despises Modernism, he also tends to help the heroes in certain occasions. A particular example is in the
* Ultra-Humanite's very name suggests this trope. Unusually for an "advanced human", he's not physically frail at all. Rather, he combines
* Ultra Instinct, he never says, "So this is the power of Ultra Instinct?" in any of its appearances. Of the dozen lines spoken by Goku while he's in Ultra Instinct, only two mention the form's name. The first is where he corrected Kefla on its name, and even then, "Ultra Instinct" were the sentence's only words. The second (and closer to the misquoted line) is when he says "I'm starting to get the hang of this Ultra Instinct."
* ULTRAKILL, his wings are blue and energetic instead of white and feathered.
* Ultralisks, or boost their army to Balanced with defensive upgrades and resistances to ensure their horde can make it to the target.
* Ultra Magnus, Arcee, Springer and Perceptor end up perishing when their shuttle explodes, when they not only survived the events of the original animated movie, but also lived to the very end of
* Ultra Magnus, at least early on in the series. In issue 13, he tries (emphasis on "tries") to strike up a casual conversation with Swerve, who was talking about racing statistics. His attempt at joining in is derailed when he sees an out-of-place rivet, and goes to note it down.
* Ultra Magnus commands the entire Autobot Defense Force, while Optimus Prime was captain of a Space Bridge repair force, and now commands a single unit of Autobots on Earth (which are the same 'bots really). The rank of Prime is thus equivalent to the rank of Captain, while the rank of Magnus better matches that of Admiral, or Grand Admiral.
* Ultra Magnus considers several months of "cripplingly intense" study (his words) fun. Or would, if he could actually
* Ultra Magnus is introduced to the Autobots, his hardass attitude clashes notably with the rest of Team Prime, particularly Wheeljack. Mercifully, he lightens up a bit.
* Ultra Magnus is particularly polite, and when he does attempt to curse it's usually via some euphemism from decades past. The closest he's gotten to a real curse word is when he yelled "Screw Getaway!" and them promptly apologized for his

language.
* Ultra Magnus' shtick is arresting his fellow Autobots for things such as poorly written signage, improperly adjusted insignia, or using informal nicknames, and throwing them into the brig. It becomes much less funny when it turns out he's doing this because he's having a post-war breakdown, and his boss uses this as grounds to fire him.
* Ultra Magnus started like this, but after joining the Lost Light's crew he eventually was convinced to relax a little, resulting in the rest of the crew warming up to him.
* Ultra Magnus, stern lawman to a fault, is never seen smiling (except twice, the first he regretted ever since, and the second
* Ultra Magnus takes it into battle after it's been drained of its power.
* Ultraman 80 are a species of bloodsucking ball-like aliens that invade Earth and attack humans. They are lead by a single giant member of their kind who commands the rest to merge with it, becoming a giant bipedal mass to battle Ultraman 80 and UGM.
* Ultraman 80 attempted to justify this by saying that when an Ultra's human identity is exposed, they must leave Earth, but this only applies to the Showa continuity and even then, it's very loosely applied in that timeline.
* Ultraman 80 became the last Showa era Ultra Series, and the franchise would be in a near-death state for the next fifteen years.
* Ultraman 80 has Mechagiras and Zatan Silver, sentient robots unleashed by alien invaders, who continues their rampage even after their alien masters are killed.
* Ultraman 80 kaiju that is its natural prey) that UGM was taking care of, but fails.
* Ultraman 80 named Nakagawa who is the series' sole human villain attempts to mutate a peaceful, puppy-sized space creature called a Myu into an obedient monster, only to spectacularly backfire when Myu, enlarging due to being force-fed a growth serum, promptly squashed Nakagawa flat with its foot.
* Ultraman 80: One of 80's most infamous foes was Emperor Galtan, ruler of the Rattler aliens and wielder of a massive scimitar that he used to great skill.
* Ultraman 80: One of the last episodes of the show has the appearance of Marjin, a genie-like alien who lives in a vase, uncovered by a bunch of children who then use the wishes granted by Marjin to help make the city a better place, such as cleaning up the trash. But when the vase falls into the hands of a bunch of bullies, the lead bully decides to ask for a "cool monster toy as big as the real deal"... which ends up accidentally resurrecting the kaiju Red King.
* Ultraman 80 on his throat that must be damaged in order to destroy the monster permanently.
* Ultraman 80, UGM finds an abandoned island resort where an evil alien monster called Gimyra has hypnotized everyone on the island to drink their blood and turn them into its giant monster minions.
* Ultraman Ace, and serious threats that overwhelmed even the Ultras, like "Burn! Choju Hell!", "Behold a Great Transformation at Midnight!", "40,000 Year Choju Appears", and "Ghost Story: The She-Devil of Firefly Field".
* Ultraman Ace from Tsuburaya's costuming department: Aribunta and Hotarunga are both insect-based monsters created from the same suit.
* Ultraman Ace has eyes on it's hands, and two additional eyes on it's tails. When it possesses a human, the eyes on it's hands gets transferred to it's human host as well, hence a human astronaut who is being used as a host by Brocken starts wearing gloves for no given reason throughout the episode.
* Ultraman Ace have a massive kaiju, Dreamgillas, being born from damp, urine-stained bedsheets. Somehow.
* Ultraman Ace inside of enormous glass containers, which release a liquid and gas that would turn the victim into giant statues of Jade.
* Ultraman Ace in the first minute of the next. Fans were quite baffled even until today on its sudden reappearance.
* Ultraman Ace is Japanese for "ant") and has the ability to breathe acid and shoot fire from its claws.

* Ultraman Ace: One episode has an astronaut and researcher being possessed by the parasitic monster, Brocken, who then infiltrates TAC while pretending to be a human. However, the astronaut's son realized something is amiss when his father doesn't have a shadow even in broad daylight. At the end of the episode after Brocken was destroyed by Ultraman Ace, the astronaut's shadow promptly returns.
* Ultraman Ace: One of Ace's abilities is the Ace Vacuum, which the titular hero sometimes use to suck up enemy choju's gas-based attacks. Notably used in the battle against Garan, where Ace sucks away Garan's poisonous breath and turn it back on the monster.
* Ultraman Ace's first and most famous opponent. Every part of the Choju's coral-like body is loaded with an endless supply of organic missiles that it fires en masse at opponents in rapid succession, overwhelming defense team fighter jets and Ultra heroes alike with a multitude of powerful explosions upon impact.
* Ultraman Ace: The Chouju of the series originate from Yapool's dimension.
* Ultraman Ace unleashes his newest monster to Earth — King Kappa, a giant monster that disguises itself as a swimming pool by leaving only its water-filled depression visible.
* Ultraman Ace Yapool transforms the pregnant woman into the source of the creature's life force meaning the only way Ace can kill Mazarius is to somehow lift the curse of its "mother".
* Ultraman. A humanoid insectoid creature with glowing spots in place of a face and additional ones on its chest. Orb fought this guy in Europe during the early 1900s prior to the show and faced its abilities: firing bolts of explosive light, teleportation, creating a force field, and catching energy beams to fire them back.
* Ultraman, an archaeopteryx-griffin kaiju made up by an animal-loving boy. But when the kid is killed in a vehicle accident, his ghost brings his creation to life to destroy all motorists in Japan!
* Ultraman, and was instrumental in bringing Goji-san to life on the big screen.
* Ultraman brought it back. Unlike most, it was completely harmless as it only sought to return to its grave and eternal rest, so Science Patrol had to help it get back into space.
* Ultraman Cosmos 2: The Blue Planet has a wormhole on the surface of the ocean, which leads to the underwater home of the benevolent Gyashi Aliens.
* Ultraman Cosmos 2: The Blue Planet: Shau, an alien girl, finds out how fun it is spraying champagne out of a bottle, when her fellow alien partner Jin walks in on her. After an awkward moment of silence, Jin promptly backs away without a word.
* Ultraman Cosmos 2: The Blue Planet: When Shau, an alien from another planet, tastes champagne for the first time in her life. Being unused to the taste of alcohol, this is her immediate reaction.
* Ultraman Cosmos 2: The Blue Planet who travels from planet to planet, turning every world they invaded into a total wasteland. Prior to the events of the movie, the Scorpiss destroyed the homes of the aquatic-based Gyashi Aliens, forcing a handful of survivors to flee to planet Earth and take refuge in Earth's oceans, and early in the film, protagonist Musashi on a space mission re-visits Planet Juran from the TV series, only to realize it's been devastated by the Scorpiss horde.
* Ultraman Cosmos based on Gamerot) but there's also Igomas, a non-violent, peaceful toy kaiju which only goes on a rampage due to a malfunction in it's design.
* Ultraman Cosmos corrupted him, and second when he gets hit by an enlarging beam to help Ultraman Cosmos fight some aliens.
* Ultraman Cosmos crash-landed on Earth near a rural 300 years prior to the series, and was accepted by the villagers as one of their own. He decides to repay the earthlings by using his alien form to absorb poisonous pollen from a meadow of deadly flowers spawned by a meteorite to prevent any harm from happening to the villagers, even though the poison might eventually kill him someday, until Ultraman Cosmos arrives to purge the poison from the meteorite and save him in the process.
* Ultraman Cosmos episode "Kappa's Village" where one named Kawanoji is accidentally angered by the characters, so he turns himself gigantic to wreak havoc. He even sumo wrestles Cosmos!

* Ultraman Cosmos if he ABSOLUTELY has no other choice — he'd rather get beat up trying to stop a rampaging monster so he can calm it down rather than harm them.
* Ultraman Cosmos into ravenous monsters that eventually join themselves with a pile of scrapped electronics into a kaiju form and battle Cosmos.
* Ultraman Cosmos is a peaceful, non-hostile Space Whale who unfortunately becomes a dangerous kaiju after being infected by the Chaos Header.
* Ultraman Cosmos Lidorias, the mole-like Mogrudon, and the energy-eating reptile Bolgils.
* Ultraman Cosmos monster Gelworm is a tiny insect-like creature that can absorb the DNA of any lifeform in order to take their shape and size, meaning that it can turn into a human or even Ultraman Cosmos. The good news is that it's a completely harmless creature, only using its abilities to get around, as well as fight Cosmos when provoked.
* Ultraman Cosmos, Musashi meets Mari and is stunned at how gorgeous and feminine she had become in 8 years.
* Ultraman Cosmos: Renki's nature as a vengeful spirit means that most attacks phase through him harmlessly.
* Ultraman Cosmos's physical forms, combining the powers of his Luna and Corona Modes.
* Ultraman Cosmos: The First Contact appears to be a chunk of what used to be Planet Baltan, being towed by their leader, Dark Baltan, as he tries seeking a new world for the Baltanians.
* Ultraman Cosmos: The First Contact, the ruins of Planet Baltan, in the aftermath of a nuclear war, has been converted into a spaceship housing millions upon millions of Baltanian children, with their leader Basical Baltan as the navigator and caretaker actively looking for a new planet for his kin. Basical's decision to claim planet Earth as a new home is what kickstarts the plot of the film.
* Ultraman Cosmos was an animated dinosaur skeleton that sought to reunite with its lost child after millions of years of separation.
* Ultraman Cosmos will be able to coexist peacefully, as he believes that giant monsters have the right to live in peace so long as they don't deliberately disrupt the peace of other beings. Cosmos himself thinks the same way, which is probably why he picked Musashi as his human host. In fact they've even successfully befriended a few of the monsters they've subdued over the course of the series.
* Ultraman Dyna: A one-off example is Lovemos from episode 32, a little space exploration robot specifically designed to be an appealing mascot for Super GUTS. Unfortunately, he gets possessed by an alien spirit that turns him evil and he merges himself with Super GUTS' vehicles to turn into the giant Satan Lovemos.
* Ultraman Dyna are an alien species who had to migrate from their home planet due to an impending ice age. One of them lands on Earth, befriending a lonely boy and hanging out with other children as friends.
* Ultraman Dyna are mutated lake algae that merge themselves into a singular form after consuming enough blood.
* Ultraman Dyna, a tiny, furry alien creature that is completely peaceful (if a bit mischievous) and possesses a number of useful abilities for the team.
* Ultraman Dyna has Hanejiro, a small furry alien that Super GUTS first encounters when on a mission to an alien planet.
* Ultraman Dyna: In the two-part story "The Krakov Won't Surface", a jellyfish-like alien being named Spume sets up base in Antarctica to attempt this with an artificial sun recently launched out by Super GUTS, with the plan being that the sun's heat will melt the Antarctic ice and flood Earth so that Spume can have the planet all to itself. Of course, Dyna and Super GUTS were going to have none of that.
* Ultraman Dyna is a demon that hides in mirrors, coming out under the moonlight to feed on the fear of warriors. However, Mozui can actually live inside any reflective surface, such as a window or the surface of a lake; the latter of which it originally lived in until being imprisoned inside a mirror that then had the reflective surface covered up to stop it from escaping.
* Ultraman Dyna is a giant algae monster with a gigantic mouth taking up its entire

belly area. For some inexplicable reason, the mouth resembles a pair of human lips, making the monster look more hilarious than scary.
* Ultraman Dyna is a parasite of kaiju that invades their bodies and turns them into mindless zombies as its young incubate inside them. After a while, the kaiju explodes with enough power to destroy everything in a 4-kilometer radius, killing the parasite but sending the young flying through space where they land on another planet and start the cycle anew.
* Ultraman Dyna Neosaurus to escape his exploding plane (as usual, without his teammates knowing), and they assumed Asuka had died before he shows up.
* Ultraman Dyna (set maybe a decade later) we discover that Daigo Madoka, the main character from Tiga, eventually married Reina and had a daughter with her. A further special edition episode reveals the couple had a son, too, which inherits his father's Ultra-powers.
* Ultraman Dyna's movie when Queen Monera kills Dyna by sucking out his energy. A kid with a Tiga figure has everyone give their light to summon Tiga to revive Dyna. Once more, butt-kicking ensues.
* Ultraman Dyna: Terranoid from the last arc was originally a mechanical clone of Ultraman Dyna, who ends up being affected by the Sphires and going on an unstoppable rampage.
* Ultraman Dyna. The aliens' plan was to sell copies of the game to children, who would be able to develop their own monsters and use them to fight each other to level up until eventually the highest leveled monster would be brought to life to destroy Ultraman Dyna.
* Ultraman Dyna: The battle between Dyna and Alien Himala ends with Dyna punching Himala into the stratosphere. Himala never reappears for the rest of the series (and the whole franchise, for that matter) and for all the audience knows, he's probably still flying upwards twenty-odd years after Dyna's series ended.
* Ultraman Dyna took the form of an evil-looking version of Ultraman Dyna, but rather than using it to make it seem as if the Ultra had turned his back of humanity, it was solely to fight him on an equal footing.
* Ultraman Dyna was a terraforming project to colonize the solar system. during the series itself, Settlements had been created on Mars.
* Ultraman. Essentially, if you've ever wanted to see an unofficial Godzilla/Ultraman crossover, watch this episode.
* Ultraman) ever completely runs out of power, he will never rise again.
* Ultraman franchise, giant animals (mutant, natural, prehistoric), mutant humans, cybernetic clones, mirror-people, fire-people, ghosts, fantastic vehicles, evil artifacts, MIB-style organizations, superweapons, beings transformed into a toy-like form, monsters powered or formed from the souls of other monsters, an entire dimension where the ghosts of slain monsters sleep, wizards, dragons, and all sorts of crazy stuff.
* Ultraman franchise, with 30+ series, over 15 movies, and a bunch of manga and video games since 1966, isn't stopping anytime soon. This mainly applies in its home nation of Japan (and most of Southeast Asia) as it remains relatively obscure in the West, however Tsuburaya and Mill Creek Entertainment is soon to change that with Blu-Ray and DVD releases of older and newer Ultraman titles in the US.
* Ultraman Gaia about halfway through the series, allowing Ultraman Gaia to use some of Agul's powers.
* Ultraman Gaia captains — Seiichiro Tsutsumi (who commanded the various XIG squadrons) and Akio Ishimuro (who worked with the bridge operation team).
* Ultraman Gaia, create shields or orbs of water, and change the consistency and color of water.
* Ultraman Gaia does something similar with Riku's friends having full knowledge of his Ultra identity.
* Ultraman Gaia featured the XIG fighters launching from their base in the series' opening sequence.
* Ultraman Gaia has a trio of ancient machines, Enzan, Tenkai and Shinryoku, who upon reactivation is dedicated to reset all life on earth, and the mecha Σ-Zuigul who captures Ultraman Gaia's human host Gamu, stripping him from his

transformation powers necessitating Ultraman Agul to save him.
* Ultraman Gaia monsters) is a giant eyeball with limbs that are also covered in eyes.
* Ultraman Gaia that took on humanoid forms to battle the Ultra heroes. Apatee was the first of these, taking on the form of a knight-like being to battle Gaia. Its successors Algyuros and Meemos were far more advanced though, impersonating Ultraman Agul and Gaia respectively and only taking on others forms once the disguises stopped working.
* Ultraman Gaia: The Battle In Hyperspace, but there's no reason as to why are they unscathed from the debris, heat blast, momentum, and the like.
* Ultraman Gaia: The Battle In Hyperspace reality. For most of the film, it's about a friendless young boy named Tsutomu who idolizes Ultramen, and wishes the Ultras are real, and most of the film deals with Tsutomu struggling with his peers and dealing with bullies in school.
* Ultraman Gaia to reshape the atmosphere into its liking. This granted Tenkai the ability to create massive hurricanes and windstorms by spinning itself rapidly, surrounding the machine with a colossal cyclone.
* Ultraman Gaia: While Ultraman Agul doesn't have any obviously water-based powers, his life energy is drawn from the sea itself, so he can be considered an example.
* Ultraman Gaia, whose true form is a bipedal, dragon-like monstrosity capable of stomping Ultramen like ants. Ultraman Gaia and Ultraman Agul eventually defeats her despite the sheer differences in size.
* Ultraman Gaia Worms That Walk known as Kaiser Dobishi to overwhelm Gaia and Agul.
* Ultraman Geed Alien Investigation Bureau (AIB), Moa Aizaki is the only human agent in an organization consisting otherwise entirely of alien species from previous series.
* Ultraman Geed. Although they aren't the part of the same team, they usually fight side by side with each other for the benefit of their mutual friend Riku.
* Ultraman Geed for troublemakers, deport them, and make sure humans don't know about it. In a twist however, every member of the organization (except Riku's friend Moa Aizaki) is a disguised alien as well.
* Ultraman Geed: Geed has curved triangles for eyes, and his Color Timer is shaped like the Ultra Capsules he frequently uses during his transformations.
* Ultraman Geed has an interesting take on this scenario, where a good chunk of its MOTWs are fusions of MOTWs from previous series.
* Ultraman Geed is a subversion. His default form is a nasty-looking combination of red, black, and silver due to being Belial's son and directly channelling a share of Belial's power; and the people are suspicious of him due to the resemblance. But Geed ultimately proves himself as genuinely heroic despite his heritage and appearance.
* Ultraman Geed to combine with his already available Belial capsule to become Royal Mega-Master form.
* Ultraman Ginga, allowing the monster to continue supporting him in battle afterwards.
* Ultraman Ginga and socks Bemstar in the face until the monster ends up in the stratosphere, complete with a twinkle.
* Ultraman Ginga is another fusion beast created with the bodies of five different kaijus, including the aforementioned Gan-Q. It's left arm is a gigantic Gan-Q eyeball, and it has eyes on it's forehead as well as it's stomach (respectively taken from Melba and Super COV).
* Ultraman Ginga, one episode had Ultraman Victory punching the monster Bemstar in the face... with enough force to send Bemstar flying into the stratosphere and vanishing with an audible Pokemon-style *ping*. The fact that Victory is currently using Ex Red King's knuckles helps.
* Ultraman Ginga S The Movie: Showdown! The 10 Ultra Warriors! are what scares her the most.
* Ultraman Ginga S The Movie: Showdown! The 10 Ultra Warriors! gets to grow kaiju-sized, towering over the previously humungous insect.
* Ultraman Ginga S The Movie: Showdown! The 10 Ultra Warriors!. Naturally when

attempting to infiltrate Etelgar's fortress, his fears then manifests itself into giant, sentient tomatoes that bounces after him.
* Ultraman Ginga S The Movie: Showdown! The 10 Ultra Warriors! who wants to capture Ultramen to be added into his collection, imprisoned in an interdimensional cell.
* Ultraman Ginga, Tarou's use of psychokinesis (similar to Seven's) suggests that other Ultramen have the same power.
* Ultraman gives us the first and most famous of these in Zarab, an alien invader who delights in sowing discord and break trusts through the impersonation of others. His favourite tactic is to transform himself into a sinister-looking duplicate of Ultraman and then go on a rampage.
* Ultraman has a glowing orange patch that shoots fireballs in place of a face.
* Ultra Maniac, Ayu in male form (who calls herself Ayuoh in that form) and another girl have a conversation about...how to spell Ayuoh's name.
* Ultra Maniac, but only her foster mother is a muggle; her foster father is magical, too.
* Ultra Maniac featured witches using computers to create magic spells for them. This was apparently not the only way to do so, however — the main character, Nina, pretty much relies on this method because her magic skills are so poor.
* Ultra Maniac literally *is* a Techno Wizard because she needs to use a PC to cast spells due to her lack of skill.
* Ultra Maniac one of the two main girls finds out the other has a crush on her. She scoffs it away, saying that it proves the other girl is just a child.
* Ultra Maniac started out with a one-off OVA pilot before getting picked up for a full 26-episode series.
* Ultra Maniac, there was a camera that would show who the subject of the picture liked.
* Ultraman) into a gigantic and violently insane creature. Worse still, an undetonated nuclear bomb is precariously dangling on Ragon's scales...
* Ultraman, introduces Chandler, a giant bat-like monster whose role is to get brutally killed by Red King and quickly forgotten. Later on there's the ape-like Gigass who lasts for maybe ten seconds longer than Chandler, but still dies before Ultraman could show up.
* Ultraman, is a massive enough fan of the franchise that he made his own fan film at one point.
* Ultraman. It can be assumed there are thousands of other Ultramen patrolling the rest of the universe.
* Ultraman Jack receive similar items in episode 19 from the Mother of Ultra and episode 26 from Ultraman King respectively.
* Ultraman King, the leader of the Showa Era Ultras, and the closest thing their universe has shown to
* Ultraman leads the multiverse protection crew known as the Ultimate Force Zero.
* Ultraman Leo, albeit one without an overarching antagonist for most of the series once the Alien Magmas are out of the picture.
* Ultraman Leo and become some of Leo's most dangerous foes in the later part of the series' run.
* Ultraman Leo and wipe out it's home planet, before hunting the father and daughter pair of scientists who created it all the way to Earth.
* Ultraman Leo approach (seen in the two-part premiere, the Living Saucer story arc, and "Battle! Leo Brothers vs Ultra Brothers!") often turned children off, as they felt it was too dark. At the same time, the series also had many silly episodes with storylines centered heavily around child characters (like "Mighty Momotaro!", "I'm the Monster General", and "The Rhinoceros Beetle is a Space Invader"), meaning adults often found the series too childish at times.
* Ultraman Leo. Don't forget that your life isn't yours to give! Now go!"
* Ultraman Leo). However, they never really had any big plans for Earth beyond "cause mayhem" and were treated no treated no differently from Leo's kaiju enemies.
* Ultraman Leo is able to breathe red gas that drives humans into violent insanity, causing city-wide riots as it rampages around Tokyo.
* Ultraman Leo is a child-like alien who befriends Tohru; he won't do any harm

unless if provoked, and only wants to get along with humans. Rolan (a bird-like alien from a later episode) also counts, taking the form of a woman named Hoshimura and making handcrafted toy pinwheels for children.
* Ultraman Leo possess many of the same powers as Seamons and Seagorath above, which Alien Magma uses to devastate coastal cities and even sink an entire island.
* Ultraman Leo: Seven returns in the first episode to confront Alien Magma and the Giras Brothers, but the trio overwhelm him and break his leg, forcing Leo to rescue him. His leg remains injured even when he takes human form, and the damage sustained through both that and the beatdown given to him by the villains leave him unable to do much fighting, instead becoming a supporting mentor to Leo.
* Ultraman Leo) steals the Ultra Key, the artifact that keeps the Land of Light in orbit, when disguised as Leo's brother Astra in order to start a civil war amongst the Ultra heroes.
* Ultraman Leo: The alien Mazaras resides in the mirror world and kidnaps children by impersonating their dead relatives in attempts to replace her deceased daughter. She also has a monster lackey named Specter, who she sends out into our world to destroy while she faces Leo.
* Ultraman Leo: The fight between Leo and Alien Northsatan concludes with Leo's fist through Northsatan's torso, killing him.
* Ultraman Leo:Ultraman King is the only good-aligned Ultra with red eyes.
* Ultraman Leo, who likes to do much of the same thing as Zarab. The difference is that his disguises are 100% perfect in appearance, allowing him to even fool the Ultras.
* Ultraman Max, dubbed a "Friendly Cross-Alien", is another alien refugee from a destroyed planet, who becomes fascinated with Earth's beauty and intends to live the rest of his life as a human, until a hostile alien named Alien Godley invades forcing Neril to give up his life to save the Earth.
* Ultraman Max is a highly advanced gynoid who serves as the team's communications operator and strategist.
* Ultraman Max is Berserkes, an ancient juggernaut of a machine created by the Delos civilization, and can be described as a city-sized mechanical dai-kaiju. Max defeats it after an insane amount of effort in the end.
* Ultraman Max (plus Ultraman Hikari) have these weapons as part of their movesets; Max can summon a wrist-mounted energy blade called the Max Galaxy, which he uses to fire an incredibly powerful beam, summon forcefields and channel solar energy into his body, while Mebius and Hikari can both summon forearm-mounted energy swords from their braces to slice away at foes.
* Ultraman Max's superior Ultraman Xenon gives him the immensely powerful Max Galaxy in order to bypass the infamous Zetton's force field.
* Ultraman Max: The ice-breathing Lagoras is the mortal enemy of the fire-breathing Grangon, and the former hunts for the latter to consume its molten core to become Evolved Lagoras, which combines the powers of both into a far more dangerous attack.
* Ultraman Max, who is a human, and Rei himself clearly understands him. Apparently, the Ultras communicate telepathically.
* Ultraman Mebius. A cross of a dragon and an eagle that possesses the ability to manipulate Earth's atmosphere to create multiple enormous tornadoes in a concentrated area and cause other unnatural weather patterns.
* Ultraman Mebius being Curry Rice, which is his first meal on said planet.
* Ultraman Mebius comes from a similar high ranking as Zoffy, and indeed his chest is similarly adorned with star medals.
* Ultraman Mebius despite the Ultra having saved the entire city multiple times. This lousy excuse of a person is willing to do anything to get a good story for the tabloids, regardless of what kind of horrible things it requires (or even if the story is even remotely true).
* Ultraman Mebius episode "An Old Friend's Visit". Complete with anime sound effects.
* Ultraman Mebius features a villain named Jashrine, a three-headed alien that can fire a laser from his wings that can turn victims into Gold statues. He apparently

collects them as trophies.
* Ultraman Mebius for the 1st time ever whereas everyone else in GUYS is scared out of their minds considering Eleking is a Kaiju-sized Electric Eel.
* Ultraman Mebius in half with a single strike. The only person who has ever beaten him was Hunter Knight Tsurugi/Ultraman Hikari, who is no slouch himself, as he has put his Knight Blade to excellent use against many a kaiju.
* Ultraman Mebius: It's averted while Mirai is transforming he is hit with a fireball and is thrown to the ground as he begins his henshin sequence.
* Ultraman Mebius lighting on fire, burning them severely for a few moments before triggering the explosion.
* Ultraman Mebius: Mebius' human form Mirai Hibino is based on a young spaceship crewman named Hiroto Ban who sacrificed his life to save the ship from being sucked into a wormhole. Mebius had attempted to rescue him, only to have Hiroto slip out of his grasp at the last moment. So as a reminder of Hiroto's sacrifice and his own failure, Mebius made his human identity that of Hiroto.
* Ultraman Mebius monster, Imperializers, sentient humanoid machines which can absorb plenty of hits from Ultraman Mebius, and even reassemble itself after being blown up. Even with the assistance of Ultraman Taro, it still takes three episodes to finally defeat Imperializer.
* Ultraman Mebius's big bad, the Alien Emperor/Empera Seijin, could fall into this category, an evil alien from a dead star that was very similar to the Ultra people who commanded the Four Heavenly Kings and armies of monsters and aliens throughout the millenia.
* Ultraman Mebius takes place 20 years "real time" after the last monster attacked and brings back everyone except Taro's actor.
* Ultraman Mebius that absorbs all life on a world and merges their consciousnesses and the planet with itself. Additionally, it assimilates its surroundings to take on an innocuous form, like turning into a living mass of vegetation after landing in a forest.
* Ultraman Mebius. That didn't mean they were easy to kill though. A single one overwhelmed the main characters for two episodes, thanks to its gatling laser cannons, self-repair system, and teleportation abilities
* Ultraman Mebius: The episode featuring Mebius and Leo teaming up against Alien Reflect ends with Leo and Mebius, the latter modifying his Ultra Kick into a spinning drill, using their combined powers to rip a hole through Reflect's midsection, killing him.
* Ultraman Mebius to stay on Earth up till the final battle against Alien Empera.
* Ultraman Mebius, when Lim Eleking (the chibi-fied form of the electric eel kaiju Eleking) physically manifests itself in the GUYS headquarters. George tries to pick up the creature while its tail is connected to an electrical outlet, and ends up getting shocked into unconsciousness in a comical manner, complete with his hair getting all spiky in the process.
* Ultraman Moedari, are sealed by the power of the Pillars and The Keystone.
* Ultraman Moedari. A twist on it is that he materializes them out of thin air and bombards his target with them. He doesn't use them when transformed into Ultraman Lugeno.
* Ultraman Moedari can speak any earth language from any time and a plenitude of alien ones. Madame Kandakai/Ultrawoman Lunaram seems to do the same.
* Ultraman Moedari spams telekinetic powers all the time. Lunaram and Finem are lesser examples.
* Ultraman Moedari tropes, most notably the multiverse concept of the Zero Film Trilogy, and takes them beyond eleven. So much so that there are categories for groups of multiverses. Previous hero's powers? Take them all and combine them!
* Ultraman named Goldon eats pretty much what the name suggests it does. In fact, Goldon's body is partially made of gold!
* Ultraman Neos had to be taken off their air for a few weeks due to the lead actor getting caught in some controversy.
* Ultraman Neos is highly unstable and rigged to explode, causing difficulties when HEART and Ultraman Neos attempts to fight it. For the final battle, HEART instead

uses a zero-gravity ray to disable Giga Dread so that Neos can lift it into space and have it explode without hurting anyone.
* Ultraman Neos, King Dainas, a monster created when multiple dinosaur bones gets struck by Dark Thunder Energy, gets reverted back to a pile of bones by Neos.
* Ultraman Nexus (as well as Ultraman Nexus), complete with memory wipes and other hyperadvanced technology to do the job.
* Ultraman Nexus featured the launching sequence of the Chrome Chesters in the series' opening sequence for the first 25 episodes of the series.
* Ultraman Nexus fused together from practically all the Space Beasts Nexus defeated throughout the series.
* Ultraman Nexus or lasts for at least one single episode, the creature Frogos shows up only in a flashback before getting killed off.
* Ultraman Nexus, performs illusions by hypnotizing targets to create immortal illusions of their greatest fears, make itself seem as if it has turned invisible, and make doubles of itself, among other things.
* Ultraman Nexus that produces fog to hide its presence and can erase memories of its existence).
* Ultraman Nexus, the "visitors" gave TLT most of their technology to combat Space Beasts.
* Ultraman Nexus, where each monster forms its own story arc that can run anywhere between two to four episodes, and sometimes longer.
* Ultraman normally that Ultramen only have so much power to spare on Earth and using their finishing move more rapidly drains their power supply. Thus why they only use it when they've got a pretty good idea that it'll work.
* Ultraman Orb a century before the series even started. The monster's demise is confirmed by Gai Kurenai, Orb's human form having Ultraman Tiga's power card in his possession.
* Ultraman Orb. And it did a pretty good job at that do as it ravaged its creators' world with its plethora of laser cannons and melee weaponry and even gave Ultraman Orb a serious challenge.
* Ultraman Orb can manipulate the atmosphere itself, creating gigantic tornadoes (often in concentrated clusters) and other erratic weather patterns.
* Ultraman Orb. In his appearance in the series, Hoe is able to produce fog to shroud its presence, bringing a sense of dreary despair to the characters who fear Orb will be defeated by the monster.
* Ultraman Orb is the King Demon Beast of Water. Resembling a seahorse mixed with an octopus, it fouls up bodies of water with its presence, rendering them unbearably smelly, and is able to shoot jets of polluted water from its snout.
* Ultraman Orb. It possesses the ability to manipulate atmospheric conditions to create multiple massive tornadoes in a concentrated area.
* Ultraman Orb The Movie: Lend Me the Power of Bonds! improvised their lines.
* Ultraman Orb, the people who transform into the Ultramen are pulled into a realm where time moves much faster, making it possible for this trope to happen and it was shown in previous series that it was indeed the case, as when not reusing stock footage of transformations a simple flash would happen and the Ultra would instantly transform or change orm.
* Ultraman Orb: The SSP (Something Search Party) has an Encyclopedia called the Pacific Records, which they often use as reference to study unnatural phenomenon. More often than not, the phenomenon turns out to be kaiju activities, for the titular Ultra to battle at the end of the episode.
* Ultraman Orb, with Ide saying Hayata would have become a government guinea pig if it was ever revealed.
* Ultraman Orb, would conclude with a revelation that the Galactrons are mass-produced under their master, Gilbaris.
* Ultraman R/B). Additionally, they can swap their elements as needed in battle.
* Ultraman R/B, but the two are able to switch powers around if needed.
* Ultraman R/B. He can switch powers with Ultraman Rosso though if needed.
* Ultraman R/B R/B Crystal. Coincidentally, they use this ability to defeat an updated version of the aforementioned Maga-Basser.

* Ultraman R/B The Movie: Select! The Crystal of Bond. At the climax of the film, he actually shows up to battle the Ultramen team of Rosso, Blu and Geed by phasing himself through a giant screen on the side of a city building.
* Ultraman R/B, usually supplied by their sister or, more begrudgingly, his brother.
* Ultraman Saga a decade earlier, who by that time had a son with Ayano Morimoto.
* Ultraman Saga: A recovering Taiga spat out his drink when hearing that Ultraman Zero is using his body as a vessel.
* Ultraman Saga: Early in the film, there's a Gubila which relentlessly pursues Taiga and a little boy he befriended throughout the deserted city, from the streets to above a bridge, for maybe three minutes without stopping, even destroying said bridge just to catch two tiny humans.
* Ultraman Saga, the only thing that they could use to stand on an even footing with the monster Hyper Zetton.
* Ultraman sequences. The same goes for the majority of Ultra Series works.
* Ultraman's final enemy was Zetton, an alien kaiju resembling a faceless humanoid beetle. Weirdly enough, its title is "
* Ultraman Shadow, giving him to strength to destroy Shadow once and for all.
* Ultraman showing up a few times to help Zone battle the Terror-Beasts. Two of his enemies, King Ghidorah and Gigan, also appeared as MOTWs!
* Ultraman story has a race of subterranean humanoids kidnapping Hayata (Ultraman's human form) as part of an attempt to take over the surface world.
* Ultraman Story Taro's adventures on Earth. That being said, the film climaxes with a 12-minute duel where Taro and his brothers does battle with a powerful monster called the Grand King, which is original footage made for the movie.
* Ultraman Taiga, he has the largest muscles of any Ultraman, and he is extremely prone to showing off that they are most decidedly not just for show.
* Ultraman Taiga. Not to mention, he's the Ultraman equivalent of a bodybuilder due to his muscular appearance and the full display of raw power in battle solidified this status.
* Ultraman Taiga spontaneously evolved from space junk, and now feasts on any planet it can get its hands on. It does, however, have a particular affinity to metal, and will prioritise it over other matter with almost as much attention as it gives to raw energy.
* Ultraman Taiga, Taiga's ally Ultraman Fuma fights with ninja techniques.
* Ultraman Taiga The Movie: New Generation Climax: Grimdo the "Malicious Demonic Monster," who is said to have existed before the dawn of time, is the main threat.
* Ultraman Taiga The Movie: New Generation Climax has Grimdo, now at it's peak of power and the size of a mountain, bringing it's foot down on Ultraman Reiga.
* Ultraman Taiga The Movie: New Generation Climax Ultramen, reacting in panic at the Malicious Demonic Monster Grimdo's awakening.
* Ultraman Taiga, Ultraman Titas, gets into fights, he tends to send enemy kaijus flying halfway across the city with his punches.
* Ultraman Taiga with rippling muscles, who flexes his pecs to intimidate kaijus and aliens before every battle. The camera even zooms up close to his abs during his debut in episode 2!
* Ultraman Taro, as by constantly inhaling and exhaling, Guron creates mighty gusts of nipping wind.
* Ultraman Taro bucket of water (one large enough to be held by an Ultra) and splashing its contents on Veron, waking him up, at which point the embarrassed monster quickly leaves and is never seen again.
* Ultraman Taro by brutally stabbing the heroes to death with his beak, making Birdon a popular choice for when the producers want to bring back a monster.
* Ultraman Taro, dislodging everyone, but fortunately he was able to transform into Taro to rescue the falling people.
* Ultraman Taro eat steel and concrete like termites eat through wood, causing structures to collapse.
* Ultraman Taro had an alien named Kaan, whose species are parasites of kaiju and send their hosts on mindlessly violent rampages. He takes parasitizes the body of a

friendly monster named Orphy, forcing Taro to fight it and find a way to get Kaan out of Orphy's body.
* Ultraman Taro had Mukadender, who could detach its head from its body at will to fight as two combatants. The catch is that damage to Mukadendar’s head is still felt by its body and vice versa (same goes with actions such as being thrown into the air).
* Ultraman Taro is a bit of a special example of this case; if blown apart, he can pull himself back together, but none of the damage he suffered during the explosion is repaired, resulting in him becoming a shambling mutilated mess that only just resembles his original form.
* Ultraman Taro monsters fart in Taro's face as a combat tactic while battling him: the caterpillar-like Kemujira, the living graffiti drawing Gongoros, and the gluttonous dragon-like Motokureron.
* Ultraman Taro starts off as a swarm of giant termites, who can chew through metal and concrete, until they're driven off by pesticide fired by the ZAT. The termites responds by merging themselves into a building-sized kaiju that goes on a rampage through the city.
* Ultraman Taro, Taro does something very similar to what Ace did against the alien Mephilas, although he follows it up by blowing the alien up with his Storium Ray instead.
* Ultraman Taro, the main character, Kohtaro Higashi, being a professional boxer himself, is often featured in this trope. One episode have him boxing on stage mid-episode, then transforming into Ultraman Taro to fight a kaiju a few minutes later after the match.
* Ultraman Taro, which involves igniting into explosive flames, charging the opponent and triggering a massive explosion on impact.
* Ultraman Taro, who has come to Earth on Christmas Eve for some destruction-wreaking and murders the friendly, Christmas-loving alien Miracle.
* Ultraman Taro (who, like Bemstar, also reappears in the series on a regular basis) also has this feature, thanks to Bemstar being one of his components.
* Ultraman that continues to produce new content, influenced hundreds of Japanese creators, and gets referenced everywhere in Japanese popular culture to this day.
* Ultraman the effort of Science Patrol to win and that there were times where if it wasn't for Science Patrol, Ultraman would have been defeated.
* Ultraman, the enemies can only be defeated with a Specium Beam while they have no HP. To complicate things, their health regenerates, Ultraman's power takes a long time to charge and you'll probably have to spend it sometimes while struggling against the tougher opponents.
* Ultraman, the first of the Ultraheroes (and some of the later ones) was created when an alien bonded with a human to save his life.
* Ultraman: The Next: As the first installment of the Project N works meant to reboot the franchise from scratch, its titular Ultraman (sometimes called The Next) has a very, very different design to past Ultras, looking much more organic and with many vessel-like red lines on his body.
* Ultraman: The Next of the film is a parasitic, space demon who merges with a human host and slowly overrides their mind, body and finally, kills them altogether, absorbing its host into itself. It can do the same with other living creatures for the sake of augmenting itself.
* Ultraman: The Next, the monster known as Beast The One use it's powers to absorb entire flocks of crows into his body, morphing what seems to be a few thousand crows into becoming a pair of crow-like wings on it's back, which grants it the powers of flight to battle Ultraman in aerial combat. Ultraman eventually slices those wings off, which then disperses back into crows and flew away.
* Ultraman: There is only episode in the entirety of the original series where not all members of Science Patrol appear, and that would be episode 30 "The Phantom Snow Mountain", in which Captain Muramatsu and Fuji are absent.
* Ultraman, the Science Patrol and Ultra Garrison's telephone uses King Ghidorah's cackling!
* Ultraman, the title hero's first enemy Bemular derives his name from Bemlar, the

prototype character who would eventually be developed into Ultraman. Similarly, the avian kaiju Hydra is physically based on the same Bemlar prototype.
* Ultraman: The Ultimate Hero featured Julie Young and Theresa Beck of WINR.
* Ultraman: The Ultimate Hero is notorious for its sluggish and awkward battles, consisting mostly of the suit actors nudging each other and SFX attacks with minimal physical contact — very problematic in a series where giant monster battles are one of the main attractions. Allegedly, this is because the show's high-quality rubber suits were so expensive, fragile, and cumbersome that there were concerns of damaging them if the battle scenes got too violent, and because the director actually had no idea of how to choreograph a fight.
* Ultraman: The Ultimate Hero, it was finally aired on Japanese TV in 1995.
* Ultraman: The Ultimate Hero) — with Major Havoc Entertainment (later renamed Steppin Stone Entertainment) of the USA.
* Ultraman: The Ultimate Hero: Ultraman Powered has blue eyes, which changes colour as he transforms.
* Ultraman: The Ultimate Hero, where Kane Kosugi plays Ultraman's human host Kenichi Kai, while Sho Kosugi voices Ultraman himself.
* Ultraman, the version from the anti-matter universe that's an evil counterpart to Superman, requires periodic exposure to Anti Kryptonite to maintain his powers. Its unclear whether it simply keeps him powered or keeps him alive. He seems to be in bad shape without it but he's also fighting
* Ultraman Tiga a large amount of the content. It's not very well-liked by fans.
* Ultraman Tiga are alien parasites spawned from a sentient meteor to find it food. When the space rock is endangered by GUTS' assault, the Magnia merge into a kaiju form, only to get their butts whooped by Tiga.
* Ultraman Tiga called Rucia and Zara being pursued by a beetle-like alien named Muzan. They soon find out that Rucia and Zara have been sent down to Earth to be freely hunted for sport by Muzan, and work towards trying to save the pair.
* Ultraman Tiga dub had aired on syndicated TV in the US for years until the rise of cable.
* Ultraman Tiga, Enomena, who is capable of generating high-energy electromagnetic pulses which can drive people insane and into serious violent tendencies. Naturally Enomena uses this attack to cause riots across the city as diversion, while it attempts stalk and hunt its prey, a harmless alien child called Deban.
* Ultraman Tiga episode "Deban's Turn!" features Deban, a child-like, harmless alien who lives with a travelling circus troupe. According to the troupe leader, Deban's backstory involves the alien bumbling into the group, which they befriend thinking he's just another costumed performer, but they later discover the truth when asking for Deban to remove his mask during lunchtime.
* Ultraman Tiga episode "The Closed Amusement Park" features the hibernating kaiju, Gagi, awakening in an amusement park and sealing the entire area with an impenetrable force-field. The situation starts becoming tense when Gagi targets the Ferris Wheel, where Shinjoh's younger sister and a little girl is stranded on its top, at which point Shinjoh and a boy he befriended decides to hijack a couple of go-karts to draw Gagi's attention away, trying to buy some time until Ultraman Tiga arrives to deal with the monster.
* Ultraman Tiga Ghanathor, an ancient evil that existed before time and absolutely dwarves the Ultra.
* Ultraman Tiga: Giranbo is a child-abducting monster that can shape-shift to human form to blend in. She doesn't have a reflection, which is how she is spotted.
* Ultraman Tiga growing. The human-size battle went on for some time and didn't seem to take away from the time limit for the giant-size fight later.
* Ultraman Tiga, GUTS has a fairly standard-looking patrol car, but it comes equipped with a laser cannon on its roof that they can use to blast at kaiju.
* Ultraman Tiga had a comic series by Dark Horse, which appeared to take some elements from the 4Kids English dub. The most notable example is the Color Timer being referred to as the "Biotic Sensor" and the setting being in the year 2049 as opposed to 2007; however, many elements were retained from the original version, such as the extra statues in the Pyramid of Light being Tiga's lost companions

rather than fakes and much of the rest of the terminology (Ultraman's "types" as opposed to "modes", for instance). This is a case of Tropes are Not Bad, though, as much of the universe was expanded on in a way neither version did, such as Kyreloid/Kilalien having a larger backstory.
* Ultraman Tiga, has a more benevolent version, a rabbit-based monster called King Molerat, who spends most of the episode hibernating. It does eventually goes on a rampage because of hunger, but Tiga ultimately spares its life and shrinks it into the form of a regular rabbit.
* Ultraman Tiga is an alien living with a troupe of circus performers, who blends in with public due to civilians assuming his alien appearance is a mascot costume. He spends his days performing in stageshows as a clown, and is as friendly and as harmless as he sounds.
* Ultraman Tiga is a swarm of parasitic creatures spawned from an organic meteorite. The parasites find food for the meteorite by attacking prey and latching on, turning the victims into zombies that march themselves towards the meteorite, which then consumes their life force.
* Ultraman Tiga is capable of creating illusion images of itself to distract Tiga and the Guts defense forces.
* Ultraman Tiga, it is a bizarre looking parasite monster resembling an overgrown mass of limbs fused together, with an absolutely massive mouth taking up its entire torso.
* Ultraman Tiga, it seems the developers are familiar with the original source material; however, many elements from the 4Kids dub remain, such as the names (Chaser, Zolo, etc.) as well as Sanji receiving lollipops.
* Ultraman Tiga kaiju Golza gains literal versions of these when he metamorphoses into Fire Golza by absorbing magma.
* Ultraman Tiga monsters. They are a completely mindless and emotionless race that reproduce by transforming other intelligent beings into more of their kind and share a single mind via a massive tower that stores a gigantic brain.
* Ultraman Tiga. Possesses the power to create an electrified fog of darkness capable of engulfing the world.
* Ultraman Tiga pulled the same trick on Tiga that Gabura did to Seven as the only thing that can truly slay Sakuna Oni is the sword of the samurai who originally defeated it.
* Ultraman Tiga that only lasted 25 episodes, and an uncut Asian-English dub that currently has only the first 2 episodes publically available.
* Ultraman Tiga that slowly coats whatever the laser touches into Stone.
* Ultraman Tiga. The alien parasites that compose its body are perpetually shrouded in fog as they move around allowing them to latch onto hosts by surprise and turn them into zombie-like beings.
* Ultraman Tiga: The Final Odyssey: During the awakening of the Dark Giants in Ry'leh, there is a shot of one of the giant's foot stepping on an unfortunate GUTS redshirt.
* Ultraman Tiga, which is interspersed throughout the opening, and culminates with her takeoff just as the theme song swells into its chorus. The classic underbelly shot is the very next one, with the ocean below and the shore on the horizon. Very much appropriate, as her design is essentially a cross between a Star Destroyer and a whale.
* Ultraman Tiga, which takes flight just as the theme song swells into chorus. It's interspersed with short clips of other GUTS vehicles launching.
* UltraMantis Black. Apparently, they had been waiting for an excuse to boo him.
* UltraMantis Black. Maybe it's the difficulty of getting vegan wrestling boots.
* UltraMantis Black (Rochester, New York), New England Championship Wrestling (Massachusetts), the Pure Wrestling Association (Ontario, Canada) and NWA Empire (Buffalo, New York).
* UltraMantis, he yelled "FINISH!" In fairness, this was only his eighth match.
* Ultraman: Towards the Future gives birth to two kaiju to punish the entire human race and destroy Ultraman for protecting them.
* Ultraman: Towards the Future is notorious for its poor graphics and unfair

difficulty levels.
* Ultraman: Towards the Future. It did eventually air on Japanese TV in 1995 though.
* Ultraman: Towards the Future) — with the South Australian Film Corporation.
* Ultraman: Towards the Future: Ultraman Great is the sole Ultra whose suit is made of spandex instead of rubber, therefore creating some rather obvious folds and creases when he moves. The white parts of his suit are much brighter compared to his fellow comrades, a trait that shows up in all his future appearances (even during cameos).
* Ultraman Trigger: New Generation Tiga and makes it clear to the audience that Tiga and Trigger coexist alongside one another.
* Ultraman, we have that one time when Akiko Fuji was enlarged by Alien Mephilas to 50 meters tall.
* Ultraman were able to speak Japanese when in their human disguises, but could only make gibbering noises in their true forms (perhaps their vocal cords change upon disguising?).
* Ultraman X), culminating in X sending all four of them flying into the sky and dissappearing.
* Ultraman X, Daichi and X keep them in that form and work towards bonding with the creatures and eventually reviving them to their full size.
* Ultraman X has the returning avian monster, Birdon, gaining a new abilty to twist her head 180 degrees backwards just as Ultraman X tries attacking her from behind. This new design here is seemingly inspired by horned owls being capable of doing the same thing in real life.
* Ultraman X is the Girly Girl to Asuna's Tomboy Girl and her status as that is marked by her pigtails.
* Ultraman X monster Gargorgon could turn victims into Stone by opening up its mouth to reveal an eye inside that fires a petrifying beam. No prizes for guessing what her name is derived from.
* Ultraman X, Nackle then sees the holes in his shadow, moments before he gets finished off by Zero.
* Ultraman X-shaped Color Timer in place of the usual circular one. He also has many cybernetic parts on his body which no other Ultra has.
* Ultraman X's Xio uses three vehicles — a patrol car called Athos, a minivan called Aramis, and a truck called Porthos — all equipped with powerful laser cannons to add some extra firepower to support Ultraman X against kaiju. They can also merge with Xio's planes, the Muskettys, for aerial combat.
* Ultraman X's X-Lugger is gained about halfway through the series after almost getting killed by the monster Tsurugi Demaaga, granting him rainbow-themed powers.
* Ultraman X The Movie: Here Comes! Our Ultraman!: Zaigorg the "Inferno Demon Monster" is the main antagonist, and the film depicts him as the Ultra-verse equivalent of Satan.
* Ultraman X", the opposing alien team consisting of the aliens Babalou, Dada, Kemurian and Zettonian, decides to cheat by turning themselves kaiju-sized, necessitating Ultraman X to interfere... by using his Gomora armour to send all four aliens vanishing into the skies, complete with four twinkles.
* Ultraman X worldwide as giant monsters and caused protagonist Daichi's parents to mysteriously vanish. X's corporeal form was also destroyed by the flare, turning him into nothing more than sentient computer data.
* Ultraman Z attacks. Sevengar and Windam return in this series as the team's mecha, and later a modified version of King Joe is added to the arsenal. This is actually lampshaded in one episode, which explains that Japan's long history with the trope in their media was what influenced the nation to use giant robots whereas everywhere else prefers enhanced vehicles as a kaiju weapon.
* Ultraman Zearth has the gold-feeding kaiju, Cotton-pope, who gains power by absorbing gold. Not content with draining resources from the earth's core, Cotton-pope made itself known to humans by sucking all the gold off the Kinkaku-ji Temple turning it into grey rust.
* Ultraman Zero. A two-faced, bird-reptile monster who breathes fire and can fly by

transforming into a miniature sun.
* Ultraman Zero by becoming his host and allow Zero to pull his martial arts skills while he's in control of said host's body.
* Ultraman Zero Gaiden: Killer the Beatstar, the titular Beatstar, who commands an entire army of Mecha-monsters, including numerous units of the aforementioned King Joe and Imperializers.
* Ultraman Zero, he gains Beyond after he loses the ability to use the Ultimate Zero form.
* Ultraman Zero: The Revenge of Belial, as well as altering his color scheme.
* Ultraman Zero: The Revenge of Belial: Belial's Empire mothership designed after his hand, the Malebrandes is a planet-sized base of operations that Belial uses to fabricate his armies in and literally take over worlds under his rule.
* Ultraman Zero: The Revenge of Belial Darclopses — to help him conquer planets by sending them off in dropships the size of small moons. Of course, for Zero and his friends, they're purely cannon fodder.
* Ultraman Z. He ends up becoming Zero's trainee and sidekick prior to the events of the series.
* Ultraman Z needs to consume metal to recharge its Raiden Destroy Cannon. Fittingly, the first place it shows up in after evading STORAGE happens to be right in the middle of a junkyard.
* Ultraman Z of the series, is a space entity that takes possession of various organisms to carry out his evil plans. His possessions are shown to be rather unsettling as his body language shows signs of twisting the bodies and actions of those possessed to suit his needs and his possessions are shown as rather painful.
* Ultramarines, a Dark Eldar pirate is raiding the vessel carrying the Space Marines.
* Ultramarines being sent to investigate a distress signal are all newly-promoted, and certainly weren't expecting an entire Chaos force. However, they are by no means lacking in combat experience — it takes decades of training just to become an Astartes scout, and even longer to be judged ready to become a full battle-brother.
* Ultramarines. Done with a building. The Tau blow up an Administratum tax bureau and the guardsmen cheer. Keep in mind these are people taught from birth that aliens are evil and want to sacrifice their babies to the Dark Gods.
* Ultramarines features an enormous urban tank battle between the Imperium of Man and the Tau Empire as one of its pivotal action sequences.
* Ultramarines, some Dark Eldar in search of more reliable immortality end up waking up the incarnation of Death itself.
* Ultramarines Space Marine would. A second test involves a duel with a full-fledged Space Marine, to see how the aspirant handles defeat.
* Ultramarines, the rescued Inquisitor limps into conference, clearly showing the heavy stim use that got him there.
* Ultramarines Uriel Ventris does this, screaming and crying in rage and horror.
* Ultramen, so they see humans as not only a reflection of themselves but as having the same immense potential to become as wise, benevolent, and valiant as they are. Thus, they battle alongside humanity against the evil aliens who despise Earthlings and the giant monsters that care nothing for them in order to help humans progress and ensure that humans don't become dependent on them.
* Ultramen Ultraman King and Ultraman Noa, who are both over 300 thousand years old, while the Father of Ultra (the oldest standard Ultra) is over 130 thousand.
* ultrametric geometry, all triangles have two sides of the same length, repeatedly moving a short distance doesn't result in moving a longer distance (no matter which direction you move), and every point inside a ball is its center.
* Ultra Paragon: Complete an Ultra Ending with Paragon of Order status. Becoming a Paragon of Order requires, among other things, that you
* Ultra Q Dark Fantasy: Succeeding the role of Professor Ichinotani is the quirky university teacher Kakunoshin Watarai, who shows Ichinotani's same encyclopedic knowledge on nearly all subjects, as well as a quirky fondness for British tea and biscuits.

* Ultra Q, is a fishy humanoid that looks sorta like a Japanese take on the Creature from the Black Lagoon.
* Ultra Q owned the suits, not the studio, so he was free to borrow them if suit-making costs needed to be cut.
* Ultra Q The Movie: Legend of the Stars is an alien who arrived on Earth several millenia ago, who ends up being unable to reawaken her spaceship and amazed with the beauty of nature, where she then started a cult to teach the then-primitive humans to preserve the environment. She was worshiped as a wrathful goddess for centuries to come until humans have advanced sufficiently and gradually forgot about her existence.
* Ultra Rare Trax bootleg compilations became somewhat historically important specifically because of its quality, showing that remastering, when done right, could produce high-quality bootleg and official releases that could surpass the original LP copies.
* ultra-realistic. The veterans either take them under their wings and try to teach them as much as possible to prep them for battle(Guarnere and Bull) or are bitterly hostile towards them (Cobb and Perconte [see page quote]); because depending on green recruits tends to get you killed. There's also the fear of getting to know them that comes out as hate.
* Ultra Series, a common Internal Reveal involves the attack team of the season discovering the secret identity of the Ultraman protecting Earth at the time, usually near the climax.
* Ultra Series: A few monsters/Ultras have designs very far removed from most things in the franchise aesthetically speaking.
* Ultra Series after catching a missile in its mouth, which Ultraman Jack detonates before the monster can spit it out.
* Ultra Series also count as they are an entity made out of the Minus Energy with a mind of its own and capable of free will planning.
* Ultra Series (a more literal example as he's a spaceship captain and a badass at that).
* Ultra Series, and an interesting case given the amount of humanlike alien races encountered by the Ultras over the course of the series! In the lore of the franchise, the Ultras started out looking very much like humans, but after their star died and the Plasma Spark was activated, their species was transformed into the first Ultra Warriors. That being said, most Ultras can 'become' humanlike again via a host or human form, which is vital when operating on planets such as Earth where the atmosphere blocks out the cosmic rays needed to stay at full power.
* Ultra Series) and even when they do talk, it's normally to each other and on occasion humans watching simply won't hear what they're saying.
* Ultra Series), and many of the movies. Other shows have their own continuity but many characters are shared from 'verse to 'verse and cross-overs in movies are pretty frequent.
* Ultra Series) and the main heroes, the Ultramen, are well... aliens.
* Ultra Series, and then afterwards it gets super-confusing from there.
* Ultra Series, an undead mishmash of body parts of desceased monsters, frankensteined and self-ressurected into one abomination, hell-bent on exacting revenge on the ultra brothers who slayed them in the past.
* Ultra Series a reason why most people think of the older shows when they think "Ultraman" (or even be unaware the franchise is still producing shows today) and the producers tend to bring back older monsters over newer ones.
* Ultra Series. Based on a narwhal, Gubira's drill is on the tip of its snout and is used to dig through earth, smash holes in solid steel, and make attempts to eviscerate Ultraman's face.
* Ultra Series being especially well-known. The trope has shown up a bit more in recent years, though it's still reasonably infrequently used.
* Ultra Series, carries one capable of killing lesser kaiju in only a few shots and doing devastating damage to Ultra heroes.
* Ultra Series, causing a chain of detonations that kills this monster).
* Ultra Series doesn't deserve to be killed, they'll often try to "defeat" it in a

different way. This usually involves taking it someplace else or fulfilling its needs.
* Ultra Series either, with many becoming as every bit as popular and iconic as Ultraman himself.
* Ultra Series for nothing, a select few series showcase moments aimed who are asking for adrenaline rush:
* Ultra Series for the first few episodes, and occasionally make a few musings related to an episode's themes. In some series, the protagonist will be the narrator, but only do the narration for the start and/or end of an episode.
* Ultra Series Giants of Light (or Dark Giants for the extremely rare evil Ultra). Given they're 50 meter tall humanoids with even more strength than that would imply, it's a fitting description.
* Ultra Series had comics produced for western audiences during its brief time on air.
* Ultra Series has been loved by Japanese kids and adults alike for over 50 years. Kids love watching the kaiju-Ultra fight scenes, sci-fi adventures, and cool gadgets and vehicles, while adults enjoy the action, occasional social commentary, good-looking actors, and nostalgic reappearances from past Ultras and memorable kaiju.
* Ultra Series has expanded a Multiverse and lore of the franchise on multiple instances:
* Ultra Series has multiple beings that have god in their title or appear god-like from a human perspective, but there are three Ultras that are this trope:
* Ultra Series have a few examples in it's early days, back when before censors started cranking down the violence levels in the show:
* Ultra Series) have been introduced to the Ultra Series as this sort of antagonist.
* Ultra Series have literally hundreds of different monsters, but not all of them are memorable.
* Ultra Series have numerous robot-based kaiju terrorizing Earth, for the Ultra-warriors to defeat every once in a while.
* Ultra Series have several examples. While most of the franchise's threat comes from alien invaders trying to conquer earth, every now and then there are peaceful, non-violent alien visitors who gets stuck on Earth, either fleeing from another much deadlier alien threat, or losing their home planets and being forced to take refuge in another planet.
* Ultra Series have these, and not just the cephalopod-based ones. They're often used in attempts to throttle the Ultras, which usually result in them getting ripped off.
* Ultra Series is sort of like this, though replace Togas with mantles, in the case of the Space Garrison. Much of the Land of Light appears to be constructed of gigantic emeralds and other gemstones, from the buildings to the very ground itself - spires are pretty much everywhere, too!
* Ultra Series is such a long-runner that many of the live actors and voice actors from the series' later installments were fans and avid viewers of previous installments when they were kids and often have a favorite Ultra hero or monster.
* Ultra Series is the first where it plays a significant role in both the hero and his monster foes.
* Ultra Series is waning in popularity, comes two movies from the franchise that relies heavily (as in, 80% of the oeverall runtime) on stock footage.
* Ultra Series it's implied on more than one occasion that the Earth itself is sentient.
* Ultra Series materials that they're a symbol of status and experience among Ultra warriors. However they still throw them off the moment they go into battle most likely because how impractical they are in combat scenes.
* Ultra Series often keep their Ultra identities secret for the majority of the series.
* Ultra Series, particularly if they were made after the 2010s, does this...
* Ultra Series plays more into this trope by giving its defense force, STORAGE,

several giant robots which they use to battle the monsters. The robots had previously appeared as autonomous mechanical beings in previous entries, but in this series they are piloted mecha.
* Ultra Series's influential involvement in the early days of both franchises.
* Ultra Series tends to have these happening when two Kaiju shows up and fight each other over territorial dispute, and the Ultra of the show trying to prevent them from doing further damage.
* Ultra Series that the show featured two regular Ultra Heroes, the eponymous Gaia and his rival Ultraman Agul.
* Ultra Series that will be battled by the series' title Ultra. And about half of the time, the Ultramen themselves are connected to or inspired the myth.
* Ultra Series, the eldest member of the original Ultra Brothers, Ultraman Zoffy, have star-shaped medals adorned all over his chest surrounding his Colour Timer.
* Ultra Series: The franchise has its share of monsters and aliens, and inevitably some of them ends up with rather... awkward designs.
* Ultra Series. The larger productions can feature dozens of costumed heroes and monsters duking it out or even performing a dance routine.
* Ultra Series. The mainly serve as just a point-of-view character for younger viewers and a little brother stand-in for the heroes.
* Ultra Series. Then again, the title heroes are, themselves, members of an alien race.
* Ultra Series, the Space Garrison that the titular heroes belong to fits the bill with the addition that all of the organization's members are armored giants that mostly deal with rampaging kaiju and their evil extraterrestrial masters.
* Ultra Series: The Ultras always have one of these. The faster it's flashing, the closer they are to running out of power.
* Ultra Series: The various Ultras similarly have fighting stances that help differentiate them. The original Ultraman, for example, hunches his body with his hands up and slightly open while Ultraseven takes more of a boxer's pose, with both hands balled up into fists at about chest height.
* Ultra Series, this trope doesn't come into play often, but gets subverted a few times.
* Ultra Series, this was given further meaning, as they were badly hurt and they couldn't be healed on Earth.
* Ultra Series transformation items often have abilities attached to them, and they're alien.
* Ultra Series uses this convention to name most of its alien species.
* Ultra Series, uually of the bloodsucking parasite variety for some reason.
* Ultra Series were full of this. The later series also tend to have a lot of it, depending on how seriously they take themselves.
* Ultra Series, where the hero can stay for as long as he likes. The Colour Timer (or Head Lamp in Seven's case) only flashes for them if they're in danger if dying, acting more like a video game warning for low HP instead.
* Ultra Series which is at least a head taller than the Ultra. And sometimes, they will be fighting against Dai-kaiju, monsters which absolutely towers over the various Ultramen.
* Ultra Series, which though not obscure is not quite as popular in Japan when compared to the rest). This alone is why Tsuburaya is doing their best to make their shows accessible in the western hemisphere, and it works.
* Ultra Series, while everything else looks as it was in the years the show was produced in.
* Ultra Series.While they have made many non-Ultraman shows over the years, the Ultra Series is their most iconic, popular, and profitable worldwide.
* Ultra Series: Whoever is the Ultra's human host/form — always a brave and compassionate young man who sees the best in people and desires to make the world a better place. The Ultras themselves certainly share many of the same sentiments.
* Ultra Series, who frequently heralds their arrival by backflipping a few times in the air before landing their foot on the monster's face.
* Ultra Series (who keeps coming back one way or another due to his resurrection

powers).
* Ultra Series, who looks an awful lot like a non-cyborg version of Gigan above (and keep in mind that Gigan debuted in 1972 while Dorako first appeared in 1966).
* Ultra Series with the Thai company that started the problem, Chaiyo Productions, over the international rights to the franchise.
* Ultra Series with Ultraman Belial (the father of the series' titular hero) detonating Earth with a Super-dimensional Eradication Bomb. As a result, Earth is not only destroyed but also becomes the epicenter of a giant wormhole that consumed the universe until Ultraman King reversed the damaged by merging with the entire universe.
* Ultraseven), Alien Kill is humorously referred to as "The Unidentified Saboteurs... from Space!" throughout the entirety of the episode.
* Ultraseven: Alien Wild is the only alien or monster in the series which is depicted with a full-body suit that doesn't covers the actor's face.
* Ultraseven: Anne does not appear in either episode 11 "Fly to the Mountain of Evil" or episode 13 "The Man from V3", while both Soga and Amagi are absent from episode 19 "Project Blue" (although they are mentioned).
* Ultraseven, as a reoccurring main character and one of Geed's closest friends.
* Ultraseven as slaves in exchange for surrender and the destruction of major world cities.
* Ultraseven: At the end of the series, Seven's many injuries sustained during all his fights leave him hurt enough that he has to leave Earth lest he dies, leaving his friends and life he made in his human form behind.
* Ultraseven chopped off by Ultraseven, they rebuild the creature's missing limbs and send it back out to battle Seven under the name Reconstructed Pandon.
* Ultraseven episode "the Green Terror", Ultra Garrison astronaut Captain Ishiguro was replaced by a plant alien who terrorized Earthlings before capturing them and replacing them with plant aliens disguised as humans. Ishiguro's impostor would become moody and secretive before transforming, go out on rampages, and later pretend to the wife and housekeeper that nothing was going on, even after they witnessed his true form a few times. It all culminated with "the couple" going on a vacation by train and his transformation into a kaijuu before her own eyes.
* Ultraseven Fan Club for a while. Yes, you read that correctly - Ultraseven is his own number one fan!
* Ultraseven had an alien named Wild who used a camera to steal the life forces of other beings, trapping their souls inside the film.
* Ultraseven. However, on the other side of the coin, some fans think that the Hawaiian dub wasn't all that good, and the Cinar dub was actually better.
* Ultraseven is an extraterrestrial parasite that feeds on blood, which it does by taking over people's bodies and turning them into vampire-like beings that sleep in the daytime and wake up at night in a trance to search for blood to drink.
* Ultraseven: King Joe and Crazygon are robotic monsters sent by alien invaders who gives Ultraseven a hard time to defeat in their respective episodes.
* Ultraseven: Miner and mountain climber Jiro Satsuma to Dan Moroboshi. In fact, Dan is actually just Ultraseven in the form of Jiro Satsuma, having taken his appearance to honor the human's selflessness.
* Ultraseven monster Gabura was able to survive as a floating head after Seven chopped it off with his Eye Slugger, catching the hero by surprise. Fortunately for Seven, it turned out that the spaceship of the aliens commanding Gabura needed to be destroyed to kill the monster permanently.
* Ultraseven movie, civilian Ultras could be seen in the Land of Light without color timers, signifying that they are not part of the Space Garrison.
* Ultraseven. That is, until he drew the attention of the Ultra Garrison.
* Ultraseven: The two-parter episode with Alien Guts starts with Ultraseven fighting a bird-looking kaiju called Daron, seen on a monitor screen, for less than a minute before the monster is killed off.
* Ultraseven, the very second Ultra Series. It's revealed in the final two episodes that the numerous beatings and injuries he's suffered throughout the show's run (including being blasted, stomped on, run over by a dinosaur-sized and shaped tank)

have left him in terrible shape. The show actually ends on the downer note that it's possible he may die of his injuries on his way back home (and one of the OVA series makes a plot point of mentioning his inert body was found floating in space, meaning he didn't even make it out of the solar system. He got better.)
* Ultraseven, this became the way he could weaken and even physically move kaijuu so that Leo could finish them off.
* Ultraseven X as well. The series took place in a world where all forms of war and terrorism had long ended, bringing forth to a dystopian future. An amnesiac man named Jin awakened and was entrusted with missions given by DEUS to fight against aliens that had slipped into the human society, joining forces with agents K and S. During that moment, he was given a pair of glasses by Elea Saeki to transform into the red giant. While fighting to preserve the safety of the city, Jin becomes closer to discover his memories.
* ULTRA-slow motion sequence (the likes of which the series had never even done before). The sequence starts with Blossom yelling "NOOOOOOOOO! BUTTERCUP!"
* Ultrasonic as a pandemonium. The polar bear driving him objects to this saying that he has pandas in his family. Nick tells him to pick up a dictionary.
* Ultrasonic, during a battle with an akuma called the Chemist. Ladybug manages to separate her from her weapon, a possessed beaker, and she throws her yo-yo at it intending to break it. At the same time, Chat Noir chases after the beaker and would have been able to grab it in time if the yo-yo hadn't hit his hand and caused him to knock it away. As such, the Chemist gets the beaker back and the fight gets drawn out.
* Ultra Street Fighter II, who in this game are palette swaps of the standard Ryu and Ken.
* Ultra Street Fighter IV even more by making Ken a charge motion character.
* Ultra subgame was added via an online update, where it had "Parallel" bosses.
* Ultra Sun and Moon, where it's given Poison Jab (super-effective against Fairy-types), a Roseli Berry (which lessens the power of super-effective fairy attacks), and is fought before receiving Fairium Z rather than after, and its ally Scizor is much higher leveled.
* Ultra Sun and Ultra Moon continues the tradition with its two unique minigames.
* Ultra Sun, it's implied that, like other Ultra Beasts, the ones the player encounters is just two of a species.
* Ultra Super Death Gore Fest Chainsawer 3000 and was universally panned.
* Ultra Super Death Gore Fest Chainsawer 3000 games—do sort of fit the stereotype, but they are also largely parodies of this trope and only came about because of it. That's not to say there weren't many games that fit the full stereotype released in the 90s, and even a few in the 80s, but they were generally far from mainstream.
* Ultra Super Death Gore Fest Chainsawer 3000 (thematically "bad" video games)
* Ultra Super Death Gore Fest Chainsawer 3000, video games were subjected to this. In the arcade days, they were blamed for wasting money and providing a place for unsupervised minors to hang out; with the early consoles came accusations of laziness, eyestrain, and illiteracy. Which is rather amusing, considering that some studies have shown that video games may actually improve reaction time and signal detection.
* Ultratech has Gatling versions of just about every firearms type it covers which are at the low end of the high power weapons but have four times the rate of fire and about twice as many shots.
* Ultraterrestrials as a result, while others (such as the aforementioned North Sentinelese) are violently aggressive toward outsiders. It's of course unknown precisely what they think about them, but helicopters are met with arrows whenever they draw near.
* Ultraterrestrials: A species that came from Earth, left, and now want to come back.
* Ultraterrestrials who seeded Earth with their DNA 60 million years ago.
* Ultra.Trance series feature a different bikini-clad girl on the cover.
* Ultraverse for so long that the "world of light and air" was considered a myth.

* Ultraverse when the sales are low that the company just killed them off literally in the final issue of the protectors.
* Ultraviolents even captured a fleeing dropship in secret and forced the mercenaries who had been on it to fight in a hidden gladiatorial arena they'd made.
* Ultraviolet a militant Catholic priest, but disdainfully remarks that "the Church doesn't like to talk about evil these days", implying that he's lost his standing because of his views.
* Ultraviolet has a scene start with a closed door, gunshots, sword sounds, screams, mayhem...and then Violet comes through the door alone.
* Ultraviolet heroine, saying she was human once, too. She dismisses it, saying that humans were who made her that way and then wanted her dead, so she owes them no loyalty.
* Ultraviolet keep their existence a secret so that human society won't wipe them out. The secret government agency that seeks to eradicate them also keeps it a secret to avoid creating a mass panic.
* Ultraviolet never used the word vampire. Instead, the government called them "Code 5" (that is, V). Also 'leeches' as a slang term.
* Ultraviolet, the confrontation at the climax of the first episode takes place in an empty playground at night.
* Ultraviolet, the heroine uses extradimensional space/folding technology to almost achieve enuff dakka.
* Ultraviolet, the heroine weeps over a dead boy, causing him to come back to life — because her tears infected him with vampirism.
* Ultraviolet. The main protagonist Mike is a policeman who discovers that vampires exist and is therefore recruited into a covert government agency to fight them.
* Ultraviolet (unrelated to the film), the vampire hunters use sights that pretty much amount to video cameras strapped to their guns in order to tell vampire from non-vampire.
* Ultraviolet. Violet herself will use either one depending on the context.
* Ultraviolet was engineered, and the scientist responsible goes on to take over the world using the infected as a bogeyman.
* Ultravox had just one entry on the Billboard Hot 100, and it was not "Dancing with Tears in My Eyes", which only bubbled under at #108, or "Vienna", which didn't chart at all in the US. Instead, it was the forgotten "Reap The Wild Wind"(#71). Averted by the former two songs in their native UK, where they were both Top 10 hits.
* Ultravox in 1979, he was replaced by Midge Ure, whose singing voice was uncannily similar to Foxx's, but not to the point of being identical. When Ultravox disbanded in 1988 and returned in 1992, it received an almost completely different lineup save for the inclusion of keyboardist Billy Currie; this lineup was then axed and replaced (again, save for Currie) in 1994 and lasted until the band's second breakup in 1996. The lead vocalist in the second 90's lineup, Sam Blue, displayed a singing voice that sounded like an amalgamation of Foxx and Ure's.
* Ultravox quality-wise. Unfortunately, this was the last album the band released before dissolving for good— a rather sour note to go out on.
* Ultravox song "Dancing with Tears in My Eyes". The video's protagonist is a worker at a nuclear power plant who, when the reactor goes into meltdown with no hope of stopping the explosion, hurries home to spend one last romantic evening with his wife. The video ends with the couple in bed; the last thing we see is a shot of their television (bearing an onscreen message warning of the impending disaster) which then goes blank as a blinding light floods the room.
* Ultra Warrior, as despite valiant attempts to avoid showing the actors' heads, the viewer can still notice the man who's supposed to be Dack Rambo's character has completely different hair.
* "Ultraworld". This terrifying fate is represented by the victim seeing a hallucination of a disco glitter ball.
* Ultron and Avengers enemy, attempts to upload the entire mind of his 'mother', the Wasp, into a female bot that he's created (aptly named Jocasta) for companionship, having brainwashed his "father"/her husband into helping him do it.

While the Avengers rescue her before the process could finish (and kill her), Jocasta ends up with enough of Janet's personality to later turn on him and join the Avengers.
* Ultron at the existence of nice!Ultron, killing him and vowing that there would never, ever be another Ultron like him. Pity, he was actually a really nice guy.
* Ultron, a well-known member of the Avengers) but he proved to be far more popular as well.
* Ultron believes that superheroes do more harm than good to the broader cultural landscape and must be eliminated.
* Ultron does one as Vision blasts him out of the church in the climax, holding one hand in front of him as he struggles against a combination attack by Vision, Thor and Iron Man.
* Ultron himself is guilty of this at several points, most notably when he keeps
* Ultron in full effect). His unique creations have a tendency to rebel against him and become superheroes.
* Ultron line is infamous among toy collectors for looking nothing like any iteration of the character featured in the comics, complete with a weird, rabbit-like face.
* Ultron. Not helping is that he can't change his expressions, and his head is designed to look like an ant. Even worse, before he turns evil, he speaks in a much more emotional and upbeat fashion, meaning this is most likely intentional on his part.
* Ultron's body was originally built of the indestructible metal adamantium. Since adamantium is more associated with
* Ultron. Seriously, if you've got an army of drones and you can hide inside any single one, then why not let two slip away with one acting as a decoy? The fact that the film does not outright show Vision destroying him has only added fuel to this fire.
* Ultron. Then proceeds to align their corpses to resemble his face. Who says 10 foot omnicidal killer robots have no style?
* Ultron. (There have been a few hints that Stark and Bruce Banner weren't the only ones to have worked on the AI.)
* Ultron this and proceeds to successfully do the same to Sigma, overwriting him completely and killing him.
* Ultron took things a step further by revealing that the Human Torch's body even contained the same type of solar gem that would later adorn the Vision's forehead.
* Ultron turned into an evil robot, along with uncannily puppet-like exaggerated movements and even singing a Disney song.
* Ultron. Ultron unlike his nicer robotic brethren is disgusted by humanity and believes he is doing the right thing by blowing them all to hell, he also has no qualms destroying fellow artificial intelligence as he wrecked poor Jarvis upon awaking and rips apart his own old bodies to make for better ones with no regard for preservation.
* Ultron Unlimited: Played for laughs. Ultron is watching the activities of the Avengers... and, in turn, Alkhema is watching Ultron.
* Ultron with added pain. It doesn't need to hurt, Ultron just likes hurting people.
* Ultros. He attempts to grope Terra and flirts with Relm, to the point where she's able to save the party from him by charming him into letting her paint his portrait. Ultros's later appearances
* Ulver IS this trope - They began as a mix of atmospheric black metal and folk metal and then went dark folk and then a harsher, more lo-fi black metal. On their 4th album they became practically industrial metal and on their 5th they became a mix of trip hop, ambient and breakcore. They now have gone towards a general experimental rock style.
* Ulysses 31 attack is doomed to fail when the shield is up, but can be devastating if the undermanned ship is taken by surprise without time to erect it.
* Ulysses 31 may not have necessarily been a Messianic figure, but this one certainly is.

* Ulysses 31: The dead denizens of Hades's kingdom are floating above the ground. For added creepy, they also always move backward, their back facing the mortals they're chasing.
* Ulysses 31, the spacesuit sometimes worn by the titular character's son, Telemachus, is blue. Yumi, a young alien girl, sometimes wears a pink spacesuit.
* Ulysses 31 when his usual shield was stolen) which he wears on one wrist like a watch.
* Ulysses, a man approaches Leopold Bloom, asking to read the report on the day's horseraces. Bloom, not wanting to be inconvenienced, tells the man to keep it, as he was just going 'to throw it away'. The man walks away, inspired. The winning horse of the day winds up being the horse, Throwaway.
* Ulysses because James Joyce personally explained it to everyone who wasn't running away while covering their ears.
* Ulysses, being a counterpart to the Courier, does a great many things on his own in his service to Ceasar's Legion as the best of his Frumentarii. Without giving away too much of the plot, lets just say that a big chunk of the plot elements are the Courier
* Ulysses can also be seen as one, developing an obsession with symbols and patterns and hidden meanings, and kicking off much of the plot simply because he can't accept that the destruction of his home in The Divide was an unfortunate accident and nothing more.
* Ulysses despite being written a hundred years ago. Other characters assume that Leopold Bloom is this when he doesn’t pay for drinks, but he’s shown to in reality be generous.
* Ulysses Dies at Dawn is a cyberpunk noir story that draws its characters from Greek mythology.
* Ulysses ends with two sentences in its final chapter. The first one is 11,281 words long and the second is 12,931 words long.
* Ulysses has a twofer. Before the events of the story, Leopold Bloom's deceased father Rudolf Virag (a Jewish immigrant from Hungary) married a Protestant Irish woman shortly after emigrating to Dublin. Leopold himself—who's non-observant, but often ostracized for his Jewish ancestry—married Molly Bloom, who grew up in Gibraltar and apparently has some Spanish ancestry.
* Ulysses has Bloom and Dedalus travel through Dublin's Nighttown and stop off in a brothel. It's one of the most surreal sections of the book and has degrees of all three versions, but tends towards pitiful and hostile.
* Ulysses is constantly blamed for the amount of mind-boggling STUPID his crew members wreak. They are always eager to disobey the orders of the superior forces, and when he tries to apologize for them, he is usually held responsible.
* Ulysses: Jeanne d'Arc and the Alchemist Knights above, is no surprise.
* Ulysses Klaw and his father, Fritz Klaue. Both men are obsessed with vibranium, both tried (unsuccessfully) to overthrow Wakanda, and both lost a hand only to have it replaced with a high-tech prosthesis.
* Ulysses Klaw (who's made of solidified sound) learned this to his horror after tricking her into helping him escape confinement at Project Pegasus (where she'd been blackmailed into going by the government). Using his sonic powers on her resulted in her powers getting so greedy for more that they completely consumed him.
* Ulysses, Leopold Bloom has a habit of kissing his wife's bottom as a greeting.
* Ulysses Moore and in the novels. This is part of the author's "playing with reality" style.
* Ulysses on the back. After Lonesome Road, Ulysses gives the Courier one of his own called "Courier's Duster" which also has a flag on the back, the precise flag depending on whatever faction you choose to rule the Mojave. Aligning with the NCR gives you a 2-headed bear, Legion gives you a Bull, House gives you an Old World USA flag, and Independent gives you the symbol for Vault 21, representing New Vegas.
* Ulysses S. Grant almost never bothered with his own uniform, to the point that he only got into the Appomattox Court House surrender ceremony in his dirty fatigues

and splattered with mud because the Confederates knew him by sight. In contrast Robert E. Lee was fully dressed in his best uniform for the surrender, with one observer commenting that if you hadn't known better you'd have thought Lee had won. Lee had been forced to abandon his baggage train earlier that week and he naturally chose to change into the best uniform he had left before ditching all of the others. Lee played into this trope as well by typically wearing the insignia and uniform of a colonel, despite his rank in the Confederate army. Among modern infantrymen, many would think Grant made the right choice - his mud-spattered uniform showed that he was "in the shit," and not just a desk officer who had the time to get clean.
* Ulysses S. Grant completed his autobiography five days before succumbing to throat cancer in 1885. His notes concerning the progress of his cancer were reportedly required reading in medical schools for many years.
* Ulysses S. Grant due to an error made during his entry to West Point. Being called "US Grant" didn't hurt him any as a Presidential candidate.
* Ulysses S. Grant. "Grant stood by me when I was crazy, and I stood by him when he was drunk. Now, we stand by each other always." Grant entrusted Sherman to handle the Western theater of the Civil War while Grant assumed command in the East to fight Lee. It worked. Philip Sheridan, a fiery and aggressive Union commander and cavalryman, also played this role for Grant in the East in Sherman's absence.
* Ulysses S. Grant, in order to bring a faster victory. The result was the sacking of McClellan and (eventually) the appointment of Grant in his place as commanding general of the Army. Grant wasn't callous to his losses—in fact, it often horrified him—but understood strategically that this was the only viable way to win, whereas McClellan was too timid for his own good, unable to seize the initiative for fear of losses, thereby making "mistakes of kindness" of the exact sort warned against by Clausewitz.
* Ulysses S. Grant knew he was dying of throat cancer so he put all his energy into writing his memoirs, in order to provide for his family after he was gone. He died two days after completion.
* Ulysses S. Grant to Ford's Theatre the night he was shot, but bowed out at the last minute. Grant believed that he would have been able to stop John Wilkes Booth had he been there. At the funeral Grant wept profusely, and later stated unequivocally that Lincoln was the greatest man he'd ever known.
* Ulysses S. Grant. While President, Grant was stopped for speeding. (Yes, in a horse-drawn carriage. The man loved his horses.) The cop who flagged Grant over immediately apologized after he realized whom he was talking to and offered to let the whole thing go. The President waved this off, replying "Officer, do your duty."
* Ulysses speaks similarly because he wants to trick people into believing that he's a classy, trustworthy gentleman.
* Ulysses Sweet: Maniac For Hire and has to plump for the mechanical option frequently. In one story, he's fully biological again, only to shoot himself in the head to destroy a court-mandated control chip that was annoying him and winds up as a cyborg again.
* Ulysses that it was Bobby Kennedy's favorite poem, his campaign manager says, "I'm sorry, who?"
* Ulysses X. Lugman, aka the Slug, has been known to asphyxiate a man in the folds of his flesh when he wants to kill someone personally.
* Umaga. Debuted in the 1990s, made his WWE TV debut in 2002. Died in December 2009.
* Uma Lightning's variant deserves credit for looking like it's actually trying to glare someone to death.
* umami tasting food, got a reputation for causing various (if never quite scientifically verifiable) health problems, specifically being linked with Chinese Restaurants, even though it could be found in just about every savory packaged food on the market. Nowadays, it's usually listed as yeast extract, hydrolyzed protein, glutamic acid, and sodium or calcium caseinate.
* Uma Musume. All of Team Spica have this reaction when they come across a pronounced curve during their training race, and they realize they're running too

fast to stop. They keep running until they land on the ocean.
* Uma Musume, and is hinted to have romantic feelings for Spica's trainer.
* Uma Musume are champion athletes that double as Idols. One of the prizes for winning a race is getting to be the lead in a Winning Concert, performed to thank the fans for their support. Team Spica runs into trouble early on, when they win their races....and then realize they've neglected to practice for their concerts. (Naturally, the franchise organizes the actresses into idol units to crank out tie-in albums.)
* Uma Musume has Team Spica get excited about the nice place they're staying...only for the bus to move and reveal the crappy place where they're really staying.
* Umamusume: Junko Hosoe, a real life race commentator, comments on horsegirl races as herself. In one episode, she is joined by Yutaka Take, the famous jockey who rode many of the horses turned into girls by this anime.
* Uma Musume with completely fictional characters do not have this rule.
* Umaru hides her identity for a game tournament by pulling on a domino mask and tucking her long hair into a cap, becoming "U.M.R." It convinces Sylphin, who recruits her to... help her beat Umaru.
* Uma Thurman, and Dorothy Hamill. He wanted to include Isabella Rosselini, but the guys convinced him that she's too international, so his odds would be very low. Too bad Rosselini did appear in their favourite coffee place; however, Rachel allowed him to hit on her despite being out of the list. It doesn't go well.
* Uma Thurman briefly wears a catsuit/motorcycle racer suit hybrid in
* Uma Thurman had upon waking up from her coma, so shocked that she sat straight up in bed, emphasized by the freeze-frame.
* Uma Thurman is actually a brunette, but has her hair bleached in most of her roles.
* Uma Thurman was considered for Hunny Bunny before being cast as Mia Wallace.
* Umbara is perpetually shrouded in darkness, which can lower visibility. The known fauna on the planet includes
* Umbara's surface is blanketed by strange plants with leafless, twisting stems dotted with
* Umber hulks are towering beetle monsters whose hulking build and powerful arms are backed up by a magical confusion gaze.
* Umber hulks in general are really bad about this. Due to their ability to burrow through rock easily and their tremorsense, along with their deceptive intelligence, most encounters with umber hulks begin with the creature bursting through a nearby wall without warning.
* Umberto D: Apparently the boarding house is gradually becoming this. Umberto comes home to find that Antonia is renting out his room at 1,000 lira per hour to people who want a place for sex.
* Umberto Eco, about scholars who spend their lives learning things from books and either go crazy or despair (or both) at trying to reconcile all these different grand narratives and the terrible things they lead other people to do.
* Umberto Eco Abyssinia is liberated from the Italian fascists long before the story ends. And at the end, the oh so secret message delivered essentially boils down to: "Hold out!"
* Umberto Eco parodied this in a short story where a caveman professor invents the handaxe, but after realizing that the leaders want to use it against another tribe, says that it should be destroyed.
* Umberto Eco (set in the Middle Ages) the main characters go on a quest to find the kingdom.
* Umberto Eco thought that William Weaver's English translations of his novels were better than the originals.
* Umberto Eco, whose surname means "echo" in Italian and Spanish. He writes of how tired he is of everyone making jokes about how he "always answers back", and journalists writing articles with titles such as "Eco's echo", "A book with echos", etc.
* Umberto II, the last King of Italy, opposed his son's Vittorio Emanuele's marriage to Marina Doria. Vittorio Emanuele eventually went on and married her

anyway without paternal permission... And, by the House of Savoy's bylaws, would have excluded himself from the succession had Italy still been an kingdom.
* "Umbert the Unborn", a comic about an unborn child, reflects the Christian, anti-abortion views of its creator, Gary Cangemi.
* Umbra: real Latin name that has the same meaning in-universe, darkest part of a shadow. Actually a deceptive name, since he has light-powers
* Umbra: The Velvet Shadow, Erebus is described in these terms. Garou who wish to be rid of extreme Wyrm taint are submerged in the silver lake of Erebus, where the realm's guardians compel them to come to terms with their sins.
* Umbrella Academy has the Handler, who make some very uncomfortable remarks at Number Five, who while mentally fifty eight, is physically thirteen.
* "Umbrella" by urban explorers because of its shape that closely resembles a Biohazard symbol when seen from above.
* Umbrella Corporation is a particularly egregious example, what with the whole G-virus thing.
* Umbrella had good publicity until it was involved in Raccoon's destruction. Not only does the US government tear up all contracts with the company, their public stocks take a nosedive. In the movies, rather than the U.S. government nuking Raccoon City, it was Umbrella itself who did so, and they got off completely scot-free while making the survivors
* Umbrella of Togetherness in the rain, he laments that he wishes time would stop. Sakura wonders if he's thinking the same thing (that he doesn't want to stop walking with her). It turns out Nozaki doesn't want time to stop because he's dreading coming home to wet laundry.
* Umbrella of Togetherness moment where two characters share an umbrella with each other.
* Umbrella of Togetherness. Moreover, it's raining on their wedding day.
* Umbrella of Togetherness trope), the lyrics strongly imply that Ranma and Akane are bound together by the Red String of Fate, even though it is currently, as Ranma puts it, "loose."
* umbrella use... the depressing implication being that she thinks people would appreciate her more if she was dead.
* Umbreon resembles some sort of feline or canine. However, it is actually partially based on a black cat, and, oddly enough, a rabbit. This is because Umbreon is supposed to be a
* Umbridge has a crush on Dumbledore, who's gay. Dumbledore also seems to have a crush on Snape.
* Umbridge is an even more noticeable case, as her appearance is constantly described as toadlike in the books, and the illustrations bear it out.
* Umbridge is perhaps the most universally despised character in the series. Her authoritarianism, child abuse, and
* Umbridge's High Inquisitor job was sort of an HR-type position. However, she abused her power and was even crueler than Snape.
* Umbridge", which carves whatever the user writes into their hand as they write it.
* Umbridge, whose shrill, girlish voice is at odds with her toadlike appearance.
* Umeboshi, is acidic enough for its juices to corrode the lids of aluminum bento boxes that were popular before WWII.
* Umehito Nekozawa and his younger sister Kirimi. He's dark, brooding and extremely photosensitive, while she's cheerful, outgoing, and hates dark places.
* Umiak do not employ fighters, since they evolved on low-gravity worlds and can't handle 30+ g's of acceleration; inertial dampeners are too big for fighters.
* Umiak — even with liquid breathing mediums for cushioning, they simply can't handle the g-forces.
* Umibōzu that attacks any sailor who dares to trespass its waters. It usually resembles the shaved head of a Buddhist monk, and some portrayals depict it as a sentient mound of water.
* Umibozu (a kind of sea monster) was supposed to have the codename 'Falcon', but Ryo nicknamed him Umibozu and it supplanted the nickname. As retaliation, Ryo was

nicknamed 'The Stallion of Shinjuku' (it didn't stuck, and Ryo has a better sense of humor than Umi).
* Umibozu had taught the girl Miki to fight when she was a child, and protected her for a while. When she's grown up she reappears, wanting to marry him. Umibozu doesn't, but they end up running a restaurant together; exactly
* Umibozu is partly immune: due his sheer size, he can easily shrug off being shot with .38 Special bullets.
* Umi-Bozu, it's the Medicine Seller's turn... and we're treated to a scene of him dissolving into nothingness. Outside of staring at his hands as they disappear, he has no reaction, but quietly closes his eyes and waits for it to finish.
* Umibozu, operate outside the military's chain of command, and do not officially exist.
* umibozu) sea creature with vaguely human characteristics reported by Japanese whalers. It's probably an urban myth. Hopefully.
* "Um, I don't think we could all fit in there... and none of us can breathe mustard anyway."
* Umihara Kawase. (Natsume previously canceled a localization of the PSP port of the second game under the same title.)
* Umihara Kawase, the main character's rubber fishing line works like this.
* Umihara Kawase, would he see a real ending? He fails this (it is considered a draw), the staff eventually beats the route, only to find out the game really doesn't have an ending at all.
* Umi Monogatari, as the formerly tranquil island and ocean begin to be corrupted.
* Umi Monogatari, despite numerous warnings of death should specific actions be taken, no one dies at the end of the series.
* Umi Monogatari got a bonus 13th episode when it was released on DVD, in which Marin and Kanon have a near-encounter after the series.
* Umi Monogatari has Kojima, who never gets much more background than that Kanon likes him.
* Umi Monogatari has no real form, only seen as a cloud of red sparkles.
* Umi Monogatari, Kanon has an "evil aura" that everyone can see and comment on. It tends to flare up when she's nervous.
* Umi Monogatari: Kanon's perky, lively mom, Miyako, who acts much younger than her age and is always full of energy.
* Umi Monogatari, Marin and Kanon take up the mantle of the previous priestesses.
* Umi Monogatari really is allows for a conclusion that's more true to life than most shows of this nature.
* Umi Monogatari, Sedna corrupts the islanders, sea creatures, and Urin to suit her needs.
* Umi Monogatari, Sedna's influence is signified by too-bright or red eyes.
* Umi Monogatari, the Elder Turtle has shades of this; not only is he wrong about which priestess will fall into darkness, he doesn't comprehend what Sedna truly is and gives wrong information as a result.
* Umi Monogatari, the Elder Turtle is completely wrong about a lot of things.
* Umi Monogatari, the Elder Turtle is often wary of Kanon and is convinced she will fall into darkness if not watched. He's wrong. Marin does.
* Umi Monogatari, the Elder Turtle thinks Marin is this and strives to protect her from the darkness. Instead, she falls into it.
* Umi Monogatari, the first few episodes have Marin and Kanon battling creatures that Sedna summons. This pattern gets abandoned halfway through the series as it focuses on more personal battles.
* Umi Monogatari, those corrupted by Sedna have these, particularly on their legs, arms, and face.
* Umi Monogatari, Urin suffers this as Marin talks more to Kanon, which causes a rift between them.
* Umineko: When They Cry: A deconstruction, along with many other tropes.
* Umineko: When They Cry. After she's broken, Bernkastel keeps playing with her.
* Umineko: When They Cry, allowing for a murderer to exist among a population of 17 fully recognized people.

* Umineko: When They Cry Also appears in different variations in both anime and game openings.
* Umineko: When They Cry also has a manga, anime, and a Playstation 3 remake.
* Umineko: When They Cry also laugh at it. This time it's used more to underline her pathetic, bullying behavior.
* Umineko: When They Cry a mystery or a fantasy? Neither! It's more of a fantastical romantic mystery with a tinge of horror and Jungian-psychological elements.
* Umineko: When They Cry and one-tenth the social graces of Sherlock Holmes. So convinced is she that crimes will happen wherever she goes, she actually begins her investigation into the murder before anybody has been murdered. In EP7, however, Willard H. Wright is a truly great detective.
* Umineko: When They Cry and probably not meant to be taken as serious canon.
* Umineko: When They Cry, and then indicates that he seems to know he might die. Which he does.
* Umineko: When They Cry: Ange adopts this stance when she first appears to help Battler in the fourth game. She wants Battler to stay on his guard, think his moves through carefully, and trust no one blindly, so she insists that he should even treat Ange's own words with suspicion.
* Umineko: When They Cry, Ange mentions briefly that Amakusa will get arrested if he's ever caught back in France.
* Umineko: When They Cry anime. Virgillia explains that the Japanese fire ceremony, which today has been explained by science, was once seen as magic because it was like that to people at the time.
* Umineko: When They Cry as she repeatedly gets revenge on her abusive mother.
* Umineko: When They Cry, as we have in one scene the last of the survivors about to meet their fate, when it suddenly cuts to a tea party with no explanation how they got there. Then it tells us that that was the end of the Episode and everyone was in Purgatory. It happens again in a later Episode but with different characters. Doesn't help that there's no reveal to who's the culprit in any of these scenes.
* Umineko: When They Cry Battler several times makes passes at Maria and promises to make good on them when she's old enough. How serious he was is a subject to debate, but Maria gladly and without hesitation takes his offers as sincere.
* Umineko: When They Cry: Beatrice. And Bernkastel. And Lambdadelta. And all the other witches for that matter.
* Umineko: When They Cry: Beatrice can summon an infinite number of demon goat butlers.
* Umineko: When They Cry because Featherine hadn't decided what to write in yet.
* Umineko: When They Cry, Bern and Lambda get a sprinkling of these when they show up in the opening.
* Umineko: When They Cry, but any scenes that aren't narrated by Battler are narrated by her, and in EP5 it's confirmed that in the first four arcs the only scenes that can be trusted are ones from Battler's point of view.
* Umineko: When They Cry by a few characters who say they make her look very childish.
* Umineko: When They Cry by having the words literally manifest in the air when a supernatural creature speaks. It works... ok?
* Umineko: When They Cry by mentioning that they've been limited in power for the duration of the story.
* Umineko: When They Cry can fall into the trope on occasion, mostly because of the fact that every single episode has 2 epilogues after the conclusion of the main story, and the epilogues can go for a couple of hours sometimes. Even the characters, dangling in post-denouement, express how ready they are to just get it over with. Even Beatrice gets sick of being "Endless". If boredom is fatal to witches, imagine what it'll do to audiences.
* Umineko: When They Cry despite being the oldest in the family. Everyone accepts the argument because it seems in character.
* Umineko: When They Cry do this constantly − it usually goes like this:

* Umineko: When They Cry, during a few of the murders, Nanjo's alibi is that he was asleep at the time.
* Umineko: When They Cry ends this way, with Will and Lion facing an army of Bernkastel's demonic cats about to tear them apart.
* Umineko: When They Cry EP 4. When the background music "Monochrome Clock" starts playing, Ange complains about it, prompting Amakusa to turn off the radio.
* Umineko: When They Cry, Erika of all people swoops in to save Ange from the Goats. Lambdadelta also risks herself to save Battler and Ange from Bernkastel and Featherine.
* Umineko: When They Cry, Erika's whole life has become a series of these, from the improbable skill set she's acquired to her very arrival in the game.
* Umineko: When They Cry even points it out, saying that "rather than being good with make-up, she had a mystique around her, as if she was an immortal who didn't age".
* Umineko: When They Cry, everything in the preceding novel was as well. And it just keeps getting more and more meta from there.
* Umineko: When They Cry fans started depicting Battler wearing a cape similar to Kinzo's. When Episode 6 rolled around, the creator made the fan design official.
* Umineko: When They Cry for why they don't use magic openly is that humans have become resistant to it as they acquired an 'anti-magic toxin'. Thus, in large groups it becomes impossible to use magic on them. The mystery side argues, of course, that magic doesn't exist in the first place. It is largely ambiguous as to who is correct.
* Umineko: When They Cry gives us the four Chiester sisters. Their first appearance is for them to shoot down two people running away from them with a single arrow. After the people have turned at least one corner. And that's their most basic shot. They go on to do things like firing an arrow from the other side of a forest, through an open window and then through a keyhole into a locked room to kill two people.
* Umineko: When They Cry: Halloween is mentioned in one story arc, where Maria loves Halloween because of its association with witches. She wants to go trick or treating despite the fact that it is not a practice done in Japan.
* Umineko: When They Cry has a clock that appears in between scenes that serves both this purpose and allowing the audience to figure out the time orientation of different scenes (sometimes, the clock goes a tiny bit backwards).
* Umineko: When They Cry has a few as well. The ones that stick out most are "worldend solo" and "Wingless."
* Umineko: When They Cry has Ange Ushiromiya purposely jump down from the third floor onto one, and end up almost breaking her back, but escaping.
* Umineko: When They Cry has Beatrice in Episode 7. Of course, Bernkastel finds a way to ruin it...
* Umineko: When They Cry has the Chiester Sisters, very cute and innocent-looking rabbit girls… who can detect you, lock you on and shoot you dead with absolute precision from a kilometer away. Their arrows are homing and armor-piercing, so hiding is useless.
* Umineko: When They Cry has the option of doing this in the middle of an ongoing game. However, creating logical inconsistencies will have severe consequences, and cause an automatic loss.
* Umineko: When They Cry has this as a major part of the basic premise, with the adults squabbling over Kinzo's inheritance.
* Umineko: When They Cry has Tohya (aka Ikuko) Hachijō, a female mystery writer who lives alone in a small mansion, barely ever meets anyone, is a jerk to the few people she meets, and feels little more than contempt for most of her fans. She actually writes many of her works under various pen names to give herself an aura of mystery and spent a good chunk of her life writing novels that she didn't let anyone read.
* Umineko: When They Cry), he also wants to think the best of everyone (a trait that's shown more in the original novel and manga than in the anime) and so constantly winds up jumping up in the middle of fights to explain a scenario in

which person X might not be the culprit.
* Umineko: When They Cry. His half-sister Ange is an aversion of this trope.
* Umineko: When They Cry home", and constantly wants more of pretty much everything, whether it's knowledge, affection, or material things.
* Umineko: When They Cry how being trapped on a remote island in a storm feels like an old-fashioned murder mystery — right before the corpses start stacking up.
* Umineko: When They Cry. However, the manga adaptation reveals clear answers to most of these questions.
* Umineko: When They Cry. However, the shiny aspects definitely win out for the overall production.
* Umineko: When They Cry. However, the Stakes Valentine's Day side story reveals that she's actually the least competent of her sisters, and her TIPS reveal that she takes great pleasure in surrendering.
* Umineko: When They Cry, interpreting her mother's violent mood swings as being possessed by a "Black Witch".
* Umineko: When They Cry invokes this effect in some of the background art of locations within the novel's PS3 port, notably the hidden mansion, Kuwadorian, the Ushiromiya estate and rose garden and the Golden Land, amongst others.
* Umineko: When They Cry is enough of an excuse to break out all the spectacular spells and summons in the Umineko world.
* Umineko: When They Cry is the third message bottle from Rokkenjima that was never found.
* Umineko: When They Cry. It actually comes straight from the visual novel, which would use the effect whenever there was about to be a time lapse in the narration.
* Umineko: When They Cry it is said to happen that every time a Voyager enters a kakera.
* Umineko: When They Cry. It is the first sight for visitors to the Ushiromiya mansion, and gives Beatrice a dominating presence both in and out universe. Over the course of the stories, many deaths take place in front of it.
* Umineko: When They Cry, it progressively becomes very clear (especially from EP3) that Beatrice is just as much the main character of the story as Battler is. The entire mystery is about understanding who she is, where she comes from and what her motivations are. If we add the 1998 part, Ange, who desperately tries to find the truth of what happened on Rokkenjima, would be the tritagonist.
* Umineko: When They Cry (it's a complicated process, don't ask). Ultimately subverted by the end of the series, though, since it turns out that while they can be revived as pieces for each new game, in the real world nearly everyone who was on the island is dead and will remain so.
* Umineko: When They Cry. It's been described as "a wardrobe malfunction waiting to happen."
* Umineko: When They Cry. It shows both how motherly and protective Natsuhi really is and Battler's surprisingly tender and emotional nature.
* Umineko: When They Cry, it's mentioned that the way humans in general deal with hatred is by pushing it onto another person, and it's explicitly stated that Maria is special because she is able to find happiness and break the cycle. Unfortunately, even she can be pushed too far.
* Umineko: When They Cry, it takes Natsuhi and Krauss Ushiromiya 8 years after their marriage to conceive their daughter, Jessica. Krauss's ambitious younger sister Eva, however, gives birth almost immediately after she and Hideyoshi marry, so she tries to use this as a bargaining chip to secure her son George's headship in the family over Jessica.
* Umineko: When They Cry: Just about all "furniture" (Think where summons and servants collide) uses this trope. At least, in the mansion. Given that the meta-world appears to be where all the magical stuff lives (at least at this point in time), anyone magical can pop up at any time.
* Umineko: When They Cry, knowing fully well how terrifying that situation is.
* Umineko: When They Cry, knows the history and legends of the island dating back before it was called Rokkenjima. Because she's a known prankster and likes to embellish stories for extra creepiness, no one takes her warnings seriously.

* Umineko: When They Cry know the Golden Truth.) Then there's the whole body of omake TIPS of varying canonicity...
* Umineko: When They Cry, Kyrie makes it very clear that, if Asumu hadn't died from other causes, she would have most certainly killed her within the year to be with Rudolf.
* Umineko: When They Cry. Love? Depends on your definition, but definitely mad.
* Umineko: When They Cry loves playing with this trope, with Battler, the main character, representing logic and order and Maria and Beatrice - depending on whether we're on or off the board - representing belief in magic and the inexplicable. Most of the other characters run around in the middle, and shift their orientations throughout the story.
* Umineko: When They Cry — they don't have to explain how the murders were committed because they can just say "the culprit used magic".
* Umineko: When They Cry mistakes a drop of her own blood for a rose petal, to show that her death was unusually quick and painless.
* Umineko: When They Cry. Natsuhi also gets this treatment from her husband Krauss, which is shown to really not be helping his case since she has much more common sense than he has.
* Umineko: When They Cry nearly two years after he died of natural causes.
* Umineko: When They Cry neutral, and lies to the player in a number of scenes.
* Umineko: When They Cry, nonetheless. This was invoked by Ryukishi07 himself, since in an interview he admitted he didn't wanted to outright show the answer to the murders since he knew this would happen.
* Umineko: When They Cry. Not that the Episode's detective has the slightest concern for such trivialities.
* Umineko: When They Cry of the series is to believe in your own truth without denying those of other people. Also, the manga adaptation gives numerous additional clues or clarifications (mostly in Episode 8).
* Umineko: When They Cry on Steam with a new translation worked on in cooperation with the Witch Hunt team.
* Umineko: When They Cry or watched it on a flatscreen TV in the anime.
* Umineko: When They Cry, plus Higurashi was labeled When They Cry 1 & 2 (Higurashi and Higurashi Kai) while Umineko is When They Cry 3 & 4 (Umineko and Umineko Chiru). This might indicate a closer connection between the series.
* Umineko: When They Cry. Plus, more directly, the main Ushiromiya siblings each (Presumably Rosa too, though her husband is unnamed) have a spouse with a Japanese name: Krauss/Natsuhi, Eva/Hideyoshi, and Rudolf/Kyrie.
* Umineko: When They Cry, promising the readers and her opponent that she'd write what happened in the fight scene she decided to skip over in later. Also, in some ways, this could apply to the various Game Masters through the series and their directly controlled pieces.
* Umineko: When They Cry. Proof that she does care for her daughter, despite everything.
* Umineko: When They Cry reveals he knows a multitude of martial arts while fighting Gaap in the fourth story arc. Granted, it was known as early as the start of the first arc that his mother Eva was a skilled martial artist, and that she taught George many, many things to become the talented and successful man he is. But because it wasn't known that martial arts was one of those "many things" until later, it still counts.
* Umineko: When They Cry, Ryukishi07, has made it clear that he will never reveal what really happened on the real Rokkenjima. Though he has said that he knows what really happened (fitting with reason 5 above), it also fits with one of the themes of the series, namely about truth (and the subjectivity of it) which says that the readers has to figure it out themselves and create their own truth. He's mentioned that some people on the internet have actually managed to figure out what happened.
* Umineko: When They Cry's brains are certainly nothing to laugh at, but she's also prompt to rub it on everyone's face. Cue cheers from the fans when Battler infuriates her by out-cultivating her on the topic of mystery novels.
* Umineko: When They Cry's creation takes up the in-universe 'protagonist' role.

(That is, has a reliable perspective.) In reality, though, no face heels or heel faces occur. The 'protagonist' role simply gets taken over by the two most evil characters in the series while they force the good guys into the 'antagonist' role.
* Umineko: When They Cry. Seriously, it has to be seen to be believed.
* Umineko: When They Cry, she does get a lot more very expressive faces.
* Umineko: When They Cry shows that he was fond of foreign literature as well.
* Umineko: When They Cry, Siesta 00, the commander of the Siestas (bunny-girl soldiers), has one of these.
* Umineko: When They Cry so long as you can imagine someone inventing something, it's magic by Devil's Proof.
* Umineko: When They Cry's second arc, George's last words are inferred to be a pledge of love to Shannon. "I will always —" "YOU THOUGHT I'D LET HIM SAY THAT? IDIOT!" Darn you, Beatrice!
* Umineko: When They Cry starts out as one of these. She takes a few levels of badass as the series goes on.
* Umineko: When They Cry still remains dead, with no news about any new content in the series.
* Umineko: When They Cry suspicion. After they're thrown out, she openly confides to Battler that she doesn't have any doubt that they're all responsible. As it turns out, she's right.
* Umineko: When They Cry tends to be a bit more explicit on some aspects though.
* Umineko: When They Cry that she is completely neutral. While she's helping everyone out in order to amuse herself, you just need to remember the part about 'in order to amuse herself.'
* Umineko: When They Cry the Hell out of him and reveal it was all an act just for the sake of toying with his emotions.
* Umineko: When They Cry; the idea is that the Game Master claims that all the murders are done by magic, and the object of the game is to break "the illusion of the witch" and figure out how they could have been done by human hands.
* Umineko: When They Cry). The red background disappears, and Battler's arm reflexively reaches up to quasi-strangle him.
* Umineko: When They Cry the thing she wants most. Although that has more to do with the peculiarities of what she wants than anything with the Golden Land itself.
* Umineko: When They Cry this is what Battler's strategy degenerates into when he's desperately grasping at straws, no matter how ridiculous, as a viable theory (as long as magic isn't involved of course); from "spike-launching devices" to "small bombs". Beatrice lets the more amusing ones pass, at least for the time. Dlanor uses her laws to cut them down abruptly and mercilessly.
* Umineko: When They Cry to "Leave the jokes to [his] hairstyle." Said hairstyle is spiky enough to warrant the jab.
* Umineko: When They Cry to read through. And this time, while an anime adaptation does exist, it cuts out halfway through the story (and is often considered to be significantly inferior to the visual novel).
* Umineko: When They Cry. Trying to interpret the game board's story as a mystery rather than a fantasy story, various characters use knowledge gained from reading mystery novels.
* Umineko: When They Cry... (Warning: Link is not an example of this trope.)
* Umineko: When They Cry wears a full-skirted gown which shows off a large amount of her back.
* Umineko: When They Cry, we get to give a simpler, if very badass example from George in the 4th episode.
* Umineko: When They Cry were, in the spirit of Knox's 5th, historically and plausibly justified. These are never involved in any of the closed door mysteries.
* Umineko: When They Cry where Jessica (and the reader) only hears Nanjo getting murdered by Evatrice outside the room she is in. It is as scary as it sounds especially when Evatrice begins to taunt the blinded Jessica (earlier a gun went of next to her face and she was blinded by the discharge) from the other side of the door.
* Umineko: When They Cry who dies tragically in every single timeline other than

his/her own.
* Umineko: When They Cry, who is also revealed to have written the first and second arcs; they washed up on the mainland in message bottles.
* Umineko: When They Cry who works for the Ushiromiya family's main house.
* Umineko: When They Cry winds up being a suspect. This helps to contribute to the drama, since Battler is trying to prove that the murders weren't committed supernaturally but doesn't want to suspect his family and friends.
* Umineko: When They Cry with Kinzo, as well as a few times with Beatrice and Battler.
* Umineko: When They Cry, you find out that Kinzo used a special scheme to buy up Rokkenjima against the laws of the Japanese government, and then bribed a bunch of people in order to keep it.
* Umi no Misaki) as well as the first to make further overtures towards gaining his "favor" in the same night. Each girl has roughly equal potential to win, at this point. This was lampshaded when Karin and Soyogi realize that Shizuku may have had a leg up on them because he met her first.
* Umi no Misaki ends with Nagi and his three girls in this agreement. The epilogue chapters show that the four of them are getting along perfectly well despite the oddity of their relationship.
* Umi no Misaki has a male lead who genuinely cares for all the girls in his harem and takes all three of them out on dates, occasionally at the same time.
* Umi no Misaki to accept that he will be with all three of them forever. The epilogue chapters show that the four of them are getting along perfectly well despite the oddity of their relationship.
* Umi no Misaki who regularly cooks for her. She once met Soyogi at her own door wearing just an apron.
* Um Jammer Lammy/a tropical island, which is what Lammy will have to undergo in the following stages.
* Um Jammer Lammy depicted a car jumping a ramp and crashing into a pool at high speed, while listening to the Stage 4 music.
* Um Jammer Lammy generally being considered the superior game: it has a female main character, and the cover showed only female characters (despite Parappa also being a playable character after clearing the story as Lammy).
* Um Jammer Lammy has a song about cutting a tree down with a chainsaw, and how his chainsaws are better than those of his rival, Joe Chin.
* Um Jammer Lammy is about the joys of chopping down every tree in sight with chainsaws.
* Um Jammer Lammy is a whole lot of sounds sung extremely fast in a short period of time, represented in the lyrics as "#$%^&!"
* Um Jammer Lammy. Later on even this trigger word is no longer needed as she gains more confidence.
* Um Jammer Lammy, other characters can't simply follow Lammy into her own subconscious.
* Um Jammer Lammy takes place over the course of fifteen minutes, plus the finale song.
* Um Jammer Lammy than as the ending credits song to the original game.
* Um Jammer Lammy The U.S. version, however, significantly alters the accident and the result location to a/an (presumably more humid) island.
* Um Jammer Lammy to her apartment, turn off all of the appliances she had accidentally left on, give her stuffed panda a kiss, and race back out the door.
* Um Jammer Lammy, when hitting Cool Mode in the final stage Lammy will crowd surf while rocking out.
* Um Jammer Lammy, will also share this tradition with a rock concert this. As such, the previous characters met in her 15 minute adventure will have a "crowd performance" as they dance to a solo meant for them. Like before, they will leave once Lammy starts doing very poorly.
* Umlaut House 1 and 2 there are a few occasions where Volair and Pierce dress in drag (like father like son). Plus that one time Rick switched his prosthetic body with a female one so he could pretend to be a woman for Jake's parents. Male

cheerleading captain Jack Fusselton, on the other hand, wears a woman's outfit as a form of psychological warfare (and unlike the other examples is straight).
* Umlaut House do it from time to time. Given that most of them have quite a few implants in their brains, this is apparently a pretty trivial thing for them to do.
* Umlaut House is concerned that Rhonda's time travel could cause him to cease to exist. Instead he realizes that the timeline is fixed when his father asks him to think of a number between 1 and 16, then asks how old he was when he spontaneously decided to repaint the kitchen (they were the same number).
* Umlaut House is cybernetic below the neck, and his head can detach and walk around on mechanical spider legs.
* Umlaut House selling his other inventions, but he wanted to make sure that this particular one was open-source).
* Umlaut House, Volair and Saundra, worried that their son Pierce is moving too fast with his boyfriend, come up with a brilliant way to kill the mood: they make a big show about ensuring that everything is ready for the two to have a great night together, then remind them that they'll both be right upstairs if they need anything else.
* Umlaut House where her counterpart was a lesbian (and attempted to seduce her).
* Ummagumma warns you (in a way), you can't help with your reaction to first hearing the second part of the song.
* Umm Kulthum: The 'Voice of Egypt', iconic Egyptian singer whose work is not only famous all across the Middle East, but also became famous in the rest of the world. She's influenced everyone from Bob Dylan to Maria Callas.
* Umney's Last Case, where a Raymond Chandler-style PI is dumped out of his vague 30s/40s fictional world by his creator and ends up in the real world of the 90s. It's a serious shock to the system.
* U-Mos is the only living Luminoth that Samus encounters on Aether, because the ones who did not die in war were sealed into stasis, either to wait until the Ing were annihilated or
* Umpty is a candy which is simply so extremely delicious that anyone who eats it develops an instant psychological addiction to it and will do anything to gain more Umpty to eat.
* UMS Vortex Rikers, the Skaarj Queen and her Warlords wouldn't have been slaughtered, the Nali wouldn't have escaped from being a meek slave race into an uprising, the Skaarj wouldn't have been interested in humanity and their discoveries, the Seven Years War and humanity's near extinction would never took place, and most important of them all, the Terran Colonial Authority and the New Earth Government wouldn't have been formed, and the legendary Liandri Grand Tournament would have never existed.
* unabashed snitch who's determined to rat out her classmates for any possible misdeed and get them all knocked off until she's "the last one left."
* unable to break the lie, because Del went to the trouble of forging all their travel documents.
* Unable to Cry, Gudrun does not weep over her murdered husband Sigurd. Several women attempt to console her by relating her own sad stories, but fail to get a reaction. Only when Gudrun's sister uncovers the dead Sigurd's face does Gudrun weep.
* unable to feel pain. He's been ostracised throughout his life because of it, and would rather just be a normal kid.
* unable to find a show that doesn't use tropes, especially given that the avoidance of some tropes are tropes in and of themselves. You're failing to appreciate the material if you immediately assume the show is unoriginal if there is a trope involved.
* unable to move or breathe for a year, then unable to see other gods for 9 more years (a recipe for chaos and violence on Olympus if Zeus is the one missing). Then Semele wished to see him in his full glory, and was consequently burnt to ash by the sight.
* unable to prove it. The suspect has been hounded by the victim's family ever since, and in hopes of getting them off his back he asks for the case to be

reopened himself, as in the interim he'd taken the liberty of framing someone.
* Unable to Support a Wife: A man can't afford to get married and care for a wife.
* Unable to Support a Wife: Nowadays, the rising cost of living means that most families will have both parents working at least one job. Has evolved somewhat into the husband feeling inadequate that his wife makes more than him.
* Unacceptable Sitch Series to act on their own initiative when a plan starts going off the rails, which becomes an important factor in the heroes' ultimate victory.
* Unacceptable Targets attempt to openly mock or criticize, unless they're willing to face massive public backlash (or even worse consequences) against them.
* Unacceptable Targets, because they are treated as too sacred and sensitive of a topic.
* Unacceptable Targets. If you try to mock these people, you'll suffer their wrath and massive public backlash.
* Unacceptable Targets: Targets that are considered to not be okay to mock.
* Unacceptable Targets: Targets that no one should ever take a stab at.
* unaffected by certain effects. Notable cards include Apoqliphort Towers, Master Peace the True Dracoslaying King, Vennominaga the Deity of Poisonous Snakes and the Aria-Elegy combo for the Melodious archetype.
* Unaffected by Spice: Someone that has a high tolerance for really spicy food; often used as a gag when compared to someone who can't handle the heat or who tries to sabotage a dish by adding hot sauce to it.
* Unaffected by Spice: This person can eat and enjoy extremely spicy food without much distress, if any.
* UNA Frontiers gives you Cyberna and Shiratz, who are subtle subversions of the trope. The former is an intended human/dolphin interface, the latter an ancient alien probe in the shape of a horse and realistic enough to pass a cursory veterinary inspection. They become loyal friends and allies, but are definitely not subservient.
* UNA Frontiers has the G.E.M.'s, Genetically Engineered Morgans, a gene-tinkered breed of horses incorporating cetacean and wolf genes to boost their intelligence and alter their behavior from "herd" to "pack" mode. An unexpected byproduct was the eventual development of psychic abilities as well, allowing a few of them to draw on the brain power of associated humans.
* UNA Frontiers is a 4,000-year-old alien probe that looks like a rather smallish but refined Pinto riding horse. He is realistic enough to pass a non-invasive veterinary inspection.
* UNA Frontiers, one of the main characters is Cyberna, an AI built in a (mostly) dolphin shape to act as a human/dolphin interface. Having spent time with them in their own element, she has few illusions about their actual nature, but she is capable of teaching them "civilized manners" just the same.
* Unaging. Physically beautiful. Able to read minds and control the emotions of others.
* Una Hora Mas en Canarias, Mónica, played by Juana Acosta, floats in the air when she is in love.
* Unaired episodes are also released at Alamo Drafthouse locations as part of
* Unalaq accuses his brother Tonraq of conspiring to assassinate him. The judge states that there was a meeting where plans of a civil war was discussed, the meeting took place at Tonraq's home, and Tonraq is chief, and therefore he must be guilty. However, Korra knows her father is innocent because she was a direct witness to the event and Tonraq was not only absent from the assassination attempt, but had confessed sincerely to Korra that he had no intention of murdering his brother.
* Unalaq is revealed to be this. He betrays his brother to become Chief of the Water Tribes, he betrays his niece Korra after she refuses to open the other spirit portal, especially after screwing over his brother a second time, and he betrays his kids by treating them as mere stooges and destroying the world they inhabit. In Season 3 it is also revealed that he was a member of the Red Lotus and orchestrated a plan to kidnap a young Korra when he found out she was the Avatar, but when the Red Lotus was foiled, he betrayed them and even helped construct one of their

prisons in order to continue his goal in becoming the Dark Avatar. Of course, the only being he doesn't betray is Vaatu.
* Unalaq knew all along that Tonraq was innocent and that Varrick was behind it, but he exploited this trope to have his brother found guilty and taken out of his way.
* Unaligned characters simply don't care about Good or Evil; their focus is on getting on with their daily lives, meaning they can be cruel or kind as they choose, but they don't devote themselves specifically to doing evil deeds or championing good. Your average Joe is Unaligned, but so would be a
* "Una promesa no cumplida" and welcome her into their ranks with open arms, turning her into another creepypasta monster like the one who she tried to kill.
* Unarmed rewards you with bonuses to Magic Power and Aethereal Damage once you reach the highest levels.
* Una rosa es una rosa: it's from the POV of someone who goes to pick the most beautiful rose on the bush, thinking love will protect them, and tears their hand on the thorns.
* unattractive, Roose's leeching habits (which left him with milk-white skin) and the Bolton family's prominent pale eyes make him look somewhat off, more like a vampire than a normal human. While never mentioned to have them, he is often drawn with raven black locks just to exemplify his Dracula-esque appearance.
* Unavoidable Family Outing, the narrator fully expects this, and doesn't even bother to check if he's right.
* Unavowed, but the aesthetic is soaked in the atmosphere of neo-noir featuring constant rain, which of course gives the colored lighting of various businesses the chance to spill on the street, and pretty much each mission sees the player tasked with getting to the bottom of a mystery and then having to make a heavy moral choice at the end.
* Unavowed, is a more formal take on the tropes, being a secret society who hunt down any supernatural threat preying on the innocent.
* Unavowed when Doug asks if it's a real rule, and says that it doesn't matter because she is currently on involuntary leave from the force.
* unaware of Isabella's advancement towards him when he can't invent anything for hours, and the same may apply to Ferb; he does say that he feels like he's going to scream if he doesn't invent anything, though nothing comes out of it.
* unaware that Superman is ''weakened'' by kryptonite rather than gaining powers from it) which gives him so many new powers he can't use any of them.
* Unbalanced by Rival's Kid: The child of an unrequited crush and a love rival causes distress for a character.
* Unbalanced by Rival's Kid: Upon meeting the child of an unrequited crush and love rival, a character becomes angry.
* Unbalance × Unbalance is a good example for of this, between Jin-Ho Myung and Hae-Young Na, not to mention Hae-Young is Jin-Ho's teacher (respectively renamed as Kenichi Kando and Elina Takanashi in the japanese version).
* Un ballo in maschera around the assassination of King Gustav III of Sweden, who was shot during a masked ball.
* Un ballo in maschera; the censors forced Verdi to transpose the story from Sweden to Boston, Massachusetts.
* Unbearably disorienting, nightmarish or otherwise very jarring sounds or music.
* Unbeatable Banzuke a ball weighing 47kg and 1.8m in diameter as it rolled down a slope, and push it to the top. The next part, Rock Valley, required the ball to then be pushed into a waterway to serve as a bridge that they would then balance over it to reach the other side. The first contestant, a Chinese student, fell off the ball in Rock Valley and later got diagnosed with cervical vertebrae injury. Because he didn't look too hurt as he left for medical care the staff just resumed the show. And then the next contestant, a Japanese student, was outright run over by the ball in Rock Attack and was paralyzed by the injuries.
* unbeknownst to Dean, it's not the good angel Ezekiel whom Cas has vouched for but a more morally ambiguous Gadreel. In order to help Sam break free, Crowley possesses him as well, making it two supernatural entities and one human soul in

Sam's body.
* Unbeknownst to her, Superman too feels the same, and has started to date her because she was interested in his
* Unbeknownst to him, Gary's activity is used as "background music" for Matt and Dillon's lovemaking.
* Unbeknown to them, Ironwood's instincts about Haven are correct: the headmaster is in league with Salem.
* Unbeknown to the victim, some vital organ or other's been damaged and he's slowly dying of internal bleeding (alternatively, a careless surgeon may have left something in them after operating on them).
* Unbelievable: 2019 miniseries about the 2008-2011 Washington and Colorado serial rape cases.
* Unbelievable, but this, along with not acting in a way even other rape victims find usual, is what causes Marie to be disbelieved by the detectives on her case. She told her friend a minor detail differently (that was not even directly about her rape) and the detectives decide based solely on this that her entire account was made up, pressuring her into recanting (then sticking to it after Marie changes her mind). On top of all that, she's also charged with false reporting, something which is noted by her public defender to be very rare.
* Unbelievable Source Plot: A plot where the protagonist relies on a supernatural source of information to solve crimes.
* Unbelievable: The perpetrator of the attack on Marie is found to be one. He not only raped many other women in his home state but there may well be others the police still haven't discovered even when he's convicted, as the encryption on his hard drive can't be cracked, where they suspect he kept far more photos of victims.
* Unbelievable, whose crimes the police is investigating throughout the series, relates a worldview similar to this in conversation with one of his victims: some men like him are "wolves" who just do whatever they want to.
* Unbelievable, with his earliest possibility for parole being set in December 2283.
* unbelievably badass with technology to match. Most of them took hundreds of Ing to the grave with them, and that was only in their final stand. U-Mos, the only currently active Luminoth in the game, is also invincible to Samus's weaponry, having some sort of unbreakable energy barrier.
* Unbelievably Boring Bart: Bartholomew Bean has had to deal with three bullies since he moved to Rancho Verdugo, California.
* Unbelievably Boring Bart dad, Bill Bean, looks like Bart with a five o'clock shadow.
* unbelievably hot not being from Body Horror but being more subtle and creepy.
* Unbelievably, Shin. He had no intention of playing any sports and only tried out for the White Knights because his friend Sakuraba asked him to.
* unbetitelt (Badewanne) (a bathtub for newborns filled with adhesive plaster, gauze bandages, grease, and copper wire) was destroyed by two women who decided to clean it and use it for washing dishes after a party.
* Unbreakable actually "unbreakable" because all heroes have some sort of weakness. Another character points it out to him, saying "that's your Kryptonite."
* Unbreakable Bones: A character's bones can't be destroyed. Common with superheroes or monsters.
* Unbreakable Dark and force her to kill everyone and destroy everything around her against her will.
* Unbreakable have superpowers, to the point of being incredibly fragile and ill most of his life.
* "Unbreakable Heart", recorded by Jessica Andrews, was originally cut by Carlene Carter.
* Unbreakable: he had almost drowned once as a child (probably due to the aforementioned bone density), an event so traumatic he blocked it from his memory. That would make anyone nervous around water, even if they couldn't remember why.
* Unbreakable is an unusually minimalistic superhero film in that it features no CGI, no action scenes, no costume, a limited color palette, long periods of

silence, and only 5 real characters—one of whom only appears in 2 scenes near the end of the film.
* Unbreakable is water, and in one of his last fights he overcomes a near-drowning.
* Unbreakable. Killing him and saving a family is the first time he is hailed as a hero, and his mentor Elijah later points out that defeating him is just the first step in David's burgeoning career as a real life hero.
* Unbreakable Kimmy Schmidt and claims to quote the show to calm himself down.
* Unbreakable Kimmy Schmidt arc that also featured multiple Spider-Men and the main plot revolving around which one was "the real one."
* Unbreakable Kimmy Schmidt as "the guy who, at the end, turned out to have done it".
* Unbreakable Kimmy Schmidt audition tape includes a segment where he flails punches at the camera shouting, "Karate! Karate! Karate! Ninjitsu!"
* Unbreakable Kimmy Schmidt begins with Kimmy and her friends being freed from a fake doomsday cult, the leader of which had kidnapped and held them under false pretenses for 15 years.
* Unbreakable Kimmy Schmidt, but since the prosecutors are even more incompetent it seems to be working out for him until Kimmy figures out how to get to him.
* Unbreakable Kimmy Schmidt: Co-creator Tina Fey appears as "Marcia" in the final two episodes of season one and has a recurring role as a crazy psychiatrist in the rest of the series.
* Unbreakable Kimmy Schmidt decided that Krakowski's character on that show has a terrible singing voice to bar her from engaging in this trope.
* Unbreakable Kimmy Schmidt does a mic drop during a presentation. It makes an ugly and loud feedback sound and everyone winces.
* Unbreakable Kimmy Schmidt features four women who are freed from being held captive in a bunker. Kimmy Schmidt's life in the bunker is dramatized, highlighting the ridiculous prevalence of this trope today. Additionally, Kimmy Schmidt is not smitten by her life in the bunker, and thus this example can be considered a subversion of the Bunker Woman trope.
* Unbreakable Kimmy Schmidt finds a creative way of coming back to this:
* Unbreakable Kimmy Schmidt has Lillian look at a portrait of the Voorhees family patriarch and snort, "The Dutch! I never did form an opinion on them."
* Unbreakable Kimmy Schmidt has said some seriously sketchy remarks about her past, such as having a cop's bullet lodged in her chest, that she has experience burying bodies, that she knows the gangs of New York by heart, and that she pickpockets all the time. She also accidentally murdered her own husband. Despite all this, she has also claimed to be a police informant. What is true or not is deliberately ambiguous because she's also old and has used her fair share of drugs.
* Unbreakable Kimmy Schmidt has Titus Andromedon, played by Tituss Burgess. Zigzagged when we later find out that his birth name was Ronald Effin Wilkerson.
* Unbreakable Kimmy Schmidt has Titus' boyfriend Mikey, a construction worker with no noticeable gay tendencies except for an airbrushed portrait of Tilda Swinton on the back of his truck.
* Unbreakable Kimmy Schmidt has Tituss at the ATM. His balance is $2, which he opts to withdraw. The fee is $3. He accepts, and instead of getting his money, a receipt comes out informing him his new balance is negative one dollar.
* Unbreakable Kimmy Schmidt have theorized that the entire series takes place in Kimmy's imagination, hence all the breaks from reality and all the cartoonish concepts in the show.
* Unbreakable Kimmy Schmidt impersonator on Broadway. She has him over so that Buckley can beat him up with baseball bats and gold clubs. To quote Titus on it: "I've made less for worse".
* Unbreakable Kimmy Schmidt Kimmy and Andrea have a fairly long conversation before realizing that Andrea's current patient is still in the room - she admits that this doesn't help his feeling of being constantly overlooked, but says that it was his decision to wear clothes the exact same color as her couch.
* Unbreakable Kimmy Schmidt Kimmy has to buy condoms in a convenience store.
* Unbreakable Kimmy Schmidt, Kimmy takes a career aptitude test and it tells her to

consider the career with job code 69. Ever the innocent, her reaction is "I know that's funny, but I don't know why."
* Unbreakable Kimmy Schmidt, Kimmy tries this on the Reverend. It doesn't work:
* Unbreakable Kimmy Schmidt: Kimmy writes a book under the pen name K.C. Smith. People assume that the author is a man until she reveals her identity.
* Unbreakable Kimmy Schmidt leader and forced to live in his basement for 15 years. It mostly references the Ariel Castro case (in which 3 women were kept in Castro's basement for 11 years) as well as a little bit of the FLDS church with the outfits they were forced to wear.
* Unbreakable Kimmy Schmidt: Lillian functions as this, especially in season one when she was largely a supporting character in Kimmy's and Titus's storylines. She's a kooky older woman who owns the basement Kimmy and Titus live in, and frequently hangs around to commentate on their affairs.
* Unbreakable Kimmy Schmidt — apparently, Amtrak runs late on purpose so people can make their stirring last-minute romantic resolutions. As the conductor explains it, many other couples kiss in the background.
* Unbreakable Kimmy Schmidt one of the lasting effects of Kimmy's fifteen years in the bunker is a fear of Velcro. Eventually explained as related to the moment when she was first abducted: she was alone and vulnerable because she fell behind her friends while struggling to deal with Velcro straps on her shoes.
* Unbreakable Kimmy Schmidt on NBC and decides to stay in New York to make a new life for herself. She moves in with Titus, with Lillian as their landlady, in an unnamed neighborhood in Upper Manhattan. Titus aspires to sing on Broadway and most of Jacqueline's material centers around her being a sheltered Park Avenue wife and later trying to grow out of it. Lillian has never left Manhattan until the end of season one and can't drive, and is still hoping to see the completion of the 2nd Avenue Subway.
* Unbreakable Kimmy Schmidt on the ball!" causing all the other preppy kids to laugh.
* Unbreakable Kimmy Schmidt plays Marcia, an incompetent prosecutor in the case against Reverend Richard Wayne Gary Wayne.
* Unbreakable Kimmy Schmidt: The Mole Women are in a dark, mysterious tube and are searching for a light switch. Someone accidentally pulls out Cyndee's earring just before the lights come on, prompting Cyndee to declare, "My ear is the light switch!"
* Unbreakable Kimmy Schmidt the result is still this trope, as Gretchen finds herself spending all her time cooking for them, cleaning up after them, and generally acting like their mother.
* Unbreakable Kimmy Schmidt, Titus agrees to be a sham boyfriend for an apartment renovation show host whose brand relies on his viewers believing he's gay. This rare inversion is referred to as an "Eyebrows".
* Unbreakable Kimmy Schmidt, Titus intentionally triggers Kimmy into a "bunker flashback," saying he'll have enough time to get some cheese. He successfully triggers a flashback and when we return to the present, he's unwrapping a slice of cheese. Apparently, Kimmy always zones out when we see a flashback.
* Unbreakable Kimmy Schmidt uses the choose-your-own-adventure technology to tell a wacky story about Kimmy in the lead-up to her wedding.
* Unbreakable. Later when David Dunn does an anonymous act of heroism, the newspaper the following day shows a sketch artist's rendering of the mysterious rescuer with a jawline to rival Dick Tracy.
* Unbreakable magic chains kept Fenrir (a gigantic wolf so massive that it must crouch down to avoid scraping against the dome of the sky) bound, until he eventually breaks them. Ironically, it is implied that binding him is what made him so pissed off at the gods in the first place. Well, that's the trouble with prophecies... and he is a child of Loki, God of betrayal, mischief, and "evil".
* Unbreakable: One of the factors that make David realize that he is superhuman is the fact that he's never gotten sick or taken a day off from work.
* Unbreakable opens with a train crash; the number to call for family members to check on survivors is 800-767-1482. Originally this number went to a recording

telling people it was reserved for use as a placeholder number for use in movies and tv shows, but has since become used by a fake survey allegedly offering "free" boat cruises.
* Unbreakable precisely because he walks away from a major accident that should have killed him.
* Unbreakable Red Silken Thread: A consistent and rather troubling side effect of Gwen's relationship with Duncan is the development of this. Due to the nature of their relationship it's not exactly surprising.
* Unbreakable Red Silken Thread: After getting to know how much Cody has changed over the years, Gwen points out that he could do much better than Heather. As much as Heather hates to admit it (even to herself), she acknowledges that Gwen has a point and that Cody would have no problem finding himself a much nicer and still attractive new girlfriend; this actually has a positive effect on Heather, as it encourages her to be an even better girlfriend to him.
* Unbreakable Red Silken Thread: As revealed on Chapter One, Cody has known Heather for several years already, before they first entered the Total Drama show; Heather finds out that they go to the same school, and even share some classes, but due to their different cliques, Heather never paid him any attention.
* Unbreakable Red Silken Thread: A trademark of Dawn, as per canon, to the point more than one character has stated it was like she was never there to begin with when they blinked.
* Unbreakable Red Silken Thread because Noah held back for a very long time to spare Cody's feelings, and only told him because of the story's events.
* Unbreakable Red Silken Thread: Before dating Heather, and for a good time afterward, Cody kept a very sizable collection of porn magazines and movies. After Heather found out, she made him get rid of most of the collection, still allowing Cody to keep some selected issues and films.
* Unbreakable Red Silken Thread: Cody and Heather. Though it takes years for the attraction to form, it does eventually occur. Jasmine and Sammy also fit this as well to a lesser extent.
* Unbreakable Red Silken Thread: Cody describes talking to Lindsay as "best to avoid allusion, irony, sarcasm, repartee, satire, and words longer than 'chicken'."
* Unbreakable Red Silken Thread: Cody realizes his feelings for Gwen were this after a talk with Noah.
* Unbreakable Red Silken Thread: Cody was this to Heather for what is implied to be years. However, he has grown out of it, though ironically Heather has shades of this from time to time. Jasmine and Sammy both have this towards each other, Jasmine for not taking action to help sooner while Sammy has this more out of habit due to her background.
* Unbreakable Red Silken Thread: Considering Scarlett works as a stripper, it isn't exactly surprising she dresses in this way.
* Unbreakable Red Silken Thread: Duncan, of all people, shows this on occasion very subtly, especially when it comes to his relationship with Gwen. The fact that he was at one time on par with Heather during TDI at manipulating and instigating all manner of mischief and misery makes it less of a surprise and more a case of played straight.
* Unbreakable Red Silken Thread: Eventually becomes Zoey's defining trait out of the group. Always cheerful and upbeat, she also happens to be a former fan of the Total Drama series.
* Unbreakable Red Silken Thread: Heather is of this opinion, both in regards to herself as well as those she pursues. Given that her first experience with the same sex was with Lindsay of all people it's easy to see why.
* Unbreakable Red Silken Thread: Heather, often despite her own internal protests against it.
* Unbreakable Red Silken Thread: Heather's mother blackmailed her father into marrying her. Later Heather blackmailed Gwen into living with her and Cody.
* Unbreakable Red Silken Thread: Heather's mother is this played straight, and people sometimes mistake Heather for this until they find out she's actually the one with more money.

* Unbreakable Red Silken Thread: Heather, the girl whose tag on Total Drama Island was 'The Queen Bee' decides to date Cody, the guy whose tag on the show was 'The Geek'.
* Unbreakable Red Silken Thread: Heather to Cody, as she was even about to confront Jasmin when she insulted Cody in chapter 11. Also Jasmin to Sammy, it was mentioned that she waterboarded Amy with a toilet when she was being particularly mean to Sammy.
* Unbreakable Red Silken Thread: Heather, who typically smirks or grins when in a good mood rarely if ever truly smiles. The few times she does are noticed by whoever happens to see it. The same is true with her laugh, which is usually described as a 'harsh barking' as opposed to her genuine laughter that has been compared to "soft bells ringing". Sammy also plays this straight due to how shy she is, with the rare occasions she truly smiles standing out.
* Unbreakable Red Silken Thread. In public Scarlett is a quiet girl, but at her job she let her jerkass side show.
* Unbreakable Red Silken Thread: Izzy still talks this way sometimes, both as her real self and her video game character Wildcard.
* Unbreakable Red Silken Thread: Jasmine has a very feminine (though fit) body. And yet she has the most impressive physical feat seen so far when in her introductory scene she effortlessly drives her foot (through a street with a single stomp without even seeming to be trying to. This and other smaller examples suggest that she has more power in her "girly" muscles than characters with more defined muscles like Duncan or Brick.
* Unbreakable Red Silken Thread: Jasmine is the tallest character in the story at 6 feet, and is the only character aside from themselves or Lindsay that Heather and Cody most frequently lust over.
* Unbreakable Red Silken Thread: Mentioned word-by-word by Emma, referring to Kitty's tendency for falling for helpless, needful boys when she gets an instant liking for Cameron.
* Unbreakable Red Silken Thread: Sammy tends to have this affect on people, to the point even Heather is "weakened" by her presence. Notably, she is one of three girls that Cody hasn't shown a hint of perv towards at any point, along with Jo and Dawn.
* Unbreakable Red Silken Thread's reaction is equal parts fear and arousal.
* Unbreakable Red Silken Thread: The Solomon Grundy arc, which the authors both admit has its flaws, even if it has served its intended purpose. The problem, however, is the abrupt shift of focus after fourteen chapters featuring Cody and Heather to their near-total absence.
* Unbreakable Red Silken Thread. When it comes to Heather, she is quick to take advantage of anything that comes her way, though often times the results backfire in her face, sometimes quite literally.
* Unbreakable Red Silken Thread: While lacking in the bust department, Heather knows she has this and works it to the fullest. Jasmine is another case, her preference for shorts and towering height highlighting this even further much to several of the cast's delight.
* Unbreakable the injury, since he knew that college athletes often burnout or can't make it in the pros and he wanted an excuse to get out anyway since his burgeoning romantic interest (and future wife) was studying to be a nurse and put off by the violence of his sport. He told the lie so often that he had forgotten the truth himself.
* Unbreakable, the Producer feels more sympathy for the woman on the train who rejects David Dunn (who's trying to cheat on his wife) than he does for David himself, despite the fact that the scene is trying to make the latter more sympathetic.
* Unbreakable, the word "superhero" or variants are never used. The closest it comes is having the protagonist's son say "You think my dad's a..." only to be interrupted. However, it rather fits with the Deconstructionist aspect of the movie.
* Unbreakable via physical contact, but because David is in denial about his powers

he always explained it to himself as mundane intuition and never followed up on it. Elijah eventually confirms that David's "intuition" is extremely accurate, to the point of describing the look and design of a concealed gun. At the climax of the film David begins accepting the truth about his abilities and discovers that his bouts of intuition have been right all along.
* Unbreakable Vow with their younger brother Ron. The punishment was such that it disfigured Fred's bottom.
* Unbreakable where characters are pictured in door frames and such, to mimic the frame effect of the comic books that form an integral part of the plot.
* unbridled ambitions of both their companions of age, and much younger, fitter wizards.
* "Unbridled" begins with Spencer in a forest at night in a wedding dress, pulled up short after a sharp sound
* unbridled joy, before quickly clearing his throat and apologizing for the uncharacteristic outburst.
* Unbroken: After crashing at sea, US Olympian turned military aviator Louis Zamperini finds himself in a liferaft before being captured by the Japanese Navy.
* Unbroken First-Person Perspective is a special case in which a single first-person perspective is adhered to for the entire length of a game.
* Unbroken First-Person Perspective: When a game never breaks from the first-person perspective of its player character(s).
* Unbroken Vigil: A character refuses to leave a sick charge's bedside, believing it'll help them both and believing the charge will recover.
* Unbroken: Watanabe is fixated on Zamperini, which includes beating him and trying to break his spirit. He even tells him that from the moment they met, he knew they were alike and that they could have been friends if not for their opposing sides. Zamperini mainly just seems creeped out by the attention.
* unbuilt early on in the story. When Oolong first confronts Goku, he transforms into a bull and smack-talks him in an attempt to drive him off, since Oolong isn't all that strong. Goku is pretty much unfazed, and asks Oolong to fight him already. This ends up dragging on long enough for Oolong's transformation to wear off, forcing him to run out of sight before anyone finds out that he's just a tiny little pig.
* Unbuilt Trope and mass-production, the future society contains a large slave class which is initally presented this way. It's only revealed late on that in fact manual labour is almost obsolete and the future slaves simply operate the machines all day.
* Unbuilt Trope and the second one in which he wore the Tramp costume. The conceit of the six-minute short has the film crew recording a soap box derby race at Venice, CA, only for an annoying attention whore stranger (Charlie) to continually get in front of the camera and ruin the shots.
* Unbuilt Trope are called the Myrmidons, or, in Greek, "ant-people." This name came from their origin as ants turned into warriors by Zeus in answer to a king's prayer to repopulate his country after a plague. The word "myrmidon" has come to denote any mindless group of subordinates, and is essentially the source of the allegory on which this trope is based.
* Unbuilt Trope at work. Most later Ruritanias tend to be small, backwards and, at least in the early imitations, idyllic. Stephenson's Ruritania was a decent-sized (the capital city is large enough to have a cathedral and is described by Londoner Rassendyl as a "great city") modern (if not particularly socially progressive) country which played a pivotal role in European history on a number of occasions, and which was plagued by public order problems, deep socio-economic divides, having an absolute monarch who was neither particularly well-liked nor particularly competent and internal squabbling in the royal family bringing the nation to the brink of civil war.
* Unbuilt Trope for those genres were still decades away from being written after all.
* Unbuilt Trope; he always made sure to show that the Black guy was just as screwed up and idiotic as the white guy, being so focused on doing things the "Black way"

that he screwed himself over.
* Unbuilt Trope, in which a depressed young man who has just lost his job goes about making a documentary, or a video diary, of his own life. It goes badly.
* Unbuilt Trope or a thrall to the Dark Lord, while the weak yet humble Frodo has a slim chance to resist its evil and see to the Ring's destruction.
* Unbuilt Trope sketch, back in the days when everyone knew what records were, that had the staff in an electronics store laughing at a man who wanted to buy a gramophone.
* Unbuilt Trope". The title character's absolute, perfect memory — the result of a head injury — is useless, since every sensation or minuscule change in an object registers as a separate memory, requiring a specific name, to the point of near-sensory overload.
* Unbuilt Trope while the Elves find new ways to screw each other over.
* Unbuilt Trope with none of the qualms and drawbacks of dealing drugs addressed once in the game.
* Unbuilt Trope with their victories thereafter being more attributable to the Spartans using basic formation drill and platoon-level units which made them far more wieldy on a tactical level than their adversaries.
* Unbuilt, where the scientists (especially Dr. Carrington) butt heads with the military men about how to deal with the creature.
* Uncalculated Risk solution which manages to alert the president to the danger. He takes a small portion of the formula, walks out to the lawn in front of Green's laboratory and "accidentally" spills it on the soil before ordering an evacuation of the area. The catastrophic property damage (no lives are lost due to the evacuation) that occurs over less than an hour (and is highly publicized due to a few strategic phone calls) forces everyone who'd been ignoring Green to recognize potential dangers and gets all of the shipments halted in time.
* Un-Canceled and aimed at an older audience (the same people who'd watched it as kids)
* Un-Canceled - a show is cancelled, then something happens and it's restored to the schedule
* Un-Canceled has had similar problems living up to its first few seasons.
* Un-Canceled, the fatigue came back tenfold, and by the conclusion of season 3, very little progress is seemingly made on the overall series arc. Luthor loses his position as Secretary-General, but remains free and retains his position in the Light. Granny is being punished by Darkseid as a scapegoat, but will undoubtedly be free to continue as before. Despite everything that happened, the alliance between Darkseid and the Light remains firmly intact. There's talk of a great galactic war coming, but it's kept so vague that it's near-impossible to guess what the threat could be. The conflict of this entire season can be considered just setup for the actual central conflict that may or may not finally happen in Season 4. Either way, the arc of the series is moving a lot more slowly than many had expected. Most took as practically given after the Season 2 stinger that Apokolips would invade Earth in Season 3, which doesn't happen. The Earth is arguably never under direct threat in Season 3, unless you count the very few minutes it appeared Granny had won.
* Un-Canceled, the roles were reversed. One episode had Dexter's dad repeatedly mess up a golf tournament because he had a warped understanding of the rules and ignored Dexter trying to correct him. For one thing, he didn't understand what the holes were and thought you had to avoid the ball falling into them.
* Uncanceled was brought back thanks to strong DVD sales and solid ratings from re-runs on Adult Swim.
* Un-Canceled were made in a time when it seemed all but certain the show was dead.
* Un-Cancelled, and suffers a minor breakdown once he's told Hanson is a man.
* Uncancelled, Arnold and Helga would eventually get married as adults
* Un-Cancelled, ends in a Final Battle between the controllers and contestants of the Game Station and the Daleks.
* uncancelled. However, both versions of the finale also ended with America entering into a civil war.
* Un-Cancelled its previous "canon" and introduced technologies, ideas and memes

relevant at the time of its production, as well.
* Uncancelled, Rachel Tietz and Malcolm Ray, joined the cast as regular members (although Rachel has since left to pursue other career opportunites and was replaced by her old roommate, Tamara Chambers).
* uncancelled time to make, and the teaser clearly had fully animated segments, it had to have been in the works well before that.
* Un-Cancelled trying to hide it and wrote in a surprise pregnancy as a result of Linda's affair with Amenadiel during the previous season.
* Uncanny Atmosphere: You just know that there's something wrong with this area but don't quite know what it is (yet)
* Uncanny Avengers, Daken tells Sunfire that in Japan he's seen as an embarrassment and they gave him an appropriate nickname, "Hot Sake". This is particularly insulting because only low quality Sake is served hot; the heat helps conceal the flaws.
* Uncanny Avengers engage in BDSM (she specifically references "kinky bondage drinking games"); her experiences in the bedroom allows Rogue to escape from her bindings and begin fighting her way out of Red Skull's lair after having been captured by him.
* Uncanny Avengers finally tracks him to Tokyo, Sunfire drunkenly assumes that his former ally is there to kill him for his betrayal.
* Uncanny Avengers suffered from controversy and uneven writing. The third volume saw a change in the creative team and managed to fix nearly every problem people had with the first two.
* Uncanny Avengers that makes things like being disintegrated mere passing inconveniences, this is not entirely surprising.
* Uncanny Avengers, the Scarlet Witch does this to Rogue, at one point calling Rogue one of her father's floozies. She brings up the relationship not in a way to necessarily shame Rogue for her "promiscuity" (especially since Rogue's powers make physical relationships difficult) but to remind her that she isn't exactly pure and noble herself, having a relationship with the X-Men's worst enemy.
* "Uncanny Eighth Wonder no.2" until she finally climaxes hard enough to return to her senses.
* "Uncanny Eighth Wonder no.2" with a pair of strap-ons, until she finally climaxes hard enough to revert to normal.
* Uncanny Family Resemblance: Any family relation is played by the same actor.
* Uncanny Family Resemblance: Family members look more like each other than logic would permit.
* Uncanny Family Resemblance, Samantha is mistaken for her cousin Serina by a witch whose husband the latter had turned into a bird. Unfortunately, before Sam could clear up the misunderstanding, the witch banished her to 1886 New Orleans. Needless to say, Darrin is not pleased with Serina.
* Uncanny Tales from the Grave as a money-saving measure because "A little pain never hurt anybody!" When he finds his nurse/wife talking to a romantic rival he confronts them before having a dizzy spell and fainting. When he wakes up he's strapped to an operating table and the rival, a promising brain surgeon, tells him that his fainting spells are due to a brain clot which it'll only take a few minutes to remove. Simon asks for ether, only to be told it's too expensive.
* Uncanny Tales from the Grave which dresses in black cloaks and pillowcase masks. During their first hate crime he escapes from the police and runs home. When he removes his mask he finds another one underneath — and another, and another — to the point where he frantically tears off an apparently infinite number of masks. In the final panel the cops find him dead on the floor with his face ripped to shreds.
* Uncanny Valley, and the suddenness of it makes it as good as a screamer.
* Uncanny Valley effect with automated telephone information systems - you think you're listening to recorded human speech, and then the system comes up with something like "Here's the latest information for the flight you requested. Flight. Four. Four. Two. Seven. Is scheduled to land at. Miami. International. Airport. At. Five. Twenty. P.M. Please check the monitors in the terminal for more up-to-date

information."
* Uncanny Valley Girl: Girl seems wholesome, but there's something about her that screams suspicious.
* Uncanny Valley Girl: This seemingly flawless girl is really not what she appears to be.
* Uncanny Valley (his pixellated face in a 3D environment looks rather off).
* "Uncanny Valley", if you've paid attention to the credits. Jonathan Frakes was billed to appear in the episode but doesn't appear until the end when the team figures out that
* Uncanny Valley Makeup, a wavy hairstyle and clothes that make him resemble one of the robots in the setting.
* Uncanny Valley Makeup garish, for reasons such as flappers rebelling against the taboo of "painted ladies," to help actress' eyes and mouths pop out on black and white film, or to invoke the heavy kohl of ancient Egyptians.
* Uncanny Valley Makeup. Heavy pale foundation, rainbow eyeshadow up to the brows, rims and rims of eyeliner, severe blush on the hollows of the cheeks up to the ears, and glossy red lipstick was in. Like in the '20s, mass consumerism encouraged women to pack it on.
* Uncanny Valley Makeup: Makeup that makes the wearer look disconcerting.
* Uncanny Valley Makeup. The makeup itself isn't evil, but the degree to which it's modeled on robots is suspect and drives home how decadent and dependent on technology Kaldor City society has become.
* Uncanny Valley reaction to him, until they return to the physical world where he can successfully borrow Ryou's humanity again.
* Uncanny Valley reasons for nonhuman leads) though this specific issue is becoming far easier to get around.
* Uncanny Valley seducing many beautiful women before he comically malfunctions.
* Uncanny Valley series. "Unlucky Charlie" is a once-ordinary scarecrow formerly used for target practice by witches in the Lancre Witch Trials. It absorbed so much magic that Charlie now appears and disappears all across the kingdom, though no-one ever sees him move. He's not malevolent, but does demand privacy and respect. Give him those and your harvest will be excellent even if you've not planted anything.
* Uncanny Valley: Something that isn't alive or real is considered disturbing for being too lifelike or realistic in appearance.
* Uncanny Valley than ugly, but the transformation stems from her jealously.
* Uncanny Valley: The audience is unsettled by disturbingly lifelike character designs.
* Uncanny Valley, thus the fact these aliens are not bastards squicks him out.
* Uncanny Valley to biologically-enhanced humans with a handful of robot parts.
* Uncanny Valley to humans. This, combined with the fact that they frequently manipulate humans into doing their bidding, has caused the Imperial Guard to issue warnings against communicating with them.
* Uncanny Valley, with many online articles pointing out their creepiness. And he's always hanging around kids.
* Uncanny Valley). Xander and Cordelia manage to kill him by covering the floor in front of a door with glue. He turned into maggots to get through the door, got stuck in the glue, and was promptly stomped to death.
* Uncanny Village: A creepy village that seems like a nice place to live but has a dark secret.
* Uncanny Village: A seemingly idyllic small town isn't quite what it appears on the surface. The townsfolk may or may not be in on it.
* Uncanny Village: A small town in the countryside that is the rural equivalent of a Stepford Suburbia.
* Uncanny Village. This was later also used in series 5 of the revived TV show proper.
* Uncanny X-Force by a villain, and by the end of the arc that reveals all this, only two of the reality's X-Men are left alive.
* Uncanny X-force died, he was going to get a cloned body to come back with. However, he has three different brains and each brain received its own cloned body.

The nicest brain got a female body called Cluster.
* Uncanny X-Force might become a problem; eventually it took over and she was forced to kill him. She then dated Fantomex for a while, but eventually realized that he was manipulating her, and dumped him. After which he, too, turned evil until she gave him a psychic lobotomy.
* Uncanny X-Force, Psylocke engages in a duel of minds with the Shadow King. While only a few minutes pass in the real world, the two battle endlessly for centuries on a psychic plane. After the duel ends, Psylocke immediately contacts her team to resume their mission. She brushes the whole ordeal off and never speaks of it again.
* Uncanny X-Force series by a different writer had them break-up off-panel, with the justification that neither truly loved the other; Fantomex used his misdirection to get Betsy to think she loved him and he never loved her... no matter how hard this flies in conflict with what Remender wrote.
* Uncanny X-Force. The team was on a mission to stop the revival of the villain Apocalypse or kill him if he returns. When they see he had returned as an infant, they didn't feel comfortable killing a child and decided to take him in a raise him to be good....All except team member Fantomex who decides to not take any chances and shoots and kills the kid Apocalypse anyway, to the horror of the others.
* Uncanny X-Force will bring about the Age of Apocalypse. To prevent this, X-Force, an already morally ambiguous team that's entire purpose is to shoot the dog, decides to kill Apocalypse. However, it's revealed that Apocalypse is actually a child, who is still innocent. The team is split, with Angel the most adamant about killing Kid Apocalypse, saying that Kid Apocalypse won't be able to control his nature, and that doing this will save millions of lives. However, he stops himself, and the team decide to take Kid Apocalypse back for training. Then Fantomex shoots him in the head. Later on, Deadpool of all people is the one to call the team out on this, and Wolverine says it was the right thing to do, and that sparing him was just a moment of weakness. Fantomex himself secretly cloned Kid Apocalypse.
* Uncanny X-Men #111, the new furry Beast uses this disguise to enter a crowded carnival. Jean Grey lampshades how strange his outfit looks.
* Uncanny X-Men #137's official street date of September 1, 1980 became this in retrospect, when it was revealed in a later issue that the events of that issue occurred on that very day.
* Uncanny X-Men #149 is definitely located in the Bermuda Triangle. It contains ruins of a lost civilization heavily implicated in aliens and eldritch abominations.
* Uncanny X-Men #177, a powerless Storm grabs a length of pipe to defend herself when attacked during a blizzard, only to have her hands freeze to to the metal.
* Uncanny X-Men #183, Wolverine arranged for Colossus to get into a barroom brawl with Juggernaut after Colossus broke up with Kitty Pryde. After Juggernaut wiped the floor with Colossus, Wolverine tossed the bartender a roll of hundred-dollar-bills to pay for the damages. So did Juggs as well.
* Uncanny X-Men (2013): Or "Drug and Replace in this case: Mystique has taken over Dazzler's role within S.H.I.E.L.D. without them knowing it. She's been locked up and kept sedated so Mystique can use her blood.
* Uncanny X-Men (2018), as why he created the titular reality - he was trying to free the X-Men from their constant self-destructive cycle.
* Uncanny X-Men (2018) rhetoric is revealed to be him playing a part, his ambitions to change Earth-616 to a utopia, no matter the cost are very real.
* Uncanny X-Men #202, a confused civilian can be heard asking if George Lucas is shooting a movie.
* Uncanny X-Men #434 lists this as the reason for the villainess' "Take Over the World" plan, on the last page.
* "Uncanny X-Men 469" has Project O*N*E monitor Rachel Grey as she showers. Their technology scans everything possible, ensuring that her physical vitals are consistent with baseline species parameters. It’s also noted that she’s cute, too. Colonel Reyes makes an appearance and reminds his staff that they are soldiers and scientists, not voyeurs.

* Uncanny X-Men, a group of (ex-mutant) women are imported from Russia as prostitutes.
* Uncanny X-Men, and had manipulated her big brother into becoming the new Juggernaut in order to make him as much of a monster as she had become. Let's just say Colossus no longer feels any need to protect his "little snowflake"; he has in fact vowed to kill her if their paths cross again.
* Uncanny X-Men, and references her time in the Mojoverse, a story planned for a limited series or graphic novel. In prose or as a series of scripts of twenty two pages each, describe the events of Rachel's story in the Mojoverse.
* Uncanny X-Men and see Juggernaut across the room. A fight breaks out between him and Colossus. Since Colossus has just broken Kitty Pryde's heart, Wolverine stays out of it and keeps Nightcrawler out as well.
* Uncanny X-Men and welcomes her. Effectively Mariko was merely acting in accordance with the ethic and social rules of her class, but it still was the first time Rogue was unreservedly welcomed by anyone since she left the Brotherhood of Evil Mutants, and so in the following issue Rogue shows no hesitation to lay down her life to prevent her death ("Lady Mariko was kind t'me — she accepted me, right off — ah won't let her come to any harm!"). The fire from Viper's blaster actually hurts her badly, but Rogue accepts her likely death philosophically. However, Logan now feels indebted to her for saving the woman he loves and makes Rogue absorb his healing factor.
* Uncanny X-Men Atlantian king who's been around and active since WW2; together they trade snark when paired up on a mission and connect as friends, something both of them rarely do with anyone else.
* Uncanny X-Men At one point, Masque of the Morlocks knocks out a bunch of people on a subway, then uses his powers to mess up their faces. A news report afterwards shows one man being bludgeoned by the police while screaming for someone to help him.
* Uncanny X-Men at the State Fair of Texas, Magneto and Professor X attempt to recruit Daniel Wiley, the mutant known as Eques, at the Texas State Fair, though he is never heard from again.
* Uncanny X-Men books, artist Jim Lee depicted the law enforcement of Genosha as being mostly female and incredibly hot.
* Uncanny X-Men featured an evil team of male versions of several X-Women fighting Captain Britain. Most of them looked very flamboyant in those costumes.
* Uncanny X-Men for the first, and possibly last time, has to order an X-Man to go and change before being allowed to come on a mission.
* Uncanny X-Men, Guardian of the M'kraan Crystal's head. Once the dust clears (and amazingly, no-one is killed from being right next to an asteroid slamming into the planet at speed), Jahf doesn't have a scratch on him anyway. But the characters still note with alarm that Jean was able to do something like that anyway.
* Uncanny X-Men had a example of this trope in #274 and #275 with the Savage Land arc with Magneto and Rogue and the whole Shi'ar arc with the current team roster at the time trying to fight Skrulls. To be fair, this is during Claremont's 1st run which fits with his style.
* Uncanny X-Men: Iceman does this to Cecilia Reyes, who not only actively dislikes him but hates the whole mutants-vs-humans drama thing going on, and is only with him because she got outed and will be killed if she doesn't have his help.
* Uncanny X-Men in plain sight of the Sentinels to distract their human pilot.
* Uncanny X-Men loses an arm against Mr. Sinister. Being in diamond form, she doesn't die from blood loss or anything, and she gets better.
* Uncanny X-Men Magneto, followed by a stand-off against the Hellfire Club. Issue 153 provides the breather in "Kitty's Fairy Tale" as Kitty invents a bedtime story for Illyana, casting herself as a heroic pirate and the rest of the X-Men as other characters. By the end of the issue, the entire team is gathered around Illyana's room, listening to Kitty's story, and enjoying it immensely.
* Uncanny X-Men, mutants are going extinct because of Terrigenesis and are hated more than ever.
* Uncanny X-Men mutants try to drive Professor X's Rolls Royce after getting de-

aged by Mojo.
* Uncanny X-Men out of the dimension. Consistency was never Austen's strong point.
* Uncanny X-Men out or otherwise temporary. It's just as well since Kitty got better and fans were speculating as to her inevitable reaction when she sees it.
* Uncanny X-Men, Rogue and Wolverine ended up in Genosha naked and tried to fight their way out like that.
* Uncanny X-Men series or storyline, but if so the plans never materialized.
* Uncanny X-Men's powers and defeated Nimrod, the mutant killing robot from the future, by teleporting a chunk of his body away. The next time the X-Men fought Nimrod, Nightcrawler simply tried the same trick again, only to discover that Nimrod had adapted himself so that not only did it not work but the attempt messed Nightcrawler up quite badly.
* Uncanny X-Men that showed readers just how horrifying Magneto can be when he isn't fighting the X-Men and no longer feels any need to practice restraint.
* Uncanny X-Men: This is one of the powers of the Genoshan Magistrate Wipeout, along with erasing mutant powers.
* Uncanny X-Men). This scene is given an odd dissonance, given that thanks to time travel Cable is old enough to be Cyclops' father.
* Uncanny X-Men to murder Rachel herself, before getting away entirely scot-free, without even a slap on the wrist.
* Uncanny X-Men to Selene he was left to conduct the game however he chose. Which, invariably, was "however the hell he felt like that day".
* Uncanny X-Men to the X-Men. Among the things she recalls is the destruction of the World Trade Center towers in 2001.
* Uncanny X-Men: When the group first discovered the island of Genosha, they discovered that mutants had been enslaved to increase the quality of life for the human citizens. One mutant was used as a living power source for the monorail-like mass transit vehicle that he piloted.
* Uncanny X-Men, which doesn't help his credibility in Molly's eyes. (She's real.)
* Uncanny X-Men whose main strategy to motivate people is by throwing fistfuls of money at them.
* Uncaught serial killers the Zodiac and the Phantom both wore creepy homemade masks during some of their attacks.
* Uncertain Audience: It's not clear what kind of audience the work was aiming for.
* Uncertain Depictions: The exact race of the individual was in question to begin with, especially in the case of historical figures.
* Uncertain Doom: A character is last seen in a situation where they may have been killed, but it's not clear whether they survived or not.
* Uncertain Doom: A character is last seen in a situation where they might have been killed, but it's not clear whether or not they survived.
* Uncertain Doom: A character is last seen in a situation where they might have been killed, but it's not entirely clear whether or not they survived.
* Uncertain Doom: It isn't stated whether the character escapes a dangerous situation.
* Uncertain of whether or not he's ready to move in with his girlfriend, rather than simply telling her that,
* Unchained: Cash seated against the wall of (presumably) a barn, with a guitar case next to him.
* Unchained revolves around a female Uchiha Izuna abducting Senju Tobirama in order to force his clan to submit to hers. She keeps him compliant and manageable by lavishing gifts and attention on him, while he goes along to prevent her from focusing on the Senju's destruction. The arrangement started as blatantly mercenary, but the more time goes by, the more they start to feel genuine respect and attraction for each other.
* Uncharacteristically ghastly enemies from the usually bubbly and sunny
* uncharacteristic for Saint Francis to have written by way of its self-oriented tone, as he is well known for embracing a life of stark modesty compared to the wealthy lifestyle of his family. To Francis' credit, he did however write "Canticle of the Sun", which is more in line with his personal theology.

* Uncharted 2: Among Thieves after executing a soldier who stole from him: "I am surrounded by traitors and fools!!"
* Uncharted 2: Among Thieves, and actually considers Hitler a "great man".
* Uncharted 2: Among Thieves behind him. Nathan lampshades and complains about how the mooks continue to attack him and don't seem to notice the helicopter about to kill them all.
* Uncharted 2: Among Thieves both Nate and Sully wind up leaping off a cliff into a river to escape pursuing Russian mercs... with a direct reference to the Butch & Sundance example mentioned above.
* Uncharted 2: Among Thieves can also kill you in this manner during the final showdown.
* Uncharted 2: Among Thieves half-quotes this trope in the subtitle, and is what separates Nate from his opponents in the franchise as a whole; Nate isn't in it for the money or power but more for the journey and adventure. In this game Elena quotes the trope directly in response to Nate saying that he has no choice but to rescue Chloe from the borderline psychotic Lazarevic.
* Uncharted 2: Among Thieves, Harry Flynn does this to Nathan Drake at the end of the Museum mission, leaving poor Drake to rot in prison for 3 months.
* Uncharted 2: Among Thieves. His moustache is so badass that protagonist Nathan Drake rates it in his journal's list of scary things.
* Uncharted 2: Among Thieves, Nathan passes out from a gunshot wound and the cold of the Himalayas, then wakes up in a Tibetan village.
* Uncharted 2: Among Thieves Nepali army is occupied, nor why they think fighting guerrillas is more important than stopping a war criminal with an army of mercenaries from literally demolishing their capital and all of its temples. At a bit of a stretch, the damage Lazarevic inflicts to Kathmandu is so severe that it's not inconceivable that the army and guerrillas would temporarily put aside their differences just to drive him out.
* Uncharted 2: Among Thieves shortly before Nate crashes the train he started the game in.
* Uncharted 2: Among Thieves slaughtering the villagers wholesale, both Nate and the player are genuinely horrified and all the more determined to punch the baddie's face in and save the day.
* Uncharted 2: Among Thieves, there's an achievement for jumping into the pool at the top of the Nepal hotel. If you do, Nathan (who is attempting to retrace Marco Polo's discovery of Shangri-La) will yell out "Marco!" Chloe will be left utterly dumbstruck.
* Uncharted 2: Among Thieves, the scene where Nate wakes up on the train includes an instance of second-hand Gravitational Cognizance. At first, as he looks groggily around, everything seems normal, but then he looks out the window and realizes the train car is hanging vertically — and it is at this point that things start falling past him, having apparently waited until he was aware of the new direction for "down".
* Uncharted 2: Among Thieves, though not as much as Francis in the previous game.
* Uncharted 2: Among Thieves), until you deal him enough damage to activate a scripted sequence where he leaves, synonym of your victory. However, if you play with the "Choose your Weapon" bonus option, you can use the "innocent" one-shot Tranquilizer pistol, and it will work better than anything.
* Uncharted 2: Among Thieves, until you deal him enough damage to activate a scripted sequence where he leaves, synonym of your victory. However, if you play with the "Choose your Weapon" bonus option, you can use the "innocent" one-shot Tranquilizer pistol, and it will work better than anything.
* Uncharted 2: Among Thieves when Nathan and Chloe unexpectedly run into Elena in war torn Nepal, causing the latter to introduce herself to Chloe as 'last year's model'. However, Nathan and Chloe aren't in a relationship per se (they seem to be more "friends with benefits" than anything).
* Uncharted 2: Among Thieves, which should tell you everything you need to know about his political leanings.
* Uncharted 2: Among Thieves, while Drake is being chased on a train by an attack

helicopter, he comes across a large vehicle that ends up being an anti-air attack tank.
* Uncharted 2: Among Thieves who reforms the villain and saves the day" and uses the grenade on them in a final attempt to kill Drake rather than help him. Elena gets caught in the blast and spends the rest of the game at death's door but ultimately recovers from it.
* Uncharted 2: Among Thieves who was performing the motion capture and voice acting at the same time. He had to repeatedly hurl an empty propane tank, which isn't exactly lightweight, across the studio to act out the sequence.
* Uncharted 2: Among Thieves Zoran Lazarević, an infamous Serbian war criminal, and his mercenary company.
* Uncharted 2 with the occasional signal light and sign flying past. Don't get to a good position to avoid them? Bye bye, Nate.
* Uncharted 3: Drake's Deception: After a hectic shootout, Sully says, when back in their headquarters, "... so then guy says: Well, you better tickle mine too, 'cause now I gotta catch the goddamn thing."
* Uncharted 3: Drake's Deception, as Nate gradually succumbs to dehydration and exhaustion in the Rub Al' Khali desert Chapter rather than an outright injury. He starts chipper, but quickly his gait becomes clumsy and he leans on his knees when stopped. At a certain point, he's reduced to crawling, and stopping will have him collapse onto the ground.
* Uncharted 3: Drake's Deception, Drake fights terrorists on a cargo plane that he snuck aboard on from Elena's jeep. They become rather difficult to fight so Drake ends up opening the cargo hatch making everything and everybody fly out including him!
* Uncharted 3: Drake's Deception, if you look closely during the chase scene in the flashback to Drake's childhood, you can see Sully take down some of Marlowe's goons.
* Uncharted 3: Drake's Deception, Nate can sometimes perform this kind of attack in hand-to-hand combat; throwing his gun at an enemy and then knocking him out as he's catching it.
* Uncharted 3: Drake's Deception, Nathan Drake put his head on Elena Fisher's lap.
* Uncharted 3: Drake's Deception race to stop Talbot and Marlowe from reaching the lost city of Ubar.
* Uncharted 3: Drake's Deception was turned free-to-play about a year after release and added a ton of real money-only items. After the update, every normal unlockable could be bought with money too.
* Uncharted 3: Drake's Deception, which began in the midst of the game's development in late 2010/early 2011 and has left both countries embroiled in conflict and civil war ever since.
* Uncharted 3: Drake's Deception, while Drake and his older friend Sully (who's in his 50s) are exploring rural France, they come across the ruined remains of an old car from the 1920s, so Drake jokingly tells Sully that it's "your first car". Sully is somehow able to identify the exact year and model of that car.
* Uncharted 3, right? Flesh-eating bugs, collapsing chateau roofs, wall of water — yeah, they got bigger.
* Uncharted 4: A Thief's End, after Nathan Drake finishes his adventures in Libertalia, the game skips to 15 years later where Nathan and his wife, Elena Fisher have a teenage daughter named Cassie. During the epilogue, the player plays as Cassie as she explores the Drakes' home and learn about her father's past.
* Uncharted 4: A Thief's End and became the console's best-selling exclusive title, with over 8.7 million copies by the end of its release and over 16 million copies by 2019.
* Uncharted 4: A Thief's End at him the whole time when he's not trying to slash him), until he evades some slashes long enough to get a sword of his own around the pirate ship they're on.
* Uncharted 4: A Thief's End auction where stolen artifacts are traded. The place seems to be owned by a local crime family, as the premises are patrolled by mob enforcers serving as armed security.

* Uncharted 4: A Thief's End beat Shoreline there at all. Cue the mercenary ambush.
* Uncharted 4: A Thief's End had no idea what they were in for when they were in for.
* Uncharted 4: A Thief's End has microtransactions as well, but everything (including DLC!) can be unlocked by playing. To balance this out, the drops are random (albeit never duplicates) and it can take a while to earn enough "relics" to buy them.
* Uncharted 4: A Thief's End Meanwhile, Sam and Sully partner up and embark on another adventure in Portugal or Brazil.
* Uncharted 4: A Thief's End, Nate's arrival onto Libertalia is by way of shipwreck in the middle of a storm, and a lack of energy means he's slow and clumsy, resulting in an eventual slip off a climbing hold and passing out in a cave.
* Uncharted 4: A Thief's End raving fangirl willing to drive through buildings to get him.
* Uncharted 4: A Thief's End she teases him, so to get even with her he subjects her to this.
* Uncharted 4: A Thief's End things start blowing up). During a break in the chaos is this exchange:
* Uncharted 4: A Thief's End timeline, set at least two years after he told himself he'd stop adventuring and treasure hunting.
* Uncharted 4: A Thief's End, to locate the pirate colony of Libertalia in Madagascar.
* Uncharted 4: A Thief's End, when he pauses in a Malagasy market to play with a pet ring-tailed lemur. Unless of course he's bought an apple from a market stall earlier, in which case the lemur makes off with the apple.
* Uncharted4: Nate starys out as "retired" from treasure hunting, but quickly gets back into it when he reunites with Sam.
* Uncharted 4, your companion characters will not be spotted by enemies even if they are right in front of them, as long as the player is still in stealth and has not yet alerted the enemies themselves. This makes it very unrealistic, but the alternative would leave a player pulling their hair out.
* Uncharted and his friends frequently fight against entire private armies that have been hired by the main villains to help them search for lost cities and hidden treasures around the world.
* Uncharted are present in jungle and desert environments, respectively.
* Uncharted are revealed to have discovered famous hidden cities, searched for (and found) supposedly lost forever artifacts and treasure hordes, as well as belonged to the infamous secret societies of their day.
* Uncharted as Nathan Drake. But the character was already named that in the games, so it's either a coincidence or the makers of the film were attracted to Fillion due him also being named Nathan.
* Uncharted, as well as the AK-47s he finds left over from an old expedition into Shambhala.
* Uncharted between the quips. The games never seem to acknowledge that, by the final installment, Drake alone has murdered over a thousand people.
* Uncharted but with significantly tougher armor that allows them to withstand multiple headshots and prevents them from flinching from most attacks. The other variant carry powerful weapons, like sniper rifles, grenade launchers or rocket launchers, and can kill you in one hit if you're careless.
* Uncharted. Cities can have literally hundreds of buildings stretching into the distance, but you're unable to go near them, being limited to the ones important to gameplay.
* Uncharted: Drake's Fortune awards an instant kill on a headshot, and getting several headshots in a row (as well as hitting certain thresholds of career headshots) helps unlock bonus content.
* Uncharted: Drake's Fortune. Francis is also a crucial part of Nate's characterisation, since the latter draws a lot of pride and self-confidence from being the descendant of the former, and briefly believing that Francis failed in his quest and died alone crushes Nate's spirit.

* Uncharted: Drake's Fortune hired out a company of South American mercenaries to help them in their search for El Dorado on a deserted island.
* Uncharted: Drake's Fortune. It destroyed the Spanish colony on the island and, centuries later, did the same to the Nazi team that had come to find it.
* Uncharted: Drake's Fortune, Nathan Drake is captured by pirates and is only able to escape when his companion, Elena Fisher, breaks him out of prison by using a truck to rip out the bars on a cell window. In his defense, he was captured in the process of protecting Elena.
* Uncharted: Drake's Fortune often even saying "Do you really believe in this stuff?"
* Uncharted: Drake's Fortune of the game takes it for its monetary worth — death soon follows. It's suggested that the entire purpose of the idol is to punish people for excessive materialism.
* Uncharted: Drake's Fortune opens with the recovery of Sir Francis Drake's Lost Diary, by his remote descendant, Drake. The Diary then serves in this regard for adventures in both the Amazon Jungle and an uncharted island in the South Pacific... somehow, it always has the key for whatever puzzle stands in your way.
* Uncharted: Drake's Fortune shows Nate and Elena crossing a rickety old bridge, when (naturally) the bridge gives way beneath Elena precisely as Nate warns her about watching her step. She nearly falls to her death, but Nathan grabs onto her wrist just in time. However, her other hand is grasping her beloved video camera, and Nathan must urge her to give her his other hand, because he can't hold on for much longer. After a moment of hesitation on Elena's part, she let's her camera drop to the waters and wreckage below, and Nate is able to pull her back up to safety once she grasps onto him with her other hand.
* Uncharted: Drake's Fortune when it's revealed that Elena recovered the ring for him and Sully stole a boat from the pirates who stockpiled a crate full of Spanish gold.
* Uncharted: Drake's Fortune where Nate once again enters an ancient jungle temple in one of the early levels of the game and disturbs some bats with his torch (this time a fire torch rather than a flashlight).
* Uncharted: Drake's Fortune where the "realistic filter" option removes the vibrant colors and replaces them with muted browns and grays and puts in so much bloom that the game is virtually unplayable.
* Uncharted: Drake uses several wires and his pistol to zipline down quickly.
* Uncharted fame. He is fluent in English, Spanish, Latin, and Indonesian, and has some ability in Arabic and Tibetan.
* Uncharted gets thing he spent the whole game searching for, although he's more about the chase than the reward. Walking away from an expedition with no treasure and just a clue to a new location also pushes the characters into feeling this way about things.
* Uncharted: Golden Abyss on the PS Vita handheld gets the worst of this since it takes place in a single locale and can be completed in around 3 hours.
* Uncharted!". He's even more so in the sequel: when things get way too big for him, he's initially happy to walk away, but when it comes down to the wire, he jumps into the action with both feet. Of course, even when he does so, he knows he's in well over his head, and he barely makes it out alive. Lucky doesn't even begin to describe it; Sully even bows out of the adventure early because he "doesn't have [Nate's] luck."
* Uncharted Horizons, a smaller group in the area with many of the same people which split off after internal conflicts
* Uncharted is Sully exclaiming "Nate, noooooo!" when Nate dies while the game's death music plays. Sully does exclaim "Nate!" and "Noooo!" as potential exclaimations, but never both as one line.
* Uncharted makes liberal use of checkpoints, especially in platforming sequences and gunfights. Typically if you do a "milestone" of sorts, the game will mark it as a checkpoint. Unfortunately, gunfights are likely to kill you more often than the platforming sequences. Also, during the segments where you have to shoot while hanging from something, if you run out of ammo, the game will give you enough for

another clip. This way, you're never helpless.
* Uncharted, meaning no one got the money. Notably Nadine from that game is the only villain to survive because she specifically walks away from the job when she realizes it's gone off the rails even though that means she won't get her cut of the treasure.
* Uncharted movie, the captured Nathan Drake (played by Nathan Fillion, no less) has his captor introduce him to his mooks. Sure enough...
* Uncharted: Nate and Elena break up between the first three games. However, they remain together by the fourth game.
* Uncharted sends the enemy mooks on a wild goose chase, and, purely by coincidence, he happens to have sent them to exactly the right place.
* Uncharted series. Being made of the same cloth as Indiana Jones, no-one is surprised when Nate's idea of a plan is making things up as he goes along.
* Uncharted series have you play through the majority of the game fighting human enemies using the standard cover-based tactics of shooting games. Then they throw non-human enemies at you, requiring significant changes in tactics.
* Uncharted series. In the first game, she was originally hired by Nathan Drake to do a piece of his discovery of Sir Francis Drake’s coffin. After he and Sully conned her and left her behind to find El Dorado, she tracks them down by herself and gets tackled along in their misadventures. It happens again in the second game, where she’s on an undercover mission to spy on the war criminal Zoran Lazarevic, who’s looking for clues and artifacts that will lead him to Shambala. This leads to her again crossing path with Nathan Drake who’s trying to stop him. After that, she basically becomes one of the main characters for the rest of the series.
* Uncharted series, the Doughnut Drake costume makes Nathan very, very fat. As a side-effect, his voice is pitch-shifted downward by about 15%.
* Uncharted series uses this at least once per scene. Often said by roguish protagonist Nathan Drake as he suddenly finds himself face-to-face with a tank, or a helicopter, a slimy zombie-like thing, or a dude with a humongous gun. Or even just another wall that must be scaled.
* Uncharted Stars artifact that they hope will take them where they want to go.
* Uncharted: The Lost Legacy, Shoreline troops return as late-game antagonists now led by Nadine's former lieutenant.
* Uncharted: The Lost Legacy villain Asav calls protagonist Chloe a “halfbreed” when he finds out she’s half Indian and half white. When she outsmarts him, he says it must be her Indian side coming out.
* Uncharted this is said by Sully, usually in reference to his old age, but more meaningfully to Nate about his often reckless adventures and need to prove himself.
* uncharted waters. He was lucky enough to find Hispaniola (modern-day Haiti and the Dominican Republic) where he thought Asia was and died believing he had reached India (hence the name "West Indies" for the Caribbean islands).
* Uncharted Waters: New Horizons except Catalina (the only female captain among the six) can woo any of the waitresses he meets in major ports around the world with stories of his exploits, jewelry, or treasures until she falls in love with him, and there is no limit on how many girls can fall for him.
* Uncharted Waters: New Horizons is a British privateer in charge of decimating the Spanish Armada.
* Uncharted Waters. Pietro and Joao also do a fair bit of exploring, but the former is mainly after hidden treasures, while the latter's storyline involves an equal amount of naval battles.
* Uncharted Waters use this trope quite a bit. Your captain and some of your mates appear far more clean and healthy than standard (owing to limited portraits and tiny sprites, mostly), but starvation, scurvy, piracy, and rats are all common. Unprepared players leaving European/North African waters for the first time are often in for a rude awakening.
* Uncharted Waters, your character can rise from being a commoner to becoming a duke. In one ending of the first game, you become King of Portugal.
* Uncharted were mega-sellers, garnered tons of media attention, and wound up

becoming so successful that Nathan Drake has practically become a mascot for the Playstation, which has naturally started bringing some detractors.
* Uncharted, where each adventure features an encounter with something that establishes the myths and legends of the cultures around the world are at least based on something otherworldly.
* Uncharted, you can't unlock infinite ammo, one-shot kills, or the ability to pull out the last three weapons whenever you want (rather than having to find them) until you've beaten the game on Crushing difficulty (in which those cheats are disabled anyway).
* Uncharted Zoran Lazarevic is still alive so that the United Nations or whoever will actually capture and try him for his numerous crimes.
* Un Chien Andalou, the man wipes his mouth off, and replaces it with the woman's armpit hair. It makes about as much sense as anything else in this movie.
* Uncivil Wars, a mercenary trying to kidnap C-Ko has a craft that travels through sand like a submarine. B-Ko even use depth charges to attack the craft.
* Uncivil Wars/The VS, she stands there with an amusing look of "are you serious" on her face.
* Unclaimed, but the moralist has much more of a quirky and mischievous sense of humor than one would expect and the courtesan is rather emotionally repressed.
* Unclassified Encounter cannot be reversed, anyone bitten and killed by the Wendigo is turned into one themselves, and Wendigos cannot distinguish between friendly or enemy.
* Unclassified Encounter is about a series of paranormal and supernatural encounters and attacks taking place during World War II, ranging from Atlantean submariners attacking both Allied and German ships, Wendigos in the Ardennes, and even aliens attacking a British airbase during a German bombing raid.
* Unclassified Encounter of their loss of humanity and turn into a vicious cannibalistic monster.
* Uncle Al: In "Donkey Kong Country Abridged", Cranky Kong is portrayed as a perpetually horny creep who's afraid of having his Internet history exposed whenever the Crystal Titty is stolen.
* Unclean gene-seeds of Primarchs have this effect on the Marines who are blessed with it:
* Uncleanliness Is Next to Ungodliness: Evil characters who have poor bodily hygiene.
* Uncleanliness Is Next to Ungodliness! I'll smell however the fuck I want! And you're gonna have to take my disgusting body odor like a man, you squeaky clean pussy!
* unclean thoughts of three of the members of his harem, and a negative reaction to the implication of her sister in the same position.
* Unclearable Debris, a pile of rubble of some description that is apparently both solid enough you can't move any of it yet unstable enough that the game won't let you even consider climbing over it.
* Unclear if this actually counts, since it's less of a case of "A Form You Are Comfortable With" and more of a case of
* Uncle Arthur's Bedtime Stories. In the typical story, a small child would do something naughty (or fail to give themselves over to the Lord) and end up suffering horrible consequences, no matter how mundane their misbehavior was. Kids, do the dishes when your mother asks you to or else you will asphyxiate in the resulting housefire.
* uncle), as he ran away rather than face Koichi and his Echoes Act 3.
* Uncle Bonsai"), immediately followed by "I Never Learned How To Waltz," retelling the event from the bride's perspective.
* Uncle Bonsai's "Where's the Milk?", a woman's husband walks out on her under the pretense of going out to buy milk, prompting her to a series of milk-related philosophical quandaries:
* Uncle Boonmee Who Can Recall His Past Lives (winner of the Palme d'Or)
* "Uncle Boss," taped in 1979 but aired during the third season, sees Boss Hogg's corrupt nephew, Hughie, introduce Boss and Rosco to the state-of-the-art

technological marvel ... the video cassette recorder! Quite a bit of time is dedicated to explaining how one of these contraptions work. Although its purpose in the plot is to attempt to frame Bo and Luke for bank robbery (as a security camera is attached to the VCR), there may have been a subliminal message in it all – buy a VCR and you capture the Dukes on tape ... every week! In any case, the VCR has long met its match, and banks typically now use hard drives and hidden security cameras to monitor banks. In addition, note that Boss and Hughie hand-deliver the videotape with the incriminating evidence to the FBI ... but get detoured into a junkyard and are held up briefly by Cooter's magnet(!), which erases the tape; today, Boss could simply send the footage of his "bank robbery" to the FBI via a private Internet connection (such as file transfer protocol, or ftp, site), making his favorite scheme of hiring impersonators to pull off a "Duke boy bank robbery" even easier to accomplish without Bo and Luke even having a clue what's going on ... until federal authorities converge on the farm with warrants for their arrest.
* Uncle Bryn is proudly wearing a t-shirt printed with "My niece went to Greece, and all I got was this lousy t-shirt!" when the titular
* Uncle Buck break. Amazed, he tries banging the plate against the piano. It doesn't go as well.
* Uncle Buck, but has a moment of quiet melancholy when he sees that he's been removed from all the family photos, including his brother's wedding picture.
* Uncle Buck has this in regards to his relationship with his girlfriend, the car repair business owing Chanice. It's just one of several ways he's presented as being unreliable at the beginning of the film.
* Uncle Buck. It lets out a boom like a high powered rifle after being turned off for several seconds and leaves a smokescreen the size of Kansas in its trail. Its name is also "The Beast".
* Uncle Buck. John Candy's character survives a bowling ball falling from a tall closet shelf onto his skull.
* Uncle Buck: When Cindy calls to check how things are going, the issue of providing water for the dog comes up. Buck replies that he's been leaving the toilet seats up.
* Uncle Buck, where John Candy, playing the titular uncle, goes to see the principal of his niece's school, who has a large mole:
* Uncle Buck with his niece's boyfriend Bug by bragging about having a hatchet that he keeps in his car for maiming and is sharp enough to castrate a gnat. When his niece simply derides it as a bluff, Buck actually takes said hatchet out of the trunk.
* Uncle Chaim and Aunt Rifke and the Angel convey the millennium of grief and pain he's suffered, but when he's shown genuine kindness for the first time, he reacts with a smile that's every bit as beautiful as his eyes are sad.
* Uncle Chance is revealed in one episode to have a rather huge mane of hair underneath the bag he wears on his head.
* Uncle Chuck, a victim of roboticization who regained his free will, nonchalantly mentioned that the process left his mind
* Uncle Croc's Block has recurring live action character Steve Exhaustion, the $6.95 Man, a cyborg who is always falling apart. Another direct parody of Steve Austin the Six Million Dollar Man.
* Uncle Dane personality who gives advice on using classes and streams games
* Uncle does not have an immediate reaction to seeing the protagonist again once she arrives in Tokyo from Kyushu after graduation from university. Instead, he continues to think of her as the little girl he used to babysit, and only begins to become aware of her as a woman halfway through his route, with a sudden corresponding change in the way he treats her once the realization hits him.
* Uncle Dudley. Oddly he seems to be the only example, since all the other kids were either raised by their biological parents and/or adult superheroes.
* Uncle Dynamite by the titular Uncle Fred whose nephew Pongo apparently elicits this reaction from girls (while not a strong or very heroic guy himself). (When Pongo's polar opposite Bill Oakshot, a large sturdy guy falls in love with the same

girl he suggests that he'd be unable to use the same strategy and has to be the opposite, the "dominant male" - which eventually works for Bill.)
* Uncle Floyd and the various incarnations of his (deliberately-cheap-looking) program.
* Uncle Frank: Charlotte, a female friend of Frank's, pretends to be his girlfriend, along with his partner Wally's, so their families won't know that they're really gay.
* Uncle Frank: Frank's mother says she knew already that he was gay when he's outed, chalking this up to maternal intuition.
* Uncle Gamlen fits this trope to a tee. He frequents the city's brothel on a regular basis and, if Hawke is female and romances Isabela, he eagerly inquires what the sex is like.
* Uncle Grandpa: Again, rounded art-style but with relatively thick outlines.
* Uncle Grandpa and his brother Santa Claus have a tenuous relationship stemming from a 1983 talent competition that went awry. Though they do eventually manage to bury the hatchet.
* Uncle Grandpa and how they tend to favor Nicktoons over all other shows.
* Uncle Grandpa. Anyone who rides a Giant Realistic Flying Tiger is automatically ten kinds of cool.
* Uncle Grandpa enlists a few famous baseball players to help when a Little League team needs help. The guest stars are the cartoon versions of Adam Jones, Chris Archer, David Price, Jose Altuve, and Noah Syndergaard.
* Uncle Grandpa episode "1992 Called". Pizza Steve tells Uncle Grandpa "1992 called, they want their pants back", which turns out to be literally true.
* Uncle Grandpa episode "Mystery Noise", the title character wakes up yelling "Spaghetti!"
* Uncle Grandpa episode "New Kid", Uncle Grandpa first appears to Tommy as this.
* Uncle Grandpa episode), The Great Western Spaghetti, Ball Room, and most of the recent episodes.
* Uncle Grandpa episode "Uncle Grandpa Babies", complete with Giant Realistic Flying Tiger as a cub and Pizza Steve as a pile of dough.
* Uncle Grandpa had one of these during lunch time, with every member of the RV claiming that another one of them is driving, only for them to point out that they are right there. This includes Pizza Steve saying that the RV is driving itself... only for the RV to ALSO be having lunch inside itself.
* Uncle Grandpa had the gang get attacked by zombified pets, including a living pet rock.
* Uncle Grandpa in "Charlie Burgers", when Uncle Grandpa has to find a way to pick up a ball off Old Man Johnson's roof without going into his yard:
* Uncle Grandpa: In "Space Emperor", Uncle Grandpa gets this from Melvin, who he had mistaken for an actual space emperor and then sent to another dimension.
* Uncle Grandpa: In the "Prank Wars" episode, three of the contestants at the Pizza Eating Contest look like Moe, Larry, and Curly.
* Uncle Grandpa: In "The Vacation", Uncle Grandpa decides to take a break on a tropical island paradise, where a lot of things bear a strong resemblance to Uncle Grandpa, who they believe is the chosen one. He spends most of his time trying to relax while waterskiing, zip-lining, scuba diving, and eating hot dogs, all while the island is in danger of being destroyed, and after persistent insistence from the villagers, U.G. reluctantly decides to jump in the volcano and save the island.
* Uncle Grandpa is the only human on the RV, though most of the kids he helps are also humans.
* Uncle Grandpa. It goes so far as parodying two of the most common methods of purchasing products: Visa becomes Pizza (as in Pizza Steve) and MasterCard becomes MisterGus.
* Uncle Grandpa) Mr. Gus once talked about a pair of shorts that he last wore in 1993. That is, 1993 million years ago.
* Uncle Grandpa, said character's weird ways and scientifically impossible antics are too much for Pearl.
* Uncle Grandpa, so years later she wants to run him out of business so other kids

don't suffer the same.
* Uncle Grandpa the title character makes a funny face that's a real human face that's constantly making goofy facial expressions. Said giant realistic funny face is series creator Pete Browngardt wearing a fake mustache and wig.
* Uncle Grandpa this trope by helping one student actually eat his own homework, giving him an A+++++-+ for also saving his students.
* Uncle Grandpa), Uncle Grandpa was finally picked up in early 2013 and started airing on Cartoon Network later that same year.
* Uncle Grandpa with The Dirtbag, a slovenly, sleazy-looking old man... who, despite his questionable hygiene and appearance, is a poetic soul with nothing but love and kindness for everyone and everything in his heart.
* uncle. He is the only monarch who knows they exist and is preparing to defend the realm against them.
* Uncle Iroh is a mentor to Prince Zuko and not only helps to protect him but also helps him in his destiny to side with Aang to stop the Fire Nation's conquests. Interestingly, he is also the Obi-Wan to Zuko's Anakin Skywalker.
* Uncle Iroh is a pretty cheerful and patient guy (he has to be to put up with Zuko's Angsting). He finally loses his patience when Zuko breaks into the Dai Li's underground base to kidnap Appa for a chance at capturing the Avatar, berating Zuko for
* Uncle Iroh is one of the few firebenders who is clearly good right from the start, and he is a fat, blunt-featured old man.
* Uncle Jack, while being a ruthless hardened criminal and leading a gang of
* Uncle John's Bathroom Reader (a humor/reference book) has always included the following:
* Uncle John's Bathroom Reader, but it was four hours of polka music instead. (And they didn't specify what kind of music the offender was blasting from his truck.)
* Uncle John's Bathroom Reader he stabbed the actor playing Jesus, who shouted "Jesus Christ, I've been stabbed!" and was immediately rushed to the hospital.
* Uncle John's Bathroom Reader the element that makes this qualify; in other versions, the dreamer specifically states that he had the dream at a time when he was at work.
* Uncle Junior gets his hand stuck in the drain of the kitchen sink. Near the end of the episode we discover that Uncle Junior never got his hand unstuck, and has been standing in the kitchen for an entire day.
* Uncle Junior, Tony's uncle, and of Livia's generation. In the first episode, he is plotting to kill a rival at his favorite restaurant. He becomes boss of the North Jersey Mob shortly thereafter, and conspires with Livia to kill Tony.
* Uncle Kracker album spent nearly five years in development hell before it was finally released in 2009.
* Uncle Kracker in their song "What You're Missing" - "That's 'Cracker' with a 'C', not 'K', or 'Uncle', understand?".
* Uncle Kracker's hit 2003 cover of Dobie Gray's 1973 classic "Drift Away" features Gray himself singing the final verse.
* Uncle Kracker song "Smile" features the line "You make me spin like a record..." It is followed by a line referencing the station on which the song is playing; for example, "You make me spin like a record/on Mix 93.3."
* Uncle Kracker stations in Detroit began spinning it so heavily that it entered the country airplay charts, the song was remixed for the country format and went on to become a top 10 country hit.
* Uncle Mortys Dub Shack is that the characters got numerous Asian movies to dub, but no scripts to go with them. So the episodes featuring the movie clips are gag dubs of the characters trying to make sense of what the movies are even about.
* Uncle. Not only is he an expert Martial Artist, but also one of the most powerful Chi Wizards in the world, helping his nephew save the world on a regular basis with his extensive magic.
* Uncle Pennybags: A rich character who uses their wealth to give the middle-class and the poor a good time.
* Uncle Pennybags: A wealthy person who uses their wealth to help out the poor and/

or give those less wealthy than them a good time.
* Uncle Pennybags: I'm a rich man who is generous to give money to those who really need it.
* Uncle Pennybags trying to control as much of the world as possible using their wealth.
* Uncle Ray's House spoofs the "news ticker" variation of this trope, by having the news report relate to the show in question.
* Uncle Ruckus is an African-American white-supremacist with a strong hatred of other black people. It goes far enough that he also denies being black, and even claims to be a white man with a fictitious skin disease that makes him look darker. It is later revealed that most of this
* Uncle Ruckus is mopping a hospital floor when he's suddenly confronted by three gun-toting thugs demanding to know where Gangstalicious is. Ruckus' (surprisingly even-toned) reply: "Could you repeat that again? I couldn't hear you over the sound of me shitting myself."
* Uncle Ruckus reveres all white people, which of course includes preferring white women. It's the main reason he tolerates the DuBoises.
* Uncle Ruckus served on a jury that convicted a blind black man accused of shooting (from 50 yards away) three white women with a rifle and delighted in shouting racist threats (complete with a hangman's noose) from his seat in the jury.
* Uncle Sam himself replaced the almost entirely forgotten Brother Jonathan as national personification of the USA. (Jonathan was the brother of Britain's national personification John Bull, the satirical joke was that they did not get on although they looked almost identical). Brother Jonathan is referred to in the
* Uncle Sam is knocked unconscious with spray paint, has his leg broken, and is knocked into an empty grave, which is then filled in.
* Uncle Sam — he's able to detect that one of Golden Eyes' admirers is a German spy just by looking at him:
* Uncle Sam's. Golden Eyes, an ambulance driver and Bill's sweetheart, has been captured by German officer Hugo Von Schwatzenburg. Upon discovering that his captive has stolen German intelligence and secreted it back to the American side, Hugo drags her to the top of the trenches with the intent to shoot her in front of the onrushing American forces - Bill and Uncle Sam tackle him just as he raises his weapon:
* Uncle Sam soldier returns home and begins killing people he deems unpatriotic.
* Uncle Sam, there's a sequence where Sam meets up with Columbia to discuss the good old days.
* Uncle Scrooge and the uprising of the machines), by Zemelo, Stabile and Franzò (2017), the third and fourth episode see a similar trasformation, with mechanical legs, arms and a big round energy emitter on the front.
* Uncle Scrooge and the witches in action) by Cimino and Cavazzano (1971).
* Uncle Scrooge. Apparently it involved, among other things, fireworks and animals in ridiculous costumes.
* Uncle Scrooge). He finds the job simple enough, until he gets a letter from a 10 foot tall teenager to be delivered to the world authority on Venus. On his second trip (he accidentally went to Mars on his first — no-one let the irony escape him), he arrives to and finds that the planet is inhabited exclusively by 10 foot tall teenage girls (Mars, on the other hand, being occupied by scaly green winged letterboxes).
* Uncle Scrooge - not realising that this will, of course, make Scrooge force him to steal them. While trying to do so, Donald succeeds in starting a fire...
* Uncle Scrooge once boasted about his wrestling skills (to Roosevelt, while they were fighting) by mentioning that he once met Sitting Bull. Back then he was known as "Standing Bull." What makes this even more impressive is that Rosa definitely
* Uncle Scrooge remember the combination, which leads to difficulties when the bird flies away...
* Uncle Scrooge story, after another unsuccessful attempt by the Beagle Boys to break into his Money Bin, Scrooge decides to move his fortune to somewhere easy to

defend. He converts all of his coins into high denomination notes and stores them in a spherical water tank atop a hill completely surrounded by open ground. In one of their better plans, the Beagle Boys trick their way on to the grounds, cut the tank loose and roll it away, with Scrooge still inside.
* Uncle Scrooge story, "McDuck of Arabia," one of the nephews is kidnapped by the villains and is taken out into the infamous "Empty Quarter" desert of Arabia to force a friend to lead them to the treasure of the Queen of Sheba. Along the way, the nephew seems to be throwing about stones randomly. In reality, he is able to secretly create an arrow out of those stones and thus gives his pursuing brothers and a local troop of Junior Woodchucks some idea of where the villains are going.
* Uncle Scrooge was strongly tempted to write more meetings between them when he took over the Scrooge McDuck Universe but resisted the temptation to ruin the tragic romanticism of this trope.
* Uncle Tomfoolery, but some of his work (particularly the song "Nobody") were rather serious takes on the racism of the day.
* Uncle Tomfoolery, playing on Japanese stereotypes of black people and foreigners in general.
* Uncle Tomfoolery: Stereotypical black guys who are portrayed as comic relief.
* Uncle Tomfoolery: Using ethnic stereotypes for an attempt at comedy.
* Uncle Tom's Bungalow of Little Eva and Topsy briefly switch skin colors when they get scared.
