* Victim 2010 into a copy of his dead daughter through plastic surgery and brainwashing.
* Victim, a lawyer nearing 40 gets to know a young man about half that, who hero-worships him and with whom he shares a mutual attraction, though the older guy breaks it off because "he was getting too fond of me" — or, as his wife suggests, "you were getting too fond of him". Said young man has also had a relationship with a middle-aged bookshop owner, who is deeply in love with him and wants to give him a home and a job for life.
* Victim: Among the other issues the British Board of Film Censors had with it over its handling of homosexuality was that the film's most despicable villain is also given dialogue and a speech about just how wrong homosexuality is ... the general position of society at that time, when it was still a criminal offense in the UK. That was completely deliberate on the filmmakers' part.
* victim, and when the police learn precisely what kind of person he was, they outright tell his killer to plead self-defense.
* Victim be one criminalizing homosexual relations, as it only leads to gay men getting blackmailed as they're forcibly stuck in the closet.
* Victim Blaming: Blaming someone for the tragedies happened to them is heinous.
* Victim Blaming: Oh shut up! It's all your fault that you're a victim of an injustice!
* Victim Blaming: Someone did something bad to you? Well, it's your own damned fault!
* Victim: Dirk Bogarde was, like Melville, a closeted gay man. He not only wasn't out at the time, but never actually came out publicly (friends however knew of his orientation).
* Victim from the first episode. He has no superpowers yet he put up a good fight to the point that the Animator had to close the program to defeat him: Normally, he just beats them up.
* Victim, gays are being blackmailed for their illegal homosexual activities. (This groundbreaking film was made six years before homosexuality was decriminalised in Great Britain. It was also the first movie to use the word 'homosexual'.)
* victim is a woman. Furthermore, saying anything negative about the victim or positive about the criminal is considered equally deplorable, as is supporting people who sympathize with the criminal.
* Victim is outspokenly homophobic, but that doesn't stop him doing his utmost to bring the blackmailing ring to justice.
* Victim, Laura Farr can't stop loving her husband, despite her gradual realisation that he can never return her feelings.
* Victim Mack Rell was described as a "hitman" who was brought down to the precinct numerous times. Unlike de Killer, though, Rell was reckless, unrefined and unprepared (hence why he was caught easily).
* Victim of the System prosecutorial or police misconduct, unlike the things you see on TV.
* Victim of the Week — she's murdered, but thanks to her work, an innocent man will be freed from prison.
* Victim of the Week an envelope with a poisoned seal, knowing that the victim will

lick the envelope, seal it and place it in her bag. Then, after she dies, the killer doses her glass with poison to make it look like she had drunk it.
* Victim of the Week As the second man lays dying, she sits next to him and stares into his face.
* Victim of the Week at first because of his clothes and unusual bone structure (from a congenital disease) before the investigators figured out that he was one of the masters of ceremonies of an alien-styled marriage chapel. His friend (who had buried the man after killing him accidentally, because he knew that was the man's last wishes) was the master of ceremonies of a rival Elvis-styled chapel.
* Victim of the Week burns down their car dealership while attempting to make it look like an attack aimed at his late partner. Vera is suspicious when she checks his finances, and discovers that the only bill he has paid in the last three months is his insurance premiums.
* Victim of the Week dies from a head injury several hours after receiving it in a fight.
* Victim of the Week enough physical capability left in him to reach for the switch that shut down the alarm and push his wife.
* Victim of the Week episode "Breaking News". Determined to get out of reporting "fluff" pieces, she stumbled upon corporate corruption and was murdered by a fellow reporter who'd been taking payments to keep the story quiet.
* Victim of the Week episode "The Adventure of the Eccentric Engineer".
* Victim of the Week finds his body and stops short. Her husband walks into the back of her, causing a dramatic drop of the plate with a cake she is carrying.
* Victim of the Week for funsies. He has no idea he's hit anyone until he's arrested, whereupon it's pointed out to him that this trope is the reason it's illegal to discharge a firearm within city limits.
* Victim of the Week, given how she's dressed and the part of town she's in. They're confused when her autopsy shows her to be in perfect health and with good hygiene, something highly unlikely for a working girl and soon realize that she was just a typical college girl out for a night of partying. And her killer didn't mistake her for a hooker either—it was her boyfriend whose sex games got too rough.
* Victim of the Week> How does she do that?" as she squints and tilts the photo.
* Victim of the Week had been trying to talk his girlfriend, who works at a currency exchange, to leave the back door unlocked so he and an accomplice could rob the place when nobody was there, but she refused.
* Victim of the Week. His C.O. describes him as the most unpopular sergeant in the British Army.
* Victim of the Week. Horses are then stampeded over the body to make it look like he was trampled to death.
* Victim of the Week in "Saints and Sinners" is buried alive in an archaeology trench.
* Victim of the Week in "See You in Court, Baby" is a ruthless divorce lawyer who persuades a woman into pursuing a divorce she doesn't actually want.
* Victim of the Week is an actress, who turns out to be an emancipated minor now married to her manager. The dialogue implies that she bribed her parents to keep them from contesting the emancipation.
* Victim of the Week is a professional motorcycle racer, one of the suspects is a paraplegic former racer whom the victim had "accidentally" caused to crash in a previous race.
* Victim of the Week is a Vanguard member who Tooner kills in retaliation for their activities.
* Victim of the Week is chloroformed by an attacker hiding in the back of her car.
* Victim of the Week is decapitated by a single blow from an Indian sword.
* Victim of the Week is found locked inside a bank vault. Suspicion naturally falls upon the only person with keys to the vault. Father Brown believes him to be innocent and sets up to discover how this seemingly impossible crime could have been committed.
* Victim of the Week is found slumped dead over his typewriter with a gun at his

feet in an outbuilding with a window that doesn't open and a door bolted from the inside. However, Father Brown notices that there is not enough damage to his head for him to been shot with the gun pressed to his head.
* Victim of the Week is injected with black mamba venom. The killer then unlocks the black mamba's cage so it will look like the victim was bitten by the escaped snake.
* Victim of the Week is poisoned by a lethal dose of poison being placed on the end of his pen before he retires to write a speech. The killer then poisons the dinner being eating by everyone, including themself, with a milder dose in an attempt to make it appear he died from food poisoning.
* Victim of the Week is shoved under an illegally parked car. The body gets snagged on the undercarriage of the car and is dragged away when the car is towed.
* Victim of the Week is stunned and dropped on to a conveyor belt into an abattoir which carries into the gassing chamber where is asphyxiated with carbon dioxide.
* Victim of the Week opens the door of a brand new high tech public toilet and is washed off her feet (along with a bystander and the corpse) by gallons and gallons of water from the automatic cleaning feature.
* Victim of the Week shots. These didn't work for the government, however, as they had a number of Russian mob tattoos.
* Victim of the Week sophistry: he promised the would-be medic that he would be trained to save lives, just not that he'd be doing so by practicing medicine.
* Victim of the Week The finger prints lifted off the car mounted GPS units did not match of the lady, and the CSIs discovered that when she found out where the insurance agent went for coffee everyday, she asked her grandson to program a course on the GPS unit, he did so, and the old lady then used the directions to find the cafe, and kill the agent.
* "victim" of the week: The victim (an ex-cop who went renegade and started robbing armored trucks) is Denny Jardeen, who ends up having to go to Dr. Oliver Bloom for a chipped tooth that he gets in a scuffle with an armored car driver (in the resulting scuffle, both drivers were shot dead). As an ex-cop, Dr. Bloom is on Jardeen's medical plan. While going through the routine anesthesia, Jardeen, evidently under the anesthesia's influence, blabs to Dr. Bloom about the heist as well as the hiding place for the money, to which Dr. Bloom and his assistant Teri steal the money. Unfortunately, Jardeen, either from lingering memories of what happened, or having put two-and-two together, confronts them in their office while they are working on a patient, and he is killed when Teri strikes him with the roots of a giant plastic tooth after a fight. The patient Dr. Bloom is working on happens to be Randy, who tries to convince Stottlemeyer and Monk and anyone else around him that he saw the murder (Dr. Bloom cleans up the office after the fight and dumps the body as well).
* Victim of the Week to risk their life a second time. Cue embezzler Leon Tao flying out the window and landing at his feet, having pissed off yet another gang of thugs with big bank accounts.
* Victim of the Week, turns up dead, their appearances in flashbacks make them this.
* Victim of the Week until the guy turned on her. She gets arrested along with him.
* Victim of the Week was a young marine about to ship out to Korea. On the day he was murdered, he defeated a petty officer who was the ship's reigning boxing champ, making the petty officer a viable suspect. The opening scene of the episode is the boxing match between them.
* Victim of the Week was corrupt and received kickbacks for sentencing kids to a specific juvenile detention center (the bigger the sentences, the better) and b) the murderer was a young man that had his whole life destroyed (up to and including being abused at the center) because the judge sentenced him there for stealing a pack of gum.
* Victim of the Week was kidnapped by a "coyote" (someone who illegal immigrant families pay to smuggle their loved ones into the country), whose trademark is to cut off the victim's ear as a warning to those who can't pay him.
* Victim of the Week was revealed to have had at least a room full of sexual

conquests and a ledger of others. It turned out he was a "pick-up artist" who worked with two friends, one of whom admitted he struck out 90% of the time.
* Victim of the Week was subjected to this treatment via a radio hidden in her house's ventilation to make her hear voices.
* Victim of the Week; when he refuses to make a portrait of her on the grounds that there's something fake in her beauty and he won't paint it, she attacks him.
* Victims always act like gaping holes in their bodies are no big deal!
* Victims of paracetamol overdose can appear perfectly healthy for several hours despite suffering irreversible liver damage.
* Victims of Parkinson's disease sometimes describe their inability to walk with ease by saying it's like having their feet glued to the floor.
* Victims of shock frequently complain of feeling cold, and cold clammy (diaphoretic) skin is a major sign of shock, along with rapid heart rate and low blood pressure. Sudden complaint of cold in a trauma patient or one with known risk of shock (from infection, heart failure, internal bleeding, etc) is a very ominous sign indeed.
* Victims of the Week... and then Gibbs walks in and berates Kate for the poor quality of "her" sketch.
* victims was 17-year-old Ted Kaczynski, better known as The Unabomber.
* victim, who the audience soon sees coming out a few minutes after she did.
* Victim with this knowledge, knowing how personally Bogarde must have felt his role, certainly adds an extra level of heartwarming to the movie.
* Victor also fits this trope. Despite being the villain, he is proven to really care about the students deep down, when he kicked Vera out for hurting the students and sacrificing his last tear of gold to save a dying Joy Mercer.
* Victor & Hugo episode "Do-In-Yourself" type 8 happens to Victor while trying to disable an alarm system in a jewelers, ending in him electrifying himself, to the total disconcern of anyone watching.
* Victor & Hugo isn't driving, either...then they realise that Interpol, their pet parrot, is the one driving.
* Victor & Hugo. The titular brothers' boss, Mr. Big is a mouse in a huge human suit designed to MAKE him seem big and intimidating.
* Victor & Hugo - Victor's insults directed at Hugo often take the form of 'Brain of a (item)!' and they are often tied in to whatever is relevant to the situation.
* Victor and Rosa Vasquez are this to Billy and the others in the New 52 reboot of
* Victor and Valentino due to their similar premises that involve a pair of siblings (or half-siblings in the case of Victor and Valentino) spending the summer with an elderly relative in a town that has more than meets the eye.
* Victor and Valentino: In "The Collector", Val inadvertently trades Victor to a creepy collector named Chip to regain a priceless coin from his coin collection that Victor spent. When Val goes to get him back, he finds that Chip turned Victor into a doll and has likewise done so with other unfortunate victims. Chip awakens the dolls and sics them on Val, with the dolls chanting "Join us" as they try to capture him.
* Victor and Valentino: In "The Dark Room", the brothers try to take a picture of chupacabra. It turns out that the chupacabra is real, but it's a benevolent, vegetarian who loves goats. It also hates having its picture taken.
* Victor and Valentino is a probably-god-definitely-fashion-designer. During the song "In Your Own Skin", his mannequins and outfits are his backup dancers.
* Victor and Valentino ran to celebrate Halloween, as well as to celebrate the first day of Día de Muertos (Day of the Dead in Spanish) in Mexico. Justified in the case of the latter, as the series is set in Mexico.
* Victor and Valentino so he can grow a mustache. The mustache is alive, prehensile and independent, and it wants more of the tonic to grow a lot more.
* Victor and Valentino, the duo are trapped in a maze, but come across Achi, who is running a stand of useful items, but the catch is that they can only take one. Victor impulsively picks the only useless item there, the luchador mask. However, when the duo return to the world of the living, they discover that the luchador

mask allows them to see the undead spirits (and discover that their grandmother is... otherworldy) in their otherwise desolated town.
* Victor and Valentino: Two half-brothers encounter various, predominantly Mexican, supernatural beings in their hometown.
* Victor and Valentino: Valentino takes his new girlfriend Matty to the local cat cafe. All the cats freak out and start hissing at her. She tries to play it off as cats being allergic to her, however she's actually a monster in disguise. She just wants to fatten u Valentino and eat him.
* Victor and Yuri, which refers to a more heavenly, all-consuming love similar to agape.
* Victor Benjamin, The Savage Gentlemen wants to have the societal respect that comes with being cultured and the personal respect that comes with being a brute. This mostly results in him refusing to mingle with the lower classes in his spare time until he
* Victor Borge had a comedy bit where his piano sounds wrong... so he takes the row of keys out, flips them, and it sounds perfect.
* Victor Borge, in his "Lost Mozart Opera", described the stage for the opera as having two huge trees, on on either side of the stage. When the voluptuous soprano sings her 'death aria', he then said, "And then she stabs herself, right between the two huge trees!"
* Victor Borge made a routine out of this: he would play a piece from memory, but throw in a single off-key note, which gradually multiplied into three bad notes, then five, then an altogether unrecognizable mess. At this point he usually stopped, got hold of the sheet music, and played the song again while reading very carefully — until he started hitting the same bad notes again... the implication being that he wasn't a bad player, he'd just learned the piece from a hopelessly erroneous transcription.
* Victor Borge once made a joke that his uncle tried to invent a soft drink called 4-Up, then 5-Up, then 6-Up, before dying brokenheartedly from failure, unaware of how he close he had been to success.
* Victor Branco pulls the same thing, declaring that even if Max takes him in, he'll walk. Max responds "You'll walk with a limp" and
* Victor Buono, passed away, they killed off his character as well. Several episodes afterward mention or revolve around Jim receiving a large sum of money from his inheritance.
* Victor Cachat is described as average in size, slim and wiry. His girlfriend is the product of generations of selective breeding for size and strength and described as an 'ogress' by people first meeting her.
* Victor can steal proficiency from others by proximity, although this only works for mundane abilities. However, he retains these skills, while the victim of the skill drain can only recover part of the lost proficiency with time.
* Victor Comstock is struck and killed by a falling bomb during a broadcast from London at the end of Season 1 of
* Victor Creed, a clawed and beast-like creature with abilities similar to
* Victor Dashkov's earth magic. He can use compulsion almost as good a spirit user and can cause minor earthquakes.
* Victor Drazen could have escaped the country if he wasn't so busy trying to kill Jack.
* Victor "duties," which ended with Cashmere calling her brother a whore and throwing a vase at his head after he said it was no big deal.
* Victor Fleming - both in the same year, no less. The rest of his filmography is long forgotten, and today he is only brought up as a trivia question to talk about how those two rival films shared a director.
* Victor Frankenstein and Freddie Fox provide plenty of eye candy for fangirls who enjoy seeing good-looking actors in period costumes.
* Victor Frankenstein: At the SDCC panel, a clip was shown where Victor and Igor are wheeling a gurney down a hallway, and Victor repeatedly yells, "Big presentation in Hall H!" The SDCC panel took place in Hall H, and many of the attendees laughed and cheered at the line.

* Victor Frankenstein features a figurative and non-romantic variation. After Victor rescues Igor from the circus, he essentially "transforms" the latter into a younger version of himself. Victor fixes the hunchback's deformity so that Igor is no longer a cripple, he gives Igor fashionable clothing which is very similar (if a little less ostentatious) to his own, and encourages Igor's scientific talent by having him work as his lab assistant. Victor gradually grows to care for Igor, and ends up needing Igor more than Igor needs him.
* Victor Frankenstein. In one incredibly uncomfortable scene, he gropes a dead woman's breasts before
* Victor Frankenstein: Only Igor is willing to support and tolerate Victor's radical ideas and eccentricities. Almost everyone else views the latter as an embarrassing nuisance at best, or at worst, a lunatic who will bring ruin to the natural order.
* Victor Frankenstein the Lazarus Fork device is an alloy that tirns electricity into "Vital Force."
* Victor Frankenstein, Victor demonstrates to Igor the results of his electro-vitality experiments by using a pair of disembodied eyes in a tank of preservative gel that follow a lit match, despite not being attached to a brain.
* Victor Frankenstein. Victor gets really, really drunk and raves about the concept (and test-tube babies) to a couple of ladies at a nightclub.
* Victor Frankenstein: Victor proclaims to Igor that they will create a man after their own image. The process involves stitching together dead body parts and reanimating the corpse with lightning.
* Victor Franko is a member of the Mafia (and a convicted murderer), has no respect for authority, and makes several attempts to escape and/or undermine Reisman's authority.
* Victor Gains Loser's Powers: The character gains the opponent's powers after defeating them.
* Victor Garber, but was criticised in Northern Ireland for apparently using a soft southern lilt, rather than the much harsher Ulster accent.
* Victor Garber: Canadian actor, publicly referred to his homosexuality in 2012.
* Victor Garber episode "Duet" features an alternate universe where Stein is married to a man.
* Victor gets an erection in his "Tabula Rasa" state because of latent attraction to Sierra (who is showering right next to him). This is regarded as
* Victor Gruen was an architect best known for conceptualizing the modern shopping mall, with many of his notable projects including Southdale Mall in suburban
* Victor Herbert is best remembered as an operetta composer, but he also wrote a concerto for the cello (which he played) and put his musical theatre career on hold for a few years while leading the Pittsburgh Symphony.
* Victor Hoeness, a kalachakra who, by speaking to others who would see the technologies of his future, brought advanced tech to the court of a 17th century French king. This began a cataclysm which changed history enough for many kalachakras to simply cease existing. Once the remaining Cronus Club (a group of surviving kalachakra) got their hands on Hoeness in his next life, they began torturing him as punishment for his action and in order to discover his point of origin (date and place of birth). When he finally broke and told them, they cut off his tongue, ears, hands and feet, gouged out his eyes and bound him in a metal straitjacket. When he died, the Club simply abducted him and repeated the proces until he died a second time. However, after two lives and about two decades of torture, baby Victor wasn't able to use his hands, eyes, tongue or ears. The Club, upon discovering that they had essentially broken Victor, decided to kill him and abort his mother in the next life, thus removing Victor from existence.
* Victor Hugo, and they harshly criticized the film itself as a vulgar commercialization of Hugo's story.
* Victor Hugo as part of an effort to save the eponymous cathedral from demolition. He succeeded (and indirectly launched the historic preservation movement in the process), as the public outcry that resulted convinced the French government to reverse course and restore the cathedral instead of tearing it down.

* Victor Hugo expecting it to garner a large fanbase of teenage and twentysomething women.
* Victor Hugo. Gwynplaine is a disfigured man, and the only way he can make a living is by showing off his disfigurements to an audience. This always spread laugh among them, but Gwynplaine himself always feel mocked.
* Victor Hugo. How she remained pure and naive when hanging around with a bunch of thieves and prostitutes, and doing sexy dances in public, is confusing. Most adaptations deal with this by making her a much more worldly woman.
* Victor Hugo wrote a poem about an eye stalking Cain wherever he went. At the end, he digs a grave for himself, goes to live in it, and the eye is still there. The last line - "L'œil était dans la tombe et regardait Caïn" ("The eye was in the grave and looking at Cain") - is proverbial in French.
* Victoria 2 adds a suppression mechanic to stop ideas you find dangerous. However, it is a temporary reprieve—the suppressed movement will most likely show up again after a few years and be more radical and inclined to violence.
* Victoria 2, you can normally only recruit pops with the Soldier-profession to serve in your army. However, you also have the option to mobilize your civilian population, which will turn a portion of your laboring pops into basic infantry. This allows you to quickly increase the size of your army at the expense of goods production. Mobilized infantry is identical to regular infantry, other than drawing from a different manpower pool.
* Victoria, a corrupt federal official is thrown out of a window several stories up by a mob of angry citizens and does not survive the experience. This instance explicitly references the famous Defenestrations of Prague.
* Victoria Alexander has a quartet of books surrounding men who make a bet about who can evade marriage for the longest. The winner gets four shillings and a bottle of cognac, which are meant to symbolize freedom. They're all determined to be the one to win, and of course they all wind up married by the end of it.
* Victoria and seeks to create an artificial, all-female utopia. So, this one gender-flips the usual stereotypes, but otherwise plays totally straight.
* Victoria, and so can recruit only women for its military. So they invest heavily in hardware to minimize their main weakness (the physical inferiority of their manpower base) and build a high-tech, heavily mechanized military with its doctrine based on air supremacy and firepower. The Confederation for its part has little industry and money, and so can't field much in the way of modern aircraft or heavy artillery. They do have a large and high-quality recruitment pool, and play up their strengths by specializing in light infantry operations and unconventional warfare.
* Victoria and Ted planned to wait a month, but gets too impatient after the first two weeks.
* Victoria and the society they set up could be more accurately described as reactionary and theocratic than true individualism.
* Victoria, and they wield great "soft power" influence far beyond their borders.
* Victoria, an innovative and sometimes irreverent special forces operator who becomes a very valuable senior NCO advisor to the main military protagonist, Captain John Rumford.
* Victoria announced her retirement, the crowd chanted "Please Don't Go!", much like they did in real life when Victoria left WWE.
* Victoria are struggling to restore the pre-1918 German Empire, so they can finally return home and return the rightful Kaiser to the throne.
* Victoria are technically criminals, and this is certainly how their enemies see them. Early on, Rumford and his lieutenant, former Gunnery Sergeant Matthews, use military discipline and tactics to rally the downtrodden citizens into a formidable force to take on the ethnic crime gangs who terrorize their neighborhoods, thus building popularity and muscling in on their business. Later, they move on to overt anti-government action.
* Victoria) a senior political figure, literally catalyzing a civil war.
* Victoria Ash, a Toreador vampire with the voice of an angel and a body to match, had been trying for over a century to burst onto the global music scene. The best

she could manage was to become a one-hit pop wonder who blipped onto the public radar for a couple weeks and vanished just as quickly, while other less talented and certainly less beautiful singers continued to drown her out.
* Victoria. Ashe sees it, if the Christian Marines ever lose sight of what they are fighting for and why, they are worse than useless in any case; a few true believers are far better than a whole regiment of conscripts.
* Victoria, attempts are made both before and after her ascension to the throne to marry Victoria to various foreign or distantly related princes. One such suitor, her cousin Albert, actually does end up marrying Victoria, but it is a love match as well.
* Victoria Azania is an example, supporting secularism and considering Christianity a regressive cult that oppresses women. Their main enemy, the Northern Confederation, soundly averts this, being a reactionary and borderline theocratic state.
* Victoria Beckham once tried to sue English football club Peterborough United, because they were selling scarves, mugs and other items marked 'The Posh'. The lawsuit was dropped after it was pointed out to her that the club (or its predecessors) has been using that nickname since 1921.
* Victoria believed Weaver (aka Rumplestilskin/Gold) was a corrupt cop working for her. In reality, he's playing a long game to take her down.
* Victoria Bitter had an ad campaign that began late-80s/early-90s that is still recognizable today.
* Victoria, but Chief of Staff Rumford does relax grooming and uniform standards considerably for his elite units and allows considerable variation in details, reasoning that they don't need the spit and polish to maintain their discipline. He even jokingly references the Sukhomlinov Effect.
* Victoria, but the story establishes earlier on that the Azanians were busily expanding their forces in anticipation of the Confederate invasion, and were suffering a critical shortage in trained personnel in the meantime.
* Victoria but this trope is Lampshaded after the massacre of liberal intellectuals at Dartmouth College.
* Victoria, Captain John Rumford becomes one in right-wing circles for his brave (or at least perceived as such) anti-PC behavior and dismissal from the Corps—And then in a more traditionally heroic manner for his military leadership in the civil war and beyond.
* Victoria, Chief of Staff Rumford purposely encourages a rather informal style of work among his immediate subordinates, because he wants flexibility and character rather than a Pentagonesque military bureaucracy. Part of this is due to his background in insurrectionary warfare, where he got used to playing a little fast and loose with the ordinary rules.
* Victoria chronicles the downfall of the United States and the rise of the American successor states, this is present:
* Victoria chronicles the future downfall of the United States, and the struggles of a disgraced officer and his small band of companions first to survive, and then to rebuild some of the former glories of America out of the ashes.
* Victoria, chronicling a second American civil war, has several, for example that by General LeMieux before one of the decisive battles. Here is an excerpt:
* Victoria, concentrating instead on the military operations that are his own forte.
* Victoria, considering them a symbol of the old female slavery their ancestors fought so hard to escape.
* Victoria depend on foreign mercenaries, mostly Swedes and Czechs, to protect their persons and enforce their rule.
* Victoria describes large-scale breakdowns in government services and public order as part of an economic doomsday scenario. When food disappears in the big cities, great hordes of gangsters, looters and simple people just trying to survive migrate out into the countryside to plunder farmers and small towns. They in turn are met by local police, militias and ad-hoc self-defense groups that shoot to kill with extreme prejudice, and the near-urban regions become savage battlefields before the

swarming locusts exhaust themselves, succumbing to hunger and plagues.
* Victoria drag queens dressing up as party girls and getting him into a compromising position, resulting in blackmail and ultimately the end of his administration.
* Victoria: Early in the series, when Queen Victoria hears some rabblerousers are to be hanged, drawn and quartered, she's quick to order their sentences commuted to transportation.
* Victoria, elements of the old regime's military forces hold out slightly longer than the Federal Government itself, but soon cease to offer any meaningful resistance to the victorious rebels. Many of their personnel are then implied to join the New Confederacy and other successor states, once the collapse is complete, where they continue to cause trouble for the heroes.
* Victoria entrance video included a scene of an eye in the palm of a hand.
* Victoria Espinosa starts off as a loving cousin of the player's friend, Queen Kamea Arano. When her father seizes power from on Kamea's coronation day, she ends up becoming Kamea's fiercest enemy. She participates in the aforementioned attacks on civilians
* Victoria example of this in the Northern Confederation. A militia of former policemen and military veterans who are the ideological backbone of the Confederation's right-wing regime, they spearhead its armies and perform internal-security functions in peacetime.
* Victoria example, since he considers himself a subject of the German Emperor and leads his armored battalion through the campaign to defend New York dressed in a blue, late 19th-century Prussian greatcoat and Pickelhaube. Notwithstanding, he is both a savvy political operator and an absolutely terrifying enemy.
* Victoria family ask her to play a duet with Albert in the hopes of her warming up to him. It doesn't go entirely well.
* Victoria features one as part of the speculative future decline and fall of the United States. The last elected head of the increasingly decaying and corrupt Republic, Sam Warner, is a well-meaning but ineffective man, and unable to maintain national unity as a crippling economic crisis strikes, the federal government weakens and states begin to secede. After Warner and most of his cabinet are killed in an improbably successful lone-wolf suicide attack, General Wesley, the Chairman of the Joint Chiefs of Staff, overrides the constitutional line of succession and establishes an outright military dictatorship, trying to hold the country together with naked force.
* Victoria features one... in the basement of the Maine State House and used in an official capacity. We only see it used on men who assassinated the governor, but just the fact that the new regime felt a need for an official torture chamber raises all sorts of questions.
* Victoria features the Imperial Prussian government in exile, complete with a small armed forces. It has its seat in Koenigsberg, the historical capital of the Teutonic Knights, now situated in the Russian Kaliningrad exclave.
* Victoria Forester is broken by her previous isolation and the stories that are told about her.
* Victoria, former Marine officer John Rumford is an eminent polyglot: In addition to his native English, he knows German, French, Spanish, Latin, and apparently at least a little Russian and Greek. Justified at least in part by his military education and experience, as well as his private interest in the classics.
* Victoria for not following the common courtesy of writing an "I’m leaving you" note like he got and drives her back to the chapel to correct this.
* Victoria. From their POV, this gives women greater safety and freedom, but the procedure is hated as vile and unnatural by their arch-conservative enemies.
* Victoria games, you need alcohol to train and supply army units. You can have all the metal, gunpowder, and men in the world, but you literally cannot make even one more cannon if it's crew don't get there beer.
* Victoria, given the story's borderline post-apocalyptic setting. Even after the economy begins to recover and technology advances again, people prefer sturdy goods and tools that last, and/or can be repaired, over shiny gadgets and planned-

obsolescence consumerist items.
* Victoria gives us the Deep Greeners and their state of Cascadia, which takes environmental protection to such a degree their citizens must sometimes prove their right to air. Totally unlike the heroes, who are Good Luddites who only want to get out of cities for a pastoral existence without 20th Century technology.
* Victoria has an unusually positive example for modern fiction, where they appear in a minor role as one of the militias fighting for their local community in a dystopian post-apocalyptic world. What little we see of them paints them as largely sympathetic people merely trying to defend themselves in the midst of chaos, though also as misguided and ultimately largely ineffectual.
* Victoria has the heroes burn a female bishop in the beginning, and a televised massacre of college professors later on.
* Victoria, however, and just as in real life Victoria is destined to marry Prince Albert, forcing the Victoria/Lord M ship to be anchored permanently (but not sunk as the series and its accompanying novel - as well as historical accounts - indicate that Lord M, at least never stopped being in love with Victoria).
* Victoria in a death-grip is practically the only way you could explain the Victorian militias crushing every other army they go up against. Wooden ships with spar torpedoes can apparently easily destroy modern warships, World War II-era short-wave radar is good at catching F-35 stealth fighters, and outdated T-34s are technically better than M1 Abrams for being easier to repair and more reliable (though at least the author tries to justifies this by pointing out that they should avoid pitched battles with modern armour, it doesn't excuse how modern hand-portable anti-tank weapons would shred a T-34 without any trouble).
* Victoria in sophisticated ways, quoting sexist philosophers and poets throughout the ages.
* Victoria in this role. Captain Halsing's ideology is, of course, itself described as rather unsympathetic, but he nonetheless makes valid points when he exposes the inconsistencies and flaws in the heroes' own right wing libertarian-ish beliefs.
* Victoria in upstate New England, and its excessive brutality ends up alienating most of the government's remaining supporters in the region.
* Victoria is all about the violent dissolution of the United States prompted by, among other things, a hyperinflation crisis, anemic response to an engineered pandemic, harsh anti-smoking laws, and federal support of rapists, murders and criminals over the common citizen in the name of racial tolerance and sensitivity. Aside from the failed efforts of the Feds to retain power, few of the successor states are inclined to get along, or even suffer each other to exist.
* Victoria, is competent enough, but the civilian Secretary of Defense is not, and the cabinet listen much more to her than to him — at least until the crisis escalates precipitously.
* Victoria-ish virtues otherwise, his misogyny really is incredibly over the top.
* Victoria Justice - "Begging on Your Knees". Also has elements of the warning others type.
* Victoria Justice has been best friends with her co-star on the show, Avan Jogia, for a long time. If you're a big fan of her, you'd think they are meant for each other, given how close they are and that they spend so much time together. But she has stated that the reason he isn't her boyfriend is that she doesn't want to risk something going wrong and not seeing him again outside of on set.
* Victoria Justice soundtrack. Her first live performance was in the 2010 Macy's Thanksgiving Parade.
* Victoria Metcalf, the psychotic, poetry-loving bank robber who was the love of Benton Fraser's life in
* Victoria militants rebel and their uprising is put down, he reprieves the captives from execution and instead just exiles them from the Confederation. In order to justify this, he argues that while they are traitors, they are less malicious than merely misguided.
* Victoria military ranks structure and nomenclature lock, stock and barrel for their paramilitary organization. Despite this weirdness, they are presented as extremely well-organized, excellently trained and motivated, and consequently a

major threat.
* Victoriana (members of the lowest classes of society because they're unlikely to be missed).
* Victoriana of the Hexenjagers it's noted that "a single witch hunter might rouse an entire village to hunt down a rogue witch with torches and pitchforks".
* Victoriana RPG between the setting and the players the defining characteristic of the player-characters. Reasoning that some players would be uncomfortable playing accurate Victorian values unironically, the game encourages them to create characters whose beliefs are more in line with their own sensibilities, and hence profoundly revolutionary by 19th-Century standards.
* Victorian Britain gets dodged by having Jenny pretend to be Vastra's maid.
* Victorian Britain has been compared to the 1848 revolutionary movements as both attempted to topple autocrats, but ultimately made very few changes.
* Victorian Britain, the reading public and their predecessors didn't really make the same genre-groupings that we do today, so by virtue of never having been ghettoized to begin with, the following works remain "respectable" despite inspiring later genre fiction:
* Victorian Britain to cultivate stoicism as a virtue, or their lines would have collapsed. Since the Empire was so huge, many locals across the world witnessed this British attitude and the stereotype stuck.
* Victorian businessman Thomas Bin thought so, before offering them some peanut-butter and banana treats.
* Victorian Clara uses the name "Miss Montague" when working as a governess. One of the early ideas for the new companion was a Victorian governess named Beryl Montague.
* Victoria Neuman positions herself a benevolent critic of Vought, until the finale where she's revealed to be the one causing heads to explode, including ones who were working against Vought.
* Victoria Newman aged from 8 or so to 15 in a single winter in 1991, after aging more or less in real time up to that point. Then three years later, the same thing happened to her younger brother Nicholas. And it has since happened to Nick's children and various other assorted younger characters.
* Victorian London among the populace of London. It got so bad that the House of Commons could not meet in Westminster, and chlorine-soaked drapes hung in the windows of Parliament in an unsuccessful attempt to block out the smell. The Great Stink, incidentally, was the impetus for a concentrated effort to reduce the pollution levels of the Thames, leading to new methods of sewage disposal and water sanitation.
* Victorian London is the Ripper. The alien, in a new body, visits the protagonist in the asylum and promises to find his family and kill them before leaving.
* Victorian London People were actually encouraged to go there to relax and have fun. They were the first city parks.
* Victorian Novel Disease: Someone has a terminal illness but looks and often acts fine.
* Victorian Romance Emma, Emma and William, first meet when Emma opens the door right into William's face as he's raising his hand to knock.
* Victorian Romance Emma: Emma. Interestingly enough the series is set in age where it was rare for even the middle class to wear glasses, much less a servant girl.
* Victorian Romance Emma: Emma is convinced to attend a ball, and is shown to clean up nicely when she wears a ball gown and no glasses in comparison with her usual maid outfit and glasses.
* Victorian Romance Emma gives off vibes like this to those around her, which led a few men to court her, but is often considered aloof by her peers.
* Victorian Romance Emma included everyone who preordered the first boxset of the anime by a certain date in the credits (since they were able to use the money they made on preorders to actually help fund the release).
* Victorian Romance Emma is a female example. There's nothing wrong with her, it's just that William had already fallen in love with someone else.
* Victorian Romance Emma is revealed to take place sometime in the earlier

Edwardian years.
* Victorian Romance Emma is very odd indeed, bringing a huge entourage and a train of elephants for an 'incognito' visit. To a lesser extent, Emma's new German employers.
* Victorian Romance Emma Joneses to restore their fortune. William's father wants him to marry Eleanor to improve their social status.
* Victorian Romance Emma leads Emma and William meet when Emma opens a door right when William is about to knock. It leaves quite a mark.
* Victorian Romance Emma, little Colin Jones draws doodles that look vaguely like some animal or other and gets upset if they're misidentified. Eldest brother William is the best at figuring out what's been drawn, mostly because every other Jones child once drew like that.
* Victorian Romance Emma: Monica's husband, which might be part of why she married him.
* Victorian Romance Emma. One or two glitches slipped through in the earlier chapters, then Mori hired a historical consultant to help her.
* Victorian Romance Emma - Originally released sub-only in the United States, an Animax dub was produced for the Asian markets. In October 2018, a successful Kickstarter campaign funded an English dub, complete with period-appropriate accents.
* Victorian Romance Emma. Realizing that a well-to-do caller on her mistress has genuinely forgotten his gloves, she rushes out to return them. Initially, she fails, but manages to actually do so later. A further mutation of this occurs when she and the man in question begin to start up a friendship, which looks to be very quickly heading for romantic territory when Emma tells him she's always wanted a silk handkerchief for her own. He buys it for her on the spot.
* Victorian Romance Emma the eponymous Emma, being a maid, frequently curtsies.
* Victorian Romance Emma uses the 'just too late' variant when Emma leaves London and William chases her to the station.
* Victorian Romance Emma, where two ladies sneeze in unison after three other ladies talk about the two while far away. A male character even comments that the three ladies are probably gossiping about the other two. What’s amusing is seeing this very Asian trope being referenced in a manga that is set in Victorian England by characters who are English.
* Victorian Undead (aka Victorian Undead II) which covers vampires and retells the Dracula novel. It's revealed that Mina killed herself after being bitten by Dracula via sunlight rather then turn into a vampire. Arthur, who turns against the heroes and sides with Dracula for the sake of Lucy, dies when Lucy turns on him to heal herself and Seward is killed during the fight against the vampire brides. Oddly Quincy dies in this version too but he likewise did so in the main book.
* Victorian Undead II novel. Lucy Westenra actually survive the entirety of the book due to Arthur betraying the heroes and helping Dracula move her body after he finished feeding on her, allowing her to turn safely and develop her powers to be a vulnerable threat. Even in the final confrontation between with the hunters and backed by Dracula's brides. She manages to escape by killing the last bride for them under the condition they leave her be to enjoy her immortality. And indeed the book ends with Dracula dead but the vampriric Lucy still at large.
* Victoria of Cascadia is hunted down by the Resistance. They are out in the wild forest, and the unseen resistance commandos kill her attendants quietly and one by one, until she is left alone.
* Victoria offers a rare literal, villainous example, where the alt-right insurrectionists have a cyberwarfare outfit which is basically a militarized congeries of Internet scammers, hackers, and frogposting trolls.
* Victoria, often name-dropping real-world military thinkers such as John Boyd and Carl von Clausewitz. He's shown to direct individual battles, but also delivers heavy monologues on importance of morale, tactics and operations serving strategy rather than other way, fighting as a mere part of bigger grand-strategic picture, etc.
* Victoria of this trope during the courtship between Queen Victoria and Prince

Albert: it is the brooding and serious young man, who changes the life of the spirited and cheerful young woman. Albert wants Victoria to become more responsible and a bit less frivolous, and he reminds her of the harsh reality of how her least fortunate subjects have to live (she had previously not really opened her eyes to their situation). But despite a few arguments, there's an obvious attraction between them. And within only a few days, they're engaged to be married.
* Victoria), others are this to him (e.g. Captain Patel of Military Intelligence during that expedition).
* Victoria Perez on Monday Night Raw (or rather, a Raw Brand Pay Per View). Melina accepts because Victoria was in one of her psycho phases.
* Victoria persuades Yelena to let her court her by convincing her that she indeed would be a second love, because of the differences between her and her counterpart.
* Victoria played this role when she was the Commissioner of WWE's developmental promotion Memphis Championship Wrestling in 2001 since she was still competing and working as a heel manager for Steve Bradley.
* Victoria, politics and culture have a strong pre-World War II touch (including Nazis), and people dress in 1930s to 1950s fashion.
* Victoria, protagonist John Rumford becomes this to rebel leader William Kraft after he merges his own militia of freedom fighters into the latter's broader coalition. After Kraft becomes Governor of the independent Confederation, Rumford remains effectively his second-in-command as Chief of the General Staff.
* Victoria reach this point when a corrupt federal judge cracks down on their hitherto successful efforts to smoke out the drug dealers and gangsters infesting their neighborhoods. Their revolution begins by tarring and feathering the malefactor.
* Victoria rebel against the US Government, the restored Tsar (yes, that's a thing) gives them... 100 WWII surplus T-34s. This is perfect, the heroes say, because the T-34 is super-reliable (hah!) and the purpose of tanks isn't to fight head on but to raid the enemy's supply chain and rear areas. However, no tanks on any side are ever mentioned as making a difference in the war.
* Victoria rebel tactician who is already aging when first introduced and quickly steps down from active duty once the Confederation is established.
* Victoria receiving assistance from foreign volunteers. Conservatives in the New Confederacy contribute the Jefferson Davies Brigade to the Confederation's forces, whereas the Mexicans aid the Azanians.
* Victoria recognized as independent, and while the federal US Government lingers a while longer, its death knell has tolled, as the other secessionist states press their advantage.
* Victoria regularly uses highly irregular tactics, often subverts orders and frequently commits regular atrocities against military standards of grooming and conduct, yet does so with the full blessing of his superiors and maintains amiable and generally respectful relations with them. In effect, he respects authority, just not its trappings, and has an understanding CO who lets him get away with it because he can be counted on to deliver when the going gets tough.
* Victoria ruling an enemy state. Isis and Astarte are specific examples, with their idols venerated together with a debased Christianity in syncretistic ceremonies. The cult is eventually exposed and outlawed in the Confederation, and apparently suppressed after a female Episcopalian bishop who was a ringleader of sorts is condemned and executed.
* Victoria's career by ruining her looks, but ended up with a bloody nose and a cracked tooth before she made Trish spit out any blood.
* Victoria sees many iconic American monuments smashed as the nation descends into depression, disorder and civil war. Washington itself is ravaged by looters and rioters when the Federal Government evacuates to Harrisburg, Pennsylvania, and the halls of government are ruined and defaced much like those of Detroit in real life. Protagonist John Rumford comments bitterly:
* Victoria, sees the situation in terms of "Us or Them" and pushes full ahead for armed confrontation before the balance of power grows even more unfavorable. Eventually, he wins Rumford over to his point of view.

* Victoria see things. Especially being a woman, weak and oppressed by men throughout history. To break free from this, they have embraced transhumanism to eliminate female weakness and "oppressive" biology (such as pregnancy and motherhood), aiming to become a society of superhuman Amazons.
* Victoria's grandfather George III referred to his youngest and favorite daughter, Princess Amelia, as Emily.
* Victoria she has endured throughout her life have given her a sort of objective, philosophical way to view life that allows her to endure most anything with stoic calm.
* Victoria, since irregular warfare specialist John Rumford knows well just how horribly brutal and attritive this is, both to military and civilians, and makes sure to do his damnedest to avoid it if he can help it. He is on the whole successful, though not entirely so.
* Victoria, Sonne mentions this when he and Victoria enter an elevator.
* Victoria spends the whole series with no identity beyond being James's mate, which also serves as her only motivation for serving as the villainess for the next two books. Similarly, Irena's only identifying characteristic in
* Victoria's Secret had the Victoria's Secret Angels, who wore wings in their ads and on the runways.
* Victoria's Secret's PINK clothing line is marketed towards college students, intended to bring young women into the company's fold with the idea that they'll move up to the more expensive namesake when they get older. However, with it being trendy, youthful and inexpensive, the PINK line has had an enduring popularity among women well beyond that age group. Women in their 30s love to wear it (though they were within its target demographic when it first hit shelves in 2004) and with Generation X growing older, it's not entirely uncommon to see middle-aged women in their 40s and 50s wearing it as well.
* Victoria Stadium in Gibraltar provides a great view of the iconic Rock of Gibraltar.
* Victoria start out like this, a small group of ex-servicemen banding together to take on the criminals who prey on their old neighborhoods. Then they move on to bigger fish, the corrupt politicians and officials who shelter the gangs, and things escalate from there on.
* Victoria states declare their independence, the US government institutes a blockade against them to prevent them from obtaining war supplies from overseas. However, they still manage to get some weapons, for example across the Canadian border.
* Victoria subversives and militiamen are military veterans presently employed as law enforcement officers in some capacity or other. Naturally, this also later aids their infiltration of the police forces.
* Victoria that consciously practices this, with even cabinet officers selected for "representation" rather than competence. After its downfall, the new villains who take its place generally avert this, however, as each race and sectional interest tends to coalesce in its own successor state.
* Victoria that uses robotics, artillery, information technology and other force multipliers as much as possible to compensate for its inferior manpower base.
* Victoria: The central premise is the dissolution of the United States owing to a combination of hyperinflation, pestilence, and disobedience in the face of growing lawlessness. The heroes occupy the Northern Confederacy/Victoria, a deeply conservative version of New England, and in the South a New Confederacy forms, torn between its cosmopolitan and rural elements. Past that, Wisconsin is taken over by Nazis, the 'Party of the Will'. Insane parodies of 'Deep Greener' environmentalists take over the Pacific Northwest, forming Cascadia. California is renamed Azania, moving the capital to the Berkley campus and outlawing men. The rest is overrun by 'orcs' as minority gangs and rioters are called in-story.
* Victoria, the daughter of his brother Prince Edward. Meanwhile, his wife, Queen Charlotte, forestalled any attempts to marry off her younger daughters to keep them as her companions, with the result that two daughters married later in life (48 and 40) and two never married at all.

* Victoria) the memoirs of a former Marine officer, and as a result, the narration contains plenty of cracks at the other services, the Air Force in particular. There are also in-story frictions between the services, though these are not as serious as in much genre fiction.
* Victoria, the police are useless for cleaning out the criminals and drug dealers the vigilante protagonists are trying to get rid of, but spring into action as soon as the criminals' own "rights" are violated by the heroes. Justified, since the mob has highly-placed allies in the legal system.
* Victoria the protagonists, who are seceding from the US, are given Russian military aid in the form of a hundred T-34 tanks. As in, WWII vintage tanks. Rather than be dismayed, the protagonists praise the tanks for their ruggedness and reliability over contemporary armor (hahaha, no.) but resolve not to get into any tank battles, instead using them in raids to disrupt enemy supply lines.
* Victoria, there are many biographies of Victoria and Lord M that support the belief (which also existed at the time) that their relationship was a romance of sorts; certainly, Victoria had a stronger emotional bond with Lord M than with any of her later Prime Ministers, even the ones she liked (e.g. Disraeli).
* Victoria, the rebels make skillful use of this in the military sense in their struggles with federal law enforcement agents and military forces, taking full advantage of such factors as knowledge of terrain, sympathetic locals and overextended enemy logistics.
* Victoria the various Muslim nations all unite to invade Boston, along with a Black Muslim uprising, with the full approval and backing of the United Nations. Almost a decade later, all forms of Christianity unite to invade the Middle East (which isn't exactly the totality of Islam) and end the Islamic faith forever.
* Victoria, the vigilante protagonists' initial attempts to defeat the drug dealers infesting their neighborhood with non-violent means ends up with many of their allies arrested by the corrupt authorities for violating the criminals' "rights". This is one reason for why they increasingly drop the "non-" part later on.
* Victoria, this is the strategy the secessionists in the incipient Northern Confederation successfully employ against the US federal government. Realistically, their rag-tag rebel forces naturally have no chance whatever to, say, march on Washington and demand its surrender—but they don't really need to, either. All they have to do is to hold out and deny the Federal authorities control of New England, in order to win the war on the moral level: when the rest of the country sees that the Administration is unable to hinder secession, it loses its legitimacy and rapidly collapses.
* Victoria though, get theirs back, first through a genetically engineered plague, then by the end of the book banding together all Christendom for a new Crusade.
* Victoria. Though they do not play a major role in the story, protagonist John Rumford interacts with them during his mission to Imperial Japan, and they assist him with his "demonstration" viz. the Chinese. The main representative he deals with displays most of the associated stereotypes.
* Victoria/Tremaine believes her daughter Drizella is also cursed to think she's modern girl Ivy. She has no idea Drizella/Ivy remembers who she is and is working her own secret plan against her mother.
* Victoria used, though under these conditions cannons still claim most of the casualties.
* Victoria, various American states begin to secede as the economy tanks and the federal government lapses into totalitarian tyranny. Initially, they face very uneven odds; the protagonists in the New England breakaway state are particularly light on air defenses, with the Feds dominating the air. It becomes a plot point when a lucky soldier with a MANPAD manages to shoot down an overconfident Navy F-35 that went in too low and slow.
* Victoria whenever he ventures to criticize the ideas of his superiors.
* Victoria. When she notices that one of her faithful attendants has been shot dead with an arrow, she is upset — because the feathers on the arrow come from a holy owl, and mortals have no right to harvest them.
* Victoria, where the secessionists depend on this for essential supplies after the

US Navy cuts off their legit trade. One attempt by a Russian freighter to force its way through leads to a major naval incident between American and Russian forces.
* Victoria, where this is meted out to an activist judge who uses his powers to protect the gangbangers and drug dealers who prey on the protagonists' friends and family. The man is apparently not badly injured, but certainly does not enjoy the experience.
* Victoria which has scenes included in the non-commercial American PBS showing that were deleted from the commercial UK broadcast.
* Victoria who capture him to surrender to him instead; and once Governor Adams proclaims independence, he and his military advisors (including actual generals who have joined the rebellion) listen with great interest to the former captain and current militia leader's suggestions, ending up making him chief of the new general staff.
* Victoria, who followed him with the same devotion he followed Raven.
* Victoria who stays far away from the front and the closest he ever got to a live combat situation was a drive-by shooting, however this does not stop him mocking other officers for being intellectual cowards who have no idea what it is like at the front.
* Victoria Wood: One of the first English woman stand-up comedians to make it big, although she had a lot of other talents as well.
* Victoria Wood's "Things Would Never Have Worked". After three verses of why she's not attracted to this guy anyway ("I like big muscles, you were thin and lanky"), we get:
* Victoria: Yay! The heroes survive the collapse of the corrupt multicultural U.S. government and the warring successor states and are free to build their enlightened, traditional Christian society. Where heathens are banished or burned at the stake, Black people can be hanged for a violent crime within a week, and technology created after the 1930s is severely frowned upon, as are women working or getting higher education. Oh, and Victoria will be serving as a training center for a global crusade against Islam.
* Victor "I don't believe it!" Meldrew was stuck down by a car in the finale of
* Victories, Andrew McNeil normally has the mustache he sports as Otto for the majority of the film. He shaved it off for the flashback scenes to Otto's pre-war life.
* Victorious acts more like a friend than a teacher towards his students in many episodes, as he also helps them with personal problems or even pulls pranks on them
* Victorious and correlation of characters to the show's typical panel; then lampshaded that no kid in the audience would understand the reference.
* Victorious: Andre falls for Jade upon hearing her sing. Thanks to Tori, he eventually snaps out of it.
* Victorious: Andre likes to chase girls and is also the nicest member of the main group. He treats the girls in his group with respect and even feels guilty when he starts developing feelings towards his best friend's girlfriend.
* Victorious, and they're unable to live their normal lives without being recognized as the Diddlybops.
* Victorious attract a huge amount of interest from guys (and in the latter's case, her music career is only making it grow faster).
* Victorious: Beck, though a slight aversion as he gets more characterization in season one than most do of this trope, but whenever he figures prominently in a plot, it's always either relationship drama with Jade or ship tease with Tori and other cast members, and he's almost always seen through Tori's, Jade's or even Robbie's(!) point of view
* Victorious: Being a show set in a performing arts school, many episodes deal with the main characters putting on plays. Most of the time, these go wrong. Some notable examples include:
* Victorious: "Blooptorious" is a talk-show-formatted episode where the Rex puppet, this time as an actor named Christopher Cane, is interviewing the rest of the cast while showing blooper reels.
* Victorious, but it's clear Ponnie intends to do something nasty to get rid of

Tori.
* Victorious by a mysterious new student named Ponnie. Ponnie at first seems friendly, but always disappears whenever other people are around. She also vandalizes Tori's locker, but fixes it before Tori can show it to her friends. This causes everyone to assume Tori has had a mental breakdown and is seeing things.
* Victorious, Cat implies this happened at her last birthday. She was expecting to get a bike as a present, but when she got home her brother had shaved his head. This resulted in her parents spending the rest of the day shouting at him.
* Victorious, creates a new video series on The Slap called Robarazzi, and develops this when he embarrasses his friends to gain popularity. After his friends get revenge, they help him find new success in a cooking blog.
* Victorious does it a lot. "Rex Dies" ends with Cat being kept in the mental ward at the hospital. Cat still is in the next episodes, and it's never mentioned again. "Wifi In The Sky" uses it as well. The last episode to air ends with Cat and Robbie sitting in a trashcan in their underwear and Tori, Jade and Trina being chased by giant mice...
* Victorious episode "Beck's Big Break", Tori is sneaking onto a movie set and gets stopped by a security guard, who asks her name. She tells him it's "Crystal Waters" after seeing it on a water cooler.
* Victorious episode "Brain Squeezers" revolves around Tori having to choose three of her friends to be her team on the titular game show, with everyone giving them reasons why she should pick them or pretending not to care. Eventually Tori chooses Beck, Andre, and Robbie, but when she arrives to compete, Jade impersonates her so she can be on the team instead, though somehow, Tori and the rest of her friends still get to compete as opponents.
* Victorious episode "Jade Dumps Beck". Robbie is forced to review Trina's one woman show before opening night. Predictably, the show is terrible, but Trina harasses and threatens Robbie until he gives her show a good review. After telling André the play was "So bad, it was laughable", André suggests that Robbie review it like a comedy, which he does. Trina is furious at first, but after getting a standing ovation on show night, she goes along with it.
* Victorious episode "The Bird Scene", Sikowitz suggested that Tori enter through the window.
* Victorious episode "Tori the Zombie" ends with everyone dancing to disco music after Sinjin turns it on and encourages them all to "just go with it".
* Victorious episode "Victori-Yes", when the events of the episode lead to Cat and Robbie trapped outside in their underwear.
* Victorious films this and posts the video online. Later, she's seen laughing at the comments on the video.
* Victorious: Given how mean she is to everyone even him, it's a genuine wonder to viewers what Beck sees in Jade.
* Victorious had begun to insert a laugh track in every line, regardless of there being any joke involved.
* Victorious had Tori let Cat put zombie prosthetics on her, only for Cat to accidentally use an industrial-strength adhesive to apply them to Tori's face, requiring Cat and Trina to go out of town for a solvent while Tori had to act in a play.
* Victorious had Tori stumped on what gift to get her sister Trina for her "birthweek." (Trina is such a narcissist that she demands a whole week's celebration for her birthday.) After many ideas, Tori decides to write a song thanking her for all that she's done for Tori and explaining that, despite Trina's flaws, she still loves her sister. After Tori surprises her sister with it, performing it to her with a live band, back-up dancers, and a fog machine, Trina's first question is: "So, where's my present?"
* Victorious has Beck and Jade. No one understands it, but they've been going strong for almost 3 years, and it's implied they make each other better people as a result.
* Victorious has random strangers discuss the relationship between Tori and Beck at a pet surgery.

* Victorious, have a happy home life, and as of "Locked Up'' that view is pretty supported by canon. Beck's usually the only one who will have anything close to good parents, although there will usually be a few issues considering that he lives in an RV just so he can get away from them.
* Victorious. He's perfectly aware of her blatant rudeness and other faults. They usually make up at the end. For example, in the episode "Jade Dumps Beck", Jade gets jealous that he's hanging out with an attractive celebrity. She instantly regrets it and gives him a Rottweiler. Even though it almost kills his dad, they make up.
* Victorious, his friends take the puppet to the hospital to make Robbie feel better. When Cat tries to explain the situation to a nurse, the nurse assumes Cat is delusional and sends her to the psych ward. The bizarre things she does to keep herself occupied in solitary don't help.
* Victorious: In an episode where the main group must participate in a method acting exercise, Andre is given the role of a marathon runner who's pregnant. This ends up confusing his grandmother when she sees him with a noticeable baby bump.
* Victorious: In "Freak the Freak Out", Tori disguises herself as an ugly girl, as a scheme to be picked to compete against two girls in a singing contest. Since she looked like a nerdy loser, Hayley and Tara thought they had a sure chance of beating "Ugly Betty". When Tori starts singing on stage, she slowly rips off her disguise and reveals her true self.
* Victorious: In one episode, Cat meets a boy while she was wearing a blonde wig for a short film she was shooting. She lets him think she's a natural blonde as she worries that's the only reason he asked her out. However, eventually her wig is knocked off and the boy sees her actual hair. He admits he thinks she's beautiful but doesn't like that she lied to him and breaks it off with her.
* Victorious. In one episode, their daughter Trina has her wisdom teeth removed. They take a vacation and leave Trina in the care of their other daughter.
* Victorious: In one episode Tori and Jade sing a song (called Take A Hint) about getting unwanted attention from guys
* Victorious: In one episode, Tori got a job at a frozen yogurt stand to make extra money. As part of the job, she had to wear a witch costume, which she found hideous. However, since the owner's wife designed it, she had to pretend to like it.
* Victorious: In "Robarazzi", Tori's mom tells her to take off her shirt, as she wants to test an new depilatory cream to shave the hair on Tori armpits.
* Victorious intelligence and childlike behavior, there's a section of the fanbase that doesn't think Cat is in the proper state to give romantic consent to anyone, and thus treat any pairing with Cat (canon or not) can be seen as this.
* Victorious: In the aptly named "The Great Ping-Pong Scam", Tori comes across a scheme her friends have concocted where they've created a ping-pong team and “go compete in the locals” when really they use the majority of the money given to them to go to a fancy restaurant and use the rest to buy a trophy. Tori joins in on it and it goes off as planned... except the bill turns out to be more expensive then expected due to Robbie ordering caviar which put them over their intended budget. As the group argue what to do, Sikowitz quickly ducks out while no one's looking, intending to do this. Luckily the group get out of it by acting as the entertainment of the restaurant when the initial one had to cancel (with Sikowitz even returning).
* Victorious. In the end, they are forced to rush in order to finish the project. The final product gets some embarrassed looks from their teacher.
* Victorious: In the short film that the group of friends made in "The Slap Fight", Robbie's character has one: a violin with a knife hidden in it, or a "stab-olin."
* Victorious: In "Tori Gets Stuck" Robbie picks up a bag of blood Tori just donated only to drop it causing it to explode and splatter the both of them.
* Victorious in which the lead character is pursued by an obnoxious rich man and a kind valet.
* Victorious is E10+ primarily for the inclusion of the flirtatious "Take a Hint" (the ESRB mentions the lyrics "You should that we should hook up, but I think that

we should not" and "Get your hands off my hips, 'fore I'll punch you in the lips/Stop your staring at my—hey!"). However, these lyrics were allowed to be heard in the TV-G-rated TV show.
* Victorious, is one of these. When Jade needs money to fund her play, she offers the money on the condition that her daughter gets a part in the play.
* Victorious is pretty popular, and their respective actors are dating in real life.
* Victorious is Robbie's ventriloquist dummy. Despite Robbie controlling him, he seems to have a mind of his own, and the other characters, while at first humoring Robbie by pretending he was a real person, eventually start believing it themselves. If Rex says or does something rude, they get mad at him and not Robbie. And the reactions they all give when he is sucked into the Turblow Jet were as if one of their closest friends was being maimed.
* Victorious is this to a T. Especially if you have candy to help distract her with.
* Victorious, it does resembles a stereotypical Ruritanian country. The military outfits and the occurring conflicts seem to reference war-era Germany and Russia (or the more current Libyan civil war); and the Yerbanian flag's basis IS the Albanian flag.
* Victorious, it looks like Beck and Tori are going to kiss. However, Tori's mom walks into the room, interrupting them.
* Victorious, it's subverted in the episode "Prom Wrecker". Cat tells Robbie she can't go to the prom with him because she already has another date, who's from a different school. When Robbie accuses her twice of lying during the prom, she gives him an excuse as to why her date's not with her at the moment. But the second time, we learn her date actually is real and her stories were true after all.
* Victorious: Jade West likes gross things like blood, fat blobs, zombies and hot tubs (she pretends that witches make her human soup) but she´s scared of dolphins.
* Victorious: Jori is a popular ship consisting of two girls (Jade and Tori) who despise each other so much they've gone to psychotic lengths just to spite one another.
* Victorious just happens to enjoy pain and likes seeing her boyfriend getting smacked around by Cat, and isn't afraid to offhandedly mention that.
* Victorious Loser: The protagonist loses everything around him/her, but the protagonist's spirit isn't broken and achieves his/her goal.
* Victorious Loser: Who cares if I lost?! I still feel like a winner inside and achieved my goal in the end!
* Victorious moments between Beck and Tori, but the two never officially got together. Jade and Beck got back together, but they were shown to still have problems as a couple, suggesting that the two might break up again. Then the series got cancelled unexpectedly, preventing any resolution to this arc. In general, the show dedicated many episodes to Tori dating, but ends with her being single.
* Victorious moments between him and Tori. However, he eventually gets back together with Jade by the end of the series. It should be noted that the show ended unexpectedly, and many plot lines were ended prematurely.
* Victorious. Most of the cast appears in every episode with the exceptions of:
* Victorious, Nico is gradually being possessed by the malevolent spirit in her staff, and the team is being hunted by the Seed, children of their old enemies the Gibborim.
* Victorious). None of the cast or crew were told of this until they learned about it from their fans.
* Victorious notes that he finds Tori more attractive now that she's crazy.
* Victorious: One episode had Jade breaking up with Beck. Initially, she acts as if she doesn't care and says she's fine with him seeing other girls. However, this facade is broken when she shows up at Tori's door crying and asking for her help in getting back together with Beck.
* Victorious: One episode had Robbie becoming the high school version of this, taking embarrassing pictures and videos of his friends and posting it online. He

even recruits younger students to take the videos for him.
* Victorious: One episode had the main characters learn of a sale at a department store. When they arrive, they find an entire line of people camping out until the sale starts. Realizing they'll be at the back of the line and likely miss the sale, they sneak inside the store while it's closed so they can bypass the line.
* Victorious: One episode has Cat house sitting for her Mom's boss, who owns many valuable things, including a guitar signed by Elvis. Jade invites herself along, claiming to want to spend time with Cat, but really wanting to make Beck jealous. She ends up breaking the guitar. The two invite Beck and Robbie over to fix it, but they end up breaking more things. When it looks like Cat's Mom's boss will find out what happened, an earthquake hits and gets blamed for causing all the damage.
* Victorious: One episode involved a reality show being filmed at Hollywood Arts. The protagonists learn that show is largely staged and are encouraged to act out in order to make the show more dramatic. As part of this, Jade and Tori pretend to have a cat fight.
* Victorious: One episode involved Tori trying to help Beck get together with a girl he was interested, so he can get over his break up with Jade. Beck and the girl get together by the end of the episode. However, she's suddenly revealed to be obsessed with Beck, to the point of having no personality of her own. This causes Beck to leave her and get back together with Jade.
* Victorious, on the episode "Who Did It To Trina?", Andre says this when he isn't allowed to leave Lane's room. This is a close reference to the first aforementioned example.
* Victorious pairings have more support than other Het variations like Tori/Beck, Jade/Andre, Cat/Andre, etc.
* Victorious references the above scene with Cat telling what happened in the scene thinking it happened to Tori & Trina, only to be told it was just a scene from the above show.
* Victorious Roar let out by Marco Tardelli after he scored Italy's second goal in their 3-1 victory over Germany in the 1982 World Cup Final.
* Victorious Roar: When a character just has to let everyone know they won, they do it LOUDLY!
* Victorious, Robbie and Cat briefly make a business of singing bad news to people to make it easier to take. It works fine until they're hired to tell Trina her date cancelled on her.
* Victorious Roman generals would be feted with "triumphs", enormous festivals meant to honour the conquering hero of the Republic. An enormous parade would begin at the Field of Mars, winding its way past shrines while crowds of plebeians roared "Io Triomphe!", before finally reaching the great Temple of Jupiter. The general was followed by his soldiers as well as a host of toga-clad senators and priests, families of prominent patricians, and the Vestal Virgins. Chariots bore the plundered loot of subjugated tribes and captured barbarians were yanked along in chains. The general, at the head of the procession, was followed by a slave who held a laurel wreath over his head while whispering "remember, you are mortal" into his ear. Later, during the Empire, only the Emperor was feted in this manner - whether he had led his troops in the field or not.
* Victorious seems to be invoking this trope as part of her gothic persona. She has pale skin, black hair, and a creepy, hostile attitude.
* Victorious. She originally started out with a more normal-sounding voice, but it got higher, slower and more baby-ish sounding as she became more ditzy.
* Victorious showed up at a stage play performed by Trina. However, this may be foreshadowing a planned crossover event between the 2 shows.
* Victorious, some Hollywood guys setup a "Jersey Shore" type show with the Hollywood Arts Kids. When they edit two different conversations that Tori and Beck have with others to make it appear that they are having an affair, Jade isn't too happy. The producers freely admit the deception saying they're doing it for ratings.
* Victorious, sometimes even having conversations with the dummy. In one episode, Rex gets severely damaged. Robbie treats Rex like he's been fatally injured and

demands his friends take the dummy to a hospital. His friends play along with this and act like Rex is dying, believing that if Rex dies, Robbie will become "normal".
* Victorious special "Locked Up", Yerba is this. For clarification, the Yerba website depicts a beautiful country with white sandy beaches, but this turns out to be a scan of a picture hanging on the wall in a local hotel. The actual Yerba is a 3rd world hellhole with an easily angered dictator for a ruler.
* Victorious starts with Tori being embarrassed when Robbie films her dealing with a zit.
* Victorious teaching his class about method acting. This involves a contest in which his students must adopt personas and stay in character as long as possible. The last person to stay in character is considered the winner.
* Victorious: The B-Plot of "Tori & Jade's Play Date" involves Cat and Robbie breaking bad news to people through song. They show up at Tori and Trina's door at the end to sing about how Trina's date cancelled... and get their guitar destroyed for the trouble.
* Victorious: The episode "The Gorilla Club" had Tori wanting to get the part of a troubled girl in movie, but being told she was too nice for the part. She spends the whole episode trying to toughen up by engaging in risky behaviors. This climaxes with her fighting a gorilla.
* Victorious) The women chased him into an alley and beat him with sticks; he has a black eye for the rest of the episode.
* Victorious: This is outright stated to be the reason why Beck stays with Jade, despite how terribly she treats him at times. In one episode, Beck admits that he's bored of the girls who constantly throw themselves at him and will do anything to make him happy. He'd rather be with someone like Jade, who at least challenges him.
* Victorious. This leads to several awkward moments when she's around Andre and his friends.
* Victorious this other girl because she has no personality of her own and ends up getting back together with Jade.
* Victorious to Hollywood Arts and is more grounded compared to her more quirky classmates. She often reacts to the unique traditions at the school the way a typical person would.
* Victorious to no end. She's upset by any girl who looks at Beck and she demands to know what he's doing with a girl that isn't her. For one episode, she breaks up with him because she couldn't handle him being friends with a popular girl. In Season 2, Jade's insane jealousy is one of the reasons why Beck wants to break up with her. Even when they're separated, she still doesn't like Beck dating another girl.
* Victorious, Tori ends up becoming extremely woozy after giving too much blood, and while trying to perform in the school play ends up speaking gibberish while trying to speak her lines.
* Victorious, Tori prompts this to Kat after seeing on the news they accidentally set an actress's house on fire and got the person injured and sent to the hospital.
* Victorious: Tori's sister Trina spits out milk when Robbie kisses her.
* Victorious to show off Victoria Justice's singing skills. Especially noticeable in the episode "Beggin' on Your Knees".
* Victorious, Trina does this to get close to a boy she had a crush on. To sell the deception she creates fake coupons, pretends to be the restaurant manager when he calls, and even bakes the pizzas herself.
* Victorious was cancelled and that other members of the cast were "shocked" by the cancellation. The kicker is that he didn't write any series finale.
* Victorious: When Cat catches Tori kissing her boyfriend, she punches her in the face, albeit at Tori's request. When they go to the hospital, they tell the nurse that Tori got hurt by falling down.
* Victorious: When Tori gets a record deal, the record label asks her to do things like wear ridiculous outfits and act out in public. She's told that this will boost her profile. Of course, she can't tell anyone what she's doing, so her friends assume the fame is going to her head.
* Victorious, when Tori's ditzy friend uses the wrong glue. She is supposed to be

the lead in the play that night, and ends up performing her entire (serious) part wearing the zombie mask. With the author of the play in the audience.
* Victorious: When Trina starts complaining about pain after getting her wisdom teeth removed, Tori rummages through the freezer, looking for something to soothe her pain. She finds a bag of peas, which Trina complains about because she doesn't like peas. However, she changes her tune once the peas are on her mouth.
* Victorious, where if contestants get a question wrong, they get physically hurt (i.e. they get something dropped on them, something disgusting gets sprayed on them). By the end of the episode, the entire gang is shown to be badly beat up by the experience, with Cat's face being covered in ash.
* Victorious while the students are left to protest and argue with the staff.
* Victorious who is a talented musician but untrained, is this with her asking questions that the rest of the cast can then explain what certain theatrical or musical plot relevant terms mean in case the audience don't know.
* Victorious, who the show was meant to be a vehicle for) have long since faded into obscurity.
* Victorious: "WiFi In The Sky" has Tori and Trina on a plane the entire episode. While Tori is attempting to videochat her friends to get a project done, Trina is having a bad time with the kid behind her kicking and mocking her while his father doesn't care. Tori gets in on some of the "fun" as well, as every time Trina has to leave, she has to squeeze past Tori and her laptop.
* Victorious with Mrs. Vega cheating on her husband with his partner. It's more for laughs than anything.
* Victorique de Blois, though she admittedly has traits common for a child of her age, such as curiosity and a love for sweets.
* Victor is significantly more unhinged and murderous than his brother Logan in
* Victor is their main enemy for this season and Corbierre (his stuffed raven) is his "pride and joy":
* Victor Jovica's victory over NWA World Heavyweight Champion Ric Flair in Trinidad was struck from the record books after review of the tape revealed Jovica had his feet on the ropes.
* Victor Laszlo, hero of Europe, is the antagonist. He wants to flee the Nazis and take Ilsa with him.
* Victor Lewis-Smith's assassin Mark David Chapman would have been considered a hero if he'd aimed two feet to the left.
* Victor Lundberg. Lundberg never returned to the charts after the single's run,
* Victor Lustig is another famous example though his existence might or might not be a hoax.
* Victor Mancha, he keeps trying to find a codename for himself, each more painful than the other.
* Victor Mancha often refers to him as the 'house android' due to androids' status in his own culture.
* Victor Milgram (aka The Psycho) wants to kill the Washingtons (Hannah, Beth and Josh) due to
* Victor Neuburg. He and Aleister Crowley engaged in a "sadomasochistic magical working" (with Crowley being very much the sadistic half), during which time Crowley was a horrible racist to Neuburg and "leveled numerous brutal verbal attacks on Neuburg's family and Jewish ancestry".
* Victor Nieves doesn't get much characterization throughout the movie until his death before the climax.
* Victor Pelevin. There Russia is ruled by advertisers no less who only show the imaginary politicians on TV to the unsuspecting populace but run the things themselves.
* Victor Rogers trains a group of teenage Hunters—all of whom have the requisite traumatic past—to kill vampires by setting them on newly embraced vampires who've been framed for grisly murders.
* Victor Sells/The Shadowman is at least as strong a magical talent as the title character, particularly when powered up by the storms he draws on, but because he has little formal magical training he makes some sloppy errors that Harry is able

to exploit, and can't think of creative methods to deal with Harry beyond "smash harder", while Harry, crippled by being unable to kill with magic, outwits him easily.
* Victor Sifuentes was the token Latino lawyer at McKenzie Brakman. He comments on it a couple of times. When he left he was replaced by Daniel Morales.
* Victor spraying him with gunfire by putting up telekinetic shields, typically using one hand to hold the shield and another to throw the shooters through the windows/walls. Victor and Nick are also seen augmenting their punches and kicks with telekinesis.
* Victor Stone/Cyborg's very first movie role. He was previously better known for his stage roles on Broadway.
* Victor Sullivan, he knows how to use guns and won't hesitate to shoot at other armed criminals he encounters on his journeys. Sullivan also happens to be a trained pilot, presumably another skill he learned from the Navy.
* Victor Szasz leaves no survivors but what he does leave is a carved line on his own flesh for each life claimed.
* Victor the navigator smiles at the camera when Randy sings "River of Jordan".
* Victor/Victoria (1982), this trope is Victoria's cover story: she disguises herself as a young man in this sort of relationship with the older Toddy.
* Victor/Victoria. A dancer gets punched whil wearing a mask on the back of his head and it's the mask that ends up toward camera.
* Victor/Victoria bodyguard was an All-American football player in school.
* Victor/Victoria) but has to perform as a contralto so that her voice is deep enough to keep up the illusion.
* Victor/Victoria, but then the cockroach climbs up the leg of another diner, and during the resulting melee they're able to escape.
* Victor/Victoria, King Marchand finds himself distracted by thoughts of "Victor" and suffers from this while trying to have sex with his girlfriend Norma.
* Victor/Victoria of this trope. Marchand (the guy) is initially repulsed by the idea of having a relationship with another man but eventually decides that it doesn't matter. He tells Victor he doesn't care if Victor is a man and kisses him. Victor then reveals herself to be a woman. Marchand says he still doesn't care and kisses her again. While it's true that he's happier to be with a woman, there's no sense of extreme relief when he finds out because he loves Victor/Victoria as a person either way.
* Victor/Victoria provides a few perfect examples of the reverse of this. The one that stands out most is when Victoria, dressed as Victor, pulls Norma into a bedroom and acts as if she wants to have sex with her. Norma later bursts out of the room and proceeds to yell angrily at her ex(?)-boyfriend (who is now dating Victoria) that Victor is a woman.
* Victor/Victoria romance; subject matter includes queer male romance, homophobia)
* Victor/Victoria series has the titular character prepared to have a relationship with a man, but then luckily finds out they are a woman.
* Victor/Victoria the mobster is thought by his girlfriend to be attracted to a man ("Victor" who is actually a woman playing a man playing a woman). His girlfriend keeps going on about it, and he grabs a bar of soap. We expect rough anal sex as punishment to ensue; the next scene has his furious girlfriend throwing furniture at him- with a mouthful of soap.
* Victor/Victoria two broke actors eat a sumptuous meal, planning to avoid paying by claiming there's a cockroach (which they brought with them) in their food. The waiter is not fooled, but the cockroach flies to another table, causing the patrons to scream. In the ensuing chaos the actors decide to just run for it
* Victor/Victoria when King tries to find out if Victor[ia] is really a man or a woman. King's poor bodyguard gets the worse end of the deal, being trapped out on the balcony in the snow.
* Victor/Victoria when Victoria complains about the discomfort and expresses a fear that she's damaging her figure.
* Victor/Victoria: When Victoria finds a cockroach in her hotel room, she takes it to a restaurant and orders everything on the menu for her first meal in days, a

plan that Toddy decides to help her with when he drops in and joins her (having watched her talented but failed audition at his nightclub). But the waiter and manager, having seen this scam before, both express skepticism—until the bug escapes and crawls up another diner's leg, causing a mass panic and allowing Victoria and Toddy to flee unnoticed.
* Victor/Victoria, when Victoria starts masquerading as the female impersonator Victor, she and Toddy pretend to be lovers.
* Victor von Doom apparently has surveillance of the Baxter Building in
* Victor Von Doom life and helping her deliver her and Reed's daughter safely, claimed as his reward the right to name the child, and so named her Valeria, after a lost love of his childhood. He then declared Valeria to be under his protection. The two of them have had an oddly sweet familial relationship since, with Valeria even calling him "Uncle Doom".
* Victor Von Doom's pride and arrogance pushed him into an ill-considered experiment that backfired, permanently scarring his face. Though it could also be argued that his less handsome appearance
* Victor Vran has the Codex, which is mostly an ingame manual (it describes the different weapons' attacks, the crafting recipes, etc.), but it also includes descriptions of monsters (including bosses) written as they were notes from Victor's diary; those entries appear when Victor kills one for the first time.
* Victory at Ostagar has Adam Hawke, to his brother's constant consternation. He is both talented and very, very lucky.
* Victory at Ostagar which goes unsuspected thanks to the lack of a Fereldan forensics department.
* Victory at Sea. About twelve hours of Flaunting Your Fleets. Oh yes, the army gets in there somewhere too...
* Victory Auto Wreckers commercial, in constant rotation (with minor updates) since 1985.
* Victory by Endurance: Winning simply by lasting longer than the other participants.
* Victory by Endurance: Winning the battle simply by lasting longer than everyone else.
* Victory by Endurance: Yeah! That opponent's now worn out and too exhausted to fight back! I win this battle!
* Victory by First Blood: A person loses a duel by being made to bleed.
* Victory class. Smaller and not as powerful, but cheap and reliable and just as useful in mass quantities.
* Victory-class Star Destroyers; Katana-fleet Dreadnoughts; some of the corvette-class ships edge into this.
* Victory, Earthforce is gonna stay looking that way for a while longer.
* Victory Fakeout: When it looks like the boss in a video game has been defeated, but it hasn't.
* Victory (featuring The Notorious B.I.G. and Busta Rhymes) but it was very brief.
* Victory-Guided Amnesia: A character accomplishes something only to lose their memories of it afterwards.
* Victory-Guided Amnesia: A character wins, but ends up losing their memory of the incident.
* Victory Gundam actually features a good number of dark-skinned characters, but Shakti is a bit odd considering her mother is extremely white, living in a society (Zanscare) of predominantly white-skinned people. No explanation for this is ever given (her father is never shown).
* Victory Gundam and her memorable moments in the series, and at the same time hated for all the horrible things that she has done to the point where her fate is considered to be fitting punishment by many fans.
* Victory Gundam featured at least one female, Afro-American main cast member and a couple of other kids who were not white. Also, the origin of Shakti are up to debate, with her name suggesting Indian descent.
* Victory Gundam Fonz Ka Gatie manipulating things for his own benefit.
* Victory Gundam has an evolving eyecatch that advances two frames per episode.

* Victory Gundam in a mobile suit. Usso may be a very competent pilot, but has to painstakingly learn actual combat strategy throughout the series.
* Victory Gundam managed to avoid using much stock footage for much of its run. In fact, the only really noticeable stock footage is... a brief one-second explosion that takes up the entire screen when transitioning between scenes.
* Victory Gundam right back and treat him as as much of a threat as any adult soldier.
* Victory Gundam. The first of the girls is pregnant in the end of the story, too.
* victory in battle and a universal creative force. To the Romans, the leader of their forefathers was Venus' own son Aeneas.
* Victory in the Pacific are combined. E.g. Lae represents multiple bases on the northern half of New Guinea, Saipan also represents Guam & Tinian, Pearl Harbor & Yokosuka Naval Yard stand-in for all of Hawaii & Japan respectively, etc.
* Victory in the Pacific are this—not only are they slower than their Japanese counterparts, but they have no central base to operate from, adding to the "glacier" effect by limiting the amount of ocean over which they can project their "mighty" surface combat power.
* Victory in the Pacific between approximately equal opponents has a good chance of coming down to a giant battle in the Sea of Japan with the game at stake.
* Victory in the Pacific if you win a battle by mostly "disabling" opposing ships (which sends them back to port and ends their part in the battle, but inflicts no lasting damage) while most of your own losses are sunk and thus out of the game for good.
* Victory In The Pacific of both sides, despite the large amounts of American reinforcements, but played straight with land-based air units, which when destroyed, sit out the rest of that turn plus the entire following turn, and then return to the game good as new. The idea is that a ship sunk is completely sunk, but a flotilla of hundreds of aircraft isn't entirely destroyed, it just takes losses to the point it has to re-form with new equipment before it is combat-worthy again.
* Victory in the Pacific: The Japanese fleet is usually reduced to making one of these at the end of the game, due to their lack of reinforcements.
* Victory in the Pacific, the sole fleet carrier with an armor factor of only 1.
* Victory Is Boring: A character succeeds, but doesn't know what to do afterwards.
* Victory Is Boring: Achieving one's goal has the downside of no longer having the fun of trying to achieve it.
* Victory Is Boring: Achieving your goal has the downside that you can no longer experience the fun of trying to accomplish it.
* Victory is definitely an example: It's an incredibly powerful (and visually impressive) Vorlon beam weapon that draws so much power from a relatively underwhelming Minbari-sourced power plant (rather than the Vorlons' usual hyperspace tap) that it cripples the ship for a minute after firing.
* Victory marks A tally of how many kills/successful missions a pilot has accomplished. The more there are, the more badass the pilot/craft is. They can vary in form from simple tally marks to decals of the victims' roundels or flags.
* Victory of Eagles, drafts the human herders/minders there for a logistics train, and heads for the fighting. Meanwhile Lawrence makes it to the lifeboats (his cell having been opened by a stray cannonball), is briefly jailed in Dover before Admiral Roland has him brought to the main forces south of London and convinces the high command that Temeraire is needed on the front lines badly enough to send Lawrence to get him, and is shuttled to the breeding ground... to find it abandoned by human and dragon alike mere hours before.
* Victory of Eagles, the high command got word of local militia west of London defeating several french foraging units (by some accounts even making use of unharnessed dragons that had wandered from breeding grounds in that direction) and sent a messenger with a battlefield commission of Colonel for whoever was in charge. Temeraire accepts with alacrity, to the suprise of all humans involved.
* victory of erasing the Blues so that they can get back to the status quo of fighting Blue soldiers. This fear remains consistent from this point forward and is

finally admitted directly in season 15.
* "Victory of the Daleks" at being destroyed at the hands of the newer, more "perfect" Daleks they had created.
* "Victory of the Daleks": Churchill gets one too (how many shows can you say that for), when the Doctor is indisposed, inspiring Bracewell to take the fight to the Daleks, in characteristic Churchill style.
* "Victory of the Daleks": Danny Boy is one of three pilots that fly Spitfires into space to assault the Dalek ship, and is the only one to survive.
* "Victory of the Daleks" has the Cabinet War Rooms as a major setting.
* "Victory of the Daleks" hostage by threatening to blow up the TARDIS and take the Dalek ship with it. Eventually, however, the Daleks figure out that the self-destruct device the Doctor's been threatening them with is actually a jammy dodger, and everything goes to hell in a handbasket.
* "Victory of the Daleks", new Daleks are created with colours according to their rank. Those with the rank of "Drone" are red. We don't know if this was intentional.
* "Victory of the Daleks" sequence when they first appeared, showing off their appearances and explaining their special power.
* "Victory of the Daleks" The Doctor and Amy talk pointedly about how they're going to go away and do something else for half an hour, but Bracewell takes a while to get the hint.
* "Victory of the Daleks". The smallest Dalek time unit, the "rel", also began in films and comics but has been incorporated into TV canon in post-2005 Dalek stories.
* "Victory of the Daleks"), the trope is played with when the older Daleks pose as helpful servants of the Allied War effort. This gives rise to the amusing yet menacing request "WOULD-YOU-CARE-FOR-SOME-TEA?"
* "Victory of the Daleks" to a Dalek while whacking it repeatedly with a giant spanner. "YOU! ARE! MY! ENEMY!"
* "Victory of the Daleks", turning on every light in the city just before a German air-raid. Attempts to turn the lights off prove futile.
* "Victory of the Daleks" while trying to persuade Winston Churchill that the "Ironsides" he's using as secret weapons (read: Daleks) are actually dangerous aliens.
* Victory on Janus and an old friend, both probably, but not certainly, long dead.
* victory party will be held at the moment the polls are opened. Unfortunately, everyone's so busy celebrating that they forget to vote, leading to Martin Prince's moment of triumph with a parody of the "Dewey Defeats Truman" headline mentioned above.
* Victory Road, Matt Morgan lost such a match when Hotstuff Hernandez threw fake blood on him. In Brew City Wrestling, Stacy Shadows cheated in a First Blood Steel Cage match by pouring previously drawn blood on women's champion Selene Grey.
* Victory Road under the mask yet it made no sense for her to keep her face hidden for weeks when she could have taken off the mask to reveal who she was and thus let Madison keep the title. Furthermore why would Madison have her attacker wear a mask if it wasn't Velvet or Lacey? The stipulation only said Madison would lose if either of them interfered. It would only be a simple DQ if anyone else interfered. And when it was confirmed that it hadn't been Velvet or Lacey under the mask, the title switch to Angelina was still counted despite being a bad call by the referee.
* Victory, she wasn't the first ship to be given that name, but the one that remains is the one that saw the glory and death of Admiral Horatio Nelson at the Battle of Trafalgar. While Nelson's story gives the ship legend status, she's still a full-fledged Ship of the Line and thus a valuable piece of history as well. She was almost lost to time as well, but her significance was touted, and the British government agreed to maintain the ship as a testament to the Royal Navy's glory days.
* Victory shows a more realistic deployment: In the beginning, the V-Gundam takes the Superiority Fighter role while the Gun EZ takes the workhorse role. Then, the V-Gundam is mass-produced as the V-Gundam Hexa and takes the workhorse role, with

the V-Dash Gundam filling in the Superiority Fighter role until the V2 is ready, at which point the V-Dash takes on a Joint Support role, covering both the V-Hexa workhorses and the V2. The Gun EZ and Jamesgun are relegated to the gunship role held by the Ball in the One Year War.
* Victory Unintentional" had three robots sent to explore the surface of Jupiter and contact the Jovians living there. The aliens are so impressed by the robots, they promise to leave space to the obviously superior species.
* Victory Unintentional. Their objective? To discover if the Jovians have developed force field technology. Once the Jovians demonstrate the technology, the robots somberly return to their ship to report the bad news to their human masters.
* Victory Unintentional": The Jovians greet the ZZ robots by opening fire with some sort of heat ray, raising the ambient temperature of their target ninety degrees centigrade (roughly 150 degrees Fahrenheit). The ZZ robots were built to be nearly indestructible, so they don't notice the effect immediately.
* Victory Unintentional to talk with the aliens directly, and establish if they're able to create spaceships.
* Victory vessels. Number six is the Trafalgar one, still in commission as a museum ship.
* Victor Zsasz, a foe who, even more than the Joker, just likes to kill people. That's it. Unlike the Joker he does not have schemes, plans or esoteric motivations, he just likes to kill. When Black Mask, the criminal mastermind who managed to take control of
* Victor Zsasz has dozens, if not hundreds of scars on his body. They're all self-inflicted; Zsasz is a serial killer who carves a tally mark into his skin for every victim he has.

* Vida: A couple who Emma hooks up with offer to have her be their third. She rejects the offer though, saying that never works in the end.
* Vida: A number of minor/background characters appear either nude to varying degrees or having sex in the series.
* Vida: (bisexual female main character, lesbian supporting characters, biphobia, queer female romance, homophobia)
* Vida: Lyn has casual sex pretty frequently, with the second season also revealing that she even regularly attends orgies (though this stops in the episode we see, as she's grown tired of it). Emma does this too, but to a lesser degree, with her number of sexual partners in the show being more limited.
* Vida: Lyn meets up with her long-missing father at his church and reveals who she is to him (they hadn't seen each other since Lyn's childhood).
* Vida: Marisol gives a guy oral sex, then a video he took of this gets shared around, humiliating her.
* Vida: Mishel Prada, like her character Emma, is Mexican-American. The only difference is that while Prada's character is of full Mexican descent, Prada is of mixed Mexican, Dominican, Puerto Rican, and French descent. Likewise, Roberta Colindrez is half Honduran and half Argentine like her character, Nico. However, Colindrez is Mexican-American, having been born in Mexico though growing up within the US.
* Vida: The American-born Lyn is played by Mexican actress Melissa Barrera. Likewise, Elle Paris Legaspi, who played Lyn as child, is of Filipino and Italian descent.

* Video Game Dunkey). Dunkey says that he's still useful as a critic, meaning you just have to see what he thinks of a film and figure the film's actual quality is the opposite of whatever he says.
* Video Game Dunkey lives and breathes this trope. While he can be off-the-wall and overtly goofy, some of his more subdued moments are golden.
* Video Game Dunkey often mistaken for being African-American by new viewers of his due to his voice. This has actually become a running joke amongst his fans, with lines such as "I don't watch Dunkey because he's black" or "Dunkey was black. Now he's not" being seen in his comments section on a regular basis.
* videogamedunkey: While the content of his videos is often silly and nonsensical, there are often times where the goofy jokes serve to illustrate a salient point about the subject.
* Video Game emulators for older consoles often have an option to mimic the scanlines of a CRT tv, as many gamers who grew up with the actual consoles find the games look "wrong" without them. The scanlines also help blend the pixels making them look slightly blurry, like a very early anti-alias effect.

* Video Games and Fate: Video games tend to be highly linear by their very nature. Some games call attention to this by having fate or destiny be a narrative or thematic element.
* video games are harmful, it really shouldn't come as a surprise that, so far, no science exists that backs the notion that video games cause any more or less violence than books, and video gamers are no more or less violent or sociopathic than anyone else; it just becomes more of an uproar in media when avid gamers kill people than when passionate quarterbacks do the same.
* Video Games) are Japanese, as are two of the three companies that still make

* Video games are often made in the order they're played, which is to say, production starts on level one, followed by level two, etc. As a result, by the time the final level is being completed, the staff might be rushed with completing production of the game taking precedence over giving the game a flashy end. Cynics in the development team might likewise figure it's unlikely anyone will have the attention span to play the game all the way through, so the ending isn't really worth devoting much time or effort to. Games made on the cheap, including so-called "

* Video Game, Shaggy (incorrectly) blames the spooky groundskeeper, who then appears and starts a long rant about how everyone always blames the spooky groundskeeper, including the line "Why don't you just say the butler did it?"
* Video Games has surveyed hundreds of thousands of players worldwide and identified twelve primary motivations for playing games. They have then applied statistical analysis to their data and discovered that certain motivations often go hand in hand, ultimately arriving at three "motivational clusters" that appear to hold up regardless of player nationality, age, and gender:
* Video Games. Having never intended gamers to challenge it, the programmers gave Kerafyrm 10 billion HP (for reference, a standard dragon has 100 thousand and gods top out at 2 million). It took almost 200 of the best players in the game over four hours to kill it. On the second try.
* Video Game, she was this to her husband Malfurion and his brother Illidan (who hate each other, long story). King Varian also let her act this way towards the entire Alliance on occasion, out of respect for her superior age and considerable skills as a commander.
* Video Games improving, but you're still likely in trouble if you're looking for a more niche game.
* Video Games industry. Many workers (programmers, graphic designers, 3D modelers, animators, etc.) are hired to work on large projects with astronomical budgets, only to be fired once said project is complete. Many companies don't even go that far, and just fire their workers before they're legally required to provide any benefits (such as Health Insurance).
* Video games in general fell into this category when they became popular during the '80s and '90s. In many cases, there was a notable divide between the children who enjoyed playing them and parents who felt they distracted them from doing more constructive things. Since many of today's parents grew up with them, however,
* Video Games in general have prices in the format of multiple of fifty minus one or occasionally five such as 399 or 549.
* Video games in general tend not to suffer from this, and indeed most of the truly successful (non-sports based) games of the past decade have had at least faint hints of science fiction or fantasy, and many of them have been openly and unashamedly embracing of it. This may perhaps be to do with the fact that the medium is suffering from its own ghetto, and that it has until recently been primarily the preserve of the type of people who tend to also be interested in science-fiction and fantasy.
* Video Game Sliding: Sliding is much more useful when you can do it from a standstill, with enough force to break walls and/or kill enemies.
* Video Games of the 1980s. In this decade it made, named and codified:
* Video Games of the 1990s, to the personal computer; the industry became an

inevitable force of media, spawning new genres and tropes with it. The era gave us:
* videogame's performance in the original film as well as a soundalike for new lines. Although this came with Pacino's blessing, who hand-picked his replacement: years of smoking made it impossible for Al to do the Tony Montana voice again.
* Video Game Stealing: Video game characters steal in unrealistic ways.
* Video games that are deliberately corrupted frequently fall into this territory. Either by messing with graphical/model data which can cause flashing textures or large, spastic polygons. Same can go with sound bytes stored in the game, either distorting horribly or becoming plain (if rather painful) white noise.
* Video Games That You Play Games with Including Visuals Played Using Electronics
* video game streams were crossed when fighting Tiamat in her home dimension. Later on however, the idea was rejected when fighting the Megaspook, since they were still in New York City and this time they didn't have an extradimensional portal to skew the odds.
* Video Games, usually the ones where Witty Banter is a feature of real commentary. In games, you can get the same canned lines of "witty banter" played back 50 times during a single game.

* Videssos: The Empire of Videssos hires mercenaries from neighboring countries to fight the Yezda. Each country specializes in supplying different types of troops.
* Vid explains that when the Warr came around, people lost interest in the church- and lost their hope, as well. He worked to bring people back, and got in contact with the "unknown spaces of the universe"- also known as the callers. Despite this, not everyone came back, and those who didn't criticized his church, as it focused on something beyond the Warr and the government. Vid's goal is to break the barriers of reality and live in peace with the other world.

* vieira is a rare, expensive mollusc that is frequently carefully prepared and served, in its shell, one to a person as a tapa. In the United States, especially in the Northeast (more or less due west from Galicia), scallops are frequently served in large handfuls with bread crumbs and butter, broiled in a disposable pie plate, and are generally the whole meal along with a beer and some bread.
* VI elements are seen (well, visibly futuristic. The jackalheaded guards are probably robots, but they don't look the part).
* Viel Spaß mit... doesn't take over and make the protagonists unrelatable. For example, the daughter of the Roman family is married off at the age of 16 instead of 12 - the latter is mentioned as being standard then, but the family does it differently. And of course, they always treat their slaves / servants well.

* Vietnam War both had a drive for power that is best described as pathological.
* Vietnam War. Considering that most of them were drafted, they had low morale and didn't like their authority, i.e. you.
* Vietnam War in which eleven rescue crew members died, two were captured and one ended up being rescued alongside the original pilot. It was worse that this also led to a massive reduction in air support for the South Vietnamese due to the amount of resources that were used to rescue the American.
* Vietnam War light attack "bombers" such as the A-4 Skyhawk, A-6 Intruder, A-7 Corsair or F-105 "Thud" would often jettison all their bombs once enemy MiGs engaged them. This was because these aircraft were as maneuverable as fighters, when not laden with bombs, and except for the A-6, all other aircraft had a nose-mounted gun with which they could defend themselves in a dogfight.
* Vietnam War muses that since such a large portion of the U.S. economy is geared towards the military, there is a risk of a military-industrial alliance affecting policy, and Vietnam is a case in point.

* Vietnam War, which involved recruiting 100000 persons who had scored in Category IV of the Armed Forces Qualification Test (meaning they were mentally and/or physically unable to serve): some of them were mentally challenged, suffered from light physical impairments or had weight issues, and others were unable to read, or even speak English. They were soon nicknamed McNamara's Morons and McNamara's Misfits, and suffered worse outcomes, either in or after the fighting, than regular

recruits.

* Viewtiful Joe has all the playable characters scrambling around, looking toward the sky in a high, wide-angle shot.
* Viewtiful Joe: One of the bosses, Sergeant Big John, frequently talks over the military walkie-talkie and as such he always ends his sentences with "over". Even when he's disguising himself as "Big Lee" later on, he still says "over" after his sentences, which easily gives up his identity to Joe and Silvia.
* Viewtiful Joe (the first installment of Kamiya's Hero Trilogy), which is owned by Capcom and can't be used in a Nintendo published game. Although, a hidden secret has Wonder-Pink call Sylvia from the game and ask about Joe.

* Viewtiful Joe. To an outside observer, this could just as easily be a magic spell Joe casts which causes a bazillion Joes to appear on the screen beating the bejeezers out of everyone.
* Viewtiful Joe, who originally voiced Hulk Davidson in the games, voiced the announcer in the anime.
* Viewtiful Joe would take over as Dante in all his appearances thereafter.
* Viewtiful Switch hold hands and spin around before making a cute little pose. This creates a heart that damages all enemies onscreen.
* Viggo's dragon hunters make their chains, cages, etc. from a "dragon-proof" metal completely impervious to all forms of dragon fire and that dragons can't bite or claw through. It's a constant mission to find dragons that can get around this. The winners? Any Razorwhip tail is sharp enough to slice through it, all Hot Burples can bite through it, Changewing acid can dissolve it underwater, and Dagur's able to train his Gronckle to smash through it. Lava also weakens it like it would any metal under such intense heat, enough that one good blast can shatter it — such a technique would normally require at least 2 different dragon species to pull it off, but since Dramillions have both lava
* Vigilance believes in a glorious past, even giving themselves names of figures from the American Revolution. They believe that privacy has been stolen from them by the government, though the privacy rights they believe in were never really constitutional rights, they were merely the result of the practical difficulties of collecting information in the pre-digital age. When they put the government on trial, Collier says the defendants were only entitled to the rights given in the original constitution, clearly forgetting that as a black man, he would have had no rights whatsoever under the system he was espousing.

* Vigilante: Leonard Kord is released after the real attacker confessed to the attack Leonard had spent years in prison for, but the public still considers him guilty of the attack and he gets attacked and his home surrounded by an angry mob preventing him from getting any work and ensuring he gets blamed for any "fights" where he tries to defend himself from his assailants. He's eventually murdered by the Electrocutioner for a crime he did not commit.

* Vigilante Man points out that he could use his high-powered gun to blow MacLeod's head off. MacLeod responds with "but you won't", and the two draw their swords and fight by the "rules".
* Vigilante Man: Someone who's not an official agent of law enforcement decides to go out of their way to find, capture, or even punish (alleged) criminals.
* Vigilante Man storyline. A rich man who wears a white suit and mask and kills the "undesirables" in his neighborhood. Frank is not flattered.
* Vigilante Man, this badass will just have to take the law into his own hands.
* Vigilante Man to be driving. It has advanced electronic surveillance capabilities, an onboard computer system with phone link (in the 1970s!) and a retractable 4-shot guided missile launcher, but no armour except for some steel plates around the driver's seat, as Bolan only uses it for long-range combat.
* Vigilante Man Wells Fargo. Yeah, if you thought messing with the bank was bad today...
* Vigilante Militia: A group of like-minded vigilantes form a crime-fighting organization.
* Vigilante: Nick leads a neighborhood vigilante group, of himself and at least three other men, killing or roughing up local drug dealers, killers and rapists, while also making rallying speeches for new recruits at secret gatherings and having plenty of locals tipping him off.
* Vigilantes also has trouble with the "instant villains." They are ordinary people who took a drug that boosts their Quirks to unmanageable levels, often with some mind-affecting drugs mixed in to make them behave irrationally. Despite them going on rampages, there's not much the police can do to legally prosecute them, as the drug itself is technically not illegal. It gets worse when people start getting dosed without their knowledge or consent. The heroes have to treat them as both villains to be stopped and bystanders to be saved at the same time.

* Vigilantes' Dawn: After everything they've gone through the last five years, neither Oliver nor Laurel have any interest in being with anyone else.
* Vigilantes' Dawn: After reuniting with Oliver in Russia, Laurel fakes her death to escape the League of Assassins with him. Unlike most examples, the decision was largely impromptu, Laurel had no plans to deal with the League when the ruse was blown to hell after her and Oliver's return to Starling City.
* Vigilantes' Dawn: Every chapter begins with an excerpt from a book written by one

of Oliver and Laurel's descendants, published one hundred years in the future.
* Vigilantes' Dawn: Laurel can speak multiple languages like Oliver. Thus far, it's confirmed she knows Russian and Arabic. As she's had the same training as canon Sara, she may know Cantonese as well.
* vigilantes simultaneously kill the presidents of both nations, and without leadership in either nation everything escalates. Best-case scenario, America is nuked. Worst case, everything is nuked.
* Vigilante Tendency: In a rare heroic example, Hibari "appropriates" the local Yakuza group's base for the Peaceful Namimori Committee to use for their vigilante activities. Said Yakuza are forcibly converted and eventually become their loyal minions.
* Vigilante Tendency: The events of the fic stem from Tsuna's decision to protect his crush Kyoko from some bullies who want to get revenge on Ryohei. It all goes downhill from there.
* Vigilante Tendency, the Tomaso Family becomes well-known throughout the Underworld for their robot army (built by Spanner).
* Vigilante, the fifth and final stage has the player fighting on top of girders high above street level.
* Vigilant is a failure in every aspect of his life, repeatedly testing fate. And yet, he is the central protagonist of the show.
* Vigil are a hard counter to plasma weaponry in space combat: the kinetic barriers stop plasma from making direct contact with a ship's hull, meaning the only way hot plasma could transfer its heat is through vastly less-efficient radiation over conduction through direct contact. In order for plasma to affect a ship in any meaningful way, the shields have to first be knocked out with kinetic munitions, unless one bypasses them entirely with laser weapons, which the shields can't stop.
* Vigil humanity has created are bears. Some of which joined XCOM, resulting in giant, power-armor clad humanoid bear soldiers with plasma cannons.
* Vigil of Stendarr of Mercy and Justice, and selflessly protect mortal life from the Daedra and other supernatural threats, like vampires and werewolves.
* Vigil technology. The turians developed their own rough approximation in the form of Exos, although it wasn't until they met humanity that they could directly upload a brain into an Exo body.
* Vigil. Then again, it says a lot that hunter society has a term for cells that work with monsters towards a greater goal. That term is "cancer cell."
* Vigil, where brain uploads, backup copies of everyone's brain, and cortical stacks—small storage devices that maintain a saved brain-state—are ubiquitous except among bio-conservatives. Death just means you get uploaded into a new body.
* Vigor Mortis: a half-dead starved orphan discovers they can innately use Necromancy, an illegal and blasphemous branch of magic. Can they balance the need to use it to save them and the ones they care about from abject poverty with the need to not get executed?
* Vigor Mortis The 'creatively' named Templars of the Church of the Mistwatcher act as general enforcers and special forces for the kingdom.

* VIII opportunities, both from harvesting dragon corpses and enslaving and 'training' young dragon. As to it being a war, dragons in the setting are fully sapient, and Quixote's expedition is in Garrote Gorge — seat of the largest known dragon settlement, complete with a king.
* VII is aimed at young teenagers, many of the new fans are this age, meaning that twenty years of aging technology hasn't softened the game's ability to relate to kids.
* VII is similar. It gives whoever it's equipped to a good stat boost, but there are two major downsides to it: The first being that as soon as the battle starts, the person who it's equipped to has Death Sentence cast upon them, which kills them after 60 seconds have passed (unless you finish the fight before then), and the second being that once it's equipped, it's a physical nightmare to unequip unless you meet certain conditions. Tifa tends to make the most of the curse since two of her weapons get big power boosts when she's Condemned.
* VIII, there were the Necromancers, but they were only enemies if you chose the Light Path. If you chose the Dark Path, they were important allies.
* VI is also an example of the trope. His mechanical, sand-diving, transforming castle just by itself is an example of how incredibly COOL an Engineer can be.
* VI is led by Lady Triệu, whose leader bonus that gives all Vietnamese units a speed and combat boost in jungles, woods and marshes, bonuses that are doubled in Vietnamese territory. Given that Vietnam's base civ ability encourages it to settle in such terrain, and gives its workers the ability to plant new forests as early as the Medieval Era, this means that any would-be invaders are going to end up slogging through dense, green terrain while Vietnam's units come speeding out of the jungles to deliver an overwhelming counter-attack.
* VI, it does reduce the maintenance costs of units (by 1 or 2 respectively) being a very useful Policy Card for civilization or any playthrough. Conscription is gained at State Workforce, one of the last Civics in the Ancient Era and Levée en Masse is earned at Mobilization, one of the first for the Modern Era.
* VII, the franchise is starting to plummet. They argue that the fun factor of the game is relinquished for the sake of pleasing the fanboys and fangirls, sacrificing the deep integrated storyline that made the original RPG such an amazing game for the sake of indulging in characters such as Sephiroth, Vincent, and Zack.
* VII. This in turn brings it up to somewhere between a Level 2 and 3.
* VII to happen in the conflict are skirmishes and manouevering for position, followed by peace negotiations. It can escalate into a full-scale war, but hints in later games implies that the path in which that occurs isn't the one that happened).

However, by the endgame, mages can only hit for a couple hundred damage whereas a warrior can hit for up to a thousand damage with a good Knuckle Sandwich. The game's class system, however, allows a mage to learn some good support and offensive skills as well.
* Vijay Singh hit a ball of the 16th tee at the 2009 Masters, it skipped about 5 times off the water hazard, hit the berm, bounced onto the green, took a curve to the left, and rolled right into the cup.
* Viki is one of the strongest magic users and has a unique "Blinking Rune". She is also the weakest physically and sometimes joins the Tenkai Star's army because she's looking for her next protector.
* Viking Age Scandinavia which may or may not have existed in history and were likely inspired by the Valkyries of Norse mythology.
* Viking age were infamous for this. If a man felt wronged by another, meaning an insult or an act of violence, there were four ways to resolve the conflict.
* Viking Funeral: A dead person is cast away in a boat with their possessions while it is set on fire.

* Viking Funeral: A funeral rite where the deceased is laid on a boat with his effects, sailed on the sea and burned with a flaming arrow.
* Viking Funeral (fire. Probably neither variant represents real-life burial customs).
* Viking Funeral in the bathtub (which ends up setting the shower curtains on fire).
* Viking Huntress: Rune of the Dead, and find GOLD! Next morning, they start murdering each other for a bigger share.
* Viking invaders. Accounts of her actions might very well be the origin of the phrase "cutting off the nose to spite the face".

* Vikings a captive priest is given the chance to gain his freedom by carrying a red hot sword across a village to the Viking queen. He sees himself protected by his Catholic faith, easily handling the sword and putting it at the Queen's feet to great awe. Then the sword is put into his hands, he screams in agony and only makes it halfway before collapsing in tears as the Vikings laugh.
* Vikings and being confronted by his brother Ragnar finally snap Rollo out of it.
* Vikings are depicted running about tossing eggs at huts, with the caption explaining that "for many years, until they became truly nasty, Vikings would plunder, loot, and then
* Vikings because she could no longer cope with the long filming periods in Ireland away from her family.
* Vikings: (bisexual female main and supporting characters, queer female romance, implied bisexual male main character)
* Vikings: Bjorn and his viking companions travel to the Middle East and get in the middle of a feud between two nobles. One noble invites them all to a feast and then reveals that the meat is one of the feuding nobles. The vikings spit out the food in disgust.
* Vikings, but whether they actually are her parents or even existed is left ambiguous. The show integrates the legendary inspirations with other historical sources, and often changes around both to fit its needs.
* Vikings: Clive Standen said that he was actually more interested in the part of Rollo, but nonetheless auditioned for Ragnar, which would turn out to be the lead role for the first four seasons of the show. (Despite early drafts that planned to kill Ragnar in the first season.) After Travis Fimmel was cast as Ragnar, Standen did wind up playing Rollo.
* Vikings, due to his background as a Catholic monk and scribe, Athelstan has a fluent or working knowledge of several languages, including Old English, Latin, Greek, Old Norse, and probably High German because of his time in Charlemagne's court. He's also shown to have a natural gift for picking up dialects. It was this demonstrated ability that initially caught Ragnar's attention and resulted in him sparing Athelstan's life.
* Vikings: Earl Haraldson's young daughter Thyri is married off to an old man, Earl Bjarni. Both Thyri and her mother Siggy are dissatisfied with this decision. Earl Bjarni tells Thyri about their wedding, the sons he expects from her, and promises her gifts but she is visibly repulsed. During their wedding night, the fat, old and drunk earl passes out before he can consummate the marriage. In "Burial of the Dead", he complains about Thyri's lack of enthusiasm in bed and threatens to beat her for disobeying. Later, after Haraldson is defeated by Ragnar Lothbrok, Thyri is saved from her horrible marriage by her mother Siggy who kills Earl Bjarni in front of everyone. Thyri looks beyond grateful.
* Vikings encounter new cultures, often there will be a language barrier. This is lampshaded by having the characters actually speak Old Norse (Vikings), Old English (in England), and Frankish (in France). Eventually a translator will turn up who speaks both languages, and then one or both parties will begin speaking modern English for the benefit of the viewer.
* Vikings, flinging said teacher across the room. He storms out of the room and knocks down a chair for good measure.

* Vikings has recycled plenty of costumes from other productions filmed in Ireland and Northern Ireland.
* Vikings, if a Northman isn't wielding a shield or two-handed axe, he's almost certainly dual-wielding weapons. Floki in particular is unique in that an axe and dagger are his primary weapons.
* Vikings: In season 3, Ragnar's health slowly starts to deteriorate while besieging Paris. Whether it's from some illness, an accumulation of battle wounds, or a combination of the two, it's never revealed. When he gets back to Kattegat, he's bedridden and everyone assumes that he's dying. However, he eventually makes a slow and equally unexplained recovery in season 4.
* Vikings, in which King Ecbert presents Lagertha with a necklace and gently clasps it around her neck, complete with arranging her hair over the top of it.
* Vikings. It helps that it gives their region a more intimidating, marketable image. Many descendants of Scandinavian immigrants who have settled in Upper Midwestern America are also fans of the Minnesota Vikings with its stereotypical Viking mascot.
* Vikings, King Ecbert had a deep admiration his ally/rival Ragnar Lothbrok as he considered Ragnar to be a kindred spirit. When Ragnar surrendered himself to Ecbert, they had a drunken feast where they debated about each others gods in Ecbert's hall despite the fact that Ragnar was still his prisoner and was being sent to his death, much to Ecbert's deep regret. This exchange between them sums it up:
* Vikings often features armies fighting in formation, but sometimes not:
* Vikings, Ragnar Lothbrok takes on the princess and mystic Aslaug for his wife, after conceiving a son with her. Ragnar's first wife, Lagertha the shieldmaiden, leaves him with their firstborn son. Lagertha returns a few times in season 2, and now Ragnar gets to enjoy all the awkwardness of sitting between them at the dinner table.
* Vikings rode on horses that were around 130-150 cm at the shoulder. The horses are still here: Shetland ponies.
* Vikings Saga involves collecting scattered presents, taking care of Santa's reindeer and decorating a large tree, while the bonus level for earning three stars on levels 11-20 has you building snowmen.
* Vikings shieldmaiden Lagertha, has studied martial arts since childhood and started her own schools.
* Vikings shows the titular warriors wreaking havoc upon the hapless Saxons in this manner; with all the rape, slaughter and pillaging shown on-screen. Well, the rape is surprisingly low-key. In fact, we only see two instances of it, and only barely.
* Vikings the Saxons, while only suffering two casualties, plus the two guys who were originally watching the boats.
* Vikings this tends to be subverted as the Viking landings are usually unopposed since the defenders don't have the time to assemble a force big enough to stop them. On one occasion they have to storm the beaches the other way since a Saxon force blocks them from their ship. This is played straight when the Vikings sail up-river to invade Mercia. The Mercian commander decides to oppose their landing by splitting his army and defending both sides of the river. Ragnar simply choose the side of the river with fewer defenders and sails his ships right for the river bank. The Vikings storm the river bank and quickly rout the defenders while the Saxon force on the other side of the river watches helplessly.
* Vikings. While still a badass, he is severely diminished both physically and mentally.
* Vikings who is constantly doing weird movements with his hands and has a distinctive laugh.
* Vikings, who would go on to sack cities as far away as Italy, first shows up as an 11 year old who tries to talk his parents out of domestic squabbling, and later we have the rest of Ragnar Lodbrok's famous/infamous sons like Ivar the Boneless and Ubba, who would nearly conquer all of England for the Northmen, as cute little kids.
* Viking sword and its descendants (one-handed swords): The classic, cross-shaped

knightly weapon, a descendant of the Spatha and those originally used by the Vikings, and commonly paired with a

* V.I.K.I.'s motivations world dictated by robots. If she had started out with the premise of "I must preserve human happiness" instead of "I must preserve human life" things would have been far different. Of course, life, unlike happiness, can be quantified, and even logic based on preserving and maximizing happiness can become something horrific when pushed to its logical conclusions.

* Viktor Kurchatov from v3, his entire body covered in scars and missing genitalia, was caught by Will Sigurbjornsson and Julie Mikan nude and eating the corpse of Karl Van Buren. Viktor responded by screaming "I am the master butcher!" and moving toward Julie to try and kill her, only to be shot AND stabbed in the head.
* Viktor Kurchatov is horribly scarred more or less all over his body from being burned. He's both depraved and bonkers.
* Viktor Reznov managed to add onto that programming, sending him after the men responsible for the initial brainwashing.
* Viktor Schauberger is saucer-shaped, because it functions by spinning two concentrically-ridged discs very fast in opposite directions (in some versions, only one disc spins, and Schauberger's own notes state that they were coated with a paste of quartz and water, implying they were partially electrified) in order to generate a vortex that the vehicle supposedly uses to fly. Some designs (made by hobbyists) include a complicated air-injection manifold on the top to bring in already-spinning air, but they look remarkably like a stereotypical UFO otherwise.
* Viktor's decision to kill his only daughter for loving a Lycan kicks off the war between vampires and werewolves that leads to the death of Vampire Elder Amelia. Not only that, his decision to spare Seline because of her striking resemblance to the daughter leads to the deaths of both himself and Markus, also Elders. Without any strong leadership, the vampire covens fall apart and become fairly easy pickings for the Lycans by the events of

* Viktor Suvorov described in his book "Tales of a Liberator" how, during the invasion of Czechoslovakia, a group of Soviet soldiers accidentally burned a motorcycle and attempted to pass it off as loss to enemy action. The battalion commander spotted the lie immediately, but said he'd sign the protocol... so long as they'd add that the motorcycle had upon it a grenade launcher another company dropped into water. By the time the documents reached the front commander, the motorcycle also carried two fur coats, two night-vision devices, a rangefinder, a

machinegun, a radio transmitter and a barrel of alcohol.
* Viktor Suvorov wrote in one of his books how a man on television was given a Western and a Soviet tanks to drive, and stated that the Western is better because it has automatic transmission. Then Suvorov remarks it is very foolish of the driver not to understand the difficulties in wartime production and field repairs. Suvorov failed to understand that a properly designed heavy-duty automatic is actually more "soldier proof" than a manual.

* Village of the Giants several giant women appear alongside the males, taking over a small town after eating the growth-inducing "Goo".
* Village of the Giants, which has both bad teens (the giants of the title) and good teens.
* Village People song "In the Navy". Just remember what "subtext" is an anagram for! Hilariously, this song was originally recorded as the theme for a US Navy recruitment spot. The deal fell through when conservative activists complained about the Village People's association with the gay community. While the Navy yielded, they took umbrage to the implication there was anything at all gay about the Village People or the song "In The Navy" in any way promoted homosexuality. Or on a less insulting note, people questioned the legitimacy of the government using taxpayer money to fund a music video.
* Village People's "Y.M.C.A." and "In The Navy", respectively, but caught on to the fact that the songs celebrated homosexuality before they actually started using them.
* Village People's "YMCA". This one is unique in that the dance was invented after the song came out, by fans rather than the band itself.
* Village People: Victor Willis was the only member of the original lineup who wasn't gay.

* villain. After Vanessa is poisoned, he tries to send her to another country.
* Villain Ball Magnet: No one in universe can or will see this character as anything but evil, effectively treating them as a villain.
* Villain Ball: The villain loses because of an inability to restrain the urge to keep doing bad deeds.
* Villain Ball: The villain's downfall comes from the inability to resist the urge to continue doing bad things in situations where doing so would be impractical.
* Villain Ball: The villain's undoing is because of their own actions.
* Villain Ball: Villains always lose because they can't be evil in a smart and competent way.
* Villain-Based Franchise: Even though the franchise's identity is build around its titular antagonist Ghostface, they're actually a different villain everytime, while the protagonists are the same for the whole series.
* Villain-Based Franchise, particularly his original "Ansem, Seeker of Darkness" incarnation from the first game.
* Villain-Beating Artifact: The villain is invincible to everything but a specific artifact.
* Villain by Default: Some groups, professions or others are considered evil by default.
* Villain by Default: The villain is a villain because of what they are, instead of what they do.
* Villain-by-Proxy Fallacy: The logical fallacy that working with the bad guy means that you're also a bad guy.
* Villain-by-Proxy Fallacy: When someone goes after not only a crime's perpetrator, but those who supplied the perpetrator or were otherwise marginally connected to it, whether or not the people involved had anything to do with the actual crime.

* Villain Death: The main antagonist dies, ideally, by being defeated by the good guy. This may just be the set up for the proper ending which may take on any of the below forms.
* Villain Decay as it can be seen that he actually had more victories AFTER his marriage to Rita than before it.
* Villain Decay, as more and more elaborate moves make previous moves seem much weaker by comparison.
* Villain Decay, as well as a lot of fans of the game just outright liking them better than the player factions. A similar thing happened with another Classic World of Darkness antagonist group, the Sabbat of Vampire: The Masquerade.
* Villain Decay at this point. When you have this reputation among the Looney Tunes cast, you know you’re this.
* Villain Decay in every game like Wily and Sigma (who were turned into complete jokes because of it), he keeps to manipulating things from the background, only personally taking on Zero in the final game of the Zero series.)
* Villain Decay much the character from that second appearance - his knowledge is one of the best weapons in their arsenal, rather than them just carrying out his plans.)
* Villain Decay, Narutaki ended up as this: after the first few episodes, he did very little other than taunt Decade every time something went wrong.

* Villain Decay: People take your villains less seriously than you wanted them to.
* Villain Decay). Punch-for-Punch, Buffy is noticeably outclassed by both, serving as a potent reminder about the overconfidence the Slayer Strength may bring.
* Villain Decay returns Pinhead to his roots and tones down the gore a lot by moving to mainly psychological horror.

* Villain: Exit, Stage Left, but the latter captures him before he can get away.
* Villain: Exit, Stage Left isn't one, despite the higher consequences of letting a bad guy go free.
* Villain: Exit, Stage Left: Some stories end with the killer or supernatural being responsible for the events of them getting away.
* Villain: Exit, Stage Left: The villain ends up escaping after their plan is thwarted.
* Villain: Exit, Stage Left: The villain escapes after being defeated because the heroes just stand there like idiots and let him.
* Villain: Exit, Stage Left: The villain gets away after their scheme is thwarted.
* Villain: Exit, Stage Left: The villain gets away in the end. Especially counts if the heroes could've easily stopped the villain before they escaped.
* Villain Forgot to Level Grind: Numbers of overpowered villains introduced early on in a series are usually left in the dust when the main characters get rapidly stronger.
* Villain Forgot to Level GrindWhere the villain is still at the same level he was at ten hours ago, but the heroes are ten levels higher and therefore beat him handily.
* Villain Has a Point and all sorts of extremists (when there's something right about what the villain does).
* Villain Has a Point show those in the wrong can have valid points or motivations that the right side would be wrong to discount just because those making them are being reprehensible.
* Villain Has a Point: The bad guy actually makes a valid point even though they're committing evil deeds.

* Villain Has a Point: The evil character is right about one thing, leading to cries of "___ did nothing wrong!"

* Villain Of The Week develops an exoskeletal suit that allows him to move as fast as the Flash. Then his control chip gets damaged. Cue the "bug on its back" sight.
* Villain of the Week episode "The Wild Brood" ultimately turns out to be a train job. He managed to crash the train, but the product he intended to destroy in the wreck was saved before the derailment (which he managed by blowing up a bridge, closing Crystal Cove's railway line as of the second season).
* Villain of the Week. First we see Clover's long, slender legs replaced with stout, muscular legs complete with wide-childbearing hips; then the brace-faced owner of the large legs gets her freckled complexion and frizzy red hair switched with Alex's sleek, raven bob and Sam's peaches-and-cream complexion and smile. Guess who walks off with a smug smile?
* Villain of the Week from "Bat-sources". Luke Fox suspects she's been seeing Crow Security agent Sophie Moore despite his advice, and asks if those Bat-sources were the "tall, dark and girlfriend-material variety".
* Villain of the Week, he claimed the gods had sent him to collect their crystals, then gunned down the priests who objected with a remote-controlled laser rifle.
* Villain of the Week however as he immediately reverts to normal speech.
* Villain of the Week in the first season of is Takashi Inagaki, a journalist who wrote an exaggerated piece on a politician accused of accepting bribes, ruining the lives of the politician and his family. While he did publish a retraction, he did so in such a way that almost nobody actually reads it and he gets sent to Hell by the politician's son despite Hajime's attempts to convince the kid otherwise. Hajime even stopped working for Inagaki a few years before over his lack of ethics and refuses a new job from him when told to fudge an article. Given that Hajime sells celebrities' secrets back to them to make ends meet, that's saying a lot.
* Villain of the Week is the prince of Zarkovia stops Ben, Gwen, and Kevin from arresting him. Ben gets around this by destroying the mental control device the prince used to subjugate his people, letting them decide their own position in the civil war of Zarkovia.
* Villain of the Week, it takes some extremely fast-talking negotiation from Captain Picard to dissuade then from skipping to the "kill everyone to ensure our privacy" option.
* Villain of the Week named... either Lotten or Rotten. Even the series itself

couldn't decide, since it was spelled both ways on-screen at various points.
* Villain of the Week powers to make the elevator said victim gets into move rapidly up and down repeatedly. While the result is not shown onscreen, other charater's reactions imply that it is not pretty.
* Villain of the Week's assistant is annoyed by the misunderstandings caused by talking this way and decides to try another variety using C instead of P. It instantly backfires when he calls his neighbor Paquita "Caquita" ("little poo"), and she responds by punching him.
* Villain of the Week the Frog Hermit, who is flabbergasted to discover Ranma had never even noticed that he and his father, while dueling at Jusenkyō, had broken the bamboo pole the Hermit was sitting on and dumped him into the Spring of Drowned Frog.
* Villain of the Week to detonate if he hadn't sent a signal every 48 hours. No-one knows how long it's been ticking down either. And they can't get through the door to the hanger deck to escape.
* Villain of the Week tries to use diplomatic immunity but has a change of mind upon the prospect of dealing with the Mexican Justice instead of the American one.
* Villain of the week until they give up the item. Even the Kuno siblings find her unbearable.
* Villain of the Week used a newspaper's printing room as a hide-out. Terry said the place was empty because nobody reads newspapers anymore.
* Villain of the Week Vampire the Scoobies have faced. He's just over a century old, which means while he's a lot stronger than the average human, he's on the low end of the raw strength scale as far as vampires and demons go. He's also killed two Slayers and is considered one of the most dangerous threats around by the Watcher's Council.
* Villain of the Week Victor Dubenich, who isn't really law enforcement but has powerful security and blew their covers.
* Villain of the Week was an aspiring sniper who was rejected from the Marines because he showed signs of sociopathy. Gibbs grudgingly admits that he was one of the best and most resourceful snipers he had seen.
* Villain of the Week when animal rights activism was in the news, although before widespread Internet access was common.
* Villain of the Week, which is accompanied with a recurring stair climb (or later, elevator ride) up to the dueling arena and other recurring framing scenes.
* Villain of the Week which is so high up in the ionosphere it counts as this trope.
* Villain of the Week will be some flavor of ex-military, and they generally present a much greater danger and more difficult challenge to Team Westen than the crooks and con men they usually deal with. One such case is the ex-Green Berets and Marines operating a heroin ring in the first season finale. Recurring villains are more likely to be ex-military:
* Villain of the Week wrapped in tinfoil in the microwave, then sets the timer. Fusco defuses the bomb just by pressing the Stop button.
* Villain Omega Red, whose tentacles can bash and smash as well as transmit his "death spore virus" (its name changes from one appearance to the next, but he's got a fatal disease he's gotta give to victims periodically or it'll turn back upon him. It becomes his
* Villain on Leave: The main villain is absent for a few installments, and then comes back.
* Villain Opening Scene: The antagonist is introduced before the other main characters are.
* Villain Opening Scene: The story begins by introducing the antagonist.
* Villain Opening Scene tries to evoke this in order to scare The Joker's crew as they rob his bank. It doesn't work.
* Villain Opening Scene, Voldemort uses magic to suspend his prisoner in the air before eventually killing her.
* villainous abomination", they appreciated that he had a lot of respect for them.
* Villainous Advice Song: A song the villain sings to trick others into helping him

out.
* Villainous Advice Song: The villain uses a song to trick the hero into doing their bidding.
* villainous and had to betray the Doctor, and Clara messed that up). Thus, the women could become what the Doctor feared — and he wouldn't be able to stop them — unless they acquire mortal companions. As well, can Clara be happy with a companion who's virtually an anti-Doctor given how much she came to love and need him?
* villainous appeal. It helps that the brand barely harms his looks at all - being spread over a small area, consisting of a scarred eye and burn marks on the target spot. As one commenter put it:
* Villainous Aromantic Asexual: An aro-ace character is villainous, with their lack of interest in romance and sex being a sign of their villainy.
* Villainous Aromantic Asexual: A villain that has no interest in sex or romance.
* Villainous Aromantic Asexual: People who don't have romantic or sexual attraction are sociopathic or morally broken.
* Villainous. As it is, she has to use a parasol when she goes anywhere during the day.
* Villainous Badland, Heroic Arcadia: Heroes live in idyllic or at least cosmetically pretty places were villains live in places of ruin and little.
* Villainous Badland, Heroic Arcadia: Villains live in an inhospitable place while the Heroes live somewhere nice looking.
* Villainous Badland, Heroic Arcadia: Villains live in a terrible environment, while the good guys live in a more idyllic setting.
* Villainous Breakdown (a calm, collected villain is driven over the edge)
* Villainous Breakdown, and the noises she makes when she finally breaks down and cries.
* Villainous Breakdown begins with him screaming about how Steiner's attack, which he could not carry out because he didn't have enough men, was an order.
* Villainous Breakdown, Di Ravello begins attacking one of his own men. After he is done beating him (presumably to death), he screams "LOOK WHAT YOU MADE ME DO!"
* Villainous Breakdown: If the villain is sympathetic and was committing their misdeeds out of a misguided effort of doing right, then it can be upsetting to see them fly into a berserk tantrum over their plans being thwarted.
* Villainous Breakdown mode, was using his penguin army to destroy Gotham.
* Villainous Breakdown Naughty Plaque", before taking away the superpowers he gave her for Christmas earlier.
* Villainous Breakdown: See above, except you're committing evil deeds.

* Villainous Breakdown that allows him to absorb memories and personalities from people's personal items.
* Villainous Breakdown: The bad guy goes berserk and flies into a rage over their plan failing.
* Villainous Breakdown the Raleka guarding the warehouse to focus on the skahs, who after all are mobbing the outside of the warehouse, and not to keep an eye out for John and Ringo, who are lurking about trying to sneak into the warehouse via the roof.
* Villainous Breakdown: The villain reacts to defeat by having a psychotic meltdown.
* Villainous Breakdown: Villains in the face of defeat either lose their composure...or their sanity.
* Villainous Breakdown: When things happen that don't go according to their plans, they completely lose their composure.
* Villainous Breakdown where hallucinations of old women condemn him for his crime. Next time we see him, he's been captured and put on trial.
* Villainous Breakdown, Zhou Yu is completely unhinged by the failure of his last plan against Zhuge Liang. Zhou Yu's rage causes a wound to reopen and he sickens

and dies shortly thereafter.
* Villainous BSoD: A villain realizes that they're wrong and cannot cope with the revelation.
* Villainous BSoD: The villain realizes how wrong they've been and are consumed by guilt from their actions.
* Villainous Cheekbones and stern face cancel this out. Then the Saxon Master comes back during this time and inverts it with him as well for similar reasons.
* Villainous Cheekbones: Some villains have distinctively creepy faces.
* Villainous Crossdresser reveal his gender too, but without flashing anything.
* Villainous Crush: A bad guy shows creepy sexual lust for someone else (often a good guy).
* Villainous Crush: An evil character is in love with a heroic character.
* Villainous Crush on Zelda with a monologue on winning the Wing Ceremony:
* Villainous during an emergency situation, Dr. Flug is scolding his teammates for not following his plans, which promply gives him a new plan while he was just below some emergency lights.
* Villainous Ethics Decay: Older villains used to have standards; the new ones don't.
* Villainous Ethics Decay: Villains aren't as nice as they used to be.
* Villainous example: A few Batman stories before the 1980s showed that Harvey "
* Villainous examples: Ricky Sionis, the son of the deceased Roman Sionis, succeeded his father as Black Mask II.
* Villainous example: the Horde has a few issues keeping up its named-character membership. Adora defects at the start of the first season; Shadow Weaver is overthrown and then defects;

* Villainous Face Hold: I'll grab your face to show you I can do anything to you and you're powerless to stop me.
* Villainous facepalms, followed by ripping his face off. Yes, he has a bit of a temper.
* Villainous Friendship: A bad guy gets along pretty well with another bad guy.
* Villainous Friendship and Nelson, the latter of whom is the same age as the former's son.
* Villainous Friendship going on and the member vary in different ages. They even welcome Kalluto (10) and have accepted him as their friend...sort-of.
* Villainous Friendship: Having friends proves that they aren't ALL bad.
* Villainous Friendship initially plays this trope straight, Wily and Eggman's friendship falls apart later in the story.
* Villainous Friendship: When a Dragon is good friends with the Big Bad.
* Villainous Gentrification: The act of building new apartments in place of older ones (usually in poorer locations) is done by people with malicious intent, or at least portrayed as an act of aggression against prior residents.
* Villainous Glutton eats the candy that gushes out of his body constantly.
* Villainous Glutton habits. It's implied that some of this owes to him being demonic, as before his transformation, he was merely chubby.
* Villainous Glutton loves to eat various sweets, and this preference was a contemporary stereotype of Italians.
* Villainous Gluttons. They regard any creature weaker than they are as edible, but halflings are their favorite.
* Villainous Harlequin: An evil clown who is silly rather than terrifying.
* Villainous Harlequin Paddywhack, who is an intangible demon who feeds on fear. Eventually, Paddywhack puts Quackerjack in his place and seals him inside his own magic box.
* Villainous Harlequin tries to reboot his system. It doesn't work out so well:
* villainous he finds all of his children (Tsubaki included) burned to death by government agents.
* Villainous Incest: A bad guy has sexual relations with a biological relative, to show how depraved and disgusting they are.

* Villainous Incest: A bad guy has sex with one of their own blood relatives to demonstrate just how twisted and disgusting they are. Bonus evil points if they outright rape a member of their family.
* Villainous Incest. The social consideration overrode this trope and the couple was regarded with disgust and horror regardless of genes. The trope itself was used to point out that their child wasn't as poorly off as she could have been.
* Villainous Incest: The villain bones one of his relatives to show how vile and messed up he is. This is common with real-life sex offenders as well.
* Villainous Incest: The villain has sex with a blood relative just to show how vile and messed up he is.
* Villainous. in the official QNA video, he even boasts about never facing a hero that was a challenge for him to beat.
* Villainous Legacy: Evil actions can have long-term consequences, even after those responsible for them are long gone.
* Villainous Legacy: The villain has inspired evil long after they passed away.
* Villainous Legacy: The villain is dead, but certainly not forgotten.
* Villainous Lineage: When characters are born into an evil family, they run the risk of becoming evil themselves.
* villainous Maddie Enger who is played by 176 cm Elyse Levesque. She is the second tallest woman in the series after the aforementioned Aynsley.
* villainous member to survive the events of the finale. There are other members, but none as notorious or well-known as his group.
* villainous monologue speech with a very casual "Hey, how's it goin'?"
* Villainous Nights controls rock, with the blunt and no-nonsense personality to match. In addition to making barriers and disrupting enemies' footing, she often covers her fists with stone to add weight to her punches in combat.
* Villainous Nights has the ability to generate ice and cold, from walls of ice to an instant cold compress touch.
* Villainous Nights's telepathic broadcasts the way the rest of the team can, which the other characters attribute to his closed-off emotional state. In the process of attempting to overcome this block, Duke and Monarch discover that physical contact (whether skin to skin or through clothing) makes it possible for him to hear her thoughts and vice versa. As the two grow closer Duke starts being able to hear Monarch's telepathy without contact, but touch still makes it easier (and more romantic).
* Villainous Parental Instinct: A person will hurt children, but not their own.
* Villainous Parental Instinct: Even evil people will protect or take care of their children.
* Villainous Plan Inertia to take care of his plan/missiles/evil empire... But wait! Everything's still proceeding... um... according to plan! Oh, well. This just means the heroes are still on the clock for a little bit longer....
* Villainous Plan Inertia: You defeated the villain, but that alone won't stop his plan.
* Villainous Rescue: The villain rescues the hero, which can be due to them having positive regard for the hero and/or may lead to a more positive relationship between them.
* Villainous Rescue to save them from other villains, because she doesn't want anyone else to rob her of the privilege of defeating them.
* Villainous RRoD: When a villain has physical breakdown from overexerting oneself.
* Villainous, showing him in the exact same position and with the words "He doesn't".
* Villainous. The ambiguous one is Dementia, the fourth character: she appears human, but can crawl on walls like a gecko and a blueprint of her is shown briefly at one point.
* villainous triumvirate Red Guard and is much more wiling to try violence. The politician once tries pulling a blaster on the strategist and is disarmed quickly enough that the strategist didn't even take the threat seriously; the con man probably remembered that the strategist is ridiculously good at combat.
* Villainous Valour: Some villains can be extremely brave and determined in the

face of overwhelming odds against them.
* Villainous Valour: When a hero is unstoppable, sometimes the bad guys will show otherwise heroic traits in taking him on.
* villainous variant. In the episode "The Dream Beam Invasion", the heroes chase the villains around in a fairground themed dream, getting the upper hand on them on a carousel.
* Villainous Waterbenders have it too good. Every full moon strengthens waterbending, thereby enabling
* Villainous, who couldn't hurt a fly; he treats him with boundless kindness and dotes on him constantly, and 5.0.5. loves him just as much.
* Villainous Widow's Peak: Nothing says "villain" than having hair on your forehead form a triangle
* Villain Override. This is also often a consequence of repairing an A.I. that went bad due to injury, isolation, or decay.
* Villain-Possessed Bystander: An innocent person who is being mind-controlled by the villain.
* Villain-Possessed BystanderWhen the villain transforming random people into minions is a common ocurrence.
* Villain Prankster makes a business of this trope. For money he will distract police and Superman with his pranks so his clients can do their own crimes without any problems.
* Villain Protagonist (1995), is a partial parody of The Vamp - she's beautiful, utterly ruthless, manipulative...and dumb as a post.
* Villain Protagonist and begins to target and kill all those who oppose Kira, including law-enforcement officials. With the exception of his family and officials he considers useful enough, he is very ruthless when dealing with his opponents.
* Villain Protagonist and much of the "culture" he and his friends enjoy are fleeting yuppie fads that only appear refined due to their polish and high-end price.
* Villain Protagonist and protects them from Devils without any ulterior motive.
* Villain Protagonist a pedophile who marries a woman solely so he can lust after her titular daughter. After the woman's death, he kidnaps the girl and sexually abuses her over several years until she escapes as a teenager.
* Villain Protagonist, as their programming is comparable to a veteran soldier in terms of skill.
* Villain Protagonist, Aur implants them memories of him always being a lover of theirs, or impersonates their actual lover if the woman in question is already engaged, at any case it ends with the women falling to perverse lust and seeing Aur as the only man in their lives, completely agreeing and assisting him with his evil deeds.
* Villain Protagonist, barely makes a living out of selling his paintings, which actually don't sell. This is just the start of his descent into a madman on a power-tool-fueled killing spree.
* Villain Protagonist bathes in a tub full of blood from dead babies. He complains how difficult it is to keep them alive long enough for the bath to be warm when he empties their blood into it.
* Villain Protagonist bears a number of scars from his life as a tanner's apprentice. His brutish master is covered in them, giving him a monstrous appearance.
* Villain Protagonist, but Krusty is quick to comment that "they'll never let us air that again!"
* Villain Protagonist by Lawrence Block does this along with more conventional methods. On one occasion the intended target really does die in a road accident; the client naturally assumes this trope was in play and pays him regardless, while the hitman ponders just how difficult it would have been to arrange this accident in real life.
* Villain Protagonist confirms that she wasn't designed with any particular diagnosis in mind.
* Villain Protagonist even says her feelings are less about them as a person and

more about how they make her actually feel something. Naturally, she'll do all kinds of horrible things to make sure Senpai is hers.
* Villain Protagonist for his destroying of a site that is sacred to the manaba.
* Villain Protagonist for the control of the galaxy. Halak even admits that if the two had been born of the same species, they would've been unstoppable as a team.
* Villain Protagonist, Fred constantly lied to her about having a contact at the cabaret who would get her a spot singing, and he did all of it behind the back of his wife and children.
* Villain Protagonist frequently changes her personality from cute and adorable to a creepy psychic murderer, breaking into fits of giggles while brutally dismembering people.
* Villain Protagonist has a Swiss bank account containing wealth looted from occupied Europe during WW2, and gaining access to these funds is a source of tension with his fellow Nazis, between the younger members who want to fund a neo-Nazi resurgence and the older generation who just want to live comfortably in exile.
* Villain Protagonist. He also places a great deal of emphasis on the chivalry and honor of aerial combat, to the point of dismissing more technologically advanced airplanes as "dishonorable".
* Villain Protagonist, he's also a fan of fine cuisine, high literature and so on. He also writes music and has designed numerous famous buildings.
* Villain Protagonist. His loathing and hatred of Equestria is such that he will always choose the plan with the greatest likelihood of making the Equestrians feel stupid and being able to rub his victories in their snouts, even when a simpler plan would be far safer or would net him greater rewards. This has backfired several times, including getting him very badly injured once.
* Villain Protagonist; his only qualms about eating his teammates is that he "just didn't want to eat that greasy, foreign" elf.
* Villain Protagonist in LA... and an informant actively accepting bribes from the local Tong boss, Uncle Benny. He attempts to convert rookie cop Danny Wallace onto his side after Danny finds out about Nick's shady dealings, hence the film's title. Much later in the film, Danny's father is revealed to be an ex-dirty cop yet his father has the gall to call his son is worse than him because Danny is an Undercover Internal Affairs officer.
* Villain Protagonist in spite of ancient grudges, and a good bit of guile is needed to achieve this relatively bloodlessly.
* Villain Protagonist, in which Fiona Fox and what's left of the Destructix get themselves sent to the No Zone, a prison dimension, to bust out Scourge, Sonic's evil dimensional counterpart (long story). Getting in was easy enough, but they run into trouble as Scourge has lost any drive after being in the prison for so long and they need to convince him to get back in the game.
* Villain Protagonist is a career supervillain who even looks something like a cartoon version of Blofeld.
* Villain Protagonist, just mangled horribly and painfully. Following this, Kakihara decides he's had enough and tries to flee, managing to jump from the apartment building they were fighting on to end up hanging on another. Ichi pelts him with projectiles while he screams in terror before a bird finally comes to finish him off by shitting on his fingers holding himself up, causing him to lose his grip and fall to his death. Yeah...
* Villain Protagonist Light Yagami counts as well, considering that he didn't care that his dad Soichirou died, and in the live-action movie, he was even willing to put his name on the Death Note.
* Villain Protagonist of the movie, as he has more screentime than the Avengers and Guardians combined as well as driving the plot.
* Villain Protagonist of the play, which is "the death of a sinner always reflects his life".
* Villain Protagonists) and Peter: a married pair of con artists and petty criminals.
* Villain Protagonists are a gang of deserters from the Confederate army who stage

a bloody bank hold-up to steal gold to fund their flight to Mexico.
* Villain Protagonists of several 20th-century novels by Jewish authors:
* Villain Protagonists take advantage of the undisturbed tombs they find is raising beautiful mummified empresses for their personal service.
* Villain Protagonists. The final third of the film is a nigh plotless series of crimes they committed after deserting.
* Villain Protagonist stories has an appreciation of fine art (and is in fact a fairly skilled painter himself) and peppers his speech with quotes from various poets, authors, and philosophers.
* Villain Protagonists were a pair of Gulf War veterans who had become poachers. They get their comeuppance when a soldier whose platoon had been killed when one of the poachers had ordered a mortar strike in their position lured them into the home of a bunch of vampires living in the Alaskan wilderness.
* Villain Protagonists who terrorize their small town. Naturally, they have a couple of these to contend with. Specifically, Sheriff Welch, who is a concerned father and an honest lawman, and Big Al, who, while hotheaded and foolhardy, is a fire marshal who's determined to protect his community at all costs.
* Villain Protagonist The creators themselves have taken to referring to him as Not Important as well.
* Villain Protagonist: The main character of the work is also the bad guy.
* Villain Protagonist thinks that he is helping people by getting them addicted to cocaine, which he worships as a god.
* Villain Protagonist this trope: the five super agents are the only ones capable of permanently killing your henchmen. However, you can play this trope straight by doing special sidequests to permanently defeat each agent.
* Villain Protagonist to exist. Those games feature largely autonomous city-states run by criminals with easy access to military-grade firepower fighting against systematically-corrupt and highly-militarized police forces, while the political leaders are even more cartoonishly corrupt than they are in real-life, approaching an odd mix between post-collapse former Soviet states and war-torn African nations.
* Villain Protagonist, too. All of them have Vectors that can cut people into pieces.
* Villain Protagonist, ultimately dies when Ryuk makes good on his promise to write Light's name in the Death Note after Light's exposed as Kira.
* Villain Protagonist using tactics like ripping out piercings. Early in the film he rips out a bodyguard's earring when the bodyguard won't let him see the guard's boss, the guy spends the rest of the movie walking around with his entire ear covered in bandages.
* Villain Protagonist usually doesn't open his mouth unless it's truly something important. Entire weeks have gone by with the stoic Digimon never saying a word, which makes the times where he actually does talk stand out all the more.
* Villain Protagonist variation. Two-thirds of the episode is the titular bounty hunters setting up their plan to capture Jack. The climax of the episode features a full agonizingly suspenseful minute of nothing but silence, birdsong, and cuts between the wind blowing through the trees, birds sitting in the branches, and a drop of water falling from an icicle as the bounty hunters wait for Jack to appear.
* Villain Protagonist were all about enjoying themselves, very frequently at other people's expense — and their treatment of others, particularly those they hated, was beyond cruel. There's a reason this guy is the inspiration for the word "sadism".
* Villain Protagonist who defeated him in the first book is actually a woman using a masculine title. Of course, the fact that he's a vampire who normally prefers to feed on young women makes it a particularly galling role reversal for him.
* Villain Protagonist who manipulates everyone around him with no consideration for their feelings.
* Villain Protagonist women over the course of the series; that’s his usual method of recruiting them and make them bend to his will, he is not above taking women already engaged in a relationship either, in fact he doesn’t care, if he wants it he takes it.

* Villain Recruitment Song: The villain uses a song to convince others to join their side.
* villain relaunch. Then again, he too works to make the money to raise his son as a single parent).
* Villain Respect: I may not like that hero, but I do have to give my respect for his determination and challenge. A man with such attributes deserves my veneration for him.
* Villain Respect (Villain respects a protagonist for a positive trait)
* Villain Reveals the Secret: A character's or a group's secret is revealed by the villain.
* Villain Reveals the Secret and it usually isn't good for our heroes.
* Villains Act, Heroes React: It's usually up to the main bad guy to initiate the story's conflict.
* Villains & Vigilantes adventure "Devil's Domain". Abomination demons have a malevolent face on their chest, which includes a large mouth.
* Villains & Vigilantes, every 666 years the Earth's dimension and Hell come close enough together for the Devil to create a bridge between them that will allow his demon horde to pour through.
* Villains & Vigilantes game, a character with the Force Field power can use it as a weapon.
* Villains & Vigilantes has C.H.E.S.S. (Central Headquarters of Espionage for the Secret Service), a U.S. government agency that fights super menaces.
* Villains & Vigilantes, killing demons released a cloud that caused humans to go insane and attack you.
* Villains & Vigilantes's didn't destroy the smoke when it was created it will cause inhabitants of the nearby town to converge on Stonehenge in a killing frenzy directed at anyone who isn't infected.
* Villains & Vigilantes. The Devil has the power to affect the minds of all creatures within a certain radius and make them love him.
* Villains & Vigilantes. While a character is using Astral Projection, their body drops into a coma. The body can be attacked while the character is gone.
* Villains & Vigilantes will discover grisly looking mutant babies growing in glass vats. The Devil plans to use these mutant demonic monsters as his servants when they attain their full growth.
* Villains are a subversion. While they’re easily distracted and seemingly incompetent, the two are actually quite crafty and the only thing keeping them from being truly effective criminals is that they’re too softhearted.
* Villains aren't renowned for their intelligence, but were most guilty of Bond Villain stupidity during
* villains as the head of PR (Diethard). Also, it doesn't seem to matter much if you're a man or a woman as long as you can fight for them. The organization only gets more diverse later on.
* Villains Blend in Better — Most villainous doppelgängers easily impersonate their target.
* Villains by Necessity After all, the only way you can remove all evil from the world is if you remove choice, and freedom, from the world.
* Villains by Necessity, along with borrowing the idea that if good wins, it must turn evil itself in the end.
* Villains by Necessity along with everything else about good overwhelming the world. An owl is mentioned being unable to hunt to eat, but it is also unable to die from starvation. It may be that other predator animals are unable to kill to eat, and equally unable to die by the time (Kaylana's wildcat friend seemed fine, but this was earlier).
* Villains by Necessity: Arcie is the former leader of the (now defunct) Thieves Guild and pockets everything he comes across, even if they happen to be owned by his traveling companions.
* Villains by Necessity: Arcie, Sam and Kaylana all say prayers after Arcie's protege Kimi is killed while giving her a brief funeral before burying her, while Blackmail gently touches her body in a farewell. Even Valerie, who's been usually

callous toward anyone else, says Kimi had guts and it was a pity she died.
* Villains by Necessity: Arcie was once guildmaster of one, and most cities apparently had them, although some only had competing independent gangs.
* Villains by Necessity: Assassins and thieves organized themselves into guilds in most cities. Sam (assassin) and Arcie (thief) had both been members of their respective guilds, with the latter a guildmaster.
* Villains by Necessity: As the forces of Light proceed to spread unchecked throughout the world, night is getting shorter and shorter, moving closer to becoming Always Day.
* Villains by Necessity a world to terrorize six months later. That said, it's shown that her kind were capable of love. At most, she's willing to admit her companions are useful and tolerable (plus agreeing that a fallen thief was brave), but cheerfully warns them at the end she may "have you for dinner" if they seek her out in the future.
* Villains by Necessity: Blackmail never speaks, and communicates solely through gestures, until near the end of the book.
* Villains by Necessity: Centaurs are blue-green colorblind in the book's universe, along with (logically) having two hearts and two sets of lungs.
* Villains by Necessity dead (given that powerful healers are able to resurrect them), assassins will burn the body, take off the head or cut out their heart. Sam's done about a dozen "permanent" hits.
* Villains by Necessity, features these. Humans make up the majority, as ever. There's only one elf left, Mizzamir, since his people moved to another world. However, their portrayal (the wise, all good, often woods dwelling long-lived or immortal folk) sticks with the usual. Arcie has most of the usual hobbit or halfling characteristics, though his people are still humans, simply smaller ones from the north (with Scottish accents), being a short, hairy and mischievous man. He is a thief and a black sheep, as the others are said to be honest, more down to earth folks. In fairness though, Tolkien stated hobbits were just pigmy humans too originally. Valeriana is basically just a dark elf, though her species' origin is never given explicitly. There is also a good dragon, who's vegetarian regarding humans, can talk and has human-level intelligence. More unusually is Robin the centaur. He's a nervous and shy fellow, but his species are said to be more like the original legends (wild horse folk) while his people are the only civilized ones. There are also mentions of orcs, trolls and other standard fantasy "evil" races, plus a couple new ones in one Test which don't differ much, though most are gone due to the Light's victory, with heroes having killed most others afterward. On a minor note, the wilderkin somewhat subvert this as they're not standard (although the one that we see the most is a bit like a hobbit), as short, somewhat hairy woods-dwelling folk who are fierce and territorial in their own homeland (hunting with fox dogs).
* Villains by Necessity finally gets around to talking; he keeps fighting all the way through his monologue.
* Villains by Necessity for poisoning a knife with a toxin they are both immune to while they fight.
* Villains by Necessity from people as sustenance. It's also possible for them to transfer it into someone else, healing wounds or rejuvenating them.
* Villains by Necessity' group, but they don't find this out until much later in the book.
* Villains by Necessity, is a proud knightly prince and a champion for the forces of light.
* Villains by Necessity Kaylana especially is regularly mocked by the heroes for being a Druid and following a "backward" religion that insists on balance as opposed to good destroying evil.
* Villains by Necessity: Kaylana serves as this for the party, since her magic is primarily good for things such as healing, talking with animals etc.
* Villains by Necessity: Kaylana's religion seems to believe in something like this, since she tells the Good god Mula that conflict isn't just inherent to nature, but also society, with the strong thriving as the weak die. However, it

also advocates balance, as if either Good or Evil wins, this will destroy the world, which is the threat in the book.
* Villains by Necessity: Kaylana turns into a horse at one point as a disguise. Fenwick, thinking she's a real horse, tries to ride off on her. She bucks him off.
* Villains by Necessity: Kimi is introduced shortly before the first Test and dies attempting it, in order to hammer home to the party that the Tests are potentially lethal.
* Villains by Necessity learn that Robin is a spy, they tell him a decidedly outlandish story about their alleged plans to report to Mizzamir. The wizard wasn't fooled by the fake intelligence for long, if at all.
* Villains by Necessity: One of the many things about Blackmail that raises questions from the rest of the group. He never sleeps, never eats, never tires.
* Villains by Necessity plot as the villains must save things from delusional good guys).
* Villains by Necessity: Robin is really pretty useless in most combat scenarios, and tends to react to trouble by either running away or panicking. He gets better near the end, fighting fiercely along with the others.
* Villains by Necessity, Sam takes a long, thirsty pull from Arcie's waterskin, and only then realizes that he'd just swallowed three cups of whiskey. Then he blacks out.
* Villains by Necessity: Sam, who is an assassin but a caring, friendly person overall despite this.
* Villains by Necessity: The desert plainsmen of Ki'kartha. They've become more understanding and less hostile in recent years, in the sense that they now arrest trespassers in their land and hand them over to nearby civilized authorities rather than casually kill them as soon as they're found.
* Villains by Necessity the fact when Valerie takes over the group by holding Nightshade hostage until she gives up her amulet. Later, Nightshade fights some familiars of the Good mages and kills two in one go. Kaylana also has a wild cat who acts like this, along with many other animals. Fenwick's sun eagle is one, and it spies on the villains for him.
* Villains by Necessity: The gods are frequently referenced, but most don't get named or explicated (one, Mula, actually appears in a vision though).
* Villains by Necessity. The incantation includes the word "placebo". Blackmail finds this quite funny.
* Villains by Necessity, then fragmented and each part hidden in a trial (just in case it's needed, however unlikely).
* Villains by Necessity: The parallel world the shadow walkers enter. All the shadows are there, and through these shadow walkers can exit into the normal world wherever they exist, making it a godsend for assassins like Sam. He fears, though, that as the Light grows, the shadow world will fade and eventually disappear.
* Villains by Necessity: The War that set up all the events in the book. Over a hundred and fifty years ago, Good fought Evil in a vast, destructive conflict. Evil was led by the Dark King, with many battles whose relics are still left behind in the present. The Six Heroes finally gathered every segment of the Spectrum Key on a quest, causing the defeat of Evil and then sealing it off from the world entirely. Unfortunately, this upset the cosmic balance, so in the time since things have slowly been sliding toward "sumblimation", i.e. destruction by pure Light and Good. Six villains instead have to gather the segments and release Evil for averting this.
* Villains by Necessity: This is the threat the protagonists are trying to stop. Assuming that the forces of Good aren't thwarted, the entire world will be "sublimated"-vaporized in a flash of light.
* Villains by Necessity to see the party's futures (admittedly vaguely).
* Villains by Necessity tried to keep both sides in the war between good and evil from winning, as they knew that either side achieving absolute victory would be a disaster. This got them declared an enemy by both sides. By the start of the story (a century after the Victory), Kaylana was the only druid still alive.
* Villains by Necessity: Truelight, Fenwick's longsword, which lets off its own

magical light and can sense Evil.
* Villains by Necessity: Valerie engages in one with a Good mage, but their spells keep cancelling each other until they're used up, and it ends in a draw, with them going their separate ways.
* Villains by Necessity: Valerie is a sorceress whose usual ambition is to kill or harm others, though she's begrudgingly willing to work alongside fellow villains to save the world (thus herself as well).
* Villains by Necessity: Valerie, who's from a dark elf-like race, is an evil sorceress with pitch black hair and pure white skin, as her kind lived in the subterranean underdark.
* Villains by Necessity: When Kaylana first meets Sam and Arcie, on recognizing they're criminals she then lists basically every major crime, leaving them stunned before disabusing her of thinking they've committed them all.
* Villains by Necessity (which, admittedly, he used to stash an extra dose of hay fever medicine rather than anything directly dangerous).
* Villains by Necessity who don't realize that if the Light wins, the world will be destroyed, though even if they did it's stated they'd still feel duty-bound to fight Evil.
* villains call him on it. Usually when they're explaining how he couldn't have ever won in the first place.
* Villains' Code, although it fits the first definition more, as there are no observed non-meta members or employees. In fact, the guild is actually a secret, known only to its members and the AHC. The guild tends to use Doctor Mechaniacal's robots for menial work.
* Villains' Code brutal killing. In the end, Kristoph hangs around the Villain's Guild, and everyone is careful to introduce new villains to him as soon as possible to just get that problem out of the way.
* Villains' Code: The aptly-named Pest Control, who can summon and control any species of insect, whether normal or meta, as long as he has studied them in at least some way. He has found some creative uses for regular insects, but with meta ones, he can do some real damage.
* villains, covered by a jagged, livid scar. Right hands don't get much redder than that.
* Villains disguising themselves as clergymen or nuns is a common tactic in the novels of
* Villains Don't Date Heroes!: Fialux believes that criminals are pure evil and if they can all be stopped that the good people will be able to rise above their problems. It takes her a while to understand that Night Terror was doing more good for the city as the top villain than Fialux does as its top hero.
* Villains Don't Date Heroes!: Fialux's costume leaves her stomach bare, as Night Terror notes approvingly.
* Villains Don't Date Heroes! is a parody of the superhero genre (though the romance is played straightish) where supervillainess Night Terror falls for superheroine Fialux, and attempts to find her secret identity to get into a relationship with her.
* Villains Don't Date Heroes!: Night Terror bribes the police union and commissioner for Starlight City to insure they don't try impeding her crimes too much (aside from a token effort). She's gotten far too powerful for them anyway- this is just softening things up further.
* Villains Don't Date Heroes!: Night Terror looks over Fialux's figure enraptured for a long time after first seeing her, noting all of her attractive attributes.
* Villains Don't Date Heroes!: Police cars blow up instantly when hit by Night Terror's weapons, which makes her snarkily think in her internal thoughts how their contractor should look into improving that.
* Villain's Dying Grace: Dying villain decides to help the hero before they die.
* Villains especially get in on the act. Special mention goes to Tommy,
* Villain Shoes: A part of the story where you get to control the villain.
* Villains Inc.. Add to this that she publicly opposes superhuman registration—a popular cause after a supervillain-triggered earthquake leveled

southern California—and she's not the media-darling that she was.
* Villain Sin Eater (famous for killing Spidey's long-time ally Jean Dewolff) is a notable example of this trope being done correctly; Sin Eater actually
* Villains In Need Are Villains Indeed, he manages to reveal both lairs' existences to Odd Squad, much to the chagrin of Jamie Jam and Mr. Lightning.
* Villains in other Artix Entertainment games such as this one seem quite fond of using this trope when defeated by the hero. For example:
* villains. It, er, blossomed out of control. At last count, the author planned for sixteen chapters and was thinking of creating other short stories around the same characters.
* Villains Learn Faster: The villain has better progress when it comes to learning skills than the hero.
* Villains Learn Faster: Villains generally master their skills at a faster rate than heroes.
* Villains Never Lie: A villain tells the truth in a manipulative way.
* villains of the book who outranked him. It does take years and years of work — he's in his sixties in the Thrawn trilogy.
* villains of the week always overprofessed one or the other. Individual incarnations of the Doctor sometimes tend more towards one or the other; for example, the Tenth Doctor being quite an Enlightenment-centric believer in the power of science and reason, and the Eleventh having more of a Romantic streak with a propensity to make it up as he goes along rather than make logical detailed plans for action. The Third Doctor is probably the most Enlightenment, criticising Linx in "The Time Warrior" for giving humanity technology it hasn't progressed enough for yet and fighting a conspiracy of reactionaries trying to return the world to a "golden age" in "Invasion of the Dinosaurs", but even his philosophy involves a certain amount of pop-Buddhism; then he's succeeded by the Fourth Doctor, a Doctor aesthetically inspired by Romantic poets and a spreader of individuality and chaos, who nevertheless makes a point of schooling Leela in the logic and reason her society was not yet developed enough to know about.
* Villains of the Week of innocent people who have no control over their actions.
* Villains of the Week that Timo would be late is so unfathomable that the entire crew jumps to the conclusion that Timo must have decided to kill them to keep all the money for himself.
* villains of the week who was punished for crimes against his race by having the wings torn from his back and being forced to live as a human.
* Villain Song about it in "How Hermes Requisitioned His Groove Back".
* Villain Song, and another is when her lioness army leaves Simba to be attacked by her during the final battle.
* Villain Song "Be Prepared" - the Game Gear and Master System versions of the video game retain that, though the 16-bit versions were changed during development to match the film's grey and ivory toned piles of bones of all sizes.
* Villain Song (directed at Lord Hater, no less!) is called "I'm The Bad Guy".
* Villain Song duet about the latter's plan to imitate the former and use Shining Armor for her own nefarious purposes.
* Villain Song, even though the laugh isn't written in the score or script.
* Villain Song has one from five of the six Murderesses (the only one who doesn't is Hunyak, who speaks Hungarian and insists she isn’t guilty), albeit in the context of killers reenacting their deeds after the fact:
* Villain Song. In fact, it was the song's popularity that helped re-title the cartoon from "Donald Duck in Nutzi Land".
* Villain Song is a swingy Broadway-style song that contains some elements of this. For example, circus-themed imagery is used throughout the song, and when Jafar sings the line "You think your cat's a meanie, but your tiger's tame", you can hear the melody of "Entry of the Gladiators" in the background.
* Villain Song is enough to scare the heroine and runs away screaming merely because she says she isn’t scared. In the book, he is a frightening giant with some (if occasional) sparks of cleverness, and it takes quite some time for the heroine to escape from him.

* Villain Song is essentially telling Jasmine "That Liar Lies" about Aladdin.
* Villain Song "Let's Work Together" was cut from the surprisingly bad Broadway version.
* Villain Song "Shiny" is, fittingly, a song about how Tamatoa is shiny and better than his reputation of a bottom-feeder.
* Villain Song stops in mid-dance when Dawn reveals her sister is the Slayer.
* Villain Songs, where he plays the role of a consummate, cold-blooded gangster—see his songs like "Gimme the Loot" or "Who Shot Ya?".)
* Villain Song the Rainbooms at later points in the movie, rescuing them from a trap and providing the sound system for the climatic battle.
* Villain Song: The villain sings a song that describes their despicable nature, the evil deeds they've done in the past and/or the evil deeds they plan to do now.
* Villain Song: The villain sings a song where they boast about the atrocities they've committed, gloat about their despicable nature or describe the bad things they intend to do.
* villains on the other hand, has filthy, slum-level street crime, mafia bosses, drug trafficking, warring organized crime rings comprised of supervillains, senseless mass murder, police corruption, and loads and loads of clinically-insane psychopaths and freaks trying to make a name for themselves.
* VillainSource advises prospective villains to do this with their construction crews once their lairs are complete, because "A Secret Lair isn't so secret with a couple of hundred ex-construction workers wandering the globe, blabbing to bar patrons about the secret shark trap you built into your underwater grotto."
* Villain Source (Your Online Source For Everything Evil) has explosive collars for sale in various colors. You don't need to change the batteries either, as they blow up when the power runs out.
* Villain Source (Your Online Source For Everything Evil) you can buy a jarful of a dozen irradiated insects whose serum (well, poison actually) will give you superpowers! It then admits that the chances of this actually happening is 1 in 100,000,000,000. But that's why they give you 12 insects!
* Villains Out Shopping: Even bad people still do normal things occasionally.
* Villains Out Shopping: Often times the hero would react this way if they see the villain here.
* Villains Out Shopping: The villain is currently taking a break from being evil and is just doing the same things normal people do.
* Villains Rising, Mallory mentions in the middle of their activity that it's her birthday. At least Alex gets some cupcakes to celebrate.
* Villains sometimes fall into this category. Pretty much all of them are highly-trained fighters, but often lack knowledge of certain techniques:
* villains. The Old Count knows that being a truly invincible threat to the world would be a Bad Idea, and therefore takes the time to stock his castle with plenty of holy water, easily twitched-aside curtains, and pieces of detritus which can be readily twisted into a variety of holy symbols. Not only does this keep unlife interesting for him, it also guarantees that the townsfolk don't turn him into ash and dump him off the edge of the Disc.
* Villain stunt castings, weirdly, tended to be sitcom stars and comedians:
* Villain Sue affecting him. He's nigh-unstoppable unless he's confronted by characters who have really been bought up. However, the scenario specifically has Haight losing no matter what - his paradox-proofing eventually runs out even if the players are defeated, which results in his death. This can be averted, however, in previous scenarios, up to and including killing Haight before he's acquired any powers.
* Villains United #2: Catman and Deadshot, who both recognize that they have some degree of a death wish,
* Villains United miniseries. He even fully admits to wanting to die in a stupid gesture.
* Villains", Warren begins desperately trying to reason with Willow when it finally hits him that she really does intend to kill him. It doesn't work.
* Villain Takes an Interest: A bad guy wants to train a good guy to become their

evil apprentice.
* Villain Takes an Interest: You want to take the hero under your wing because you and them are a lot alike.
* Villain Team-Up, Lex gave Brainiac an upgrade, but arranged it so Brainiac will automatically shut down every few hours unless Lex is around to turn him back on. Lex explains this is to ensure Brainiac doesn't betray or abandon him. Eventually, Brainiac hypnotizes Lex into removing that feature.
* Villain Team-Up: Multiple villains cooperate together to fight the hero.
* Villain Team-Up scheme causes Bigtime Beagle to run off crying, Ma Beagle whacks Flintheart Glomgold with her purse and reprimands him for essentially doing her job for her.
* Villain Team-Up. They decide to ally for now to take over the world, and kill each other after that's done. Since they mutually agree on this and make no secret of it, it's not much of a backstab, more of just a plan to go back to being enemies eventually.
* Villain Team-Up: Two or more of the hero's enemies team up to try and stop the hero.
* Villain Team-Up, where the Riddler's colleagues eventually grow tired of him compromising their plans by leaving clues that they know Bats will inevitably solve. They try to stop him from doing so, but he fervently declares that he just can't resist and proceeds to leave more clues that eventually lead to their defeat.
* Villain Team-Up, who does invite him if he's in charge of the villain team-ups on the basis that it's safer to have an unpredictable Joker on your team than it is to have an unpredictable Joker who's offended you snubbed him.
* Villain Teleportation: Villains are more likely to have better or exclusive access to teleporting than the heroes.
* Villain tells hero that he is being watched. If he doesn't obey orders and/or informs the authorities, then he will kill the significant other.
* villain that greatly resembles the Iron Eagle used by the Nazis. It also uses the Nazi colors of red, white, and black. However, the show offers no insight into Fulcrum's motivations except for a desire to preserve America's "rightful place" in the world.
* Villain to Kill, Cassian put little stock in orders and plans even before being betrayed by Lampas, ditching the undercover sting plan when villains lay hands on a mother and child, with the resulting explosive battle sparking a major scandal that led to him being put on probation for excessive force.
* Villain to Kill, Villains are people who are descendants of the Child of Night, becoming people beholden to their vices and prone to acts of carnage and devastation. While some are more restrained than others, this is more because of their interests and methodology rather than their morals. This immorality of theirs also gives Psykers the authority to kill most Villains on sight, regardless of whether or not the Villain is actually caught doing something.
* Villain Toyman usually has at least two Mecha around of various sizes, some of which can be piloted remotely and some of which have to be driven by someone in the cockpit.
* Villain Trevor Fitzroy (a time traveler who hails from one of the Marvel Universe's many possible

* villain while melting a plastic 007 action figure in the microwave: "Stick around, Mr. Bond. Things are really starting... to cook."
* Villain William Hamleigh does not make a good end as he is marched to the gallows in
* Villain with Good Publicity: A supervillain who possesses a far better reputation than they deserve.
* Villain with Good Publicity: A villain succeeds in passing themself off as a good

person.
* Villain with Good Publicity: A villain who is popular among the general public while keeping his evil plans hidden.
* Villain with Good Publicity, etc., and they suspect the villain will use his arrest to his advantage somehow.
* Villain with Good Publicity: If the fans agree that the villain deserves their good public image.
* Villain with Good Publicity: Most likely what the "evil" corporation wanted to achieve with the name.
* Villain with Good Publicity: The bad guy is loved by everyone because their true despicable nature is not public knowledge.
* Villain with Good Publicity: The Evil, Evil Men and the Evil Attractive Bitch.
* Villain with Good Publicity. This example also comes with a rare retaliation as he opens fire on them with his umbrella machine gun.
* Villain with Good Publicity wanted them to clear his name, referring to him as "a terrible murderer" who looked like "a Sunday school-attending young man".
* Villainy Discretion Shot: Hinting at a villain being exceptionally vile without actually showing them doing anything too heinous.
* Villainy-Free Villain: A villain who doesn't do anything unethical or illegal, but is a huge jerk.
* Villainy Inc., who are an all-female group of enemies of Wonder Woman that team up together.
* Villanova University had this reputation in the 2010s. 2009 saw Villanova return to the Final Four, then from 2010 to 2015, didn't even make it to the Sweet 16. Then 2016 came along, and with one buzzer-beater, Villanova won its second national title over... the University of North Carolina. The Wildcats likely shed this reputation permanently with their third national title in 2018, winning every tournament game by double digits.
* Ville de Paris was launched during the Napoleonic Wars, where she served admirably.
* Ville Duval. Sido is a shy, compassionate girl who is very loyal to her father even though he ignores and mistreats her constantly. Her sweet nature wins over most anyone.
* Villetta and Rolo are assigned to the OSI detail to watch over Lelouch in order to keep him from using his Geass or becoming Zero. Lelouch manages to flip the script on them both via blackmail of the former's relationship with Ohgi, and convincing the latter that he has no future with Britannia, respectively. (Unfortunately, he fails to keep an absolute leash on either.)
* Villetta Nu is from the Britannian Empire, but since it geographically covers not only the USA but all of Central and South America as well it could account for the wide variety of skin tones among its members.
* Villette had it that Paul did indeed die. Charlotte Bronte reputedly considered it a kinder fate than life with Lucy Snowe.
* Vilous have bird-like genitals. Although males do have a penis, they don't actually need to use it during mating and it normally only extends out of their slit during mating, although male sex workers can learn to extend it voluntarily for the pleasure of other races.
* Vilous. They are descended from a common ancestor race that was similar to humans, but you wouldn't know that from looking at them. The word human sometimes also includes beings that have been granted human rights, though the other sapient species in the setting look even less human. There also is a ton of wildlife in the setting that are named after earthly creature that they have very little resemblance to and don't have the justification that the "humans" have. There are "dogs", "wolves", "cows", "weasels", and "hamsters" that are so alien that many of them resemble insects or other invertebrates more than what they are named after. And the "plants" that are part of the same organism group as those weird creatures are not really plants and function more like primitive sessile animals.
* Vimanarama, vitamin laden air, prayer fueled refrigerators and other marvels. The series ends with the hero rescuing three young idiots who crash a two-man flying

vimana into the bright face of the moon.
* VI — something which relies on draining the life-force of sentient magical beings. Like Cid Previa, he repents of this.
* Vimes believes it doesn't really count as killing someone when you fall off a roof and it's even odds who ends up on bottom when you land.
* Vimes believes people in drought-stricken countries would pay good money for Igor to say "sausages".
* Vimes, Carrot, Angua and Detritus, and the rest of the Ankh-Morpork City Watch form one of these.
* Vimes does one of these, when he works out how 71-Hour Ahmed got his name. The traditional Klatchian period of hospitality and protection is three days - 72 hours.
* Vimes hasn't promoted Fred from Sergeant (or Nobby from Corporal) because, despite the fact they're senior to almost
* Vimes has used this to his advantage, however, in the line that says, essentially:
* Vimes himself hates the upper classes, considering them entitled bastards who think themselves above the law. Since marrying Lady Sybil, he has become the richest man in the city, as well as a knight and a duke. The irony of this is not lost on him. Lord Vetinari has remarked that Vimes' continued dislike of authority and the nobility, despite being the second highest authority in the city and the highest ranking noble, is "practically Zen."
* Vimes himself is descended from "Stoneface" Vimes, commander of the Watch back in his day, and important enough to have a coat-of-arms, though it was rescinded when he
* Vimes is cynical about clues as they're too convenient, and considers any half-competent criminal can invent half a dozen to leave at the scene of the crime, while any underexperienced investigator will pick up another half-dozen.
* Vimes' joke title of "blackboard monitor" earned in primary school doesn't go over too well with the Mountain Dwarves, who venerate the written word.
* Vimes meets a local werewolf clan in their pack leader's castle, and notices there are empty nails and patches of paler plaster on the wall around them, suggesting several
* Vimes prefers that a watchman's armor should be a bit beat-up and dingy, to show that it's been doing its job, and by and large, the better coppers do tend to look a bit scruffier, while the ones with the impressively-kept armor tend to be too concerned with keeping it that way to be good at their jobs (Vimes has similar concerns about actual dress uniforms).
* Vimes spends some time pondering this trope at one point. Vimes is
* Vimes starts out as an intelligent and honest but nonetheless flawed man, with a deep sense of righteous anger at the unfairness of the world. As the series progresses his righteous anger is inflated to the point of making him into a semi-Messianic figure incapable of doing wrong — in Thud! he alone is able to resist a very powerful soul-possessing demonic superbeing, which regards Vimes as a worthy opponent and occasionally endows him with supernatural vengeance/crime-detection powers (albeit ones that mainly extend to seeing in the dark and understanding the speech of things that live there).
* Vimes tends to see two kinds of people, Watch officers and non-Watch officers. If you are part of the latter, then he mistrusts you, with only a few exceptions - he mistrusts most races - but if you are part of former,
* Vimes threatens a comparable punishment for any assassin caught carrying a spring-gonne within Anhk-Morpork city limits. "Rest assured, I can find a short cut." This line makes more sense when you know that people have previously referred to a little place near Lancre where the sun doesn't shine (which, if you know your Disc geography, means a deep gorge near the village of

* Vin also has the realization that she (and Kelsier, and all Mistborn) are this relative to Mistings when Kelsier keeps sending her to the crews various Mistings for training.

* Vin and Elend come across this way too, at least initially. They get past it pretty quickly after
* Vin and Elend eventually get together. Afterwards, they still function pseudo-independently of each other and grow as characters throughout the final book.
* Vincalis the Agitator is completely unaffected by all magic in a world where magic is pervasive and advanced. He is also forced to major in Theoretical Magic so that his inability to cast spells doesn't get noticed.
* Vince Coleman, train dispatcher who died in the 1917 Halifax Explosion (the largest man-made explosion ever prior to the atomic bomb):
* Vince discontinued The Blonde Bytch project because he, personally, had never heard of
* Vince Flynn has this trope as its main theme, hence the title. The President is sealed in a bunker below the White House for his own protection while terrorists control the White House proper, and the VP has to run the show until such time as the President can leave the bunker (Which he can't do until the terrorists are dealt with) or he can communicate with the outside world (Which he can't do because the terrorists have jammed all his communication devices). Being who he is, the VP wants the President dead, and so the army/CIA has to take it into their own hands.
* Vince Flynn. Of course, the different Agencies have it a bit easier than most examples, because their heads know each other personally, but there is still an acknowledged interagency rivalry and pride.
* Vince Flynn's Mitch Rapp series has the Orion Team operating inside the CIA, as an assassination squad. Over the course of the series, they branch out into hostage rescue, investigation and deep penetration, but their missions usually involve a fair amount of killing terrorists.
* Vince Gill became incredibly popular in the late 1980s through mid 90s, long after he left the country-rock group Pure Prairie League. (That's him singing lead on their hit "Let Me Love You Tonight".)
* Vince Gilligan as sociopaths, although he uses the term very loosely.
* Vince Gilligan. Specifically, the American healthcare system is mostly privatized and profit-driven (with government-provided healthcare being far less extensive next to the agencies available in most other developed nations), and medical bills are known to be extremely high. Hence, Walt getting diagnosed with cancer is notable in part because the treatment is likely to cost tens of thousands of dollars even with insurance, requiring him to either beg for money from his own colleagues or go into meth cooking to avoid his family facing financial ruin. In any nation with a universal health care system, this depiction makes much less sense, as medical bankruptcy is much less common, meaning that the show's premise tends to require explaining or create confusion.
* Vince Gilligan was asked, "Is there really such a thing as Blue crystal meth?" He responded, "There is now."
* Vince Gilligan was preoccupied with human evil to a disturbing degree and failed to attract an audience—lessons Vince would internalize as showunner.
* Vince Gill pop song that failed to leave much of an impact overall) and "Forever Country".
* Vince Guaraldi animated specials) suffered a fatal heart attack in 1976 while resting in-between concert sets.
* Vince Guaraldi soundtrack has become a perennial holiday classic and many kids' first introduction to jazz. Despite his fame for the Peanuts score, his style was heavily influenced by Afro-Cuban Jazz and Brazilian music. Before he died, his later Peanuts scores experimented with harpsichord, Hammond organ, hard bop, fusion, and funk.

* Vince Jr, no attention given to weight classes, no mention of time limits, Asians became even less prevelent despite continued Japanese excursions, women wrestlers had fleeting presence and matches became less technical and less violent. Since

three companies can't do as much outreach as thirty nine, pro wrestling enterprises around the world could no longer count on the USA to prop them up in times of trouble and many were in fact wary of Vince Jr's predatory practices and or dismissive of the product he promoted.
* Vince Korinek wants to rewrite the natural balance between humans and Pokemon to give great power to the Pokemon and ultimate control to the human. He plans on doing this with Miranda's DNA, since Miranda is a natural version of his goals.
* Vince Lombardi built most of his career on a single play- the Power Sweep. While not the only play in his book of course, it was the most practiced, and John Madden once related a story where, visiting a seminar by Lombardi, the coach spent
* Vince Lombardi once said "Winning isn't everything, it's the only thing." He later said "I wish I'd never said the thing. I meant the effort... I meant having a goal... I sure didn't mean for people to crush human values and morality."
* Vince McCain delivers one of these to chronic talker "Bugsy" Malone in
* Vince McMahon and God. Yes, God. And yes, of course Vince's team won.
* Vince McMahon and then, once he had the two of them alone, vindictively turning on her and then mocking her when she burst into tears.
* Vince McMahon, as McMahon appeared (very much alive) on camera to explain the situation and that he was indeed in a storyline. Several weeks later, a shortcut storyline to give some plausible closure to things (he faked his death) was played out.
* Vince McMahon bought the league out of bankruptcy, opening the door to a possible return).
* Vince McMahon briefly declared himself a god in 2006. Also sometime before that when he was the "higher power" of the Corporate Ministry before some wrestler beat sense back into him.
* Vince McMahon claimed he had lost his virginity at age 12. Jonathan Coachman responded by asking, "How is that even possible?"
* Vince McMahon couldn't help but investigate these new creatures and treated their locker room like a remote wilderness.
* Vince McMahon. Debuted in 1969, took on lead announcer role in 1971.
* Vince McMahon did during the Montreal Screwjob in his later years due to lack of draw value, leading to his decision to quit WWE.
* Vince McMahon during her job interview segment. It has since become a popular reaction GIF on the internet.
* Vince McMahon, forced Vince back on television to address the fans personally, where he admits that the limo explosion WAS in fact, meant to be the death of his "Mr. McMahon" character. Of course, Mr. McMahon has since been "resurrected" and up to his usual brutal boss ways.
* Vince McMahon, forcing Vince and Shane into exile. Aside from Triple H having been a part of the same Higher Power conspiracy that set Stephanie up, albeit via The Corporation rather than The Ministry, when Triple H then took over the WWF he cited Stephanie's share of the stocks in the company... which she technically didn't have anymore.
* Vince McMahon has said that Vince will get utterly annoyed if he sneezes - because he can't control it.
* Vince McMahon himself qualifies. He's said that, growing up, his favorite wrestler was Dr. Jerry Graham.
* Vince McMahon: His on-screen presence diminished as time went on, only appearing for the occasional big angle. His real-life handling of WWE has been increasingly criticized over time.
* Vince McMahon. Hornswoggle bit his ass instead. Out of spite, Vince claimed it still counted as kissing his ass, as his lips still made contact with his butt.
* Vince McMahon in disguise (he was) and forced him to take a lie detector test. Mr. American passed when he said he wasn't Hogan. Angry, Vince took the test to prove it was rigged, only for the machine to buzz when he said things like he wasn't an asshole, wasn't a pervert, etc.
* Vince McMahon interrupt and beat up Vince in order to remain on the roster.
* Vince McMahon is on record as saying that Joe's son James is welcome on his

roster if football doesn't work out. Although the Butkus Award for best college linebacker made that prospect unlikely, and (as of 2016) he's about to start his eighth season in the NFL.
* Vince McMahon is primarily this to authority figures, especially heel ones. For all their frequent abuses of power to stroke their own egos, as far as Vince is concerned, they are even more expendable than the talent on the roster and if they screw up, he has no issue making that very clear.
* Vince McMahon! IT WAS ME ALL ALONG!" The more accurate quote is "IT'S ME, AUSTIN! IT'S ME, AUSTIN! IT WAS ME ALL ALONG, AUSTIN!"
* Vince McMahon(Jr) for everything bad in the WWE; while it is true that he has final say on what goes on TV a lot of the more controversial angles where others were the idea of other people working for the company (for example, the infamous Katie Vick angle was the brainchild of executive producer Kevin Dunn, though Vince has defended it pretty strongly and gladly taken "responsibility" for it in interviews, confusing the issue).
* Vince McMahon. Note that his inability to get an incest story actually going didn't prevent him from alluding to such things.
* Vince McMahon. Of course, the crowd invariably roars even louder afterward.
* Vince McMahon out of business and bought out their promotions. Vince would later hire Bischoff and Heyman as onscreen commentators and characters, and revive their old brands, albeit in very different forms.
* Vince McMahon. Problem was it was cold and snowy out. The chicken wasn't having any of it, and refused to do anything at all. Vince actually belly-flopped into the snow and flailed around trying to make the chicken run from him, to no avail. Eventually he and Shane just picked the poor chicken up and laughed about the whole thing not working.
* Vince McMahon's company and the Hart family. The latter was divided into two camps, and the bitterness got to the point where one side faxed important case information to Vince, which forced a settlement.
* Vince McMahon!), screwing up a match's scripted finish just once, or getting into altercations with wrestlers backstage that are favored by the management.
* Vince McMahon's favor towards big muscle men is connected with his passion for bodybuilding. Not only has he got a bodybuilder's physique himself, but in the nineties he started his own short-lived bodybuilding organization, the World Federation of Bodybuilding. The International Federation of Bodybuilding owned by the Weider Brothers had by that time crushed most of its competition, but Vince thought he could beat them at their own game. First, as his
* Vince McMahon's has also evolved similarly going from cheerful and bold as an announcer to menacing as the evil chairman to increasingly cartoony to mellow post-haircut. Of course, when the time comes to let his infamous delivery of "YOOOOOOOOUUU'RE FIIIIIIIIIIIIRED!" rip, he really digs in and that menacing circa-2000 snarl comes right back.
* Vince McMahon should be hailed as the sole creator and protector of modern professional wrestling.
* Vince McMahon, so he should have known that Vince is much more than that.
* Vince McMahon. So he was effectively a face on Raw and a heel on Smackdown.
* Vince McMahon, stands at six-foot-two and weighs about 250 pounds, pretty average by wrestling standards but gigantic compared to the other members of his family and his various assorted corporate cronies. And he wears a padded suit to make himself look even larger.
* Vince McMahon-style swashbuckler, and nixed the character despite Burchill being over with the fans.
* Vince McMahon that resulted in Punk defeating Cena for the title and (temporarily) leaving the company with it. Oops.
* Vince McMahon This heat has mostly died down, however, due to Hart making amends with both Michaels and Vince in 2010.
* Vince McMahon to apologize to him and the fans for not giving them what they wanted. He finally relents and gives CM Punk a rather furious apology:
* Vince McMahon, Vince decided to promote him to GM, showing him that being in

charge means being the bad guy and making decisions not everyone will like for the sake of the company. He gets into a disagreement with his family after making such a decision over a match, though Vince quickly seizes the moment and fires him afterwards, ensuring Bret still looks unfairly treated.
* Vince McMahon walked in on Vickie Guerrero, Hornswoggle, and Great Khali in an "interesting" position in 2012.
* Vince McMahon when he's eating a steak; he gives his full attention to the meat.
* Vince McMahon when the angle started with Shane buying WCW out from under Vince and Stephanie buying out ECW and the two children teaming up to take on their father, turning the angle from the "WWF vs WCW (and ECW)" story that everyone wanted to see into yet another "McMahon vs McMahon" affair.
* Vince McMahon, who had survived every one of the management's attempts to bury.
* Vince McMahon who, in contrast to the serious mood the production was attempting to set, was visibly trying not to crack up. (This incident was rumored to be why he was fired later.)
* Vince McMahon, with scantily-clad cheerleaders, smack-talking announcers, a scramble for the ball between two players in place of a coin toss, and microphones and cameras in the huddle and in the locker rooms. It only lasted a single season in 2001 before folding, seen by many critics and sports fans as a gimmick-laden mess of bad football that substituted on-the-field talent for "extreme" attitude.
* Vince McMahon would hold this against her long after the fact, insisting Trish had slept her way to the top.
* Vince McMahon would use this too as part of his "Kiss My Ass" gimmick.
* Vince McMahon wrestler in the promotion every week. If 50 percent of a promotion (of 50-60 headline-type wrestlers, not including those who were strictly jobbers) were featured each week, they did well.
* Vince Neil's daughter was dying of cancer, he began drinking even heavier than he usually did to cope with his despair. After the funeral, his friends shipped him off to rehab. It didn't take, and he remains a heavy drinker to this day.
* Vincennes, the school setting, serves a real brand of tea, Fortnum & Mason.
* Vincennes works Narcotics, and on the side, gets kickbacks for tipping
* Vincent Adler's U-boat treasure that the box hid, Matthew Keller's return, and Neal's commutation.
* Vincent and Jules being miraculously saved from several gunshots at point-blank range. Jules is convinced it's a miracle, while Vincent recounts hearing a similar story. The gunman could've just been a bad shot, but Jules notes that there are bullet holes in the wall behind him and Vincent; by all rights at least one of them should've been grazed if nothing else.
* "Vincent and the Doctor" as art expert Dr. Black; Nighy agreed to take the role on condition that he was not credited and no publicity photos were taken of him.
* "Vincent and the Doctor" has been defeated, the Doctor takes Vincent to the Musée d'Orsay in the present day, and leads him up to the van Gogh collection. There, he asks a tour guide, in earshot of Vincent, where he thinks van Gogh rates in the history of art.
* "Vincent and the Doctor" has the TARDIS decide that speaking English with a Scottish accent and speaking French with a Dutch accent are translated equivalents.
* Vincent and the Doctor, is told where the monster is, but misinterprets the statement and gets smacked through the air.
* "Vincent and the Doctor" of all people one: the long coat he wears when he goes to paint the church where a monster is lurking, and which he later faces the monster in.
* "Vincent and the Doctor": The Doctor asks Amy if she's thinking what he's thinking at one point. When she responds with a suggestion of food, he says he was thinking of something else.
* Vincent and the Doctor", the Doctor digs around the TARDIS for a species-scanner that was apparently given to him as a childhood present by his godmother.
* Vincent and the Doctor to the future so he can hear art expert Dr. Black give an admiring speech about where he thinks Vincent ranks in the history of art. Vincent is so overwhelmed with emotion that he gives Black a hug and kisses him on the

cheeks before leaving. Black's reaction afterwards is to quite noticeably double take when he sees a self-portrait of Vincent on the wall and is reminded of the man who just hugged him, before he decides that there's no way he just met van Gogh in person.
* Vincent Bari uses spells based on vortexes, with many of them empowering his arms to become drills.
* Vincent Cassel by himself along with his trainer and gym pals, who played the bad guys. Unlike your typical Hollywood fight choreography, they actually played it full contact, resulting in Cassel being hurt in the face and his trainer getting a broken nose.
* Vincent Crabbe and Gregory Goyle are a duo of this trope. While Draco Malfoy delivers all the verbal insults, they do little more than act as muscular bodyguards and laugh stupidly at those on the receiving end of his snark. In fact, the reader never gets to hear either of them speak in person until towards the end of the very final book, and it is indeed stated that Harry had "hardly ever heard [Crabbe] speak before."
* Vincent D'Onofrio" before Mr. Peanutbutter showed up as a better fit.
* Vincent D'Onofrio. But D'Onofrio's performance was so complex and layered and brought such a fresh interpretation of the character into both a terrifying and surprisingly sympathetic villain, that critics and audiences didn't mind at all.
* Vincent D'Onofrio got trapped under a train car, which crushed and mangled his body from the waist down. It's understood by all — paramedics, police, and the poor guy himself — that the train's weight, compressing arteries in his crushed torso, is the only thing keeping death by blood loss in check.
* Vincent D'Onofrio. He's a foot taller than she is, broad-shouldered and, as the series goes on, increasingly barrel-chested. She's slim and tiny and sometimes looks like he could put her in his pocket.
* Vincent D'Onofrio incorporates a good amount of his own social anxieties into his portrayal of Wilson Fisk, like difficulty maintaining eye contact, odd speech inflections, and, despite taking precautions, having a set routine. He has trouble "clearing his head" at times, and is insecure when out in public.
* Vincent D'Onofrio speculate that D'Onofrio integrated this into his role of Detective Robert Goren, and thus view the character as on the spectrum.
* Vincent D'Onofrio. The added weight later caused the ligaments in his knees to tear up during the obstacle course scene.
* Vincent Gigante. Almost every day, he would emerge unkempt, dressed shabbily with pajamas and a windbreaker from his home, and accompanied by one of his bodyguards. Because of this, he was nicknamed "the Oddfather." Psychiatrists and his own relatives claimed that since he had a low IQ stemming from injuries he sustained in his earlier career as a boxer, and that he suffered from various mental diseases such as psychosis and dementia, he was mentally unfit to stand trial. This "crazy" stunt worked for many years, but it eventually came back to haunt him in 1997, when mobsters from other families testified that he used it as a ruse to shake off law enforcement. Gigante finally admitted to pulling this crazy stunt in 2003, and died in prison while doing a 12-year stint for murder and racketeering charges.
* Vincent has a bit of this going on with everyone, but especially with his brother Gil and Ada.
* Vincent has a yandere obsession towards his brother Gil that becomes even more obvious after he goads Gil into saying he'll murder anyone who tries to take Oz away from him and gets excited when thinking about the angry expression Gil will make due to his actions. Later, while flirting with Lotti Vincent releases hearts marks and becomes happy when Lotti threatens to maim Vincent for hitting on her. He also has
* Vincent, in the throes of one of his Vincent Price/Roger Corman/Poe fantasies, believes he's buried his wife alive, and digs up his mother's flower bed trying to "retrieve" her.
* Vincentio Saviolo, though an Italian, produced the first fencing manual written in English.
* Vincent J. McMahon, the late father of Chairman Vincent K. McMahon and founder

in 1953 of Capitol Wrestling Corporation (sort of the proto-WWE), was born in Harlem about the time of
* Vincent Kartheiser said that he quickly lost interest in playing Connor after about four episodes. He disliked that every scene would have him and Angel arguing, and he would then go into a corner to sulk. He said he wasn't surprised when he learned that Connor was hated by the fans as well.
* Vincent Kartheiser shows off his dancing skills in the scene where Pete and his wife Trudy stop Roger's party dead by doing the Charleston.
* Vincent Kennedy McMahon, just so they didn't have to change his name.
* Vincent Law is the Ergo Proxy of the title, and it initially acts as a separate part of him without him knowing it. He previously erased his memories so that he could live a normal life as a human.
* Vincent leaves to seek a new life elsewhere, and presumably both the above things happen.
* Vincent Martella has gone on record as having recorded his family's answering machine message in character as
* Vincent Nigel-Murray compulsively spouts facts/trivia when stressed and has difficulty picking up on social cues.
* Vincent opens with a minor key tune that the titular character is playing on his flute.
* Vincent Price (1966), between Price's title villain and Ciccio Ingrassia's hero/comedy relief.
* Vincent Price, from 1985, had him sitting in a car opening and closing his garage door with a remote while his wife talked to camera.
* Vincent Price. The former was filmed the week leading up to Halloween 1976 (although it actually aired in late January 1977 in the U.S., and late April the same year in the U.K.), and the latter aired two days after Halloween 1978 in the U.S.
* Vincent's replacement Mark St. John basically disappeared from the industry after a collaboration with ex-Kiss drummer Peter Criss ended up failing miserably. He wasn't completely gone like Vinnie Vincent, but never did anything with any kind of profile again, and even spent time in jail prior to his death.
* Vincent Valentine was originally human, but was modified by both Hojo and Lucrecia Crescent into a deadly shapeshifter.
* Vincent van Gogh, and who could really blame him? Every time he went outside he was called "the redheaded madman".
* Vincent van Gogh considered "The Starry Night" to be a failure. Some of his critiques can be found in his letters to his brother, Theo, and to contemporary artist Émile Bernard.
* Vincent van Gogh had a self portrait called "Me as a Japanese Man" where he tries to emulate the hairstyle of the samurai.
* Vincent van Gogh has this reputation among many graphic artists, because everyone can relate to a struggling genius unable to make a living, while his work is so ahead of its time that nobody recognizes it.
* Vincent van Gogh is a popular example of this, but he is actually not a great example. There was only four years between Van Gogh's visit to Paris in 1886 (when his signature style started to emerge) and his early death in 1890. This is an incredibly short time by the standards of the art world, but Van Gogh was already beginning to attract serious attention before his death, and was highly regarded by influential artists such as Gauguin. Had Van Gogh lived just a few years longer, people would likely be telling the story of his meteoric rise to prominence; the fact that he was not recognized until after his death has more to do with his early death than with his reception in the contemporary art world.
* Vincent van Gogh managed to sell just one painting during his lifetime, but became much sought after soon after his suicide. He did actually get some recognition by his contemporaries, however, he just died too early to be recognized by the masters.
* Vincent van Gogh section, Van Gogh's paintings never sold well when he was alive, and the episode focuses heavily on the man's mental health on account of this, his

depression, and his psychic visions which make him seem crazy.
* Vincent van Gogh was that he cut off an ear. Which is kind of ironic, given he didn't. It was only the lobe, and it probably wasn't him that did the cutting.
* Vincent van Gogh who painted most of his works, and lived most of his life in France.
* Vincent van Gogh, who used the very little money he made to buy art supplies and lived on coffee and absinthe. As if his mental health wasn't bad enough, poor nutrition made his physical health that much worse.
* Vincent "Vinny" Perotta, UnSub of Season 1's "Natural Born Killer", is a six and a half foot tall
* Vincent Wants to Sea: when Dr. Rose loses her car keys, Vincent's father has to hotwire her car and break the steering lock, which takes some time. This later causes them trouble when they get pulled over in Italy - the officer is understandably reluctant to believe they didn't steal the car, especially since Dr. Rose doesn't have ID with her.
* Vincenzo affection for Vincenzo reaches its peak in episode 11. Ahn pulls strings to get Vincenzo released from custody, offers his help in Vincenzo's campaign against Babel, and in return asks for...a hug. Vincenzo offers a handshake but instead Ahn leaps into his arms, his legs wrapped around Vincenzo's waist while a stunned Vincenzo is left grabbing onto Ahn's butt.
* Vincenzo Natali, and its two protagonists: Andrew (Miller) and Dave (Hewlett).
* Vince Offer, A.K.A. the ShamWow/SlapChop guy. "You're gonna' love my nuts!"
* Vince Offer it is. This was referenced in a later commercial for the Da Vinci Pro Cutting Tool, where Vince throws a $200 food slicer out the window.
* Vince Offer, of the Shamwow and Slap-Chop ads, uses this a fair bit.
* Vince Offer slipped in some dialogue that could easily be interpreted as a double entendre while advertising for the Slap Chop.
* Vince Russo and Lodi and Lenny getting taken off TV and getting repackaged yet again.
* Vince Russo, and the quote, usually incomplete with exclamation mark after Japan and without context, is guaranteed to pop up every time the word "Russo" is ushered near "smart" wrestling audience as proof of his total incompetence. Granted, it wasn't Russo's only controversy in wrestling world...
* Vince Russo) by saying "It got people talking about us!" Never mind that most of the talk was about how ridiculous and embarrassing it was. In the end, all the talk was for naught, since the company went under less than two years after Russo's initial hiring.
* Vince Russo creating complex characters with those shades of gray was nearly impossible and it simply turned into characters pinballing between 100% Face and 100% Heel on a nearly weekly basis.
* Vince Russo demanded he take, and it made him very uncomfortable to do, as his children (and grandchildren) would see it on TV.
* Vince Russo, even if they produce nonsensical incoherent unresolved storylines.
* Vince Russo in a one-off appearance, White Wolf sued WWE for trying to infringe upon their trademark; they lost due to the fact that they couldn't prove that the usage of the name for that one-shot appearance was enough to be infringing. In the WWE Encyclopedia, his entry is "David Heath (Known in WWE as Gangrel)".
* Vince Russo in the 90's where he changed any hard "S" sound to a z. For instance:
* Vince Russo isn't a line down the middle and characters should act naturally to achieve their objectives rather than abiding by their defined alignment. Unfortunately he isn't very good at making this happen so when it's attempted it just ends up confusing and everyone winds up with weak characterizations across the board.
* Vince Russo or not, the backstory of both Undertaker and Kane can be easily considered a complete mess.
* Vince Russo's booking in general. Even during his disastrous stint as the booker of
* Vince Russo" tournament because he overheard Bradshaw bragging that he could beat up everyone in the locker room and Russo wanted to see Layfield get his ass kicked.

* Vince Russo went out of business before this angle could come to fruition.
* Vince's attempts to do an incest storyline prior to the WWE going PG is most likely due to issues involving his screwed-up childhood. He unfortunately vents all these issues through storyline, instead of venting it to a psychiatrist like anybody else would. As Vince is someone whose blood would test positive for Kayfabe if such a thing was possible, it may be impossible to find out what really makes him tick.
* Vince's desire to push giants at the expense of better workers doesn't just apply to men, as the case of
* Vince the Crash Test Dummy manages to drive — until Larry reminds him he can't —
* Vince Vance & the Valiants" parody "Bomb Iran" in 1980, but they are not the only act to have done a parody of that name.
* Vince Vance & the Valiants were mostly known for their novelty songs, such as "Bomb Iran" (a parody of
* Vince wasn't the only one. One of the worst offenders was WWE's VP of Talent Relations from 2004-12,
* Vince would later create an evil religion yet again, this time simply called "McMahonism", which began as a mockery of
* Vinci and Arty, a knock to the head makes Vinci forget everything that has happened since he moved from Greece to the United States, like learning the English language or being in love with Arty. What makes it worse for Arty is that pre-immigration Vinci was apparently kinda homophobic.
* Vinci and Arty says he doesn't pay much attention to physical details), at least in regards to his relationship with Arty he technically qualifies. Though his occasionally being mistaken for female somewhat overshadows this.
* Vinci, Industrial Devastation, is basically a giant drill that comes from underground and devastates the area of effect.
* Vindex and Propugnator seems to be for the wielder of two different abilities, although they mean mostly the same (protector). Both are for some kind of barrier. They seem to mean respectively the users of psychic shield and armor. One refers to an ability to stop any kind of offense (even gunfire, and can be extended for others nearby), the other is good for lessen the power of the attacks which reach the user.
* Vindicare assassins are the epitome of cold snipers, enhanced with a few extra handy organs and cybernetic implants and trained to be emotionless so as to be maximally effective killers.
* Vindicated by Cable: A work that flopped when it was first released becomes more successful on home video, streaming etc.
* Vindicated by Cable later makes back its budget through home video, TV airings or streaming.
* Vindicated by Cable makes a lot more money through television airings.
* Vindicated by History, after which point the series creator Stephen Hillenberg and most of the writing staff stepped down, causing a widely-perceived decrease in quality. Even though reception has been more positive with Hillenberg's return in Season 9, you'll still see few people discuss them.
* Vindicated by History: A work that wasn't popular when it was first released becomes more popular and appreciated over time.
* Vindicated by History: A work that wasn't successful when originally released receives better reception over time.
* Vindicated by History: A work that wasn't very successful when originally released receives better reception over time.
* Vindicated by History: A work that was panned in its time becomes more appreciated at another.
* Vindicated by History message did this with the Ira and George Gershwin song "They All Laughed" in 1999, leading to at least one modern cover in 2000.
* Vindicated by History, resulting in his removal from the series. However, in more recent times, African-Americans have come to appreciate Roosevelt Franklin for how dedicated he was to clearing up misconceptions of their African heritage and,

overall, just being a fun guy to hang around.
* Vindicated by History's other iconic song "Life on Mars?" (which subsequently charted as a reissue) it was never given a second chance. The closest it came was being used as a B-side to the 1975 reissue of "Space Oddity" (which went to #1, so a lot of people got "Changes" on 45 that way).
* Vindicated by History: The work was unpopular when it was originally made, but has since gained more attention and praise as time went on.
* Vindicated by History, with Dreyfus being released and exonerated. The scandal had a tremendous impact both on France (where it entrenched secularism) and Jewish life in Europe as a secular Austrian Jew of the name Theodor Herzl who hadn't felt particularly Jewish up to that point came to the conclusion that Jews would need their own state if they were ever to live free of prejudice and persecution, thus giving birth to Zionism.
* Vindicated by Reruns: A TV series that wasn't successful when it first aired becomes more popular via reruns.
* Vindicated by Reruns: A work becomes more appreciated through its reruns.
* Vindicated outside of younger generations of the Internet. Looking at parent company's WB's marketing, it appears the Adult Swim shows are pretty much bargain priced with a few now OOP, while the original
* vindicate. It favors the pets and makes Luna and Larimar main characters alongside the aforementioned Luea.
* Vindictus. And the name of the mission in which this happens? "Wake Up Call." Things don't really improve from there.
* Vindictus bosses become more common, Evie's defenses do not scale as quickly, thus it becomes progressively harder to solo. By comparison, the other characters get heavier armour and develop powerful defense and attack skills that make them far more survivable against later bosses, with Tank Fiona and Scrapper Karok becoming the predominant solo characters.
* Vindictus crossbow/machine gun. He uses elements of all four basic types.
* Vindictus hammers. Starting with the Ruins of Sanctity missions, Gnoll mooks start using big two-handed hammers as well.
* Vindictus. His comments towards the player are mostly cold and almost hostile. but he is shown repeatedly to have a soft side, especially for Tieve.
* Vindictus, the prequel to Mabinogi, is about the battle to escape the Shadow World in order to reach the promised land of Erinn, where the original game takes place.
* Vindictus, the secondary weapon Light of Palala is a flash grenade which stuns most enemies for a few seconds, looking confused.
* Vindictus, where Tieve is trying to persuade the mercenaries to let her reason with her friend the giant fuzzy spider before they start shooting.
* Vin Diesel BASE-jumping off a sports car that he's just driven off a bridge, and it just goes uphill from there.
* Vin Diesel commandeered a policeman's bullhorn and improvised a euolgy on the spot.
* Vin Diesel fan, who got to write the introduction to Wizard of the Coast's D&D 30th anniversary book.
* Vin Diesel's indeterminate ethnic phenotype allows him to convincingly play many different nationalities, from Italian-American to ancient Carthaginian.
* Vin Diesel, so much that he would go to promotions and premieres wearing the stilts he wore for the movie and a shirt proclaiming "I Am Groot."
* Vin Diesel's skin color is so indeterminate that not even he knows what his exact ethnicity is. He's known to have English, German, and Scottish ancestry on his mother's side, but he's never met his biological father though he does know that his parents' relationship would have been illegal under the then-current laws on race mixing. This has allowed him to play characters of varying ethnicities.
* vine made by a user named Alpha Male that showcases a slightly exaggerated use of this trope involving a turkey sandwich.
* Vine Realms community. Many, many community in-jokes are mentioned or referenced in-game.

* Vinesauce. And expect to hear more than one hysterical "What is this?!" when he's streaming corruptions.
* Vinesauce decides he's done mocking it, it just gives him (and the audience) one hell of a scary by shifting to a demonic red and humming louder than ever. The clip of the moment has been justifiably named "CURSED PIZZA"
* Vinesauce does a wide variety of gaming-related streams, including traditional playthroughs of well-known games, peaks at obscure and often bizarre free games from the Internet, and reactions to new game trailers. His most famous videos, however, are his game corruption videos. This is despite him admitting that the sheer unpredictability of corruptions, while the source of their appeal, also makes it extremely hard to sift anything interesting out of them. Hence the dearth of such streams despite heavy viewer demand.
* Vinesauce fame has an odd fascination with ducks. Said fascination tends to leak into fangames about Vinesauce.
* Vinesauce has an early scene where Luigi, Mario, and Wario volley pasta-themed puns.
* Vinesauce has pretty much gotten sick of memes in general, but he has a particular distaste for people who still think "It's Hip to Fuck Bees" is funny.
* Vinesauce") It turns out that the software was, in Joel's words, "a two-frame, 24x24 pixel GIF of a woman having a seizure." And it seemed to be malware too, because he was unable to uninstall it, forcing him to get his dad to fix the problem. Being a child at the time, Joel got a pretty good scolding out of it:
* Vinesauce just for Vinny or even Joel. And for Vinny, it's the video game corruptions that get him his highest views in spite of them being few and far between compared to his other vids.
* Vinesauce, leading to the glorious sight of a screaming helicopter trying to be stealthy.
* Vinesauce, Mario is able to elude Luigi with the clever disguise of a hand with glasses on it, claiming to be Handio. Luigi is fooled, but not for long.
* Vinesauce milks Mario's apparent death for all it's worth, with dramatic slow-motion, Luigi shedding a single tear, and screaming Mario's name.
* Vinesauce opens with Luigi ordering a spaghetti on the rocks from Toad, miserable over losing Mario.
* Vinesauce streamer Joel admitted in his Pokemon Gold randomized stream that he likes drinking hot sauce, straight from the bottle.
* Vinesauce Tomodachi Life at best, and the most threatening thing on Vineland at worst.
* Vinesauce Tomodachi Life. By the time the original run wraps up, the population of the island is less than 50.
* Vinesauce Tomodachi Life decides something interesting should happen to them. Even main characters aren't safe; Witch and Waluigi were among the first islanders added, and they were well-known for being the first (and by far the most stable) couple, but around the time they got married, they stopped being interesting and focus shifted to other islanders.
* Vinesauce Tomodachi Life. Even then, he still relies on coincidental random events to strengthen the plot.
* Vinesauce Tomodachi Life is livestreaming the game and can't save scum his way out of certain events, he ends up being just as surprised as the viewers are by them. Essentially, the series writes itself on the fly.
* Vinesauce video game, the title screen has an ear-bleeding loud and clipped version of "You Can't Keep a Good Dog Down" playing, startling both Joel (who literally starts screaming in pain) and his viewers.
* Vin, especially when every other thieving crew she's been a part of considers backstabbing to be a part of life.

* Vine where the protagonist discovers he only has 69 cents, not sufficient for chicken nugget.
* Vine, which officially released on January 24, 2020, 7 years to Vine's release day, but as of yet has yet to live up to Vine's success. The other app is, surprisingly, the equally-popular TikTok, as evidenced by the multitude of "TikToks that radiate the same energy as Vines" compilations floating around.
* Vin Gerard if there ever was one) and then twisting his world on its axis as Vin thanked him for it. Ended with Storm 'transforming' into the rudo STIGMA, dropping the color from his outfits, the bright mullet becoming a black mohawk and joining with Vin Gerard and Colin Delaney to become the UnStable.
* Ving Jane's "Girl Next Door" brings up the singer as the Betty and her rival who is the Veronica.
* Ving Rhames explains near the end that this likely saved the whole fire station from being brutally murdered by Fred when his repressed emotions would boil over. At the end of the film, Fred marries Alex's brother at the same chapel as Chuck and Larry.
* Ving Rhames roles by having him deliver intense monologues about...sandwiches.
* Ving Rhames) who stands guard in all weather and calmly tells two would-be burglars to take a hike.
* Vinick also comes into possession, accidentally but legally, of Santos' briefcase. It includes various embarrassing documents (such as Santos' frustrations with his running mate), and particularly documents that appear as if Santos has had an extramarital affair— though Santos had a true and innocent explanation for it. Vinick's campaign manager tries hard to get Vinick to use the damaging info against Santos, but instead Vinick insists on returning the briefcase to Santos and using none of it. This shows how strongly the show was on the idealistic end of the
* Vinigortonio is a girl with a giant lab-house who makes inventions for a hobby.
* Vinigortonio. The name is a mashup of the names Vinicius, Igor, and Antonio, even though only the first two are actual characters in the comic. Antonio is never mentioned at all.
* Vinland Saga and Askeladd gives him one of these. It shuts him right up.
* Vinland Saga and proceeds to lose rather spectacularly. Askeladd fights like this as well, all the time, but with him there's a slight subversion. Despite the tactics he employs physically he's still one of the strongest characters in the series.
* Vinland Saga, as his acts as king set in motion a great deal of reactions that directly affect the protagonist Thorfinn.
* Vinland Saga, before handily beating Askeladd (who can split a man's skull through his helmet and claims to have been able to beat 50 men single-handedly) for an encore.
* Vinland Saga: Canute has this done to Ketil and his son, to take over his farm, who is one of the most prosperous in the region.
* Vinland Saga for close combat pre time-skip, but he is good at throwing knives too.
* Vinland Saga, given his weapon (a sabre implied to be made from Damascus steel) and his ability to read Greek.
* Vinland Saga has a few examples, keeping in mind that in medieval Scandinavia making it to forty in certain high-risk professions (like being a professional warrior or a sailor) was impressively rare in and by itself.
* Vinland Saga has just recently come into possession of an eye patch after losing an eye in a battle. As if he wasn't badass enough already, if this trend continues he'll soon be wearing a long coat regardless of how anachronistic that might be to the period.
* Vinland Saga has multiple examples, as often played straight as not.
* Vinland Saga have thrown something else out, but the captain determined she was less valuable.

* Vinland Saga. He even went on a trip to Iceland to research Viking Culture in greater detail, to give his artwork that authentic tinge, and it shows.
* Vinland Saga he was often tasked on scouting and assassination missions by Askellad with the reward being giving the boy a chance to kill him in a one-on-one duel.
* Vinland Saga. His mother — as well as the lineage he shares with said mother — is very important to him, to the degree that despite being an amoral bastard he'll keep any oath he makes in her or his maternal ancestors' name. If he makes an oath on his father's name, however, there's a very good chance he's going to stab you in the back.
* Vinland Saga: In chapter 8, Thors is departing from Iceland with the purpose to join the Jomsvikings in an attack on England. As families and locals see the voyagers off, Thorfinn (who was shown to be very upset about his father leaving in the previous chapter) is nowhere to be found, and Ylva suggests that he is sulking because he was previously scolded by Thors. After the ship has rowed out to the open sea and Thors declares that they have "reached the current" and the ship will now travel on its own, Thorfinn's voice asks whether that means "we can't go back, father?" Moments later, Thorfinn emerges from a barrel and hurries to the railing to pee.
* Vinland Saga is initially mistaken for a girl once he removes the helm hiding his face, and though the confusion gets cleared up fairly quickly, Thorfinn continues to use the insulting nickname "Princess" for a bit, and Thorkell's men once make a crack that if Thorkell is the avatar of Thor, Canute must be the avatar of Freya.
* Vinland Saga is to defect to the enemy since they're weaker, then joins Canute, the underdog of the political factions. Unfortunately, once Canute is crowned there isn't much left for Thorkell to do.
* Vinland Saga, Leif the Lucky is the man who found Vinland, though he's now old and retired.
* Vinland Saga likes to school fools in history and religion, usually right before he ends their lives in a spectacularly bloody fashion.
* Vinland Saga, love and sacrifice are a recurring motif and as such this trope shows up several times:
* Vinland Saga, man's man of a warrior, so it is almost expected. However, despite being on the strongest side in England with rival factions constantly uprising against them, Thorkell is extremely bored because his worth as an intimidation-based commander means that he has to sit on the sidelines.
* Vinland Saga on their wedding night... After stabbing him (nonfatally) in the leg.
* Vinland Saga or retrieving a hostage from a forest fire, using the promise of a duel to motivate Thorfinn. Thorfinn, on his end, despises Askeladd and is only too happy to stay alive out of spite until he's killed him.
* Vinland Saga - Rereleased with different English dubs by both Netflix and Sentai Filmworks in 2021, two years after its initial broadcast.
* Vinland Saga, set in the 11th century during the Viking Age, and chronicling the adventures of famed explorer Thorfinn Karlsefni and the rise to power of Cnut the Great, among other things.
* Vinland Saga. There's close to a hundred men in his crew, the number fluctuates, but those are the ones that stand out.
* Vinland Saga: The story of a young Viking hell-bent on revenge for his fathers murder, until he stands before nothing.
* Vinland Saga this trope happens, and is subverted as well, several times:
* Vinland Saga. This was a test to see if the person was a mole. Simultaneously they use it to get the enemy to do what they want.
* Vinland Saga, Thorfinn was the first norse to attempt to colonize Vinland (the coast of Newfoundland) after it had been discovered by Leif Eriksson.
* Vinland Saga Thorkell the Tall, who dual-wields axes. Not just any old normal sized axes, big mo' fo' great axes almost as big as the hero.
* Vinland Saga, thus he's safe from being stabbed to death in his sleep, and also how to push Thorfinn's buttons to make sure he loses all the duels.

* Vinland Saga tries to tell Thorfinn, the protagonist, not to be one of these, explaining that a warrior that loses his cool often loses his head. Thorfinn, being Thorfinn, doesn't listen, so Askeladd is forced to teach him the truth of the matter rather bluntly.
* Vinland Saga: When a Christian priest is asked in passing about what he considers valuable in the world, he answers that 'love is the thing that makes all other things valuable'. The Viking marauders and mercenaries he's travelling with not only are confused, but have NO IDEA what he's talking about, and a few more curious ones ask for clarification on this "love" thing he mentions. He isn't really sure either and it is the question that makes him wander the world in search for an answer.
* Vinland Saga when battling named characters, their bonafides against other armies is demonstrated in the second arc where sixty Jomsvikings take on around three hundred armed civilians and rout them with less than five casualties (inflicted on them by a named character).
* Vinland Saga when he recalls the many men he killed over the years and wonders how many of them were brothers, fathers, or sons of other people. It's one of the reasons he decides to never kill again.
* Vinland Saga), which causes him to throw off the deal (he wants to hold power over people, and willing victims just aren't any fun).
* Vinland Saga who can't even have a civil conversation with the man who knew him from before his time growing up in Viking band, although he gets better after the time skip.
* Vinland Saga, with no clear-cut victor in either of their two fights, though Thorkell concedes the second fight after Thorfinn tears out his eye.
* Vinland Saga with Sigurd seeking to recapture her to reclaim his honour.
* Vinnie has another test later in the first season when he's infiltrating a different organization. Mel Profitt gets annoyed with one of the guests on his yacht and orders Vinnie to throw her overboard. Vinnie refuses. But it works out because Mel respects Vinnie for standing up to him.
* Vinnie's Tomb, you encounter an Old Queer Snake living on a heap of garbage who has the key to the aforementioned tomb. Understandably, the player will try offering him various items in their inventory, including an enormous diamond you find in that same heap. Waving the diamond in front of him will prompt dialogue along these lines:
* Vinny; after that, he says he's going to hell AND to get sued by the Pope.
* Vinsmoke Judge is an exceptionally cruel example as he heavily favors his daughter Reiju and 3/4 of his sons Ichiji, Niji and Yonji over his third son Sanji
* Vinsmoke Sora is one of the most compassionate selfless individuals in the series which is saying something, Sora was willingly to take a drug that would kill her so long as her one of her sons would have humanity; for Sora it was
* Vinsmoke Yonji always had the luxury of being genetically superior to his brother Sanji who he beat on regularly as a child, so it came as a shock to Yonji after meeting his brother years later that Sanji was
* VINSON radio encryption equipment had an area marked where a signaler could fire a 9mm bullet to destroy the crucial circuits, if his position was being overrun by the enemy.
* Vintage Apple keyboards have the odd quirk of putting the tactile bumps on D and K instead of F and J (assuming QWERTY layout) like every other keyboard, screwing up touch-typists trying to get to the home row position purely by feeling the bumps underneath their index fingers.
* vintage base ball teams and play matches against each other. All of the equipment and uniforms are reproductions, and actual 19th century rules are used.
* Vintage British comedians Eric Sykes and Tommy Cooper actually made an entire 45-minute film devoted to exploring and using every possible permutation of this gag. It is simply called
* Vintage Dragon introduced his own variation of the Bunkhouse Brawl in Vendetta Pro he called a
* Vintage lenses are usually so well-built, and yet so affordable second-hand that

it's not unheard for people to adapt them to modern digital camera bodies. This does require giving up the convenience of auto-focus, as that did not become commonplace until the late 1980s, but they can still hold their own in terms of optical quality. Manual-focus lenses also tend to have much better-built adjustment rings, with solid detents for aperture adjustment and focus rings that are smooth, damped, and easy to dial in just right.
* Vintage Stuff. When told to descend by flying fox and then come straight back to the top of the cliff, he descends on the flying fox and then climbs back up along the cable.
* "Vintage" T-shirts for sale at retail stores. Brand new shirts deliberately faded and cracked to look like they're 30 years old. Pre-ripped jeans also count.
* V intended to harvest the human race for use as snack food and drain all the water, and were turning the planet into a thinly disguised version of Nazi Germany to make it easier. In the end there would be nothing left but a dead desert planet. Diana puts a spin on this when the resistance is close to winning — if she can't have it then no one will. She tries to deploy her mothership as a bomb to turn the world into an irradiated wasteland.
* V introduces himself in a speech that is rife with words starting with the letter "V".
* Vin Vulpen makes two attempts on Rudy's life, jealousy over his relationship with Fiona being one of a few motives.
* Vin who loves Vin for her dedication and willingness to see the best in him, and worries that he's not good enough for her because he can't fight when she killed his god. There's a funny scene where Vin vents her worries to her friend Sazed, who gives her advice, and almost immediately after she leaves, Elend comes in asking the same questions.
* Vinyl and Octavia Duel Destiny series. See the fanfic page for specific details.
* ''Vinyl and Octavia Engage in Roleplay'', it's briefly revealed that Octavia has gone to university. She says that she never mentioned it because it didn't come up.
* Vinyl and Octavia Fight Ten Thousand Ninjas, the trope is both parodied and played straight.
* Vinyl and Octavia Get Incredibly Drunk, ends with Octavia drunkenly calling for Vinyl to come into her bed and cuddle her, since she doesn't want to sleep alone. Vinyl obliges, of course.
* Vinyl and Octavia Have Multiple Dates, Octavia ends up doing this with Neon Lights, before it descends into a pun battle.
* Vinyl and Octavia in 'Dial D for Detectives' where Vinyl and Octavia look around the scene of Switch Blade's murder for clues.
* Vinyl) listens to Karen Carpenter on the radio and the camera shows via a dreamy filter and unusual lighting, "Karen Carpenter" sitting next to her in the car and singing the same song. This is meant to reflect the self-absorption and identification with music people experience in their daily lives.
* Vinyl. Mob thugs beat him up and permanently damaged his windpipe, depriving him of his powerful and iconic singing voice.
* Vinyl: originally refering to Polyvinyl chloride (a.k.a. PVC), it now refers to vinyl records (a.k.a. gramophone or phonograph records), predominantly made of PVC after the 1950s.
* Vinyl records can have a message in the run-out groove area. This is most often the name (or nickname) of the cutting engineer, matrix numbers, or the name of the pressing plant, but sometimes also jokes.
* Vinyl Scratch tells Octavia interprets this as a proposal and starts preparing for her wedding, leading to Vinyl freaking out and locking herself in Fluttershy's bathroom.
* VI of the series, got a new design that embroiled her in the recent "boob armour" debate.
* Viola Cadaverini works as an assistant for Furio Tigre, the man who supposedly saved her life. In reality, Tigre is in debt to Viola's father for paying Viola's medical bills in an accident he caused, and
* Viola Davis) had she been nominated. As expected, Davis swept the award all

season, and easily won the Oscar. She also received a Best Actress Tony Award for the same role when she played it on Broadway. However, it's worth noting that Mary Alice received a "Featured Actress" Award (the Tony equivalent of Supporting Actress) for playing Rose in the original Broadway production.

* Violation of Common Sense: Advancing in a video game requires doing things a sane person usually wouldn't even think of.
* Violation of Common Sense: A situation where the proper course of action involves doing something a sane person would most likely be unwilling to do.
* Violation of Common Sense: Being rewarded for performing an action that goes against the logic of the genre.
* Violation of Common SenseDo something stupid enough, and you'll be rewarded.
* Violation of Common Sense. Taking any sort of damage on purpose, dying, skipping items that would normally be required to progress, buffing your character very early on to breeze through the rest of the game, and even setting the game to display in a language you can't read are all examples of common speedrun tactics.
* violations of the Geneva Conventions if done to enemy prisoners — understandable, since not everyone who might take them prisoner is going to respect the Geneva Convention, and since many of the missions rely on the ability to plausibly claim that the people involved are not combatants from your country, a technicality that the Convention recognizes.
* Violation - Someone breaks the big rule. This could be good or bad as seen by the examples above.
* Violence Action, and while protagonist Kay's backstory hasn't been explored yet, she displays almost superhuman agility and skill despite only being in her early 20's at most.
* violence at Altamont killed not only Meredith Hunter but the whole idea of the "peace, love and music" late-'60s outdoor rock festival that Monterey had pioneered and Woodstock made legendary.

* Violent Saturday, Gil Clayton is considered the leader of the 'wolf pack' in town. At the start of the film, he is having an affair with Mrs. Fairchild.
* Violent Saturday, Harper, Dill and Chapman arrive in town intending to rob the bank. The bank robbery is successful, but the getaway goes sour.
* Violent Saturday. He is infatuated with Linda Sherman and takes his dog for multiple walks late at night hoping to catch a glimpse of her undressing.
* Violent Saturday probably would have gone off with a hitch if the robbers had picked anyone except Shelley's car to carjack.
* Violent Saturday, Shelley is able to use a nail stuck in a beam to rip off his blindfold and gag.
* Violent Saturday: The bank robbers side of the story is entirely about the planning and execution of the bank robbery.
* Violent Saturday unfolds over two days; starting on Friday and ending on the evening of the eponymous Saturday.
* Violent Saturday: When drunk, Boyd seems incapable remembering any man's name,

including his own. He never gets a woman's name wrong, however.
* Violent Shit has one of the poor victims of Karl the Butcher being sewn in half (and the saw appears to cut through the belt harmlessly...).
* Violent Sky agent "silences" the genius of the protagonist's side by stabbing her in the back of the head and cutting a nerve for expressing thoughts. The victim is later implanted with an A.I. who's meant to impose her until her body dies of old age. Her nerve self-healed by luck later.
* Violent Storm unhooks the train carriage that the player is on in order to escape.
* violent tactics that took him out of the next game, where Hungary showed the messily assembled and coached team was not up to snuff. Portugal, the revelation of the tournament, going all the way to third place, took this even further while also aggressively ensuring Pelé stood pat.

* Violet Beauregard goes unquestioned on any of her decisions by her parents. In the 2005 version, she is a competitive overachiever who's managed to win first place in every competition she's participated in, and is determined to not only get a golden ticket but also to win the special prize at the end of the factory tour and believes that she
* Violet Detector, Suireko's main ESP ability is her spirit cellphone camera, which works pretty much like Aya's camera, and is required to obtain photographs for her nightmare diary. Unlike Aya, she doesn't have a photo requirement and can just curbstomp the nightmares, but each is only considered "cleared" once she has managed to take at least two photographs before beating the boss. Which is sometimes harder than it sounds, since some patterns require liberal usage of her other ESP abilities, and specially short-range teleportation, but none really necessitate the camera unless you make it a point to incorporate it.
* Violet Evergarden anime, where the Major was last seen heavily wounded in an area that was bombed immediately afterwards, and his dogtags were found nearby. The fact that his body was never found causes Violet to insist that he's not really dead, but it's implied she's just in denial and he never shows up again. However, it is played straight in the Light Novel, where he did in fact survive.
* Violet Evergarden. Despite being a warmongering asshole murdering his own countrymen because he thinks they're "weak" for choosing peace, he gives up and walks away without the slightest sign of embarrassment.
* Violet Evergarden for the story. While not explicitly confirmed, it is heavily implied that the entirety of the original cast have long since passed away by the "present" of the movie.
* Violet Evergarden. However, he changed his mind after scriptwriter Reiko Yoshida turned in a sequel concept.
* Violet Evergarden: In Episode 11, Violet buries Aidan and uses his rifle as a grave marker.
* Violet Evergarden, she has trouble in her early attempts at writing letters because she often interprets a client's words in the most straightforward way possible, so that even something that should be sentimental and familiar ends up sounding like a formal report.
* Violet Evergarden to take advantage of her superhuman combat abilities; and by the time she was fourteen she was desensitized to violence, almost-completely emotionless, and saw herself as a living weapon — with the bulk of the series

being about her breaking free of that conditioning after the war's end.
* Violet Evergarden, Violet's classmate Luculia explains why her brother is constantly drinking and getting into fights. He, like many other young men, were deployed in the war, but his unit did not see much action. Their parents who were traders happened to get caught up in the conflict and were killed. Her brother is riddled with guilt for surviving the war when their parents did not.
* Violet Evergarden was one of these. She was too young to be a soldier in the Leidenshaftlich army so she was officially a Human Weapon owned by Major Bougainvillea. The story covered in the anime is about her growing out of this.
* Violet Eyes, they have what's called TrueFalse, administered through a patch on your skin. While it doesn't force you to tell the truth, it does force you to talk, and will make you sweat if you tell a lie. While it can be used in court, a person can refuse to have it used on them.
* Violet, flashbacks occur regularly. Some characters (e.g., Young Violet, Father) appear only in flashbacks.
* Violet from her family's farm in Spruce Pine, North Carolina, to the televangelist's headquarters in Tulsa, Oklahoma.
* Violet Kincaid, Roman's mentor, is a shamelessly cruel woman. She's a subtler example than Roman, but it's clear that she is proud of her villainy and never even tries to paint herself as victim or a good guy.
* Violet, since her scars are left to the audience's imagination, rather than being depicted through makeup or prosthetics.
* Violet sleepers are Awakened Venus flytraps native to the Amazon rainforest, and resemble their regular kin in most respects except for being large enough to eat humans.
* Violetta is, as introduced, a Smoke Knight and Tarvek's tightly-wound cousin, but
* Violetta shoots her with a dart containing more Movit #11, reasoning that now she only needs to wait until Zola combusts; Zola manages to avoid dying by keeping constantly in motion to burn the extra energy off.
* Violet tells Danny how she has a brother named Dash, though he's actually more mature than Danny's bully.
* Violette Morris, a French athlete and later Nazi collaborator, was an avid competitor during the 1910s to late 1920s. Among her many, many sporting accomplishments were being selected for the French national water polo team (there was no women's team at that time) and winning the national heavyweight boxing championship in 1923 as the only female competitor in a field of men.
* Violet, the final puzzle is figuring out how to relieve yourself without leaving your room. You can use your wastebasket, or an empty bottle if you're male.
* Violet tries to do this to Huey when they compete for the position of Senior Woodchuck in
* Violet Zombie, a teenage girl who was resurrected as a zombie and retained her good looks.
* Violet Zombie never wears closed-toe shoes and goes barefoot at any opportunity, especially when wearing her main outfit.
* Violet Zombie: Penelope Martinez demonstrates this ability frequently, either to scare people or just for fun.
* Violight has just about every other tile of the battlefield containing an electrical field, divided into four segments, with a button on each segment to trigger a surge on the opposite corner for Electric-type damage. Electric-type Pokémon can walk through the voltage without trouble, but other types have to follow the paths.
* Violine, about a 10-year-old girl who can read people's minds by staring into their eyes, has an encounter with one of these that appears to be played partially straight and partially for dark humor. Violine escapes from her school where she was accused of being a witch and finds a random man driving by who offers her a ride. The man takes her away from the direction she told him she lived, however, and she gets suspicious. Staring into his eyes to read his mind, Violine sees an image of herself bound and gagged and looking up with pleading eyes while lying on

a pillow. Angered and scared, she attempts to escape and crash his car.
* Violine), and of the hunting and feeding habits of crocodiles at the worst possible moments.
* Violine. Bonus points for being placed inside an African dictator's palace.
* Violine falls to his apparent death in a trapdoor leading to a moat full of crocodiles, but he survives and comes back with a vengeance.
* Violine, has a mild example, where sometimes characters' eyes are shown closeup, in more detail and with red veins visible.
* Violine, in contrast to other times when people are attacked and killed by crocodiles.
* Violine, is very strict and controlling, mostly communicates through robots with Violine, and is distant to her. She goes to any length to keep Violine from her father, from having the doctor fake a broken leg and put her in braces, to having her made sick by the doctor, to having her killed if nothing else works.
* Violine, Kombo, a witch doctor, even going so far as to save bottles of whiskey from a fire (he thought a child was still inside). His alcoholism also prevents him from seeing the future in time, or at all.
* Violine, Marushka chains Muller in the basement after he loses his memory. She surrounds him with things from their past to try to give him his memory back.
* Violine, Muller and Marushka are the main villains in the plot, driving much of the backstory as well as Violine's adventures, especially Muller who actively hunts her and her father down.
* Violine: Oddly enough, the titular character. Violine spends one comic book in nothing but panties and an open shirt.
* Violine, of the day school variety, and it does not last very long before Violine causes mayhem and flees the school.
* Violine, one of the rooms of the mansion is filled with stuffed animal heads.
* Violine, one of the tribesmen remarks how their witch-doctor Kombo is unmasked as a fraud... to Kombo himself.
* Violine, one of Violine's dreams involves her in just her underwear.
* Violine, the doctor has various pills, whose functions are differentiated by colour.
* Violine, the mansion has one at the front door which washes and clothes anyone who comes in, due to its germophobic inhabitant.
* Violine, the word "fatalitas" is used as a trigger to snap someone out of hypnosis.
* Violine, this happens several times to several characters, though not with Violine's pet mouse, only with other groups of mice.
* Violine, this is how Violine is put to sleep each night. This is routine for her control-freak mother.
* Violine to save Violine. However, he is saved just before he can be killed.
* Violine, Violine can read minds when staring at people. Kombo is also able to recognize this and mistakes it for an evil eye. Her father has the same powers.
* Violine, Violine has a dream where both her legs become trapped in two bear traps, with bloody results. It reflects her legs being trapped in plaster casts when awake.
* Violine, Violine is covered in mud after escaping via the airvents and being launched into a muddy pigpen.
* Violine, Violine is regularly in need of saving, and occasionally tied up as well.
* Violine, Violine's father uses soap to slide under a quickly closing door. No hats are involved, though.
* Violine, Violine's pet mouse, Klaas, gets his tail cut by the claws of Muller.
* Violine, Violine's pet mouse, Klaas, provides one in the form of his offspring.
* Violine, Violine tells the captain of the oil tanker to "clean his tanker" when smelling his breath, after remarking on the smell of the oil tanker itself.
* Violine, when she returns to the mansion, it is treated as a haunted house, despite still being inhabited, due to Marushka controlling all the mechanisms and camera's, using them to track and fight off her father. The title of the last book

also reflects this ("Het Griezelhuis," The Haunted House).
* Violinist of Hameln bra when she's about to unload her most powerful attack on him, which forces her to stop and cover herself. Though it wasn't necessary since Vocal's power level is leagues above hers anyway.
* Violinist of Hameln, Hamel's love interest Flute is stated to resemble his mother, Pandora, as they're both kind, gentle and accepting. They interchange in Hamel's dream sequences, and his best friend Raiel outright states Flute would be good for Hamel because she's like Pandora.
* Violinist of Hameln have gone towards the animation instead went towards purchasing the rights to use the classical music pieces that Hamel and Raiel play.
* Violinist of Hameln, in an odd twist, he's dirty around young men and hits on Hamel and Clari multiple times.
* Violinist of Hameln (manga version) never built a fourth wall in the first place:
* Violinist of Hameln, misunderstood the head peeking out from Guitar's "groin" as something else entirely, to Guitar's annoyance and Flute's embarrassment. Worse, when he suggested that Guitar wear pants, the image of the enormous BULGE (caused by the deer's head) under the warrior's waist horrified Flute.
* Violinist of Hameln of one Pastel-Chalked Freeze Frame after another. Within the fandom, the show has since gained the affectionate nickname "Slideshow of Hameln".
* Violinist of Hameln personality is currently dominant depends on whether the scene is supposed to be humorous or not.
* Violinist of Hameln Queen Horn seems to be this for all of Sforzando.
* Violinist of Hameln! Since they all seem to be pretty close in age to each other, it means Flute had to be pregnant non-stop or often gave birth to twins or triplets. Her magical royal blood must have contributed a lot for her to be that healthy and youthful even after all that.
* Violinist of Hameln sports these for a while, along with a pink hat, but later graduates to a different, more mature hat with her hair hanging loose.
* Violinist of Hameln still is the driving reason for their atrocities).
* Violinist of Hameln, the petrified victims return to normal as soon as she's defeated, leading the panicked Hamel and Flute to reassemble Raiel before he returns to normal.
* Violinist of Hameln. To make this even more ridiculous, he participates in massive melee battles with it down.
* Violinist of Hameln with Clari Net. Clari has yet to demonstrate any real prowess—only talk—when Trom and Flute come across a mirror that shows the past, and a scene with a pathetic-looking crying boy. The end of the flashback reveals the boy to be Clari. Cue adult Clari taking out an army of dragons. Singlehandedly.
* Vio Toxica, who do this. Every monster has a grab attack where they attempt to eat you, and that's the only way they can kill you; any other attacks will leave you with one hitpoint. However, at one HP the grab is guaranteed death.
* VI P2x 16 Hard Vals Night who she winds up having to protect from jewel theives and arms dealers while they hide out at VIP headquarters. She also helps them rehearse for an upcoming concert.
* Viper (but mostly villain). The two were briefly in an arranged marriage, but really did love each other. Viper still laments that things didn't work out. The Red Skull was briefly involved with the Viper, attracted to her nihilism as well.
* Vipergout lets its casters do this to themselves on purpose as a weapon, for those problems that can be solved by projectile-vomiting snakes at them.
* Viperia has several puddles of poisonous goo scattered around the battlefield, inflicting Poison status on any non-Poison-type Pokémon that have the misfortune to stand in them.
* Viper: In Season 2-4 the intro still mentions that the story takes place in the 21st century. But there are no futuristic concept cars like in Season 1 anymore. Even actor Jeff Kaake mentioned in an interview that the future setting was dropped for Season 3.
* Viper likewise uses this as the word-for-word explanation when Jackie wonders how Kuro's mask ended up buried inside a cliff face, halfway up it.

* Viper Mutagen 368 in "The Origin of Dr. Viper." Averted, then subverted. Although there exists only one sample of the mutagen, Dr. Zyme does have notes on how to make more. This allows for more to be made in the event that something happens to the sample - which it does when Zyme's thieving assistant Purvis steals it and spills it on himself. However,
* Viper Phase 1 port of the first game getting the former's soundtrack as an unlockable.
* Viper Phase 1: The "New Version," also exported as the "U.S.A." version, increased the speed of bombs and changed Wide Shot, Laser, Missile and Napalm from powerful special weapons with limited ammunition (which made them inconvenient to use as they replaced the normal firing mode) to unlimited and upgradable alternate weapons.
* Viper Phase 1, you get a multiplier applied to your end-of-stage bonuses dependent on what percentage of enemies you killed. If you destroy every single enemy, the muliplier is x100. But if you so much as miss a single enemy, that multiplier drops to a x50. It won't matter much in a survival-oriented run, but in a score-based run, missing one enemy can make a massive difference.
* Viper's Creed has a chainsaw-rifle combo, a villain's mech in the last episode has two mounted on extra arms.
* Viper's Creed: in the last episode we see a prototype white mech with greater speed, armor and two additional arms; but its software is not optimized, so at critical moments it freezes from bugs.
* Viper's Creed: With most of the Earth's cities underwater due to the onset of global warming followed by a third world war which brought calamity and turmoil to the people, various PMCs are one of the few remaining organizations able to provide law enforcement and self-defense protection for cities that are trying to rebuild again from the war and the floods.
* Viper Snakely. Just when he was about to give up hunting and retire for the sake of his daughter (in the manga version), he finally earned a crumb of sympathy from the audience... and then proceeds to lose it entirely when we learn what his job was before he became a safari hunter; he was an SS Officer posted in an internment camp.
* Viper squadmate, at one point refers to Canadians as "the maple-flavored kind." We can only hope she's just messing with her human teammates.
* Viper, still physically a Shadowkhan, leaves in order to hunt down Blankman in the hopes that the stolen Monkey talisman can restore her humanity.
* Viper, the titular high-tech supercar had an armored body/shell comprised of hexagonal tiles. Though they were normally blended together in such a way that the seams were invisible, they manifested when the vehicle suffered damage, or transformed to or from its 'less conspicuous' street car mode.
* Viper, they move quickly and are more numerous for the same price than their other Clan peers. Unfortunately for them, while they can field the units, they usually fail to field a necessary amount of power, and must rely on achieving a win condition that isn't a straight duel to the death.
* V.I.P. is fighting a woman who's trying to get to the Vice President's therapist (so they can figure out what to use to prevent the VP from casting a tie-breaking vote on a law that would make things much harder on their organisation). The woman is knocked on the ground and starts sliding towards a cliff. Tasha yells Take My Hand and starts moving towards the woman, trying to grab her. The woman slips too fast for Tasha to catch her.
* V.I.P.: One episode had Vallery popping up out of a bubble bath with a pistol hidden somewhere on her body.
* V.I.P. She gets close to her target by disguising herself as a pizza delivery girl (with the real delivery girl supposedly disposed of offscreen).

Kevyn dealt with him by disconnecting and wiping the different nodes and convincing him to download into his current "floating maraca" body. He also infected their third ship but they grudgingly allowed him to stay because they were going to put an AI in it anyway.
* Viral. He later does this again, with an actual smoke bomb, to escape with Adiane.
* Viral Marketing, Bishop founded the resistance group Free Mutants in 2018, and by 2023, the only survivors besides himself are Warpath, Blink and Sunspot.
* Viral Marketing included a fake commercial for the Stark-Fujikawa subsidiary, which made little sense in the overall context of the film. This is because the character Rumiko Fujikawa (a Japanese businesswoman and one of Tony's love interests from the comics) was supposed to appear in the film, but was cut when the script was rewritten.
* Viral Marketing: Marketing that goes through word of mouth like wildfire.
* Viral Marketing, which overlaps with World War Two, he was a Lithuanian by birth who was orphaned by Nazis, spent part of his childhood in a Russian orphanage, was taken out of there by a family member living in France, became close to a Japanese woman, burned his bridges while actively seeking out the aforementioned Nazis, and traveled to North America; besides this, he's been depicted as having an interest in Italy as an adult, and in the series, he had actually lived there.
* Viral's Gunmen, Enki goes through a forced downgrade. He loses his helmet to Kamina, which had a focusing lens for an energy beam weapon, losing it in the process. He remodels Enki into Enkidu, basically the same mech with an axe blade crest replacing the head. Then, he realizes the weapon's not good enough, has it removed, and replaces it with a second set of swords and arms, turning Enkidu into Enkidudu. Unfortunately, the mechs never stand up to Gurren Lagann, and after the

* Vir Cotto got a lot slimmer halfway through the series, which fit with the character developing from mostly comic relief to playing a more serious role in the show. In reality, Stephen Furst had been ordered to lose weight after becoming diabetic.
* Vir Cotto, Londo's attache, is meek and calm. At one point, a Drazi (a Proud Warrior Race Guy) put a bug in his grocery and humiliated him when called out, so Vir went to Londo's apartment, borrowed one of his swords, hacked to pieces the Drazi's stand, and
* Vir Cotto working in secret to protect Narn refugees during the Centauri occupation, along with his general spoken distaste for the decadence, power games, and atrocities associated with the Centauri Republic at the time, and the influence of the Shadows (and concern for Londo for getting caught up in all this).
* Vires are stronger enemies resembling humanoid bats, and split into multiple

Keese when killed.
* Virgil, Aeneas and indeed many other heroic characters break down and cry on several occasions. This is further expanded upon in the notes, where it says that it was not prohibited for a Roman man to cry under extreme duress.
* Virgil and Ovid both portray the Greek heroes at Troy mostly in terms of their post-victory atrocities.
* Virgil and provided about as much protection as a broken condom. He's also not very popular with fans, with there even being photos of him alone at wrestling conventions.
* Virgil and Wyatt Earp, Deputy Marshals for the Arizona Territory (Virgil first, Wyatt after his brother's death.) Virgil was also the town marshal for Tombstone.
* Virgil) are made to put their hand within the mouth and declare they've been faithful to their husbands. If they tell the truth, all is well. If they lie, their fingers get bitten off. Most women of the city bear this mark of shame. There's no stories of anyone just admitting to cheating to at least keep their fingers, but there is a story of one woman who outsmarted Virgil. She instructed her lover to attend the proceedings and feign sudden madness. He was to run around and grab her and not let ago until the crowd would free her. He did and she placed her hand in the statue's mouth afterwards, declaring that she'd not been in the embrace of anyone but her husband and of course that guy everyone witnessed just now. The statue let her keep her fingers.
* Virgil implies at the end of the episode that after both parents are informed offscreen about the truth, Thomas' father realizes that now is not a good time to be pushing his son so hard when he has anger-induced powers, and that he is helping him get treatment for them.
* Virgil, setting out how Trojan refugees founded the greatest city in the world. Or, rather, founded the tribe that would later give birth to the founders.

* Virgin in a White Dress: A white dress that symbolizes the wearer's virginity.
* Virgin in a White Dress: If the bride is a virgin, she will wear a white wedding dress.
* Virgin in a White Dress. In addition, remarried brides are still allowed to wear white if they choose to. Another reason of why this is discredited is the fact that white lost its connotations of purity and became simply the color associated with new beginnings, including but not limited to marriages, that's why most wedding decorations are either white or in any other very light color such as cream. (Gold/white and silver/white are extremely popular)
* Virgin in a White Dress to exemplified her child-like mentality and vulnerability. After she got her power restored, thus became more actively evil, she dressed in much darker colors like red and black.

* ...Virgin Love, Chiharu's knowledge of Kaoru's sex life starts to make Daigo think there might have been something between them and Chiharu decides to fan the flames. Kaoru later reveals to Daigo that Chiharu is his cousin and he's just being had.
* ...Virgin Love. Daigo gets kissed by some random girl at a club and Kaoru slaps him, which Daigo reads as Kaoru having feelings for him. Kaoru freaks out when he realizes this might be true.
* ...Virgin Love, Daigo's mother is Japanese and his father is American. Though his father's ethnicity is never specified, both he and Daigo are ambiguously brown.
* ...Virgin Love. Kaoru also qualifies as a mankiller (maneater?) in love when he finally comes around.
* ...Virgin Love, Kaoru and Daigo have what is supposed to be an anonymous one-night stand, but then meet again at work. Kaoru doesn't want a relationship but thinks the sex is too good to give up so he and Daigo become sex friends instead. Daigo quickly falls for Kaoru.
* ...Virgin Love, Kaoru's biggest flaw is his pride, which is his defense mechanism

to combat his insecurity and jealousy and makes him completely emotionally isolated.
* ...Virgin Love. The reason he shuns romantic relationships is his fear of becoming like his man-crazy mother. His prediction does come true, but Daigo is willing to accept the madly jealous side of him and convinces him to give their relationship a chance.
* ...Virgin Love to lovers after Kaoru overcomes his commitment issues.

* Virgin-Shaming: Expect virgin men to be made fun of and considered weak.
* Virgin-Shaming: It's believed that a man isn't a real man if he hasn't lost his virginity yet.
* Virgin-Shaming: Since men are expected to be virile, virgin men tend to be seen as weak and targets for abuse. However, in some circumstances women can be subjected to this as well.
* Virgin-Shaming: You, a man, never banged any women? What a pathetic loser you really are!
* Virgin story, where it's revealed the Seventh Doctor triggered his previous incarnation's regeneration as he felt the time had come for him to appear, as he was more ruthless and thought himself better suited to fight the evil of the Universe.
* Virgin Tension: Tension caused by a threat to someone's valued virginity.
* Virgin Tension: Virginity is highly desirable in a woman for it heightens the "purity" of women's body.
* Virgin Territory: At the end of the film, Dimitri comes to marry Pampinea, driving a wedge between her and Lorenzo - until they discover that Dimitri mistook her for Elissa, with whom he had sex and now loves. Even after that gets cleared up, however, Lorenzo is reluctant to marry Pampinea, as he's still pining for the mysterious "nun" who kissed him. Then this turns out to be Pampinea, so everyone ends up with the one they love.
* Virgin Territory: Dimitri insists on listing his long name, title, his father's title, that he's his father's first son etc. every time he meets someone.
* Virgin Territory. Later another there's another undressing as well for sex with him beside her friend and shows her right breast doing so (they're equally attractive).

Not only are these games taking place within the same universe, but most characters find it perfectly natural for everyone to just randomly go to and fro between series as either cameo shots, secondary characters, or main characters, and often reference these fourth wall breaking aspects regularly. * Virtue's Last Reward apparently has a collection of "grandpa videos" although they don't have any plot relevance.
* Virtue's Last Reward begins with a newscaster discussing the horrible extent to which the Radical-6 virus has spread before succumbing to it and killing herself.
* Virtue's Last Reward can send their consciousness across multiple realities, where certain major events have happened differently (their physical representation

still lives through and experiences these events, but their mind can go just about anywhere in the course of the AB Game). After jumping to a new reality, they can occasionally retain some knowledge of what they've learned without knowing how they know it, to push the plot of that reality forward. By the end of the game, they're fully aware of this, and use it to their advantage multiple times.
* Virtue's Last Reward due to the way the Nonary Game is set up. If someone opens the "9" door before everyone else can get 9 points, then no one else will be able to escape. Furthermore, if someone is betrayed and drops to 0 points, they die. And finally, it's fairly certain that one of the participants in the game is Zero, the mastermind behind the whole thing.
* Virtue's Last Reward. Even the people who worked on the voice acting have no idea who the voice is from.

* Virtue's Last Reward, images of lion heads eating a sun are all over the place, and written on one of the warehouse walls is "Memento Mori if the nineth lion ate the sun."
* Virtue's Last Reward, in order to unlock the door in an escape section, you need to get a key from within a safe, by unlocking said safe with a password. All your passwords you find are stored in the file screen, and after you've completed an escape section, you can replay it by selecting it on the flow chart. If you replay one of them, you'll be able to automatically open the safe by entering the password, thus bypassing the puzzles. If you do so, then there'll be unique conversations when you go to leave the room, particularly if there is something within the room and it's puzzles relating to the plot. The same thing obviously happens if you happen to guess the password and input it without having found it. One particular example is in the lounge, where doing this will result in Phi stopping you from going through the door, and shouting a quick lecture on lunar eclipses at you, much to the confusion of protagonist Sigma.
* Virtue's Last Reward is an android given direct orders to comply with the mastermind's plan and must not break them under any circumstances. Watching the death of the same mastermind put a heavy toll on her as she believed she could have saved them. After helplessly watching people die, she decided to break protocol and rescue the one person she could save. This causes the master AI to sentence her to death by deletion.
* Virtue's Last Reward is basically a complete pervert. He doesn't exactly try to hide it either - he gets explicitly turned on by Clover pulling on a lever due to comparing it to a certain sexual act; in one ending when he's stuck in the facility, he laments that it's not so bad because he's the only fertile man among 4 young women; and asks Clover, Luna, and Phi for "swimsuit action" as a reward. Except he does genuinely care about them all, and obviously values them as people. Especially Luna, whom it's made clear that he has a strong bond of trust with. His attraction to Luna also seems to go beyond just perversion, since it's mentioned a number of times that his favorite things about Luna are her warm smile and cheery voice.
* Virtue's Last Reward is preventing the virus outbreak in the first place.
* Virtue's Last Reward it, which prompts Alice to smack him in the head.
* Virtue's Last Reward, Quark is the only person you will never explicitly see dead. Everyone else is fair game.
* Virtue's Last Reward says there's no way on Earth she would seduce Sigma into betraying Tenmyouji so she could escape the facility with 9 BP. What's the first thing she does half a minute later, when she's alone with Sigma in the AB room? Seduce Sigma. Or trying at least, if you ignore her and choose "ally" anyway.
* Virtue's Last Reward, she asks Sigma to do something random. This is presented to the player as a list of actions (wave, clap, cheer, tap dance, moonwalk) that ultimately continue the conversation in the same way, with one of them letting Sigma blow a kiss at her; he notices that she actively dodges every one of them as if they were fired out of a gun.

* Virtue's Last Reward, Sigma and Alice wish they could forget the sight of a grown man in armour (K) riding a big cute bunny like a little kid.
* Virtue's Last Reward, Sigma states to the player a number of times that walking into a room and finding a dead body never has any less of an impact or ever becomes any easier to cope with, despite how often it happens.
* Virtue's Last Reward takes place. As you can probably guess from that description, this was not taken well.
* Virtue's Last Reward, the protagonist Sigma and 8 other strangers are abducted by someone named Zero and are forced to play the Nonary Game. Sigma, a 22-year-old college student, later finds out that he's actually 67 years old, an esper, has lost his eye, had his arms replaced by cybernetic ones, and is Zero. Needless to say, this is quite the shock to him.
* Virtue's Last Reward The remaining two characters' fates are left ambiguous; Quark is presumably left trapped in the Cryo chamber, whereas K appears to have picked up the deadly virus Radical-6.
* Virtue's Last Reward. The subject about Left's death is dropped in this game, and it calls into question the real designs of Free the Soul.
* Virtue's Last Reward, though in this case, it's more tragic than horrific.
* Virtue's Last Reward, we can't see their face, or who the person in the suit is at all. Players and the character can only tell who's who thanks to the communication line between the suits. There's one scene in which one character is about to smash another over the head with a rock, both of whom are in space suits, and Sigma specifics that he can't tell who's who because of the suits.
* Virtue's Last Reward, you'll find a diary in one of the safes. Phi translates it to reveal it's what has happened in the wake of Radical 6: bodies are just piled up to the point flies are blocking out the sun while cats are getting fat off the rats that come to nibble on those iles.
* virtues of money over God and love, since this is what she has been able to rely on in her life. She initially has great difficulty dealing with Rock's idealism, threatening to kill him if he ever moralizes to her again. Revy herself elaborates that "nothing's worse than being treated like some whore by your companions", but in later chapters, it is suggested by one character that she attacks idealists because their ideology contradicts her assertion that the world is a terrible place.

When Sid ends up getting himself released into the real world, Washington has to be let out of prison to stop him before Sid kills lots more people than his initial bloodbath takes out.
* Virtuosity is a virtual program who eventually gets downloaded into a self-regenerating android body. He's assembled out of the minds of dozens of psychopaths, murderers, and dictators, including the dead terrorist Matthew Grimes, the protagonist Barnes's previous nemesis. Grimes is repeatedly brought to the surface when Sid comes face to face with Barnes and influences Sid's desire to gain world notoriety.

* Virus environmentalist. There's the spirit of a true nature guardian killed by them that helps heroes.
* viruses and bacteria brought over from the Old World ran rampant across the New, with the result that the total indigenous population dropped to only about 9 million by the seventeenth century. North America was particularly hard-hit, with mortality rates reaching 90% in some areas, leaving whole regions that had once been home to large agricultural villages and small city-states to return to wilderness. The change was so drastic it even had an effect on world climate patterns- it's now believed that the Little Ice Age was caused by a sudden expansion of North American forests greater than the area of modern France that occurred as a result of the continent's sudden crash in population. This history did not until recently get much discussed in the history books.

* Viscount Hundro Moritani in the prequels. As much, if not more, of a bastard than Baron Vladimir Harkonnen (see below). Most of his subjects take after him. His ambassador shoots a rival at a state dinner. He orders the bombing of civilian targets despite the declaration of Kanli, a war limited to military targets. He has his rival's son and daughter kidnapped and publicly executed. When another House condemns these actions, he orders the assault on their planet to steal their most holy relic. An ally of the viscount's assassinated the rival's second daughter at her wedding to Duke Leto Atreides (the ally was himself a Duke, by the way). He gets what's coming to him, though.
* Vise-Grips, or Mole grips in the UK: Two brand names that have since come to refer to any adjustable locking pliers.
* Visenya Targaryen is about the same height as the average man, but still shorter than her imposing brother and she's described as a harsh, buxom beauty.
* Viserion, after getting killed by the Night King, was personally resurrected by him, as a Dragon Wight (or maybe a White Walker dragon?). This also made him strong as well. How? Put it this way: He breached the 8000 year old Wall single-handedly,

without any wear or tear.
* Viserys, although much like Gregor Clegane, this one is more or less canon as well. In Dany's very first chapter, he is noted as being incredibly invasive of his sister's personal space. In the tv series, when she is about to be bathed, Viserys "examines" her and caresses her nipples. Dany's facial expressions make it seem like this is a common occurrence for her. The fifth book revealed that
* Viserys claims that Tywin Lannister's tenure as Hand of the King brought out the worst in his father. While this ignores Aerys' (many) flaws, Tywin doesn't exactly come across as a loyal and selfless advisor. Tywin's own daughter views him as a man who finds delight running the realm in the king's stead but chafes at being an assistant for someone else's agenda.
* Viserys: First, there's all his mood swings, which range from intense calmness to manic twitchiness. There's also his uncontrollable rages, bouts of depression, and extreme self-delusion. His sister Daenerys says that the worst of it only started after they were forced to sell their deceased mother's crown to survive, but considering he's the son of "Mad King" Aerys Targaryen and there's an in-universe saying that the Gods flip a coin when a Targaryen is born as to whether they'll be destined for "insanity or greatness", this makes sense, and centuries of incest probably haven't helped.
* Viserys has browbeaten Daenerys emotionally and physically all her life.
* Viserys, strives to be this. Even if he can do little but stand behind a battle line and be seen, or preside over diplomatic meetings being actually carried out by his underlings, he'll do it proudly.
* Viserys Targaryen dies after getting molten gold dumped on his head by Khal Drogo, after whimpering and begging for his life.
* Viserys Targaryen is dressed all in black, with a red dragon in the center of his outfit. Admittedly, according to the books, that is how Targaryens often dressed.
* Viserys Targaryen is one for Robert Baratheon: Viserys sees himself as the
* Viserys Targaryen is one who has lost his house's fortune and prestige. Despite that, he still acts like one, treating everyone else like crap. This doesn't go well for him when he is with the Dothraki.
* Viserys Targaryen is this towards his younger sister Daenerys. For 14 years he did the best he could before bitterness, paranoia, and possibly genetic madness turned him into what he was. Dany thought well enough of him to name one of her dragons, albeit the smallest one, after him after all.
* Viserys Targaryen spends most of the first season complaining about how Khal Drogo promised to make him king of the Seven Kingdoms again. After Viserys finally confronts Drogo in a violent way, Drogo
* Viserys Targaryen to Robert Baratheon. When Robert hears that Daenerys is pregnant, he goes berserk and calls for her assassination, but when giving the order he throws out "and that fool Viserys", almost as an afterthought. Viserys however saw Robert ("the Usurper") as his

* Visibility from inside the tank was usually horrible, especially during World War II. Tank commanders (and sometimes drivers) usually preferred to operate "unbuttoned" to get a better view of the battlefield, even when fighting the tank and under enemy fire. The only time when the hatch was always shut was under enemy artillery fire; otherwise it depended on the whims of the TC, but accurate sniper fire or a machine gun usually qualified as reasons to close up. This made the commander more vulnerable and risked a grenade, but overall made the tank much less vulnerable on balance; you can't protect yourself against things you can't see. Modern tanks, with commander's cupolas as standard and much better optics, rarely even get near combat unbuttoned unless the TC wants to use his external machine gun.

* visible, and Vahla are tall and slender (all traits that can appear in baseline humans).
* visible. Beyond the visible universe is just too far to see, limited by the speed of light. Confusingly, despite the universe being ~13 billion(?) years old the observable universe has a radius closer to ~45 billion light-years and the radius of the actual universe is even bigger. Something to do with how the expansion of space-time isn't limited by the speed of light. It's a consequence of Hubble's Law, that the further two bodies in the expanding universe are from each other the faster they are moving away from each other (or, more precisely, the faster the amount space in between them is expanding). The horizon of the observable universe is the distance at which that point in space is moving away from us faster than the speed of light so that no light originating beyond that point can ever reach us.
* visible breasts, specifically for Sanae. The fact it's a frontal view probably helps. And indeed, when other people do the artwork (for example, the fighting games), the sudden breasts on some of the characters can be jarring. Just look at Sakuya in EoSD, PCB, IN or PoFV. Then look at her IaMP/SWR art. you'll see why a meme arose from it.

* Visigoths vs. Mall Goths in 1990s Los Angeles and making it their new home. While the Visigoths have adapted enough to learn English and open up shops in The Mall, they still retain most of their proto-Germanic identity, including their style and religion.
* Visigoths vs. Mall Goths (Proudly uses the tagline "there are a lot of bisexuals." Most of the pre-made NPCs are labeled as LGBTQ+ by the rulebook's demographic categorizations)
* Visigoths vs. Mall Goths with most of the NPCs being LGBT in some respect, and the system amounts to a queer reclaiming of 1990s media.
* Vision A huge part of the reason everyone hates Thanos so much is because of Vision's death because it's very hard to not love the guy.
* Vision and Sam see a growing forcefield coming from the Gah Lak Tus module. They escape from there.
* Visionaries, also falls into this category. The opening scenes of the first

episode show how all machines on the planet failed when its Three Suns aligned, though the precise reason this happened is never made clear. Within a few years, the once technologically advanced Prysmosians were living in a medieval-style society, though remnants of the Age of Technology can still be seen.
* Visionaries and finds themselves racing back to the legitimate owner of the book so he can reverse it, restoring things back to normal.
* Visionaries, Darkstorm is unable to swim. So, when he and Mortdredd fall into the moat around his castle, his immediate response is to start thrashing around and shouting for help, only for Mortdredd to tell him that the part of the moat they fell into is shallow and he can stand up in it. Darkstorm, looking very foolish, immediately does so, much to the amusement of the Spectral Knights, five of whom witness the incident.
* Visionaries episode "Feryl Steps Out" revolves around Feryl leaving the Spectral Knights because he thinks he's "too much of a liability". However, when Leoric is later captured by the Darkling Lords, it is Feryl who saves the day, leading to his return to the team.
* Visionaries episode "Horn of Unicorn, Claw of Dragon", a Magical Plague strikes Prysmos, affecting all but one of the Spectral Knights and up to five of the Darkling Lords. In this case, the precise cause of the Plague is unspecified, though Merklynn does say that he foresaw it coming and tried (unsuccessfully) to send the Darkling Lords on a quest for the ingredients (the unicorn's horn and dragon's claw referred to in the title) needed for a healing spell.
* Visionaries episode "The Overthrow of Merklynn". Mortdredd attempts to retrieve a spellbook which is guarded by a short-tempered dragon, only to emerge moments later with his backside on fire, having been "unable to reach the book". Reekon manages to distract the dragon long enough to retrieve the book, but still gets flamed on his way out.
* Visionaries featured as a plot point, in which it compares leylines to rivers through which magic (water in the metaphor) "flows" across the world. Damaging one is implied to threaten the balance of magic everywhere on the planet.
* Visionaries from their chest. The action figures had 1980s hologram stickers on their chests where you could sort of make out the animal if you already knew what it was.
* Visionaries had Ectar assuring the local residential committee that the soldiers of New Valoric are a well disciplined and non-rowdy bunch. Cue Witterquick crashing into the room and landing onto the meeting table.
* Visionaries has Cravex's Spider of Fear which, when summoned, bites its victim and causes him or her to suffer terrifying hallucinations.
* Visionaries Knights Of The Magical Light Darkstorm plays with on an oversized board with actual humans. When "captured", the person is dunked by trapdoor into the moat. (This becomes an escape route later on.)
* Visionaries: Knights of the Magical Light episode "Lion Hunt" contains a variation of this trope, where the hero is the one who needs saving. In this episode, the Darkling Lords use a magical potion to trap Leoric in his Totem form. If the spell is not reversed by the setting of Prysmos's Three Suns, Leoric will never be able to revert to human form again. Needless to say, Witterquick, having gone to get the antidote, returns just as the third Sun is about to set, freeing Leoric with moments to spare.
* Visionaries: Knights of the Magical Light, which starts with the end of the Age of Science and the start of the Age of Magic. How this happened or why this happened when the planet's three suns aligned went on unexplained due to the cancellation of the series at only one season, although it's implied that this is a cyclical event, with magic & science having sequential ages of dominance.
* Visionaries Leoric's reaction to learning the ability of his magical staff (make incredibly cryptic comments that eventually turn out to be significant to their situation) in comparison with the abilities the bad guys get, such as summoning a giant monster to do his bidding. After seeing a particularly impressive display one of his companions, Ectar, even comments that the wizard gave him a bad staff.
* Visionaries suns and their alignment is what triggers a new Age of Magic.

* Visionaries The alignment of Prysmos's triple suns acts as a catalyst for the Age of Magic/Science. They are often seen throughout in the background of the series.
* Visionaries to represent its magical powers. Unfortunately, the holograms wound up dooming the line — they were expensive to make and easily damaged, and the toys didn't sell well enough to compensate for this.
* Visionaries which they hope will help them to counter Darkstorm's power. The Darkling Lords destroy the Eternal Spring to make sure Leoric stays old and feeble, but, towards the end of the episode, Feryl forces Darkstorm to restore Leoric to normal.
* Visionary architect Frank Lloyd Wright's mistress Mamah Borthwick, her two children, and four workers were murdered at Taliesin, the home Wright built for her, by a mentally unstable servant. He set fire to the home and killed the people who emerged from the flames with an axe. He never gave a motive for the murder spree.
* Visionary, probably because in practice there is only so much difference between being locked up in a jail cell for life for multiple murders, and being locked in an insane asylum for life for the same.
* Visionary spends a while taken over by an evil parallel universe version of herself. Argent Adept gets rid of it, but himself becomes corrupted by the cursed instrument he uses to do so.
* Visionary, this happens to Shiori when she first falls out of the skydiving plane.
* Visionary Villain: They have some very grand evil schemes to change the way the world works.
* Vision becomes badly damaged at the end of "Ultron Unlimited." In the next episode, "Yellowjacket," he appears alive and well. However, the episode after that, "Emperor Stark," begins with Vision undergoing the process of becoming repaired. You can't assume this episode takes place before "Yellowjacket", since it has him in it.
* Vision by Proxy is about a round pink alien with one big eye, a bow on her head and, for some reason, a belt. Taking it up a level, the alien from the first game appears in the opening cut scene and has grown a moustache.
* Vision Divine deals with a history about a scientist who discovered the key to eternal life and the consecquences of achieving immortality.
* Vision Divine had two singers, three keyboard players, two bassists and five drummers. The only constant members on the lineup are Olaf and Federico, the guitar players.
* Vision Divine. Their original singer, Fabio Lione, left the band to concentrate on his solo career and on Rhapsody. Then, they've hired the unknown (to the metal world) singer Michele Luppi. The three recordings on his stance are still today regarded as the best the band made in their career, even after Lione's return.
* Vision of Escaflowne Abridged and saves her in a similar fashion, she drops this gem:
* Vision of Escaflowne Abridged because his father hooked up with her grandmother years ago (thanks to magical time travel), her reaction is this. His reaction?
* Vision of Escaflowne Abridged being "an evil expansionist empire," who use kidnapped children as guinea pigs, and in this version address their Emperor as "Mein Furer."
* Vision of Escaflowne Abridged, brings us this gem when told the night before a battle, regarding a girl he's carried a torch for all series...
* Vision of Escaflowne Abridged despite going through the same trauma as in canon.
* Vision of Escaflowne Abridged: Duke Freid when his men are outnumbered on the battlefield.
* Vision of Escaflowne Abridged: Lampshaded when Hitomi's pager receives a call from home even though she's in a planet in another magical dimension.
* Vision of Escaflowne Abridged spoofs this with them both knowing what the other is talking about right away, and then playing with this in other forms.
* Vision of Escaflowne Abridged, to the point where one of them forgets what he's doing and desperately tries to defect when someone DOESN'T bitchslap him. But so

* Vision of Escaflowne Abridged, we have the missed fight with the dragon.
* Vision of Escaflowne Abridged when he tells his story to his son. Subverted when it doesn't.
* Vision of Escaflowne Abridged When Hitomi tells Van she can't stay forever since she has a family, friends, and life back on earth...
* Vision of Escaflowne Abridged. Yukari's projecting just a wee bit too much...
* Vision of Escaflowne Dilandua and his henchmen are clearly Bushwackers and Snipers, using stealth technology and advanced ranged weaponry to try to overwhelm the heroes rather than going toe to toe with them. Given the themes of honour and chivalry in the show, this contrast is more than a little thematically appropriate.
* Vision of Escaflowne for getting in the way of his gawking dumbly at her).
* Vision of Escaflowne had Folken telekinetically breaking Dilandau's fingers.
* Vision of Escaflowne is guilty of this, mostly due to focusing ONLY on its story and characters. It's carefully plotted and compressed, the content in the episodes always leads up to something, and there's absolutely NO filler in it (this would have been rectified had the producers had the necessary budget and amount of episodes they wanted), not that this prevented fans from loving it to death.
* Vision of Escaflowne, the relative flow of time between Gaia and Earth seemingly follows no logic whatsoever. At first, time seems to move at roughly the same speed in both worlds, and traveler Hitomi is even able to receive a page on Gaia at the exact same time it was sent on Earth. Then, time seems to be moving faster on Earth when it's revealed that Hitomi's grandmother traveled there as a girl at least thirty years ago Earth time, but only enough time had passed on Gaia for Allen to age from a youth to a young man (perhaps ten years max). Then, when Hitomi returns to Earth, she is transported to a point before she even left, which is about where you stop worrying about it.

* Visseria has Alchione, who until pointed out by a child, was unapparent to the reader as being female for the first couple of pages that she appeared. This was caused in large part by her armor, but also by her abnormal height and musculature.
* Visseria is shown preparing his magic-payloaded arrows by writing scrolls in his

* Visseria pulls off a nice one when convincing a guard to follow him along.
* Visseria, who kills violent criminals even while lucid. His superior acrobatics don't help much when she simply tears through every obstacle.
* Visser, it is suggested our development is at least partially due to the fact that our dialectic, hemispheric brains allow us to second-guess ourselves, making for carefully thought-out decisions, which are ultimately more useful than rushed decisions.
* Visser One concludes that humans as a race are this. Self-doubt and second guessing are alien concepts to Yeerks until they meet humans and their best translation is that it is like living with your own worst traitor in your head. She also sees the advantage of this, as unlike an external traitor, the internal human one still has the survival of the human as a major interest, so the decisions humans make are wiser because the considered the possibility that they could lose. As a whole, Yeerks find humans to be very frustrating to infest, as humans tend to fight them, if only a near constant barrage of

* Vista due 8 having an interface that is designed more for tablets than traditional PCs and the OS changed everything around, which frustrated people that had known where everything in the OS was before Windows 8.
* Vista Hermosa, literally being run by the inmates as organized crime groups/"pranatos"/"pran" are running a criminal system out of prisons and taking advantage of overcrowding prison populations and lack of security personnel to bolster their influence. Approximately 80% of Venezuelan prisons are run by their prisoners. Some prisons even established a tax system where prisoners paid taxes to the pran each week. Failure to do so resulted in beatings or death and prisoners could even pay more to the pran for a nicer cell or a flat-screen TV.
* Vista is apparently a big fan of magical girl shows and has a little squee moment herself on meeting Taylor.

* Visual Kei in the band as a hide clone. It's been overdone to the point that anyone in Visual Kei with red or pink hair, especially paired with hide's face or eye makeup, is a clone of him regardless of sound or instrument.
* Visual Kei is a duet centered around the idea of being a male couple, though in their case it's inverted - both members are suspected to actually be heterosexual offstage.
* Visual Kei, names like Yo or Yuu or Yue or that are abbreviated to/pronounced the same, and some people's stage names. An unintentionally offensive variant can happen with the ones that are named "Die" or "Dai" - when someone told the bandman's name assumes they are being told to die.
* Visual Kei (not that they weren't already a bit odd since the very start), resulting in each album getting progressively weirder and crazier.
* Visual Kei this. There are some bands that actually aren't/that aren't self-aware enough to be considered this that still fall under the umbrella of Eroguro Kei, but most Eroguro bands are self-aware extreme satire of something (anything from mainstream society to other bands).

* Visual Novel are capable of falling pregnant, and this ability heavily features into the plot of the novel.
* Visual Novel. As per the trope, the protagonist's intentions are completely innocent, but the other characters don't have any real way of knowing that.
* Visual Novel assume the player got the best possible endings in the first and second games, which makes sense, considering the bad endings generally involve the main characters being killed or enslaved.
* Visual Novel: a zombie who's magically compelled to stay close to her, a very French vampire, and a friendly ghost.
* Visual Novel choices by design) that influence the way the game plays out and the narrative ends. Often what will let a character survive or place the narrative on a specific character route can be as simple as the MC picking the color blue instead of red.
* Visual Novel defeat by another Master, as well as a number of ways to lose by making a wrong dialog choice. (DEAD END, indeed.)
* Visual Novel demographic romance. Many new fans gushed about how they expected a harem story with forgettable characters, and how surprised they were to enjoy its realistic drama.
* Visual Novel doesn't feature any actual space whales, but its aquatic theme park does have a "Cosmic Whale Room," with a lifelike animatronic whale suspended in a

* Visual Novel, especially if the heroine will meet a horrible fate without the intervention of the main character. Does not apply if intervention by the main character causes her suffering circumstantially or directly.
* Visual Novel genre can be described as a kind of gamebook, since the gameplay is entirely about reading text and making choices to direct the story. There is no need to list every individual visual novel here.
* Visual Novel has Shinya Kamijyo, who has such a terrible sense of direction, that when he intends to go to school (even when accompanied by his twin sister Saya), he always ends up elsewhere (such as the sewers), but no matter where he is, whenever Saya is in any danger, he instantly knows where she is and comes rushing towards her exact location within seconds.
* Visual Novel has this as the major plot. You are disappearing from everyone's mind and vanishing from the Earth. The only thing that can bring you back is if you've made a connection with a girl enough for her to remember you.
* Visual Novel, he's unquestionably loyal to his master, Selma Fortenmayer (Which may have something to do with her role as the potential savior of the world). Interestingly enough, he's the protagonist of the game, not a side-character.
* Visual Novel, however the player must "play" his/her cards VERY well for that to happen.
* Visual Novel is about half the height of the other princesses and carries no weapon. Don't think that makes her weak.
* Visual Novel, is genuinely sorry for the consequences, and apologizes to Hanako as soon as she can talk to her.
* Visual Novel. Justified because if he isn't dogged enough to get the girl, he loses his head.
* Visual Novel-ness, he's been occasionally driven to spontaneously express his love for her in rather extreme (though not sexual) ways that have caused her friend to impose an informal restraining order on him.
* Visual Novel. Notable translation projects related to this drama include:
* Visual Novel novels in which the crossdressing male characters are able to become pregnant, a fact that is central to the plots of several of their works.
* Visual Novels, add a few new characters and some routes fans had been begging for for years tacked on to the original.
* Visual Novel. Saito and Hijikata's routes in particular are full to the brim with it, both on their own parts and on the parts of Kondou and the subordinates they've inspired to follow them; they are dedicated swordsmen with deeply-held beliefs about what it means to be a warrior, in an age in which swords are quickly becoming obsolete in favor of guns and Western tactics. Their senses of honor also mean that, nearly to a man, the Shinsengumi captains insist on keeping Chizuru with them and protecting her even as they face losing battle after losing battle and everything falls apart around them; whenever it's so much as suggested that it would be better for Chizuru to leave rather than have them risk death to defend her, they bridle at the suggestion that they're not capable of protecting her.
* Visual Novels, especially the romance ones taking place in schools, often make the player character choose one among the several extra-class activities (like thematic clubs or sports teams) when it is clear later that he/she could have taken part of almost all of them at the same time. The official reason is "to focus more on the girl/boy the protagonist will end up dating", but could also be because of all the complexities at programming and loads of extra lines of dialogue and plot sections that should be added to take account of the role these activities would take place in the plot.
* Visual Novels were almost all porn; it took several years for non-erotic ones to find their audience.
* visual novels with the sex scenes removed coming out once the creators have "paid their dues", so to speak, are not uncommon.
* Visual Novel, Tiné Chelc sees Servant stats as rivers around the Servant, with a faster river meaning a higher stat.

* Visual Pun episode "Operation: C.L.O.W.N.", as Numbuhs Two and Five encounter an actual chicken trying to cross the road. When Numbuh Five wonders why the chicken is trying to cross the road, Numbuh Two struggles not to give the punchline, as earlier in the episode, he had been warned by a clown not to tell any jokes. Naturally, after Numbuh Five leaves, Numbuh Two gives in and blurts out, "To get to the other side!"
* Visual Pun in the first episode, made worse by how there weren't even any beans in the can to spill.
* Visual Pun of a listing and then the listing. (A football player pounces on a fish being reeled in = Fishing Tackle, A group of men display their ability to perform a death scene for a director = Die Casting.) * Vitamin C's biggest hit was not "Graduation (Friends Forever)", but "Smile".
* Vitamin String Quartet series of instrumental lullabies. Also remains relatively common in doctor's offices.
* Vitamin. The protagonist's boyfriend forces himself onto her while they're in school, and a classmate sees them.
* Vitamin water. The only chance you would know is if you heard the blurb at the start mentioning the product and the duck sampling it at the end shot.
* Vitani is not Kovu's litter mate but doesn't look much older than him.
* Vita Nuova appears out of thin air holding Dante's heart in his hand while it

burns. Dante doesn't seem to mind losing the heart and seeing Love feed it to someone because dreams are weird like that.
* Vita Nuova can truly love; all the women he fawns after after her death are just distractions from the memory of his true beloved.
* Vita Nuova is driven by the narrator's fears, passions, and weaknesses. He has only himself to blame when his lady refuses to speak to him, when he mistakes base attractions for love, and when he finds himself unable to handle the death of the most beautiful woman on Earth.
* Vita Nuova maintains that anyone who does not remember Beatrice and mourn must have a heart made of granite with no space for goodness.
* Vita Nuova of sinning if they do not comfort the poet in his weakness.
* Vita Nuova poem "Amore e ‘l cor gentil" is all about how love and an open heart can only exist together, as judged by the wise man, legislated by Nature, and executed by Lord Love. For a heart to exist, Love must at least be hibernating within it so that it is ready to act when the heart encounters beauty.
* Vita Nuova saw the most beautiful woman in the world from a distance and wrote poetry trying to capture her beauty.
* Vita Nuova's first meeting in 1274 before segueing into Dante's poetry about her written from 1283 to 1293. The poet explains that he didn't want to go much into his youth since stories about kids often sound made-up.
* Vita Nuova's longing poems for a declaration of love to an attractive woman that the poet doesn't really know that well. He's actually quite happy with the mistake, since it means no one will know who he really is in love with and he can continue with his writing without drawing suspicion.
* Vita Nuova's poetry, because he didn't feel he could do the subject justice.
* Vita Nuova. Still feeling indebted to her beauty, Dante continues to base his poetry off her even if he now hides his deep love for her.
* Vita Nuova. The narrator works the rest of his lady's life content with being spurned while capturing her beauty in verse.
* VI their borders, allowing them to do short-ranged raids into enemy territory as well as play defense.
* V Ith Legion reuses the old models for both the soldiers and the magitech units, on the basis that they're part of an organized military. Even Bozjan Southern Front and Zadnor get in on the action, while also adding new unit types (Aquilifers giving us Garlean Arcanists, for instance, and beastmasters being similar to gladiators, but using one-handed marauder axes in place of swords).
* Vitis vinifera, sort of tastes like it, a flavor known for some reason as "foxy"; the common "grape" flavor is based on the "Concord" variety originally bred in the town of the same name in Massachusetts and most commonly used for grape jelly. (Labrusca grapes can make wines, even good wines, but they taste rather strange to people who've never known anything other than typical vinifera wines; one labrusca-vinifera hybrid, Ravat Blanc, makes a wine that tastes rather like pineapple juice.)
* Vitius Crassus's wife is named Sarah, which happen to be the same as Shepard's mother.
* Vito Spatafore boasts about "how close" he got with Adriana La Cerva, Christopher's girlfriend, after it seems that she had an affair with Tony behind Christopher's back. Not only is Vito a
* Vitriolic Best Bud Elanor having an online friendship with Bentley, irritates Dorothy to no end. On the flip side, when Bentley learns they talk about him, he decides he's better off in prison.
* Vitriolic Best Bud heroes in the Marvel Universe, while his photographic reflexes make him an expert with virtually every fighting style, weapon, or skill. He regularly researches fighting techniques to mimmic, and as he's learnt from so many heroes who punch above their weight, so can he, often fighting heroes who are significantly more powerful than him but still putting up a real threat.
* Vitriolic Best Buds (although Damian's stunted social skills meant that it took a while for him to warm up to Jon).
* Vitriolic Best Buds, and nearly kills Wisdom when he realises that the other man

set Warren up so that he'd end up having to kill someone and would therefore be easier to mould into a soldier.
* Vitriolic Best Buds and Watson, who the two girls compare themselves to frequently) which would ultimately subvert this trope if proven true.
* Vitriolic Best Buds as the show went on, perhaps even moreso than her relationship with Chandler.
* Vitriolic Best Buds: Belittles and antagonizes their friend, but still cares for them. Can be one-sided or go both ways.
* Vitriolic Best Buds: Best friends who express their friendship in ways that make them look like bitter rivals.
* Vitriolic Best Buds. Bringing up someone is suffering failure in their career, however, is low.
* Vitriolic Best Buds: Friends who often argue with each other and get into fights, but still stick together regardless.
* Vitriolic Best Buds. However, Nero is in a happy relationship with Kyrie and the three of them live together at their Devil May Cry franchise office.
* Vitriolic Best Buds: Just because I'm your buddy doesn't stop me from calling you an idiot, a loser, a piece of shit, or other creative insults I can think of! But hey, that's what friends are for!
* Vitriolic Best Buds situation between Uryuu and Ichigo becomes a great source of amusement for everyone. Uryuu hates having Orihime point out just how close he and Ichigo have become.
* Vitriolic Best Buds slightly mockingly, as if he's buttering up K-9 for favours.
* Vitriolic Best Buds-style relationship with Reimu, who still is human and whose age is a double-digit number. Frankly, most youkai with human friends are like this.
* Vitriolic Best Buds that consists exclusively of them arguing. One thing that can make it hard to separate the vitriol from good-natured ribbing is that one will often acknowledge a particularly good shot from the other with a "Nice" or by noting "It's probably true, but you still shouldn't say it."
* Vitriolic Best Buds, Three is always bouncy, full of energy, and always eager to go out on a mission (even when she's deemed "too small a number" in the earlier episodes). Four on the other hand would rather spend his time tinkering things on the sofa and is overall a calm and collected Numberjack... however, he does get nervous when he's asked to go on a mission.
* Vitriolic Best Buds: Two friends who argue and bicker with each other.
* Vitriolic Best Buds: Two friends who argue and insult each other constantly, but do genuinely like each other.
* Vitriolic Best Buds (Type 1): My friend over here insults me and ridicules me. Despite this, I treat him kindly nevertheless.
* Vitriolic Best Buds (what Arle essentially describes their relationship as) is a thing.
* Vitriolic Best Buds with Lucifer, Chloe's current love interest. In fact, Dan actually ships them together.
* Vitriolic blogger John Solomon also attempted a Remix of the entire comic strip, entitled
* Vitruvian H.A.C.K.S., in which the Gorgon Horde is more than happy to oblige.
* Vitruvian H.A.C.K.S. series created by Boss Fight Studio features several skeletons warrior figures with Greek motif.
* Vitruvius is a minor offender here: Almost all of the non-licensed characters have yellow skin, with a few non-humans (e.g., the vampire) having non-human skin tones. Vitruvius owns the
* V. It's unlear if she's of another race/ethnicity or just tanned. Doesn't apply in the game proper, where either V can be of any race/ethnicity.
* Vittoria, a 1954 sci-fi juvenile by Lee Correy (G. Harry Stine). Though he describes it as an 'oblate spheroid' (e.g. a flattened sphere).
* Vittorio Malvora also uses them. Harry points out that when you've had centuries to practice and can launch them at a hundred miles per hour, you make up for the fact that thrown knives aren't particularly good weapons. Hell, even when one

misses the hit from handle causes Harry's hand to go numb.
* Viudas E Hijos Del Rock And Roll, and he is treated as "THE" greatest figure of Argentine rock ever.
* Viudas E Hijos Del Rock And Roll. She was a fan of Argentine rock in general, to the point that she became a music journalist. And one day, she discovered that Roby, the legend of Rock, was his lost father!
* VI. Until then, he either only exposed his chest or his navel, but not both at the same time.
* Viva Caligula allows you to raise the dead to fight for you, along with a flame weapon. Combining the two gets this trope.
* Viva Caligula. Combine the two: Your own personal army of flaming skeletons! The fire doesn't bother the undead, but any living enemy they touch will burst into flames, steadily draining their health until they collapse, at which point you can add another skeleton to your army.
* Viva Caligula website is built around being a crazy tyrant and killing everyone you meet in creatively horrible ways.
* Viva Knievel! and Frank Gifford play fictionalized versions of themselves.
* Viva La Bam: Here are a couple things to describe Vito, He blabbers and freaks out uncontrollably, his favorite food is veal scallopini from Antonio's, he definitely loves the ladies to an extreme, He's Phil Margera's older brother, but sadly he hates Russia.
* Viva La Bam" misadventures because he wants to "stay home and look up porn. And smut. *pause* Ew, it's a dog."
* Viva Las Pegasus": Zigzagged. Applejack and Fluttershy work with the Film-Flam brothers to expose Gladmane for manipulating his employees. Partway into the plan it is reveal that they have disguised Fluttershy as "Impossibly Rich" to trick Gladmane into confessing that he has manipulated his employees, but Gladmane sees through the plan. It turns out that this was part of the real plan all along and while Gladmane is bragging, he doesn't realize he has been tricked into confessing, which the viewer doesn't find out was part of the plan all along until after it happens.
* Viva Laughlin (who had a recurring part!), it met with critical venom, lost viewers at a precipitous rate and was dead within a week.
* Vivaldi; they were the first concertos to put so much passion into a single instrument and forever defined what concertos in the future would be like.
* Viva Maria!), set in a fictional Central American country around the time of the real-life Mexican Revolution.
* Viva Max!, the eponymous General Maximillian is driven to near insanity when the Mexican woman he has a crush on spurns him and insults his capacity as a military officer. He assumes that, naturally, the best way to impress her is to recapture the Alamo.
* Viva Max!, when General Maximillian, after somewhat successfully attempting to recapture the Alamo, draws a line and asks his men who want to give in to the local sheriff's orders to leave. Everyone stars to cross, but go back when Max's assistant—the only man in the company actually carrying ammo—points a gun at them. Max's men decide to stay of their own volition.
* vivandieres were French female independent merchants who followed Napoleon's armies in wagons to sell food, small luxuries, and wines to the troops. Some of them also did a little hustling on the side, though this was frowned on by most of the girls, who viewed themselves as legit tradesmen. During the great retreat in Russia, many of them rescued stranded and wounded troops, and even in some cases fought off marauding Cossacks. They were swashbucklers of the first order, and they need their own flick.
* VivaPinata: In "Mr. Unbustable", Fergy Fudgehog takes part in a training regimen created by Meinhardt Mousemallow, and a training montage is played where Fergy ends up becoming incredibly bulky and impervious to damage.
* Viva Piñata cartoon had a chase on really slow-moving forklifts.
* Viva Piñata cartoon is about visiting a character's old uncle at a retirement home. One of the gags used is that paint drying is actually an exciting

pastime for the residents (along with the Grass channel, which featured grass growing in real time).
* Viva Piñata doesn't technically have a sandworm, but the Whirlms can dive into the ground without making a mark and pop out again without any dirt on them, so they could easily burrow through ground like a sandworm if they wanted.
* Viva Piñata features a literal example. According to Leafos, you'll only be able to tame sour Mallowolves "when Rashberries fly". Taming a Mallowolf actually requires a piñata called a Pigxie, which is acquired by getting a Rashberry to Romance a Swanana.
* Viva Piñata has an item called the Weathergirl Wig. It's a blond wig. The description says, "It decreases the wearer's intelligence by 50%, but apparently, [blondes] do have more fun."
* Viva Piñata has a piñata get broken open, dropping the Rare logo as the piñata’s remains are eaten by several others.
* Viva Piñata has this as a mild inconvenience. It happens to Dr. Quackberry in "Party Parasite".
* Viva Piñata He then goes on to demonstrate that a Chair is not as cool as a SPACE-CHAIR! Ice cream is bested by SPACE-ICE CREAM! And his evil plot becomes an evil SPACE PLOT! Hudson concedes the point after he realizes that he is now SPACE HUDSON!
* Viva Piñata, it takes him 50 years to actually reach the volcano.
* Viva Piñata manages to invoke this with one of the wild and destructive sour pinatas. While sour it looks like a horror movie bat and makes other pinatas sick with its bite. Once you cure it (with garlic) it becomes... A rabbit-like thing with hilariously tiny wings.
* Viva Piñata references the popular Japanese cookie snack Pocky.
* Viva Piñata sim management tasks that kids, and even some adults, just couldn't handle. As such the franchise only lasted a scant two years.
* Vivarium the two protagonists try to exit a neighbourhood filled with identical houses, but no matter which way they turn (or even if they go straight) they always end up at the same particular house.
* V. Ivashchenko subverts the trope with Valle, called "Black Earl". While a necromancer, Valle can treat diseases and curses beyond the abilities of regular healers, which are quite common in Ivashchenko's works. Valle learned healing in an attempt to turn his own necromancy backwards, to reduce the extreme prejudice he was treated with.
* Viva Variety had a game show where contestants tried to identify the products being promoted in (fictitious) European commercials. Not one commercial had anything to do with what was being sold.
* Viva Variety Mrs. Laupin. They even do a romantic musical number together called "My Divorce."
* Viva Variety were originally supposed to be generically European; however, most viewers perceived Mr. and the former Mrs. Laupin to be French, and eventually it was implied that they were. Johnny Bluejeans' origins were left vague. It's also suggested at other times that they hailed from somewhere on the eastern side of the Berlin Wall, such as Mr. Laupin's comment on a crappy "Beach Blanket" film he and Agatha starred in: "To celebrate our success, we used the money from the film to buy some toilet paper and a cabbage... Good livin'." American blue jeans were also famously popular contraband in the Soviet Union.
* Viva Villa!, Pancho Villa the bandit and guerrilla fighter has a bad habit of slaughtering all his prisoners. Madero gets him to stop doing this for a while.
* Viva Zapata!: Diaz's solders, manning a fort, take little notice of the old ladies that are hauling bags of produce to market. They do not realize that the old ladies aren't hauling bags of produce, they're hauling bags of gunpowder, and they're leaving trails on the ground via holes cut in the bags. The soldiers start shooting when the old ladies get too close to the gates but it's too late, as the trails are lit, the gates are blown, and Zapata's men take the fort.
* Vivec tradition holds that he was not born in the land that would eventually become Morrowind, though does not specify where he was born. Even the year of

Nerevar's birth is unknown, though had to have been prior to 1E 369 when he first appears in the historical record.
* Viveka Codd, while not a world-class beauty, is taller than average but regarded as pretty.
* Vive Sin Drogas ads feature a decidedly less horror-based variant. In one ad, after the boy overdoses on drugs, his head does a full 360-degree spin several times before he collapses and dies.
* Vivi’s greatest trait is her nigh-unbreakable optimism and pluck even when faced with the massive threat of criminal organisation ripping her country apart from within. Her wild bravery has freaked out her guardian Igaram (who fears Vivi will become a pirate) and inspired her friends the Straw Hats to save her country.
* Vivia and Merik used to be best friends with Serrit Linday, but as they grew up, Serrit's political ambitions
* Vivi, a character who'd been introduced in the Reverse Mountain arc, traveled with the Straw Hats since Whiskey Peak, becoming fairly close with the rest of the crew. At the end of the arc, Vivi is formally invited to join the crew, and even ditches her speech in order to meet up with the Straw Hats... and say she can't come. Shortly thereafter, Nico Robin, a former enemy who'd been introduced not long after Vivi, appears on the Going Merry and invites herself into the crew.
* Vivi administers one to Nami after she moans about missing getting Crocodile's gold-plated crocodile statue in Rain Dinners.
* Vivia finds Virgil's severed head (and hands) stuffed into the refrigerator in
* Vivi also counts as a Decoy Crew member. She travels and adventures with the Straw Hats for over three story-arcs, is even given her own theme song and commercial eyecatcher, but at the end of the day it's the previous villainess Nico Robin who joins as they leave Vivi behind to rule her country. Now that's a plot twist.
* Vivian and Constance D'Aramis actually faked Constance's death so that one could appear as
* Vivian and having actual support, Vivian slowly becomes way more assertive, to the point where, if you have her out during the fight with the Shadow Sirens at the end of the game, she will actually tell Beldam off.
* Vivi and Arthur keep a stash of various things to protect them from the supernatural in their van in
* Vivian Francis Porter but is actually a Dumb Brunette in contrast to her smart blonde.
* Vivian had a sheltered upbringing, and so she's completely lacking in social graces. She's
* Vivian has a lot of nerdy interest, ranging from anime to musicals, that she's both deeply invested in and deeply embarrassed if anyone finds out about.
* Vivian Hsu voiced Aisha in the TV and HD Remaster versions; she was replaced in the TV Movies.
* Vivian Maier lived in obscurity unknown and unpublished, pursuing a photography as her hobby. Now she is considered a major street photographer of the 20th century.
* Vivian Soontodie and mocks her for wearing a catsuit. Vivian kicks her.
* Vivian Stanshall (born Victor Anthony), the Bonzo Dog Band frontman, among other things, embraced the christened name of his father (who hated it and prefered to be called Victor).
* Vivia spends the entire session of the Battle Council growing increasingly annoyed with the Councilmen seemingly out to sabotage every one of her ideas. When they imply that they'll never treat her as their equal, much less superior, she finally breaks and goes straight into
* ViVid as her personal skill. However, her defense are very weak compared to her speed.
* Vivid Conceptions of the protagonist—it kills or harms nearby bugs, and gets rid of destructible blocks.
* Vivid Conceptions. When activated, it destroys nearby enemies and fragile blocks.
* vivid daydreams of a beautiful forest filled with friendly magical creatures.

* ViVid, greeting Vivio rather enthusiastically whenever she would return home after an extended time.
* Vividly showing (or describing) something scary which directly affects the human body.
* ViVid makes her first appearance standing on a street light as she challenges Nove to a fight.
* Vividred Operation, Akane Isshiki carries a tube of mayonnaise around with her and puts it on everything. She manages to convert a few of her friends as well.
* Vividred Operation anime...where the girls are given their powers through pure science.
* Vividred Operation: An impromptu kendo match has Akane using twin swords against Wakaba.
* Vividred Operation before gradually speeding back up to a sprint once they're out of the teacher's sight.
* Vividred Operation: Despite Kenjirou's knowledge of the threat that the Alone had presented to humanity, the scientific community remained skeptical and excommunicated him.
* Vividred Operation has his consciousness transferred to a stuffed otter for most of the series.
* Vividred Operation, has this in regard to its primary antagonists The Alone. Unlike Neuroi though, Alones actually have biological parts.
* Vividred Operation is a professor who had participated in the development of the Manifestation Engine and is shown to be a talented researcher who may forget family meals while involved on his projects. Following an accident, his body literally become absent of mind as his consciousness gets transferred into a doll.
* Vividred Operation, the military tries to fight the Alone with tanks, planes, and warships, but they only cause minor damage.
* Vividred Operation, Vivid Yellow's Vivid Collider is a human portable particle accelerator / wave motion cannon capable of vaporizing the show's monster of the week pretty much instantly.
* Vividred Operation with Akane to become Vividblue, the hammer grows to about six feet long.
* ViVid, she goes toe-to-toe with Nanoha, an experienced solider wielding latest in technomagical hardware. When she gets her own series, she's struggling against juvenile civilians in martial arts tournaments. It's explained that Nanoha damaged her Linker Core when they fought but it comes across as a blatant nerf to stop Vivio from curbstomping everyone.
* ViVid) sometimes inherit his memories and martial arts knowledge. Einhart denies being an "extension of his existence" though.
* ViVid Strike!. And unlike most examples, she actually hates martial arts.
* ViVid Strike!: Einhart and Nove offer Fuka a job at the Nakajima gym and perks as free food and lodging as part of their recruitment after her initial refusal to join. They use the fact that Fuka needs the money to help support the orphanage and Fuka's recent loss of job as leverage in order for her to accept. This is a non-malicious example as Einhart sees potential in Fuka and genuinely wants to take her in as an apprentice.
* ViVid Strike! franchise, despite being the only one to not feature any characters from Earth.
* ViVid Strike! has a rose motif in her transformation sequence, complete with her magic taking the form of thorny vines while applying her Barrier Jacket. Fittingly, her character is defined by her inability to move past the events surrounding the death of her grandfather.
* ViVid Strike! has Fuka protecting Rinne from some bullies when they were children.
* ViVid Strike! has Rinne and Fuka visiting Rinne's grandfather's grave.
* ViVid Strike!, her opponent forces her to break her self-imposed rule of not using grappling attacks (which wasn't purely imposed out of overconfidence, but to prepare herself for tournaments in which they aren't allowed).
* ViVid Strike! is the first sign that her cold personality is merely a mask.

* ViVid Strike!: It's mentioned in passing that Jill's career as a competitive fighter ended because of an unspecified injury she suffered in training.
* ViVid Strike! used to be a skilled martial artist, but she was forced to stop competing after she received an unspecified injury while during training.
* ViVid Strike!, where it's revealed that Nove isn't allowed to compete in martial arts tournaments due to her being a combat cyborg.
* ViVid Strike! who easily makes friends and was adopted into a well-to-do family, Fuuka is a martial arts-hating cynical orphan who easily gets into fights with other people and needs to work various odd jobs just to feed herself. While Vivio ends up becoming friends with Einhart as a result of fighting against her, Fuuka had a falling out with her old friend Rinne.
* ViVid tends to avert this trope in general. Characters who are weaker or less experienced than their opponents cannot win against them.
* Vivien Leigh. But both her Belles are deconstructions of the character:
* Vivienne frequently addresses other characters as "darling" or "dear." However, depending on the context, it can be either an endearment or a condemnation.
* Vivienne gives a string of Little No's of the first type when she's refuting Ghidorah (specifically Ichi's head) with a
* Vivienne is this. During her introduction, she even mentions that she was manufactured less than three months ago.
* Vivienne Pinay and Honey Mahogany's double elimination in Season 5, as it was the first in the show's history.
* Vivienne Westwood has bright orange-red hair, which she dyes to maintain its shade (she's 70 years old, and would probably be at least partially grey if it weren't for the dye).
* Vivienne with her, given the setup. (She does come back for a visit, though, and occasionally gets mentioned by other characters, so she's not completely forgotten.)
* Vivien Reid likes nature. Particularly the red-in-tooth-and-claw kind of nature. The flavour text to Sudden Spinnerets, a card about a creature spontaneously mutating in front of her, is to say that it "delights" her, and in the story she gets a little upset that she couldn't charter a ship to go and find the giant demon kraken that eats trade ships.
* Vivien Thomas, whose parents thought they were having a girl and really liked the name. Also has a nephew named Koco.
* Vivi mis-translating octopus sign language and forcing Luffy into a surfing competition Boss each administer one of these to Vivi when she offers to translate a goodbye.
* Vivi. Much more powerful than normal black mages and a longer life span, but he was never zombie-like and easily controllable like the others. While seen as a flaw by his creators, this worked out rather well for him
* Vivio is just like Einhart in that regard, although fighting is more of a hobby for her than a compulsive drive. She wants to be strong enough to one day be able to protect those that gave her the chance to have a normal life, especially her Nanoha-mama.
* Vivio shows the other end of the spectrum in that enough raw power can overcome any amount of skill. When she was first introduced, she was a six year old girl who hasn't had a day of combat training, formal or otherwise. With nothing more than brute strength, she managed to take on the best aerial combat mage in the entire TSAB utilizing the latest in military hardware. And she probably would have won if she had actually wanted to.
* Vivio spars with Einhart and loses easily, disappointing her, as she thinks Vivio cannot possibly be the Sankt Kaiser. Vivio proposes a rematch in a week and hopes to get strong enough to satisfy her. Since Vivio heard about Nanoha fighting Fate in Magical Girl Lyrical Nanoha StrikerS.
* Vivio was introduced to the franchise dragging herself through a sewer in rags and was later kidnapped, tortured, and forced into a fight to the death with her mother. At no point in any of the later seasons does she let the memory of this affect her, to the point that Rinne mistakenly believes that she never underwent

any hardship in her life (since everything related to her trauma was classified by the TSAB).
* Vivir al Día, from 1998, which addressed many topics that were then taboo in Chilean society, such as homosexuality, abortion or drug use. The creators expected a reaction from the moral guardians, but in reality the show was watched by very few people and caused no controversy.
* Vivisector Beast Inside catch up with you and kill you with a casually-placed detonator to the chest. Oh, and it can turn invisible at will, as well, to both sight and radar, making it even harder to avoid the monster. Games designers are sadists, clearly.
* Vivisector: Beast Inside has this in abundance: the animalistic enemies are faced based on their level of feralness and anthropomorphism. The Human enemies also get stronger as the game goes on. In a subversion, though, the final leg of the game contains "unfinished" versions of the animal enemies that are pathetically weak and easy to take out..
* Vivisector: Beast Within allowed massive chunks of flesh to be ripped away from an enemy with little more than a pistol, and even the basic knife or scalpel weapon could completely gib an enemy without much difficulty under the right circumstances.
* Vivi's favorite food is okonomiyaki, a savory pancake, though as a
* Vivi's reaction when Nami is able to predict when a cyclone will hit while navigating the Grand Line, something regarded as impossible by most pirates. She wonders whether Nami does so less from researched skills and more from innate ability.
* Vivi tells Luffy, Zoro, and Nami not to ask her about the identity of the boss of Baroque Works, because if she tells them, they'll be in danger too.
* Vivy: Fluorite Eye's Song follows the adventures of a robot songstress named Diva, as well as an AI named Matsumoto who has traveled back in time from 100 years in the future, to change history and prevent a world-ending war between humans and AI that breaks out on April 11, 2161.
* Vivy: Fluorite Eye's Song from Episode 6, various characters are seen wearing clothing decorated with lime green luminescent lines remniscient of those seen in 2161.
* Vixen. Cue much hilarity in British computer magazines (one remarked "I bet she does").
* Vixen. First appearance in Fall, 1978. But in a title only available to DC personnel.
* Vixen shouts out the name of the animal that she is using the powers of.
* Vixen was billed as the American Kong event, stayed talkative after returning to the ring in SHINE, though still not particularly talkative by wrestler standards.
* Vixy and Tony. (They also work with Seanan a lot — see "Wicked Girls.")
* Viy, with Anastasia being the last in their line to form a contract just before her death.
* Viz - "A donation of just £2 a month supplies an African village with water says my water company, yet they charge me £10 a week, the robbing sods"
* Viz (and what's more, she always believes it's truly her fault) and leading her to spend money she doesn't have to cater to her son's every whim. In one old strip, he pretends to be sick to get out of school and keeps implying that it's his mother's fault. The doctor then tells Timmy's mother that "There's nothing wrong with your son that a good smack on the bottom wouldn't cure!". In the annual he runs away from home because his mother put two sugars on his Weetabix when "She knows!" that he only has one and three-quarter sugars.
* Viz bear the warning "not to be sold to children" due to the art styles of the covers and most strips being more associated with traditional British children's comics.
* Viz character Mr Logic takes everything said literally. For example when he is asked to boil the kettle he points out that the kettle is made out of stainless steel and he can't produce a temperature high enough to boil stainless steel.
* Viz does this a lot, notably with the strip Jack Black, which is a parody of

wartime comics and books such as The Famous Five series. The occasional one off strip drawn by the same artist will often involve surreal stories. Some 'news' articles are done in the same manner.
* Viz features Biffa Bacon, who is a bully, but who himself is bullied by his parents constantly, and occasionally his uncle too. The character was based on a father joining in a fight their son was having with someone (it was never clear whether what this person had done to make the person fight them, or if it was a random assault).
* Viz, featuring a 16-year-old cashier who showed more interest in her mobile phone and blowing bubbles with her bubble gum than she did in serving customers.
* Viz. Fortunately for those without naval training, a feature further inside the comic explained the signal-flag alphabet.
* Viz) gives us Sid the Sexist, who, while not wearing a leisure suit, is very much a virgin despite his claims to the contrary and his attempts to change that situation. His friends could also possibly come under the same category - while they have occasionally been shown having success with women, usually they appear to look up to Sid for his 'studliness'. One strip even featured the brother of one of Sid's friends, who wore a leisure suit and claimed to be a massive hit with the ladies. Sid attempts to one-up him by getting several love bites - with the aid of a bicycle pump. He is, of course, caught and mocked by his friends. But then the last panel shows the friend's brother, alone in a tiny bedroom, doing the same trick, surrounded by porn magazines, used tissues, inflatable dolls, and other sexual paraphernalia, making him possibly the only character to have ever been made to look even more pathetic and lonely than Sid in the strip.
* Viz had a Jack Black strip where Jack teams up with the local priest to frame someone as a pedophile by planting the priest's supply of child porn on him.
* Viz had a one-off strip with a comic called "Bert Midler, Biddy-Fiddler" about a perverted young man with a fetish for very elderly women. He dates a 92-year-old and then, when she dies, starts looking for a new girlfriend among her similarly-aged friends at the funeral.
* Viz has a running joke about how it "isn't as funny as it used to be".
* Viz has been manufactured and sold in real life, even the Elvis Presley Dambusters Clock Plate of Tutankhamen.
* Viz has done many parodies of General Jumbo and featured one-off strips about evil living toys and similar things. Regular strip "Tinribs" is based around a young boy's "robot" (actually glued together from random parts and unable to do anything mechanical) which is typically used to mutilate or kill the boy's teacher in every story. Another recurring strip using the trope was "Tommy Salter's Chemical Capers" about a boy who would perform horrifically dangerous, and usually fatal to others, experiments with his chemistry set.
* Viz, is the rewriting of familiar coarse exclamations in an antiquated style.
* Viz Media and didn't want to read the manga, they had to watch fansubs of the three OVAs.
* Viz Media naturally warm voice became unexpectedly beloved with Venus fans.
* Viz Media seems to make a habit of putting unusual content warnings on its English-language M-rated manga.
* VIZ Media's recasting as unlike in Japan, the same cast plan to cover that as well.
* Viz Media, which took itself more seriously than the original, gets the same reaction from fans no matter what dub of the original they prefer.
* Viz occasionally featured a strip whose protagonist was cursed with the power of being a "Tranny Magnet". Women with facial hair (or men in drag) just wouldn't leave him alone. He got no attention at all from cisgender women.
* Viz once featured a letter from a reader asking if anybody knew whether or not Rohypnol works on sheep. He hastily added that he had a friend who wanted to know.
* Viz once worked as a nail gun by having a load of nails inserted anally, which he the farted one-by-one at the relevant target. As the nails were funnelled into his bum, he pointedly warned readers to "be extremely careful when you try this at home".

* Viz - only for his mother to intercept them as they enter the house, drag them into the living room and proceed to totally ruin the whole thing by showing the girl albums upon albums of Sid's baby photos.
* Viz. Readers familiar with the characters can probably guess how successful they were.
* Viz. Sometimes he's Roger's agent and at other times he's Roger's producer, but he's always Roger's straight man. One strip featured a sign on his desk that had "straight man" as his job title.
* Viz's sister boys-love publisher SuBLime also makes a habit of using content warnings - depending on the steaminess of a title and its rating, the warning could range anywhere from "suggestive themes" to "frank/graphic depictions of sex."
* Viz - the first two activities into which the titular Larry Ladd is pushed by his father are boxing and ice-skating.
* Viz using the power of his flatulence to drive the vessel at incredible speeds.
* Viz was concocted primarily to jam as many words for the bottom onto one page as possible.
* Viz was once best man at a wedding. Knowing that he would need some jokes for his speech, and being Mr Logic, he came up with these belters:
* Viz) who speaks like a Victorian gentleman and acts like a modern delinquent.
* V. K. Wallstreet, a wrestling stock trader. Played, amusingly enough, by Mike Rotunda, who's also on this list as Irwin R. Schyster. The "V.K." initials were a sideways dig at
* Vlad and Ingrid get a dose of this trope. Vlad doesn't want to become a vampire as the family tradition dictates, and Ingrid is often ignored in favor of Vlad.
* Vlad bites Erin, she goes from being the face of the Vampire-Slayer alliance to biting people and actively breaking the ceasefire.
* Vlad bites Erin to save her life. She then vows to never forgive him, mocking him for every failure and even making an attempt on his life.
* Vlad fits the trope for Ingrid, just as she, though older, covers the "annoying" bit for him: he doesn't want to be a vampire but is still favoured by his father, and she
* Vlad III declares Pyrrha Nikos to be this, as she had started to become overconfident due to being the strongest student in Beacon Academy and doesn't train to her fullest potential, and she hasn't tried to truly master her Semblance. He makes it his pet project to correct this and fully unlock her potential. He succeeds. Pyrrha unlocks new levels of power and new applications of her Semblance but declares her eyes are opened and she has no limits. She will constantly train so that she will remain undefeated.
* Vlad III explains that his Noble Phantasm, Kazikli Bey, gives him power over the concept of impalement itself. Pyrrha Nikos is shocked and says that is impossible. He tells her that she should learn not to limit her thinking, especially with all the unusual things in the world already.
* Vlad III of Wallachia) once received some Ottoman emmisaries, who due to their religion, refused to remove their turbans. He made certain they could never take them off; nailing them to their heads.
* Vlad III, who is the Prince of Transylvania, gives up his humanity to gain the power to destroy the Ottomans and protect his family.
* Vladimir Glebov is a classist who styles himself as a Russian aristocrat that repeatedly calls Niko and Roman Bellic "serfs", "yokels" and "peasants" due to their Serbian background.
* Vladimir Guerrero is yet another example. The man was known for not having any speed when it came to running the bases, but a game didn't end without him getting multiple hits with the bat. He was picked for the elusive Baseball Hall Of Fame because of his success as a great hitter.
* Vladimir Kozlov as he softened from guy who likes seeing him in pain to guy who genuinely likes him.
* Vladimir Kozlov cut a promo where the audience cheered when this was brought up.
* Vladimir Kozlov passed through a fascinating progression of this. He started out never speaking at all (which was also emphasized by his ring entrance, which

featured no music or sound). Eventually he got a musical theme and began speaking, but he could only say things in Russian with the occasional English phrase. Now he speaks in English (with a Russian accent) exclusively, but still doesn't talk all that much.
* Vladimir Kozlov. She'll be built up to goddess-like status, and then have some real matches.
* Vladimir Kozlov's was pretty much the bad guy because he was a native of the Soviet Union (born in Ukraine billed as Russian) even though he came to WWE long after the Soviet Union had dissolved.
* Vladimir Kozlov to the WWE. Also, Jeff Jarrett said that Vince was one of his biggest supporters during the death of his wife, so things have probably been patched up between the two.
* Vladimir Kramnik defeating Garry Kasparov in the year 2000 was a similar situation.
* Vladimir Lenin command economy resulted in tens of millions of deaths.
* Vladimir Lenin, despite being unable to talk or feed himself properly.
* Vladimir Lenin died, so God and the Devil get together to decide where he should go. After a brief discussion, they settle on Hell. After a few weeks, the Devil runs to God, telling him that Lenin has organized the demons into a labor union, so now they are demanding heavenly conditions in exchange for their hellish work. He begs God to take him to Heaven, figuring that there won't be any negative social conditions for Lenin to make use of to make trouble. God agrees. A few weeks later, the Devil calls God to ask how Lenin is doing. God replies, "First of all, it's 'Comrade God'. Second, there is no God. And third, I'm late for a party meeting."
* Vladimir Lenin) - got exiled into deeper Siberia, which was colder and more barren, but still only required time and effort to escape from. At least once he did so just by hopping on the nearest train!
* Vladimir Lenin he halted the persecution of the Orthodox Church and allowed it to revive in a big way after the war, until Khruschev mounted a fresh anti-religious campaign. After him it was mostly relaxed once more.
* Vladimir Lenin. Of course, it was conveniently misplaced by Uncle Joe and declassified only after his death.
* Vladimir Lenin's work for the 20th century after 70-odd years of contrary evidence to his prediction of "hypercapitalism", by suggesting that western capitalist economies had staved off inevitable collapse due to exporting surplus capital to their colonies, therefore making the "class struggle" global. As Thomas Sowell pointed out, aside from Lenin not citing his sources, the categories he used to illustrate his argument ("Europe", "Africa-Asia-Oceania", and "Americas") lumped together so many disparate economies under the same rubric that the data was completely useless at proving anything. In reality, the industrialized economies primarily invested in each other, not their colonies, which only further dismantles communist theory of an ever-increasing capital concentration leading to revolution.
* Vladimir Lenin, though, the Soviet government had to develop new embalming techniques to preserve the corpse, and in contrast to Evita, who only required occasional examination and touching-up until her final burial decades later, Lenin's body has to be regularly maintained (including chemical baths) and monitored to ensure that it remains in viewable condition.
* Vladimir Lenin, who, despite their flaws, were extremely well-read and educated men.
* Vladimir Makarov also wants to start war for fun and profit, though the "fun" in this case is "dead Americans/British/miscellaneous Europeans" and the "profit" is Ultranationalist Russia ruling all of Europe like it "should have" after World War II.
* Vladimir Mayakovsky, an unorthodox late Imperial Russian turned Soviet poet, was known among other things for bold and untried, if imprecise, rhymes in the Russian language. He often deliberately put the most expressive word at the end, even if it was usually considered unrhymable, and came up with a rhyme for it, come fire or water.
* Vladimir Nabokov and his wife, Vera, to whom he often dedicated his books.

* Vladimir Nabokov, in which you actually find out in the foreword how most of the characters end up, but you don't realise it until you've got to the end.
* Vladimir Nabokov speaks even more languages, including Russian. Nabokov was, of course, himself a polyglot, speaking several languages, and is one of the few writers to have composed works of literary merit in two languages (in Nabokov's case, Russian and English, of which the former was his native language).
* Vladimir Putin, after being crippled by friendly fire from a fellow KGB officer during a riot, turns on the Russian government and becomes an outspoken community organizer, who is frequently interviewed by international news.
* Vladimir Putin has based most of his public persona on this perception.
* Vladimir Putin is proficient in several different martial arts and has been practicing them since childhood.
* Vladimir Putin still becomes President of a post-Soviet Russia, but stricter term limits than OTL mean that he's only in office for six years. Afterwards, he becomes Russia's ambassador to the UN, quickly being elected Secretary-General.
* Vladimir Putin, who didn't know any English when he was first elected (having been stationed in East Germany during his KGB days) and had to learn the language.
* Vladimir Rezun, better known by his pseudonym of Victor Suvorov, a former Soviet GRU agent, says that among the first rules they were taught was - no sunshades, no raised collars, no hands in the pockets. After all, why should they look like spies if they are not spies but Soviet Intelligence Agents?
* Vladimir Smirnov died in 1982 of fatal complications after an accident in which Mattias Behr had broken the tip of his foil on Smirnov's suit and then unknowingly pierced Smirnov's mask, driving the broken tip
* Vladimir Stane meets one, "The Ol' Biglio", which leads him into Hades.
* Vladimir Taltos's first encounter with his eventual wife consisted of her trying to assassinate him for a rival crime boss (she technically succeeded, but coming back from the dead isn't impossible in this setting).
* Vladimir Ulyanov, now a scheming terrorist roaming the Eurasian skies in an airship.
* Vladimir Vasiliev becomes a major plot point in the later books of the series.
* Vladimir Vasilyev and would probably assume the heavily-armed invaders were part of a government anyway.
* Vladimir Vasilyev are concerned. By the time of the novel's events, 70% of the Aczanny race has been wiped out, most of them during the first few months of surprise attacks.
* Vladimir Vasilyev around the Solar System except for a very narrow vector on the ecliptic (they could have fully isolated themselves but that would just put Earth under siege, cutting it off from the war). Even then, the Shat Tsurs jump in along the vector at the edge of the system only to immediately jump at another vector within the bubble.
* Vladimir Vasilyev books, aliens tend to call humans "Homo", likely derived from "homo sapiens".
* Vladimir Vasilyev (British) captain is seeking to hire a Tauridan (Crimean) pilot to help him sail the treacherous waters of the Euxine (Black) Sea. While the local pilots (called "shtarkhs") use more magic than learning to navigate the sea, Ralph also has a piloting degree from the Southampton Naval Academy. He shows his diploma to the captain, who immediately asks how his good friend the chancellor of the academy is doing, seemingly forgetting his name. Ralph helpfully supplies the name and, when the captain asks how the chancellor's wooden leg is feeling, calmly corrects him that, when Ralph last saw the chancellor, he had two good legs but only one eye.
* Vladimir Vasilyev called Longers was found in Big New-York that have a lifespan roughly double that of normal humans. They were slaughtered by normal humans who couldn't bear to have other humans live for so long. However, several characters (members of other races) admit that this means that humans are more likely to make advances and change the status quo due to their short lives.
* Vladimir Vasilyev has. The only reason the "wolves" even came is that Earth is their home (they were abducted by aliens 400 years ago to serve as mercenaries in a

war).
* Vladimir Vasilyev) have become averse to killing thanks to the Bio-Correction that extracted the "wolf" gene from everyone. The wolves are disgusted with their brethren, as they realize that any alien power could waltz in and take the place with hardly a shot being fired.
* Vladimir Vasilyev, it's mentioned that Earth and the core colonies are suffering from overpopulation and pollution, while the outer colonies are, for the most part, tiny and isolated, where law and order don't really matter as much as the power of your blaster. By the time of the third and fourth novels, the influx of alien technology has revitalized humanity, and Earth and the colonies are actually not a bad place to live anymore.
* Vladimir Vasilyev of sorts, and a barely-mentioned nation called Sinojapan.
* Vladimir Vasilyev' portals that can be used to transport entire armadas instantaneously (normal FTL travel is fast but far from instantaneous and can be detected far in advance of arrival - arriving ships leave an "imprint" in space). The duology is even called "The War for Mobility", as both sides realize that the more mobile side wins. In the end, the good side (the one with humans) ends up obtaining the portals and quickly figuring out how to use them to capture the "evil" side's Emperor, forcing their surrender.
* Vladimir Vasilyev: Several novels are set on a world whose surface is uninhabitable. Instead, people live on giant leaves that float on the strong air currents. Some of the stories deal with characters who find themselves on another leaf and are unable to return home when the winds separate the leaves.
* Vladimir Vasilyev's novelization goes with the former. In fact, in the book, the tank controllers stay in the transport plane during missions, as the signal is too weak to penetrate the force field thrown up by the UFOs. Another Russian novel, inspired by the game (but taking place a century later), has the crippled general in charge of the task force pilot the tank using a VR helmet.
* Vladimir Vasilyev, the entire continent of Antarctica swaps places with a bunch of island chains near the equator. The book deals with the consequences of the frozen continent suddenly becoming much a more favorable piece of real estate (even if it will take a few millennia to melt) for the world powers. A bunch of drunk Antarctic researchers send out a radio message declaring independence, calling for the creation of the Free Antarctic nation. Despite half of the world supporting them (as they agree, it's not the half that matters), Antarctica finds itself blockaded by the US Navy and, eventually, outright invaded in a "peacekeeping action". Earlier, the Antarcticans start claiming that they have found an alien device in the melting ice that appears to be some sort of FTL drive that works by swapping two locations. They threaten to use it in the event of an invasion. Turns out it's just a bluff, which no one seems to be buying. Then, in the middle of the invasion, an American destroyer disappears and reappears in orbit. The President couldn't sign the order to pull out troops fast enough. It turns out that an Antarctican found a glowing orb with strange symbols on it buried in ice. Then he tripped and dropped it on the floor. The result was Antarctic moving to its new home. After using it to secure the sovereignty of the Free Antarctic nation, he buries it where no one will ever find it.
* Vladimir Vasilyev, three alien armadas are heading towards Earth and two other major human worlds. As part of defending them, powerful Nonlinear Field Generators are engaged, preventing the enemy from warping in, leaving only a tiny (by comparison) window, allowing them to "funnel" the enemy into a predictable position. This field is large enough to encompass the entire system. It also helps that any ship at FTL leaves an imprint at its destination that is detectable far in advance of the ship's arrival.
* Vladimir Vasilyev to use as shock troops in their interstellar wars. Rasmus is their leader.
* Vladimir Vasilyev. While this would normally lend them a measure of compassion, the fact that they are not merely retaliating for the years of slavery but are determined to dominate the galaxy (not to mention slaughtering over 70% of their former masters, many of whom are innocent) using the enormous armada they have

assembled under everyone's noses means they fall squarely into this trope.
* Vladimir Vasilyev who created the portals were able to do so, as they would've had to fly a portal to the other galaxy first in order to use it.
* Vladimir "Viktor Suvorov" Rezun, a defector from the GRU, Soviet military intelligence, started
* Vladimir Zhirinovsky, known by his Jewish surname, Eidelstein, becomes a far-right politician in Israel.
* Vladimir Zhirinovsky serves as Governor of the Irkutsk Oblast during WWIII
* Vlad is a more straight example. The show makes it all too obvious that Maddie will only ever love Jack, now or in an alternate reality where she married Vlad. Even as a
* Vladislav Delay's "Anima" quotes this trope in its ending dialogue: "I might never go to sleep again, I might stay awake forever".
* Vladislav Ivanov aka Lelush is a Russian model who served as a translator for the Chinese singing talent show Produce Camp 2021. After the producers of the show noticed his good looks he was signed up as a contestant. Lelush quickly regretted the decision, finding the weekly training sessions and isolation to be grueling, but couldn't leave the show without breaking his contract. So he deliberately performed badly in hopes of being voted off the show. But instead, fans found his grumpy, defeatist attitude to be endearing and managed to vote him to stay until the final episode.
* Vlad lives up to the trope in the second game, using the good will he earned in the first game to advance his plans for a while longer before revealing himself as the true
* Vlad Masters has a hunting lodge. Every animal that appears as a trophy on the wall is a ghost animal under Vlad Plasmius' thrall. He also has ghost vultures.
* Vlad Masters. He doesn't care if Maddie is already happily married with children, because he wants her to be his wife and her son Danny to be his son. He spends much of the show trying to accomplish this. One episode that examined an alternate future where Vlad and Maddie got married showed that the relationship would not be a happy one; Vlad appeared to treat Maddie more like a trophy that he won from Jack, rather than his wife.
* Vlad of Dacia in "Darkness Visible" was a one-shot villain, though he qualifies for this trope in so many ways: immortal and inhuman? Check. Dresses in all black? Check. Lives in a haunted castle in the middle of a cursed frozen land? Double check.
* Vlado Taneski that stalked Taneski's own hometown and he often wrote about, when he included copious details about the crimes that had not been disclosed to the public, such as the type of phone cord used to strangle the victims, or the fact that it had also been used to tie them.
* Vlad Plasmius has one of these as a standard ghost ability. Danny is rather unappreciative.
* Vlad Plasmius. Seriously, HOW does he style his hair like that? Does he just dump 300 L of hairgel onto his head?
* Vlad Plasmius uses mechanical bugs that resemble him to spy on the Fentons in
* Vlad's annual Christmas-themed heists, like White Xmas and Santa's Workshop, tend to see a lot of play as well thanks to their gimmick of potentially limitless amounts of loot to stash. Even as low as Very Hard difficulty, you get a noticeable boost to your end-of-heist experience for every individual bag you manage to grab.
* Vlad's first step to becoming a vampire after he drinks the Elder Vampire's blood in
* Vlad's friend Robin Branaugh, due to his semi-Gothic persona and obsession with vampires, is something of an annoyance to his elder siblings Ian and Paul (and vice versa); although his sister Chloe is younger, her brothers tend to fit this trope for her, since she is generally more mature and academically bright.
* Vlad Taltos also invokes this trope a lot; he has to be smart and sneaky to last as long as he has, first in
* Vlad Tepes are the Ottoman Empire, who are trying to conquer Wallachia.
* Vlad the Impaler accuses Count Dracula of being weak and soft, and threatens to

kill him with
* Vlad the Impaler decided to protect his homeland of Wallachia from Turkish invaders by surrounding Wallachia with the corpses of 20,000 dead Turks impaled on wooden stakes. Needless to say, it worked.
* Vlad the Impaler's backstory. He was never a blood thrall, but, before he was Embraced himself, he fed on captured Tzimisce and shared the blood with loyal elite troops, thereby establishing himself higher on the food chain than the clan that had been terrorizing so many similar small European kingdoms.
* Vlad the Impaler that one day he (purposely) left a gold cup in the street, and the next day it was still there.
* Vlad. Then he proceeds to further damage the car when Danny dodges his punch.
* Vlad took Isabella as his bride to seize control of Sylvania. He fell in love with her afterward, while she was still human, and did everything he could to
* Vlad Vladikoff does that do the Sour Kangaroo in Horton Hears a Who.
* Vlad von Carstein; an ambitious, ruthless vampire lord, Vlad adored his wife Isabella, even vamping her so she could rule at his side for all eternity (though he was initially hesitant to do so and only caved when she was dying of tuberculosis). The feeling was mutual, so much that when Vlad was killed for real Isabella threw herself off the walls of Altdorf to join him in death. If they are part of the same army on the tabletop, they gain a bonus in combat if the other is killed.
* Vlad von Carstein had a similar goal during the End Times, but in his case, it's more of a
* Vlog After College has 600+ videos on its main channel dedicated to Ryen's life and later his corgi's. Although each video is less than 20 minutes long on average, it would take forever to watch all of them. Not to mention all the videos on their side channel.
* VlogBrother. "I will have the teaching power. I am the English teacher! I am mad with power!!! [violent camera shaking]" It was closely followed with a more toned-down comment:
* VlogBrothers and HankGames, all of which they host, plus many more in which they have executive or editorial involvement.
* Vlogbrothers channel they're appearing on, expect them both to be talking up a storm. Perhaps it originated from the 'under four minutes' restriction of their early Brotherhood 2.0 videos; they only added the exception for educational content later.
* VlogBrothers including the one that shows the origin of the term 'Nerdfighter'.
* vlogbrothers people. He calls them up and tells them an optimistic fact about the world such as a statistic about decreasing violent crime. After one call resulted in more of a conversation than a prank, in subsequent calls he hung up immediately after saying his fact.
* Vlogbrothers, someone gets John Green to propose to their girlfriend for them through the phone. She says yes.
* VlogBrothers tend to get more views from guys on videos where the picture giraffe sex on the preview, even though the giraffe sex is not typically actually in the video.
* Vlogbrothers videos. The idea is that, when time travel is discovered, time travelers should abduct evil dictators and the like when they're infants and put them in an "Evil Baby Orphanage" where they could be raised to be good people.
* Vlog, Carolina confronts Brooke in a cafe and calls her out about her numerous sexual encounters, and loudly calls her a slut several times.
* Vlog, the killer disposes of Brandon's body by dissolving his body in hydrochloric acid in his bathtub.
* Vloz'ress: Unit Specialist/Spammer, with their specialization being
* V — The Ultimate Variety Show. It even had a cartoon illustration with a black sheep choosing the variety show while tons of white sheep chose the others. The show is a B-list, low-budget production compared to those A-list ones, so the ad was assuming the target audience did not know that.
* V-me (formerly aired as a subchannel on PBS member stations; currently moving to

a cable-only model)
* VMF-214 in World War II was known as the 'Black Sheep,' because the squad had essentially been cobbled together by replacements and volunteers and had never trained as a squad before their first combat missions.
* VNN: the V stands for Vegetable. reported by a Cucumber named Anderson.
* VO 5 hairspray commercial featuring the actress Rula Lenska is, depending on your viewpoint, an homage to or a parody of the "Diamonds Are a Girl's Best Friend" number described in Films — Live-Action below.
* Vocal Adrenaline, the main rival glee club, are "souless automatons" who are technically proficient but lack any passion; they've got so much financial backing from boosters that all the students were given Range Rovers; and they like to egg their opponents for no real reason. The first time anyone from New Directions spoke to a member of Vocal Adrenaline, she tearfully warned them to stay away from their sadistic choreographer.
* Vocal cords can be tightened as well as the result of a sudden reaction to pain. Some animals with gravely sounds can suddenly utter high-pitched squeals because of this.
* Vocal Dissonance: A character's voice doesn't match their physical appearance.
* Vocal Evolution: A character's voice changes in spite of still being voiced by the same actor.
* Vocal Evolution, Courtney's voice became more high pitched and childish-sounding, particularly whenever she is whining.
* Vocal fold operation is quite common for professional cante flamenco singers.
* Vocalist Jon Chang also has another band called Gridlink where he continues this trend, including songs like "Asuka" (about a character in
* Vocalists Tyler Carter and Michael Bohn were fired from Woe, Is Me in 2011 due to

* vocally to simulate the endless stopping and starting of the endless "Theme From M*A*S*H" videos the protagonist is forced to watch all day.
* Vocal Minority: A few particular people within a group get the most attention, often negative.
* Vocal Minority: An opinion only seems omnipresent because of how vocal the people who have that viewpoint are about it.
* Vocal Minority: An opinion only seems omnipresent because of how vocal the people with that viewpoint are about it.
* Vocal Minority, even if the other side can be just as guilty (if not more so) of an action. While this definitely can apply to Gender roles, it can apply to all sorts of other issues, too, like Race, Religion, and even fandoms.
* Vocal Minority returning to free him from prison. Even if only one of them can officially lead the League of Shadows, there's genuine love and friendship between them, and Bane is far more than just a servant.
* Vocal Minority that hates GNOME 3 by switching from GNOME to Xfce as the default desktop environment for Debian 8 "Jessie".
* Vocal Minority: We're not representative of the entire group, we're just the most noticeable because of our actions!
* Vocaloid", a happy and upbeat song meant to advertise curry. There's also Infinite Dreamer, which sounds like a very mainstream pop song with none of Kikuo's signature surreal sounds, although the lyrics do have some dark implications.
* Vocaloid), all of humanity suffers from this. The couple from the beginning is put into robot bodies and lose their love for each other, and a pair of twins are the only ones left with souls, until one of them dies. The other, however, manages to change history so that the mass-Cybernetics Eat Your Soul and the war that prompted it never happens.
* Vocaloid and finding song after song after song. In the beginning there weren't that many, but now there are literally thousands of songs — tons for each character. You can get lost for hours just listening to all the funny songs, then all the horror ones, then the depressing ones... You get the idea.

* Vocaloid and her video for "Rampaging Lolitaholic" wants to take Kagamine Rin home with her.
* Vocaloid and its freeware derivative UTAU can get easily frustrated. The interfaces are similar, but the methods of drawing notes, doing pitch bends, creating vibrato, etc. are very different, causing a likelihood of extreme aggravation (especially when one tries to use the Vocaloid editor and click elsewhere to create a note from your current point to where the mouse is clicking, but instead starting a new note where the click is).
* Vocaloid, and only address what happened to them. And the last song just ends with Rin telling Len 'good night until you wake up from this bad dream'. What does it mean? Who are the other characters? Why do Lily and Gumi appear on the cover of the album? Will Rin and Len ever get closure? It won't ever be addressed.
* Vocaloid are sometimes mistaken for Lin and Ren. Luka is also sometimes called Ruka.
* Vocaloid are the characters' names, appearances, and voices. Usually. (Some have a couple more minor things, like age and height, while others only have a name and a voice.) Personalities, backstories, relationships, and some characters are pure fanon.
* Vocaloid, as opposed to the usually more mature if somewhat hotheaded and booze-loving Meiko.
* Vocaloid" by Kagamine Rin features a shy girl awkwardly attempting to confess her love.
* Vocaloid characters Hime and Mikoto don't have an assigned gender, since their lore states spirits are genderless by default. Further muddying the waters is that their motif was partially inspired by fellow GYNOID co. vocal flower, whose androgyny theme references real life flowers' hermaphrodidic qualities.
* Vocaloid characters like Teto Kasane (who herself started out as an unofficial April Fools prank).
* Vocaloid composition "Don't Look at Me That Way" has a childish spin on it, much like the rest of the song. While the singer (a little boy) is having his last thoughts while leaving the mortal plane, his final line "oh" is backed by a drawn out, high pitched recorder note.
* Vocaloid could essentially stand for the face of Japan. The synthesizers maintained their popularity through the middle of the New 10's, but as it stands they've mostly regressed to Stage 4 in Japan (6a elsewhere), with some of the most famous producers leaving the scene and new producers struggling to garner the same level of attention. The products do maintain some level of mainstream presence in Japan, however, and new official projects based on the characters are still released every so often.
* Vocaloid dedicated for their crossovers. For added posse, their videos are mostly illustrated by Suzunosuke. They eventually form an official group named TeamOS.
* Vocaloid ends with Miku and Luka going forth into an unsure future together. Although Luka admits she wants to have Miku in her life and Miku agrees to do so, it's not stated directly that the two will get together.
* Vocaloid featured this in one his series. "Demise of Hatsune Miku" is the worst end, "Disappearance of Hatsune Miku" the bad end, "∞" the true end, and "Intense Singing of Hatsune Miku" is the "Happy End".
* Vocaloid features Miku Hatsune and her floor-length green pigtails. She's not the only one though—there's also Luka, Haku, Neru, Miki, Lily, and Gakupo.
* Vocaloid featuring Kagamine Rin and Len is about a mutually abusive relationship, in which both partners are constantly at each other's throats and keeping extreme tabs on the other. For example, Rin makes Len delete his female contacts and eavesdrops on his incoming calls, whereas Len makes Rin reply to his texts within 10 seconds and goes through her belongings to find a purikura of Rin with another boy. They acknowledge the relationship is destructive and borderline physically violent, but they're so attached at the hip that they can't muster the courage to split from each other.
* Vocaloid) for character models. There've been cases of having the virtual singers being projected into real life.

* Vocaloid: Hatsune Miku did this during her "live-action" concert in Los Angeles. Each time a member of her band was introduced, she would turn to them, smile, and wave. In fact, the entire concert was an example of this. A virtual diva in the real world? Sweet!
* Vocaloid, if we include unreleased Vocaloids and private voicebanks, and don't include Append, Extend, V3 Updates, fanmades like Haku & Neru, or things like Ice Mountain, there are 94 Vocaloids.
* Vocaloid is animated in a shadow-puppet style, with the parade's red shoes showing clearly.
* Vocaloid is a series of computer programs meant to imitate human voices, and the general consensus is that in-universe they qualify as these. It doesn't help that their personality varies with their song writers.
* Vocaloid is at a slower pace than the others who almost always sing the song extremely fast. The song is about a Vocaloid "being deleted," but unlike the other versions this one makes Gakupo sound rather calm about his fate.
* Vocaloid Kagamine Len, the Dream Eater promises to take away all the bad dreams of a girl and fills her with pleasant and lustful ones... to the point that she can no longer make her dreams become real and is trapped in a world of endless longing and fantasy.
* Vocaloid: Many of the voicebanks have characters attached to them. However most of the time they have no canon personality at all. Yet, looking at Nico Nico Concerts, it seems this trope is often given to Gakupo. He's often seen appearing at random moments on stage, portraying questionable behavior, such as putting on weird costumes (alternatively: wearing no clothes at all), forgetting the dance routine, or trying to hug one of the girls mid-concert. He's also the most likely one to break the fourth wall, if it were to happen at all. The fact that for the longest time this guy was best known for his troll songs, didn't help in bettering his image. Hell, to this day his best known songs is arguably Dancing Samurai. It is hard to describe what's going on in that video clip, but it includes horse masks, naked people, SM whips and kiddie pools, so believe me when I tell you it's weird.
* Vocaloid Miku's song "Wide Knowledge of the Late, Madness". Watashi watashi watashi watashi watashi...
* Vocaloid (musical speech synthesizer software): A Yamaha trademark, often used whenever synthesized voices get used for music regardless of if that was the intended use of the software. Sees common use in Japan, where it is frequently shortened to "Vocalo" (ボカロ).
* Vocaloid on your hands. Hatsune Miku is so popular with adults and children alike, that recent concerts in Japan have separate daytime showings for younger fans.
* Vocaloid or treated as "cute" and the common rumor that early in development Len was originally going to be a girl before it was decided he'd be a boy instead to satisfy fan demand for more male Vocaloids.
* VOCALOID, pairing them up with other people, or just downright raping or abusing them. It's not exactly rage against the author of the story, but against authors of other stories.
* Vocaloid parodies this trope, as well as American stereotypes of the Japanese, and vice versa. It has the English vocaloid "Big Al" speaking in Japanese peppered with English, and Luka as the voice of the geisha.
* Vocaloid points and stayed on top for two weeks straight (a rarity on the rankings).
* Vocaloid producer Oster Project did not reveal her gender until years after she debuted because she wanted listeners to view her work under a gender neutral lens, possibly because people may have viewed her work differently if they knew she was a woman.
* Vocaloid, "Rolling Girl" by Hatsune Miku is about a girl who is implied to be bullied and how her world kept spinning out of her control, as she is seen spinning by herself. Throughout the video when the guy asked her if she was okay now, she would never quite answer the question. At the end, as he is holding her, the guy

tells her that it's going to be okay now and they both spin together.
* Vocaloid" (roughly "Waiting Person, Ocean") is about... well, with a title like that, what do you think?
* Vocaloid seems to imply this is what will happen to poor Rin, even though she's still alive by the end of the song.
* Vocaloid series could possibly take place on a day like this. The events that play out through the night are roughly the same, and the characters try doing things differently to receive a good "ending" to the night, possibly for time to advance normally. The residents of the mansion try following their "script" more strictly and the lost villager tries murdering the residents in more exciting ways, for example.
* Vocaloids Kaai Yuki and Hiyama Kiyoteru have the song "Sensei to Seito no Rabu Geemu" ("A Teacher and a Student's Love Game") fits the bill, although mutual attraction also seems to be hinted at.
* Vocaloids Kagamine Rin and Len as mirror images, then took that back and called them twins. Later, they ended up taking both statements back and ended up leaving it up to anyone's interpretation. This resulted in one of the most annoying situations for anyone in the fandom, where any video involving Rin and Len resulted in a comment war over which is which.
* Vocaloids Kagamine Rin and Len come packaged together. Some buy them and only use Rin for their songs, and some will only use Len and never touch Rin. The same could be said for ZOLA Project's Yuu, Kyo, and Wil, to a lesser extent.
* Vocaloids (Most using Stock Photos as box art) were released in Taiwan, their box arts were changed to be younger and anime style, and in the case of Sweet Ann, more attractive. This move was quite baffling in the case of Big Al, who had already been redesigned as an attractive anime-style man, rather than the resemblance to popular depictions of Frankenstein's Monster that he began with.
* Vocaloid: Some PVs for "Alice Human Sacrifice" (as well as the music itself) imply that Kaito's songs of madness were Ear Worms with lyrics that stray away from the melody and emotions put in the song.
* Vocaloid song about a robot and his undying loyalty to his master (played by Hatsune Miku) who was taken away from him because of a war. Even till his last breath, he still protects his master's house, hoping to see her one more time.
* Vocaloid song "Hocus Pocus" by shikemoku, Gumi finds Miku sitting on the swings and realizes that she's been abused by her parents, and subsequently brings the younger girl home.
* Vocaloid song "Shotarella", Kaito falls in love with Len simply because he gave him "bananaisu" (banana flavored ice cream).
* Vocaloid songs. Notable examples include Mothy-P's Story of Evil and the numerous "yandere" songs like "Luka's Love Disease," "Miku's Rotten Girl," and "Grotesque Romance."
* Vocaloid song "Villain" is about a trans youth who pretends to be a boy in public. They lament that society disapproves of their love for someone else assigned male at birth.
* Vocaloid style sung by Hatsune Miku tells the story of a girl who, beginning in childhood, spends fifteen years writing love poems to a boy who never sends a reply. She becomes an accomplished author, endures extreme fluctuations in health from overworking herself, and sustains a head injury causing amnesia, erasing every memory but her love for him. She spends years not remembering anything but him, slowly growing more anxious and fearful with her memory not returning. One day she finally remembers everything and cries with the returning knowledge that he's been dead for the fifteen years she's been writing to him. The song ends with her digging up a time capsule with a letter inside that the two of them buried as children.
* Vocaloid" tells the story of a legion of ghosts being freed on Halloween Night and waging war on humanity after finding out people nowadays view Halloween and the supernatural as lighthearted fun.
* Vocaloid tend to have a genderbend. In the UTAUloid's cases, many are made by the authors themselves. People have also edited their vocal files to create a

masculine/feminine version of the characters.
* Vocaloid, the detective (played by Len) initially appears to be unmasking the girl (played by Rin) as the culprit of the murders. However, in the end, the detective reveals himself to be the actual killer.
* Vocaloid - The Dixie Flatline song "Just Be Friends" is one that takes place right in the middle of the breakup, and all the complicated feelings that led to that point. It has a followup song titled "Answer" which is a song that takes place three years after the breakup and how the girl has moved on.
* Vocaloid. The first video is chronologically the last, and the second two are basically flashbacks telling us how the story led up to the first video.
* Vocaloid. The mother in the song repeatedly tells her child that he is worthless and useless while constantly reminding him that she is the only one who will ever love him and that he should stay with her forever. The child eventually kills himself, and the mother finally realizes what she has done to him, but it is too late.
* Vocaloid, the titular character eats her fifteenth chef just for asking her for a vacation, and it's likely that some of her previous chefs met the same fate. And then she eats her maid and butler for no real reason beyond still being hungry.
* Vocaloid this trope comes into play when some scientists cut off a little girl's head.
* Vocaloid (though there are heterosexual female versions if you look around).
* Vocaloid; true to the trope, pink-haired Luka is a girl and blue-haired Kaito is a boy. Inverted with Miku, who has light blue hair and is a girl.
* Vocaloid twins/mirror images Rin and Len. One example is Childish War, in which two rich siblings are fighting over the inheritance, only for the competition to be deemed a tie because both of them are too immature (they start throwing cutlery at each other). Another example is Remote Controller, where Rin and Len wish they were more like their sibling as they use a remote controller to mess around with each other.
* Vocaloid voice bank Oliver was a 13-year-old boy, and the voice provider for Kaai Yuki was a grade school-aged girl.
* Vocaloid voice synthesizers can and will sing songs of any genre their owners have a mind to producing.
* Vocaloid whenever they lost. The children play this game with wayward visitors even after the scientists are long dead, making the song a good case of horror all the same.
* Vocaloid which is a Ring-Around-The-Rosie-like song about immortal children playing endlessly and the horrible way they died. The video doesn't help.
* Vocal Range Exceeded: A person tries to sing outside of their natural range, and their voice cracks.
* Vocal training can give your voice massive amounts of range, even to the point where some biologically male people are able to accurately sound like they're biologically female.
* Você Decide, or one episode where votes were so close both endings were shown.
* Voces Inocentes to fight the Marxist guerillas. As the students stand in attention to see if their name is called, the camera focuses on a boy who creates a large puddle of urine around his feet.
* Vocho - The Volkswagen Type 1 as known in Mexico, one of its best selling markets.
* Vociferous Carmichael. He didn't cheat his insurance company directly; rather, he charged the owners of his ship's cargo a fat fee to be used to insure its safe delivery, but pocketed their money instead of buying the promised insurance.
* Vodafone has a new add touting its new smartphone, it features people with fuzzy masks at a wedding for no clear reason. Whenever it comes up, people who see it wonder what it's trying to sell.
* Vodyanoy of Slavic folklore is occasionally depicted as a toad-like humanoid with a fish-like tail.
* Vod (Zawe Ashton) unexpectedly falls in love with a handyman in a Series 2

* Voez was temporarily pulled from the Nintendo eShop in the US and rerated from E for Everyone to T for "Mild Blood, Partial Nudity" in regards to some previously overlooked content.
* Vogel, a Zamoran, at one point uses metaphor about how it's more rewarding to climb a tree to get fruit than it is to get them with a ladder to explain his people's Luddite culture. This only allows the main cast to belittle and deconstruct his beliefs by pointing out that ladders aren't high tech, are more safe than climbing a tree by hand and can actually be harder than climbing the tree in certain situations.
* "Voglio armarmi" features caricatures of the band being turned into cartoony creatures vaguely reminiscent of Looney Tunes characters (it even ends with "That's All, Punks!"). The actual band appears every now and then on a TV. The American toon style was chosen ironically since the song's lyrics are about gun control and death penalty in the USA.
* Vogons use their own poetry as torture. Vogon poetry is sufficiently awful to elicit screams of pain, and could legitimately be regarded as torture. However, Arthur Dent doesn't seem to be particularly bothered by listening to it, which perhaps has to do with the fact that his own planet had the worst poet in the universe (at least until the Vogons demolished it).
* Vogue cover featuring LeBron James imitates the famous propaganda poster.
* Vogueing, coming from the black and Latin LGBT community in Harlem, became mainstream after the release of Madonna's "Vogue" in 1990.
* "Vogue": Madonna striking a pose by holding her hands in front of her forehead and chin.
* Vogue magazine used to warn its readers to never let the man in their life see them in curlers and facial mask.
* Voice 2: The suicide bomber in the first episode actually tried to detonate his bomb, but the wires came loose.
* Voice acting in general is prone to this. While voice actors are generally freelancers, a lot of studios and casting directors tend to have their own little talent pool, though there is some overlap when it comes to popular and in-demand talent. For instance, while all three studios use Los Angeles-based actors, it's easy to distinguish a dub by

* voice actor. Reactions from Mexican-Americans were mixed: while anti-defamation groups successfully lobbied for the retirement of Bandito, surveys in four cities in California and Texas conducted by the ad agency who created Bandito claimed that 85% of Mexican Americans liked him. Frito-Lay reportedly received a letter from a Los Angeles junior high school with a predominantly Mexican student body saying "If you take away the Bandito, we'll stop buying Fritos." In Mexico itself, the character was very popular.
* Voice Actors. Everyone remembers their voices, and some may know their names but they are otherwise obscure personalities.
* Voice actors in Spanish-speaking fandoms will always be remembered for their roles in famous series. Notable character roles in Mexico include:
* voice actor. This becomes a plot point in "Homie the Clown", where Homer becomes a Krusty impersonator and the two look so similar that no one in Springfield can tell them apart.
* Voice Actress Carolyn Lawrence has said that the titular Orel Puppington from
* Voice Changeling: The ability to imitate anyone's voice, rather than their shape.

* Voice Change Surprise: A character speaks in a voice that isn't their own, or makes a weird sound, much to their shock.
* voiced by a woman, by which point he is 17 years old.) In the English-language dub, Tai is voiced by an adult male actor (Joshua Seth) throughout, with a portrayal that, while goofy and boyish, emphasizes his leadership qualities more.
* voiced by a woman in the original Japanese, who used his feminine appearance to get close to his targets and even managed to assassinate a man in broad daylight. He even hid out in a brothel at one point after an assassination.

* Voiced Differently in the Dub: The character's voice in some foreign dubs is wildly different than the original.
* voiced event trailer for L.E.T.S. H.A.N.G. is currently the only event trailer made with a GIF animation, while all other event trailers are simply static images.
* Voice for the Voiceless: A character who speaks for an inanimate object, or someone who can't talk.
* Voice from the Stone, it's revealed that Lillia, the housekeeper, committed suicide the day of Malvina's death.
* Voice Grunting: Games that either have audible "beeps" while text is scrolling, or short voice clips rather than full voice acting.
* Voice: Kwon-joo is doing this in episode 1-2, continually repeating the emergency call of Jin-hye's death, and particularly the words caught on the recording of the man who killed her: "That's why you shouldn't have run." Kwon-joo, who is blessed with hyper-acute hearing, is listening to the recording to see if there's anything she missed.
* Voicelines between characters are often based on their relationships in lore, such as Ana praising a friendly Pharah for doing well in combat, or Talon heroes being constantly hostile with Overwatch heroes, even when they’re on the same team.
* Voicemail Confusion: A character mistakes a voicemail for an actual person.
* Voice of Breland compared to the one that acts like all Cyran refugees are part of some grand conspiracy to invade and/or destroy Breland.
* Voice of Karrnath talks about the Mror Holds as a birthplace of abominations, accusing the dwarves of being at fault for the various daelkyr monsters that spring up from time to time.
* Voice of Reason has voiced his dislike for Luna on a few occasions, being another one of the bigger names in the same community, he too naturally experienced backlash and as

* Voice of the Condor and its superior Black Suns, Esteban has the Condor use its backup battery to overcharge the turret. It works well, but overheats the turret before long.
* Voice of the Condor before they arrived, to lessen the chance of the Chosen Ones being buried by crumbling rock during their search.
* Voice of the Condor, the Golden Condor's AI, gain a projected human avatar toward the climax.
* Voice of the Legion: A character speaks in a voice layered with echoes pitched higher or lower than the main voice, as though multiple entities are speaking through them at once.
* Voice of the Legion, but his fourth form is barely larger than his first and is outwardly the least monstrous of them.
* Voice of the Legion effect and can pull off things that even an endgame-tier

player character is incapable of doing. He is also completely covered head-to-toe and his face is masked, so the player does not get a glimpse at what he looks like. It is not known if he is a human that is simply well-versed with eldritch magic, a once-human that turned in to something else, or if a different entity that happens to be the same size as the human characters.
* Voice of the Legion: Someone's voice sounds like multiple voices speaking in unison.
* Voice of the Resistance: All rebel propaganda requires a good spokesperson to represent them.
* Voice of the Resistance: The public face and spokesperson of a resistance movement.
* Voice-Only Cameo: A cameo role that is only heard and not seen onscreen.

* Voiceover Letter: A character reads a letter and we hear a voiceover of the letter being read aloud by whoever wrote the letter.
* Voiceover LetterWe can't see the actual text of the letter, so instead we hear a voiceover of the person who wrote it.
* Voiceover Letter: When someone reads a letter, we hear the letter being read by whoever wrote it.
* Voiceover Translation, and leaving some parts in English. However, in the 1st dub (the rarest and hardest to find), the songs are fully dubbed and given accurate translations.
* Voiceover Translation: When the original audio track is still audible and the translation is read by one actor.
* voicepack, of all people, has this very phrase in it. Makes sense, since Oni are traditionally known to carry people off when they lost contests, and Suika is strong enough to carry away anyone she'd want. Fans have taken to joking about taking her home, and then get rebutted by other fans saying that Suika'd take THEM home instead.
* Voiceprint with Trevor Devall, Scott admitted to being afraid of the very word, having once had his back injured in a glomping incident.
* Voices Are Mental: Characters who switch minds also exchange voices.
* Voices Are MentalIf characters swap bodies, their new body will talk in their old voice so that you can tell it's the same character.
* Voices Are Not Mental: Characters who switch minds retain the voices of whoever's body their minds are in.
* Voices Are Not Mental: Though of course, sometimes voices do remain with the original body.
* Voices, but slowly comes to realize that simple revenge won't help, and they're really not that different.
* Voices) does a bizarre inversion. The narrator (Korra's noncanon adopted sister) quickly falls for and latches onto Mako, while Korra is portrayed as being an irresponsible ditz who has no sense of manners or responsibility and needs her sister to be her "manager", because she can't take her Avatar training seriously (ignoring how, in canon, Korra loved being the Avatar more than anything). Given that the author proclaimed a rather loud hatred of Asami, in the notes of another fic, it's no surprise that she turns out to be an Equalist Sympathizer with little to no sympathy once she's found out.

* Voices in One Room: All the show's voice actors have their lines recorded while they're in the same room at the same time.
* Voices in One Room: All the voice actors record their dialogue in the same room and at the same time.
* Voices in the Dark: Sōichi Tsujii is introduced as an 11-year-old boy who goes out of his way to be as creepy as possible, often sporting a nightmarish grin with his eyes in shadow and too many teeth that look like a piano's ivory keys.
* Voices in the Fog is about a paranormal investigator who interviews someone about the legends surrounding the local bog. The bog had become claimed by a demon known as "The Mother of the Bog" who demanded blood sacrifice. The local tribe of Indians would bury their dead there, but that stopped when the tribe was displaced. Now she lures people into the bog and kills them, enslaving them as zombies.
* Voices of a Distant Star are based on the remains of technology found in Martian ruins.
* Voices of a Distant Star ends with a Macross Missile Massacre launched by Mikako, wiping out a good chunk of Tarsian Fleet.
* Voices of a Distant Star gearing up for a rescue mission, meaning there might be a chance they could get together after all.
* Voices of a Distant Star, lovers are separated by relativistic considerations and light travel time.
* Voices of a Distant Star pilot and sent with the fleet into space. As the fleet does not have FTL communications technology, the only means of contact the two have is email, with increasingly long delays in transmission - first six months, then a year, until finally Mikako ends up eight and a half lightyears from Earth. The anime does some deconstructing as both Mikako and Noboru struggle to cope with the separation - Noboru at one point even makes up his mind to give up on Mikako, saying that "a distance that takes eight years at the speed of light is no different than saying 'forever'," - but ultimately plays the trope straight in its final scenes.
* Voices of a Distant Star's Earthside scenes take place in Saitama, capital of the prefecture of the same name. Despite being on the northern doorstep of Tokyo, its much, much more famous and populous neighbour is never mentioned.
* Voices of a Distant Star stems from the fact that the first United Nations space armada (where the protagonist serves) has faster-than-light drives but no means of faster-than-light communication. The dub very slightly implies that it's some kind of time dilation instead, because they failed to translate the newspapers, prominently displayed on the table, where headlines, basically, explain it all. (And, indeed, one newspaper's side-column contains the particularly mean-spirited revelation that FTL communication was actually invented shortly after the armada jumped out of range.)
* Voices of a Distant Star subverts this by structuring the entire plot (and title of the work) around the delay in communication.
* Voices of a Distant Star task force bugs out via FTL jump rather than take their chances trying to fight the enemy head-on.
* Voices of a Distant Star. The only thing he didn't do by himself was the voice acting on the commercial release.
* Voices of a Distant Star - the Tarsians possess a starfish-like structure. In addition, miscommunications between them and humanity is implied to be one of the reasons why humans are fighting a war with them.
* Voices of a Distant Star to arrive. Only at the very end, when Mikako has been stranded in space for eight years and Noboru, now twenty-four, has finally gotten assigned to a spaceship himself, does the fleet finally gain FTL communications capabilities.
* Voices of a Distant Star to resolve himself to move on but can't ever manage it.
* "Voices of Anarchy" Jeremiah Cross and Soundbite, "Corsair Princess" Nefertari Vivi, Carue "the Duck", "Man of the Sea" Boss Dugong, "Disciples of the Sea" Teenage Dugong Warrior Squad (including "Half-Shell Blade" Leo), "Angel of

Destruction" Conis, "Cottontail" Suu, "White Menace" Going Merry.
* Voices, since they generally have big blond afros. Half-Alds like Memer get it too.
* Voices there's much more travelling, but no map at all in the British edition (not even a reprint of the large map from the first two books).
* Voicewitches are basically human telephones, connecting themselves to Voicewitches in other places and repeating words they hear for them.
* Voice with an Internet Connection are in comparison. Adam is always willing to knock him down a peg by pointing out when he mispronounces a word, or when fixing a security hole Pritchard didn't know about.
* Voice with an Internet Connection of the first System Shock, tells you that she allowed you to believe otherwise to "establish trust".
* Voice with an Internet Connection, the Mission controllers who diagnosed the problem from the telemetry, figured out the rocket burns required to get the crew on a trajectory to return to Earth (using just the Aquarius' engine, since the integrity of Odyssey's could not be determined), developed kludged-together procedures to keep the crew alive, and then worked out how to power the Odyssey back up and bring the crew through re-entry on less power than was thought possible. Badass the crew was, but they were not alone in being badass.
* Void and Life seem to be ass pulls. Before Act 6 there were minimal references to them despite playing a more and more significant role. They are then revealed to have abilities unlike the previous rings seen in the comic, like being used by players (it's a hard rule that the "regular" rings only transform Prospitians or Dersites) and the ability to be transported to and from Dream Bubbles. They seem to directly parallel Life and Void players Jane and Roxy. When one goes missing, the other is miraculously discovered.
* Void being at the center. However, it switches the Earth and Air correspondences, as Earth is understandably attributed to Wood and Air to Metal.
* Void Between the Worlds and there has to be a reflective surface somewhere near them. If one or both of these conditions is not met, then the proper cube will not materialize.
* Void Between the Worlds. At least one angel is a free-floating Euclidean solid with a halo. The number in front of their name actually indicates how many times they have incarnated.
* Void Between the Worlds with only one thing in it, or otherwise in a place full of many instances of the same thing, making the game trivial.
* Voidbringers masters left them mystically lobotomized and incapable of functioning without orders.
* Void City, an artifact which contains some of their magical essence. Until it is destroyed, they can resurrect from any form of death, even if nothing remains of their body.
* Void City, Carl loans Eric one while Eric's own car is out of commission. He deliberately picked the worst one available since, knowing Eric as he does, he figures it's just going to get wrecked somehow and there's no point wasting a good car.
* Void City, Eric fights a number of children who were turned into vampires. Though he has a moral code against harming children, he considers vampires to be monsters rather than people and so does not hesitate to destroy them.
* Void City, Eric kills some werewolves by using his super-strength to rip their hearts right out of their chests, holding the organs up in front of them as they die.
* Void City, Eric transformed his adopted daughter Greta into a vampire so they could remain a family forever. Despite Greta turning into what anyone else would call an insane bloodthirsty monster (it turns out compulsive eaters don't make good vampires), they retain an unconditional familial love for one another. It's a notable exception to the general rule, as most other vampires in the series despise and try to destroy their sires.
* Void City, Greta, Eric's adopted daughter who he transformed into a vampire. She is one of the only people in the world he loves, and she in turn loves him to the

point of obsessive insanity. She treats anyone Eric is currently dating as her mother, acting with respect and deference — but always making it bluntly clear that however much they love her father, she loves him more. And when Eric inevitably breaks up with them, she will gleefully take any excuse to kill her former "mother" unless Eric explicitly forbids it.
* Void City, human thralls of vampires ranked Master or higher don't age; a gift which comes in exchange for being magically bound to obey the commands of the vampire who controls them.
* Void City, Tabitha tries several times to tell Eric important information about Rachel, but he manages to cut her off each time; as he is her vampire sire, she is incapable of disobeying his orders, and so literally cannot continue speaking about the subject when he tells her to stop talking about it.
* Void City, there are some beings called True Immortals. The only way they can be destroyed is if their soul is absorbed by another True Immortal; and this is rarely done, as it poses a great risk of causing mental or even physical changes to the absorbing True Immortal.
* Void City, there's a powerful spell over Void City which enforces the Masquerade by imposing obliviousness on all non-supernatural inhabitants. Other locations have various other methods of maintaining supernatural secrecy, such as mages tasked with erasing the memories of witnesses.
* Void City, the vampire Eric has a habit of losing track of the time and getting caught in sunlight, thus causing him to burst into flames. He's powerful enough that it doesn't kill him, but he finds it annoying and embarrassing.
* Void City, the vampire Veruca is nicknamed "Froggy" because the only animal she can shapeshift into is a frog. Her real name is no better, meaning "wart".
* Void City, this is a standard vampire power. Stronger vampires can transform into a variety of shapes such as bats, cats, and rats, while weaker vampires are limited to a single transformation. Froggy, for instance, got her nickname because the only animal she can shift into is a frog.
* Void City, this is deliberately invoked by the vampire Phillipus. Having existed for many millennia, he seeks to prevent life from becoming boring by making powerful enemies who can surprise him and keep him on his toes. Thus, every year he takes on new apprentices and offers them immortal life as vampires, then proceeds to horribly abuse them in order to ensure that they will bitterly hate him and stop at nothing to get vengeance against him.
* Void City, vampires have the power to make their eyes glow bright red. Though they can choose to do it consciously, it also tends to happen subconsciously when they are extremely angry.
* Void City, vampires have the power to slow, halt, or even reverse the ageing of the humans who serve them as thralls. If the vampire is destroyed, however, the thralls rapidly revert to their true ages.
* Void City who works for an organization of vampire hunters, subsisting solely on animal blood and destroying her monstrous kin to protect innocent humans. Greta is also a vampire who regularly hunts and destroys other vampires; but in her case, it's because she just really likes killing things and enjoys the challenge offered by semi-immortal prey which requires extremely elaborate measures to destroy.
* Void Dogs doesn't even consider herself to be a person. Considering that her real name is a serial number, this might not be surprising.
* Void Dogs features the "Celtic revival" planets of Nova Hibernia and Nova Caledonia (New Ireland and New Scotland).
* Void Dogs has Nova Hibernia, Nova Caledonia, and Nova Terra (which strangely enough is in the Sol system).
* Void Dogs security has a code for "exiled royalty has detonated a bottle". They also have one for "exiled royalty has detonated a turtle".
* Void Dogs uses this, referred to in text as the "warp spasm" of Irish myth.
* Void Dogs "was first told by an Irishman, as called himself MacTwain."
* Void Domain all get their own chapters, each doing their own thing. Even with that, some characters never get a chapter but can still be seen doing things in the background.

* Void Domain: Arachne and other demons get to the mortal plane by summoning circles.
* Void Domain are a group of nuns dedicated to eradicating undeath and necromancers. They are fairly extreme in going about their duties.
* Void Domain are capable of destroying a person's personality and completely taking them over.
* Void Domain are explicitly stated to work as bounty hunters on occasion. The mother of one of the main characters is a retired mage-knight.
* Void Domain: A young mage is accepted into a school for magic. Necromancers, demons, and nuns all disrupt regular school proceedings. Completed in November 2017.
* Void Domain, Bloodstones are formed by magically crushing a living heart into a gem.
* Void Domain for comfort after being rescued from a pack of vampiric thralls.
* Void Domain for MMORPGs and, unlike almost all demons, is ambitious and driven to attain new power.
* Void Domain, Genoa puts her daughter, Juliana, through highly realistic combat. When Juliana finds a way to defend herself better, Genoa simply stops holding back quite so much.
* Void Domain has a primary Point-Of-View cast of about ten characters. Then there are all the background and side characters and plenty of main characters who simply do not get point-of-view segments. The cast page tends to grow every handful of chapters.
* Void Domain. Hugo looks normal, but several characters comment on his unnaturalness. Both are related to the resident mass killer and necromancer, Sawyer.
* Void Domain is fourteen years old at the start of the story. She drastically eclipses her peers in terms of power and magical ability. Alongside a fellow badass, she found herself in a handful of fights before her first year of schooling finished.
* Void Domain is the mother of one of the main characters. She was once a bounty hunter/mercenary and has countless scars to show for her efforts. None of her badassery has been lost since her more active days.
* Void Domain, most people have an affinity for one of the four classical elements and can't cast with the opposed element. In addition, there is Order and Chaos magic.
* Void Domain: Necromancy is the controlling of the dead and undead. Pyrokinesis is the controlling of fire. Aerotheurgy is the controlling of air. Clairvoyance, Clairsentience, Clairaudience, Clairalience, and Clairgustance are all mentioned as well.
* Void Domain says this of his daughter and Hugo after they screwed up one of his plans. Both paid dearly for their failures.
* Void Domain uses an abandoned prison to fulfill a similar function. Several demons infest the place under her supervision.
* Void Domain way to make portable, semi-permanent enchantments, so Eva does a lively trade in selling runes to her classmates.
* Void Domain, we have Eva, a fourteen year old girl who has dabbled in some magic that might not be socially acceptable in most respected circles. Before the story started, she struck up a friendship with Arachne, a psychopathic spider demon several times older than Eva.
* Void Domain, while Zoe's is a shortcut into a frigid dead-white "Between" space that everybody but her finds profoundly disturbing.
* Void Domain, winds up acting as a school bus for a handful of students when they decide to live a fair distance from the school.
* Void energy is corrupting, both physically and mentally. If the user cannot resist, they are driven insane by the whispers of the Void Lords and are twisted into pale, pathetic creatures consumed by hunger.
* Void energy users — Malzahar, Varus, Kassadin, Vel'Koz, others.
* Void Forge uses a sledgehammer in the first half of the book, and later upgrades

to dualwielding it with a warhammer.
* Void Moon, Cassie Black leaves the straight world behind to go back to her old life as a cat burglar. While the immediate motivation for returning to a life of a crime is the impending departure of her daughter, Cassie admits to herself that she really did enjoy being a criminal. She muses at length on the rush she always got while on a job.
* Void Moon containing $500,000. She succeeds but is horrified to find out that the "high roller" was actually a Mafia bag man and he was carrying not $500K, but $2.5 million.
* Void Moon, Karch tells this to the man he is murdering, right before Karch shoots him in the head.
* Void Moon which she thinks is a Vegas high roller's $500,000, only to find out that it's really $2.5M in Mafia money, and the Mafia wants it back very badly.
* Void of the Stars are quite prone to this trope. Especially when they have a religious civil war.
* Void of the Stars has the Boskops and Ethra'Hirel, who were actually native to Earth, but were spacefaring and inspired multiple myths such as the myth of Prometheus.
* Void of the Stars, nearly every species practices it in some way. Aside from the humans. It's illegal to genetically modify one of them.
* Void of the Stars species that want nothing more than to consume everything, and one species that is literally from hell. Even the Equestrian Empire has dystopian elements.
* Void of the Stars this trope. All their names seem to have a meaning.
* Void of the Stars use rainbow weapons. These are used to destroy starships and bombard planets.
* Void of the Stars when in trouble. Unless their respective creators actually want something bad to happen to them.
* Void. Rarely has an opposing element. Might be the source of Space or Gravity powers.
* Voidskipper are expensive and heavy but very important. They are made from artificial black holes that have been subjected to quantum entanglement and then inflated to produce a traversable path. They come in two common varieties, both spherical.
* Voidskipper even with less than a tenth of the galaxy actually settled, people's tendency to politic keeps them from unifying on any scale larger than a few star systems. Even an actual hive mind has a major problem with schisming.
* Voidskipper people make use of a wide variety of simple non-intelligent robots to perform menial labor and industrial tasks that people find stressful, repetitive and boring. These robots are often called "drones".
* Voidskipper requires a very large and expensive power plant and a very sturdily-built ship, meaning that for operating a Voidskipper to be economical it needs to be huge.
* Voidskipper series this is completely and utterly ubiquitous, to the degree that those who aren't backed up are a statistically insignificant minority. Custom bodies can be printed on demand in most locations, meaning that this is also a common means of travel.
* Voidskipper these are a common construction project for inhabited star systems, albeit in the originally intended "huge cloud of space habitats and power satellites" sense. When fully completed they can easily accommodate a population in the quintillions.
* Voidskipper these are portrayed in the realistic sense of lasers and highly relativistic particle beams. The shots travel at or very near lightspeed, they're effectively invisible until they hit, and the weapons have smart targeting systems that mean they almost never miss when used against terrestrial targets.
* Voidskipper while a Voidskipper can - strictly speaking - bash its way through to wherever it wants to go through sheer brute force, they can go vastly faster if they don't have to worry about running into stuff in the way. To facilitate this, chains of laser armed space stations have been built in interstellar space to clear

specified travel corridors of errant dust and gas. The net effect of this is to create an artificial network of lanes.
* Void Trilogy, more than one species/characters are revealed to have essentially weaponized this idea.
* Void Trilogy, the Anomine left their ascension mechanism behind, allowing Gore Burnelli to ascend and reason with the firstlifes to destroy the Void.
* Void Trilogy: the biggest and most efficient are company or government owned, but there is a significant number of leisure yachts.
* Void Trilogy, the race of 'Higher' humans use Energy and Mass Allowance (EMA) as a kind of currency. The majority of Highers live non-corporeally, but their EMA can be pooled as part of a 'Faction' or in smaller groups to effect change in both the physical and simulated realms.
* Void Trilogy The Void itself at the heart of the galaxy was created by the firstlifes, who were the first sentient life in the galaxy to evolve and it (the Void) had the potential to consume everything in the outside galaxy, which the firstlifes believed to be lifeless anyways.
* Void Troopers, you can savescum to save the galaxy by resetting time to the beginning of the alien invasion, getting Time Orbs that you can use to unlock new technologies to make your space fleet stronger.

* Voix de l’Algérie libre et combattante. It was really popular among the masses: author and psychiatrist Frantz Fanon noted that, before 1954, most of the auditive hallucinations involving radio among his Arab patients were negative but that, after 1954, these voices became positive and motivating. It went to the point colonial authorities had to restrict the sale of radios.

He tended to be outright downgrading and insulting towards "Diana Prince" and Etta Candy despite having worked well with them before and only trying to exclude Diana, who in that identity supposedly had no fighting abilities when going into a fight.
* Vol 1 presents Pluto as a place of constant night...and an atmosphere breathable by humans though the place is so cold ending up there is a death sentence for humans anyway.
* Vol 1 which allows everyone who drinks it to regain and retain their physical youth, thus eliminating death from old age, Etta also develops an anti-L-3 formula which causes the effects of L-3 to rapidly reverse until the imbiber is their actual age.

Nope, those respectively stalled at #2 and #11. They were actually "Black Rose" and the relatively forgotten "Die to Live".
* Volcanion And The Mechanical Marvel" after he was kidnapped by Alva, leaving his teammates Jessie and James to follow Ash and his friends in order to rescue him.
* Volcano, all the small children survive. And so does a small Jack Russell named Bill. Just in case that wasn't enough to assure you no innocents were harmed there is even a brief news report on vets setting up an emergency pet shelter.
* volcano alongside his Talonflame, each time getting rescued at the last moment before anything bad happens.
* Volcano has this in one part, with a news reporter standing right up against the line of barriers that are barely containing the volcanic lava.
* Volcano. In order to save the city from a volcanic eruption it is decided that a precision demolition of a 20 story building must be planned and executed in 15 minutes. Unfortunately, a random child wanders into the street directly in the path of the soon to be demolished building. The child is saved by Tommy Lee Jones sprinting (quite fast for an old man), grabbing the boy, then jumping behind cover.
* Volcano motorcycle to get to where Amy says the next eruption is building. The cop yells at him as he drives off.
* Volcano, none of the characters seem to understand the signs of a volcanic eruption even as ash, firebombs and lava flows are literally exploding forth and blanketing the city. At first it's understandable that people might be confused by what's happening, but eventually the ignorance becomes so unbelievable that it seems the mere concept of a volcano or even lava is almost fantastical.
* Volcano of volcanoes is an obscure geological fact completely unfamiliar to the public. Although that's probably less "people don't know what a volcano is" and more "no-one expects a volcano to erupt in the middle of Los Angeles."
* Volcano Planets rocky planet will look like this in the first few hundred million years of its formation, so expect to see a lot of them. The air almost certainly won't be breathable, though, so bring your ventilator mask.
* Volcano's Wrath, it's "Children. They make a mother proud" when the kids rush off to stop Sly Sludge.
* Volcano: The movie is about a volcano suddenly emerging from the La Brea tar pits, so it doesn't get to loom threateningly in the background.
* Voldemort also framed a House Elf named Hokey for poisoning her mistress with the same methods he used to frame his uncle. The Ministry didn't bother investigating the situation any further
* Voldemort also inadvertently marks Harry with a scar when he tries to kill him with the infamous Killing Curse; this serves as a mental conduit, a sign of their connection, and an indicator of his power and mood.
* Voldemort and Harry get into a "Do not!"/"Do too!" exchange about whether Voldemort whines.

* Voldemort Goes Back To School when Snape catches "Evan" raiding his potion stores, "Evan" forces him to let him go without punishment or telling anyone else lest a flashing neon sign reading "Dumbledore Took My Virginity and I Liked It!" appear on the back of Snape's trousers.
* Voldemort hears half of a prophecy about a boy about to be born who will be his nemesis. With two possible choices, Harry Potter and Neville Longbottom, he chooses Harry, but in the process of trying to kill him, gives him both the power to defy him and a reason to. What's the best way to turn an otherwise unimportant young wizard into your mortal enemy who's well-equipped to defeat you? Well, murdering his parents and spending the better part of a decade sticking him in convoluted death traps is not a bad start. What's more, Dumbledore hints that not all prophecies have to be fulfilled. The only reason Harry is going to fulfill the prophecy is that
* Voldemort himself as a student. Only Dumbledore recognized that one of the darkest wizards of all time was right under their noses. It is also implied that he was this during the First Wizarding War to many, that is, until he showed his true colors.
* Voldemort himself in his final moments, yet refused to divulge any information about Harry's whereabouts.
* Voldemort himself qualifies, seeing how he was voted the #1 villain in a poll that decided which character was the best literary villain.
* Voldemort himself sometimes indulges in a laugh that narrator-Harry describes as "humorless and insane" - usually just before or after killing someone.
* Voldemort is described as being very tall, thin, and bony, with chalk-white skin and spidery hands.
* Voldemort is evil, but also brilliant. At the end of the fourth book, he delivers a speech to his minions for a whole chapter. It basically consists of, "Let me tell you in excruciating detail
* Voldemort is stated to not have died, but this is only true in the most technical of senses. After his attack on the baby Harry, he became something that was described as 'less than the meanest ghost', and was capable of possessing bodies. While he might not have died by the strictest definition of the Potterverse, he could easily trick people into thinking that he had come back from the dead. In this case, any wizard with Horcruxes (Or alternatives), could put on a quite convincing show of dying and coming back. There's the problem that dark magic ruins your body. You do NOT get a good following looking like a snake, and cursing and subjugating your followers. You might get a cult of power hungry crazies, but you probably wouldn't ever be mainstream.
* Voldemort on the other hand seems to have been a narcissist ever since he was a kid.
* Voldemort put Harry's parents into suspended animation in a pocket dimension for thirteen years instead of killing them outright. Lily called James a man child in exasperated affection when he gave Snape a "welcome back present" by turning his robe pink.
* Voldemort recruited Death Eaters straight out of school the first time round as a matter of course. He also pursued the Hogwarts post of Defense Against the Dark Arts teacher for this same purpose.
* Voldemort respects, allowing the school, besieged by his forces, time to mourn their dead.
* Voldemort's Children definitely invokes this trope, especially given the nature of the Curse's targets.
* Voldemort's Hair-Trigger Temper frightens even Bellatrix. He can go from
* Voldemort's mother, was constantly terrorized and abused by her father and brother for being unskilled at magic and her only reaction is to cower in fear.
* Voldemort's name, and nobody else reacts: once when he sarcastically tells Hermione, "I forgot we’ll be hunting down Voldemort in a mobile library," and later when he asks Remus Lupin, "Why didn’t Voldemort declare himself Minister for Magic?"
* Voldemort spends the series attacking Harry and messing with his emotions via

invading his dreams.
* Voldemort's rebirth ceremony goes wildly askew, making him (a) a woman and (b) infatuated with Harry. The new Dark Lady considers, and ultimately rejects, "Mrs. Potter," "Mrs. Harry Potter" and "Mrs. Harry Potter-Voldemort."
* Voldemort stuck the brain of a mook who failed him in a glass globe attached to an eye and a large number of flytraps. The eye acted as a surveillance system while the plants supplied enough nutrients to keep the whole thing in operation.

* Voldemort trips over a peacock and vents his rage by using the Killing Curse on it, sending an explosion of feathers into the air. He dies by choking on one.
* Voldemort uses his mutant ability to pull the former's heart out of his chest.
* Voldemort who used his undeveloped magic to traumatize his peers, even if the staff could never figure out how he did it.
* Voldo is seemingly incapable of speech, able to fight trained warriors using only smell and hearing and contort himself in ways that just don't seem possible, and has
* Vole, a Jägermonster of her taste. More specifically, from hearing his jubilant, bloodthirsty anticipation regarding a war that would devastate the continent.
* Volere Volare: the head-tilt is inspired not by the porn movie playing offscreen but by the bizarre (to say the least) sound effects applied to same by a Foley artist who normally does cartoons.
* Volere volare): The main character of this Italian film is the sound effects guy for Italian dubs of American cartoons. At one point, he's been asked to dub a serious live-action love scene, and fills it with zany cartoon noises.
* Vole, the defector Jäger, tried to kill Bill and Barry because they were soft (as in they were heroes instead of the nutters the Hetereodynes usually produced). He also wants a new pack of crueler, meaner, more psychotic Jägers to burn down Europa with, as he sees the current set of monstrous super soldiers to be pathetic lap dogs. However, he ends up getting his butt kicked pretty often and after
* Volga-Volga: When singing the big group song at the end, the cast starts by telling the audience "Do not go rushing out of the theater."
* Volhynia. The Ukrainian administrator of the village serves Poles, Russians, Germans, and finally Ukrainians with the same level of shameless flattery and enthusiasm.
* Volibear is usually seen in the top lane, but he is capable of jungling.
* Volkite weapons are another Imperial technology lost to the ravages of time. They're basically heat rays so powerful that organic targets are instantly turned to ashes in a fiery conflagration. Even more impressively, the effect can chain to other nearby targets. These days, what few Volkite weapons remain functional are sacred relics that only the most elite or heroic warriors are allowed to carry onto the battlefield.
* Volkner has this reputation as a gym leader. It doesn't translate very well to the anime, though, considering the regional conference typically requires its entrants to defeat the gym leaders to make it in. And that's before he got bored of crushing everyone's dreams and started giving away his badges for free.
* Volkoff himself is a highly-unstable and dangerous killer who scares and unnerves his underlings and anyone else he deals with. He's also so thoroughly
* Volkshalle. Also planned was a ridiculously huge triumphal arch, more than triple the size of the Arc de Triomphe in Paris...with dwarfing the French arch being the sole purpose for its size.
* Volkshalle, which Hitler greatly admired. However, it was so big that the water

vapor exhaled by its occupants would have created clouds and rain — assuming the entire building hadn't already sunk into the swampy ground. In Berlin, there remain a few gigantic concrete test cylinders the Nazis cast to see if the soil could support the Volkshalle's weight. Proving real life has a sense of dramatic irony, these cylinders have been steadily (albeit slowly) sinking for sixty years.
* Volkssturm. By the end of the war, nearly all of Germany's prime fighting men were either dead or captured, so they were reduced to recruiting underage boys and old men - anyone who could hold a rifle basically.
* Volkswagen ads spoof the exact wording of "sign and drive" car sales by having someone drive a car while simultaneously trying to sign a contract. This then segues into their "Sign,

* Volkswagen could have not existed at all, if not for the British major Ivan Hirst reopening the KDF-Wagen factory after World War II and renaming the product to "Volkswagen Type 1", colloquially known as the Beetle.
* Volkswagen emissions scandal de facto most elsewhere, caused Volkswagen stock to drop by a third, several higher-ups resigned or were suspended, and ended up with a 2.8 billion dollar fine. One wonders why they thought that would be less expensive than actually bringing their cars up to standard.
* Volkswagen had a print ad for the Polo which showed a car with every part a different color (red doors, yellow hood, blue roof, etc.). Enough people requested a car like that that VW made the Polo Harlekin.
* Volkswagen owns Audi, Bentley, Bugatti, Lamborghini, SEAT, Skoda, Ducati and Porsche.
* Volkswagen Passat ad. It is immediately obvious what they are selling, and what feature you'll remember.
* Volkswagen's ad campaign for their car, the Routan, is just...baffling. Apparently, according to
* Volkswagen Santana, which is basically the 1981-1988 Passat with some slight changes and engine changes.
* Volkswagen used a mild example of this trope when advertising the original VW Beetle in the US, including a famous one with basketball's Wilt Chamberlain stating, "They said it couldn't be done (fit Chamberlain into a Bug)."
* Volkswagen was the first automaker to acknowledge and try to exploit this periphery demographic with the 1975 release of the Golf GTi, a high performance version of the Golf hatchback. It was a resounding success and inspired other automakers to make high performance versions of their economy cars.

* Voltaire. "In a glen beyond the castle wall/ There was a tinker/ And he was a thinker/ The smartest man in all the world/ He made a mechanical girl." Especially when it turns out what the girl is capable of doing...
* Voltaire in the musical version with the song "You Were Dead, You Know."
* Voltaire" is a ballad assuring the child that even if there are monsters, the child is too badass for the demons to eat.
* Voltaire is a concept album set at the turn of the industrial revolution. One song has a man going off to sea to become a merchant trading in imported goods, and his wife waiting for him. Other songs imply he has had other partners while at sea, but that she is his true love, in a kind of "that was just sex, you own my heart" kind of way.
* Voltaire is easily the punniest. Featuring an entire song's worth of body part-related puns.
* Voltaire is through the point of view of a "torches and pitchforks" mob ("Stakes and torches, scimitars and bayonets, scythes, pitchforks a sickle with a sharpened

* Voltaire's old band) uses this as its punchline, describing the efforts of a Jew to convert the eponymous goi into "a coin-operated Jew, just like me and you."
* Voltaire song "Stuck With You" is narrated by a married couple venting about all the things each partner has done to piss the other one off and how much they drive each other crazy. At the end of the song, after this long litany of complaints, they mutually agree that "I'm not sad I said 'I do'/I'm just glad I was stuck with you."
* Voltaire's response when someone told him that coffee was "a slow poison": "I think it must be slow, for I have been drinking it for sixty-five years and am not dead yet."
* Voltaire's song "Bomb New Jersey" (the other Voltaire). However, there are enough in-jokes that only people from New Jersey would get that it's hard to be offended. Voltaire grew up in New Jersey (and hated it), and mentions it in more then one of his songs. For example: "Hell in a Handbasket".
* Voltaire's song "God Thinks" is often misinterpreted as being anti-religion, when it is actually against people who use God and/or religion to spread their own agendas.
* Voltaire's song "When You're Evil" is a classic I Am Song for any villain.

* Voltorb and Electrode. They both explode literally at anything that angers them. Electrode is the worst of the two, though...there's a reason it's called 'bomb ball'.
* Voltorb is implied to be a Poké Ball turned sentient, through an unknown cause.
* Voltron attacks them during the transformation. By the next episode, they've figured out how to avoid the problem in the future: by combining behind the protection of the castle's force field.
* Voltron but new animation, Sven actually gets one last chance to pilot Blue Lion before the second finale.
* Voltron Force does this: Daniel is Asian, Vince is black, and Princess Larmina is white.
* Voltron Force had Lotor as this in the penultimate episode, leaving his minion as the final boss.
* Voltron Force hit the airwaves in June of 2011, reviving the the series with several nods to the original in the first few episodes alone.
* Voltron Force, hopped up on haggarium, declares that "This is the day that I—" and gets blasted by Voltron's new guns. When he is later revived back at his castle, the first thing he says is "—destroy Voltron!" ... and smacks face first into a wall.
* Voltron Force, Hunk builds an enormous contraption that turns out to be a jet fuel-powered grill to cook a side of ribs bigger than he is. It instantly burns the meat to ash, then blasts itself through the roof and explodes.
* Voltron Force is a villainous example, as he confronts the Voltron Force personally a few times.
* Voltron Force, is less interested in actually saving the universe from King Lotor, and is more concern in securing more power for himself, and spends more time and resources fighting the Voltron Force, and oppressing anyone who is against him.
* Voltron Force Voltcoms can form twin pistols. When it's Lance's turn to form Voltron Red Center, his Blazing weapon is a pair of high-powered energy pistols.
* Voltron had 22-minute episodes that consisted of about 16 minutes of original footage and 6 minutes of the Lions leaving their lairs, forming Voltron, etc.
* Voltron had the Blazing Sword. It killed pretty much everything in a single hit

and was more effective than Voltron's other weapons, and in the first episodes it was even used early in a fight. There is very little reason for the crew to not be slicing up Robeasts right off!
* Voltron has had numerous adaptations, primarily based on variants of the original series.
* Voltron, its original version, lacked. This feature made it THE show to air to showcase the Stereo capabilities of most affiliate stations and systems.
* Voltron: Legendary Defender, Adam. At San Diego Comic-Con 2018, the show's producers revealed that the two were together for years, and were on the verge of getting engaged when Adam broke up with Shiro.
* Voltron: Legendary Defender: After Allura becomes a paladin, she is given a bayard that becomes an energy whip.
* Voltron: Legendary Defender, all the while insulting his smug attitude every chance she gets.
* Voltron: Legendary Defender, Allura did not have any real option at the time.
* Voltron: Legendary Defender. Allura's first reaction upon seeing a human (Lance) is that his ears are hideous.
* Voltron: Legendary Defender, Alteans measure time in "ticks", which are slightly longer than seconds. The team spends a little time trying to work out the comparison. The second season expands on this: A decafeeb is somewhere between a years and a decade, a quintant are roughly a day, a varga seems to be about an hour, and a dobashes is more or less a minute. After a while, the Paladins manage to pick up on it.
* Voltron: Legendary Defender anime. However, he was quickly brought back in Season 3, as the toy company execs were worried that killing off Shiro would jeopardize his action figure sales.
* Voltron: Legendary Defender are just really common (which would be in keeping with the technology displayed by the Altaians and Galra).
* Voltron: Legendary Defender as a love interest, her hair is a few inches longer—just long enough for it to be obvious whenever she moves.
* Voltron: Legendary Defender before things start getting really heavy.
* Voltron: Legendary Defender began only a year after the US release, but the dub of seasons 3 and further took a longer wait to be released than the original. The last two seasons were released on the Italian Netflix feed with subtitles only in January 2021, a little more than two years after the original release, with the proper dub being released only two months later.
* Voltron: Legendary Defender: Besides Earth, the entire universe uses Altean units of measurement (presumably enforced by the Galra Empire). The human characters get used to using them pretty quickly, but we're never given an explanation for any of them except for the tick, which is slightly longer than an Earth second. This lets the show keep things like time and distance vague while making the characters sound like they know what they're talking about.
* Voltron: Legendary Defender, but he also voiced the current Pidge's older brother Matthew.
* Voltron: Legendary Defender, but he was already this close to Keith before the start of the series.
* Voltron: Legendary Defender, but only because he's driven away all his henchmen by acting like a selfish prick, and knows he can't fight Zarkon alone.
* Voltron: Legendary Defender, but the few on-screen deaths don't involve any visible injury, even from people being slashed with blades or shot with a variety of energy weapons.
* Voltron: Legendary Defender, Coran attempts to spoon-feed Shiro his lunch like a baby. This is Shiro's reaction.
* Voltron: Legendary Defender ends up in critical condition after his most recent battle against Voltron.
* Voltron: Legendary Defender, especially against the rabid Keith/Lance shippers.
* Voltron: Legendary Defender: Even the most straight laced of the defenders of the universe have their moments where they get involved in their teammates' antics.
* Voltron: Legendary Defender find themselves in a time pocket. They spend two

years there before escaping, only to find that no time has passed in the real world.
* Voltron: Legendary Defender gets promoted to this trope in Season 7 with the introduction of Earth's battleship the IGF Atlas. Initially a battlefield promotion due to him being the only Galaxy Garrison officer with any experience commanding a ship in a space battle, he's gained the rank proper by Season 8.
* Voltron: Legendary Defender half the original pilots and they're still breaking in a new flight roster.
* Voltron: Legendary Defender has a robotic arm that he acquired during his time as a prisoner of the Galra.
* Voltron: Legendary Defender. His voice actor, Josh Keaton, even noted in an interview that he channeled his own experience as a father into his portrayal.
* Voltron: Legendary Defender immediately after the reveal. The show culminating in him marrying a random background extra, rather than anyone he actually knew or had chemistry with, was also heavily criticized by gay fans.
* Voltron: Legendary Defender in Episode 1 when Lance tells Keith to "shut your quiznak!" (though in that case, the fans debate on whether or not the specific context Lance was using it in made it more offensive than it normally would be given that the contexts they use it in indicate it's closer to the f-word or s-word in meaning and attempting to use it as an a-word substitute as Lance was is beyond inappropriate.)
* Voltron: Legendary Defender: In "Fall of the Castle of Lions", Lance complains that Nunvil, the drink Coran is serving, "tastes like hot-dog water and feet".
* Voltron: Legendary Defender in season 1 and 2 until Keith takes over for season 3 before handing it back to Shiro in season 4. However, Team Voltron would have a true Sixth Ranger in season 4, when Pidge's brother Matt joins the team, given that he becomes literally the sixth hero as Keith joined the Blade of Marmora during the season.
* Voltron: Legendary Defender: In the original version, Sven ends up having a romance with Romelle. In this incarnation, Shiro is revealed to have had a boyfriend named Adam on earth. It was confirmed in a convention that Shiro is gay.
* Voltron: Legendary Defender in the Space Mall, Pidge come across a bathroom but as the sign is written in an alien language and the people going in and out are aliens without clearly defined genders she decides to hold it. Hunk seems to momentarily have the same dilemma when looking for a hiding spot. However, Keith does not seem to have had any problems as he comes out of one side quite casually.
* Voltron: Legendary Defender introduces Leifsdottir in Season 7. Alongside being intelligent with a focus on numbers and awareness of spatial directions, Leifsdottir is shown to misinterpret others' intentions, such as giving a description of the weather when asked for a status report during battle.
* Voltron: Legendary Defender is considered to be a major improvement over the filler-heavy season 4, due to revisiting storylines such as Operation Kuron, Pidge's search for her father, Keith's Galra lineage, and Haggar's memories. Lance and Hunk being de-flanderized was also well-received.
* Voltron: Legendary Defender is full of characters who are excellent pilots, but special mention is given to Keith, who was a pilot prodigy and top of the class at the Garrison before being expelled due to disciplinary issues.
* Voltron: Legendary Defender is shown to have heavier armor and more raw power than the other Lions, but is also the slowest of the quintet.
* Voltron: Legendary Defender is that Pidge is actually a girl who joined the Galaxy Garrison to look for information about her missing brother. "Katie" had already been caught snooping, so she cut her hair and created a male identity to hide better.
* Voltron: Legendary Defender: It's mentioned a few times as having killed all previous test subjects, but Zarkon's obsession with obtaining the Black Lion drives him to ignore all warnings and use it anyway.
* Voltron: Legendary Defender, just made the whole thing even less appealing.
* Voltron: Legendary Defender, Keith catches Allura this way when they run into each other while both trying to secretly escape the team.

* Voltron: Legendary Defender, Keith meets Axca in the belly of a weblum and initially thinks she is hostile when she aims her gun at him. It turns out she was aiming it at the monsters behind him, thus saving his life.
* Voltron: Legendary Defender, Lance and Keith are in a control room in the Balmera, trying to close the hatch. At one point, Keith puts his hand on the handprint and the hatch closes. Lance asks him how he did, and Keith responds that he doesn't know.
* Voltron: Legendary Defender, Lance gets trapped in an airlock and it opens. He's still able to yell and cling onto the door for several seconds before Keith saves him.
* Voltron: Legendary Defender, Lance is able to milk the cow he and he fellow Paladins got from the shopping mall in the far reaches of the universe, despite it very likely having no mate or offspring.
* Voltron: Legendary Defender legal) shopping mall. This is especially amusing when every other Zarkon-controlled area up until this point had been despotic hell-holes.
* Voltron: Legendary Defender of the classic '80s anime. The series proved the action-oriented animation wasn't dead, despite the drought of it beforehand, and open the door for general audiences in a similar manner to the above.
* Voltron: Legendary Defender of the team but is also a great chef, especially when he improves the Vrepit Sal restaurant in "Space Mall" after originally being held as a dishwashing prisoner for unable to pay for the food he ate and thought they were free samples.
* Voltron: Legendary Defender, Pidge leaps onto Shiro's head when they run into an alien.
* Voltron: Legendary Defender, Prince Lotor has his four top generals on his side named Acxa, Ezor, Zethrid, and Narti.
* Voltron: Legendary Defender reveals that Shiro used to have a boyfriend prior to leaving Earth. He's not stereotypical in any way whatsoever, to the point that it was once extremely popular to ship him with his female teammates since nobody suspected otherwise.
* Voltron: Legendary Defender, Romelle's younger brother Bandor was among those "chosen" by Lotor to be taken off to a special village to be cleansed of his life. We then cut to later on, where he managed to escape, tell Romelle she was right, and then die in her arms as a withering husk.
* Voltron: Legendary Defender, seems to be especially fond of using it on social media.
* Voltron: Legendary Defender's second season. He spots a mermaid and wants to ask her for help finding the rest of the paladins, but Hunk refuses to follow him (at first).
* Voltron: Legendary Defender staring up in confusion, before changing to annoyed expressions.
* Voltron: Legendary Defender stated that the final straw that got Keith kicked out of the Galaxy Garrison was that he punched a teacher, specifically Iverson.
* Voltron: Legendary Defender that can destroy whole sections of a massive space station.
* Voltron: Legendary Defender. The episode plays out with some tension, with it never quite being clear whether the host is sadistic and insane or some kind of benign benefactor, but ultimately the heroes all survive the ordeal and are returned to their regular world/continuity—shaken, but with a better understanding of the threats they face next. So...not exactly an episode premise that is likely to have repeated too closely without the second case occurring with some "inspiration" from the first.
* Voltron: Legendary Defender, the Galra soldier Haxus falls from a high catwalk after Pidge trips him up. He tries to grab Rover for support, but Rover deactivates and they both fall to their presumed deaths.
* Voltron: Legendary Defender, the only food initially available on the castle ship is a strange green goo. Hunk (a human) takes charge of making the meals more edible.

* Voltron: Legendary Defender: The paladins that form Voltron take up this dynamic for some time beginning in Season 3 as a shoutout to the formation in previous continuities in the franchise.
* Voltron: Legendary Defender, there are countless realities that are the result of diverging paths at different points in time. It's implied that Slav has the ability to see all these different realities, along with future ones, and is easily overwhelmed by them.
* Voltron: Legendary Defender thinks. Mutual pining ensues between the Galran prince and the sharpshooter.
* Voltron: Legendary Defender to be helmed by the villainous Emperor Zarkon.
* Voltron: Legendary Defender to have some dinner and enjoy a show. What looks like a dancing mermaid behind a curtain (which gets Lance grinning) turns out to be an octopus with a smaller octopus on top of its head. Lance's reaction turns from delight to disgust.
* Voltron: Legendary Defender was renewed for one more season after a total of 65 episodes across seven seasons, totalling 78 episodes.
* Voltron: Legendary Defender, when it was revealed that he was supposed to have been removed from the series after the second season finale, but was brought back by Executives due to his quickly growing fanbase.
* Voltron: Legendary Defender, when Lion Forge was purchased by Oni Press, the new owners elected to cancel the series.
* Voltron: Legendary Defender when the the crew picks up Kaltenecker the cow in an alien store selling Earth merchandise.
* Voltron: Legendary Defender which depicted the entire team as white.
* Voltron: Legendary Defender, which provide each Paladin with a personalized weapon, and can activate additional functions when Voltron is formed.
* Voltron: Legendary Defender, while the imperial soldiers wear masked helmets covering most of their faces.
* Voltron: Legendary Defender who essentially went back into the closet as part of her disguise. Other fans interpret Pidge as nonbinary because her voice actress, Bex Taylor-Klaus, is nonbinary.
* Voltron: Legendary Defender, who is of German Jewish descent, respectively.
* Voltron: Legendary Defender with English accents despite never having been to Earth.
* Voltron: Legendary Defender with great grace. She also pilots her Lion with more composure and poise than her fellow Paladins once she understands how to use it.
* Voltron: Legendary Defender, with the protagonist role often leaning more towards Keith, Shiro, or Allura.
* Voltron: Legendary Defender: Zarkon gives the task of finding the traitor on his flagship to Thace, who is the Blade of Marmora's agent on the ship.
* Voltron: Legendary Defender: Zigzagged. Emperor Zarkon was viewed as the main villain of the series but was presumably killed in the Season two finale. However, he was revived in the Season 3 finale but met his defeat in the season 5 preimere.
* Voltron—it's where the Castle of Lions was hidden for a long time—but not where Allura is from.
* Voltron never formed Blazing Sword until after the Ro-Beast and Voltron had stomped half the countryside flat and Voltron was getting its ass handed to it on a big Roboplatter. However, this was for a very good reason: Voltron could not defend itself while wielding the sword, so it had to fight until the robeast was incapacitated or gave them an opening. In an early episode, Voltron Force faces a new Juggernaut robeast built by King Zarcon, not Haggatha's sorcery. They come out with Blazing Sword already formed, but get roundly trounced. For three days, the Royal Army holds off the monster while Voltron trains, and in a huge battle, the individual Lions beat down the robeast until it can't fight back, then form Voltron, blast it a few more times for good measure, Form Blazing Sword, and dispatch it.
* Voltron once had the good guys and the bad guys play American football.
* Voltron portrays him as a thoughtless lout and ends with Allura desiring to kill him for being lousy in bed, and another fic has Keith abusing Allura so she can run

into Lotor's arms.
* Voltron, Prince Lotor/Sincline ties up Princess Romelle/Amue this way.
* Voltron that can allow the team to target the enemy. Eventually, he finds that his lion somehow has a clairvoyance sensor mode that may be slow to create a clear image, but it still allows them to pinpoint the exact target on the enemy and hit it hard enough to not only make it let its prisoner go, but also knock out its stealth mode long enough for the team to unite into Voltron and take it down.
* Voltron that the war between Arus and the Drule Empire has been going on for so long that nearly everyone has forgotten why or when it started, or that a mysterious third party is somehow involved in it.
* Voltron: The American release of the Vehicle Team has just about every enemy unit, and most friendly units, as robots. The number of "robot attack ships" and "android stormtroopeers" was staggering. This was done to follow the "nobody can die in cartoons" standard against animated violence on TV at the time.
* Voltron: the Black Lion has wings, and that means that Voltron does as well. In neither instance do they actually do anything. They certainly don't affect either robot's ability to fly, the other lions can fly just as well without wings.
* Voltron: The Castle of Lions comes under attack multiple times in the course of the several series.
* Voltron: The End" has Sgt. Lance Rainier (Timothy Omundson) wake up after some kind of accident and discover that he is likely the only survivor of the entire Voltron Force. His Red Lion is critically damaged with only 10 minutes of oxygen left and only enough power to send a single message. He starts a recording, explaining that the unthinkable has happened and that the Galaxy Alliance must now prepare for King Zarkon's attack. As he sends it out, the eyes of the Red Lion wink out, the computer is able to tell him goodbye before shutting down.
* Voltron, "The Lion Has New Claws", Princess Allura gets a spanking from Nanny for putting herself in danger.
* Voltron). The monster-of-the-week attacks one of the individual units that make up the left leg mid transformation, causing it to crash. This leaves the two other units that make up the leg flying solo while the main robot is very off balance. And while it ultimately fails, it does have the sense to try and neutralize the units that couldn't combine and prevent the combination sequence from completing.
* Voltron: The Third Dimension, during a climactic battle prior to the start of the series, Lotor was badly injured and had to be rebuilt as a cyborg.
* Voltron: The Third Dimension the titular robot travels to another dimension and transforms into Stealth Voltron. It isn't a permanent upgrade however as Voltron returns to normal when returning to its home dimension. It does however transform into Stealth Voltorn every time it returns to the other dimension.
* Voltron translation, the pilots were themselves android stormtroopers.)
* Voltron. Voltron I (Vehicle Voltron) and Voltron III (Lion Voltron) both used the same combination spiel. But Voltron I's head was a separate piece from the torso and piloted by the main character. It doesn't make sense in Voltron III to say "And I'll form the head!" because the head is part of Black Lion... though the neat close-up on the head makes up for it (and that shot is probably why the World Events team thought the mirrored spiel still "worked").
* Voltron with a proposed animated series based on the ancient Oriental Zodiac called "Z-Force".
* Volturnus, Planet of Mystery. Several examples can be found inside the Eorna underground complex.
* Volume 11 has Rias transfer power to Issei with her breasts, causing them to shrink, and causing them to melodramatically declare their love for each other, prompting the Occult Research Club to defend the
* Volume 14 of New Testament introduces a character with many similarities to Touma, Kamisato Kakeru. It turns out that he had built up a harem for himself amongst a group of women that he saved using his World Rejecter power. However, in a strange twist to the harem genre, Kamisato
* Volume 1: After Paula was arrested and handed over to the authorities she somehow managed to construct an entire elaborate lair complete with throne and all the

torture devices a girl could want in the basement below her cell, which could be accessed through a hidden hatch in the cell itself.
* Volume 1: A large female gorilla escapes from the zoo and starts attacking people and property. She is eventually subdued by Wonder Woman, and when most are pushing for her destruction due to just how dangerous she is Prof. Zool asks permission to use her in an experiment, which ends up turning her into the human villain Giganta.
* Volume 1: Bobby Strong, Glamora Treat and Etta Candy accompany a professor to a recently opened ancient Egyptian tomb and discover that it is full of still functioning traps, though as the "mummy" meant to be entombed there is some variety of immortal and living there with a whole bunch of minions these traps have been maintained through the ages.
* Volume 1: Byrna Brilyant's motivation to become a supervillain. Despite being a genius roboticist who has also perfected her chemist father's "blue snow" she hides her abilities in order to hold entire communities hostage for money as the "Blue Snowman", and once she's stolen everything from those who live there she discards them.
* Volume 1: Circe raises Artemis—the Amazon Champion prior to Diana—from the dead as a skeletal figure bent on revenge for her people abandoning her to die alone in the outside world without a proper burial.
* Volume 1: Doctor Cyber had deflector shields built into her armored suit in the Pre-Crisis continuity, before she was turned into a minor annoyance instead of a major villain Post-Crisis.
* Volume 1: During the Golden Age of Comics the Amazons of Paradise Island were made up of women from throughout history who had ended up on the island's shores one way or another and chose to remain there taking the oaths and going through training to become Amazons. Many of these women were refugees, for example Paula von Guther's daughter who fled from Nazi imprisonment as soon as Wonder Woman made it possible.
* Volume 1 focusses on the main villain being Roman Torchwick, a petty thief who runs afoul of
* Volume 1 Impossible Tale in #111 a massive shark tries to take a bite out of Diana while she's floating on her back near Paradise Island. Renno is able to warn her of its approach, and get knocked for a loop by the shark himself, in time for her to dodge it, grab it by the tail and toss it away.
* Volume 1: In issue 107 Wonder Woman fights an alien named Zugggm whose people are thinking about invading earth.
* Volume 1 that lives on a spire near Paradise Island and Diana has to rescue him from the bird.
* Volume 1, the Pre-Crisis Amazons had a scrying device with which Hippolyta could view anything on earth, or elsewhere in the cosmos, with ease if she so desired. She mostly used it to keep an eye on her daughter's exploits.
* Volume 1: The Saturnian Arc had a rather heavily foreshadowed betrayal that never actually happened. Eviless formed Villainy Inc, and failed to actually escape Reformation Island or overthrow Hippolyte and then Marston died, that was his final issue and no subsequent writer event mentioned any of the Saturnians.
* Volume 1: The Saturnian Empire consists of the bodies orbiting Saturn the citizens can live on, and those which they can't but can mine and is looking to expand by conquering earth. The Empire runs on fear and harsh consequenses and has been paying slavers to abduct humans for use as slave labor.
* Volume 1 the warden's son Freddy is an absolute menace to his older sister Mabel, whom he calls names and keeps sneaking up and lassoing while she's trying to read and go about her day since he's in a cowboy phase.
* Volume 2: Ares finds Hermes annoying due to his ridiculously upbeat personality. Luckily for Hermes his bloodthirsty big brother seems slightly more fond of him than he is of most of their siblings, Ares has even rescued him once, though Ares was getting more out of the bargain than just Hermes:
* Volume 2: Circe had an elaborate home filled with her "pets" on her own island from which she ruled over a nearby island whose populace feared her powers. Her first meeting with Wonder Woman put a major kink in her way of operating.

* Volume 2 Diana learns how to use a bit of magic to change from her civilian gear into her Wonder Woman costume by spinning.
* Volume 2 Episode 8 has the girls going out on their first mission. Although morale is low, Ruby cheerfully informs them that they will be accompanied by a veteran huntsman. Cue them learning that the huntsman in question is
* Volume 2 involves Team RWBY attempting to uncover what the White Fang and Roman Torchwick are up to, given that it's very strange for a
* Volume 2 is almost always accompanied by guards wearing face-concealing helmets, and the empire's fighter pilots' faces are likewise hidden.
* Volume 2—Cassie is first introduced she accidentally turns on an "unstoppable" giant murderous automation that her mother was inspecting as the museum had acquired it under the impression it was a large ancient bronze statue from Crete. The this is evidently ancient, and also fully functional and malevolent but fails to live up to it's "unstoppable" reputation.
* Volume 2 sells the items he then uses to frame his "villains" and the reason he ends up on the mob's payroll.
* Volume 2: Tao Jones uses her personal force field to protect herself and reflect Bumblebee's electricity based attack back at her.
* Volume 2: The Sangtee Empire is a galactic empire where chattel slavery is legal and the combined government and state religion control population through the outlawing of natural procreation and women. Any trespassers to the empire are enslaved, with the women sent to border planets to mine in harsh conditions until their deaths. Wondy starts up a resistance that forces the empire to abolish slavery.
* Volume 2: When Hera knocks Themyscira out of the sky and destroys its magical protections many of the, often incredibly dangerous, animals in their reserve and zoo escape and the Amazons have to recapture them to prevent many more deaths.
* Volume 2: When Themyscira was reinvented as a set of floating islands its culture took a turn back to it's Paradise Island roots as a place of scholarly pursuits and refuge, with many of the more alien-looking extraterrestrials stranded on earth who faced persecution elsewhere moving to the island.
* Volume 3 #10: faced with a mutant cobra monster that's constantly respawning via eggs, Chase told Victor (a cyborg) to swallow the mutant cobra eggs in order to destroy the mother. Chase admits that he didn't know that it would work, but figured in the worst case scenario they could rebuild Victor.
* Volume 3 Diana does some traditional courtship rituals with her boyfriend Nemesis; he asks how a society of only women has such things.
* Volume 3 ends with Ruby, Jaune, Ren and Nora joining forces to travel across the continent of Anima together, searching for answers to who the villains are and what their plans are. In
* Volume 3 ends with the climax of Cinder's villainous plans and the reveal that she's just

* Volume 3 finally gives Qrow a proper introduction, drunk off his ass and complaining that the Vytal Tournament is a televised mess.
* Volume 3's sudden escalation of darkness in the show contributed to many fans struggling to accept the death of fan-favourite villain, Roman Torchwick; he was
* Volume 3 starts with Ruby talking to her mother's grave, and the shot of the crows flying into the setting sun is deliberately designed to form the shape of Monty's artistic personal signature.
* volume 4, Diana, being kidnapped by Hades and forced to marry him, uses the Lasso of truth to prove that she loves him. She then says that she loves everyone, even Hades, unconditionally.
* Volume 4 had the Higinbana waitress with the unfortunate tendency to encounter dangerous people.
* Volume 4 introduces the farm boy Oscar Pine, who suddenly finds himself
* Volume 5 5 accidentally created a super-bomb while analyzing a mystical statue.
* Volume 5 focusses on the various plans to either destroy Haven Academy and steal its mythical Relic of Knowledge or protect both the school and the Relic it guards.

Yang confronts her mother, who is revealed to have the ability to create portals to people she has created a 'bond' with. She has three known connections: her daughter, Yang; her brother, Qrow; and her former husband, Taiyang. Yang uses Raven's ability to connect to Qrow to locate her sister, Ruby. During the volume finale, Yang and Raven have a confrontation over the fate of the Relic of Knowledge, and Raven abandons both the Relic and her daughter, escaping from the school by a portal, despite the fact that two of her portal connections (Yang and Qrow) are in the same building as her. The stinger shows an idyllic scene of Taiyang watering his plants at home. When he suddenly hears feathers rustling overhead, however, all Taiyang can do is sigh as he sees a black feather landing near him. The stinger's implication is that Raven used her portal connection to Taiyang to escape from Haven Academy.
* Volume 5 gave us Shay D Mann, who existed to be punched out by Yang and then lead her to the plot.
* Volume 5 has Samuel Sullivan, the superhuman Antichrist, whose Earthbending ability is powered by the number of followers he has and who, with enough followers, is strong enough to crack the Earth in half.
* Volume 5 has Weiss fight a swarm of Lancer Grimm during mid afternoon.
* Volume 5 introduces the Goblin Paladin, a goblin blessed by the God of Wisdom. Not only is he a powerful warrior, he's even smarter
* Volume 5 reveals this had also briefly happened once before in secret during the 60's. Ironically, most of the former inmates went onto found The Company, who did pretty much the very same thing.
* Volume 5 shows that this is a terrible way of building loyalty, and only works if the subject is truly intimidated. When Cinder cajoles Raven's
* Volume 6 deals with the protagonists as they attempt to reach Atlas without aid from Ozpin whom they take to task for the secrets he's been keeping, and also with the villains who are taken to task by Salem for the failures in Volume 5. The volume ends with both the villains and the protagonists descending upon Atlas for their own reasons. The stinger, however, reveals to Emerald and Mercury that Salem is building an army of Grimm made from a new species she is creating. Hazel's explanation of what's happen indicates that she's decided the only one who can properly complete the task she's set is herself.
* Volume 6 had the Mistral Girl who encountered Cinder (and was almost certainly killed).
* Volume 6, Sonic reaches the infamous barrel in act 2 of Carnival Night Zone and doesn't know how to make it move, he tries everything until there are only 10 seconds left on the timer, he picks up a guide telling him that he only needed to press up and down, he gets so furious but is killed because time has run out.
* Volume 7 explores the reason for Ozpin's secrecy as a plot point. Ruby decides to copy Ozpin and hide the truth from Ironwood. The heroes are extremely uncomfortable with this; while they trust Ruby, they feel they're doing to Ironwood exactly what Ozpin did to them. When Ruby worries she's no better than Ozpin, Qrow tells her that Ozpin trusted no-one with the truth while she's waiting for Ironwood to earn her trust so that she can tell him. Ruby isn't convinced by that argument.
* Volume 7 had the Pink-Haired Faunus Girl who left Pietro's clinic just as the heroes arrived.
* Volume 7 is an exercise in Mook Horror Show, the problem being that very few of the mooks are
* Volume 7 was this all around. Ruby's decision not to tell Ironwood what they knew about Salem until the almost literal last second when Grimm were attacking Mantle. Robyn being left in the dark about why Ironwood has been taking supplies resulted in her stealing from him and heavily crippling the supplies needed to launch the reboot for his communication systems. The resulting two miscommunications results in Ironwood's full
* Volume 8 gives us two—one in the form of Fiona's Uncle, a friendly badger faunus who gave Oscar some soup, and Bill the unlucky coffee-drinking staff member in the Atlas Military Headquarters.
* Volume 8 included 3 episodes, 'Ultimatum', 'Worthy', and 'The Final Word', which

had content warning cards displayed before the opening. 'Ultimatum' and 'Worthy' had photosensitivity warnings for flashing lights, while 'The Final Word' had a warning for distressing themes related to death. Additionally, the episode description for 'The Final Word' had the National Suicide Prevention hotline number.
* Volume 8 introduces a Goblin Priest who has been similarly divinely empowered.
* Volume Five's conclusion returns to this trope with Central Park being the backdrop for Samuel's dastardly plan and, by extension, also used during the setup for Volume Six.
* volume of fire until the introduction of breech-loading mechanisms and metallic cartridges; the catch is the "trained" part. It took many years of training to be a truly accomplished longbowman, whereas a simple musket could be mastered in a week by the simplest peasant. It was not actually superiority in combat that led to the firearm supplanting the bow and arrow, as the bow was capable of a significantly higher rate of fire, farther accurate range in skilled hands, and free of the problems of misfires that often plagued the muskets of the era (though they shared a weakness to wet weather, as a wet bowstring is about as useful as wet gunpowder is). What did the bow in was the fact that an army that used firearms could field about 10 times as many men as one that fielded bowmen due to the contrast in training time.
* Volumes 1 and 2 featured a new roster of heroes assembled to replace the recently
* Volumes 3 and 4 were republished together as an unnumbered book, using the same title as the series.
* Volumes have had this happen to them twice over the span of their career:
* volumetrically scaled down to 1/2 to 1/8 the average size" of space warfare...
* Volumetric Mouth: Character's mouth opens real wide when they are shouting.
* Volumetric Mouth, the usual secondary trait of cartoon characters who yell, where their mouth scales up considerably to match the volume.
* voluntarily stayed in Haiti because seeing the plight of the Haitians, they saw who obviously had the more ńoble cause and switched sides.
* voluntarily the end result was a nationalist movement popular enough to lobby for and eventually receive some significant concessions.
* voluntary shapeshifter is her go-to combat form, though it's more successful at distraction.
* Voluntary Shapeshifting. And that's just the ones that have been altered to survive in our dimension; we don't even glimpse what the True Ancients really look like.
* Voluntary Shapeshifting: Anyone with the power to change their appearance at will inevitably use this ability to pretend to be someone or something else.
* Voluntary Shapeshifting as inherent abilities. Poledra is either the only wolf to really get the hang of her powers, or the only one to actually take an interest in human affairs. It's hinted that she was called as a disciple.
* Voluntary Shapeshifting: Bats are most commonly associated with vampires, but wolves, snakes, and insect swarms are popular too. Sometimes they can mimic other humans.
* Voluntary Shapeshifting: Ghosts can sometimes morph into morbidly, gruesomely horrific, grotesque (or amusing) shapes to terrify their haunts. If their emotions flare, this effect may happen involuntarily.
* Voluntary Shapeshifting infection is unrelated to her mutant powers). There's also Shisa, who skips the catgirl part entirely and transformed into a oversized housecat with hand-like paws.

* Volus are native to world who's life catalyzed in ammonia rather than water. This, combined with the intense atmospheric pressure necessary for such a biosphere, requires them to wear environmental suits in Earth-like atmospheres to prevent themselves from suffocating and exploding.
* volus as a client race. They have a more pragmatic approach to combat as well; preferring long range superiority; less focus on hand to hand and more on squad firing tactics, and the most dreadnoughts (long range monsters of warships) than any other member of the Citadel. * Von Bolt's weaknesses are particularly obvious next to Sturm (from the last game) and Caulder (from the following game), both of whom were so powerful as to be considered broken in a series that practically runs on brokenness. Von Bolt, by comparison, is at best unremarkable, and is widely judged as a nerfed Sturm (Sturm buffs his units' attack and defense by 20%, Von Bolt by 10%, Sturm ignores terrain, Von Bolt doesn't, Sturm has a single 10-star power that nukes a massive area for eight damage and buffs his units even further, Von Bolt has a single ten-star power that blasts a small area for three damage and freezes a few units for a turn). * Von Ryan's Express has Colonel Ryan and Major Fincham. Ryan is a self-declared "90 Day Wonder" who was drafted in to serve as an Army pilot, earning his rank of colonel due to age and education. Fincham is a major but has lived his whole life as a battlefield soldier, and obsesses over discipline and adhering to a code of behavior that Ryan can't fathom. They clash early and often over every step Ryan implements, with Ryan proved right some times and Fincham proved right at other times.

* von Uptime short story compilation and novel was engaged to Imperial Prince Karl von Liechtenstein, which had to be a morganatic marriage, even though she was extremely wealthy. Good thing loads of money can earn you favours from the emperor of a broke empire.
* Voobaha. Parodied in that it becomes clear that the narrator is a misogynist who's only upset about his girlfriend leaving him because he can't have sex with her anymore.
* Voodont, the doll rips her own arm off, Ellie is heard screaming in pain off-screen. Considering Ellie actually got a cut when Sam slit the doll's arm at the beginning, not to mention Sam's satisfaction with what is going on, it should be pretty obvious what happened.
* Voodont: There are four characters that physically appear in this story. Out of all of them, Ellie's friend is the only one with no known name. The doll is also not given a name and is simply referred to as Doll by Sam, but that's likely because she had just been made to resemble and torture Ellie.

* Voodoo Doll fairs better, using stock footage to show New Orleans on Bourbon Street to open the episode...though the subsequent sets in the episode didn't even try to look like the French Quarter.
* Voodoo Doll: The best way to get back at my enemy is to torture him/her with a doll thst looks just like him/her. I'm gonna enjoy this.
* Voodoo in particular has a fascination with the crossroads as symbolism. Papa Legba is the lwa of the crossroads that serve as the boundary between the living and the dead. Kalfou, his evil side is also associated with them.
* Voodoo Island as a scientist leading an expedition to the titular island. Somewhere during the expedition, anthropologist Claire Winters (Jean Engstrom) goes off on her own and decides it’s time for a swim. Never mind that for all she knows the jungle waters might be infested with poisonous snakes, crocodiles, or other predators. Well, she gets far worse than that when she finds herself wrapped up by the tendrils of a prehistoric man-eating plant.
* Voodoo Man, a producer considers making the events of the film into a movie. The hero suggests that Lugosi would be a perfect choice to play the villain.
* Voodoo Shark; a patch over a plot hole creates another plot hole. This trope doesn't require that the weirdness be an attempt to fix an earlier weakness.
* Voodoo Shark, describing how black and white too close together are rendered invisible on black and white television, and describing how this led to players being unable to spot referees in football and prisoners effortlessly sneaking past guards in Johnny Cash prison concerts. Despite the fact that, this logic followed to its (internally) logical thread would mean Mr Ed would too be invisible. Also the fact that since THE WORLD wasn’t black and white when TV was, it makes zero sense for the people standing right there to be affected.
* Voodoo Shark'ish. In one particularly hilarious example they used they totally retconned one incident where some ships bombed a fusion reactor. (Which of course exploded like a nuclear bomb...) See what "really" happened was that the ships bombed the plant which had snow on the roof which then fell into a giant vat of liquid sodium that happened to be next to the reactor and THAT exploded like a nuclear bomb... Because that's way more plausible!
* Voodoo Shark technically doesn't generate any plot holes or unanswered questions when it explains that the Brodie family's bad luck with sharks is the result of a voodoo curse. Its explanation is just generally agreed to be really, really stupid.
* Voodoo Walrus A publishing house operates out of an underwater techno-volcano powered by a baby fueled furnace. Not to mention the tendency of explosions be at least partially comprised of live, unperturbed by being in explosions, cats.

* Voodoo Walrus recently broke the tension of a storyline that was going from bad to worse for the main characters by cutting to reoccurring femme fatale Mac, quite literally, getting off on the pair's misery.
* Voodoo Walrus went through a reboot after only six updates that completely removed half the cast.

* Voor een verloren soldaat), a 1992 film set during the Second World War, portrays the brief love affair between a twelve-year-old Dutch boy and a young Canadian soldier, with elements of this trope invoked. The source book, an autobiographical

novel by choreographer Rudi van Dantzig, portrays the soldier pretty much forcing himself on the boy, who is upset by this but is also drawn to the soldier and keeps coming back to him. The film turns this into a gentle, consensual romance.

* Voriki, the "Seventh Toa", was a fan-made character created for a 2001 contest using recolored official artwork with a mask and a weapon obviously edited in Photoshop. * Vorknkx is more widely known than the Republic Intelligence Service would like. As with superlasers, it's official policy that the Trans-Galactic Republic neither utilizes or holds any such devices.
* Vorkopian Dictator Spider that possesses people by burrowing in their ear.
* Vorkosigan Saga. Admiral Aral Vorkosigan notoriously murdered his own particularly scheming one with his bare hands on his flag bridge during the invasion of Komarr, and only dodged serious consequences (other than a demotion to Captain) due to his bloodline. Later, another political officer tries to murder him in return.
* Vorkosigan Saga and had them carve up his enemies with butcher knives.
* Vorkosigan Saga and more or less never comes up again; despite being ostensibly military sci-fi, the books usually focus on people, not pulse lasers.
* Vorkosigan Saga and subsequent books in the timeline as Miles and Ekaterine marry each other and still continue growing as characters.
* Vorkosigan Saga and they contain individuals escaping from social pressure on Barryar including Elena and her husband and in a different way Miles himself. However they mostly contain people from any and every world in the Nexus. Also they play the "screening the Empire from external threats" role.
* Vorkosigan Saga, a number of seemingly-elaborate schemes are either purely or partially the results of somebody screwing up.
* Vorkosigan Saga: Aral Vorkosigan's first marriage, mentioned a few times in the books, was arranged. It did not turn out well.
* Vorkosigan Saga, at one point, Miles finally thinks of a cover story to explain

why Admiral Miles Naismith (his spy alter ego) looks exactly like Lieutenant Miles Naismith Vorkosigan. Admiral Naismith is a Cetagandan clone of Lieutenant Vorkosigan, created to wreak havoc in the Barrayaran Empire! Miles' superior thinks it's a stupid story, to Miles' annoyance, and the cover story appears to be simply a gag on Miles' hyperactive imagination. Until it turns out Miles was subconsciously inspired by a brief glimpse of a double (Miles was exhausted and on medication at the time and didn't realize he wasn't hallucinating) who actually is his clone, created to wreak havoc in the Barrayaran Empire.
* Vorkosigan Saga: Barrayar had the Ministry of Political Education in Emperor Ezar's time, and though things have improved by Miles' time ImpSec still enjoys a bit of a reputation, which they do little to discourage.
* Vorkosigan Saga: Bothari tries to pass the newborn Ivan Vorpatril as being a few months old, but the person he's trying to fool quickly figures out that the boy's stated age would be correct if he changed 'weeks' to 'hours'.
* Vorkosigan Saga, both times by quietly leaving while everyone else is distracted by something very attention-holding. Fulfills the "audience doesn't see" criteria because the author doesn't describe her departure, just the reaction when somebody turns and looks for her.
* Vorkosigan Saga but on Barrayar was satisfied to be a properly maternal if rather eccentric vor woman. Miles is the closest to a self-made character in the series as he made himself a mercenary warlord in an area too far away from his planet for anyone to know about his princely lineage and used that to do covert ops for his native planet until he rose high in power and prestige.
* Vorkosigan Saga...but really, it's his body's payback for what he did to it for thirteen years. Not that he let up afterward...
* Vorkosigan Saga, but their science/astrocartographers/explorers have military training and fulfill that need as necessary. The Barrayarans' inability to process the idea of women soldiers works against them in the first book, as they not only hesitate to shoot the female protagonist (bad idea), they consistently underestimate her.
* Vorkosigan Saga, but with advance warning, full-sized parts can be grown.
* Vorkosigan Saga, Commodore Koudelka's four daughters are referred to his "All-Blonde Commando Team". They got the nickname as kids, so it's mostly a joke.
* Vorkosigan Saga connecting them to the wider galaxy was disrupted somehow, well before they had a large enough population to avoid problems with inbreeding, and then a neighboring power with territorial ambitions made matters worse by dropping a bunch of nukes on them. The resulting cultural stigma against any kind of deformity — even non-hereditary ones like a cleft lip, or what happened to Miles in utero — is something they're still along way from moving past for most of the series.
* Vorkosigan Saga connection that Barrayar has to the rest of the galaxy. The Hegen Hub is a more general Gate. Beta Colony is Science (of almost all varieties), Jackson's Whole is Underworld Service and Earth is Cultural Capital.
* Vorkosigan Saga, Cordelia discusses Aral's artistic talent with her grandson.
* Vorkosigan Saga courier is what eventually ends his military career.
* Vorkosigan Saga Defenestration of the Privy Council. (Referred to by various characters but never actually portrayed or described in detail.)
* Vorkosigan Saga designed with legs replaced by a second set of arms + hands and free-fall adapted metabolisms) obsolete.
* Vorkosigan Saga desk jockeys that they are, can't be bothered to salute with the proper Ops-style precision.
* Vorkosigan Saga. Despite Kareenburg being built on the side of a volcano that is known to be a geological time bomb, and despite Cordelia's insistence that the planetary capital move to somewhere safer, it does not go off during the book. (The capital gets moved anyway — and Kayburg suffers some strong tremblors during the epilogue, hinting that the mountain is getting ready to blow sometime in the near future.)
* Vorkosigan Saga, each Count of Barrayar is limited to twenty armsmen to prevent them from having large private armies that could threaten civil war. Naturally

every armsman is a badass. Armsmen are assigned not merely to guard the count and his family but to carry out local police duties.
* Vorkosigan Saga eaten raw rats, would like to point out that rat bars taste better than rats.
* Vorkosigan Saga, Ekaterin comments that you can't clean a baby's bottom in one!
* Vorkosigan Saga: Ellie Quinn loves Miles and is perfectly fine with his dangerous life as a mercenary and secret agent; it's the prospect of becoming Lady Vorkosigan and being forced to move to Barryar she can't get past.
* Vorkosigan Saga: Elli Quinn has her face burned off by plasma-arc fire - "she looked like an onion". Fortunately, she lives in a universe of advanced biotech where the commander of her mercenary company buys her reconstructive surgery which leaves her looking better than she had before, but plasma fire is one of the few things that can truly terrify her.
* Vorkosigan Sagaes) replacement of his brittle bones with synthetics but retains one from a needle grenade to the chest that nearly cut him in half. His future wife finds these scars quite a turn on.
* Vorkosigan Saga faces disaster with the decommissioning of the last remaining ship he is able to pilot.
* Vorkosigan Saga features tractor beams at military scale, including on starships, but also in civilian use at smaller scale - 'hand tractors' are used for cargo manipulation, and 'medical hand tractors' are used for delicate surgical work - ideal for battlefield medicine as they're fundamentally sterile, never physically touching the patient.
* Vorkosigan Saga features Vice-Admiral Ges Vorrutyer, who combines dangerous military adventurism with a brutally manipulative attitude to his companions' lives, and in his spare time is a serial rapist. General Metzov is so obsessed with people respecting his authority that he dragoons trainees who aren't even in his chain of command to supervise the torture/murder of subordinates for refusing to enter a biohazard zone to try to recover spilled chemical weapons when they can be safely destroyed without endangering anyone's lives.
* Vorkosigan Saga. Given their respective capabilities it's a good thing they prefer to "score" by pulling each other's chips out of the fire.
* Vorkosigan Saga had a chip that recorded everything he saw and heard, using a protein-based data storage, installed into his brain. Many who got such chips installed developed schizophrenia.
* Vorkosigan Saga had a relationship with her first husband that was borderline abusive. Miles has to convince her that things could be different with him. Unfortunately, he decides to approach that task as if it were a covert ops mission...
* Vorkosigan Saga has an alternative fiscal calendar that changes with each Emperor. Thanks to the fact that the Counts officially give the Emperor a "birthday present" of a substantial amount of money instead of doing something as explicitly subservient as paying taxes (which happens to be in the amount that their district would have owed in taxes if they paid taxes), the Barrayaran tax calendar is centered around the Emperor's birthday. This also means that in transition years, the Empire can have anywhere from zero to two tax days in it, depending on the order of the old emperor's birthday, the new emperor's birthday, and the day the old emperor died.
* Vorkosigan Saga has an implanted organic chip that records everything he sees and hears, and which he can recall later. Most people who got the implant went crazy. Subverted in that only he has access to the memories, and that most of the memories stored are near useless.
* Vorkosigan Saga has Barrayar, named after the ruling Vorbarra family, and Sergyar, named after Prince Serg.
* Vorkosigan Saga has "bod pods", inflatable, single person, idiot proof life support modules for use by untrained personel in an emergency. Miles really dislikes them, because once you're stuffed inside one, you're stuck waiting helplessly for someone else to come rescue you.
* Vorkosigan Saga has elements of this. Citizens of Beta Colony, with its advanced

technology and gene cleaning, can expect to get 120 years standard. The Cetagandans, with their genetic manipulation (among the haut at least) can also live past the century mark, and possibly longer. In contrast, Barrayar, which is emerging from the Time of Isolation and medieval medicine, is dealing with a number of health problems (one character, at 70, is considered old for Barrayar but only middle-aged galactically), but they are improving health standards.
* Vorkosigan Saga has Elena Bothari-Jesek, Elli Quinn, and Taura. Also Cordelia Naismith, whose brief military career provides a lampshading.
* Vorkosigan Saga, has many elements of this, though it varies from book to book.
* Vorkosigan Saga has the Imperial Service Academy, though it's only shown briefly.
* Vorkosigan Saga has the weird quality of being Enlightened in its sympathies-being about reform bringing in technology, the rights of the unfortunate-while being Romantic in it's decoration-having medieval splendor, savage warlords, and so on.
* Vorkosigan Saga has Vat Protein, grown meat flavored to taste like chicken, beef, etc. Primarily used by many advanced societies without mention, while some cultures prefer meat the old-fashioned way. (And for members of the former who get squicked by the latter, well, the best example is Cordelia, who grew up on Beta Colony, the most advanced planet in the Nexus, bravely chomping down on her son Miles's freshly caught and cooked catch of fish, when he was a young boy on Barrayar.)
* Vorkosigan Saga have this attitude toward Cetaganda and in some cases most galactics. But especially Cetaganda which once invaded them.
* Vorkosigan Saga. He's part military genius, part con man, and he has allies and people in his debt across the galaxy. When an organization tries to oppose Miles, he tends to end up in charge of it by the end.
* Vorkosigan Saga, he thinks on his feet, holds his own, and could even be said to save the day—maintaining a thorough focus on getting everyone safely home, very much including himself.
* Vorkosigan Saga. He was created to replace Miles, but when Miles and his family found out they broke the clone out and adopted it into the family. He's treated by everyone as Miles' brother.
* Vorkosigan Saga him in the Imperial Service after the Kyril Island incident.
* Vorkosigan Saga. His short height, slight build, and high pitched voice cause people to subconsciously register him as a child; however the facial lines caused by constant pain for most of his life means that only a slight adjustment of tone, expression, and body language is needed to convince people he is at least a decade older than he actually is.
* Vorkosigan Saga hurting ends up looking like, which calms the kid right down.
* Vorkosigan Saga: In Barrayar, aristocrats have a Vorsylable in front of their last name so that Vorkosigan means "Sir" Kosigan, etc. There's also a tradition where the firstborn son is given his paternal grandfather and maternal grandfather's first names as his first and second names in that order and the second son is given his maternal grandfather and paternal grandfather's second names as his first and second names in that order (assuming each grandfather agrees if living). The Cetagandan warrior caste does the same only using the sylable "Ghem".
* Vorkosigan Saga include Miles Vorkosigan as an NPC. "If you include him, he'll try to take over the plot from the PCs. If he doesn't try to take over the plot, you're not doing him right."
* Vorkosigan Saga In other words Barrayaran infantry get sent to their counterpart of Siberia just to get trained.
* Vorkosigan Saga, interstellar travel is through naturally occurring wormholes. Most wormholes don't lead anywhere useful, and planets with breathable atmospheres are therefore rare and highly prized.
* Vorkosigan Saga: In the story "Labyrinth", after cooking Baron Ryoval's gene banks:
* Vorkosigan Saga into working for him). Other companies are referenced as existing at a variety of scales.
* Vorkosigan Saga involves the United States falling apart due to internal

conflict. The borderline utopian Beta Colony in the series was an attempt to preserve the best of America and is a rather "Blue State" kind of place.
* Vorkosigan Saga is a more complex version of this. He is a sadistic sociopath but has enough conscience to realise that random killing is wrong. So he uses military regulations to tell him when it is OK to kill. His commanding officers learn to think very carefully before taking off his leash.
* Vorkosigan Saga is a multiple rapist and murderer, who get sexually excited by killing and when watching a pregnant prisoner be abused by her captors. Knowing this, he depends on the structure of his military service and the guidance of the lord and lady he serves to show him what is right and what is wrong.
* Vorkosigan Saga is full of these. Mad Yuri's War, the Cetagandan Invasion, the Komarr Conquest and subsequent Revolt all have a direct impact on the storyline decades after they took place.
* Vorkosigan Saga is renowned in-universe both for their discipline, and their brutality. The latter improves over time, but their reputation does not.
* Vorkosigan Saga is seen by most people as a gadfly who never saw a foul rumor or vicious innuendo he didn't want to spread. Of course, there's actually a bit more to him than that, and there's a method to his madness, but most see him as an particularly annoying "town clown".
* Vorkosigan Saga is set far enough into the future that sea levels have already risen; London is protected by a system of barrier walls.
* Vorkosigan Saga Ivan Vorpatril is a subversion. At first he'll do almost anything Miles says(with proper amounts of grumbling of course). Later he learns to show some initiative.
* Vorkosigan Saga, Jackson's Whole infamously hosts life extension clinics based on brain transplants into younger clones. The clone's brain is thrown away.
* Vorkosigan Saga made them redundant, and by the time of the main series they've built themselves a thriving civilisation.
* Vorkosigan Saga: Mark, secretly cloned from principal protagonist Miles and raised by his enemies. Over the course of several books, there's a lot of character development with him learning to be his own person away from the purpose his obsessive father created him for.
* Vorkosigan Saga: Mark Vorkosigan is tortured into this by his "guardian". Eventually, the legendary Betan therapy helps. Beautiful, lovable—not to mention brave and understanding—Kareen Koudelka helps even more.
* Vorkosigan Saga Mark, who is a clone for other purposes, was raised amongst these clones and has set out to destroy the industry. At first he tries to do so physically, but when that doesn't work set about to do it economically, by obsoleting the procedure or otherwise making it unfeasible.
* Vorkosigan Saga — Given that a number of the characters are on a first name basis with the ruler of a multi-world empire, yeah.
* Vorkosigan Saga: Miles is crippled, but consistently wins through brilliance and sheer force of personality.
* Vorkosigan Saga, Miles ("Mr. Naismith") Vorkosigan was too short to use the average powered armor suits of his universe, but acquired a "petite" size in his first mercenary venture. He had to have the techs adapt the plumbing to fit, though, as it was originally for a female. Later in his career, he's worn powered armor so often that the equipment's left a mark on his forehead.
* Vorkosigan Saga, Miles samples bug butter, the product of his brother Mark's latest investment, and finds it a bit bland but otherwise edible. Then, Mark shows Miles a Butter Bug, which is described as resembling a cross between a cockroach and a pustule, and Miles abruptly loses interest in eating any more bug butter.
* Vorkosigan Saga: Miles Vorkosigan's former boss says this to his current love interest:
* Vorkosigan Saga, most notably in its description of Barrayaran history and culture.
* Vorkosigan Saga, most of the series is set on several planets that became human space colonies and Earth is sort of like a giant Switzerland/United Nations. When Miles visits Earth, his description of what he considers classic London

architecture is all modern or near future, implying that the famous landmarks in the city were either replaced of destroyed. There's also a description of the "Island of Los Angeles", implying that California eventually sank into the Pacific Ocean.
* Vorkosigan Saga, not guaranteed, because there's several ways the process can go wrong if performed in haste.
* Vorkosigan Saga novel has Miles commenting that in his ten year career in the military, he has never once seen a spacecraft or station larger than a courier or personal transport that didn't have an unauthorized still on it somewhere.
* Vorkosigan Saga novels, rank among the Imperial Auditors is entirely due to seniority, so one only increases in rank when a more senior Auditor dies or retires. Of course, even the most junior Auditor outranks everyone else in the Empire other than the Emperor, and Auditors generally work independently, so relative rank among them doesn't mean much.
* Vorkosigan Saga of a multi-planetary, extremely militaristic empire. Except that he's also one of the good guys.
* Vorkosigan Saga of battlefield casualties. (Probably part of her overall bodyguard training.)
* Vorkosigan Saga of interservice rivalry in the military he's serving in — he feels it gave the top brass more leverage when dealing with mutineers.
* Vorkosigan Saga of Komarr but he— and occasionally Miles— play with the sinister public perception to get things to go their way.
* Vorkosigan Saga: On Barrayar, the Vor traditionally carry two swords, and dueling with two swords is mentioned as being specifically illegal. The two swords aren't described in detail, but one is shorter than the other (it's noted at one point that Miles finds the longer sword of the pair a particular trial (he's very short).
* Vorkosigan Saga one is angry because the other was executed for dueling.
* Vorkosigan Saga places the events of the series somewhat more than 700 years after an unspecified 23rd-century date. "Borders of Infinity" takes place in the year '97 (of an unspecified century); given the infodump, this is presumably 2997 and all the other series dates can be extrapolated from that.
* Vorkosigan Saga possible. By the point he realized how bad his position was there was nothing for it but to confess or try a new frame-up despite no longer having the time or freedom to cleanly pull it off.
* Vorkosigan Saga, raising clones for brain-transplant purposes is a major industry in Jackson's Whole.
* Vorkosigan Saga regularly takes time out from his duties to give the seminar at the Imperial Academy about how to know when an order is criminal and what to do then.
* Vorkosigan Saga, set 200 years later, it's revealed that so many quaddies wanted to name babies after these founding heroes that later generations were forced to allow duplicate names, with numerical suffixes to keep them all straight. There are over 99 people named "Leo" alone.
* Vorkosigan Saga: Shaving is just for Barrayaran nobles who have the free time and inclination (and because they are so macho, that holding a blade to one's face holds certain appeal). Rest of the nexus uses a depilatory cream, or permanently stun the hair follicles.
* Vorkosigan Saga, sit in cul-de-sacs in the Nexus and require travel through other systems to get to. There are no FTL communications. Instead messages are relayed to ships that carry them through the wormholes and then retransmit them to other ships traveling to the destination system. The result is that most colony worlds are independent, although a few multi-system space nations, such as the Barrayaran and Cetagandan Empires, exist. But these generally only control a handful of systems at best (the examples given have three and eight, respectively).
* Vorkosigan Saga", some of Miles' more oblique comments to his fellow prisoners are really instructions to his Dendarii Mercenaries, who he knows are listening in, telling them that he's changing the plan in mid stream. The reader is kept in the dark about that until late in the story.
* Vorkosigan Saga: Some very rich and very evil people clone themselves, then when

the clones are in their twenties have their brain transplanted into the clone's body. Mark has made it his life's work to eliminate this practice, by inventing a life-extension technology that does not depend on committing murder.
* Vorkosigan Saga, so that he was unable to escape no matter how hard he tried.
* Vorkosigan Saga stories, from 1986 onwards. Bujold's characters joke about "stunner tag" in a way that suggests it has become an almost ritualized substitute for more lethal confrontations. Stun shock is definite with these.
* Vorkosigan Saga take having his wife, daughter and oldest son murdered at the dinner table well) decided that they'd had enough of Yuri's insanity and launched a coup which resulted in his death.
* Vorkosigan Saga than using them directly as feedstock for meat replication.
* Vorkosigan Saga that children's cartoon characters are made out of its gargoyles.
* Vorkosigan Saga that time he has had nearly all of his bones replaced with synthetic ones, even less breakable than normal.
* Vorkosigan Saga. The Barrayarans began the Cetagandan war with primitive weapons. However they switched to modern weapons as soon as they could get them and learn how to use them.
* Vorkosigan Saga: The caravanserai area of Vorbarr Sultana in Barrayar. By the time of the later books in the series, it has been cleaned up and gentrified (but you can still get into trouble in some of its back alleys.)
* Vorkosigan Saga the Cetagandans, and proceeded to attack Komarr in revenge, making a colony of their empire.
* Vorkosigan Saga; The emperor's personal troubleshooters have the title "Imperial Auditor", and they allegedly started out as the Emperor's tax auditors who were sent out to keep the Counts (Which allegedly was derived from 'Accountant' - they were the Emperor's tax collectors) honest. Over the centuries, their remit eventually expanded to investigating anything the Emperor wanted investigated that for whatever reason couldn't be handled through normal channels.
* Vorkosigan Saga: The first jump through a newly discovered wormhole is always blind. You have no idea where your ship is going to come out. Doing this used to be Cordelia Naismith's job.
* Vorkosigan Saga: The Jacksonians, being a Mafia-ruled planet, often engage in slavery, though their most valuable slaves are less for mundane purposes and more for exotic things like replacing the brains of clones with those of rich men who wish for a rather vampiric immortality. On Barrayar slavery is illegal, but its status as an unevenly developed civilization means that in many parts they will depend on manual labor, sometimes in nasty conditions.
* Vorkosigan Saga. The net result is it's rather difficult to define the series as a whole.
* Vorkosigan Saga. The ones in the Time of Isolation and during the reigns of previous emperors were often bloodthirsty folks, though.
* Vorkosigan Saga, the planet Barrayar was cut off from the rest of the galaxy because of a disturbance in the spatial feature that allows interstellar travel. During that time, technology was lost, and the inhabitants reverted to feudalism and manorialism. The efforts to catch up with the rest of the galaxy are a major theme in the books.
* Vorkosigan Saga: there are transhumanist elements, but fairly limited given the potential. Cetagandan haut are an ongoing project to make better humans. Jackson's Whole will make altered humans to order, or a clone to transplant your brain into. Four-armed space workers, quaddies, were made. Hermaphrodites were made as a social experiment in gender relations. Most civilized people use uterine replicators instead of natural pregnancies, and have their children's genes 'cleaned' of defects. Total sex change, down to the genes, is available. All that aside, lifespans don't seem impressive for 1000 years in the future and the demonstrated ability to regrow any body part, most people are pretty close to baseline human, implants seem vanishingly rare. Basically, they have nice medicine, but not too nice for lifespan purposes, and some isolated wacky experiments.
* Vorkosigan Saga, the reason that Elli Quinn didn't marry Miles is that she was in love with his alter ego Admiral Miles Naismith, rather than his true persona Lord

Miles Vorkosigan.
* Vorkosigan Saga to aid his hobby; his brother, Baron Fell, is a notorious arms dealer specializing in biological weapons; and Baron Bharaputra has a genetics clinic specializing in a procedure for the wealthy but aged, in which a young clone of them is produced, and then the clone's brain is ripped out and the original person's implanted instead). However, Jacksonian barons aren't really aristocrats: they are at best unscrupulous plutocrats and at worst, mob kingpins. The hat of Jackson's Whole is "capitalism gone very, very bad".
* Vorkosigan Saga to Cetagandan diplomats but otherwise they would just have to stay in the attic.
* Vorkosigan Saga trope) is traditionally played with a ball painted to look like the head of an enemy warrior. It's implied that during the relevant war they used to use the real thing.
* Vorkosigan Saga wants investigated if it can't be handled by normal channels." They have almost unlimited powers (As the Emperor's Voice, any order they give has the Emperor's authority, so the only people who can countermand an order from an Auditor are other Auditors and the Emperor himself) which is why they are usually chosen from old men who have reached the pinnacle of ambition.
* Vorkosigan Saga was trying to seduce. However, when asked to smuggle an attractive young refugee away from a hostile force it refused most of the money, just keeping one token note to make it a legal contract. Thorne also once passed up a chance to seduce its commanding officer's clone brother by blackmailing young Mark into submitting lest Mark blow his cover. It already knew it wasn't really Miles it was seducing, knew Mark was a scared teenager trying to impersonate a man in his twenties, and refrained from either exposing Mark or... exposing Mark.
* Vorkosigan Saga, where characters at least occasionally mention things like it being "18:00 hours of a 26.7 hour day [on this particular planet]".
* Vorkosigan Saga, which adds a framing narration to tie together three novellas.
* Vorkosigan Saga. While soldiering is the most honored profession on Barrayar, the only reason technology is low is because of a natural disaster and they are racing to catch up fast. The Imperial Military Hospital (ImpMil) is proverbial on Barrayar and has won the respect of outsiders as well.
* Vorkosigan Saga who have their own peculiar forms of art. Miles is impressed by the Quaddies' null-grav ballet. Miles and his friends seem to be more ambiguous about Cetagandian art, which is fascinating and requires a great deal of skill but kind of creepy.
* Vorkosigan Saga who is only half jokingly described as a "werewolf." Despite her appearance, she's highly intelligent and not particularly bestial in personality at all.
* Vorkosigan Saga who manages to escape his programming, and become (mostly) a good guy.
* Vorkosigan Saga, who mercilessly used and threw them out the moment they fulfilled their task in his plans.
* Vorkosigan Saga works in exactly the same way. You can hire the cops to arrest someone, but the target may be able to out-bid you and thereby retain their freedom.

* Vostok 1 suffered a failure to fully separate from its service module prior to re-entry, causing the spacecraft to enter at a squirrelly angle that potentially could have ended in disaster had the reentry module not been a sphere entirely covered in heat shielding.
* Vostok 3KA, yes). The process of journal-keeping was not without incidents, however.
* Vostok - since the ship did not include any cushioning for a soft touch-down on land, it was standard modus operandi - but this fact was kept secret because a landing with ejection did not count with several aeronautics associations. The Soviet Shuttle knock-off Buran was to have ejection seats as well, but instead it flew unmanned.

And that's if they even came into the booth aware that all other stuff was even there.

* Vow of Celibacy: Members of a certain organization must promise not to have sex.
* Vow of Celibacy: People are not allowed to get married and/or have sex due to an oath they took.
* Vow of Celibacy: Some clergy (especially monks and nuns) have sworn to never marry or have sex, and instead devote their whole lives to practicing their religion.
* Vow of Celibacy's Vestal virgins, acolytes of the Roman goddess Vesta who were required to remain virginal and were severely punished for violating this.

* Voyage: A Journey Beyond Reality, most Selenites initially speak in incomprehensible musical notes. Winning a minigame lets you learn their language via a teaching-machine, after which their speech is accompanied by English subtitles.

* Voyage dans la Lune Cyrano de Bergerac, where fireworks are used as rockets.
* Voyage for Vengeance has a man in one of the cities who loves Shadowrun so much that he started his own shadow running the organization which the player can eventually work for.
* Voyage From Yesteryear has Baluchistan, a tangentially-mentioned (and surprisingly extant, though only as a region in Pakistan, Afghanistan and Iran, and not a state) battleground for the US and USSR.
* Voyage From Yesteryear, the Soviet Union is stated to have collapsed in 2021.
* Voyage Inspired By Jules Verne are a race of blur-skinned aliens with bulbous heads with glowing growths on their sides, squat torsos, three fingers on their hands, and VERY long arms and legs. They also speak in a variety of flute noises, but are perfectly capable of speaking English.
* Voyage Inspired By Jules Verne, in order to be able to speak the Selenites' language, Michel Ardan needs to use a specialized flute.
* Voyage Inspired By Jules Verne, involves Michel Ardan crash landing on the moon and encountering Selenites.
* Voyage Inspired By Jules Verne involves Michel Ardan reaching the moon, and discovering that it has a complex ecosystem inhabited by a race of alien beings called The Selenites.
* Voyage Inspired By Jules Verne, the plants on the moon come in a variety of vibrant colours, and all seem to be predatory in nature, and quite hostile to anyone who approaches them. They also seem to be averse to certain types of each other, which the Selenites utilize to be able to walk among them without being attacked.
* Voyage Inspired By Jules Verne, they just prefer their own language.

* "Voyage of the Damned". Thanks to an almost two-century long lifespan, he's only a head attached to a machine.
* "Voyage of the Damned": The Hosts will answer three questions if the correct security override is used. However, as the Doctor discovers the second time he runs into them, they'll take rhetorical questions, and he quickly finds himself down to only one question before managing to leverage the situation to his advantage.
* Voyage of the Damned"), the newsvendor was renamed "Wilfred Mott" and retconned into being Donna's grandfather. Since he was never mentioned by name in "Voyage of the Damned", it was simply a matter of changing the name in the credits before it aired.

* Voyage of the eventually fused with a powerful sphinx-like extraplanar entity, acquiring a new layout, the capacity for self-direction and self-defence, and a quirky personality.
* Voyage of the Javelin, about a young man from late 19th-century New England who joins a merchant sailing crew on a round the world voyage, this becomes a plot

point as one Chinese-born crewman tries to warn everybody about pirates as they pull into an Asian port, but everyone ignores him thinking he's telling them about the harbor pilots. The ship gets attacked and suffers casualties.
* Voyage of the Little Mermaid, a multimedia live show, officially opened in a minuscule theater at Disney's Hollywood Studios in January 1992 — right after the Christmas rush.
* Voyage of the Rock Aliens, a man is murdered while eating chicken. When his body is wheeled into the police station, a cop pries a drumstick from his hand and takes a bite.
* Voyage of the Rock Aliens: As scriptwriter James Guidotti put it, "It's a little like sitting home and watching TV late on a Saturday night, all the while switching channels from 5 to 9 to 11 and to 13. On channel 5 they're airing an old beach party movie; on 9 one about alien invaders; on 11 a film about a mad, homicidal maniac on the loose; and on 13 a rock 'n' roll program." The movie contains elements from all those genres.
* Voyage of the Rock Aliens: "Combine Man" plays while the aliens transport the pieces of ABCD, who has exploded from looking at Dee Dee, back to the ship, repair him, return to Earth, and drive to the beach on a tractor, where they play the end of the song. The beachgoers clap.
* Voyage of the Rock Aliens: During their voyage, the aliens are "frozen" as plastic dolls only a few inches high. Thawing restores them to their full height.
* Voyage of the Rock Aliens has a couple passionately making out on the beach for several minutes until the tentacle monster drags the boyfriend away. The girlfriend seems strangely unaffected.
* Voyage of the Rock Aliens, where the robot 1359, who's disguised as a dog, chases off a German Shepherd by squirting water at him.
* Voyage of the Unicorn help the rest of her family retrieve the artifact while the trolls were distracted - while trying to rescue her, that is.
* Voyage of the Unicorn they might get together, and he can move on from losing his wife. Other people who look like those from the magical land are also seen.
* Voyage of Wisteria that Grace got a slap on the wrist for everything she did and how the ending of Book 3 tried to sweep away most of the problems she made (particularly Grace doesn't bring up how they have been unintentionally hurting denizens for their amusement) and that Simon pretty much lost all chances of redemption after he murdered Tuba.
* Voyager 1 being the unique probe that has explored the four outer planets.
* Voyager), a Borg cube slams itself into a comparatively tiny Species 8472 bioship, destroying both ships.
* Voyager", after a fashion: the entire crew was trapped in a dream version of the ship in which they had taken over. Only Chakotay and the Doctor remained in the real world.
* Voyager. After being stranded for two months, Tom is disappointed that his girlfriend B'Elanna doesn't miss him more because for her, only two days have passed.
* Voyager, a Kazon faction stole transporter technology and used it to beam out into space a few Kazon delegates that refused to bow down. And the Nyrians seize Voyager by teleporting their people in one-by-one, at long range so no-one suspects teleportation is involved, while at the same time teleporting Voyager's crew out. By the time they're sure foul play is involved, the Nyrians have seized the ship. Janeway resolves the issue by seizing control of the teleporter and beaming all the aliens on board Voyager to a freezing environment until they surrender.
* Voyager also contains a particularly egregious example of this trope in Tom Paris. Not only is he really only interested in Earth pop culture, he's only interested in 20th Century Earth pop culture.
* Voyager also features the return of Barclay. In the Voyager simulation within his lab, the crew totally adores him, the female members finding him attractive of course, though it doesn’t go quite to the level of Troi’s “goddess of empathy.” The creep factor is still there for those who learn about it: Turns out his boss is a certain Admiral Paris, who is NOT amused by the fact that a

hologram of his son Tom is one of Barclay’s virtual buddies.
* Voyager also had the resetting shuttle bay. It carried a complement of 8 shuttles at the beginning. During the season 6 episode Alice, Chakotay comments that they have a full complement of shuttles. By this point in the series, 9 have definitely been destroyed, and another 12 may have been destroyed. Photon torpedoes may also qualify, since they fired 85 MORE than their full complement of 38 (note that while they can alter them, they never say they are capable of making more and at least once specifically said they couldn't).
* Voyager also had the two-part episode "Workforce", in which a society was so starved for laborers to push buttons on fancy consoles that they resorted to kidnapping and mind-wiping the crews of passing ships for workers.
* Voyager also has Naomi Wildman who is 1/2 Human - 1/2 Ktarian. At age 2 chronologically, she looks and acts like an 8-year-old Human. This was justified
* Voyager and has trouble finding a willing partner, the Doctor creates a "treatment" program for him on the holodeck.
* Voyager and most of her cybertech implants removed against her will. She is told she is now safe and free and can be with her people again...but (at least initially) she still thinks of the Borg as "her people". Seven does eventually accept her new existence and tries to simulate some human interpersonal emotions, but never feels entirely comfortable as a human, as she considers her nanite-augmented brain and body superior to those of humans and is currently exasperated with the emotionalism and "silliness" of other crew members. Seven is one of the few characters who dare to openly criticize Janeway's decisions.
* Voyager approaches Borg space (specifically, a Borg-free corridor running through the region) and the crew prepares for a possible confrontation.
* Voyager by an actual villain with previously established engineering skill.
* Voyager-class Klingon battlecruiser, a TOS-era relic. Naturally, they're able to quickly defeat the cloak and cripple the enemy.
* Voyager cliffhanger "Unimatrix Zero" involves an unspoken plan which several characters think is nuts, and indeed, it seems to go spectacularly wrong. But then Chakotay says "So far, so good", letting us know the plan isn't actually over yet. We get to see the rest in part two.
* Voyager crew comes across a member of the Q Continuum who wants to commit suicide, he enlists Tuvok to help him prepare his argument in favor of it to the other Q.
* Voyager crew comes up against a group of con artists who have been impersonating Janeway, Chakotay and Tuvok. Tuvok eventually comes face-to-face to with the man who is impersonating him and the con remains in-character, commenting that "Logic would indictate that neither of us has the advantage." Tuvok responds "Your logic is flawed," and shines a flashlight in his eyes, then stuns him with a phaser.
* Voyager crew initially assume they just can't use it correctly until Neelix identifies the pair.
* Voyager deemed the Kazon to have absolutely nothing worth assimilating.
* Voyager did manage to do it once with style, in the episode "The Year of Hell".
* Voyager, Doc decides to teach Seven of Nine about dating and romance. When Tom Paris finds out, he derisively describes it as "the blind leading the blind".
* Voyager does this a lot as it's the only Federation ship in the Delta Quadrant, and running is just as valid a tactic as fighting when you have no backup. In the pilot episode its maximum speed is stated to be Warp 9.975 (making her one of the fastest ships in Starfleet), so it has plenty of oomph to do so (plus those folding warp nacelles look cool).
* Voyager due to causing them. This had to do, amusingly, with some sort of time-induced insanity brought on by having the proverbial reset button pressed one too many times.
* Voyager. During a car chase, Paris is aiming with his phase and tells the astronomer to give him "one more meter", possibly confusing her. Then again, as a scientist, she's probably familiar with the metric system.
* Voyager encounter a Klingon Battlecruiser made into one. They made the trip to the Delta Quadrant the long way.

* Voyager encountered a group of Klingons descended from a sect that viewed the Klingon Empire as irredeemably corrupt. They set a course for the Delta Quadrant and never looked back.
* Voyager enhanced weapons let them blow the sphere apart from the inside once it's arrived at its destination.
* Voyager episode "Dark Frontier" involves a raid on a Borg cube, which we see the characters rehearse on the holodeck first. They actually fail, but not by much, and something very different goes wrong when they try it for real.
* Voyager episode has the crew come to Tuvok to tell him to go ahead with a plan to get a cure from the Viidians, who are not on good terms with Voyager. Tuvok says that he will take full responsibility for the plan. Later, when the crew gets the cure, which was for Janeway and Chakotay, when Janeway comes back to the ship, Tuvok says that he was responsible and does not mention that the rest of the crew convinced him.
* Voyager episode, Seven of Nine says, "Do you want to copulate? Take off your clothes!" to an awkward Harry Kim. Without context, it seems as though she's trying to rape him. However, it was only because she could tell he had a crush on her and was very socially-awkward at the time, and he was intimidated by her coming on too strong.
* Voyager episode, the crew is abducted by aliens whose planet is experiencing a labor shortage and implanted with false memories to make them believe they want to be there. They do get paid rather than being forced to labor for free, but they're not free to leave (even if they don't realize it); anyone who wants to leave is promptly brought in for further memory modification.
* Voyager for himself. How in God's name a hologram fathered a son is quickly lampshaded and handwaved as "a long story".
* Voyager had been in their sky for centuries, and was a complete mystery to them.
* Voyager had perhaps the worst security in the history of Starfleet, considering how often enemies were able to steal shuttles or hack their computer. One episode ended with two unarmed Ferengi overpowering their guards, getting to the shuttlebay, stealing their own ship, and escaping through a wormhole.
* Voyager in an alternate timeline, but only Harry really feels this. Or rather, he represents the external guilt, and Chakotay represents the internal guilt.
* Voyager. In the fourth season premiere, suddenly she's credited as a guest star. They might as well have named the episode "Yes, Kes is Leaving."
* Voyager into the past. Her scheme is foiled, and she is killed. Determined to break the loop, Janeway has the Kes of the past record a message for herself. When the loop comes around again and Kes once again boards the ship, Janeway plays the message to her, convincing her to stop.
* Voyager. It could don super armor capable of shrugging off the best efforts of the Borg (for a time).
* Voyager, it having been in space for some time (even if it wasn't for the full 450 years), puts the entire thing into the realm of the ridonkulous.
* Voyager itself is turned into a prison for several death-row inmates.
* Voyager launched. Their only hope is that he entrusted the messages to someone before death.
* Voyager newspaper clippings (despite this ancestor living during pre-warp times on Earth).
* Voyager. On at least one occasion, "cochranes" were used (quite incorrectly) as a measure of explosive yield, rather than the proper usage as a measure of warp field strength.
* Voyager plays with the trope — Janeway states at one point that if someone like Kirk had been a Starfleet officer during the show's time, he's have been kicked out long ago.
* Voyager, possessing various people long enough for them to enter various commands in their computer, then moving on. At one point Janeway considers dividing the command codes between herself and the security chief, as the alien can only possess one person at a time.
* Voyager). Possibly meant as a general "this might feel weird/we may experience

some turbulence" warning.
* Voyager reaches them their tech has advanced substantially from 1937 Earth, but still isn't up to Federation standards.
* Voyager returns via a transwarp hub. Back on Earth two years after their duplicates, the crew have to face various issues adapting to the fact that some of their doppelgangers have been involved with their spouses for the last two years, while characters like Joe Carey's wife are unsure how to feel upon learning that the 'original' is dead when his duplicate is playing with their children. As the fic ends, various individuals are shown trying to adapt to the situation, such as the Samantha Wildmans 'sharing custody' while one or the other of them goes off on assignments while Tuvok and his duplicate are accepted by T'Pel as both being her husband.
* Voyagers!: "All Fall Down" concerns the 1938 rematch between Joe Louis and Max Schmeling.
* Voyager's antics have resulted in a small fraction of the Collective being freed from her control, she tries to coerce Janeway into helping her rectify it by self-destructing Cubes filled with thousands of drones just to kill one or two in each ship. Janeway logically pointed out that she'd have to blow up the entire Collective to get them all with that strategy, so she changed tactics.
* Voyagers!: As the Omni is only supposed to go up until 1970 and Bogg's arrival in 1982 was a fluke, he can't return Jeffrey to his own time.
* Voyagers, astronaut Keith Stoner turns off his EVA suit heater because the alien ship is colder than outer space and will preserve him (and his presence aboard it will spur NASA to recover it before it leaves the Solar System). He's revived some years later and discovers everyone else in cryonics experiments conducted to make sure it could be done has died. He survived because alien nanotechnology was repairing his cells.
* Voyagers! back to the lab to make things easier once they've recreated the rabies vaccine. She lifts him into her arms to carry him there.
* Voyagers!", Bogg and Jeffrey find out the reason that airplanes have disappeared from the time stream is that the Wright Brothers fell out over a girl called Agnes. Jeffrey is baffled over how something that big could happen because of a girl. Bogg, amused, informs him that wars have happened over girls.
* Voyagers!". Bogg and Olivia know Pasteur did perfect it at some point. Olivia suggests they get some from the future when it has definitely been perfected, but Bogg points out that Pasteur is suffering a crisis of confidence and might not perfect it in the future if he isn't encouraged about it now.
* Voyagers!", Bogg crashes the Wright Brothers' glider during an attempt to prove it works and winds up lying unmoving amidst the wreckage for a few minutes, causing Jeffrey to think he died in the crash. He's fine, if a bit battered.
* Voyagers!": Bogg falls on top of Drake when he and Jeff omni in, although not for long as Drake uses him omni to time jump out.
* Voyagers!: Bogg is cleared and it's revealed that Jeff was always destined to be a Voyager himself, so the two can continue roaming the time stream together.
* Voyager's bridge, mess hall, and Janeway's ready room underwent some cosmetic changes to differentiate the two ships; they kept the CGI model, however, right down to the serial number.
* Voyagers!), but the judge explicitly states that this is "without precedent in these colonies"; the other accused are sentenced to imprisonment and hanging.
* Voyager's Computer had a bit more of a personality during "Q2" thanks to young Q's meddling.
* Voyager shift) and even discussing waking senior officers when an incident arises. However, even this is something of an example of this trope; we almost never see an adventure begin when there is nobody from the main cast on the bridge.
* Voyagers! However, Bogg loses his "Voyagers Manual" in the pilot. Jeffrey tags along to help, as he is a history buff (and Bogg can't return him to his own time, as his omni only goes up to 1970).
* Voyager simulation in that the latter included a distress call that Starfleet officers are duty-bound to respond to.

* Voyager. Since the entire premise is that Voyager is stranded halfway across the galaxy from home, there will obviously be no other Starfleet authorities or reinforcements around for them to fall back on.
* Voyagers!: In "Created Equal", Bogg knocks a large gladiator backwards over Jeff.
* Voyagers!: In the episode "Bully and Billy", a woman named Rita asks Bogg if he's married.
* Voyagers! is a very uncertain and discombobulated existence. The attempt is thwarted when Jeffrey sees Bogg is gone and suspects what he's trying to do.
* Voyagers!", is Jeffrey Jones' daydream as he imagines him and his family being attacked by pirates and himself trying to rescue his parents. Cut to reality, and it turns out Jeff is an orphan.
* Voyagers!. Jeffrey asks if he's ever been heard to complain, to which Bogg replies that he has, multiple times.
* Voyagers!: Jeffrey Jones is quite resourceful and knowledgeable and has brown hair.
* Voyager's Kes, whose race has a nine-year lifespan. In one alternate future episode, Kes had a daughter with Tom Paris... and that daughter was old enough to marry Harry Kim within a year or two.
* Voyager's, most of the all-but-omnipotent Q are shown to be bored half out of their minds, because life offers no challenges any more.
* Voyagers!". Nellie Bly, who's only able to remember the black cloak and shiny watch of her attacker, comes to the wrong conclusion that Bogg is the Ripper. She clearly suspects she could have been wrong later and recants her statement to the police when Drake attacks her again.
* Voyagers! occurring during history: Napoleon at Waterloo, George Washington at Valley Forge, and General Eisenhower at Bunker Hill. Jeffrey, as intended, reacts in surprise, knowing that the third is inaccurate.
* Voyager spacecraft the extra impetus and direction to go onwards to encounter Uranus and Neptune. Otherwise, they would have run out of fuel and propulsive power and taken a lot longer to reach the outermost planets.
* Voyagers!, Phineas Bogg tries to play Poker, but continually gets it confused with Bridge and Gin.
* Voyagers! series where Phineas and Jeffrey would travel through time to "give history a little nudge".
* Voyager's shuttles inside itself with a tractor beam. When the crew wake up, they're inside a vast chamber full of small spacecraft.
* Voyagers! start with Jeffrey and Bogg arriving in one time period, jumping to another time period (usually to escape a sticky situation), and then returning to the first time period to fix history. This often results in Bogg wanting to hang around in the second time period (usually because of a woman) while Jeffrey anxiously tries to impress on him the urgency of needing to go back to the first time period "before it's too late", despite how little sense this makes.
* Voyagers!) suggests to Bogg that he should leave Jeff with him and his wife. Although Bogg is fond of Jeff and it hurts to consider walking out of his life for good, he attempts to do so in the belief that Jeff would be better off with a mother and father and a stable home.
* Voyagers!" (the pilot), Jeffrey lies down on the rocks at Kitty Hawk, physically and emotionally worn out after the events of the day and telling Bogg the story of how his parents died. Bogg covers him with his coat.
* Voyager's vid library includes documentaries on long-vanished species like African lions.
* Voyagers!, "Voyagers of the Titanic". Bogg leans over the side to retrieve Olivia's omni before the boat sinks, with Olivia holding his hand. He manages to grab it in the nick of time.
* Voyagers!", when Bogg leaves to get the gasoline so Lindbergh can fly the Atlantic, he's warned there's a guard dog on the premises. When Jeff tries to tell him to be careful, Bogg declares that he has a way with women, children, and animals. Jeff concedes to two out of the three.
* Voyagers!": When the Sheriff asks Maid Marian how she's enjoying their excursion

through the woods, she compares it to eating live lizards.
* Voyagers!, with Jeffrey knowing more about how to use a clutch than Bogg.
* Voyager takes place in a part of the galaxy where replicators weren't readily available to the locals, so they often found that offering replicated but otherwise scarce goods could help... but having the damn things was such a game breaker locally that their initial troubles revolved around other aliens wanting them.
* Voyager - that it's hard to fathom how the ship made it back to Earth in one piece, let alone looking just as spotless as when it first set out at the beginning of the series. Later episodes like "Fury", where a time-travelling Kes causes a Vidiian warship to blow out three of Voyager's decks (in an episode set during the early seasons, when rationing and supplies were vitally important), make the ship's ability to effortlessly repair damage even more ridiculous.
* Voyager that proved extremely difficult to translate. They were very mysterious, and got their name from the ships they used- swarms of thousands of tiny, networked shuttle-sized vessels that worked together to drain energy from ships that invaded their space. Each little ship looked like a cross between a trilobite and a Horseshoe crab.
* Voyager, the Doctor created a holographic female Vulcan companion for another male Vulcan going through the pon farr.
* Voyager. (The episode was about racism in the 1950s, and the writers thought that the episode would suffer if it wasn't directed by someone who has to live with it today.)
* Voyager". Their leader believes that their sacred scrolls indicate that the as-yet-unborn Miral will lead their people to their promised land (they've been flying around space since Kirk's time and didn't even know that the war was over). However, some of the followers don't look too kindly on the fact that Miral is only one-quarter Klingon.
* Voyager - the leader is ready to strike a deal with Janeway in exchange for the holodeck technology.
* Voyager. This makes it a fertile ground for any theory that could go back re-explain past problems.
* Voyager to just outrun them once they rescued B'Elanna. Their enemies have apparently equal capacities.
* Voyager trapped in a phenomenon called "chaotic space," which is inhabited by aliens that can't be seen directly and can only communicate with certain people via hallucinations.
* Voyager twice (it succeeds in the finale, though it doesn't stick). The sphere itself is usually deployed from a giant hatch inside a Borg cube or the Unicomplex.
* Voyager used the prefix "iso" quite often to accomplish the same thing: "iso-rem", "iso-gram", "iso-modulator", and "iso-convective oven" to name a few examples.
* Voyager violent thoughts and specifically provoked B'Elanna. A few minutes later, a local murders another local over a tiny disagreement due to the influence of B'Elanna's thoughts. She is arrested by the local police and sentenced to have her mind purged of violent thoughts. Realizing that there's very little to B'Elanna besides violent thoughts, the crew fights to prevent this.
* Voyager was, in her words, "raised by the Borg", with an emphasis on completing tasks efficiently rather than reacting to situations emotionally. In a typical day, her emotions range all the way from "mildly annoyed" to "mildly confused". In the seventh-season episode "Human Error", #264, it's learned that Seven's cortical implant is specifically designed to function as a kill switch to shut down her higher brain functions if she experiences strong emotions. This is presumably to prevent Borg from regaining too much individuality after being separated from the collective.
* Voyager we learn that hair accessories such as Alice bands are permitted as long as they are in uniform colors.
* Voyager, which would likely have been difficult in their original three meter tall form, where they kill everything they touch. Note that they were only killing everyone because they thought everyone was like the Borg, who tried to assimilate

them.
* Voyage's End in Theros depicts an ocean falling into an abyss, with this flavor text:
* Voyages Of The Flying Dragon. Humans simply get sick and die, however.
* Voyages of the Princess Ark included a female lizardfolk shaman with substantial breasts.
* Voyages Of The Princess Ark, souls there can use their own residual life force as currency.
* Voyages of the Starwolf series. The former tends to be stable unless parts of the ship are damaged and cause it to go into amputation trauma considering it considers the ship it's body. The latter is purposely unstable and paranoid, designed to be that way and typically has to be wiped after each mission.
* Voyages of the Wild Sea Horse, giving her the ability to assume the form of a creature with the head and forequarters of a cat, the hindquarters of a rabbit, and ears that combine elements of both species.
* Voyage to the Bottom of the Sea (1961). The comm officer aboard the Seaview (a U.S. government vessel) was called Sparks.
* Voyage to the Bottom of the Sea, and several other 60s SF shows produced by this man.
* Voyage to the Bottom of the Sea episode "The Mermaid", Captain Crane captures a mermaid. Unfortunately, her companion turns out to be a Creature from the Black Lagoon-type monster who wreaks havoc aboard the Seaview.
* Voyage to the Bottom of the Sea had "The Deadly Dolls", where puppets come alive and try to replace all crewmembers.
* Voyage to the Bottom of the Sea: Has a Shark Pool inside a submarine. Yes, really. A villainess meets her end in it.
* Voyage to the Bottom of the Sea— submarine there, pretending to be the monster. And based on what the model work was like, doing a rather bad job of it. Some may feel quite cheated to find out Nessie was a submarine in this one and, on considering how often "Voyage" had REAL sea monsters on the show, then feel REALLY cheated.
* Voyage to the Bottom of the Sea that will save the Earth, a pair of nuclear submarines showing up with orders to sink them because the UN believes the missile will destroy the world instead.
* Voyage to the Bottom of the Sea, where an enemy agent explains to the immobilized captain that the energy weapon's immobilizing beam moves at the speed of light, and is therefore impossible to dodge.
* Voya Nui Resistance Team, being a squad of deformed Matoran, each have at least one oddity in their design, such as Velika's uniquely built arms or Dalu's larger limb pieces, but none stand out like Kazi, who uses a forearm piece for his body, while the other five all have foot pieces for theirs, giving them significant hunches. He also lacks the usual head piece; his mask is mounted on a piece typically used for hands, and his legs are different pieces that lack hip articulation.
* "Voyatoran" and "Doomtoran" for the Voya Nui Matoran (the latter coming from the book title
* voyennoe uchilische that go then straight to reserve; after the fall of the Union, they aren't as numerous and remain only in several universities.
* Voyeur does this when the player is supposed to be recording footage.
* Voygaer two parter: a small patrol ship, encountered in timelines where the Krenim were a second-rate minor power, and a battlecruiser, encountered in timelines with a strong Krenim Imperium. The episode's main villain operated a specialized temporal weapon-ship, a huge gun whose beam could erase an object as small as a single molecule or an entire civilization from the timeline.
* Voynich manuscript, a manuscript dated to the 16th century, of unknown origin and written in an unknown script. There have been many claimed translations of it, all of which have been debunked.
* Voytek, who loved sweets, baths and hanging out with his buddies. A case where he brought this upon someone: one day when Voytek went to the steam baths, he found an

enemy spy hiding in them. He roared and backhanded the spy, who promptly surrendered, presumably not having expected a bear to blow his cover. So he was punching Nazis before Harrison Ford made it cool.
* VP Andrew Nichols stages an assassination attempt to get Fitz to declare war on West Angola.
* VPRO, which is dedicated to cultural and intellectual programming (they're historically socialist), and primarily known for its documentaries and films.
* VR5 get the studio to green-light a TV movie to tie up the storyline. Unfortunately, the cast had moved on to other things by then, the scriptwriting foundered, and the whole thing fell apart before it got very far.
* VR5 Sidney can transport herself and anyone anyone else into virtual reality by calling them up on the phone and slamming the receiver down on the outside of her modem. The callee has no memory of the event after she hangs up.
* VR5: Sydney Bloom was the daughter of Dr. Joseph Bloom, a computer scientist who was working on developing virtual reality. He died in a car accident in 1978. Now in 1995 Sydney is a telephone lineworker and computer hobbyist. One day she accidentally discovers that she can enter an advanced type of virtual reality, where she can interact with other people.
* VR.5: We learn in one of the final episodes that a character killed early on was cryonically preserved.
* VRAINS, and Playmaker is the only one to have the Skill "Storm Access", a skill that gets him new Extra Deck monsters in the middle of a speed duel. Then Revolver gets the same skill for some reason. Come Season 2, Storm Access becomes so prevalent, that one starts to expect everyone to just use it.
* Vrak and Vekar, two villainous royal brothers, have different approaches in destroying and conquering Earth. Vrak is the cold, manipulative type; while Vekar is compulsive and is not afraid to throw temper tantrums when things don't go his way.
* Vrak, like his Sentai counterpart Brajira, is often considered to be one of the redeeming factors of Megaforce. He is easily described as many things: a sadistic, sociopathic
* Vralkans usually ride shantags, large purple-skinned creatures with apelike forelimbs and rhinoceros-like horns.
* Vraska the Unseen, a gorgon assassin from the Golgari Swarm. This seems to be the flavor behind both her +1 and -3 (+1, anyone who jumps her is petrified, -3, she tracks her target down and assassinates them through petrification).
* V remake, Anna threatens to lead people away from the Catholic Church, as V technology is capable of many of the same "miracles" on which the Christian faith is based, unless the Church forces its priests to stop badmouthing the aliens. The Cardinal she is talking to gives in.
* Vrienden Voor Het Leven, when Eddie gets drafted in the army, the sergeant makes him clean the toilet with his toothbrush.
* Vril Dox, or Brainiac 2, also has a force field belt, albeit a much less advanced one.
* Vrischka also sells a chocolate mephit, which is a real mephit magically transformed into pure chocolate.
* Vriska actually used to be pretty close to Aradia and, in particular, Terezi, but after she started going too far and becoming Chaotic just for the sake of it, both turned their backs on her, their relationship irretrievably broken. Even later when Terezi remembered their friendship and wished they could return to it she couldn't pretend that Vriska wasn't evil or that she wouldn't work against her if it was necessary.
* Vriska and is too intimidated by her to reciprocate after he finds out.)
* Vriska. As the main extrovert on a voyage laden with introverts of various stripes, she prevented them from splitting off into small groups on a large asteroid and kept them interacting with each other.
* Vriska as to whether she really deserves the treatment she gets from the other characters.
* Vriska could also count. From the outside, she's a wild, powerful, intensely-

confident
* Vriska eye it covers is never officially determined. It isn't until later in the Hivebent arc that we find out how she lost her eye (and arm) in the first place.
* Vriska fights Jack strewn across the floor like a demented rainbow definitely counts as this.
* Vriska finds herself in the body of a human, and tries to live like one. It doesn't work well.
* Vriska gets a robotic arm (also made by Equius) after her original one gets blown off. Aradia may be an additional case, as she spends a good part of the plot as a ghost-sprite inhabiting a realistic robot (again, made by Equius).
* Vriska has a diary from her ancestor who she strives to emulate, the notorious pirate Marquise Spineret Mindfang, who writes in an overwrought, awkwardly sexual, fanfiction-like style. When we meet Mindfang's alternate universe self, she is a fanfic writer. We also discover Meulin, who writes 'friendfic' speculating on ships.
* Vriska in general is a major example. For example, she holds long grudges and takes horribly
* Vriska is at least a semi-comedic example, since both Vriska's expression and gesture are
* Vriska is missing an eye and has a robotic arm (though she later regains her eye and arm when she attains god-tier power). Tavros, on whom she has a crush, is paraplegic (though he later regains the ability to walk, after receiving robotic legs).
* Vriska like Vriska, and is constantly asking people to keep her in check to prevent her from going off the deep end.
* Vriska Serket has a similar effect - at the start of Hivebent, most of her friends have stopped liking her due to her abusive, sociopathic personality, and the only troll willing to give her the time of day as a friend is
* Vriska Serket is an intentional example (her character class title is literally the Thief of Light). She's not one of the initial trolls introduced, but she quickly gains more panel time and becomes very important to the plot. It's actually part of her personality to force herself into the story; she even thinks she's the one who is going to kill the
* Vriska Serket ticks every box. Her narcissism is epitomized in her calling up Terezi right after she blinded her to laugh about it, casually bragging about how resilient she is in the face of her ARM being blown off, and her seeming to not understand why the other trolls can't just "get over" what she did to both Terezi and Aradia after the fact.
* Vriska's relationship with John reconstructs the trope, mostly because she's learned from her past experiences "helping" people. Not only does she succeed with him in every way she failed with Tavros, but she actually starts wanting to be a better person as a result.
* Vriska suggests that this actually doomed their SGRUB session since trolls are so naturally combative that three out of their four different kinds of romance revolve around managing hate as the basis (or demise, in the case of moirallegiance) of interpersonal relationships; trolls, she says, aren't meant to work together. Of course, then there's the times when it implies that much of the conquest and hate that has defined the species is a cultural choice made by rulers generations ago, and that under leaders like Feferi or Karkat the species could actually thrive. It's fuzzy which direction Hussie's decided to go with this.
* Vriska when John finally realizes how cruel and dangerous Vriska actually is.
* V'rix spaceships. Weather they were actually in the ships as pilots or if the ships were living vessels (maybe even another form of the humanoids) is another question entirely. Design documents released after the servers were shut down did reveal that neither the ships nor the humanoid form were the true form of The V'rix, but rather a form chosen to play on human's deepest fears; and their technology was a perversion of human tech. Oh, and there was 1 V'rix vessel that proved they could change their form becoming more powerful by incorporating human DNA.

* Vrook remarked that though The Exile was never a very powerful Jedi they were remarkably good at making people seeing their way, by unconsciously creating and drawing on force bonds even with people they'd just met. For example Mira the bounty hunter never usually kills, but is unhappy to note that she doesn't hold back when fighting in The Exile's party.
* VR technology is advanced enough to allow an individual’s brainwaves to move virtual objects without the items being touched in some simulations.
* VR Troopers after seemingly mortally wounding Ryan's father. After that, Ryan is the one delivering the beatdown to Decimator, and not the other way around.
* VR Troopers as its main protagonists. (Through no fault of the actors involved: Brad Hawkins {white guy} and Sarah Brown {the white girl} have both gone on to bigger and better things, though Michael Bacon {black guy} seems to have vanished)
* VR Troopers can be said to be the clone of Kaitlin (that two-parter ends with Kaitlin and the clone being merged, and Kaitlin gaining a "Double Team" duplication ability.)
* VR Troopers. Essentially, his own pride prevented him from having a chance at a rematch with Ryan.
* VR Troopers, Gozo Kirihara (Karl Ziktor's counterpart in the source material) has his two secretaries, K and S.
* VR Troopers) had 40; overall, it's 92 total episodes to 139 (if all three source shows are tallied together).
* VR Troopers had the Millennium Saber. Fortunately, it only activates once every thousand years, hence the name. The rest of the time, it's old and rusty.
* VR Troopers, JB and Kaitlain are fighting an outlaw cowboy robot named Gunslinger who speaks like Clint Eastwood in Dirty Harry (combined with stereotypical cowboy lingo), he's winning thanks to his shield, but when he injures Kaitlin with his gun, JB retaliates with a supercharged flying kick that shorts out the robot's shield, the previously calm and cocky robot absolutely loses it in response.
* Vr Troopers JB complains to a waiter that there is a fly in his soup and the waiter starts smacking the fly with a fly swatter.
* VR Troopers: Jeb, Ryan's pet Redbone Coonhound, gained human intelligence and speech when he was accidentally caught in a power surge in their base in the series opener.
* VR Troopers. Luckily it had just enough power to take out the mutant.
* VR Troopers made of her, and due to instability both couldn't exist at the same time. After being found out and imprisoned by the good guys, Ryan managed to convince her to switch sides, and she was reintegrated into the original Kaitlin, even giving her a "Double Me!" attack that created a clone of her.
* VR Troopers, so there were plenty of MOTWs who made the traditional one-off appearances.
* VRV: Bundles together content from Crunchyroll and related third-parties.
* VSauce did a video about the joke, appropriately called "Why Did The Chicken Cross The Road?".
* Vsauce his goal is to discuss and teach any subjects that he can with the questions in the title only being "hooks" to get the viewer's attention.
* Vsauce, intelligence and the fact that he has already lost most of his hair, you'd think he was closer to 41.
* V Sauce, Michael begins the video by eating the camera. After a few seconds of darkness, the camera lands in the toilet, demonstrating one of the human body's "through holes", with the mouth as one opening and the anus as the other, with Michael postulating that the human body is similar to a donut because of this hole.
* Vsauce often raises an eyebrow in his videos. His YouTube avatar also has him raise an eyebrow.
* Vsauce's "What's the Brightest Thing in the Universe?" video. It's brought back again at the end, linking it to the fact that the brightest things in the universe come from the darkest things (quasar-forming black holes), and that the brightest cities have the darkest skies due to the city lights drowning out the light of the stars. The video itself ends with a depiction of a black hole consuming a star and creating a quasar, before a border circle appears to form a proper taijitu.

* Vs. Skate Kid Bros. Changes to the game sprites include Mario being replaced with a guy on a skateboard who turns into a man in a red wifebeater and boxer shorts after picking up a quarter, who also collects soda cans, stomps on tanks, and infiltrates the castles of America to defeat football players and pick up hot babes until one finally takes off her top and invites seven of her friends.
* Vs Sky, allowing her to be a mainstay in the fandom roster of fan characters, especially those who can separate the character and art from the artist and their inspiration.
* Vs. Super Mario Bros. (an arcade port of the original with some changes to make it harder), depending on DIP switch settings, Mario might need to collect as many as 250 coins to get an extra life.
* Vs. System has army characters that are generally mooks given they can get killed off quickly and lack uniqueness because you can only have 1 copy of non-Army characters like Spider-Man on the field; army characters are replaceable. Some examples are S.H.I.E.L.D. agents, Doom Bots, and Sentinels. Also, army characters do not have any restriction whatsoever in deck construction, whereas any other card is restricted to 4 copies (at most).

* VTM) being exempt from this fate and blame it for making society dumber due to the fact that they permanently give shows on there low ratings, but the network was so successful that Medialaan, the creator of that network, started publishing four more networks in Belgium in addition to that one.
* VTM was introduced the BRT tried to demonize it. The only reason why it still passed is that the minister of culture at the time stood firmly behind it. Oddly enough this time it was not because they allowed American programming, but because Belgian television critics feared that it would lead to television without quality, which was a realistic fear in the very first years that they made programming. Nowadays most critics would not fear it anymore though, because the fact they can win awards has stimulated them to make more quality programming.
* V-Tuber fandom also largely notably goes out of its way to avoid breaking kayfabe. Even in situations where the real identity of performers is an open secret, it will rarely, if ever, be openly discussed among fans. If it is, it is generally treated as "forbidden knowledge" and only spoken of in certain spaces, away from fans who prefer to not learn about that kind of thing. (Of which there are a fair number.) This applies broadly up and down the entire medium, and is equally true of superstar channels with over a million subs as it is of indies with just a few dozen. Exceptions are quite rare.

* Wacky Americans Have Wacky Names: An American character with a wacky name.
* Wacky Delly. In an ironic twist, the general public hates it and it gets the show cancelled.
* Wacky Fratboy Hijinks: The first recognizable Western universities were founded in the High Middle Ages, as far back as the 11th–13th centuries... and already students were being condemned for drunkenness, getting into violent brawls, and engaging in all sorts of mistreatment of women, up to and including rape. It was worse in some ways because medieval university students in those days were younger on average than their modern descendants.

* Wacky Races (1991) all serve as the game's bosses who attempt to fight Muttley.
* Wacky Races (1991), quicksand is present throughout the Desert world. The battle against Sergeant Blast and Private Meekly in the Army Surplus Special at the end of the world takes place entirely over a stretch of quicksand. Strangely, while Muttley is able to sink in the quicksand, the Army Surplus Special can't.
* Wacky Races (1991), the first half of Stage C-3 takes place in a western town. Enemies include raccoons, desperados, and tapirs.

* Wacky Races (2017): "Cold Rush" features penguins trying to accelerate global warming to take over the world.
* Wacky Races (2017) episode "Formula Racing" has Dick Dastardly forced to look after Peter Perfect, Penelope Pitstop, I.Q. Ickley, and the Gruesome Twosome after they've turned into babies, suffering a lot of pain during his efforts to keep them from harm.
* Wacky Races (2017) episode "Smokey and the Racers" had all the racers end up in prison when Dick Dastardly attempted to cheat by having his cousin Sheriff Longarm D. Law arrest the other racers for speeding. Unfortunately for Dastardly, his cousin arrests him as well, forcing him to work with Peter Perfect, Penelope Pitstop, I.Q. Ickley, and the Gruesome Twosome in finding a way to bust out of jail.
* Wacky Races (2017) episode "Unraceable" has Dick Dastardly banned from participating in the Wacky Races and forced to try different jobs. One of the jobs he tries is ice cream man, which he gets fired from because he only gives the children broccoli-flavored ice cream and he lets the ice cream cones get covered in dirt before giving them to the children.
* Wacky Races (2017): In "Mambo Itali Go-Go", the racers stop at an Italian village where the locals insist on offering them feasts every day. By the time they're finally allowed to leave, they're too fat to fit in their cars and have to ride on scooters for the rest of the episode's race.
* Wacky Races (2017): In "Smokey and the Racers", Peter Perfect advertises a Japanese product named steakasaki and the phone number for orders is 1-555-0123.
* Wacky Races (2017), in the vein of the aforementioned 90s WB Animation cartoons, contain frequent fourth wall breaks and meta jokes, including entire episodes built around them - ranging from the racers having to put up with format changes against their will to meeting the creators of the old show in a courtroom session.
* Wacky Races (2017). Once he returns, he tells the others he had a dream and they were there.
* Wacky Races (2017) the same casual slapstick that comes from being a racer at the same time.
* Wacky Races #7, Gold Key) when Penelope Pitstop—who was first to the finish line—is disqualified for misinterpreting one of the items. The first item was a "real gone muffler," a beat-up exhaust pipe, but Penelope brought a crazy-colored scarf.
* Wacky Races after the narrator calls him "the Dracula of the drag strip":
* Wacky Races. Always noted as being devious and despicable but saddled with three charges who rank from inept to chronic backstabber, Dastardly would often wonder (in one episode) "what's a nice guy like me doing in a cooped-up outfit like this?"
* Wacky Races and from Blue Max. By style, one can argue he's a bushwhacker.
* Wacky Races, and its resident ghosts send several of the racers running away screaming. It might have gone on working if they hadn't tried to scare the Gruesome Twosome and their dragon.
* Wacky Races, a pair of cave-men who raced in a car made out of stone.
* Wacky Races (as well as Yankee Doodle Pigeon) have headgear with goggles, but at no time do the goggles go to use protecting the eyes. Once in awhile, Wacky Racer Red Max will have his goggles covering his eyes.
* Wacky Races: At the end of "The Dipsy Doodle Desert Derby", Dick Dastardly's genie laughs at his latest misfortune and Dastardly says he'd teach the genie to laugh if they switched places. The genie then switches places with Dastardly.
* Wacky Races: At the end of "The San Diego Go-Go" (Gold Key issue #7), Dick Dastardly takes losing to Penelope Pitstop well as he acquired a gold nugget that was lodged in Penelope's tire (it had gotten there when Dastardly sent the other racers back to Aztec times with a time-travel device.)
* Wacky Races car, the Compact Pussycat is not only various shades of pastel pink and bright red with a pair of ruby red lips as a grill, but her dashboard features lipstick application, hair dryer, and other feminine options.
* Wacky Races, Dastardly has stretched his arm to abnormal lengths to hit Muttley for snickering at him.

* Wacky Races, Dastardly uses his breath to inflate a giant balloon hoping to send the other cars away by popping it. The balloon floats while Dastardly is inflating it, allowing the cars to pass.
* Wacky Races debut episode "See Saw to Arkansas", the Ant Hill Mob is disguised as the Seven Dwarfs while hiding out from the police. When Dick Dastardly stops to asks where the highway is:
* Wacky Races debut episode "See Saw to Arkansas," yet Dick Dastardly's Mean Machine is on the other side. The train stops long enough for the other racers to go through a boxcar so the race can resume.
* Wacky Races. Dick Dastardly has Muttley plant explosives at a rock face in order to create a road-blocking avalanche, but when Muttley pushes the plunger, it doesn't go off. Dastardly splutters "Now what went wrong??" Muttley finds the problem: a wire was disconnected. He reattaches the wire and the explosives go off in Dastardly's face.
* Wacky Races Dick Dastardly will never win, because he always cheats, since one episode was shown to have him win only to have the trophy taken away from him because he cheated. Yet he continues to cheat anyway. Funny thing is, that when he sets the traps up for the other racers, he is always far ahead of everyone else, so if he just raced legit, chances are he would win every time.
* Wacky Races drives the ultra-girly Compact Pussycat, the #5 car. During the series intro, Penelope presses a button that compacts her car into a handheld ladies compact, and proceeds to touch up her face with the normal-sized powderpuff within the compact. Being beautiful, it seems, is more important to Penelope than winning stages.
* Wacky Races DVD set, one of the menu screens has two hot spots that lead to pre-commercial bumpers.
* Wacky Races episode "Beat the Clock to Yellow Rock", a group of bear cubs steal the Ant Hill Mob's clothes while they're swimming in their underwear.
* Wacky Races episode "Beat the Clock to Yellow Rock" at one point has a scene where Dick Dastardly and Muttley manage to hide behind a cactus that's much thinner than both of them.
* Wacky Races episode "Beat the Clock to Yellow Rock", this happens to Penelope Pitstop after Dick Dastardly and Muttley lure her onto a geyser by repainting the ground. Happens to Dastardly at the race's conclusion.
* Wacky Races episode "Creepy Trip to Lemon Twist" features two mischievous ghosts in the abandoned saloon. They play pranks on some of the racers, until Big Gruesome turns the tables on them.
* Wacky Races episode "Creepy Trip to Lemon Twist", one ghost says to the other, "I'd be bored out of my skull... if I had a skull."
* Wacky Races episode, "Fast Track to Hackensack", the Anthill Mob are arrested for speeding thanks to Dick Dastardly painting an 8 on a 35 Miles-Per-Hour speed limit sign. While in jail, the Mob form a human ladder so Ring-A-Ding can use a nail file to file down the bars on the window. Clyde is on the bottom, Ring-a-Ding is on top, and the other five members are in between them. This plan unfortunately fails because the Mob get caught by the sheriff.
* Wacky Races episode "Free Wheeling to Wheeling," as the Ant Hill Mob tries to get back into the race.
* Wacky Races episode, "Free Wheeling to Wheeling", the Anthill Mob speeds their car, the Bullet-Proof Bomb, up by tossing their ill-gotten gains (stolen money, machine guns, etc) out of it. They win the race as a result.
* Wacky Races episode "Race Rally to Raleigh" after the Mean Machine falls into a missile-created chasm just short of the finish line:
* Wacky Races episode "Rhode Island Road Race", after the narrator calls Dick Dastardly "the Dracula of the drag strip":
* Wacky Races episode "Speeding For Smogland". A chain reaction crash causes Luke and Blubber, Red Max, Rufus Ruffcut and Sawtooth, the Gruesome Twosome, and Dick Dastardly and Muttley to be jettisoned from their cars into each other's cars. Dastardly is in the lead in the Arkansas Chuggabug, but the announcer informs him that he'll be disqualified for not being in the correct car. He stops and another

chain reaction crash sends everyone back into their correct cars.
* Wacky Races episode "Whizzin' to Washington" when a motorcycle cop pulls him over for speeding. (Dick's alibi was that he was pursuing the Ant Hill Mob, who in this series appear to be fugitives.)
* Wacky Races Forever, Dastardly even states that his being a villain qualifies him to cheat, even when victory is within his grasp.
* Wacky Races for the NES, Muttley gets an extra life for every 100 diamonds collected.
* Wacky Races: "Free Wheeling to Wheeling" has Dick Dastardly and Muttley in a derrick crane poised to hook Peter Perfect's car as it comes out of a tunnel. A train comes out instead, and yanks Dastardly and Muttley off with it. The very next scene is a wide shot of the other Wacky Racers, and Dastardly's car, the Mean Machine, among them. It's later revealed that, unlike what the wide shot suggested, Dastardly and Muttley are still in the crane and the train is still pulling it.
* Wacky Races gimmicks. Luke gets extra points for steering his car with them.
* Wacky Races has Dick Dastardly putting the Mean Machine in reverse accidentally, causing him to smash into and crack the steel beam on which the other racers have been chained to.
* Wacky Races have some kind of armament mounted on/in them: ranging from an actual tank cannon on the Army Surplus Special to a fire breathing dragon in the Creepy Coupe.
* Wacky Races, he'd win every time. (Granted, almost everybody in that show cheats to some extent, but it's mostly just to make their own journeys easier. Dastardly is one of the only characters that tries to deliberately impede the others).
* Wacky Races, he has some scenes where he rides his car while Muttley drives it.
* Wacky Races, he never seems to realize he can easily wish to win the race.
* Wacky Races: In "Baja-Ha-Ha Race", the Mean Machine gets stuck on mud until a donkey pulls it out. To make sure his rivals won't be as lucky, Dick Dastardly buys the donkey. When Penelope Pitstop gets stuck, the seller calls another donkey to pull her car. Dastardly protests that the seller didn't say he had another donkey and the seller replies that Dastardly didn't ask and he has several donkeys.
* Wacky Races: In "Fast Track to Hackensack", Dick Dastardly sets a trap for the other racers in Hackensack, New Jersey by vandalizing a speed limit sign from 35 miles per hour to 85. This results in the Anthill Mob being arrested by the Sheriff and thrown in his jail. After Ring-A-Ding tries many unsuccessful attempts to bust him and the rest of the Anthill Mob out, Clyde explains to the Sheriff that they're competitors in the Wacky Race. As the Wacky Race is the Sheriff's favorite sport, this convinces him to give them an escort to the finish line, where they win first place. Dastardly is about to win, but the Sheriff arrests him for shooting at him and resisting arrest.
* Wacky Races in real life and has annually paraded them with people cosplaying as the drivers.
* Wacky Races is ordinarily a mild variant, if it weren't for Dick Dastardly repeatedly trying to kill all of the other racers.
* Wacky Races is really a tricked out tank. With all its tonnage, it's a wonder it could get out of the blocks at the start, let alone win a race.
* Wacky Races makes a Bonnie & Clyde reference in the episode "Free Wheeling To Wheeling" when he tells the mob to get out and push the car:
* Wacky Races, Muttley was known to bite the hand that feeds him (a.k.a. Dick Dastardly), but in "Race to Racine" he pulls a doozy. In a sabotage attempt, Dastardly plants him among the Ant Hill Mob, who take him as one of their own (Smiley O'Toole). Clyde instructs him to take Dastardly out, of which Muttley first surprised says "Who, me??" But then he gets a shit-eating grin on his face, snickers, runs atop the Mob car and fires a hand grenade at the Mean Machine.
* Wacky Races, not the "Smash Brothers" which is the name of a popular video game series (Super Smash Bros.).
* Wacky Races offered an example of the "slightly more credible version" when Sgt. Blast ordered Pvt. Meekly to turn left.
* Wacky Races often had a racer, usually Dick Dastardly (of course) either starting

the race before the opening shot or trying to do so.
* Wacky Races, one of discarded tank parts, another that's apparently a mobile moonshine sill, and one that's a literal rock on wheels.
* Wacky Races, Penelope Pitstop uses her ejector seat to expel Dick Dastardly.
* Wacky Races posits in the story "Follow Through To Yoo Hoo" that all the racers (even virtuous Peter Perfect) use a book entitled "How To Win A Race By Hook Or Crook," written by the series' token villain, Dick Dastardly.
* Wacky Races right down to the car which fell apart into a pile whenever he parked it.
* Wacky Races, Sergeant Blast ends up in the Compact Pussycat (Penelope Pitstop's car). Trying to stop it, he activates the controls that apply face powder and lipstick. Granted these are not standard controls in a car, but it does raise the question of why he thought the brakes would be activated by a button on the dashboard.
* Wacky Races shows Dick Dastardly zooming past all of the other racers without any trickery whatsoever — only for him and Muttley to stop so they can try to blow up a bridge. He also does this during the game, speeding ahead of everyone else fairly and then trying to cheat again.
* Wacky Races that drive the plot of each episode. Without them, every episode would just be a simple (if still highly unconventional) race.
* Wacky Races, the Mean Machine had holes all over its body and it fell apart as Dastardly was about to cross the finish line.
* Wacky Races themed video games out there, too, and they’re just as fun as the show.
* Wacky Races, the narrator is almost a little too interactive. (In the spin-off, he's clearly biased in favor of Penelope.) In one episode, for example, Dastardly is commenting on him passing the other racers, and the narrator cuts him off, saying "I’ll do the commentating, you do the driving."
* Wacky Races the steel wall with the painted scenery Dastardly employed. Dastardly proceeds to get flattened by a bus coming out of the scenery.
* Wacky Races. They have no problem operating vehicles scaled for humans of normal stature.
* Wacky Races to get wrecked in each episode. Sometimes through accidents, most often through deliberate machinations. Also expect them to be back in action in the next scene, even if the damage looked beyond repair (unless you’re near the end of the episode and the Mean Machine gets totaled, since by rule, Dastardly always has to lose).
* Wacky Races. Two new characters featured in the pilot were Parker and Piper Perfect, who were the children of Peter Perfect and Penelope Pitstop.
* Wacky Races. Usually, Dick's retaliation for Muttley snickering at him comes by a bop on the head, dumping water on him, or other variations.
* Wacky Races villain Dick Dastardly never set out to be a villain as in "The Super Silly Swamp Sprint" he says the other racers forced him to be one. It doesn't stop him from pulling his dirty tricks with gusto.
* Wacky Races which he uses to race to the finish line. He fails after colliding with a cactus, the result of not paying attention because he was breaking the fourth wall.
* Wacky Races, which seemed to - ahem - borrow a lot of Road Runner gags.
* Wacky Races would later avert this, revealing that the original Ant Hill Mob was in jail.

* Wacky Wayside Tribe: A secondary conflict added to keep the story from ending too soon.
* Wacky Wayside Tribe, Lotus-Eaters, Aeolus and his family, Circe and her "animals," the Laestrygonians, the Cicones, Calypso...
* Wacky Wayside Tribes as thanks for fixing it (to the ire of the new priest).
* Wacky Wayside Tribe stories keep "oasts" as mounts and meat animals. "Oasts" look exactly like oversized human beings, albeit with dull, uncomprehending expressions.
* Wacky Wheels has Razer the shark. Just like everybody else, he runs over hedgehogs and throws them at other racers.
* Wacky Wheels is just basic kart racing, except for the hedgehog cannon.
* Waco: As the FBI surround his compound, one of David Koresh's advisors tells him he's in a Catch-22 because he's had sex with multiple underage girls. Having sex with an underage girl who is at least 14 is statutory rape unless she's your wife, but claiming them as his wives would be an admission of polygamy.
* Waco depicts a real-life example. Mount Carmel is a ranch in the middle of nowhere; its owner and the Branch Dravidians' leader David Koresh has "taken on the duties of the flesh" for the group. Married men remain celibate while Koresh has sex with their wives and fathers children on them.
* Waco does this to save the Apache scout Johnny No-Legs from being lynched by a wagon train in "A Rope for Johnny No-Legs" in
* Waco, has a little of this attitude when she talks down to Judy, who has recently given birth to one of her husband David Koresh's children. She tuts that Judy, as the mother of one of Koresh's children, now has his ear, so she should follow Rachel's lead more.
* Waco: Koresh is facing a conundrum with his second 'wife', the teenage Michelle, as polygamy and having sex with a minor you aren't married to are illegal. So he marries her to Thibodeau to ward off questions by authorities, but the marriage is in name only.
* Waco, Koresh, suspicious of his new neighbor who claims to be a rancher, asks him a question about cows. Vazquez, who is a government agent and not a rancher, fails to provide a good answer, tipping Koresh off that he's not who he says he is.
* Waco opens with the ATF about to raid Mount Carmel, before jumping back nine months to show the lead-up to the shootout.

* Wade Barrett's guaranteed title shot and turned it into a six-pack challenge.

* Wade Barrett, when going by Bad News Barrett, would get the audience's attention by banging a gavel and making a thundering proclamation of "bad news" for the audience.
* Wade Barrett, which began when Wade started bragging about a movie he got to appear in. Sheamus, for no apparent reason, came out to answer this bragging by crapping all over the movie and Wade's acting skills. The odd part is that nothing ever came of this, partly because Sheamus was already in feuding with The Shield at the time, so it made his actions seem unnecessarily dickish.
* Wade Barrett, who was introduced as someone who will do anything for money, but aside from that mention, that hasn't been a part of his gimmick.
* Wade Herbert. Generic Juggalos and Juggalettes can be also be found partying in specific areas in Sandy Shores.
* Wade is stabbed in the head with a knife, but when he sees his beloved Vanessa, he starts

* Waffles for Stephanie," focusing on not just Stephanie Brown, but also Cassandra Cain, Helena Bertinelli, and Renee Montoya. Stephanie, Cassandra, Renee and even Helena (reimagined as a spy) were all eventually brought back into the new continuity at staggering points. It's largely due to fan support, but it's unclear it it had anything to do with any sort of "send stuff to DC" thing.

* Wagons East, Harlow and Larchmont are both much better at taking damage than giving it. When they have a fistfight, the fight takes hours before Larchmont is defeated.
* Wagons East's obesity didn't sit well with the high altitude and desert heat, and he died of a heart attack shortly after completing his scenes.
* Wagons East. The man tears several pages out and makes for the outhouse.
* Wagons East, the wagon master uses kitchen utensils to lay out a map of his proposed course (while drunk), then proceeds to get lost on his own map.
* Wagon Train directed the episode; the two of them showed up to do their old friend Ward Bond (the show's star) a favor.
* Wagon Train episode "The C.L. Harding Story," the title character is a female reporter whom Major Adams had given permission to ride with the train for a story, not realizing she was a woman.
* Wagon Train. Everyone complains about Charlie's cooking, although he seems borderline competent and occasionally good. One of his major problems seem to be adding less-than-popular ingredients to his stews, like gopher or even buzzard. One episode had him make birds nest soup out of an actual bird's nest.
* Wag the Director: Savvy wrestlers who can no longer work without risk of permanent injury can cultivate other opportunities as a trainer, commentator, or — most ominously — booker. The SOP goes as follows:
* Wag the Director: The cast makes demands that must be met if they're going to act in the work.
* Wag the Dog) a political cartoon poking fun at the President's sex scandal. The musician immediately composes an impromptu song mocking the whole thing, but stops when he realizes that everyone else in the room (most of whom work directly for the President) is staring at him in horror.
* Wag the Dog a war as far as the viewers know. There may be fighting going on off screen, or there may not at all. We don't know, because it doesn't matter and nobody cares. What's important are the photo ops, the slogans, and the huge PR spin.
* Wag the Dog is a particularly Juvenalian satire on the US news media and politics.
* Wag the Dog: The president's election campaign manufactures a war with Albania to unite the country around its current leader and ensure his reelection.

They then rushed the footage to Christchurch and played it over the South Island network.
* Wahoo's, probably as a play on the title character's catchphrase. If you don't live near a Wahoo's location, you'll understand why this example is on here.

* Waidstill and Martha Sharp are a downplayed example, while they never did any actual fighting, they risked their lives multiple times to help people escape from Nazi Germany, and were even give a reward/title by Israel for their work.
* Waif-Fu: Petite, yes, but that doesn't stop her from kicking your ass.
* Waif-Fu seems to be the exception that proves the rule, as she tends to rely on stiff shots and submission holds...and usually ends up beaten after the larger man toughs them out.
* Waif-Fu thin do not hit that hard. There are ways for small women to do damage in a fight, but it doesn’t look anything like it does on TV.
* Waif Prophet... and she'll give you three chances. Then she can destroy cities.
* Waikiki Wedding, played by comedic actress Martha Raye, is subjected to a lot of slapstick. She has a typewriter slam on her fingers, slumps face-first into a bowl of liquor, hits her head on a bunk, and falls over a lot. Georgia (Shirley Ross), the romantic lead, doesn't suffer any slapstick outside of the one scene where Tony accidentally pushes her off a pier trying to fix the heel on her shoe.
* Wai Lin or just shooting enemies) is because Michelle Yeoh has decades of experience doing kung fu movies.
* Wailord EX decks that ran no energy at all became popular at one point and are still seen in the expanded format. The idea is to use various item cards to heal your Wailord and render your opponent unable to attach energy and damage it, until your opponent runs out of cards in their deck.
* Wailord is supposedly 14.5 meters tall and is presumably the length of a real blue whale, yet its battle model shows it smaller than its trainer. This is obviously so it doesn't take up the whole screen and force the camera to be zoomed ridiculously far out. Some even say that its Dynamax form is how big it really is normally.

* Waiting for Frodo, but it's still on the first strip. Now that the movie is finally out of development hell, maybe the story will continue.
* Waiting for Godalming, Lazlo points out that if they make this offer they are going to find you rather than give you a free pizza. He experimented with this fact by hiding in his house, leading the pizza deliverers to abseil down to his window.
* Waiting for God - Diana has been single for over 60 years and wants to remain that way, but her latter-years lover Tom is unsatisfied with his role as the last of a long line of equally significant lovers. After many hijinks as Diana tries to avoid having to marry Tom, Tom ultimately refuses to marry her instead. They then carry on their affair as normal, Tom accepting that Diana having been willing to marry him at all is good enough and he doesn't need to actually force the issue.
* Waiting for Godot behave in somewhat of an Alphonse and Gaston manner, both deciding they should leave at the end of each act but neither one moving, apparently waiting for the other to act first. (A homoerotic subtext is also implied in the play.)
* Waiting for Godot, has one of the most well-known examples in theatre when silent put-upon Lucky is ordered to think:
* Waiting for Godot has the messenger boy who brings the news that Godot will not arrive today.
* Waiting for Godot, in general: among his other works are 'Act Without Words I' (an act without any spoken words), 'Act without Words II' (another act without any spoken words), Breath (a play just featuring the sound of someone breathing), 'Play' (a play), and 'Film' (you get the idea).
* Waiting for Godot in The Netherlands. When asked by the press on why he felt so strongly about this matter, Beckett replies "Because women don't have prostates," referring to one of the characters in the play's prostate disease. Female casts have still gone ahead, but not without having to wrangle with his estate.
* Waiting for Godot is a philosophical version of this trope. Didi and Gogo talk nonsense while waiting for the eponymous Godot. They keep on talking about how things happen, whether they should continue, if they're hungry, if they should commit suicide. Godot never shows up, and they don't do anything.
* Waiting for Godot is either an allegory of the Cold War, a collection of Jungian archetypes or an examination of human existence and the role of God, depending on who you ask. Godot himself is often thought as being God, largely because of his name and the fact that both him and God are described within the play as having a white beard. Samuel Beckett himself was very insistent about the fact that Godot was not God and if he meant Godot to be God he would have called him God.
* Waiting for Godot). Posters declared the play to be "the laugh sensation of two continents."
* Waiting for Godot. (Pozzo tries to be one too, but they're too incoherent to explain anything.)
* Waiting for Godot. Read through it carefully and there is actually a philosophical point being made, but it is embroidered with so much verbal diarrhea,

non-sequiturs, and just sheer nonsense words that it sounds like a complete load of gibberish.
* Waiting for Godot. Read through it carefully and there is actually a philosophical point being made, but it is embroidered with so much verbal diarrhea, non-sequiturs, and sheer nonsense that it sounds like a complete load of gibberish.
* Waiting for Godot subverts this by having the second act be more or less the same as the first, without much difference in tone. Hence the reviewer who said that it is "a play in which nothing happens, twice."
* Waiting for Godot that persists in studies of the play. "If I meant Godot to be God, I would have simply called him God." Though, to complicate matters, at another point he did claim that his subconscious does things without him at times. All in all, "If I knew who Godot was, I would have said so in the play."
* Waiting for Godot Though inaccurate, this phrasing fits a bit more humorously with the last lines of Act I, which it's meant to contrast.
* Waiting for Godot, waiting interminably for a man (friend? employer? supervisor?) who never comes.
* Waiting for Godot where Vladimir and Estragon spend one page hurling insults until Vladimir yells "Cretin" to which Estragon replies with "Critic", which naturally utterly defeats Vladimir.
* Waiting for God, several residents report items missing from their rooms. It turns out to be resident ditz Betty who's absent-mindedly stealing everything.
* Waiting for God this would be Diana Trent, most often deflating Harvey "The Idiot" Baynes in the midst of one of his schemes to defraud or otherwise suppress the tenants of Bayview.
* "Waiting for God" went farther than most with this. The evolved descendants of Lister's cat escaped the space ship years ago aboard arks using a "star map" given to them by their god, Cloister the Stupid. The star map turned out to be Lister's laundry list which he used to line his cat's basket.
* Waiting for God, who meet when they're committed to the same retirement home.
* Waiting for Guffman: A small-town play about the town's history (including their close association with the stool industry and the town's historical visitation by aliens) might be visited by a Broadway talent scout.
* Waiting for Guffman, a UFO expert uses the presence of a crop circle to prove that aliens visited Blaine, Missouri in the early twentieth century. He also notes that it's always the same temperature inside the circle: "67 degrees with a 40% chance of rain."
* Waiting for her boyfriend to return from looking for a missing kid, Betsy in
* waiting for him to pick out the correct fork. As Carlton wakes up Geoffrey after Will got the right answer, he cries out to him "Get your own Geisha!"
* Waiting for Insane Wayne" had Insane Wayne and his team of mercenaries-for-hire who the team briefly impersonates then ends up fighting.
* Waiting for Santa, while Santa himself does not show up until the end, Barney and the Backyard Gang still visit the Workshop and visit Mrs. Claus in a quest to give them Derek's new address.
* waiting-for-the-elevator-to-arrive moment, as Sergeant Cortez tries to make small talk with Agent Chen, his current ally.
* Waiting For The Sun might also count, if only because Morrison was plastered when he sang/shouted that, too.
* Waiting for the Trade they suffer integer overflow and loop back around to finding them attractive.
* Waiting in the Summer, and at the very least they're still hanging around with each other.
* Waiting in the Summer: Ichika's glasses serve as a disguised head-up interface for her alien technology.
* Waiting in the Summer: it's not intended as fanservice so much as an accurate depiction of what a nudist would wear while cooking.
* Waiting in the Summer love interest Ichika Takatsuki here is at least 2 years, if not, much older than him.
* Waiting in the Summer outright says this much and that he wants to be the one

doing the chasing.
* Waiting in the Wings. After 110 years, the Fang Gang is able to break the curse and set her free.
* Waiting in the Wings, so they try to get out of the room where it's affecting them.
* Waiting... is a constantly ticked-off, misanthropic, 'been at this too long' server who's always going off at coworkers and belittling customers behind their backs. Bishop, the dishwasher, offers her some genuine advice, and for a moment it seems like her angry personality is based on exhaustion and substance abuse...until she mockingly thanks him and screams at him to do her dishes.
* Waiting is worth it: Bakugo's overprotectiveness over Izuku and Izuku's emotional dependence on Bakugo in-turn has led to a lot of people - from Izuku's mother to Uraraka - to assume that the two are together. Bakugo denies it of course, and Izuku has no idea what they're talking about.
* Waiting is worth it, Izuku's telekinetic quirk awakens when he is accidentally pushed off a bridge and breaks his back, crippling himself for life.
* Waiting is worth it volunteered to act as protection for the Midoriya family when villains started targeting Izuku for his powerful quirk. Over time, he and Izuku's mother Inko began dating where they would eventually marry.
* Waiting..., it turns out the seemingly random items adorning a wall of the restaurant comprise one of these.
* Waiting...: One of the waiters has a problem that he can't pee in a public restroom, even if there's no one in there.
* "Waiting" revolves around SpongeBob standing next to his mailbox and waiting for a toy to come in the mail, neglecting his friends and his pet.
* Waiting Skeleton: A character waits so long that they've been reduced to a skeleton. Sometimes used for comedic effect.
* Waiting Skeleton: Showing a skeleton to demonstrate that waiting at a place can take a ridiculously long time.
* Waiting..., the staff does some nasty things to the food of a woman who endlessly complains about small flaws. Never piss off the people that handle your food.
* Waiting.... This earns him the "undying allegiance" of Monty and the respect of the entire restaurant.
* Waiting to Exhale, Bernadine's husband's mistress is a white woman and that is part of the reason why Bernadine is so upset with him.
* Waiting to Exhale is the best way of life for women if they don't want men to walk all over them.
* Waiting until the last second to do a maneuver when not waiting is far more advantageous.
* Waiting until you incur a loss before buying insurance, then claiming that the loss took place during the policy period
* Waitress briefly returned to the role of Jenna, and several other Broadway cast members returned to their roles as well.
* Waitresses and truly terrifying perms (and possibly worse bleach jobs), but who affably refer to everyone, even total strangers, as "hon," "suga," "sweetie," or "dear." She might be a "Flo."
* Waitress seems to have a lack of social skills and is obsessed with Lifetime movies and Revolutionary War reenactments. She also seems to have severe anxiety, as explained in "When He Sees Me". She also explains that she likes how the days are almost exactly the same in "Opening Up", showing that she likes to follow a strict routine and doesn't like change.
* Waitrose in 2014 took a page from John Lewis and made a Christmas advert set to a cover of
* wait. Small wonder they have a chance of attacking their own side in battle.
* waitstaff, convinced that their service was inexcusably terrible while the customers tried to reassure them it wasn't a big deal. The issue? A slightly dirty fork. The result? Most of the staff end up dead.
* Wait Till Your Father Gets Home dealt with the suspicion of infidelity. Harry is transporting a rather attractive female client to an out-of-town meeting when car

trouble forces them to stop at a motel. There's only one single-bed room, so Harry insists the client take it while he sleeps in the car. The motel manager suspects some hanky panky until he sees Harry owning up sleeping in the back seat of the car. Irma isn't buying it, believing that Harry is cheating on her. To prove his innocence, Harry drives Irma to the motel where the manager vouches for him.
* Wait Till Your Father Gets Home Don Adams) is particularly inept and Harry is only saved from a losing judgment when the plaintiff suddenly decides to drop the case.
* Wait Till Your Father Gets Home, introducing Gunther as Erma's brother in law. The episode quickly focuses on the officers trying to find a missing kid, with the Boyles shoved into the background.
* Wait Till Your Father Gets Home is escorting a rather attractive female client to a meeting and they stop overnight at a hotel which has only one room with one bed available. Harry lets the client take the room while he sleeps in the car, much to the surprise of the hotel manager, who thought Harry would try to sneak in the hotel room. Naturally, his wife Alice thinks he's cheating on her.
* Wait Till Your Father Gets Home — in this instance a new car dealership - with faults ranging from defective ignition, bad original tires to malfunctioning fuel pump (though it's more the dealership and shady salesman that's the problem in the episode).
* Wait Till Your Father Gets Home, Ralph Kane, thinks the Commies are on the move in our country. He has a grass roots squadron of neighborhood citizens at the ready to ward off the Red foe...wherever they are.
* Wait 'Til You're Older, featuring a child protagonist who desperately wishes to grow up, and getting his hands on a prototype experimental potion that causes him to grow up overnight into Andy Lau. (Said potion also spilled on a small shrub, which turns into a gigantic tree whose roots spills into the middle of the streets the next morning, much to the surprise of the public).
* Wait Until 8th pledge, which rallies to have parents delay giving their kids smartphones until 8th grade for those same predictable reasons: Smartphones are addictive, serve as distractions in academic settings, wound relationships, increase risk of depression, risk kids to cyberbullying, and expose kids to sexual content.
* Wait Until Dark, but especially the climax, in which blind Susy is trapped in her apartment with Roat the seething psychopath.
* Wait Until Dark has this as part of the premise: A group of burglars resort to increasingly desperate means to get a poor blind housewife to give up a cocaine-laden doll that was mistakenly delivered to her house.
* Wait Until Dark is about a blind woman whose basement apartment becomes her prison when she is targeted by a trio of criminals looking for a misplaced heroin shipment.
* Wait Until Dark, Sam gets wet when the taxi cab outside the apartment gives him a puddle shower.
* Wait Until Dark when psychotic Roat leaps and grabs Susy's ankle as she tries to get out of her home.
* Wait Until Dark, when the baddies are first searching the apartment, Roat tells Talman to check the closet. He opens it and is startled to find the corpse of the sexy woman who was carrying the doll, in a plastic bag hanging from a hook.
* Wait until football season to hear one of the most fun examples of this trope yet, courtesy of a Philly-area auto dealer: "The Matt Blatt Splat of the game!"
* wait until passengers were saved to be rescued thenselves, and were hailed as heroes by the passengers for it.
* Wait Wait... Don't Tell Me! as the title for an infrequent panel segment during the Carl Kassell years, in which a panelist had to guess which of three wacky headlines read by Carl was the real one. (Under Bill Kurtis this became "I'm Bill Kurtis, and This Is the News.") The introduction of the segment came with a lampshading of how period-specific the phrase was.
* Wait Wait... Don't Tell Me!. At one point, he followed it with, "Look, if you got better ones, send 'em in, OK?"

* Wait Wait... Don't Tell Me! features this in spades, as for most of the game each question is worth one point to each panelist, but in the final round, Lightning Fill in the Blank, questions are worth two points each, and they're more numerous than all the other questions combined. That said, since it's a comedy show masquerading as a game show, the score isn't really all that important.
* Wait Wait... Don't Tell Me!, fell into a real and hilarious example in the March 8, 2014 episode, creating one of the show's greatest unscripted moments:
* Wait Wait... Don't Tell Me! has also done "Germany or Florida" segments.
* Wait Wait... Don't Tell Me! has Carl Kasell giving a line from the "Who's Carl This Time" game, which sounds completely odd out of context.
* Wait Wait... Don't Tell Me! has the promise of this trope as a prize. If a contestant wins, they'll get radio personality Carl Kasell's voice on their home answering machine. What kinds of thing do they make him say? Well, find someone who knows someone who's won the game to find out.
* Wait Wait... Don't Tell Me! involved an ancient Egyptian chariot detained in American customs because it was classed as a vehicle but had no VIN. Host Peter Sagal said they finally found the VIN on the axle, consisting of eyeball, eyeball, bird, guy walking like an Egyptian...
* Wait Wait... Don't Tell Me! involved a study purporting that women found men speaking in a monotone to be sexy, leading to a hilarious attempt to invoke this from announcer and scorekeeper Carl Kasell:
* Wait Wait... Don't Tell Me! involving robots (robots being "laid off" in Japan, a robot taught to pair socks, etc.) often invoke this trope at some point, usually with host Peter Sagal or one of the panelists giving a monotone "What is love?" or the like. Brian Babylon once chided Peter for this, suggesting that it was no longer politically correct to make robot voices sound that way.
* Wait Wait... Don't Tell Me! leaving office in a couple days, so we're not worried."
* Wait Wait... Don't Tell Me! orginally offered scorekeeper Carl Kasell's voice on the winner's answering machine because the show couldn't afford anything else. The plan was to start offering proper prizes once the show gained a large enough budget but Carl's voice became so coveted that plan was dropped.
* Wait Wait... Don't Tell Me! Peter Sagal related a conversation in which he'd mentioned to an acquaintance that his brother was a lawyer. When the acquaintance expressed sympathy, Peter hastened to reassure him.
* Wait Wait... Don't Tell Me!, prompting this comment from Peter Sagal:
* Wait Wait... Don't Tell Me!) when Peter Sagal said he and Bill Kurtis were going to go down to the county courthouse to get married, and then have the wedding reception at the county jail. (They're both straight in real life.)

* Wait... what is the beautiful innocent victim doing now? She's got her cell phone out! She's calling the police! "That was extortion they tried to commit — the police need to know about it." The "delinquents" flee, revealing the truth.
* Wai Wai World is a slow, boring autoscroller that seemingly takes forever to end. Thankfully, the game gets more exciting the minute the second stage starts.
* Wakaba Isshiki. As little as her role is in being Futaba's deceased mother and Sojiro's former friend-implied-love-interest, her handprint is all over the background plot. Wakaba was a researcher and was focusing on learning about Cognition, eventually leading her to find out about the Metaverse, Cognitive Dissonance and similar. Her research and knowledge in this
* Wakako Zake. Wakako's character design is somewhat based on the author's likeness (a decision based on the editor's suggestion), the first volume's afterword shows that the author is likewise fond of food and drink, and the author has visited at least some of the establishments mentioned in the manga, but there's no clear evidence that Wakako and the author share opinions or beliefs, or are supposed to be one in the same.
* Wakamatsu attempted to invoke this towards Seo in chapter 14/episode 6 of

* Wakamatsu, in a distinctly divided example, gets extremely stressed out by the way Seo treats and acts around him, and yet he's outright said he can't live without "Lorelei" (Seo's voice) to help him sleep. Even in regards to Seo herself, he's considerably less stressed when she's gone on her school trip (to the point of being overly nice to everyone at school) but starts to feel down when he thinks about how much fun she's having without him.
* Wakamatsu is subject to this in Chapter 45. While spending time with the girls while they're swimsuit shopping, he assumes that Kashima is a boy, and it isn't until the very end that he's informed otherwise.
* Wakamatsu often wears a open-front sweater, which is not really officially sanctioned.
* Wakamatsu suffers from insomnia and was born on Sleep Science day (9/3).
* Wakamoto adds to that with his magnificent voice, as well as being able to
* Wakana Morinaga is shown to also be very hyper the moment she entered the classroom.
* Wakanda, a tiny African nation long hidden from the world, has had the cure for cancer for centuries and possesses the world's major source of
* Wakanda features the Black Panther; but it also involves Storm (who has ties to the country) and characters related to
* Wakanda is also not that different from the United States of America. It's a global superpower that was founded by immigrants from various cultures, and in the present day has been forced to realize that
* Wakanda is a subversion. It is a small yet high tech nation in the center of Africa with access to
* Wakanda is attacked before Shuri can finish detatching Vision's consciousness from the Stone, forcing Wanda to take him and flee into the forest. In the end, Wanda destroys Vision completely to keep Thanos from getting the Mind Stone, only for Thanos to bring him back with the Time Stone and brutally rip the Mind Stone out of him.
* Wakandan is increasingly depicted in the modern era as having a purple glow when energized.
* Wakanda who is an American yet his character is of both African-American and Wakandan descent.
* Wakatake often provides information on law, particularly about what actions broke which clauses of the Japanese Criminal Code.
* Wake, after several months of unresolved sexual tension, Shinji openly admits he wants to kiss Asuka. In answer, Asuka kisses him. They become officially together from that point on.
* Wake. As explaining to Asuka what he found out about Rei's secrets, Shinji gets gradually more upset until he ends up yelling.
* Wake, Asuka begs Shinji to not leave her alone when he states they should part ways.
* Wake, Asuka falls asleep in Shinji's arms after telling him about her parents. When she wakes up, both comment they have grown closer, and Shinji admits he wants to kiss her. Asuka encourages him to do so, and they become together from that point on.
* Wake, Asuka gets angry with Shinji when he insists on using a boat without warning her beforehand he cannot swim.
* Wake, Asuka sets up a little shrine for her late guardian Kaji on a cliff overlooking the ruins of Tokyo-3.
* Wake Island, in which the Japanese twice attempt to storm the tiny little atoll defended by 400 U.S. Marines. The first time they attempt it the Americans put up such a vigorous defense that the Japanese abort their landing. The second time they attempt it they succeed and wipe out the garrison.
* Wake Island the garrison surrendered when the battle had obviously been lost.)
* Wake Me When It's Over). His arrival to Gus's court martial is hailed by doing this twice, bailing out the second time.
* Wake Me When It's Over to prevent Colonel Hollingsworth from arresting Stark for going AWOL. Doc is quick to threaten to expose Hollingsworth's involvement in the

hotel when he purchased a massive amount of king crab for his own use. Hollingsworth relents, but his later demotion to sergeant indicates that this might have gotten out regardless.
* Wake of Death movie has a female US Army officer wearing a Combat Infantryman's Badge, which only men can receive as women are not permitted in Infantry (11) or Special Forces (18) series MOS.
* Wake of Death vessel belonging to a Chinese triad, ends up being adopted by the Archer family which she grows to embrace by the end of the film. The Archer family wife Cynthia is this trope herself, being an orphan and a white girl adopted by a Chinese-American family - which is why she felt obliged to provide a home for this orphaned Chinese girl she found.
* Wake of the Clash are two mismatched cartoon villains with a gang of faceless bank robbers. Both are loud and ineffective at their jobs, celebrating their minor victories to comedic effect, before being swiftly dealt with by a few passing heroes. The Hourglass may also fall under this trope, as he is practically harmless, though he is much more adept at making a sneaky getaway, and appears to keep far more threatening company.
* Wake, Shinji states he can forgive a lot, but he will never forgive his father for treating Rei as dirt as turning her into his loyal child soldier.
* Wake, Shinji suddenly becomes more assertive and able to stand up for himself after Third Impact.
* , wakes up and discover that in this reality women are in charge, and he falls victim to the same type of sexism he forced women to go through in his normal life.
* wake. The main character, Quoyle, has trouble explaining this to his young daughter, who doesn't quite understand the difference between death and sleep.
* Wake: "The sky above the island was the color of television, tuned to a dead channel - which is to say it was a bright, cheery blue".
* Wake-Up Call: A character gets put through some event that forces them to grow or otherwise get their act together.
* Wake-Up Call Boss after the fight when she reflects on the power boost it gave her:
* Wake-Up Call Boss is a giant robot called “the Praetorian”.
* Wake-Up Call Boss: Surprisingly hard early boss vs. surprisingly easy early boss
* "Wake Up Call of the Wild" segment "Kitty Cat-Astrophy" with Furrball; while he imagines the alley he's in is a prehistoric forest, he walks up to the screen and his nose fills it up.
* Wake-Up Call: Something occurs that forces a character to develop out of complacency, get their act together, learn a lesson, or some combination thereof.
* Wake Up Fighting: Someone wakes up holding a weapon or trying to fight.
* Wake Up, Girls! is about seven girls who make up the titular group as they aim to become famous. This anime is notable for being more realistic and cynical than most series about idols, putting a lot of focus on callous or careless managers, the precariousness of their careers, and the exploitative side of the industry.
* Wake Up, Go to School, Save the World also have to balance life as school students with their hero work.
* Wake Up, Go to School, Save the World has to juggle heroics and their personal life.
* Wake Up, Go to School, Save the World novels. The vast majority of the epic Yeerk-Andalite War has still never been seen, leaving it a wide-open canvas for fanfic writers to play with.
* Wake Up, Go to School, Save the World: Young heroes have to balance their school life with fighting evil.
* wake-up juice gone tesseract. Take a bit of Exam Crystal and let it dissolve under your tongue, and no matter how tired you were you will be more awake than ever before in your life until the dosage runs out. When it does, though, one of two things will happen: you'll either be just as tired as you were before you took the crystal, plus about thirty percent, or you will fall unconscious and nothing will be able to wake you up until you've made up for every minute of lost sleep. And both the duration and which aftereffect you will get are based on so many

variables as to be effectively random.
* Wakeup Makeup: Not taken seriously in live action anymore, but still played straight in animation.
* Wakeup Makeup: People don't wake up looking like they groomed themselves.
* Wake Up Ron Burgundy, Brick Tamland snaps out of his idiocy to bark out a series of Vietnam-style attack orders, prompting Ron to remark, "Looks like the Captain's back!"
* Wake Up, Ron Burgundy. It is notable because the film is comprised of deleted scenes, outtakes and unused subplots from the original film - there was so much material that the filmmakers cobbled it together and released it direct-to-DVD.
* Wake Up To Wogan story in the style of a children's book about what John did that day. Unfortunately, when he explains it to his wife Janet afterwards, his adventures with Melanie Frontage and Pastor Kidneys don't sound quite so innocent to her.
* Wake Up To Wogan. Terry himself, whichever of Fran Godfrey, John 'Boggy' Marsh or Alan Dedicoat (Deadly Alancoat) was co hosting that weak, Lynn Bowles the traffic announcer, occasionally producer Paul Walters and later Alan 'Baralands' Boyd, and at the end of the show a handover to Ken Bruce.
* Wake: When Shinji is feeling upset about Misato's absence, Asuka tries to comfort him by kissing him. However, Shinji mistakes her warmth for hostility and jumps backwards.
* Wakfu above a sea strait. The fight scene is a bit more extensive than usual, since the gondola is the size of a house and armed with a cannon, and the pirates have magical flying steeds.
* Wakfu: A great flood was caused in the past by Ogrest, whose heart was as compassionate as his tear ducts were limitless. As a result, this world is now composed of many archipelagos instead of a continent.
* Wakfu Amalia and her bodyguard, Archer Evangelyne, amongst the Brotherhood of the Tofu.
* Wakfu: Amalia in season 1 episode 25, while feeling the destruction of every tree in the forest.
* Wakfu and heels. As she's quick to mention in her first appearance, her blades are highly poisonous.
* Wakfu, and he's old, so his eyesight is bad either way. He keeps confusing random people for Princess Amalia — and then accuses said people of trying to trick him with disguises.
* Wakfu and its Noxmillen special. The eldest (judging height-wise) child and Nox's wife had black hair in the series, while being blonde in the special in addition to the wife's massive character redesign.
* Wakfu, a special device can nullify magic powers in a given radius. Looking like a sphere with three mechanical eyes, it isn't too hard to neutralize: a piece of cloth covering it will do the trick. One is used in the Justice Knight's prison to inhibit the magic of the prisoners, and another in the wrestling arena of the Trool Fair to prevent cheating.
* Wakfu, but sometimes combines it with this for some names, like "Rubilax" ([Exc]alibur again), "Kabrok" ("corbac", French slang for raven), "Sybannak" (Cannabis)...
* Wakfu. But then the carriage just stay hanging in the air (showing there is some magic at work) even before Nox stops time.
* Wakfu by his companions since he inevitably winds up making their quests over twice as long as they need to be, but he's too nice of a kid to back down.
* Wakfu can do this. And ironically can travel much faster because of it.
* Wakfu (chronologically the fifth episode) has this as a premise, the heroes trying to teach a peaceful society of blob-people to stand up against the bull-creatures who are stealing from them.
* Wakfu consist in a whole race of humanoid pygmies made of water and able to melt into puddles of water when they like. Normally shy and fearful, they can become a threat when they get serious, with their legendary hero Percemool being an actual warrior.

* Wakfu couldn't have been on the Zinit to research alien creatures if he was imprisoned back on his homeworld.
* Wakfu covered in damaged buildings that keep soaring or crumbling without warning.
* Wakfu during the Gobbowl story arc, when Yugo, Amalia and Eva are entering the match. The rather excitable sport announcer is handled sheets with their descriptions, finds them too bland and comments "Who wrote this? That's lame!" before going into wild improvisation.
* Wakfu episode 24. The sketch of Nox's two common minions (a Grouilleux and a Noxine) done by Renate is rather poorly drawn (and unfortunately using blue, despite insistence that the creatures were black). This results in the Crâ border guards, to which the poster was distributed to, to attack Yugo and Adamaï when they show up.
* Wakfu episode "Island of the Bellephones" has a huge Arachne chasing the girls, only to run away in fear upon reaching the lair of the titular creatures.
* Wakfu: Evangelyne falling down the stairs of a tall tower because of her high heels, in season 1 episode 4.
* Wakfu, Eva, while denying, casually chokes Grovy with an arm around his neck to stop him from adding a word.
* Wakfu felt rather lackluster, though the latter character has his defenders.
* Wakfu generally started like this. The villain of each episode shows up in the opening credits throughout season 1, though as the show progresses into season 2 and beyond, it begins to turn away from this format.
* Wakfu has a Gobbowl team call in a super-powered ringer after their star player was revealed to be a woman and switched to the other team (long story).
* Wakfu has a maw surrounded by crustacean-like pincers hidden in the belly. Although he describes "eating" what he puts there, it seems more to act as imprisonment.
* Wakfu has the Mechasms, who may or may not be this trope. But they certainly look like they are.
* Wakfu, he briefly slips into a cold monotone, the implication being that he's not really having fun anymore.
* Wakfu) into macho men. It doesn't just gender-bend the females drinking it; it turns them into tall, hunky, hairy, overly-muscular specimen of manliness.
* Wakfu is basically a huge set of stamps, leaving the sigil imprinted in the ground wherever he tries to smash an opponent.
* Wakfu-is integral to the game), and can only quest in the tutorial area and the new players area, are restricted to walking rather than using any of the various forms of rapid transit, and are even limited to using emote animations found in the beginner area.
* Wakfu is of no concern to it. It drove its most notable wielder, Nox, completely insane.
* Wakfu is one of the most emotionally mature, yet earnestly childish examples of this trope.
* Wakfu is suffering from heat stroke in the desert, and is convinced the ruin he's stumbling toward is just another mirage. So he gives a good kick to its stone wall — barefoot. Cue an X-ray shot of his poor foot bones, followed by the one-legged dance.
* Wakfu is willing to do almost anything to achieve his goals, but only because he thinks it'll all be erased when he succeeds and shows a lot of respect to parents like Alibert, who are willing to fight and possibly die to defend their families.
* Wakfu Likewise for Nox's cube vision. Justified in that the cube is closely related to Eliatropes.
* Wakfu looks the same even when everyone else is growing! Post season 3, this trope is why Yugo doesn't act on his feelings for Amalia; He's worried that a meaningful relationship would be impossible because of A) how silly it would look for a royal to have such a small consort, and B) he doesn't want Amalia to wait who knows how long for Yugo to mature into a man when she's already a young woman.
* Wakfu minor shushus as a form of execution. There's just the little problem that

Sadlygrove can't count.
* Wakfu. Near the end of Season 1, he manages to break free from the sword and fights Sadlygrove, and seals himself back in the weapon upon his defeat.
* Wakfu Not that the other heroes are slouch either, and regularly receive some serious beating with barely a trace a few frames later.
* Wakfu. Once they regain human form, Amalia insists that this incident should never be mentioned again.
* Wakfu: One amusing sequence has the girls falling into a swamp and being subjected to this repeatedly. First they run from a huge monster. Then they and the monster start running in the opposite direction from a bigger feline monster. Then all of them start running from an even bigger dinosaur. The dinosaur is puzzled when its prey suddenly run past it...only to get crushed underfoot by a much bigger dinosaur.
* Wakfu OVA, he breaks off large chunks of Mount Zinit, which come crashing down to various cities on the World of Twelve. Although nobody is shown being killed by the meteors, they're dangerous enough to have Ruel claim, "It's the end of the world."
* Wakfu, Qilby is not surprised. He claims that Adamai and Yugo have not changed since their previous incarnations. As much as he wishes things would be different this time, his long immortal existence has taught him that history repeats endlessly.
* Wakfu, Rubilax the major Shushu has glowing Volcanic Veins in his true, demonic giant form.
* Wakfu, Ruel has a sniper rifle. Made from bamboo, but definitely a sniper rifle.
* Wakfu). Ruel is also absent in "Reunion" while the rest of the group reunite, and he doesn't appear until the following episode.
* Wakfu, Sadlygrove pulls one on the party's first visit to the Sadida kingdom, after Evangelyne advises them that in the royal palace, they should act like gentlemen and with courtesy.
* Wakfu Sadlygrove to let him help. Unfortunately, Razortime is too much even for Sadlygrove's demon form.
* Wakfu Sadlygrove. With a hilarious epic buildup, at that. He whines afterward that it was still a beautiful goal, while Ruel has to be restrained by their teammates from strangling him.
* Wakfu scheming to claim the Eliacube so he can go back to draining entire worlds of their wakfu.
* Wakfu Season 1 Episode 3, while fighting a villain named "The Black Raven", Yugo makes the point that all ravens are black. The team then immediately drops what they're doing in order to work on a better name for him, ignoring the feeble attempts of the Black Raven to remind them that they were about to fight.
* Wakfu season 1 episode 5, Evangelyne and Amalia gets caught in a net... while they are setting it up themselves to defend the village, in the 13 episode Yugo, Amalia, Eva and Ruel were trapped upside down by a Shushu's net and in the following episode, Yugo and Evangelyne gets hanged upside down for a tribal dinner. In the second season, Evangelyne was cought by a green monster who could control vines, and it put her tied upside down in front of him.
* Wakfu, season 2, episode 10, Evangelyne and Amalia temporarily turn male thanks to a magic potion to be able to play Gowbbowl in the misogynistic town of Brâkmar.
* Wakfu Season 2 finale Eva is looking for her boyfriend during the battle. Cue a huge nuke like explosion going off on the other side of the island.
* Wakfu several years by the latter announcing she was pregnant, as it was one of numerous things that interrupted the former's attempts at proposing.
* Wakfu takes place in a universe full of a variety of different from animal people, elves, plant people, and a race of greedy old people, it also has the titular base of magic that's also the life force of all living things, gods and demons, and even reincarnation. On the Science Fiction side, it has aliens, laser weaponry, time travel, and robots.
* Wakfu than they can. When he copied Yugo's power he could create dozens of portals at once while Yugo is only able to create one pair of portals at a time.

* Wakfu that of the official deities of the World of Twelve. For more specific examples:
* Wakfu, the Demon Roses created by the Shushu Djaul are encountered in Season 1 and one of them bites Amalia, poisoning her. According to Eva there are three types: purple, orange and red. The red ones have the strongest poison.
* Wakfu. The latter case he's able to patch up, while the former...doesn't.
* Wakfu. The only reason their king wants to invade the main characters' world is that the Shushu have already destroyed everything worth destroying on their own world. Destruction is nothing but one big game to the Shushu.
* Wakfu, there's less emphasis on summons (and no way to learn "extra" summons), but eleven out of seventeen classes still get at least one by default. (Not the same 11 classes, and mostly not the same summons) Summoning here was formerly split into two types, "Leadership" (for summoning living or magically-animated creatures), and "Mechanics" (for summoning or building devices), but Mechanics was folded into Leadership to simplify the system.
* Wakfu The series does a good job showing just how intense battles between teleporters can get.
* Wakfu, the Sushu armies certainly fit the description, a horde of evil beings who seek only to destroy anything good or beautiful.
* Wakfu. The two Gobbowl arcs in particular are especially harsh for her. Evangelyne less often, although she's hardly immune, notably in the Ugly Princesses' abode, or in Ruel's house.
* Wakfu. They can put it to a great variety of uses, including battles by creating large and fast-moving clusters of vines to strangle or crush their enemies.
* Wakfu, though they can also be considered as simple parts of a wide franchise heavy on the cross-media.
* Wakfu to pay a non-refundable funeral expenses fee given how brutal it gets.
* Wakfu: Turns out, the usurper boss is the last remaining Lenald on Wabbit Island, who was just minding his own business and doing solitaires before the Wabbit King sent his guards to arrest him.
* Wakfu was created when a piece of candy accidentally fell into the alchemist Otomai's Ogrine mixture. Otomai instantly takes a liking to the baby and adopts him as his son.
* Wakfu, which parodies several horror tropes. Sadlygrove is found amongst several red stains all over the walls and floor, and the heroes think he's wounded or dead... except that he comments later, "It's a bad idea to eat red berries while seasick."
* Wakfu, Yugo immediately points out that all ravens are black, and he and his friends attempt to find him a better name.
* Wakfu, Yugo learns that he can use his portal abilities, which are usually limited in range, in a daisy-chain fashion, diving out of one and immediately into the next.
* Wakfu, 'Zaaps' are the network of portals used to travel across the archipelago.
* Waking Life, a man ends his disgruntled rant on the human condition by dousing himself with gasoline and tossing a match onto himself, as stoically as a Buddhist monk. Two bystanders watch with mild curiosity on flames rendered by hand-painting the frames of the film.
* Waking Life and loosely connected by one main character. Occasionally he wakes up in bed, only to eventually realize that he's still dreaming. His quest to wake up forms a vague plot during the second half of the film.
* Waking Life is less over the top than most examples on this page, as it is a series of vignettes where people monologue about dreams and philosophical concepts. It does get a bit trippy, sometimes.
* Waking Life. It's likely because of these reasons that Fox decided not to credit their 20th Century Animation branch in the film's production.
* Waking Life: Played with — the audience is never told if The Dreamer is alive or dead, though he strongly suspects he is, and the film keeps hinting at it. It's all up to interpretation.
* Waking Life scenes. The movie does not follow a traditional narrative structure,

having the same kind of disjointed randomness a dream would have.
* Waking Life, the main character learns he can tell if he's dreaming by flipping light switches or checking digital clocks. Unfortunately, this knowledge doesn't help him wake up.
* Waking Mars eventually takes over any environment it's planted in, converting the fertile soil to an acid type so nothing else can grow.
* Waking Mars is basically this trope: The Game. You as the player character grow and study increasingly unusual plant species in Lethe Cavern below the surface of Mars, though as your AI companion is quick to remind you, they're technically not plants.
* Waking Ned Devine. The title character is a man in a small Irish village who wins the lottery, and promptly dies from shock. One of the protagonists has a dream that convinces him that Ned would have wanted the other villagers to enjoy his winnings, and so he and his buddy convince (almost) the entire village to pretend that Ned is still alive and attempt to con the claim inspector. Hilarity, naturally, ensues.
* Waking Ned Devine when the man from the Lottery Commission comes to square away the administrative formalities.
* WakingNightmare is a small scale UK system that started out as "could we do an XCOM-style larp?" but evolved into something more like "Les Miserables meets Hammer Horror".
* Waking Nightmares players, that means they're completely invulnerable.) The Doctor is hit by a verbal version when their enemies reveal that they know who he is... and aren't the slightest bit afraid. Until then, everything that has ever faced him and survived has learned to fear The Oncoming Storm.
* Waking Non SequiturA strange outburst from someone whose mouth is awake and functioning a split second before their brain is.
* Waking Non Sequitur: Someone says a nonsensical sentence upon waking up from a dream.
* Waking The Dead, Fielding's girlfriend Sarah is killed in a car bombing, but he keeps seeing her in crowds and hearing her voice. She eventually comes to his office late at night to say goodbye and Fielding doesn't see her again afterwards. Either she was a ghost, she faked her death and went into hiding, or Fielding's grief made him mentally unbalanced. None of these scenarios are proved or disproved.
* Waking the Dead is about a Metropolitan Police division that specializes in investigating cold cases.
* Waking Up at the Morgue: A character awakens in a place where the dead are kept.
* Waking Up at the Morgue: A person who has died or been mistaken for dead after passing out finds themselves in a place where dead bodies are kept after they resurrect or regain consciousness.
* Waking Up at the Morgue. Likewise this is done for a Mermaid who had given up her voice. She broke the taboo by shouting to save them which resulting in a death curse; and a different member of the Monster Royalty gave his blood/life essence to her.
* Waking Up Elsewhere: Someone wakes up in a place that's not the place they fell asleep.
* Waking up in the morgue does (rarely) happen in real life. A woman named Allison Burchell, who had a severe form of a rare condition called cataplexy, was mistaken for dead on three separate occasions. It was more common in the past, before advances in medical technology made it possible to detect very faint signs of life. This probably led to several people being
* waking up on a distant planet a thousand years after his death in the finale. Prowl follows in his footsteps in the sequel.
* Wakka also has fairly balanced stats, decent in about every category and with a much longer grid. What sets him apart are his unusual tricks that allow him to inflict status and his long-range attacks. If a character just needs stat-buffing in general, send them to Wakka's grid.
* Wakka ruins Lulu's dramatic moment of volunteering to be Father Zuke's guardian when he awkwardly pipes up "me too!" She's visibly irritated in the next panel.

* Wakka's gravity-defying peak shows him to be no slouch in the absurd haircut department either. Even underwater.
* Wakka will praise Tidus on how well he handled himself in battle. This will happen whether you actually use Tidus in battles or not.
* Wakko also never said "Where's the potty? I'm gonna be sick..." in "
* Wakko is the only Warner sibling appearing the shorts "Ups and Downs" and "10 Short Films About Wakko Warner".
* Wakko's favorite. They go to Spielberg himself and ask him to which he simply says, "Who are you people?".
* Wakko's Wish after watching it twice — implying that he plans to rewatch it at least a few more times.
* Wakko's Wish", features a scene with Yakko tickling Dot as he tells her the story of their childhood.
* Wakko's Wish movie they made that year... or that decade, for that matter.
* Wakko's Wish. The actual film would be released on December 31, 1999.
* Wakko's Wish: Yakko, Wakko, and Dot repeatedly call King Salazar "King Saladbar".
* Wako and Sugata are supposed to marry on the basis of Wako being a Maiden and Sugata
* Waku Waku 7 if necessary. To top it all off, it's actually a police vehicle, piloted by the chief of police.
* Waku Waku 7, is based on this trope. Despite officially being designed as a housekeeper and maid, and fighting with brooms and hypodermic needles, she is able to evenly match the other (quirky) fighters.
* Waku Waku 7 is, well, a robot maid who serves her creator, "the Doctor."
* Waku Waku 7, you get to fight a final Bonus Boss in the form of Rouwe, an old man dressed in a karate gi.
* Waku Waku, a classic charity show with a focus on wildlife trivia. Although it was extremely popular for quite a number of seasons, it was cancelled well over a decade ago. It's the one panel show that all others take their cues from.
* WALA-TV (a Fox affiliate) in Mobile, Alabama, plays a 2000s ad for a local bankruptcy attorney (which is currently in business) once during almost every commercial break outside of Fox's regular programming schedule.
* WALA-TV also loves playing ads for Dale Seasoning once during almost every commercial break especially the local news.
* Walden Macnair is a large, bloodthirsty and aggressive Death Eater. He spent the years between wars as an executioner for the Ministry, greatly appreciated Voldemort's promise of victims, and helped recruit the Giants by bonding over bloodshed. Hagrid refers to him as a maniac.
* Walden's debut episode had him get a lustful reaction from every single female character, including Charlie's lesbian therapist, making it this trope for her.
* Walder Frey asks a serving girl, who is Arya Stark in a Faceless Men mask, if she's from his castle, to which she says no. Walder then remarks "You pretty," then smacks her in the bum.
* Walder Frey is the second-oldest character seen in the show (after Aemon Targaryen - though possibly excepting Old Nan, while she was still alive), and certainly one of the most evil.
* Walder Frey knows the other noble houses look down on his family and him personally for being tardy to the Battle of the Trident, so he demands a good reason why he should waste a single thought on any of them.
* Walder Frey, who is past 90, publicly gropes and boasts of bedding his 15-year-old wife and utters filthy innuendos pretty much every time he opens his mouth.
* Walder had other plans, having entered an arrangement with Tywin Lannister and Roose Bolton to overthrow the Starks and Tullys, and had Robb and most of his people murdered at the wedding.
* Walder "the Late Lord" Frey earned his moniker for his tardiness at the Battle of the Trident.
* Waldo, and is told that magic can do anything — no rules. He disbelieves this and proceeds to discover the rules of magic and applies them, becoming a very successful magician as well as technologist.

* Waldo Butters, not Chrisitan, and Uriel specifically notes that it's his faith in good winning over evil that helped him become a Knight.
* Waldo Butters, the geeky, polka-loving medical examiner, is one of the foremost experts in the world on wizard physiology. He studies Harry whenever the titular wizard gets injured (which is a lot), and also gets a crash course on magical theory (circles and the use of "will") in
* Waldo. Like Steve, although to a lesser extent, he's likely to annoy nearly everyone on the show, even Steve, but he still is loved by fans.
* Waldo's Hawaiian Holiday. Alex Cox writes that the novel explains what happened to Otto 10 years after his disappearance.
* Waldo story of the same name. It wasn't entirely by choice in his case.
* Waldo": 'waldo': A device which is controlled by moving a model of the device; usually a pair of robotic hands that are controlled by sensors in a pair of gloves. This allows things to be worked on remotely or for someone to control a much larger/smaller version of their own hands.
* Wale isn't a two-hit wonder on the urban format, but his only top 40 hits on the Hot 100 were 2012's "Lotus Flower Bomb" and 2013's "Bad".
* Walena Devilana. She holds the view "The world has neither justice, god, nor order" and sneers that "It's all nothing but wretched extravagance."
* Wales have grown dilapidated and broken-down as the mining industry has more-or-less evaporated and people have flown to the big cities or even to England to find more gainful employment, leaving the towns as shells.
* Walesisms. He's for, and even against, and he'll answer you in deceptive straightforward way. He can invite Mr Lech Kaczyński with his wife or Mr Jarosław Kaczyński with his husband. He doesn't want, but he must. He made a 360 degrees turn. There are positive and negative pluses.
* Wales national team and also the country's most-capped player (i.e., most international appearances), is also qualified as a lawyer, more specifically a solicitor.
* Wales-related stuff going on, thanks to it being filmed in the BBC's Cardiff studio...
* Wales right next to the rail tracks. Somebody complained, the police were called and they found the man in the same spot. You'd think he would have moved.
* Wales, until the 2016 European Championships. While not expected to win anything, with players of the calibre of Neville Southall, Ian Rush, Ryan Giggs, and Gareth Bale, they were at least expected to qualify for a tournament - however, until they qualified for the 2016 Euros, the last time they'd been at a major championships, it was 1958 and they'd been knocked out by a young fellow called Pelé. Then they promptly took the footballing world by storm, swaggering to the Semi-Finals in style, thrashing Russia 3-0 and a much-fancied Belgium side 3-1, before apparently running out of steam and losing 2-0 to eventual champions Portugal.
* Wales was conquered by England in the late 1100s. In the following centuries there were sporadic rebellions against English rule, the most successful being by the prince Owain Glyndwr in the 1400's. An organization called the Meibion Glyndwr — Sons of Glyndwr — still exists today, although dormant, in the way a rump IRA continued between the War of Independence in 1921 (only to leap into active life again in 1969). In the 1960s, traffic signs written in English only were destroyed until the British Government agreed to dual-language signage in all of Wales, with Welsh taking precedence over English in the West. In the 1970's and '80s, second homes in Wales bought by English-speakers were under threat of being firebombed. In a very real way, a Remnant is still fighting English rule nine hundred years on — although very, very, much marginalized and made insignificant after a series of concessions to Welsh nationalism.
* Walfas arrests people and randomly administers the death penalty. It's entirely possible for a school activity to end with someone being killed.
* Walgreen's has intentionally-scary ones in its stores during Halloween. Turn the crank, and "Pop! Goes The Weasel" plays, only for a
* Walhart has several skills on higher difficulties (Aegis and Prescience in Hard,

those two, Rightful King and Pavise in Lunatic) that he inexplicably loses by Paralogue 19 where you can recruit him and only retains his base skill Conquest. He only can relearn Pavise if reclassed into a General but all other skills are lost.
* Walibi Holland's Halloween Fright Nights event uses an evil clown called "Eddie the Clown" as one of its main mascots.
* Walkabout, a teenage girl and her younger brother are lost in the Australian outback. At about the halfway point in the movie, we are shown that there is a farm house, just the other side of a hill from them. Of course they never see it.
* "Walkabout", "Bushido", "Kingdom" and "The Journey" all have elements that feature in the
* walk around the house in her "unmentionables". He would of course say this even if she wasn't his (non-biological) niece, as he is quite uptight about nudity, period.
* Walk Cheerfully might be the earliest example, being a 1930 film about a yakuza hoodlum who decides to go straight to win the love of a virginal good girl.
* Walk, Don't Run in order to avoid scandal and social embarrassment and damage to Julius's career. All because Steve rented out Catherine's guest bed. It's impossible to imagine the movie being made even a few years later when the swinging 1970s were underway and nobody would have batted an eye at such a living arrangement.
* walked and hitchhiked across most of the United States to try to talk her out of it. Needless to say, she accepted and they were engaged.
* walked) before meeting his black mother's people. However, Ranec gets around sexually (like most men in this story), and many characters have observed his genetic influence on the younger generation, so a darker skin tone is present among some of the Mamutoi children whom he fathered.
* walked in on him being very badly beaten by a rather pissed off rival member of the local Irish mob.
* Walker called He Who Walks Behind resembles a living shadow in that it stays behind its target at all times. No matter where they turn or what they do, even something as simple as putting their back against a wall, He Who Walks Behind will always attack them from the rear and is next to impossible to look at directly beyond talking to its reflection.
* Walker Cup/Curtis Cup (USA vs. Great Britain & Ireland amateur team competitions held every two years)
* Walker, maybe about a hundred years. Things towards the beginning of that span start fading and getting blurry, and eventually are replaced with new memories. Occasionally a catalyst can give him flashes of some long dormant memories, though.

* Walkers Crisps did this on several occasions. Nobody was able to tell the difference as most of the time, they were able to replace ingredients without the flavour significantly changing. However, there was at least one instance of them having to own up to it. They had to change the name of the flavour "Barbecue" to "Bbq Rib" because it tasted so different with the new ingredients. Many people who liked "Barbecue" also like "BBQ Rib" but think it should have been launched as a different flavour, rather than replace one of their favourites.
* Walker's Crisps, which feature former footballer Gary Lineker belying his nice-guy image by portraying an arch-villain who will stop at nothing to get his hands on the product. The campaign began with
* Walker's Crossing as his older brother Gil and best friend Matt gravitate toward a Neo-Nazi movement.
* Walker's Crossing: Lon sometimes threatens to "take a strap" to Gil for making white supremacist comments.
* Walker's Crossing Lon Walker can't be a cowboy anymore because he hurt his leg when a horse bucked him off.
* Walker's Crossing: Ryan and Gil's sister Charlene is campaigning to be rodeo

queen and is annoyed that Gil's extremism reflects poorly on her.
* walkers Doesn't excuse the imminently deceased ripping apart like wet construction paper in the walkers' hands...
* Walker's preferred fighting method seems to be lighting people on fire. Later on, he uses flammable fluid as a method of intimidation, a spray can and a lighter to defend himself from rogue Dollars members,
* Walker's resignation at the end of season 2 while facing impeachment over a minor crime would be a hard sell after Donald Trump's impeachment in 2019, which failed to remove him from office. Most people would think "Walker would never be impeached for such a small crime" (or at least "There's no way he would voluntarily resign") given the nature of the allegations against Trump, and the fact that his own party ultimately stood by him.
* Walker suggests the nickname "Adventure" to Rick, who later goes by that nickname in
* Walkers used to run adverts for their "French fries" (basically long, thin potato based snacks) where they were eaten like this (though without the ding).
* Walker, Texas Ranger actually innocent; DNA evidence exonerated him, but the cops never checked.
* Walker, Texas Ranger: Alex Cahill is this to Walker, whose backstory includes a fiancée who was murdered.
* Walker, Texas Ranger, Alex (of course) is kidnapped by one of the Villain of Week's henchmen, who has been lurking in the backseat of her SUV. One would think that as an ADA, the girlfriend of a cop, and someone who's been kidnapped or assaulted numerous times, she'd be more vigilant about her personal safety.
* Walker, Texas Ranger, and inherit half of the trust, they decide to get the mother's half this way. Their tactics involve spiking her tea with small amounts of ecstasy, moving her things around when she isn't looking, and having some one dressed as her dead son ride down on a boat, calling to her.
* Walker, Texas Ranger, and probably more besides that, had a particularly bad instance of this: Walker confronts a car full of gang members by calmly walking out into the street, drawing his gun, and firing a single shot into the hood, setting it on fire and out of control.
* Walker, Texas Ranger and the episode "Storm Warning" were written and co-written respectively by Leigh Chapman under the name "Louise McCarn".
* Walker, Texas Ranger. A Russian cop who has gone undercover with the Russian mob sneaks away to call Walker and company. When he's caught by one of the gangsters, he turns the tables by yelling at him for interrupting his phone sex with his girlfriend.
* Walker, Texas Ranger bad guy is finished off after his weakness is revealed.
* Walker, Texas Ranger, basically any lawyer who isn't Alex Cahill. Even her fellow prosecutors, who are cynical and jaded in contrast to her idealism, as well as occasionally corrupt and incompetent.
* Walker, Texas Ranger, but the Viper immediately tells him that if the truth were revealed, Walker wouldn't live to see Monday. Out of spite, he finally agrees- but gets only two words out when a bullet rockets into his chest and kills him instantly, shot by another sniper in some unknown area of the vast stadium. Walker has no idea where the shot came from, as he heard only a sharp echo resonate through the walls, and it was drowned out by sounds of cheering crowds, meaning Trivette, the security guards, and Secret Service alike couldn't hear the gun go off, letting the culprit slip away virtually unnoticed. Walker never finds the second assassin, as the episode closes out respectively to the way we see Kennedy's murder in real life - riddled with conspiracy theories, and the actual truth behind it never made clear.
* Walker, Texas Ranger ended with a photo of the main cast, along with the caption/ narration "Until We Meet Again".
* Walker, Texas Ranger episode has Walker and Trivette running the "boot camp" variety to reform wayward youth.
* Walker, Texas Ranger episode "The Avenging Angel" portrays wrestling as a legitimate, high-stakes sport, to the point where the titular wrestler is killed

for refusing to throw a championship match.
* Walker, Texas Ranger episode "War Zone", Walker and Trivette must outrun a bomb explosion set off in a house by a dead body.
* Walker, Texas Ranger episode "White Buffalo", the villain attacks Walker with a crowbar, only to be beaten down with a 4x4. Naturally, while Walker deals with one of his accomplices, he decides that the proper response is to rev up a chainsaw. It doesn't really take.
* Walker, Texas Ranger, especially in later seasons where the fights lasted longer.
* Walker, Texas Ranger featured bears a number of times, Episode 173 featuring a particularly scary one.
* Walker, Texas Ranger finds a bus full of schoolchildren buried in a muddy pit dug out of a field where not only will the kids die but clues to the bus's location will be erased.
* Walker, Texas Ranger fits this trope. They're all filled with big, mean, lowlifes, and they all get their butts kicked by Walker and his partner(s). One wonders why the bad guys never wised up.
* Walker, Texas Ranger, Francis Gage is usually referred to by his last name, with only his sister calling him by his first name. Although this is typical of male characters usually being called by their last names: Walker, Trivette, etc.
* Walker, Texas Ranger had a version where to get in to a group, a pair of undercover cops have to go with the gang to town to commit a crime. They're able to avoid causing real trouble by having a cop stop them and pretending to kill him, which is good enough.
* Walker, Texas Ranger had Cordell Walker rescue a girl who was trapped in a Christian cult camp, but with the last minutes of the episode devoted to Walker's rescue of Alex Cahill from the cult camp, it's unknown what has happened to the girl he was supposed to rescue. An even worse example is the movie "Trial by Fire" which ends with Alex being shot in the courthouse and lying near death. Supposedly, the producers were expecting CBS to offer them the opportunity to make further TV movies but low ratings (supposedly due to a football game preceding the movie running an hour longer than anticipated) and CBS shortly thereafter scrapping their Sunday night TV movie has made further TV movies unlikely. INSP network even doctored the movie to edit out the final scene with the shooting because there is no resolution and removing Alex's shooting leaves the story in a position to end without a hitch.
* Walker, Texas Ranger had the rangers break into a vault (for some reason). The relatively minor female ranger does it because "She's the only one that can fit into the stealth suit."
* Walker, Texas Ranger had three cops who did this to criminals they feel didn't get the punishment they deserved. Their downfall begins when they kill a kid who was actually innocent; DNA evidence exonerated him, but the cops never checked.
* Walker, Texas Ranger: Happened in at least one episode. The bad guy doesn't escape, but this allows him to have a big throw-down with Walker.
* Walker, Texas Ranger in a tan canvas duster, even though he's much more likely to be wearing a cattleman's short coat, a sheepskin jacket, or a leather vest during the episode.
* Walker, Texas Ranger includes two parallel stories, one taking place in the present and one taking place in the Old West. They feature the same dozen or so actors playing similar (though not quite identical) characters.
* Walker, Texas Ranger in his episodes told in flashbacks. Cooper's family farm was attacked, with his father shot dead on the spot and his mother raped and murdered. He later takes revenge against the culprits one by one.
* Walker, Texas Ranger is met with the reopening of a cold case that retired him in the episode "Hall of Fame"—women in general. CD never caught the Hangman because he got checked into a clinic to try and mend his personality, but that failed and he went right back to killings. CD has a proper showdown this time.
* Walker, Texas Ranger, played football for Penn State and was drafted by the Dallas Cowboys before a career ending shoulder injury.
* Walker, Texas Ranger premiered with the two-hour TV movie "One Riot, One Ranger."

* Walker, Texas Ranger: Regularly used, to varyingly degrees. A frequent use will be a split second before the villain is about to leave town, kill someone or carry out a particularly evil act (e.g., committ a huge bank robbery and kill hundreds of people inside), only for Walker and Trivette to arrive at the last second – with an army of police officers – and, after interrupting the vile act, beat up the bad guys.
* Walker, Texas Ranger reveals to an orphaned young man that his parents were murdered by racists because his mother was white while his father was Cherokee.
* Walker, Texas Ranger: Season 5's "Warriors," where a despot tries to perfect a genetically enhanced superhuman so he can clone and create an entire army of them to stage a hostile takeover of the world, the villain and his sidekick try to kidnap the woman who is using the same genetic formula (but for good). Walker and Trivette arrive to try to foil the kidnapping and – in a twist of this trope – try every kick and punch in their arsenal, and also fire their entire supply of ammunition into the muscleman's body … to no effect. Just before they can decide what to do next, the muscleman beats up Walker and Trivette and helps his boss make a getaway.
* Walker, Texas Ranger: Several episodes feature the local news media as vicious, bloodthirsty, ratings-seeking outlets who care more for getting the story first rather than accuracy. The primo numero uno example is "In God's Hands," where a news reporter continually reports (wrongly) that Trivette had fired his gun during a shootout (with a street gang) and one of his bullets had struck and critically wounded a six-year-old boy; the same reporter is seen harassing the family and hospital staff, and bungles key facts each night on the news as the investigation is ongoing. In the end, Trivette is cleared — a bullet from one of the villains' guns had struck the boy — but no on-air correction is ever shown.
* Walker, Texas Ranger: Several episodes had corrupt cops, mainly in background roles, but one — the Season 4 episode "The Brotherhood" — was the focus of an episode. A small-town police department is run by a police chief frustrated about the crime rate and the perception that criminals get off on technicalities, so they kill the suspects after they are freed by the court. At one point, the crooked officers turn things up another notch when they throw a lighted cocktail into a prison bus, killing several prisoners and the guards and badly burning the driver. The main focus of the episode was on a Marine Corps recruit named Ernesto Lopez, who had been accused of rape only for DNA evidence to exonerate him; Walker is unable to get to Ernesto before the overzealous cops do, and Walker is left to track down the two stooges. The chief eventually turns his gun on himself when he learns Walker is coming for him.
* Walker, Texas Ranger: Several episodes have featured one of the main characters or an underage person, usually children buried by the villains, and Walker and the Rangers racing against time to stop the bad guys and locate the victim. Three such episodes aired within months of each other in 1996 alone:
* Walker, Texas Ranger: Several episodes where child or teenage victims are in deadly situations, fearing they are about to die (before always being rescued by Walker, natch). One particularly infamous example was in the 1996 episode "Deadline," where the teen-aged daughter of a state senator is buried alive in a coffin with a short supply of air (in an attempt by that episode's bad guy to extort millions from the senator). After a commercial break – the senator had just been given false information as to where his daughter is buried – the scene focuses on the daughter, having been buried for several hours. The thought of what was likely going through her mind at that moment – very likely, contemplating her death, never being with friends again, getting married and having children, and being denied her dreams and goals in life – is downright chilling, frightening and nightmarish.
* Walker, Texas Ranger: Several, with either the Rangers or Alex posing as inmates to expose corruption. Examples:
* Walker, Texas Ranger, suggests they make a show about their lives as Texas Rangers. The rest of the cast wave him off; however, they do play with the idea of who would play their characters if the show was real, ironically using their actual

actors' names.
* Walker, Texas Ranger: The 1998 episode "Warriors," where a criminal planning to take over the world kidnaps a genetics researcher who has used DNA to create a healing medicine, with the criminal planning to use it to create an army of genetically enhanced super soldiers. The prototype soldier is the one who menaces Walker, Trivette and others throughout the episode, and it is the scientist who helps Walker get the upper hand and defeat the prototype in the end.
* Walker, Texas Ranger: The fifth season episode "Warriors", where a criminal steals a genetic healing formula from a scientist (who was perfecting it for the benefit of good), and then uses it to develop a prototype muscleman that couldn't be stopped. Walker and Trivette find out firsthand how brutal this man-mountain is when nothing they do can so much as faze him. Eventually, during a final confrontation where the muscleman has Walker beaten to a pulp, the scientist throws flammable liquid and a blowtorch in his face, and Walker is able to finally kick the stunned muscleman to his doom.
* Walker, Texas Ranger. The Rangers recruited a young female hacker named Buzz to help bring him down. She ended up having the remainder of her sentence commuted.
* Walker, Texas Ranger, this is flat-out unethical conduct that would result in her being reprimanded.
* Walker, Texas Ranger. Though in this case it was a liver, and the ambulance had been hijacked by bad guys who needed the medics to tend to one of their own and had no knowledge of or interest in the organ.
* Walker, Texas Ranger, throughout the course of the series, piloted numerous vehicles, including cars, helicopters, private planes, and a jet.
* Walker, Texas Ranger. True to form, only the bad guy is killed, when in real life, the shot probably would have gone through him, Walker, and the poor girl.
* Walker, Texas Ranger: Walker and his partner Trivette break into a recently paroled convict's motel room, looking for evidence that he's stalking Walker's girlfriend ADA Alex Cahill. When the man returns to the room and catches them, he proceeds to smugly—but correctly—inform them that without a warrant, his permission, or the motel owner's permission, anything they find is useless, and in fact, he can charge THEM with breaking and entering. When Walker grabs him, he threatens to include assault charges as well.
* Walker, Texas Ranger, Walker will regularly track down rapists and drug smugglers, but eventually find they killed one of their accomplices to keep him from talking.
* Walker, Texas Ranger were usually finished with a roundhouse kick. It also became his most powerful move on Chuck Norris Facts.
* Walker, Texas Ranger where Walker beats the crap out of a corrupt racist sheriff of a small town. After curbstomping his ass, Walker rips off the sheriff badge from the guy's chest.
* Walker, Texas Ranger, which depicts the Ranger Division (state investigation bureau) of the Texas Department of Public Safety.
* Walker, Texas Ranger, which was actually shot in Texas, particularly in Dallas where the majority of the show is set. However, when the rangers went to other locations, like Houston, they shot there as well. The show paid special attention to make sure you knew they were actually using Texas by having many shots of the Dallas skyline. Many scenes even used locals as extra's or one-liners.
* Walker, Texas Ranger) who's turned his life around to run a youth center. Members of rival gangs converge with the young kids and it looks like a fight is about to break out. Walker arrives with some ex-cons who quickly educate the kids to how gang life leads to prison or the grave. One even shows off the scar from an eye he lost in a fight in jail.
* Walker, though later on they become increasingly violent, such as blasting out the enemy's knee caps before shooting them repeatedly in the chest, or bashing their head into the ground repeatedly to kill them.
* Walker will usually go into some detail in commentaries about his conception of the character and how he has developed over time; a lot of what seems natural and spontaneous on-screen is actually very deliberately planned out.

* Walk Hard takes it the furthest - they all deliberately state that there is a rift between the four of them, George Harrison complains that they never let him write songs, and they all really obviously drop the names of songs that hadn't been written yet.
* Walk Hard: The Dewey Cox Story. He visits Dewey in rehab just to reiterate this, he sings it as he does fieldwork...
* Walk Hard: The Dewey Cox Story screaming about how he's going straight to hell:
* Walk Hard: The Dewey Cox Story screaming about how he's going to hell.
* Walk Hard: The Dewey Cox Story: The major source of angst in Dewey's life is the fact that he accidentally halved his brother with a machete when they were little. His father shouts, "You're not half the boy Nate was. You're not even half the boy that the top half of Nate was after you cut him in half!" He is eventually forgiven by his father after the old man accidentally halves himself while trying to kill Dewey.
* Walk Hard: The Dewey Cox Story was reviewed as one of the much-better parody films but failed to break even at the box office.
* Walk Hard: The Dewey Cox Story" when discussing Dewey's deceased older brother is a pretty good indication of where Dewey stands on the pecking order.
* Walk Hard, there are Jewish procuers, because, you know, "those Jews control show business."
* Walk Hard. They have to be sharp to cut a person in half and impressively sharp to do so on accident, but it's reaching into the realm of the absurdly sharp when you can cut yourself in half by accident.
* Walkin' Butterfly, the protagonist bemoans the fact that she's super-tall until she realizes that most models are actually quite tall.
* Walk-In Chime-InA character just entering the set has somehow heard what the characters already there were talking about before they walked in—the audience knows, after all, so the characters should too.
* Walk-In Chime-In: A person enters a conversation he hasn't overheard with a completely appropriate response to what was just said.
* Walking a dog that's not familiar with you — especially if you're a child — can quickly lead to it taking initiative. Not only is this embarrassing, extreme cases are
* Walking Armory list is so long is because the average ninja will be carrying most of it on their person at once.
* walking around barefoot (5'8") had to wear platform "disco boots" under her dresses to better match the height of the actors playing the other elves.
* walking around in an extremely cold environment wearing only his loincloth.
* "Walking Dead" and DJ Z-Trip has lyrics about a recently reanimated undead digging up the body of a fellow deceased loved one and wanting to bring them back to life:
* Walking Disaster Area, but the characters changed hugely in development.
* Walking Disaster Area: So unlucky that disasters follow in his wake.
* Walking Distance", had an advertising executive in Manhattan go back to the small town of his youth to relive parts of his childhood. While his childhood is shown as having been a happy time, his father tells him that it doesn't have to be the best time of his life and he can be equally happy with his current life in New York.
* Walking Distance", Martin Sloan meets himself as an 11-year-boy but he does not realize that he has traveled back in time until a teenager tells him that his 1934 roadster is brand new.
* Walking Distance" were all adapted as graphic novels by Walker Paperback from 2008 to 2009.
* walking gun platform, hard-wired to the machine through invasive cybernetics that bombard their minds with sensations of guilt and sorrow, and are sent into battle to die for their crimes with no other chance for forgiveness.
* Walking in Circles cares for and befriends Evelyn in the first place because she constantly goes out of her way to help or rescue him, even when she must suffer for it while he didn't think much of her in the beginning.
* Walking in Circles: The first season includes elements of this, like interviews

with the various characters.
* Walking in Circles: While the characters talk directly with an interviewer in interview scenes, outside of those there's no indication of it being a documentary. All of the documentary elements are dropped in the second season.
* Walking in itself could be considered this. For most of baseball's history, no one paid much attention to the ability to draw walks, and batting average, which did not take walks into account, was by far the most widely-used statistic to measure offensive output. With the rise of sabermetrics, or
* walking in on his parents, learning a valuable lesson about knocking.
* Walking in Rhythm: A character walks to the beat of the background music.
* "Walking in the Air" was first performed by Peter Auty in the movie adaptation of
* Walking in the Dark after all and when you give them supernatural powers, that leads into disaster.
* Walking in the Dark in that humans don't know of the supernatual elements around them given the rise of the industrial age of the 1930s. The vampire council is trying hard to keep it that way as they don't want their kind to be further hunted. But it's made tricky due to a rebel group of vampires seeking world domination.
* Walking in the Dark: Said vampire in question is more a reporter, but same deal. He uses it to investigate supernatural ongoings.
* Walking in the Dark whose demonic form turns his eyes black and makes him sprout enormous black wings.
* Walking in the Shadow of Dreams: Asuka seems to think so. In the rewrite, when Shinji told her Misato had brought Pen Pen with her, Asuka asked if he also attended the reunion.
* Walking in the Shadow of Dreams fanfic, Rei is vividly describing what she did to Kensuke on their first meeting, including the phrase "Seven hours." And several others that were not made explicit. At the end of all this, Hikari, who had been sitting nearby has a teacup half raised in the air, and a glazed look. Toji then turns to Rei and says: "I think you just broke my wife."
* Walking in the Shadow of Dreams: In chapter 5 Asuka comes home drunk. She lunges at Shinji and kisses her. When he tries to stop her because he think they should not do this as she is plastered, Asuka cries out nobody wants her. Shinji tells he does.
* walking into a dungeon, arming three prisoners, and ordering them to try to kill her. At the same time. Naturally, she's able to defeat them all with barely any effort. And she's still no match compared to her brother.
* Walking is pretty much the only way one can travel in the Deep Roads in
* walking nukes the aforementioned TYPES, although he doesn't seem to be able to kill them permanently.
* Walking. Of all animals, humans are the most inept at moving around immediately after being born. Of course, there are many reasons for this.
* Walking on Sunshine, in which Maddie's harem of swimmers dance around her in the swimming pool.
* Walking on Sunshine provide all the jokes and comedic moments, but are never mocked for their size.
* "Walking on Wall Street" opens with "Extra! Extra! Latest Wall Street prices!"
* Walking Out on the Show: Patrons walk out of a show in progress to express how bad it is.
* (walking over a pile of leaves and getting sprung in a trap that also turns you upside-down), the temple screen is also upside-down.
* walking right up to the gun she's holding on him. Needless to say The Arrow does a lot of this trope when confronting criminals as well (who are less reluctant to shoot at him).
* Walking Shirtless Scene: A character who is never seen wearing a shirt.
* Walking Shirtless Scene has dark skin from head to stomach, but has light skin from waist to toe. This combined with him being a swimmer implies he's heavily tanned.
* Walking Shirtless Scene: Most male wrestlers tend to go shirtless in the ring.

* Walking Shirtless Scenes. Chuck's official art even shows him hefting a giant dumbbell.
* Walking Spoiler: A character who is difficult to talk about without giving away spoilers.
* Walking Spoiler is too light on plot to have any characters that would spoil it.
* Walking Spoiler. Or, they're at least hiding some sort of unpleasant secrets.
* Walking sticks can have small blades inside, activated by a button.
* Walking Swimsuit Scene: A character is always seen wearing a swimsuit.
* walking, talking goldfish can scream high enough to break glass. Taken to extremes in "The Castle" when Gumball makes fun of his voice and he lets out a scream so shrill, it almost renders Gumball and Anais catatonic.
* Walking Tall (2004) Dwayne "The Rock" Johnson plays a returning soldier who must clean up his small town after drug dealers and criminals overrun it.
* Walking Tall (2004), the villain and the hero were childhood friends before taking very different paths in life as adults. The villain reflects on this with a hint of sadness before the final fight.
* Walking Techbane: Someone who breaks machines with ridiculous ease vs. someone who can fix them just as quickly
* Walking Techbane: Someone who's uncannily good at wrecking every gadget they touch.
* Walking Techbane. While she does adopt the alias of Corentine, she immediately goes public with her real name when making her debut.
* Walking Techbane: You fail to prevent your mere presence from causing machinery to fail.
* Walking Techfix: Someone who's uncannily good at getting recalcitrant technology to work.
* Walking The Dead focuses around a village full of dead people. The only people who seem to be alive are the American reporter, a drunk ex-cop, an axe murderer, a woman looking for her daughter, and said daughter. Turns out the only people who were really alive were the American reporter, a drunk ex-cop, and the daughter.
* Walking the Earth: A character travels the earth, never returning home.
* Walking the Earth and swordsmanship thing. Also, the cute-looking girlfriend with long black hair.
* Walking the Earth, eventually winding up lost in a desert and pining for home. The author was eventually able to tweak an unrelated storyline to get Squig home.
* Walking the Earth has given her a very broad palate (or just low standards).
* Walking the Labyrinth, the protagonist sees the attic and says no one ever told her about the it. Alex replies, "Callan would say that you have to know the right question to ask. Though I don't think you'll find anything very interesting there."
* walking the plank be a splash when someone walks the plank, so he throws said crewman overboard to create one.
* walking through and filming the different beds and he briefly captures a traumatized nurse huddled against the corner of a wall.
* walking through Shavers' punches until Shavers tired and Cobb was able to knock him out.
* Walking Transplant: A clone that literally exists to give organ transplants.
* Walking Transplant. The girl was conceived and born so she would provide organ donations to her ill sister.
* walking trees that can kill you in a few hits and are hard to distract
* Walking under a water leak will cause a gush of water to momentarily run down the screen as if it were a camera.
* Walking Vengeance: Male non-cop version, Aurora has a habit of hiring male prostitutes; assassin Gabriel intercepts her call and pretends to be the prostitute.
* Walking Wasteland: A being whose very presence causes the land around them to become withered and corrupted.
* Walking Wasteland: A character who spreads death and destruction everywhere they go.
* Walking Wasteland: Your very presence causes the land around you to become

withered and corrupted.
* Walking with Beasts, a Gastornis chick is devoured by flesh-eating ants - while it is still hatching from its egg.
* Walking with Beasts ends with an episode set in Paleolithic Europe where the main characters are woolly mammoths, and modern humans and neanderthals are just another predator.
* Walking with Beasts. The series ends with the narrator saying that if all the vast evolutionary history of the world has taught us anything, it's this; "no species lasts forever".
* Walking with Beasts, which likely occurred periodically in the region the episode is set.
* Walking With Cavemen and probably the most famous after Lucy) had been killed and eaten by an eagle.
* Walking with Dinosaurs, about prehistoric mammals, and they didn't laugh anymore. In the end, they settled for using guide hairs, single strands of hair whose animation the computer copied over and over until the entire animal got fully covered by it. This way, they only had to animate fewer hairs. The results may not be super realistic, but it at least spared them from crashing their systems.
* Walking with Dinosaurs, although this was a post-production adition in order to make the movie more suitable for audiences, the original idea was to have a standard nature documentary film with dinosaurs like the show.
* Walking with Dinosaurs and its spinoffs/sequels differ in that the creatures are mostly CGI, with animatronics thrown in.
* Walking with Dinosaurs and remarks at how mammals would go extinct while dinosaurs would live on.
* Walking with Dinosaurs, as it would insure that her call traveled the maximum possible distance, making it more likely to attract a suitor.
* Walking with Dinosaurs case have also been replaced by typo-ridden dinosaur fact-files, written in English, save for one which is inexplicably French.
* Walking with Dinosaurs episode "Cruel Sea", a birthing Ophthalmosaurus is surrounded by sharks... which are then scared off by a Liopleurodon.
* Walking with Dinosaurs featured life-sized animatronic dinosaurs prowling the stage.
* Walking with Dinosaurs from "Giant of the Skies" with a few minor tweaks. They didn't even edit out the teeth!
* Walking with Dinosaurs has people feeling that the tacky voice-overs brought the movie down a notch. Then a Blu-Ray feature called Cretaceous Cut came along, and this lets the viewer see the movie with none of the dialogue (though it does still feature scenes including dinosaurs information, songs in the background, and the rewinding scene when Patchi falls into the river).
* Walking with Dinosaurs has Scowler often saying "Eat my dust!" when rushing ahead of Patchi. After nabbing Juniper to be his mate, he gets ready to say it again only for Patchi to say wearily "I know, I know. Eat your dust."
* Walking with Dinosaurs. He often picks on his younger brother Patchi because of their size differences. But when he gets older and becomes the leader of the herd, he gets worse.
* Walking with Dinosaurs make things even worse than they are with sharks. How much worse? Try 21 ft aquatic reptilian killing machine with a combined jaw size of just under 9.5 ft. Run.
* Walking with Dinosaurs, Nigel regards the sea scorpions as a nuisance. They can't swallow him whole or cut him in half, but they can and do bother him, and their pincers are sharp. And painful.
* Walking with Dinosaurs often has large, uninteresting herbivores who get eaten by the main predator of the episode in order to establish how dangerous it is.
* Walking with Dinosaurs series does this for Dinosaurs and Prehistoric Animals. In fact, a good deal of Nature Documentaries fit this trope.
* Walking with Dinosaurs that, upon dying, looks like it instantly became some huge stuffed animal toy. Then there's that insect that goes from being a CGI ant to a live cricket.

* Walking with Dinosaurs: The franchise uses this to some extent when characterizing prehistoric animals.
* Walking with Dinosaurs. They're a much more accurate example, though.
* Walking with Dinosaurs would have to keep three feet on the ground at all times or they would trip over while designing early models.
* Walking with Monsters, a fish is being chased by a sea scorpion. Despite the fact that the fish can swim, but the sea scorpion can only walk on the bottom of the ocean, the fish tries to go faster than the scorpion. It takes the appearance of a larger scorpion for the fish to finally swim up where neither scorpion can get it.
* Walking with Monsters, and the first one seen is explicitly referred to as a 'giant spider'.
* Walking with Monsters migrate in large herds like wildebeest, crossing rivers where they are hunted by primitive crocodylians.
* Walking with Monsters reveals how powerful its fins are by dragging itself after the amphibians and grabbing the male by surprise.
* Walking With... series frequently subvert this by placing sharks alongside even scarier predators:
* Walking with Shadows features a ghost in a mirror who tries to tempt a teenage girl to suicide.
* Walking with Wikis. Including the sequels, spinoffs, and the 2013 film.
* Walkin' on the Sun to advertise summer sales on some of their models from 2001 to about 2004/05. Because that song is well known for its relevance to car salesmen.
* Walk into Mordor: To enter the forbidden realm, you are only allowed to use the most grueling methods available.
* Walk Into the Sunset: The series ends with the characters going off on another adventure. This ending is the one ripe for fans to either write fanfiction about what happens after the series ends or fans to pester the creators into continuing the series with a spin-off or a reboot.
* Walk Like an Egyptian: A stance or style of walking meant to resemble ancient Egyptian murals.
* Walk Like An Egyptian, Part 1", Ezekiel brags that he'll never have to travel economy class on the Total Drama Jumbo Jet. Noah, who stands right next to him, asks if "never" is his policy on mouthwash too.
* Walk Like an Egyptian: The stereotypical pose of Ancient Egyptian dancing.
* Walkman (portable cassette player): A Sony trademark. Mostly phased out by both CD players and mp3 players, though with the iPod Brand Name Takeover and the fact that Sony still uses the term Walkman for their portable music players, it's possible to say that you have an iPod that's a Walkman.
* walk my fish" as "telling someone that you are going to walk your fish is a nice way of saying you don't want to do something."
* Walk Off the Earth gets briefly derailed when they can't find a rhyme for "Spotify".
* Walk Off the Earth have used cardboard tubes, water bottles, and a BB gun as instruments.
* Walk Off the Earth's "Somebody That I Used to Know" went viral - driven by its gimmick of five band members playing the song on the same guitar at the same time. The cover's novelty didn't translate into a career: While followup "Red Hands" was a minor hit on American adult alternative radio, the only other chart action they've seen since are a couple of low-charting singles on the Canadian Hot 100.
* Walk of Shame for her (Cersei originally plotted for Margaery Tyrell to be falsely prosecuted for adultery, but ended up having her own dirty laundry get outed).
* Walk On The Moon, Hinata Hyuga is one. Just how bad, and unhealthy, she has it becomes a major issue during the Forest Of Death training arc.
* Walk On The Moon Rei Yamanaka develops shades of this after running into obstacles on her path to freedom. You can tell the general state of her mental health by how sadistic she is at any given time.
* walk on walls for some reason too, although that could just be another illusion!
* Walk on Water ability). Everyone turns to Rider... who just shrugs and says it

doesn't make a difference to her.
* Walk on Water features two gay bars, one in Tel Aviv and one in Berlin (two cities known for their LGBT scene). The one in Tel Aviv is pretty wild, and is populated mainly with shirtless men.
* Walk on Water stereotypes. Due to this, Eyal doesn't realize at first that he's gay at all (though Pia says he once identified himself as such to everyone who he'd meet).
*) walk out into the dragon arena shirtless with a lawn chair and a tanning mirror, as he thinks the dragons are iguanas on steroids. Cue Remus hitting his head on a book going "Stupid. Stupid. Stupid." with "He's gonna die." thrown in every once in a while.
* walks in on a girl), and Negi stares for a few seconds before freaking out. Perhaps he's starting to grow up...
* walks up to the TV screen, knocks on it, and says, "Daddy, people are looking at me!", just before the TV (not the real one) turns off.
* Walk the Earth and tried to kill him. Though Louis only did this to protect Claudia after her murder attempt provoked Lestat's wrath. He and Lestat remain on good terms.
* Walk the Earth killing dangerous things and people for Chaos, keeps the trophies on his person, including skulls, a giant's scalp for a cape, and an entire crucified skeleton.
* Walk the Earth. Lois flat out tells him that the only way he'll stay completely hidden is to stop saving people.
* Walk the Line shows how Johnny's father blamed him for his brother's death, and didn't respect his musical accomplishments.
* Walk the Moon (entering the Top 10). It's also different from their repertoire as it's far more poppier than their normal material, which usually targets alternative radio.
* Walk the Plank: Pirates send people to their watery graves by making them leap off the ship's plank.
* Walk This Earth Alone by Lauren Christy is nothing short of an apology of this trope.
* Walkthrough games. Some of the earliest "game guide" books to be published were walkthroughs of text adventures.
* walk through walls. On that note, while Kitty does phase through walls, she at least has the courtesy to phase through the door.
* walk through walls, using explosives to create passageways through houses and other buildings.
* Walkure Romanze, Celia is gorgeous, kind and bar none the best knight in the school. Because of this, people have a hard time approaching her, resulting in her having few friends and suffering from social insecurities.
* Walkure Romanze, Lisa and Akane consider each other worthy opponents after they fail to win in a jousting match due to both of them being unable to gain the upper hand against the other.
* "Walk With Me In Hell" by Lamb of God is this, though with the twist that hell is existence itself.
* Walkyverse alone, there were 247 named or otherwise identifiable characters.
* Walkyverse, and it takes her years to get them back. Although she has since matured to the point where "pre-marital hanky-panky" no longer bothers her (and she frequently engages in such with her fiancé Walky), she is still the nicest, sweetest, most innocent person you are likely to ever meet.
* Walkyverse are dopey pop-culture junkies who are obsessed with human television and movies.
* Walkyverse, a spin-off-slash-reboot of the Walkyverse that excises the sci-fi elements, combines the casts of all the previous comics, and is a straight up dramedy throughout.
* Walkyverse, but was averted. Danny is talking with ex-girlfriend Sal and mentions that he is planning to ask current girlfriend Billie to marry him.
* Walkyverse comics, whose defining trait is his blatant sexism and sexual

magnetism, falls into this after finding love on an Internet forum and eventually settling into his first monogamous relationship with his crush. Said crush goes missing, however, and to cope with the loss he regresses deep into his old habits.
* Walkyverse fame not only appears to have no problems with Rule 34 fanart of his characters, but has actually made some himself.
* Walkyverse in general what with being one of the lead administrators for the Transformers wiki.
* Walkyverse in the long term, as long as it makes them suffer in the short term he seems fine with it.
* Walkyverse, is a tangled, continuity-challenged rat's nest of this trope.
* Walkyverse is exactly this. He once said he grew up a "mortal among gods".
* Walkyverse, is well know for screwing his audience at every opportunity, mostly through drama bombs. There's a reason the fandom's catch phrase is "DAMN YOU WILLIS!" (which, of course, he turned into his twitter handle).
* Walkyverse Melotians and Zinoboppians are classic diminutive humanoids (even though the Aliens are quite monstruous under their armor), the Martians are enormous tentacled monstrosities best described as a cross between a mantis and an octopus.
* Walkyverse the blandness of the early art, humor, and characters, as well as the occasionally naive moralizing.
* Walkyverse universe, which is...well...yeah. There's also one where Sal and Danny ended up together and had a kid, and a few others that have gone unnamed.
* Wall $treet Week with Louis Rukeyser features a teletype machine used as a percussion instrument.
* WALL•E after Eve repairs Wall-E from near-fatal damage. He appears to lose all his memory and personality until she "kisses" him with an electric spark that reverts him back to normal.
* WALL•E and it is the captain who is technically going against the plan.
* WALL•E) and living a life of endless leisure with the robots performing all of the manufacturing, maintenance, and clean-up duties.
* WALL•E, and then he replaces the R after knocking it down. Uniquely, this was not shown in theatres (aside from a few trailers) but added to the home video releases. An additional one occurs immediately afterwards, where the "BnL" logo appears complete with the "BnL" jingle.
* WALL•E. A new credit sequence was added when the makers found out test screenings agreed with this.
* WALL•E. Apparently he's specifically designed so he can replace any of his damaged parts himself, with absolutely everything being modular. Justified: he is an industrial robot designed to take care of himself for long periods of time,
* WALL•E, a "Starliner" with a design evoking that of a sea-going cruise ship.
* WALL•E auto-pilot bot to prevent humans from attempting to recolonize Earth, since it's too polluted to sustain life. It can't be countermanded because the only guy with the authority to do so is long dead. There is the non-sanctioned method of having the captain to get out of his chair, walk to the control panel, and press the "manual control" switch, quite a feat to say the least as humans had by then become extremely obese and out of shape.
* WALL•E: AUTO's "face" appears to be made up of two white pieces, split through the "eye".
* WALL•E: AUTO was ordered by the BNL Chairman to stay in space and protect humanity, and by God he'll do it by any means necessary... and regardless of what the puny humans think of his protection.
* WALL•E: A waste management robot falls in love and follows her into space.
* WALL•E" But if you have any soul, you wouldn't need an explanation.
* WALL•E can be completely disabled with a playful splash of water!
* WALL•E, Captain McCrea is the only human on board the Axiom that isn't entranced by the 700-year-long ennui of their existence.
* WALL•E, Captain McCrea, someone who's never done anything in their entire life, including standing, is able to hotwire the ship's public address system in a second with no thinking. One can argue that, since he's the captain, he should know

a thing or two about the ship, but, then again, he needs help turning the pages of a book, so... yeah.
* WALL•E consciously hits both extremes: it has a very dirty setting (the ruins of Earth) and a very clean setting (the spaceship). WALL•E himself is filthy and made up of spare parts, and EVE is shiny, sleek and streamlined.
* WALL•E contains an ad for Xanadou, a medication to induce shopping euphoria. "Side-effects may include unpleasant taste, headache, drowsiness and dizziness, headaches, intestinal discomfort and cramping, temporary blindness, bleeding of the gums. Failure to use Xanadou during shopping specific excursions may result in a desire to wear drab clothing, redistribute wealth and property and attend socialist summer camps."
* WALL•E does a Wiper Start as one of many things he tries in an attempt to shut off the self-destruct sequence of a spaceship lifepod.
* WALL•E does this when he's trying to stop his runaway escape pod, especially slamming the
* WALL•E due to a constant reliance on machines and junk food. The animators explained that they wanted to make them resemble oversized babies to reflect the symbolic degradation of the human mind from complex to simple.
* WALL•E: Earth is left almost completely lifeless after rampant consumerism, forcing humanity to leave on giant ships to the stars.
* WALL•E: Earth itself has become a junk planet, and humanity has gone beyond the stars instead. Not a usual example of the trope, as Earth was not intentionally made such, but the visual aesthetic is the same.
* WALL•E EVE desperately tries to repair WALL•E after he is nearly destroyed in his efforts to bring the Axiom back to Earth.
* WALL•E EVE is a essentially a biological collector, trying to find evidence of plant life on Earth. So naturally, she has a high-power plasma gun, enough power to make a micro-tornado by spinning, fast enough to break the sound barrier, and strong enough to hold back a huge sliding wall by herself. Those plants are apparently rough customers.
* WALL•E features astronaut Roberto Vittori as the steward robot.
* WALL•E finds out about the classified order A-113 to not return to earth by using this phrase.
* WALL•E for him. It does. At the end of the movie, days later, he lands and it's still in the same spot.
* WALL•E has a romantic flight sequence in space with Eve and WALL•E.
* WALL•E has robbed them of their humanity. In both cases, they (re)discover their humanity partly through connecting with one another.
* WALL•E; he chose the ring box. No kid would fault his logic. It opens and shuts and makes a clicky noise!
* WALL•E. He's the one that gives AUTO the "never return to Earth" order 700 years before the events of the film.
* WALL•E himself, though his design is boxy and not sleek, makes a distinctive
* WALL•E humanity to forget life on Earth; it just happens all on its own.
* WALL•E In a video broadcast from before the Axiom was launched, humans are skinny and live-action. In the video, it's outright stated that spending long periods of time in space will result in bone mass loss. The implication is that centuries in space turned people into fat cartoon characters.
* WALL•E initially doesn't want anything to do with WALL•E, but eventually warms up and falls in love with him.
* WALL•E: Inverted in both ways. WALL•E is an ugly and outmoded robot, but also the kind and sensitive one, whereas EVE is an extremely attractive and state-of-the-art robot but is the insensitive and hot-tempered one, and WALL•E is the one that calms her down and teaches her to be more caring.
* WALL•E is about this trope. Applied to garbage disposals, no less.
* WALL•E is comedy, drama, romance, sci-fi, and even silent film during the first half.
* WALL•E is portrayed as the logical extreme of middle-class consumerism run

amok.
* WALL•E is sending out probes — such as EVE — to find viable life on Earth but the "ark" takes on a mind of its own and tries to prevent a return.
* WALL•E is virtually dialogue-free, the only talking coming from Wall E's VHS copy of "Hello Dolly" and the various BnL adverts left on Earth.
* WALL•E it. Her semi-translucent white plastic body scatters light, giving her an innately soft outline.
* WALL•E luxurious is a big part of the plot; the human passengers are so coddled that they never have a reason to leave their chair.
* WALL•E made the "humanity restoring Earth" montage, about half the audience walked away with the rather realistic assumption that humanity died less than a week after they returned to Earth.
* WALL•E — even though the relevant clip is included in the movie.
* WALL•E most notably in the space dance scene. When WALL•E uses the fire extinguisher to fly about, he kept going even after he had stopped firing the fire extinguisher and had to fire in the opposite direction to stop his movement.
* WALL•E, most robots have a specific function. Wall-E himself is designed to process trash, despite having an AI capable of falling in love.
* WALL•E: Of course, there's a good reason why humans haven't really changed language a lot in a few centuries.
* WALL•E opens with "Put On Your Sunday Clothes" playing, which turns out to be a recording the eponymous character plays while cleaning up trash.
* WALL•E or anti-consumerism message, but the director stated that there was not supposed to be any political message, and the setting was created to justify the story of "the last robot on Earth". Fred Willard also ad-libbed the line "Stay the course," causing some people to assume the film was commenting on the Bush administration.
* WALL•E out of the cockpit window, causing him to get smashed to pieces upon hitting the floor just below it.
* WALL•E people begin falling out of their chairs. Eventually, one-by-one, the passengers grab hold of one another, preventing the others from falling to the end of the ship.
* WALL•E: Played straight as the love-struck robots kiss at the end while the humans rediscover their humanity. The epilogue shows human civilization advancing back to full glory.
* WALL•E pretty much embodies this trope, especially when WALL-E is compared to the sleek, shiny, futuristic EVE. Note that this is literally due to use; they were actually designed and built at about the same time, but WALL-E has been in continuous use while EVE has spent most of the time in storage.
* WALL•E prone to blowing things up with her plasma cannon at the slightest provocation.
* WALL•E receives some major character development using one of these. He starts by asking the computer to define "Earth," and ends on "Dancing," after passing through "Sea," "Farms," "Pizza," and "Hoedown."
* WALL•E responsible officially stated that the clean-up would only take around five years, but it actually takes 700 years until plant life finally starts growing again.
* WALL•E says the two styles are indicative of the (d)evolution undergone by humanity in the intervening centuries.
* WALL•E scathing satire of Wal-Mart. It's so large that the CEO is President of the World — we even see the White House press room redone with the Buy n Large logo.
* WALL•E seems to go through one of these when EVE first kisses him, even if the "kiss" is an actual shock of static electricity...
* WALL•E, showing the humans and the robots successfully rebuilding Earth over many generations, was added with the intent of averting this trope, after the initial test audiences thought that all the humans would die in a hopeless attempt to do so.
* WALL•E, so they could keep fulfilling this trope while eliminating the need

to give change back.
* WALL•E space liner. What was meant to be a five-year cruise for Earthlings while the titular robots cleaned up the polluted planet instead turned into a perpetual cruise. Everyone has gotten so fat from living in microgravity while being pampered by robots that everyone is traveling on hoverchairs meant for the infirm — no one has actually walked in centuries. Even the entertainment consists of watching robots play golf at the driving range.
* WALL•E's sci-fi rom-com has the chivalrous robot hold an umbrella over the cataleptic EVE to shield her from the rain. WALL-E gets zapped by lightning this way twice in a row. Apparently, he's used to this, since he brought spare umbrellas.
* WALL•E. The autopilot is clearly inspired by HAL, and the scene where the passengers learn to walk uses "Also Sprach Zarathustra".
* WALL•E, the big screens across the city can still playback the president giving some of the backstory of why the Earth looks the way it does.
* WALL•E: The captain seems like this (though it's worded more "Success is not an option") towards an EVE coming back positive.
* WALL•E, the credits sequence was specifically designed to let people know they survived quite handily. This one is justified: humankind may now be living on a nearly-uninhabitable Earth, but they're not stranded — they still have a fully-functioning cruise ship capable of meeting all their needs, and hundreds of friendly robots with various skills.
* WALL•E: The Earth has become covered in so much garbage that WALL•E was making skyscrapers from the blocks of trash he compacted.
* WALL•E, the Earth is covered with holographic billboards which fizzle and static frequently. Justified, since they haven't been maintained for centuries.
* WALL•E: The entire basis of the film is that humanity left the heavily polluted Earth to allow the robots to clean it. Problem is, is that it's a major plot point that the excursion, which was only supposed to last five years, went for 700 years. Thing is though, if they overstayed their time by that long, how were they able to stay supplied and not die out in the intervening time? Even if you assume that the Axiom had extra supplies, it's highly doubtful at best that the creators would have the foresight to pack so far ahead of the planned time.
* WALL•E, the eponymous character lasers his name and EVE's onto a metal pole.
* WALL•E themed merchandise, given the movie's anti-commercialization themes.
* WALL•E, the people who return to Earth still have to clean up their ancestors' mess of garbage.
* WALL•E, the Pixar animators brought in renowned cinematographer Roger Deakins to demonstrate real-world lighting and camera techniques, using real cameras, lenses, and lights, which they then replicated digitally in the film. He was highly amused that they wanted to duplicate effects that technicians and equipment makers have been trying since the advent of film to eliminate.
* WALL•E: There are a few of these on post-apocalyptic Earth. EVE blows up a couple when she gets angry.
* WALL•E, the robot GO-4 is kicked out of a window. The scene then pans to the pool below, showing a prominently-placed diving board, only for the robot to land on the hard ground right next to it.
* WALL•E, the title character wordlessly ponders the gesture of hand-holding in his movie Hello Dolly (and does discover its true meaning).
* WALL•E, the titular character could be seen doing this on several occasions and is a non-humanoid robot example of this.
* WALL•E: This is AUTO's reaction to finding EVE and WALL-E somehow escaped from the Axiom's garbage dump.
* WALL•E This was changed very late in production when the scene was nearly complete, until director Andrew Stanton decided to change it at a test screening in Portland.
* WALL•E, though they manage to stay in the ship with the timely help from M-O. Of course given that they already were in space five minutes or so before, this would not have been lethal.

* WALL•E to be. The humans were supposed to be aboard for just a few years, while the Wall-E units cleaned up the earth. The Buy-n-Large president, however, deemed the Earth permanently doomed and ordered the Autopilot to keep them in space forever. He turned out to be wrong, but it's 700 years before the first plant life reappears on the planet. By that time the inhabitants have been heavily affected by generations of sedentary lifestyles, although they recover quickly once their routines are broken.
* WALL•E to keep him company, the titular robot comes to associate holding hands with companionship and longs to do so with the probe bot he falls in love with, EVE.
* WALL•E to the first human to stand under his own power in centuries, deactivating the mutinous taser-wielding Autopilot.
* WALL•E WALL•E with a kiss that looks like a spark. Justified, as they are both robots.
* WALL•E, Wall-E himself has a weird high voice and can only say his own name, Eve's (but he pronounces it Eva) and a few words. The rest of the time, he just makes noises. Played straight for Eve, who sounds feminine but definitely stilted, and zigzagged for M.O. who sometimes makes high noises and sometimes talks in a monotone and uses technical terms like "foreign contaminant".
* WALL•E: Wall-E's fundamental misunderstanding of human cultures is often as humorous as it is heart-breaking.
* WALL•E. Wall-E uses a fire extinguisher, while Eve can propel herself.
* WALL•E, when their hands accidentally meet on the seat control.
* WALL•E when the titular character's pet roach crawls into his armpit at the start of the movie. Later reinforced when it does the same thing to EVE.
* WALL•E when WALL•E takes the inactive EVE on a boat through some trash-filled water.
* WALL•E, which received a 2009 tour (the last tour prior to that was in 1996).
* WALL•E, whose huge adorable eyes seem custom-made to tug the heartstrings of all who gaze upon him.
* WALL•E, you can see one of the robots in the background peek back and try to watch before being dragged off by M-O.
* Wall2Wall-Mart literally sells EVERYTHING, including military helicopters armed with computer-guided missile-launching systems. Justified by the setting; if kids can wish for anything, what do they do with the non-sentimental stuff when their godparents leave? Also, that world lacks common sense.
* "Walla" and "wallah" are mispronunciations of "voila"; Walla Walla is a town in Washington state (and also the penitentiary), and "
* Wallabee Beatles and Abigail Lincoln, AKA Numbuhs Four and Five, from
* Wallace & Gromit", a ladder of sheep, with Wallace at the bottom, helps break Gromit from prison.
* Wallace & Gromit being used for a series of well-regarded British Gas adverts in the 1990s. Except the adverts were for the Electricity Board, and emphasised how much better electric heating was than gas.
* Wallace & Gromit by randomly flicking a panel of switches. It doesn't work, but it does turn on a huge neon advertising sign outside so Gromit realizes where they are and flies to the rescue.
* Wallace & Gromit, CG is used when the rabbits are floating about in the giant vacuum thing. It stands out more, as it is CG shown against stop-motion clay animation. The bunnies themselves are deliberately animated to look like claymation, but they float smoothly around in the air tunnel and that gives away the fact that they're CG.
* Wallace & Gromit comic, they visit a hotel where there's only one employee, who's constantly changing his uniform based on whether he's needed as a doorman, concierge, bellhop, cook, waiter, gardener, or janitor.
* Wallace & Gromit comic, Wallace uses tartan paint when making slippers.
* Wallace & Gromit contains an extremely rainy caravan holiday, during which the duo spend all of one day playing I Spy...according to Gromit's typewritten

notes, "R for rain featured regularly." (The next day is apparently even duller, since the entry for that day gives a precise count of the number of flowers on the caravan's wallpaper.)
* Wallace & Gromit (especially the whole system for arranging breakfast). Justified, sorta, in that Wallace is an inventor by trade.
* Wallace & Gromit, Gromit carries one of these out to the dog house and then leaves.
* Wallace & Gromit, Gromit fights robo-dog Preston on the Conveyor Belt-O-Doom of a dog-food machine.
* Wallace & Gromit": Gromit spies on Feathers McGraw while hiding in a box. It turns out the box has a drawing of a dog on it, with Gromit's peepholes right where the eyes would be.
* Wallace & Gromit has air ducts to a museum big enough to stand in. They were realistically loud though, insofar as a pair of remote-controlled, vacuum-soled robotic trousers can be realistic.
* Wallace & Gromit has a steering wheel that can be removed, and plugged into the passenger's dashboard and used.
* Wallace & Gromit helped a little there) while being a small penguin Feathers is able to fit rather comfortably in the locomotive's tender.
* Wallace & Gromit. (In the latter the BBC announcers warned of puns and even did a few themselves.)
* Wallace & Gromit: In "The Wrong Trousers", the titular trousers (a set of robotic legs) were bought so Wallace could walk Gromit with zero effort. However they are used by their new lodger and through some convoluted circumstances, to hijack Wallace and have him rob a museum of a diamond.
* Wallace & Gromit introduced a number of non-filmed gadgets of his, such as the Recyc-O-Matic. The fact that when said out loud this includes "Psycho" is significant, because after he put arms and wheels on it, it proceeded to run amok, recycling building fronts and people's clothes before crashing into a brass band.
* Wallace & Gromit in W&G's neighborhood, so the pair make money removing rabbits off people's gardens. Then the titular Were-Rabbit arrives and destroys gardens all over town, which is treated by the populace as akin to a murderous rampage.
* Wallace & Gromit is a very sensitive individual who has a love for knitting and isn't afraid to cry when things really get bad, but is nonetheless pretty brave and heroic.
* Wallace & Gromit keeps the hats and aprons of the bakers she killed, and she places them on wooden dummies, with a naked dummy reserved for Wallace, her intended thirteenth (a baker's dozen).
* Wallace & Gromit — Claymation animated series. Four animated shorts and a full-length movie since 1989.
* Wallace & Gromit: Notable in that the Straight Man (Gromit) is completely mute and only expresses himself through pantomime. Their exchanges are usually along the lines of:
* Wallace & Gromit. On hearing that their vegetables will be used as bait to attract the Were-Rabbit, Mrs. Mulch flees with her giant pumpkin, whilst the townsfolk yell at her "Come back! Come back!" The Were-Rabbit then approaches, prompting her to about turn. The villagers then realize what is happening and start yelling "Go away! Go away!"
* Wallace & Gromit opens on Gromit's birthday. Not only does he get lousy gifts, it's the day Wallace advertises he's renting out the spare room and Feathers McGraw moves in, kicking off a series of events that leads to Gromit moving out.
* Wallace & Gromit plays out as a monster movie, except the monster is a vegetarian, killing vegetables instead of humans.
* Wallace & Gromit Preston frames Gromit for sheep rustling. It even involves a literal frame-up, tricking Gromit into sticking his head through a picture of a butcher and taking an incriminating photo with one of the sheep.
* Wallace & Gromit, Preston frames Gromit for the sheep kidnappings by tricking him into sticking his head through a picture of a butcher in front of Shawn the

sheep, and then taking a very incriminating photograph.
* Wallace & Gromit puts her hand on Wallace's knee, cut to a shot of bread rising in the oven. Specifically chosen for being an "Old-School" style, according to an interview with the creators.
* Wallace & Gromit; sales of this niche culinary product rose by 500% after the film was released.
* Wallace & Gromit's Grand Adventures. Although it's hidden behind a door, you can see it and it's extremely obvious it's the same cow since it doesn't fit the art style at all.
* Wallace & Gromit's Grand Adventures. As Wallace gets an idea in the first act, a few sparks in the plug behind him go off above his head. In the second act, it's a sun lamp.
* Wallace & Gromit's Grand Adventures the course before Duncan does, meaning that despite Wallace having completed the course in twice as many strokes as his opponent, he still wins the game (mainly because Duncan couldn't find the 18th hole).
* Wallace & Gromit's Grand Adventures, Wallace accidentally proposes to Miss Flitt while picking up a lugnut that she mistakes for a wedding ring. Sorting this out takes up a good part of the plot of episode 4.
* Wallace & Gromit's Grand Adventures, Wallace makes plant growth formula by mixing a battery, a military ration bar, and a teabag in his blender. He doesn't even unwrap the ration bar first.
* Wallace & Gromit tendencies, as it would be hard for Gromit to bite anyone, as he has no mouth.
* Wallace & Gromit: The Curse of the Were-Rabbit, wherein a garden fete stall changes its sign from "Gardening Supplies" to "Angry Mob Supplies". The stallholder cries out:
* Wallace & Gromit: The Curse of the Were-Rabbit, which was made by the same studio, was it really a surprise?
* Wallace & Gromit, the duo build an orange rocket of this design. Some later episodes feature smaller versions of this rocket as decorations in their house.
* Wallace & Gromit, the vicar's revelation that "a hideous creature has been sent to punish us all!" is accompanied by crashing, demonic chords on an organ. Whereupon the policeman turns to the organist and tells her to knock it off.
* Wallace & Gromit, the villain locks Gromit in the supply closet where the hot-air balloon was kept. Guess how he escapes.
* Wallace & Gromit, though he's more "eccentric" than "scattered".
* Wallace & Gromit, Wallace also gives Gromit the Techno Trousers as a present, but it's obviously for the purpose of saving him the burden of taking his dog out for walks.
* Wallace & Gromit, Wallace & Gromit are off to explore the moon, which turns out to be made of green cheese.
* Wallace & Gromit, Wallace gives Gromit a birthday card which plays an instrumental of "Happy Birthday to You." But even though the melody is not copyrighted, the producers were still forced to replace it (with "For He's a Jolly Good Fellow") after the first video release.
* Wallace & Gromit. Wallace is obsessed with cheese in general but Wensleydale is his favourite.
* Wallace & Gromit: Wallace often waves his fists when he's excited.
* Wallace & Gromit, Wallace says to Lady Tottington that "We'll be with you in— AAHH!" due to being pulled upwards by one of his machines. Tottington mistakes this as him saying he'll be there in an hour (they're both British). She tells him that she can't wait an hour, but of course there's no reply.
* Wallace & Gromit, Wallace soaks his feet after being made into a snowman, although he's just cold, not sick.
* Wallace & Gromit, which depends on the second character's very posh RP accent.
* Wallace & Gromit while the Constable says "Oops" before everyone goes into a panic.

* Wallace and Gromit's Cracking Contraptions had a horse sound effect.
* Wallace and Gromit: The Curse of the Were-Rabbit" gold) instead of silver bullets. It is unclear if this is correct or not because none of the gold bullets fired at it manage to hit.
* Wallace and Gromit: The Curse of the Were-Rabbit, Wallace tries to catch the eponymous giant rabbit by making a puppet of a giant female rabbit in hopes that he'll fall in love with it.
* Wallace Binghamton is a Navy Captain who spends most of his time at his desk trying to figure out how to bust McHale and his merry band of profiteers.
* Wallace from "Hell and Back" goes through hell and high water to rescue a woman whom he saved from suicide at the start of the story.
* Wallace habitually wears a trenchcoat that comes to his ankles and earns bonus points for the fact that he is also a
* Wallace had a guild of assassins running scared to the point where the mob boss running the organization decided just to leave him alone and not try to get revenge.
* Wallace, Jimmy, and those in the immediate vicinity from the effects of "Last Song Kills Audience", although they weren't in as much danger as the name implies.
* Wallace Shawn (a human) plays the role of Bojack (a horse) while in the same film Bojack plays the role of Mr. Peanut Butter (a dog).
* Wallace Shawn. Blair is outraged at having such an ugly stepfather, until she discovers his conniving personality makes them a good match.
* Wallace Shawn qualifies. Which is rather a bit of a subversion as well, because Cary Elwes subdues his part quite a bit while Wallace Shawn, well...
* Wallace Shawn (Vizzini) is not actually Sicilian and is also Jewish.
* Wallace The Brave, Spud really likes Amelia in a way she really doesn't like him.
* Wallace The Brave when Wallace lost a bet to a female classmate. While he was upset he lost, he made it clear to Amelia it was not because of this trope.
* Wallace was notorious about this; most of his kills being headshots. In fact, in the climax, he killed an entire warehouse full of assassins with headshots.
* Wallace, which is all the way on northern Elibe even though his destination was at the southern end of the continent.
* Wallace with long, fuzzy rabbit ears. Doesn't get more spoiler-y than that.
* Wallander: in the Swedish series, Isabelle vomits at a gruesome murder scene made worse by the ongoing heat wave. She blames it on the stench.
* Wallander: The episode "The Man Who Smiled" of the BBC version has Kurt Wallander performing this with a kitchen knife and a pen.
* Wall Around A Star: The title object. The inhabitants live on the low-gee outside of the sphere.
* Wall Bang Her sex. It turns out that the man in question was her daughter's boyfriend, making her play this trope twice.
* Wall Breakers are bomb-toting skeletons that blow up walls (and themselves) to make an opening for troops. They have low health, so it's best to lay down sturdier troops to cover them.
* "Wall Buddy" is this in Season 5, it's much more lighthearted and less surreal than episodes prior to it, and features Rigby acting incredibly immature.
* Wall Crawl parody with extreme mental issues); Captain Lemming (who is constantly leaping from high places and hurting himself); and Fishboy, Lost Prince of Atlantis (a timid and nervous Atlantean who is implied to not even be that good at swimming).
* Walle: Can be seen among a trash heap at the very beginning of the film.
* WALLE, EVE, being a robot, is capable of communicating in various languages. When she first encounters WALL•E , she tries to ask him what his directive is in several languages before finding the one he recognizes: English.
* WALLE named John and Mary who discover that there was more to life than luxury.
* Wallenberg: A Hero's Story: Eichmann's goal is to transport every Jew remaining in Budapest to Auschwitz. When the trains stop running he starts death marches instead.
* Wallenberg: A Hero's Story: The Nazis blackmail Horthy into abdicating by

threatening to shoot his son if he doesn't.
* Wallenberg: A Hero's Story the protective passports have a lot of stamps. Justified as it was needed to impress the Nazis.
* Wallenberg: A Hero's Story: The whole rescue operation happens right under the noses of the Nazis and Arrow Cross.
* Wallenberg: A Hero's Story to the train station in Hegyeshalom at the Austrian border where the trains to Auschwitz wait. In the event that the trains aren't running, they're forced to walk the rest of the way as well, all as part of a deliberate effort to kill as many of them as possible.
* Wallenberg: A Hero's Story: Wallenberg claims to be half-Jewish as opposed to one-sixteenth Jewish.
* Wallenstein. Wallenstein lampshades: "Spare us telling us from the newspapers / what we witnessed ourselves in horror!"
* Wallet Moths: Moths fly out of wallets or pockets to indicate lack of money.
* Wallet Moths: Moths fly out of wallets or pockets to indicate the character has no money.
* Wallet Moths: Someone opens a wallet and moths fly out to indicate lack of money.
* Wallet of HoldingWhere you can collect millions of gold coins and not have your pants fall down.
* Wallet of Holding: Where you can collect millions of gold coins and not have your pants fall down. Having a money limit is never fun, though, because it creates an extra unnecessary hassle for a player.
* Wall E. Weasel establishment has a cheap animatronic animal band singing "You're the birthday — you're the birthday — you're the birthday — boy or girl!"
* Wall-E-Weasel's Pizza, where the kids start off acting decent to the guy in the Wall-E costume but by the end he's lying on the floor and they're stomping on him.
* Wallflowers series, has a stutter. She becomes this in "Devil in Winter" (after a happy marriage, her stutter somewhat diminishes, but never disappears completely).
* wall full of newspaper clippings covering their actions. Sometimes they keep a photographic record of their kills, or even a souvenir of the victim's.
* Wall of Text, particularly during Kotomine or Tosakah's long-winded lectures.
* Wall of Voodoo Stan Ridgway (after the split) plays with the trope on "Walking Home Alone": "Put another quarter in the jukebox, Pete, but don't play the one with the sad trombone..." Cue sad trombone.
* Wallpaper Camouflage: Disguising yourself to blend in to the wallpaper or furniture.
* Wall Pin of Love from leaving by pinning their hand against the wall and effectively blocking their path.
* Walls' advertisements for their Vienetta ice cream showed one being served at a dinner party. Everybody ate the slice they were given, and then held out their plate for the one remaining slice.
* Walls (at least the non-black, non-artifact ones) can potentially drop dead of fright in this game.
* walls, because who needs walls when you have an invincible army of golems?
* Walls closing in. And just in case none of that worked, a ticking time bomb. Say what you will about Music Meister, but the man's thorough.
* walls in biology (nobody knew about the things to name them before the invention of the microscope), so their technical usage is their only correct one.
* Wall Slump: A dying character falls to the wall and slumps to the ground.
* Wall Slump: A killed person hits against the wall before their corpse slinks down.
* Walls of Tyranny: Great big walls are built to remind the people they cannot escape their country's tyrannical rule.
* Walls symbolize Dahlia Academy's divide between the two warring countries, Towa and the West, and their respective school dormitories, the Black Dogs and White Cats. Walls are also used by the
* walls that close in on them, and they either manage to save themselves, or get squashed.

* Wall Street commits is searching a law firm's records (under the ruse of co-owning the cleaning company) and making copies of them for Gekko.
* Wall Street, Gordon complains about how difficult it has been to turn around Teldar even after he's fired most of the management. For that reason, he initially rebuffs Bud's suggestion that he buy and turn around the airline his father works for.
* Wall Street is different as well, as is The Coca-Cola Kid, which, in the American cut, features the protagonist getting the local eccentric committed to a psychiatric institution and claiming his current assistant is a Communist spy. Someone was trying to write a message about the current political climate there...
* Wall Street: Money Never Sleeps: Takes place during the 2008 recession.
* Wall Street: Money Never Sleeps territory since the entire point of the movie is to show how corruption works.
* Wall Street reveals that after his stint in prison, Bud retires a wealthy man after he turned Bluestar Airlines into a large, successful operation.
* Wall Street, saying, "The minute I laid eyes on you I knew you were no good."
* Wall Street seems to play off this trope, specifically when Gordon Gekko tells Bud Fox to do some things for him which would violate trade laws.
* Wall Street tells his protege Bud Fox that he bought himself a seat on the board of the Bronx Zoo because, "One thing you gotta learn about WASPs: They love animals, but can't stand people."
* Wall Street to be the closest thing in their culture to a holy site, despite the fact that the location is no longer used for trading.
* Wall Street wears trend-setting, custom-made clothes, collects art, and dates an interior decorator.
* Wally and Jesse's understated, but pretty epic one in the lab, during "The New Rogues".
* Wally and Osborne trope by teaming him up with a displaced polar bear named Wally.
* Wally Bear and the NO! Gang Gang, but former first lady Nancy Reagan already trademarked the phrase.
* Wally Bruner was known to do this as well on the syndicated edition, as did Eamonn Andrews on the 1950's BBC version.
* Wally Gator short "Medicine Avenue" also features the "blood pressure cuff inflates the patient" gag.
* Wally Gator two crooks come to the zoo to steal a platypus and wind up taking Wally instead because they read the name plate on his cage wrong.
* Wally had one instance that parodied just how easy this is for speedsters. A psycho with an Uzi opened up on a room and Wally walked around picking a half dozen bullets out of the air, and disarming the man in a very casual manner. He misses one bullet that then kills
* Wally has explicitly mentioned that Superman cannot beat him unless he allows it because Wally totally controls speed itself.
* Wally is a master of this trope, minus the part about doing anything. In one comic, he convinces the Pointy-Haired Boss to not give him any projects for the next year as he's working on the WDNW project, which he says "prevents the 1s and 0s in the code from becoming 10s". He buys it, and Wally points out that the PHB never realized that the full name of the project was the
* Wally is good at cartography and hopeless in every other situation. He's admittedly based on nerd stereotypes.
* Wally is setting out his long-range project goals at an annual staff meeting:
* Wallykazam, after Hattie is splattered by a rotten tomato that Bobgoblin gave her as a gift, she uses her magic to summon a raincloud which washes the tomato off her hat. After she exits the scene, the cloud starts following Bobgoblin around, soaking him until he gets Wally to use his magic stick to make the cloud "leave," as all of the magic words for the day begin with the letter "L."
* Wallykazam, even though Norville talks more in later installments, he mostly just uses short declaratives or repeats what Wally says. Nevertheless, in the teaser segment of "The Bathmobile," he and Wally chat on telephones Wally created with his

magic stick like a couple of school-pals, apparently simply because of Rule of Funny.
* Wallykazam, the magic word "young" causes Norville to become a puppy. Upon seeing him, Bobgoblin says there's something different, asking if he changed his hair. Wally tells him he turned into a puppy and he replies "No, I think his hair is different." Wally points out Norville doesn't have any hair.
* Wallykazam!, Victor traps Wally and his pet dragon Norville in a cage with bars spaced such that Norville (a small dragon) could probably at least escape from them.
* Wallykazam!, Wally and Gina do this in "The Switching Stone" when Bobgoblin is transformed into Biggoblin by the power of the switching stone and stomps around making a lot of noise.
* Wallykazam, Wally explains that he and Norvill have to get past a goblin guard in order to get to the wishing potato.
* Wallykazam! with him about whether or not he ordered a cake until finally Norville makes noise and gives himself away.
* "Wally Pipp Syndrome" is the fear that no matter how good you are at your job, someone better will take your place should you ever take a day off.
* Wally Pipp was a decent first baseman for the New York Yankees in the early 1920s, until he had to sit out a game with a bad migraine. His replacement - Lou Gehrig, who would play 2,130 consecutive games for the Yankees, a record that stood for about 60 years.
* Wally's, Adams briefly mentions in his intro that said colleague did ultimately succeed in losing his job.
* Wally's death at the end of the season turned this into Take Up My Sword.
* Wally Took Notes notes from the last meeting are insults about his co-workers and a list of snacks.
* Wally trying to rewrite the timeline), which Barry explicitly calls a "bad idea".
* Wally was recalled to a full tour of active duty because he had been discharged
* Wally West) and return them to Linda, allowing her to remember everything, but apparently at the cost of Wally losing his humanity.
* Wally West, and seems capable of doing this again but at great risk of losing his humanity, and it's shown that in the future, he'll eventually stop existing in a single location, choosing to use his speed to functionally be everywhere at once. One story even showed that his ultimate death will be after converting into an energy being fully, dying fighting for humanity after having long since abandoned it.
* Wally West and use it's power for speeds that would make other speedsters lose themselves to the Speed Force's pull.
* Wally West, Barry's successor, fell increasingly out of focus to the point that, after
* Wally West), but this is later established as being because he was already connected to the Speed Force, the mystical energy field that empowers all DCU speedsters, Johnny included.
* Wally West is also glad to have them around. After taking the Weather Wizard to Earth-Two for his own protection, Wally ponders he will miss him, but luckily, he still has a lot of the old gang left.
* Wally West / Kid Flash" Allen (who's technically his cousin, once removed).
* Wally West never succumbed to the urge to do so is that his love for Linda would make living without her (even in paradise) unbearable.
* Wally West's, the link stabilized and it all ended up in her, so she gets full Speed Force powers and Jai ends up depowered.
* Wally West (the Flash III) is this to his wife, Linda Park. When they first met, he was a cocky idiot and she was an uptight news reporter. As time went on, she learned to have more fun with life and he became more mature and responsible.
* Wally West. Wally's uncle Barry arranged the chemicals that empowered him in the shelf as a demonstration for Wally, but there also happens to be a lightning storm outside, so... Later, when the Speed Force concept is introduced, it is all but outright said Barry had unconsciously called upon that bolt of lightning due to

having wanted a companion in his super speed.
* Wally West was originally depicted as being slower than Barry, not even being able to break the sound barrier. This was revealed to be a mental block that Wally subconsciously placed on himself because he was afraid of surpassing his hero. Once he got over it he truly became The Fastest Man Alive.
* Wally West where this begins, a furious mayor is about to demand compensation for the massive property damage involved in apprehending a supervillain tax evader, but backs off when he flashes his badge. In the next issue, Wally contemplates the possibility of nailing the Joker on this basis.
* Wal-Mart, at least in Canada, also uses the "change the cents to indicate a sale": There's actually a particular number that indicates "this product will not be rolled back any more".
* Walmart, but less evil) features a kid first tasting the "national-brand spinach", going "eww, yuck!", then tasting the Meijer-brand spinach...and going "eww, yuck!" The tagline is: The only difference is the price.
* Walmart corporate policy states that stores cannot set their prices to end in 9, 5, or 0, partially because of this trope.
* Wal-Mart is known to discount a product from, for example, 39.99 to 39.9
* Wal-Mart once sold a men's shirt with "Some call it stalking, I call it 'love'" printed on it. In a red font. That looked like dripping blood.
* Wal-mart only requires its employees to wear blue shirts, brown pants, and their name badge. What shade of blue and what shade of brown is completely irrelevant, and they can be any style of shirt or pants (provided it stays within reasonable dress code). Though most simply choose the standard navy blue, collared shirts. They did away with the uniform blue vests a couple years ago for unknown reasons.
* Walmart pulled a commercial featuring a Black father saying "I can't breathe!" after the grand jury failed to indict NYPD Officer Daniel Pantaleo for the choking death of Eric Garner, an unarmed black man. In particular, the issue was that "I can't breathe" were the last words Garner said while dying on-camera, and subsequently became the rallying cry of those seeking to end race-based police brutality. (It is still available on t-shirts, jackets, hats, etc., and his daughter famously wore one in
* Walmart "Rollback Man" commercial from 2003-2004, which parodies all the old action/spy tropes as a parody of "Secret Agent Man" plays in the background, when a hot female Wal-Mart employee disguises herself with a rubber Smiley Face mask (a CGI effect.)
* Walmart's 2019 back-to-school commercials have giant kids heading to school.
* Walmart's name made many people scratch their heads in Germany, since "mart" sounds like someone utterly incompetent butchered the word "Markt" ("market" in German). That already left a very bad first impression and it only became worse after it.
* Walmart tried to trademark their smiley face, but failed due to it being too generic. They have since changed their logo to an asterisk-like starburst they call "The Spark". They later brought back the smiley face, but only use it in conjunction with The Spark.
* Walmart was packaged with a Mr. Peabody plushie. Meanwhile, Best Buy sold a lunchbox with their copies and Target had replicas of Peabody's glasses and bowtie.
* Walpurgisnacht and decides she can't reset the time-loop again, because that would just make Madoka's fate even worse
* Walrolotl. Part walrus, part axolotl, the greatest animal that will never be.
* Walruses all have thick, bushy whiskers that look like mustaches. Even the babies have them. Both genders also have tusks, as they use them for defense and acquiring food and not in mating rituals like other mammals with tusks and antlers.
* Walruses, bovids, and even apes and monkeys are sometimes drawn with noses shaped more like a dog's or a cat's, rather than just two nostrils.
* Walrusguy retired from pooping is that he feared that was what he was becoming best known for, rather than flash animation where his real passion was.
* Walrusguy try to order spaghetti, and on Day Five, the floating disembodied Mario head also tries to order a pizza. Unfortunately for Link, Duke Onkled's Diner sells

all kinds of different foods, and as a result, he ends up not earning any money on Payday.
* "Walrus" is derived from the Norse name, which translates as "horse-whale".
* W also did the same. Most of the games did however add to or improve the animations and effects for many attacks. J is the first game using that engine.
* Walt and Jesse survive being targeted by Tuco and his cousins due to a lucky intervention from Hank the first time, and Gus diverting the Cousins the second time.
* Walt Disney actually kept himself under this, being quite a chain smoker, to the point where he eventually succumbed to lung cancer, but he made a point of making sure never to be seen smoking in public, as he wanted to project a wholesome personal image.
* Walt Disney, all it took was an pair of sunglasses and an Hawaiian shirt to make sure that nobody recognized him.
* Walt Disney also takes credit for all of the output of his studio, even though the lion's share was thought up and done by his personnel.
* Walt Disney anthology series Clarence Nash, and of course, Walt Disney.
* Walt Disney anthology series, which aired continuously under various titles from 1954-83 and has been revived several times since.
* Walt Disney as early as 1938, but author P.L. Travers didn't think it could do justice for her books, mainly because Disney hadn't done any live-action films at the time. After sales of the books started declining, Mrs. Travers finally met with Disney to discuss a movie treatment, and the story finally reached theaters in 1964.
* Walt Disney, Captain Hook and Mr. Darling are almost always played by the same actor.
* Walt Disney Classics) has some really cheesy and primitive animation and music, but can be considered endearing because of its cheesiness.
* Walt Disney company has made a staggering amount of live-action movies; there were 67 live-action films made during Walt's lifetime alone, and the company has made hundreds more since then, and isn't stopping anytime soon. (Mitigating this somewhat are a large proportion of the films from the 1990s onward, many of which are either remakes of earlier live-action films or live-action adaptations of the animated films, and thus may be skipped if one is not a completist.)
* Walt Disney demonstrates the use of sound effects on cartoons with the help of Donald Duck. He shows how the right sound effect can make Donald's head seem hollow when it is hit by a mallet. Donald is not amused, especially when the demonstration moves on to heavier objects.
* Walt Disney, ending a long and stressful period of being almost perpetually in debt from the early 1920s through the late 1950s.
* Walt Disney, especially when looking over the work of his animators.
* Walt Disney films are set in this period as well, usually portraying it with a mix of cozy nostalgia and charming quaintness. Following Walt's death, the setting became less common in Disney films, but it still comes up now and then. In order of release:
* Walt Disney finally left the air. See below for more about the show's namesake.
* Walt Disney for example famously sold off the rights to their pre-1948 film and cartoon short library in 1958, only to get them back in 1996 when their parent company Time Warner purchased Turner Entertainment.
* Walt Disney for probably the ultimate expression of his love for this setting.
* Walt Disney had himself cryonically frozen. In reality, he was cremated.
* Walt Disney has a countless number of fanfics and fanart, no exceptions, this leads to little kids and Disney fans imagining their own "Disney Adventures".
* Walt Disney has changed many classic fairy tales and literary classics in ways the general audience now considers to be the "official" version.
* Walt Disney. He looked around mostly for amateur kids of a certain degree of talent rather than professional actors, and he kept the mothers (who according to labor laws had to be around) offset by setting up a room where they could relax, chat, knit, or read.

* Walt Disney himself really liked this dub). The 2001 dub was made due to Lupita Pérez Arias (the singing voice of Snow White in the 1964 dub), having sued Disney for not paying the royalties on the use of her voice. After her death in 2005, the 1964 dub has occasionally aired on TV since 2010, with certain channels often switching between this and the 2001 dub. Interestingly, Francisco Colmenero appeared in both Mexican dubs: as Happy in the 1964 dub, and as Grumpy and the narrator in 2001. The dwarves' names weren't translated in the first two dubs.
* Walt Disney himself would make his own changes (often throwing out weeks' of work in an instant) or suggest putting in a song. It was only at this point that dialogue would start being mapped out, with changes occurring until the very last minute.
* Walt Disney in order to raise the bar with a park more reminiscent of a World's Fair where parents and kids could have fun together. When it opened in 1955, Disneyland set a new standard for the industry, and many older parks had to step up their game if they wanted to compete. Virtually every theme park today follows some form of the template that Walt Disney originally laid down.
* Walt Disney in the Nutcracker Suite segment. The narrator says "You won't see any nutcracker on the screen. There's nothing left of him but the title."
* Walt Disney in the parks, the Magic Kingdom features a smaller statue in the Hub of Walt's brother Roy and Mickey Mouse reclining on a bench. Roy spearheaded much of "the Florida project" after Walt's death, and was the one to suggest the name change from "Disneyworld" to "Walt Disney World" in his honor.
* Walt Disney is a magnet for sordid stories without much basis in reality.
* Walt Disney Monorail before Nixon's Secret Service entourage had a chance to board the vehicle.
* Walt Disney never being produced. This isn't even counting on the fact that a number of his animators that Mintz hired away later on became legends on their own, including helping create the first Looney Tunes and MGM cartoons.
* Walt Disney". Nobody—not even Russell himself—knows what Disney meant by that, although because at the time of Disney's death, Russell was a child actor on contract with Disney, consensus is that most likely it was a project Disney had in mind for the boy. For decades, just what this project could be has been a subject of occasional speculation.
* Walt Disney playing the trope straight and inverting the trope seconds later.
* Walt Disney Presents episode "Mars and Beyond", during the "typical science-fiction story" sketch, while the secretary is being pursued by the Martian leader and his minions. After she changes into her superhero costume, she holds up her hand to stop the leader and his minions slam into him.
* Walt Disney Presents episode "Mars and Beyond" shows a pursuing alien transforming from a swarm of insects back into his true form while chasing a secretary.
* Walt Disney Presents: In "A Day in the Life of Donald Duck", Donald parks his car at the Disney Studio and a cop makes him aware that he's in a "No Parking" zone. Donald responds by folding his car to miniature size and hiding it under his hat.
* Walt Disney Presents, Jiminy looks at the "kikazaru" monkey and says "I'm with you" before covering his own ears.
* Walt Disney Presents orders his studio's publicity department to go all-out in spreading the news, which is followed by a sequence of Donald listening to reports about his departure on his car radio.
* Walt Disney Presents suffer this after being squashed by a falling safe.
* Walt Disney Presents typically showed a 30-second trailer for Disney's latest theatrical release after the credits.
* Walt Disney Presents) used an instrumental medley of well-known songs from Disney movies, including "When You Wish Upon a Star", "Whistle While You Work", and "Zip a Dee Doo Dah". At least one of the tunes — "It's a Small World" — was from the theme parks.
* Walt Disney's animated films were very much inspired by this element from the older fairy tales, in which the typically nondescript protagonist ventures into the unknown and encounters the supernatural. As such, "normal characters in bizarre

situations" tended to be a trademark of his.
* Walt Disney's based around this trope, predicting things like multi-colored lanes indicating their destination, heated roads for rain and snow, cantilevered highways above canyons, tubular highways, air-conditioned desert highways, mountain highways that protect from sub-zero temperatures, underwater highways, upside-down highways, etc.
* Walt Disney's Carousel of Progress) about her date for tonight. As her father admonishes her to be home by nine, we hear a dissonant "womp-womp" effect from the orchestra.
* Walt Disney scenario Disneyland fell victim to: his company purchased large tracts of cheap land in a quiet but economically viable part of Florida, keeping the project a secret to avoid a burst of land speculation. This was ultimately successful: they acquired enough space for four different theme parks, two water parks, and numerous other attractions.
* Walt Disney's Comics and Stories 692) has Horace brag his way into promising to make a 100-foot dive. In his ensuing efforts to skip town, Horace eventually plummets from a plane into the pool, accidentally accomplishing the dive in the process.
* Walt Disney's Comics and Stories. (That's the one that goes "Eye of newt and toe of frog, wool of bat and tongue of dog...")
* Walt Disney. Shortly after the film's release in 1955, he retired from show business altogether and became a fashion designer.
* Walt Disney shows Hook choosing a gold-plated hook from an assortment of hooks.
* Walt Disney's, Huey, Dewey and Louie trick their Uncle Donald into thinking an accident with a boulder has killed him and that he's now an angel.
* Walt Disney's "Signature" logo, (designed by an artist at the studio, not Walt) was so famous that Disney himself had trouble signing autographs. Every time he did, people accused him of being an impostor because his signature didn't match the logo.
* Walt Disney, started out as this. She was the youngest of ten children, and her family was poor. They even set aside money for food to buy her art supplies.
* Walt Disney's Wonderful World of Color with guest host Ludwig Von Drake and the two have such an exchange.
* Walt Disney, the mouse has always been voiced by non-professional voice actors:
* Walt Disney Treasures sets contained animated shorts as easter eggs, though these were eventually done away with in later sets.
* Walt Disney, use realistic art to illustrate animals and humans (with the exception of Mickey and co, obviously).
* Walt Disney, which personifies atomic power as a helpful genie that provides almost unlimited power and such wonders as radio isotopes used for tracking the bloodstream of patients, while downplaying such minor things such as total nuclear annihilation...
* Walt Disney, who passed away while his "Florida project" was still in the planning stage. In fact, it was Roy Disney's idea to put his brother's first name in what was then called Disney World the so that everyone would know who's idea it all was. There is also a tribute to Walt in the resort's dedication plaque in the Magic Kingdom:
* Walt Disney, who proceeded to sign away most of his animators to a new in-house studio under the control of his former boss Charles Mintz. Disney was so shaken by the incident that he vowed to never lose the rights to any of his characters again. Disney would eventually regain the rights to Oswald in 2006, averting this.
* Walt Disney who's obsessed with immortality and has Mr. Freeze help him undergo the same cryogenic process Freeze had. By the end of the episode, he's been frozen inside an iceberg at the bottom of the ocean, trapped forever.
* Walt Disney won the rights to Oswald in a poker game with company founder Carl Laemmle. Decades later, the Disney company was able to get Oswald back... in exchange for ESPN Sportscaster Al Michaels. For the record, Michaels is pretty cool with it.
* Walt Disney World famously has the utilidor system, a series of underground

corridors in a ring around the park (plus a central corridor) that includes virtually all of the important employee areas and allows them to quickly move to any area of the park without being seen by guests in the wrong costume. Ironically, the utilidor technically isn't underground; Florida notoriously has a very high water table that makes it excessively difficult to build anything below ground, so the Magic Kingdom is actually built on a raised hill (made from the earth scooped out for the Seven Seas Lagoon) with the utilidor built at ground level.
* Walt Disney World in Florida does not... because they own so much of the land, they
* Walt Disney World like Füd Wrapper (who was even voiced by Tone Loc), the Peach Boys, and Pita Gabriel.
* Walt Disney World resort good a job in bringing their theme to life.
* Walt Disney World, resulting in the much-criticized attraction being overhauled into an abridged version of the original show. Many Disney fans jokingly attributed it to divine intervention from the actual Tiki Gods.
* Walt Disney World, Rizzo the Rat's Pizzerizzo restaurant has a sign reading "The City's Top Rated Pizza" The illuminated portions read "It's Rat Pizza".
* Walt Disney World's 2010-2014 expansion of Fantasyland (aptly dubbed New Fantasyland) is treated this way in the official tie-in material, explained as always having been there, though unbeknownst to us due to a recently-broken curse placed upon it.
* Walt Disney World's Magic Kingdom, a fountain uses a high-pressure stream of water (ascending over 250 feet into the air uncovered) to lift a one-ton ball off its base, allowing an average six-year-old child to spin it with ease.
* Walt Disney World's Magic Kingdom has an additional statue, "Sharing the Magic", showing Roy O. Disney (who spearheaded the park's construction after Walt's death) and Minnie Mouse sitting on a bench.
* Walt Disney World story, Disney asked Florida Governor Haydon Burns to confirm the story on October 25, though kept the official reveal on November 15th.
* Walt Disney World tried sending in maps and masks in their efforts to save it from closure with the rest of Pleasure Island. Sadly, Disney didn't budge; the Club was removed and Pleasure Island eventually became The Landing section at what is now Disney Springs.
* Walt Disney World vacation planning video has a plane flying over the resort with the pilot going over what they have there for adults and how to order the video. Soon, every passenger is asking him to repeat the phone number to order them.
* Walt does this (well, except he keeps his underwear on — thankfully) in the first episode of
* Walter acts like he's in a Vietnam drama that chronicles the veteran's
* Walter also plays the gossip columnist in a couple of episodes, with a column entitled "Campus Dirt: Shoveled by Walter Denton". This is to Miss Brooks' dismay, as he uses the column to blab about her being disappointed that Mr. Boynton is away at a Biologist's Convention.
* Walter and begins shouting conflicting orders. Tiren punches him in the mouth to settle him down.
* WALTER-) and ends with him being the departing one (to WWE), losing it at the hands of Martin Kirby.
* Walter Bishop has developed a technique to extract information from a corpse, provided the body has been dead for less than five hours. It is implied that William Bell is capable of doing this as well.
* Walter Bishop is normally on any number of psychotropic drugs at once. When he hits rock bottom, instead of drowning his sorrows, he smokes them out. To similar, but far more hilarious, effect.
* Walter could actually do a realistic Russian accent. He actually did during an audition, but Roddenberry told him the accent "wasn't strong enough" and instructed him to "ham it up". For the V pronounced as W thing he was inspired by his grandfather, who he says had the same difficulty (albeit not to the extent that Chekov does).
* Walter Cronkite briefly lost his composure on the air when he reported the

official statement that John F. Kennedy had died. (Video
* Walter Cronkite. He invokes this trope repeatedly, most famously in his "From Dallas, Texas..." announcement of the President's death. It appears that Cronkite keeps putting on his reading glasses to scan bulletins as they are handed to him, then takes them off as he faces the camera to avoid reflecting glare from the lights.
* Walter Cronkite. Johnny Carson attends one of Mary's parties in the last season, but a blackout occurs so the audience only hears his voice. He's still credited as himself at the end.
* Walter Cronkite (stock car racing, though now best known as a journalist)
* Walter Denton has a high, discordant laugh to go along with his squeaky teenage voice. In "Mr. Leblanc Needs $50" his girlfriend Harriet Conklin walks up to him while he's laughing:
* Walter Denton is editor of the school paper, the "Madison Monitor". From time to time he gets himself into trouble by writing editorials critical of Mr. Conklin or Madison High School in general, i.e. "Cafeteria Strike" and "Threat to Abolish the School Paper". "Marinated Hearing" revolves around Miss Brooks' attempt to keep Walter Denton from publishing an editorial insulting the Board of Education in revenge for only giving students 2½ instead of 3 weeks of Christmas Vacation.
* Walter Emanuel Jones originally auditioned for Billy, but changed tunes when he saw that playing Zack would be more attuned to his skillset.
* Walter even shouts "It can't all be for nothing!" in the second-to-last episode when his son
* Walter get shipwrecked and their primal instincts kick in. Walter builds a house while Tiren hunts for food.
* Walter Gibson noted in an article in The Great Detectives (edited by Otto Penzler) that he based the Shadow's foe Double Z on the then contemporary terrorist Three X.
* Walter Gotell also features Tatiana Romanova played by the Italian Daniela Bianchi and Rosa Klebb, played by the Austrian Lotte Lenya.
* Walter Hardy without showing how much he hates him for the murder of Uncle Ben, his uncle/adoptive parent.
* Walter has a recurring habit of tasting whatever disgusting thing they're dealing with and then revealing it's just some food he left lying around in the lab. He's done this with what appeared to be blood, brain matter, and cremated ashes. Taste is apparently the most important sense for scientists.
* Walter has to toss some bags of a rare-type blood from the back of a moving transport truck to his associates, who are following the truck in a beat-up old RV. He's only got three bags, and two are needed to save the life of a little girl. Guess how many of his tosses miss...?
* Walter Huston, but the actual plot focuses on poor farmer Jabez Stone whose soul is on the line after a deal with the Devil. Huston is the Devil, and on screen for about 20 minutes. He was nominated for Best Actor.
* Walter instantly became this when the character design was revealed, even more so when the film itself released. Aside from being a
* Walter it turns out also has a daughter, Raikou, he never knew about from a one-time tryst.
* Walter Jon Williams (also looking to capture and sell singularities) in the same system, resulting in the events of the book.
* Walter Jon Williams. As a result, only the eponymous Aristoi are legally allowed to use nanotech freely and they are fanatically paranoid about the possibility that any given form of nanotech could somehow mutate into mataglap.
* Walter Jon Williams books, where the aliens did not really disturb Earth very much bar imposing their own formal culture and ideas of monarchy upon it. Humanity still didn't take this very well and kicked them off-planet before the beginning of the first novel, becoming the first and only race to accomplish this. The protagonist Drake Maijstral is the descendant of those who opposed the revolt, and honestly doesn't much care either way.

* Walter Jon Williams has a heavily balkanized territory formerly known as the USA, in which Hovertank jockeys make a fortune flying contraband across fortified state borders.
* Walter Jon Williams is a member of a race of living ships, who use genetically-engineered servants to maintain them and do various tasks like load cargo, the most prominent of which is General Volitional Twelve, who is sent to study humans and act as her envoy. At the end of the novel, Beloved's trade (high quality drugs for computers) with the newly-discovered human siblings Ubu Roy and Beautiful Maria results in prosperity for both sides, although it is hinted that Beloved's "people's" exposure to humans will eventually lead to their demise.
* Walter Jon Williams is rife with this. It's pretty violent, though; one episode of corporate sabotage involves murdering an executive to get access to the company's intranet.
* Walter Jon Williams, leading to the reorganization of society into essentially a confederation of feudal states, with each state's leader (the Aristoi in question) being the only ones allowed to use nanotechnology freely.
* Walter Jon Williams of how the invention of photosynthesis in humans to solve world hunger was suppressed by regimes who used hunger as a weapon.
* Walter Jon Williams on any technology not strictly needed to allow the Shaa to conquer.
* Walter Jon Williams plays a variation of this trope; a person who replaces too much of their brain-matter with implants becomes "white-brained", detached from the world and other people, obsessed with mathematical abstractions, and losing much of their emotions in the process. However, it only happens to those who are inclined towards abstract thinking to begin with - those who use their cybernetic implants to interact with physical objects like vehicles, and expand their abilities in the realms of physical talent like martial arts rarely suffer from these effects.
* Walter Jon Williams seems to qualify, although he never appears and is referred to only in discussing the past. He planned on "artistically" reconfiguring planetary landscapes with gravity generators — with the people still living on them and expected to be grateful. Understandably "a commission had been formed in Perseopolis to examine his behavior", but he was somehow persuaded to retire before the other Aristoi actually did anything.
* Walter Jon Williams, the (male) protagonist's boyfriend voluntarily becomes pregnant with the protagonist's sperm, using the commonplace technology of the far future. (It's so far in the future that people have godlike powers and can do just about anything.)
* Walter Jon Williams, using the commonplace technology of the far future (it's so far in the future that people have godlike powers and can do anything).
* Walter Koenig (Chekov) was missing from the entire series because they couldn't afford to pay him. Instead, he worked as a writer on the show.
* Walter Koenig doesn't talk like that either, and he can do a very accurate Russian accent. Roddenberry told him to "ham up" the accent as much as he could, and it was more or less played for comedy. Koenig and Yelchin both thought the v/w mispronunciation was more typical of Polish accents than Russian ones. But Koenig says his father had a difficulty with v/w, and he based the accent on this (of course hammed up to 11).
* Walter Koenig was once mistaken for a bellhop at a hotel, when wearing his Starfleet uniform during a public appearance.
* Walter Krueger, George Kenney, and John Shalikashvili (born in Germany, Canada, and Poland, respectively), all rose to be four-star Generals in the American army. Similarly, Hyman G. Rickover, born in
* Walter Lantz, a tiny penguin who's always cold, hungry, and determined to get what he wants.
* Walter Lantz, had already been written. After the studio reopened in 1950, they were the first new shorts to be put into production.
* Walter Lantz Productions short "Scrambled Eggs", Peterkin tries to shift blame for mixing up the birds' eggs. First he blames the squirrels, prompting the skeptical owl to intimidatingly ask "who?". Nervous, Peterkin changes his story to

blame the chipmunks, earning himself another "who?" from the owl. He can't come up with someone else to blame before the birds attack him, knowing quite well Peterkin's the perpetrator.
* Walter Lantz short "The Boogie Woogie Bugle Boy of Company B" (from the song of the same name) has a soldier assigned to play the bugle at dawn, a position he fears, as the other soldiers usually beat the bugle boy up for waking them. He remedies the situation by playing jazz on the horn.
* Walter Melon cuts her off before she can name whatever one she was thinking of.
* Walter Melon of Mr. Myogi claimed he watched Walter Melon and stopped him before he could kiss Daniel's girl). Simultaneously he wasn't the only one as his assistant Bitter Bug and his rival Sneero also displayed such ability, typically taking on the roles of needed sidekicks and villains respectively without anyone noticing.
* Walter Melon who are short two members and need all five to transform.
* Walter Moers and are sometimes adopted as pets and lap puppies... until they grow older and (often to their owners' surprise) begin walking on their hind legs, talking and displaying huge tempers.
* Walter Moers has a man (depicted literally wearing horns) doing a walk and wonders why he always has to leave when his wife's brother is visiting her. In a later scene he wonders why she's wearing sexy underwear for her brother, but not for him. Then he remembers that she has no brother - and still doesn't make the connection, only thinking "women are odd".
* Walter Moers has General Tictoc, the love of his life — a pimped-out Iron Maiden — and Rala, the main character's love interest.
* Walter Moers has refused to be photographed since the mid-'90s and communicates at most via email.
* Walter Moers, just to provide an example that as a prize-winning writer, he can write anything he wants.
* Walter Moers of his remaining slogans must stay in use... or all the money goes into the Invented Just To Annoy My Inheritors trust. The marketing department is forced to run each slogan above a foot-high disclaimer asking the reader to consider the mental state of its author.
* Walter Moers, one of the many obstacles the titular character has to face is a huge, discarded Bollogg head.
* Walter Moers. While he does combine flavours that probably shouldn't be mixed out of a belief that the more flavours in a meal the better, he's still considered a very good cook.
* Walter Mondale (D-MN): U.S. Vice President (1977–1981), U.S. Senator from Minnesota (1964–1976), Attorney General of Minnesota (1960–1964).
* WALTER: Most of his career took place on this decade. Near the end of 2018, he signed with WWE and from 2019 onwards performs in the NXT UK brand.
* Walter Peck firmly refuses to believe in ghosts even when his own actions cause the rampaging ghost menace in the first place (or maybe he had his denial blinders on). Plus the hundreds of eyewitnesses who have seen ghosts and seen the Ghostbusters at work. Peck's accusation that the Ghostbusters use gas to cause hallucinations is made without the slightest shred of evidence.
* "Walter Plinge" and "George Spelvin" (and feminized variations) are the fictitious actor names traditionally used in, respectively, British and American theatre cast lists when it is necessary for plot reasons to hide the fact that one actor is playing two roles, especially if they are the same person in-story as well. Of course, this means that theatre geeks may be clued in to the spoiler anyway.
* Walter Pyramid situated at the campus of Long Beach State University in Long Beach, California; essentially the West Coast equivalent of the Pyramid Arena, but smaller and used as a venue for college sports teams.
* Walter Raleigh is closely associated with a popular anecdote: he once
* Walter Ray Williams Jr. is a legendary champion in two sports. He's well known for being a great bowler, but he's also a champion horseshoe thrower. His nickname "Dead-Eye" comes from horseshoes, not bowling.

* Walter Scott: As described by Bailie Jarvie, in the eighteenth century Scottish Highlands, taking the law into one's own hands is commonplace. And the chieftain's will is the only law.
* Walter Scott several of the tropes that became stock parts of the Robin Hood legend. Still, any reader with even the tiniest familiarity with the genre must have seen it coming a mile away.
* Walter's own waffling on this trope causes no end of trouble for him.
* Walter steals hard-to-get equipment and chemicals from his high school to kick-start his meth-cooking operation. The fact that there's no sign of forced entry immediately tips off DEA agent Hank that it was an inside job.
* Walter to age while vampires cannot factors into his preference for the elderly.
* Walter. Up until his death throes, the only real characterization he has is "Supports Wanderer." When his death scene rolls around, it just serves to illustrate how caring and sensitive Wanderer is.
* Walter Veritas, a Syndicate unit, is based on game director Jason Slama.
* Walter "Wally" O'Pierce looks and acts like a 34-year-old. He is ten.
* Walter White, a chemistry teacher who turns to cooking meth when he's diagnosed with cancer. When the chemotherapy starts making his hair fall out, he shaves it off. The first words his son says in the face of the new look are "Badass, Dad." He's got an
* Walter White agonizes over whether or not to kill Krazy-8 in the first season, drawing up a literal "pros and cons" list.
* Walter White... complete with plastic Walter White mask. While certainly amusing, it does make it hard to tell how to categorize this example.
* Walter White is one of the best meth cooks on the planet. He's also a fairly clever schemer who can usually come out on top and is excellent at manipulating people, despite being generally unlikable on a personal level. It was these traits that led him to
* Walter, who has recently arrived in Bulgaria after witnessing the horrors of war at Leningrad, and is disturbed by the treatment of prisoners in the nearby concentration camp, but also believes himself incapable of doing anything about it. He opines to Ruth, "It took millions of years for humans to evolve from chimpanzees, yet the chimpanzees are better off than we are."
* Walter Zerlett-Olfenius and charged for his role in Herbert Selpin's death. In 1947, after a prolonged trial, Walter Zerlett-Olfenius was sentenced to five years in a heavy labor camp. Upon release, Olfenius discovered most of his assets were seized and he was permanently blacklisted from ever working in the industry. None of his former friends would speak on his behalf with the new film commission due to the lingering memory of Herbert Selpin hanging helplessly in his cell, strangled by his own suspenders. Walter Zerlett-Olfenius died in 1976, ostracized and unemployed.
* Walt Flanagan's Dog, Jay bursts into a string of threats when Randal calls him a "fucking junkie". Among other things, he threatens to "fucking tear off your sweaty sack and make you wear it like a fucking clown nose".
* Walt gets all the money his family could possibly need by the middle of the series, but keeps on cooking meth because of his
* Walt goes to a hardware store and notices a tweaker foolishly buying meth making equipment wholesale. He schools him on "different items, different stores" and buying the wrong kind of matches. The tweaker runs off in fear. This leads to the iconic "stay out of my territory" scene.
* Walthamstow Town Hall and the neighbouring Assembly Hall are London’s stock location for a large inter-war building due to the art deco exterior and surviving 1930s interiors. Notable appearances include many different fictional locations in
* Waltharius: Hagen urges Gunther to accept the hundred brooches offered by Walther as a compromise, because he had a dream the night before in which Gunther and he himself fought with a bear which bit Gunther's leg off and ripped an eye and several teeth out of Hagen's face. Later they fight with Walther, and Gunther loses a leg and Hagen an eye and six teeth.
* Waltharius: King Gunther demands of Walther to surrender to him both Hiltgunt and

the two chests of gold he brought with him from Hunland, arguing that, as the gold is taken from Attila's treasury, it rightfully belongs to him because of the tribute his father had formerly paid to Attila. Though Walther offers a compromise, which Hagen advises him to accept, Gunther refuses to settle for less and instead orders his champions to fight. His behavior draws much criticism from Hagen, who demonstratively renounces his right to a share of the spoils, and comments the unfolding desaster with a speech on the evils of avarice (v. 857-69).
* Waltharius, retelling Germanic heroic legend: When Hagen suggests to king Gunther/Gunnar to accept Walther's gift of 100 golden rings (instead of taking all his treasure), Gunther mocks him: "You are truly a son of your father Aldrian. He would talk a lot so he wouldn't have to fight." After Walther has killed the other eleven knights of the king, Gunther tries to make Hagen fight again. But Hagen says: "I am truly a son of my father Aldrian. He would talk a lot so he wouldn't have to fight."
* Waltharius: When the Frankish king Gunther orders his retainers to attack Walther for the sake of Walther's treasure chests, his retainer Hagen refuses to fight against his old friend Walther until after Walther has slain eleven Frankish champions, one of them being Hagen's own nephew Patavrid. When Gunther finally convinces Hagen to fight, and Walther accuses him of behaving dishonorably, Hagen replies that Walther himself ended their friendship by killing Patavrid, and that he is going to avenge his nephew. However, the facts that Hagen earlier told Gunther that he would not break his friendship to Walther for the sake of Patavrid alone, and that he remained passive while Walther killed five more Frankish champions after Patavrid, imply that this is an attempt at self-justification rather than objective truth. After fighting each other to a draw, Hagen and Walther reconcile and renew their friendship, without Hagen having avenged Patavrid.

* Walton Simons is not invulnerable during the cutscene, so a well-timed and well-placed high-explosive shot from either the GEP or assault rifle will hit and kill him during his speech.
* Walton Simons is supposed to be the brawn to Bob's brains and the true physical challenge you have to overcome, which would've made Page's non-involvement more forgivable - after all, he's the mastermind, defeating him should be an ideological victory. Unfortunately, Simons, for all his bragging about wielding newer and improved version of augmentation technology, is a pushover. He has a powerful weapon, and he's accurate with it, but because of bugs he doesn't use his augs properly, meaning you can kill him with a single missile, and his AI is really dopey, so he behaves almost like a rank-and-file mook.
* Walt's cover for his disappearance is that he was wandering through the desert in a "fugue state." When he becomes unable to uphold that lie, he confesses to his psychiatrist that he made it up, and instead claims that he consciously chose to run away because he just got sick of his family (a better story than the truth, which is that he was kidnapped by a rival drug dealer).
* Walt Simonson anthology series, is set in the distant future, in "a stainless steel city of light" where a woman is telling her child a bedtime story about how evil was banished from the world by the great warrior Batman. Then she starts crying, and we learn that the brightly-lit, peaceful city is a dictatorship with tanks and soldiers on every street.

* Wandaba Style starts off this way, with the girls staring in disbelief at future versions of themselves, then complaining to Ichirin about it, then blaming each other for them ending up in the predicament they're in. Ichirin takes advantage of this to flashback to shortly before the episode began, showing how the girls took advantage of a man-powered warp engine to get some exercise and ended up in the future by accident. The rest of the episode continues normally from there on.
* Wandaba Style, Susumu is in the middle of a slump, and without one of his experiments to liven things up, the girls have nothing to do and have gained a substantial amount of weight as a result. When they realize just how fat they've gotten, they're quick to lose most of the extra pounds.

* WandaVision: a magical superheroine accidentally traps an entire suburban town in a sitcom-based alternate dimension built from her own trauma and grief while the government attempts to intervene from outside.
* WandaVision and subversion of classic television tropes, it doesn't go well.
* WandaVision as the show is a deeply meta look at television, showcasing the new possibilities of TV shows for MCU.
* WandaVision: Beneath the campy sitcom shenanigans and superhero weirdness, the show is fundamentally about how loneliness, depression and unresolved grief can lead to reckless, dangerous and self-destructive behaviour.
* WandaVision can make even the show's most heartwarming moments seem disturbing rather than uplifting.
* WandaVision: Darcy, Jimmy Woo, and the agents of S.W.O.R.D. take on this role when watching the titular sitcom in the fourth episode, asking some of the same questions the real-life audience asked (if Vision is alive, the significance of hexagons, why a sitcom, etc.). Though Darcy and Jimmy become the most emotionally invested in the series as it progresses.
* WandaVision days as a fugitive to paint her as an unambiguous villain so he can justify killing her and cover up his revival of Vision in violation of the law. Wanda digs things deeper for herself when she suffers a breakdown and accidentally creates a pocket reality encompassing the town of Westview where everyone is forced to act out roles in her sitcom fantasies.
* WandaVision: Episode 7 reveals that Agnes, really Agatha Harkness, was manipulating Wanda from the very beginning and setting up a number of conflicts across the series. She sings about this at length in "Agatha All Along."
* WandaVision, has Tommy and Billy frequently make aside comments to the audience.
* WandaVision. He opens the door, picks her up, and resumes carrying her like nothing happened.
* WandaVision in an ad for Nexus. Side effects of using Nexus include "feeling your feelings, confronting your truth, seizing your destiny, and possibly more

* WandaVision, in the segments set in the 50s, has several references to the Cold War, such as Vision accusing a co-worker of being a communist (in jest, a hint that's something wrong since that would be a serious accusation in the actual 50s), and mr. Hart immediately gets suspicious when he learns that Wanda is eastern-european.
* WandaVision: Jimmy Woo tries to bluff SWORD Director Hayward that he's already called FBI headquarters in to arrest him, then swipes a cell phone he can use to actually do it. The FBI arrives too late to do anything about the plot of the series, but do get to cart Hayward off in handcuffs.
* WandaVision) misogynistic as hell, to match the decades they're supposedly from.
* WandaVision: Parodied when Wanda finds her kids giving a stray dog a bath in the kitchen sink.
* WandaVision plays such a character while acting as Wanda's friend and neighbor. Eventually, Vision becomes savvy enough to predict her appearance.
* WandaVision Protagonist, but she definitely fits. Regardless of how sympathetic her motives are, the fact is that she trapped hundreds of people inside the bubble and controlled their minds (even if the initial creation was an accident), gaslit Vision when he started to get suspicious and turned violent with anyone who even slightly challenged her comfort-reality.
* WandaVision rating, and all episodes after that have TV-14 ratings with varying language/violence content descriptors (except for the finale, which has a plain TV-14 rating).
* WandaVision shares his uncle's speed but is even more fragile, even his brother Billy can subdue him by holding out his hand at the right moment and telekinetically stopping him in his tracks.
* WandaVision! She's absolutely awful, having steadily insinuated herself into Wanda's life while causing her more and more pain, all to get at Wanda's power... but she is great fun to watch.
* WandaVision: SWORD Director Tyler Hayward is illegally experimenting on Vision with the intent of reviving him against his will and in violation of the Sokovia Accords, and intends to frame Wanda Maximoff for his crimes.
* WandaVision S.W.O.R.D. tries sending an agent into Westview through the sewers, wearing a hazmat suit and trailing a tether. Crossing the Hex causes his suit to turn into a beekeeper's suit and the tether to detach and get reeled back as a kid's jumprope.
* Wandavision takes place roughly three to four weeks after Endgame, placing it roughly in early November.
* WandaVision: The finale sees Wanda Maximoff taking on Agatha Harkness (who wants to take her magic for herself) and SWORD agents led by Tyler Hayward (who wants to kill her to cover up his illegal resurrection of Vision).
* WandaVision: The Hex border around Westview is almost invisible during the day, with the only sign of its presence being when anyone tries to go near it. At night, it appears light blue. After Wanda strengthens the Hex barrier midway through the show, the whole thing becomes visible at all times and glows an ominous red when viewed from the outside.
* WandaVision: The lynchpin of the plot is that Vision has been resurrected somehow, and he and Wanda have been able to get married and continue their relationship in a sitcom setting.
* WandaVision themselves, whereas Jimmy Woo and Darcy Lewis are much more serious looking in on Wanda's artificial sitcom setting for herself.
* WandaVision, the shape of the area around Westview is hexagonal, as well as the individual parts of the forcefield wall that Wanda puts up around the town. Dr. Darcy Lewis, called in by S.W.O.R.D. to investigate the phenomenon, calls it "The Hex," a name that turns out to have a double meaning.
* WandaVision. The twins are infants at the start of Episode 5, but quickly age themselves up to become five-year-olds, and later turn ten so they can adopt a puppy. Later in the episode they are about to do it again before their mother stops them.

* WandaVision", Vision, an android pretending to be a human, accidentally swallows some chewing gum and it clogs his internal machinery. As a result, his behavior swerves from prim and proper to extremely cocky and inebriated.
* WandaVision, Vision bought property in Westview that he intended for himself and Wanda to live in. On the property deed, he drew a heart over the lot where the house would be built, with a simple message: "To grow old in - V.". It is seeing this that prompts Wanda to break down and in an outburst of grief, transform Westview into one giant sitcom reality.
* WandaVision walking Wanda through a series of flashbacks in an effort to work out how she managed to create the Hex.
* WandaVision. Wanda may be phenomenally powerful, but she's had no formal training in spellcraft, meaning she can be outclassed by someone less powerful but more refined in their magic.
* WandaVision, Wanda picks up a bottle of almond milk from the fridge, which suddenly transforms into a carton of whole milk with an old black-and-white picture of a missing child on it.
* WandaVision Wanda snaps, and creates a sitcom reality encompassing the whole of Westview.
* WandaVision: Westview, New Jersey is represented by various locations in both Atlanta and Los Angeles.
* WandaVision: When Wanda begins to panic, her powers reach out on their own and begin hurting the people who caused her distress, even though she doesn't intend it. In the sitcom reality of the Hex, this results in characters who go off-script getting violently punished while Wanda is confused about why it is happening.
* WandaVision", where Wanda goes through the usual Hollywood bag of tricks to hide her telltale belly, including long, loose-fitting clothes and unseasonable coats.
* WandaVision"), which is run by the tyrannical Dottie, her next-door neighbor Agnes quietly mutters how anyone can get through the meeting sober, while holding a drink.
* WandaVision, which was transformed into a traveling circus. One of the performers mistakes Vision for one of their clowns, due to his bright red skin and green and yellow outfit.
* Wandavision, with the style of couch updating with each "decade" Westview goes through.
* Wanda was made for $100,000 with a crew of 4 including director and lead actor Barbara Loden (the DP also edited the film). Apart from Loden and co-lead Michael Higgins (whose costumes were borrowed from Loden's husband's personal wardrobe) all the actors were amateurs.
* wanded magic, Harry Dresden states that the latter falls into this trope. While wandless magic has all kinds of great perks, like greater longevity and magical senses, and is incredibly flexible (every practitioner has their own strengths and can do all kinds of things with their area of expertise), it also takes longer to learn, partially because that same flexibility also makes it harder to standardize. Meanwhile, a wanded mage can become incredibly proficient in just a decade or two of study, and its standardization means that a wizard doesn't have to make things up, say, in the middle of a fight.
* wander around naked to put off Skills. But Skills counters by starting to wander around naked himself. Millicent finds herself caught in the middle of their "Naked Standoff" and tells them to put their pants back on constantly, but they ignore her. Although Skills does get miffed when she pokes fun of his size
* Wander by how far she’s willing to go at times, and it’s outright stated that a part of the reason she decided to save him was that she hoped he could teach her to be around people again.
* Wanderers of Sorceria fantasies during her stay in Jin (having been made a general there).
* Wander himself also has a very nice pair of navy-and-black shoes that he wears on his travels.
* Wanderhome, bugs serve as the pets, livestock, and wild creatures of Hæth, so they are accordingly large. Unlike most depiction of giant bugs, they are

supposed to be less creepy and more cuddly.
* Wanderhome dictates campaign play through "the great arc of the year," which is divided into five seasons of two months each, with a holiday concluding each season. For example, the recommended starting season is Leap, the setting's corresponding season to late winter and early spring. Leap's two months are Tillsoil and Monsoon, and the season ends with the Sun Parade. Meanwhile, each year is given its own name, with the starting year being "The Year of the Waterlily," and subsequent year names being up to the players.
* Wanderhome: Hæth is a world full of spirits and gods, with the aftermath of a war looming over the land. At the same time, the text predisposes players to problems that are interpersonal and local such as "conflict between expectations and demand" in a village workshop. Even if the characters do end up encountering any major gods or conquerers, any epic-level adventures exist outside the game's scope.
* Wanderhome keeps its focus away from the high-concept heroes of other fantasy stories, focusing instead on the day-to-day life of villagers. All of the playbooks revolve around more-grounded vocations; the only significant difference between the player characters and the NPCs is that the PCs are wanderers.
* Wanderhome, the local fauna consist of insects and other arthropods. The playbooks paint this dynamic, as a Moth-Tender can be a pigeon carrying for carrier moths, or a Shepherd can be a ram herding chubby bumblebees.
* Wandering Albatross has to settle for a mere 3.7 metres (12 feet) at the most.
* Wandering around a supermarket wearing a suit could often lead to being mistaken for the store
* Wandering Djinn, has the ability to disguise himself in a myriad of human forms, knows a lot of different folklore creatures because he's met a lot of them, and has the creepy appearance of skin that's so dark blue it borders on black, golden cat eyes, and instead of hair a scalp covered with flame. If he wasn't such a goofball, he might be frightening.
* Wandering Hamster has a whole army of knights clad head-to-toe in armour, including helmets that at most leave their eyes visible as tiny lights.
* Wandering Hamster. Killing it doesn't seem to affect the snake in any way.
* Wandering Island vols. 1 and 2 by Kenji Tsuruta. Volume 2 in particular.
* Wandering Jew: according to the story, one man who taunted Jesus during the crucifixion was cursed to walk the Earth until the second coming. Since that hasn't happened yet, presumbably he must still be out there.
* Wandering Jew from the Christian perspective: If the Wandering Jew truly is immortal, then no matter what good deeds he does to atone for his sinful act, he can never go to Heaven, since one must die in order to enter the afterlife.
* Wandering Moon: A serious one between Wasteland time and Equestrian time. Sometimes a few days in the Wasteland equals a week or a year in Equestria or in more extreme cases, a single day in the Wastes can be equal to several hundred years of Equestrian time. It really just moves at the speed of plot.
* Wandering of a Sword Hero: Shirou assumes the other three heroes are Magi like him or at least something equivalent, not knowing they were all ordinary young men before getting summoned.
* Wandering Pilot of something, "taught" is mistaken for "taut", and other similar errors abound in the story. Actual spelling issues are relatively rare, though.
* Wandering Son acts this way toward Shuuichi, however they aren't dating and Shu doesn't even have romantic feelings toward Saori.
* Wandering Son) and even gains a girlfriend halfway through the manga.
* Wandering Son and found boys to be too rambunctious but girls to be too snobby. Afterwards she makes a small group of friends, however she proceeds to more-or-less ruin all but one of said friendships within three years of creating them. By the end of middle school they're close again but due to going to separate high schools she loses track of most of them besides Takatsuki.
* Wandering Son, and Oka to a more mild extent. They both bully Nitori for being feminine.
* Wandering Son and when she's having friendship issues her first thought is to

destroy her two-year friendship and ignore that person.
* Wandering Son anime changes the story from the mid-to-late 2000s to the early 2010s. It's not that noticeable besides cellphones being more common and some technology changes. For example, Nitori and Mako recording their voices using a tapeplayer is changed to them recording their voices on their cellphones.
* Wandering Son anime ends just when Nitori's voice is starting to break and before the puberty related drama really hit. The ending is comparatively much happier than the manga counterpart, as Nitori seems fine with her voice changing while in the manga she reacts with a blank expression.
* Wandering Son anime, the protagonist has a crush on Takatsuki which gets mentioned all the time. In the manga the crush is brief; Nitori doesn't like when people refer to it and it's not mentioned much afterwards. In the anime, their characterization and scenes are warped to make the crush appear to continue long after it ended in the manga.
* Wandering Son as a classmate of Maho that she has a crush on. He has a crush on her little sibling at first but eventually, they begin dating. By high school, though, he's pretty much "Maho's boyfriend" when before he had some chemistry with Nitori at least.
* Wandering Son being mainly set in late elementary and middle school has quite a sum of this:
* Wandering Son believes she has a crush on her best friend and confesses to him. Takatsuki rejects Nitori but their friendship doesn't falter, Nitori moves on, and she begins dating Anna instead. Cut to high school and after years of not seeing each other Takatsuki s attracted to Nitori. Nitori rejects Takatsuki and stay with Anna.
* Wandering Son both have crushes on the same teacher in middle school, though neither knows of the other's crush. Maho, the protagonist's older sister, is implied to have fallen for the same teacher when she was a freshman. There's also a background character who has a habit of flirting with one of the teachers.
* Wandering Son boys, as she gushes when she dresses up Takatsuki for a fashion show).
* Wandering Son, but by volume two shows they've been friends for years.
* Wandering Son but matures over the course of the series and becomes more confident in herself.
* Wandering Son caused the black-haired characters to be given black eyes. It's presumably stylized dark brown. In the anime, Takatsuki is given gold eyes while Saori has her original brown.
* Wandering Son chapters, especially when the characters have begun high school. The protagonist in particular is prone to scenes that cut to a bathroom after they've interacted with their girlfriend.
* Wandering Son chapters it's shown Nitori can bake quite well, though she's never shown cooking anything else.
* Wandering Son: Chizuru Sarashina is a wacky and eccentric girl who does what she wants to, even going against her school's clothing rules (she wore a bikini instead of the school swimsuit once, sometimes wears a tie instead of a ribbon, and wears the boy's uniform occasionally).
* Wandering Son: Falling for Shii as a preteen helped Yuki realize that she liked boys and that she wanted to be a woman when she grew up.
* Wandering Son falls for Shuuichi Nitori despite Shu's older sister Maho liking him, and Shu not returning the feelings. After a while, Riku falls for Maho properly and they begin dating.
* Wandering Son gets mistaken for this by her boyfriend when he walks in on her being a bit too touchy with Takatsuki, who at the time was a fifth grader.
* Wandering Son had always shown attraction to Saori but it wasn't until after he begged her to go on a date with him that she agreed to date him. Saori isn't the best of girlfriends but there isn't much to say that she doesn't love him back.
* Wandering Son had one where Nitori and Takatsuki hang out with Yuki and her boyfriend.
* Wandering Son has Chizuru, a middle school girl who likes blurring rules and

gender roles due to commonly wearing the boys uniform to school. She goes to an all-girls high school and it's unknown if she drops the habit. Chizuru strictly crossdresses at school as she's never shown wearing anything too androgynous outside of it.
* Wandering Son has quite the reaction when she starts getting pimples, however part of it is because she doesn't want to enter puberty.
* Wandering Son: If you look at colored manga pages, and often the anime uses this motif. You'll notice it's not uncommon for male characters to wear blue and females pink. Considering the series is themed around gender, it makes sense.
* Wandering Son is a major fan of the model Maiko. She eventually began working at the same modeling agency as her. They're later shown to have become friends.
* Wandering Son is a manga heavily themed around gender and gender roles this pops up:
* Wandering Son is a more levelheaded version of this. When Riku, Maho's boyfriend, comes over for Christmas, he gets nervous. When Maho was a little younger and in middle school, he made her little sister tag along on their date.
* Wandering Son is a transgender boy or simply a cisgender yet not exactly gender-conforming girl is up in the air. Shimura said it's up to the fans' interpretation. (Nitori remains a trans girl, however.)
* Wandering Son isn't technically a "spare" since she is dating someone, however her boyfriend is treated rather like a disposable fling.
* Wandering Son is only around 10 at the start of the story but is remarkably mature for her age, even compared to the other characters.
* Wandering Son is only available on Crunchyroll, and not only has no dub but also no physical release.
* Wandering Son It's also worth noting that Takatsuki is the only boy Nitori likes - she's otherwise interested in girls and most other boys bully her.
* Wandering Son. It's never quite said whether Nitori herself had feelings for Riku, but she later gets a girlfriend.
* Wandering Son. Makoto considered dropping out of school during this arc but didn't.
* Wandering Son. Momo in particular is very clingy to Chi and seems to think of little other than her friend.
* Wandering Son much but it still gained a lot more notability within anime communities.
* Wandering Son, Nitori Sr. wonders if Grandma was really so wrong about them.
* Wandering Son, or, what the heck, both. From the looks of it, it was probably a period stain; she also mutters something about whether had mom had "any", implying tampons or pads. Though she did act a bit too suspicious and embarrassed.
* Wandering Son plays several characters' affections as this, both minor and major. The most apparent is Mako and every boy she's ever liked, along with Saori having unrequited feelings for Nitori.
* Wandering Son revolves around Nitori writing what essentially is a novel version of the series.
* Wandering Son's last two episodes were shortened and mashed together for the TV release. The DVD release has the original versions.
* Wandering Son. That meant skipping important parts, scrapping the field trip, compressing scenes together, and removing most of the comedy.
* Wandering Son the middle schooler Nitori was voiced by a fourteen-year-old boy. The issue is his voice had already begun to deepen, however it's a plot point that Nitori's voice is prepubescent until the very end of the anime.
* Wandering Son. The transgender protagonist writes a gender-bender play about everyone in the world switching sexes one day. The main characters of the play are avatars for herself and her best friend.
* Wandering Son though, but it only appears a few times in the series.
* Wandering Son, though neither Shi nor Yuki knew that (though Yuki seemed to have guessed).
* Wandering Son, though only eleven episodes were broadcast on television with one unreleased episode being added onto the Blu-Ray.

* Wandering Son (transgender female main character, transgender male main character)
* Wandering Son when Nitori's new teacher crashes into Maho due to being late for school. The crash ends up making Maho not go to her first day of her new school; she went back home for the day.
* Wandering Son: When Riku dresses up as a maid for a school festival, he's noted to be attractive. Fumika crossdresses to attract the attention of a girl she likes, who likes feminine boys and is attracted to the transgender protagonist, and likes to flaunt his cuteness around.
* Wandering Son when they start going out as a girl and a boy respectively. They decide to go with the girl's room since Takatsuki is young enough to pass as a tomboy.
* Wandering Son where in the manga, in a volume that came out in 2006, two characters record their voice using a tape recorder. Cut to the 2011 anime adaptation and the scene is changed to them using their cellphones instead. The series lasts from elementary to high school, so the slow change in tech is a bit more realistic compared to other examples.
* Wandering Star. Cassie quotes Madison in describing what it's like to be psychic: "It's like being locked alone in a room. Next door they begin to kill someone. You can hear everything. The screams. The sobs. The pleading. And you can't do a thing. All you can do is listen."
* Wandering Star needed Earth to fight the Bono Kiro because of that unique reputation. Throughout the story, Cassie encounters prejudice from aliens who see all humans as an uncivilized, backward, warlike species.
* Wandering Star's systems and run the ship in a far more efficient manner than when operated manually. She spends the majority of the series this way, within the ship, and communicates with the rest of the crew through the intercom.
* Wandering Wenda), and every episode's title. The result is probably the most alliteration you'll ever hear in the span of 8 minutes.
* Wandering Wenda: "The Disco Dragon of Detroit" has a "HERE BE DRAGONS" sign which Wenda opens (thinking it a decoy) to find an actual dragon behind it. The Duchess of Disco emerges from the "HERE BE DRESSING ROOMS" door beside it after asking if they opened the dragon door.
* Wandering Witch: The Journey of Elaina is like this. Both have stated that they love her, while she has shown no romantic interest in either. At most she'll give a bemused or slightly disturbed reaction to their individual advances, but largely she tries to brush them aside or ignore them. Saya and Amnesia, meanwhile, don't get along very well due to their respective attractions to the eponymous wandering witch.
* Wander is a guy that is always there to cheer and help everybody that he comes across, but in season 2's "The Wanders" we find out that he does this because he knows what it's like to be afraid, sad and hopeless himself.
* Wanderjahr" or year abroad between finishing school and the rest of their lives. They were supposed to soak up culture, usually in Italy or Greece. The "Gap Year" is the closest modern equivalent.
* Wanderland had initially scrapped plans for a release in her home country when the single “Young, Fresh, ‘n New” failed to chart and doubted the album’s commercial potential.
* Wander over Foster's AU One-Shot and only Bloo realizes that he isn't.
* Wander over Foster's AU One-Shot. At Foster's, imaginary friend's pasts aren't often dwelled on. It's considered rude to question someone on why they're at Foster's.
* Wander over Foster's AU One-Shot. Being away from Sylvia takes a toll on the Wander, but he doesn't completely break from sorrow. He instead becomes friends with others at Foster's.
* Wander over Foster's AU One-Shot): Bloo's "investor disguise" consists of his typical enormous coat and sunglasses.
* Wander over Foster's AU One-Shot, Bloo thinks that Wander is an alien spy sent to Foster's in order take back information to alien invaders. While Wander is an

alien, he isn't a spy. He had an accident and became stuck on Earth without a way back to his friend Sylvia.
* Wander over Foster's AU One-Shot. Bloo thinks that Wander is an alien spy sent to teach his invader comrades about Earth, but he isn't. Wander is just a benevolent alien who is stuck on Earth.
* Wander over Foster's AU One-Shot): This is Wander's reply to Frankie's concern over him. He has enough injuries to be covered in bandages, but he says it's "just a scratch".
* Wander over Foster's AU One-Shot): Wander and Wilt's similarly polite natures make them easy friends.
* Wander over Foster's AU One-Shot. Wander is an alien, but no one but Bloo believes him. They just think he's an abandoned imaginary friend who thinks he's an alien.
* Wander over Yonder a few times. For example, when Lord Hater gets hit with his own giant bottle-like laser in "The Birthday Boy", it has no fatal effects and he is left charred and burnt, with his jaw hanging loose.
* Wander over Yonder aliens and eyeball-for-a-head aliens somehow eating and speaking.
* Wander over Yonder, a living skeleton who can shoot lightning and punch someone with enough force to send through a planet, wears high-tops, hidden by that black-and-red cloak he wears. They're even lampshaded by Wander on at least one encounter.
* Wander over Yonder, and it livens the genre up with threatening and booming drumbeats during more intense moments.
* Wander over Yonder, and Lord Hater has a variant with sickly green sockets.
* Wander over Yonder and Lord Hater's singleminded obsession with destroying him, causing dozens of other villains to come out of the woodwork to compete for power.
* Wander over Yonder, an evil queen invites villains from across the cosmos in hopes of finding potential heir for her space armada. However, when Lord Hater triumphs over the competition she grabs him and reveals that she really just wanted a new host as her current body was wearing out. Interference from Wander leaves her spirit trapped in a sandwich. In the second season, we see that the spirit renamed itself to "Sourdough the Evil Sandwich" and is trying to conquer the universe like Hater is.
* Wander over Yonder are adorned in these colors as well as a bit of yellow.
* Wander over Yonder are small enough for buildings, mountains, and other features around that size area to be visible from space.
* Wander over Yonder as a buddy, despite the fact he's clear to be the villain. His partner Sylvia is well-aware, and constantly tries to show the truth.
* Wander over Yonder, but a small and passionate part of the fandom continues to fight on.
* Wander over Yonder by showing the planet the episode takes place on at the beginning, before zooming in to the action.
* Wander over Yonder can party as hard as he can. While he's taking it deadly seriously, Wander treats it like the most fun ever, and easily wins both the contest and the adoration of the crowd.
* Wander over Yonder confront a monster called the Troll, who feeds off of negativity. He constantly insults and taunts Prince Cashmere's goat army, and he gets bigger and stronger every time he gets a rise out of them. How do the heroes defeat him? By ignoring him. Once they stop reacting to the Troll's jeers, the Troll loses his power and shrinks into nothing.
* Wander over Yonder does this on Lord Hater's ship in the episode "The Prisoner".
* Wander over Yonder ends with things returning to normal after Lord Dominator's defeat; Wander and Sylvia set off to explore the rejuvenated galaxy while Lord Hater renews his vow to conquer it.
* Wander over Yonder episode had a fast-paced, high-energy song "Your Happy Birthday Song," Wander performed for Lord Hater.
* Wander over Yonder episodes "The Gift" and "The Gift 2: The Giftening" tell the same story, the former being told from Wander and Sylvia's perspective, the latter

from Lord Hater and Commander Peepers. Funnily enough, "The Gift 2" was broadcast before "The Gift".
* Wander over Yonder episode "The Bad Neighbors" essentially had Emperor Awesome be Lord Hater's variant of this trope while retreating on a planet known as "Suburbion 5" complete with a laugh track every line.
* Wander over Yonder episode "The Bad Neighbors", Lord Hater and Commander Peepers are hiding out in a suburban cul-de-sac while plotting how to stop Lord Dominator's rampage across the galaxy, and Peepers accuses his boss of getting side-tracked by a rivalry with Emperor Awesome (who just so happens to be living across the way from them).
* Wander over Yonder episode "The Bad Neighbors", Lord Hater and Emperor Awesome are living next door to each other while hiding from Lord Dominator. Awesome plays his music too loud, so Hater blasts his stereo even louder. The two keep turning the volume even more, until Awesome turns his speakers up to infinity, causing Hater's speakers to explode.
* Wander over Yonder episode "The Cool Guy", Lord Hater relishes the chance to hang out with Emperor Awesome, but when Awesome starts picking on Commander Peepers, Hater eventually decides he's had enough and rushes to the Commander's defense, shouting "NO ONE PICKS ON PEEPERS BUT ME!!"
* Wander over Yonder episode "The Date", when Lord Hater becomes angry enough to blow up a planet after being stood up on a dinner date, Sylvia must act as a substitute date to calm his temper. She passes herself off as a woman named "Linguini von Breadstick", based on foods the waiters just happen to be bringing by.
* Wander over Yonder episode "The Fancy Party", Lord Hater attempts to impress a wealthy socialite to inherit her fortune before she dies. He succeeds, only for it to turn out that she's actually the host of a demonic entity that claims a new host every millennium and wants to make Hater its newest host. It transfers to Hater, who starts choking on it, but Wander gives him the Heimlich maneuver and transfers the entity to a sandwich, where it remains for the rest of the series.
* Wander over Yonder episode "The Fugitives", Sylvia points out a garbage barge will be leaving the planet she and Wander are on in "precisely three minutes." Exactly three minutes after she says that, she and Wander are tossed onto the barge as it is leaving.
* Wander over Yonder episode, "The Little Guy", Wander, Sylvia and Wesley do this to hide from Lord Hater, with Wesley on top, Wander in the middle, and Sylvia on the bottom.
* Wander over Yonder episode "The Party Poopers" was filled with as many subtle references to toilet humor as the censors would allow. One of these references was a picture of the astrological symbol of Uranus appearing on a wall alongside pictures of euphemisms for butt-related stuff.
* Wander over Yonder episode "The Sky Guy", Wander discovers a tiny planet full of miniature people in a wizard's shop, and accidentally inspires them to start worshiping him.
* Wander over Yonder episode, Wander and Sylvia have one that says "Wanted: For making Lord Hater look totally stupid!!! And other punishable-by-death type stuff."
* Wander over Yonder features this trope heavily in "The Axe." It is seen most notably when Hater tells Commander Peepers that they've been through a lot together. Peepers agrees and just a moment passes before Lord Hater asks him to keep the pictures but crop himself out of them. The ending subverts the trope. Having realized how much he needs Commander Peepers and given him the best apology he could muster, Lord Hater commissions a statue of Commander Peepers and places it right next to his own on their latest conquered planet.
* Wander over Yonder feels the need to help out aliens he meets on all the planets he and Sylvia visit. This turns out to cause trouble in a few episodes:
* Wander over Yonder for their actions for things to finally start settling down.
* Wander over Yonder get fired by his boss, Lord Hater. Without Peepers to help manage his army, Hater's planets are easily reconquered by Sourdough the Evil Sandwich. It is only when Hater rehires Peepers that everything goes back to the

way it was before.
* Wander over Yonder had the Robomechabotatron; which Wander, Sylvia, Lord Hater and Commander Peepers had to work together to operate to try to take down Lord Dominator (whose spaceship could also transform into one). It went about as well as you expect...
* Wander over Yonder, hamminess can be found everywhere in this galaxy.
* Wander over Yonder has a large number of episodes where either Wander and Sylvia or Hater and Peepers do not appear. These episodes are usually either about Hater and Peepers doing something on their ship or Wander and Sylvia on an adventure irrelevant to Hater.
* Wander over Yonder has a thing for crawling onto the ceiling and dripping metal-corroding acid. None ever actually hits Wander or Sylvia, but they do get many close calls.
* Wander over Yonder has special stingers every episode which consist of an animatic showing a scene that didn't make it into the finished episode, either an extended version of a specific scene or a completely original scene.
* Wander over Yonder, he is later shown to be rather lackluster at anything that doesn't involve villainy. After his second appearance, he ends up giving up on villainy and tries his hand at a number of odd jobs. However, everyone (besides Wander) still fears him.
* Wander over Yonder in an episode entitled "The Cartoon" The Watchdogs explicitly stated that they didn't include Hater's fight with Awesome in the cartoon they made because their budget was used up on the fight scene with them in it.
* Wander over Yonder, including misplaced cels and clumsily reused animation cycles.
* Wander over Yonder, including the main duo, Wander and Sylvia, who only wear accessories that don't really cover anything. Lord Hater, Commander Peepers, and the watchdogs are far more modest though.
* Wander over Yonder: In "The Prisoner", Wander starts a food fight in Lord Hater's ship's food court. However, after he yells "Food fight!", he remains perfectly still while the other Watchdogs continue the fight.
* Wander over Yonder in this episode, and when Sylvia pays there's one that reads "The Overpriced Lunch".
* Wander over Yonder introduces in Season 1 Janet, a sentient planet, and in Season 2, Lord Dominator, who wants to destroy every single planet in the galaxy for fun. By the season finale, only one planet remained, and it isn't Janet. However, while one of the people who worked on the show implied that she died, another one said that she and her moon were actually away on their honeymoon.
* Wander over Yonder inverts this in "The Tourist"; the pair meets Trudi Traveler, who is more well-traveled in the universe than Wander, and awakens in the fuzzy alien a competitive urge to see the most of the universe. Once Wander realizes that the competition is taking the joy out of the travel, he gives up. And we discover that Trudi is one of several dozen little old Trudi Traveler aliens who only beat Wander because they cheated, and he never knew.
* Wander over Yonder is nicknamed 'The Time Bomb' in the episode of the same name due to her competitiveness and "explosive" temper costing her the race all the previous times she's entered the Galactic Conjunction 6000.
* Wander over Yonder. It quickly becomes apparent that he doesn't want to be "it" either and is willing to full-on battle Lord Hater to prevent it from happening.
* Wander over Yonder. Lesser villains, such as Lord Hater and Emperor Awesome, are not above destroying a few planets for fun or to make a point, but they want to keep the galaxy intact so they'll have something to conquer.
* Wander over Yonder: Lord Dominator, as such she's described by the series creator as a better hater than Lord Hater.
* Wander over Yonder, Lord Hater's skull-shaped spaceship is barely bigger than a two-storey house on the outside, yet it contains his entire army, a dungeon, a mall, and lots of other rooms.
* Wander over Yonder named Baby Cakes while she brainwashes people who watch her cute videos into giving her their money.

* Wander over Yonder. Once the wish ends, Wander resumes right where he left off: "—'cause a silly photo shows you're havin' fun."
* Wander over Yonder on the sun that threw off his astrological chart.
* Wander over Yonder. See "The Egg", "The Pet", and "The Day" for examples.
* Wander over Yonder shooting at the protagonists and yelling at them to stop singing. The cold tag depicts her singing the song intermittently as she goes about her day.
* Wander over Yonder shorts airing between the first and second seasons, Lord Hater has finally captured Wander and has him shackled while he plans to broadcast his execution live. However, Wander is able to slip out easily, which annoys Hater to no end.
* Wander over Yonder so she can have Wander to herself. She later falls in love with her moon, who has a mustache and a French accent.
* Wander over Yonder's sadism home by having her plan (and very nearly execute onscreen) a horrific death for Sylvia: namely impaling her with the massive drill she uses to destroy planets.
* Wander over Yonder: Sylvia does one in "The Stray" when she sees Wander's not with her.
* Wander over Yonder tends to be a nice furry orange creature, and generally doesn't set out for taking antagonists down in return for a perceived slight — but a lot of his antics come out this way anyway. However, in "The Waste of Time", he's revealed to know exactly what he's doing, because he's been practicing for thousands of years.
* Wander over Yonder that, due to resisting the temptation to open the box, drove Wander insane. She makes the aliens put some junk in the box, which Wander is satisfied with.
* Wander over Yonder that he's not faking his friendship and kindness — he's just naturally kind and friendly to virtually everyone, even his enemies.
* Wander over Yonder that this reduces the planet to a barren wasteland.
* Wander over Yonder: The clerk at the gas station convenience store in "The Nice Guy" is a snarky teenager who does his best to ignore Wander's goofy antics trying to get Sylvia a drink.
* Wander over Yonder The episode "The Family Reunion" has her visiting home where her mother reprimands her for swearing, making it clear that terms like "grop" and "narfin' froods" are indeed curse words in this universe.
* Wander over Yonder, "The Gift", a gift (which Wander was in it) bounces on Sylvia's stomach.
* Wander over Yonder: "The Little Guy" shows just how empty someone's life is when they buy into hateful propaganda, especially if they aren't a hateful person. Wesley is constantly abused by his fellow Watchdogs, for example by being the victim of physical assault, being forced into the back of an audience he can't see over, and getting left behind by Lord Hater's ship when tracking Wander. After finding Wander, Wesley is so paranoid thanks to Hater's demonization of Wander that he ends up unable to appreciate their genuine kindness, nearly attacking Wander and Sylvia when they cook a meal to share and only taking a chance when he realizes just how hungry he's gotten. Only after spending some time learning that Wander and Sylvia aren't at all like Hater's propaganda made them out to be does Wesley find genuine happiness and something he can believe in, ultimately staging their capture and faking his own death to free them so he can go his own way and follow Wander's example in kindness.
* Wander over Yonder the slightly racier punchline "Blaster? I hardly know her!"):
* Wander over Yonder: The titular character suffers stress from being prevented from helping, or from his curiosity being denied but doing so actually clears it up. The stress takes the form of his eyes changing color, pupils changing size, his fur getting frizzy and brittle, and patches appearing on his hat.
* Wander over Yonder (the voice of Emperor Awesome) did the show's voice direction and wrote 3 episodes.
* Wander over Yonder. This often gets him into deep trouble with Sylvia having to bail him out at the last moment.

* Wander over Yonder, this trope is parodied when Wander and Sylvia fall offscreen with the egg they're trying to protect, and a whistling sound is heard...then the camera pans down to show that they landed on a ledge, and Wander was actually whistling.
* Wander over Yonder, though also a professional voice actor himself) doing scratch work on how the character should sound like. He ended up keeping the role when the former wasn't available in time, with Arnett going on to later voice a different character instead). However, this allowed Emperor Awesome to be a recurring character instead of a one-shot.
* Wander over Yonder to a more story-heavy format, giving it a more serious tone and major plot points that carry from one episode to the next.
* Wander over Yonder to the clunky automaton soldiers of elderly super-villain Mandrake the Malfeasant.
* Wander over Yonder trope. How well characters fare in outer space range from nearly dying to doing perfectly fine despite there being no atmosphere. It really all depends upon what best suits the plot at the moment.
* Wander over Yonder try to get rid of each other because their temporary houses are right across from each other.
* Wander over Yonder, various villains and their armies of mooks have a massive fight over what they think is a Ring of Invincibility but is really just a blorpberry-flavored candy ring.
* Wander over Yonder: Wander. As an eternal optimist who sees the good in everyone, Wander will stop at nothing to help even the cruelest of villains find their way onto the path of good. However, he unable to reform Lord Hater, and by a bigger expense, Lord Dominator.
* Wander over Yonder. Wander figures that the way to defeat him is to ignore him, which causes him to shrink down.
* Wander over Yonder", Wander is jumping on a waterbed, with it bursting afterwards.
* Wander over Yonder Wander is stranded on the planet without his banjo or anything else. He even sums it up by saying "No hat, No Wander!" Demonstrating how handy it really is.
* Wander over Yonder. When Commander Peepers comes looking for Hater, Wander reluctantly lets him go back to the Skullship, saying he's learned "True friendship comes from the heart, not an electric squid to the face."
* Wander over Yonder, when she thinks Wander was eaten by the alien (when it was really a teddy bear Wander gave it).
* Wander over Yonder when they try to invade a planet. When Hater gets knocked out and wakes up in the Skullship's infirmary, he assumes the whole thing was a crazy dream.
* Wander over Yonder: While more of Sylvia's species is seen (and she's well established to be a Zbornak) and Commander Peepers is obviously a Watchdog, Lord Hater and just as interestingly Wander himself are as best we know it the only ones of their kinds.
* Wander over Yonder", who happen to have hiney-shaped heads, and their dialogue is peppered with hiney- and poop-related puns. Sylvia insists that she and Wander need to act serious and respectful toward them, whereas Wander struggles really hard to hold back his laughter.
* Wander over Yonder, who he can't get through to, but this doesn't diminish his spirit.
* Wander over Yonder, who starts a conversation with the disguised Wander, forcing her to puppet him like a ventriloquist's dummy.
* Wander over Yonder, who voiced Emperor Awesome and voice directed the show, wrote 3 episodes ("The Bad Hatter", "The Bad Neighbors", and "The Robomechabotatron").
* Wander over Yonder without it ever being framed as romantic by the show.
* Wander over Yonder with Wander and Sylvia, including a re-make of the intro that includes Hater. This includes Hater staring up in shock and dismay when he sees the Skullship.
* wanders off to help people. Fortunately, in the end, all the people Wander helped

pay him back by helping him and Sylvia escape.
* Wandersong, as well as providing the player with a level select, so they can easily access previous acts.
* Wandersong feature. As you go throughout the areas, little glowing orbs appear that spout off trivia about the area and development process.
* Wandersong into singing at a thousand miles an hour, shaking the entire room and sending everyone in it flying. Afterwards, they are implied to have slept for hours after the resulting caffeine crash.
* Wandersong protagonist has had enough of her self-centered mass-murdering ways.
* Wandmakers, like Mr. Ollivander, sell wands and nothing else. Justified as each wand must fit its owner, much like a shoe or clothing store. Wands are also major purchases, as a wand does not appear to ever 'wear out', and since they are central to a wizard's power, it is worth buying the highest quality you can afford. A wand store is basically a place that sells a product that must fit like a suit and and important as a home.
* Wand of Wonder in later editions)— a magic item whose effect is randomly determined from a table of 50 or so possibilities each time it's activated. Possible effects range from shooting fireballs to turning a random combatant into a rhinoceros, and a popular pasttime on the game's official forums is coming up with new and even more bizarre effects for the item.
* Wan Fu, a gigantic Chinese royal who believes the path of the sword is "Possessing absolute power to crush his enemies." His character bio states he can kill a tiger in under three seconds, and that he insists he has no flaws and idolizes no one.
* Wangan Midnight, after the player has completed Story Mode, fully tuning their car, they can go through Story Mode again with their fully-tuned vehicle, with perks varying from game to game:
* Wangan Midnight and the game will say "SUDDEEN KILL" on the results screen.
* Wangan Midnight and took many of its drivers' lives, prompting Jun Kitami to fix it up. This trope was mostly put to the backburner, though.
* Wangan Midnight arcade games have manual transmission controls (with a six speed shifter and slotted gate), but no clutch (though fully automatic is an option).
* Wangan Midnight arc). The year allows for cars that were previously nonexistent to be introduced in later chapters of the manga without forcing the story to advance years at a time. After all, how else can you make a Skyline GT-R R34, which started production in 1999, appear in the manga without making everyone age seven years?
* Wangan Midnight blocks of text, he has the gall to say them NEAR THE END OF THE STAGE, making you more likely to lose.
* Wangan Midnight expands the capacity to 200 cars and allows players to use their own "discards" (partially tuned copies of a fully tuned car, which formerly could only be given to other players), increasing the scope of alt-itis even further.
* Wangan Midnight finally uses the Porsche brand, due to the expiring exclusivity deal.
* Wangan Midnight has a secret code that allows one to select the Toyota Celsior, also known as the Lexus LS 400 in North America. While the car itself isn't a joke at 250 stock horsepower, it's a luxury car and not a racing car, and its basic tuning has useless "ricer" parts and comments such as "Chrome tails confuse the enemy!"
* Wangan Midnight has Tatsuya Shima, the driver of the legendary "Blackbird". Despite being one of the best race drivers on the Wangan expressway, he will pull out of a race if he feels that his vehicle is in danger of a breakdown.
* Wangan Midnight km" and "___ m till goal / rival crosses finish" displays), and all turn and hazard alerts are replaced with a catch-all "!" alert.
* Wangan Midnight Maximum Tune are set in C1, Hakone or Osaka. In the opposite direction, almost no one choose Yokohane, Wangan or Yokohama, especially the latter.
* Wangan Midnight requiring you to reinsert credits to play again). This is very useful, because there are rewards for completing cycles of Story Mode with no

losses.
* Wangan Midnight's Story Mode chapter 79, featuring Tatsuya and Koichi racing against each other, ends with "TO BE CONTINUED" rather than the usual results screen. They pick up where they left off in chapter 80.
* Wangan Midnight stages, in a game that asks you to insert more credits after every stage. Once you hit full-tune, the "real" game opens up and you can start racing seriously with other players whether in real-time VS matches or in Ghost Battle mode and try your hand at Time Attack.
* Wangan Midnight, the daughter of RGO shop owner Kazuo Ota. She could dismantle and rebuilt a whole engine by herself down to the crankshaft, and is in fact slated to inherit her father's shop..
* Wangan Midnight, the player can earn "dress-up" parts through winning Ghost Battles to change the visual appearance of their car (spoilers, decals, tires, neon lights, etc.). As stated on official pages and in operator manuals, these changes are purely cosmetic. Despite this, there are players who, after 10 years of the dress-up system being in existence, still insist that dress-up parts influence vehicle performance in some way.
* Wangan Midnight, you get special titles for defeating a player with a long-enough win streak.
* Wang De Sheng Yan AKA The Last Supper, portraying the rise to power of Gaozu, the first Han emperor, and his last days.
* Wang De Sheng Yan's Liu Bang/Emperor Gaozu is a frequent womanizer, to the lament of his wife Lü Zhi. No wonder she turns somewhat sour with time...
* Wang Film Productions - Largest Taiwanese (if not overseas) animation studio, have done some work on anime and worked with several of the other studios listed here.
* Wang, from the French author Pierre Bordage, Western nations use third world populations to play massive wargames with live subjects. The combat is transmitted on TV. The two players are located above the battleground, can see what their troops see, and direct/order their commander who then relays commands to the rest of the army. Weapons and communications depend on the historical setting.
* Wang Jingwei. Nowadays, Wang is seen as a pitiable, naive fool within China these days, rather than a despicable coward.
* Wangst by design. The Cybermen, while organic underneath, have had their emotions and feeling removed because of the constant horrific and intense pain their existence entails. It could literally be seen as putting them out of their misery.
* Wangst: Endlessly complaining about minor things makes you immature.
* wangst if she gets close to him, or the very real consequences that come with becoming a vampire. Uncontrollable hunger for blood? Loss of human emotions? Who cares? All she wants is to be with Edward forever! (It turns out that she doesn't suffer from the drawbacks of becoming a vampire... for some reason.) She also has a grand total of maybe one or two misgivings about leaving her human family to be with Edward. Considering how she's set up as a loving, sweet daughter who is her mother's best friend and her father's only hope for normalcy, it seems odd that she's willing to live forever without them after they die a mere month or two after meeting Edward. Then again, it quickly becomes evident that she lies to and patronizes her mother every chance she gets.
* Wang the Perverted. Since the same actor portrayed both characters, with no attempt to hide his voice, it's obvious to everyone who watches.
* Wang Wang and Funi had a lot of double-entendres both intentional and unintentional with the newscasters losing it, including a totally new definition for "Eats, shoots, and leaves."

* Wano flashbacks show Kozuki Oden meeting his future wife Toki, but Oda notably skims over the falling in love part and naughty bits until their children are born.
* Wano is shown as being utterly isolated. While Kaido and his lackeys do have access to Transponder Snails, it is rather doubtful that ordinary citizens do as well. And even if they did, even speaking against Kaido gets you kidnapped by his Mooks. He probably has outlawed listening to the SBS.

* "Want Ads", first popularized by Honey Cone and later covered by Taylor Dayne. "Extra, extra, read all about it / Wanted: Young man, single and free"
* Want a good way to be scared of this universe? Consider that the standard-issue lasgun has more firepower than most conventional modern ballistic weapons, and standard-issue flak armour can stop a lasgun shot
* want all Charr dead), it's better to have them weaken each other than have the Legions face two enemies at once on top of their recurring ghost problem.
* Want a quicker game? You can turn off all the presentation flairs like camera cutaways and even the AI delay between pitches.
* Want a simpler 16-bit style approach to hitting, fielding, and pitching over the modern day meters and mechanics? There are independent options to turn each of those into an old-school aim-and-press-X mechanic.
* want, because they're too emotionally distressed to find their way out. Virgil has to coach Thomas on calming himself down so everyone can leave.
* want Dresden, and if any muggle were to acknowledge the reality, they'd feel they'd have to kill him preemptively.
* Wanted. Afterwards, he brands his initials onto the back of the family member's necks so that they will never forget what he did to them.
* Wanted: A Gender-Conforming Child: A character wishes their daughter were more feminine or their son were more masculine.
* Wanted: A Gender-Conforming Child: A tomboy's parents want her to be more feminine.
* Wanted: A Gender-Conforming Child: Parents take issue with their son or daughter not conforming to traditional gender stereotypes.
* wanted and also remembering Hendrick's fate, refuses (much to the officers' relief).
* "wanted a nicer car". Not only that, but he blew the cover of a high-ranking KGB agent, Oleg Gordievsky, who was secretly working for the British, who barely managed to escape across the Finnish border in the trunk of a car, and who still

lives in hiding under an assumed name.
* wanted a pet fox as a child... But Vorpika thinks she was checking her ass.
* Wanted a Son Instead: A baby is born one sex when the parents wanted one of the other sex.
* Wanted a Son Instead: A parent is upset that they have a daughter instead of a son.
* Wanted", as well as his youthful ward. He drops them in a vat of acid for added faithfulness to the source material.
* Wanted at his victim. Aswell as always being depicted firing away with a gun in each hand while performing all sorts of acrobatics. And he later displays his Vaporizer skills by laying waste to his enemies with a Gatling gun. Justified in that his marksmanship abilities are actually a genetic ability that he inherited from his father, who was known as the greatest supervillain who ever lived.
* Wanted, but also has the intelligence of a very slow child. When Sucker steals his powers, he initially expects to get super-strength and durability, and maybe flight. He is astounded to discover that Fuckwit also had various enhanced senses, which ends up being his downfall; he spends so much time enjoying Fuckwit's powers that he forgets that his own powers only last for 24 hours per victim, causing him to fall to his death in mid-flight.
* Wanted", Cardinal Mazarin orders Jacqueline's father killed; she kills the henchman in revenge, and spends the rest of the series disguised as a man in order to avoid capture and hopefully get revenge against Mazarin.
* Wanted: Dead or Alive: In "Dead End", Josh is holding a Mexican cowhand he suspected of attempting to bushwhack him at gunpoint. The Mexican pulls a hidden knife and throws it at Josh. The knife goes over his shoulder and impales the rattlesnake slithering on the log behind him.
* Wanted: Dead or Alive: In "The Bounty", a ruthless bounty hunter, feared for the speed of his shooting, is pursued by a band of Apache seeking for an old man he had killed. Rather than killing him, they cut off his right thumb, removing his ability to cock a hammer one-handed and thus destroying his speed as a gunslinger.
* Wanted: Dead or Alive: In "The Martin Poster", Andy Martin escapes from Josh by jumping through a closed window and running off with no cuts, abrrasions, bruises or any other damage.
* Wanted: Dead or Alive: In "The Martin Poster", Andy Martin shoots the doctor who has just saved his brother's life in the back as he walks away, so as to leave no witnesses.
* Wanted Dead Or Alive who killed his best friend and his girlfriend, back to his employers with a grenade jammed in his mouth. He's being paid a bonus to bring the guy in alive, but ultimately decides "Fuck the bonus," just before pulling the pin and leaving him to die an explosive death.
* wanted enemy aircraft to find them, so the enemy would engage and be destroyed.
* Wanted for murder and a picture of the hobo. The woman took the newspaper to a female police officer and showed... that there was a 50% sale at a Norwegian shoe chain, as written a bit down on the first page.
* Wanted gives him crap, and he realizes he could take Fox up on her offer. He walks out, showing the first inkling of being a badass. The transformation continues into the movie.
* Wanted goes on a shooting spree in a police station like some unstoppable Terminator-supervillain because he was bored.
* Wanted have superheroes who can choose to intervene — Fraternity members do occasionally raid those other universes, but they're very careful to cover their tracks. The Masquerade becomes a major plot point, as the Fraternity is divided on whether to maintain it or drop it and rule openly.
* wanted him alive. Unable to get the old man's attention (he was solving a geometrical problem on a sand table), the soldier got angry and eventually killed him. Archimedes' last words? "Do not disturb my circles!"
* wanted (ie ones that showed Spider-Man as a criminal), regardless of how deceptive they were, and was not above blackmailing people with his photos if he thought he could get away with it. Spidey once commented that whoever said the

camera never lies had never met Nick.
* Wanted is having a secret affair with Deadly Nightshade. His boss doesn't want him doing this incase he accidentally undoes reality while in the throes of passion.
* Wanted jumped to other dimensions with the specific purpose of stealing things (such as an irradiated condom) and killing superheroes. While they were there they felt perfectly free to trash other realities to make their own go the way they wanted (of course, as supervillains they would have no such compunctions).
* Wanted killed him. This has left him with his teeth gruesomely exposed in what seems like a permanent grin, hence his name.
* wanted man (him) being in the room. He calls for everyone to wake up and Karol mutters "Not too much milk on my cereal. It'll get soggy."
* Wanted military training programs; primarily it builds up a person's ability to handle pain and exhaustion, but it also builds up a lot of repressed anger.
* Wanted: Mr. Rictus and The Future, the supervillain leaders of respectively the Australian and European Fraternity chapters, team up to take over the Fraternity together.
* Wanted of allied supervillains who exterminated all superheroes on Earth in 1986, and keep the world under a delusion that they never existed, as well as covering up all the horrible crimes supervillains can now commit for fun.
* Wanted (playing Fox, but really playing herself) transform him into an expert assassin.
* "Wanted!" Poster: A mass-produced document depicting images and information about a fugitive criminal wanted by the law, detailing their crimes and often promising rewards for anyone who willingly assists in their capture.
* "Wanted!" Poster). Heck even Vivi got one during her tenure with the Straw Hats.
* "Wanted!" Poster of her, one of them reading the text out loud to the others. The description mentioned her illiteracy, so she grabbed a book and pretended to read, which kept them from spotting her.
* "Wanted!" Poster was less effective than it is usually played to be; criminals on the run were often chased by former acquaintances, the only people who could recognize them.
* Wanted procreate, but his offspring don't inherit his immortality, given that he's shown attending the deathbed of one of his sons.
* Wanted so he could satisfy every sadistic whim he ever had and just commit murder and other atrocities on a daily basis since there would be no ultimate punishment for his sins in death. Of course, getting horrifically disfigured in the process of that aforementioned accident probably didn't help.
* Wanted superpower is being unnaturally good at dealing death. While this would be unworkable in an ongoing comic, it's mighty good in a miniseries.
* wanted the bomb to go off. Chuck figured this out in time and did the opposite of what he said, disarming the bomb.
* wanted the daycare center placed on the second floor, visible to anyone who passed by, in the hopes that seeing the innocent, adorable children playing might deter anyone looking to harm. As we all know, it didn't.
* Wanted, the Empire State Building is actually the machine that The Fraternity used to warp reality.
* Wanted, the Fox recounts to Wesley that the first supervillains (at least, in the sense that they were criminals with a gimmick) were a gang of robbers who committed their crimes naked so that the people they robbed would be too distracted by their nudity to identify them. Superheroes were also too afraid to do anything about them due to how inherently uncomfortable it is to fight a bunch of naked men. When Wesley asks how the crooks were eventually thwarted, the Fox simply answers "closed-circuit television", to which Wesley quips explains everything.
* Wanted: The Fox used to be the lover of Wesley Gibson's father before his death. She subsequently becomes Wesley's new lover.
* Wanted, The Fraternity occasionally makes raids on a futuristic universe called Parallel-2 where people can be paid to have advertisements put on their teeth.
* Wanted: The immortal African supervillain Adam One (who looks about middle-aged)

is briefly seen spending time at his oldest son's deathbed along with his other non-immortal descendants.
* Wanted. The villain does remember he can fly but forgets that the power is seconds away from running out.
* Wanted this happens where Wesley must shoot the wings off of flies or Fox will blow his brains out.
* wanted to create new Primarchs, they cannot. Much of the knowledge of how the Primarchs were created was never recorded by the Emperor, and the Emperor himself was the source of the genetic material. In his current state on the Golden Throne, he's in no condition to donate said genetic material. There have also been hints that the Emperor used the power of the Warp itself to create the Primarchs, meaning they are more than simply products of genetic engineering. Finally, the blueprints for the Immortis Gland that is in the Primarchs were partially lost. What was left of the knowledge was used to create The Magnificat that supercharges the Primaris Marines.
* wanted to get control of Russia's nuclear arsenal from the President, but was unable to extract it from him before he was rescued.
* wanted to know what advancements his society had made, then was disappointed when the answer was basically 'none'.
* wanted to win the Tournament so badly she purposely killed Penny. Some civilians also blame her for kickstarting the fall of Beacon It's so bad the passengers on the airship get the crew to kick Pyrrha off, much to RNJR and the nations' disgust. Pyrrha wears a hoodie in an attempt to stop people from recognizing her due to this.
* Wanted: Weapons of Fate. Wesley finds this absurd and doesn't think the problem is self-fulfilling prophecy so much as members of the Fraternity having serious problems with common sense and a lack thereof.
* Wanted, Wesley calls Shit-Head "Fuckface", but Shit-Head thinks that Wesley is getting him mixed up with Fuckwit.
* Wanted, Wesley is regularly stabbed and beaten to a bloody pulp, but the Fraternity has these special baths that allow for rapid healing, and so after a good soak, he's barely worse for wear.
* Wanted, Wesley's conversation with his boss after meeting The Fraternity:
* Wanted, Wesley's father faked his own death so he could set his son on the path to succeeding him and becoming one of the most powerful supervillains in the world.
* Wanted, Wesley shoots a guy in the head, jams a looted revolver through the hole, and fires through it, while carrying the body along to soak up rounds.
* Wanted, when The Fraternity altered reality turned the superheroes into actors who played them in movies and TV shows. Superhero comics and movies are still being made by people who subconsciously remember the heroes.
* Wanted, whose job is to assassinate those decided by fate to prevent a more horrible event from occurring.
* wanting and making her hand in marriage a term of its return. These attempts are inevitably foiled, often with the help of Loki's guile.
* Wanting Is Better Than Having: Once you've gotten all that you've wanted, life becomes boring and unrewarding.
* wanting Konoha to kill Sasuke. So that Sakura and Ino won't go out to avenge him if the Cloud ninja kill him, which would result in them being killed and avenged by their loved ones, creating a vicious cycle that would lead to war.
* wanting, not to mention incapable of understanding why the truth might hurt someone.
* Wanting to approach birds without being noticed by them, Garfield glued some feathers on him and put on some swim fins. He ended up being chased by other cats.
* "Wanting to Be Wanted", replaced by "Somebody, Somewhere". The orchestral cry of anguish that punctuates "Please Let Me Tell You" is based on its tune.
* "wanting to end the series, but constantly being roped in for another go.". He's also gone on record saying that he receives death threats every time he announces that he's ending the Metal Gear series, and no one really knows if that's true.
* Wanting to kill his leader in order to become leader himself, Tigerclaw

convinces a group of rogues to attack the camp. During the battle, he attacks Bluestar, hoping to make it look like a rogue had killed her.
* want is to be treated as "of the people" by humanity, to share in the exploration and colonization of the galaxy as equals.
* Wanton Cruelty to the Common Comma (The examples, are Self Demonstrating, not the description).
* Wanton Cruelty to the Common Comma: The misuse of punctuation marks.
* want previously trying to kill him under Wolfram & Hart's employ), but Angel doesn't buy it for a second and accuses her of only coming for vengeance; Buffy doesn't even try to deny that.
* Wants a Prize for Basic Decency: A character expects to be rewarded for living up to minimal standards of civilized conduct.
* Wants a Prize for Basic Decency: Demands praise for behaving in a situation like a decent human, disregarding that basic humanity is expected of others by default, rather than something above-and-beyond to be rewarded for.
* Wants a Prize for Basic Decency: Someone demands a reward for a courteous or noble action that everyone does.
* Wants a Prize for Basic Decency: Someone thinks they have high standards, but compared to everyone else's standards, they've only attained the bare minimum.
* Wants a Prize for Basic Decency: You don't get a reward for doing/not doing something you're expected to do/not do in the first place.
* wants grandkids, apparently, even though she has never shown any interest in the subject. This one seems to exist to facilitate Harem fics or make her push Ranma toward whichever girl the writer wants him to end up with.
* wants, having become engaged (and very much attracted) to Princess Nada Naga, but is required to marry Electra due to a curse that will kill her on her sixteenth birthday unless she marries the prince who kissed her awake. His mother vetoes this, saying he must choose one (and subsequently making polygamy illegal, which leads to the setup where Humfrey only has one wife living with him at a time a few books later). She also won't let him just wait out the curse (and Electra dying) and then marry Nada, insisting that he willingly choose one before Electra's time runs out (which will be when he's fifteen). He ends up marrying Electra to abate her curse and realizes that he's fallen in love with her, choosing to stay married to her and putting an end to his initial plan to divorce her once her life is saved and then take Nada as his permanent wife.
* Want someone to bully campers into putting out their fires? Say hello to Smokey Bear! An
* wants responses can imply that Sylvain keeps them up, as their room is directly under his. In the Japanese version, an annoyed Felix calls Sylvain a "sex demon," changed to "insatiable" in the English version.
* wants Sasuke's body with Orochimaru's eyes watching the image, make it so much worse.
* wants to be a normal girl and fears that she'll lose everyone again. While she deals with the former, she never truly gets over the trauma of the latter (which is explicitly shown in the R movie).
* wants to believe in StarClan, but she can't risk getting her hopes dashed again.
* wants to be liked, but hasn't got a lot of social skills; it wasn't a major part of her former job and her size tends to scare off most people she meets.
* wants to be one of these, but the girls won't let her become one. So instead Princess becomes a Kid Villain.
* wants to be this for the female Smuggler, but the Smuggler isn't terribly ladylike. A male Smuggler can try being this for Risha, but she doesn't really buy it.
* wants to do it. Turns out their baby is a fetus, and they are participating in the "Pre-Natal Pretties" pageant.
* wants to do this the other Kingdoms of the West, forcing them to worship Belar as opposed to their own gods (or all of them in the case of the very ecumenical Sendars).
* wants to eradicate all organic life, that better way sometimes includes co-

operating with or at least avoiding fighting against human guerrillas on raids into Zone Mexico).
* wants to fire him, but is unable to because the bosses at the company are idiots who somehow seem to think anything Johnson does is brilliant, even giving him Employee of the Month in one of the ads.
* wants to go to the real world, as this will no longer limit his parameters, and he will be able to write new Programs himself.
* wants to have a relationship with a nice, kind boy. However, she's also a part of Nadine's gang and goes along with them when they bully Ciro.
* wants to marry princess Lala, too bad he doesn't take kindly to rejection.
* wants to obey. She gets the normal reward-response from her system for obeying the order, plus an additional rush because she just really, really wanted to do that anyway. She mentions that in uplifted chimps (a previous iteration of the same project that produced Florence), the same phenomenon resulted in addiction problems.
* wants to scissor Leina, who's well aware of her younger sister's lust for her. As they grew older, Leina began to see her advances as improper and was put-off by it; which was part of the reason she eventually ran away from home. Oddly enough, she still indulges Elina on occasion, such as the 9th episode of season 2, where Leina spent the night spooning with her, in the nude.
* wants to testify against their partner, they are free to do so. Note that this is considerably different from other sorts of legally recognized privileges. In those cases, the party the information is adverse to has the control. Unlike the Marital confidences privilege, the two have to be married at the time, but this privilege also covers things before marriage.
* wants to watch Londo die, but can't actually kill him himself for fear of reprisals against his family. Awkward.
* want superheroes. The only one who could be discovered is Minako, who is incredibly hammy even as a civilian... Except the one time her childhood friend Hikaru met Sailor V she acted meeker than usual, throwing her off course.
* wants...wait for it..."ME WANT HONEYCOMB!"). So it's not desirable...it's inevitable.
* wants, you can capture Reshiram and Zekrom once more, but their capture rates have been reduced to 3 as they're not involved in the story this time around.
* wants you to open the cabinet, the same thing happens if you keep trying to talk to him instead. This is how you get another achievement.
* want them, but it's hard to say whether the potential competition Russell would've given them would be worth the sabotage he'd inflict on his own tribe.
* Want to actually go the whole evil hog and permanently depopulate a town in
* want to believe. It doesn't help that he's got a grudge against the practice thanks to the DL-6 case, where Misty Fey's channeling of his father resulted in an innocent man sent to prison.
* want to be seen as a hero... for rather off reasons. He and his crew don't mind helping people and admire those that do, but they're not that interested in getting good press.
* want to be selfish and arrogant, even if it is to their detriment. They may put on "jerkass/bitch mask" to try to counter it.
* want to be this trope, but they push it so far that it comes off as parody. For instance they're so honor-bound that their prisons are just a line on the ground they tell you not to cross; on more than one occasion the heroes escaped them by just walking away. They also suffer from being so low-tech compared to every other space faring race that they're really only a threat to each other.
* want to blow. There is no cost to using ordinary magic because, unlike dark magic, it isn't doing anything that nature isn't already doing on its own, just directing it.
* want to confess to him (as she's already dating Luka), Alya thinks she means that she's still too intimidated to do it without help.
* Want to destroy a star that obstructs your view of a distant galaxy? Hurl a white dwarf, or better, a neutron star, into your target star and watch how

* want to die in a society where downright suicide is dishonourable themselves in search of their Doom.
* want to do, if they want it badly enough, even if normal biology wouldn't permit it.
* want to fuck him. Salladhor Saan also refuses to rape anyone but has no issues cavorting with prostitutes.
* want to go on, but her family (especially her grandmother) convince her to continue on in Matthew's memory.
* want to go through with a big cheesy reception with all their friends and family partying and celebrating with them.
* want to kill his brother, it's just in their nature to fight as the embodiments of the two halves of Eternia.
* Want to know how to handle impatient hostages you're trying to rescue? Kick the crap of a
* Want to know what some random Youtuber thinks are the top 10 webcomics?
* Want to open an establishment where people can order drinks and play arcade games? If you do, then you better not call it a Barcade, unless you want a nasty letter from the Brooklyn-based
* want to reset civilization (In a Biblical flood sense) because they think the world has gotten too corrupt despite Kalos is not only the most beautiful region, filled with gorgeous scenery, lots and lots of atmospheric cafes filled with friendly people, but also has tons of random people giving the player (A complete stranger) helpful items and advice for no reason other than to be friendly, even the street punks are generally well mannered.
* want to see a movie but are too young and only have one ticket. They then spot a coat rack with a trenchcoat.
* want, where Belkar's beloved housecat eviscerates a first-level character with one slash.
* want with the expectation that it will stay that way) with their spouse while they were married. Even then, the spouse may testify as to such private conversations if the other spouse allows it as well.
* Wan ultimately ends up losing everything she actually loved in her grab for power in
* Wan Wan Celeb Soreyuke! Tetsunoshin, and nowadays it's likely the few remaining fans you'll find for the show are furries.
* Wan Wan Celeb Soreyuke! Tetsunoshin Chin clear off-screen purely out of fear.
* Wanze and Duval. So Gonky that repeated kicks to the face rendered them
* Wanze of Cipher Pol. is a chef who wears googles on his forehead. In an SBS question corner, the author said that they were to prevent him from crying when he chops onions. In response to another reader's statement that onions irritate the nose to cause tears,
* wanzers allow the choice of paradrop insertion or surface assault, and the Cavalry arrive for the last battle via HALO.
* Wapol had all doctors who did not work for him murdered so he could charge ridiculous sums of money for medical treatment, and beat up small children (which would have possibly sparked an international incident) simply because they were in his way.
* Wapol is a short, fat and generally absurdly looking guy (and that's only his appearance, not speaking of his personality) who marries with the One Piece world's equivalent of freakin' Miss Universe
* "WAP" only using sounds of stirring mac and cheese, taking the song's innuendo about "macaroni in a pot" literally.
* Wapsi Square, and, as a result, she often has difficulties remembering details from previous cycles. She often entrusts people with information to help her remember.
* Wapsi Square, Bud and Brandi are able to acquire modern birth certificates and social security numbers despite being immortal clay golems who predate most known civilizations. However, it is made believable in that it was done by Jin, who has been playing political manipulator in multiple countries for over a thousand years

and probably has more than enough contacts to make someone exist (or cease to exist).
* Wapsi Square, Bud the indestructible golem girl has a slight accident with the sidewalk. When she discovers that the hunk who comes to her assistance is actually an ambulance-chasing lawyer she decides to give him his comeuppance.
* Wapsi Square for making her worry due to a little basement debacle. Monica in turn was smart enough to realize that this showed how much Amanda cared about her.
* Wapsi Square gets one of these when he comes up with a way to wake up Monica.
* Wapsi Square had one of these being reversed. He had been turned into a statue using unexplained methods for unexplained reasons, and Monica accidentally released him by reading an incantation. Fortunately, he did not seem to be conscious throughout.
* Wapsi Square had tendencies towards this, partially because her mother died when she was around nine.
* Wapsi Square has a complex save-the-world plot without any antagonistic characters. Instead, the conflict comes from the difficulty in figuring out how to save the world, as well as difficulties in carrying the required plans out. Certain people can't be told certain elements of certain plans, but those people are still working towards saving the world. It's all very confusing.
* Wapsi Square has been running since 2001, has over 2000 strips, and has heavy enough continuity that you can't merely skim read if you want to be able to understand what is going on.
* Wapsi Square has Katherine who is a chimera formed from the fusion of six unborn children. Assuming each had a different father that brings her number of parents to a dozen.
* Wapsi Square has Shelly trapped in some sort of pocket dimension for thousands of years while almost no time passes back home. The experience leaves her nearly catatonic, and it takes time for her to start remembering her life and friends again.
* Wapsi Square. Her motherly exploits include taking responsibility for teaching Bud and Brandi how to be human again, helping Shelly deal with nightmares at 3 am, and breaking up fights between other characters.
* Wapsi Square If you enter it, you come out the other cloth, but you have to be able to teleport on your own to use it. It still does have its uses though.
* Wapsi Square. In 2012, this machine will reset all of time back to when the machine was first activated. Only one immortal character, Jin, retains memories of this event. She has lived about 81,200 years (56 iterations of the loop), living through the same looping time period, trying to fix the machine and end the loop. All the other characters in the comic are known to her, and she has been friends, enemies, maybe even lovers with each of them during the endless cycles of time she has lived through.
* Wapsi Square in a non-military setting. This is done to highlight her over-disciplined nature that is compensation for her criminal past.
* Wapsi Square is an extra-dimensional library that contains every book ever written (but only things that have been written, no audio recordings). It is guarded by a sphinx librarian. It is implied that the Library of Alexandria was a physical manifestation.
* Wapsi Square is reading a book of instructions written by herself from a previous time loop. Pretty much every time some instruction seems absurd to her or she yells at the book, the immediate next line is something in reaction.
* Wapsi Square is remarkably observant, but lacks any social skills, so it makes sense that she would fall into this trope at times.
* Wapsi Square is usually extremely positive and has been known to, in the words of the other characters, "Blow sunshine up your ass," she considers it her duty to be brutally honest with those she considers friends.
* Wapsi Square. It had something to do with an accidental sharing of demons, and it resulted in them being able to communicate telepathically.
* Wapsi Square just like the main character is great evidence for this).
* Wapsi Square, many ancient deities seem to have been this. Most were created by a

far older civilization.
* Wapsi Square: Monica and Shelly are on speaking terms with some very strange and powerful beings who have influenced the destiny of the entire world. In Minneapolis.
* Wapsi Square never wore clothes at home for many years' worth of strips. The first mention of this is when she asks Monica what to wear at a bar they're going to. Monica tells her that she can wear "whatever she wears at home". Katherine replies "But I don't wear anything at home". She starts wearing clothes when she becomes an adoptive mother and has to share her apartment with adolescents. No mention of her previous nudism is ever made.
* Wapsi Square Note that this is not a case of cartoon physics, but rather an indestructible character.
* Wapsi Square puts the world through cycle after cycle, resetting time every time it hits 2012. One character retains her knowledge through all cycles, and has seen over 80,000 years worth of this cycle.
* Wapsi Square. Rather early on, we are introduced to characters who seem to be deities and mythical figures from various cosmologies, but they are all actually remnants of an ancient civilization older than the cosmology in question. One character in particular played the role of multiple deities herself.
* Wapsi Square (she gives up eventually). It's rather hard to explain.
* Wapsi Square shortly after his introduction. He returned later and played an important role in the plot.
* Wapsi Square story arc included a segment where a sphinx repeatedly dropped hints that Shelly should cut open a sacred tree with a sword, but she repeatedly missed them.
* Wapsi Square strip is much less frightening if you know that the woman on the beach is essentially indestructible.
* Wapsi Square: Stuck in a time loop, Brandi writes a book to her future self detailing how to get out of the time loop.
* Wapsi Square. The 1450 years before 2012 have repeated 56 times, and she is the only one that remembers. It is starting to get to her.
* Wapsi Square. There is a group of immortal politicians from an ancient civilization who have been subtly manipulating everything for ages. However, they aren't particularly competent, and have been controlled themselves by Jin, one of the main characters, the entire time. On top of that, all of their manipulations have been for the purpose of fixing the calender machine and saving the world, though they don't know this.
* Wapsi Square They seem to be very reasonable, although they seem to have let the protagonists deal with most of the supernatural problems.
* Wapsi Square (warning, some spoilers) that makes Oedipus out to be a simple pawn who padded his own story.
* Wapsi Square when Shelly, an apparently mostly normal human running around with three golems capable of destroying the world, a body controlled by a coven of demons, a god of alcohol, the atlantian mad scientist who created the golems, and the teleporting woman who controls the golems is suddenly aged up by 80,000 years and revealed to be an immortal and incredibly powerful sphinx... just so she can stay within shouting distance of the massive power levels of the other main characters of the comic. What makes it odd is that she was already a fully mature human woman in her twenties, but she still Aged Up by three and a half orders of magnitude.
* Wapsi Square, who find reading emotions easier than figuring out expressions and body language.
* Wapsi Square, who is quite sure that since this is a patriarchial society, fathers and sons have no difficulty talking about the women the son has slept with.
* Wapsi Square who liked to change in the middle of sex. Justin wasn't really into it.
* Wapsi Square with Luci talking to Jacqui about Shelly using the analogy of a tattoo, not knowing that Shelly had recently acquired a tattoo covering the entire front of her torso.

* Wapsi Square with the introduction of characters who might be gods, immortals or aliens, the concept of humans possessing (or being possessed by) inner demons, and a 12,000 year old mystery. In spite of all this, the sitcom elements are still present, and often just as strong as ever.
* War: 13th Day. A gentleman and a lady share a bed but not because there's only one available:
* War: 13th Day, Ambrosia does a variation of this. Night blackmails her into giving herself to him everyday in exchange for keeping Arsenik out of jail. While Ambrosia doesn't have to split up with Arsenik, she feels like it's a form of cheating and tells him that they shouldn't see each other anymore.
* War: 13th Day, Ambrosia is found in an inadvertently compromising position with Arsenik. After she is blackmailed, Arsenik proposes to her not only to keep her reputation intact but out of true affection.
* War: 13th Day. Boy meets naked girl, boy makes inappropriate comment, and boy gets punched by naked girl's suitor. Boy then blackmails girl into giving him a kiss everyday or he will jail her suitor. This leads to another fight with the girl's suitor. Girl stops the fight and chooses the boy over the suitor because the player said so.
* War: 13th Day but especially Arsenik and Night. In-universe, the former more so than the latter.
* War: 13th Day has one of the most natural build-ups leading to the grand reveal that the main characters are trapped in a dream.
* War: 13th Day literally watching her every second, she's probably much more comfortable this way. On the other hand, Wildfire doesn't believe them for a second.
* War: 13th Day, Night blackmails Ambrosia into giving her body to him in exchange for Arsenik's safety. Feeling like it's a form of cheating, she breaks up with Arsenik. Since she still has feelings for him, she tries to keep away from him because it hurts her to see him, especially when he's so clearly hoping to get back together with her.
* War: 13th Day. So, when one of their members starts getting serious with a boy, they aren't pleased.
* War: 13th Day, Wildfire even goes so far as to describe it. In detail.
* War: 13th Day, Wildfire makes no effort to hide the fact that she's lusting after Arsenik.
* War and Democide Never Again to travel through time and reading flashbacks of people's lives in oppressive dictatorships.
* War and Peace (2016): Andrei and Natasha participate in a dance at a ball, which confirms their attraction and is in fact intercut with scenes of their future courtship.
* War and Peace (2016): The soldier who accompanies Pierre to the ammunition cart at Borodino is promptly blown up, resulting in Pierre crying over the top half of his body.
* War and Peace about taking part in a revolution. It's implied that this revolution divides all the main characters into two camps who will have to fight each other.
* War and Peace and Field Marshal Kutuzov. War isn't very personal; most prisoners throughout the book are treated relatively well, even equally.
* War and Peace and Mel Ferrer, the Italian Vittorio Gassman, the Austrian Oskar Homolka and the Swedish Anita Ekberg.
* War and Peace and other guys...not so much. He gets in a huff later when Boris joins the Freemasons purely to advance his social standing.
* War and Peace and passed away a month before the issue was published.
* War and Peace (as well as a special "cinematographical cavalry corps") provided by the Soviet Ministry of Defense. But then, the Soviet Ministry of Defense was very fond of this trope in general, often providing soldiers for patriotic war films set during the Napoleonic Wars and the Russian Civil War.
* War and Peace. Calm, methodical, the perfect man to have fighting for you. Tolstoy devotes most of a page describing why people like Dokhturov are never

considered heroes despite the fact that battles would be lost without them.
* War and Peace Denisov, one of Nikolai's friends from the army, is suddenly revealed to be a great dancer when he and the Rostovs attend a ball. Tolstoy's style of writing necessitates a lot of this because he tends to write about things as they happen without going too far into backstory.
* War and Peace despise him. He has a knack for drawing up troop dispositions and knowing terrain, just nothing to do with strategy or winning battles.
* War and Peace devotes several chapters to explaining how Russia's many losses during the Napoleonic Wars were thanks to various (mostly German) generals, who formulated complex plans based, on scientific/mathematical proofs of how wars SHOULD be fought, which served no purpose beyond turning their mob of poorly trained, poorly equipped, poorly led conscripts into a very tired and very confused mob of poorly trained, poorly equipped, poorly led conscripts. It doesn't help that they're all more concerned with earning favor with the Tsar and proving their pet theories than actually winning the war.
* War and Peace, given that the financial future of the Rostovs seems to depend on whom their children marry. There is a short-lived conflict between Nikolai and his parents when he chooses to marry the nice (but technically poor) Sonya, but he had to do a lot of "should I go for personal happiness or the happiness of my family" soul-searching first.
* War and Peace includes chapters relating the 1812 retreat from Moscow, largely through the eyes of Pierre Bezukhov, who is forced by the French to go with them.
* War and Peace is a former Hussar officer now serving in the ranks. Officers who once served under him now refuse to speak to him.
* War and Peace is remembered because it's one of the longest classic narratives ever written.
* War and Peace, mostly because joining the army and fighting for the fatherland is seen as one of the best ways to achieve fame and glory.
* War and Peace: Noticeably subverted. Kutuzov abandons Moscow despite everyone on his staff and his emperor demanding that he hold Moscow against a siege.
* War and Peace scholars is actually not considered among his best work.
* War and Peace series. Today, she has performed with many prominent opera companies like the Met Opera, the Vienna State Opera, and the Royal Opera House, and has been awarded with the State Prize of the Russian Federation.
* War and Peace when he's discharged from the sovereign's court on charges of corruption and treason.
* War and Peace: While travelling, he had something going on with a Polish farmer girl, which her father found out about, and there went his freedom. Well, technically anyways.
* War and Peace with the realisation that he loves Natasha Rostova when he's comforting her after her failed elopement and her broken engagement with Andrei Bolkonsky; he declares that, if he were free from his wife Hélène and the best man in the world, he'd propose to her without a thought.
* War and Peace, would most likely have come true. Sonya has dreams of Prince Andrei lying down in bed in a rickety house, and that's where he dies.
* War and Remembrance After torpedoing a transport full of Japanese infantry, the captain of an American sub orders them to surface. He then orders his crew to sink all the lifeboats and and execute the men now in the water. His first officer protests, only for the captain to double-down, loudly telling his crew that if they do not execute the infantry said infantry will simply be rescued and sent into combat within a week. The crew obeys, strafing the floating men with automatic fire. This occurs in both the book and the series. How this action is taken in-setting is mixed. This instance is especially notable as at the time the US was practicing unrestricted submarine warfare, and thus the captain was technically well within his authority to give the orders.
* War Arc that concerns two or more large-scale factions (city-sized at least) in conflict with one another.
* Waratte Iitomo, a live-broadcast Japanese variety show, has been on the air since October, 1982. There has only been one host throughout its entire run, who holds a

Guinness world record for longest continued hosting of a live television program.
* Waratte! Sotomura-san: Haruno reacts like this when Sotomura shows up at school in spite of having a fever.
* Waratte! Sotomura-san: In a flashback from when the Sotomura siblings went to a store to buy yukatas, each one was given something for the other's gender.
* Warband If you're really bored and winning the game, there's always the good ol' method of finding a belligerent drunk, getting into a fight with him, and simply laughing off his puny sword with your Lordly Plate armor that needs a warhammer to damage, then you punch him over and over.
* Warband of the Forsaken Sons, a Warhammer 40000 fic, has an example where an entire world, thanks to being plunged into a Warp Storm and cut off by a curtain of eternal night, doesn't follow the time of the rest of the system. A Chaos Marine on the planet spends generations preparing the recruits for his masters, while only months pass outside.
* Warband of the Forsaken Sons, Jikaerus, former Apothecary of the Alpha Legion, is this. In order to create recruits for his master, he released mutated monsters on a world already plunged into eternal night and manipulated entire bloodlines so that natural selection and careful breeding would do his work for him.
* Warband sequel, is the Middle Eastern faction, with various exotic light infantry and cavalry. As for the specific country they're based on — it seems to be predominantly Egypt during the reign of the Mamelukes, with some vaguely Ottoman bits inserted here and there. Its name is a reference to the pre-Islamic Sassanid Persian Empire.
* war-beast to destroy a Corvette and isn't nearly as badly hit, but he is still bone-weary by the time he lands.
* War between Canada, the United States, and Mexico was once a likely scenario and became reality in the War of 1812 and the Mexican-American War of 1848. Nowadays, war between the three countries is almost unthinkable, mainly because large percentages of their imports and exports circulate among each other-in Canada and Mexico's cases, the overwhelming majority of exports go to the US. Only 21% of the US's exports go to Canada and Mexico, but that's still 5 times more than goes to China.
* war between Guelphs and Ghibellines) and the bucket was taken as a mock trophy when the battle, although bloody, ended in the stalemate. This is also exactly the reason that a large battle (comparable with battles of Agincourt or Tannenberg numbers-wise) is largely unknown and usually mentioned only in reference to the mock-heroic poem written three centuries later.
* War Between The Provinces is a fantasy retelling of the American Civil War in which the original inhabitants of the kingdom, who are blond, play the part of slaves to their dark-haired rulers.
* Warbirds, and has control over titanium (much of which it uses to make its planes better), it's adept at poaching up-and-coming pilots from various countries. It also doesn't object to hiring out a squadron to each side in a conflict; since pilots in Guild warbirds are likely to survive going down, as long as it's making more from the clients than it's spending on replacement planes, it's satisfied.
* Warbirds) and then letting the player loose on the options menu. In more straightforward games this might include weapon or engine upgrades; ones using, for example, the mad science sourcebook might culminate in the squadron kook upgrading his kite with a dangerously overclocked laser cannon that will explode if things go even a little bit wrong.
* Warbirds, centered around an Air Force F-4 squadron before and during a fictional Middle East war, the egotistical, incompetent, and ambitious General Blevins forces the inspectorate to give the squadron (which is in fact a model of Air Force regulations) terrible report to destroy the career of the commanding officer, who made Blevins look like an idiot at the beginning of the book.
* Warbirds Of Mars Diesel-fied America at war with Nazis, alien invaders and (maybe?) Nazi aliens.
* Warbirds RPG is focused on the player characters being mercenary fighter pilots in a setting where that role is analogous to "rock star who shoots people".

Bluntly, if you're not a skilled pilot, you're probably an NPC. In the Guild, anyone with ten dogfighting kills is a "dogfight ace", while ten strafing kills is a "strafing ace"; there are certain plane upgrades you can only take if you've reached this status, and some require you to have fifty in one category (an "Elite Ace") — you get free plane upgrades as your killcount rises, although if it gets shot down you need to start over or drop a lot of money on getting your kite back up to scratch.
* Warbirds (ten dogfighting or ten strafing kills) gets you plane upgrades, and some options, like a rear turret or some of the better aerodynamic refits, are only available to aces or Elite Aces (50 kills), and so everyone can compare them and has an incentive to go for as many as possible.
* Warbirds: The GM advice section mentions that in a gonzo game, Azure's countless unexplored errant sky islands could well be inhabited by aliens, lizard people, or dinosaur-riding lizard aliens.
* Warblade for some people. Then there is an upgraded triple fire, then plasma, which shoots a blue ball of energy, followed by fireballs (a wave motion gun in itself), then a laser, and finally upgraded plasma which is like normal plasma but has a wider spread and melts absolutely everything. And that's WITHOUT Super Autofire, which pretty much quadruples firing rate. It's probably safe to say that if you pick up a triple shot powerup if you have something really awesome, you are totally screwed.
* Warbleck" is off to vaporize itself thanks to a five-man Logic Bomb.
* Warborn: The Krukov Mining Corporation has its own private army, to the point of being one of the four playable factions (the other three being two state armies and one mercenary company). They make heavy use of mechs wielding "repurposed mining equipment" (i.e. lots of explosives).
* Warboss Gorgutz Deffscreama Bloodspilla Deffkilla Ragescreama Ghostkilla Gunsmasha Daemonkilla 'Ead'unter. A minor Ork character is actually called "Da Krimson Barun" presumably in spoof of the trope namer. Another, a Fighta pilot on Armageddon, is called "Da Red Nob" (Nob being short for "noble," and a term for an ork squad leader).
* Warboss Gorgutz 'ead'unta Ghostkilla Ragescreama Gunsmasha Deffkilla Daemonkilla Bloodspilla.
* Warboss Headcrusha was so impressively stupid that the Trust was actively trying to keep him alive as any replacement would be much smarter.
* Warboss Tuska was an ork with a dream of finding the best fights and reasoned that the best place to find them was in the Eye of Terror. He did just that, leading his Waaagh! on an interplanetary rampage through the biggest
* Warbot In Accounting around Warbot that prevents others from recognizing (A) he's a giant robot and (B) he's a pacifist looking for friends.
* Warbot In Accounting declared the goal of himself and the artist was to have each comic more depressing than the previous one, and while it only lasted 15 strips, they kept true on it!
* Warbot In Accounting is a decommissioned weapon of mass destruction that was given a job at an accounting firm. The trope is thus Justified - the robot was superpowered in the first place, then converted to accomplish a mundane task.
* Warbot In Accounting is a horribly depressing comic about a sapient combat robot struggling in civilian life and dealing with an office job. He has such a difficult time because he isn't physically built for anything else besides combat.
* Warbot In Accounting, which details the incredibly depressing attempts of a retired war machine to integrate into society.
* Warbound Widow. Because of her Life abilities she's incredibly tough and hard to kill, able to heal shattered bones with ease. Even when faced with loosing a limb she comforts herself with the fact she'd be able to grow it back. Eventually.
* Warbound Widow has this happen with planet Earth via the Alternian Empire, which kickstarts the plot.
* Warbound Widow to stringing up trolls above giant vats and draining them of blood while they're still alive for their paintings, along with their belief system towards causing a galactic apocalypse once they harvest enough souls to summon

their Messiahs.
* Warbreaker and a kicked puppy (when it isn't used). Despite not having any meaningful understanding of what evil is, Nightblood excels at the "destroy" part, and anyone with ill intent will feel compelled to pick it up, and will soon be involuntarily killing their partners in crime, while good people will feel overwhelmingly nauseous simply at the sight of it, although they can get over this to carry it. It does, however, like to urge its proper owner to kill almost anyone so... yeah, we'll call that a design flaw.
* Warbreaker and the fact that he's really a decent guy, it doesn't take.
* Warbreaker, created by Awakening a dead body, can follow more complex commands and be given new ones.
* Warbreaker: Denth often complains to Vivena about his current situation with "You know what I hate about being a mercenary?" followed by whatever it is that's bothering him.
* Warbreaker. Doing this is fairly rare, as creating a Lifeless is moderately expensive (since you can't reclaim the Breath used to animate it, plus you need special chemicals for best effect) and humans are far more useful in most circumstances.
* Warbreaker explicitly confirms that this extends to facial hair in the case of male royalty.
* Warbreaker introduces Nightblood, an incredibly powerful sword which drains Investiture from both its wielder and its targets to feed its hunger. Nightblood devours and digests the souls of those it kills, preventing them from forming Shadows and permanently destroying any Cognitive Shadow it touches.
* Warbreaker, just in case he happens to get peckish at any random time.
* Warbreaker, Life Energy is measured in "Breaths", which can be removed from a soul with consent of that soul (Everyone starts with one Breath). Once accumulated, these Breaths enhance you in specific ways, allowing you to discern colors and musical tones with higher fidelity, "sense" other lives around you, and become functionally immortal. Furthermore, these Breaths can be placed in an inanimate object, animating them to follow a specific Command. However, the sheer number of Breaths required to achieve these powers (200 to achieve perfect musical tone recognition, all the way up to 2000 Breaths to become immortal), and the state of those left without Breath, make the practice of accumulating Breath highly controversial in some cultures. The book mostly takes place in an area where there's no taboo related to trading breath, although it is very valuable.
* Warbreaker Lightsong discovers a murder in the palace and starts using investigative skills he's never learned, concluding they're a holdover from his old life before he Returned and that he was a police officer. After being easily defeated in a fight and confused as to why his presumed combat skills didn't carry over, he's informed that he was a scribe people hired to locate embezzlement and fraud.
* Warbreaker, Lightsong hates the lazy, self-serving behavior of himself and the other Returned. He is portrayed sympathetically, the other Returned, not so much.
* Warbreaker, Lightsong plays a game that he doesn't know the rules to, but manages to win every time. He considers trying to throw the game, but realizes that would be identical to what he was already doing.
* Warbreaker. One of the perks of this resurrection is that their appearance is a combination of their idea of physical perfection and how they see themselves. Common traits are being taller than normal humans, in prime physical condition and, for goddesses, having a huge rack.
* Warbreaker. Particularly true with Tonk Fah, who is a murderous torture-loving sociopath.
* Warbreaker per week to survive, but due to a quirk of the magic system, Breath a) can be detached from a person as easily as a change of clothes, with no ill effects beyond an increased vulnerability to mental and biological illness (and a cosmetic loss of color) and b) must be given voluntarily.
* Warbreaker powers, which most of them use to take on whatever particular form of ideal beauty they desire.

* Warbreaker. Returned lose their memories, and must consume one human soul a week to stay on this plane of existence.
* Warbreaker; Shardblades, while a bit weaker, don't require magic to function, and there's no danger of them killing their wielders.
* Warbreaker that each Returned is sent back with a specific purpose to accomplish, although in the process of coming back to life they lose all their memories, so they have to try to figure out what their purpose is along the way.
* Warbreaker), then change the magical control codes on said zombies and order them to attack Idris and butcher its inhabitants. Finally, everyone who knows the new control codes takes poison, making it physically impossible to revoke the orders.
* Warbreaker, the Returned only need one Breath (part of a person's soul) a week to survive, but most eat food anyway because food tastes good.
* Warbreaker; they really are sadistic criminals and they turn out to be the real villains of the story.
* Warbreaker, torturing and killing an innocent boy, and kidnapping Vivienna under the guise of her hiring them. Vivienna herself only becomes stronger once she runs away from them.
* Warbreaker to the point where it's difficult, even in the end, to tell who's been telling the truth about the origins of the God Kings, the nature of the religious turmoil between Idris and Hallendren, or much concerning biochromatic breath.
* Warbreaker Vasher uses Nightblood to demolish walls in the royal palace in order to reach his target Denth. It's not a straight example because it's not a dungeon but the effect is the same.
* Warbreaker: Vivenna is the protagonist, Siri is the deuteragonist, and Lightsong is the tritagonist
* Warbreaker, which means he's forgotten that he has no idea how to use a sword. This comes back to bite him.
* Warbreaker, who are mostly figureheads, and their priests (though said priests are often powerful Awakeners themselves).
* Warbreaker without the Tears of Edgli, the cheap dyes that can be manufactured from the flowers are the foundation of Hallendren's economic prosperity.
* Warbringer was intended to placate him (which failed, as he left almost right after the album dropped). Bennett, meanwhile, had started out as a live fill-in on their early tours due to Andy Laux's inability to tour (as he was still in high school) before being made full-time, and his arrogance, incredibly abrasive personality, and drug issues made him quickly wear out his welcome and culminated in an incident on a very large tour where he kept making incredibly cruel and hurtful personal digs at Nic Ritter that finally resulted in Ritter running out of the van and punching a dumpster hard enough to break his hand, which put him out of commission for the rest of the tour and made Kevill angry enough to pull Bennett out of the van and stomp on his head before kicking him out the minute the tour had concluded.
* War Brokers, the revolver is superior to pistols mainly due to its superior accuracy and damage, which enables skilled players to take out their opponents with headshots at a decent range, while pistols are only effective up close.
* War, Caesar is a rare heroic example, being the charismatic leader of the apes, who is viewed as a messianic figure by his subjects and who rules from a hidden compound in the Muir forests.
* War-chickified by the same Romans, who rechristened her Venus, and added victory (in battle/war) tot her portfolio.
* Warchief Thrall was long believed to be a case of this trope, since his best childhood friend was a human girl the same age as him (a lot of people assume they were more than friends), and he's had a good friendship with Jaina Proudmoore (with whom he's commonly shipped). However,
* Warchild Series Falcone tortures Jos at the climax. Because he is also the man who raped and abused Jos as a child, this scene is undoubtedly a source of terror for both the protagonist and the reader.
* Warchild Series goes into deep cover aboard the starship Macedon. He learns a new accent and slang for the part, and acts the part of a soldier perfectly, even

fighting against his own people.
* Warchild Series has a Space Navy that was pretty much called just that.
* Warchild Series. He explicitly states that attractive people can get away with more, and they can use their appearances to get what they want out of people.
* Warchild Series Jos mentions that Jets in uniform have an extra allure about them. Being asexual, he's immune.
* Warchild Series, "strit" for the striviirc-na aliens and "symp" for human sympathizers (like the protagonist and his mentor).
* Warchild Series universe. Lowachee never goes into detail about how the pirates find their victims. Most of the ships they prey off of, however, are running through the notoriously hard-to-police DMZ.
* Warcraft (2016), but less-advanced mages like Khadgar draw more complex shapes with chalk before casting them.
* Warcraft (2016), Garona is the only character to speak both human and orc tongues, and acts as a translator during the meeting between Llane and Durotan. She's also seen translating Draenai's pleas to Gul'dan early in the movie, and it's implied that Gul'dan keeps her around in part to be his translator.
* Warcraft (2016) hammer capable of turning the head of anyone hit with it into little more than red mist. His nickname, Doomhammer, comes from the weapon.
* Warcraft (2016) has a bald head, and he's nicknamed "Doomhammer" for a very good reason.
* Warcraft (2016) has Lothar failing at convincing the guard that he has calmed down:
* Warcraft (2016) has Lothar's and Llane's blades, lion-decorated swords wih runic inscriptions on them. They don't seem to be special in any way, they just look way cool.
* Warcraft (2016), his son's death causes Lothar to grow more fatalistic and unstable, even lashing out against his friend Medivh in anger. It gets so bad, Llane has him imprisoned in hopes he might cool off.
* Warcraft (2016), Khadgar realizes that something doesn't add up in Medivh's behaviour when the latter burns down his research on the Portal.
* Warcraft (2016), Llane's war room's main feature is a huge table with a 3D-ish map of Stormwind and figurines to represent Horde and Stormwind legions, which humans use to plan their campaign.
* Warcraft (2016), Lothar's very first scene includes him being introduced to dwarven "boomsticks" (one-shot gunpowder pistols), and by the time of the final battle, the entirety of Stormwind's forces is equipped with them, despite maintaining a medievalesque tech level in general.
* Warcraft (2016) (Roman tortoise), which proves highly effective against larger and stronger orcs.
* Warcraft (2016) sprouting everywhere. However, when he removes his robes for the mak'gora, we see they're actually coming from inside his body due to his use of fel magic.
* Warcraft (2016), the journey from Draenor to Azeroth can only be described as floating helplessly through water-like, black void between two points of light, with nothing but trees falling as they crash into the portal from Azeroth's side, and orcs rising upwards from Draenor. The experience almost kills Draka's unborn child.
* Warcraft (2016): the mages forming the council of Kirin Tor, the wizard city, all have purple-glowing eyes.
* Warcraft (2016). The orcs come from another world, want to use the local population to bring the rest of their Horde to Azeroth, and then intend to (or at least Gul'dan intends to) magically terraform their new home in Draenor's image.
* Warcraft (2016), the ornate book Khadgar finds in Medivh's vast library is a tome on the Portal and fel magic, both of which are pretty much evil.
* Warcraft (2016), the two armies hurl themselves at each other with complete disregard of formations. It could be that, with the humans being in a canyon, there was quite literally no other tactic possible than to go forward, but this still doesn't excuse lack of even the most basic shield-wall while it's made very clear

their orc adversaries are individually far more mighty.
* Warcraft (2016), this is how Gul'dan controls the Horde when it starts to lose respect for him.
* Warcraft (2016): when Blackhand pins Lothar down to crush his skull, he makes a mistake of grabbing Lothar's boomstick with his fingers and gets them, along with most of the hand, shot off.
* Warcraft (2016) with small orc-like tusks, and fairly beautiful by human standards.
* Warcraft 2, the mage Khadgar destroys the Dark Portal with a single devastating spell that no regular mage is capable of in-game.
* Warcraft 3 hero is also a skeleton, albeit much more powerful and with a free will (the above examples are mindless undead slaves). Death knights also use skeletal horses. Similar to the Diablo example above, a Necromancer using the Raise Dead skill creates two humanoid skeletons from any sort of corpse. Even something like a Crypt Fiend (half-spider) or a wolf. In the Frozen Throne expansion, the Scourge shop sells staves that allow any Hero Unit to raise skeletons as well.
* Warcraft 3: Reforged that looks more like the two are rubbing their weapons together rather than trying to overpower one another.
* Warcraft 3: Reign of Chaos, Prince Arthas declared "Spirits of this place! I will do anything, pay any price, if only you will help me save my people!" This... didn't end well for him.
* Warcraft 3, the Demon Hunter's repertoire of autoattack moves includes a spinning attack.
* Warcraft 3 when the World Tree was destroyed to prevent Archimond from corrupting it the Night Elves lost their immortality and connection to nature. Major characters in WoW have begun showing signs of aging for the first time in 10,000 years.
* Warcraft 3, with heroes or armies attacking, doing some damage to the enemy base/ expansion/army , then pulling out, except when in a strong enough position to just annihilate the opposition. Sometimes done via Town Portal Scroll if walking is not an option, or would result in losses.
* Warcraft Adventures: Lord of the Clans, and the game was mostly forgotten until it was publicly released in 2016 by a former Animation Magic employee.
* WarCraft a good idea - even the weaker heroes are generally fairly difficult to take down unless you can surround them, and while you're trying to focus on them, the other team can be wiping out your army. That being said, if the opportunity to take out a hero quickly presents itself, successfully doing so severely weakens the other team, as well as denying experience to that hero.
* Warcraft a hidden section of one mission reveals the King Penguin, an invulnerable creature that gives you a ring of protection + 4.
* Warcraft also has Magatha Grimtotem. She is obviously evil from the very beginning and doesn't even TRY to hide it. By her race's standards, she's an old woman/cowlady. She's fairly harmless, until Cataclysm, where she
* WarCraft and a spoken incantation, and overall, the spells are distinct enough that after one use, you can guess what's being cast while the runes are still forming.
* Warcraft, and invades the Night Elf lands in the middle of the apocalypse.
* Warcraft and player's character (who later evolved into Orgrim Doomhammer) betrays Blackhand out of lust for power alone. Also, canonically, bad guys win there. Warcraft III: The Frozen Throne is a far more prominent and complex example, where ALL campaign protagonists are anti-heroes or villains to some degree, and the known world is still suffering the aftermath of a massive undead and demon onslaught. The humanity is hunted down to the borders of extiction (and its remnants are run by a racist tyrant), high elves willingly damn their entire race, and the main conflict is set between the Lich King and his former master Kil'jaeden, both sides nearly equally evil. Even the bonus campaign, The Founding of Durotar, has a Tearjerker ending with Jaina having to betray her father.
* Warcraft, Anduin Lothar, leader of the Alliance forces, falls in battle. His second-in-command, Turalyon, takes up his position and kicks the living shit out of

the orcs.
* Warcraft, Anduin Lothar, who is locked in a cell, is trying to convince a guard to release him. When the guard refuses, Lothar snaps and hurls a tankard at the guard, who abruptly turns into a sheep. Lothar looks at his hand in confusion, wondering if he actually did that, but then Khadgar walks in.
* Warcraft." A player in the game has become so powerful that even the admins can't stop him from killing other players, and the fear is that everyone will become frustrated and stop playing:
* Warcraft, a quest line involves a Paladin of the Argent Crusade being infected by the Plague, apparently contradicting this.
* Warcraft are big rhino-like six-legged cattle. Their children, however, are clearly some mutant form of yappy dogs judging by the screeching they do when you attack them. Why would you ever want to attack such terrible things? Because they like to zip in and out of your buildings stealing resources, eating food, and smashing things randomly. Of course, you better be prepared because all that screeching will bring the whole herd close behind.
* Warcraft are "Over-proportioned, primary colored, bulky armored dudes and monsters."
* Warcraft are planetary parasites that merge themselves to a planet and slowly corrupt it. Whether this would eventually destroy the planet is unknown, as the Old Gods on Azeroth were sealed away by the Titans (they could not be killed, having already corrupted the planet to such a degree that removing them would've required the destruction of Azeroth).
* Warcraft: At least in the first one, night elves (and perhaps high elves also; don't have now the sourcebook) are described to have no pupils and glowing eyes, especially under the moonlight.
* Warcraft. At least some of it seems to be by choice, however. The Tauren, for example, have access to gunpowder but otherwise prefer to live closer to nature. Meanwhile the Goblins live in a industrial port city, with Gallwywix having his own golf course and pool.
* Warcraft between Arthas and Ner'Zhul while the merging of their souls finished.
* Warcraft). Both are royal heirs. Both are transformed by their powers. Both have an ice fortress in a remote location. And despite Arthas technically having all Death Knight powers, he favors the ice powers.
* Warcraft, but there's no visible scarring or decomposition. As mentioned below, it seems this is a feature of high ranking undead.
* Warcraft came around though, and they reverted back to normal spelling.
* Warcraft campaigns are considered canon, and the only missions that aren't are the ones that end the campaign and don't allow for the canonical ending of the story.
* Warcraft can be used against ancient evil gods. And the dimension-hopping giants that ride around in spaceships.
* Warcraft can convert their peasants into milita in an emergency. They turn back into normal peasants after a while, though.
* Warcraft. Certain plot-important enemies during the campaign had "Divine" armor that could only be damaged by units doing Chaos-type damage, which are almost impossible to obtain. Therefore, characters with Divine Armor aren't meant to be slain in conventional combat and can only be defeated by completing the mission as the developers intended.
* Warcraft confines Orgrimmar's troll and goblin populations to a cramped stretch of canyon, a situation made even worse when the goblins decided to drill for oil in the only water source.
* Warcraft Curse of Flesh. Several machines created by Gnomes are very similar to those found in ancient Titan complexes, suggesting they may have an innate ability to build such machines.
* Warcraft, despite the fact they would have died if they didn't. At that point, Garithos admits he never trusted the elves and believed they should have never been accepted into the Alliance, essentially revealing his treatment of them comes from the chip on his shoulder.

* Warcraft differently if Taretha hadn't shown Thrall so much compassion and love in his formative years.
* Warcraft Earlier builds of the game, which were much more RPG than the final game was, had even smaller forces.
* Warcraft, enough to destroy ancient night elven society and cause global misery for the high/blood elf population millennia later.
* Warcraft even highlight that among all the teeth regarding Orcs, there's "the prosthetic teeth this actress can barely speak through."
* Warcraft even if she wasn't several times larger than him and built like the Venus of Willendorf with four arms and three faces.
* Warcraft Expanded Universe, is almost hanged before Tirion, having sacrificed his position as a paladin, his right to rule Hearthglen, and contact with his family in an attempt to protect him, saves him.
* Warcraft features a form of trial by combat known as the "Mak'gora", a sacred one-on-one duel. Mak'gora was adopted by all races of the Horde as well, the Tauren Carne Bloodhoof challenged the orc Garosh Hellscream to Mak'gora for leadership of the Horde. There are several rules regarding the Mak'gora. Each fighter must have a witness, each fighter can only use one weapon, and battles are to the death.
* Warcraft features Kargath Bladefist, who leads the Shattered Hand clan of orcs. The Shattered Hand clan has its origins in the orcs enslaved in mines by ogres. They were kept from escaping by having one hand chained to a wall while they worked. One day, Kargath decided he'd had enough, so he strangled his overseer with his chain and sliced off his manacled hand, replacing it with a blade. He then encouraged his fellow slaves to follow his example, and they rose up and killed their ogre masters.
* Warcraft features many different types of giants and similar beings.
* Warcraft, features such a wide variety of mounts that listing them all would be impractical — but, luckily, they come in a somewhat tidy number of categories.
* Warcraft fell through. Then it was rapidly spun off into its own 'verse.
* Warcraft, five naval units were given to each side: Oil Tankers, which gathered oil, the resource used to build other naval units, Destroyers, elven or troll ships which could attack units on land or in the air as well as other naval units, Transports, which had little armour and no weapons but could bring troops across bodies of water, Bruisers (Human Battleships, Ogre Juggernauts) which couldn't attack air units and moved and attacked more slowly than Destroyers, but hit like a truck when they did, and Submersibles (Gnomish Submarines, Giant Turtles with Goblin technology) which moved fairly slowly and could only attack sea units and buildings, but could only be seen by watch towers and flying units and attacked in rapid fire.
* Warcraft franchise has a few of these: For Jaina Proudmoore and Tyrande Whisperwind, their love triangles are more interesting than what they actually achieve in the conflicts. Alleria and Vareesa Windrunner, while capable fighters, lose all attention to their husbands.
* Warcraft franchise has played host to several Bug Wars involving the insectoid Aqir empire and its descendants.
* Warcraft games - a chair magically carved out of glacial ice, which doubles as Ner'zhul's phylactery. There's also a place called the Throne of Kil'Jaeden, but it's not an actual throne. Whether the Legionlord has an actual Cool Chair remains to be seen, as surely no self-respecting demon lord would go without an obsidian throne covered in skulls and spikes.
* Warcraft games also have many creatures with four legs and wings (such as dragons and gryphons).
* Warcraft games generally play this straight. To win you typically have to annihilate the enemy force down to the last peasant worker and farm and they'll do the same to you if given the chance. In-story the Alliance refused to wipe out the remaining Orcs when the war was lost, but the survivors were so dispirited that attempts to coexist with them failed utterly and they ended up in internment camps until Thrall led an uprising.

* Warcraft gave up cannibalism due to devotion to the Horde in sharp contrast to the other trolls who are cannibalistic and xenophobic. The latter is somehow even able to get along with, or at least tolerate, their ancient enemies the high/blood elves.
* Warcraft had glowing red eyes, caused by his embracing demon rage with open arms. The glow dies away a moment before his death because he killed the demon who caused the rage. In the expansion Frozen Throne, Arthas gets glowing blue eyes after fusing with the Lich King Ner'Zhul.
* Warcraft has a member of the race ask you to avenge his wife who was killed by his (still living) former best friend. He states that he can no longer feel love and is only able to feel revenge. However one seasonal quest chain on Valentine's day implies that the forsaken are still able to feel love in the same manner as they did in life.
* Warcraft has some of these, such as Vereesa Windrunner and Garona Halforcen.
* Warcraft has stated that the Legion's current commander, Kil'jaeden the Deceiver, still follows his master's philosophy.
* Warcraft has two abilities that come close to this: Barrage and Cluster Rockets. Barrage gives Steam Tanks a missile launcher that can attack up to three air units at a time, while Cluster Rockets fires a swarm of weaving missiles into an area, stunning units caught inside (and the number of missiles increases with the level).
* Warcraft have six legs when presented. The two even use the same basic models.
* Warcraft. He killed many named characters and many of them are badass in their own right.
* Warcraft heroes rendering demons and zombies unto loot pinatas en masse.
* Warcraft, he sealed a powerful demon inside his staff, turning it into an evil weapon with terrifying magic powers. The staff was later shattered to prevent it from falling into evil hands, but in the Level 60 version of Naxxramas, players can acquire its pieces to remake it and then banish the demon, making it wieldable.
* Warcraft hit, however, the playable dwarves were mountain-dwelling, ale-drinking, blacksmiths and miners, with the gryphon riders relegated to a minor NPC faction.
* Warcraft II, advanced units differ enough to require different strategies. Orcs are more of a Powerhouse, relying on Bloodlusted Ogre Magi, while Humans rely on Subversive but powerful spells such as Invisibility, Blizzard and Exorcism.
* Warcraft II allowed players to enter Outland and meet the Alliance heroes there (thus confirming that the Alliance campaign was the one that happened).
* Warcraft II also has an engineering gadget called "Goblin Sapper Charge", which allows the player to do this as well.
* Warcraft II attack other human kingdoms so his own nation would stay relatively untouched.
* Warcraft II begins with Stormwind, having been conquered by the Orcs and its king slain, founding a government in exile in Lordaeron under Anduin Lothar as Regent.
* Warcraft II, clicking on an orc ship enough time will make a crew mate say he's gonna be sick. Continue to click and you'll hear a vomiting sound.
* Warcraft II. For the Horde, many of their town names are in remembrance of past characters, perhaps most notably the orc capital, Orgrimmar, named for the second Warchief, Orgrim Doomhammer.
* Warcraft II had absurdly pathetic sight range for most units, which made scouting horrendous if you didn't have a Flying Machine/Zeppelin in your army.
* Warcraft II had a mod called Kali, with the esoteric function of emulating a local area network between all players who were using Kali across the Internet. Blizzard took notes and built Battle.net.
* Warcraft II had no ability to define custom rules in this way, but you could play it PVP with someone who agreed to.
* Warcraft II had one, later they switched to face-concealing helmets but the Knights took over.
* War Craft II has soldiers running past a rack of spears and swords, each grabbing one as they go past, along with shots of cannon crews loading their pieces and running them out the gun ports of the fortress.
* Warcraft II have access to a spell, the Eye of Kilrogg, that is essentially a

magical version of a surveillance drone (which takes the shape of a big green, disembodied floating eye).
* Warcraft II, he makes an enemy drop his defenses by screaming so loud it physically hurts him.
* Warcraft III ability) and ninja (one of his skills creates illusions of himself, the other lets him go invisible and deal extra damage on his next attack).
* Warcraft III, after pulling players into the Twisting Nether in desperation.
* Warcraft III: After Sylvanas betrays Garithos, his body is instantly jumped on by ravenous ghouls (to add insult to injury, heroes normally don't leave corpses behind).
* Warcraft III, after taking up the soul-stealing sword and becoming evil, also manages to pick up armour with a lot of skull motifs and a long purple cloak. Also, his skin and hair turn deathly white. Apparently, he's able to stroll right back into his father's throne room looking like this without raising anyone's suspicions.
* Warcraft III: All shops except the marketplace have limited quantities of items (most between one and three) that replenish over time. The marketplace, however, starts out empty and gradually fills with items found by players as they kill monsters for experience, these disappear for good when bought.
* Warcraft III alongside Arthas, and can be seen in the campaign's ending cinematic accompanying his master into the capital city, where he helps murder the aristocracy and watches Arthas kill his father. In effect, he became that which he hated most.
* Warcraft III, and forces him to do a bunch of stuff. Though to be completely fair, she's not actually aware of how much the things she's doing align with his real goals because she is very cynical. Illidan is only half doing this stuff because she is telling him to. Also, he uses the opportunity to escape his imprisonment.
* Warcraft III and its expansion have the player control a villainous army, making the enemy army a Hero Antagonist. This is most blatantly during the Scourge campaign, though the Horde and Night Elf campaigns tend to paint heroes from other factions in this light as well.
* War Craft III) and its own theme song ("Vi sitter i ventrilo och spelar DotA" by Basshunter).
* Warcraft III "annoyed" quotes. The Pit Lord gets even more egregious with line with him publicly coming out to his girlfriend as a demon over a daytime talk show.
* Warcraft III, any side can buy landmines from the goblins and lay them around the place. They turn invisible, so most units won't see them.
* Warcraft III are often subtle variations of each other, with the creep's size being a general indicator of its strength in comparison to others like it.
* Warcraft III are tough, amphibious neutral monsters with saberteeth.
* War Craft III. Arthas issues a grave ultimatum to Uther: help him to purge Stratholme of its infected citizenry or leave the kingdom's service. Uther and his followers leave, with Uther telling Arthas that he is crossing a terrible line. Jaina also leaves Arthas' side, telling him she can't watch him do it. In the end, it's just Arthas and his men performing the grisly task of killing innocent people before Mal'Ganis can convert them into zombies.
* Warcraft III). As in Brood War, the timer is usually enough to take out a single side's base (with the game itself recommending you use banshees to possess powerful enemy units along the way).
* Warcraft III before the death system was revamped (the stones would ultimately become Meeting Stones).
* War Craft III book containing concept art, high-quality screenshots, and backstory notes; and a music CD with the orchestral music from the game (though for some reason the cinematic music wasn't separated into individual tracks, but all in one suite); all packaged in a vinyl-covered slipcase. All for about $80 Canadian.
* WarCraft III came with a hundred-page manual featuring concept art, detailed descriptions of every unit and a dozen pages of backstory for the entire setting.
* Warcraft III casters, or horribly high, coming from the heavy flyers).

* Warcraft III cinematic: he summons a dragon that breaths ice on the ground. Tyrande summons an owl which flies in a straight line revealing everything, and with the right talent kill anyone who doesn't pay attention to the minimap. Lunara summons a wisp for vision. Gul'dan has the Eye of Kilrogg for a similar purpose.
* Warcraft III: Creatures hostile to all players are found all around the map, and killing them gets you experience, gold and sometimes items. The Orcs even have an upgrade that lets their units gain money by attacking enemy buildings.
* Warcraft III: Crypt Lords like Anub'Arak are giant bugs who can summon carrion beetles from corpses and a swarm of angry locusts to attack their enemies.
* Warcraft III custom campaign had a chess piece encounter within Karazhan, where you were required to keep the two sides as equal as possible so that when one side won and attacked you, you'd have as little fighting as possible to do.
* Warcraft III Druids (particularly the hero version, the Keeper of the Grove).
* Warcraft III). Every faction has a Siege Engine to deal with towers from beyond attack range, but they also have other specialized units:
* Warcraft III features troll batriders who can set themselves to explode on enemy flying units.
* Warcraft III. Fortunately, Anub-Arak digs his way back to Arthas in time.
* Warcraft III four-star badass, former ranger-general Sylvanas Windrunner, steps in.
* Warcraft III had upkeep. If your forces got big enough, 30% of any gold you gain from that point is lost. If it gets bigger, you lose a whopping 60% of gold that is brought in. Considering that gold is limited...
* Warcraft III has a campaign mission where Lady Vashj and Kael'thas free the Blood Elves from the Dalaran dungeons, which are full of ultra horrifying monsters. It isn't a bad level, but at the end of the day it isn't as challenging as the normal base-building campaign missions.
* Warcraft III has a few abilities like this (Doom, Parasite, Dark Arrow...), but they create a unit upon death instead of insta-killing.
* Warcraft III has an ending credits movie, in which Archimonde is "filming" a movie, complete with several takes. In one take, there's a dragon attack, and while running away, someone says "The goggles! They do nothing!!"
* Warcraft III has an Orc unit called the Kodo beast, which is ridden by an orc drummer. It increases the damage done by all nearby allied units by 10%.
* Warcraft III has a number of missions where the player is supposed to win without destroying the enemy base and in fact they are designed to discourage attempting to.
* Warcraft III has a segment in the human campaign where the player saves a child called Timmy. A few levels later, a ghoul named Timmy is encountered.
* War Craft III has Kael defending a Draenei village from Fel Orcs. The Draenei return the favor by allying with Kael.
* Warcraft III has several ways of magic canceling. There are some like resistant skin that merely blocked most enemy spells, but also pure magic immunity, meaning no heals or buffs either.
* War Craft III have a sound pack distressingly but understandably focused on pronouncements of vengeance.
* Warcraft III he purges the rest of Lordaeron. Over the course of the Undead campaign, Arthas not only kills most of his former paladin order, he kills most of Dalaran's archmagi during a raid on the city.
* Warcraft III. Illidan does eventually get released and the night elves eventually lose their immortality as well since, surprise surprise, they weren't exactly responsible enough to handle it.
* Warcraft III in Kalimdor for the first time, one of the orcs commented on the curiosity of the new beings with, "At least they're prettier than the humans".
* Warcraft III: In the early years, when makers of custom maps were mostly inexperienced in creating new 3D models for themselves, they were stuck with what the game files had to offer, resulting in characters bearing little, if any, resemblance to how they were supposed to look. Of note, many LOTR-themed maps featured Legolas as a woman, because there was no male elf (or otherwise humanoid)

archer model in the game.
* Warcraft III: In the second level of the Blood Elf campaign, you start with several barely-defended bases on the mainland that are immediately attacked by vastly more numerous and fully-upgraded undead forces.
* War Craft III invokes this trope immediately before separating from Benamin by summoning a literal red string that connects them. She informs Benamin that the string will stretch and tangle as they separate, but it will never break, thus binding them together throughout all space and time. When they reunite later in the shrine, she summons it again as a way to show her identity.
* Warcraft III is one of these. It even corrupts the wielder (not that the wielder wasn't asking for it), and hungers for souls. It can drain the victim's soul to strengthen the wielder or to be later reanimated. There's even a warning inscribed on the dais where Arthas finds it:
* Warcraft III is that the AI will focus on attacking weaker units before stronger ones, which can be particularly annoying for the factions that have weaker ranged units compared to the melee units on the front line.
* War Craft III) is to indulge this hunger, regaining HP as they munch away on enemy (or ally, or neutral) corpses.
* Warcraft III. It may be just one level, but you're likely to replay it over and over trying to survive the whole gauntlet of enemies.
* Warcraft III(Lordaeron, Stormwind, Gilneas, Dalaran, Kul Tiras, Ironforge and Quel'thalas). Both the Burning Crusade and Warlords of Draenor expansions featured six zones on the planet Draenor, and the orcs were divided into six major clans before the formation of the First Horde. The Exodar has six sections, Silvermoon City has seven districts. There are usually six or seven bosses per raid (though some had as many as eleven: another number that tends to show up a lot in these games). A filler raid is usually four bosses (although sometimes it's just one). There were originally seven Titans, and seven Titan facilities on Azeroth. There are the traditional European Four Elements, and four druid specializations. There are technically speaking four roles in the gameplay: with melée and ranged damage being very different due to how fight mechanics tend to work. There are four Titan Keepers in Ulduar, though there are actually seven Titan Keepers in total (counting Ra-Den, Tyr and Odyn). To name just a few examples of these numbers occurring.
* Warcraft III, Lord Garithos is shown as an extremely racist commander who insults and degrades non-humans and incarcerated the Blood Elves for not staying in a doomed base to die as he ordered. When he's finally backstabbed by Sylvanas Windrunner, one doesn't feel sorry for him.
* Warcraft III. Magic is not for everyone, consult your doctor before use."
* Warcraft III—the Night Elves remain on good terms with the few human settlers on Kalimdor, but are hostile to the new orcish nation of Orgrimmar right on their border.
* War Craft III: Mercs can be hired from camps, and mercenary heroes, in the expansion, from tavenrs. Mercs can be quite useful in story missions as when you aren't given the means to make more of your troops but are still picking up money they can fill in gaps in your forces and in skirmishes as they can give you access to spells normally reserved for another faction.
* Warcraft III: Most neutral hostile enemies (called "creeps") use the same model with different sizes and color schemes, though they're seen in different regions rather than having specialized versions for different terrain types (e.g. bandits in cities and villages, skeletons in dungeons and corrupted forests, etc.).
* Warcraft III of the first campaign and as Arthas' personal nemesis, before the greater conflict of the story would unfold.
* War Craft III, one mission involves rescuing the captured Illidan from Maiev Shadowsong, who's locked him up in a magical cage and is dragging him away to her base at the very moment you discover her. Even when you defeat the guard and secure the cage, however, there's still a battle raging on. Rather than try to undo the lock and free Illidan in the midst of a war, why not just drag the entire cage back to safety and figure out how to unlock it later?

* Warcraft III: One of the doodads is a large pot with three human heads bubbling to the surface, on of them already a skull.
* Warcraft III on the Dwarvern Mortar Team results in them having the following exchange:
* Warcraft III, playable in a few quests during the campaigns. As one of the very few units in the game that can move in water, attacking from the sea is among their preferred battle tactics.
* Warcraft III playable race composed entirely of undead. The, well, Necromancer is the Undead faction's main caster unit in III.
* Warcraft III practice any of this; most of their spells are fire-based. Lampshaded by one you meet in the Blasted Lands, who says Blood Mages "eat normal food like normal people."
* Warcraft III. Prior to the Battle For Azeroth expansion, many wondered about her top as well (though tbf, it did look like it was reinforced with metal). While one can suspend disbelief in the case of the dragons who dress in similar styles, since their "clothes" may actually be body parts, one really has to wonder about Sylvanas. The front of her pants sits well below her belly button or even her hip line. If she jumped in the air, the fabric SHOULD be pulled down sufficiently as to show her vaginal opening. Of course, it never does: no matter how many crazy archery stunts she pulls.
* Warcraft III. Quite a bit of creeps have axes to them. Such as most trolls whom mostly carry around tomahawks to throw at their opponents. Alongside that there are most bandits, carry around axes or hatchets.
* Warcraft III receives a health regeneration boost when standing on blighted ground, which is generated by their buildings. In fact, undead units can only regenerate health passively on blighted ground, but do so faster compared to the races.
* WarCraft III: Reforged angered the fandom for multiple reasons, one of them being that any custom made map made by players is the "sole and exclusive property of Blizzard". Many other big publishers like Bethesda or CD Projekt don't claim ownership over mods, they just claim the right to license or use them.
* Warcraft III: Reign of Chaos, the dwarves, having suffered terrible losses among their sapper teams in the Second War, have been developing a method of delivering those explosives that do not require the demolition dwarves to themselves to get near the target. Hence, the dwarven mortar team replaces the old sapper units.
* War Craft III, Rexxar is one of the last Mok'nathal (half orc/ogre). There are few of his own kind left, since Draenor was shattered in the second war.
* Warcraft III's creep, though there are differences- blight does not recede when its source is destroyed and can be dispelled by building structures of other races on or near blight.
* Warcraft III: Several Hero units are capable of summoning beasts, elementals, or demons to aid them in battle.
* Warcraft III shady (or outright sinister) nature, ignore the warnings, use the power source and beat the enemy but become corrupted in the process. Undead are exempt because there's nothing to corrupt there any more.
* War Craft III shows this, with a battle between Orcs and Humans which quickly goes in a different direction when demons unexpectedly rain from the sky and kill everyone.
* Warcraft III since the swapped gender of those units were archers and spellcasters.
* Warcraft III starts losing power, so does Arthas, who in the game starts to LOSE levels as the campaign goes on. By the final levels he's just a measly level 1 Death Knight and has to work his way back up.
* Warcraft III's undead plague. Deliberately made by the scourge to create more minions, it took some time for the targeted humans to figure out what it was for and where it came from.
* Warcraft III: Sylvanas Windrunner would've gotten her revenge on Arthas, prevented his ascension to Lich-Kingdom and saved everybody heaps of troubles if only she had had the sense to kill him outright rather than seek to prolong his

torment, allowing him to escape and fulfill his goals.
* Warcraft III that dramatically shift the status quo for both franchises' future games.
* Warcraft III that picked up some basic weapons and armor at the town hall), wields a small axe along with a small metal shield, contrasting the steel kite shield and sword of the standard Footman.
* Warcraft III the Acolyte and Sludge Monster units have their skins stored on the same file, so changing one will change the other. As the Acolyte sees a lot more use than the sludge monster, this can cause considerable surprise if the skin is switched using the editor.
* Warcraft III: The Amulet of Spell Shield blocks a targeted spell every forty seconds. Savvier players will waste the charge with a minor spell before unloading with their heaviest spells.
* Warcraft III: The Avatar of Vengeance can spawn invulnerable Spirits of Vengeance from corpses, regardless of the corpse's original allegiance.
* Warcraft III, the Druid of the Talon is able to transform into a bird, and one of his joke quotes is sneezing and hoping that he's not allergic to feathers.
* Warcraft III: The Frozen Throne as well: After severely wounding Illidan near the Frozen Throne, Arthas didn't finish him off. The game's sound files reveal that he considered Illidan a piteous creature who wasn't worth killing.
* Warcraft III, the leader of the series' creative division. In WoW's second expansion pack, he got an NPC named after him.
* Warcraft III The main difference is that the Paladin fully restores 6 units to life permanently, but only friendly units, while the Death Knight summons up shades of the most powerful allied or enemy units for 40 seconds, and those shades are indestructible during that time.
* Warcraft III: The most powerful spells often require channeling, which puts the caster at risk. Some very powerful spells like summoning a demon lord or breaking the Earth's crust under the Northern continent took several in-game days to complete, with the summoners completely dependent on others for protection.
* Warcraft III, the night elves have dropped their traditional gender requirements. (Also, they were only requirements for joining the Sentinels or formal druidic training, respectively - there's no rule that says a night elven man couldn't be a badass swordsman on his own.)
* Warcraft III then maybe that would be enough blood! Ehâ€¦ but probably not."
* Warcraft III, the orc campaign is completely separate from the three main chapters, and even plays differently, being more akin to a traditional RPG than an RTS.
* Warcraft III, the Orc Raider units, and their Hero, Thrall, make use of rather large wolves as mounts. The game's Night Elf faction also includes mounted warriors riding large predatory cats such as Panthers and White Tigers. There is also the windrider: which is a wyvern (not a dragon but a winged lion).
* Warcraft III the plague cloud released by some Scourge units is green and intoxicates anyone nearby. The Venom Globe is bright green and Dryads can use green poisonous spears.
* Warcraft III, the same spell could also be used to steal summoned creatures from the enemy.
* Warcraft III: The second mission starts with Uther telling Arthas he sent two of his best knights to negotiate an orc tribe's surrender. Cue two horses returning, pointedly missing their riders.
* Warcraft III: The Tauren chieftain Cairne Bloodhoof refers to invading Alliance forces as "pinkskins" (which could apply to humans, elves, and dwarves), since the only other outlanders he's met are the greenskinned orcs.
* Warcraft III: The Undead faction have the Disease Cloud ability, which allows Meat Wagons and Abominations to deal additional damage over time via persistent clouds of noxious plague to their targets, which the undead are immune to (even the enemy).
* Warcraft III. This is because banshees are just souls: although if they find

their previous bodies they can inhabit them. All undead actually can do this because their souls are not firmly connected to their bodies. Nathanos Blightcaller did this to his cousin Stephanos at the direction of Sylvanas Windrunner. It's unclear if Stephanos' soul is still around, or if it was destroyed in the ritual.
* Warcraft III, this race includes priests and necromancers among its ranks.
* WarCraft III, this was removed in the expansion, and trying it with the expansion installed gets an error message even as the hint is being displayed.
* Warcraft III toward his dwarven and elven allies, and is pretty much the reason that the Blood Elves break away from the Alliance. The rest of the universe definitely disagrees with him since the humans needed their alliance with the high elves and dwarves to beat back the Horde. It's very clear that currently, no singular race would ever be able to rule over the rest of Azeroth.
* Warcraft III: Treant buildings have long flowing beards and hair made of leaves, which is most noticeable on the Ancient Protector (who even has birds living in it).
* Warcraft III, turning these off is often a matter of killing the generator of boss powering them.
* Warcraft III, turn the tables by featuring a xenophobic Alliance admiral campaigning against the (reformed) orcs even after a truce between the Alliance and the Horde.
* Warcraft III ultimate spell of the Pit Lord, which slowly kills the target and spawns a demon from the corpse? "Doom".
* Warcraft III; Undead structures can only be built on Blight, ashen, bone-studded terrain generated by their Ziggurats or headquarters building. The corpses are continuously generated by graveyards, though only up to five at a time.
* Warcraft III: Units killed by a siege weapon Incinerate explode or in a shower of blood, organs and bones, leaving no corpse behind. This is actually of tactical importance: the Undead can't use exploded corpses to summon skeletons, nor can the units be resurrected via Paladin spell.
* Warcraft III) was this, but the dungeon journal reveals that he is entirely unrelated to the child named Timmy.
* Warcraft III: When Arthas returns as a death knight and quests to retrieve the urn in which his father's ashes are held, Paladin leader Uther asks him if he's "come back to piss on his father's ashes once more."
* Warcraft III when Illidan awakens the Naga race in one cinematic. We see a Naga's very reptilian eye opening.
* Warcraft III, where invincible units can't be attacked at all. Similarly, it's impossible to directly target magic-immune units with spells. It is, however, possible to uselessly cast area effect spells on them.
* Warcraft III, where the Dragonhawk Rider asks for permission to buzz the tower.
* Warcraft III, which they missed out on), always-online requirements, and removing the ability to play existing custom campaigns (which had been one of the main things keeping fan interest in the game). Even worse, downloading the patch retroactively applies these to other versions of the game, even players uninterested in the new features. On release, the game quickly achieved the worst Metacritic score ever on the site.
* Warcraft III: While not on a different planet, the Undead faction produces Blight from its buildings, which kills the ground around them and turns trees into dead wood (though it's just as useable as before). Undead units only regenerate while on blighted ground, and unlike creep other factions can put their buildings down on it (it even dispels the blight in a wide radius).
* Warcraft III: While the trope isn't mentioned by name, it's in effect in the penultimate Night Elf level where Illidan consumes the skull of Gul'dan. This triggers his permanent transformation into a demon, and more importantly gives him Chaos damage, the only type that can damage the demon lord Tichondrius.
* Warcraft III: Winged Dreadlords will sometimes ask "If I have wings, why am I always walking?"
* Warcraft III with its Impale spell, which damages and stuns enemies in a line.
* Warcraft III with neutral dragons); this probably stems from the fact that the

game was originally planned to be much closer to what DotA is. It is also justified by engine limitations: the game can only support about 200 units per player before slowing down.
* Warcraft III. Without a necromancer to control them they wander, aimlessly attacking any living who approach.
* Warcraft III world editor, where there is a gem that says "gem activated/deactivated". When clicked multiple times, one of the characters will taunt you. It is functional, however: It makes it so that the units you spawn will say their "Ready" quote, and will do their death animation when you delete them.
* Warcraft III, WoW's RTS predecessor, has several campaigns where you take the fight to the elves and shove their superiority up their asses. First was the Undead campaign's assault on the Sunwell Plateau, which saw the player cruise through High Elf bases with zombie hordes, sweeping aside all the tricks and defenses of the High Elves and their Ranger General, Sylvanas Windrunner. Then you beat her, and to cap it all off, you raise her as an undead monstrosity and defile their precious Sunwell just to resurrect a high level Undead wizard as a powerful Lich. Then there's the fight between the Orcs and the Night Elves, with the Warsong chieftain Grom Hellscream slaughtering his way through the forest, killing many Night Elf warriors and razing their forests and bases for lumber, and when the Night Elf demigod Cenarius interferes, Grom drinks from a demonic fountain of power and uses that power to wipe out Cenarius. Their luck in the expansion, The Frozen Throne, doesn't improve. The Night Elves get embroiled in a war against one of their former heroes and the fish-like Naga, which all proves fruitless when all the Naga's leader wanted to do was destroy the Undead capital of Icecrown. Then the High Elves get rejected by the Human Alliance leader and get imprisoned, only to flee to the protection of a demon, the same man who led the Naga, who has the High Elves assault a demon capital for their new home.....only to be forced by the demons' leader, Kil'jaeden, to hunt down and destroy the Undead capital of Icecrown once and for all.......a task they end up failing miserably.
* Warcraft II lost continent with a plot that has a very similar outline, all the while acting like a mysterious hidden land is a unique concept.
* Warcraft II on the Horde side thanks to the goblins, whom most others consider crazy for flying in such a contraption.
* Warcraft II's case, even the setup program got annoyed if you kept clicking the sound test button.
* Warcraft II. Submarines and sea turtles must surface to fire and can only be fired upon if a flying unit (griffon, dragon, helicopter, or zeppelin), tower or another sub or sea turtle can see them.
* Warcraft II: The Ballista and Catapult serve as the Alliance and Horde siege weapons, throwing giant arrows/rocks at the enemy, killing weaker units outright (if they're holding still).
* War Craft II, the wizard units have deadly artillery style spells, but, under the AI, attack in hand-to-hand combat.
* Warcraft II will yield the comment. " 'Join the army!', they said. 'See the world!', they said. I'd rather be sailing."
* Warcraft in which Gul'dan wanders into the Tomb of Sargeras is recited almost verbatim in the first book, and Auchindoun plays a much more extended role in the second, along with the introduction of the "new" draenei.
* Warcraft, in which the stereotypically ugly orc Thrall rises to become one of Azeroth's greatest heroes, while stereotypically handsome human Arthas falls to irredeemable evil (though he becomes less handsome when he becomes a Death Knight.
* Warcraft is actually a major aversion: Until recently, many of those diverse cultures used to be isolated from one another. With the rapid exchange of knowledge and technology, many races managed to catch up with their modern brethern while those that did not have suffered massive cultural upheaval.
* Warcraft I, so although he managed to tell the orcs how to build the portal between worlds, said portal ended up in the middle of a dragon-infested swamp on the edge of a backwater kingdom. Instead of in Stromgarde, an already empty fortification, and a much more logical place to launch an invasion from. Basically,

the Horde's conquest was doomed from the start by being dumped in a crappy location.
* Warcraft is pretty much full of Magocracies. Another example would be the Blood Elven kingdom, Quel'Thalas, where the 'Magisters' are seen in almost every position of authority. Though that may be because every Thalassian is capable of, at least, very basic magic — to which they are literally addicted. If you want to stretch it, the Night Elves of Darnassus are ruled by nature-wielding druids and divine magic-wielding priestesses.
* Warcraft is revealed in the Zul'Aman cinematic to have cut off his own arm to escape from High Elves who had captured him and had been torturing him (the torture is how he lost his eye). This is an odd case in that Trolls of the series can normally regenerate limbs including arms unless cursed or forsaken by their Loa Gods, but Zul'jin is still missing the parts years after the event, making it unclear as to how much a sacrifice he thought he was making.
* Warcraft is simply intended to hold them off just long enough to set up a trap. Of course, given the odds they were facing, they weren't exactly letting them have it easy on purpose.
* Warcraft. It turns specially weird when you take into account that classes aren't disguised in any way, so you can have Warlocks and Death Knights helping Thrall escape from Durnholde, shapeshifted Druids running about, and Humans casting Shaman spells. But no High Elves.
* Warcraft. It was the smallest of the human kingdoms, but rather influential. That is, until the Scourge and Burning Legion ravaged it.
* Warcraft, lampshades this at one point by complaining "Doesn't anyone stay dead anymore?"
* Warcraft made contact with the Night Elf royalty and tricked them into opening a portal to Azeroth and invade.
* Warcraft, magically-aged and brainwashed to serve as an advance scout.
* Warcraft), magnataurs (essentially a wooly mammoth centaur) and zhevras(zebras with a small horn on their forehead). There's also creatures that look mostly like real-world ones but with few parts added, like giraffes with gazelle-style horns and crocolisks (6-legged crocodiles).
* Warcraft makes frequent use of the map of the world (in addition to always being able to pop up the map of the area you're in, when you use the flying taxi service you click on your destination in a map of the whole continent). Each expansion has changed the maps, with Cataclysm replacing the maps of the original two continents and all the others adding a new continent-sized area.
* Warcraft Medivh by magical means, and in the process suffered a one-off curse that caused him to prematurely age. By the time adventurers re-discover him in the Burning Crusade expansion, he is chronologically in his late 30s or early 40s but physically much older.
* Warcraft" Most ridiculous are the Pit Lords, enormous scaled demonic centaur things with a set of woefully inadequate wings sprouting from their humanoid torso.
* Warcraft. Mud Golems could slow enemies, while the other versions tend to be tougher and can throw rocks to damage and stun.
* Warcraft mythos, Kilrogg Deadeye, chieftain of the Bleeding Hollow orc clan, was known for having killed several of his sons and a couple of grandsons who challenged him for control of his clan. He's still painted as one of the more sympathetic members of the old horde, which says something.
* Warcraft oeuvre, especially the trading card game, uses fictional quotes from various plot-important characters to tie the whole expanded universe together.
* Warcraft of the previous seven campaigns. Though the Orc campaign isn't part of the main story (as it's unlocked from the start) so it's not very sudden.
* Warcraft of the Val'kyr and the Lich King. That's to say nothing of the multitude of various different ways that these forces are utilized.
* Warcraft opens with the night elves coping with the fact that they're going to start dying natural deaths for the first time in... well, forever.
* Warcraft optional rules include that all arcane casters are prone to arcane magic addiction which can cause (and not limited to) growing extra limbs (sometimes not

functioning limbs as fingers and eyes and horns), paranoia, spontaneous casting (including self teleport while sleeping) and other mental and physical ills. Addiction to demon magic (Fel Magic) is the same only on the highway and with auto-white/green-glowing-eyes (also turns the user to evil in many cases). More literal serum is drinking demon blood (especially Mannaroth's) which turns the drinker into a fighting addict psychopath with uncontrollable urge to kill anything else that has not turn to CHAOS RACE (but mostly orcs). Comes with glowing red eyes, increased size and strength (enough to kill a god with special damage type to accomplish this) and in more sever cases the skin also change color to dark red (also makes the drinker a total traitor and douchebag as an unpleasant extra).
* Warcraft: Orcs and Humans, as the orc ending, in which daemonically corrupted orcs overrun the continent, is canon, though some aspects of the Human campaign (like killing Medivh) are also integrated. The sequel also does this with the roles reversed, so the humans win, but some aspects of the Orc campaign are also canon.
* Warcraft: Orcs and Humans has a list of special thanks, with the final entry being "The Kitchen Sink and you for reading this."
* Warcraft: Orcs and Humans: The Black Morass is not evil per se, but it is where the orcs first came to Azeroth.
* Warcraft: Orcs and Humans was the road mechanic, which restricted where you could build structures. As nobody liked it, it never appeared again.
* Warcraft: Orcs and Humans, you could not create new Town Halls at other locations. This made it difficult to mine gold that was far away from your Town Hall. Subsequent games would allow you to build new Town Halls at other locations (and in the third game, one faction can turn their Town Hall into a mobile unit and back).
* Warcraft, organic enemies killed by siege units are turned into a bloody goop and leave no corpses. This is notable seeing as the Undead faction uses corpses for various abilities, so this can be used to deny them corpses from their own dead untis.
* Warcraft. Originally they were often seduced by promises of eternal life, social grievances, and disillusionment with the Holy Light. In the modern era this is exacerbated by the widespread trauma and suffering experienced by humanity. Members are given a potion after their initiation that removes their ability to object and makes them unquestioning fanatics.
* Warcraft or not. Fans were understandably furious, and eventually Blizzard issued an official statement addressing complaints... that refused to accept responsibility and attempted to shift blame to the fans for their high expectations that Blizzard themselves set with their 2018 trailer. It went about as well as you'd think it would, with Blizzard's reputation being self-damaged further.
* Warcraft), prince Kael'thas (after joining forces with the Legion), and archmage Arugal. The playable warlock class has this vibe going on, too.
* Warcraft, ranged units who are at a lower elevation than the units they are attacking have a chance of missing said attacks, though spells and whatnot are exempt from this rule.
* Warcraft' remains were hidden. It used to be in the underwater ruins of a city, but it was raised from the depths and is now an archipelago infested with demons.
* Warcraft RTS series. Dread Lords, Succubi, Doomguards, and even the non-humanoid Pit Lords have bat-like wings, although only Doomguards have ever been shown flying in the game.
* Warcraft series had this with the invasion of the Burning Legion, though they've tried and failed three times already. Rumor has it, though, that they're at it again.
* Warcraft series has grown from a fairly standard setting to this, including lore elements dating back ten thousand years or more. It has four worlds (Azeroth, Draenor, and to a lesser extent, Argus and Xoroth) which are explored in depth.
* Warcraft series needed a new villain, Blizzard would seem to throw a dart at a character board and have the one they hit go insane.
* Warcraft series. The Lich King produces a virus which kills humans, then resurrects them as undead loyal to him. There is also a faction of Undead, the

"Forsaken", who have broken free of the Lich King's control and have regained their free will.
* WarCraft setting are these. The prime example is the Dark Portal that leads to Outland, a world that had so many of these gates opened that they tore the world apart and sent what was left into the Twisting Nether.
* Warcraft show that it used to be just as earth-like as Azeroth and Draenor.
* Warcraft. So far there has only been one entity in lore that is officially a deity, the Night Elf goddess Elune.
* Warcraft sometimes against greater threats, like the Lich King and the Old Gods.
* Warcraft sourcebooks), others don't have that excuse. There are also excuses like the blood elves being minor antagonists before TBC made them a playable race, with all the inclusion that entails, but the RPG books stayed what they were.
* Warcraft, Stormwind City was razed by the Orcs in the First War and rebuilt after the Alliance reclaimed the continent of Azeroth six years later. The original city is referred to as "Old Stormwind" in historical texts. The southeastern district of the city is called "Old Town" in-game, even though it's architecturally identical to the rest of the metropolis and was ostensibly (re)built at the same time.
* WarCraft suggests that Khadgar has run away from Kirin Tor because he could see decadence growing within it, even if he couldn't really name what didn't feel right.
* Warcraft that even the most noble of orcs can lose themselves to savagery.
* Warcraft that the heroes riding on dragons couldn't even stop to pick up other groups of fleeing parties that they saw. Given the absolutely massive amount of land that became sea, it's safe to say that hundreds of thousands died.
* Warcraft, the Blademaster's funny quotes "I have a blade that can cut through armor! And still cut a tomato."
* Warcraft, the character Krasus (a dragon shapeshifted into an elf) is unable to transform into his dragon form because he already exists, as his younger counterpart Korialstraz. Likewise, Korialstraz is unable to transform into anything else. The two are weaker the farther apart they are, but become stronger when they're close. The two work around this problem somewhat by giving each other one of their scales.
* Warcraft, the Farseer Drek'Thar carries a spellbook—not his own, but pieced together from human mages killed during the First and Second War. He gives it to you as a reward for helping him out; it gives the wielder a bonus to mana, a brilliance aura (one of the Archmage's skills), and the ability to use Mass Teleport (the Archmage's "ultimate" spell).
* Warcraft, the following basic rules apply: Mortals only permanently die if their souls are destroyed (one way to do this is to consume them with Fel energy) or if their bodies are completely annihilated, while elementals and demons can only be destroyed on their home planes; if killed in the mortal world, they simply respawn some time later. It is not clear how these rules apply to the Old Gods, at least one of which has been canonically resurrected. Of major characters:
* Warcraft: The Forsaken and the Scourge (the antiheroic and villainous undead factions), the Alliance and the Horde (human/elf/dwarf and orc/troll/tauren). Night Elves are the Sentinels, but strangely this one never really caught on.
* Warcraft, the Frostwolf clan is purged by the rest of the Horde after their chieftain Durotan tried to secretly negotiate peace with the humans.
* Warcraft. The game was later leaked in 2016, and it was for the most part finished, missing little more than a few voice lines (which had text-to-speech lines as a placeholder).
* Warcraft the goblins (Horde) are specialized units that blow stuff up. Each unit is only good for a single explosion, killing the demolitions team in the blast of its own attack. They are, it would appear, so willing to die for the cause that they chose a specialty that makes every mission a suicide mission.
* Warcraft: The Last Guardian, when the wizard Medivh teaches his apprentice Khadgar how to ride a gryphon.
* Warcraft: The 'Legion' expansion gives a legendary weapon for every available player class specialization. These range from old classics (such as twin blades

forged from the broken shards of Frostmourne and the sword that broke Frostmourne in the first place) to completely new ones, which were given a fitting backstory.
* Warcraft: The plague of undeath that turns people into zombies, preparing the way for a demonic invasion.
* Warcraft. There are several similar missions, and the Zerg and Undead even play extremely similarly in style, complete with backstories involving godlike precursors unleashing them.
* Warcraft, there is a Druid only glyph by the name of "Glyph of Charm Woodland Creature", which "Allows the Druid to befriend an ambient creature, which will follow the Druid for 1 hour."
* Warcraft: The Roleplaying Game (at least, the pre-WoW one), the lands of the night elves are said to be in a perpetual night.
* Warcraft: The Roleplaying Game: The Roleplaying Game", the retconned Horde faction sourcebook was written to make it clear that the previously alluded to misogynistic aspects of Troll culture were only practiced by the still-evil tribes, and "good guy" Trolls who had joined the Horde, like the Darkspears and Revantusks, were much more egalitarian.
* Warcraft: The Sunwell Trilogy in and have his people slaughtered by the soon-to-be Lich King.
* Warcraft. The Twisting Nether in the Warcraft series is hyperspace in all but name. It's a series of hyperspace-like extra dimensions that connects all worlds together. Portal magic uses this to work. Also, the former world of Draenor (called Outland after its destruction) was entirely shifted into the Twisting Nether when it was destroyed by a portal storm, so it has a REALLY interesting sky.
* Warcraft they didn't start calling themselves druids of the fang until after they turned evil.
* Warcraft, they picked the time before that destruction and bleaching happened, and she's still 100% this trope.
* Warcraft, this was a not uncommon tactic for a human playing the computer. The archaic UI made a coordinated advance difficult, but sending a bait unit to draw the computer into an attack on your carefully drawn-up defensive formation usually worked pretty well.
* Warcraft, Thrall learns about Grom Hellscream by finding a wanted poster for him in Durnholde.
* Warcraft) to be 50%, 60%, 70%, 80%, 90%, or the standard 100% before the match begins.
* Warcraft to Doomhammer defeating Lothar in single combat in order to make the former seem more honorable and sympathetic.
* Warcraft to kill the demon lord when he tries to claim the tree's power.
* Warcraft to see enemies that are invisible or on the other side of a wall.
* Warcraft trigger system allows you to create your own Cutscene Power To The Max moments by healing near-death characters or having them deal massive damage with the right "code" at the right time. Of course, that means you can remove the official moments yourself by toying with the campaign map files.
* WarCraft Trilogy are transported to the past, Krasus, the only one who existed then, finds himself considerably weaker and unable to transform into his true dragon form of Korialstrasz. We find Krasus's past self is experiencing the same problems, and it's attributed to the fact that, since they're one and the same, they're sharing the same life force. They also find themselves much stronger if they are together. Eventually they're able to lessen the problem by swapping one of their scales and using magic to bind them to their skin (It hurts like hell, but Krasus is able to transform his arms just long enough to rip off one of his scales).
* Warcraft trilogy has the invading demon army use this tactic. Several times. And the overzealous army commander falls for it. Every time.
* Warcraft undead. Their siege weapon is the Meat Wagon which throws bodies as ammunition and can stack up the corpes of the deceased. Luckily, these corpses can spawn from thin air and you don't have to collect any for that purpose if you don't want to.

* Warcraft units and abilities, and of course melee units if they get close enough. Caster-type heroes like the Archmage and Lich are also kind of fragile compared to other heroes, but get all the defensive benefits of being heroes, still.
* Warcraft universe. Apart from his original name (Neltharion) and his new name, he is also sometimes referred as Xaxas, Blood's shadow, Lord Daval Prestor, and has many titles.
* Warcraft universe. Demons seem to radiate fel energy and any area with large amounts of demons will become either a barren wasteland or a twisted mockery of its former self. Living beings exposed to fel energy will mutate, making them more powerful but turning them insane, and causing them to become demons after long enough exposure. In fact, most demons were mortals before they were corrupted by fel energy.
* Warcraft Universe has a lot of these, which is particularly evident in their architecture:
* Warcraft universe, it is implied that this can happen with a warlock and his/her succubus. The succubus will often grow attached to her master, even to the point of being uncontrollably in love with him or her, though the succubus is prone to fits of jealousy.
* Warcraft universe, Thrall, the warchief of the Horde was raised as a gladiator by humans. Also, after the king of Stormwind washed up on the shores of Durotar after escaping his imprisonment, some orcs found him and made him fight as a gladiator.
* Warcraft universe which does feature benevolent gods, including some who directly help the player at times. Interestingly, the game's most widespread "good" religion, The Light, is arguably more like Buddhism in that it has nothing to do with worship or deities and more to do with philosophy and introspection.
* Warcraft. Upon doing so you locate several corpses that your companion, Shandris Feathermoon, recognizes as Tyrande's handiwork. She outright says that the path of carnage created from the corpses will lead you to her.
* Warcraft variant called the Crypt Fiends, which are Nerubians killed by the Scourge during the War of the Spider and reanimated as undead. In turn, there is a bigger, meaner variant of the Crypt Fiends known as the Crypt Lords, though those are not so much spiders as they are huge, bulky scarabs of sorts, with mantis claws.
* Warcraft was considered one of the best weapons in the game for retribution paladins. (Do a Google Images search for "Vindicator Maraad.")
* Warcraft were well on their way to becoming this after the Second War. The survivors were rounded up and placed in internment camps where they were kept for years afterwards as a strange lethargy (caused by a kind of withdrawal from losing the demonic power that had propelled the original invasion) settled over them. Some were taken and trained as gladiators, one of which, Thrall, eventually escaped and set about to free his people and reclaim their heritage.
* Warcraft. When first mentioned during Warcraft 3, they were treated ominously, but didn't have any focus. They started to be confronted directly in World of Warcraft, but they were only in raids not tied to the main story. Slowly, they were revealed or implied to be behind major events in the series. For the most part, however, while their cultists assumed victory like any villain, there was nothing particularly more hopeless about fighting these villains than any others (and the Cataclysm expansion ended up with foiling their planned apocalypse that was arranged 10,000 years prior).
* Warcraft, where various factions have taken them over for their own use. Hammerfall, the Horde's outpost in the Arathi Highlands, is one such former camp, named for Orgrim Doomhammer, the former Warchief who was slain during the camp's liberation.
* Warcraft, which is said to contain the name of every demon in existance.
* Warcraft while Archimonde is The Enforcer. Aggramar may or may not also have been this to Sargeras, it's hard to say given that we know very little about what the Legion did on planets other than Azeroth and Draenor.
* Warcraft, who bathes in the blood of his slain victims to heal his wounds—including those that can otherwise prove fatal.

* Warcraft who hates all non-humans. In Garithos' mind, the usefulness of the Blood Elves was simply outweighed by his burning hatred of them.
* Warcraft, who have Light-granted abilities that specifically deal damage, or deal extra damage, to demons and undead.
* Warcraft, who use it to punch holes into new worlds or intercept travelers passing through it.
* Warcraft will sometimes scream "Death From Above!" when given an order to fly in and throw envenomed spears at enemies below.
* War Crimes to view past events, in order to avoid errors in the witness testimony.
* war criminal guilty of the rape of over fifty women, and he was killed by two of his victims. One of the killers commits suicide, the other (married with a young son) is arrested. While they don't let her off, the detectives and ADA go out of their way to give her the lightest sentence possible and don't even ask for bail.
* Wardaddy treats German women as spoils of war and lets his men have their ways with them (not an Eastern Front mass rape situation, but still). He even tells Norman to have sex with Emma or else
* Wardancers they tend to be more durable and hit with more attacks than the Swordmasters at the expense of some stopping power.
* Ward and manages to close with and capture her by the expedient of smashing through walls to grab her from an unexpected angle.
* Ward, as well as having a lot of residual animal DNA left in her system due to the process of restoring her original body shape.
* Warday (1984) by Whitley Streiber and James Kunetka was somewhat unusual in that it depicted the resulting world after a "limited" nuclear exchange between the U.S. and the USSR.
* Warday and the breakdown of order while California is pretty much untouched and has become an undeclared separate country with closed borders.
* War Day by Whitley Streiber and James Kunetka, which is written as the account of the two authors traveling around the United States in the aftermath of a limited nuclear exchange.
* Warday. Five years afterwards, a Captain of the British Royal Navy, patrolling the Pacific , tells the protagonists: "There are still submarines at sea, carrying nuclear missiles and loyal to non-existent governments. They are extremely dangerous and if they don't surrender we have to destroy them".
* War Day, following a (relatively) limited nuclear exchange with the USSR, Washington DC has been destroyed and the US is slowly splintering into a collection of Balkanized nations, with California aggressively leading the pack.
* Warday, the US and USSR engage in a limited nuclear exchange; years later, the US is a third world nation slowly balkanizing into separate countries.
* Ward, believing that normal humans are incapable of effective self rule, and that Paladins should control the world.
* Ward, decades of making harsh choices for the greater good have rendered Doctor Mother almost unable to feel pity or remorse. In her defense, her answer to being told she'll be killed by one of her victims is that she obviously had it coming.
* Warden Blackwall doesn't believe he's worthy of the Inquisitor and is also worried about their respective obligations and the fact that he's ultimately another soldier in her army.
* Warden Carlos Ramirez is a water mage and combat magic specialist. In the Dresdenverse, water is associated with entropy and cleansing, and pretty much all of Ramirez's combat spells involve disintegration to some extent.
* Warden-Constable Blackwall, who feels that part of being a Grey Warden is to be this trope.
* Warden did, and the Grey Wardens themselves were almost obliterated in the fight - only two remain alive in the entire kingdom. The trope is somewhat played with, however, because very few people genuinely believe that the Wardens are guilty.
* Warden Donald Morgan is revealed to have been deeply in love with his mentor Captain Anastasia Luccio since he was her apprentice in "Turn Coat". Just like with Molly and Harry, the love was unrequited

* Warden encounters Isabela in a brothel and can convince her to sleep with him/her. With enough charisma, he/she can get Zevran and even Leliana to join them for a foursome.
* Warden Gad Hassan, who attempts to take some of the jeweled scarabs from a wall mural, only to discover that they're
* Warden Luccio is one of the most battle-hardened Wardens. She fought against the archmage necromancer Heinrich Kemmler
* Warden: Melody of the Undergrowth can pick up and use a variety of hammers over the course of his adventure.
* Warden: Melody of the Undergrowth: Emperor Magulus is shown to be this in the intro. He slashes through a bunch of vines blocking his way with one slice of his sword, and takes out a sword-wielding vine with a leaping strike.
* Warden paired with either himself or his future self is one of the more popular pairings in the
* Wardens Are Evil: The prison is run by a ruthlessly corrupt administrator.
* Warden, singular was established to contain monsters, and hunt them if they escaped.
* Warden's Keep DLC is installed, the Warden and company will learn about Sophia Dryden, the great-great-grandmother of new acquaintance Levi Dryden. She was a noblewoman sentenced to join the Grey Wardens, and retaliated against the sentence by working her way up to the rank of Warden-Commander. Her children are never seen nor mentioned, but given that Levi is her direct descendant, the implication is that she must have had at least one.
* Warden, so this ultimately was the better option (not that they could appreciate that).
* Ward features the multiverse throughout, as the events of Worm led to contact, travel and trade across over a dozen different Earths being initiated.
* Ward: Following the near-complete annihilation of the original Earth (Earth Bet), the survivors mostly move to an alternate universe Earth (Earth Gimel), forming a mega-city on the east coast of Gimel's North America. No one's sure what to call the mega-city as a whole (it's mostly just called "The City"), but many of its subdivisions are named after locations from Earth Bet. The most prominent is New Brockton, located where the city of Brockton Bay was located on Earth Bet. "New York C" is also briefly mentioned (as opposed to the original New York City or the New York City on Earth Aleph).
* Ward has Damsel of Distress give one of these after she kills Beast of Burden for attacking her and ordering her to stop pissing him off when she hadn't actually done anything this time.
* Ward has the main protagonist, Victoria Dallon. While she doesn't go overboard, she is very fashion conscious and her narrative descriptions of other characters frequently include a rundown of exactly what they're wearing and her own critique of it.
* Ward. His favored attack? A headbutt, which takes advantage of his power and odd physique.
* Warding Halo works similarly to Iron Skin, nullifying status effects and absorbing almost all incoming damage. In addition, any foe who approaches the forcefield gets blasted with fire, stunning them and dealing damage.
* Ward leads to some heavily lopsided confrontations, it's a good mindset to have.
* Ward managed this with the Necrons, giving them depth and personality. A number of Eldar players started to see this with Ward as he's currently the only writer who writes Eldar winning battles.
* Wardner, a certain enemy in Stage 3 will drop an ocarina that summons a giant phoenix that can carry the player over most of the stage.
* Wardner and three vertical climbing shafts which are identical to each other.
* Ward Perry, a staff member at a certain dubbing studio in Vancouver and not a proper actor, after his voice-acting career ended rather unceremoniously in the late 2000s.
* Wardrobe Flaw of Characterization: Tries to dress well, but can't quite pull it off.

* Wardrobe Malfunction angry Sam with what appears to be actual steam coming out of his ears. Turns out he was just sitting in front of Kermit's humidifier.
* Wardrobe Malfunction of the costume. This way, even if the costume ripped, everything "important" was still covered.
* wardrobe malfunction. Or take a look at representations of Marianne, the spirit of the French Revolution, as she would typify this look. It would not have been too remarkable at the time.
* Wardrobe Malfunction: Someone's clothes fall off or become undone because of a freak accident.
* Wardrobe Wound: Someone cares less about being attacked and more about the fact that their clothes were damaged as a result.
* Ward's captain is very young and new. Lampshaded when the base commander, Admiral Kimmel, is furious that he didn't get the report right away.
* Ward. This is still not enough to win the battle at hand nor gain him the respect of other capes.
* Ward tries to avoid thinking of her so she won't find out about his friends or what they know, but he fails when a friend mentions possibly being watched.
* Ward, Victoria Dallon is convinced that her adoptive sister Amy (who is creepily obsessed with Victoria) let Victoria's boyfriend Dean die in battle in order to have Victoria for herself alone.
* Ward, Victoria Dallon meets up with her -deceased in the original timeline- boyfriend Dean and attempts to explain her agitation away as caused by a dream where he died and the world ended, as well as her figuring out her adoptive sister is in love with her and the recontextualizing past interactions that goes with it. And she did that all in a single night. Because it was a long night. Yes. Dean visibly doesn't believe her but he lets it go.
* Ward we meet Spright, who can copy any one power near him, though for people with multiple powers he can only take one. It works best with Mover powers, where he can get a sense of how they work before using them, and Changer powers, where he can keep the form for several minutes even after dropping the power to take another.
* Ward With her hair-trigger temper and incredibly destructive powers she felt it was safer if she wasn't out in the world among normal people.
* Ware County is the largest county in Georgia. There's a local saying that the county seat of Waycross is the largest city in the largest county in the largest state.... east of the Mississippi River.
* 'Ware Hawk, the heroine nearly stops to bury the dead before going on because they had found one survivor who had to take precedence.
* Warehouse 13: Agent Myka Bering, who appears to be able to read or speak every single language on the planet (at minimum, French, Russian, Japanese and Latin, and at least some Arabic, Chinese and Portuguese. And English). It's become something of a running gag.
* Warehouse 13 (allow the user to drive a car through walls) to Joseph Pilates' stretch bands (prevent muscular atrophy).
* Warehouse 13 also holds a massive library containing first editions of everything ever printed.
* Warehouse 13. Although Williams is a main contracted actor, she's actually not in very many episodes, and her character Leena has little screen time in episodes she is in, and has little impact on the plot. Leena isn't even acknowledged in series promos that supposedly highlight all the main characters. Williams is also absent from the new intro sequence.
* Warehouse 13, and a butcher's knife that can cure someone by transferring the ailment to someone else.
* Warehouse 13 and cause short term memory loss. Turned all the way up by a villain at one point, they're basically a disintegrator ray.
* Warehouse 13, and painfully aware of it too. Her brother Joshua is her role model for this behavior.
* Warehouse 13, and there's a noticeable shift from using the ones with tactile switch keypads to touchscreen phones between seasons 3 and 4, firmly rooting the series in the early 2010s when Blackberry began to abandon its flagship product.

There are more intentional references to the time period, like the "Got Your Six" lapel pins, Pete and Claudia's fondness of internet memes, and of course newspaper dates, but the transition from cellphones to smartphones was something the writers couldn't have planned for.
* Warehouse 13, and wasn't just making up about some of the inventions in her books.
* Warehouse 13, a prototype game console enhanced by an Artifact traps the users inside, and started to use their own fears against them. One of these fears grows strong enough to steal the controllers from the players, effectively trapping them inside.
* Warehouse 13 are an interesting example, because they aren't really a real part of the government.
* Warehouse 13, Artie has a camera which turns the people it takes pictures of into pictures, specifically life-sized cardboard cutouts. A second picture puts them back to normal. Another episode had Man Rey's camera, which could steal youth from one person and give it to another.
* Warehouse 13, Artie Nielsen sits down at a piano. In "Regrets," he plays a piece that he's written for his father. The piece, "Nocturne for Artie's Dad," was composed and performed by Saul Rubinek himself.
* Warehouse 13: Artie, so much, particularly to Claudia. Even outright stated by Pete in one of the Christmas specials:
* Warehouse 13), but their voices remained the same. To emphasize the switch, the actors (rather impressively) mimicked the other character's mannerisms.
* Warehouse 13, by preventing the tattoo from transferring to other hosts.
* Warehouse 13: Claudia Donovan, a hyperactive, always-getting-into trouble tech wiz.
* Warehouse 13, Claudia is handcuffed with no way out. Looking around, she picks up a plastic spatula and tosses it down disgustedly. After the action falls, Artie shows up and tells her he sees seven ways out of the situation. He picks up the spatula and corrects himself: "Sorry, eight." It should be noted that he got himself out of a similar situation earlier in the episode using a iron to make an electromagnet.
* Warehouse 13 contain more of their original owner's personality than others, most notably Lucrezia Borgia's hair comb, which channels Lucrezia's personality, desires, and her gifts of influence into its wearer.
* Warehouse 13 episode "Age Before Beauty", Pete and Myka are investigating the murders by artifact of several supermodels and notice that Jenny the PA is acting suspiciously. They confront her, and she tells them that the models deserve to pay. They tell her that this is a poor justification for murder. Shocked, she explains that she thought they were busting her for dealing drugs. Later in the episode, one of the designers confesses to giving Myka "a killer dress": he gave her a metaphorically killer dress as a snub to one of the other models. For those unfamiliar with the show's premise, Pete and Myka are tracking down objects with mysterious properties, so a dress that kills anyone who puts it on would've been par for the course.
* Warehouse 13 episode "Never Let Me Go" bringing that show into this universe as well.
* Warehouse 13 featuring a virtual reality game, the "in-game" scenes were subtly rendered with cel shading techniques to help distinguish them from the outside reality.
* Warehouse 13. For example, it's entirely likely that Charles Dodgson had a mirror, but the characterization of Alice Liddell is completely fictional.
* Warehouse 13 has an art collection behind a concealed door activated by turning a statue. The statue is so incongruous with the rest of the decor that Pete spots it immediately.
* Warehouse 13 has a variation with a knife that turns people into glass.
* Warehouse 13 has one example without the singing. Pete rattles off the first two lines when he finds out that Artie has a crush on a doctor affiliated with the Warehouse. Claudia mentions Pete saying 'something about Artie and a baby carriage'

when she contacts him for information while on a mission.
* Warehouse 13 has rotoscoped segments when the characters enter a video game.
* Warehouse 13 has the original marquee from the Strand theater which, when triggered, produces a several chorus lines of tapdancing showgirls and compels anyone in the vicinity to dance along to "42nd Street" until they die from exhaustion. Appropriately, Artie uses Busby Berkeley's drinking flask and the original pan from Tin Pan Alley to deactivate the artifact.
* Warehouse 13 has the team investigate a hockey player who is somehow able to heal instantly from the many would-be career-ending injuries he has sustained during games. He mostly uses this skill to fight.
* Warehouse 13, H.P. Lovecraft's Silver Key makes any person touching it temporarily look like a C'thulhu-esque creature to people around him or her. This usually results in said person being beaten to death by the freaked-out mob. This is deliberately done by a man whose wife was trampled to death at a stadium. Anybody whom he deem responsible for her fate (either by accidentally pushing her or by walking away when he asked for help) is seen as a monster, and he justifies using the Key by claiming that he's merely showing the others what these people are really like.
* Warehouse 13: In "Breakdown", Claudia, Pete, and Myka find themselves trapped in a "clingy house" version of Leena's B&B in the Warehouse. Try to go out the front door, come in at the back of the hallway. Jump out through a window, fall in through the adjacent window. Climb out through the hole Claudia fell in through? Come back in through the fireplace. Turns out actual artifact is a painting fused to the wall, and the only way out is to cut a door in the painting.
* Warehouse 13 incorporates historical figures (with hidden attributes), fictional characters, ancient myths and urban legends. The causes of historical events are often rooted in the effects of the various artifacts the team pursues.
* Warehouse 13 induces Rapid Aging on fashion models, forcing Pete and Myka to go undercover in the industry.
* Warehouse 13: In the episode "Savage Seduction," our heroes are transported by an Artifact into a Spanish Telenovela — quite literally a World of Ham. And it seems to affect the characters even when they're not "in character;" Pete's holding another Artifact that protects him from the effects of the Telenovela, but he's still chewing more scenery than he usually does.
* Warehouse 13. In turn, he refers to her as "Claud," something that Pete and Myka both pick up but don't use nearly as often.
* Warehouse 13, in which Fargo visits the Warehouse and Claudia visits Eureka, place the two shows in the same universe.
* Warehouse 13 is an X-Files-esque procedural which combines fantasy, science fiction, and occasional horror with Steampunk elements, all mixed together with a heaping dose of comedy.
* Warehouse 13 is a pair of underwear which belonged to a wrestler. They manipulate the wearer's mass and end up very difficult to remove, threatening to turn the unlucky SoB into a blackhole.
* Warehouse 13 is a self-propelling and multiplying dodgeball that was used in military training under the premise of "if you can dodge a ball, you can dodge a bullet". The only way to stop it from killing you with blunt force trauma is to catch it.
* Warehouse 13 is filmed in Toronto and the surrounding area, and they barely attempt to hide it. In the third season finale, there is a Valu-Mart which is supposed to be in Elk Ridge, South Dakota. Valu-Mart is a grocery store that doesn't exist outside of Canada at all. Union Station in Toronto doubled for Geneva, Switzerland in the second season premiere as well.
* Warehouse 13 is functionally equivalent, except the victim remains conscious.
* Warehouse 13 is her older brother Charles, who chronicled her adventures using her abbreviated name as a pen name.
* Warehouse 13 is sentient. To what degree is uncertain, but it is alive.
* Warehouse 13 Jinks also picks up the nickname "Poopypants" due to being a bit more serious and less prone to goofing off than his fellow Warehouse agents. He

loosens up over time, but never manages to lose the nickname.
* Warehouse 13 led to men briefly outnumbering women in the main cast for the first time. When Mika returned, Claudia told her how glad she was to see her back, after having felt outnumbered in this sausage-fest. She didn't care about gender ratios, the others just eat way too much meat at breakfast and she was glad to have another healthy eater on the team.
* Warehouse 13, Leena's entire bed and breakfast had to be moved into the warehouse and rebuilt outside because of an artifact painting that couldn't be removed from the house. The bedrooms of dead agents are also put into storage in case their personal belongings are needed again.
* Warehouse 13-looking iPhones they carry were invented by Philo Farnsworth (one of several people credited with inventing the television).
* Warehouse 13. Many of the artifacts had terrible consequences, and they were never unwilling to be serious. However, some of the artifacts started to become even more and more silly as time went on, among them an artifact that traps people inside a Mexican Soap Opera, Walt Disney's pen, and an artifact that summons a bunch of dancing showgirls that chase down people (while singing and dancing.)
* Warehouse 13" — case in point, a self-replicating dodgeball used for military target practice.
* Warehouse 13, Mrs. Frederick (who looks about 60) introduces Claudia to her grandson, who looks to be in his 80s, meanwhile she hasn't aged a day since at least the 1940s. This is a harsh lesson that being a Warehouse Caretaker has a negative side (i.e. she will outlive all her friends and loved ones).
* Warehouse 13, Myka Bering stands at 5'8"/173 cm-only 3 inches / 7 centimeters shorter than her partner Pete-and often wears high-heeled boots for work, not to mention short and tight dresses on several occasions.
* Warehouse 13, Myka complains about Pete not closing his bathrobe in the morning. Pete's response? "That's involuntary, Myka; all guys wake up like that."
* Warehouse 13 Myka does this with H.G Wells when H.G is trying to destroy the world. In the end Myka makes H.G put a gun to her head telling H.G to shoot her then since everyone was going to die anyway then H.G should just shoot her making H.G realise she can't kill Myka and has a breakdown.
* Warehouse 13 Myka has no time to wait for Claudia to hack the lock again if they're going to rescue Pete, so she gives the computer lock a roundhouse kick.
* Warehouse 13: Myka insists on mispronouncing it for this reason. Pete does not co-operate.
* Warehouse 13, Pete and Myka discover the body of a lost Warehouse agent handcuffed to a pipe in the basement of a St. Louis police station.
* Warehouse 13, Pete's love interest fled the town after being possessed by an artifact that caused her to try and kill him. Thankfully, she stopped him before he used up his one chance to tell someone the truth about his job.
* Warehouse 13, Pete was about to reveal the true nature of his work to Kelly, but having just had a small sample of that dangerous world, she breaks it up with him and leaves. Since Pete is only allowed to tell his secret to a single living person, it's very fortunate that she stops him before he does.
* Warehouse 13 program a virtual reality game and use an Artifact to help make it more real. The artifact caused players to become trapped in the game which manifested their greatest fears. They couldn't get out until those fears were conquered.
* Warehouse 13 quickly becoming complex making Myka's partner tell them to stop a small part below
* Warehouse 13 rarely misses a chance to doff his shirt and pop his pecs. He once did so without prompting in front of newly-arrived gay Agent Jinks, along with comments on how glad he is to have someone around to appreciate his body and an offer to strip anytime Jinks wants.
* Warehouse 13's stockings, a homewrecking artifact, at an insurance company named Truehart.
* Warehouse 13, stones from the tower make anyone touching them unintelligible to anyone who is also not in contact with a stone, effectively encrypting speech.

* Warehouse 13. Strangely, it's put into the Warehouse after she gives it to Myka. It's hard to believe a grappling gun would be a dangerous Artifact, especially since it would be fairly easy to check for its "Artifact-ness" (simply dunk it into the purple liquid they use; if there's a flash, it's an Artifact). On the other hand, some of the items kept in the Warehouse are not Artifacts per se but simply ingenious inventions that some Warehouse agent has decided not to give to the world (the Tesla, for example, would be extremely useful for crowd control or hostage rescue; and the Farnsworth would make cell phones obsolete; then there's the electric car that can be powered by a person's bio-electricity). It is lost in Season 3 when used by Myka to temporarily keep an elevator from falling. The rope snaps a few seconds later, and the Grappler is, presumably, destroyed when the elevator crashes.
* Warehouse 13 that has taken over the warehouse. He wins by not actually putting any ships on the board. This is used to prove a point to the AI that it is merely an incomplete version of its creator, who is a master cheater.
* Warehouse 13 that he is often considered uncouth by the new agents Pete and Myka. One episode reveals that he deliberately gives himself appendicitis every year in order to see a doctor he likes, until it nearly kills him and he finally has the guts to ask her out properly.
* Warehouse13 the first artifact we see is a Mesoamerican statue (looks like a stone jack-o-lantern) that possesses a man when he accidentally cuts his finger on it.
* Warehouse 13 The man using it threatened the agents by crushing a cup.
* Warehouse 13. The real Myka would never have done so. However, that was a lie to ensure that she didn't find out that the rest of the Warehouse staff had figured it out. The real instance of this trope was when Leena used the Farnsworth to call the fake Myka and ask about her pet ferret. Alice gives herself away when she says that she hadn't named it, which Artie and Leena both knew to be false.
* Warehouse 13: The season 4 premiere shows what happens when one particular magical artifact is destroyed. With the loss of Pandora's Box, the world loses all hope. The results aren't pleasant.
* Warehouse 13, the supposed AI created by a former Warehouse agent, which takes over the warehouse in one episode, is actually an artifact-assisted upload of his right-brain, leaving the living agent with all his creativity, but none of the logic that enabled him to harness it.
* Warehouse 13. The sword was so sharp, it could cut through light, rendering the user invisible. That was clearly a bit of hyperbole though, since that function didn't work until the tsuba (the little circle thing above the hilt) was reattached. That said, the sword is absurdly sharp in its own right, as it was able to slice through a computer monitor and stab in a man's shoulder effortlessly.
* Warehouse 13 they have paranormal powers; the series is glad to leave either option in the air).
* Warehouse 13). They tend to swing between love and hate depending on the day.
* Warehouse 13, this is the sign of the artifact of season 3's "Insatiable" affecting someone. Other side effects include an insatiable hunger and eventual death from hypothermia.
* Warehouse 13, this seems to held as the mentality of the Warehouse agency with regards to the artifacts they collect, or at least by Artie as he claimed in the first episode:
* Warehouse 13. To emphasis the switch, the actors (rather impressively) mimicked the other character's mannerisms.
* Warehouse 13) until they were revealed to be the same universe. (Not even to mention the actor paradoxes.) The gap between the two shows is perfectly illustrated in the episode "13.1" by an exchange between Claudia and Fargo (paraphrased):
* Warehouse 13 version, made by and named after Philo Farnsworth, one of the inventors of TV.
* Warehouse 13 Walter Sykes traps Myka in a chair and forces H.G. Wells to play chess for her life. Wells recollects her mentor's proclivities and breaks the rules

to win the game.
* Warehouse 13 was once a nice kid who found a bracelet that let him walk (he's crippled from the waist down). Unfortunately the bracelet's trade-off for giving something is to make one unable to feel true happiness or love, causing the person who uses it to become a sociopath addicted to the bracelet's power. Artie thought that he had gotten the bracelet away from Sykes before the corrupting influence took hold only to discover years later that he was too late.
* Warehouse 13 was to involve Aaron and Shawn Ashmore, thanks to an artifact splitting Aaron's character into two people, but Shawn was unavailable when it came time to shoot the episode, so Aaron had to handle both roles by himself.
* Warehouse 13. When it comes to this trope, excluding the Muggles, we have 3 groups of people.
* Warehouse 13, while tracking down an artifact via psychic link, the character describes hearing "Kill the Wa-bbit", to the consternation of the classical music fan on the other end.
* Warehouse 13 who wants to be punished; the others understand that it wasn't really his fault.
* Warehouse 13 with Agent Steve Jinks, formerly of the ATF, who has an unexplainable ability to always know when he's being lied to. But rather than keep this a secret because it can't be explained, he openly uses it, even on cases, and everyone who knows him for any length of time is aware of it. If a new acquaintance is skeptical, he demonstrates by letting them test him until they believe him.
* Warehouse 13 with Steve annoyed at how Claudia seems to enjoy his "campier" version more.
* Warehouse 23 is described as working by dumping the ship's inertia into an alternate timeline, where it will likely cause some localized disaster.
* Warehouse Thirteen is a tank of water that moves to envelop whoever's nearby, drowning them. Claudia almost falls victim before Leena neutralizes it. Supplementary materials suggests it was intended to form a hydrodynamic shell for increased speed in water but went wrong.
* war elephants and that most of their units wear Indian dress. Some of their units also resemble Zulu warriors.
* War Elephants: Encountered by Alexander the Great when invading India; also famously used by Hannibal in the Second Punic War.
* War Elephants — select your pachyderms, double-click the ground behind the enemy lines to order them to charge-move, and watch your enemy scatter like bowling pins.
* War elephants, with their thick hides and high health, can survive being aflame for a long time unless they exacerbate it by spreading it to something more combustible. One of the few things that aren't better on fire is a barrel of booze.
* War, Famine, and Pestilence are implied to be as old as the concepts they personify. Meanwhile, their brother Death is so old that he can't even remember if he preceded God himself, but is a subversion on the other end since he's more impartial about the Apocalypse and doesn't take any glee in destroying humanity.
* Warfare 1944. The first game of a new campaign and one of the custom games are a limited version of the D-Day invasion. Depending on your side (American or German) you are either invading or defending against the invasion, respectively.
* Warfare also produces euphemisms like "collateral damage" (killing innocent civilians) and "friendly fire" (killing our own troops).
* Warfarin, a prescription drug used to treat many heart and circulation problems, is known to have potentially harmful interactions with over 200 herbal medicines, including ginseng, dong quai, feverfew, gingko, alfalfa, chamomile, and St. John's wort. Warfarin was originally developed as a rat poison before its blood thinning properties were used in therapeutic doses, so high doses can easily be fatal.
* War Fics show humanity fighting back against the ponies, who are generally convinced they're doing this for the humans' own good.
* War for Cybertron Trilogy's 35th anniversary. The above mentioned promotional poster spoiled anyway the fact that the Ark itself is a Transformer.
* War for Cybertron Trilogy subline (a secondary line of store exclusive redecos

and retools depicting more show-accurate versions of the characters, plus some extras such as Earth mode versions of Bumblebee and Soundwave) also deliberately haves its Leader Class figures sold as "Spoiler packs": not only the actual character inside each is usually unveiled only a few weeks after the first announcement, but the packaging features writings in Cybertronian language that feature spoilers about the character. The first one included Ultra Magnus and implied his death; the second features Nemesis Prime, a character whose involvement in the series was unveiled only in the second trailer for the second season and became actually relevant to the plot only in the third one; and the third one included Megatron with the chest harness he wears to carry the Matrix of Leadership in the first half of season 3 (plus a completely unrelated retool of Paleotrex in translucent purple that is not in the show and is there just to fill up the Leader pricepoint, since Megatron is actually a Voyager figure).
* War for Fun and Profit: Instigating a war for one's own material benefit.
* Warforged (a playable race) and other constructs don't need to eat, drink, sleep or even
* Warforged is notoriously difficult to specifically categorize due to the way that they mix elements of technical death metal, black metal, dissonant death metal, post-metal, and progressive metal. The band themselves have lampshaded it, jokingly referring to themselves as "post-progressive blackened technical death djent metal".
* War for the Crown ends with Princess Eutropia succeeding her father, Grand Prince Stavian III, as Taldor's first female monarch.
* War for the Oaks has the Seelie Court and the Unseelie Court. The Seelies are, at the least, tolerant of humans, and usually kind and friendly — as the Fae would define it (The Pouka, who is more familiar with humans than most, does say they have been "unkind" to mortals in the past). They're even capable of falling in love with humans as humans would recognize love. The Unseelies are malicious and nasty, and think nothing of twisting a mere mortal to their ends.
* War for the Oaks, one of the few unqualifiedly positive benefits Eddi gets from her new association with the fey comes when a brownie volunteers to move in and help take care of her apartment.
* War for the Planet of the Apes. Apart from slaving a race of sentient beings, crucify some of them and deprive them of food and water, he kills his own son and some of his men... and his men's families, to prevent the spread of a non-lethal virus. His sociopathy is probably motivated by his obsession with the survival of the human race.
* War for the Planet of the Apes, as the mutated strain of the Simian Flu is starting to affect those who were previously immune, turning them into mutes with diminished mental capacity, meaning that no matter what they do, human civilization is doomed in a generation or two. However, they're still trying to massacre the apes anyway if only to stop them from becoming the species that replaces them.
* War for the Planet of the Apes, Bad Ape tries to look through binoculars to spy on the Alpha Omega base, where Caesar and his brethren are being held prisoner. He is worried about how far away it looks until an annoyed Maurice flips them over.
* War for the Planet of the Apes, but lives just long enough to see his fellow apes finally get their happy ending, with his closest friend Maurice assuring him that future generations of apes will know what he sacrificed for their kind.
* War for the Planet of the Apes. Red is also said to have been one of Koba's coconspirators in the previous film, but like Lake, he didn't actually appear in it.
* War for the Planet of the Apes was mostly stuck with one-time roles in sitcom shows often playing a mean-hearted bratty girl. In her breakout role, she plays a mute, delicate angel.
* War for the Planet of the Apes, which caps off the reboot trilogy, pretty much ends on this.
* War for the Planet of the Apes with vague pretensions towards godhood, who commands an army of fanatically loyal followers, using psuedo-religious doctrine, who battles with and, eventually, enslaves the apes (the "natives"). Woody

Harrelson has even noted the parallels to Kurtz.
* Warframe about a Grineer soldier who wants to be just like the Tenno. Eventually, Clem was made into an actual character in the game and had a series of sidequests dedicated to him that had various nods to the original comics.
* Warframe against all sources and types of damage, and several factions equip their troops with regenerating shields, but there are ways around both.
* Warframe, a group of particularly enthusiastic Warframe players have dedicated themselves to maintaining the Fortuna 69 instance of the map, keeping their characters logged in to ensure that it never goes away.
* Warframe all have basic parkour training as well, so there's not much risk of leaving them behind on accident.
* Warframe also has the Infested, the results of a techno-organic virus infecting and mutating various people and machines in the setting. Typically, Infested will mindlessly swarm the Tenno or whatever else they're attacking... until you encounter bosses. Which will
* Warframe, although each faction maintains its headquarters in other locations.
* Warframe), and are able to do business with all other factions, including their enemies. The dark side comes out every once in a while, especially in the Fortuna expansion, which features a colony of Corpus workers who are forced to constantly sell themselves deeper into debt because of Nef Anyo's horribly exploitative policies. They end up hiring the player character as a deniable shadow strike force just to get enough leverage for basic rights such as not being disassembled when they fail to meet quota.
* Warframe, and grant extra health for not bringing a melee weapon. That said, even the melee weapon associated with her, the Redeemer, is also a gun.
* Warframe, and without them the planet would presumably return to its natural state as we know it.
* Warframe are earned respectively through excavation missions and and scavenging parts scattered around the Origin System, with the upgrades for the latter gained by repairing wreckage rewarded from railjack missions.
* Warframe are equipped with giant cannons aimed skywards that fire at something, probably some ships of the Corpus they are at war with.
* Warframe are guarded by sensor regulators, balloon drones that will trip the alarm the moment an intruder gets into their cone of view, conveniently depicted as four lines jutting out from its camera. Don't think about trying to destroy them, as they will also trip the alarm if they survive the damage, unless you've already gathered the data.
* Warframe are human creations. Everything in the setting originated from earth.
* Warframe are this. A standard Grineer Galleon is just over 4 kilometers long, while Corpus Obelisks appear to be significantly larger.
* Warframe are used as a deniable shadow strike force since the Solaris can't be seen publicly fighting against the Corpus.
* Warframe armored bulkheads that can seal off the leaks, but the player has to manually activate them.
* Warframe, Ash's 'Smoke Screen' ability throws down a smoke bomb that momentarily stuns enemies and renders him temporarily invisible provided he does not shoot an non-silent weapon.
* Warframe (as in actual credit chits that were apparently encased in rock).
* Warframe as though they are far superior to those silly superstitions everyone else holds.
* Warframe become the most powerful greatsword. It also has a hefty damage bonus against the Sentients, who are normally infamously hard to kill.
* Warframe before they can use each Junction, it's doubtful that normal Rail Agents have to bother.
* Warframe besieging Fortuna's surface elevator by outrunning it on a hover board they are given.
* Warframe "Blind Justice", single-handed "Tranquil Cleave", and twin-handed "Decisive Judgement".
* Warframe, but it becomes more of an issue in Sorties and other high-level

missions. Then there are Spy missions, which require three separate terminals to be hacked, each of which is best handled solo in order to reduce the risk of alarms. Spy missions are the only missions where you are expected to split up (and told off if you bunch up, since you're just slowing down the mission).
* Warframe, but they can still fight. Cryopods are also the standard target in Defense missions, though some have something different.
* Warframe called Teralyst, Gauntlyst, and Hydrolyst, as well as countless tiny Vomalysts. Unlike Hunhow, the Eidolon is now mindless, its scattered pieces wandering the Plains trying in vain to recombine.
* Warframe can also cause a similar lockdown which is automatically lifted when he disappears.
* Warframe can attack by vomiting stuff, such as mutalist MOA's loogies that create lingering harmful puddles or nauseous crawler's paralyzing juices.
* Warframe caught in Orb Vallis lakes, they probably are). They can also get you equipped with modular guns that look like they were made from repurposed tools.
* Warframe, Cephalon technology embodies this aesthetic. Weapons and tools have streamlined shapes with minimal decoration beyond some LED trim and suspended holograms. Apparently even AIs can have a taste in fashion.
* Warframe community are referred to as "Tenno" by the devs. The community itself adopted "Registered Losers" as a nickname after a gaffe from Community Director Rebecca Ford had her mix up the word "users" with "losers" during an interview.
* Warframe compared to the Tenno he trains, but what he lacks in amazing and powerful abilities, he more than makes up for with his centuries of experience.
* Warframe: Corpus security cameras, if they see the player, will often trigger laser barriers, leading the player to need to shoot it out to disable said barrier. It's advised during Spy Missions to do this trope, because if the player gets caught by one it'll trigger the destruction of the data, necessitating a fast recovery of said data before deletion completes (In a sortie, data deletion is mission failure).
* Warframe deliberately takes on Margulis's mannerism to make the children feel more comfortable with her.
* Warframe, does pretty much that — Gauss runs full-tilt forward, and unlike other abilities, Power Strength doesn't affect this skill. Sprint Speed Mods (such as Armored Agility, Rush and the Sprint Boost Aura) are what affect it. Since they all stack alongside speed-boosting abilities like Volt's Speed, Gauss can end up running fast enough to not only outpace the Itzal Archwing (which in itself is the fastest Archwing), but can even make the camera glitch out!
* Warframe does this with a variety of melee weapons: staff users throw the bar across a humanoid opponent's neck and violently wrench it to one side, whip users coil the length of the whip around a victim's neck and pull down, and gauntlet users just straight up grab the head and twist. The end result is always a rather loud crack and bonus experience for stealth kills.
* Warframe, do this a lot. They're even infamous for selling weapons to their own enemies. Part of this is because the Corpus is made up of multiple merchant-kings and guilds who might have different alliances, but most of it is just that they will literally sell anything to anyone.
* War Frame due to the introduction of armour customisation, with shoulder plates.
* Warframe energy, and are disabled by shooting ID scanner over the doorframe.
* Warframe: Excalibur has a rounded set of stats and a decent mix of damage and utility moves. There are better "casters", better tanks, better damage-focused frames and better utility-focused frames, but most of those require a fair bit of skill to use well, and Excalibur's rounded loadout makes him good for beginners.
* Warframe features a few variations. Cephalons do this by default, being data-based artificial intelligences with no human avatars. Your MOA companion can also do this, lighting up when it beeps at you. The debt-slaved Solaris of Fortuna light up when they talk because none of them seem to have normal human heads. Finally, mysterious space DJ Nora Night has flashing accessories that light up during her short transmission clips to you.
* Warframe features several whips used as melee weapons. The Lecta has a taser

attached to the end. The Scoliac is an infested whip that can deal toxic damage. The Atterax is a whip with a row of saw blades attached to the end, being described as a particularly brutal execution device.
* Warframe for skins, both weapons and armors, and helmets, created by fans, called "TennoGen" in-game.
* Warframe for superiority (whenever they're not being assaulted by Tenno, of course).
* Warframe found in Spy datavaults, where they will be teleported back to safety only to run right back into the pit.
* Warframe from the boss is invariably more desirable than what comes from even a hundred grunts, and players are impatient things.
* Warframe has an overwhelmingly deep, dark, and booming voice while speaking.
* Warframe has a seasonal "Dullahan Mask" cosmetic that replaces the head of a Warframe equipped with it with a Jack O' Lantern.
* Warframe, has many of these. Most famous are the servofish that swim in the coolant; there are servofish for taking coolant samples, for mapping the underground rivers, for killing organic animals, and for repairing the other servofish. There are also spider-like Raknoids that are used as cheap scouts and security drones.
* Warframe has not only the Dual Zoren hatchets (which can be used to craft the fire-based Twin Basolk), there is also the Scindo and its Prime Variant, the latter even stated to have been an executioner's tool.
* Warframe has the Kubrow and the Kavats, which are functionally canines and felines respectively. However, Kubrows are hatched from eggs and have bat-like snouts while Kavats have reptilian features and can turn invisible. The Plains of Eidolon have Condrocs, which are just buzzards and Kuakas, which are chinchilla-like rodents. The Tenno refer to a wedding as a "Nuptia".
* Warframe has the Ripkas, a pair of hand-mounted chainsaws with decent critical hit chance and focusing on Slash damage. Their original purpose was stated as cutting through metal and overgrown wildlife. It even has a unique mod made for increased critical chance and dismemberment of enemies.
* Warframe has two examples, one for the Grineer and one for the Corpus.
* Warframe have the capability to speak, but feel that actions speak better and instead communicate to each other using subtle gestures if any communication is needed. The only Tenno to speak so far is Valkyr, who upon using her "Warcry" ability emits a scream.
* Warframe, he excels at defending a point, boasting a wide arsenal of traps that can stun, displace and even crush those who oppose him.
* Warframe. If you succeed in fighting them off anyways, she'll somewhat reservedly praise your skill, and then tell you to follow orders next time.
* Warframe. In the Fortuna expansion, Eudico is your contact with Solaris United, and she handles all your missions.
* Warframe into the ground, spewing out ethereal swords than pin enemies to walls, and "Exalted Blade" summons an energy sword that sends out waves of destructive energy with every slash.
* Warframe is a massive asteroid with spaceship engines built into it, allowing the Grineer high command to evade detection and attack from their enemies by constantly relocating their base of operations.
* Warframe is home to desert skates, which swim in the sand and will attack Tenno and Grineer alike.
* Warframe is one of the six composite elements, gotten through combining Heat and Toxin. It can cause enemies to be covered in a toxic fog that damages others nearby, making it very useful in huge crowds. The dart gun Zakti is the only weapon in the game that does Gas damage normally, and with it's darts exploding into gas clouds that can cause more gas clouds, it's an area-of-effect monster.
* Warframe. It is colloquially referred to as the "Forward Artillery", though its actual name is the Tunguska Cannon.
* Warframe, it's not that surprising that there's no bathroom on the Orbiter. Eventually one of the locked rooms opens up, filled with a small ecosystem of

plants and animals, in addition to some machines. Ordis explains it's for attending to the Operator's biological needs, which seems to include both food and cleansing.
* Warframe, it's originally implied that they were all uploaded against their will (and modified after to be loyal), but at least one woman uploaded herself willingly. Her mind was deteriorating, and she wanted to preserve herself.
* Warframe killing an enemy with Puncture damage inflicts this on whatever body part the attack went through, be it the head, chest, or legs.
* Warframe: looking like one of the warframes and requiring suspiciously similar components).
* Warframe, maps are littered with explosive canisters that will detonate nigh-instantly upon being shot, clubbed, cut open, or otherwise. This can be a good thing (shooting a canister to blow up and knock over enemies near it), or a bad thing (knocking yourself down by hitting one absentmindedly while surrounded will ensure a swift death).
* Warframe may send you to meet Garv, a Grineer castaway who will challenge your team to a friendly competition to see who can kill most of the Infested. Two percentage bars will show up, one for Tenno and one for Garv and his fellow survivors, that fill up with every enemy killed. The bounty success depends on your team reaching 100% before the Grineer, preferably before the latter even reaches 50%.
* Warframe New Loka expects to "return" to, but they seem to define all their enemies as "impure", and only themselves as "pure".
* Warframe). Nullifiers are the most common, projecting a sphere centered on themselves that cancels any Void powers in their radius. Various Scramba enemies do something similar, and the Null Bursa can shoot grenades that create the same field. Finally, while magnetic damage doesn't directly interfere with Void powers, it drains the energy of anyone hit with it.
* Warframe: Numerous. The Grineer have elite lancers above their basic lancers, and the Corpus have elite crewmen above their regular crewmen. Technically any unit above the most basic lancers, crewmen, and chargers (for Infested) count. However, the most obvious are the Eximus units, which are regular units with heavily enhanced stats, health, and a special ability like energy drain or a frost aura.
* Warframe, of all things, gets in on this with the 'Domestik Drone', a Corpus Robot that can be found roving about the Corpus Gas city, cleaning up filth. You can buy one for your ship, if you want to.
* Warframe, often times the first sign that a player has been affected by Radiation is when everyone else in the team is suddenly downed, as the player's overpowered weapons kill everyone in one hit.
* Warframe of which very few in the Origin System can stand on equal or greater footing with (let alone the squads of 4 they often work in). However, for the downtrodden oppressed or threatened by any of the game's enemy factions: the Tenno are their protectors and saviours, preying on those who would prey upon the defenceless.
* Warframe: On the Invasions Tab, the Grineer and Corpus will often be battling one another, and offering up rewards to Tenno that side with them. After clearing 5 invasion missions for one side, the other will put out a hit on your Tenno, represented as a Death Mark similar to the one the Stalker can give upon killing a boss; the Grineer will enlist the Grustrag Three, while the Corpus have Alad V sic his Zanuka pet upon you, and each one only spawns inside their faction-controlled mission nodes (meaning no Zanuka in a Grineer-controlled node, for example). In addition to these, whichever Syndicates you have negative standing with will occasionally send out Eximus Squads to attack you.
* Warframe on the other, and caught between them are all the little people who have to survive in a post-apocalyptic, transhumanist wasteland where half the animals are actually robots that violently defend their territory. Then there are the Tenno, the player characters, who work with all of them at once in order to play the big sides against each other and keep the innocents safe.
* Warframe operatives travel around In Liset "stealth dropships", which can apparently remain undetected from as close as visible range. A big factor is

probably how tiny the Lisets are — despite the moniker of dropships they're not much bigger than a bedroom. When not in use, the dropships are docked to the slightly larger Orbiters, which are stealthy enough to float in the middle of enemy Grineer/Corpus fleets and are capable of easily going into FTL the second they release their cloaking. They completely outclass all other stealth and detection systems, making it very difficult to force the Tenno to fight a traditional war.
* Warframe or even being hot-dropped uncontested at their facilities. More hilarious are the situations where players can see their landing craft waiting at the evac, without any Grineer or Corpus so much as reporting them. You'd think someone would watch those landing zones...
* Warframe. Parodied by Alad V if players chose to back him during the Gradivus Dilemma event.
* Warframe: Played with. The Orokin tried to use their highly advanced weapons against the Sentients, but the Sentients easily subverted their technology and used it against them. The Orokin were forced to resort to "zero-tech," ancient weapons without any real technology in them. But the Orokin were so ridiculously advanced that they didn't see much of a technological difference between a gun and a sword.
* Warframe, riddled with so many genetic defects that they're dependent on cyborg technology just to survive.
* Warframe right? Nope! Give the captive your pistol, and they use it with very good accuracy on anything that comes close. Despite presumably getting tortured, they still are able to tank a few bullets, and if they lose all their HP? They still hang on for 20 seconds during which you can apply first aid to get them back to their feet.
* Warframe: Saturn was historically a merchant world, but by the time of the game the Grineer have blockaded the famous shipping lanes and driven everyone else out.
* Warframe show up in the Corrupted, implying that even total brainwashing wasn't enough to keep these soldiers from realizing they should be shitting themselves in fear and running at the sight of a Tenno.
* Warframe, since he's the only frame who is sturdy enough to survive long enough to hit the enemy with it. However, they are hands-down the most powerful melees in the entire game, capable of easily pounding the most dangerous foes in the game into crudeburger and coming with an enormous knockdown AoE on their jump attack.
* Warframe, since it pauses the otherwise lightning-fast ninja warriors for a second as the animation completes. One of the first things new players learn is how to prevent the animation from triggering, in order to keep speed up.
* Warframe situations), but now want to destroy all other humans in the Origin System. While in the Orokin Empire only the highest caste were true Orokin, the Sentients don't seem to make any distinction, and consider all humans to still be Orokin who need to be destroyed.
* Warframe. Some of the Orokin's towers escaped into the Void, where their technology was preserved, but others were left behind to become filled with the Infested.
* Warframe spaceships, look no further than the Sentients, whose Murex troop ships are like floating biomechanical cathedrals, and infiltrating one is like entering its own pocket dimension.
* Warframe spend most of their time wandering the Origin System helping out the little people caught between the warring factions.
* Warframe survivors, was given the chance to recant her support of the children, she did this instead. The Orokin executed her shortly after.
* Warframe taunts you with "This one has your name on it!" as he pulls out his gun.
* Warframe than are really necessary, especially while players are on the Plains of Eidolon.
* Warframe that are actually just small pieces of a much larger Sentient that was defeated long ago, now left to wander the Plains, mindlessly trying to recombine.
* Warframe that he can't seem to decide if he's talking metaphorically or not.
* Warframe that they edged the line between living creatures and machines. They speak of their wombs and their children, but at the same time they are easily able to subvert any Orokin technology. This is why the Orokin needed the warframes,

armed with primitive "zero-tech" weapons like swords and guns, to fight them.
* Warframe: The bat-nosed egg-laying Kubrows serve as a stand-in for dogs while the long-legged Kavats are the equivalent to cats.
* Warframe, the cast is able to instantly recognize the player no matter what Warframe they're using, even though they look radically different and can have entirely different powers and genders. This is on top of the fact that there are hundreds or thousands of these Tenno running through the system at any given time.
* Warframe: The game takes place in a future so distant that the modern-day era is practically forgotten, and biological engineering in the distant past gave rise to multiple varieties of humans.
* Warframe: The Grineer are a fanatical race of cloned cyborg conquerors bred to abhor all that is not Grineer. The few decent, honourable, reasonable Grineer such as the Steel Meridian, the Kavor Defectors, or the quirky Clem are considered genetically defective.
* Warframe. The Grineer Empire also relies on low-tech weaponry, but only because they lack the technology and know-how to create more advanced weapons; while Tenno designs are sleek and elegant, Grineer equipment looks like it's been cobbled together out of scraps (which likely isn't all that far off from the truth).
* Warframe, the Grineer make use of "Ramsleds", which are capable of punching through the hulls of both Corpus and Tenno ships to deploy a full squad inside. When siding with the Grineer in Invasion missions, the player may get an opportunity to use one themselves at the level's midpoint. Generally, any ship larger than a fighter will be able to deploy at least one Ramsled. The Corpus and Tenno also make use of boarding parties when in pitched space combat, but handle the delivery of said parties differently (Portals for the Corpus, and either phasing through the hull or entering through the airlock for the Tenno and simply slingshotting their frames through the hulls of ships).
* Warframe, the Lotus, who provides live commentary on your mission whether you're around Mercury or on Sedna, 86 AUs away from the Sun. Little Duck from Fortuna can likewise comment on your Disruption missions anywhere in the system seemingly without departing from Venus.
* Warframe. There are also electromagnetic anomalies or radiation hazards that can make sortie missions extra difficult.
* Warframe: The skies you can see are a sure sign that it's not the Solar System as we know it.
* Warframe. The soul/life energy of the victim also visibly explodes once Nekros or Garuda is done with them, just in case you thought those Grineer were going to experience an afterlife.
* Warframe, they are instead dropped from above the clouds in capsules.
* Warframe. They do still have a strong sense of honor and duty, however, especially in the way they protect civilians from the Grineer and Corpus.
* Warframe they normally use) are some version of big laser. All their ships have them, both the Profit-Taker Orb and the Exploiter Orb have primary laser weapons, and the cutting-edge Ambulas have a laser cannon as well. The Sentient Eidolons have something similar, and in fact it's quite possible that the Corpus versions are based on Sentient technology. On the player side, there's the Opticor, a Corpus-made laser cannon that can charge up and deal a massive amount of damage to any target.
* Warframe. This allows for rare, limited, or overly grindy equipment to be bought outright and gives players a way to get platinum without buying some.
* Warframe, this is Grendel's whole theme. He can use his first ability to absorb enemies into the maw on his gut, then use his second to convert them into a party-wide buff or his third to turn them into a projectile.
* Warframe. This is particularly played up with Nekros, Banshee, and Saryn, who are shown terrorizing their foes as they wipe them out in their Prime trailers.
* Warframe, this is the rationale for Survival missions - the player's cell has to distract the stage enemy while another group of Tenno, "Alpha Team", conducts a raid offscreen.
* Warframe to a whole new level. Perhaps it's to make up for being just a degraded

clone head kept alive by inferior Grineer life support machinery...
* Warframe, turning her into one of the most ridiculous sources of damage-per-second in the game.
* Warframe use Condors to deploy their own troopers in the heat of battle.
* Warframe uses his signature thurible to whip himself in his ability animations, particularly when using his "Penance" ability, which sacrifices all of his current shields to provide a life steal for his allies alongside a passive fire rate and reload speed bonus.
* Warframe) using their Archwing, a personal jetpack normally used for space travel. The underwater segments are strikingly detailed, and the players haven't leveled any complaints about the mode that Archwing combat didn't already have.
* Warframe. Vast cities and technological ruins dot the planet, but they have been completely consumed by the forest. One mission type revolves around stopping the Grineer from poisoning the forest as they plan to use it as an industrial base to finish their conquest of the system. Despite all this, the primitive Ostron tribes have adapted to life, and are staunch allies of the Tenno.
* Warframe was able to hijack the developer's real life Twitch stream back on March 7, 2014.
* Warframe was originally rated T by the ESRB for its beta release, but was switched to an M later on. Gore and dismemberment were present in the game from the beginning, but became more prominent with further updates.
* Warframe, which can easily keep up with assault rifles, plasma casters and handheld laser cannons.
* Warframe, which predictably got out of control and is now a constant threat to any life in the Solar System.
* Warframe, while Corpus Condors are seen using them to carry Ambulas units to Frohd Bek's spaceship.
* Warframe: While nearly everyone is transhuman by the start of the game (and none more than the player characters), there are still some worth noting.
* Warframe: while they were immensely powerful at taking down Sentients, their rage made them uncontrollable. Ivara's Leverian story later implies that Prime Warframes are NOT in fact, prototypes, subverting this. Rather, the non-Prime models were in fact the originals, and are tested to see if they're worth keeping. Those that survive their ordeals and prove their worth were rewarded with the superior, Primed versions of their models, while ones that failed were scrapped and forgotten.
* Warframe who abused and tortured and slaughtered anyone beneath them at will. When the Sentients were defeated, the Orokin gathered the Tenno for a great ceremony honoring them... at which point the Tenno slaughtered the Orokin leadership in seconds in vengeance and justice for their crimes, shattering their empire overnight.
* Warframe will sic their superweapons on these stations, threatening to destroy them unless the Tenno team up to destroy these threats. The Tenno themselves can also build Clan dojos, which are hidden somewhere in space.
* Warframe with Braton being redesigned to imply that it's a decent Tenno reproduction of Orokin weaponry instead of a mass-produced Corpus reproduction.
* Warframe woke up. The Tenno fight to keep the Grineer and the Corpus as balanced as possible, in order to keep both sides weak so that the innocents caught in the crossfire have a better chance of survival.
* Warframe, you can choose to mount them on trophy boards and display them in your Orbiter.
* Warframe, you may encounter doors that require two players standing by their control panels in order to open. If there is only one player in the squad, activating one of the panels will suffice.
* Warframe, you will be automatically brought back up with no penalty aside from losing any buffs or abilities you had active on your frame when you fell, such as Rhino's Iron Skin.
* War from Another World: When a world and its inhabitants unwillingly gets drawn into a war from elsewhere.
* War Front: Turning Point including the Maus heavy tank, the Soviet's Kharkov

Rampager takes the cake. It's a superheavy tank with a huge main gun and 4 smaller turrets (though smaller in this case means a pair of 75mm and 85mm cannons) that dominates any ground battles it's involved in.
* War Front: Turning Point: Russians take Germany's fall as the chance to advance into Western Europe, triggering a new conflict with the Allies.
* War Game, a Civil War re-enactment is interrupted when somebody finds a genuine corpse lying in a pool of red. It turns out his neck was broken; the red is from a dye pack he was wearing for his big death scene in the re-enactment, which broke while his killer was hiding the body.
* Wargame: European Escalation and its sequels. Yes, there are tanks, and potentially lots of them, but tanks running about unsupported are likely to be rapidly demolished by infantry and anti-tank missiles without ever seeing an enemy tank.
* Wargame: European Escalation, and most tanks come with their variants so, for example, you will find 5 variants of the T-55, from the basic T-55 to the ATGM armed, well armoured T-55 AMV-1, another example for NATO, the Leopard 1A tree brings from the 1A1 to the 1A5, each one stating consecutively better stats like speed, armoure, AP capabilities, inbuilt machine gun, etc.
* Wargame: European Escalation has four different World War III scenarios from 1975 to 1985 depicted mainly at the conventional level.
* Wargame: European Escalation out of artillery, on the other hand, almost never works, but is, on occasion, hilarious.
* Wargame: European Escalation the two factions are NATO and Warsaw Pact, which are later subdivided into four countries. NATO(USA,France,UK,West Germany) Warsaw Pact(USSR,Poland,East Germany,Czechoslovakia).
* War Game Leveraging the Internet) to combat Somali pirates. It puts teams of players in the roles of the Navy and pirates in which they will have the expected resources of each side and have to pursue their respective goals against each other. A control team ensures no one does anything phenomenally stupid or unrealistic.
* Wargame: Red Dragon, too, as anybody who has seen a late-series Tunguska could tell you.
* WarGames. A death bloom appears around the Wildfire facility, with speckles nearby and tickling population clusters. As the projection continues, most of the United States is engulfed, as is southern Canada and northern Mexico. The computer then displays "601", an error code signifying too many dead bodies to count.
* WarGames and initate an automatic "counter-strike" against the USSR.
* WarGames and unnecessary to the story, while Ebert thought Falken and his messages were essential.
* WarGames a set is built to represent NORAD's War Room. Much larger and more impressive than the real thing. But for some reason, the NORAD war room you see in the movies never has any Canadians present, even though it's the North American Air Defence alliance.
* Wargames, both miniature and board, usually have some classes of terrain that is classified as 'impassable' to all or some kinds of troops- for instance cavalry in woods. While, yes the men could dismount and lead the horses through, in reality they didn't and the men wouldn't train for it; its not easy getting 600 men to the correct point of a wood in the middle of battle, in the correct place in their line and form up, and giving such a command would have a real-life subordinate quite possibly trying to find a way not to do something so suicidal. Where something out of the ordinary did happen it is usually dealt with by scenario specific rules.
* WarGames) but by having his voice actor read his lines backward and then chopping it up and adding a filter: "Would you like to play a game" was read as "Game A Play To Like You Would" and then recut and distorted.
* WarGames computer calls David back, the FBI manages to trace the calls and find him.
* WarGames, David and Jennifer definitely get into the spirit of this trope when they start playing the "Global Thermonuclear War" and gleefully discuss which U.S. cities they should bomb first.

* WarGames: During the scene where David initiates the game, he says "sometimes people make mistakes." If you look at the screen afterwards, you can see that he demonstrated this himself by typing "sometimes people make mistak".
* Wargame series are best kept out of harm's way, as they're vital to capturing sectors for resource points and reinforcements. However, they range from tanks to helicopters, giving them a good chance to defend themselves.
* WarGames: he seems at first to be a stereotypical General Ripper and is quite prepared to launch America's nuclear missiles at the Soviet Union, but he is actually very reasonable and makes the decision not to launch when Falken tells him that the incoming Soviet attack is just a computer glitch.
* WarGames in the beginning. It is due to their disagreement during the opening simulation that NORAD decides to replace the missile crews with the WOPR system.
* WarGames, is a Playful Hacker whose attempts to preview games nearly causes a global nuclear war.
* WarGames is itself just a simulator, but the computer JOSHUA can't tell the difference between simulations and real life, and is not inclined for NORAD to tell the difference either. Thus, what should have been just a game nearly causes a real nuclear war.
* WarGames is one of the few times in popular culture that you see law enforcement actually pull out a Miranda card and read the text as someone gets arrested.
* WarGames is the last major film to have a non-robotic AI antagonist. It was just a computer game that somehow managed to gain access to actual nuclear missile silos. It just thought it was playing the game it was programmed to do.
* War games mentioned show the British dividing themselves into Ack Army and Beer Army.
* Wargames might be the last place you expect this trope to appear, but it is in fact part of the canon of
* WarGames move is not to "play the game" at all. At least that seems to be the Aesop. In any case, WOPPER's "logic" is sound and subverts the notion that one can rationally plan a nuclear war, so this may count as a subversion of the trope.
* WarGames movie, a scientist is hit by a car while jogging but it was an assassination made to look like an accident.
* WarGames on the part of anyone whose actually seen the movie, since "the only winning move is not to play".
* Wargames Research Group of Irregular Knights is their impetuosity: unless constantly guarded, they are liable on charging spontaneously the nearest enemy and thus ruining the battle plan.
* Wargames Research Group: War Elephants are the most powerful (and most expensive) units in the DBA, DBM and DBMM game systems. They are vulnerable to shooting and light troops, however.
* WarGames, right down to the first cinematic reference to the term "firewall". In fact, practically every hacking-related trope from the past 30 years owes its existence to this movie.
* WarGames showed the actual Cheyenne Mountain complex. The NORAD room in that was a mock-up (the most expensive movie set ever at that time) and far more snazzy than the real one. This was due to the film-makers having insufficient security clearance for the real one.
* WarGames. Somewhat justified, because WOPR isn't really "talking", it's simply printing text which is run though a fairly simple text-to-speech synthesizer on the protagonist's home computer. The voice was provided by Falken's actor John Wood, who recorded his dialogue word-for-word in reverse to give it a flat affect, e.g. "Shall we play a game?" was recorded as "game? a... play... we... Shall"
* WarGames, the Air Force brings David (Matthew Broderick) to NORAD because he hacked into the missile control system computer. The first example happens when they leave him alone in McKittrick's office where he has access to a computer terminal. Next, they lock him up in the infirmary where he (not surprisingly) finds enough supplies to facilitate a crafty escape using medical supplies and a tape recorder.
* War Games The Dead Code movie is uploaded into RIPLEY in order to save the day.

* WarGames, the general in charge of NORAD delivers this opinion: "Mr. McKittrick, after very careful consideration, sir, I've come to the conclusion that your new defense system sucks." To which McKittrick responds, "I don't have to take that, you pig-eyed sack of shit!"
* WarGames: The Match Beyond are a man down (and thus, the underdogs) going through the majority of the match. This also increases the drama when the faces are able to even the odds after every advantage period.
* WarGames. The only person who has anything that comes close to a military haircut is the four-star general. The rest of the members of the Air Force in the movie look like they haven't had a military haircut in months.
* WarGames, the parents of Matthew Broderick's character are having dinner where the father butters his bread and then uses it to butter his corn-on-the-cob, which, he finds out, his wife didn't cook "to preserve the vitamins." He begs her to cook the corn and use pills for getting more vitamins in their diet. Nothing else is said about this scene, not even by them later.
* WarGames. The scenario repeats again and again until the message is imparted.
* Wargames: the silo crews in the opening are specifically not told it's a drill to test their reactions in a real WWIII situation.
* War Games, Under the Red Hood, Death in the Family is a Pyrrhic unresolved.
* WarGames: When David Lightman visits his programmer friend Jim, Jim has his head under a table. When David says his name, Jim raises his head and bumps it on the table.
* WarGames where thousands of nuclear missiles were shown on a giant map traveling across the world and exploding, not once but hundreds of times, as the WOPR computer displayed multiple strategies to try to "win" a nuclear war.
* Wargames, which typically feature maps full of troops duking it out at varying levels of realism.
* WarGames: Win a game of Global Thermonuclear War. It can't comprehend that the consequences of fighting a simulated nuclear war are vastly different to the consequences of fighting a real one, in either case the death toll is just a number in a memory address as far as Joshua is concerned, and in either case winning is better than losing so it tries to win by any means necessary. Just like Steven Falken programmed it to.
* Wargaming — games as somewhat competitive exercises in tactical skill.
* War Girls: Both the Biafrans and the Nigerians use huge mecha suits in the war.
* War Girls: During a hostage situation, the War Girls strap C-4 to the hostages and threaten to detonate them if the Nigerians attack.
* War Girls: The Biafrans construct synthetic soldiers or "synths". One is assigned to work with each War Girl. They are known as abd.
* War Girls: The eponymous War Girls are an all-female squad of soldiers.
* Wargi. They have yet to lose a pit fight, as the bigger direwolves underestimate them.
* War God: A deity who represents warfare and violent conflict, whom soldiers and warriors are expected to pray to for winning battles.
* War God) and despair respectively, and nowhere does it say the victims are necessarily enemies (although in Khorne's case, presenting the skulls of the weak and defenseless as mighty trophies is a good way to get turned into a Chaos Spawn).
* War God believes in the strong ruling over the weak, which to him means gods directly lording over mortals.
* War God by carrying no weapon but having a glowing blade manifest in his hands whenever he attacks.
* War God Demonbane, the hidden, second form of the titular mecha amount of the aforementioned universe-destroying, multiverse-colliding abominations.
* War God: Generally barbaric peoples' Gods are as warlike as the tribes from which they are worshipped.
* War God, his appearance was a blonde man with red eyes and black clothing.
* War God, instead ending up chained for all eternity at the base of the Skull Throne, forging enchanted weapons and wargear for his chosen champions to use.
* War God Khorne despises magic and forbids his warriors from using it if they want

his favor. Magic weapons and the like are permitted so long as they result in more bloodshed, and the base of the Skull Throne is a massive forge where kidnapped sorcerers and cowardly warriors toil away creating enchanted weapons for his champions to use. Meanwhile, Tzeentch's followers tend towards a manipulative, backstabbing mindset, and so look down on Khornates as simple-minded brutes.
* WarGod series because setting up The Strifing killed, drove insane, or drew out all the powers of every other remaining wizard. Wencit survived only because he's a once-in-a-thousand-years Wild Wizard who's not dependent on his own magical powers.
* Wargods Of Olympus, naturally has Greek-myth-style Amazons as a playable army. Maenads and Medusae are also unit options.
* War Gods. The cult also sponsors an order of knights, the Knights of the White Wolf.
* War Gods: The final boss and his predecessor are both immune to throw attacks. Since throws are game-breakingly overpowered in this game, it is easy for a new player to exploit his way up to the boss and then be powerless when his only method of attack no longer works.
* War Gods, the "turning into stone" part won't work on him and he'll taunt the head instead. Medusa still blasts him to pieces.
* War God to pick up Garagos' portfolios of bloodlust and destruction).
* War God, was born a fully armed adult and proceeded to slay most of his 400 siblings. The reason? They were going to kill their mother Coatlicue because they thought her sudden pregnancy was a dishonor on her.

* Wargs and Peace, near the end, The company makes several comments that imply that they're just about to figure out who the warg is...but actually they're not.
* Warhammer 40,000), 10,000 years later the mortally wounded Emperor, now confined in the life-supporting Golden Throne, is venerated as a god and the names of Horus and other traitorous Primarchs have been removed from Imperial records.
* Warhammer 40,000 about the Warp is that you can never tell when you will emerge. More than once a fleet has arrived centuries after (or before) departing. This occasionally creates outright paradoxes; one of the most famous is an Ork warlord accidentally ending back where he started just before he left and promptly murdering his past self and stealing a second copy of his favorite gun.
* Warhammer 40,000. A common saying is that any Cadian who can't field-strip his own lasgun by the age of ten was born on the wrong planet.
* Warhammer 40,000 actually has one straight "beloved servant" example among the brutal aversions: the Chapter Serfs of the Space Marine chapters. Chapter Serfs are an integral part of a Chapter, filling all roles that aren't impossible for anyone other than a Space Marine to fill, and they do so far better than their counterparts outside the Space Marines. They are treated accordingly by their masters, considered full members of the Chapter Cult, and their lifestyle is superior to that of all but the richest people in the Imperium. Chapter Serfs are often made up of those who aspired to become Astartes, but failed along the way before even joining the Neophyte rank (scouts in most chapters, Blood Claws in Space Wolves), so they're likely chosen as a sort of consolation prize, as well as to ensure that only those who would dedicate a lifetime to the Chapter would serve it.Of course, the details are highly dependend on the chapter in question and can go all the way: From the Salamanders considering their serfs nearly as equals, over the space wolves, that may let the younger ones ignore or belittle the serfs, but have highly respected traditions that may see serfs in highly respected roles like

story teller or brewer getting respect similar or even more than the wolves themself at times, towards the Ultramarines, that respect the serfs due to the necessity and importance of them therefore having professional respect for them, even if on a personal level the serf is clearly inferior, right on to extremes like the Marines Malevolent, who despise their serfs (and most others) and oppress everyone below them with passion therby averting the trope.
* Warhammer 40,000 a decent amount of hitting power, without being all that expensive.
* Warhammer 40,000: Adsrubael Vect, the leader of Commorragh and the Dark Eldar, is one of the most ancient, cunning and vicious creatures in the galaxy, being one of the few who was around during the Fall of the Eldar some 10,000 Earth years prior.
* Warhammer 40,000: A few of the Primarchs have this dynamic, such as Leman Russ (a boisterous, superstitious, hard-drinking Space Viking) and Magnus the Red (a sorcerer who was fascinated with knowledge and the mystic arts).
* Warhammer 40,000: a folk belief is that running water can disrupt sorcery, but a sanctioned psyker says it's BS. The fact that the final ritual to summon a daemon princess is taking place on a mining barge in the middle of the ocean kind of underlines it. That specific ritual did require ground contact (thus the mining rig), but it's a coincidence.
* Warhammer 40,000. After the victory of the loyalist forces, the Tallarn were some of the greatest tank units of the entire Imperium.
* Warhammer 40,000, after they kill a Chaos stalker, Gaunt laughs and taunts the darkness with his still being alive. Ludd finds it more frightening than the stalker.
* Warhammer 40,000 against a greater threat, but these are temporary alliances at best.
* Warhammer 40,000 against anyone accused of being a mutant or not faithful enough. Law enforcement either encourages them or arrests them, depending on how productive these crusades are.
* Warhammer40000 again. The Tau have FTL travel, but since they don't have psykers like the Imperium or Eldar they have to bounce their signals off relay beacons the old-fashioned way.
* Warhammer 40,000) Age of Technology, when mankind first colonized other planets and created amazing technological advancements. Most of the fanciest stuff used by the Imperium are barely understood and often nearly irreplaceable relics of this time.
* Warhammer 40,000 all agree that they're anything but. Physical beauty is also one of the most common gifts bestowed by Chaos God Slaanesh, Prince of Excess and Debauchery.
* Warhammer 40,000: Almost every alien species that poses a significant military threat to the Imperium:
* Warhammer 40,000 along with rather too much scalpel imagery, they maintain the robo-skeleton and "I'll Be Back".
* Warhammer 40,000 Also, all of the urban terrain sold by Games Workshop for Warhammer 40K is imperial buildings, of which about 1/4 of the parts are used to show where the building took a direct artillery round.
* Warhammer 40,000 also introduced Loxatl mercenaries that could take lots of lasfire.
* Warhammer 40,000, although it does use the occasional mind blowingly gothic drawing to set the mood, 40k relies mostly on quotations and snippets of fluff to set the plot pieces. Good thing it's one of the most quotable pieces of fiction out there.
* Warhammer 40,000. Although not actually historical, most regiments of the Imperial Guard or Space Marine chapters take cues from historical armies.
* Warhammer 40,000, a member of the Adeptus Arbites who hunts down mutants and heretics with relish and a very big gun.
* Warhammer 40,000), a mercenary alien race that has worked for both the Imperium and the Tau in the past.
* Warhammer 40,000) among Chaos warlords, Ork bosses, Dark Eldar archons, and

Imperial commanders alike. Some specific examples:
* Warhammer 40,000 among those competing. An army's success depends on that army's commander's knowledge of the units and rules of Space Marines and their own army's ability to effectively counter and kill those Space Marines.
* Warhammer 40000, an alien race that has a taste for (and is liable to become addicted to) human brains.
* Warhammer 40,000, an amalgamation of derelict spaceships (of all factions) that clumped together in the Warp and pop back into realspace for various periods of time, and of great interest to people who deal in archeotech and alien artifacts. Unfortunately for them, space hulks are more often than not filled with Tyranids or orks or Chaos forces, who are all too ready to eat/loot/desecrate their newest victims and conquer the planet they left from.
* Warhammer 40,000 (and 40k universe in general) simply could not pass by this topic.
* Warhammer 40,000, and also have different-looking backpacks for some reason.
* Warhammer 40,000 and an updated Custodes model range and ruleset to emphasize that no, the Custodes are no longer running around half-naked.
* Warhammer 40,000, and finding that they'd been missing for hundreds of years when they escape.
* Warhammer 40,000, and (for humans at least) the people able to navigate it are blind to normal space.
* Warhammer 40,000, and have the leftovers of that time period stick around to menace the galaxy's new caretakers. It happened with the Necrontyr, then the Eldar, then humanity's first empire, and the "modern" timeline depicts this happening to the Imperium of Man.
* Warhammer 40,000, and his (sadly no longer) unique ability, Tactical Genius, allows him to infiltrate almost any unit (super-heavy tanks and 45 foot tall mechas included) almost anywhere, leading his enemies to screech CREEEEEEEEEEEEEEEEEEEEEEED!!!!!!! when his plan is revealed and turns the tide of battle.
* Warhammer 40,000 and horrible mutations such as extra limbs, heads, eyes inside their mouths, etc.
* Warhammer 40,000, and its position at the galactic power table was paid for with the blood of millions of humans. Examine the Rogue Traders specifically: Brave and intrepid captains who go out on long missions to find and contact new worlds and new civilizations, with the mandate to exploit the heck out of them, or even wipe the natives off the face of their worlds outright in order to take what's left. Slightly different than the prime directive!
* Warhammer 40,000 and listen to concussive blasts of pressure to get their kicks.
* Warhammer 40,000), and military forces trying to seize control of these artifacts for good or ill, and it's conceivable, even probable that battles or even wars broke out for control of these. However, it's more often that covert operatives are used to avoid drawing too much attention when someone makes a grab for one.
* Warhammer 40,000 and other horrifying entities, and utilizing psychic abilities is often enough to attract their attention.
* Warhammer 40,000, and Sergeant Criid, who sports a fur bomber jacket. They also have a surprising mixture of smaller equipment, including sidearms and utility tools, that comes from various sources (up to and including the enemy, if they're not using it any more).
* Warhammer 40,000, and so forth. But at the end of the battle none of these units will matter unless you have some humble Troops choices, the rank-and-file of your army, to hold mission objectives.
* Warhammer 40,000 and so on. If anybody want to write about or parody a certain type of science fiction, then they can.
* Warhammer 40,000, and that should tell you everything else you need to know about the setting.
* Warhammer 40,000, and their planet is basically a sentient jungle that actively hates all non-indigenous life.
* Warhammer 40,000, and their vehicles are as tough as they are, being cobbled

together from looted vehicles or whatever bits and pieces of metal the mek had lying around (and still working, if not outperforming the original), and drive at breakneck speeds at minimum. There are orks considered batshit insane by other orks known as the Kult of Speed, who tend towards a "brakes are for cowards" mentality.
* Warhammer 40,000. And then another character asks why he keeps watching that message over and over...
* Warhammer 40,000 (and the narrator himself dismissed the idea out of hand).
* Warhammer 40000, and the priest assures him that the man is being cared for and orders Ragnar to accept treatment.
* Warhammer 40,000, and the rapture their victims feel is magical/psychic in nature.
* Warhammer 40,000 and the spin-off air combat game Aeronautica Imperialis, several planes have guys in back.
* Warhammer 40,000 and Warp travel (a demon-infested alternate dimension that allows FTL travel, sped up or hampered by Warp currents).
* Warhammer 40,000 and were turned into robots. They no longer look the part, but this explains why they've lost more of their identity than the rest of their people.
* Warhammer 40,000 and you win, even if doing so cost your Space Marines their Chapter Master and dozens of their greatest warriors. The fluff has even more examples:
* Warhammer 40,000, a nightmare realm made of the emotions and thoughts of the entirety of sapient life in the galaxy.
* Warhammer 40,000, an Inquisition shuttle pilot uses his exhaust to blast the front wall off the bad guys' mansion.
* Warhammer 40,000: Another example in which almost every single unit type is included. It is also notable for popularizing:
* Warhammer 40,000 any character can be outfitted with an explosive collar, and Guardsmen can take one as part of their starting equipment to imply ex-membership in a Penal Legion.
* Warhammer 40,000 any of his rivals and b) most of the Archon lords are smart enough to realize that if Vect would die, the entire city would be thrown into a massive civil war as every Archon would attempt to seize the throne for himself. The fact that all his rivals hate each other nearly as much as they hate him also helps.
* Warhammer 40,000 anyone worshiping him in those days, and wanted science to replace religion).
* Warhammer 40,000, any psyker with access to the Daemonology (Malefic) Psychic Discipline are able to summon and control units of Chaos Daemons during a battle, not just Chaos Sorcereres.
* Warhammer 40,000. Any vehicle can explode as long as the weapon's stats are high enough to cause it. Unless a rule says otherwise vehicles don't explode after losing all their hit points however.
* Warhammer 40,000. Apparently, it's so horrible most people give up and tell the Inquisition everything it wants at this point. Doesn't usually stop them from doing them, either.
* Warhammer 40,000 appearance can also unnerve some of the humans they deal with.
* Warhammer 40,000) appear like this when summoned onto the battlefield.
* Warhammer 40,000 approach, where you add additional soldiers to a squad to discard as casualties after taking fire. The more regular soldiers there are, the more likely the troopers carrying the plasma gun or missile launcher are to survive to use their more potent weapons. As for the individual armies and their designated Cannon Fodder units:
* Warhammer 40,000: Archon Vhane Kyharc once unleashed a virus on a planet that turned every living creature's face into a copy of his own. This is the Dark Eldar who forces ever member of his Kabal to get their face surgically modified to look exactly like his, in theory to prevent assassination, but in truth he's just that narcissistic.
* Warhammer 40,000, a ready supply of expendable minions, generally getting wiped

out in the first ten minutes or so of any invasion. The Imperial Guard also fulfills this function when the Space Marines are the protagonists.
* Warhammer 40,000 are considered by some to be the next step in human evolution, due to their supernatural powers, the fact that they only started appearing towards the end of the Dark Age of Technology (a few tens of millennia in the setting's past and our future) and are now being born with increasing frequency, and a few extra details such as increased white blood cell counts and stronger and more extensive lymphatic systems. The rest of the Imperium, which is fanatically devoted to the idea that the baseline human form is perfect in every way, finds this notion to be outright heretical.
* Warhammer 40,000 are either former humans or purpose-grown bodies (depending on location/faction) with their brains lobotomized and largely replaced by machinery, and are used as a plentiful source of manual labor.
* Warhammer 40,000 are fitted with such technology as standard and many high ranking Necron nobles are equipped with phase shifters that allow them to briefly phase out of reality to avoid enemy attacks. The same technology allows advanced Necron melee weapons to bypass enemy armour.
* Warhammer 40,000 are gods among men and strong charismatic leaders of their adopted planets but many harbor serious issues like insecurity (Fulgrim), inferiority complex (Perturabo) or a need for revenge (Angron) which led half of them to commit rebellion.
* Warhammer 40,000 are kept in line with the lash or inquisitors' interrogation machines.
* Warhammer 40,000 are mutants with a third eye that can perceive the Warp without going mad(der), and especially the Astronomicon beacon powered by the Emperor.
* Warhammer 40,000 are not as stupid as they act, especially their Chapter Master Logan Grimnar. There is a reason he ends up running most of the wars he gets involved in, even if it's from the sidelines.
* Warhammer 40,000 are noted to do either this or phase out after taking significant casualties. The Eldar (and their dark cousins) operate in the same fashion.
* Warhammer 40,000 are notorious for underestimating the number of soldiers it would take to win a war. Examples include:
* Warhammer 40,000 aren't in a position to do anything about it. It's not clear what makes the Dark Angels' relatively minor disobedience so awful.
* Warhammer 40,000 are sometimes depicted as having a good time, or at least "winning glory and honor".
* Warhammer 40,000 are the nastiest things on the tabletop, but ultimately they aren't that impressive despite their power. They do still get a decent amount of respect for the standard-issue giant brass balls that they keep fighting regardless.
* Warhammer 40,000 are used by 'umiez to indicate rank, and so these are a frequent addition to their trophy racks.
* Warhammer 40,000 are usually justified as superior agility, supernatural toughness, magical wards, or force fields, but for some people they are explained as luck or fate.
* Warhammer 40,000. Artillery regiments typically replace the rank of private with "gunner".
* Warhammer 40,000. As a result, he's more machine than Ork and has been rendered damn near invulnerable.
* Warhammer 40,000 as a shout-out to Kurtz. Fittingly his overall arc resembles that of Kurtz, in that he is a charismatic visionary who becomes the tyrannical ruler of an isolated, undeveloped world and who dies surrounded by a crumbling empire of madness created by his own hands.
* Warhammer 40,000 as heretical). Basically your average Mechanicus-controlled planet is a seminary for cyborg mechanic-priests.
* Warhammer 40,000. Asides from carrying a BFG of a fusion weapon, being Cain's driver and general aide, Jurgen makes sure that Cain always has a cup of Tanna tea at hand.

* Warhammer 40,000)) as labor or military in exchange for fresh sustenance, although they of course just squander it away just as quickly.
* Warhammer 40,000) as non-psykers are towards people who could at any moment explode into a daemon-vomiting portal to the Warp.
* Warhammer 40,000; a soldier's second most important job, after fighting the enemy, is to let those in charge know where the enemy is.
* Warhammer 40,000; a Space Marine stranded on a Death World is severely chastised for picking up an alien weapon and using it after his own weapons are out of ammo; any time the Eldar get pissy over the Imperium "selfishly" wanting to save a world housing tens of billions of humans they were willing to sacrifice to save a couple thousand (or less) Eldar.
* Warhammer 40,000 aspect came about much later, Necron Monolith are massive, floating, truncated pyramids that spit death at the living and summon even more Necrons.
* Warhammer 40,000, a squad of soldiers fight their way through a hostile jungle sector to reach an evacuation point before they are bombarded. Once the remnants of the said squadron reach their destination, they learn that the area has been compromised and the evacuation point has been moved, and they have to fight through another area.
* Warhammer 40,000, a Standard Template Construct fragment makes for an all-purpose MacGuffin. STCs were machines from the Dark Age of Technology containing the sum total of human technological knowledge, plus the capability to build any device. No working STCs exist anywhere in the 41st Millennium, but a printout from the STC's library can be worth entire solar systems, so the Imperium will use every means at their disposal to grab one.
* Warhammer 40,000, as the Imperium was being torn apart by the Horus Heresy, the Emperor ordered his chief adviser Malcador to form what would become the Imperial Inquisition, and, in particular, the Grey Knights chapter of the Space Marines:
* Warhammer 40,000. As the ship Cain is on is tracking a space hulk, they need to pop out into realspace at the same place the hulk did, run the calculations, and then go back in the warp. Even when the sector of realspace is occupied by half an ork Waaaggh!.
* Warhammer 40,000, as well as getting them used to fighting enemies bigger than them (which the galaxy has no shortage of).
* Warhammer 40,000 as you reveal your unit, since Creed is so notorious for this ability, both in and out of canon.
* Warhammer 40,000. A tactical manual so chock-full of propaganda, misinformation, misunderstandings and outright lies, no-one in-'verse thinks of it as anything other than a glorified roll of toilet paper.
* Warhammer 40,000. A Tau's given name will be (in order) their caste, their rank, their world of birth, followed by any personal names they might have earned. As a Tau's career advances, one or more noun-verb titles are added to their name. However, for brevity's sake, Tau will often answer to a single well-known name instead of their full formal name. For example, Shas'O Vior'la Shovah Kais Mont'yr ("Fire Caste-General Hot-Blooded Farsighted Skillful Battle-proven") is more commonly known as O'Shovah or Commander Farsight.
* Warhammer 40,000: At least a couple of sentient cities and complexes have cropped up, usually due to the Adeptus Mechanicus or Chaos. Titans are so enormous they may also qualify.
* Warhammer 40,000: At least one Titan has been defeated this way, by infantry swarming it to overload its onboard troops and weapons.
* Warhammer 40,000 at the gritty end & everybody else somewhere in the middle.
* Warhammer 40,000 audiodrama, the Navigator Octavia is guiding the ship through an uncharted region of warpspace with the shields easily deflecting the ample lightweight creatures there. Then they get the attention of a huge predator capable of swallowing the ship whole, the sort of thing that maps would mark with this trope. When Octavia realizes they can't outrun it, she tells the captain to make an emergency translation back into realspace.
* Warhammer 40,000 augmentation and hypno-therapy administered during puberty.

However, the Chaos God(dess) Slaanesh very much embodies this trope, being immortal and also the Chaos Deity of Sex and Perversion. Traitor Marines who worship Slaanesh can end up anywhere on the spectrum (many choosing to pursue another form of excess instead of developing an interest in sex).
* Warhammer 40,000 available to those proficient in Interomancy focus mostly on inflict penalties to opponent's abilities in addition to, or instead of, causing direct damage.
* Warhammer 40,000 averts this with psykers often having limited and support abilities, whereas combat leaders can often be much more powerful. In the stories it's played dead straight; weak psykers can barely function as humans, let alone soldiers, while medium psykers can balance things out and strong psykers are nigh-untouchable. In the pencil-and-paper adaptations, however, this is played straight.
* Warhammer 40,000 aware of Chaos and the Warp and deliberately hide this information from the population.
* Warhammer 40,000 backstory has strong vibes of this in the Primarchs. With a few exceptions the vast majority of them defected because of their father's disapproval and/or withering apathy. In the words of Roboute Guilliman, "The Emperor was a great scientist, a great leader, but a terrible father".
* Warhammer 40,000 bad idea in 40K, since they spend their every moment preventing daemons from exploding into the material world through their heads. Psykers on Prospero were immune to this due to some kind of magical crystals from a cavern under the city, but they were still duped by daemons into some very poor choices.
* Warhammer 40,000. Baseline humans, even with age-retarding techniques like juvenat treatments, will only live two or three hundred years at most while Eldar typically live at least a thousand years, and Farseers can live even longer than that.
* Warhammer 40,000 battlefield). Individual Destroyers have "reliquaries" that hold items from Earth or the possessions of first-generation colonists, and bear names like "St. Germaine's Destroyer".
* Warhammer 40,000 because it sounds fancier. Since most factions already have aerospace crafts that can cheaply move people to and from a planet's surface, they're mostly used by Forge Worlds for heavy cargo lifting.
* Warhammer 40,000 because they needed eyes on the ground to see him die.
* Warhammer 40,000 - because what's a massive, apocalyptic battle with without skyscraper-sized mechs that can level cities with a single shot? The newer editions have been critizised for introducing more and more stompy robots to the game, invoking this trope.
* Warhammer 40,000 becomes Galatea's latest victim in the second book.
* Warhammer 40,000, becoming the first Chaos Space Marines. While most of the mortal forces of Chaos are comprised of the humans, mutants, later founding and some loyalist marines who decided to join their ranks, the original Legions remain amongst the most powerful and respected forces of Chaos.
* Warhammer 40,000: Before the Emperor developed the Astartes warriors who serve as franchise mascots, his first creations which he used to conquer Terra were the Thunder Warriors. Larger, stronger and more savage in combat than the Astartes, but not quite as long-lived due to the instability of their genetic mods, the Emperor had them all purged to make way for his Astartes creations when they had conquered the planet and outlived their usefulness.
* Warhammer 40,000, being a game about collecting and painting armies of miniatures, naturally uses this:
* Warhammer 40,000, being dedicated to the lives and happiness of the people who live within the Imperium rather than the Imperium's twisted laws or ideals.
* Warhammer 40,000, being incredibly vast, has several to varying degrees:
* Warhammer 40,000, being vastly superior to standard humans in every way and thus asking why they should fight and die for them. Falling to Chaos is not the inevitable outcome, but it's a common fate.
* Warhammer 40,000 besides goggles with different auspexes (what the Imperium of Man calls sensors), there are also contact lenses for making someone immune to blinding light including a direct hit from a photon-flash grenade

* Warhammer 40,000 between the (millions and millions of) creatures of the Tyranid fleets is done through the Warp, and so, any person with psychic powers, needed to travel in the Warp, is (painfully) overwhelmed. When the Imperium knows they're coming, they thus always scramble to reinforce the system's defenses beforehand.
* Warhammer 40,000 between the Salamander and the Marines Malevolent revolves about a time where the Marines Malevolent fired on civilian camps.
* Warhammer 40,000 black-ops division), a brilliant spy and manipulator... Most importantly however, every Alpha Legionnaire is a capable leader and trainer of men whenever necessary. This means three things: 1) the Alpha Legion can use as many or few specialist marines as needed to best complete any mission at any time, 2) the Alpha Legion can employ non-Astartes soldiers and agents in vast numbers, and 3) the Alpha Legion leadership is practically impossible to decapitate, as soldiers are encouraged (and capable of) improvising and acting on their own initiative.
* Warhammer 40,000 body that haven't broken at least once, tends to react to minor things like getting entire limbs lopped off somewhat differently than normal people.
* Warhammer 40,000 books; certainly much better known nowadays. One of the signs of the Imperium's gradual decay is that the Golden Throne is starting to fail.
* Warhammer 40,000 books whenever a Chaos superheavy tank, daemon, or similar threat shows up.
* Warhammer 40,000 brings rather different sorts of ghosts to the field-all of which are armed to the teeth. Eldar Wraith-constructs are the souls of dead Eldar given material form, and the robotic shells of the Necrons house the souls of the long-dead Necrontyr. Necrons Wraiths in particular drive the point home, being able to phase in and out of existence. Space Marine Dreadnoughts aren't technically dead, they're just the head and vertebrae of a 'mostly dead' Space Marine hero. Although since they are inside a tank sized mini-mech you'll call them dead if they wish to be called so.
* Warhammer 40,000 brought on plague zombies during the 13th Black Crusade, courtesy of the god of pestilence and decay, and other zombie infestations have been known to be caused by Tyranids and a fair number of different plants.
* Warhammer 40,000, brought the legions of Chaos to Earth. Now the Imperium is a theocratic, Luddite empire where people believe in magic, gods and daemons, because they really are out there.
* Warhammer 40,000 but are now reduced to being briefly mentioned in the background section of the rulebook.
* Warhammer 40,000, but Corbec makes a rather good accounting of himself as well.
* Warhammer 40,000 but evolved over time with some additions and some removals. So far there have been Squats (Dwarfs), Eldar (High Elves), Dark Eldar (Dark Elves), Exodites (Wood Elves), Ratlings (Halflings), Ogryn (Ogres), Orks (Orcs) and Space Undead (Undead) (the latter started off literally as skeletons in space but have now become the Necron legions).
* Warhammer 40,000, but Fenris, home of the Space Wolves takes the crowner: Half a Fenrisian year is spent in bitter cold, with the oceans frozen to ice and snow over all the few landmasses. The other half is spent in a blazing summer with the oceans raging and constant seismic upheaval (as the ocean swallows the existing land, new islands are formed by constant volcanic eruptions). Only Asaheim, the northern continent and home to the Space Wolves chapter remains stable......oh, and did we mention a Fenrisian year is about ten earth years?
* Warhammer 40,000, but he becomes one of this with his plan to take down the Chaos lords of Drakaasi, even if he does not think such a plan to be right.
* Warhammer 40,000 but is among the only ones in recent history to have done so.
* Warhammer 40,000, but one of Amberley Vail's footnotes comments that it's "quite big enough under the circumstances."
* Warhammer 40,000, but Space Marines being Space Marines, they find a way to survive anyway, often as not.
* Warhammer 40,000, but the Chimera infantry fighting vehicle used by the Imperial Guard is fully amphibious. The Land Raider used by Space Marines is a bit too heavy for that, but is so well-armored (and fully-pressurized) that one battle between

the Space Wolves and Tau took place five miles underwater, on the ocean floor.
* Warhammer 40,000 but their skeleton decorated armor and flaming bodies certainly makes them look like it.
* Warhammer 40,000, but they harbour a special hatred for the Gue'vesa, those humans who have accepted the Tau Empire's offer of egalitarianism and progressive thinking. They consider the Gue'vesa as despicable race-traitors. Readers may think differently (especially in those cases where the Imperium pulled back from a planet, leaving the civilians to fend for themselves).
* Warhammer 40,000, but Vulkan goes crazy before he even realizes what's going on.
* Warhammer 40,000, by Ben Counter, sees an army of invading Orks use small asteroids (with rockets attached) as conveyance through space. Once they've arrived, they use the same Roks as a crude yet surprisingly effective orbital bombardment, devastating the Planetary Defense Force.
* Warhammer 40,000 by ordering his ship to fly right down the throat of Lorgar's flagship so he can personally rip out Lorgar's internal organs one by one, even though the tactical situation isn't really in a good place for that. He does get talked down from it, though.
* Warhammer 40,000, by ripping out the heart of each Legion's Primarch and using a psychic ritual to kill off their legions and wipe their existence from memory. Certainly only the other Primarchs seem to remember their forgotten brothers ever existed, and the Emperor has forbidden them to speak of it.
* Warhammer 40,000. By standard, such weapons do not receive penalties for firing on aircraft, but have a hard time hitting anything else.
* Warhammer 40,000 by swimming in an underground river, they go over a waterfall.
* Warhammer 40,000 by taking the "less is more" approach a bit too far. His biggest offense was the removal of numerous unit options and items that were in previous Chaos Marine books, which largely homogenized what was once a diverse and varied army and prevented players from being able to run themed lists based off the available Chaos Legions at the time. Fan response to the Chaos Marine codex was so negative that Thorpe was removed as a codex writer and transferred to GW's novel writing division. Even then Thorpe has not released any GW-related content at all.
* Warhammer 40,000 by the Dark Eldar: Scourges (individuals who have been modified to have wings) are highly valued by the various kabals for being couriers as well as flying troops, so the kabals tend to come down hard on anyone who makes a habit of messing with them.
* Warhammer 40,000: By the standards of the Imperium (and not a sane human of the 21st century), the Grey Knights are this, refusing to consort with the kind of loonies who think using Chaos against Chaos is a good idea, and as a result, not one Grey Knight has ever fallen to Chaos (mentally, that is, they've died in droves to Chaos).
* Warhammer 40,000: Cain snarks regularly about the varied uniforms worn by the Periremundan Planetary Defense Forces. Each plateau of the planet has their own design, and almost all of them are this trope — one plateau issued green and purple striped body armor, with orange fatigues.
* Warhammer 40,000: Cain's ship is dragged out of the Warp too early and starts exploding. Since they're still on the fringes of the system, it takes him several very long weeks cramped up in the small survivor pod to get to the planet, where he then faces the comparatively easier issue of finding his way out of an ork-infested desert to civilization.
* Warhammer 40,000. Calistarius however was trapped for a solid week under rubble when his Black Rage took hold. And through sheer force of will, overcame it. When he emerged, he shunned his old name, becoming the famed Mephiston, Lord of Death.
* Warhammer 40,000 called Brimstone Horrors, which take the form of small and malicious living flames. Created when a dying Blue Horror splits in half, Brimstone Horrors are among the least of Daemonkind and know this, and spread fire and devastation everywhere they go to make themselves feel better.
* Warhammer 40,000 can be equipped with grapnel launchers in order to scale buildings and ruins as part of their infiltrations. In the 8th Edition of the game, these launchers allow Reivers to ignore vertical distances when moving, something

all other infantry models must factor into their movement.
* Warhammer 40,000 can be found at both ends to a degree - the Imperium of Man acknowledges that it is a dystopia, but is a far sight better than anything else. Meanwhile, the Tau Empire sees itself as a utopia for all races, but non-Tau have a different view.
* Warhammer 40,000 can be seen as an unusually well-developed version, which does seek to keep Imperial citizens as ignorant of Chaos (among other things) as possible, and they don't hesitate to silence those who have seen too much in a rather permanent fashion. Including entire planetary populations.
* Warhammer 40,000 can lead to entire populations of people being immediately forgotten about and/or destroyed.
* Warhammer 40,000 can only be found in the offspring of two-Navigator pairings.
* Warhammer 40,000, certain privileged members and associates of the Adeptus Mechanicus are given the augmented eyes necessary to see and interact with the "noosphere", giving them access to some pretty sophisticated A.R. where the noosphere is available.
* Warhammer 40,000, Chaos Lords, C'tan shards (who were right up there with the Chaos Gods and Hive Mind when they were still whole), Ork Warbosses, Dark Eldar Archons and the various sundry madmen and psychopaths the galaxy breeds like mosquitoes. The most notable 'humanoid' antagonists would be Ezekyle Abaddon (leader of the Black Legion of the Chaos Space Marines and the figurehead of the thirteen Black Crusades that have tried to overthrow the Imperium), Asdrubael Vect (the leader of the most powerful kabal of the Dark Eldar and the de facto leader of the entire Dark Eldar race), and Ghazghkull Mag uruk Thraka (one of the most powerful Ork Warlords ever and the leader of the largest Waaagh! in history).
* Warhammer 40,000 Chaos Space Marines. Though most of them underwent voluntary lobotomy beforehand.
* Warhammer 40,000 chapter even uses it as part of their initiation), pipe organs are mounted on tank treads to provide inspiring hymns and missile support... old canon even implied the Emperor was Jesus and Saint George in one of his many "guide humanity towards betterment" disguises, but new canon only kept Saint George (replacing the dragon with the C'tan star vampire called the Void Dragon and "killing" it by locking it up on Mars).
* Warhammer 40,000 chapters (both good and evil; it's explicitly stated that they eschew camouflage in favor of scariness).
* Warhammer 40,000 characters who hail from a Death World get some serious stat bonuses, because even the biggest wimp from that planet still survived to adulthood on a world seemingly crafted to kill them. Some examples are:
* Warhammer 40,000 claims the years its victims would have had if it hadn't cut them down and gives them to its wielder. No one in-universe, not even its current owner, knows this for certain. He has his suspicions, though, since he's lived far longer than the average projected lifespan of his race.
* Warhammer 40,000 codexes, several questionable rules, as well as in general being considered really unbalanced.
* Warhammer 40,000 codex, it refers to Gretchin deafened by artillery duty being forced to communicate using "a sort of sign language," which "tends not to work very well, as a Gretchin can only carry so many signs."
* Warhammer 40,000 Codex: "Let no good deed go unpunished, and let no evil deed go unrewarded."
* Warhammer 40,000 coexist with more conventional firearms. Lasguns are easier to mass-produce, more reliable, and are easier on logistics since their "ammo" is rechargeable and robust power packs. Autoguns are easier to fire on full-auto, don't draw a line to your hidden position, and allow for different ammo types to adapt to different enemies and situations. Lasguns are good assault weapons, and autoguns can make good tactical weapons. But on the tabletop, the two are both interchangeable and among the weakest weapons available.
* Warhammer 40,000 colonel. The adjective is emphasised to lend weight to the reason: there is no one else.
* Warhammer 40,000: Combat drugs are very common in the setting. A few of them are

straight performance enhancers with little to no side-effects. Most of them are not. However, particularly in the RPGs, drugging your party can be very helpful against otherworldly horrors.
* Warhammer 40,000 comes in two varieties: the huge ones used by the all-male Space Marines, and the smaller, thinner ones used by Sisters of Battle, both featuring exaggerated pauldrons and religious iconography. The Battle Sisters' power armor also features breastplates that are molded to resemble an actual bust, possibly to make clear that the Sisters are female and thus slip by the Ecclesiarchy's ban on having "men under arms".
* Warhammer 40,000 comic features a battle between an ork and Chaos army, who break out increasingly bigger-guns to hold the absolutely vital bridge. By the end of the comic, only the armies' respective warlords are left duking it out... on the one part of the bridge that hasn't collapsed.
* Warhammer 40,000 - Commissar Ciaphas Cain, Hero of the Imperium, remarks on several occasions that he may seem brave at this moment, but he really, really needs to change his pants.
* Warhammer 40,000 Commorragh. The raids' continued success is vital to the Dark Eldar's survival, and Dark Eldar usually aren't stupid enough to risk failure in this just to get rid of their rivals. Once they get back to Commorragh, though, all the aforementioned backstabbing is firmly back on the table.
* Warhammer 40,000, Corax specifically states that because his legion is smaller than the others, they would not survive a mass frontal assault on the traitor forces, and must rely on hit and run attacks.
* Warhammer 40000 count as this trope. Hell, even some of the (richer and more prestigious) PDFs count!
* Warhammer 40,000 creator Rick Priestly has confirmed that the two "missing" Primarchs exist to provide fodder for player-created Space Marine chapters and Chaos Space Marine Legions, and will never be identified.
* Warhammer 40,000 cults. This didn't stop fans from speculating that they might be right, though.
* Warhammer 40,000 Cunning — so don't let your guard down. Additionally, because of how their version of psi works, choosing not to roll with formal education is actually a very calculated and clever strategic decision. If they built an engineering college for the mekboys so they all understood how engines and aerodynamics work, making their hoverbikes go faster would no longer be as simple as a can of red paint.
* Warhammer 40,000 Daisy is a custom-built battlewagon belonging to another Ork Warboss, and the Kaptin makes Nailbrain promise to keep Daisy fueled and loaded and take her out for ruckuses.
* Warhammer 40,000, Dak'ir says "with respect, sir" that the enemy would have left by now.
* Warhammer 40,000, Dark Eldar and Tyrannids make heavy use of poison as do certain Chaos units like Fabius Bile. Out of the Forces of Order, the only poisoned ammo exists for sniper rifles, that Eldar ammo that causes heads to explode, the character Sly Marbo and other rare assassin types. Oddly out of the more benign armies, the one that uses poison the most are the Space Marines who have plenty of snipers and can make extensive use of hellfire ammo (a mutagenic acid).
* Warhammer 40,000. Dark Eldar avoid this by offering the souls of others in place of their own to placate Slaanesh while they indulge themselves. Natural born Dark Eldar are called "Trueborn" and are still rare enough that they are treated with great honor and privilege. The vast majority of Dark Eldar are Vatborn, clones though till considered useful members of society, and what labor the Vatborn can't or refuse to do is done by billions of slaves.
* Warhammer 40,000 Dark Eldar gladiator queen Lelith Hesperax has hair long enough to use as an entangling net (naturally it is woven with poisoned barbs too) but then she is also skilled enough with a simple metal blade to not need a power weapon to bypass armour, and fast enough on her feet to dodge bullets even without combat drugs, even with all that hair.
* Warhammer 40,000, Dark Eldar Hellions ride on bladed Skyboards, compact anti-grav

platforms that allow the sadistic Dark Eldar to race around the spires of Commorragh and through the skies Realspace with great speed and agility.
* Warhammer 40,000: Dark Millennium's ashes, which went into closed alpha in August 2015 thanks to a secure source of funding from founder's packs.
* Warhammer 40000: Dawn of War and it's three expansions. The base game contained 4 factions (Space Marines, Orks, Eldar, and Chaos Space Marines), and a single campaign with the Blood Ravens Space Marine chapter squaring off against the other three factions.
* Warhammer 40,000: Dawn of War have various units that wield hammers.
* Warhammer 40,000: Dawn of War II: Retribution, Chaos Sorcerers have the Coruscating Flame ability. It engulfs friendly units in flames dealing damage to anyone in the immediate vicinity. It is absolutely devastating against units with high model count.
* Warhammer 40000 Dawn of War. The Imperial Guard's basic infantry units have Commissars, who can kill a random member of the unit in order to cause a fear-induced performance boost in the rest.
* Warhammer 40,000 dealt with running underhive gangs in small scale skirmishes and what went on in the downtime between them. The game was known to be exceedingly complex and terrifyingly lethal (roll up a gang in a few hours, have the first guy killed within a minute of starting to play) but interesting nonetheless.
* Warhammer 40,000) decides that he's going somewhere that isn't the front line, he always makes up some excuse about checking on the troops. He invariably runs into some previously-unknown game-changing event (genestealers, Chaos cultists, Necrons, etc.) that the soldiers wouldn't have been able to handle had he and Jurgen not been there.
* Warhammer 40,000, depending on how you and your opponent painted your models. There's also canonical examples in the background:
* Warhammer 40,000: Depending on how you see it, a Genestealer cult could be this. They are unfathomably loyal to their Patriarchal Alien, are made by parasites, etc. One can argue that they're not true undead and are just mutants, but half this list can also argue that.
* Warhammer 40,000 depending on the chapter, but you should try anyway, because where do you think the Imperium's supply of super soldiers comes from?
* Warhammer 40,000. Depending on which version of the story you believe, the Chaos gods possessing Horus abandon him as soon as the tables turn during his final battle with the Emperor. Realising what he has done, Horus begs the Emperor to forgive him for his betrayal. The Emperor does so, then kills Horus to prevent him from being possessed again.
* Warhammer 40,000, depending on you and your opponent. The background fluff offers more examples:
* Warhammer 40,000 descended on their homeworlds and the Blood Angels were on their last legs, a massive daemon army fell upon the Tyranids and destroyed many of the leader beasts until Imperial reinforcements arrived to finish off the swarm. The daemons promptly disappeared back into the Warp, waiting to claim the Blood Angels' skulls another day.
* Warhammer 40,000 describes a drug that is made from a space marine's organs while he is made to watch. It is never clarified if making him watch actually does anything to the drug itself; but then, the Emperor's Children and their kind would do it anyway.
* Warhammer 40,000, designed to spook the enemy into over-committing their firepower to take down the DISTRACTION, allowing the smaller, but destructive units to do their things.
* Warhammer 40,000. Despite their treacherous, cutthroat, and backstabbing nature, some of the Chaos Marines do still hold some measure of reverence and loyalty to their Primarchs.
* Warhammer 40,000 devoted to keeping archives of files, staffed with countless scribes, servitors, and mono-task servo skulls constantly writing down everything on scrolls, and libraries (forbidden, of course; knowledge begets heresy) filled with rows upon rows of dusty ancient tomes, scrolls, and datatomes. And this takes

place in the 41st millennium. Some planets are almost at civil war just over the little space that is left to put paper!
* Warhammer 40,000 didn't) All that, and he wasn't even an official named character. And then in the 7th Edition Codex, he is. So he's well and truly ascended.
* Warhammer 40,000, different planets within the Imperium can have massively different technology levels and cultural views. Examples range from "feral worlds" with mostly medieval technology (save what's imported from other planets), to planets with fairly modern-looking cities (except with more skulls and statues) to dystopian hive worlds where the entire populace lives inside enormous plasteel towers surrounded by uninhabitable wasteland.
* Warhammer 40,000 doesn't begin to describe how incompatible this is with current canon.
* Warhammer 40,000 don't believe they exist, and so get lazy about perimeter security.
* Warhammer 40,000 do this in reaction to strong attacks. If the scouting parties the Necrons send first fail, they send another more powerful one, than another and another till all resistance is dead. Since the Necrons are a race of undead machines, and they are the most advanced in the galaxy, they have yet to meet resistance that would warrant awaking their more powerful weapons of war.
* Warhammer 40,000 Dreadnoughts, fighting machines piloted by mortally wounded super soldiers permanently encased in a life support sarcophagus might also count.
* Warhammer 40,000 due to their potential to corrupt the entire species.
* Warhammer 40,000, during the Horus Heresy, when the Emperor of Mankind confronted his traitor son Horus, he struck Horus with so much psychic power that Horus' own soul was annihilated. Normally, on death a human's soul is sent to the Warp (and thus powerful servants of Chaos are forever reborn, being bound to their particular Chaos God) but with the destruction of his soul, there was nothing of Horus left, making it impossible for the Chaos Gods to bring him back.
* Warhammer 40,000 - during the Third War for Armageddon a Salamanders commander nearly started a feud with another company of Space Marines after striking their officer for ordering a bombardment on a refugee camp under Ork attack, and while other chapters sought glory on the battlefield, the Salamanders also lent their technical expertise to repairing Armageddon's infrastructure, saving uncountable civilian lives.
* Warhammer 40,000. Early hybrids are obvious, often having extra arms, claws, scales and so on. Later generations are often able to pass for human with small efforts at disguise, and by the fourth generation they are indistinguishable from real humans. Slightly subverted, however, in that all offspring of a fourth generation hybrid will always be purestrain genestealers so you will never have a hybrid less than 1/16 genestealer.
* Warhammer 40,000. Earth, or rather Holy Terra, has become the biggest Hive World in the galaxy, to the point where the "Hives" (giant conglomerations of skyscrapers that act as cities) have spread out to encompass the entire planet. All of its resources have been depleted (even the oceans are completely gone), and its atmosphere is choked with pollution. All that's left are layers and layers of cities, coating every inch of the planet in city, filled with countless holy relics and sites.
* Warhammer 40,000 eats their souls when they die), until you remember it's their fault Slaanesh exists in the first place, as (s)he was created by their decadence.
* Warhammer 40,000. Eisenhorn spots an imposter posing as a trusted member of his retinue by saying their situation reminded him of the tight spot they'd been in fighting Beldame Sadia on Eechan. The imposter agrees, alerting Eisenhorn (and any particularly astute readers) to the trick — they'd actually fought Sadia on Lethe Eleven.
* Warhammer 40,000: Eldar who feel too confined by their society's rigid structure are allowed to pursue the Path of the Exile and become Rangers, though they usually respond to requests from their craftworld to return and offer their skills (and sniper rifles) in defense of their race. The Orks have their own inversion- Ork

society is based on any boy doing whatever he wants, as long as it doesn't get him krump'd by da Boss. For some younger, 'rebellious' Orks, the pressure is too much, and so they decide the best option is to enlist with the Stormboyz, whose training includes un-Orky training like marching and regimented training drills.
* Warhammer 40,000, Eloeholth the Faceless is a possible main villain.
* Warhammer 40,000 empire in the galaxy besides the Imperium is the T'au Empire, which is at most about one percent the size. The sourcebooks mention various small empires (both human and alien) scattered about, but they're bit players even by the standards of the T'au, much less the Imperium.
* Warhammer 40,000 encounter an artifact which makes vast promises to them. Ragnor only breaks free when it tells him he has to kneel to the Ruinous Power to get it. And the others don't break free on their own; he has to help them.
* Warhammer 40,000, enlightenment ideas are basically deemed as heresy by the Imperium of Man which is ripe with religious fundamentalism and xenophobia. This comes across as extremely ironic as the Emperor of Man tried to squash superstition in favor of the ideals of reason and logic in order to starve the chaos gods, only for his Imperium to degenerate into what he fought against after thousands of years.
* Warhammer 40,000 enough can take this as truth, while those who like the fact that they're an optimistic and friendly faction can dismiss it as Imperial propaganda.
* Warhammer 40,000 ensured his captain's death, Tsu'gan refuses to let anyone near his body
* Warhammer 40,000 erupted and he found himself fighting the traitorous Alpha Legion, Alpharius knew precisely what Guilliman would do, which combined with the renegade Primarch's mastery of irregular warfare meant that the Ultramarines were outmaneuvered at every turn. Guilliman was only able to defeat Alpharius by abandoning his own rules of operation to make a risky, unsupported assault on the Alpha Legion command center and killing the other Primarch in personal combat. However, the Ultramarines doubt the veracity of the records detailing this event, and the Inquisitor who produced them is suspected of being an Alpha Legion infiltrator, so it's possible the whole story is nothing but propaganda.
* Warhammer 40,000. Especially because the psychic web of a Hybrid Cult means that each person truly loves and adores even the most bestial-looking of their "family".
* Warhammer 40,000-esque way. All of these methods aim for one thing: rendering life on the planet impossible.
* Warhammer 40,000. Even their orbit-to-surface rapid re-entry vehicles are living monsters called Mycetic Spores.
* Warhammer 40,000 examples on this page, this is also standard procedure for both Inquisitors and their many enemies.
* Warhammer 40,000 exist and why the Emperor doesn't do much, but in recent years has become a major focus of the literature in the expanded universe.
* Warhammer 40,000 extraordinaire, believes the PDF to be beneath them. This is usually for the straightforward reason that the best PDF troopers get inducted into the Guard.
* Warhammer 40,000 faces daemons, aliens, and mutants as daily (and serious) threats, to the point that two branches of the Inquisition, the Ordo Malleus and Ordo Xenos specialize in hunting down and destroying daemons and aliens, and have their own specialized military forces-the Grey Knights and Deathwatch, respectively. The Sisters of Battle also qualify to an extent.
* Warhammer 40,000 famously activated itself, drove out of a bombed fortress, and waged war against Ork invaders until it was disabled, all without a human crew.
* Warhammer 40,000 fanboys complained vociferously, he revised the review to clarify that he was referring more to gameplay and general feel than to setting, the latter of which he admitted to knowing little about.)
* Warhammer 40,000: Fans often accuse the Tau of being space Japanese, and, thus, anyone who plays them are called Weeaboos. This is perhaps because the costumes and vehicles of the Tau are inspired by East Asian clothing and architecture.
* Warhammer 40,000 favors the Planet With A Dark Secret approach instead, with

roughly even odds of Chaos, Eldar, Genestealers, and/or Necrons being said secret. Since we're talking about planets here, there's plenty of room for multiple dark secrets to be hiding out, all of them unaware of one another.
* Warhammer 40,000 features future slang that varies from world to world. One Guardsman might yell "FETH!" when something goes wrong, another prefers "Kec!", another might prefer "Emperor's blood!", and so on.
* Warhammer 40,000. Finally, Necron Tomb Worlds are covered in eons-old alien ruins, beneath which deathless metal warriors slumber in stasis... at least until interlopers wake them up.
* Warhammer 40,000 find that the biggest downside to being permanently sealed inside a giant metal can is being permanently sealed inside a giant metal can.
* Warhammer 40,000 fire a hypervelocity projectile at such insane speeds that they're capable of going straight through an Imperial tank and out the other side without overly damaging the tank as such, but instantly converting the crew into a 30-foot long streak of red sprayed out of the exit hole (similar to the story listed below in Real Life).
* Warhammer 40,000. First believe they can use the second. The second think only about killing them. The second succeeds 99(,9)% of the time.
* Warhammer 40,000 fit into this mold. The God Emperor created each of the 20 Primarchs, using his own DNA, to embody a portion of himself. The Space Marines are implanted with organs cultured from the Primarchs tissues, and recruits are picked at age 10 or above.
* Warhammer 40,000, fitted with equipment like flamethrowers that burn souls.
* Warhammer 40,000 follows when the Blood Angels find its people fallen too far from the God-Emperor's light.
* Warhammer 40,000 forces uses this motif somewhat less (for the most part), although they will use actual skulls more often.
* Warhammer 40,000 for Imperial Guard leaders. At this point, it is difficult to determine if they are the exceptions or the rules. Most protagonists tend to avoid the trope, but almost always have to deal with other Imperial Guard leaders that do fit the trope. The Commissars are infamous for being this. Most of the time they would kill a guardsman for cowardice to get others back in line, but there are times that they would shoot an individual for something like uniform violation.
* Warhammer 40,000 for more info. One of the more notable elements is a dozen or so terms for fine degrees of the term "first among equals."
* Warhammer 40,000 for so long that there is no account of the first contact between the species. In the case of more recent alien encounters:
* Warhammer 40,000 for telepaths or the psykers who are powerful enough to cross disciplines.
* Warhammer 40,000 for the more studious hero, Ragnar. At one point he drags Ragnar away from the hologlobe for beer.
* Warhammer 40,000 for the vast, vast majority of characters a swift end could be around the next corner.
* Warhammer 40,000 fortunately, in some cases) this was dropped for a more serious setting that started to go in the extreme direction it used to parody. Thus the game itself has become Comically Serious to many of its fans.
* Warhammer 40,000 for years to accumulate a long string of defeats, with no victories to counteract them.
* Warhammer 40,000. From a modelling viewpoint, the rank-and-file units tend to have more bodies on the table than elite ones, so the mob models are designed in a way that allows mass painting without consuming too much time, which should be dedicated to grandiose and highly customized centrepiece character models instead. This same pattern holds for pretty much every army. Specific examples include:
* Warhammer 40,000, gaining victory points for each of their ships that they manage to move off the blockading player's table edge.
* Warhammer 40,000 games, describes the setting in the September White Dwarf magazine (the game's 30th anniversary special) thus:
* Warhammer 40,000 games, which manage to capture the gritty feel of the game perfectly.

* Warhammer 40,000Games Workshop started work on updating older books, which thankfully will see a resurgence of the forgotten armies. However the Sisters of Battle are notable in that while they're not as old as the Dark Eldar, they might very well have to wait quite a bit longer given that they're getting a Magazine Codex (which usually means development on them has halted and they're just getting lip service in the meantime). Even more notable is that the army is so old, they're the only ones who still require you to use metal models for the entire army (every army, even the Necrons and Dark Eldar, had plastics for troops. Sisters are not so lucky).
* Warhammer 40,000 game; that moral center tends to be based on setting fire to heretics.
* Warhammer 40,000 generally occupy the very top levels of this scale. They are all said to possess more or less supernatural levels of attractiveness and charisma.
* Warhammer 40,000: Genestealer Broodlords/Patriarchs. Granted, an individual broodlord/patriarch is usually pretty "young", often "only" a hundred years old, but the cult he spawns certainly reveres him as this trope.
* Warhammer 40,000 get a lot of mileage from adding "Brother" in front of ranks (Brother-Sergeant, Brother-Captain) though it's not clear whether or not it's reserved for the Grey Knights, along with the ubiquitous "Battle-Brother". Also, the commander of the naval vessel that an Astartes company travels in is called Shipmaster, not Captain. The only Captain associated with a company of Astartes is the Brother-Captain in overall command.
* Warhammer 40,000 Ghazghkull and has vowed to pursue him to the ends of the galaxy to avenge the billions killed for his amusement.
* Warhammer 40,000: Given how many factions prefer melee combat despite being no slouches in the interplanetary guns department, this was inevitable. The orks basically use a vacuum-protected box with a pointy end and engines on the non-pointy end, while Space Marines have the Caestus Assault Ram, which is a flying magna-melta that fires a wall-softening shot before ramming into the now-weakened area and unloading its specially-trained crew.
* Warhammer 40,000 gives us Captain Alessio Cortez of the Crimson Fists, the least killable Space Marine in the Imperium. There's maybe two bones in his body that haven't been broken at least twice, he once disarmed an ork warboss by letting the weapon get stuck in his ribcage, received seventeen wounds in a single battle (including a stab through a heart), led a defense of a breached wall with a broken back, and then there's his reaction on being told he was missing an arm:
* Warhammer 40,000 gives us exterminatus. A planet is bombed with a virus which consumes all organic matter, in the process producing large quantities of flammable gasses. The gasses are then ignited, setting fire to the atmosphere and ensuring that not only is everything on the planet dead, but that it is left a barren husk that will never support life again. Or, barring that, the surface is glassed through orbital bombardment and the planet is finished off with Cyclonic Torpedos, an explosive so cataclysmically potent it shatters and churns the entire surface until there is nothing but fire and molten rock. This is used by the "good" guys of the setting.
* Warhammer 40,000 gives us the planet of Calth in the Ultramar sector, where there are bases, cities, and agricultural communities built up in the planet's massive cavern system, because the sun is deadly. Necron tomb complexes also qualify.
* Warhammer 40000 Gladius as the Old Ones, the Necrons and the Eldar, you are worthy of apotheosis and becoming an immortal Daemon Prince. Your victory is short-lived as the Chaos Gods have further plans. They plunge your new self into the relic planet's World Circuit and merge you with Gladius Prime before dumping the whole planet into the Warp. You're now the biggest Daemon Engine ever, and a new (albeit trapped) god in your own right.
* Warhammer 40000 Gladius, the Space Marines realize they can't stop the evil tainting the planet without doing an Exterminatus while they're still on Gladius. They're happy to do it, but to preserve their Chapter for the future, they first make a Geneseed Bunker to safely store geneseeds for the eventual revival of the Chapter.

* Warhammer 40,000 governor, to be held responsible by the Administratum should the planet lapse in any of its three duties.
* Warhammer 40,000, grabbing the commissar's cap and using it to slaughter half his men, sticking explosives on his side's transports as a prank, spelling amusing messages with dead bodies, making carnage angels, etc. If ever you see Kharn's name followed by "What a guy!", it's a reference to this view.
* Warhammer 40,000 had an ultra-maximum security prison in which all the doors automatically unlocked in the event of a power outage.
* Warhammer 40,000 happened, as Games Workshop took down the .PDF with the results from their site, and materials published after the Eye of Terror campaign speak of Eldrad as alive. He is still included as a fieldable character in the Eldar codex published afterward.
* Warhammer 40,000, happens a lot. The Dark Angels homeworld was destroyed, and their HQ The Rock is on a chunk of what's left of their home planet, and Magnus' homeworld of Prospero getting utterly annihilated by his brother was a big part of why Magnus became a Champion of Chaos.
* Warhammer 40,000-happy Imperium (and infuriates them when the T'au how up with non-depleted forces). The Tau do have some cases of last stands, but view it as proof of the commander's incompetence if he let the situation degrade that far.
* Warhammer 40,000. Harsh discipline and brutal training methods are commonplace, and deaths, while meant to be avoided, are expected and not uncommon.
* Warhammer 40,000 has a few, but none of them explain what the original place was (except New Badab, which replaced the Red Corsairs old homeworld of Badab).
* Warhammer 40,000 has a few mentions of something called a "Void Whale". In the 5th edition rulebook, there's a picture of one. It looks like a combination of whale and an anglerfish. In SPACE. The Space Wolves codex has a short story about a mutated Void Whale. It was 12,000 miles long. The little picture of the whale using a small moon to lure stuff into its mouth is pretty much to scale.
* Warhammer 40,000 has a few unit combinations that compliment each others' skills very effectively. Scout Bikers and Terminators in a Space Marine army, for instance; the Scouts have teleport homers that patch up the Terminators' lack of mobility by dropping them on the enemy on a spot that moves very quickly, the Terminators make up for the Scouts' lack of durability and close combat prowess, everyone wins. Except for the poor Tau on the other side of the field that just got a new orifice to defecate through.
* Warhammer 40,000 has a kill-counter built into the H.U.D. of his helmet, and regularly amuses himself by conducting a body-count competition against his own personal best in every battle and campaign that he takes part in; a tally of 5,000 in a day being merely "quite good" by his own reckoning.
* Warhammer 40,000 has a lot of these, such as the Imperial Guard Valkyrie, the Space Marine Thunderhawk, the Eldar Vampire, or the Tau Orca.
* Warhammer 40,000 has an example in the staff of Orican the Seer, said staff existing half-a-second before the "now". The effect is described that the staff will hit the enemy before Orican even swings it, ensuring a hit. In game-terms, this allows Orican to reroll to-hit dice.
* Warhammer 40,000 has an extremely well crafted setting with a complex history going back tens of thousands of years.
* Warhammer 40,000 has an eye instead of a nipple on its exposed breast. The Forgeworld model for the Keeper of Secrets (a greater daemon of Slaanesh) has multiple breasts, several with eyes in place of nipples.
* Warhammer 40,000 has are dystopias. The Imperium believes that new technology is heresy, creative thought is heresy, and lots of other things are heresy. The Tau require everybody to work toward the "greater good" (which apparently involves concentration camps for dissenters).
* Warhammer 40,000 has a version of this, which is notable for an adversarial game with no impartial storyteller. A callout in its core rulebook called "The Most Important Rule" that boils down to a mutual version of this: if you aren't sure how something works, whatever you mutually agree at the tabletop is fine, and if you can't agree then roll-off to pick a side and get on with it. The game has an

incredible number of moving parts, with a standard game involving the core rules and two codices that have additions and exceptions to them, so this helps keep a game moving without diving into the manual every turn. Like other games mentioned above, competitive-level games tend to defer to the referee or tournament organizer who's more familiar with the rules and errata.
* Warhammer 40,000 has a whole line of differently-flavored RPGs, here by order of publication:
* Warhammer 40,000 has caught onto this; one of its many Thoughts For The Day being "Hope is the first step on the road to disappointment". It helps when the literal god of Hope is also the god of Manipulation.
* Warhammer 40,000 has Chaos Marines randomly break down and cackle occasionally.
* Warhammer 40,000 has Comorragh, the city of the Dark Eldar. It's roughly the size you'd expect from this trope, but it's not on an actual planet — rather, it's a collection of ports, fortresses, lesser settlements and assorted strongholds and refuges built by the Dark Eldar within the Webway (essentially a sort of pocket dimension consisting of a galaxy-spanning maze of tunnels and passages used by the various Eldar peoples for FTL travel) all closely linked by a large number of portals and passages to the point that, for all practical purposes, they act as a single, vast city.
* Warhammer 40,000 has demons from hell and medieval inquisitors as some of its factions, borrowing heavily from Christian theology (especially Catholicism).
* Warhammer 40,000 has direct exposure to Chaos causing things like being attacked by clouds of anger, and daemons are made of emotion.
* Warhammer 40,000 has Eversor Assassins, essentially a human weapon of mass destruction massively modified with augmetics and drug injection systems. They're kept in stasis at all times, and are mentally programmed with various targets for their next mission. Once activated, they will attempt to kill their assigned targets, but will also kill every living thing they see along the way, exploding upon death. Even once their mission is over, they won't stop looking for things to kill until their handlers show up and shut them down with a code word.
* Warhammer 40,000 has had several incarnations of these with the Tyranids since third edition.
* Warhammer 40,000 has its share, both in the Horus Heresy and the 41st millennium.
* Warhammer 40,000 has long been part of the game. The new codices are supposed to be more powerful to try and drum up interest and sell more models. (Case in point, the extremely powerful 6th Edition Tau Empire codex wasn't even written by him.) The lack of quality control and playtesting of codices is also the result of a direction change at Games Workshop to generate content in a rapid manner.
* Warhammer 40,000 has many instances, although the official miniatures usually have it downplayed for censorship reasons (but not the books/artwork).
* Warhammer 40,000 has never been revealed. He is always referred to as the Emperor. Ostensibly, The God-Emperor is a transcendent being who has had tens of thousands of lives (although Sigmar's origin story is very similar to the post-Age of Strife God-Emperor). His backstory is given as being the final reincarnation of thousands of amalgamated shamans 48,000 years before the main storyline: which would give him an innumerable quantity of possible names—and no need for any of them. It's heavily implied he was a lot of important historical figures, including Jesus.
* Warhammer 40,000 has no shortage of these, with the youngest Chaos god being ten thousand years old. The other three achieved sentience during the Renaissance, Middle Ages and Mesopotamian eras respectively, while the Orks were created approximately sixty million years before humans existed, but the eldest entities in the universe are the C'tan.
* Warhammer 40,000 hasn't always been the grim place it is nowadays. There's also recaff for coffee, amasec for something like whiskey, tanna for chifir (Russian gulag tea), vox for radio transmitter of any kind, Auspex and Augurs for sensors and quite a couple of other "futuristic" and/or grimdark names.
* Warhammer 40,000 has Penal Colonies, most of which have a toxic atmosphere. Some are used for mining, others are just used to hold the people. They are also used

for recruitment into Penal Legions which are sent on missions too dangerous for normal troopers or ones which need the people who did it to be executed afterwards.
* Warhammer 40,000 has plenty of galactic maps and a few maps of individual planets or areas thereof. Most detailed perhaps being the ones of Armageddon's two main continents in various Armageddon War-related materials. The Horus Heresy novel Mechanicum has a map of the (real) Tharsis region of Mars, with all its (fictional!) 31st millennium locations marked.
* Warhammer 40,000 has plenty of planetary libraries and eldritch stores of information:
* Warhammer 40,000 has plenty of this. Being a grim dark world, there is no shortage of Sick and Wrong things in it. A few examples would be the Forces of Chaos (Slaanesh and Nurgle in particular), the victims of Dark Eldar, The Imperium of Man, who have been described as Nazis in Space!, who are only "good" by comparison of MUCH worse horrors, and many more.
* Warhammer 40,000, has psychic defences, or have all three, such weapons are quite necessary, but Guardsmen are just normal humans in flak jackets, so... Yeah. Guardsmen have terrible morale for good reason.
* Warhammer 40,000 has several vehicle variants on each faction that the fluff describes as more effective against infantry. An example are variants of the Chimera APC with flamethrowers or toxic waste-throwers instead of the normal Multi-Laser, the 'Devastator'-Pattern Leman Russ tank (with dual autocannons which are effective against anything with light armor, but again the fluff describes as an 'anti-personnel' variant of the tank... which says a lot about the kind of monsters commonly considered as 'enemy personnel', actually) and the Punisher Pattern Leman Russ tank,(which is armed with an enormous Gatling gun capable of turning a massive enemy army into red mist) .
* Warhammer 40,000 has Slaanesh's realm, composed of concentric rings known as the Six Circles of Seduction. Each of them tempts anyone who enters with a different carnal sin, but stopping even for a moment to indulge in any of it will leave one trapped there forever.
* Warhammer 40,000 has stated that the reason for this is because female models don't sell well, although their critics suggest it's because the model lines were not supported well by the company (the aforementioned Sisters being the best example of that).
* Warhammer 40,000 has such bonuses in spades, ranging from mythology to sf to history. Some examples:
* Warhammer 40,000 has Tactical Marines which are durable units that shoot at enemies by default, but actually achieve a better damage per second with melee attacks, and have a 'Melee Resistance' aura for themselves that reduces melee damage taken (all other melee units in the game has this).
* Warhammer 40,000 has the Black Library of the Eldar - an ancient craftworld adrift in the Webway between reality and the Warp. It contains the race's gathered knowledge of Chaos and Sorcery, and is maintained in order to better understand and combat the machinations of the Infernal Powers. Ahzek Ahriman of the Thousand Sons is particularly obsessed with the Library.
* Warhammer 40,000, has the distinct property of being unpredictable, but acts unpredictable given this by being, to a degree, predictable. It's consistent in its nature of being entwined with the soul, affecting people with high psychic aptitude and areas of chaotic influence, but exactly how it affects these people and areas when it does so is characteristically unpredictable.
* Warhammer 40,000 has the Eldar craftworlds, massive spaceships built to escape an impending disaster that destroyed the old Eldar empire. Unlike many arks, the craftworlds were built as self-sustaining worlds that would travel the galaxy, rather than as simple transportation away from danger.
* Warhammer 40,000 has the Eternal Warrior rule, which renders models with it immune to Instant Death. This basically exists to stop expensive and powerful characters from being one-shot by a lucky Lascannon hit even if their Toughness isn't that good.
* Warhammer 40,000 has the Gift of Chaos/Boon of Mutation (essentially the same

ability, but one is Chaos Marine psychic power and the other is a Daemon shooting attack), which attempts to turn the target into a Chaos Spawn (a mindless mass of mutated flesh). The Orks also have a special character that can polymorph an enemy into a Squig. The Tyranids have a special character that can infect units arriving from the reserve, causing them to turn into Ripper Swarms.
* Warhammer 40,000 has the Keeper of Secrets, the Greater Daemon of Slaanesh that knows every one of your dirty little secrets. It actively uses this information in combat to hamper you, ranging from bribing you with your heart's desires to revealing something that shatters its victim's minds.
* Warhammer 40,000 has the Lost Eldar Craftworld of Altansar, introduced to the game background c. 1992 as the place of origin of the Dark Reaper Phoenix Lord Maugan Ra. Maugan Ra was the last survivor of the doomed world-ship, which was dragged into the Eye of Terror millennia ago by treacherous warp-currents, and for just over a decade (real-world time!) that was all anyone knew about the place. In the Eye of Terror campaign and accompanying rulebook of 2003, Maugan Ra returned to the Eye with the express aim of rescuing Altansar and its inhabitants from their unpleasant sojourn. He succeeded, after a fashion, and the Craftworld's livery and background appeared in the 2006 Eldar codex. Unfortunately their period trapped in the warp has turned the Eldar of Altansar into otherworldly wraith-like creatures, but they are now officially at large in the universe once more.
* Warhammer 40,000 has these. Lots of them, actually. In every size, shape, and means of destruction imaginable.
* Warhammer 40,000 has the Tau, organic aliens who have embraced machine culture enough to section their society into castes based on their given functions in life and where they come from. Even their names denote their particular traits.
* Warhammer 40,000 has the Tau turn a natural satellite into a Kill Sat. As in, they built a cannon capable of firing across the system's interplanetary distances on a moon. (Flee not, spoilerphobes! This is told to you in the very first campaign cinematic!)
* Warhammer 40,000 has the tongue so firmly planted in cheek its punching through, in-universe it is so serious and depressing it's rather surprising you have productive people at all considering how depressing it must be to be in charge of anything in 40k. It also depends on which perspective it's coming from. For example: a battle between the Imperial Guard and the Orks. If the story is from the Ork's perspective, the dialogue and descriptions take an amusing and humourous tone, talking about "takin' da biggest, baddest shootas and choppas ya can get 'old of, and spendin' da rest of da havin' a bit 'o' fun, krumpin' 'umie gitz with da boyz and tryin' not ta get zogged yaself". Take the point of view of an Imperial Guardsman, and the same battle is a terrifying fight for survival with your woefully inadequate lasgun and body armour, against hordes of hulking tough-as-nails green-skinned horrors brandishing monstrous cleavers and improbably-sized machine guns and flamethrowers.
* Warhammer 40,000 has the Tyranids, who give a whole new meaning to Death Is Cheap. Any Tyranid that gets killed in an invasion is just digested and used to make more 'Nids.
* Warhammer 40,000 has three factions: the Eldar, who, with a small number of elite units, are the Powerhouse; the Tyranids, who, with a large number of units, including many that are human genestealer hybrids, are the Subversives; and the Imperium, who are the Balanced. Interestingly, you play as the Eldar in campaign mode.
* Warhammer 40,000 has three kinds of this, all distinct from one another.
* Warhammer 40,000 has two notable instances that show up in models for the game:
* Warhammer 40,000 has undergone quite a few of these through its four editions, including entire races being retconned out. Anyone younger than 20 remember the Squats? Didn't think so. The official policy on the Squats now appears to be that the entire race was murderlised by one of the Tyranid Hive Fleets. The Tyranids are God's gift to retconners. "Hey, what happened to those guys?" "Eaten by Tyranids." And then Ret Conception kicked in with the game's 6th edition, which brought the Squats back as a race of abhumans tolerated by the Imperium.

* Warhammer 40,000 have a greater connection to the Warp, but are more likely to attract attention from the hellish beings that lurk there and are therefore more vulnerable to daemonic possession.
* Warhammer 40,000 have an outnumbered defender trying to hold out against the attacker until their reserves come in.
* Warhammer 40,000 have been shown to actually provide semi-accurate (although not always clear) predictions.
* Warhammer 40,000 have Exorcist artillery organs that do this. Space Marines also have multiple missile tubes on their Whirlwinds and they even have a portable version for their Terminator armor, but not to as over-the-top extents as with Skyrays or Exorcists.
* Warhammer 40,000 have plans, they're just also really good at ad-libbing when it all goes to hell. The Orks, on the other hand:
* Warhammer 40,000 have the souls of all previous wearers of their armour bound into it. Though the mind of the wearer (usually) remains dominant, they can commune with the souls of the previous exarchs and gain their knowlege. Phoenix Lords, the oldest of the exarchs and creators of the Path of the Warrior are an exception though. Their souls are so powerful that the original personality will dominate all others, causing anybody who wears their armour to effectively become a reincarnation of the Phoenix Lord.
* Warhammer 40,000 have typically been depicted in artwork and models as having large, heavily muscled torsos with broad shoulders and well developed arms sitting atop a pair of legs that are relatively short and stubby by comparison. Prior to this, Orks had a more humanlike, though still heavily built, appearance.
* Warhammer 40,000 helmsmen, capable of navigating through the Warp and allowing the Imperium to exist. Many officers in the Imperial Navy are so heavily augmented that they're often described as being more part of their ships than autonomous beings.
* Warhammer 40,000. He mentions that he hopes that an attack on the capital city of Perlia managed to destroy a particularly hated monument to him (a clock that features him decapitating an orc every hour), but he's disappointed to learn it's still standing.
* Warhammer 40,000, heretics, mutants, traitors, etc., etc., so you can imagine how reliable they are.
* Warhammer 40,000 heroes, used as heavy-duty combat walkers and spending centuries in slumber between campaigns. Being put in one is an incredible honor, as it means the Marine is considered important enough in terms of experience and morale that they may continue to serve in death. Chaos Dreadnoughts have the same function... but being in one is considered one of the worst fates a servant of Chaos can face, for one simple reason: they don't get the luxury of spending their non-combat time asleep, instead having their weapons and limbs deactivated and having to wait for the next battle, fully aware of every passing second.
* Warhammer 40,000. He's also not dead and stuck in a chair, which counts for something, certainly.
* Warhammer 40,000. His "feats" also come from the list of Chuck Norris facts.
* Warhammer 40,000), Holy Terra is only important because of its importance to the Imperium; if it weren't so critical to enemy morale, no one would care. As it is, it's probable that the Necrons and Orks don't care anyway (because they're too mysterious and too stupid, respectively). (The Tyrannids, however, are homing in on Earth specifically because they're drawn by the Astronomican. In WH40k, it sucks to be significant.)
* Warhammer 40,000 Horus the Warmaster (i.e. the Emperor's second-in-command, since he was the Emperor's favorite son).
* Warhammer 40,000, however, most imperial tech does not come anywhere near this level.
* Warhammer 40,000 However, the way GW handled their discontinuation has been infamous in the fandom; after much heckling from people who still liked them and hated the "squatting" of the squats, GW started banning anyone who made mention of the Squats on their personal forums and absolute refusal to even discuss the matter

at public events. While the rest of the line was spared from this, "squat" ended up evolving into a term meaning "to be discontinued and erased from canon" within the fandom. It's only during the Kevin Rountree era that GW finally started acknowledging the Squats, likely wanting to turn this around and finally put an end to all the memes surrounding it.
* Warhammer 40,000 However, they received a brief mention in the 6th edition rulebook, which carried over to the 7th edition rulebook.
* Warhammer 40,000 - however, this did mean that flame weapons could set infantry alight, who then ran around panicked whilst their squadmates tried to beat out the flames. Unless they were Frenzied, of course - in which case they charged screaming at the enemy, ignoring the fact that they were covered in burning chemicals. If you avoided rolling the "goes out" result, you could theoretically have a squad of insane, howling madmen, running across a battlefield and cutting down their enemies whilst all the time being human torches.
* Warhammer 40,000. If anything goes wrong, madness will be the least of your worries.
* Warhammer 40,000 if he so chooses (Though he is usually polite about it), and often the dangers they hunt require that kind of firepower to destroy. The Inquisition is divided into many groups or "Ordos" specializing in various prey, but only three have any real clout: rooting out traitors and heretics (Ordo Hereticus), dealing with Chaos Daemons and incursions (Ordo Malleus), or learning about/shooting aliens (Ordo Xenos).
* Warhammer 40,000, if only to use them as cannon fodder in some later scheme.
* Warhammer 40,000 if they did not behave like this; the iron grip of the Imperium is the only thing keeping mankind alive.
* Warhammer 40,000 Imperial Guard campaigns, you get to witness the fate of captured Chaos Cultists.
* Warhammer 40000 Imperial Guardsmen realizing "They're using cover! They're supposed to be just animals!" In their defense, their training manuals do insist that Tyranids are simple-minded beasts.
* Warhammer 40,000 impressed with Kais' bloodbath that he started backing the little blue guy.
* Warhammer 40,000, in actual gameplay, wiping out the enemy's force from the table is generally an alternative win condition, as opposed to the point system revolving around battlefield objectives. This is known as "tabling" the opponent.
* Warhammer 40,000 in a hundred years. What the Emperor did after, while well meaning, didn't help Lorgar in the slightest.
* Warhammer 40,000' included 10 pt 'stunt doubles' that would absorb a single hit for a marine before dying, but were just as hard to kill as the regular kind.
* Warhammer 40,000 included). Same applies to the Imperial Guard where Officers from nobility get actual food and the ordinary grunt's rations are indestructible bricks or goos of superdense nutrition. Though this varies wildly world to world. Your typical Civilized (Gamma-class) world citizen would eat much like a modern 1st world individual. Hive, Fortress and Forge worlds without a fraction of the agricultural capacity needed to support their population get the densest, cheapest sources for the masses (if they're lucky). Shipping halfway decent food through the warp is unreliable at best and incomprehensibly dangerous at worst, so the price goes up a bit.
* Warhammer 40,000 in constant war. Earth itself, on the other hand is relatively safe by Warhammer 40K standards, though back in the Age of Strife, around ten thousand years ago, it was divided into warring techno-barbarian empires that only stopped when the Emperor arrived to conquer it all and stop the fighting.
* Warhammer 40,000 in existence. From its fluff to the posing of its models, everything about 40K drips pure, unbridled, unfiltered, grimdark MANLINESS! Some examples include:
* Warhammer 40,000. In fact, the 'Nam-inspired Catachan Jungle Fighters require a special saving roll before the game even starts to prevent them from fragging the Commissar (Oops, sorry sir!).
* Warhammer 40,000) influenced human history since. Older editions occasionally

implied he was Jesus, while he is still all but explicitly stated to have been Saint George.
* Warhammer 40,000 in full battle plate is a pussy compared to Patience Kys.
* Warhammer 40,000 in honor of their rescuers, only for the Necrons to turn around and destroy the T'au without a second thought.
* Warhammer 40,000. Initiation into the more formal Chaos Legions and the Grey Knights goes beyond horrific.
* Warhammer 40,000. In most cases, it's a necessity: the lower atmosphere is so polluted by millenia of reckless industrial production that only fresh air pumped in from the top of the hive allows them to survive.
* Warhammer 40,000 in particular. In it he is callous and uncaring, his affection for his sons being just an act to maintain their loyalty while mentally he refers to them by their legion numbers.
* Warhammer 40,000. Inquisitors (especially Radicals) also fit the description.
* Warhammer 40,000 in smaller-than-Apocalypse games? Because it's cool and fun, that's why.
* Warhammer 40,000 in the Eye of Terror, Fabius implanted Saqqara with a bio-bomb in his chest. When his services aren't required by Fabius, Saqqara divides his time between trying to start a revolution amongst Bile's servants and trying to remove the bomb from his chest before it inevitably detonates.
* Warhammer 40,000 in the fandom that the PDF is only mentioned in a footnote that's some variation of "The PDF responded but were killed to a man".
* Warhammer 40,000 in the first book. It turns out he got the nickname when a malfunctioning plasma cannon exploded in his hands during the most traumatic event of his life.
* Warhammer 40,000 in the form of the incorruptible Grey Knights. Not one of them has fallen to Chaos or turned rogue but that's only because they were given the "666 Rites of the Emperor" which accounts to 666 brain washings.
* Warhammer 40,000 in the Prol system because they're running out of places to store all the paperwork. All sides making their points in multi-volume treatises is not helping.
* Warhammer 40,000. In this kind of universe, it's pretty much a prerequisite for survival. And sometimes even these aren't enough.
* Warhammer 40,000 into his retinue after rescuing her from one of these hunts.
* Warhammer 40,000 involves the Orks repeatedly failing to intercept a messenger squig. They breed a special hunting squig to take it down, but find that it won't come back once the messenger is caught. The story ends with the skwadron's boss repeating "Catch that squig!"
* Warhammer 40,000 in what would become the bloodiest war in human history.
* Warhammer 40,000 is a lone Space Marine as old as they come, whose entire identity is a mess of contradictions and who makes his former battle brothers the Dark Angels drop whatever they were doing to hunt him down. More importantly, it is believed that he carries an abnormally huge sword which he never uses, and could be the weapon of the Dark Angel's Primarch, which he supposedly want to take to the throne room of the Emperor. Whether he is a dangerous revolutionary who plots to kill the Master of Mankind, or a lost soul looking for redemption for past sins, his entire image fits snugly in the Ronin trope.
* Warhammer 40,000 is an alternate universe comprised of psychic energy and shaped by the emotions and thoughts of sentient lifeforms. The setting being what it is, the Warp is a nightmarish realm of daemons where even benign emotions like courage, hope, perseverance and love fuel the Chaos Gods of slaughter, scheming, plague and excess.
* Warhammer 40,000 is a similar organization, they take volunteers from every Space Marine chapter, and many a Marine from a destroyed Chapter has lived out the remainder of his career amongst their ranks.
* Warhammer 40,000 is a type of advanced synthetic material that has the consistency of plastic but the tensile strength of a steel alloy that was developed during the Dark Age of Technology, but long used by the Imperium of Mankind in the construction of many types of personal infantry armor. Heavy-duty plasteel were

combined with the heat-resistant ceramic material called ceramite to craft the plating of Terminator Armour when the Adeptus Mechanicus still maintained the technical knowledge required to manufacture it.
* Warhammer 40,000 is between "puritan" inquisitors, who uphold the strict, dogmatic, xenophobic credo of the Inquisition to the letter, and "radical" inquisitors who play fast and loose with the rules, often believe that the ends justify the means and have a tendency to question authority and orthodoxy in all matters. A puritan, for example, upon uncovering the activities of a Chaos cult, would launch a straightforward purge and burn them all at the stake, no questions asked. A radical might very well try to infiltrate the cult, learn what they're doing and subvert their activities — possibly even taking their daemon-cursed artefacts to turn against their creators. So far so good — and in line with modern cultural expectations we might expect that the inflexible puritans would tend to be the old-fashioned fuddy-duddies, while the radicals are the dynamic fresh blood who can see beyond the stifling hidebound dogma. But thanks to the nature of the job it very much tends to be the young, freshly-appointed inquisitors who are the puritans and the older, grizzled, seen-it-all-before veterans who are the radicals. They hit the galaxy as fiery dogmatics (the general default state for Imperial citizens), but decades or centuries of seeing how complicated and clandestine the Imperium and its enemies are tends to give them a more nuanced, less black-and-white outlook. The Gregor Eisenhorn trilogy of tie-in novels takes this transition as its major premise — following the career of the young, puritanical Eisenhorn as his experiences gradually turn him into the most radical of radicals.
* Warhammer 40,000 is Dark Eldar Scourge and thus has a giant, leathery wings. She wasn't born with them but underwent severe surgical operations to have them fitted on her back.
* Warhammer 40,000 is definitely evil. Most notably he's a follower of Khorne, the god of bloodshed and slaughter.
* Warhammer 40,000 is fond of describing artwork influenced by Slaanesh as portraying people, beasts, and daemons in "blasphemous and improbable" positions.
* Warhammer 40,000 is like. As one might expect, such speeches are commonplace.
* Warhammer 40,000 is marinated in this, particularly as the Horus Heresy became more fleshed-out. The setting's gradual in-universe descent into the shitter is punctuated with people making bad decisions based on their flaws that end up coming back to bite them catastrophically, usually with the assistance of one of the setting's fascinating variety of evil gods.
* Warhammer 40,000" is no proof against psychic detection. The measured advice of a few psykers can have a drastic effect on the deployment and success of an entire military campaign.
* Warhammer 40,000 isn't so much a story as a setting, so it doesn't technically have a storyline, only a backstory. More to the point, however, "advancing the storyline" would have logically meant killing off the Tau and possibly the Imperium as well; which were the two best-selling factions as of 2013.
* Warhammer 40,000 is of this nature. Eldar technology tends to resemble exquisitely carved bone, rendered in flowing organic shapes and studded with gemstones. High-ranking Eldar seers carry decorative spears, wear ribbed bone breastplates and cast bone runes from leather pouches. The "bone" in question is actually a highly advanced psycho-plastic substance called Wraithbone, and is shaped by the Eldar's formidable mental powers. The Dark Eldar use a similarly organic aesthetic, but with even weirder and much nastier devices at their disposal. Many of their most exotic weapons look like objects out of a fairy-tale, such as mirrors that shatter the individual reflected in them when they break, or caskets of malicious flesh-eating sprites.
* Warhammer 40,000 is stated as capable of splitting an armoured space marine from crown to crotch, or something along those lines. Also, the damage rules from 40k roleplay games mention that characters can lose legs from enemy attacks.
* Warhammer 40,000 is that no matter how big, bad and fierce something is, it'll be afraid of something else.

* Warhammer 40,000) is that their god demands blood, no matter whose, as long as it's obtained through combat.
* Warhammer 40,000 is that they can consume a creatures brain to experience its memories.
* Warhammer 40,000 is the physical incarnation of the god of the dead and as such is surrounded by a frigid aura of death that leaves a trail of hoarfrost as it crosses the battlefield.
* Warhammer 40,000 is trapped in one of these, while a Daemon uses his physical shell.
* Warhammer 40,000 is utterly ruthless when it comes to ensuring the survival of Man over the survival of men, and justifies its draconian actions as being necessary in the face of the aforementioned threats.
* Warhammer 40,000. It's all but stated that despite the scale and power of current era humanity, they're barely scratching the surface of what they could once use.
* Warhammer 40,000: It's all but stated that the Adeptus Mechanicus' Machine God is in fact worshiping the Void Dragon, a C'tan star god who was imprisoned on Mars long ago.
* Warhammer 40,000 It says a lot about how much the Emperor loved Horus that none of that was actually enough to force the Emperor to kill Horus. Even as he was being torn apart, he still hoped that Horus could be redeemed. Then a lone soldier (who prior to retcons, was an ordinary human being with absolutely no chance of hurting Horus) stood before Horus in a futile attempt to defend the Emperor. Horus casually flayed the man alive with a glance. This cold-blooded murder is what finally convinced the Emperor that Horus needed to die. So the mortally wounded Emperor launched a psychic attack of such power that it obliterated Horus and sent the four Chaos gods who had possessed Horus screaming back to the Warp.
* Warhammer 40,000 itself and continue to advise the living. Additionally, in times of great need, soul can be downloaded from the infinity circuit, placed into spirit stones, and uploaded into Asuryani war machines and Wraith-constructs to act as a form of spiritual AI.
* Warhammer 40,000 itself — just replace "cutscene" with "background material".
* Warhammer 40,000: It's heavily suggested that Dark Eldar Mandrakes are this. They can crawl into and out of the shadows of their targets, come from a dimension of pure shadow and often request odd things in exchange for their services. Also in 40k, some daemons are shadows. This means that bullets and cannon shells pass through them harmlessly, but laser beams and similar energy weapons will utterly destroy them. Just one of the reasons why a lasgun is the most practical weapon in the Imperium.
* Warhammer 40,000, it's just that germs, bacteria and vermin outnumber sentient species, and they need love too...).
* Warhammer 40,000 it's more like a Billion Bug March). One Imperial Guard codex even uses photo-editing tricks to show just how large a single regiment is, resulting in a two-page spread of four thousand toy soldiers all lined up in formation.
* Warhammer 40,000, its tough to be sure. After serveral thousand years, it's likely that the human race has developed new curse words.
* Warhammer 40,000), its use is rather limited. And now they've found out that using them strengthens Nurgle, the Chaos god of disease...
* Warhammer 40,000 "Jinxie" Penlan with the command staff when her reputation comes up, and...
* Warhammer 40,000 just to be safe. Outside of the Inquisition itself this distinction is almost completely unknown, and all psykers get lumped together as witches; the more sophisticated might avoid using the term for sanctioned psychers out of politeness.
* Warhammer 40,000, Kage throws away his pardon by starting a brawl at the end. In the subsequent novels, Schaeffer, more than once, points out that this was what motivated him, as he was the last of the four thousand the legion started out with.
* Warhammer 40,000. Killing a local Synapse Creature causes the portion of the Hive

under its sway to become disoriented until another one can move in to take its place.
* Warhammer 40,000 killing machine, he'd likely be executed for being aided by Chaos.
* Warhammer 40,000: Kill Team are just as capable as their fellows in battle but are also able to boost the resilience of members of the kill team and, with the right skills, heal their comrade's injuries.
* Warhammer 40,000: Kill Team mentions that Comms specialist act as a relay between the Kill Team, and their allies and commanders. This is represented in the game by the 'Command Relay' Level 3 Comms skill that can refund Command Points.
* Warhammer 40000 Killteam to any enemy models that move through that terrain piece.
* Warhammer 40,000: Kill Team: Weapon specialists from the 2016 game and Sniper specialists from the 2018 version can take a number of skills that increase the effectiveness of their ranged attacks above that of their fellow warriors, enabling them to fire accurately beyond the usual effective range of their weapon, hit the most vulnerable part of an enemy with pinpoint accuracy or pick out targets in cover as if they were standing in the open.
* Warhammer 40,000. Lacking the technosorcery of the Tau or Necrons, the Imperium uses Q-ships, merchantmen or barges (the novel uses an ore barge) refitted to performance levels of military-grade craft of a similar class. Given that an ore barge is the size of a light cruiser...
* Warhammer 40,000 languages, and humans of the Imperium speak High or Low Gothic.
* Warhammer 40,000. Later novels set during the Horus Heresy expanded considerably on the time of the Space Marine Legions, including the "Lost Legions"; while they are never named nor are their Primarchs brought up, dialogue suggests they did, in fact, go with Horus — and were wiped out for it. However, this information directly contradicts other equally canon sources that suggest the two Legions were destroyed before the Horus Heresy for other reasons, ranging from siding with alien species to simply succumbing in battle.
* Warhammer 40,000 leader wallbanged his metal forehead against the inner wall of a bunker in response to his units' abysmal accuracy.
* Warhammer 40,000, leading to the collapse of the Imperium and a win for Chaos).
* Warhammer 40,000, learning how to enter Heroic Safe Mode is one of the core tenets of Eldar aspect warrior training.
* Warhammer 40,000 librarians, which are more powerful at level one than your own psykers are at level seven.
* Warhammer 40,000 like army, fighting Chaos sorcerers and cultists with tanks, artillery and riflemen.
* Warhammer 40,000 like it just fine). Most inhabitants of a hive city never see the light of day; only the nobles in their spires have that luxury.
* Warhammer 40,000 likewise.) The Eldar and Dark Eldar make liberal use of peculiar spellings: Vyper hover-tanks, Wych cults, Haemonculi...
* Warhammer 40,000: Lion El'Jonson probably counts as this to a greater degree than the other Primarchs. Considering he joined the Crusade much later than, say, Horus, he probably won more military victories than any of his brothers, proportionally speaking. Horus and Robute Guilliman would be the runners-up.
* Warhammer 40,000 (literally, the models can be used for both games).
* Warhammer 40,000, Loken knows that Erebus is lying to him because he pointed out that the interex had accused them of stealing a kinebrach's sword—and in fact, the interex had only accused them of stealing a weapon.
* Warhammer 40,000 look like humans with pointed ears and angular features in art. However, it's made clear in descriptions that no-one would ever make that mistake in-universe due to the weird boneless way they move, their fingers being compared to writhing worms.
* Warhammer 40,000 look. The Space Wolves Chapter, who are giant space Vikings, have equally giant beards. Other Marines like Sergeant Torias Telion of the Ultramarines can also sport beards.
* Warhammer 40,000 love explosions as much as they do loud guns, fast vehicles and

a good fight. So much that for them, a troop transport detonating in midair killing every boy inside and resulting in a catastrophic explosion is just as good a result as if it had successfully landed.
* Warhammer 40,000 Magnus the Red tried to warn the Emperor of his brother Horus's corruption but was ignored. While Magnus was right, he used sorcery to deliver the message, which was not only outlawed but inadvertently allowed daemons to invade the Imperial Palace. By the time the Emperor realized the truth, half of his sons had been corrupted and turned against him. Worst of all Magnus himself was forced to turn to Chaos in order to save his legion, joining the same traitors he tried to warn his father about.
* Warhammer 40,000 main goal, driven by perpetual hunger, is to eat everything they com into contact with. They would use your genetic material for its evolutionary advantages, and your flesh, and that of dead Tyranids, for the raw materials for creating more Tyranid life forms.
* Warhammer 40,000 make extensive use of gauss weapons, firing green lightning that strips away the target, layer by molecular layer, often to the bone. The basic version employed by Necron grunts is even called the Gauss Flayer. A subversion, technically, as there is so much power even in the infantry versions to instantly vaporise enemy infantry.
* Warhammer 40,000 making it to retirement age are pretty low, considering that the Imperium is almost continuously at war with some if not all of its neighbors (and quite frequently itself). Those that make it are generally discharged on the planet they happen to be on when they retire, and their retirement package does not include a ticket back to their home planet (which could be thousands of light years away, depending on what events happened during their deployment). As such, there is a very good chance that anyone who enlists in a Guard regiment will never return to their home planet, let alone their home town, ever again. Indeed, the lucky ones instead get a commission and some land on the planet they conquered most recently, essentially becoming landed gentry there.
* Warhammer 40,000, many of the Space Marines felt this towards their Primarchs. Tragically, this meant that when the Traitor Primarchs turned to Chaos, they dragged their Legions down with them.
* Warhammer 40,000, many planets in the Screaming Vortex have impossible shapes, either due to the Immaterium's reality-warping nature, or because a Daemon Prince shaped it to their whim (one such example is a planet shaped like a giant, grinning skull). One of the most noteworthy planets is "The Hollows", a forge world where the Dark Mechanicus ate away at the southern hemisphere with deep-core mining technology until the entire planet consisting of only an upper hemisphere with a thick, gnarled stem of rock jutting from beneath, making the planet look like a rotten, half-eaten fruit.
* Warhammer 40,000 Marines Malevolent. They're loyal to the Imperium of Man, but several of their actions are so brutal and immoral that you wonder sometimes why they haven't been declared Excommunicate Traitoris by the Inquisition.
* Warhammer 40,000, massive battlefleets, and elf ninja clowns that the planet's distant rulers are liable to send when they receive word that one of their vassals is under attack. On the other hand with the galaxy being so big, it may take days, weeks, or months for reinforcements to arrive.
* Warhammer 40,000 may decide that it would be best if they couldn't tell anyone about it, since the true nature of Chaos is supposed to be kept secret from the general public.
* Warhammer 40000 — but does nothing to your foe (the same mechanic is used for paratroopers getting shot down and tunneling units suffering a cave-in).
* Warhammer 40,000 — it's technically correct, but it fails to convey the sheer magnitude of the situation.
* Warhammer 40,000 — realizing it sounded stupid even as he said it — and the priest assures him that the man is being cared for and (gently) orders him to accept treatment.
* Warhammer 40,000 — used for extremely rapid troop deployment. There's even a special term for it: "Deep Strike".

* Warhammer 40,000 means ending up around seven feet tall before putting on your armour (which adds on another foot at least). And that's just the basic Space Marine. The Primarchs and God Emperor of Mankind were at least half again larger. Horus, when he killed Sanguinius and crippled the emperor, towered over his foes (mostly due to his [frankly enormous] power armor that makes a Space Marine look like an Imperial Guardsman in comparison).
* Warhammer 40,000) mentions the strange feeling of gravity shifting when they move from the range of one ship's gravity generator to another.
* Warhammer 40,000, Meritous Felyx Chass is actually 11, but juvenat and other bio-treatments were used to age him up to 17 effective.
* Warhammer 40,000 metagame varies depending on which edition is being played and which books have been published within that edition.
* Warhammer 40,000 miffed at the rude treatment he'd given her. Being a Greater Daemon, though, she wasn't too keen on anyone else either, though.
* Warhammer 40,000, Mikal feels heavily burdened by the role that fell on him when Berek was gravely wounded. He sees the unconscious leader and asks why him — and is enraged when he realizes that the skald, Morgrim, listened to him. Morgrim is able to reassure him.
* Warhammer 40,000: Mordia is a hive world and a death world, where the sun side is only inhabited by mutants and chaos cultists, while the rest of population lives on the night side of the planet. It's the homeworld of the Imperial Guard's Mordian Iron Guard regiments.
* Warhammer 40,000. Most armies have their own one too, sometimes doubling as their battle cry or rallying line:
* Warhammer 40,000, most factions have non-combatant worker units. The Imperial Guard faction has techpriests, who are heavily armored, armed with both a laspistol and a power axe, and can garrison in buildings more efficiently than a guardsmen squad.
* Warhammer 40,000 mostly has its action confined to the Milky Way, with humans in particular limited in how far they can travel by the psychic beacon produced by the Emperor. The Tyranids, however, have travelled from at least one other galaxy. Depending on the true size of the hive/organism, they could have consumed many before reaching this one, and could even be the size of a galaxy or bigger them/itself.
* Warhammer 40,000, mostly in the hive cities. Often led by the completely insane Redemptionist priests (whose unofficial credo is "Burn them all and let the Emperor sort them out"), when they're not being riled up by the local sorcerer of Tzeentch to distract the authorities from the daemon being summoned three levels lower or the genestealer infestation provoking unrest so as to pave the way for the Hive Fleet. Or all three at once.
* Warhammer 40,000, most of the settled planets are not, in fact, habitable. The Imperium seems to absolutely love settling worlds that humans can't actually expect to survive on.
* Warhammer 40,000 multiple times. Her present-time self is executed by one of her Sisters, whose zeal prevents her from accepting that the Emperor could possibly let things get so screwed up.
* Warhammer 40,000, nearly every single race has reasons and plans to exterminate every other race.
* Warhammer 40,000. Nearly gets shot by his commissar, but the Space Marines treat the request with utmost respect.
* Warhammer 40,000: Necron Monoliths, like most other Necron vehicles, hover as a means of movement. Unlike most other vehicles, however, the Monolith's slow, ponderous approach is infinitely more eerie and menacing.
* Warhammer 40,000.) Necrons are even less emotive...those who can speak, anyway.
* Warhammer 40,000. None moreso than Lord Commander Dante, Chapter Master of the Blood Angels.
* Warhammer 40,000, no-one particularly cares and Orfos doesn't dwell on it before jumping into the fray.
* Warhammer 40,000 no). They feature in Krieg's backstory (a rebellion ended in a

century of atomic fire, after which the population took atonement and trench warfare as their hat), and some Rad weapons (weapons that use radioactive fallout, not slang).
* Warhammer 40,000. Not infrequently, the result is the Imperium destroying the planet where it has gone wrong.
* Warhammer 40,000 not limited to Imperial Guard thinking that Orks are mindless brutes, Orks thinking Imperial Guard are just squishy wimps, Space Marines thinking filthy Eldar are no match for their zeal, Eldar thinking Space Marines are foolish primitives, everyone else thinking Necrons are just machines, Necrons thinking everyone else is just defenseless food... it happens a lot, is the point.
* Warhammer 40,000 - not only They Don't Make Them Like They Used To - ancient magic weapons and eldar artifacts benefit from 'ancientness' as much as human technology.
* Warhammer 40,000 novel Angels of Darkness, the story cuts back and forth between the interrogation of Chapter Master Astelan, and Brother Chaplain Boreas' storyline while on guard duty on Piscina, decades later. Interestingly, both plots include Boreas, and the effects of the first are enormous on the conclusion of the second plotline.
* Warhammer 40,000 novel does mention the geosynchronous ones being on the planet's equator.
* Warhammer 40,000 novels has a nasty scar nearly bisecting his face. It "nicely" foreshadows the extent of his treachery.
* Warhammer 40,000 novels make extensive use of other Imperial Guard regiments fighting alongside or in the same area as the Ghosts, with the commanders typically being named, likable individuals. Watch out, though, for the other commanders ever getting character development. If they do, bastardry will ensue at some point during the book.
* Warhammer 40,000 novels mention the names of several drugs: 'slaught, psychon, blissout, and others.
* Warhammer 40,000 novels often shout orders a good deal louder than they might really need to. But then, if you had the chance to yell "Nova cannon! ACTIVATE!" would you pass it up?
* Warhammer 40,000 novels use metric (but the game mechanics use imperial).
* Warhammer 40,000 novels, where the Tanith First is mostly engaged in secondary theatres of war during the Sabbat Worlds campaign, though their side missions are usually vital nonetheless.
* Warhammer 40,000 of all guns actively used by the series' factions, and they can blow body parts off. How realistically the weapons are portrayed varies.
* Warhammer 40,000 of All Mankind, who never wanted to be a god in the first place, but in his own words "wanted the best for his people". It's also his massive willpower born from love for Mankind that has allowed him to keep the Chaos rift at Terra closed and the Astronomican galactic beacon lit despite getting reduced to an undying corpse. That, and the sacrifice of a thousand souls every day so he can endure such a hellish state.
* Warhammer 40,000 of a planet he landed on as a child through brutal and uncompromising murder of anyone who broke the law. When down the line this method of governing causes extreme problems for both the planet (when Curze is gone, the place slips back into its old ways without fear of him keeping people in line) and the Astartes recruited from it (they're a bunch of sadistic, murderous psychopaths), Curze's second in command calls him out for using such brutal methods, leading to this exchange:
* Warhammer 40,000 of a Swarm has ended up absolutely, incurably insane.
* Warhammer 40,000 of Chaos corruption about him and not allowing any members of the Ecclesiarchy to actually come and test him until after he was long since dead. His quote says it best.
* Warhammer 40,000, of course, an area of the Milky Way where the warp and the Materium intersect, born from the creation of the last Chaos god(dess). The Traitor Legions who gave themselves to Chaos ten millennia ago still live here, periodically launching Black Crusades on the rest of the galaxy.

* Warhammer 40,000. Of course, if you didn't prepare for one, you're screwed.
* Warhammer 40,000. Of course, the lot of those spears are chainsaw too...
* Warhammer 40,000. Of course, when faced with hypervelocity ninja star machine guns, gyrojet autocannons, Chaos enhanced versions thereof, laser assault rifles, and double-barreled .50 spewing monstrosities... it is somewhat... underpowered.
* Warhammer 40,000 of cybernetics superseding the normally all-pervasive Rule of Grimdark.
* Warhammer 40,000 officials (who view technology as a religion) who don't see how it can work without exposed wiring and angular surfaces everywhere.
* Warhammer 40,000 of finding an artifact from Vulkan's hand, and an unprecedented eruption on their home planet.
* Warhammer 40,000 of getting executed for cowardice, most Guardsmen would choose the former.
* Warhammer 40,000 of his captain's betrayal. When confronted, Maas clings to his oath of loyalty to the Warmaster.
* Warhammer 40,000 of his madness and unwavering faith in his scope that he could see the through the illusion.
* Warhammer 40,000 of increasing the model's Movement and combat speed considerably.
* Warhammer 40,000 of it) — even if the cult loses the ensuing civil war, they would still likely have greatly undermined the planet's defensive strength and left it wide open for the invading Hive Fleet.
* Warhammer 40,000 of Man, confined to the life-support of the Golden Throne).
* Warhammer 40,000 of Man set out to purge anything that would challenge his vision of a secularist science-based mankind. Among those things is the last Christian church, maintained by a single elderly preacher. The Emperor, under a disguise, attempts to peacefully convert the priest. After getting utterly defeated in the ensuing philosophical debate, the Emperor storms off and orders the church to be burned down. The clock begins chiming, as it is prophesied to do when the end of man begins.
* Warhammer 40,000 of plans running at once, yet not one of his plans have ever succeeded. The reason is that he ruins his own, since it is very possible that if that he wins, or even has a single, solitary plan work, he may cease to exist.
* Warhammer40000 often pose as rogue traders - no-one will see anything suspicious in them owning a heavily armed cruiser packed with mercenaries.
* Warhammer 40,000 of the Alpha Legion claims to be Alpharius, it's not known if the "Alpharius" killed by Guilliman was the real Alpharius, his twin Omegon or just a high-ranking Marine of the Alpha Legion.
* Warhammer 40,000 of the early Noise Marine as a tribute.) There's also an Imperium superweapon called an Ordinatus, where at least one variant is armed with a Sonic Disruptor.
* Warhammer 40,000 of them, running a million-world Imperium as best they can.
* Warhammer 40,000 of the Naviagator Houses, he observes of one particularly ambitious and ruthless one:
* Warhammer 40,000 of the planet, recycling the Tyranid and everything it's eaten into genetic material and other raw materials useful to the Hive Fleet. Their close combat weapons are forged in biological furnaces and then affixed to the creature in question and their bodies are almost entirely armored carapace. Even their soft tissues are built of materials similar to Kevlar. They are not your average squishy biological version of this trope, they are armored hell-beasts designed with one singular purpose — relentless assault. Tyranid bio weapons are notably inferior individually to their non-organic counterparts though, and their space fleets are noted to be inferior to every other faction's. It is their single minded purpose and sheer numbers that make the Tyranids so deadly.
* Warhammer 40,000 of the setting. All throughout the series, this trope occurs many, many times.
* Warhammer 40,000: Ogryns are a nine-foot-tall ogre-like subspecies of humanity noted for their strength, endurance, and childlike mentality and devotion (and for the smarter ones, childlike intelligence as well). This being 40K, the flipside is

that they're also easy to turn traitor as they rarely question orders (telling them that the Emperor is angry at the loyalists is enough to set them on a rampage).
* Warhammer 40,000: Ollanius Pius, is (as of the latest retcon) a human born sometime around 15,000 BC. He still carries a cross necklace as he's a Catholic.
* Warhammer 40,000 once created a Chaos God from their excesses, and so the survivors follow a life of strict discipline called the Path. Each Eldar focuses on one role at a time - poet, artisan, warrior, seer, etc. - and cultivates a new personality based on that vocation, which can be set aside and returned to later. In the Aspect Warriors' case, part of their training is the construction of a figurative "war mask" allowing them to fully embrace their violent tendencies when needed and avoid being consumed by them, which must be mastered before the warrior is allowed to don the actual war mask of their armor. Despite such precautions, some Eldar become trapped on their current path, so that seers become Farseers obsessed with reading and altering the future, or a warrior becomes an Exarch who lives only to battle and train others for war, forgetting their past life and taking the name of the first to wear their armor.
* Warhammer 40,000: One Chapter of Loyalist Marines started hearing their victims screams in their sleep. This being less than helpful for restful slumber, they quickly fell to Chaos.
* Warhammer 40,000 One of their early codices was titled "'Ere we go!"
* Warhammer 40,000, one of the others has to be convinced to not go back and storm the place in his search. Finally, after the two surviving members succeed in returning the sword as the third one makes a last stand to ensure their escape, they embark on a new quest to rescue their brother.
* Warhammer 40,000. One of the reasons ork paindoks are feared is that they occasionally replace a patient's brain with that of a squig, leaving them comatose for a while while they adapt, then leaving them semifunctional zombies only fit to follow the dok's orders.
* Warhammer 40,000, one of the stratagems you can use is rappelling lines, which allows troops to disembark from skimmers directly ontop of buildings.
* Warhammer 40,000 only arrive when things seem to be at their bleakest.
* Warhammer 40,000, only two years pass from the Prodigal Sons’ perspective; from the Inquisition’s perspective, Vohal has been a dead world for hundreds if not thousands of years by the time they set up shop there
* Warhammer 40,000. On rare occasions, the epiphany sticks, and a Dark Eldar abandons their old life to join a Craftworld.
* Warhammer 40,000. On the sexual side there's the Tau, Tyranids, Necrons, and Daemons:
* Warhammer 40,000 on the wounded man) orders the others on while he tends the wounded. When they are attacked again and he gains more injuries, Ragnar finally carries him to safety.
* Warhammer40000 onwards, the skill Operate (Aeronautica) covers everything that moves in three dimensions and can be controlled by a single pilot (and copilot), be it in air or space. Capital ships however require a separate skill.
* Warhammer 40,000 opens with an investigation of whether Ragnar, who had destroyed the Chapter's most prized relic in a fight with the forces of Chaos, had done so because he was Chaos-tainted.
* Warhammer 40,000 operate in multiple worlds, answer to an invisible leadership, have countless members in all parts of society, all for some nefarious and unknown end.
* Warhammer 40,000 or even Stone Age Stasis, the reasoning being that people from such harsh worlds make better soldiers.
* Warhammer 40,000) or jet-black skin that would never occur naturally.
* Warhammer 40,000: Ork Burna Boyz carry their flamers' fuel in large tanks strapped to their backs, and prefer to haul around as large a tank as possible to be able to flame for a long while before running dry. This carries a significant risk for them, though, as their fuel is extremely volatile and, should an enemy round find the Ork's tank, will go up in a violent and very lethal explosion.
* Warhammer 40,000, Orkish technology is either real technology they're able to

build and use due to it being built into their genes, or it's pure magic powered solely by their belief it will work. Sometimes humans are able to use it with no trouble other than it being a bit crude, other times even simple things like guns turn out to just be full of metal scraps that couldn't possibly do anything.
* Warhammer 40,000: Orks are renowned for being exceptionally tough and exceptionally stupid, to the point where it's joked/believed (in-universe) that the least dangerous way for an ork to fall is for it to land on its head. While they can survive decapitation and brain transplants (including with a squig), this is due to them being part fungus.
* Warhammer 40000 Orks can use a bastardized version of Low Gothic (known as English in the millennium we live in) aside from their original language which is mostly guttural yells with a glyph writing system. Their grammar is likewise bastardized.
* Warhammer 40,000: Orks have a very direct aproach to naming things, applied both to their own gear and their enemy's: any cutting implement (sword, axe, knife...) is a choppa, guns are shootaz, any Titan-sized combat walker is a stompa, etc.
* Warhammer 40,000: Orks of the Snakebites clan keep a variety of extremely venomous snakes as pets that they allow to bite them throughout their lives, sucking out most of the venom after each bite but allowing some to remain. Over time, this allows them to develop a considerable resistance to poison.
* Warhammer 40,000: Ork Stikkbommaz are noted for being above average intelligence for Orks, as they know that stikkbommz are the bit you throw, not the pin...
* Warhammer 40,000: Ork technology is in itself something of a Bamboo Technology, as it mostly consists of stealing already-made equipment from other races and making it Orkier (though they are capable of building their own). Feral Orks don't even have that, so their hugenormous battle robots are steam-powered.
* Warhammer 40,000 or the kind to shoot out a door before asking if someone's on the other side.
* Warhammer 40,000), others such as Inquisitor Lord Fyodor Karamazov are more likely to descend on a planet with their own personal fleet and Chamber Militants.
* Warhammer 40,000 outcome they can expect is summary execution once the fighting is over. Generally everyone knows this and is not stupid enough to tempt fate. Of course there have been exceptions.
* Warhammer 40,000 out of a mound of scrap metal and a hot water heater. Not to mention every other piece of Ork technology from cars to guns to back scratchers are made in this way. Since this knowledge is bred into their DNA, and they aren't really that bright, they use latent psychic powers to cover up flaws.
* Warhammer 40,000, overloading the energy shields and setting both him and his bike on fire. The bike continued on its trajectory and slammed into the Titan's head, whereupon Wazdakka, still on fire, proceeded to butcher the Titan's pilot and bridge crew.
* Warhammer 40,000-pattern weapons, and their heroes were all part of the various wolf ranks of the Wolf Guard.
* Warhammer 40,000, penchant for shooting their own troops for cowardice notwithstanding. As in real life, most of them fall well short.
* Warhammer 40,000 people by their very presence, but are also largely invulnerable to conventional weapons. But aside from a bare few exceptions none of this is represented in the mechanics, and those that are present are nowhere near as powerful as the lore suggests.
* Warhammer 40,000 personalities, but over time, they became accustomed to each other's personalities and eventually became very close friends. Their rivalries remained, however, so this is the kind of friendship that evolved. Their successors sadly only remember the rivalry part of their relationship, however.
* Warhammer 40,000, pictures of generic Kroot and Necron warriors appear several years before their armies were officially introduced.
* Warhammer 40,000 plays this straight by most races' psykers, with the exception of some being real hardcases, such as Tyranid Hive Tyrants (but not Zoanthropes), Space Marine Librarians, Grey Knights and Chaos Daemons. Eldar Farseers are actually tougher than most other Eldar, due to slowly turning into crystal.

* Warhammer 40,000 popping up everywhere, but it still has a few examples:
* Warhammer 40,000 practically operates on this principle. Everyone from the lowest menial, to a planetary governor, to the even the Space Marines have to deal with some form of tax or tithe. Failure to pay you debt can result in punishments ranging from beatings and forced conscription, to the planet being reclassified into a prison planet, to outright war and Exterminatus. Even when said tax is paid in full, one can still be placed under a Inquisitorial Audit due to how much of a bureaucratic mess the Imperium is.
* Warhammer 40,000 prescribes this as a punishment for many, many offenses.
* Warhammer 40,000 products have new revisions brought out every four or five years, that being the length of time most players stick with the hobby, according to Games Workshop.
* Warhammer 40,000 prominently features cartomancy on several occasions, typically using a deck developed sometime in the distant future:
* Warhammer 40,000 provides plenty of space for fan works, with even official material presenting vastly contradictory interpretations of factions, characters and events, the fans following the same policy.
* Warhammer 40,000, psycannons (designed specifically to fight daemons) fire shells that are not only charged with negative psychic energy and inscribed with holy symbols, but are (of course) tipped with silver.
* Warhammer 40,000 psychic backlash obliterated the Eldar civilization, the border worlds remained miraculously untouched.
* Warhammer 40,000 publication), a library that stores the information of just about everything involving the supernatural and daemonic, guarded by the Harlequins of the Laughing God, thus making it inaccessible to most of them.
* Warhammer 40,000, Ragnar is told how the Navigators marry: to whom they are told to marry.
* Warhammer 40,000, Ragnor loses his sword defending the House of Belisarius. The Celestarch therefore gives him one: from the time of the Emperor, that had once belong to Skander. It fits his hand as if made for him, and the rune radiate a strange coldness.
* Warhammer 40,000, Ragnor presses into battle with young Marines. The sight of them makes him wonder whether he had ever looked as green to his superiors — and conclude that he had. (Though a long time ago.)
* Warhammer 40,000 rate their defense of a world's population as being slightly more important than exterminating the enemy.
* Warhammer 40,000 Ravenor series by Dan Abnett, where a large part of the plot involves a drugs ring investigation, mentions several fictional drugs such as lho (which is the 40k tobacco), obscura, lodestones and flects.
* Warhammer 40,000: Regicide pieces and a couple of game modes which add randomness and hit points and so on to chess.
* Warhammer 40,000, replied that he could, and a furious Perturabo ranted at him before storming out.
* Warhammer 40,000 revel in this trope, as nearly all of their buildings possess these. Depending on the painter, they themselves might be glowing as well.
* Warhammer 40000: Rites of War universe plays the above mentioned three-way version of this dynamic perfectly: the all-consuming Tyranids (Flesh), the technocratic Imperium of Man (Steel) and the highly psychic Craftworld Eldar (Energy).
* Warhammer 40,000 Rogal Dorn of the Imperial Fists. Both legions were siege specialists, but the latter got the privilege of being asked to design the Emperor's Palace while Perturabo and his legion were pigeon-holed into digging trenches and garrisoning planets, with no glory and no thanks. When Horus turned traitor, Perturabo followed him, and took great delight in destroying what their rivals built.
* Warhammer 40,000 Roleplay gives us the Technical Knock and Gun Blessing talents. Technical Knock allows an operator to clear a "jam" (the catch-all term used for almost all weapon malfunctions, including in flame and energy weapons) with a swift, simple ritual

* Warhammer 40,000 running some of the most sophisticated and destructive military technology in the Imperium - which the Adeptus Mechanicus waves away by calling them machine spirits, adding that all technology made by man is inhabited by machine spirits, and the ones in the Land Raider battle tanks are simply especially holy, which explains their ability to move and fire without any human crew.
* Warhammer 40,000's 8th edition suggests that they may be swinging back in the opposite direction again.
* Warhammer 40,000's "chair" is barely a chair at all - it's an all-enclosing life support system on wheels with psycannons and psychic amplifiers built into it.
* Warhammer 40,000. Scorned by Asdrubael Vect, she wandered into the webway, potentially beat the Laughing God (or some other powerful, unknown entity) in a game of wills, tore out his heart, and replaced her own with it. Now she commands one of the stronger Kabals of Commoragh, is possibly the only person able to kill Vect (something she yearns to do), and is completely immune to psychic powers, as well as being able to see into the near future.
* Warhammer 40,000's ears are packed with nerve endings and are highly sensitive. The deuteragonist adds "Speculation: Erogenous?" at the end of the notes.
* Warhammer 40,000 seems to have a fondness for using "battle tank" as a standard size for wildlife, and Tyranids revel in this trope with their heavier creatures, especially the Bio-Titans.
* Warhammer 40,000 sees a sky of smog, pollution and storms, but on a relatively clear night you can see the moon... because it's covered with just as much infrastructure and glows brightly. If you're actually down on the surface (and not dying from millenia of refuse, toxins, radioactive waste/fallout and Warp filth) then you'll have a lovely view of the underside of the foundations of said planet-city.
* Warhammer 40,000, see this way all the time. Because of this, they are never affected by low light situations.
* Warhammer 40,000 series from the Black Library) one of the Space Wolves is called simply "Bear". This is categorically not his real name, which comes back to save the day when a daemon that uses "the power of true names" to wipe the floor the the Space Wolves faces "Bear" who resoundingly beats the daemon. As a bonus for the long term fans, "Bear's" real name is "Bjorn", aka "Bjorn the Fell-Handed", the oldest living sentient being in the Imperium (being over ten thousand years old by the time of "now", the year 40,000).
* Warhammer 40,000 series. Though they are fantastic drugs, their uses approximate that of opium and something between cannibis and tobacco, respectively.
* Warhammer 40,000 series, where the first time in any book the 'nids are mentioned, Cain recalls a time he saw genestealers tear apart Space Marine Terminators as if their armor wasn't there. We finally get to see it in the seventh book.
* Warhammer 40,000 serve as Internal Affairs for the rest of the Imperium and for themselves, each Inquisitor has unlimited operational authority and the power to judge when another Inquisitor has lost it.
* Warhammer 40,000 set of Precursors (the malevolent C'Tans this time) right afterward, and were too ehausted from the conflicts that they went into hybernation for millions of years.
* Warhammer 40,000 setting. The game itself occasionally has units that can take drugs to gain some effects, although obviously general usage and legality aren't entirely relevant in a battle situation. The literature contains a huge variety of drugs of all stages of legality though.
* Warhammer 40,000, several alien species have this trait, but the two most prominent are the Kroot and the Tyranids:
* Warhammer 40,000: Several species of Tyranids have these, like the Mawloc and Haruspex.
* Warhammer 40,000's first target is Vrox, an Obliterator (which, for the uninitiated, is a mutated monstrosity twice the size of regular Chaos Space Marines and can spawn weapons and armor from his body). After he kills Vrox with relative ease, he even comments that he was the least threatening of the Chaos Marines on

board.
* Warhammer 40,000, Shira Calpurnia, and various Space Marine novels have received this treatment.
* Warhammer 40,000) shoot everyone outside of their faction on sight for the crime of existing.
* Warhammer 40,000 short story "Blueblood", Volpone trooper Culcis makes a memorial marker for the Kauth Longstriders, a feral-world company who the Volpone had feuded with, but ultimately fought alongside to stop a Chaos cult, with the Kauth being wiped out in the process. He uses his own hellgun for the marker, but adorns it with the Kauth's battle standard, which he retrieved from the battlefield.
* Warhammer 40,000 side of the board, thus preventing him to deploy his own model, and thus lost the game before it even started. (This was made impossible in later editions; as of 9th, each player has to start with at least one model on the board and nothing can deploy in the opoonent's start zone anymore.)
* Warhammer 40,000's Imperium intentionally invokes this trope with every institution, organization and military unit mistrusting everyone else. This does leave them with a bureaucratic nightmare where military or humanitary aid for worlds may arrive a century after it was needed, but it also keeps the human race comparably safe from the danger of a high-ranking defector. This lesson was learned after two bloody civil wars, one of them tearing humanity out of its early golden age.
* Warhammer 40,000. Since the Tau are the one faction whose technology is regularly improving, by their next codex update that upgrade was available without any drawbacks.
* Warhammer 40,000 situations, where one enclave of Inquisitors is trying to get another declared as heretics or traitors, while the other is doing the exact same thing.
* Warhammer 40,000, Slaanesh claims all unprotected Eldar souls upon death and subjects them to indescribable torments. It's a little hard to feel sorry for the Eldar Empire since it was their murderous depravity that spawned Slaanesh in the first place. The Craftworld and Exodite Eldar are sympathetic since they were the few Eldar who rejected the hedonism of the rest of the Empire. Indeed, their physical and metaphorical distance from that mess is the reason they survived the initial massacre when Slaanesh was born. The Dark Eldar on the other hand have sunk even further into depravity, placating Slaanesh with the souls and suffering of their victims just so they can have their cake and eat it too. If anyone truly deserved to become Slaanesh's plaything for eternity, it's the Dark Eldar.
* Warhammer 40,000's main value is provoking thought rather than serving as some end-all guide to warfare.
* Warhammer 40,000's major background character, the Emperor, is an immortal, incredibly powerful psyker who adopted various guises as he subtly guided mankind's evolution - it's known that he was Saint George. It was only when subtlety failed that he stepped out of the shadows and emerged as the founder of the Imperium.
* Warhammer 40,000's mental signals may cause the genestealers to operate independently of, and against, each other. Note that when everything goes well, genestealer cults willingly walk into the reclamation pools so their biomass gets absorbed back into the hive fleet. For some time, Hive Fleet Hydra appeared to have gone rogue as it was attacking and devouring other Tyranid hive fleets, but later observations seem to suggest it's scavenging and reclaiming resources from heavily damaged fleets.
* Warhammer 40,000, so in recognition of that, she was just demoted into a line Battle Sister and reassigned to another Canoness.
* Warhammer 40,000, so it doesn't really matter how long it takes for them to get anywhere.
* Warhammer 40,000). Some do nothing more than transmit sensor data, while the massive orbital dockyards of Jupiter manufacture the kilometers-long ships of the Imperium.
* Warhammer 40,000. Some Eldar crewed independent, planet-sized spaceships called Craftworlds, some depraved individuals fled into the settlements in the Webway and

formed a horrifying civilisation built on slavery and torture, some fled to worlds on the edges of the empire and formed Luddite colonies, and some simply took to roaming the galaxy as bands of raiders and pirates. The massive cultural differences which have emerged between these divergent Eldar factions over the millennia mean the Eldar race will probably never again be united as they used to be.
* Warhammer 40,000, some of the more technologically advanced races have them. The Necrons do in addition to being the only race to possess true FTL travel as opposed to using the warp (if you can't go FTL in the real world, go through Hell where you can! Just be careful about the daemons). The Eldar and Dark Eldar may possibly have them, while other races do not.
* Warhammer 40,000: Some progressive worlds allow mutants to live in miserable ghettos to serve as slave labor for the Imperium's factories, with only occasional pogroms to keep the numbers manageable. Other planets simply burn their mutants at the stake with the other heretics.
* Warhammer 40,000 sometimes has predetermined successors for Chapter Masters, usually if the Chapter Master bites it the Captain of the First Company takes over but in the case of the Ultramarines Sicarius is being groomed as Calgar's successor and he's Captain of the Second Company.
* Warhammer 40,000, some units have the option of taking a medic, which grants the entire unit Feel No Pain (50/50 chance (roll 4 or higher on d6) of ignoring any unsaved wound). This generally makes the unit absurdly tough.
* Warhammer 40,000 so that they can continue to fight for the Imperium.
* Warhammer 40,000: Space hulks are huge conglomerates of ships that are mushed together in the warp, occasionally getting spit back out into realspace and continuing to drift until they get sucked back in or fall into a sun.
* Warhammer 40,000: Space Marine allows you to wield a giant hammer, and jump pack, letting you drop out of the sky and slam down in the middle of enemies.
* Warhammer 40,000: Space Marine as the main character. He has said in an interview that he wouldn't mind doing more 40K stuff in the future.
* Warhammer 40,000: Space Marine can attack equally effectively with his ranged weapons and melee weapons.
* Warhammer 40,000: Space Marine: Captain Titus cannot jump, only roll, therefore knee-high obstacles are impassable to him. You do get a jetpack, but only in certain levels.
* Warhammer 40,000 Space Marine chaplains carry a Crozius which serves not only as a symbol of their rank but doubles as a powerful maul. Their evil counterparts the Dark Apostles use corrupted versions of them as well.
* Warhammer 40,000: Space Marine in his instance — the protagonists are responding to an order to scramble their forces to defend a critical planet that has come under sudden attack, and those three just happened to get there first.
* Warhammer 40,000: Space Marine, is defeated entirely through a single button mashing spiced with primitive and repetitive QTE.
* Warhammer 40,000: Space Marine is simply the point man, operating ahead of his company.
* Warhammer 40,000: Space Marine: Just charge into a group of enemies and start slashing (and shooting) away.
* Warhammer 40,000: Space Marine, naturally plays with this trope the same way. Captain Titus and the Ultramarines play it straight with their power armor being bright blue with gold trim and heraldry. Lieutenant Mira and the Imperial Guard avert it by wearing the standard olive-drab flak armor of Cadian regiments.
* Warhammer 40,000: Space Marine needs a good 10 feet to stop when running at full speed. Handy when you're rushing to an enemy, not so handy when trying to round a corner.
* Warhammer 40,000: Space Marine, since your default weapons are a pistol firing explosive bullets and a chainsaw sword, with the rest of weaponry being far more powerful.
* Warhammer 40,000: Space Marine', the heroes begin with Tidus, Sidonis, Mira, Leandros, and Inquisitor Drogan among named characters holding Graia. By the end of

the game, Drogan has been revealed as a daemon-possessed puppet, Sidonis has been gutted by Nemeroth, and Leandros has sold Titus to the Inquisition over a question of Warp-resistance.
* Warhammer 40000 Spacemarine, there's Captain Titus from the Ultramarines' 2nd Company.
* Warhammer 40000 Spacemarine. They can actually clear up the bridge of Chaos Marines and Bloodletters without you really having to do anything and can go that far without casualties.
* Warhammer 40,000: Space Marine upgrades Captain Titus's bolt pistol to a plasma pistol about a quarter of the way into the game. Larger plasma cannon are also available in multiplayer and at special points in the campaign.
* Warhammer 40,000: Space Marine when she's the last surviving Imperial Guard officer on Graia — a junior platoon commander left in charge of all the remaining 203rd Cadian regiment. You can see just how relieved she is when the Ultramarines arrive.
* Warhammer 40,000: Space Marine, when your game autosaves it doesn't save your health. If you die with a sliver of health left after the autosave, you revive with full health.
* Warhammer 40,000 Space Marine. While Nemeroth is undergoing his transformation into a Daemon Prince, you're distracted by fighting a horde of Bloodletters. You can't attack Nemeroth anyway, as a barrier protects him. Sadly, this leads to one of the lamest final boss "fights" in recent history — a QTE button mashing affair that a chimpanzee could get right on the first try.
* Warhammer 40,000: Space Marine, you can see cannon shells with "Mercy is a sign of weakness" written on the back of the casing.
* Warhammer 40,000 special character Brakar the Avenger had been stalking the underhive killing anyone he believes has wronged his adopted people ever since the tribe that took him in and nursed him back to health was slaughtered.
* Warhammer 40,000 (specifically, set 40,000 years into the future). Further editions made each more distinctive, until the Warp and the powers of Chaos are all that's left in common.
* Warhammer 40,000's personal psychic might, it's virtually impossible to take over Terra, ever.
* Warhammer 40,000's presence. This being 40K, we're talking millions of people, with many families having been there for generations and are still no closer to seeing Him.
* Warhammer 40,000 squad. Males, however, are permitted to join their ranks. Since the Banshee is a female spirit in Eldar mythology, he adopts a female persona and female armor when wearing his 'Warmask'.
* Warhammer 40,000, squads that suffer casualties from enemy fire have to pass a Leadership test or fall back, but weapons with the Pinning special rule - sniper rifles, mortars, coils of psycho-plastic resonating with negative emotions, rapidly-growing entangling alien tumors, etc. - lock units in place and prevent them from firing effectively instead.
* Warhammer 40,000 standards is 'No treason in realspace'. Realspace raids are essential to the Dark Eldar as they need to capture slaves to feed on their suffering. Having that collapse due to infighting would just make their whole civilization wither. Once the raid is over, though, anyone's fair game.
* Warhammer 40,000 starts killing heroes of the book the moment he arrives on scene. As Khayon puts it:
* Warhammer 40,000 starts this way. During a routine patrol mission a titan's princeps (main pilot) dies of old age, leaving the giant war machine immobilized a minute away from a combat engagement. Since the role requires a set of plug implants to connect the user's brain to the machine, none of the crew members can replace him. Fortunately, there is a princeps cadet on board, added to the crew to see the titan at work...
* Warhammer 40,000 status. This has only gotten worse in recent years as variants of the Space Marine list have gotten their own standalone books, so the previous roadblock of buying two books to play one army is now gone. There are now enough

books that the company's publishing schedule is basically one marine book for every two non-marine books.
* Warhammer 40,000 still refers to zombie units as zombies, but their sub-faction was named Deadwalkers.
* Warhammer 40,000 story "Renegades", when Gessert demands that the members of his company paint over their insignia, so they realize they are renegades and commit themselves, one says that he is no longer authorized by the Imperium as their captain. Gessert says that if he wants to fight him, go ahead.
* Warhammer 40,000 story "Words of Blood", Valerian objects to retreating. Athellenas threatens him with not only execution, but striking his name from the book of honor, no mention at the Feast of the Departed, and not reclaiming his geneseed.
* Warhammer 40,000: Subverted with Noise Marines, who very much want their victims to hear their hideously-distorted music and overload their senses with noise (dubstep is a popular representation of this effect).
* Warhammer 40,000. Such warriors are venerated as their chapter's greatest heroes and wisest leaders, allowed to slumber away the centuries when their skills aren't needed. Bjorn the Fell-Handed is the most famous example, a Space Wolf who fought alongside the Emperor during the Great Crusade ten thousand years ago.
* Warhammer 40,000 suggests that they have the power to execute soldiers found lacking in maintaining equipment perfectly clean.
* Warhammer 40,000 suit. Unfortunately these shiny new features tend to come with a drawback or two, something notably absent in normal Tau technology.
* Warhammer 40,000 suspects that as cyborgs it's a tasty snack to them.
* Warhammer 40,000, Sven and Ragnar know there is trouble when they see the Chaos forces have dogs sniffing at a trail.
* Warhammer 40,000's warp, which is why the same Chaos Space Marines that fought during the Horus Heresy are still terrorizing the Imperium (up to 10,000 years later, depending on when the story in the Imperium's long history takes place). However time doesn't always flow slower in the Warp, sometimes it goes faster. Or backwards. Or sideways. Or purple. The laws of physics are little more than guidelines in the Warp.
* Warhammer 40,000 tasted much better. Things went rather downhill for the sentient species of the galaxy from there.
* Warhammer 40,000: Tau females don't have breasts, and their species' armor doesn't accentuate the male/female differences either. Try telling that to fanartists though.
* Warhammer 40,000 teaching them to speak, fight, and determine friend from foe. This makes them incredibly dangerous threats - even if you wipe out an Ork platoon, a few months later a horde of Orks may charge out from where you slew them.
* Warhammer 40,000 technology, boring play style, and lack of unique characterization. After the newest Necron codex, their technology was tweaked and they were given a distinctly different motivations along with a variety of different viable strategies.
* Warhammer 40,000. Teleportation beacons, and other, stranger pieces of wargear can actually allow easy teleportation, but even the ones that are most commonly seen are very rare pieces of technology.
* Warhammer 40,000 tend to be of this stamp, as psychic powers tend to manifest in all kinds of people, irrespective of social class. Given that being a non-sanctioned psyker is a capital crime in the Imperium - and one pursued with extreme prejudice - most of the ones who aren't rounded up by the Inquisition and put on the black ships tend to be part of a criminal underclass. Actual battlefield psykers in the main tabletop game tend not to be this though - they're either military professionals or classic fantasy mystic types.
* Warhammer 40,000. Ten-thousand-year-old mile-long cathedrals to war and destruction with broadside guns that can screw continents. In space.
* Warhammer 40,000 Terminators; the Changeling had stolen a teleporter homer from a nearby Ravenwing biker, which was keyed to that of the attached Deathwing Terminator Squads. The siege was indeed swiftly ended.

* Warhammer 40,000 territory to anyone outside of their faction... and even a lot of people within it.
* Warhammer 40,000 than an unstoppable army of robot zombies; this was countered by claiming that the old characterization was based on a few seriously damaged cases.
* Warhammer 40,000: Thanks to the prevalence of crude biomechanical limbs, many soldiers can continue serving the Imperium even with lost limbs.
* Warhammer 40,000 than their tau allies/employers, are more apt to appreciate jokes.
* Warhammer 40,000 that anything they believe should behave like a gun, will. Just about the only limit to this power is handing them a literal banana and telling them it's a real sneaky shoota. But trust us, hand them a box of broken gun parts and a welding torch, and they will find a way to make bullets come out of that banana. From where is anyone's guess.
* Warhammer 40,000 that destroyed the first great era of human civilization lingers as myth, cultural superstitions, and the occasional archeotech weapon.
* Warhammer 40,000 that is a massive battleground between the Forces of Chaos fighting for dominance. Nearly the entire population is made up of Daemons or insane humans that follow Chaos constantly trying to kill each other. Couple with the fact the corrupting nature of the Warp would drive lesser minds to madness just from being there and even the austere Space Marines aren't immune to it (one of their main protagonists falls to Chaos and the another is being gradually corrupted very visibly).
* Warhammer 40,000 that Necron Lords have spoken, they have been unusually polite and cultured speakers possessed of a truly chilling calm, which may make some sense, given that they are the still-sentient leaders of a race that now exists as, for all intents and purposes, undead robots.
* Warhammer 40,000 that other fans can enjoy a more lighthearted take on it, even without involving the Orks.
* Warhammer40000. That said, it usually never ends well for the dealer. Unless they get busted by either the Arbites or Inquisition, a lot of arms dealers will run at a loss for the comparative value of the items they sell. For example, a full magazine of Heavy Bolter ammunition can cost more than the yearly living expenses, earnings, and possession values of the average hiveworlder.
* Warhammer 40,000 that the "old beliefs" of gods, angels, demons, etc. were either outright fabrications or simply ancient proto-psykers getting glimpses into the Warp. Then of course there's the theory that the Immortal Emperor "popped up" now and again throughout history as particularly influential people.. Jesus, King Arthur and the like, but always either a great warrior or great philosopher (or both!)
* Warhammer 40,000 that the Tyranids are said to have entirely consumed, merely to emphasize how big of a threat they are.
* Warhammer 40,000 that they will use to purge a planet of taint when it is considered "irredeemable." (and the philosophy behind it specifically states that the billions of innocent casualties that are often included is acceptable collateral damage; after all, the Imperium will never run out of people).
* Warhammer 40,000 that what would be superweapons in any other setting are just weapons, but there are still a few examples:
* Warhammer 40,000, the Adeptus Mechanicus is paranoid about the possibility.
* Warhammer 40,000 The Astartes are long lived but usually die a glorious death in battle before old age becomes an issue; it's not established whether or not Space Marines are actually biologically immortal. Various Imperial nobles, Inquisitors and members of the Adeptus Mechanicus hierarchy survive an awful long time, and it is here that the problems are most pronounced.
* Warhammer 40,000: The Avatar of Khaine manifests as a towering iron statue covered in a network of glowing cracks, symbolizing the immense power of the war god barely held within a physical shell.
* Warhammer 40,000, the Chaos forces cause a green and yellow fog to boil up. It obscures vision, allows their enemies to sneak up, and contains some kind of poison.

* Warhammer 40,000, the Chaos god Nurgle fell in love with Isha, the Eldar goddess of life. After Nurgle rescued Isha from Slaanesh, he expressed his love for her by imprisoning her in a cage and killing any warriors who attempted to rescue her. Now he uses her as a test subject for his plagues.
* Warhammer 40,000. The Chaos Gods actually represent both positive and negative emotions, just taken to the extreme. Since they gain power from the emotions, they want their followers to feel as strong emotions as possible. So the daemons of the god of love rape you to death. Also home to the Ork gods Gork and Mork, the psychic manifestation of the Ork race. Given that the Orks' vast numbers and simple mentality (endlessly enthusiastic and no real concept of defeat or despair), Gork and Mork appear to be invulnerable and portrayed as simply laughing off any attacks by Chaos gods. Fortunately for everyone else they seem to have no plans other than cheering on the Orks and bashing each other over the head.
* Warhammer40000, the clavises used by Deathwatch Watch Masters are explicitly compared to skeleton keys. A repository of ancient machine-spirits, a clavis is capable of opening any door in the Imperium and can take control of any Imperial machinery.
* Warhammer 40,000, the confrontation between Cain and Warmaster Varan starts out like this. Then they fight. Bonus points for both of them explicitly playing it up for the propoganda potential, as it's being broadcast to the entire planet.
* Warhammer 40,000, The Dark Eldar are naturally vain (especially if they compare themselves to humans), but the archon Vhane Kyharctakes this form of discrimination to disturbingly narcissistic extremes. He is so obsessed with beauty that he has all the members of his Kabal undergo surgery to look like him or wear masks of his face, and once unleashed a virus on a planet that turned every living creature's face into a replica of his own.
* Warhammer 40,000: The Dark Eldar's raiding/hunting parties pop out of nowhere, blast anything that stands in their way, capture as many slaves as they can, and disappear as quickly before reinforcements can come. Notably, one of their targets had been the planet Nocturne, eventual homeworld of the Primarch Vulkan who put an end to the raids almost singehandedly (and his actions caught the attention of the Emperor, leading to Vulkan's recovery).
* Warhammer 40,000. The defence of Hive Hellsreach during the Second Battle for Armageddon is one of the more poignant examples.
* Warhammer 40,000, the destruction of several planets, trillions of people dying, and a new dark age for the galaxy. Yeah, 40k is that kind of franchise.
* Warhammer 40,000. The developers of the game seem to have notice his popularity after game's their edition, because his incarnation in the next rulebook made him cheaper to field and a stronger unit, and he essentially stayed the same in the rulebook after that.
* Warhammer 40,000), the Eldar became Aeldari and the Tau inexplicably gained an apostrophe in their name. Amusingly, even in-universe everyone refuses to use Astra Militarum unless they're doing official paperwork for practical reasons; it's basically "Imperial Guard plus some other things technically in the same chain of command". Individual soldiers are still called Guardsmen, for example.
* Warhammer 40,000 the Eldar race carry Soul Stones on their persons, to avoid their Souls being consumed by Slannesh, the Great Devourer, upon their deaths. These Soul Stones are then transferred to the Infinity Circuit upon the death of the eldar carrying it where their soul is released. To help, among other things, guide the younger eldar, and power their Craftworld. In times of great need these Souls can be called back from the Infinity Circuit and places into man-sized or huge constructs known as Wraith Guard and Wraith Lords respectively. The construct bodies can be destroyed but as long as the Soul Stone is intact, so is the soul. The Necron consist of an entire army of soul jars, each Necron unit containing the soul of a Necron. Unfortunately, that means every time a Necron is damaged and repaired it loses a fragment of its soul.
* Warhammer 40,000, the Emperor created the Thunder Warriors to help him bring order to Terra during the Age of Strife, but though powerful they were physically and psychologically unstable. He came to view them as a hindrance and so quietly

got rid of them once the conquest of Terra was complete, and created the more stable Space Marine Legions to continue his conquest of the galaxy.
* Warhammer 40,000 the Emperor. Despite this, he remained a pious (hurr hurr) Catholic during his life (or Catheric, as the religion was eventually known in the 31st century).
* Warhammer 40,000: The Emperor of Mankind is sometimes depicted this way: even when he's not consciously using his psychic powers to disguise himself, his passive psychic abilities are so powerful that they affect other people's perception of him. Most humans see him as a shining god-like being, warriors see him as a man of tremendous stature and strength, while intellectuals see him as a wise man, and so forth. It's suggested that extremely powerful psykers, or just people with very strong wills (such as his bodyguards and Malcador the Sigillite) could see past the illusion and see him as simply an ordinary man.
* Warhammer 40,000 the Emperor's last remaining bodyguard. Deciding that Horus was a lost cause, the Emperor gathered up all of his psychic power and wiped Horus from existence in turn.
* Warhammer 40,000, the evil empire also has a planet-killing order, called "Exterminatus." Exterminatus is usually used on planets where there is no possible way of ever using the planet again, say because soldiers deployed to it invariably defect to Chaos. Most of these methods usually leave a dead ball of rock, however, but Two-Stage Cyclonic torpedoes indeed cause a Planet-Shattering Kaboom.
* Warhammer 40,000: The fate of the Unknown Primarchs and their Legions will never be revealed, originally to encourage fans to make up their own stories about them.
* Warhammer 40,000. The food tends to be decent, the teachers harsh but not sadistic, and the education's about as good as it gets.
* Warhammer 40,000 the god of disease itself starts paying special attention to you.
* Warhammer 40,000, the gravely wounded Hakon gives him some warnings about tendencies which might undermine him, and then
* Warhammer 40,000 - the highest possible field rank, which requires three Trials by Fire and at least sixteen years of active service (out of a T'au 30-40 year lifespan, and doing it in just sixteen would be considered a meteoric rise). In other words, only the biggest badasses are allowed to retire in the first place, and none of them are afraid to get back into the battlesuit if the Greater Good needs them to.
* Warhammer 40,000: The Horus Hersey. Horus has besieged Terra, and the traitor legions have ravaged the entire planet, and the Emperor and only 3 of his Space Marine legions are all that stand against Horus and his 8 traitor legions.
* Warhammer 40,000, the Imperial Guard has "vox operators" with radio backpacks for battlefield-level communication. For the purposes of interstellar communication, the Imperium of Man actually uses specialized telepaths called Astropaths.
* Warhammer 40,000. The Imperial Truth: "There are no supernatural things or gods." Yeah, sure... The Imperium is practically BUILT on blatant lies.
* Warhammer 40,000, the Imperium at large is either mostly ignorant or totally unaware of Chaos and Daemons. Considering all the of various aliens, mutants and psychic powers running around, Chaos gods and Daemons aren't exactly far fetched. That said if you do see Daemons in person you probably won't be telling anyone about it anytime soon, and the Imperium is not very big on education, so it's plausible that the average citizen would simply not know much about Chaos at all.
* Warhammer 40,000 the Imperium has going on may give some of them some solace for putting up with it.
* Warhammer 40,000. The Imperium is also very culturally and religiously diverse, with few if any cultural standards enforced beyond "Don't muck about with aliens (unless you are a Rogue Trader) or Chaos, venerate the Emperor (in some way, no-one really cares how), pay tithes on time and in full, and don't get in the way of Imperial authorities when/if they roll onto your homeworld." Slavery is legal, as long as it's between humans. Humans being owned by aliens is a horrible, unforgivable sin, and the Imperium has mobilized entire army groups to punish alien civilizations for using human labor (or livestock).

* Warhammer 40,000: The Imperium of Man faces rebellion and invasion on numerous worlds, and its responses to each of these are entirely dependent on how competent the Administratum feels on a regular basis. One mess-up by this organization and insufficient forces can be deployed, entire worlds can starve to death, et cetera.
* Warhammer 40,000, the "Instant Death" rule serves to represent this trope. When a model is hit by a weapon of sufficient calibre (typically a weapon with a Strength of twice or over the model's Toughness value, usually something like a lascannon or missile launcher), it doesn't matter how many Wounds they have, they're dead. The game even notes that "it can be imagined that the target exploded in a suitably gory fashion".
* Warhammer 40,000. Their homeworld, Kiavahr, has enormous, carnivorous, and man-eating crows as one of its dominant predators.
* Warhammer 40,000 their most potent anti-vehicle weapon. They're also notorious for stealing other army's stuff and mounting large artillery on it. They usually remember how the controls work.
* Warhammer 40,000 their objectives (the allied Imperial Guard were the actual winners and the Marines piggybacked on them), causing fans to accuse GW of favoring its mascot faction past the point of reason.
* Warhammer40000: The Iron Hands Astartes Chapter believe that the living metal hands of their Primarch were a physical embodiment of his doctrines of efficiency and strength above all things, something that has led to the Chapter's Rite of Severance where a newly initiated battle-brother has their left hand replaced with a mechanical one. Ferrus himself, however, never saw his hands as a sign of strength, for all the great works he accomplished with them he was painfully aware they weren't his real hands and it amazed him that no one else saw it that way too. He saw the hands as a sign of his weakness, a crutch he relied on instead of being strong in his own right. He intended to lead by example by removing the metal from his hands but was slain in his fateful duel with Fulgrim before he had the chance.
* Warhammer 40,000: the Iron Men. Bit humanity in the rear in the form of a galaxy-wide dark age.
* Warhammer 40,000: their smaller spacecraft may look utilitarian, but when it comes to their larger vessels, they discard any sense of practicality in exchange for being Baroque Gothic Cathedrals... IN SPAAAAAAAAAACE!!!
* Warhammer 40,000. The kicker? For the sake of surviving, they really DO have to do it.
* Warhammer 40,000. The Land Raider and the Wave Serpent are both transport vehicles that function at least as well as battle tanks.
* Warhammer 40,000, the "loss" (of marriage to a planetary governor's daughter) is actually the best outcome Cain could hope for, as it prevents him shattering said daughter's delusions (both of wanting to marry her and of being able to overcome Cain's service in the Imperial Guard. He has to restrain himself from doing handstands on the lawn out of sheer exuberance at her marrying someone else.
* Warhammer 40,000, the Marine's response is to say "No, I haven't. It's right over there."
* Warhammer 40,000, then advises him to use his own judgement. So Cain picks one at random and pulls.
* Warhammer 40,000. The Necron/Old One conflict known as The War In Heaven occurred around the time the dinosaurs died out and the Necrons/C'Tan are known to have come to Earth in the distant past.
* Warhammer 40,000. The next three ciphers (018) is the year. And the ending (.M3) is the millennium.
* Warhammer 40,000, then the two were implied to be alternate universes of each other or that Fantasy was just set on one planet among billions in 40K. Now the universes are more or less set apart except for the occasional reference to high-tech wargear finding its way to Fantasy by way of the Warp.
* Warhammer 40,000. The only reason Russ spared Angron was in hope that the Primarch learned something.
* Warhammer 40,000, the Ork race are notorious for looting and plundering. They even have a squad dedicated to this, the Lootas, who scrounge battlefields and mug

enemies for loot to sell in return for the heavy weapon Deffguns. Chaos warbands also rely heavily on plundering to meet their need for equipment, slaves and Space Marine geneseeds. Tyranids plunder the biosphere of whole worlds to take back genetic information and bio-matter for their Hive Fleets. Dark Eldar have a lust for looting too but differ from the other villainous races in that they're typically not interested material goods except as an odd trophy. Rather they loot enemies for slaves to take back home, so they can get their souls sucked out and other nefarious purposes. The Imperium largely gets the short end of the looting stick and will usually find anything from their enemies to be incompatible/dangerous to them - at most, various veteran guardsmen might acquire something special off of other, deceased simultaneously-luckier-and-unluckier guardsmen.
* Warhammer 40,000, the Orks have a table you roll on when a Trukk is destroyed with results ranging from "keeps going for a ways before toppling over" to "zooms off a ways and explodes".
* Warhammer 40,000 the passed Aspirants are welcomed to the brotherhood with a beer bash. The last thing the POV character remembers is a power armor helmet full of beer before waking up on the transport.
* Warhammer 40,000, the 'patient hunter'. Derived from an ancient Tau hunting technique, it essentially relies on a lure to draw the enemy into a prepared killing zone.
* Warhammer 40,000: The planet Aphexis is populated by people who simply do not care- Chaos forces have repeatedly conquered the place only to find that the inhabitants don't give a rat's ass about the vast displays of cruelty their captors put them through.
* Warhammer 40,000, the plot is kicked off when a Guardsman tries to shield a Sister of Battle from some incoming fire and accidentally touches her breasts.
* Warhammer 40,000, the presence of the blood wolf causes the street lights to go out as it races by.
* Warhammer 40,000. The Primarchs and Astartes might qualify, the Imperium definitely created the Life Eater, and it's entirely possible, if not likely, that the Imperium has created much more.
* Warhammer 40,000, the Primarchs and the Astartes. Roughly fifty-fifty split on the good-evil divide, but the bad fifty definitely left their mark.
* Warhammer 40,000 the Primarchs are described as virtual gods and show it in the novels (doing things like stopping a Titan with their bare hands). But in the Talisman Horus Heresy video game, the Primarchs are really no better than the regular Space Marine heroes in the game (for example Corvus Corax has a melee ability of 3 and shooting of 2, while a Space Marine Praetor is 3 and 3 in those skills).
* Warhammer 40,000, the protagonist of one story moonlights as a teacher for a rich man's daughter, and is paid in fresh food.
* Warhammer 40,000: the psychneuein, a wasp-like warp creature, infested Prospero, the homeworld of the Thousand Sons, until the natives' psychic powers evolved in defense. They could infest unprotected psychic minds with their eggs without even making physical contact.
* Warhammer 40,000, there are several Necron who are looking for ways to become mortal again after having survived as robots for a very long time.
* Warhammer 40,000. There is also at least one unit with helmet-mounted lasers and Commissar Yarrick has a laser weapon in his bionic eye.
* Warhammer 40,000. There's a tale told about a group of Orks that ventured into the Eye of Terror and landed on a Khorne-Controlled world. Every day they are forced to fight to the death against enemies they can never beat, only to be raised the next day to repeat the cycle. What would be living hell for anyone else is basically an Orky Valhalla.
* Warhammer 40,000. There's one guy who not only remembers all the men he's had under his command, but tattooed the faces of those who died onto his body. This being 40K, one wonders how long it'll be until he runs out of space.
* Warhammer 40,000, the richest live in the upper atmosphere that's actually

breathable, while the poorest have to fight off mutants, giant spiders and each other, feeding off the waste that gets dumped from higher strata. Unsurprisingly, the Imperial Guard recruits heavily from the scavenger population, since surviving to adulthood is no easy feat (and often develops other useful skills, like scrounging or a highly-developed sense of 3D direction).
* Warhammer 40,000. These creatures devour everything and everyone that they find, human or not, but the catch? Like the moths to the flame, they fly precisely to this human beacon.
* Warhammer 40,000; The servo skulls for the Inquisition, and the Tau drones.
* Warhammer 40,000. These struggles are continued by the Space Marines and Chaos Space Marines, entire armies of superhuman, genetically-engineered brothers trying to murder each other.
* Warhammer 40,000: The setting gives everyone ample opportunities to die heroically, both on and off the tabletop. A 4th Edition scenario, typically the last mission in a campaign, revolved around one side's Last Stand; the defenders won if they had any surviving models at the end of the game, meaning they held out long enough to let their comrades escape, or that they killed enough of the enemy to have their names forever etched into their opponent's minds.
* Warhammer 40,000 (the sixth published), which takes place at the end of his career and on the same world where there are statues of him as "Cain the Liberator" and towns he visited have been renamed in his honor.
* Warhammer 40,000: The smarter characters think like this. Unfortunately, that's not the kind of thinking encouraged by the Dark Gods/the Warboss/the Commissariat, and in fact doing the smart thing like pulling back in front of superior numbers only gets you eaten by daemons/krumped flat/in front of a firing squad. However, a number of factions are noted to make regular use of this strategy.
* Warhammer 40,000. The Tau are a little behind the Imperium in technology and do not allow any genetic enhancement beyond the selective breeding used to maintain their rigid caste system (although it's been hinted that the Ethereals were created through bio-engineering by another race, possibly the Eldar), and have no visible cybernetic enhancements, either, though some may have minor implants for combat purposes.
* Warhammer 40,000. The Tau otherwise do not have suicide attacks in their army, and view suicidal last stands as foolish; they prefer to feign retreat, or really retreat, then come back when the situation is more favorable.
* Warhammer 40,000, the title character Ragnar gets a new set of Power Armor. To demonstrate his new strength, he is given a fist-sized rock and told to crush it. He succeeds.
* Warhammer 40,000, the two are less differentiated than at any time since their original launch.
* Warhammer 40,000 the unfortunate enemy. Add in that shooting enemies causes blood and gibs to fly out as well, and battlefields can get quite bloody. Large blobs of blood and organs will fly out of a corpse when they die, but the corpse itself remains completely whole as it falls to the ground, making one wonder where all those chunks of meat actually came from. Ludicrous indeed. This Rectified in the sequel, where powerful attacks can literally shred the enemies into pieces.
* Warhammer 40,000: the various Tyranid organisms' name were given by the Guardsmen fighting them. Hence Ripper swarms, Gargoyles, Carnifexes (butcher in fake Latin)...
* Warhammer 40,000 the whole thing away, saying they just hack the Eldar webway and use their immortality to take longer trips at sub-light speeds. The Necron leader and his personal forces actually did leave the galaxy on a personal quest, but after meeting the Tyranids in the gulf between they turned back.
* Warhammer 40,000, the Witch Hunters faction possesses a unit called an "Arco-Flagellant". These are convicted heretics who undergo severe cyber-reconstruction and psycho-conditioning to make them insane killing machines. However, they are also equipped with pacifier helms that project soothing images and hymns into their brains... at least until the trigger word is spoken. Then they kill everything in sight.

* Warhammer 40,000. They are also apparently ancient enemies of the Eldar, despite no Eldar ever mentioning them before.
* Warhammer 40,000. They can all breathe our atmosphere unprotected, however.
* Warhammer 40,000 - They corrupt the DNA of the victims, so that the offspring are horribly mutated but hypnotise the parents (or this happens as part of the infection) into looking after it. From the parents point of view, they aren't this at all.
* Warhammer 40,000, they find an assassin dead of poison — causing Ragnor to comment on what a fanatic the assassin must have been. The possibility of mind control is brought up.
* Warhammer 40,000. They form a point of contention regarding Eldar imbalance.
* Warhammer 40,000. They have the ability to incorporate into themselves useful traits from the creatures they eat, which often results in entire organs, glands and more complex systems being incorporated into them more or less unchanged. As a result, a Kroot's internal anatomy is a patchwork of alien organs, many of which don't even share the same biochemistry — Kroot circulatory systems are fairly complex as a result, as they may need to distribute iron-based blood to one organ, copper-based blood to another and entirely more exotic fluids to others still.
* Warhammer 40,000 They look like something Hitler would drive, and that's no coincidence.
* Warhammer 40,000, they often manipulate other species into fighting each other to protect Eldar interests.
* Warhammer 40,000 they're doing their damnedest to not lose the "peacetime". So far they've managed to mostly hold together for eleven thousand years, but they have no idea how much longer they'll be able to last.
* Warhammer 40,000 They wear odd alien jumpsuits and vests in the traditional style of Tau armor.
* Warhammer 40,000: This happened in the backstory according to one story of Emperor's creation. Back in the stone age, humans had warp users called shamans, but as they were preyed on by daemons, they eventually merged their souls into one being for protection, effectively ending human involvement in warpcraft... until shortly before the beginning of Age of Strife, over thirty thousand years later, it began to manifest again as psykers started to be born. This is noted as being one of the things leading to downfall of the old human civillization, so Not A Good Thing.
* Warhammer 40,000: This happens with such frequency in the fluff (as well as numerous ret-cons) that Games Workshop has outright stated that if something sounds contradictory or weird, chalk it up to Imperial Propaganda.
* Warhammer 40,000, this is a given for anyone falling to Chaos, such as obese plaguebearers oozing pus from open sores, mutilated hermaphrodites with extra breasts, and general mutation such as multiple faces, tusks, tentacles...
* Warhammer 40,000 this is done by two factions, inverted by another, and subverted by a fourth.
* Warhammer 40,000, this is frequently lampshaded by the characters themselves.
* Warhammer 40,000. This is quite a popular option on less developed worlds; after all, a steam engine can be made to run on just about anything you can reliably light on fire.
* Warhammer 40,000, This is the common tactic of Genestealer cults: Their aim is to incite rebellion and civil war across the whole world they're established on, which they do by infiltrating both sides. That way they can ensure the Arbites will shoot at peaceful demonstrators, as well as ensure most demonstrators won't be peaceful to begin with, and violence will escalate.
* Warhammer 40,000, this is the eventual fate of all Eldar Farseers. As Farseers grow older, their minds become so intertwined with the wraithbone core of their Craftworld while trying to divine the future, that their physical bodies become dormant and slowly crystallize. Once this crystallization progresses too far, they retreat to the 'Dome of Crystal Seers' of their Craftworlds, where the crystal bodies of past Farseers remain, their minds having been preserved in the infinity circuit.

* Warhammer 40,000. This leads to red vehicles flying faster simply because they can.
* Warhammer 40,000. This may have been deliberate, since Squats are mutated humans rather than actually aliens; Ogryn (ogres) and Ratlings (halflings) were also mutants and were given new names.
* Warhammer 40,000 this means that the majority of them were military brats who also joined the military.
* Warhammer 40000. Those who are interned in Space Marine Dreadnoughts aren't quite dead beforehand, but are certainly never the same again afterwards.
* Warhammer 40,000, though as their fluff is expanded, differences between Tau Septs are starting to appear.
* Warhammer 40,000 through with the power they use, in the latter wizards are able to draw upon the ambient Winds of Magic (which have chaotic and irregular power levels, no less) to fling spells.
* Warhammer 40,000, thus being the exact blend of utterly cool and horrifyingly gory that defines 40k.
* Warhammer 40,000. Thus illustrating an often forgotten but important lesson: never focus on your elites to the detriment of the rest of your military.
* Warhammer 40,000 to avoid the pity. She is convinced that her subsequent survival — two and a half years, where normal life expectancy is measured in hours — resulted from others pitying her.
* Warhammer 40,000 to death. Wulfe thinks that he's still trying to avenge him.
* Warhammer 40,000 to defend their countries and fight for the Imperium of Man.
* Warhammer 40,000 to do the logical thing and back down when threatened with a floating space artillery piece. Two things went wrong:
* Warhammer 40,000 to flee if they have exactly zero chance to damage an enemy in close combat. In either case, they have a chance to be swept off the table when they flee.
* Warhammer 40,000 to go even further. The men of Krieg are clones. Though they don't hold a candle to a group of mercenaries who use cloning technology to keep their "perfect genetics" intact.
* Warhammer 40,000 too, or at the very least have someone to do that for them.
* Warhammer 40,000. To reach Shas'O (commander) rank, you have to start as a basic Fire Warrior and pass through multiple trials of fire (usually surviving a dangerous mission or passing a difficult combat exercise) to progress through the ranks. There are no shortcuts, so every commander has started out as a basic infantryman.
* Warhammer 40,000, Torin warns Ragnar that the conversation he overheard may have been to induce him to assassinate a lord to protect a young woman — and that the woman may have been part to such a plot.
* Warhammer 40,000. To them, the Dark Eldar appear in their true forms, as hideous, rotting corpse-like monsters.
* Warhammer 40,000 to the point that the eponymous Primarchs cannot even fathom the concept of a planet having more than a single biome, proclaiming any such planet they encounter to be an abomination which must be destroyed.
* Warhammer 40,000 trilogy features a traintop sword-fight between Eisenhorn and the mercenary captain Clansire Etrik. However, the train is not moving at the time, which is probably a good thing since it is noted as being able to make a trans-continental crossing in a day.
* Warhammer 40000 Trouble. Results usually break into three categories:
* Warhammer 40,000 trying to destroy other races, it's just that they are manipulative bastards who see no problem with directing an entire orc WAAGH to an Imperial system if it saves a couple of Eldar). The developers took steps to undermine this, and indeed explicitly stated in one of their releases that they were attempting to correct what they saw as a misconception. The same has happened to the Tau over time, although to a lesser extent. It's especially ironic because the Tau were conceived as a fundamentally decent race by their developers — in their own words, "a likable, if a bit naive, addition to the universe."
* Warhammer 40,000: Try leafing through the descriptions of Chaos mutations

sometime. And good luck catching a peaceful night's rest if you do. Oh, and Chaos imagery and architecture also counts. Explicitly described is the alphabet of Chaos as "sanity blasting sigils".
* Warhammer 40,000, Tsu'gan fights fiercely to protect his dead captain's body; the next chapter features all his company attending his funeral.
* Warhammer 40,000; tusked, dinosaur-like beasts fitted with howdahs filled with guns, artillery or howling Orks, and driven into battle to rampage their way through the enemy army. Squiggoths native to icy worlds, which develop mammoth-like fur and tusks, come particularly close.
* Warhammer 40,000 types who wouldn't arrest or kill anyone without evidence).
* Warhammer 40,000 typically uses the pronoun "He". However, he in fact is neither male nor female yet both at the same time (the Eldar who created hir use "She Who Thirsts"). He assumes whatever form the person viewing him would find most attractive, which means that he can either be a fully functioning male, female, hermaphrodite or whatever else a person finds attractive at any given time. His traditional form is a weird sort of hermaphrodite, being split down the middle vertically as a woman on the right side of the body and a man on the left. The same goes for his/her breeds of daemon, including the more animalistic ones, and the cultists s/he shows favor to.
* Warhammer 40,000, Tyranids have enhanced vision and Daemons see peoples souls rather than by any light. None of this helps much in night fighting though...
* Warhammer 40,000 Unfortunately, there are so many similar victories in novels and codices that it makes fans question: if just so few IG regiments and Astartes companies can thwart a galaxy-ending threat, why hasn't the Imperium, which has millions of regiments and thousands of companies of Astartes, won already?
* Warhammer 40,000, units get 'cover saves' for being in cover, either in area terrain or behind obstructions that partially block the enemy's line of fire. In addition, most units and vehicles are impeded when moving through certain types of terrain, with a rare few special units that are unaffected.
* Warhammer 40,000 units have to keep their models within a few inches of each other. While this means Skirmishers don't get the rank bonuses to close combat, they can move about much more easily compared to units in a proper formation, which have to sacrifice inches of movement to wheel around, or spend a Movement Phase turning to face a new direction.
* Warhammer 40,000 universe. Although ones 'Milage may Vary' as he went out and smote for only a short time and has spent the past ten millennia static on life support, on the verge of death.
* Warhammer 40,000 universe have explored every angle of this trope they could find. In the art and the video games they are huge highly-visible coconuts, because otherwise you wouldn't know they were firing. In the fiction they are described as firing invisible, near-silent beams. There is a button to make the beam visible again, but this is officially for training purposes (read: playing laser tag) rather than actual combat. The only 'Pew', so to speak, is the audible snap of the air ionizing.
* Warhammer 40,000 universe helps maintain the Masquerade for much of humanity. Countless worlds have never seen an alien incursion, and might even regard the Imperium itself as a myth due to centuries of isolation. Basically all the dark things of the universe are just old stories, until they show up and start eating you.
* Warhammer 40,000 universe is a behemoth in geek circles and on the internet; besides being the dominant miniatures wargame with several other tabletop spinoffs there have been several popular videogames and hundreds of novels, many of which have cracked best-seller lists. In the mainstream, it's almost completely unknown.
* Warhammer 40,000 universe is filled with long-service vehicles and tech. Some maintenance is required, but most gear used by the Imperium of Man dates back decades if not thousands of years. These can range anywhere from regular bolter firearms to power fists, imperial star ships and Dreadnought chassis, which in turn house some of the oldest living members of the Space Marine chapters.
* Warhammer 40,000 universe is shared by a large number of writers; the sheer scale

of the setting in both space and time helps avoid continuity problems.
* Warhammer 40,000 universe; many characters will have their limbs removed and replaced with mechanical devices:
* Warhammer 40,000 universe — as befitting fantasy — the Warp is unashamedly magic.
* Warhammer 40,000 universe, of course. This happens largely through a twisted form of natural selection; the insufficiently Badass simply die in droves at the hands of the rest.
* Warhammer 40,000 universes (though the main focus is on Warhammer 40,000).
* Warhammer 40,000 universe, until it was discontinued along with most of Games Workshops spin-off games.
* Warhammer 40,000 universe wouldn't be too far off the mark. Later publications from the two even started to share writers.
* Warhammer 40,000, unless you can find an empty stadium to host your battles in.
* Warhammer 40,000 upon the profiteers who had, on announcement of the cancellation, bought up every copy they could in the hope of selling them for silly money on eBay. This also had something of a longer-term effect, where several veteran designers and writers at Games Workshop left the company in the late oughts, only to contribute to Fantasy Flight Games, who currently publish all of the Games Workshop-licensed Tabletop RPGs. This then happened again in 2017, when Fantasy Flight lost the license; the books were simply re-listed under the new publisher and put back on sale in digital format.
* Warhammer 40,000 use bat-shaped bladed hoverboards that can decapitate infantry.
* Warhammer 40,000 used by Chaos. Necron ships are much less angular than the Imperium's as well, tending to follow geometric curves and shapes, although they're not as colorful.
* Warhammer 40,000 used by the daemon hunters of the Imperium. As well as being inscribed with runes of banishment and charged with psychic energy, psycannon bolts are tipped with silver to further enhance their effectiveness against daemons
* Warhammer 40,000 used to have a lot of these, with human civilization having collapsed several times in its history both before and after colonizing the galaxy. Most of these have since been explained in various books and other bits of lore added over the years. However, in-universe they're still almost all mysteries, if people even know they happened at all.
* Warhammer 40,000 used to have extremely short lifespans due to the radiation of the homeworld, an issue that plagued them even as they tried to colonize distant stars. After their transformation into the Necrons, this was no longer the case. Perhpas the biggest example of this are the Tau, who have very short lifespans as they often only live up to their forties (barring the Ethereal Caste, who live for much longer). However, this is seen as emblematic of their philosophy of the Greater Good, as they are driven to do much as possible as their short lives permit. This in fact led to a brief pause in their expansion as their empire became so big that a single Tau could not traverse it in their lifetime. As a result, the Tau will often put some of their best and brightest into cryogenic stasis or copy their minds down into A.Is just to keep them around for much longer.
* Warhammer 40,000 useless here- the Dark Eldar are renowned for having the durability of wet kleenex.
* Warhammer 40,000 uses Earth years in a continuation of the Gregorian calendar, with the year nominally divided into 1,000 parts for record-keeping purposes. They do use a unique notation, though. Instead of "38,420 AD" they would write "420 M39," meaning 420th year, 39th millennium. There's also an official way of recording how accurate the date is considered to be (the vagaries of space travel and communication in the setting mean they're lucky of it's within ten years in many cases), but few authors bother with the whole 10 character date.
* Warhammer 40,000 uses names like Lorne V and Kaurava IV on top of more standard titles. But they also tend to name a star system after its most important planet, a subsector after its most important system...
* Warhammer 40,000 uses the word "tank" for a subclass of vehicles. Taking a closer look at what most of the wide range of "tanks" are, it's clear that "tank" is being

used to replace the words "armored fighting vehicle" (because saying "armored fighting vehicle" in casual gameplay is annoying and boring). Indeed, most of the supplementary material is a lot better, correctly applying terms like "infantry fighting vehicle".
* Warhammer 40,000 using these. Probably the most dramatic (which has been reprinted a few times) is the diagram of the Tyranid Hive Fleets' approaches on the galaxy, but there have also been maps depicting Ork Waaaaaghs, Chaos Incursions, Warp Anomaly spreads, or just good old fashioned campaign progress.
* Warhammer 40,000: Variously used in the setting (while magic comes from the Warp, it's an observable scientific phenomenon), with an unintentional example in the form of the Tau, who have near-zero Warp presence and thus are not subject to psykers or being possessed by Chaos. They have a very scientific-based society, fielding highly advanced battlesuits and vehicles, but they have so little knowledge of the Warp they tend to dismiss stories of Chaos daemons as just another unpleasant alien to be exterminated for the Greater Good. It's widely believed that they sterilize at least part of the humans who join them, which would reduce the chances of psykers showing up (who are born maybe one in a million) to near-zero.
* Warhammer 40,000 vehicles and war machines are often plugged directly into the pilot's brain. In a rather low-tech way.
* Warhammer 40,000 vehicles apparently use a genescanning system to prevent hijacking, as seen when an Imperial commando tried to steal a battlesuit and got fried for it.
* Warhammer 40,000 version of Ahriman and the plastic Fiends of Slaanesh kit). Luckily Games Workshop is known to take the matter very lightly and usually answers to the leaks by giving high quality pictures of the leaked stuff, usually by making a video featuring lighthearted jabs to the leakers.
* Warhammer 40,000, wanting to honor his favored son Horus' accomplishments, once suggested that Horus change the name of his legion the Luna Wolves to the Sons of Horus. Horus initially refused since he was worried that might cause factionalism and strife among the Astartes. Ironically, Horus would follow the Emperor's suggestion after betraying him for the Ruinous Powers. After Horus' death, the legion name was changed again to the Black Legion, since its new leader Abaddon had lost all faith in Horus following the latter's failure and wanted to make a clean break from him.
* Warhammer 40,000 warp disease/curse, the last one hundred survivors wander the galaxy searching for other marines, coming to their aid in their hour of need, vanishing as mysteriously and silently as they came, never straying from their dedication to the Emperor even as their bodies and minds slowly break down.
* Warhammer 40,000: Warp rifts are tears in spacetime through which the Warp can enter realspace, exposing anything inside or in close proximity to them to the raw stuff of Chaos. Their presence invariably results in temporal and spatial anomalies, complete shutdowns of interstellar and psychic communications, isolation of whatever is caught in them from FTL travel, and, at worst, hordes of daemon spilling into realspace through the weakened and thinning fabric of reality.
* Warhammer 40,000 was over, a crippled humanity was turned on by every other Federation species. The Tau, an upcoming race near the Ultramar systems, fit this trope more neatly and are viewed by the older, more advanced races as unbelievably stupid and naive for even trying.
* Warhammer 40,000 was put on ice after being mortally wounded in a duel against Daemon Primarch Fulgrim. Nine thousand years later, the Eldar and Mechanicus collaborate to resurrect Guilliman so he can lead the Imperium against the tide of Chaos. Guilliman is appalled by the theocratic nightmare that is the Imperium, even musing that it would have been better for Horus to have razed it during the Heresy rather than letting it get this far, but puts on a brave face for the rest of humanity.
* Warhammer 40,000 was successful, the raid was difficult and costly, as hordes of wild beasts beset the piratical raiders and inflicted heavy casualties on them.
* Warhammer 40,000 were originally just harvesting machines. Even from their early days, they were heavily armed. Their reaper chainswords were for cutting down trees

and the battle cannon was for blowing up rocks. The only real modification for when they transitioned into a full-time weapon, was that their original plasteel armour was exchanged for adamantium plates. Similarly, the dreaded Tactical Dreadnought armour a.k.a Terminator, was originally a protective industrial exo-suit for doing hazardous work such as welding inside a plasma reactor or doing work during a meteor storm.
* Warhammer 40,000. What he's seen and done has made him unable to function other than by killing the Emperor's enemies (he apparently has loads of medals piling up somewhere, having no use for them).
* Warhammer 40,000 When in doubt, have another Tyranid/Ork/Chaos/Necron invasion or an Imperial Crusade or have it turn out that the governer/inquisitor/whatever was actually an agent of chaos/tyranids/generic evil all along.
* Warhammer 40,000: When it comes to Necron Tomb Worlds, the Adeptus Mechanicus are Scientists (study them) and the Imperial Guard are the Military Men (nuke them from orbit). In this case, the "scientists are right" bit could not be more averted.
* Warhammer 40,000. When it was discovered that the game didn't actually exist, some people decided to get together and make it real.
* Warhammer 40,000: When one of Khorne's Bloodthirsters was pushed to attack him by Tzeentch, Khorne ripped the poor bastard's wings off and threw him out of his fortress. He fell for eight days and eight nights before finally crashing to the ground.
* Warhammer 40,000, when Strybjorn is injured, he snarls at Ragnar, "I don't need your help," but gets only to his knees before he starts to topple. Ragnar helps him up and to walk.
* Warhammer 40,000, when the aspirants are climbing a mountain and Ragnor starts to slip, Kjel comes to help him like this. It also inspires Ragnor to get a grip, because he is afraid he might drag Kjel down if he falls.
* Warhammer 40,000). When these isolated planets rejoin the Imperium the more pragmatic Inquisitors and Ecclesiarchs just check that there's no real heresy and let them get on with life instead of purging them from orbit because the stained-glass window shows the God Emperor's eyes in the wrong color. In fact, they're willing to let quite a lot go, do you want to worship the Emperor in the belief that he was a simple farmer before being the Emperor, go ahead. Do you believe that the stars are the Emperor's eyes and that he is always watching you, that's fine too. Both of those are canon examples, the big point is that it is clearly the Emperor you worship and not chaos or something else.
* Warhammer 40,000, where a universal dating system based on an Earth year is used by the Administratum, but it is purely for administrative purposes and individual planets generally adhere to their own calendars.
* Warhammer 40,000, where he is able to actually start ruling the Imperium.
* Warhammer 40,000, where servitors (lobotomized humans used for repetitive tasks) and Mechanicus priests always speak in robotic monotones (though occasionally an undercurrent of urgency or fear can be detected).
* Warhammer 40,000 where space and nature don't work as they should and FTL travel is largely impossible, and serve as home to the worshippers of Chaos and beachheads for the various Daemonic invasions of the universe.
* Warhammer 40,000, which has the 597th Valhallan deployed to fend off an Ork attack.
* Warhammer 40,000, which is normally a good way to get yourself killed.
* Warhammer 40,000 which is prevalent in most of the Dark Eldar. The usual bodyguard of choice (and the only ones there are currently game rules for) are the hulking four-armed snake-like Ssslyth, who are known for their loyalty.
* Warhammer 40,000, which supposedly holds all secrets of the universe, but can only be entered to those who have "mastered the Warp within themselves". Seeing how in real life, Black Library is Games Workshop's publishing house...
* Warhammer 40,000, which will doom whoever removes it from stasis to death from a wasting curse. Prince Yriel saved his Craftworld from being eaten by Tyranids by using it.
* Warhammer 40,000. While a standard close-combat attack by a typical infantryman

will rarely do any damage to even a light vehicle, many can be issued anti-armor grenades specifically for this purpose, such as krak grenades, melta-bombs, and EMP grenades.
* Warhammer 40,000: While discouraged due to the WYSIWYG rule, the game still does this.
* Warhammer 40,000 while Games Workshop released dozens of different flavors of Marines until they became some of the most-played armies in the game.
* Warhammer 40,000: While it's a bit complicated, this is what the Pariahs (and units that take these people and enhance them, like the Culexus Assassin) are to those who use (or are composed of) Warp energies in a nutshell. They are dispelled, die from a violent feedback reaction, or are driven insane just by being close to these people.
* Warhammer 40,000 while leading Black Crusades likely inspire even more challengers, yet he defeats them time and time again.
* Warhammer 40,000, while Ragnar is eyeing the Chaos forces arrayed against him, he factors in on his side that he has the high ground.
* Warhammer 40,000, while some orks actually worship the Chaos god Khorne. Beyond that, though, all Orkz, apart from the luddite Snakebitez, have an appreciation for human war machines and fancy hats and will try to capture them in working order wherever possible.
* Warhammer 40,000, while the Doylist reason is GW giving a reference point for those players more familiar with historical wargames.
* Warhammer 40,000. While the Gods of Chaos are served by Daemons, the Star Father, a God of Order, is served by the Angyls who are androgynous, faceless, glowing humanoids with dozens of razor-feathered wings who seek to create a universe of perfect, self-defeating order.
* Warhammer 40,000. While the Orks' enemies consider such actions horrific, to the Orks it's all in good fun.
* Warhammer 40,000, who are technically a group of client institutions of the Ecclesiarchy.
* Warhammer 40,000 who ended up losing the war, but in the process sent humanity into a galaxy-wide dark age.
* Warhammer 40,000 who in turn swear loyalty to House Helmawr, the Imperial House whose leader, Lord Gerontius Helmawr, is Necromunda’s absolute ruler.
* Warhammer 40,000 who love every minute of it (at least, the 25% of Catachans who survive past age 10).
* Warhammer 40,000, who never leave battles with scars and deformities due to their advanced medical technology and psychic healing. Also played straight by Callidus Assassins, who are all shape-shifters.
* Warhammer 40,000 who (obviously) collects the heads of enemy leaders to put them on his "pointy stikk".
* Warhammer 40,000 who ranks above "grunt" has a custom uniform to some degree, getting more elaborate and shiny as you move up the chain of command.
* Warhammer 40,000 whose body count left the sewers choked with corpses. He was so successful that he was made the planet's ruler and the entire populace toed the line out of fear that he would kill anyone who broke the law. His story also shows the logical problem with such methods: because the only thing keeping the population in line was fear of Curze, once he leaves to join the Great Crusade, Nostramo slips right back into its old ways.
* Warhammer 40,000, whose role appears to be simply to clean up rubbish from the ecosystem. However, it later transpires that a secret society knows how to control them, using them to kill their enemies and strip their bodies down to skeletons.
* Warhammer 40,000) whose screaming is amplified and distorted through their helmets to paralyze their enemies, which they then cut apart with monomolecular-edged swords.
* Warhammer 40,000 who walks the Path of the Warrior multiple times as a member of different Aspect Shrines gains a deeper insight into the myriad ways of war than any other member of their race. Such Aeldari are then able to walk the Path of the Leader to become an Autarch who is able to wield the military might of a Craftworld

with the ease and skill that a regular warrior can wield a blade.
* Warhammer 40,000 who would most likely kill them if she had any idea why they looked at her like that...
* Warhammer 40,000 willing to undertake any challenge for a chance at godhood.
* Warhammer 40,000, with a promise of forgiveness if they die, and freedom on the very, VERY small chance they live.
* Warhammer 40,000, with its heavily gothic-inspired aesthetic, has these in abundance. Pretty much any John Blanche illustration will have a background full of them, and the remains of smaller ones are available as scenery kits for the game. Even the aesthetics of the largest Imperial Titans are full of gothic cathedral elements, and Imperial Spaceships have creepy cathedrals integrated into their superstructure. Special mention must go to Black Templars Chaplain Grimaldus though, who is accompanied by a retinue of Cenobyte Servitors carrying pieces of a destroyed Imperial Cathedral with them as holy relics. Most religious buildings are generally decorated with winged skulls which are symbols of the Imperium.
* Warhammer 40,000. Without a Navigator able to use the Astronomicon as a psychic lighthouse, you're more likely to get lost in the Warp than survive to get lost in deep space. The kicker is that the Astronomicon is only ten thousand years old, and the Navigator caste not much older - yet even without them, mankind still managed to colonize a quarter of the galaxy through brief, insanely risky "hops" through the Warp.
* Warhammer 40,000 without damage to itself or passengers will probably work well against ground targets as well.
* Warhammer 40,000 with serious PTSD issues (but that doesn't make him any less effective).
* Warhammer 40,000 with the area of space known as the Nem'yar Atoll. How the Startide Nexus was created is unknown but the Fourth Sphere survivors claim they it was torn through the fabric of reality by a powerful entity with a nightmarish sentience.
* Warhammer 40,000 with the biggest and nastiest guns at hand. Not that the Eldar are any better...
* Warhammer 40,000 With the introduction of the Horus Heresy series, there is technically a time skip from the heresy to "present day", 10k years later. While the Horus Heresy game is built upon the same game system as "regular 40k", it's points system does not seem to be balanced against the existing 40k system (with many saying that it has good internal balance, but will utterly crush any current 40k army). Forge World (the producer of Horus Heresy series) differentiate between the two by stating that certain models can be used in 40k, dubbed the "Age of Darkness", and gain extra rules to reflect how they're older technology, but also has adjusted point costs and rules. The Horus Heresy campaign books itself contains several time skips within the Heresy, as it took place across several years with only a few notable events happening (due to it being an intergalactic war). Between 7th and 8th editions there's a jump from the final days of the 41st millennium to a little more than a century later... or the next day, depending on where a given character was standing when time went weird.
* Warhammer 40,000 with their planned codex canned just after the Imperial Guard codex came out in print. Something similar happened in fifth edition; Ultramarines (and no other Imperial armies) had a rule that they could ally with Tau to the same degree as with other Imperial armies. GW never did really explain what that was supposed to be about.
* Warhammer 40,000 with the powdered remain of the former Marine inside and his soul bound to the armor.
* Warhammer 40,000 (worn by a guy so evil and insane that he makes the rest look better in comparison).
* Warhammer 40,000 would count, though a few stand out because they're easy to write as a faceless, looming threat:
* Warhammer 40,000. Writers have been trying to reverse the process of flanderisation and turn them back into an authoritative and overly bureaucratic but still functional dictatorship with genuine heroes.

* Warhammer 40,000. Years later, in the early stages of the Horus Heresy, the Word Bearers responded by attempting to wipe out the Ultramarines to the last man, mingling a greater objective (victory for Horus) with some good old-fashioned revenge. Since then, the two Legions have taken every available chance to murder each other, even after the Ultramarines were divided into largely independent Chapters.
* Warhammer 40,000. Yes, tanks are powerful, but enemies such as Fire Dragons, Wraithlords, Sanctioned Psykers, Heavy Destroyers, and more, are so good at destroying them that tanks become more of a fire support vehicle, to aid your infantry than the damage sponges they are presented as in many other games.
* Warhammer 40,000, you can become one. Since (after one inevitable machine rebellion) creating true AIs is considered a blasphemy, tasks that would be given to single-task robots are instead given to servitors — cyborg slaves lobotomised to keep them "single purpose" and focused on their tasks.
* Warhammer 40,000, Zahariel's first glimpse of Brother Amadis disappoints him: merely a man, not a figure like Lion. But the longer he looks at him, the more he understands his character and heroism.
* Warhammer 40,000: Zig-zagged. Some flying and hovering models, like jetbikes or creatures with wings, fight no differently in close combat than ground-based units (though they do get to ignore the effects of most terrain when moving). However, vehicles which can hover ("skimmers") have had rules making them harder to hit, depending on which edition of the game is being played and, as of 6th Edition, there are proper rules for flying vehicles and monstrous creatures, which allow them to fly well above the battlefield and avert the trope entirely.
* Warhammer 40,00 supplement and the release of the Forge World weapon kits.
* Warhammer 40K and the Inquisition shortly after the first war for Armageddon. After the events of Armageddon, the Inquisition wanted to kill the Guardsmen and civilians who'd participated in the conflict to prevent knowledge of Chaos from spreading, something which the Space Wolves (one of the nicer Chapters) objected to. This combined with an incompetent Inquisitor way out of his depth led to the Space Wolves and the Grey Knights fighting a full-blown war, resulting in more damage to the Wolves' home planet than the entire Horus Heresy, and only ended when Grey Knights' Chapter Master and the Inquisitor were killed.
* Warhammer 40K don't even count, since 2/3 of their drug programs exist simply to make sure that their genetically-modified and cybernetically-enhanced bodies don't just go haywire shut down.
* Warhammer 40k, no other philosophy shines so bright as this. One single light in the dark.
* Warhammer 40k to bulk up, eventually becoming non-sentient and stuck in that form.
* Warhammer 63K, which does this for the entire universe. PRAISE THE EMPRESS!
* Warhammer. Absolute power corrupts absolutely, but only Chaos gives you eyes inside your mouth.
* Warhammer. A classic variant of the Great Unclean One, Greater Daemon of Nurgle, has a giant mouth in its stomach as well as the regular one on its face (and quite often one on the end of its tongue, or of each of its tongues, too. Occasionally on the tips of its fingers, or elsewhere). Flamers of Tzeentch have many gibbering mouths about their bizarre fungoid anatomy, all of them leaking warpfire.
* Warhammer Adventures having adventures while aged between eleven and fourteen.
* Warhammer advised his fellow vampires that preying on the innocent would drive other people and neighboring kingdoms against them (they didn't listen and that is exactly what happened).
* Warhammer, a fact that has been exploited in a number of his defeats over the course of his life (the archmage Teclis, for example, reignited the embers with a simple fire spell when Malekith attempted his most recent invasion of Ulthuan, setting him on fire again).
* Warhammer: Age of Sigmar, a Curseling’s parasitic Tretchlet homunculus lacks eyes, having nothing but flat skin stretching from their noses to the top of their heads. Instead of sight the Tertchlets use their arcane sense of smell to perceive

the world.
* Warhammer: Age of Sigmar: After Behemat, an ancient titan of immense size, fell into slumber after losing a battle with Sigmar, he became covered by soil and rock and was eventually buried under he was indistinguishable from the landscape. His recumbent form became known as the Scabrous Sprawl, and eventually people forgot that its valleys, ridges and hills were simply the soil-covered body parts of an immense titan... until he woke up.
* Warhammer: Age of Sigmar: After he died, the skeletal remains of the titan Behemat continued to dominated the landscape of the land where he fell — his ribcage, for instance, houses a large commercial hall.
* Warhammer: Age of Sigmar, Alarielle the Everqueen, Goddess of Life, rides into battle on the back of a Wardroth Beetle, a giant-sized combination of a stag beetle and a Hercules beetle.
* Warhammer: Age of Sigmar and a threshing flail, while the parasitic homunculus that grows out of them wields a mystical Staff of Tzeentch.
* Warhammer: Age of Sigmar, any model with the Chaos and Wizard Keywords are able to summon Daemonic units and characters; all the player needs is the appropriate Warscroll and models.
* Warhammer: Age of Sigmar are forced to take up the life of a wandering mercenary, known as a Maneater, after falling out with their fellows and being banished from their tribe. Such Ogors don’t mind their situation however as they are now able to be paid for doing what they enjoy most, fighting.
* Warhammer: Age of Sigmar are vulnerable) can be picked for him to land right into, and since he is a very large dwarf in a very heavy suit they will take plenty of damage from it.
* Warhammer: Age of Sigmar Arkanauts are generally equipped with an aether-powers pistol and a close combat weapon known as an Arkanaut cutter that release a burst of energy when they cut their target. The more successful Arkanauts often wield elaborately designed and decorated version of these weapons.
* Warhammer: Age of Sigmar because his enormous shoulder pad is in the way.
* Warhammer: Age of Sigmar can hack and gouge at his enemies. This is in contrast to regular Khorgoraths who make do with their natural claws and tentacles to kill their foes.
* Warhammer: Age of Sigmar, Curselings are gifted with a parasitic, daemonic homunculus known as a Tretchlet. These twisted spirit-creatures are created from an eldritch coalescence of forbidden knowledge that has gained sapience. The homunculus constantly whispers advice to its host and support them with their arcane abilities as the Curseling continues their search for further hidden knowledge.
* Warhammer: Age of Sigmar doesn't bother with formations, and is intended as a more casual "skirmish-level" game rather than a tactical wargame.
* Warhammer: Age of Sigmar: Drycha Hamadreth is able to command the swarms of centipede-esque squirmling spites that nest in her body to attack her enemies. She can also play host to the ravenous, beetle-like flitterfury spites that will attack anything, friend or foe, on their mistresses command.
* Warhammer: Age of Sigmar for the last few thousand years), the Great Horned Rat (the patron deity and leader of the Skaven, recently promoted to the level of the original four Chaos Gods), and Nagash (a very powerful necromancer who has ascended to god and Supreme Lord of the Undead).
* Warhammer: Age of Sigmar get captaincy back, but they need to prove themselves again.
* Warhammer: Age of Sigmar goes big with these, adding an entire faction of dwarves riding these and living in giant, flying cities. Even the most basic of armies is mostly composed of heavily-armed airships.
* Warhammer: Age of Sigmar got this particularly bad when it first came out. They had general ideas for the setting, but a lot of the new model lines were still in development and nowhere near ready to go. This resulted in the setting being vague to the point of incomprehensibly at first and all the early storylines focusing on the new Stormcast Eternals, which were available at release. Even years later you

can tell which realms still have major factions planned to be based in them when the model lines are done by the way the topic gets avoided in the fiction.
* Warhammer: Age of Sigmar had some differences to later game releases: some factions were called with different names than the one they're called in later books (Fyreslayers were Red Slayers, Bonesplitterz were Bonesplittaz, Flesh-Eater Courts were Flesh-Eaters and Beastclaw Raiders were Beastclaw Ogors). Also, the Bonesplitterz shaman hero was called Juju Dok rather than Wardokk and the Ironblaster is shown as a Beastclaw unit rather than a Gutbusters one.
* Warhammer: Age of Sigmar has the Bonereapers...who are skeletons who use this as a method of reproduction. They kill someone, flay their bones, and use those bones to make a NEW skeleton.
* Warhammer: Age of Sigmar has the Flesh-Eater Courts. They see themselves as beautiful kingdoms of rich nobles and holy knights fighting evil. In reality they are hoards of twisted cannibalistic monsters under contagious shared delusions and may be fighting against good or evil depending what their insanity makes them see.
* Warhammer: Age of Sigmar has this in the Daughters of Khaine. While they're all vicious, blood obsessed Aelves who worship the god of murder, they hate Chaos and the undead with a burning passion, and fight on the side of Order. Most of the time. It should also be noted that many of the other Order factions are little better (such as the Idoneth Deepkin, Aelven raiders from beneath the ocean who steal people's souls to extend their lifteimes) and many of the most emblematic Order faction, the Stormcast Eternals, are 100% on board with how brutal and vicious the Daughters of Khaine can be.
* Warhammer: Age of Sigmar, it takes a far more optimistic view of this trope. After Nagash betrayed the alliance of gods, Chaos managed to conquer 7 of the 8 realms, and Sigmar shut the gates to Azyr for an entire age while Chaos ran unopposed. Sigmar wasn't idle, however, and he finally opened the gates of Azyr when he finished the creation of the Stormcast Eternals, his heavenly host of immortal warriors. While the war against Chaos is far from over, Sigmar is making progress, his armies slowly retaking territory and his alliances with the other gods are slowly being rekindled and the great cities of Sigmar once again stand tall across the world.
* Warhammer: Age of Sigmar. It travels randomly between realms, causing darkness and madness wherever it appears. The Gloomspite have several theories about its origin, ranging from it being an egg, to it being an accidental creation of Gorkamorka, but no one, not even Sigmar, knows its origins for certain.
* Warhammer: Age of Sigmar setting managed to survive its destruction and endure into the Mortal Realms' present day, making them all thousands of years old and technically older than the world they inhabit.
* Warhammer: Age of Sigmar shtick, with each mask generally bearing a subtly different expression of boredom or indifference.
* Warhammer: Age of Sigmar, Sigmar creates the Stormcast Eternals to give the forces of Order a fighting chance against the Warriors of Chaos. Similar to the Einherjar of Norse myth, the Stormcast Eternals are created from fallen heroes and literally reforged in body and mind into mighty immortal golden warriors clad in sigmarite armor.
* Warhammer: Age of Sigmar: The ancient titan Behemat is the progenitor of the gargants, having birthed the first of their kind by vomiting them out from his mouth, and continued to birth new tribes of them in this manner until his eventual death.
* Warhammer: Age of Sigmar, the brass-clad shields used by the elite Bloodbound warriors who ride Juggernauts are forged in a similar manner to Collars of Khorne and grant their bearer a 50% chance of ignoring any damage caused by magical attacks.
* Warhammer: Age of Sigmar, the build-up event to 2nd Edition was referred to as "Malign Portents", with various portents of doom were witnessed all over the Mortal Realms, most pertaining to Nagash's designs in the realm of Shyish.
* Warhammer: Age of Sigmar, the God of the Dead, cursed the city, turning it into the nightmarish realm of madness and illusion that it is today.

* Warhammer: Age of Sigmar: The Great Necromancer Nagash returns as the God of the Dead and ruler of the Realm of Shyish. The necromantic abilities of Nagash and his Deathlord followers, as well as the lesser Deathmages and Soulblight vampires, are greater than ever with their ultimate goal being to raise the populations of all eight Mortal Realms into undeath.
* Warhammer: Age of Sigmar: The Idoneth city of Galanaur rests on the back of a colossal sea monster called a Great Scaphodon, which slowly moves across the seafloor and takes the city with it. Galanaur was originally built in the Realm of Ghyran, but the Scaphodon's movements have long since caused it to move into Ghur.
* Warhammer: Age of Sigmar; The Idoneth Deepkin use sharks called Allopexes as beasts of battle for their more elite warriors, who attack with various ranged weapons while the Allopex tears at opponents with its teeth and fins.
* Warhammer: Age of Sigmar, the Kairic Acolytes wear twisted masks resembling the daemonic servants of their god that these mad cultists believe that these masks represent their true face.
* Warhammer: Age of Sigmar, the Kharadron Overlords have the Endrinriggers and Endrinmasters of the Endrineers Guild are talented combat engineers whose job it is to keep their sky-vessels flying as well as defend it from any enemies and monsters that would attack it.
* Warhammer: Age of Sigmar, the Kharadron Overlords live in floating sky-port cities in the skies of Chamon, the Realm of Metal, held aloft by the mystical science of the aether-endrins. These sky-ports are centres of commerce and culture with the six greatest ports of Barak-Nar, Barak-Zilfin, Barak-Zon, Barak-Urbaz, Barak-Mhornar and Barak-Thryng forming the Geldraad, a council of representatives that act as the Kharadron government.
* Warhammer: Age of Sigmar: The Mortal Realms take the form of very large, spherical pocket universes each bisected by a vast flat plane on which the inhabitable landscape is found. They begin as fairly straightforward in the middle of each realm, but become increasingly charged with magic further out; towards the edges of the realm, the flat worlds gradually break up into areas of floating landmasses, exotic landscapes, and eventually areas of manifest magic.
* Warhammer: Age of Sigmar. The Realmgates are the only means for the majority of creatures to travel between the Realms with even the gods themselves finding the network of portals to be the most convenient means of travel. While most Realmgates only link two specific points within the Realms, some link to multiple locations while a single portal, the Allpoints, links to all the other Realmgates and is the single most strategic location in the Mortal Realms.
* Warhammer: Age of Sigmar, the Stormcast Eternals lose a bit of their personalities with each reforging after the first one.
* Warhammer: Age of Sigmar: The tree spirits became their own faction in the Sylvaneth, personal servants of the Goddess of Life Alarielle with a grudge against the Chaos followers of Nurgle for having infected Ghyran, the Realm of Life, with his plagues and pollution, destroyed most of their forests and tried to kill their queen.
* Warhammer: Age of Sigmar. They're some of the few Nighthaunt who actually deserve their punishment.
* Warhammer: Age of Sigmar, those who have never faced an Ogroid Thaumaturge in combat believe them to be nothing more than dumb brutes due to their size and monstrous appearance. In reality the Thaumaturges have incredibly cunning minds and possess a deep knowledge of the arcane arts.
* Warhammer: Age of Sigmar to protect them from the vicious aerial monstrosities of the Mortal Realms, as well as any other threat they might face. Highly trained and outfitted with advanced weaponry, the Grundscorps are well worth their high price.
* Warhammer: Age of Sigmar Tzaangor Skyfires are able to use their precognitive abilities to pull off incredible feats of marksmanship. In-game this is represented by a re-roll to hit and their attacks having a 1-in-6 chance of automatically wounding.
* Warhammer: Age of Sigmar: When Sigmar's followers returned to the Mortal Realms, the Herald of Tzeentch known as the Changeling disguised itself and moved through

the new cities that had been established, leading countless followers of the God-King astray with its lies and promises of power.
* Warhammer: Age of Sigmar who will stop at nothing to lead their Cult to victory and gain favour with their profane god. Having sold their souls to Tzeentch, the Chaos God of Sorcery, magical energy saturates their bodies allowing the Magister to draw upon the raw power of Chaos to power their spells.
* Warhammer also has quite a bit of this. The Empire is mainly based on part-medieval, part-early industrial revolution Germany, but the "good" factions also include various other European influences, particularly French aristocracy and British Arthurian legends (themselves largely based on the culture clash between traditional Celtic culture and the rise of Christianity). Elves, dwarves and humans are nominally on the same side, but often come into conflict due to misunderstanding, or deliberate dismissal, of each others' cultures.
* Warhammer, although two are merely dealing with attacks by vampires and Necrons respectively.
* Warhammer), a missile to the face is going to kill him. The prior existence of said rule is problematic to some veteran gamers now, since even a lowly human with no armor could survive a point-blank hit from a high-powered laser on a bad roll... and a multiwound model (such as a commander, or certain tougher units) can survive hits meant to destroy titans, if they don't do multiple wounds.
* Warhammer among the Ogre race because he makes a habit of gutting Ogres who lose duels against him.
* Warhammer and allow their rider to soar through the skies of a battlefield to rain magic and psychic powers down on their foes.
* Warhammer, and are disciplined and focused fighters able to quell lesser greenskins' animosity with a stern glare.
* Warhammer and asking for the complete payment, they instead stewed on this vile theft for a century, assembled an army, and laid siege to the baffled fortress.
* Warhammer and consuming a victim's brain can project the unfortunate's nightmares into the minds of the Butcher's foes.
* Warhammer and Dwarfs are able to arm their characters and unit leaders can do this. For dwarfs it's the only way many of their characters can get "two hand weapons"; Skaven can do this together with a tail weapon.
* Warhammer, and enough novels to justify the creation of an entire publishing company (Black Library). Bonus points? The miniatures games have no advertising - they gain new customers solely through word of mouth. This has however had a knock on effect - GW paid little to no attention to its other games as a result of this trope, to the point where the Specialist Games range, designed at the older GW players, were taken down.
* Warhammer (and even sometimes able to intimidate normal orcs into staying in line). Black Orc warlords are unsurprisingly some of the most fearsome generals in the setting.
* Warhammer and impossible to map; people have to navigate by landmarks and by instinct.
* Warhammer and killing them became a less daunting prospect, but it's still bad news.
* Warhammer) and lead to the death of the Phoenix King. The Elves refuse to put it behind them because the Dwarfs stole the Phoenix Crown from their king. The Dwarfs refuse to put it behind them because, again, they literally have a giant book listing every grudge in the whole history of their race to ensure they never stop being mad about them. While, by the time of the game itself, the two races are once again allies and on relatively (they are willing to talk and cooperate to an extent) friendly terms, it is noted that they will never again be as close as they were before. They even insist on conducting most of their trade through human middlemen to avoid contact as much as possible.
* Warhammer, and she's so pure her very presence dissolves daemons and dark magics. The powers of the Everqueen come directly from the elven Mother Goddess Isha, so in a very real sense, the Everqueen is the living avatar of a fragment of a divinity.
* Warhammer and the Empire is capable of building simplified, standardized Steam

Tanks.
* Warhammer, and The Masque (most powerful of all Daemonettes) gets its power from basically being the best dancer in the universe, able to entrance even the Chaos Gods.
* Warhammer (and to a lesser degree those of the Orcs/Goblins, Undead, and Dark Elves), who would sweep the entire world under their hordes if given the chance. As a result Order generally teams up when a large-scale incursion from those factions is on the loose, and conflicts involving them dwarf those that the Order factions fight with each other.
* Warhammer and toned down so that an "overkill" roll is made into a whole bunch of high-strength hits; it's still gonna suck, but now it's just an ordinary kill instead of a potential total wipeout.
* Warhammer; and "Wazzock", meaning "sucker" (literally "A dwarf who has exchanged gold or some other valuable item for something of little to no worth at all") but also used as a catch-all term to insult someone's intelligence.
* Warhammer: Apophas of Numas was a Nehekharan prince who murdered his family and was executed by being sealed into a coffin filled with Neheakaran Scarabs. His body was reduced to his skull, upon which a cursing rune was carved. In the Netherworld, he made a deal with the God of Death. He promised to bring him someone who was his equal to take his place. His soul was given command over the scarabs who ate him alive, and he scours the world for his equal. But, no two souls are truly equal, and he is damned to wander the world forever.
* Warhammer approach to creating fun rather than creating a situation where fun can develop.
* Warhammer, appropriately enough, the four gods of Chaos each represent an emotion and mindset. Khorne the god of anger and bloodshed is choleric. Slaanesh god of passion and lust is sanguine. Tzeentch god of ambition and hope is (ironically) melancholic. Nurgle god of despair and disease is phlegmatic.
* Warhammer are another good example of this trope. It can be taken to ridiculous extremes even, if players decide in a casual game to have 'no point limit' for building their army.
* Warhammer are basically cannons stuffed with rocks, broken weapons and other detritus that their wielders are able to use as easily as other races use handguns and crossbows.
* Warhammer, are immensely protective of their home and will viciously avenge any harm done to it. Their tree spirit allies are even more zealous about this — Wood Elves can, theoretically, be bargained with. Forest spirits can't. If your army is 2,000 pts or over (large enough to include a Treeman Ancient as your General), the entire thing can be composed of walking tree-things out to destroy anyone who dares to cut a shrub inside the boundaries of Athel Loren.
* Warhammer are no better than the 40K version, disappearing shortly after Chaos arrived and leaving their servants the Lizardmen unable to properly run the place and a bunch of unfinished projects that would spiral out of control and create even more problems for those living within.
* Warhammer are one such society, a successful "breed" of mutant that resembles a savage, bloodthirsty satyr.
* Warhammer are still associated with darkness and shadows. Tzentch, the Chaos god of change, mutation and backstabbers, is called the Raven God by some tribes and his demons bear strong similarities to corvid birds. Interestingly, his opposite Nurgle (god of disease, decay and stagnation) is called the Crow God by some.
* Warhammer article explaining that they wanted to release it as part of a wave of new Chaos Daemons models and so it was postponed until more new models for that range were ready.
* Warhammer: As a byproduct of general Skaven recklessness and disregard for casualties, Skryre inventors take absolutely no steps whatsoever to make their laboratories and factories safe to work in — the slaves and underlings working in Skryre facilities routinely die by the dozens from falling off of unstable platforms, getting facefuls of steam or noxious gases or being caught within exposed gears or moving parts, and larger workplace accidents can kill of

hundreds or thousands of workers at once. This goes on all the time, and Skryre higher-ups don't care — you can always get more slaves, after all.
* Warhammer as a deadly serious matter, and also tend to assume that anything people do that displeases them is a deliberate insult. In one notable case, the people of a fortress found themselves besieged by an army because they employed dwarfs to build it and accidentally underpaid them by a few pennies. As far as the dwarfs are concerned this was a deliberate attempt to rob them of their labor (again, by shortchanging them something like 0.001% of the total cost), so the appropriate response is to never tell them the payment was short, raise an army, then burn the place to the ground.
* Warhammer as a sign of devotion like actual religious practice). Followers of Ulric are similar, but favor axes and instead display their faith with a variety of wolf totems (usually furs). There are also Bretonnian Questing and Grail Knights, and some Chaos warlords qualify as evil versions of this trope.
* Warhammer, as every one of them still thinks himself the rightful king of Khemri with a bunch of related usurpers to eliminate.
* Warhammer, a skaven warpfire thrower has a good chance to explode violently on any malfunction.
* Warhammer. A suit had rejected his original (much better) head sculpt, so Gary created the "Bobo the Evil Skeleton" head in the belief that the cartoonish job would get rejected and he could go with the one closer to the artwork. It was approved.
* Warhammer as well, where every race gets more powerful characters the higher in rank they are. This is explained with some like Chaos and Orcs, where brute strength does take you to that position (and is required to keep it), but not for Elves and Dwarfs that inherit their positions as leaders, but still are far superior to the best elites of their armies. The Empire makes a single exception to this with the general choice which only excels the captain in leadership and is otherwise equal to a captain.
* Warhammer. As you do. When Vlad was slain Isabella committed suicide.
* Warhammer attempt to stir up a war between their enemies by constructing airships mimicking dwarf design and setting them to attack a human city.
* Warhammer at the beginning of each round of melee combat, but their fervor drives them to excel at slaughtering the enemy.
* Warhammer axes are much more popular than the hammer of the title, which is mostly limited to Dwarfs and a few humans.
* Warhammer. Beastmen and daemons have no say in whether or not they follow the Chaos Gods (due to being chaotic by their very nature and being aspects of their God respectively), while humans choose to follow the Gods by their own volition and the desire to break humanity to serve them is more tempting to the Gods than just relying on those that were already worshipping them in the first place.
* Warhammer became wanderers, eventually making their way to the Mountains of Mourn, and are widely regarded by other Dwarfs as hounded by ill luck.
* Warhammer behave in funerals, because they view death as ascension to the realm of gods, and thus they think that in funerals, the dead should be celebrated, not mourned.
* Warhammer block font logos and probably a few others for each franchise.
* Warhammer: Bretonnia has a unit called Knights Errant, representing the young, impetuous knights whose courage sometimes outpaces their skill. Their special rules reflect these details. A better example of this trope, Questing Knights, are knights who have given up their feudal responsibilities to quest for the Grail and the Lady of the Lake; their oaths command them never to stay in one place for too long, and they keep righting wrongs until they die or drink from the Grail.
* Warhammer, but it was accident-prone. Oddly enough, this actually happens less often then you'd think: Necrotects really did view it as an honor to serve their king in the afterlife (that, and the prospect of being around to maintain their monuments instead of letting them fall to wind and sand).
* Warhammer, but once upon a time a team of Halfling cooks attached to an Empire army got caught up in an ambush by goblins. The plucky little cooks defended

themselves with meat cleavers, but some goblin blood got in the stew, thoroughly ruining it. The head chef then snapped, dumped all the peppers and spices he had into the pot, looped ropes around the bubbling cauldron, had his team haul back on it, then fired the thing like a slingshot into the middle of the goblin horde. The resulting mixture not only scalded greenskins to death, it was strong enough to melt trolls! This ended up saving the day, and in subsequent campaigns many halfling cooks have contributed during battles with their own attempts at weaponized stew, though even the original chef never could quite remember what he put into that first batch.
* Warhammer came true simultaneously and everything was destroyed in horror despite everything the various heroes and factions tried.
* Warhammer campaign gives the GM several rumours that the players might encounter when talking to people, some of which have a grain of truth. On the other hand, most were just rubbish.
* Warhammer, can ignore that rule, and effectively always march. Apart from when they charge. The result is that army of short bearded guys is going to tactically outmaneuver you by landing their gyrocopters 7" behind your lines and so suddenly everyone but your cavalry is being outpaced.
* Warhammer can possess humans whose wills prove pliant. Though this provides a boost in power, a physical vessel can only sustain a daemon for so long; the greater danger is when a daemon possesses an individual with magical or psyker powers, and uses them to start summoning friends.
* Warhammer cause impact hits when they charge an enemy, or in other words, smash into enemy lines just like speeding chariots.
* Warhammer: Chameleon skinks were believed to be extinct for a very long time, as their only spawning pools were located in Pahuax, a temple-city lost to Chaos during the Great Catastrophe, and the last of their kind perished in battle not long after. They have begun to reappear during the Age of Strife, first as isolated spawnings and then in greater and greater numbers, for reasons unknown, although the Skink Priests consider this to be a sign or warning from the Old Ones.
* Warhammer changes over time; all examples should state when they were true. Some of the past rules can be seen below.
* Warhammer, Chaos cults have been known to permanently take over entire solar systems and beat on the punitive army that arrives to take back what's theirs because of their supernatural abilities. It can get so bad that some worlds have essentially become permanent Chaos vassal states with no one being able to do anything about it.
* Warhammer, Chaos often asks you to starts shedding lots of blood — whether it's yours or your enemy's depends on how Tzeentch is feeling that day — for anything more complicated than boiling water, though the most common ritual in any given cult will be summoning daemons.
* Warhammer: Chaos Warhounds, creatures associated with both the Beastmen and the human followers of chaos, are the descendents of regular wolves and dogs mutated by exposure to the influence of Chaos. The resulting animals are hideous, hulking, front-heavy beasts with any of a number of further mutations such as protruding tusks, horns, bodies studded with spikes and jaws bristling with fangs. Those further affected by Chaos sport even more monstrous mutations, such as distorted human faces, scorpion tails, coats of rock-hard scales and bladed tongues capable of impaling foes.
* Warhammer: Clan Verms, a clan reviled even by other Skaven, shares a close affinity with insects, spiders and other tiny, crawling things, and is believed to have been responsible for creating several of the larger varieties known to exist.
* Warhammer. Consequently, if it appears in any other Codex, it's getting stomped.
* Warhammer contains plenty of examples, and though many are due to the "more experience" version many others fit this trope.
* Warhammer. Daemons and Dragons are pretty much all that's left to challenge you, and dragons in the Warhammer setting are rare.
* Warhammer Daemons is almost never a good idea. Unless, of course, you're on their side, and even that isn't all fun.

* Warhammer Dark Elves and Lizardmen ride theropod-like creatures known as Cold Ones.
* Warhammer: Dark Omen Morgan Bernhardt, leader of the Grudgebringers, insists on "Commander" rather than going by "Captain" like most mercenary company leaders do. A lot of people he meets seem to consider his choice of title rather grandiose, though the Grudgebringers are large and well-equipped enough that not settling for "Captain" may be justified.
* Warhammer: Dark Omen: Regiments move and fight in formation and a tight one defends better against charges while a loose one is better for ranged fire. If a unit routs, it loses its cohesion for a while and it's an easy target.
* Warhammer: Dark Omen: The games provide them through your paymaster Dietrich's books. The in-game encyclopedias provide a lot of valuable information on various topics as well as give a good flavouring of what the Warhammer Fantasy Battle world is about.
* Warhammer decided 'Fuck it' and after an incredibly underpowered Beastmen release, grabbed the rules set and shook it so hard that 8th edition came out. 8th edition completely revamped a lot of rules, such as how breaking, charging and magic worked, and while far from perfect, at least managed to restore a lot of the balance. Of course a lot of players hated that because of the lore reasons and excuses, causing it to be rebooted.
* Warhammer. Dedicating their kills to a particular god gets them favors (and occasionally curses, the Chaos gods are weird like that).
* Warhammer definitely had to be done. And this is just the humans, the other 'good guy' races are just as bad.
* Warhammer describes an incident where a merwyrm — a giant, seagoing dragon — that had been ravaging the coast of Nordland attacks a village close to a necromancer's tower, putting an end to its rampage once it's enthralled by the wizard.
* Warhammer, despite the name, are actually just petty thugs who only signed for the chance to exercise church-sanctioned bullying or bounty hunting.
* Warhammer, detests magic, and psychic abilities, so much that this hatred can interfere with, if not outright prevent such abilities from working. Khorne’s priests, and some of his most favoured servants, share a portion of this hatred and the ability to disrupt arcane powers.
* Warhammer doesn't have such an extensive time period to work with, but a higher number of factions and being limited to one planet means a lot more attention to small details.
* Warhammer does the same thing, except without the "IN SPACE" factor.
* Warhammer. Downplayed with the Necrarchs, who still need to consume blood every now and again but for the most part subsist upon dark magic alone and are largely free of the ties binding other vampires to their bloodthirst and human society. Many Necrarchs seek to become this in full, and put a great deal of work in researching ways to purge the last traces of their thirst from themselves.
* Warhammer dual wield weapons in close combat. Typically using a weapon in each had in these games gives bonuses to combat, such as additional attacks.
* Warhammer: Dwarf tunneling units can pop up out of the ground somewhere other than where they were supposed to go. This also causes them to lose a turn as they argue over whose fault it was.
* Warhammer, early portrayals of Karl Franz make him into a cowardly and inept leader. Today he is known as a badass Emperor who fights with his Griffon.
* Warhammer elves are considerably more hardcore than your usual stock fantasy elves.
* Warhammer emotion or sensation, and they don't distinguish between incapacitating their opponents with extreme pleasure or extreme pain.
* Warhammer: Empire military leaders tend to sport some rather impressive facial hair, including large, impeccably groomed mustaches.
* Warhammer energy source, component of giant hamster wheels that shoot lightning, or as part of the setting equivalent of a nuclear bomb. Their Clan Skryre is a blend of dark wizards and mad scientists known as Warlock-Engineers.

* Warhammer even has a class, the Judicial Champion, who represents the local courts.
* Warhammer, ever on the cutting edge of technological development, have Gatling guns. Naturally, they're called ratling guns.
* Warhammer Fantasy 8th Edition has a few versions of this. The ambush rule, if it goes off right, allows you to place a unit where ever you want (like behind the enemies' precious cannons); scouts can now be deployed as close as 12 inches from an enemy unit; assassins' hidden rule allows them to hide in their unit then pop out at any time. Because assassins always strike first, they hit hard first.
* Warhammer Fantasy after a Norscan chieftain plundered his realm and stole his crown.
* Warhammer Fantasy), and being the subject of a Grudge tends to be a Very Bad Thing for anyone. Dwarfs keep entire ledgers of Grudges that have not (yet) been avenged, some of them centuries or millennia old, and still remember every last one of them, and their intent to repay them.
* Warhammer Fantasy) and unwilling to take responsibility for his failures.
* Warhammer Fantasy, an entire race of the spirits of long-dead aliens encased in metal skeletons by the C'Tan. They inhabit the dead Tomb Worlds in the galaxy, and have a carefully structured imperial hierarchy, with Necron soldiers at the bottom, (Over)Lords in the middle, and the Phaerons at the top. The C'tan were shattered into pieces for tricking the Necrons into becoming their slaves.
* Warhammer Fantasy applies it to factions like Chaos, Dark Elves, or Skaven (who are incidentally enough their prime targets)? They deserve that and more. Other races are usually left alone unless provoked.
* Warhammer Fantasy approach, their deadened bodies feeling no pain, regenerating with cancerous growths, and the knowledge that everything decays eventually.
* Warhammer Fantasy are almost all pale and black-haired, though no actual reason is given. Perhaps that was just a major dominant trait among the Nagarytheans.
* Warhammer Fantasy are based (loosely) on the previously mentioned Christian practice of self-mortification. Their main gimmick is, unsurprisingly, self-flagellation, but they also have a habit of wearing spiky clothes, crowns of thorns, and various other types of painful clothing.
* Warhammer Fantasy are not bearded, despite in-universe rumors to the contrary, but tend to look like plump, braid-haired viking maidens straight out of a Wagner opera; they also make up less than five percent of the Dwarven population, as most Dwarf births are boys. That said, they do have some eccentricities:
* Warhammer Fantasy as their servants, workers and soldiers, led by the powerful Slann, with their temple-cities built in a way to create a ‘geomantic web’, an interlinked matrix of natural earth-energy that encompassed the planet. The Old Ones would also create the other species from the setting: First, they created Elves, who were given mastery of magic, but they decided the Elves could not beat Chaos alone due to being frail and having a low birth rate. Then, they created the Dwarfs, who were higly resistant to magic and chaos corruption, but were too stubborn and would not adapt fast enough in the face of demon trickery. The next race created was Humanity, who had the magical aptitude of the Elves, the durability of the Dwarfs, and having a lot of adaptability of their own, however, they were extremly corruptible to the powers of Chaos due their short lifespan and ambition. Finally, their last were the Ogres, created by combining the best aspects of Men, Dwarfs and Elves, in addition to this, they are able to survive on just about any food, from meat to tree trunks to rocks. However, before their were properly instructed by the Old Ones, the forces of Chaos invaded the world and the Old Ones dissapeared mysteriously.
* Warhammer Fantasy, at the end of the Storm of Chaos campaign, by Death Master Snicht.
* Warhammer Fantasy Battle are this. They look like primitive Aztec-style stone carvings or monuments but are actually the relics of a super-technological galaxy-spanning race "the Old Ones" who were forced to abandon their colony after a catastrophic failure of their warp-gates (that flooded the Warhammer world with Chaos).

* Warhammer Fantasy Battle describes some of the items necessary for undertaking the ceremony to be admitted into the First Mystery of the order of the Witch Hunters, which include a wild boar with one tusk painted black, three keys, a silver knife, a receptacle capable of holding three pints of liquid, a white robe made of material thin enough to tear, a length of stout rope, a leather-and-birch crop, and bandages and smelling salts. It's clear enough that the initiate needs to do something violent involving the boar, but the details are otherwise left to the reader's imagination.
* Warhammer Fantasy Battle or the end of the first empire, depending on how you look at it.
* Warhammer Fantasy Battle representing general magical defence, and using them to cast spells, presumably after a quick coat of paint and swearing blind that they'd had the die in question for years.
* Warhammer Fantasy Battles Volkmar the Grim is killed by Archaon tied on a banner carried by the legions of hell in a weakened state is about as close as you get. He gets free and fights his way from there. Otherwise it's pretty much averted in the world.
* Warhammer Fantasy Battle the actual battle) is described to have been a completely incompetent nincompoop.
* Warhammer Fantasy bonuses to combat resolution (the check to see if the enemy breaks and runs) if they charge from the side or rear.
* Warhammer Fantasy, but according to the 8th edition Tomb Kings rulebook, he requires a highly literate bodyguard because he has so many titles that it takes "2 hours to say them all."
* Warhammer Fantasy but were almost entirely exterminated by the Emperor during the Great Crusade. The survivors were sealed in a stasis container which is eventually unleashed on the daemonworld Sicarus.
* Warhammer Fantasy clothing, medieval weapons, no fanservice, and no BDSM undertones.
* Warhammer Fantasy, Deathmaster Snitch killed an Imperial noble that had locked himself into a tower with the only door being guarded by a large band of knights. The knights didn't notice anything until the following morning. In fact, no explanation is ever given for how he did it, making it even more of a mystery.
* Warhammer Fantasy deliberately leaves a lot up in the air concerning some of its mysteries, but a great deal of fanon proclaims definitive answers to these questions. One common example is the nature of the Bretonnian goddess: many fans declare that she is merely a deception by the Wood Elves to be holy writ, but this is only one of several possibilities vaguely hinted at by the actual canon.
* Warhammer Fantasy do this as well. Dark Elves begin training the moment they are strong enough to pick up a sword or spear. All Bretonian knights start off as a Knight Errant. Once the young knights have proven their worth in the field of battle, they are knighted and receive a small plot of land to rule.
* Warhammer Fantasy do this in their End Times story arc. After having the story stuck in the same place for years, the entire setting was turned on its head, with characters getting killed off left and right like it was going out of style.
* Warhammer Fantasy element, the more ridiculous elements of 40k background are omitted. It nevertheless evokes this trope pretty hard, with vampires, daemons and the undead butting heads with dwarfs, elves and Lizard people.
* Warhammer Fantasy. Even worse in Sylvania, where frequent famines make cannibalism a disliked but socially accepted practice, and that's before the fact that it's run by vampires...
* Warhammer Fantasy. For Celestial Wizards and Light Wizards, this generally turns their hair pure white, alongside other effects.
* Warhammer Fantasy generally fills the position of being well-rounded with access to basically any kind of unit or strategy, although arguably they do still have some notable strengths and weaknesses, lacking many large monstrous units while having a good range of powerful ranged and artillery options. Lizardmen are also sometimes described this way, although again they do have some notable strengths (lots of big dinosaur monsters, powerful spellcasters) and weaknesses (relatively

few, short ranged ranged units)
* Warhammer Fantasy had a magical suit of armor fused to his body that grants him to strength to fight and makes him hard to kill (both in the background and in-game). However, he believes only a male wizard using dark magic can kill him, especially since most of his protection doesn't protect against magic. So he has every male sorcerer in his empire killed off, forbids males from learning magic and has them hunted down, and has all sorceresses married to him to ensure that they do not have a child (he's fused to the armor, it ain't coming off). It's a subversion because many of the Witch King's Brides take on male lovers, and sometimes have children in secret.
* Warhammer Fantasy has a few. Night Goblin Fanatics follow it the best — they deal the same damage as a giant catapult but are even easier to kill than a normal goblin and have a chance of killing themselves. There are, however, many others.
* Warhammer Fantasy has Arabyan Carpet (a flying carpet) as a common magic item (i.e. one that all factions can use)
* Warhammer Fantasy has Dark Elf ninjas and ratman ninjas, as well as more traditional Nipponese human ninjas in Fanon.
* Warhammer Fantasy has Dark the Dark elves hag Queen, Morathi, is one of the most powerful wizards in the game and the reason the dark elves had been corrupted in the first place. The Hag Queens of the Temple of Khaine are berzerkers that go to battle looking like they are two thousand years old by human standards and wearing next to nothing. If that isn't frightening, nothing is.
* Warhammer Fantasy has the Crown, Hand and Black Pyramid of Nagash. Interestingly the Crown and Hand were never intended to act as soul jars, but were taken from Nagash during his defeat by Alcadizzar and remained intact while the rest of his body was burned. Nagash reformed in the Black Pyramid over 1,000 years, but was considerably weakened without the other two items, which had been busy corrupting mortals during his absence.
* Warhammer Fantasy has the fate of Gilles le Breton, founder of Bretonnia, dragonslayer, and one of the greatest knights in history... who took an arrow from a random enemy archer on the battlefield. What made this particularly galling was that it was impossible for his allies to identify the one who fired the killing shot (which is a big deal in Bretonnia's honorbound culture), meaning the history books simply record his killer as "unknown archer." The entire thing was considered such an unfitting demise by the people of Bretonnia that there's a stigma against bows and other ranged weapons that continues to this day.
* Warhammer Fantasy has Wulfrik's longship, the Seafang. Its figurehead is possessed by a daemon, who demands to be fed blood before it will sail the ship into the warp or make it fly, allowing Wulfrik to chase his prey wherever it goes.
* Warhammer Fantasy, having obtained more fame and wealth through the curse than if he'd remained a mere clan warrior.
* Warhammer Fantasy; humans who want to work for vampires are rare, can operate outside in daylight, and (unlike lesser undead) do so independently and for long periods of time, which makes them valuable assets. However, it goes beyond that; while Vlad has no patience for fools and incompetents he rewards success generously, and never punishes anyone for honest mistakes or being forced to go up against opponents who are genuinely better.
* Warhammer Fantasy, in at least the most recent editions, it's heavily implied this is what happens to Chaos Warriors once they take up Chaos Armor.
* Warhammer Fantasy in its language, including animals. This ability was given to him by the Chaos gods to force him to live up to his boast of being the greatest warrior in the world by letting him deliver challenges to anyone or anything, which he achieves by delivering the crudest insults he can imagine in their language (in game terms, it means a challenge delivered by him can't be turned down).
* Warhammer Fantasy irrelevant) as well as the variety of continuity issues it caused (such as it being stated or shown multiple times in no uncertain terms that the Chaos Gods were badly struggling to take a single preindustrial planet in Fantasy) saw any connection being dropped. The End Times books indisputably joss

any theorized connection through their brief look at the wider universe and the Realm of Chaos.
* Warhammer Fantasy, is a lot more complementary to humans than you'd think).
* Warhammer Fantasy, is revealed to have been the last Aeldari Emperor while his mother, Morathi, is the Arch-Priestess of Slaaensh.
* War Hammer Fantasy, it's stated that Ogres will trade for some very esoteric items, including, in one instance, a skeleton and a pickled orc head.
* Warhammer Fantasy, just about any non-Black Orc unit has to make a Leadership test at the start of each turn they aren't in combat (called an Animosity test, in game). If they fail, they have a 1 in 6 chance of attacking the nearest friendly unit, a 1 in 6 chance of charging the nearest enemy unit, and a 4 in 6 chance of basically grinding their advance to a halt as they start bashing each other out of boredom. They'll even do this despite having a Black Orc Boss or Warboss in the unit... who will basically kill any troublemakers the first time they start punching each other up. And they can potentially go right back to doing this even after he cracks some heads together!
* Warhammer Fantasy, killing his underlings in large numbers, or even forcing Archaon himself to spend some time recuperating from battlefield wounds.)
* Warhammer Fantasy now boasts three with Games Workshop finally changing the status quo, with
* Warhammer Fantasy of the Chaos hordes (they do already exist inside the borders of Chaos's main enemies and can strike soft targets, which makes them moderately threatening).
* Warhammer Fantasy passed the law is no longer ruling, then everybody stops bothering to pay attention to it.
* Warhammer Fantasy, patron of thieves and liars, and believed to be an ascended human (like Sigmar). But where Sigmar did so via feats of strength, Ranald tricked his way into godhood.
* Warhammer Fantasy plays this straight with a few armies. Lizardmen are a particularly drastic example. Hero Level Sarus are hard fighting warriors and while Skink Priests are solid casters, their lack of access to different Lores (and the Lore of Heaven isn't the greatest lore in the world) and the fact that they're made of tissue paper means that they're often not worth it (at least without an Engine of the Gods). On the other hand, Lord Level Sarus are merely really good fighters whereas Slaan's access to all the lores, the different abilities you can give them and the sheer power of their casting abilities means they can often devastate entire units all on their own.
* Warhammer Fantasy plays this trope pretty straight. Humans have the standard 50-100 year lifespan we are used to (albeit with medieval or early modern levels of health and medicine, and the concurrent reduced average life expectancy), while Dwarfs can live for many hundreds of years and Elves for a couple thousand. The Slann and their Lizardmen servants are older still. Ogres and Halflings tend to have lifespans similar to those of humans. Indeed, the comparative briefness of human life is why only man has pursued and developed Necromancy - magic to extend life and cheat death is of little use to already virtually immortal Elves. The humans of ancient Nehekhara tended to live about five times as long as modern ones due to a pact they made with their gods, though all of this long-lived breed have been wiped out and rendered undead. At the other end of the scale are the Skaven - chaotic rat-men who generally only live for twenty years (though their leaders can extend that to a couple of centuries using dark magics). The lifespan of Orcs and Goblins has not really been touched upon, though given the race's penchant for perpetual violent warfare it is unlikely that many of them ever get to find out either.
* Warhammer Fantasy response, as the irreversible Chaos mutation ensures the affected person is no longer the human they once were and has no qualms killing and eating their family / selling out the town to the closest beastman horde.
* Warhammer Fantasy Roleplay, all activities depicted herein. Just so we're clear."
* Warhammer Fantasy Roleplay: All Bretonnian mercenaries are considered shepherds for legal reasons, since peasants are technically not allowed to travel without

their lords' permission, and may be questioned harshly or killed if they show up in places they aren't supposed to go, but shepherds traditionally have far more leeway in these matters. Merecnary bands usually have one sheep to provide the necessary legal fig leaf, and these sheep often become pampered mascots.
* Warhammer Fantasy Roleplay and, barring the ones who are mutilated or too ancient, all are extremely beautiful.
* Warhammer Fantasy Roleplay and either run away at top speed or curl up in a blind panic. Examples include dragons and especially grotesque daemons.
* Warhammer Fantasy Roleplay and its spin-offs are famous for averting that. That hunchbacked, grossly fat oaf with a lazy eye and hairy warts is not a mutant, that's a representation of the average Old Worlder. Even the elves aren't pretty in the first Warhammer editions - more scars and eye-patches than a pirate crew. Though there is some movement away from the "everyone is fugly" character depiction.
* Warhammer Fantasy Roleplay, and most of them are illiterate and can't read your 'please do not burn by order of the Emperor' papers. Also, 1st ed. WFRP magic has been translated directly from WFB with inches changed to meters and figures changed to targets. In WFB, a capability of killing 3 figures at 48 inches could rout the small unit half a mile away. Killing three people at 48 meters is flashy, but nowhere near "war god" level. Also, with bad rolls, a wizard can end up with Magic Points score barely enough for one or two high-level spells per day. And we're speaking about the best of the best here. Roleplaying potential is another thing, but noblemen, clerics, engineers and witch-hunters still get the upper hand.
* Warhammer Fantasy Roleplay and you have the liberty to remove these elements if you wish.
* Warhammer Fantasy Roleplay annoying escortee — for most of its second half.
* Warhammer Fantasy Roleplay, a quote by a Bretonnian soldier describes an experience he had fighting goblins riding giant wolves. They came riding down on them, all teeth and fangs and halitosis, and the wolves were also pretty awful.
* Warhammer Fantasy Roleplay are nearby or the orc is already in melee with someone.
* Warhammer Fantasy Roleplay are still going at it over an alleged ravishing that happened several hundred years ago (if it happened at all) and which both sides claim to be the victimized party in. The feud is so formalized the time and place of any battles are agreed upon in advance, fought according to a timetable, and are apparently a great spectator sport for neighbouring nobility and peasants.
* Warhammer Fantasy Roleplay: Bloodsedges are a type of tree that feeds on living animals by grabbing them with its branches and holding them against its trunk, where powerful acids quickly turn it into fertilizer. A copse of these things can devour an entire war party passing through them.
* Warhammer Fantasy Roleplay characters are able to use a weapon in both hands. Unlike in the core game however, this does not grant any extra attacks as the off-hand weapon is mainly used for parrying (much like in real life).
* Warhammer Fantasy Roleplay describes them as a versatile, surprisingly well-organized group who do various odd jobs around the camp, as well as scavenging and offering "personal companionship".
* Warhammer Fantasy Roleplay even without failing any checks (making a sword that can become an absurdly sharp blade for a single blow is easier, taking a few days' off-time), and it's explicitly verboten for a runesmith to ever create two weapons with identical runes on them (that Alaric did this is why he's called 'the Mad'), and master runes occupy all slots on a weapon.
* Warhammer Fantasy Roleplay: Extreme gigantism is one of the most common mutations caused by Chaos on normal animals; while most cases aren't quite extreme enough for this trope (giant rats and spiders, for instance, are "only" the size of a wolf), others, like fen worms (common marsh snakes turned into 20- to 30-foot long monsters), certainly are.
* Warhammer fantasy role-play has a superstition that this is how you kill fire wizards. It doesn't work.
* Warhammer Fantasy Roleplay has two Petty Magic spells for this purpose: "Light"

causes an object to glow like a torch while the wizard is holding it, while "Marsh Lights" creates four floating lights that can move independently.
* Warhammer Fantasy Roleplay have several species who don't wear shoes:
* Warhammer Fantasy Roleplay. His idea of a really funny joke involved pretending to reform, and luring many of the Empire's nobility to a feast at his castle… laced with paralyzing poisons, so that they starved to death with a feast spread out before them.
* Warhammer Fantasy Role Play, Imperial calendar counts the years from the coronation of Sigmar, an event marking the birth of the Empire (canonically the game is set in 26th century). The year is 400 days long and divided into 12 months with six with intercalary holidays, while weeks are eight days long. Other nations use similar calendars, usually numbering the years from the founding of respective state (e.g. 977 IC for Bretonnia, 1524 IC for Kislev). And the calendar of High Elves is divided into epochs of variable length, each one referring to the reign of the particular Phoenix King (very similar to the Japanese eras). Wood Elves, Ungols and other nomadic tribes use various lunisolar calendars.
* Warhammer Fantasy Roleplay is necessary but not sufficient for spellcasting, and magic theory is neither.
* Warhammer Fantasy Roleplay, it has a mechanic for going insane and lists quite a nice amount of mental illnesses for which your character can suffer
* Warhammer Fantasy Roleplay keen on personal property) easily comes across as skuzzy.
* Warhammer Fantasy Roleplay. Later editions drop these mechanics and describe the Old Faith as having been subsumed into the cults of various nature gods.
* Warhammer Fantasy Roleplay native to the lakes and rivers of the forests of southern Lyonesse, resemble misshapen humanoid frogs with pincers and gills in addition to whatever other individual mutations they may have. They're as evil and vicious as any other Beastman, and prefer to attack amphibiously. They sometimes travel up rivers for very long ways to attack unsuspecting villages.
* Warhammer Fantasy Roleplay notes that this was the fate of many of the citizens of Praag, in the northern kingdom of Kislev, as a result of its conquest by the forces of Chaos.
* Warhammer Fantasy Roleplay: One mutation causes your genitals to ditch you in your sleep and run off to the realm of Chaos. In their place, they leave you with "a toothed orifice which stage whispers lewd suggestions at inappropriate moments".
* Warhammer Fantasy Roleplay or other entangling weapon can attempt either to wriggle out with an Agility test or burst their restraints with a Strength test.
* Warhammer Fantasy Roleplay simply have no knowledge of (or concern for) their past at all. By the end, almost nothing is left of the character's original identity, and what remains is a fractured personality formed from rampant insanity and the overpowering influence of his chosen deity.
* Warhammer Fantasy Roleplay starting careers that represent your characters having experience in adventuring-suited skills, like soldiers or slayers, but they are rare and unlikely to obtain.
* Warhammer Fantasy Roleplay: The 2nd Edition vampire sourcebook describes Madam Kalfon, a Bretonnian girl who was turned into a Necrarch vampire while only fifteen years old. Necrarchs universally resemble desiccated and borderline inhuman corpses, and the figure of a child-sized mummy ruling over a tower filled with undead minions dressed in colorful clothes and toys fashioned from flesh and bone, all while still acting like the living child she hasn't been for centuries, provides a rather disturbing scenario for players to be drawn into.
* Warhammer Fantasy Roleplay: The second edition Bretonnia sourcebook describes the Forest of Châlons as being the haunt of "Undead, Beastmen and Undead Beastmen".
* Warhammer Fantasy Roleplay, the Strigany are the nomadic descendants of the people of Strigos, an ancient human nation that was ruled by vampires. The fortune-telling Strigany mystics maintain the true history of their people, which happens to include some genuine necromantic lore.
* Warhammer Fantasy Roleplay Tome of Corruption has a section on grimoires - at

least one of them is daemonically possessed and will attack people.
* Warhammer Fantasy Roleplay to suspected "dove fanciers". Canny adventurers sometimes fake this in hopes of getting the most senior medic.
* Warhammer Fantasy Roleplay wargame can be used to stage underground battles between adventurers and monsters too, and this was very much a popular use for it in its early days.
* Warhammer Fantasy Roleplay, which will unfailingly pull a character out of certain death and put them in a position where you are safe for the immediate moment. For small stuff a Fate Point will turn a killing blow to a glancing one, cause the enemies to take you prisoner instead of killing you on the spot, or let you dodge that lethal fall pit, but it becomes one of these when, say, you've just been killed by being spaced, caught inside a collapsing mine or building, or by having a daemon biting your head off.
* Warhammer Fantasy Roleplay: While this particular weakness is rare among other vampires, Necrarchs find it almost impossible to enter a building that mortals made a home unless expressly invited — trying to do so otherwise will cause them great physical harm if they manage it at all.
* Warhammer Fantasy Roleplay will save you from any fate no matter how gruesome and cruelly unusual, however.
* Warhammer Fantasy Roleplay, you're no great hero; you're just a peasant or bandit, trying to survive against all the odds.
* Warhammer Fantasy's (debatable) replacement, Age of Sigmar, has swung the other way entirely. The stripped-down system is dependent upon weapon profiles, not standardized rules, and as such rules like the insta-kill double strength would not fit in the style of the game. The multiwound weapons are still a thing, they they too can be different depending on who is using them — but they are much more common. Models also have more wounds than they did before. The former cap was 10 wounds, but now some large figures have over 30. Having originally (or so the rumors go) been designed as a skirmish game to run in tandem with a new edition of WHF, it makes sense that the models would be less disposable, and that larger models would be more resilient.
* Warhammer Fantasy: Skinks. They're among the fastest infantry in the game, with a move score of 6 and initiative 4... but their toughness score is so low even elves consider them fragile. Ranked-up units tend to be used for flanking enemies, while the skirmishers tend to run around picking off war machines and chariots in a hail of poisonous blowdarts.
* Warhammer Fantasy: Skin Wolves are people cursed with the blood of a Chaos-mutated wolf. In battle, their wolf form erupts out of their body, still draped in their tattered human skin, and only once their hunger is sated does their form collapse and the human has to tear his way out of the wolf's skin, or degenerate wulfen who fully changed into animals.
* Warhammer Fantasy, Snorri Whitebeard, the first High King of the Dwarfs, was entombed, with a tankard of ale set upon his sarcophagus.
* Warhammer Fantasy so beautiful and seductive that entire units must make a morale check to avoid distracted by her mere presence in combats she is involved in.
* Warhammer Fantasy. Some of these mutations have a clear end goal, like the champion taking on the appearance of one of their god's daemons, but others follow no set pattern. Those who have received too many "gifts", or have fallen out of favour with the gods, risk devolving into insane, shapeless horrors called Chaos Spawn.
* Warhammer Fantasy source material, a quote from Chaos Champion Egrimm Van Horstmann uses the idea for dramatic effect and symbolising the end times.
* Warhammer Fantasy spoiled a lot of the mysteries of the armies of the Old world. The lore merely hinted that the Green Knight was Gile Le Breton, but could equally be a daemon-esque construct of the Lady of the Lake, but two paragraphs in to the Bretonnian section in the first End Times book outright states that it was Gile. The third book likewise spoiled the eventual fate of the elves and their eternal war with the Dark Elves. The website also spoiled that Nagash would return to the old world, since they released a playable model of him as a preorder with the book

and named the first book after him, despite the fact that the summoning ritual constitutes a good half of the book's lore.
* Warhammer Fantasy's Skaven take great pains to conceal their existence from humankind, presumably to aid in their attempts to undermine and enslave human society without anybody noticing until it's too late. What with regular massive incursions and devastating pitched battles to hush up, this usually involves such extreme measures as stealing back all surviving artefacts of Skaven manufacture, assassinating or discrediting witnesses by the thousand and conducting complex magical rituals every thirteen years to cloud human minds on a global scale. The fact that the Warhammer world contains untold other sinister underworld terrors and chaotic warbands that make no attempt to hide their existence makes things considerably easier, as does natural human superstition and gullibility. In the Empire and Bretonnia at least the Skaven are widely regarded as nothing more than a bad-taste myth put about by bored university students who should really know better. It should be noted, however, that the Skaven only seem to keep their existence a secret from human societies - the dwarfs, elves, orcs, lizardmen and others all seem perfectly aware of their existence following centuries of open warfare.
* Warhammer Fantasy: Subverted with beastmen: despite some of them serving a god of perversion, lust, and excess, having sex with humans is just about the only thing they won't do.
* Warhammer Fantasy, the core lores of magic are based on this, and both High Magic and Dark Magic can be tied to this as well. Other forms of magic are not such good fits. Some of the Lores are straightforward, others more complicated.
* Warhammer Fantasy: The Dark Elves are the High Elves' crueler kin, living in a society founded on slavery and the worship of the god of war and murder and regularly raiding other species for wealth and fresh slaves.
* Warhammer fantasy: The elven High Mage Teclis is the single most wise and powerful magic user in the world, but his body is so weak he needs to be constantly fed healing potions to keep his heart beating.
* Warhammer Fantasy: The legendary dwarf brewmaster Josef Bugman was named by his father Samuel (formerly Zamnil) in the belief that their beer would sell better in the human Empire if they had local names.
* Warhammer Fantasy the Skavens clan Skyre is a group of giant rats numbering hundreds of thousands if not millions of Gadgeteer Geniuses. The engineers of the empire follows this trope quite good as well. The dwarfs might at first appear like this but their constructions aren't that improbable and most are old engines based on experience and new inventions are rare.
* Warhammer Fantasy. The Vampire Counts have been known to jump in and help the Empire if the forces of Chaos and the Skaven threaten them sufficiently. After all, they're vampires, and vampires need living mortal prey to snack on... What ever will they do if all the warm walking blood-bags are killed off?
* Warhammer Fantasy the Wanderer is also known as the High Executioner of Chaos, because his divine mission in life is to find the biggest, toughest, ugliest monsters/champions/enemies around and challenge them to a fight, dedicating bits of their corpse to the Chaos Gods. Thanks to his Gift of Tongues, he's able to goad his target into fighting no matter how disastrous this would be for their side.
* Warhammer Fantasy. They have a special rule, "Festooned with Pistols."
* Warhammer Fantasy, until an outbreak of the plague forced him to choose between her joining him in undeath or losing her to 'regular' death.
* Warhammer Fantasy uses this trope as part of its 'immortal enemies hiding in wilderness' motif, with many of the forces of Disorder especially making use of this.
* Warhammer Fantasy using da Vinci-esque pedal-powered flight suits. The Birdmen's regimental motto is outright "Those Magnificent Men in their Flying Machines".
* Warhammer Fantasy, which represents both fire and passionate emotion.
* Warhammer Fantasy: Wizards who channel the Wind of Life use a combination of this and healing magic — besides being able to heal and strengthen allies, they can influence plant growth or call on animated vegetation to attack their foes.

* Warhammer Fantasy world was part of a planet cut off from the rest of the universe by warp storms, explaining the many shared elements. However, mentioning this nowadays is liable to get you bundled into a van and never seen again.
* Warhammer Fantasy would have been a Bad Thing.) The Slann also use them to communicate with each other, unfortunately for them they had to move their continent around a bit, which meant that their cities in Lustria and the Southlands are no longer aligned, which means they cannot communicate. This leads to redundancy at times, such as hitting the Cathayan fleet with two hurricanes.
* Warhammer Fantasy: You can find bad guys loving their mommas. Malekith is the king of possibly the most evil race in Warhammer (which tells you something), but he is nothing if not absolutely devoted in loving his eternally young mom/concubine Morathi.
* Warhammer features a character who made the mistake of wishing for a Lord of Change to make him the greatest mage in the world. The daemon did just that, making him 15 feet tall.
* Warhammer features a rather one-sided battle between a Chaos warrior and a Sigmarite Warrior-Priest. The latter is on his knees, having taken a nasty blow to the side, when suddenly his eyes and weapon come alive with a holy fire. The Chaos warrior just cocks his head and knees him in the injured side.
* Warhammer features the Paths of the Old Ones, a series of pocket dimension "hubs" connected to each other and to real-world gates by "tunnels" through the realm of magic. Since the Old Ones disappeared, the Paths have been tainted by Chaos. The tunnels are even worse, containing "reality bubbles" that travelers can be trapped in. These may vary from alternate timelines to a daemon's personal playroom. And if you take a wrong turn in the Paths, you may just end up in the Realms of Chaos. Or worse, what is heavily implied to be Warhammer 40K's Warp.
* Warhammer. Followers of Nurgle then seek only to bring the joy of pestilence and death to the universe.
* Warhammer, followers of Ranald, god of thieves and gamblers, also avoid violence when possible, both because it's crude and unprofessional and because murder is a premise of a competing god.
* Warhammer: for balance reasons, units in melee can't be targeted by ranged attacks, averting this trope. Played straight with the Skaven, who as a race of backstabbing ratmen, can fire into melee (with a random chance of hitting friendlies).
* Warhammer for cavalry, obviously inspired by the hussar pictured above.
* Warhammer, Forest Goblins and Spiderfang Grots respectively ride giant spiders into battle with the rank and file riding spiders about twice their size while their bosses ride spiders twice as big as those of their followers. The largest spiders fielded by these tribes are the arachnarok spiders, spiders so massive that they can be fitted with howdahs and fitted with catapults or primitive shrines.
* Warhammer, for the few surviving souls to be caught and eternally tormented by another evil deity.
* Warhammer from the only tool in their considerable arsenal, but it is certainly used.
* Warhammer genre. While the concept of a less-than-happy fantasy obviously existed before (the fathers of fantasy fiction — J.R.R. Tolkien and R.E. Howard — both contributed to it), many of the typical traits such as the vaguely Central European late-medieval settings or focus on lower classes and social outcasts seem to have been first put together here.
* Warhammer gets in on the act too, with the primarch Magnus the Red (also known as the Crimson King).
* Warhammer: Giant monsters are not uncommon in certain armies, and several resemble supersized versions of common animals.
* Warhammer giants are the barbaric remnants of a once-great civilization devoured by the Ogres. Drunken, inbred and incredibly stupid, the giants roam the Old World fighting for whoever can provide them with enough to sate their enormous appetite for booze and bloodshed, most often the Greenskins and the Warriors of Chaos.
* Warhammer gives us an Orc army that was briefly famous for their stealthy night

raids until the boyz started bellowing the new battlecry: "Youz can't see us!".
* Warhammer guys) will lose. No matter what. Honestly, you might not even bother. It's like the creators have already thought up an ending in advance! True, they always lose. But as it is said in the Horus Heresy books they are destined to win. Well, Chaos at least. It is said that they will whittle away at the Imperium until eventually all of humanity is destroyed. Considering most every daemon or Chaos Space Marine can't die, this is easily understood.
* Warhammer had five alignments: Lawful, Good, Neutral, Evil and Chaotic.
* Warhammer had his hands removed after he angered the Tyrant of his former tribe. To stop the bleeding, Skrag jammed cleavers into the stumps and now uses them to slice 'n' dice his victims.
* Warhammer had them before, yet another bone of contention between their respective fans.
* Warhammer has Abhorash and his Blood Dragon knights, who are basically a cult of martial vampires who have a code of honor which states that only cowards prey on the weak and defenceless, and so they travel around picking fights with worthy warriors and monsters and feeding on their blood instead. They're still bloodthirsty (metaphorically and literally), sociopathic undead monsters, but if you're a woman or child, they'll leave you alone.
* Warhammer has a book on tactics written by the High Elf General Mentheus that is referenced occasionally.
* Warhammer, has about a 99% chance of being a football hooligan. The game itself represents this with random chances of riots, pitch invasions and other fan violence happening whenever there is a kick-off. Fans will also beat-up any player pushed into the crowed.
* Warhammer has a few. Orion and Ariel, the Wood Elf King and Queen, are immortal demigod spirits bound eternally to one another, and the vampire counts Vlad and Isabella von Carstein grew to be passionately in love throughout their unlives (until Vlad was finally slain centuries later, and Isabella committed suicide rather than face eternity alone).
* Warhammer has a more detailed system that has most people drawing on a collective library of spells, though Lizardmen, Chaos, Undead, Orcs and Goblins, High Elves, and Dark Elves all have access to an extra group of spells.
* Warhammer has a necromancy spell that tears the souls out of the victims and turns them into Spirit Hosts, as well as a spell available to the Daemons that turns enemies into more Daemons.
* Warhammer has a special rule which causes everyone around him to reroll misses in close combat due to amplifies hate. Some version even forbid nearby units (friend or foe) from falling back or breaking off combat without a difficult leadership role, forced to tear their opponents to shreds or die in the attempt by Skarbrand's rage.
* Warhammer has Balthasar Gelt, the current Supreme Patriarch of the Colleges of Magic and head of the Gold College, who wears a golden Greek-style face mask at all times. He only took to doing this after a mysterious alchemical lab accident many years ago, but nobody is quite sure what the mask (and his full body robes and gloves) covers. Some speculate his skin has turned to gold, others that he is horribly burned and disfigured, others that there's actually nothing wrong with him at all and it's merely an affectation. Balthasar isn't the sort of person one generally feels comfortable asking these things, and he probably wouldn't tell you even if you did.
* Warhammer has become this due to the huge infusion of raw arcane energy. Now it's anyone's guess whether that forest consists of normal trees or EVIL DEATH-TENTACLE TREES OF HORRIBLE TOXIC DOOM. You don't want to know what some of the other terrain pieces are like.
* Warhammer has developed a rich and diverse mythological background to complement the histories and cultures of its many peoples. There are several pantheons of gods, a handful of different creation myths and cosmogonies and many details of how the peoples of the world relate to their gods and myths. Generally the mythologies are race-specific, however, and it is altogether unclear how, for instance, the

families of the gods of men relate to the gods of the elves, the Ancestor Gods of the Dwarfs, the Old Ones of the Lizardmen or the Gods of Chaos.
* Warhammer has exposed breasts... and sculpted blood pouring from every orifice. If you read its background, it gets even more disturbing: this is what it does to anyone who happens to look at it, and it's implied to be slowly suffering the same fate itself.
* Warhammer has Gotrek Gurnisson and Felix Jaeger - originally kept together by a rashly-sworn oath on Felix's part when horribly drunk, but over the many decades of their adventures they have become pretty inseparable. Despite Felix's constant feeling that he'll never understand Gotrek's dwarfish psychology as long as he lives.
* Warhammer has many such libraries in its background. The biggest and most extensive is that maintained by the High Elf Loremasters of Hoeth in the White Tower, but each of the Imperial Colleges of Magic has its own library, and most wizards and sorcerers from the more civilized races will tend to keep their own. The realm of the Chaos God Tzeentch in the Realm of Chaos is often perceived as including a vast library, and he has even created two special Blue Horror daemons - the Blue Scribes - to traverse the multiverse and copy down knowledge of all the spells in existence for his collection.
* Warhammer has Sigvald the Magnificent — the favored champion of the Chaos God Slaanesh, Lord of Vice and Excess. Sigvald is so narcissistic that he has his shield polished to a mirror sheen so he can look at himself in battle, and is often distracted by his own reflection even in the heat of combat. His narcissism even causes him to launch his followers on wars of aggression to punish people whose hair is said to be more beautiful than his (the high elves if you must know), or the makers of wines he finds dull and tasteless. Many champions of Slaanesh show similar behaviour.
* Warhammer has the Beasts of Chaos, the first children of the Dark Gods. Since they are unable to do anything not Chaos-related, while the humans who offer their devotion to Chaos do so willingly, the Dark Gods provide boons and power to the humans while the Beastmen are left to squat in the mud and kill things. Unsurprisingly, they are not happy about this.
* Warhammer has the Dispel Magic Scroll and variants. The eighth edition limits you to a maximum of one, but in previous editions the Dispel Ringbinder was a common fixture. The 5th edition Dogs of War armybook also includes the Prism of Power as an item choice for Leonardo da Miragliano, which he uses to catch and dissipate the winds of magic and thus prevent enemy casters from fueling their spells.
* Warhammer has the eponymous Warhammer itself, Ghal Maraz, and to a lesser extent, the Runefangs (swords) of each of the constituent provinces of the Empire.
* Warhammer has the Runefangs, dwarven-made swords that are wickedly sharp. There are twelve of them, each made for one of the Elector-Counts of the Empire. None of the people the swords were made for lived long enough to use them, because the dwarves wanted them to be perfect and it took longer than a human lifetime for the smith to make them all. The descendants of the original intended owners use them just fine.
* Warhammer has the Skaven... Frankly, most of their clans neither want nor need a motive for what they do. Though they are pretty goal-oriented whenever they are put up against someone of equal or superior skill (and considering the strength of the average skaven, that isn't too hard).
* Warhammer has the somewhat unstable Skaven Warp Lightning Cannon, which fires magical lightning bolts of massively variable potency. Additionally there is the warp-lightning spell that Skaven warlocks can use, and a number of lightning-based attack spells in the Lore of the Heavens, which can be used to call down bolts of lightning from on high.
* Warhammer has this to some extent, when one compares the physiques of the miniatures for warriors with the same Strength (S) characteristic. A standard Orc warrior, for instance, has a Strength value of 3, which is the norm, despite that Orc model having gigantic muscular arms bigger than a man's torso. An elite High Elf White Lion Axeman, however, has a Strength of 4, despite the model's slender

and willowy frame. Admittedly the biggest disparities tend to come with non-human characters and could be chalked up to their peculiar biology or magical nature, but it is still noticeable with human models too. Normally proportioned Empire State Troops, for instance, have the same S3 as Chaos Marauders, who are all built like Arnie in the wrong aspect ratio.
* Warhammer has various examples that, for the most part, provided the inspiration and blueprint for its sci-fi offspring's entries.
* Warhammer have a Book of Grudges in which are recorded every slight and every insult made to a dwarf. Appropriate passages from the book are read out during the wars waged to avenge these insults, with the dwarves having difficulty in seeing the link between every such war lengthening the Book and their diminishing population.
* Warhammer have also allied with Chaos where convenient, most notably during the Great War Against Chaos and in the Storm of Chaos.
* Warhammer have a special ability which essentially forces them to stand their ground. They sacrifice their movement for combat bonuses.
* Warhammer have barbed whips used for goading War Hydras and other beats. Designed to inflict pain or large thick-skinned monsters, they are also quite deadly against humanoid enemies (although their damage isn't particularly high, they're armour-piercing weapons). Dark Elf characters can equip a magic weapon that is a slightly more powerful version of these whips.
* Warhammer) have comparatively few significant female characters in its background (mostly elves, thanks to their more gender-equal societies), but those it does have tend to avert this trope.
* Warhammer he is intelligent... for a troll, speaking in broken English, frequently talking about eating his enemies and being much dumber.
* Warhammer, he is still the physical embodiment of war itself and no mortal, god or daemon can match his understanding of tactics or his military expertise. As extensions of his will, the most favoured of Khorne’s daemonic generals are also gifted with a fraction of this knowledge.
* Warhammer holds a deep, paternal love for all living things. This includes bacteria and parasites. Nurgle loves every living thing equally and can't just kill those couple thousand bacteria that live within a sick person. That would be Something-cide!
* Warhammer: Humans are the most common species in the setting, and have the greatest cultural and nation diversity. Dwarfs are reclusive mountain-dwellers who despise the elves and orcs, but have a close alliance with humanity. Elves are divided between the usual High, Wood and Dark kindreds; the High Elves are nominally allied with humanity but view them as little better than apes, and are bitter enemies of the dwarfs due to lingering bitterness over an ancient war; the Wood Elves are intensely isolationist and only get along with forest spirits and animals, alongside whom their aggressively defend their forest home; and the Dark Elves are slavers and raiders despised by everyone else. There are also the bloodthirsty orcs and their goblin lackeys, who are in constant war with each other and everyone else, and the barbaric but more reasonable ogres of the high mountains, as well as lumbering dim-witted giants, brutish trolls who often ally with monstrous factions, immensely ancient dragons who often raid civilization for treasure, and eldritch daemons worshipped by the Chaos Hordes.
* Warhammer humans tend to be just as varied as their real-world counterparts, and no specific hair colouring predominates.
* Warhammer: Hysh, the Wind of Light, focuses on the manipulation of radiance. Light-related magic generally focuses on Daemon fighting, healing of the soul and body, and illumination of the mind and darkness.
* Warhammer in contact with malign supernatural beings. In one piece of background material a witch hunter burns a 6-year-old girl at the stake because her parents went to a mad scientist to heal her broken leg and ended up mutated as a result. The witch hunter got her drunk because he knew that she was an innocent who just had the misfortune to have the traveling doctor be an insane lunatic, but she couldn't be allowed to live because of the mutations.

* Warhammer. In fact, the entire Storm of Chaos campaign appears to have been completely reset, as all the army book timelines printed since then, if they even mention the forces of Chaos, merely end on an ominous note about how the forces of Chaos are massing under Archaon's banner and will soon sweep southwards. With the obvious exception of Archaon himself, most of the other Storm of Chaos characters have been completely erased from the setting (poor Valten)
* Warhammer in great, infantry-crushing circles while they revolve around the battlefield, crushing everything in their path, friend or foe.
* Warhammer. In the older editions of the later, if a unit's toughness stat is four points higher than the strength of an attack thrown at it, the attack can't hurt it. In the former, any unit can be harmed by a hit if the attacker rolls a six on a six-sided dice to wound, and no matter what, armor has a minimum 1 in 6 chance to fail. After all saves, any attack has at least a tiny chance to hurt the enemy. Interestingly, the current editions actually favor a big group of Mooks attacking a single powerful unit, since not do their mass of attacks and numbers mean they can beat it a battle of attrition, but they get automatic bonuses to their combat resolution meaning they can win without inflicting any harm on target.
* Warhammer is a not-very-subtle version of Europe (and beyond), so the layout is much the same as a real-world map. As the primary focus is on the Empire (Germany), Bretonnia (France), and the frozen, inhospitable wastelands only inhabited by desperate, drunk, and brutal deformed humans (Scandinavia), that's what most of the maps show. The larger map is has approximations of North & South America, East Asia including an island named "Nippon", Africa. England is represented as the island "Albion" (which despite the origins of the game, wasn't particularly explored until 2 decades into it's lifespan). The biggest changes are that there is a gigantic circular island planted in the middle of the Atlantic Ocean equivalent, and that Australia & South East Asia is smushed into a handful of large islands or pushed into the Antarctic equivalent "Southern Wastes".
* Warhammer is full to the brim with spellbooks of one sort or another. There are so many that Tzeentch, Chaos God of Change, under whose auspices magic falls, has created a pair of daemons - the Blue Scribes - to travel the multiverse copying them all out for him. Notable spellbooks include the Book of Hoeth (High Elves), the Nine Books of Nagash (Undead), the Book of Volans (Empire), and the Tome of Furion (Dark Elves).
* Warhammer is immortal, but his existence is tied to the seasons. As a result, he willingly passes into his own funeral pyre every winter. While that is going on, a Prince is chosen to bear Orion's mantle the following year. The prince is taken to the oak of ages, where he is sculpted and remodled to look like Orion, and merges with the spirit of Kurnous, god of the hunt, whom Orion is the avatar of. Each Orion does have all the memories of their predecessors so they technically are the same person, but each incarnation has a different personality.
* Warhammer is seen as a sign of future greatness among the ratmen. The Skaven character Throt the Unclean suffers from a particularly extreme version of this, and if he fails a leadership test in play he will uncontrollably snatch the closest unit to himself — whether a foe, a fellow Skaven, or a colossal war beast — and completely devour it.
* Warhammer is still a better caster than most living mages). The small, wiry Skinks are the priest and artisan caste and act as attendants to the Slann, in addition to managing the day-to-day running of the civilization and acting as skirmishers and assassins during war. The strong, physically imposing Saurus are the main warrior caste, acting as frontline warriors and guarding the Lizardmen's treasures and temple-cities. Finally, the Kroxigor — colossal, hulking and dim-witted brutes the size of tanks — perform heavy labor and construction in times of peace, and in wartime join the Saurus on the battlefield, wading through enemy forces to pound their targets into pulp with their bare fists or colossal bronze cudgels.
* Warhammer is written as an in-character study of the Chaos Gods. As the book goes on, the author starts having more and more ominous visions and making less and less sense as he descends into madness. At least half of the quotes in the Necron,

Tyranid, and Dark Eldar codexes fit this trope.
* Warhammer. It has an unfortunate habit of blowing up, however. When most armies' artillery misfires, a bad roll will result in loss of the artillery piece and its crew. When Skaven artillery misfires, it tends to result in the loss of the gun, it's crew, and everything in a fifty meter radius.
* Warhammer. It is said that the Changeling has taken on so many forms over its existence that it cannot even remember what its true face and form looked like.
* Warhammer, it's mentioned that the various kinds of dragons can be told apart by the color of their scales — fire dragons are red, black dragons are, well, black, frost dragons are icy white, forest dragons are green, and storm dragons are blue. This also ties into the magical affinities of their respective Emperor forms — doomfire dragons always wield the Lore of Fire, nightmare dragons the Lore of Death, ice dragons the Lore of Light, vemom dragons the Lore of Life, and great storm dragons the Lore of Heavens.
* Warhammer, joining the Slayer cult. This is done by discarding any armor, dyeing their hair orange (in honor of the first Slayer), hacking it into a mohawk (not explained), and finding the nastiest enemy they can. Dwarfs being dwarfs, don't expect them to throw the match.
* Warhammer jousting mini-game had a table that could be rolled on to determine what favor a knight was granted, the more intimate the garment the luckier it was.
* Warhammer Khorne) in existence and is the only one to sport a beard. Skarbrand’s beard is plaited, hung with bones, and longer than a man is tall.
* Warhammer kingdom of Bretonnia plays it straight since their tech is limited to cavalry equipment and longbows to go with its magic, but that's due to their ruling class being staunchly against it (also they're secretly manipulated by Wood Elves, not exactly the most welcoming of technology).
* Warhammer: Leonardo da Miragliano possess the Compass of Meteoric Silver, whose arrow is made from silver taken from a meteorite and always points to the highest concentration of magic in a battlefield.
* Warhammer likely to see in an army is two, and that's only in Storm of Magic games.
* Warhammer, likewise, gives virtually no attention to romance or romantic/sexual relationships, thanks to being focused almost entirely on warfare and battles. Such things are touched on briefly in a couple of the novels, but always in passing and never as a major plot device or focus. The game materials themselves leave the romantic status of most characters almost entirely unmentioned. Exceptions include the vampires Vlad and Isabella von Carstein (who are married and deeply devoted to each other), the High Elf Prince Tyrion (who is the consort of Alarielle the Everqueen, though the precise nature of their feelings are not mentioned), the Wood Elf King and Queen Orion and Ariel (likewise a couple, but left at that) and perhaps Malekith the Witch King (who is rumoured to be disturbingly and unnaturally close to his mother Morathi...).
* Warhammer live below those in big cities and tunnels that span every continent.
* Warhammer: Lustria is the worst jungles in South America taken to eleven; most of the continent is covered in trackless swampland and rainforests teeming with swarms of aggressive insects stinged and bloodsucking alike, enormous carnivorous plants, giant snakes, and man-eating dinosaurs, all quite happy to kill you — unless the plagues or the ever-present crushing heat do so before they can (and that's without getting into the zombie vampire pirates on the coast). The only reason anyone ever goes there is to search for wealth and magical artifacts in the golden cities deep in the jungle. Pity that there's a race of killer dinosaur-people living there who take a decidedly dim view to people walking off with their sacred artifacts...
* Warhammer make extensive use of javelins. Halberdiers are common in mercenary units.
* Warhammer, Malekith, soon to be the Witch King, considers it his birthright to be Phoenix King, ruler of all the High Elves of Ulthuan. He plots his way to the throne, but the last step is to endure the Sacred Flame. Malekith steps into the flame, confident of his right. He is however maimed and burnt by the flame, just

like his father Aenarion was. Unlike his father, however, he collapses and gives up. Thousands of years later, and after leading his own faction, the Dark Elves, and conspiring to take Ulthuan by force, he learns during the End Times, just before the end of the world, that he was the Chosen of the gods and all his injuries would have been healed had he lasted but a moment longer, just as Aenarion's had been.
* Warhammer: Malekith, the Witch King of Naggaroth, frequently makes laws, customs and rules for his Dark Elf subjects that he flaunts himself (such as his ban on male sorcerers, and for a long time his proclamation that nobody else be allowed to ride in a chariot). His mother Morathi has a similarly dismissive approach to following her own rules (as with her treatment of the Cults of Pleasure, which she outlawed, despite being a High Priestess of herself). To all the other Dark Elves their behaviour is a clear case of this trope, though Malekith and Morathi think it's a justified perk of being in charge. Whether Malekith and Morathi really do have the constitutional authority to behave in this fashion is a vexed question, given that "constitutional authority" to Dark Elves means "power to exercise one's tyrannical wishes when one wants".
* Warhammer: Malekith, Witch-King of Naggaroth, initially wanted to become king of Ulthuan and the High Elves before failing, being horrifically burned and retreating to the New World where he would establish the Dark Elves and Naggaroth. In the modern day, Malekith is a megalomaniacal tyrant constantly clad in black enameled armor that he can't survive without, ruling over a society of slavers, sadists and sorcerers where his word is unquestioned law, and dreams of returning to Ulthuan, crushing the High Elves under his feet and becoming the unquestioned ruler of all the elves.
* Warhammer many elite units receive a lot more glory than the rest. Knights in particular are are best remembered for their bravery and skills in turning the tide of battle in their favor. The best example is Crusades of Araby, where a combined army of Empire and Bretonnian knights fought against the armies of the Araby sultan Jaffar, who's army outnumber theirs 20 to 1, the knights fought them off all the way back to Araby, and their deeds are greatly glorified to this day.
* Warhammer, many of the cults initially present themselves as organizations for social and political change, something that the Empire could rather use.
* Warhammer: Mark of Chaos are pretty fond of unleashing the hog as well:
* Warhammer: Mark of Chaos begins with the rolling map illuminated by small explosions and fires, with the narrator describing the state of affairs in the Empire defending from the Chaos invasion. In a bit of a twist the main war is already over, and the game is about a local war with a splinter force.
* Warhammer may not be as over-the-top as its erstwhile sci-fi spinoff, but it's no slouch in the manliness department.
* Warhammer — Doomrocket, Doomwheel, Doomglaive, Doomflayer... plus "Your doom has come, man-thing!". Ahem.
* Warhammer — the further north you go, the closer you get to where the world ends and Hell begins.
* Warhammer, models armed with a brace of pistols are able to fire both their weapons at the same target during the same turn.
* Warhammer: Mourngouls are fundamentally very similar to the mythical wendigo, being created when people driven mad by cold and hunger in the far north of the world turn to cannibalism to survive, only to later succumb to the elements and rise as monstrous undead creatures driven by an endless, insatiable hunger that they can never relieve.
* Warhammer, mutated children of normal humans are often abandoned by their parents. If they survive, they roam the wilds until they're found by groups of beastmen or other Chaos mutants who they can join up with.
* Warhammer novel, an empire soldier is killed by the way of being impaled on the spikes of an Ork Warboss helmet. As in, the Ork Warboss discarded the helmet and it just happened to land on the soldier.
* Warhammer novels in over three dozen series, meaning the average one has been read by very few people indeed). By contrast, at least two game series have bigger

player bases than even the highballed 3 million figure despite having been out a fraction as long as the tabletop game:
* Warhammer novels play with the accent, introducing a Dwarf character whose speech is a comically exaggerated version of a real Scottish brogue. Even the other Dwarfs can't understand him half the time.
* Warhammer occasionally have marks of Chaos appearing on mortal worshipers. One mildly unnerving piece of art from one edition of Warhammer depicted a pair of eyes with the pupils turned into eight-pointed stars. In the latte, this mark is seen as heretical by the theocratic Imperium of Man and must be snuffed out with extreme prejudice. The person marked with it will most likely be overjoyed at the mark as they've likely already turned to Chaos.
* Warhammer of Chaos warriors. The comic "Condemned by Fire" shows they won (reinforcements came)
* Warhammer". Of course, claiming the defeat was just as planned is a meme in itself...
* Warhammer of the Elvish and Dwarf Kingdoms; Dark Elves disguised as High Elves attacked a Dwarf caravan, to which High King Gotrek sent emissaries to Phoenix King Caledor II demanding an explanation and compensation. Caledor sent the emissaries back with nothing, saying that the Dwarfs had to beg if they wanted anything. Gotrek was pissed, but sent the emissaries back another time, demanding more compensation for the insult. Caledor had their beards shaved, one of the most grievous insults to a Dwarf, starting a war that would wreck both kingdoms and leave the two races as bitter enemies.
* Warhammer of winning against them. Some fans theorised that Games Workshop were forced to push out 8th Edition solely because Daemons of Chaos broke the game so badly (the only way to make the game work again other than decanonising the entire DoC book would be to power creep all the other factions so heavily that the game would be unrecognisable), although there's no solid proof of that.
* Warhammer: Ogre butchers (wizards that eat all kinds of dangerous things to cast spells) have the immune to poison rule, so one would assume they have built up a very handy poison immunity.
* Warhammer ogres chaotic is the fact that while ogres can be negotiated with successfully, unlike orcs and forces of Chaos, ogres don't feel bad for eating you a second after the contract is done. One of their tribes actually value iron more than gold for the simple reason that with gold they can buy a weapon of iron, but with a weapon of iron they can have all of your gold.
* Warhammer: Ogres, orcs and beastmen are all quite happy to eat human flesh when they get the chance — and they're just as fond of elf and halfling meat. Dwarf meat is not as popular, being tougher and gritty.
* Warhammer, once having erected a mountain in front of advancing Dark Elf army.
* Warhammer once mentioned Sigvald the Mighty, whilst butchering a priest, chipping a nail on his armor. Sigvald immediately vowed revenge on the Empire for this "hideous deformity".
* Warhammer: One Goblin warboss, Great Grif Snazgit Nosepicker, defeated a chariot-heavy tribe by stealing or sabotaging every wheel in their army before the fight.
* Warhammer one of the rewards that the Chaos Gods could grant their followers to be merged with a daemonic beast, such as a Juggernaut of Khorne, a Flamer of Tzeentch or a Steed of Slaanesh. The resultant composite being had the abilities of both its original mortal form and the daemonic beast, while its physical form was also a combination of the two.
* Warhammer Online: Age of Reckoning, the player can grow Elvish Parsley.
* Warhammer Online and need to be destroyed to ensure the weakness is purged. Another is to gather the blood of a prominent villager and anoint a banner with it — the villager happens to have already been cocooned, so you need only stab him and gather the blood from the twitching, prone cocoon.
* Warhammer Online gameplay and 1on1 duels with other players. As with Shadow Priests, they tend to get a lot of flak should they dare to prefer hitting over healing...
* Warhammer Online had a collectors edition filled with this. It had a map, comic,

miniature, and artwork book.
* Warhammer Online has mostly "normal" names, although very Germanic, for the Empire NPCs. For Chaos and all the non-human races, this trope applies. For example, "Garik Bludfist", "Kargesh Fellgaze", "Bjorn Warpmask", "N'rarch Fleshreaper", "Vaardek Skullsplitter", "Alaric Grimstone" and "Brok Boarsmasha". No surprise that player characters who purchase a last name tend to either choose "NounVerber", "AdjectiveNoun" or a pop-culture reference.
* Warhammer Online metallic miniature of the lead Orc and his Goblin buddy to be used in the Warhammer Fantasy tabletop game. Shame what's happened to the actual game over time...
* Warhammer Online's redesign of the city sieges pits boss NPCs against each other. The Warlords are twice the size of a normal player (despite being characters that, in the original tabletop game, were normal man-sized), whereas the King NPCs are both roughly three to four times the height of a normal man. including the Emperor Karl Franz, who is very much a normal human. Still, it helps to a) justify his one-on-one fight with the monstrously huge and mutated Daemon Prince Tchar'Zanek and b) pick him out as a target...
* Warhammer Online that was released in 2008, and was shut down in 2013.
* Warhammer Online, the devs watched alpha testers get to some pretty strange places, and rather than fixing it, they either added kegs of dynamite to blow yourself up, so you can respawn where you are meant to, or by adding high-level boss characters you can fight if you can get an entire party to that spot.
* Warhammer Online) to swipe across enemies' faces. The Marauder class may come under this also, as his arm can be mutated into a variety of goopy shapes, some more tentacly than others, but all quite nasty.
* Warhammer Online when they somehow manage to blow themselves up trying to kill you (which is rare, admittedly. Because they kill you very, very fast).
* Warhammer) or are horrifying death machines to be rushed into melee as soon as possible (orks, tyranids, most Chaos and Space Marines leaders). In the fluff, however, the less insane armies keep their high command well out of harm's way.
* Warhammer) or by killing everything down to the last bacterium (the Necrons in 40K).
* Warhammer or just have them "falling in the swirl of battle" somewhere and coming back. Somehow.
* Warhammer people, giving them nightmares, driving wizards temporarily insane and in some extreme cases brainwashing people into adding themselves to it.
* Warhammer play the trope very straight indeed. The existence of the Elves' natural arrogance is thought to be a result of their exposure to the wild magics that have saturated the Warhammer world since the coming of the Old Ones. Elves are very resistant to magic, thanks to their natural affinity for it, but not completely immune. Rather than physical mutation and madness, such as humans might develop, this racial trait is the price Elves pay (just as the Dwarfs have been made universally stubborn and covetous for gold). But although they share the same basic psychological substrate, the three different kindreds of elves - High, Dark, and Wood Elves, express it in very different ways. Indeed, it might almost be said that the manner in which different elves manifest their race's natural sense of arrogant superiority is the defining feature of the different kindreds' cultures:
* Warhammer prefers to cripple them, so that they lie helpless on the ground, before taking their head in his hand and burning the flesh from the still living victim’s skull with hellfire.
* Warhammer: Pretty much every faction has an example of an "ultimate warrior" who represents the pinnacle of strength and skill amongst them. Of the more notable examples lorewise:
* Warhammer pushing the hapless infantry off the table.) Fliers are the one exception, able to freely return from the game after leaving; since they have a minimum speed they have to move each round, and a maximum amount they can turn, they sometimes can't avoid leaving.
* Warhammer Quest the Imperial Noble character tended to do this. A large chunk of his utility was based around guns which had long reload times and no limit on how

many he could carry. Consequently it was more useful to just buy lots of guns and then reload them between fights.
* Warhammer Quest was a semi-sentient sword with a set of razor-sharp whirling sawteeth on its blade. A great weapon for chewing up a Chaos Warrior's flesh and armour. Speaking of Chaos, one property a Daemon weapon can get is Chainsword, which is an oil-sputtering, armor-piercing engine of destruction
* Warhammer Quest, your heroes will definitely yank every bit of gold out of any orifice of their dead enemies. In fact, gold from the dead is so vital, that it replaces experience in the game. However, your heroes will never loot enemy equipment. The reason being that all the evil races use weapons that are tainted with black magic that's harmful to your heroes.
* Warhammer races tend to be willing to risk body and soul for victory, especially when victory entails simply keeping body and soul. Notable examples are Dark Eldar combat drugs that run the risk of ravaging the user's system, Slaaneshi spells that cause enhanced performance at the cost of bodily shutdown, and a whole swathe of Skaven items and spells that give bonuses in exchange for members of the unit simply dropping dead afterward.
* Warhammer ranged damage options beyond spells and a daemonic siege engine, and the Wood Elves, which fight almost exclusively as skirmishing archers.
* Warhammer, rat-portable flamethrowers, sniper rifles, energy cannons, mechanical lighting-spewing hamster-wheels, etc.
* Warhammer refuse, because they're too pissed off by his insults to back down.
* Warhammer, regardless of the population migration or continental drift that's occurred since they disappeared.
* Warhammer require a massive amount of detail about their settings. The war games do a fairly good job of giving a feel for their worlds, however, with rule-books that are about a hundred pages of rules and three hundred pages of fluff and model galleries.
* Warhammer revealed them to be distinct settings, sometime around '98.
* Warhammer, ride a variety of large predatory beasts into battle. These mounts range from the giant wolves ridden by regular goblins and grots, and the giant spiders used by forest goblins and spiderfang grots, to the more unusual cave squigs (creatures consisting of little more than balls of fungus, teeth, and nasty temperament) that night goblins and Moonclan grots cling desperately cling to.
* Warhammer rulebook discussed the relatively short ranges ascribed to its bows and cannons with words to the effect of, "Accept that these distances don't scale to real-world distances, or else go find an empty parking lot to stage your battles".
* Warhammers are large, two-handed blunt weapons. They range from rather small and wimpy (the ones made of chitin), to medium (the
* Warhammer's China) is either a powerful but benevolent Vampire or Liche (it is known that the first vampire gave one of the heirs the elixir that makes you one to settle a debt millennia ago). There's so little detail given about the place that it could just as easily be an actual dragon.
* Warhammers didn't look much different from your average carpenter's hammer - they just had longer handles. Placing a lot of the weight at the point of impact gave the weapon a lot of punch, breaking bones through armor that was intended to deflect the lesser impact of blades; hence why they were highly effective against plated armor. The real-world hammers often had a small flat face on one side of the head and a simple pick on the other. Strike with the flat face and you can quickly use your weapon again; strike with the pick and with any luck you'll penetrate your opponent's armor entirely, at the cost of possibly having to take a moment to yank the pick out again.
* Warhammer, seeing no difference between the enemies or allies of her people.
* Warhammer: See that really hot, half-naked elf woman? She's the Dark Elf Hag Witch who kills children and bathes in their blood. That fat frog guarded by the huge, frightening lizards she's fighting? The frog's a Slann Mage-Priest, and those lizards are Temple Guards, among the noblest soldiers in the world.
* Warhammer. See their own pages for the awful details. "In the grim darkness of the far future there is only war", indeed.

* Warhammer see the world, with spellcasters glowing particularly brightly. This often ends badly for the spellcaster, since the Cygors do so enjoy killing them.
* Warhammer's Elves exhibit some degree of this. The noble and good High Elves tend to wear long robes, cloaks, silk trousers, and ornate armour, and while most of their evil Dark Elf cousins often wear just as much (albeit darker, and with more spikes, blades, and chains), many Dark Elf Sorceresses and the frenzied Witch-Elf cultists tend to wear very little indeed. The Wood Elves tend to fall in the middle, as their morality is mercurial, shifting and occupying a middle space between their High and Dark cousins, and, while their leaders and rank-and-file soldiers are fairly well covered up, many of their wilder warriors — especially the Wardancers — wear just as little as the Witch Elves.
* Warhammer semiautomatic rocket grenade launchers or tanks the size of small cities.
* Warhammer, serving the Chaos Gods will inevitably result in receiving various mutations such as horns, unusual skin color, or tentacles. These changes do put strain on their psyche though, and it's not rare for a rising champion to receive too many in quick succession and become a mindless Chaos Spawn.
* Warhammer short story "The Ignorant Armies", the protagonist's journey after his brother and the villain who took him takes him to an area covered by skeletons old and new. He learns that every night, the place becomes a battlefield between various Chaos warriors who must survive there for a month in order to become proper champions for their cause.
* Warhammer sides' spellcasters could be frantically trying to dispel the comet before it pulverized their dueling generals, or wiped out everyone contesting an objective.
* Warhammer: Sigvald the Magnificent, the Champion of Slaanesh, was born of a particularly depraved chieftain who ended up bedding his own sister. Sigvald continued in his father's footsteps until he tried to overthrow him, his excesses bringing him to the attention of Slaanesh, and now merrily rapes, tortures, and burns his way through the world at the head of his army.
* Warhammer: Skaven leaders usually kill the messengers — the always kill the messengers of bad news, but sometimes also off ones bearing good news to keep their rivals from hearing it as well.
* Warhammer: Skaven Packmasters breed and command swarms of rats, and their Grey Seers even have spells that summon them.
* Warhammer's nickname during the character-centric 4th and 5th Editions.
* Warhammer's ogre "butchers" who are both the tribal cooks and shamans, and often carry a stock of body parts (of various edibility) with them as snacks and spell components. One butcher special character drags along an enormous cauldron, which radiates an increasingly powerful buff as it is filled with enemy bodies.
* Warhammer, so they moved it back. Unfortunately the Dwarfish Empire was based there at the time.
* Warhammer, so they would (and do) readily and happily raze entire cities and kill thousands of innocent people if they felt slighted in even the tiniest way, but will never abide or forgive the death of a single Dwarf.
* Warhammer specifically, one of the basic forms of magic available to the majority of magic uses in the setting is the Lore of Fire that specialises in the use of pyromancy.
* Warhammer's Storm of Chaos campaign was "Halting the Tide," based around an Empire-Kislev alliance battling against the overwhelming Chaos hordes of Archaon, Lord of the End Times. The attackers outnumber the defenders two to one, but the defenders are grimly determined to tie up the attackers for as long as possible, and are immune to Panic during the battle. Another twist is that victory depends upon how many units the Defender kills, so if the Attacker completely wipes out the Defenders but loses half of his own forces in the process, it's still a loss for him.
* Warhammer's two "neutral" armies (the other being Ogre Kingdoms), and while many are given to acts of cruelty, tyranny, despotism and brutality they are really just behaving like the ancient absolute rulers they were in life. Sure, they'll hound

you to the ends of the earth and butcher you without mercy to recover their stolen treasures, but any Dwarf worth his beard will do that too, and nobody calls them irrecoverably evil.
* Warhammer's Tyrion and Teclis have always been the only direct descendants of the first High Elf Phoenix King—Aenarion the Defender—from his first marriage to Astarielle over seven thousand years ago, and hence the direct inheritors of his bloodline and destiny. However, this trope was averted in the 7th edition High Elf army book (and the Tyrion and Teclis trilogy written afterwards) when it became clear that they're only the last surviving descendants, and the rest of Aenarion's heirs were systematically murdered by a Greater Daemon out for revenge against the bloodline of the elf who slew it. Given the extreme longevity and slow reproduction of elves, it helps that there have only been a handful of successive generations born during that time.
* Warhammer supplement naturally expands on this even further, with rules for scaling ladders, siege towers, mantlets, battering rams, and boiling oil (or, for certain armies, cauldrons of boiling blood). Each faction also tends to have its own characterful or fantastic siege units:
* Warhammer supplement, possess a couple of region variants with different color schemes and special abilities in stead of the basic merwyrm's venomous attacks — white-scaled pagowyrms native to arctic seas and possessing auras of bone-chilling cold and black sciowyrms native to abyssal depths and enshrouded by auras of crushing darkness — but otherwise identical to the base creature.
* Warhammer's version of Islam is practiced by the nation of Araby, though other than being described as a monotheistic faith manifested by its chosen prophets, not much else is known about it. The equivalent of the Crusades happened when a daemon of Tzeentch tricked an Arabyan sultan into attacking the Empire, but little else is known about it.
* Warhammer's version of the Varangian Guard are Hungs and Norscans employed by rich citizens.
* Warhammer take this to truly extreme levels, cobbling together anything from a chainsword to a building-sized gargant out of scrap metal and interesting shiny things.
* Warhammer that are released when they land. Even when they use teleportation, enough flies are carried with them to blot out the sun. The Beast of Nurgle, a disgusting aberration that looks like a monstrous slug that acts like an over-excited and love-filled puppy, becomes the horrible Rot Fly when it grow disillusioned, saddened, spiteful, and all around bitchy it is returned to Nurgle's Gardens and lies in the muck to mope. Nurgle's fattest flies cocoon it and it metamorphoses into the embodiment of hatred against life's unfairness. The Plaguebearers that ride them push them into greater heights of revenge.
* Warhammer that behemoth, he maybe can tie it up so it doesn't damage anything important while the rest his army crushes your force. For example, one solution to facing a dragon in LotR is to feed it a mook every turn; sure, the mook is doomed, but the dragon is likely impotent to do anything else and cost so many points the rest of your army can sweep the enemy with little trouble. Likewise, if a new player insists on a huge squad of assault terminators you can't kill, skating around them will mean that incredibly expensive unit does too little damage to justify its massive cost. Boring but practical wins cutthroat games.
* Warhammer that can burn the very soul of the victim, mutate them beyond all recognition, or anything in between.
* Warhammer that leaving him alive would do far more damage to the Skaven than killing him on the spot.
* Warhammer that second test then they'll continue to leg it off the table.
* Warhammer that's powered by two colossal bound djinn — a wind spirit to inflate the sails and a fire spirit to power the engines.
* Warhammer that the density of conversations and jokes has doubled if not tripled from the first game (which had more gloomy and loreful exchanges thrown in).
* Warhammer the Arc Fatigue days. Based on the example the End Times, not everyone is sure they want 40k to advance anymore.

* Warhammer: The battle cry of Ruglud's Armored Orcs runs "Gobbos fer dinner! Gobbos fer tea! Gobbos when u want 'em! Gobbos fer me!", but the Orcs will substitute other races' names (for example, "umies", "stunties" or "ratsies") to match their current foe.
* Warhammer: The Blood Dragons' mastery of martial combat comes with a degree of pride and disdain for humanity notable even among vampires. Blood Dragons view the majority of the human species as nothing more than pathetic vermin fit for little more than testing a new blade's edge, and make no attempt at hiding this attitude.
* Warhammer: The Blood Dragon vampires make heavy use of dragon imagery in their heraldry and armor, in order to remind themselves of their founder's slaying of a dragon and of their own ultimate goal to do the same.
* Warhammer, the Border Principalities have known for their instability and consequently any currency issued by them is viewed as worthless.
* Warhammer: The Changeling, a powerful Daemonic Herald of the Chaos God of Magic, is able to alter its form at will, using this ability to advance the plots of its nefarious master and generally spread as much chaos and misdirection as possible. It is said that the Changeling has taken on so many forms over the course of its existence that it has forgotten its original form.
* Warhammer: The Chaos gods are usually agreed to be the worst of Mankind's enemies. Unfortunately, since they are basically made of emotion (rage, love, desire, and hope), humanity keeps fueling them even when defeating their agents in the material plane.
* Warhammer the context is a bit more traditional. The ork painboy (medic) "Mad" Dok Grotsnik once had to be revived with a charge from an electrified "grot prod" (a tool used to herd unwilling gretchin underlings into battle) when his barely-competent gretchin orderlies were stitching him back together after an unfortunate "accident" arranged by his enemies. Suffice to say he wasn't known as "Mad" Dok Grotsnik before the procedure. Given the absurdly robust, partially fungal nature of the ork body, being easily revived is actually fairly tame for them.
* Warhammer the cut as full-fledged Battle Wizards. Other factions may have a more or less strictly regimented relationship between their wizards and their armed forces, but every faction (again, excluding Dwarfs) have access to them. Most Lores have spells that allow wizards to fill several of the roles above, depending on which spells they have access to.
* Warhammer. The design team created the Fimir, a bunch of hideous, swamp-dwelling, reptilian, cyclopean monsters that reproduced by raping abducted young women, a deliberate hodgepodge of the most despicable and lamest traits possible. They largely disappeared when the next edition (4th) was released, relegated to brief allusions in the fluff.
* Warhammer, the Dogs of War have been shelved for being game breakers. But Kislev and other human nations barely get mentioned anymore to the point GW acts as if they don't exist.
* Warhammer - the Dwarfs refuse to use anything that hasn't been tested for at least two hundred years, the Chaos Dwarfs are very few in number and prefer to rely on slave labour, and the Skaven are fractured by constant infighting and rarely ever unite long enough to threaten anybody else. The Empire meanwhile are building new stuff every day.
* Warhammer: The End Times and wanted to him defeat Malekith. Quite tellingly even with the plot bending over backwords to make Tyrion look bad, his atrocities still weren't anywhere close to those of Malekith.
* Warhammer: The End Times at the point of disaster for decades all going off at once. You can guess the results from the title.
* Warhammer: The End Times, loses all will to fight and just wanders off into the distance, never to be seen again before the world is destroyed.
* Warhammer: The End Times novels, even went into detail on why he would be found unworthy - for example, the part where he conspired to undermine the former Phoenix King for years, then murdered him, then started a fight at the election to determine the new Phoenix King because the other lords weren't falling in line fast enough. Then, in the End Times, it suddenly turned out that he was actually

Asuryan's choice all along, and the bit where he was only near the Flame to begin with because he murdered the last guy to have the job he wanted was quietly ignored.
* Warhammer: The End Times sequel: we've seen what Chaos can do, now mankind fights to keep it from happening again.
* Warhammer The End Times: Vermintide. Later, despite having months to rebuild its defenses and the Skaven Clan Fester having incurred quintuple-digit casualties against the U5, the city then falls almost immediately when they're absent. Saltzpyre has a line lampshading this in the Horn of Magnus mission, when the team arrives to find their supposed reinforcements already dead.
* Warhammer The End Times: Vermintide will usually deploy a smoke bomb and take off if they find themselves observed with no way to easily strike at the players, hiding and seeking another chance to ambush them.
* Warhammer, the entire faction of Vampire Counts is very much based on this trope.
* Warhammer: The Everqueen of Ulthuan has traditionally been protected by her all-female elite cadre of handmaidens called the Maiden Guard, recruited from the most skilled and accomplished female members of the citizen militias of Avelorn, where the Everqueen rules.
* Warhammer the Forest Goblins frequently use giant spiders the size of St. Bernards as cavalry, as well as some the size of moving vans for their shamans and bosses to ride to war on. They also have Arachnarok Spiders, which carry catapults on their backs and are so big Games Workshop had to come up with a custom base for the model.
* Warhammer - the general procedure goes: berserkers attack weak troops -> weak troops run away -> berserkers follow into the middle of a large number of heavily armed troops -> meat grinder.
* Warhammer, the goblin armies can use giant spiders, including the massive Arachnorok spider which is bigger than some warmachines.
* Warhammer the Great Necromancer Nagash did this after his body was chopped into pieces, burned to ashes, taken in several containers far away from each other, and scattered to the winds. The process took over a thousand years though, and his hand, which wasn't burned because it crawled away after being severed, never returned to him.
* Warhammer: The great white lions of Chrace are unflinchingly loyal to their pride, putting their bonds to their kin above everything else, and will go to immense lengths to bring vengeance to those who harm their pride-mates. This is something a wizard seeking to magically bind them has to keep in mind. Once the magic inevitably wears off, the lions are more than capable of tearing a wizard limb from limb to avenge companions who died in their service, but if the wizard manages to be accepted into the pride then the lions will remain at their side long after the spells fail and fight to the death in their defense.
* Warhammer the jungles of Lustria were magically altered by the Lizardmen to slow the advance of Chaos across the continent. Effectively every living thing in the jungles exists to kill trespassers. Plants are carnivorous, stinging insects can pierce armor, blood-sucking flies can turn a human to a husk in seconds, carnosaurs stalk the jungles as the apex predator because they hunted dragons to extinction, every pond and river hides some murderous horror. Oh, and then there are the Lizardmen themselves who have ancient Slann mages that wield tremendous power and Saurus Old-Bloods with millennia of combat experience.
* Warhammer: The Lizardmen worship the Old Ones, who created the world and try to carry out their plan for the destruction of Chaos.
* Warhammer. Then some of the later campaign newsletters came out, with references to an Orc Warboss falling off a bridge on a boar and squig-firing cannon... And the campaign ended up with the Orcs ultimately winning.
* Warhammer, the Ogre Kingdoms special character Greasus Gooldtooth has three special rules dedicated to just how much money he has. These include one that has nearby friendly units fight all the harder in hopes of getting a higher pay and one that allows him to bribe enemy units into not fighting for a turn.
* Warhammer - The ogre Overtyrant Greasus Goldtooth has a sceptre bigger than a

man.
* Warhammer, the others mostly fit under this. The most famous are of course Gotrek and Felix, but there's also Kroq-Gar and Grymloq, Karl Franz and Deathclaw, Eltharion and Stormwing, and Louen and Bequis.
* Warhammer. There are actually a few good guys. Evil races include Daemons, Beastmen, Orcs, Goblins, Undead, Skaven, Dark Elves, and Ogres. Also, one of the few times in which the "chaotic" part of Always Chaotic Evil plays a part, as every evil race can be traced back to mutations caused by Chaos, which is a powerful force in the Warhammer world.
* Warhammer: There are lots of examples, but the term "Black Knight" itself is used for the undead Wight cavalry of the Vampire Counts army (who probably fitted the classic version of the trope more when they were alive). Beyond that, there are:
* Warhammer there are those that use it. Witch elves and sorceresses of the dark elves wear stripperiffic "clothes".
* Warhammer there is precious little angst over this as they are both bloodthirsty monsters of the old school, even before Isabella became a vampire.
* Warhammer There's also a Bretonian Cataclysm spell that can do the same thing.
* Warhammer: The setting has no shortage of these whatsoever — generally, any and all necromancers and Chaos, dark elf or vampire sorcerers can be counted on to be unscrupulous, malicious and power-hungry maniacs with no compunction about performing horrific arcane experiments, raising armies of undead and gibbering abominations, and generally making life miserable for everyone else.
* Warhammer, the Skaven are seen as very analogous to the Third Reich, what with their super technology, horrifying experiments, rune iconography (one of the more commonly used ones is a swastika-styled triskelion), disregard for human life, plan to conquer the world by killing everyone worthless (i.e. everyone, period) and the fact they have a unit called "Storm Vermin".
* Warhammer: The Skaven take this up to thirteen with the Council of Thirteen.
* Warhammer, the Sky-Titans were once a glorious civilisation who lorded over a floating kingdom over the Mountains of Mourn to the east of the Old World. A war with the invading Ogres left the Sky-titans decimated and overthrown, fleeing into the world wherever they could find refuge. Now their descendants, the Giants, are formed into tribes of primitive, inbred degenerates who roam the world fighting for anyone who can provide them with food and booze, usually the Beastmen, Greenskins or the Ogres who destroyed their people.
* Warhammer, the Slaans - the mage-priests of the Lizardmen - sleep most of the time, and when they wake up, they speak in very short sentences without any context. As a result, unpleasant things have happened. When the High Elves arrived in Lustria, they were brought before a Slaan who said, "They should not be here". His Saurus guards read this as "Destroy all High Elves" and killed them. Whether he actually meant "Send them home" will never be known.
* Warhammer, the strategy game based off it, would be what eventually put them on the map.
* Warhammer: The tale of the dishonor of the Ironfists. The family had suffered a dishonor so severe it required one member of the family to swear the Slayer Oath and seek death in battle. Ungrim Ironfist took the oath so his son Garagrim wouldn't have to. Garagrim Ironfist took the oath so his father Ungrim wouldn't have to. Garagrim eventually found the honorable death he sought, thus discharging the family's debt of honor and freeing his father from his Slayer Oath. However, his death drove Ungrim mad with grief and caused him to take the Slayer Oath in order to shed the dishonor of sacrificing his son to save his own skin, rendering Garagrim's sacrifice completely moot.
* Warhammer: The Tileans are already notable for their skill with the crossbow, but the Marksmen of Miragliano are truly something special. Being able to put a bolt through the center of a coin from 300 paces is considered the bare minimum of skill needed to get into the regiment to begin with, and constant training afterwards results in some of the most ludicrously accurate long-range marksmen in the Old World.
* Warhammer: The Tomb Kings are former rulers of Nehekhara who, as their lives

neared their ends, had themselves put through a ritual that would eventually (after centuries) resurrect them in immaculate, undying bodies of living gold. Then Nagash showed up and ruined everything. Thanks to his interference, the Tomb Kings were woken up centuries ahead of schedule, trapped in their withered corpses.
* Warhammer: The Tomb kings can summon giant undead scorpions from underground.
* Warhammer, the writers released a Morathi themed book that attempted to retcon even that into being a lie by Teclis to get Malekith on their side, signifiying that the writers viewed it as a mistake on their part.
* Warhammer, they eventually develop a cocoon out of sheer resentfulness — in which they gradually metamorphose into the forms of giant insects so that they can take their revenge on the mortal realm.
* Warhammer. They're temperamental and barely-understood contraptions, but you can imagine their effectiveness in an otherwise late Medieval/Renaissance setting.
* Warhammer, this happens occasionally in The Empire, when an Emperor dies or retires the Elector Counts tend to disagree who would be the next. There was once the time of the Three Emperors, where three Counts decree themselves as Emperor of the Empire that it's a miracle that the provinces didn't fall into all-out civil war over who is the rightful Emperor.
* Warhammer, this is likely true. Given that Malekith is a 4th degree burn victim permanently encased in full body armor, not so much. That being said, incest (no matter the exact kind) isn't unheard of in Druchi society.
* Warhammer: This is perhaps the best way to describe the relations between the cults of Sigmar and Ulric. The cult of Ulric considers itself to be the "senior service", loves to point out that during his life as a human Sigmar was an Ulric-worshipper, and resents that Sigmar has supplanted Ulric as the god of choice in large swathes of the Empire. Sigmarites, on the other hand, see it as only proper that the Empire's founder is venerated above other gods by the citizens of the Empire, consider the level of devotion required by Ulric's worshippers to be disproportionate to the gifts Ulric gives (they may have a point) and considers the cult of Ulric to be sore losers. The rivalry is compounded by the fact that the Ar-Ulric only has one vote in the Imperial elections and the Grand Theogonist of Sigmar has three (technically the Grand Theogonist and the two Arch-Lectors have one each, but the Arch-Lectors always vote the way the Grand Theogonist, their superior, tells them to). Both cults are dedicated to serving the Empire and its people, but if they get the chance to get one over on the other in the process, they will take it.
* Warhammer this is the goal of Nagash the Great Necromancer. He wants to kill everyone and raise them as his undead servants.
* Warhammer. This managed to rally the remaining defenders, who held fast for another three months until an allied army arrived to break the siege.
* Warhammer this means that several of them are capable to take down large monsters and demons.
* Warhammer (though they're not complete opposites, that would be Slaanesh, the Chaos god(dess) of desire, who Khorne sees as even more of a cowardly effeminate weakling). Note that Khorne has no problem with magical wargear or summoning his daemons to fight alongside you, but it's probably unwise to discuss the potential hypocrisy of this.
* Warhammer thrown in for good measure; including things like steam-powered tanks, primitive machine guns, ironclad warships, flamethrowers, and a few other things as well. This can make for some interesting battles in the series.
* Warhammer to, as beastmen and daemons are good at slaughtering and killing but not very good at, say, building boats.
* Warhammer to be poisoned). Dwarfs, High Elves, Empire, Bretonnians, and even Wood Elves don't have any poisoned attacks at all.
* Warhammer, too. He's been working carefully for ~40,000 years and it still doesn't make any damn sense. This is because his "master plans" actually have no purpose — their elements are nonsensical, self-contradictory and — as befitting a Chaos God — utterly chaotic. If he wins then he can't plot anymore and he can't exist without plotting. So planning is part of his nature, but

no-one said his plans have to make sense or actually accomplish anything.
* Warhammer to serve as proxy personifications of the Chaos Gods whenever a given plot requires their presence.
* Warhammer to them; one wonders what they'd do once the Book of Grudges no longer had any unfulfilled grudges within.
* Warhammer to the traditional outfit associated with real life and fictional witch hunters.
* Warhammer tropes really should indicate when they were the case since the game zig-zags many tropes with each edition. Before 8th edition, tanks and similar vehicles were invulnerable to most infantry weapons and generally had to be engaged with anti-vehicle weapons. The rules in most editions also forbade most units from splitting their fire; either the anti-tank squaddie wasted his big gun on the same infantry his unit shot at, or the riflemen wasted their shots on the tank so the anti-tank trooper could target it. As of eighth edition, every attack has some minimal chance to inflict
* Warhammer type is probably the Wyvern, available to Orc warbosses and great shamans.
* Warhammer units in cover are harder to hit, and ranged units may fire in two ranks if they are at a higher elevation than the target.
* Warhammer units, the Regiments of Renown, have names like this: "the Marksmen of Miragliano," "Ruglud's Armored Orcs," "the Bearmen of Ursulo," "Richter Kreugar's Cursed Company," "Menghil's Manflayers," "Long Drong's Pirate Slayers," etc.
* Warhammer universe, are Semi-sentient, with each having its own mind. On one occasion, the mind of a Titan commander is also resident inside the machine, after he dies while still linked up to it.
* Warhammer utilize different types and styles of weaponry in accordance with their culture and personalities. Even the designs of the same types of weapon vary in this way (for example, the spears used by High Elves are thin, elegant, leaf-bladed things with gentle, flowing curves, while their Dark Elf cousins use equally slender but jagged and spiked spears. Human spears tend to be a lot thicker and cruder, and Orc spears thicker and cruder still).
* Warhammer Warhammer. The accepted terms of distinction are "Fantasy" and "40k". You can also call Fantasy "Classic". Also bear in mind, a considerable population plays both.
* Warhammer, wearing a cape made from his victim’s skulls (his tabletop model itself includes over 100 skulls).
* Warhammer, were a giant diseased hulk that had a grinning mouth in its belly.
* Warhammer when Bretonnia, the Empire and Tilea join forces to strike back at the Arabyans and liberate Estalia. Unlike the Crusades, this started when a daemon of Tzeentch manipulated the Sultan into attacking.
* Warhammer when they try to invent something new; they usually join the human guild for a while until they refine their prototype to something more reliable and trustworthy. Dwarfs like to maintain their reputation for machines that run like a Swiss watch.
* Warhammer where a rank and file unit will do exactly this for a leader who is in the same formation.
* Warhammer where many in universe armies might follow the same rule set. In the case of Warhammer and Warhammer 40,000 a number of factions started out life as simple palette swaps, but have developed over the years to get their own models and/or rules. The Space Marine chapters are a good example - originally Blood Angels, Dark Angels, Ultramarines and Space Wolves were just red, dark green, blue and grey versions of the same thing, but now they have their own distinct stylings and rules. Other factions, such as Eldar Craftworlds and Ork Clans, are still just different colour schemes, though each can be characterised somewhat by choice of units taken as well as the livery.
* Warhammer, where the ancient vampire countess Gabrielle is out to destroy her 'child' Adolphus Krieger, with a little (lot) help from everyone's favorite Slayer. Admittedly, Krieger hates her too, and his own 'child' Ulrika Ivansdottir, hates him but is compelled to obey him.

* Warhammer, which, as with Lord of the Rings, is heavily based on real world Europe. The Chaos Wastes to the north are cold and populated by over-the-top Vikings, while the south has deserts that were home to an ancient civilisation with a bit of a mummy obsession. It's clearly shown that there is more world beyond this and that the utmost south is also frozen, it's just that travelling there is too dangerous for much information to reach the Old World.
* Warhammer, which had until then been dominated by historical games, and brought a new generation into the hobby.
* Warhammer, which its Elector Counts are trying to do all the time, and if his enemies surrendered to him, he let them live. Though all the undead he kept around would take some getting used to.
* Warhammer which lets their player bypass the game's taboo for shooting into close combat. Which doesn't seem quite that impressive until you realize they're one of the few armies with ready access to Gatling guns and flamethrowers in the game's medieval setting.
* Warhammer, which still plays Warhammer 3rd Edition rules (published 1987) with appropriate army lists.
* Warhammer which takes elements of Celtic legend and incorporates them into a story where demigod warlords have imprisoned the Earth Mother and taken much of her power for themselves. As a result, the sun is frozen in the sky and the moon burns while plants and animals grow twisted. Humanity itself grows increasingly more mutated and deformed with each succeeding generation, battling and enslaving each other in warring tribes. The Earth Mother seeks a champion to become the Horned God and save her.
* Warhammer: While no proof one way or the other has ever emerged, some in-universe scholars and Ogres speculate that the Yhetees, ferocious, white-furred beasts native to the highest peaks, began as Ogres who adapted to the bitter chill of the Ancient Giant Lands during the Great Migration, over time becoming sub-tribal predators with only the simplest remnants of tool use.
* Warhammer who flayed their victims alive and wore their skins as cloaks.
* Warhammer who loved monster-hunting and great feasts. Then, while he was away, Karak Azul was invaded by a horde of Greenskins led by Gorfang Rotgut, destroyed most of the hold's treasures, and horrifically mutilated and killed many of the inhabitants, including Kazador's only son. Kazador became a shadow of his former self and went almost catatonic with grief, and the only thing that can rouse him is the prospect of killing Greenskins.
* Warhammer whose legend has gotten out of hand, depending on who you ask).
* Warhammer whose only hope for social advancement is to join their lord's army as a bowman, but there is a small "middle class" of merchants, skilled craftsmen and the like. Legally, however, they are non-distinct from their field-grubbing brethren, and all treated by nobles as worth less than the muck under their boots.
* Warhammer who wears the skulls (and the entire skeleton) of vanquished foes, and the Skaven warlord Queek headtaker who, showing courage uncharacteristic for his race, loves single combat and goes to battle with an actual trophy rack on his back.
* Warhammer. Who would be considered people you'd not want to have around by most people who aren't them (and 40K's are considered obnoxious rich assholes by other orks).
* Warhammer will feature more copyright-friendly Highborn Aelfs, Orruks and Duardin, and even basic undead units will be Deathrattlers and Deadwalkers rather than skeletons or zombies.
* Warhammer, with no units being allowed to use ranged attacks upon units in engaged in a melee and risk hitting their allies. However, Blast weapons missing could potentially end up accidentally hitting allied units from scatter moving the targeting circle onto them.
* Warhammer with the minions of Tzeentch, god of fate, and Slaanesh, the god of pleasure, being particularly adept at turning the innocent from the path of righteousness.
* Warhammer women (their reproduction processes are unclear), skaven females are

non-sapient and lizardmen are poorly named as they are in fact genderless life forms created from magical spawning pools.
* Warhammer world. But they keep fighting, out of sheer, stubborn, dwarfish bloody-mindedness. The high elves have a similar situation regarding their dark kin and the forces of Chaos, but are naturally more stuck-up about it. Oddly enough, the human Empire is a bit more optimistic, due to spanking Chaos in a campaign a few years back.
* Warhammer world's equivalent of Africa. Here, you'll find the Badlands; a harsh, barren wasteland filled with various Orc clans constantly warring for supremacy, as well as other vicious predators. Beyond the wastes is a patch of desert once known as Nehekhara, once the first human civilisation, now known as the Land of the Dead and home to the undead remnants of the first human civilisation. And beyond that is pretty much nothing but untamed, unexplored jungle teeming with Orcs and Goblins even more backwards and savage than their northern kin.
* Warhammer world, while still plentifully enmagicked, has lost a lot of it since the olden days because of the elves creating the Vortex on the Isle of the Dead, greatly decreasing magical potency and also preventing daemons from rampaging across the world. Incidentally, this may have caused the dragons themselves to fall asleep as well.
* Warhammer would be a better descriptor, as it causes physical, mental, and spiritual corruption. So, naturally, the city is also teeming with all manner of horrific monsters...
* Warhammer, would easily qualify if he was still around), and others.
* Warhammer yields unpredictable mutations, which in extreme cases can turn the character into a mindless gibbering Chaos Spawn.
* Warhammer, your reserves are delayed, your tanks are stuck in an unfortunate terrain feature - and you have to wing it from there.
* Warhammer zone that he or she is too high a level for, a powerful debuff hits them that, among other things, turns them into a chicken.
* WarHams Crusade. Notable in that viewers can donate money to contribute temporary bonus dice to either the players or the GM to either increase the odds of success, or to make things... complicated, in interesting ways.
* War Has Never Been So Much Fun: It's a war game, but it stars cute, colorful characters and there's no blood.
* War" has two moments that are coloured by real life context that can be connected to the scene:
* Warhawk 2 for the PS1. They did recently revive the franchise on the PS3, though.
* Warhawk (a member of the Justice League in the future time period of
* Warhawk explodes in an impressive fireball. Even if it was from being beaten with a wrench. If left unattended long enough, vehicles will spontaneously explode and respawn.
* Warhawk: In one of the epilogues from the original Playstation game, it is mentioned that one of the pilots, after the events of the game, retired and resorted to selling "I survived the Red Mercury War, and all I got was this lousy t-shirt" t-shirts.
* Warhawk, making them aggressive and lethal, but also slow and hard to resupply. Smoke Jaguar units are devastating early on but exhaust themselves quickly, making them easy to outmaneuver.
* War Hawk: Someone who's really eager to start bombing their country's (real or perceived) enemies.
* War Hawk until the Centauri occupation and events caused him to become more spiritual.
* Warhawk, which can lock on as many times as you want before firing, with the only limit being how many you have. Naturally, this can get extreme.
* "Warhead" killed because he could have been on the Star Destroyer the droids were returning to.
* Warhog, a design with bladed, spinning dome, failed to take Newton's Third Law into account and ended up
* War Horse. By the next scene, there are plenty of riderless horses wandering

about and even more dead ones strewn all over the battlefield.
* War Horse has overtones of this. It's vaguely referenced within the movie.
* War Horse. His wife explains the situation to Albert, his gentle and somewhat simple-minded son, but it doesn't keep him from attempting to enlist in World War One at the first opportunity.
* Warhorse of Esdragon that none of the other Riders can match Valadan, and they have to play some shell-games to keep them in the saddle at all, as they keep exhausting and foundering their mounts trying to keep up.
* Warhorses of Letters: Denial, Following Marengo Around, Sexual Promiscuity and Acceptance. Copenhagen isn't convinced.
* War horses were trained to not be spooked by loud noises. Church bells were often used for this, along with breeding for a - for want of a better word - 'brave' temperament. Police horses are similarly trained and selected to handle noise and similar stresses.
* War Horse, the two horses Joey and Topthorn start out as rivals, but after Joey (Captain Nicholls astride him) defeats Topthorn during a practice run race, they become friends.
* warhound and not a puppy to be teased. The "dialogue" Alistair has with Dog also doesn't seem terribly friendly either.
* warhounds—consistently score in the top 10 (and often top 5) of the most aggressive dog breeds. High maintenance plus an aggressive breed equals a lot of problems. They are described as not an appropriate first dog for anyone.
* War, Inc. has a bizarre ending, in which the main characters escape on a private plane, but in a blink-and-you-miss-it final moment, a missile can be spotted flying toward them. The scene ends before we can see what becomes of them.
* War, Inc., Hauser gets so stressed out at seeing Yonica acting slutty (the infamous scorpion down the pants scene) that he accidentally crushes the vial of cobra venom he was about to pour into Omar Sharif's food.
* War, Inc., some little boys set Hauser's truck on fire. As they run away, one of them flips him off.
* War, Inc., when Hauser is asked what happened to his family, he gets depressed and the lively music stops. He then gets up and adjusts the record player, as the needle had slipped off.
* War, Inc., Yonica's fiance was planning to make one of their honeymoon and then sell the resulting DVDs. Yonica was unaware of this and got really upset when she found out.
* War In Heaven there is subtle supernatural help, which is appropriate as the supernatural danger is more subtle than most stories of this kind.
* War In Hell arc. After his enemy is dispatched by Stonewater using an ice attack on his earthly form, Karnak muses that this is the perfect time to deliver a line like, "Hell's frozen over," but Karnak's always hated those jokes.
* War In Hell as a far more interesting character with a lot of potential that had been squandered.
* War in Middle Earth despite being at the core a strategy game portrays the Nazgul as surprisingly weak. Even right at the beginning of the game just the four hobbits have a good chance of killing a lone Nazgul, should they encounter one.
* War in Season 5, who manages to dump a whole town into armed conflict using no more than illusionary black demon eyes on people.
* War in the Pocket takes 08th MS Team in the sense Mobile suit combat leaves metal husks. With the exception of the Kampfer fight scene, the mechs don't explode cleanly and flaming debris hits the general population with particularly brutal results.
* Wario also gains super speed when he transforms into Wario-Man with his Final Smash. This stacks with the aforementioned Bunny Hood.
* Wario, among other things. In any event, he's able to shrug off anything that happens to him.
* Wario and Waluigi (though more so in their earlier appearances) are still this to Mario and Luigi in
* Wario becomes almost uncontrollable (save for jumping), but can break certain

obstacles.
* Wario has faced scorpion enemies on occasion, typically found in desert areas.
* Wario (informal leader of the Kong Klan of primates) fit the bill, too.
* Wario is surprisingly this as well considering in one game, he was able to create a device that allows him to go in and out of the television at will. He is also shown to create other devices in the
* Wario Land 3, particularly the Golf minigame. Some think the execution, pacing and progression are a downgrade from II, while others still consider it an overall improvement over II and the best game in the series.
* Wario Land 3 that they can use to freeze Wario and send him sliding back across the level.
* Wario Land 3, the treasures can only be used in the cutscenes immediately after they are collected. Thus, treasures like the Ax of Destruction and the The Detonator, despite seeming like the kinds of items that could be used in many different situations, are only used once to open new paths.
* Wario Land 4: Aerodent, the aerial rodent, blows up its own teddy-bear balloon.
* Wario Land 4 being 2D platformers with rather thin plots. The gamebook aspect doesn't work because the choices are almost meaningless, and there's only one ending for each. They're not helpful as guides, either, since they don't go in-depth and you have to work out how to defeat bosses and solve puzzles from first-person recounts. The games are pretty good, but experiencing them through these books is a waste of time.
* Wario Land 4 first boss (complete with punching spiked leaves and flying).
* Wario Land 4 handheld games) appears, although he turns out to be a magically disguised ghost princess/cat being.
* Wario Land 4 is more divisive than the titles before it. This is mainly because it makes Wario able to be killed again, there are fewer transformations he can go into, it makes every level a time-trial mission to escape before it explodes, it becomes mandatory to find every single treasure to beat the game, the level designs go back to the more linear ones of the first two games, and it is much shorter in length than the previous titles.
* Wario Land 4. It resembles a purple Cadillac Eldorado with a decal of Wario's mustache on the hood.
* Wario Land 4's Crescent Moon Village, in both senses of the word (no inhabitants, but plenty of bloodthirsty undead ghosts).
* Wario Land 4 Wario car action figure-like enemies. Oh, the irony of a toy based on Wario driving his car being something that's dangerous enough to kill him in the toy-themed levels. It also had a metal spike on the front (hence how it was so dangerous), could drive through more spikes, and was apparently a pretty good throwing weapon.
* Wario Land 4, with Hotel Horror especially having a freaking ton of them (about four to every door in the hotel).
* Wario Land and onwards certain fit this profile (especially Rudy the Clown and the Shake King)
* Wario Land, and the hungry dead stalk the dark places. Near the end of the game, you get an item that lets you change the time of day on the world map without having to enter a level.
* Wario Land. Burning into a pile of ashes just causes him to regenerate, and most enemy attacks revolve around inconveniencing him.
* Wario Land), but the ultimate 'huh' example of an insane boss design just has to be Cuckoo Condor. It's a flying, psychotic, laser shooting cuckoo clock! Which is the boss of a world based on industry and factories.
* Wario Land (despite being a few thousand year old robot guardian of an ancient civilization, it can still hold up the roof, fire missiles and shoot laser beams at intruders an infinite amount of times).
* Wario Land fandoms, due to their status as collectathon orientated 2D platformers with detailed graphics that first originated on the Game Boy/Game Boy Colour.
* Wario Land games, which take the silliness Up to Eleven with each consecutive installment.

* Wario Land has a small heart equalling 1 heart point, a large heart equals 10.
* Wario Land has switchable stair/ramps that can be used to build up momentum.
* Wario Land has the Black Dog/Big Lips/Big Fist/Black Dragon items, which can be bought for about 20 mini game coins before any boss battle. However, this isn't merely an equippable weapon that's powerful; nope, you just enter the boss battle, and get to watch the item being used to send the boss to literally two health points from death before the battle even begins. And each of them is actually super-effective on a specific boss.
* Wario Land II alarm clock in the castle which proceeds to wake up Wario and distract him from their thievery. The first level is completed upon destroying the clock.
* Wario Land II. All the boss fights against her involve knocking her out of various hovering vehicles that sport various weapons, and one fight sees her remotely controlling a robotic Spear Man.
* Wario Land II had this kind of animation where his feet would appear near his front, cycle to his back and sort of roll behind him looking very much like his body is in front of a wheel with feet stuck on them.
* Wario Land II, he turns into Fat Wario and is able to KO enemies by walking into them, break through certain blocks by jumping on them, and weigh down floating platforms.
* Wario Land II - neglect to wake up at the beginning of the game and the invading pirates throw you out the window and take over your castle, forcing you to reclaim it.
* Wario Land, it's probably because of the health set up being extremely generous towards the player (aka about ten heart points to complete invincibility). Which completely ignores that both series have some quite difficult bonus challenges and secrets.
* Wario Land. Lucky, considering they throw their head as a boomerang to attack.
* Wario Land Note the mermaid, sea serpent and octopus-like creature in various points on the map and the old-fashioned compass (itself something many of these maps also contain).
* Wario Land of places and fighting some extremely weird bosses (Evil cuckoo clock, basketball playing rabbit, what looks like a French duck chef riding a frying pan and randomly attacking the character from the ceiling or the side of the screen, etc.) And with treasure that includes literal metaphors and random items with punny names.
* Wario Land. Okay, it's avoidable, and seems to be more the cloud trying to strike Wario with lightning for some malicious reason, but otherwise fits the trope.
* Wario Land series is exactly this (Snowman Wario). And he turns into a giant snowball seemingly INSTANTLY after standing on any form of slope or slanted ground (and can break certain blocks).
* Wario Land series, Wario can end up becoming one if he gets attacked by a zombie or ghost. While he moves more slowly than usual, he can get past one-way platforms by jumping and decomposing, letting his hat fall through and recomposing afterwards. Cures for this state of undeath are usually exposure to light and water.
* Wario Land Shake Dimension has a few called Venus Guytraps, which eat Wario as well as any enemy that happens to land on one (one mission is actually to feed five enemies to them). There's also Bloomsday/Scumflower, which while it doesn't actually eat Wario as an attack, is pretty much this by how it actually spits out various enemies as attacks.
* Wario Land: Shake It! also has giant boulder chases in Mt Lava Lava and Sneak Peak. The boulders don't actually hurt Wario, he just gets stuck to them and misses out on a ton of secrets along the way, so to get 100% completion you have to outrun them either long enough to get the treasure or somehow jump over the boulder. There are also sections with all these small boulders rolling down a path at certain intervals, which again must be avoided/jumped over.
* Wario Land: Shake It! are little bandana-waring red balls with feet and mouths known as Bandineros. They don't actually do any damage, they just walk about and

bounce off your fat gut, and grabbing them causes them to panic in a way that can cause just a little bit of empathy for them. Also, they come in multiple types - yellow (they jump all about the stage), blue (they inflate and float, making a face that looks suspiciously like that anime "Hey-I'm-cute" face we all know and love (:3, to be exact) all the while), and a lighter blue (they have forks on their head which can actualy harm you, but cause them to get stuck to the cealing or walls when thrown, with struggling included). It seems even the game likes them, as some missions to unlock the music soundtrack require you to get through a stage without killing a single baddie.
* Wario Land: Shake It! arguably does this. You've got the basic settlements shown in the first world and the intro cut scene that the Merfles lived in, then right in the middle of the wild west themed area, you've got Glittertown/Neon City which is basically some Las Vegas equivalent complete with modern technology, electricity and slot machines.
* Wario Land: Shake It! as its boss theme, and a distinct, high-pitched cackle.
* Wario Land: Shake It!. Everything is black at first (except for Wario), then you see the King's eyes, and then the whole room lights up.
* Wario Land: Shake It! features Flipstings, who keep their stingers arched over their backs and are thus immune to jump attacks.
* Wario Land: Shake It! has a similar mechanic. By grabbing enemies and shaking the Wii remote, things will fly around. Garlic, money, or even the armor they're wearing.
* Wario Land: Shake It!, Love literally is in one of the treasures chests in the game, and is actually represented by the word 'love' itself; but the treasure's listed name is merely "Something important." It is assumed that this name comes from Wario's own view of the subject.
* Wario Land: Shake It!, Wario has no qualms with grabbing Queen Merelda and nonchalantly throwing her off-screen (with an audible crash!) so he can get to taking the bottomless coin sack.
* Wario Land: Shake It!, with the globe containing the whole mini universe seen in a museum, stolen by Captain Syrup and sent to Wario (So that she could get Wario to enter, beat the Shake King and bring the Bottomless Coin Purse to the outside world.)
* Wario Land: Shake It!, you can use a Max Fastosity Dasherator for a speed boost, which would give Wario a wheel of feet.
* Wario Land. Since he always comes back together as if nothing happened, it's only a minor inconvenience.
* Wario Land: Super Mario Land 3 Amusingly, you can just walk right out of the battlefield through a convienently-placed door.
* Wario Land that was just a red boxing glove on a spring, and that just knocked him off a ledge or the like.
* Wario Land. The former shoot some kind of ectoplasm that turns Wario into a zombie, the latter actually use their head as a boomerang, and reassemble if destroyed with the head intact.
* Wario Land, there are two levels in Parsley Woods taking place in/on a train. Falling onto the rails while the train is in motion is instant death.
* Wario Land to hurt himself with the various obstacles and enemies in order to solve puzzles.
* Wario Land used the exhaust flames of his race car as an attack against Wario if Wario came too close (in the second stage of the battle, he actually lowered his car to the ground to burn Wario with the flames if Wario tried to go past him).
* Wario: Master of Disguise. Although the only thing it's shown to do is build robots to try and kill Wario.
* Wario: Master of Disguise named Carpaccio. His company's slogan is "We're hard at work watching your back... That way it's easier to pick your pocket!"
* Wario plays the trope even straighter if you use the bike while he's transformed into Wario-Man, as it moves about four times as fast (But causes a proportionally higher amount of damage).
* Wario precedes his over-the-top badass persona. Waluigi has a distinguished

pointy moustache as well.
* Wario series. Pretty much all of them based on the same 'How fun but completely and utterly crazy can the designers make these games?' formula.
* Wario series that have developed enough of their own identity to be considered franchises in their own right.
* Wario's money-grubbing behaviour, habit of running his video game company without paying his workers, and his generally chaotic and freedom-loving personality has led to
* Wario spinoff games tend to have inactive fandoms compared to the main game and RPG spinoffs.
* Wario's Woods released for both NES and SNES, with the latter also having a Game Boy release.
* WarioWare, also has varying art styles throughout its many minigames.
* WarioWare appearing as the toy shop clerk in 9-Volt's stage. His face isn't shown until you beat the stage in the story. The gag credits also lists Iwata as the shop clerk.
* WarioWare are the biggest Nintendo fanboys, making Nintendo microgames and owning everything Nintendo worked on. And 9-volt was working for Wario until DIY for unknown reasons and 18-volt still works for him.
* WarioWare, as the complexity of the editor and low-quality prebuilt games made it difficult for it to appeal to the series' usual audience.
* WarioWare came at the end of the 3DS's lifetime as the final (non-remake/sequel) first-party game, it was instead a big celebration of it and made sure to utilize all of its controls. One minigame and a few of the prizes one can win include every 3DS from conception to 2018.
* Warioware DIY has Orbulon's boss stage, a slider puzzle that comes in two versions. Both require multiple moves to complete under a rather strict time limit, making it the most complex boss in the game.
* WarioWare D.I.Y. has the Record tutorial, with Penny Crygor having already made a verse for the Record Class song. However, when you press the play button, it is off, meaning that if that is to go by, Penny is awful at composing.
* WarioWare, doing this to enter 9-Volt's room. It's so quick, it can catch the player off guard if they are not prepared for this.
* WarioWare for Ashley's theme he saw that interpreted one part as "Ear! Shut up!"
* WarioWare for Jimmy T., they have nearly the same storyline in their stages. Jimmy P. has a tan, though, causing an anonymous flyer on the town message board to say that Jimmy T. "Must have gotten some sun" and "Looks like a different person!"
* WarioWare game that came out three months AFTER Touched unlocked a video in Touched.
* WarioWare Gold, clinging onto his arm at the end of his level and Cricket just sees her as a lost child.
* WarioWare Gold has you help a young man and woman reunite with each other as they run across a meadow. If you screw up, they'll trip and fall.
* WarioWare Gold, Orbulon does this in his stage (albeit with pigs instead of cattle) in order to have them processed into burgers at the local fast food joint.
* WarioWare Gold, something rarely seen in a Nintendo game, which was another major hook that won over new fans.
* WarioWare Gold, the microgame hosts have special responses for different circumstances: clearing 15 microgames in a row with no mistakes, clearing a microgame at the last second, failing a microgame three times in a row, failing a microgame by not doing anything, etc..
* WarioWare Gold, thinking that because they're called "Hamburgers" they're made from ham. After you beat his games, he returns to the burger place to try to get them to take the pigs, but the cashier promptly denies him, stating he couldn't even cook them if he wanted, as he isn't allowed to work the grill yet. Orbulon sheepishly apologizes and goes to return the pigs.
* WarioWare has a microgame based around this concept called "No Love for You", where the player has to pluck all the petals off of a flower within the given time limit. On the first level of difficulty, the flower is replaced with a four-leaf

clover.
* WarioWare has a microgame called "Power Line Pigeons" where you have to avoid getting pooped on by a flock of pigeons.
* WarioWare has an unlockable telephone that you can dial. Once you get it, you may be awarded phone numbers every now and then to call — but all of them have only four digits.
* WarioWare has a set of songs from Orbulon, which have an alien\futuristic theme. Many are like current video game music, just done in weird time signatures and\or more sparsely.
* WarioWare, has you passing a drink to the patron by physically tilting the bar itself.
* WarioWare) her age isn't unstated in Japan, where she sounds more like a child (but still vague enough that you accept that she's a young teen). Overall, her design is so vague that it's kind of hard to tell what age the character is outside of "looks fairly young".
* WarioWare himself, and even then it's mostly because he's taking advantage of his friends' efforts.
* WarioWare in America and Australia. This is a problem in itself, since the latter game obviously serves as 18-Volt's real introduction in the series (Which is part of the reason why he says "Word!" a lot (except in the game's manual).
* WarioWare, Inc.: Mega Microgame$!, the life counter consists of four Alien Bunnies trying to get Orbulon to their spaceship. In the end, when Orbulon plans to take over the ship, an Alien Bunny replies "Shucks!" and drops Orbulon back onto the Oinker. The default amount is four. But, were you to lose a life and then clear the stage for the first time, then the Alien Bunny who pulls the switch is the one closest to it.
* Warioware Inc. move that is spammed. Unlike the other level up boss stages, which are optional, it must be completed to clear Remix 2.
* WarioWare involves yanking a tablecloth without knocking over the settings.
* WarioWare is a treasure hunter who's earned his wealth battling beasties and saving the world.
* WarioWare is Wario parodying a Mario catchphrase: "It's-a-Wii, Wario!"
* WarioWare, Joe is voiced by the series' character designer Ko Takeuchi.
* WarioWare, one minigame has two cowboys in a quick-draw contest. The winner shoots the opponent's pants down.
* WarioWare patterns of projectiles to dodge and an end boss that has three separate pieces shooting things at you.
* WarioWare plays with this via a feature in which players could dub over the game's cutscenes, creating their own gag dubs.
* WarioWare series can be loosely considered mini-game collections, but it does it in such an unusual way (games are typically about 4 seconds long, must be done in quick succession, are presented in random order, and the goal is to survive a predetermined number of them before failing four times), and has an emphasis on single-player rather than multiplayer, that gamers and critics alike have largely given up trying to classify it at all.
* WarioWare series for the mini games, where even ignoring the deliberate retro style choices in 9-Volt (and 18-Volt)'s microgames, the games seem to range for sprite to cartoon to semi photo realistic style on a per game basis. The music changes about as frequently as well.
* WarioWare series, had his plan stopped when he crash landed in Diamond City. He's become quite enamoured with Earth culture in spite of this, if a little airheaded.
* WarioWare series have shorter timers than regular ones, so you'll have to react fast or lose a life.
* WarioWare series is built around this trope, throwing rapid-fire 5-second minigames with different controls and gameplay styles at the player (though fortunately the rules are always easy enough to be described in one or two words.)
* WarioWare series, take this to such a blatant extreme that it starts making sense again by having the gameplay and the story literally have nothing to do with each other.

* WarioWare series. The most emotion she shows outside of her theme tune is a tiny smile at successfully turning a plant into a giant monster.
* WarioWare, she's also been a sports reporter and interviewer. Not to mention that she works as a games developer for Wario throughout. What makes all of this especially weird is that she's listed as a high school student, and all these jobs are part-time. Her boss, Joe, is usually seen working alongside her, so it's most likely that she follows him when he decides to change careers.
* WarioWare: Smooth Moves, a football player works up the courage to admit his love to Mona (who passes by him... twice) only to explode on a stray cheerleader.
* WarioWare: Smooth Moves has Young Cricket cut in line at a dumpling stand by dashing across the heads of the generic silhouette patrons. Once he realizes how upset they were, he apologizes and dashes back across their heads so he can wait at the back of the line.
* WarioWare, the game has been released standalone as a downloadable purchase from said channel (and yes, it counts because in story, the game was the one that actually inspired Wario to start the WarioWare Inc. company in the first game).
* WarioWare: Touched!, when Wario got a cold, he decided to eat garlic, his favorite food. Garlic is antiseptic and antiviral and therefore used in treating colds, which would explain why Wario never got a cold until that time.
* WarioWare: Twisted! freely admits their pizzas are sub-par in their theme song.
* Warioware Twisted. You need to outrun a boulder and jump over holes, by violently shaking the GBA, which makes it hard to see the holes.
* WarioWare version of the microgame "Rocky Reunion", there's a chance that a level might have the lovers very old instead.
* WarioWare was rated E10+, but that had some slightly edgier microgames that bumped up the rating.
* WarioWare, where after being warned to not eat any sweets, after some dental surgery, he does just that, immediately gets all teeth damaged, apparently has a seizure, flies about fifty feet into the air, smashes through the dentist's roof, and lands in the chair again.
* WarioWare, where it was arranged as a big band tune. Although Japanese Ashley's singing is still pretty creepy. Ironically, the original Japanese lyrics boil down to "Ashley is awesome. Isn't Ashley awesome? She's a little bored and wants friends, though. But she's awesome."
* WarioWare where the names and appearances of the characters are available on trading cards.
* WarioWare where the player must use the Wii's motion controls to grab the woman falling off a skyscraper, into a crocodile pit or out an airplane depending on the difficulty.
* WarioWare. With Fronk's nudging, 9-Volt finds he can answer his math homework questions easily by rewording them as RPG problems (for example: If you have 100 health and you get hit for 56 damage, how much health do you have left?)
* WarioWare, with the number of wires to cut going up per difficulty level. The color (red, blue or yellow) to be cut varies and you are always told which one to cut.
* WarioWare, you feed a bomb to Wario-Man to change him back to Wario (to access Wario's levels).
* WarioWare: You play as the supervising monk and must do a quick slapping motion with the Wii Remote whenever he passes by a monk nodding off or not paying attention to put them back in line.
* Wario, when he gets slammed by a massive hammer, turns into one of these; it gives him super bouncing powers.
* Wario, who has raspy voice, stinky breath fat belly and zig-zagged mustache, has several girlfriends, who are more beautiful than him - Princess Shokora, Captain Syrup (for
* Wario), with Dedede smugly floating through space afterwards. That is a new peak in humiliating deaths.
* Wario World bosses is named one of these, but in reality it's more like an antlion with scythe-hands. It still tunnels through the sandpit it's found in at

high speed.
* Wario World), both of which missed out of getting better than good reviews from some professional video game critics (they thought the games ended too quickly).
* Wario World does this a lot. There's a few unique enemies, but generally there's about four or five standard enemy types, and each world just changes the theme of them. You've got Magons, which then get reused as Skeletal Magons, Clowns, Snowmen, Wolves, Puppet Magons and Mummy Magons. You've got Cractyls which come as Bone Cractyls, Pigeons, Snow Bombers, Hawks, Masked Crows and Mummy Hawks. And the same for another four or so types of enemies.
* Wario World flies into Wario's mouth if he looks at him while his eyes are red.
* Wario World has Big Scorpers, which attack by lashing with their stingers.
* Wario World has enemies that are skeletal versions of the enemies from the first two levels.
* Wario World that is called the Terrible Portrait. It's literally a living painting that shoots fire, ice and boulders at Wario, and takes the appearance of three photo frames with a face in the middle one.
* Wario World, the 8 treasure chests and their corresponding buttons are Colour-Coded for Your Convenience. The 5 colors for the Spritelings also count.
* Wario World to quickly move around the two halves of a wrecked ship that serve as his battle arena.
* War Is Glorious horde, and may find something beautiful in the order and disciplined involved in the military, and a common enemy giving a single purpose for people to unite behind.
* War Is Glorious: War is an exciting adventure where patriotic men can prove their bravery and heroism.
* War Is Glorious war is unpleasant, from personal experience, but would go back and fight anyways.
* War Is Hell and his first priority is his family, but Gabriel just sees it as cowardice and joins against his father's wishes.
* War Is Hell) angst about it very much. The rewrite has more angst though, and this trope is somewhat justified considering Sonic's heroic nature.
* War Is Hell, but it makes a point to commend the courage of the singer's comrades, who stood and gave their lives for that worthless victory.
* War Is Hell comrade, he buries his face in his hands from sheer embarassment that he at one point thought it was a good idea.
* War Is Hell. Given they are entirely motivated by expressing their hatred and bottomless contempt for life.
* War Is Hell has been in the grips of a genocidal civil war between the Farawi and the Dellabona-Prati tribes, that started because the Farawi lived on the apartment above the Dellabona-Prati and walked around in clogs all the time, and some of the individual atrocities in the conflict are sparked by other violations of the condo regulations.
* War Is Hell. Instead of having wars depicting heroes improving themselves in positive ways, this trope depicts wars as a nightmarish land where people are traumatized in different ways.
* War Is Hell plot gains extra menace if the other guys you're trying not to pick a fight with are both unpleasant and undefeatable.
* War Is Hell. Pure, unadulterated contempt for life is all that motivates them and war is the ultimate way for them to express that hatred.
* War Is Hell: The story focuses on the downsides of warfare, such as countless people getting killed and the soldiers fighting in the war being traumatized by the bloodshed they had to endure.
* War Is Hell: Violent conflict between opposing armed forces will inevitably result in lots of people (soldiers and civilians alike) dying gruesomely, while the survivors may be badly injured or mentally traumatized for the rest of their lives.
* War Is Hell: Warfare and violence are inherently emotionally-distressful experiences for most people.
* War Is Hell: War is nothing but a hideous display of bloodshed, cruelty, and death.

* War Is The H-Word. After finding that out he starts a game of "Make Bender happy or he blows up the planet!".
* War Is the H-Word, and he obliges by wrapping one around his head. A few seconds later, President Nixon's head (carried by Kif) comes into the room and yells at Brannigan to cover himself. Instead, Zapp has Kif raise Nixon's head up higher.
* War is the H-Word as Zapp is to him after Fry has the misfortune of being demoted to his assistant. Years of pent up frustration at Zapp are no doubt being released since he has someone to pick on himself.
* War Is The H-Word". Indeed, any episode centered on Zapp Brannigan will have some elements of this.
* War Is the H-Word, Zapp Brannigan is strangely attracted to "him" and, in the end, after fighting Lee, losing, and finding out who "he" really is, proclaims that he's never been so happy to have been beaten up by a woman.
* warjacks found throughout the setting are nowhere near as powerful and impressive as the Colossi the Iron Kingdoms fielded in the war against the Orgoth, but far more flexible, less resource-intensive, and can be used for non-combat purposes in a pinch.
* Warlight, a free-to-play indie Risk-like, spreading can look like this.
* Warlight is a Risk-like free multiplayer indie game, yet players often create diplomatic games, called diplos, that run on previously agreed upon mechanics to start scenarios. The restrictions range from simple (declare war before attacking) to very complex (a whole ruleset with predefined characters/countries designed for roleplaying).
* warlike tribes among humans than like lions. They have a sense of tribal cohesion, hierarchy, a stern honor code, and so on. Canon actually says right out that they have a lot in common with humans.
* Warlock. After the warlock has been taken care off by a friendly housekeeper he notices that the man's ring actually has magical properties. When the man explains that he can't get it off, the warlock simply hacks off the finger with a kitchen knife and murders the guy.
* Warlock, again due to the same corporate restructuring happening at New World. Instead, the U.S. distribution rights were sold to Trimark and got a theatrical release there in January 1991.
* Warlock and she asks for a name, the Warlock replies "he has many names". When she says that she only needs one, he deliberately gives her one of the Devil's more esoteric names.
* Warlock: At one point, Kassandra is hunting the Warlock through a train yard, driving nails into his footprints to slow him down. The Warlock then holds a board against his feet to protect himself. At this point, Kassandra quickly notices that he's not screaming anymore, but also notices an interesting set of prints where the Warlock not only sat down, but rested his head against a pile of dirt. Kassandra gets an inquisitive look on her face and drives a nail into the latter. Turns out that ALL of a warlock's body-prints have that weakness.
* Warlock considers Satan his father, and conjures him in a human vessel to receive further orders.
* Warlock does in the movie of the same name is bite some poor shmuck's tongue off and make an omelet of it.
* Warlock hero only three or four days to find and defeat the Warlock before she dies of old age.
* Warlock. However, she managed to reverse the spell and restore her youth.
* Warlock III: The End of Innocence: An old lady tries to warn Kris as she's driving up to the warlock's manor. Kris ignores her, thinking she's just a kook.
* Warlock III: The End of Innocence, as he holds the protagonists in his cupped hands.
* Warlock III: The End of Innocence: Jerry can hear Kris and Michael going at it in the adjacent dorm room. He looks sad rather than annoyed, hinting at his feelings for her.
* Warlock III: The End of Innocence: Jerry is in love with Kris, whom he's known for years, but she already has a boyfriend (Michael). The Warlock promises him

Kris' love in an effort to corrupt him, but he actually manages to hold out the longest of her friends rather than betray her. What finally causes him to give her up is the Warlock showing him that Kris previously believed him to be a joke.
* Warlock III: The End of Innocence. Later on, after Kris realizes what's really going on and tries to flee, the Warlock traps her in a repeating loop until she's right back where she started.
* Warlock III: The End of Innocence: The Warlock is a lot more subtle this time around, slowly corrupting Kris' friends to become his servants rather than simply going for the kill right away. It's implied that all of Kris' friends showing up to help her unintentionally invoked a protective magic that the Warlock can't simply ignore, so he must convince them to forsake her of their own free will.
* Warlock, in which the title character curses the female protagonist to age 10 or 20 years for each night that passes. She remarks to Redfern, "This is worse than death", to which he replies, "That's what he had in mind."
* Warlock Magnus is over 1400 years old but maintains a very youthful appearance. It becomes a tearjerking moment when he shows lover Alec a box of mementos from dozens of men Magnus has loved over the centuries and this is the only way he can remember them all.
* Warlock: Master of the Arcane allows player to summon variety of magical creatures to serve in his or her army.
* Warlock: Master of the Arcane, all their cities and units remain in the game as "Neutrals". These cities do no longer play to win and are hostile to everyone, except other neutrals.
* Warlock: Master of the Arcane has variety of effects. There are standard movement and vision limits, but also some special areas that provide special resource and/or damage the units on the tile.
* Warlock: Master of the Arcane, the AI will within two dozen turns of meeting you send you a demand for half your money or mana. Your options are ´accept´ or ´declare war´. Accepting several times may let them offer an alliance, but it won´t stop them from demanding half your stuff at regular intervals. In short, when meeting an AI opponent, get ready to rumble.
* Warlock: Master of the Arcane. They are reasonable early game unit, but lose effectiveness later in the game unless upgraded.
* Warlock of Gramarye, as the main character's horse, Fess, is a highly intelligent AI placed in a mechanical horse.
* Warlock of Gramarye: Gwen Gallowglass is a devoted wife and a loving mother to her four children. She is also a ridiculously high-powered psychic, and God help you if you lay a finger on her or her family.
* Warlock of Gramarye mistaken for magic. Naturally, the protagonist and his family are major exceptions to those rules, due to partial fake-Faerie blood and magic borrowed from another universe (way too complex to go into here).
* Warlock of Gramarye series, the inhabitants of the planet Gramarye interpreted abilities like telekinesis as "magic" due to their ancestors' decision to adopt a low-tech pseudo-medieval culture and the passage of centuries without contact from any other planets. Beings such as fairies, trolls and whatnot, according to the main character, were the result of a combination of psychic powers, a psi-sensitive local plant called "witchmoss" and a lot of fairy tales.
* Warlock of Gramarye series, the interstellar government's currency is the "kwaher" or kilowatt-hour.
* Warlock of Gramarye the area first so no innocent bystanders get hurt. 'Kay?
* Warlock of Gramarye. They also have an inconsistent relationship with iron.
* Warlocks also have Dark Bargain, which gives them six seconds of complete immunity before they take 50% of all they suffered when it expires, depending on the severity of the absorbed damage, they may die from it without healing.
* Warlocks are much like vampires in that they will live forever if nobody kills them but are unable to breed. The only exception is Tessa Gray, because her mother is a Shadowhunter, which negates her demonic blood and allows her to procreate, but her children are mortals and therefore always outlive her. Tessa technically can have as many children as she wants, but,

* Warlocks are the descendants of humans and demons, but Tessa Gray is especially among the warlocks because she is related to the nephilim. She is an angel to a quarter, a human to a quarter, and half a demon.
* Warlocks are the male counterpart of witches - when they're not simply called "witches". Real life male neo-pagans call themselves witches and consider "warlock" a slur.
* Warlocks can spec for Shadowburn spell, which is an instant cast spell that can be used at any time, but unless the target dies within a few seconds of casting, you lose a Soul Shard so it's mainly used as a finishing move. Warlocks also have Drain Soul, a channeled spell which deals 4 times its normal damage when the target it below 25% health. There is also a high-end demonology talent that reduces the cast time of Soul Fire (normally very impractical spell due to its long cast time) by 60% if the target is below 35% health and is hit by Shadowbolt or Incinerate. And Priests' Shadow Word: Death damages the caster if it doesn't kill the target.
* Warlock series of movies is a servant of Satan, tries to destroy the world, and kills and mutilates innocent people for fun.
* Warlocks get a unique interaction with this particular moment that stands out. Normally your champions will happily report to you and help you out and Velen will be thankful for the aid. A Warlock however, has the toadying demon Calydus and angry destruction warlock Rittsyn show up, with Ritssyn commenting that Calydus bugging him to come out to help you has him minutes away from killing the demon. This back and forth gets an exasperated "Well this is awkward." from Velen under his breath.
* warlocks has a strange effect on vampires, even if it is never explained exactly what effect it is.
* Warlocks have the Hellfire spell to burn enemies around them... and themselves. It's actually known to be a useful trick in situations of certain doom since killing yourself with it doesn't damage your equipment.
* Warlocks of 20th level or higher can learn how to summon a succubus as a minion, using the hearts of pure men to entice her from her home plane. They also clearly enjoy being
* Warlocks of the Sigil, everyone has a power specific to them. This is Kole's power.
* Warlocks of the Sigil, people are referred to by their name and hometown. Quinn muses how weird it will be to be Quinn of Haldon, as the distinction wasn't really needed in the academy and he was just Quinn there.
* Warlocks of the Sigil: Since Quinn was in the school most of his life and just got out he needs things about the world explained to him, including somethings that are different than our world and somethings that are the same.
* Warlocks, on the other hand, tended to prize sheer amounts of stamina (which increases their health) rather than stats that generally improve the amount of mana and mana regeneration. They can essentially trade health for mana
* Warlocks who have summoned a Voidwalker can "sacrifice" that Voidwalker, which throws a protective barrier around the Warlock. Like the priest's shield, this barrier absorbs a certain amount of damage and then fails.
* Warlock: The Armageddon. A nameless female satanist that becomes mystically pregnant with the titular Warlock is shown having the full-term foetus exorcised out of her with mystical jewellery. No, seriously.
* Warlock: The Armageddon: The warlock picks up a slutty woman on the road. Eventually he gets so annoyed with her that he scalps her before throwing her out of his vehicle.
* Warlock: The Armageddon which quickly morphs into Satan's new minion and kills his "mother".
* Warlock, the Grand Grimoire is a Satanic book that was broken up long ago. When brought together it reveals the hidden name of God, which if said backwards will undo all that he created and destroy the world.
* Warlock; the Warlock escapes to the future and the witch hunter Redferne follows to hunt him down.
* Warlock to reverse God's work and unmake creation itself to advance himself in

Satan's eyes.
* Warlock tricks a phony medium to channel the Devil by providing her with one of his lesser known names. The medium mutates to something more demonic and the Devil offers the host's eyes for the Warlock's use.
* Warlock, when faced with a revolutionary army which includes cavalry, proposes to unleash a plague on the horses- he has one lying around in his laboratory. Also, he is the creator of several other doomsday works, some of which could be plagues.
* Warlock when in low energy, and much more fuller and human-like when in full power.
* Warlock. When the Warlock retrieves the grand grimoire and learns the word that can undo all of creation instead of saying it straight away the starts ranting "I know the word that can undo all you have wrought!" giving Kassandra time to sneak up on him and inject him with salt water which is fatal to witches.
* Warlock, witch hunter Redferne stabs the Warlock to kill him, but finds that even the incomplete Grimoire gives the Warlock the power to recover from the wound almost immediately.
* Warlord Chronicles, which would become known as Excalibur by the later generations.
* Warlord Gazghull Mag Uruk Thraka; not content with being as big as a Space Marine Dreadnought, he's brought the Imperial planet of Armageddon to its knees twice (the first time was just a test run, see) and, unusually for an Ork, has learned from his experiences to the extent that he can outwit most Imperial field commanders before they even make their decisions. And all whilst fighting in the front lines with his ladz.
* Warlord Kitiara and Elf wizard Dalamar hook up. Kitiara is the half-sister of Dalamar's master, and still not over
* Warlord. Morgan is mistaken for the persona-non-grata Arrow and is consequently attacked by half of Seattle's criminal population, leading to a confrontation with his double to find out why everyone in town hates him.
* Warlord of Mars #17, Commandant Keisari, military commander of the Vathek (a race of vampires who dwell on Saturn), is shown bathing in a tub that is being filled from draining corpses suspended above it.
* Warlord of Mars and both of them fell in love with Earthmen. Their resemblance to each other is so great that Heru's old flame mistook her daughter for her.
* Warlord of Mars and is always fighting in the frontlines along with the adults.
* Warlord of Mars as they feared it would harm their brand. Surprisingly, the lawsuit did little to affect the comic and its spin-off's publication until 2014 when the dispute was amicably resolved, and both parties have worked together to relaunch the comic.
* Warlord of Mars by Dynamite Entertainment. The books were also adapted by Marvel at some point.
* Warlord of Mars example: Matai Shang dies in the climax of the third book, at the hands of his former ally Thurid. In the comics, he dies much earlier than his book counterpart at the hands of Salensus Oll, another ally besides Thurid, because he didn't felt honoring his agreement.
* Warlord of Mars, is relatively faithful but it contained a couple of changes:
* Warlord of Mars is the megalomaniacal tyrant that ruled as a living goddess over Barsoom for ages, instituting a oppressive system of slavery and rape among its people. While most Martians age very slowly and often are centuries old, Issus looks like a hag as a result being being hundreds of thousands of years.
* Warlord of Mars, Mars was once depicted having massive oceans and the greatest superpower at the time being the seafaring empire of the White Martians. But a disaster lead to the oceans drying up and the atmosphere being slowly destroyed.
* Warlord of Mars prequel has her thwarting an attempted invasion by vampire aliens from Saturn. And at least in one possible Bad Future, this trope is inverted when Mars is invaded by Earth forces.
* Warlord of Mars, reducing them to slaves whom he has 10% killed for no good reason, except spite and disgust. He still thinks himself as a savior, however, as he justify his actions as liberating the Red and Green Peoples who have been

oppressed by polar races for millennia.
* Warlord of Mars series, are a race of warriors that invade planets, enslave their population, take their resources and move for the next one. They are in the process of invading Barsoom in the beginning of the volume.
* Warlord of Mars, so they're not as big a melee threat to the Red Men).
* Warlord of Mars: The Boora Witch is your average swamp sorceress that lives on planet Mars, and unlike the rest of the cast (which is grounded on sci-fi pulp action), explicitly uses foul magic.
* Warlord of Mars took extreme measures to silence Salensus Oll's concubines after one of them blew the whistle about who was behind the Green People's violent bursts. In fact, had her not warned the heroes about it, they would likely never had figured it out.
* Warlord of Mars where she is caught by a giant alien squid (who goes as far as wrapping his tentacles around her body) and fears that it will turn her into a broodmother. Turns out the monster is friendly and as Barbarella points out, they don't have the necessary reproductory systems for this trope.
* Warlord of Mars White Martians, the religious Black Martians and the reclusive Yellow Martians.
* Warlord of Mars who had a crush on her, specifically for her use alone. After his death, nobody was able to reverse-engineer or replicate it somehow.
* Warlord Okeer created Grunt to be the perfect Krogan. The other tank-grown krogan you fight to reach Okeer are his failed attempts, discarded because they failed to meet his expectations. (Though if called on it, he actually notes that they're more than capable of doing what they were commissioned for — the Blue Suns leader who ordered them is just really
* Warlords Battlecry and can kill the hell out of that initial fighting force if not properly built and managed.
* Warlords Battlecry series are essentially exactly the same but with new storylines and a few new playable races.
* Warlords Battlecry series. There are a few different stories explaining why this is; one claims that both races were manipulated into war by the Dark Elves (who were excluded from mainstream elven society when they discovered how to summon demons), while another claims that a dwarf king swore an oath of friendship to the elves when they saved him from a storm at sea, but a jealous nephew murdered the king, seized the throne and declared war on the elves in order to pillage their treasures.
* Warlords Battlecry, who are just totally overpowered; with access to cheap hordes of units with powerful upgrades "and" powerful area of effect monsters, their only real weakness is a lack of effective ranged units.
* Warlords Battlecry wider and fatter), and often bear armor of their making. Oh, and on top of being just as belligerent and warlike as regular orcs, they're almost always hungry, and don't have many qualms with eating food that talks back.
* Warlords: Heroes uses this for its entire storyline, placing you in the minds of the characters themselves.
* Warlords of Draenor, after defeating Imperator Mar'gok in Highmaul on Mythic, the raid faces an alternate version of Cho'gall.
* Warlords of Draenor, allowing them to form the Iron Horde, but they eventually turn against his father Grommash and side with the Legion, becoming the Fel Horde. This only applies to the corrupted orcs, however, as Grommash remains uncorrupted and Draenor itself escapes its main universe counterpart's fate of being split into Outland.
* Warlords of Draenor characters like Lantresor on permanent mining duty also counts.
* Warlords of Draenor equivalent. Interestingly, this can be traced back to Warcraft III, where the ogre units are all refered to as part of the "Ogre Legion".
* Warlords of Draenor expansion added instanced garrisons that were run by the player. The garrison allowed players to collect resources and launch missions from their own personal command fort. One of the major criticisms of this expansion was that this resulted in many players spending considerable amounts of time hidden

away in their garrison instead of out in the world, making everything seem rather empty.
* Warlords of Draenor expansion, he took plans for the Iron Stars and other siege weapons with him. The Iron Horde went on to add flamethrowers, two types of cannons, and a screw to the siege weapons seen in-game.
* Warlords of Draenor expansion makes a point of killing off the alternate timeline's Velen, for no real reason except that he's one of the few characters to be alive in both timelines whose presence in the story could not logically be ignored.
* Warlords of Draenor, Gul'dan manages to overthrow Grom by bringing attention to the fact that for all his promises of conquest, he's accomplished little beyond getting most of the Iron Horde killed.
* Warlords of Draenor held an "Eleven by Eleven" contest, which was centered around creating one character of each of the then-eleven classes and getting them all to the then-max level of 100 by the end of November.
* Warlords of Draenor, in which the player character has become so well known for saving the world, their faction's leader handpicks them to be the Commander leading the troops against the next threat to the world (though they were part of a large vanguard that took what was a suicide mission, they are the only survivor of their faction). You personally build up the garrison that is Azeroth's first line of defense, and all of the non-player characters within will talk about what an honor it is to serve you.
* Warlords of Draenor, it's still extremely close to ours when we get there and tends to coincidentally follow some of the same beats (including certain new family trees being retconned to be true of both timelines), despite drastically different circumstances.
* Warlords of Draenor, it was retconned that ogre culture was defined by sorcerer-kings, who ruled their people with immensely powerful magic. While still rare by the standards of their people, the ogres were established to have been the dominant race of Draenor, making ogre magi a relatively normal thing.
* Warlords of Draenor, Mannoroth never returns despite the fact all his deaths occur in ways that would let him return, which raises questions of why select demons seem to be able to respawn but some just vanish for good.
* Warlords of Draenor many raids include quests to kill certain raid bosses, which in turn creates a portal or unlocks a door to later portions of the raid. This allows guilds that have no interest in killing the early, easy bosses to skip right over them.
* Warlords of Draenor of past Draenor, and fighting to save this Draenor from Outland's fate is seen as a worthy goal.
* Warlords of Draenor. Players start off in either the non-tainted Shadowmoon Valley or the snow-covered Frostwolf mountains. The zones gradually get more and more threatening, but the highest level zones are the Savannahs of Nagrand and the Tanaan jungle.
* Warlords of Draenor, really. While we can't actually change what happened to OUR Draneor (getting corrupted and blown up into fragments called Outland) due to this being a parallel timeline...the expansion pretty much represents this for Draenor. Garrosh goes back to the moment his people were corrupted by demons and seeks to set that right by convincing them to take their own path; while it's a very noble concept at face value, Garrosh uses it to turn the orc clans into the Iron Horde and invade Azeroth anyway. The Draenei (Maraad especially) see going there as an opportunity to prevent what happened in our timeline from happening again. And indeed, our characters intervene at crucial moments to stop MANY bad events that happened on our Draenor from happening here.
* Warlords of Draenor sends the entire Iron Horde after you and your allies. The only option left is to run for the docks at max speed before the rest of the army arrives.
* Warlords of Draenor, the main conflict is the combined Alliance/Horde forces vs. the Iron Horde vs. the Shadow Council/Burning Legion.
* Warlords of Draenor, there's a Doge reference, long after the meme was relevant.

* Warlords of Draenor, the Shadowmoon Exiles are former members of the Shadowmoon Clan that refuse to follow Ner'zhuls actions, when he plans to use the Dark Stars power to raise undead.
* Warlords of Draenor to the paladin player class, drawing her power from the fel magic of the Burning Legion and employing several debuffs which absorb or prevent healing as well as auras which harm the party. Each of her three phases is patterned after one of the three paladin specs.
* Warlords of Draenor version of Hellfire Citadel, the boss Gorefiend possesses this. Part of the fight's mechanic is he'll devour the souls of members of the party, who can then help weaken him from the inside.
* Warlords of Draenor, where both factions work together to fight the Iron Horde, and conflict is mostly limited to a competition to recover rare artifacts from a remote island. The promotional material for Legion also seems to indicate that the Alliance and Horde will truly join forces to battle the Burning Legion.
* Warlords of Draenor, you would be forgiven for forgetting that the Draenei are in fact not a balancing race for the alliance so they would have an equal number of playable races to the horde. You would also be forgiven for having to look up who Prophet Velen is even if you have been playing since 2004.
* Warlords of the 21st Century have led to the collapse of civil society.
* Warlords of Utopia universe, has all the Alternate Universes where Hitler won declare war on all the Alternate Universes where ancient Rome never fell.
* Warlord" (thought the person suggesting the idea has already betrayed them, so Avon is hardly inclined to sacrifice his friends to save him).
* Warlord", Xenon Base is sabotaged; bombs destroy the teleport and all entrances, yet the ventilation is left intact to spread a lethal virus. So the people trapped inside have to shut down life support leaving them with air for around 20 hours, and it will take at least four days to dig themselves out.
* Warmachime: Vladimir Tzpeski, the dark prince of Umbray, dual-wields a sword and a twin-bladed dagger. As do Supreme Archdomina Makeda, Tyrant Xerxis and all the skorne Praetorian swordsmen.
* WARMACHINE, and his mount gets its own powered barding to compensate.
* War Machine armor because he's not interested in becoming a superhero.
* War Machine as Norman Osborn, not as the Goblin; Rhodey (hopefully) blasted him because he knew this.
* War Machine as tritagonist. Often a supervillain such as Ghost, Blizzard, or Madame Masque will take on the role of tetragonist.
* War Machine at some point, hinting that his role was bigger than the mere cameo appearance many initially believed he would be making.
* War Machine game, revolver technology scales up to the huge-caliber rifles used by Cygnar longgunners, and the huger-calbier cannons used by warjack robots like the Khador Decimator.
* War Machine has a more powerful, wrist-mounted version which he uses to knock out Scarlet Witch. It's far less effective against Giant-Man, though.
* Warmachine has four (with another planned in 2017). Has even more if you count the sub groups in the mercenaries (5) and Minions (2) factions.
* War Machine has Magitek cybernetics used by the Cryx, which are made of machinery and dead tissue, making all manner of cyborg undead; and their sometime-allies the Cephalyx, who won't wait for you to die, and have perfected their implants to enhance and mind-contorl their living captives, as well as equipping them for combat. There are others, including a massive farrow beast which is basically a steam-powered borg whose designer had some trouble getting anything other than pulled pork out of the experimental process.
* War Machine he used the same armor for most of the movie, but for the climax deployed in an even heavier looking armor that emulates the tech advances Tony had been using.
* War Machine is a faction composed mostly of clockwork creatures. The Convergence worships Cyriss, the Maiden of Gears, goddess of mathematics and innovation. Cyriss does not possess much influence on Caen so she cannot grant her followers a proper afterlife, so her followers place their souls into clockwork vessels to allow them

to remain in the world after their deaths.
* War Machine is relieved when Orsus Zoktavir one of their own kommanders is apparently killed in action. Considering how insane and destructive he was they weren't too sad to see him go. He didn't really die of course.
* War Machine Kali that for every person he killed he would gain an extra life, healing him from lethal damage. This was visualized literally with a digital counter on his wrist that would tick higher with every life he took.
* War Machine series, Rhodey's parents claim that he has a son that he's never met. It's left ambiguous as to whether this revelation was true or simply a lie to get rid of his then-current flame, Rae, but it's never resolved one way or the other.
* War Machine. Showcasing what Iron Man could do if HE ever cut loose from all restraint.
* Warmachine's plot. As the wars that engulfed the land ground into full gear, he realized that he could no longer protect his beloved homeland with just courage, honor, and fancy weaponry. He then proceeds to persecute Menites, steal prototype armor from his mentor, and pardon inquisitors (one of the major reasons why the previous king was forcibly overthrown) to fulfill his duties.
* WARMACHINE's rules state that, if there's ever duplicates of the same character on the board, one is an impostor. Whoever is on the winning side or survives is the real one.
* Warmachine, the Cryx Empire is able to make Soul Cages. The Iron Liche, Asyphyxious actually cages his own soul, and replaces all but his Skull with a steam and magic powered body. As long as his Soul Cage is intact, he is not really dead.
* War Machine to slam your enemies about the battlefield. More than one unwary player has found their key units disable by a well-timed slam attack and it forms the basis of one of the most simple assassination strategies.
* War Machine trope. For a while, Rhodey's armor had the capability to magnetically lock any piece of machinery to itself, meaning he could repurpose any weapon he found from downed enemies or destroyed vehicles. Even at his current, normal weapon loadout, he's more heavily armed than pretty much any Marvel hero.
* Warmachine, with hints of Technical and Pariah, using Vectors (more technologically advanced warjack equivalents without an ai) that rely on their Warcasters' accuracy stat instead of their own, are unusually focus-efficient, and cannot use Mercenaries under any circumstances.
* War Machine. With his current ability to integrate external technology into his armor, he can (and often does) add more.
* Warmaster has "kill the enemy's general" as one of the generic win conditions for all armies.
* Warmaster Horus was this personified. No, really: all the Primarchs embodied some aspect of the Emperor and inherited one of his traits, and Horus' trait was his thirst for glory. It caused a lot of friction between Horus and the rest of his brothers and eventually
* warm, because Harry didn't specify otherwise. He then tells Harry to expect the same level of response from commands to the fae if he dislikes what Harry asks of him.
* Warm Blood Bags Are Everywhere: A vampire lives among humans and is trying to resist the urge to feed on human blood.
* Warm Blood Bags Are Everywhere: A vampire tries to live among humans while resisting the urge to feed on their blood.
* Warm Bloodbags Are Everywhere: A vampire trying to not drink blood of a person when by all rights they should be.
* Warm Bodies. Boneys, on the other hand are simply super-zombies; despite having no skin and very little muscle remaining, they are fast, powerful, skinny zombies.
* Warm Bodies doesn't just eat brains—but eating the brains of his victims allows him to experience their memories and associated emotions. Eating Perry's brain in the beginning makes R fall in love with Julia.
* Warm Bodies, it is inverted where it is the protagonists' passion for life (whether zombie or human) is what gives them the power to change the world while

the antagonists' stoicism dooms them.
* Warm Bodies Julie and her parents drive to Canada, which has fortified itself against the zombies while the rest of North America is ravaged. Shortly after reading the fortified border, they realize that the soldiers on the walls are dead, and cities are burning in the distance.
* Warm Bodies: R finds himself face-to-face with a suspicious Boney, a member of a race of predatory skeletal superzombies who actively seek out living humans to eat, and attack regular zombies in the process of regaining emotions, and thus, their humanity.
* Warm Bodies, R gives Julie a blanket shortly after taking her to his plane. Although she is not asleep, this is the first sign for her that he is kind-hearted.
* Warm Bodies: R mentions a couple of possible reasons the zombie plague happened, then admits he isn't sure which if any is true and concludes it doesn't really matter.
* Warm Bodies, so humans that rise from zombie bites require the attacker to be somehow prevented from doing so.
* Warm Bodies: The dynamic between zombies and boneys — zombies whose flesh has completely rotted away — has shades of this. Boneys are noticeably feared by the regular undead and openly antagonistic towards them throughout.
* Warm Bodies to fight them. This doesn't outright contradict anything earlier in the story, but it leaves a lot of unanswered questions.
* Warm Bodies where Julie pretends being a zombie while covered by zombie blood that covers her smell and when R the zombie has to pretend being alive inside a human settlement.
* Warm Bodies, who falls in love with a human girl after eating her ex-boyfriend's brain.
* Warm Bodies, with half of the characters replaced by zombies. And a considerably lower deathcount (of course, as previously mentioned, half of the characters were already undead anyway).
* Warm Bodies, with zombies and humans as the warring parties rather than families. In this version of zombies, zombies acquire the memories of the people whose brains they eat. They also have extremely sublimated memories of being human, which can be brought back out again.
* Warm Bodies wonders at the start of the movie why he doesn't eat better, why he doesn't stand straighter, and why he can't connect with the people around him. Then he remembers; it's because he's dead.
* War Metal, and it mutates any life forms it touches into Bloodthirsty.
* War Metal Tyrant, players consider the metagame to be moving towards a cookie-cutter layout where the aim is to pack as many of the strongest cards available into a deck. The usual decks used to be Tiatlapreds, Wall-stalls, Reaperspam, II rush, Pummeller/Bloodpool, and Xeno slowroll, all of which interacted with each other in complex ways, however most of these decks are considered moot and have been outstripped by cards with Summon and Refresh, two very unbalancing skills. At the time of writing, Righteous Slowroll is most dominant, with Raider Rally and Xeno Summon being very prominent.
* Warm-Hearted Walrus: Walruses portrayed as heroic or lovable characters.
* warming up the Earth, and modifying the chemistry of the atmosphere and ocean, which isn't very good news.
* warming up when he returns to the Hawks, it's not until they've consummated their relationship that she can look at him naturally.
* Warm Milk Helps You Sleep: Trouble sleeping? Some warm milk will get the job done.
* war. Most of its interactions with its member planets revolve around tithes of materiel and manpower for its conflicts, and the draconian measures the Imperium uses to stay in power can only be justified by the number of threats surrounding it. If peace ever broke out, nobody sane would want to live under such a regime — and even in the current state of affairs, world after world chooses to rebel and try to survive on their own rather than endure further Imperial oppression (and are either violently brought back into the fold, conquered by

Chaos, or eaten by 'nids).
* warm summer days and apple blossoms on the wind, with an unexpected aftertaste of Father going off to war, never to return."
* Warmth, nearing graduation, one of Minamo's PE students asks her out on a date with her. She knew that Minamo would decline her it but felt the need to ask anyway.
* Warm Water Whiz: Putting a character’s hand in warm water makes them wet the bed.
* Warm Water Whiz: Putting a sleeping person's hand in warm water in order to make them wet themselves.
* Warned against in E-ROTIC's aptly-titled "Max Don't Have Sex With Your Ex".
* warned, the Master has the Doctor, Martha and Jack Harkness declared public enemies with the intent of flushing them out of hiding.
* War Neighbors is a Garry's Mod comic about two unnamed Halo modeled characters with the orange soldier having a one-sided rivalry with the green soldier.

* Warner Bros. (1962), featuring cats and set in France. The Alaska Gold Rush is a minor plot point.
* Warner Bros. and narration by Robert C. Bruce to tell the story of a monkey wedding.
* Warner Bros. Animation, all of which have been praised for staying true to their source material, being well-written and enjoyable for audiences of all ages, and beautifully animated.
* Warner Bros. Animation films of this era have been released in their original aspect ratio on Blu-ray, and most of these are available legally in Digital HD, but if one prefers physical media, they've got the short end of the stick.
* Warner Bros. cartoon "Early To Bet," the cat whose luck at gin rummy against a bulldog was awful (having to perform a "penalty" each time he loses) deals for high card against the Gambling Bug. The cat draws a three, but the Gambling Bug draws a two. The cat metes out a penalty on the bug—a rolled up newspaper! ("No! Not that! Not the Post!!")
* Warner Bros. cartoon "Hamateur Night" (1939) presents a series of talent acts that are judged off stage—bad acts are discharged with the judge striking a boxing ring bell. Egghead keeps interrupting the proceedings with an ear-bleeding rendition of "She'll Be Coming 'Round The Mountain." When it's time to judge the winner, Egghead wins. That's because the audience was filled with Egghead lookalikes.
* Warner Bros. cartoon "Holiday Highlights" spotlights Valentine's Day, as a little girl entreats a little boy to be her Valentine. The boy responds by throwing himself at her, body and soul in a scene normally reserved for romance features. When the narrator points out to them that it's a leap year (1940 was in fact a leap year), the girl throws herself at the boy in kind.
* Warner Bros. cartoon "Malibu Beach Party" has a scene where Ned Sparks resignedly lets Baby Snooks bury him in sand. She unloads a dump truck full of sand on him.
* Warner Bros. cartoon of the same name, the Dover Boys of Pimento University are about to collectively deliver a finishing blow to villain Dan Backslide, who collapses after already having his ass handed to him from damsel in distress Dora Standpipe. As a result, the boys knock themselves out.
* Warner Bros. cartoon "Rebel Without Claws" has Sylvester getting shot down by his own firing squad instead of the intended victim Tweety.
* Warner Bros. cartoon "Screwball Football" has a team kicking off to start the game. The entire line is posed post-kickoff and then performing a cutesy dance recital and finishing it with a curtsy.
* Warner Bros. cartoons (particularly ones featuring Wile E. Coyote) frequently involve characters getting blown up with guns and explosives, ranging from sticks of dynamite to cartoon bombs. Being caught in an explosion is never fatal - at the worst the effect is usually just having blackened and ruffled fur/skin, or in some cases body parts blown/broken off that are easily re-attached.
* Warner Bros. Cartoons, with the goal of eating/shooting/defeating Roadrunner/Bugs

Bunny/Speedy Gonzales.
* Warner Bros. comedy, and cartoons haven't been the same since. If you watch the Warner cartoon library in sequence and look at what the studio was doing by 1937 or '38, it's amazing to think that this same studio had been producing terminally boring cartoons just two or three years earlier. When Warner cartoons finally became funny, they had Tex to thank for it.
* Warner Bros.* Daffy eventually chops down all the trees in his path, then tries again — only to crash into a huge boulder on the ground.
* Warner Bros.). Due to the growing decline of the DVD market and other economic setbacks, Warner Bros. pulled the plug on the label in 2013. The studio still makes direct to video films, but those are under the regular Warner Home Video banner.
* Warner Bros. for one week only. In fact, many of these have not aired on the channel since the 2015 rebrand.
* Warner Bros. has a gag about how citizens are giving up their corsets to help the war effort. The before shows a couple walking down the street; in the after, the woman looks the same, but her husband has a noticeable paunch.
* Warner Bros., having acquired the TV rights to all the black-and-white Looney Tunes that were previously held by Guild Films, had 75 of those cartoons sent to Korea to be redrawn and embellished in color. It was slipshod to say the least; sound synchronisation faltered at times, objects were off-color, the trace jobs were sloppy (it was done on six-field cels as opposed to the normal 10-fields), and some animation was eliminated altogether.
* Warner Bros.). He even reportedly expressed that a male has to be the lead of every script in order to get broader audiences.
* Warner Bros. (he is completely ignored by people who think they must be getting delirium tremens), but he is arrested for causing a panic after his pink paint washes off. The judge sentences Bobo to — working for the circus! As the elephant team's batboy.
* Warner Bros., including Don Wilson who thinks he's doing a commercial. When Jack tells him it's a movie, Don suddenly goes into Shakespeare before Jack dismisses him.
* Warner Bros. Interactive Entertainment in 2021 after trying to do so since 2015. News outlets, developers, and players alike were concerned by this news, to say the least, as they feared it would set a dangerous precedent and end up stifling creativity in the games industry.
* Warner Bros.. It usually prominently displays a small gazebo in the center, with a number of houses and stores surrounding it.
* Warner Bros. loved the idea of using classic Hanna-Barbera characters and having them meet present-day WWE stars:
* Warner Bros. often releases the most popular movies in their library as "Ultimate Collector's Editions", which package the movie together with some merchandise inside a giant box.
* Warner Bros. (parent company of DC) and Marvel Comics have had a joint trademark registration in the US for the term "Super Hero" and its variant spellings since 1979. That half-ownership acceeded to Disney when they bought Marvel in 2009.
* Warner Bros. record company. And neither Warner Bros. nor Time Warner owns WMG anymore. WMG spun off from Time Warner in 2004; since then, they've been owned by private investors, then a company called Access Industries, not Time Warner. At least the record company still keeps "Warner" in their name.
* Warner (Bros.) Records it on the success of "1982"... and the re-release became his first #1 hit.
* Warner Bros. refers to it as DC Extended Universe since early 2020, so it became official somewhere.

* WarnerMedia shut down its premium movie channels in India, HBO India, HBO HD India, and Warner Brothers India.
* WarnerMedia shut down its premium movie channels in India, HBO India, HBO HD India, and Warner Brothers India. During the days leading up to the closure, all channels ran a notice celebrating the channels' 20 years on the air and rolling credits to thank the channels' staff. Both HBO and WB ran "Best Of" marathons, and shortly before the shutdown, HBO aired a montage of movie clips while thanking the viewer for loving the network.
* Warner Music Group as Birch Tree Group) in 1935 for a specific piano arrangement of the song. However, the song's history significantly predated this particular publication; the song itself was based on the melody of "Good Morning to All", which was first published in 1893. A publication of the lyrics and music in 1922 did not contain a copyright notice as required by U.S. law at the time (nowadays, the U.S. is part of the Berne Convention, which makes copyright automatic upon publication). In 2015, it was ruled that the publisher's claim was invalid, and that the tune had long entered the public domain.
* Warner struck again in 2008 when Raybaw Records, a division owned by the songwriting clique MuzikMafia (

* WARNING! Do not place this brick in a one gallon crock, add sugar and water, cover, and let stand for seven days or else an illegal alcoholic beverage will result.
* Warning Forever's 3 Lives mode, destroying 100 boss parts grants an extra life. Interestingly, the parts destroyed aren't part of a separate counter; rather, your life counter has two decimal places (i.e. "3.00" lives instead of "3"), so destroying a part increases your lives by 0.01.
* Warning From Space), "Planet 'R'" is on a collision course with Earth. One-eyed, starfish-shaped aliens from the counter-Earth Paira take on human forms to warn the earth about the impending disaster.
* "WARNING: I LEARNED HOW TO DRIVE ON MY PLAYSTATION!", and similar games actually have helped teenagers to earn their drivers license by improving hand-eye coordination skills, improving their peripheral vision, and increased response times to external reactions on the road.
* Warning: It will eat your fucking Olive Garden leftovers and leave its laundry in your hamper like you're its goddamn maid.
* Warning Mistaken for Threat: I'm not threatening you, I'm warning you!
* Warning! Readers Advisory!: Darla often borrows Linkara's "because poor literacy is ~*KEWL*~" catchphrase during the books she's reviewing.
* Warning! Readers Advisory!, Derek the Bard is caustic towards terrible books (and sometimes terrible movies based on good books).
* Warning! Readers Advisory!: Derek the Bard often finds himself in need of one,

and often reaches for a crystal skull full of vodka.
* warning the public about preparing for a zombie apocalypse, as a tongue-in-cheek way of getting people thinking about disaster preparedness.
* warns loser and ditching it out the back of the bar. If you go behind the bar, there's a huge dust pile composed of all the people who lost recently.
* warns real-life divers not to hold their breath like Harry does after giving his only remaining oxygen-supplying rune cluster to a drowning Gabrielle.
* War of 1812. After that, US expansion was uniformly aimed westward, not northward.
* War of 1812, a savvy general who was able to persuade the Aboriginal leader, Tecumseh, to join forces with him so effectively that the Native Leader stood up, patted Brock on the shoulder and proclaimed, "This is a man!"
* War of 1812 is the only time the U.S. capital was overrun by an invading foreign army. The British burned a number of important structures, including the White House. While generally considered a major defeat for the Americans, the British were unable to do much to capitalize on the successful raid, a few weeks later being turned away in an attempt to take Fort McHenry and seize the nearby city of Baltimore.
* War of 1812 major sides in the conflict claiming victory due to this trope - the US claimed victory because they maintained their territorial integrity and the British were no longer kidnapping American sailors, the Canadians claimed victory because the US failed to conquer Canada, and the British claimed victory because they had successfully prevented the US from helping France during the Napoleonic Wars. The only clear losers were the Native Americans, who lost their British sponsors. This had major positive long-term ramifications for the US; because the British failed to win, they failed to curb American expansion. Because the Native Americans lost, there was no one left to prevent further American expansion. As a result, the US eventually became one of the largest and most powerful countries in the world, surpassing the UK and making further wars with them untenable. Conversely, the Canadian colonies got considerable self-esteem for defending themselves, which led to the continuing desire to be different from the US, which led to the later creation of Canada as a determined separate nation.
* War of 1812 — and also to at least two U.S. Navy warships, eight towns and townships in America, and a mountain in Vermont.
* War of 1812 only intensified these separatist feelings, as Mainers saw Massachusetts as unconcerned with the British on their doorstep. Maine was granted statehood in 1820 as part of the Missouri Compromise, with Missouri entering the union as a slave state to compensate for the addition of a new free state in the northern US.
* War of 1812, the British burned Washington, DC. They explicitly targeted government buildings, including the Capitol and the White House. Urban legends state that the British generals sat down in the Capitol and voted on whether they should burn the place down.
* War of 1812 to fight certain wars indefinitely, especially if the goals are unclear and no progress appears to be made.
* "War of Coprophages": Mulder and Dr. Ivanov each have a glass of scotch after Dr. Ivanov was shown the alien robot cockroach. Dr. Ivanov particularly looks like he really needs it.
* War of Honor, and Honor gets pregnant, the paparazzi find out. In one scene, some suggest alternate candidates for the father of Honor's son, including White Haven's brother (the current Prime Minister) and Protector Benjamin Mayhew of Grayson (who is easily the least likely person in the entire Honorverse to ever have an extramarital affair).
* War of Honor: diplomatic notes from the Republic of Haven become more and more strongly worded as the current Manticoran Government deliberately strings them along. It doesn't help that other parties were deliberately altering some of the diplomatic notes to aid in this.
* War of Independence And so Australia was chosen, and you probably know the rest of the story if you've read the rest of this section.

* War of Kings: Subverted. The Guardians never had a weapon able to harm Gladiator, they only made him think they did. However, Gladiator's powers are directly related to his confidence. So, if he believes you can beat him, you can.
* War Of Legends has "WoLCash" used to purchase in-game items and bonuses.
* War of Light and Shadow series find a random baby with green eyes, who looks as though he might grow up to look sort of like Arithon...and cast a spell on him as he grows up so that he looks exactly like Arithon. As Arithon is considered rather like the Antichrist...things do not work out well for that kid.
* War of Omens is this. As of this update, she has faced a dozen or more enemies, and has beaten them all.
* War of Omens, Pietra Siani chooses this over being taken prisoner by Listrata.
* War Of Omission are affected — when someone does it to a diner table, people wonder why the diner has such an awkward corner. Also, the effect is reversable — the deleted places, people, etc. are stored in the device and can be retrieved at their original locations.
* War of the Biju, Fugaku Uchiha intended to arrange one between his youngest son Sasuke and the Hyuuga Clan's heiress, Hinata — most likely to ensure the Hyuuga Clan's loyalty under the new regime should Uchiha Clan's coup succeed. He died before anything came of it.
* War of the Biju war effort. That means he commands forces of all five of the major villages plus samurai from the Land of Iron.
* War of the Chosen and possibly attack multiple times a turn. Reapers are stealth specialists who can uniquely attack from concealment with their Vektor sniper rifles, or engage in some bomb throwing. Finally, Templars can use a variety of offensive and defensive psionic abilities to support your other troops, but their dual energy wristblades and machine pistol mean they can contribute to the battle themselves.
* War of the Chosen expansion. These posters will then be seeded around your mission sites.
* War of the Chosen, the Chosen each have a device called a sarcophagus that dedicates a massive amount of Psionic energy to resurrecting the chosen it's tied to every time they die.
* War of the Chosen. The head of your science department can't even identify what it's made of.
* War of the Colossal Beast, except he's missing all of the skin and muscle on one half of his face, exposing parts of his skull. He's kind of a cyclops, too, in that one eye is just an empty socket.
* War of the Colossal Beast is male, and that everyone should follow "his" lifestyle. Crow later says it when TV's Frank will be an "impartial" judge in a contest between the SOL and Forrester.
* War of the Colossal Beast: The reporter for Los Angeles TV station KTLA was Stan Chambers, a real-life KTLA reporter at the time.
* War of the Damned in comparison! In his case, it is shown that his father is trying to raise him to be a ruthless asshole and simply did too good of a job of it.
* War of the Damned, Spartacuss ultimate nemesis, Marcus Crassus, fits as the same types as him.
* War of the Dreaming blends, among others, Celtic, Greek, Christian, Norse and Cthulian mythi.
* War of the Dreaming, this applies to Oberon and Titania, who were around long before humans, and are implied to have been there when life first evolved on earth.
* War of the Gargantuas: Gaira and Sandra (Green and Brown Gargantua) shares one inherited from their "father", Frankenstein's Monster.
* War of the Gargantuas is one. Unlike his savage "brother" Gaira, he is benevolent and kind to humans. He even tries to protect his brother (though still making sure he doesn't hurt anyone. However, upon realizing Gaira's actions, he abandons his will to protect him and fights him for humanity's sake. Unfortunately, it doesn't end well for either of them.
* War of the Golden Stool to sit on the stool, seeing as she was ruler of the

British Empire and someone they saw as an equal and victor. Hodgson? Not so much...
* War of the Green Lanterns, Kyle finally puts on a blue ring, and Ganthet takes a moment to tell Kyle what a bad idea that was. (He's not too happy with John, Hal, or Guy's choices either.)
* War of the Green Lanterns storyline, Krona the Mad Guardian manages to take over the entire Lantern Corps by reinserting Parallax into the Central Lantern Battery, forcing Hal Jordan and the other lanterns from Earth to use alternate rings (Sinestro's yellow ring for Hal, Saint Walker's blue ring for Kyle, Atrocitus's red ring for Guy Gardner, and Indigo-1's indigo ring for John Stewart). While trying to move undetected, the group finds themselves in the Guardian's vault where the original prototype for the green lantern rings is kept; a gauntlet and a backpack power source. As the prototype isn't connected to the central battery, Guy equips it to supplement the red ring and describes the surge of power as feeling like he was wearing twenty power rings at once.
* War of the Human Tanks, you receive a message from an enemy Human Tank at the start of the third mission, and after it is finished delivering the message, it blows up.
* War of the Monsters are always seen being destroyed easily, and the ones in game only deal chip damage to your health. Somewhat subverted with the missile tanks, as they deal considerably more damage and the player should take note of their presence.
* War of the Monsters extends spikes from its wrist during punch attacks, and Robo-47 replaces its hand with blades for some of its attacks.
* War of the Monsters-like feel to the game. The menu screen is even a drive-in theater.
* War of the Monsters. One of her alternate costumes is instead a winged ant.
* War of the Monsters Robo 47, Togera and Congar play this role, with Congar being slightly faster, Togera slightly stronger, and Robo 47 in a comfortable middle ground.
* War of the Monsters stand no chance for the monsters, who are seen casually destroying tanks and helicopters in cutscenes.
* War of the Monsters uses a laser katana in its short range special move.
* War of the Monsters, who then rampage and destroy the landmarks anyway.
* War of the Realms #12, Loki is disgusted by his past self's sadism as well as his own evil deeds — starting Malekith on the path to become a warmonger and stealing the life of his child self. To top it all off, he sees a vision of his future self as the All-Butcher Necrogod in the distant future of All-Father Thor and is horrified at the prospect of being so evil. It's enough to make him plead he stay dead once and for all.
* War of the Realms as Dario's attempt to use Xemnu the Living Hulk on the Not-So-Jolly Green Giant ended with all of them being reduced to blobs, Dario himself being snagged by the Leader, who taunts him for his failure.
* War of the Realms) in a massive hug and tells them he's proud of them. Their utterly baffled expressions are both hilarious and depressing.
* War of the Realms: The Dark Elf soldiers ride creatures resembling moss-covered woolly mammoths.
* War of the Roses has weapons that break if you parry with them too much - good players duelling will often go through their main weapon and side arm both in a single fight, having to end the fight with daggers.
* War of the Servers, the Mingepods aren't even really tripods. They have two front wheels, and a third "leg" with another two wheels on it. So while they're technically tripods (three 'legs') they still have four points of contact.
* War of the Spanish Succession with Villars, who was a genuinely skilled general and was instrumental in salvaging the situation for France.
* War of the Spider Queen deals mostly with a slave uprising, but it quickly turns to finding out what is happening with Lolth.
* War of the Spider Queen series once was held at wand-point by a fellow drow wizard. This guy would be more of a trouble if he could shut up on his own, though.
* War of the Spider Queen stays as nice guy as he can afford to be, to the end.

Even so, neither character did jump out of the Drow ways.
* War of the Triple Alliance actually temporarily permitted polygamy there (a practice otherwise wholly forbidden by Catholicism) to bring up the birth rate after this.
* War of the Triple Alliance and still leading his troops in the vanguard.
* War of the Triple Alliance) at the end that it resulted in a bona-fide population crisis and the nation nearly ceased to exist altogether.
* War of the Triple Alliance. Paraguay decided that it would be a good idea to invade Brazil and crushed their army. Then, as if that wasn't enough, they went to war with Argentina and Uruguay at the same time. Paraguay won early victories, but ground down over six years. The war only ended with the complete conquest of Paraguay by the Alliance and the death of their dictator. Over half of the prewar population of Paraguay died before they finally surrendered. It got to the point where the Roman Catholic Church decided to allow polygyny (the "multiple wife" type of polygamy) because so many men had died there weren't enough husbands.
* War of the Triple Alliance to allow Paraguay to rebuild its population. Paraguay lost 95% of all males in the war.
* War of the Triple Alliance won the war and the three formed the Triple Alliance against Paraguay.
* War of the Twins seen by his brother in the final book of the trilogy reveals were he to succeed he would then kill all other gods in the world.
* War of the Wizards) the copyright issues at the time forced the band to change the names of the characters (for example; Aragorn to Aaron).
* War of the Wizards. The only way to beat him is to use a teleportation effect to scry-and-fry him when his guard is down.
* War of the Worlds (1988) and the theme of the show even changed. When fans tuned out (which caused the series to end its run prematurely), several arcs from Season 1 were left unresolved and there were more questions than answers.
* War of the Worlds (1988). Another piece of UFO conspiracy mythology, Hanger 18 at Wright Patterson Air Force Base, is referred to as military disinformation to cover up for the real hanger where Martian technology is kept.
* War of the Worlds (1988) as back up) fighting remnants from the original 1950s invasion guerrilla style. The Blackwood Project has it hard— their resources aren't too vast, since society mysteriously forgot about the original invasion for the most part. And the US government would like to keep it that way.
* War of the Worlds (1988). Blackwood is a kooky scientist who refuses to wield a gun through most of the series and carries a tuning fork to keep himself calm and collected. Many of the plots are motivated by him either getting trapped somewhere or staying one step ahead of the Morthren aliens (via the use of strange technology). Suzanne (as a fellow researcher and mother) also proves to be a capable fighter in several episodes and goes along with the rest of the team in several dangerous missions.
* War of the Worlds (1988) by Orson Welles is being celebrated. They learn that the 1938 invasion was also real (although it was defeated by the local militia, not by terrestrial microbes), and the government hired Welles to produce his broadcast as part of a cover-up.
* War of the Worlds (1988) episode "Totally Real", the loser of the VR game lost his life. This turned out to be the entire point of the simulator's design.
* War of the Worlds (1988) followed on from the 1953 film, taking the large time lapse as justification for introducing an entirely new set of characters.
* War of the Worlds (1988): "Goliath is My Name". An alien is sealed in a biohazard clean room when our heroes start its decontamination procedure. When the indicator shows that the room has become a total vacuum, the alien promptly swells up and explodes. Admittedly, it's not unheard of for aliens to explode from dying in other sorts of ways as their decomposition causes a massive, rapid exothermal reaction.
* War of the Worlds (1988): In "Amongst The Philistines", Kensington and Mrs. Pennyworth buy a dog just in time to have it react badly to Adrian, a few scenes before he turns out to be an alien. The trope is pretty blatant here, as the dog was introduced in this scene, and is never seen (alive) again.

* War of the Worlds (1988), in which the base of the Blackwood Project was blown sky-high.
* War of the Worlds (1988) is an example with a narrow scope and clandestine affiliation with the government.
* War of the Worlds (1988) one of the Martians catches a grenade fired from an M203 launcher by Lt. Colonel Ironhorse. The Martian stares at it in puzzlement as Ironhorse (who doesn't realise he's fighting aliens) gapes in amazement, then the grenade explodes in his hand.
* War of the Worlds (1988) that the entire war had been orchestrated by a single madman. Everyone walks off optimistically into the sunset. However, civilization has mostly collapsed, crime and decay are rampant, the world is a polluted cesspit and the heroes are still homeless. The Morthren are in even worse shape, as their population numbers something near 20, and they've had extremely limited success at reproduction on Earth. Better yet, if you factor in the unresolved plot points from the first season, there's an entire Morthren invasion force that's set to arrive at the planet in three years. "Nice morning," indeed.
* War of the Worlds (1988) that to most people they're indistinguishable from the corrupt corporations and organized crime.
* War of the Worlds (1988), the Blackwood Project occasionally steals some alien toy and contrives it into a one-off device.
* War of the Worlds (1988). The message? "Humanity still in danger as future food supply."
* War of the Worlds (1988), "To Life Immortal" was consistently presented as "tu doe nok tay".
* War of the Worlds (1988): "Totally Real", the loser of the VR game lost his life – though this turned out to be the entire point of the simulator's design.
* War of the Worlds (1988) use a combination of crystals and organic technology. Note that the aliens of the first season (and of the movie) do not appear to use organic technology, though they do retain the reliance on crystals.
* War of the Worlds (1988) were subject to this. When the second season premiered, viewers were reportedly incensed that the entire framework of the series had changed (including the deaths of main characters and the changing of several plot-related elements) that they decided to make their displeasure known with hateful letters written to the cast and crew. Their biggest targets were actor Denis Forest and actress Catherine Disher (who played the leaders of the Morthrai on the show). Disher was so angered by the derogatory and negative letters she received (both during and after the show) that, to this day, she won't talk about it at fan conventions.
* War of the Worlds (1988), when they attempt to ransack a military depot and instead let loose some dormant aliens, who take over their bodies.
* War of the Worlds (1988) where the alien joins with a human host through the chest, melds perfectly with the body, and when it wishes to leave the host it's arm bursts through the chest to touch the skin of a new host to repeat the process.
* War of the Worlds (1988), who were the prototype of the trope, though they had to be liberally mixed with the Nazi archetype, since the religious fundamentalist archetype wasn't quite ready for public consumption yet.
* War of the Worlds (2005) is learning to become a better dad, especially towards Rachel.
* War of the Worlds (2019): Both Emily and Sophie get pregnant without intending to.
* War of the Worlds (2019), French troops stationed in the French Alps have begun to desert their observatory posts to ensure the safety of their families from the worldwide EMP attack, while taking anything that they can. This is likely due to the lack of formal contact with the rest of the French government and armed forces and the morale dwindling as their numbers are easily picked off by the quadrupedal scout bots.
* War of the Worlds (2019): In Season 2, one is found left by a young Englishman (after his corpse is discovered). Unlike many such cases though, it's not used to explain what happened (that's known already) and it doesn't show how he died

exactly (though it's implied as a possible suicide). It takes the form of video diaries.
* War of the Worlds (2019): In the Season 2 opener, Emily sees a vision of three people on another planet under an eerie-looking golden sun which is looming over them.
* War of the Worlds (2019) It appears that this was accidental eavesdropping, though it's unclear.
* War of the Worlds (2019): Mustafa Mokrani, a Frenchman of Arab descent, and Kariem, a Sudanese immigrant to the UK, are the only characters of color on the show.
* War of the Worlds (2019), not any of the boys she had consensual sex with.
* War of the Worlds (2019) opposed the genocidal plan his people had, and he was killed for it.
* War of the Worlds (2019): Sacha is able to overhear a pretty shocking revelation from his mother and uncle's conversation when in the bathroom while they speak nearby.
* War of the Worlds (2019): The aliens are clearly intent on this, first wiping out most humans by EMP and then sending in killer robots to hunt down survivors.
* War of the Worlds (2019): The killer robots whom the aliens send to kill all surviving humans.
* War of the Worlds (2019): The story is moved to the modern day, with the aliens coming from somewhere unknown.
* War of the Worlds (2019), they're sent by the aliens to kill all surviving humans after the EMP blast wipes out most.
* War of the Worlds after realizing they were surrounded by the aliens, decides to tunnel his way out toward the city, but instantly unsettles Tom Cruise due to the noise and his daughter's safety and kills Harlan.
* War of the Worlds are capable of turning an entire block to rubble with no effort, or shredding the Bayonne Bridge like it's made of cheap cloth ribbons.
* War of the Worlds convinced her to stay and worked her pregnancy into the story.
* War of the Worlds, Dakota Fanning asks "is it the terrorists?" when the aliens start attacking. The film is full of imagery that evokes the attacks as well: aliens fire heat rays that turn people into clouds of ash, and in one scene the aftermath of a plane crash is studied. Also notable is the attitude of the protagonist's son, who is obsessed with "getting back at them."
* War of the Worlds ending to occur (and be actually needed, from a Doylist point of view)—rioting Los Angeles residents steal vehicles to escape, without knowing nor caring that scientific equipment vital to fight the Martians was loaded into them.
* War of the Worlds everything. It would appear they also have no concept of germs which ends up being their downfall.
* War of the Worlds: Global Dispatches as the Martians are seeking to conquer a resource-rich planet for colonization, rather than just take the water back with them.
* War of the Worlds: Global Dispatches, free-flowing water being unknown on Mars.
* War of the Worlds: Global Dispatches investigates one of the Martians tripods, he activates an emergency mechanism that seals off the dome and causes time inside to be slowed down. When he finally manages to turn it off again after 7 hours, two and a half weeks have passed outside the tripod.
* War of the Worlds: Global Dispatches while Prince Tuan has all the power. The Emperor orders Tuan to kill himself on several occasions, but Tuan always pretends that the Emperor is making a joke.
* War of the Worlds: Goliath and has both the original invasion (as seen in the opening) and the one the movie focuses on.
* War of the Worlds: Goliath has the heat rays from the original tale (albeit highly visible), used by both sides and capable of quickly and horribly disintegrating organic matter as well as blowing up anything else.
* War of the Worlds: Goliath), Nikola Tesla, and Theodore Roosevelt fighting together in a united special organization against Martians.

* War of the Worlds: Goliath setting thanks to humans having retroengineered the technology of the downed Martian tripods.
* War of the Worlds: Goliath takes place in an alternate 1914 on the cusp of World War I, with walking tanks and giant heavily armed airships thanks to retroengineered alien technology.
* War of the Worlds: Goliath world full of human-built tripods armed with human-built heat rays, which become major centerpieces of the action when a second Martian invasion takes place.
* War of the Worlds had New Jersey (specifically Bayonne) getting blown up. The film crew actually did blow up a small park in Bayonne as part of the movie (the crew rebuilt it afterwards).
* War of the Worlds. If they need to feed frequently on something as large as a person, though, then the amount of living matter inside of one is probably significant.
* War of the Worlds in history: The radio broadcast, done as though it were a breaking news story, which many listeners thought was really happening.
* War of the Worlds, it's revealed that the aliens piloting the giant tripods look like human-sized versions of their death machines, making them the extraterrestrial equivalent of humanoid mecha.
* War of the Worlds might be the earliest example. They have the technological know-how to create giant tripodal war machines and chemical weaponry, but...
* War of the Worlds: narcotics have been recently legalized, but this is presented as a symptom of the societal collapse that is in progress.
* War of the Worlds provide the page image, featuring three legs and two arms, evoking the tripod fighting machines they pilot.
* War of the Worlds, Ray spits out the pins of a couple of M67 grenades he uses to destroy a tripod.
* War of the Worlds reacted rationally, flooding telephone lines, rather than streets and highways, with calls to the radio station and police, to ask if it were true.
* War of the Worlds repulsors keeping it hovering in the air. (They originally planned to have the usual tripods, but the amount of money available and the limited technology of the day led them to change it to more fit a "Flying Saucer" motif)
* War of the Worlds says the aliens aren't from Mars and probably come from as far away as E.T..
* War of the Worlds shows the Martian tripods seeding the red vines across the landscape (apparently created by converting human biomass into a fine red mist and possibly contributing to the Martians' inevitable defeat by exposing themselves directly to the microbes inside human beings).
* War of the Worlds. Thanks to divorce induced estrangement and raging teenage contempt, it goes disastrously when barbed comments from his son incite Ray to put a lot of heat on his throws and hurt his son's hand, who then "accidentally" busted a window of Rays house.
* War of the Worlds, the alien rays blast people into clouds of dust with their clothes torn off.
* War of the Worlds; the narrator, hiding in the cellar of the wrecked house, is at the mercy of Martian war machines with heat rays and digging machines with all sorts of mechanical apparatus, but the Martian ultimately elects to open the door.
* War of the Worlds. The orifice that hangs over a Tripod's prison basket also uses a mechanical tentacle to pull people in to feed.
* War of the Worlds, the protagonist is (like in the novel, listed below) a dockworker trying to survive the alien invasion with his two children.
* War of the Worlds: The Second Invasion television series: "There's rioting breaking out from the city...fire is continuing to burn everywhere, troops are shooting people...there are conflicting reports about who or what started the chaos. Will some one tell me what's happening? This is madness! What is this world coming to?"
* War of the Worlds. "The Spirit of Man": 'If one man can stand tall, there must be

some hope for us all, somewhere in the spirit of man...'
* War of the Worlds, the Tripods used to invade the Earth were buried underground at some point in the distant past. A character in the film speculates that they may have been planted before there were any human beings on the planet, but at a minimum they precede recorded history and the oral tradition of any society with surviving descendants. This gives them a minimum age in the tens of thousands of years.
* War of the Worlds told Newsweek magazine in an interview that the aliens might be attacking for water.
* War of the Worlds, Tom Cruise's character enforces this by telling his daughter to sing to herself with her hands over her ears so she won't hear the sounds of his fight with Ogilvy.
* War of the Worlds: When Ray leaves the farmhouse looking for his daughter, he finds that a large portion of the surrounding countryside has been rendered red and unrecognizable by the Invader's terraforming abilities.
* War of Underworld, and just how cool and intimidating his abilities and weapon are.
* War on Drugs and the training or reforms that can help reduce unintended incidents and outrage is just not there. One of the common criticisms of "militarized" police is that they are not held to the same standards of discipline and training as soldiers of the same nation are when performing policing duties overseas.
* war on drugs in particular, or at least the approaches to it that involve prison sentences for the possession of illegal drugs. It is especially often applied to the US, whose prisons are regarded as especially likely to make hardened criminals and whose approach involves locking people up for so much as possessing soft drugs like marijuana for personal use. Sociologists have been trying to raise awareness of this, asking people to apply the concept of prison to other situations. For example: "If you had a child who was behaving poorly, would it help to take that child out of society, and place them in an environment where they are surrounded, 24/7, by other troublemakers?"
* War On Drugs is similar to the fight against crime that all countries have to deal with on one point: both are impossible to win strictly speaking and it's mostly a struggle to keep them below controllable levels for the foreseeable future. Unlike crime however, arguments against drugs are no longer as widely accepted as before with the rise of racial disparity in terms of prosecution, causing a lot of people to turn against the war on drugs like the aforementioned law enforcement of L.E.A.P..
* War, one of the biggest rock bands of the '70s, made it up to #2 with their highest charting song, but that song wasn't "Low Rider" or "Why Can't We Be Friends?", but the less iconic "The Cisco Kid".
* War On Everyone, who are taking down some real scumbags, but also taking the opportunity to get rich (and high) while they're at it.
* War only ever gets replaced in the unlikely event that, at any given moment, there isn't any war anywhere in the world. The moment does not have to last very long, and indeed usually doesn't.
* "war" over Hans Island until, in 2005, the two countries finally decided to resolve the issue once and for all but little has actually happened — presumably they couldn't agree on what to drink during the negotiations.
* Warp 10 wasn't just a theoretical limit, it was infinite speed. Can't go faster than infinite speed, so the scale must indeed have been changed.
* Warp and Weft includes some paper intended to be folded into an origami crane; Veirs pledges to donate a dollar to a peace group for every crane returned to her. This is in reference to the track "Sadako Folding Cranes".
* Warp Angel by Stuart Hopen features a mercenary who, much to her surprise, falls in love with a rabbi/prominent religious leader who later gets kidnapped and shipped to a hellhole planet. The marriage was already kind of weird for her before that, and later Adam tries to figure out how one keeps kosher on the planet (by eating weeds).

* Warp Angel, there are 'acid swords'. An acid sword is force-field projecting hilt that shapes an extremely corrosive pool of acid into a blade. Getting hit by one tends to result in limbs getting melted off and large gouges getting burnt into flesh. The acid sword is so corrosive that, with the exception of the force field of another acid sword, the blade will dissolve through anything in the story setting including hardened far-future alloys.
* Warpath, Brawl, Guzzle, Quake, and others also had tank altmodes. RiD!Armorhide also has a tank alt mode. The triple-changer Blitzwing usually has a tank as one of his alt modes. Even
* Warpath, during Kira Nerys' vision quest her imaginary troops implicitly correspond to the people she interacts with in the real world, in a similar manner to Sisko's "Benny Russell" visions. The names are the most prominent clue, being anagrams of the usual characters' names.
* Warpath. Not much is known about them, though, mostly because they are very secretive and determined.
* Warp. Back when she was a teenager, Antares usually charged headfirst in any situation, trusting her force field to deflect any physical strike. Her adult self is reluctant to take unnecessary risks, so she fights more carefully and cleverly.
* warp, commanding the armies of their gods in their eternal internal struggles, though they're sometimes called back to the material realms whenever the tides of Chaos are strong enough to allow a demonic incursion.
* Warp Darkmatter is somewhere between this and and his arm being the cannon. Normally, he has a robotic claw hand at the end of his artificial right arm, though it has been switched out with a laser cannon and a flamethrower.
* Warped Path of Time, and finally a giant boss called the Gatekeeper.
* Warped, though with Tropy clearly the spearheading and eventually betraying Cortex as well in favour of a more efficient accomplice.
* warped to question them, let alone work around any existing loopholes for moral purposes. Or to work out when he's completely flunked Comparative Religion 101, for that matter.
* War percussionist Papa Dee Allen suffered a fatal heart attack in 1988 during the band's performance of "Gypsy Man"; the band retired the song from its setlist in his memory.
* Warpfire fire drawn from the warp. It's chiefly the domain of Tzeentch (whose daemons are little more than living flamethrowers) and Khorne (whose daemons often brandish weapons wreathed in warpfire). Oddly enough, since they are Chaos, their warpflames might also have the effect of freezing enemies instead (so hot they wrap around and go into negative temperatures) or do something else altogether. The effects are generally spectacular, though.
* warp, flects are a much more insidious example than most others on this page…
* War Pigs which was recorded but never released. Hence, why "War Pigs" contains references to witches and Satan.
* Warp in the West effects of the Warp in the West, he also remained as a "mortal" being (or at least, as mortal as a Lich can be.)
* War Planets by virtually every planet being designed and built, not evolved. The Cluster in particular was created as a quartet of interdependent worlds. The adaptation took it a lot further. Bone provides food, Rock provides minerals, and Fire provides energy. They even have world engines inside.
* War Planets, involved an ages-long war between four planets, until they are all forced to cooperate because they are attacked by a fifth, far more powerful enemy.
* War Planets, the Beast Planet's commander, Blokk, has a tendency for his skeletal face to begin visibly vibrating as static blurs across the image, creating a very freakish sight. It's originally presented as something akin to a nervous tic, but later implied to be more something he does deliberately.
* War Planets; the new king, since he wasn't going to hang around long enough to make it worth creating a new character design, was depicted by another instance of the same anonymous armor.
* War poets such as Siegfried Sassoon and Wilfred Owen subverted this trope

slightly in the sense that they wrote about hating war whilst continuing to serve as soldiers (since they would still have viewed fleeing as treacherous and cowardly). Rudyard Kipling played it a little straighter in the sense that he likewise took on a less jingoistic tone in his poetry after his son died in battle, but he continued to view the concept of besmirching soldiers or the war effort as little better than treason.
* Warp, Oni Lee shoots Victoria Dallon knowing fully well she's protected by a bulletproof personal force-field. Vicky catches the crumpled bullet and just stares at him. Then Oni Lee shoots her again.
* Warp Pad, much to Steven's horror. Afterward, the following exchange occurs:
* Warp-powered gravitational slingshots are used a method of time travel in the franchise, especially in
* Warpspace/realspace overlap. As luck would have it, warp storms sometimes have beneficial effects as well. At one point the Imperium of Man found a Stone-Age alien species on an uncharted world, and as per normal procedure tasked forces to exterminate them. A warp storm blew up and rendered the star system off limits for about 6,000 years. Then the storm dissipated and the Imperium tried again, only to discover that in the interim the aliens in question, the previously mentioned Tau, had become a spacefaring culture more technologically advanced than the Imperium and fended off the incursion quite handily.
* Warp Speed factors would be inconsistent depending on the incarnation. About the only thing clear is that the scale is exponential rather than linear. The original Enterprise was said to have a max speed of Warp 8, but had aliens modify the drive to temporarily reach warp 13. By the Next Generation era it was said that Warp 10 was a theoretical limit break for conventional warp drive
* warpstone; and also a concern to enterprising mercenaries who know that it's worth more than it's own weight in gold, and to the Empire loyalists who are working hard to make sure every last fragment doesn't make it out of Mordheim.
* warpstone, food and slaves. Skaven only value gold in that it can be used to bribe man-things.
* Warpstone is Chaos energy solidified into crystalline form, so while it's still as corruptive as true Chaos, it can also be used as
* "Warp the Rainbow" has one guy eating skittles from an hourglass that represents his friend's lifetime. The friend comes in as an old man and as he continues to age before the guy's eyes, the guy
* Warp to travel faster than light. That project pretty much died thanks to the events of the Heresy, when Magnus accidentally broke the barriers that protected the gate from the daemons. The gate collapsed into a warp rift that will consume Holy Terra itself when the Emperor finally dies.
* Warp travel, if you even get there at all. A graphical history for a given ship would more closely resemble a circuit diagram than a timeline if plotted out.
* Warp travel theoretically lets you go anywhere if you're willing to put up with the inherent dangers of traveling through
* Warp wakes up and finds she has somehow returned to the past before her boyfriend's death and the end of the world, she quickly wonders if she is trapped in a psychic illusion modeled after her own desires.
* Warp Whistle: In real life, you can't just open a map, select a location, and instantly appear there (or pay to suddenly appear there at a specific spot), but if it saves you from trekking across a huge world, no problem.
* Warp WhistleInstantaneously teleport to any location you've been to before.
* Warp Whistles, which let you skip entire worlds. There's two in World 1, and using them together can take you directly to World 8, bypassing almost the entire game.
* Warp Whistle to take the player to any waypoint on the Perfect World Midlands map.
* Warp World setting, where—among other character combinations—Captain America is amalgamated with Doctor Strange into Soldier Supreme, a magically-powered American soldier fighting Hitler's priest of Hell, Dormammu Red, and becomes trapped in the Dark Dimension for decades instead of becoming frozen in

ice.
* Warp Zone: A secret area of a video game that allows you to magically teleport to another level, possibly offering you a choice of levels.
* WarpZone Project in such a way that if someone actually runs into super-heroes or super-villains doing their usual super-hero and super-villain activities, the memories change into the impression of remembering a scene from a comic book or movie featuring the characters.
* WarpZone Project that is being held up by a super-hero that supposed to let him go sooner or later asks if the emprisonment will last any longer because he's late to take a school bus hostage.
* WarpZone Project, this is the case of Eve Bones. She's been alive at least since Renaissance times, as she mentions that one of her rings dates from that period.
* Warrant and ultimately one of those responsible for the "Parental Advisory" sticker on music. The album has a "Parental Advisory" sticker solely because of this track.
* "warrant canary" statements declaring that they have not been served with any secret government orders to hand over customer data. Removing the statement invites the obvious conclusion while not technically violating the gag order.
* Warrant) concerns Sheriff John Brady and Deputy Hedge, two corrupt small-town cops who murder two people and throw them into the Wishing Well. The protagonist and his uncle witness them getting rid of the bodies, but do not tell anyone for fear of being next.
* Warrant disposing of two people they murdered by throwing them in the Wishing Well.
* Warranties often have clauses that say if the customer treats a product in a way that leads to damage that is outside normal usage of the product, the warranty is void.
* Warrant: "In walked her daddy/standing six-foot-four/said "you ain't gonna swing with my daughter no more".
* Warrant Officers in particular are often portrayed as ingenious improvisers who are great at fixing thing but have kleptomatic tendencies.
* Warrant's biggest hit, "Heaven", while still a classic, is not nearly as well-remembered as "Cherry Pie."
* Warrant's "Cherry Pie" has one very quickly, just before the final verse begins: Jani Lane shouts "I'm a trained professional!" over a brief guitar solo.
* Warrant's "Cherry Pie" has the line "Think about baseball and swing all night!"
* Warrant's "Cherry Pie", written in about twenty minutes at the request of the producer who didn't think the album they'd recorded had a radio hit. This joke song worked far better than intended, overshadowing their other work to the point that many people think it was actually recorded by Poison.
* War Reenactors-class frigate fleet also bears the names of Republican moths.
* War Refugees: Civilians who have been rendered homeless by the chaos and destruction of war, fleeing for their lives by staying in refugee camps or migrating to safer countries.
* War Refugees, especially for unarmed civilians who get in caught in it, being forced to flee far away from their ruined homes in order to try and survive the bloody chaos.
* War Refugees: People whose homelands have been brutally devastated by civil war or foreign invasion, so they have fled for their lives by migrating to safer countries.
* Warrel Dane and Jim Sheppard for both their excessive alcohol consumption and their mean, obnoxious, immensely offputting behavior while drunk, and it's been hinted by Jeff that this was part of why he and Van both left the band and essentially caused it to be put on indefinite hiatus.
* Warren about the whole thing, which is generally considered to be very worrying.
* Warren Beatty could not. They've been married for going on thirty years and have four kids: Stephen, Benjamin, Isabel, and Ella.
* Warren Casey had written a solo song for Danny, but had never titled it and it was scrapped. It was added into the 2011 production with the title "How Big I'm

Gonna Be".
* Warren Clarke called Andy. The part was dropped, but he did play multiple roles, as did the rest of the cast.
* Warren comes back in the comics, and it is explicitly mentioned he was resurrected by
* Warren does succeed in killing Tara, even if by accident, who comes dangerously close to destroying the Earth.
* Warren Ellis, a dark crime drama about a cop going through a nervous breakdown, at a convention he was asked who would win in a fight between Batman and the main character.
* Warren Ellis advanced people who came from another planet to Earth in the past and interacted with more primitive humans.
* Warren Ellis dies or is zombified by the end, it's not like they were singled out).
* Warren Ellis, Doc Samson shrugs off a hit to the groin from Moonstone, quipping "Oh, trust me. It's ALL gamma-enhanced."
* Warren Ellis features a variant of this trope when the protagonist stumbles into a conversation with a demented fellow mystery explorer that mentions a homicide by Anal Dentata. Yeah, the book is kind of like that. Warren Ellis is kind of like that.
* Warren Ellis has Mr. Knight fighting his way through an entire brownstone house to rescue a kidnapped girl, including several hallways.
* Warren Ellis has Tom Noir use his old girlfriend's gun to blow up a cemetery, taking both John Horus and Frank Blacksmith with him, thus taking out the main people behind the whole situation.
* Warren Ellis insisted that she be a named Joe, they gave Ellis a list of names, and that's the one he picked.
* Warren Ellis is about an ex spy who, after being fired for constant drunkenness, "volunteered" to have this done to him. He emerges from it a hallucinating, insomniac, sociopathic albino with a completely withered body.
* Warren Ellis is an homage to kaiju manga and anime, with an eye turned toward realism as the robots and kaiju cause massive property damage and send literal waves of kaiju blood washing away civilians.
* Warren Ellis is a warts-and-all depiction of the famous Battle of Crécy in 1346. The narrator acknowledges the dissonance, describing himself as "a complete bloody xenophobe who comes from a time when it was acceptable to treat people from the next village like they were subhumans" and admitting that by modern standards his side have been "acting like evil pricks", but insists that the other side was even worse.
* Warren Ellis is only referred to as this. His "prey" are human beings, although he doesn't seem to recognize them as such.
* Warren Ellis. It's worth noting what the backup plan if the good biofeedbacker lost was - destroy the entire building complex with an air strike.
* Warren Ellis. Known to his fans as Dear Leader, the Internet Jesus or the Love Swami, among other similar monikers. Once commanded a Holy Slut Army of fans.
* Warren Ellis' "Ministry Of Space", Sir John refers to Britain's space dominance as "this new ocean above Britannia's shores."
* Warren Ellis, one of the magicians Gravel faces calls the Wild Hunt down on him.
* Warren Ellis run, he realized Thor would need to be at full strength. To that end, he wrote a scene where Thor banged Mjolnir on the ground while reminiscing about the good old days, which somehow magically restored his powers. The closest thing to an explanation given was "Even a god may believe in miracles," which still isn't much of an answer.
* Warren Ellis's approach to grilling: MAN COOK MEAT WITH FIRE. Not "man show fire to meat and then eat it while it still squirts and pulses." KILL IT DED WITH FIRE YUS. "Medium rare" = "good vet could get it up on its feet in an hour or two." That's not cooked with fire. That's THREATENED with fire. I do not season steak. Start seasoning steak and before you know it? You're French.
* Warren Ellis; Skywatch calls it "Little Stick", a single diamond rod too small

for radar detection, dropped into the atmosphere over a target and striking with the force of a tactical nuke. Bendix uses one to level a recently-evacuated I/O base and threatens he could easily do the same to their New York City HQ.
* Warren Elliss, there's a "spiral of realities" stretching above and below, with the universes "downspiral" being significantly more chaotic and difficult for life to develop/survive in than the the relatively advanced and idyllic universes located "upspiral".
* Warren Ellis story, people at Scans Daily pointed out that genetics don't work that way. Ellis admitted his mistake.
* Warren Ellis, the coroner presents a rotten corpse to Detective Fell while eating a sandwich. After taking a bite, a piece of tomato falls into corpse's chest cavity. The coroner reaches in.
* Warren Ellis, the Hasbro executives told him that he couldn't have Cobra Commander wipe out Beijing; however, they were fine with him wiping out Moscow (Hasbro toys are manufactured in China).
* Warren Ellis there is a brief mention of some Russian scientists who discover that souls are merely electromagnetic fuel for a war between Heaven and Hell. They decide to check out on an A-Bomb, so that the EMP blast will destroy their souls.

* Warren Ellis: When told to call (555) 555-5555 for help, Mike demonstrates his detective skills by pointing out that the number won't work, as it's only used by Hollywood. To which the Chief of Staff responds, "We gave it to them. It works for us."
* Warren Ellis, who, after finding out that the President is out to kill him, walks into a bar and orders 37 shots of whiskey. Earlier, after a particularly frustrating episode, he produces a shot, downs it in a blink, then shatters the shot glass against the wall (later on, his assistants copy the move perfectly at a bar to vent their own stress).
* Warren Ellis, with the twist that humanity is ultimately responsible for the very creation of the incomprehensible god-things whose very existence renders it insignificant.
* Warren G had two Top 40 crossover hits: "Regulate", a duet with Nate Dogg, went to #2, while the solo follow-up "This D.J." reached #9.
* Warren G. Harding once misspoke in a political speech and accidentally invented the word "normalcy." Nowadays, it's more common to see it used than "normality," the word Harding was supposed to say that means the same thing. At any rate, "normalcy" is attested (if rare) before Harding. The phrase "Return to Normalcy" (Harding's campaign slogan) is now so ingrained that many think it sounds more natural than "Return to Normality"
* Warren has a distinctive downward chopping gesture that he makes with both hands when he's annoyed.

* Warren killed Tara with one because her husband's father, Freddie Prinze Sr., killed himself with one. Her anti-gun stance would eventually be incorporated into most of her later roles.
* Warren Mears makes a number of robots for this specific purpose (including Spike's Buffybot, which totally creeps Buffy out) and his own girlfriend April.

* Warren Mears starts off as a harmless geek, but in Season 6, his anger over his inability to get a date, and subsequent poor luck when he does, leads to him descending into this.
* Warren originally created a robot that would obey his every whim, but he eventually abandoned the android because he wanted a girlfriend that would be a partner in the relationship and he fell in love with a woman with her own ideas and personality. His creation of a
* Warren Peace has the Squelchers, an alien race with no less than six different sexes, each one with its own unique appearance, and with a reproductive cycle where each sex fertilizes the others in turn. The forms look so different that, to the vast majority of the universe, the species only consists of the fourth sex, which resembles an orange haired saggy sasquatch (kind of like a blown up balloon that's developed a slow leak) with multiple eyes in a ring around its head (usually covered by its fur), oversized feet that let it wade on water, and two giant red nipple-like gamete sacs positioned one above the other on its torso. The fifth sex, the only other one mentioned, is described as being indistinguishable from a tree, except for the presence of a pair of two dual-pronged ovipositors (they look almost identical to staples) sprouting from its trunk.
* Warren's accidental killing of Tara. Is Warren taken seriously as a villain? Yep. Is he alive? Not so much.
* Warrens of Oric the Awesome just hit its 5000 posts mark — that's over 300 pages, with updates almost every 5 to 20 posts.
* Warren the 13th, Annaconda is described in her first appearance as a witch. It initially just seems like the author's way of describing how cruel she is, but then we learn that "witch" is absolutely literal. She and her sisters are genuine, black-magic-casting witches who crave power.
* Warren the 13th is described as looking toad-like, thanks to his huge eyes, elongated jaw, and misshapen teeth. This is a minor source of angst for him, as all the other Warrens before him were known for being physically attractive.
* Warren the 13th is in the boiler room of the hotel, we see a bunch of creepy red eyes glowering at him. Subverted when it turns out that the monster they belong to, Sketchy, is very friendly and means no harm at all.
* Warren the 13th notes that his father, Warren the 12th, had a strong jaw. It serves to perpetuate his kindly-but-strong appearance.
* Warren Zevon," and closes with the melancholy "Keep Me In Your Heart." He passed away two weeks after its release.
* Warren Zevon carried a much more depressing tone than his previous albums, as Zevon was dying of lung cancer and the album was meant to be his swan song.
* Warren Zevon, describing a consumer-driven hell of a dystopian future.
* Warren Zevon enjoyed holding the last syllable of "Berkeley" in live versions of "Roland the Headless Thompson Gunner" — in the album version it's only 2-3 seconds, but on Learning to Flinch it's a good 17 seconds.
* Warren Zevon is set in a very cyberpunk-influenced future. Life is cheap and death is free. Join us in this neon vistas. Ravaged tenaments and laser hologram equipped shopping centers. Dominated by the clergy of the mall.
* Warren Zevon is the ballad of a Canadian hockey player who was best at beating other players up but who would rather score goals if he could.
* Warren Zevon. It's them implied he goes on to become a spirit of conflict, following the major ideological wars across the world and in some cases inciting them ("Patty Hearst/heard the burst/of Roland's Thompson gun/and bought it"). Notably, David Lindell, the man who co-wrote the song with Zevon and inspired him to write it, was a former mercenary.
* Warren Zevon's 'Mr Bad Example' has a phase of this in Australia, stealing the wages of the aboriginals he has hired to work the opal mines, after previous occupations as an altar boy (where he stole the collection), a carpet fitter (where he laid his clients' housewives and stole their furnishings), a lawyer (when he counselled all his clients to plead insanity), a hair replacer ('swindlin' the bald!'), and a gambler (where he lost all his hair replacement money, mugged a prostitute for her passport and her wig, and caught the midnight flight from Monte

Carlo to Adelaide). The song ends with him having to flee another country, cash in hand.
* Warren Zevon song "Poor Poor Pitiful Me" is a masterpiece mixture of this and complete obliviousness.
* Warren Zevon's "Werewolves Of London" has become an oldies radio staple in the UK despite never reaching the Top 75 at all.
* Warren Zevon then tracks the traitor all the way across Africa for revenge and ends up blowing his entire body away.
* Warren Zevon was also crafted after the singer was diagnosed with inoperable lung cancer, and reflects his impending mortality. He died approximately two weeks after it was released.
* War Requiem apart. The first sung line from Wilfred Owen's poetry makes the implications clear: "What passing-bells for these who die as cattle?"
* Warrick informed the father of a little girl killed in a drive-by that it could have been one of the local gangsters. The father went after the guy. The real killers were some kids that he had thrown out of his youth center.
* Warring Natures: A child whose parents are members of different groups that are currently at war with each other.
* Warring Natures. And those two races also happen to violently hate each other. Do I really have to choose a side?
* Warring States Period/Sengoku-jidai naturally featured all the major warlords of the period. The aforementioned Samurott even serves as "link" partner of one of the major characters (though obviously not the only one), and most Pokémon in the game act and are treated as loyal retainers anyway.
* Warrior (2019) and go to war to defend their home. In the end, the mob are driven out.
* Warrior2019 has just about every major Asian character know martial arts. The non-Asian characters tend to be adept fighters in their own right.
* Warrior: Although the sport itself is treated pretty realistically, the idea that MMA is a brutal bloodsport where competitors could die at any moment is played up for dramatic effect, particularly with Brendan's wife.
* Warrior and Mage, Валентин Иващенко):
* Warrior and the book collapsed before any of this could actually appear.
* Warrior Born and peace, becomes a scene of bloodshed. Many of the Xarkonian soldiers involved in the coup are not even aware of the truth behind the incident, including the Enomeg super-soldiers.
* Warrior, but still takes liberties. For example, one character very obviously gets his arm broken in the middle of a bout, but continues to fight on. In reality, getting your arm broken would result in an immediate stoppage, no matter how much you want to continue fighting. For example, Tim Sylvia was forced to concede the UFC heavyweight title after getting his arm broken by Frank Mir, despite his pleas to continue fighting.
* Warrior card game; which consists almost entirely of humans, and they are capable of taking on all kinds of freaky creatures.
* Warrior Cats about how the Clans first formed. Due to fan demand, they published a book taking place after the fourth series, which then continued into a sixth and seventh series continuing the main storyline.
* Warrior Cats, a couple of RiverClan cats do this to rescue a cat stuck in deep mud.
* Warrior Cats: A fight between Graypaw and then-housecat Rusty marks the beginning of their long-lasting friendship (and Rusty's invitation to join ThunderClan) when Rusty defeats the better-trained Graypaw.
* Warrior Cats, after Finleap pressured Twigbranch (who is still a very young warrior) into having children with him, threatening to leave the Clan if she refused, and acting cruelly to her when Twigbranch called him out on it.
* Warrior Cats. After Finpaw's tail has to be amputated, he and Twigpaw jokingly suggest holding a vigil for it and visiting its gravesite to pay their respects.
* Warrior Cats, after the first one, also started doing a short manga chapter at

the end that shows a brief scene that takes place after the end of the book.
* Warrior Cats a group of ShadowClan elders agree to help the ThunderClan warriors recover the kits ShadowClan had stolen. They drag former ShadowClan outcast Yellowfang into the camp and present her to their leader as their prisoner as they sneak the ThunderClan warriors into the camp.
* Warrior Cats, a human girl has picked up Feathertail, who is unable to escape the girl’s grip without hurting her. Squirrelpaw decides to act cute to try to distract her, which works. She then informs the others that she’ll claw them if they tell anyone she purred at a Twoleg.
* Warrior Cats, a kittypet named Velvet comes to the ThunderClan camp looking for help after she was burned when her house caught fire. She and the medicine cat Alderheart start to develop feelings for each other, but ultimately both of them accept that it wouldn't work out due to their different lifestyles, and Alderheart's calling as a medicine cat means too much to him to break his vow and take a mate.
* Warrior Cats, all leaders appoint a "deputy", who is the second in command and succeeds them when they die. Both leader and deputy have quite a bit of responsibility, with the deputy doing jobs such as organizing all patrols.
* Warrior Cats: All new apprentices are eager to go into battle but their mentors won't allow them till they've had proper battle training.
* Warrior Cats allowing Firestar to mate with Tigerstar. The fact that he mated and had kits with her is glossed over.
* Warrior Cats, almost all of the point of view characters in the main series are the descendants of the living legend Firestar, the first hero of the series.
* Warrior Cats, although she isn't his mentor in the sense the series usually uses the word (training the character to be a warrior or medicine cat), Yellowfang serves this role to Fireheart; she's the elderly, dear friend he always goes to for advice. She later becomes Cinderpelt's actual mentor (training her to be a medicine cat) and does the same for her, and they both remember her wisdom after her death.
* Warrior Cats, an ancient WindClan warrior named Rabbittail is stuck in a snare.
* Warrior Cats and a leader would probably face outright revolt if they tried to rule this way.
* Warrior Cats), and a six month gap between the second and third series. The fourth series is also supposed to start around six months after the end of the third.
* Warrior Cats. And don't you dare suggest otherwise. Perhaps justified in that this is pounded into your brain for over twenty books, and not bothering with grammar rules automatically gets you labeled as an idiot on the major forum.
* Warrior Cats; and even Jingo, a cat trying to protect her band of former kittypets after their lives were ruined by Sol.
* Warrior Cats and fan-artist community the series has received. Many come across an animation on YouTube and become interested in reading about the series about dramatic, talking cats.
* Warrior Cats, and got pushed around and beaten up by the other characters in all but one of his appearances.
* Warrior Cats and has special powers, and wishes she could be normal like every other cat; her sister Ivypool is normal but is jealous of all the attention her sister gets. There is plenty of friction between the two as a result.
* Warrior Cats and he'll always love her (maybe even more than he loves her).
* Warrior Cats and overcomes oppression to become the first kittypet-born Clan leader ever.
* Warrior Cats, and sees that the ninth cat is her son who died as a young kit.
* Warrior Cats, and the fact that his prophecies are often misleading.
* Warrior Cats A potential meta reason for him not being punished for his crimes is that one of the authors said she empathizes with him because she too has done crazy things for love.
* Warrior Cats Appledusk as rejecting his children as well. Appledusk's cruelty towards his own family makes him one of the most despised cats in the series, yet he never laid a claw on anyone.

* Warrior Cats, apprentices are assigned mentors at six months by the leader, with the entire Clan watching. Becoming a warrior requires an assessment of skills, an oath to defend the Clan with one's life if necessary, and a vigil. The new warrior must guard the camp alone all night, and is not allowed to speak until dawn, except to raise the alarm in case of attack.
* Warrior Cats arc, Bramblestar's body is hijacked by a spirit pretending to be him. This cat insists that the only way to restore the Clans' connection with StarClan is to punish "codebreakers" - no matter how serious - or not - the crime. Had a forbidden relationship with a cat from another Clan? Exile. Left the Clan for a while but later returned? Exile. Accidentally took a couple steps across the border? Exile. Questioned his orders by asking him to please un-exile the medicine cat? Exile!
* Warrior Cats arc, Lionpaw and Heatherpaw (who are both young apprentices) become friends and begin to sneak away at night to play with each other, and they start to realize that they have actual feelings for each other.
* Warrior Cats are all trained to fight unless they're physically incapable of doing so. And some medicine cats were warriors before becoming medicine cats, which makes them even more skilled in battle. They don't normally need to fight, as they're not supposed to be acceptable targets, but woe betide anyone who breaks that rule.
* Warrior Cats are doing a pretty good job of tying things up recently.
* Warrior Cats are forced to train in the brutal battle training, and many end up dying. Dark Forest training also counts.
* Warrior Cats are implied to have had kits after only mating once or twice. This is especially troublesome as a few of these are cross-Clan couplings.
* Warrior Cats are often presented as too small for their age. Kits that are four or five moons old aren't much bigger than three months olds. Real kittens at five months can be half as big as their mothers or even almost adult-size. There are some exceptions, though, such as when some apprentices are carrying around older kits and find them surprisingly heavy.
* Warrior Cats, a rogue named Slash kidnaps Clear Sky's mate Star Flower, saying that the forest cats need to hunt prey for them like the strays that lived there used to.
* Warrior Cats as a fearless warrior. By the next series, she's an anxious wreck who stays in the nursery taking care of her kits and fretting over them.
* Warrior Cats, as HarperCollins doesn't set strict embargo dates on the books, some stores sell them before the release date, and spoiler threads prior to release used to be a regular thing on official and fan forums. According to one of the official forum's mods, it was legal and they'd allow such posts; it was just that if HarperCollins figured out which stores did it regularly they might delay shipments to that store until after the release date.
* Warrior Cats - a somewhat major character. There's also the case of the elders who stayed behind instead of going to their new home. Did they eke out a life in RiverClan territory, accept food from humans, or die from starvation or the humans' machines?
* Warrior Cats, as well as their rocky history. She's determined to protect her sister from the humiliation and heartbreak such a relationship would bring.
* Warrior Cats as well. Ironically, Cloudtail is white-furred. His pelt colour is another reason why he's looked down upon though. Most ThunderClan cats are "foresty" colours like grey, orange, or tortoiseshell, with pure-white being very rare.
* Warrior Cats attempts to dispose of Ashfur's body by tossing it in a stream, hoping he'll be swept into the lake, the Clan would think he just mysteriously vanished, and that would be the end of it. Things don't exactly go as planned.
* Warrior Cats, a young girl falls into the gorge, and the cats know that it'll mean that other humans will be looking for her - not to mention that half the Clan are or were kittypets that don't want a human to be hurt. When initial attempts at leading other humans to the gorge fails, they get various items out of the girl's backpack and create a trail leading to the gorge.

* Warrior Cats, become united and willing to die for each other like one.
* Warrior Cats Beetlenose comes flying out of the Nursery, squeeing about how cute Crookedstar's daughter Silverkit is. Keep in mind that he's a very nasty cat, and even he found her cute.
* Warrior Cats, Beetlepaw is complaining about having Ottersplash as his mentor when his littermates suddenly try to shush him. He's confused about why, until Ottersplash makes a comment from right behind him, and due to his lack of respect, assigns him to spend the afternoon cleaning the elders' den.
* Warrior Cats, Berrynose steps on a thistle and hops around on his other three paws.
* Warrior Cats, Berrynose was in love with Honeyfern, but Honeyfern died of an accident. Moons later Berrynose mated with Honeyfern's littermate, Poppyfrost.
* Warrior Cats, Blackfoot's nine lives ceremony works this way. He is told before it starts that he can leave at any time if it becomes too much, but that means another cat will have to lead instead. In order to receive each life, he has to relive a memory of his evil actions. These become increasingly more difficult to bear, and he's asked between each one if he wants the life. Although he falters and is tempted to leave, he eventually becomes certain that he needs to complete it for the sake of his Clan.
* Warrior Cats, Bluefur attacks the enemy warrior Oakheart, but misses and falls into a river. Bluefur begs for Oakheart to save her, but he laughs and tells her to stand up, because she was "drowning" in shallow water.
* Warrior Cats book, a pack of dogs gets loose from the tree farm that they were being kept in to guard, and they end up living in the forest. While escaped dogs might not be the scariest thing to a human, they were a big threat to the cats living there.
* Warrior Cats book, Bluestar's recruitment of Rusty is considered to be this by most cats, since recruiting house cats with no fighting experience is basically unheard of in the Clans.
* Warrior Cats book, Fireheart has a nightmare of a faceless queen losing her kits.
* Warrior Cats book, Jayfeather goes back in time to the ancient incarnation of himself. He first sees it just as part of his duty, to make sure he sets certain events in motion so that they affect the future, but then he falls in love. He wants to stay in that time period, but isn't allowed to because he's still needed in the present day.
* Warrior Cats book, Longtail doesn't want Rusty to join the Clan because he was owned by humans, and the two fight. There's a moment during the battle where Longtail grabs the back of Rusty's collar and begins using it to strangle him. Rusty struggles forward until his collar snaps, and the Clan leader stops the fight, saying that it's a sign that Rusty is meant to join the Clan.
* Warrior Cats books, a group called The Sisters makes their young males leave at the age of six moons. They hold a ceremony, and after that the young tom is ordered to walk through the night without looking back or stopping. It's part of them leaving their kithood behind and becoming an adult by their standards.
* Warrior Cats books are made up of several "sagas" that cover completely different parts of the world with a handful of intersecting characters.
* Warrior Cats book SkyClan's Destiny works this way, with the current-day story of SkyClan interspersed with chapters from Stick's point of view, back before he left the city, some time earlier than the main events of the book.
* Warrior Cats Bramblestar, and manages to escape during the ensuing fight. He tells his Clanmates afterward that his injuries were from an owl, but they don't really believe him.
* Warrior Cats breeds, such as Bluestar looking like a Russian Blue with the wrong eye colour and Yellowfang resembling a Persian, which also spurs interest in breeds.
* Warrior Cats: Brightheart was savaged by a pack of dogs, who mangled her face to the point that she lost an eye and parts of her skull were showing even after she recovered. She was even called "Lostface" for a while, but fortunately, Firestar renamed her.

* Warrior Cats) but their adherence to the 'warrior code' resulted in a lot less death and paranoia.
* Warrior Cats came out; it's a prequel about the founding of the Clans, set at least a few decades before the modern books.
* Warrior Cats can do a little of this trope- enough to explain simple things like names, but not sophisticated concepts (like precognition or the Moonpool) to someone entirely ignorant of them.
* Warrior Cats can help them save some cats from the Tribe of Rushing Water, and his father Tigerstar refuses to let him go. She gets caught by Tigerstar and they make an agreement for Tawnypelt, Shadowkit, and Shadowkit's mother Dovewing to leave together legitimately instead.
* Warrior Cats, cats have a variety of phrases that are synonymous with human curses, such as "fox dung" (and similar terms) for "shit".
* Warrior Cats, cats seem to bite each other's tails in battle often. Kits also often practice pouncing on the tail of an unsuspecting older cat.
* Warrior Cats character had contained either a prophecy, a glimpse into the future, or allowed them to speak with their ancestors.
* Warrior Cats characters tend to be depicted as adorable, no matter how they canonically look.
* Warrior Cats, characters tend to be the subject of a prophecy or take on a role like a leader if it happened to their mentor or parents. For instance, the last few ThunderClan leaders have been a series of mentors and their apprentices: Sunstar mentored Bluestar who mentored Firestar who mentored Bramblestar. Hawkfrost tried to take over the Clans like his father Tigerstar and there was a prophecy about the final confrontation that stopped each one. Being the subject of a prophecy and saving the Clans in some way also seems to run in Firestar's bloodline.
* Warrior Cats, Cloudstar gives one to his Clan after they lose an important battle, in order to keep their spirits up and encourage them to fight another day.
* Warrior Cats: Cloudtail fell for Brightheart before she was maimed but didn't begin courting her until after the incident. Brightheart was mauled by a dog, which left her with serious facial scarring and only one eye.
* Warrior Cats complains that the ThunderClan leader Firestar is letting too many kittypets (house cats) into his Clan and tainting the blood of the Clan. Another cat immediately points out that Berrynose himself was a kittypet that Firestar let into the Clan, only for Berrynose to try to claim that it's different.
* Warrior Cats, Crookedstar calls Mapleshade insane after she explains how she tried to get revenge on him, while pretending to be his mentor, all along.
* Warrior Cats Crookedstar is afraid that having a loved one will make him soft. This is further pushed by his spirit mentor Mapleshade, who tries to convince him that his relationship will turn him weak, and push him away from his great destiny, and so this trope becomes one of the central conflicts for Crookedstar.
* Warrior Cats, Crookedstar's apprentice Sedgepaw speaks rapidly, to the point that he asks her to slow down and she even admits that she talks too much... before continuing to "chatter like a blackbird" in more run-on sentences.
* Warrior Cats, Crowfeather and Nightcloud's relationship has been described by the authors as one: he knew that with a mate and kits he'd be trusted more by his Clan again, and Nightcloud figured that he was a strong young cat that was going to be "going places".
* Warrior Cats, Daisy's main role is to care for the kits and help new mothers with the trials of motherhood. She's a literal team mom.
* Warrior Cats: Dawn of the Clans does this for Bumble. While the other cats are wondering whether Bumble should join them or not, Wind Runner bluntly tells her that she can't because she doesn't know the ways of a wild cat.
* Warrior Cats: Dawn of the Clans: Gray Wing is running freely and happily on the moor he recently arrived on, only to crash into Wind and Gorse, the future founders of WindClan, and ruin their hunt. They get off to a bad start, but later they do become pals.
* Warrior Cats den and eventually makes Cinderpaw her official apprentice.
* Warrior Cats depicts an unaware Fireheart as Tigerclaw sneaks up on him.

* Warrior Cats: Dovewing dishes this out on Bumblestripe in Bramblestar's Storm. She broke up with him because she still loved her last mate, Tigerheart, and legitimately felt bad for stringing him along for so long.
* Warrior Cats equivalent, and ended up getting into trouble with the editors for it.
* Warrior Cats. Even he is surprised that his enemies keep falling for it after a while. Other warriors throughout the series use it on occasion, though it's usually subverted when their opponent doesn't fall for it and dodges the surprise attack.
* Warrior Cats even shows that he snapped Yellowfang out of her depression just by talking with her for a few minutes.
* Warrior Cats everyone that he was, Thrushpelt still loved the kits as if they were his own and behaved as if they were, and both of them were fine with everyone assuming that they were mates.
* Warrior Cats: Everyone. They aren't outright happy or excited (except maybe Lionblaze), but no one seems to be at all fazed by all the bloody battles in the series. Quotes from various characters:
* Warrior Cats fans will never let Longtail live down getting beat up by a kittypet in the first book. To make it worse, Rusty couldn't have been much older than a kit, so it's basically like getting beat up by a ten year old who's never fought anyone before.
* Warrior Cats finds himself stuck in the time of the Ancients twice. He manages to leave both times.
* Warrior Cats, Fireheart starts falling for Sandstorm after Cinderpaw tells him everybody can see that Sandstorm is very much into him.
* Warrior Cats, Firestar and Sandstorm are on a mission to rebuild SkyClan, which left the forest and subsequently split up years ago. They find Sky, the only remaining SkyClan descendant who has any knowledge of the Clan. His grandmother was born into the Clan, and he was named after the lost Clan and taught its traditions, and still tries to cling to them, despite younger area cats believing him crazy. He is able to teach them about SkyClan's life in the gorge.
* Warrior Cats: Firestar, Graystripe, and Ravenpaw met when they were barely of apprentice age but stayed close friends for the rest of their lives.
* Warrior Cats, Firestar sees a lion reflected in water, and is so startled that he runs backward into a tree and yowls loud enough that some of his Clanmates come running. Turns out the lion isn't actually a reflection of something real; it's a vision sent to him by StarClan hinting at something he must do.
* Warrior Cats, Firestar shows nothing but kindness to everyone around him and is willing to give his nine lives for just about anyone, including cats of enemy Clans and also Clanless cats.
* Warrior Cats, Firestar's jaw drops open when he realizes that Smudge's home is the former SkyClan camp.
* Warrior Cats focuses on Clans of feral cats. They almost never see humans or their vehicles unless patrolling the borders of/leaving their territory, and they mainly appear as hazards to be avoided. Only in the graphic novels do any of them get speaking roles, but even then they're minor, and it's because the reader is seeing a bit wider view than the main character's viewpoint, unlike in the actual books.
* Warrior Cats Following a string of betrayals and tragedies, Bluestar, the leader of ThunderClan, becomes paranoid and fearful that the other Clans are plotting to destroy her Clan. When her warriors find remains of dead rabbits on their territory, Bluestar assumes that the culprits are WindClan (who regularly eat rabbits), assumes that they have been stealing prey, and plans to attack them, despite her deputy Fireheart pointing out that the rabbit remains were most likely left by a dog. When Bluestar refuses to back down, Fireheart sets up a peace talk with WindClan behind her back in order to prevent needless bloodshed.
* Warrior Cats. For a while it looked like Tigerstar's other son Brambleclaw was going to join them, but he decided against it.
* Warrior Cats for its similarities, including an orange tabby protagonist, similar naming scheme, and usage of cats living in "clans".

* Warrior Cats. For the most part, the cat is already considerably old when it happens:
* Warrior Cats for the same reasons. Like Tigerstar holding up some Jew.
* Warrior Cats, getting your warrior name is apparently a pretty good way to be rescued—Cloudtail and Squirrelflight are both significantly less annoying than they were as apprentices. Berrynose shows that this doesn't always work, though.
* Warrior Cats, Goosefeather calls his mother's name when he's attacked by a badger and thinks he's about to die. Despite having his full medicine cat name, he's only seven moons old - just barely over the age most kits leave the nursery - so he's still quite young.
* Warrior Cats, Goosefeather comes to accept this idea by the end of the book. He had known that he'd be attacked by a badger and nearly die, but even with expecting it to happen he was unable to do anything. He also had a vision of his Clanmates starving around him, and tried to prevent it by coming up with a strategy to "refrigerate" prey in the frozen ground, but the plan failed due to the weather and several of his Clanmates starved to death.
* Warrior Cats, Graystripe and Millie get lost and separated from each other in a field of corn, desperately fleeing from the terrifying roar of a "monster" (a combine harvesting the corn). Some local farm cats find them and lead them to safety.
* Warrior Cats, Graystripe was captured by Twolegs early in the third book of the second series and ultimately presumed dead or permanently lost by his Clanmates. In the first book of the third series - taking place half a year after the second series ended - he returned, having escaped and found the Clans in their new home.
* Warrior Cats, Greystripe has a relationship with Silverstream, a cat from another clan. When Silverstream dies in childbirth, Thunderclan finds out about his secret relationship. Bluestar, the clan leader, decides that losing Silverstream is punishment enough, and doesn't give one of her own for breaking clan law.
* Warrior Cats has a short story focusing on this idea, where a leader asks the other Clans to stop stealing prey from his starving Clan instead of fighting back. This only serves as an invitation to them since they know they'll be unchallenged; in the end, the spirit of his lost mate appears to him in a vision and convinces him to let his Clan fight.
* Warrior Cats has suffered from this a lot, despite being an action series:
* Warrior Cats have a leader. They can be identified by their 'star' suffix and they have nine lives presented to them by StarClan. Each of them have to have been deputy selected by the leader in order to be next in line to be leader.
* Warrior Cats have been convincing Clan cats to train with them and betray their Clanmates by joining their army. Out of all the Dark Forest trainees, only two stayed evil: Redwillow and Breezepelt.
* Warrior Cats have been described this way by fans, since there's really no antagonist and no overarching conflict until the later part of the fourth series.
* Warrior Cats: Hawkfrost, the main villain of the second series, dies by way of his older half-brother Brambleclaw driving the stick of a fox trap into his throat.
* Warrior Cats. He asks Barley's name, and Barley, taken by surprise, responds, "Er... Barley." Then when he calls him "Erbarley", Barley says "No. Just Barley." So Fuzz proceeds to call him "Justbarley" for the rest of the story.
* Warrior Cats. He becomes extremely strict on enforcing the rules, not only within ThunderClan but the other Clans as well, and begins to exile any cat who speaks against his behavior. He even starts checking on what his Clanmates are doing at all times and butting in on private conversations just to make sure they're not doing anything he doesn't want.
* Warrior Cats, he considers it a sign of the same discrimination that he endured, and refuses to listen.
* Warrior Cats, he is harrassed for being such a close friend to a cat of another Clan that he breaks off the friendship and views them more as enemies than anything.
* Warrior Cats", he really meant "whore" (it works in context, and explains

Hollyleaf's shocked reaction).
* Warrior Cats, he remembers something else important and says a little extra as he bleeds to death.
* Warrior Cats, Hollyleaf falls in rage and shreds mouse to pieces, until all that remains of it is described as red pulp.
* Warrior Cats, Hollypaw is amazed at how all four Clans welcome him home with equal warmth. When everyone's crowding around him and Leafpool tells them to give him space, Hazelpaw even protests, "But he's a legend!"
* Warrior Cats, however, he's no longer this. In fact, he even apologizes to Jagged Peak for kicking him out of the forest.
* Warrior Cats how his way is best. He loves to throw around his weight, bullying cats on his border, starving his captive just because he can, making anyone who questions him fear him, and becoming eager at the thought of making himself more powerful and expanding his territory. He's extremely self-conscious about how others view him and spends part of the book wondering if cats are talking about him behind his back, and how confronting them about it might look.
* Warrior Cats. If the 20+ main novels weren't enough, there are at least 4 field guides and more mangas than you can count! The books keep coming because they make Harper Collins rich. And because the fans always want more.
* Warrior Cats implies that Squirrelflight killed Ashfur, due to her showing up late with fur covered in mud (his body was found in a stream). It turns out she was just being clumsy, and by doing so she distracted the reader from the true killer, Hollyleaf.
* Warrior Cats. In human terms, the Clans have only been around for 100 years at oldest. However, to cats, the four Clans have been around for dozens, if not hundreds, of generations. Still, the cats in the origin series speak exactly the same as the cats at the tail end of the series' timeline.
* Warrior Cats in one blow, gives the forest Clans three days to either leave the forest or meet them in battle. The forest Clans spend the three days weighing their options, training, having medicine cats prepare herbs, and coming up with an escape strategy for the defenseless kits and elders if they fail. All four Clans join together to face BloodClan, and the battle itself lasts about a day.
* Warrior Cats, in the battle against Tigerclaw's rogues, Graystripe gets a scratched tongue that won't stop bleeding. The medicine cat apprentice doesn't know what to do for it, so she sends Fireheart to fetch her mentor.
* Warrior Cats into apprentices. This turns out tragically when, during battle, a warrior attacks a three moon old named Badgerpaw and kills him.
* Warrior Cats is a cat who wears a collar with dog teeth sticking out of it. It's uncomfortable, but he wears it because he knew it was awesome.
* Warrior Cats, is a cheerful ditz who is so literal-minded that he thinks Barley's name is "Erbarley", and upon being corrected, then thinks it's "Justbarley".
* Warrior Cats is a collection of rules that all clan cats must follow. Yet almost all of these rules have been broken at least once:
* Warrior Cats is a fun binge. Over 30 novels, and that's the bare-bones experience. You also have a bunch of extra-long standalone "super editions", books explaining history and characters, several series of OEL, and at least a dozen novellas.
* Warrior Cats is aimed at preteens and most of its characters start at the equivalent of 10-13. But they quickly age into adults and as a result the series has a lot of mature themes.
* Warrior Cats is a macro that got passed around for a bit with that original image.
* Warrior Cats is blocked off for unknown reasons, and cats who die during this time are left as ghosts while unable to move on.
* Warrior Cats, is generally considered to be the least popular. Some of the most common complaints are the main characters having superpowers and plot points being reused several times (such as forbidden romance).
* Warrior Cats is in place, as cats that lived fifteen years ago are legendary and those that live forty years ago are ancient myth.

* Warrior Cats is introduced as a kit in the arc's first book and mentioned several times throughout the rest of the arc, only to be killed by Tigerstar as an example of what will happen to those who do not join his new Clan.
* Warrior Cats is only in the first book to lighten the mood. However, his role greatly increases in later books.
* Warrior Cats is that there must be a balance between light and darkness, because without one the other would not exist.
* Warrior Cats is the love a mother has for her kits, in order to help them protect the Clan; this life is often expected to feel gentle, and the new leader is often shocked by how painfully fierce it is - mothers are willing to face any amount of enemies or even die for their kits. One particular Action Mom is Leafstar: leaders normally are not allowed to have kits because it conflicts with their duties, but Leafstar decided to have kits anyway.
* Warrior Cats is trained to fight and can hold their own in a battle. (Except the kittypets, but some of them are pretty basass too.)
* Warrior Cats, it is shown that Scourge, the leader of BloodClan, started innocent but found it easier to kill as time went on.
* Warrior Cats: It's not uncommon for leaders to appoint their family, significant other, best friend or former apprentice deputy.
* Warrior Cats, it's zigzagged. Runningwind is dead and Fireheart sees Whitethroat, who he assumes to be the killer. Whitethroat is hit by a car after Fireheart realizes it wasn't him. Fireheart asks who killed Runningwind, and Whitethroat says who it was but Fireheart can't hear him over the noise of a passing car. Fireheart asks again, but Whitethroat dies just as he's about to say it, however, he has a look of horror in his eyes. Then Fireheart turns around and sees the killer right there.
* Warrior Cats it turns out that half the cats in ThunderClan have broken the warrior code at some point- and they all realize this on the same night.
* Warrior Cats: It was mentioned by the writers that no character was going to use "moon" in their name because they felt this would signify the cat as more beautiful or important than their Clanmates. Bluestar's name was originally "Moonstone" but this was changed. Her mother is named "Moonflower" as an accident. There was a later attempt to change it to "Duskflower", but for continuity reasons Moonflower's name stuck. She was the sole exception until later books gave us Ambermoon and Harveymoon.
* Warrior Cats, Jayfeather suspects that Longtail is giving his water to Mousefur because he thinks she needs it more.
* Warrior Cats, Leafpool accidentally does this to Crowfeather — she'd promised to meet him, but then had to come desperately to RiverClan's aid when Mothwing could not heal them alone.
* Warrior Cats: Leafpool is one of the cutest kitties in the forest in terms of overall sweetness, next to Spottedleaf.
* Warrior Cats. Leafpool tries to make him do this once to figure out where his sister is when, as an apprentice, Hollyleaf goes missing.
* Warrior Cats, Leopardstar is an ambitious and occasionally antagonistic cat who first appears in the second book and is one of the more prominent RiverClan characters, especially after becoming its leader. She ends up living long (more than 10 years, which is amazing for the setting) and dying of diabetes.
* Warrior Cats Lionblaze then leaves the Dark Forest forever, proving to Tigerstar that he wasn't going to let himself fall to the level of the villains.
* Warrior Cats, Lionblaze wants to prove to Cinderheart that destiny doesn't control their lives when the latter thinks so. So he starts a fight with a ShadowClan patrol and deliberately lets Ratscar beat him. It backfires, for Cinderheart gets angry at him for being hurt (since his power prevents him from being hurt) and trying to avoid his destiny. The next time he persuades her, she finally chooses him as her mate.
* Warrior Cats: Lionblaze, whose prophecy power makes him invincible in battle.
* Warrior Cats Made funny by the fact that Flametail is an actual CAT, albeit not a kitten.

* Warrior Cats madly in love with Brightpaw, refuses to leave her side and tells her, "Come back to us. I don't know where you are now, but please come back."
* Warrior Cats makes him gaunt and ragged, with his ribs showing, and almost elderly-looking.
* Warrior Cats manga about Ravenpaw, Barley asks him this at the end of the first volume when they're on their way to Highstones. Ravenpaw assures him that they're almost there.
* Warrior Cats manga covers, especially the Sasha and Scourge ones, tend to have much more fine details and shading (not to mention actual color) compared to the art inside.
* Warrior Cats manga, one scene in the second volume has Sasha wandering into a shop and getting chased out as soon as she's spotted. She's so startled by the experience that she ends up getting lost as she flees.
* Warrior Cats manga trilogy, which involves events that don't happen until part way through the second series of books, was released in Germany before they finished translating the first series.
* Warrior Cats — the identity of the "you" isn't necessarily clear.
* Warrior Cats, medicine cats are forbidden from having kits, so they aren't allowed to have mates. That's not to say they don't break the rule, but for the most part, they adhere to Clan standards.
* Warrior Cats, medicine cats frequently receive prophecies in the form of dreams. Notably, the main character Firestar decided to venture into the forest and join its Clans after having dreams of hunting mice.
* Warrior Cats, Moth Flight's father Gorse Fur tells her he's proud of her after she speaks up to the five Clans and announces that each Clan must have a medicine cat.
* Warrior Cats. Much of it focuses on boring tasks like gathering moss and cutting into smaller parts, to teach her patience, concentration, and good control of her claws.
* Warrior Cats, Mudclaw's attempted coup fails after ThunderClan brings two patrols to help Onewhisker, and he knows that he and his supporters are badly outnumbered. He knows that their only option now is to flee and hope to survive.
* Warrior Cats newborn kittens start walking and talking a day or two after they're born.
* Warrior Cats, none of Su’s headcanons and OCs were canon. This revelation, along with Vicky leaving the Warrior Cats team of authors sometime after, caused the admins of the wiki to send out an apology and get to work on removing Su’s headcanons and OCs from the site.
* Warrior Cats (not even as an apprentice or at least in the allegiances), and her first appearance in the second book was only to rescue Graystripe from drowning. She never had an appearance where it didn't involve another more important character, and the only notable thing she did outside of bearing Graystripe's kits was getting Firestar in touch with cats who knew something about Redtail's death.
* Warrior Cats, occasionally a leader will order that if a particular cat is found in their Clan's territory, they should be killed on sight: this includes when Tigerclaw is exiled from ThunderClan for murder, and when Graystripe is exiled from RiverClan for betraying them during battle to save Fireheart's life.
* Warrior Cats often, parts of their names are things found in nature. Throughout the books, you'll find names containing animals, plants, rocks, landforms, natural phenomena, celestial bodies, weather, etc.
* Warrior Cats often wonder why the arrogant Berrynose attracts Poppyfrost and Honeyfern.
* Warrior Cats of them were minor characters. The other ends up getting reincarnated, anyway.
* Warrior Cats: Omen of the Stars and having to find a different way to defeat the beavers.
* Warrior Cats: Omen of the Stars Spottedleaf mostly disappeared from the plot, with her role as an adviser being given to Yellowfang.
* Warrior Cats, once a StarClan cat or Dark Forest cat fades away over time or is

killed again, they never come back. Examples include Spottedleaf, Antpelt, Brokenstar, Hawkfrost, and Tigerstar.
* Warrior Cats, on rare occasions, a cat will affectionately call their Clanmate by the first part of their name (for instance, Lionblaze once called Jayfeather "Jay".) It happens infrequently enough that it really stands out when it happens.
* Warrior Cats on their collars. (This started when their leader, as a young cat, attempted to use a loose dog tooth he found to try getting his collar off, only to get the tooth stuck. When others asked about the tooth, he claimed he killed a dog and took the tooth as a trophy, and from there the idea took off and became true.)
* Warrior Cats over half a year and several books later, having escaped and found them in their new home.)
* Warrior Cats, part of the medicine cats' standard examination of a cat who has fallen into a stream/river is to check for leeches.
* Warrior Cats (plus two tagalong friends), following a prophecy, quest through unknown territory to follow the setting sun to the sea and "listen to what midnight tells them".
* Warrior Cats policy (and how), the seldom seen Tribe of Rushing Water is made up of about 75% Red Shirts, who get killed off in bunches pretty much anytime the Tribe is featured in a book.
* Warrior Cats: Power of Three: rather than having a main villain to be defeated, features the protagonists struggling with the meaning of a prophecy about them.
* Warrior Cats, Rainflower begins scolding Crookedjaw and Oakheart for telling friendly jokes about the queens, making a (quite) boring lecture about how the queens "enjoy helping their Clan". Crookedjaw and Oakheart just roll their eyes at this.
* Warrior Cats, Rainleap declares that she'd rather die than ask ThunderClan for help (which in Cloudstar's opinion is a bit extreme).
* Warrior Cats: Raptorial birds appear as dangerous foes on a number of occasions. Justified, as the main characters are feral cats and regular-sized hawks and eagles really are dangerous potential predators from their point of view:
* Warrior Cats rats. Once Firestar kills the leader, they're too confused to fight because they have absolutely no idea what to do now, and those who aren't killed scatter.
* Warrior Cats: Rats serve as antagonists numerous times throughout the books, always attacking in huge swarms.
* Warrior Cats" reasoning is just an excuse to be greedy and seize territory and power.
* Warrior Cats, Reena seems to like Talltail/star and is obviously flirting with him. The only problem is, Talltail is gay, so her advances don't even show up on his radar. Reena later complains to Shrewclaw about it.
* Warrior Cats refer to the seasons as Newleaf, Greenleaf, Leaf-fall, and Leaf-bare. They also don't use years like humans. They go by moons. One moon is roughly a month, a half-moon refers to two weeks, and a quarter-moon refers to a week.
* Warrior Cats RiverClan cats are often named after water-related things in nature (Graypool, Lilystem, Lakeshine, Rippleclaw, Rainflower, Stormfur, Rainstorm, Silverstream) or aquatic animals (Piketooth, Troutstream, Ottersplash, Voleclaw).
* Warrior Cats, rogues are cats who don't live in the Clans or with humans. Fans frequently spell the word wrong.
* Warrior Cats, Rootpaw is able to make Bramblestar briefly visible to other cats, and when Bramblestar's mate Squirrelflight sees him, she tries to touch her muzzle to his, but she just passes through him.
* Warrior Cats RPG, as Maine Coons are a very soft-voiced breed of cat.
* Warrior Cats runs without looking where he was going, Gray Wing scolds him for it... before doing it himself by accident. He realizes he's being a hypocrite and resolves on not becoming one.
* Warrior Cats's attempt to destroy the Clans, and the sixth series is about the discovery of the modern remnants of SkyClan.
* Warrior Cats say that weak cats should either look after themselves or die.
* Warrior Cats, seeing as they're semi-realistic cats, and they live in Clans that

don't allow intermixing, this is kind of inevitable, and there are several such relationships like this:
* Warrior Cats series, apprentices play this role during the battle against the Dark Forest cats - traveling through a battle-filled forest where any enemy will kill them on sight so that the Clans can send messages to each other on the status of their warriors.
* Warrior Cats series are rather similar, but there's enough difference in them that they can clash at times - especially when the Clan cats insist that the Tribe try to live like them in order to drive off intruders.
* Warrior Cats series both have two two-page maps per book: One is the "animal view" map, which is more decorative, having houses and trees and everything drawn out, and labeling it with the animals' names for landmarks. The second is a "human view" map, which labels the landmarks with human names. It also looks more like a proper map: rather than drawing the forest, there is a map key, and it just uses the symbol for "tree" lots of times.
* Warrior Cats series, Brambleclaw and Sorreltail are named after author Cherith Baldry's cats, Bramble and Sorrel. Sol's appearance is based on a cat named Aslan, and Millie's appearance is based on the pet of one of Vicky Holmes' coworkers (her name comes not from his cat, but from the fact that he is a fan of the Millwall soccer team).
* Warrior Cats series, Darkstripe is being watched by Brackenfur since he's suspected of being a traitor. He tells Brackenfur he needs to make dirt, so he goes behind a bush for privacy... and sneaks off.
* Warrior Cats series, Firestar is told that he is the subject of a prophecy, "Fire alone can save our clan". Later, three of his kin find out about their own prophecy "there will be three, kin of your kin, who will hold the power of the stars in their paws".
* Warrior Cats series has a greeting gesture, which the Clan cats find strange: extending a paw while bowing the head.
* Warrior Cats series is about feral cats living in a forest near a human city. The series follows several generations, including a grand exodus, and is all through the eyes of cats who see humans only as giant "Twolegs", and automobiles as "monsters". They face horrors such as badgers, dogs, foxes, humans, starvation, disease, and of course rival cat clans for which each kitten is trained to be a warrior in order to defend his clan.
* Warrior Cats series, kittypets (house cats) are terrified of the woods, and tell stories about the savage wildcats that eat bones and the dangerous animals that live out there. Most feel that if you go into the woods, you won't come out, but some of them do like to explore there from time to time, and some actually join the Clans of cats that live out there.
* Warrior Cats series, Midnight the badger is able to speak Badger, Rabbit, Fox, and a few types of Cat, whereas everything else in the series can only speak in the language of its own species (except for one case where a cat knows a little bit of Dog). Why and how she managed to learn all of these is never explained.
* Warrior Cats series, naming Graystripe deputy rather than waiting to hold the usually performed ceremony.
* Warrior Cats series, one battle tactic that SkyClan developed and later ThunderClan used involves the attackers hiding in trees above the battlefield, and then dropping down all at once onto the enemy. This often works, seeing as it has quite the element of surprise, and of course it can't feel nice to have someone land on you from many times above your head height, but if the opponent is expecting it and dodges, this can result in nasty injuries for the falling cats.
* Warrior Cats series, one young cat's spine is broken when a tree falls and she's pinned by the branches. Jayfeather, the medicine cat, tries to encourage her by telling her how ShadowClan once had a cat with a similar injury and had told him about their experiences. Unfortunately, ShadowClan's warrior had ended up dying because of complications with it, which doesn't encourage Jayfeather's patient much.
* Warrior Cats series, owls are often thought of as ill omens. Justified, since an

owl seems quite large to a cat, and owls have been known to carry off kits. However, ThunderClan does occasionally look for owls at night, because if it's windy and they're having trouble scenting prey, they can follow an owl and find prey that way.
* Warrior Cats series, the cats call a certain cave "Mothermouth" because it resembles a mouth.
* Warrior Cats series. The Clans have no experience with rabies, so they wouldn't understand what it is or how to combat it.
* Warrior Cats series, the forest — the home of the Clans — is destroyed, prompting a journey to find a new home where the rest of the series takes place.
* Warrior Cats series, the Great Journey map has the sea to the southwest.
* Warrior Cats series, the names of the characters, which are usually combinations of nouns, verbs and adjectives, are left in English.
* Warrior Cats series, there are two. Cloudtail refuses to believe that StarClan exists, despite seeing his leader come back to life after being killed and the fatal wounds healing themselves. But even more notable is Mothwing, a medicine cat. She had a prophetic dream herself right after being apprenticed, and everything that Leafpool has told her, which she couldn't possibly have known on her own, happens to be true. She has also seen her own leader lose lives and come back to life. As part of a medicine cat's job is to be the spiritual leader of the Clan, this makes her the equivalent of an atheist priest.
* Warrior Cats series, the Tribe rolls in mud to cover their fur in order to disguise their scent and blend into the rock better so that prey doesn't spot them so easily. The visiting Clan cats try this, and aren't too thrilled at the idea, but it works.
* Warrior Cats series, they announced in Feb 2010 that there would be some sort of online multiplayer game based on the books. They picked beta testers in March 2010, saying that the game would be out at the end of 2010. Though for a while they kept listing the release of the game in the "marketing/publicity" section for each new book in HarperCollins' catalog, the beta testers never got another message after the one saying they were picked to be one, the gamemakers didn't make any posts on the official forum to keep fans updated on the game's progress though they'd promised to (to the point that the subforum for it was, eventually, removed because it confused new members). There have been one or two surveys about what fans would like in a game since then, but they have never made any official statements saying whether or not it's cancelled.
* Warrior Cats series, Tigerclaw. He's a highly respected senior warrior, and, by the end of the first book, becomes deputy (second-in-command) of the Clan (and therefore next in line as leader). However, he murdered a previous deputy in order to try and claim the position, which only the young hero Fireheart and his two best friends know. Tigerclaw is such a respected cat in the Clan that nobody suspects him of treachery — even the leader rejected the idea when Fireheart told her his suspicions. Being deputy, Tigerclaw can assign Fireheart punishments in order to keep an eye on him, or order him to perform a life-threatening task, or suggest to the leader that Fireheart should be driven out of the Clan.
* Warrior Cats series when they are chased by dogs or other predators, such as badgers: cats will hide in places such as under a thick bush, or in a rabbit hole, or in a crevice between rocks, where the larger creature cannot reach them.
* Warrior Cats, several characters are like this, but Thistleclaw and Tigerclaw are probably the most notable. Bluestar tells Fireheart that she gave up her kits to become Clan deputy instead of Thistleclaw because if Thistleclaw had gone on to become leader he'd have led the Clan into unnecessary wars. When Tigerclaw is exiled, he insists he would have never have been such a soft, peace-keeping leader and speaks of how he would have made ThunderClan great and feared; Bluestar remarks in response, "And how many cats would have died for it?"
* Warrior Cats. Several hundred cat years apart, plus one stinking prophecy. Need we say anymore?
* Warrior Cats, several of the heroes are apprentices when we first see their

points of view - the feline equivalent of 10-18 years old - and some POVs start even younger.
* Warrior Cats, several of Tigerclaw's followers in ThunderClan were generally jerks, but they remained in the Clan when his treachery was revealed: Dustpelt and Longtail proved to be loyal warriors and grew to treat Fireheart with respect. Darkstripe, however, only refused to join Tigerclaw because Tigerclaw hadn't told him about conspiring with Brokenstar, and later continued to work for him while still in ThunderClan, until he was caught and exiled himself. After Tigerstar's death, Darkstripe joined up with Tigerstar's killer, Scourge, to destroy the Clans.
* Warrior Cats. She thinks about how this means that he'll likely long outlive her, and frets that he can always take another mate after she's gone, and wonders if the reason he's not ready to have more kits right now is because he has so much more time than her.
* Warrior Cats, shocking them both. His "apology" is basically "I'm sorry you don't understand that questioning me puts us in danger."
* Warrior Cats short-story featured in the "Battles of the Clans" field guide, Mistystar is seen training a group of apprentices in water combat. Rushpaw, the smallest, is having trouble swimming due to the water temperature and her size. After driving everyone crazy with her problems, she accidentally splashes water everywhere when they're tasked with ambushing Mistystar. She thinks she ruined everything when Mistystar admits that the water splash made her think the apprentices were on the other side of the stream — and that it could be considered a brand new battling tactic.
* Warrior Cats shows how Spottedleaf felt about the whole thing after her death: she was jealous of Sandstorm to an extent but more than that she wanted Firestar to be happy, and was glad that Sandstorm was there for him since Spottedleaf herself couldn't be.
* Warrior Cats, six cats were sent to deal with the mountain lion, Sharptooth. The Clan cats meet three of them: Talon, Bird, and Rock, who explain that the other three had been killed by Sharptooth. In the next book, the Clans return to the Tribe, and there's a fourth cat, Jag, listed as being one of the ones originally sent to fight Sharptooth, with no explanation as to why we didn't see him in the last book (though the characters do recognize him and say they'd met him before).
* Warrior Cats, SkyClan had to endure this. Forced out of their home, they found a gorge and settled down in it. However, a massive horde of rats surrounded them, just waiting for them to try to leave the get some food, take a nap outside the gorge, or something of the sort. When a cat left, they were swarmed by rats and killed. It was enough to drive a cat mad, and led to the end of SkyClan. However, the cats get the last laugh, as the rebuilt SkyClan drives a group of rats under a pile of garbage, surrounds it and waits for them to try to escape, then kills them as they leave.
* Warrior Cats, Snowtuft mentions an island where Ashfur keeps spirits prisoner. Shadowsight asks for more information, and Snowtuft responds, "You really don't want to know", refusing to say anything else on the topic. It helps build the tension and significance of one of the most important locations of the book.
* Warrior Cats, so even though the Clan cats are pretty battered, they are able to recover because the Tribe takes them in for a little while.
* Warrior Cats spoiled that Ravenpaw was going to learn about and travel to the long-lost Clan.
* Warrior Cats, Spotpaw is in trouble after sneaking up on and attacking Bumblestripe as a joke. Her parents explain to her that half the reason Bumblestripe is so furious is that he almost killed his Clanmate before he realized who she was.
* Warrior Cats Squirrelflight and Brambleclaw's son, a living reminder of the mate he couldn't have and the future he was denied. They don't get along. While they are never outwardly rude to each other, Ashfur mostly gives Lionpaw the cold shoulder and doesn't try to bond with his apprentice the way all the other mentors do. When Lionpaw demands more intense training, Ashfur takes this request very specifically... by unsheathing his claws and fighting Lionpaw as if it were a real

battle. Ashfur is eager to finish Lionpaw's apprentice training quickly so that they won't have to see each other eye-to-eye anymore.
* Warrior Cats, Squirrelflight tells this to Ashfur to end his romantic relationship with him. While she honestly wants to remain his friend, he still doesn't take that too well.
* Warrior Cats starts with Leopartstar at the Bonehill, watching Stonefur die. The rest of the book shows her life up to the point and the decisions that led her there.
* Warrior Cats, Sun Shadow explores a cave in the mountains, and is spooked by a colony of bats flying around him out of the cave.
* Warrior Cats, Sunstar decides to take back Sunningrocks from RiverClan by walking into their camp with a patrol and announcing that Sunningrocks is ThunderClan's territory now, and that any RiverClan blood spilled in an attempt to re-claim it will be on their leader Hailstar's paws. As Sunstar had planned, every Clan knows how strong ThunderClan is at that point, and RiverClan doesn't make an attempt to re-claim it after that.
* Warrior Cats, Super Editions, and manga, plenty of popular characters get their own adventures. Tigerstar, Graystripe, Crookedstar, Tallstar, Yellowfang, and more have all gotten either novellas, manga, or Super Editions about them.
* Warrior Cats tell them how it was all Longtail's idea and that Darkstripe couldn't stop him.
* Warrior Cats), ten super editions, five guidebooks, thirteen mangas, and twelve novellas. And counting.
* Warrior Cats that prey animals are sapient, though cats cannot speak with them and it is suggested that they are less intelligent (or at least more primal) than cats.
* Warrior Cats, the author frequently insults her readers for giving her bad reviews.
* Warrior Cats, the characters will, on rare occasions, attack another Clan's camp instead of just fighting somewhere in the territory. This can be risky, though, as the home Clan knows the best way to defend it, will be fighting more fiercely and desperately to protect the defenseless kits and elders, and the raiding Clan is usually outnumbered. It's worked about as often as it has failed.
* Warrior Cats, the Clan leaders are given nine lives by Starclan, the feral cat afterlife. The first eight times they die, they heal for a few minutes, then get back up.
* Warrior Cats: the Clan society has almost perfect gender equality, with equal numbers of female leaders and warriors throughout. The only real difference in how they're treated is when a female warrior becomes pregnant: she spends a few months in the nursery to have her kittens.
* Warrior Cats, the Dark Forest invades, but the two Heaven equivalents, StarClan and the Tribe of Endless Hunting, fight alongside the Clans to even the odds.
* Warrior Cats, the Dark Forest is made up of cats from all four Clans, which are treated like races in the series.
* Warrior Cats, the dogs have a "!" appear above their heads when they realize that the stake holding their chains has been dug up, leaving them free to escape the fire.
* Warrior Cats, the feline characters believe that humans smell, and even once the main character earns his place in the Clan (since he was born as a house cat), other cats still occasionally insult him by saying he smells like humans.
* Warrior Cats, the first book in the upcoming new arc. The artist was only a third of the way done, so since he was unable to finish it in that amount of time, it ended up being split into three shorter volumes with the first one being released on that day. Later manga in the series followed suit by splitting the story into three parts as well.
* Warrior Cats. The first series follows Fireheart as he joins the Clan and eventually becomes leader. The second series is from his children's point of view; they consider themselves Clanborn and don't really think much about their non-Clan roots. The third and fourth series are from his grandchildren's point of view, and

their kittypet heritage is rarely if ever mentioned.
* Warrior Cats. The idea that the Clans should get along is repeatedly scoffed at throughout the series.
* Warrior Cats, the main villains are defeated two-thirds of the way through. The rest of the plot deals with Barley's brothers hanging around the barn, abusing Ravenpaw until Barley finally tells his brothers that they should get the hell off his property.
* Warrior Cats, the moon is bright red and the medicine cats comment that it's the color of blood, worrying that it's a bad omen from their ancestors.
* Warrior Cats, the most common unit of measurement is a "tail-length", which is equivalent to about a foot. "Foxlength"—about a yard—is used occasionally as well, and on very rare occasions they'll use "kittenstep" (about an inch).
* Warrior Cats: The New Prophecy), who are even younger than the kits of the protagonists of series 3 and 4.
* Warrior Cats, the others often can't keep up with the massive cast, especially characters who were created just to flesh out the allegiances, so this has happened to several characters (most notably Sedgewhisker and Rowanclaw).
* Warrior Cats, the "prequel" Super Editions, many novellas, and then a number of short stories in the field guides, such as the one about Barley's past. Even the main series has some of these moments.
* Warrior Cats, there's a section where Millie asks Graystripe to teach her to fight, and it shows training sessions spanning several days, interspersed with her asking questions about Clan life, with Graystripe narrating over it about her progress.
* Warrior Cats, the RiverClan leader Crookedstar dies mid-sentence: "Perhaps Mudfur was right. Perhaps death isn't—"
* Warrior Cats, the second arc, just isn't as good as the original series, though many admit that the writing quality, if not the story as well, improves at the third arc.
* Warrior Cats, the ShadowClan leader Ripplestar orders his Clan to attack the other four Clans at the Gathering. During the battle, he and the ThunderClan leader, Finchstar, are left on the Great Rock. Ripplestar slips, and Finchstar tries to save him despite what Ripplestar had done, but he falls off and dies.
* Warrior Cats, the StarClan and the Dark Forest cats can still interact with the living, so many fans have made pairings based on this. Examples include Firestar/Spottedleaf, Ivypool/Hawkfrost, and Jayfeather/Brightspirit. And then there's Hollyleaf/Fallen Leaves, which is borderline canon, partially because Hollyleaf doesn't know that Fallen Leaves is actually dead.
* Warrior Cats: The suffix "-heart" was originally one of the rarer ones out there and was only used for particularly kindhearted and brave cats. Over time, more and more cats have been named with it, making it lose its uniqueness.
* Warrior Cats the sunset). It also results in Feathertail nearly getting captured by a Twoleg and Tawnypelt being bitten badly by a rat.
* Warrior Cats: The villain Tigerclaw has unusually long claws to add to his menacing appearance. It's one of the first things the main character notices about him.
* Warrior Cats, they are kept to the cats themselves, not affecting most of the other species.
* Warrior Cats they lead to the conflict of loyalty to Clan vs. loyalty to mate in a battle, but this doesn't stop these relationships from forming.
* Warrior Cats. They pretty much say that they've been around since the beginning of time, but it's not revealed exactly what they are.
* Warrior Cats, they visit all four Clans and attend a Gathering, not only listening to stories told by cats, but also being visited by deceased warriors in their dreams for stories that the current Clans couldn't possibly know.
* Warrior Cats, things become awkward when Bristlefrost confesses her feelings to Stemleaf, and it turns out that he views their relationship this way (he even describes her as being like a littermate to him); he has feelings for Spotfur instead.

* Warrior Cats, Thistleclaw asks the apprentice-aged Spottedpaw to be his mate. She declines because of her age. Thistleclaw says that he'll wait until she's a full-grown warrior if he has to.
* Warrior Cats three months too soon. He was accidentally killed in battle. In StarClan, he was renamed "Badgerfang" because that would have been his warrior name if he had survived into adulthood.
* Warrior Cats, Thrushpelt did not get Bluestar, and several notable genderbent examples include Cinderpelt and Firestar, Spottedleaf and Firestar, Mapleshade and Appledusk, Feathertail and Crowfeather, and Leopardstar did not get Tigerstar.
* Warrior Cats, ThunderClan and RiverClan cats are described as being large and powerful, but slow.
* Warrior Cats, Thunder is reluctant to attack Star Flower in training. She points out that she's not made out of cherry blossoms and that if she can give birth to three kits then she can certainly teach them some battle moves.
* Warrior Cats Thunder tells Clear Sky that Star Flower is his mate only because he's like her father, One Eye.
* Warrior Cats, Tigerclaw and a WindClan apprentice named Sorrelpaw are both chasing the same rabbit without realizing it, and end up colliding with each other.
* Warrior Cats, Tigerclaw orders Redtail to attack the WindClan apprentice Sorrelpaw, who's accidentally strayed across the border. When her mentor arrives, he rightfully calls out the two full-grown warriors for attacking a young apprentice on her own who's just made a mistake.
* Warrior Cats, Tigerstar convinces RiverClan and ShadowClan to combine into one Clan, and offers the other two Clans the chance to join, saying the all the leaders will rule jointly. Tallstar and Firestar refuse, and Tigerstar snarls to Firestar that he just gave up his last chance to save ThunderClan.
* Warrior Cats, Tigerstar murders an innocent WindClan apprentice in front of the rest of WindClan. Tallstar and Firestar know that Tigerstar did it to send a message to them on what to expect if they continue defying him.
* Warrior Cats to create a story about cats. She wasn't thrilled because she doesn't like cats all that much, but she decided to add things that interested her, such as lots of action.
* Warrior Cats) to hurt Squirrelflight—who had rejected him the year before.
* Warrior Cats to join ThunderClan in the forest. Born a housecat, he doesn't know anything about clans or being a warrior.
* Warrior Cats, trains make their first appearance in the series. Tigerheart and his family are staying close to the tracks to find their way home, when one day the kits are playing on the tracks and an unusually fast train comes. Spire saves Lightkit by dragging her out of the way just in time, and warns Tigerheart that they need to leave the tracks or death will come - "Death too quickly. Death without meaning."
* Warrior Cats, Tree's mother Moonlight yowls a terrified "Mrrrroooooooooooow!" during a storm.
* Warrior Cats, Twigpaw and Violetpaw were discovered as evidently-orphaned kits and raised in the Clans. After meeting and starting to live with their father, Twigpaw asks him to tell them about their late mother. Violetpaw's a bit mad at her for asking, thinking that Twigpaw's being insensitive, but Hawkwing assures them that he's always happy to talk about Pebbleshine and tells them a story about when she was young.
* Warrior Cats) until they die and join StarClan, since StarClan feels too guilty about how SkyClan was driven out. Upon learning of SkyClan, Firestar is so shocked he nearly loses faith in StarClan altogether,
* Warrior Cats uses the "moons" type, having the cat characters measure things in lunar cycles. They also have different names for the seasons. (Leaf-bare for Winter, Newleaf for Spring, Greenleaf for Summer, and Leaf-fall for Autumn/Fall.)
* Warrior Cats, usually with warriors braving the elements to hunt for their Clan. One notable moment is when Cloudtail, as a kit, sneaks out of camp to go hunting even though he's not old enough. As a result, Firestar and Sandstorm need to brave the weather in order to find him.

* Warrior Cats was also to contain a short story about Fernpaw and Ashpaw leading the dogs to the gorge, but this didn't make it into the actual book.
* Warrior Cats) was killed in battle, it was decided that a couple of apprentices would bury the body, and no elders need be present, as his actions meant he did not deserve a funeral.
* Warrior Cats were originally living in New Forest in Southern England, locally known for being a former royal forest and nothing else.
* Warrior Cats, when Bluepaw suggests that there should be something in the warrior code allowing you to put thistles in your denmate's nest. Later, when Pinestar leaves his clan, Bluefur notes that she wouldn't be surprised if there was a rule added to the warrior code stating that warriors should reject the soft life of a kittypet. This is almost the exact wording the newly-enacted law uses.
* Warrior Cats, when Fernpaw's mentor was exiled and she needed a new mentor, Dustpelt, who had feelings for her (and was already mentoring her twin, Ashpaw), asked if he could be her new mentor. She was thrilled at the idea, but Dustpelt's request was denied because he wouldn't be tough enough on her, hindering her training. This doesn't stop them from becoming mates, however.
* Warrior Cats when he becomes Clan leader. A while later they realize how dumb they're being and that they still love each other, and get back together.
* Warrior Cats when Sunfall starts to confront her about her antisocial, suicidally reckless behavior.
* Warrior Cats, when Swiftpaw does so, he comments that the cat on watch, Cloudtail, wouldn't notice a car crashing through the camp.
* Warrior Cats, when the deceased ancestors of StarClan want to send a message to a living cat, they choose as messenger someone who had a close relationship with the recipient. For example, Firestar talks to Spottedleaf, an old friend of his. Echosong talks to Fawnstep, who was the medicine cat of SkyClan before her. Aside from comforting both cats, this custom means they can skip introductions and get down to business.
* Warrior Cats where RiverClan cats attempt to sneak through ThunderClan's territory. Unused to thick undergrowth, they make a lot of noise just walking through, and then they have a whispered argument about how noisy they're being.
* Warrior Cats, where they helped save the Clan from an outbreak of sickness.
* Warrior Cats, which both take place during droughts and involve cats trying to cross land that would normally be covered by water. While neither resulted in a death, both were life-threatening events and required the help of others to escape.
* Warrior Cats, which has influenced many cats, including clan leaders and plotted to overthrow the clans since long before Firestar came to the forest.
* Warrior Cats, which is not only a perfect starting point for new readers, but also contained fresh themes, a faster pace, witty dialogue, plenty of death, a whole new crew of likable characters, tighter continuity, a protagonist vastly different from Firestar, an antagonist who wasn't a rehash of Tigerstar, Brokenstar, or Scourge, and a perfect combination of lighthearted scenes and darker scenes. The reception has been almost entirely positive.
* Warrior Cats, which is spoken of in several prophecies, and had been built up for most of the series.
* Warrior Cats, which, so far, have given the spotlight to Mistystar, Cloudstar, and Tigerstar, with Mapleshade and Goosefeather novellas forthcoming.
* Warrior Cats. While Bramblestar is dead, the spirit jumps into his body and takes over, pretending to be him and causing chaos in the Clans.
* Warrior Cats, while Fernsong is a gentler tom. Ivypool wasn't certain about having kits since she didn't want to spend a whole six moons in the nursery, but they decided that once the kits were weaned, Fernsong would move into the nursery to take over their care until they became apprentices. His name is also often considered feminine by fans since both halves of it have been used more often for female characters.
* Warrior Cats. While she spaces out a lot, leading to some near-death situations, she's an expert with herbs and healing.
* Warrior Cats, Whitepaw is injured by one that she's trying to catch.

* Warrior Cats, who had a scene in the prologue of the first book and was killed offscreen a few chapters later.
* Warrior Cats who has one eye and ear missing and is horrifically scarred in that area, are both heroes. Tigerstar, another villain, has a scar across the bridge of his nose and a split in his ear. Longtail, a hero, has a V-shaped cut in his ear as well. Of course, one has to take into account that almost every character in existence is scarred somehow, but...
* Warrior Cats, who in his backstory was an inquisitive, cute little kitten who had bad things happen to him, turning him into a crazy killer.
* Warrior Cats who joins ThunderClan in the first book. Being raised a pet, he has no understanding of how Clans work and has to be taught alongside the reader.
* Warrior Cats, WindClan does the feline equivalent of this by making a cairn to honor those who had died in the battle against the Dark Forest, with each stone representing a specific warrior who gave up their life to save the Clans. The book begins with them adding the last stone to the pile to represent Crowfeather's mother Ashfoot.
* Warrior Cats with no redeeming traits. Should have added a little more sugar there, buddy.
* Warrior Cats, with sludgy rivers, and no prey. Each evil cat is meant to walk the Dark Forest alone, but they haven't exactly been doing that lately.
* Warrior Cats) with unusual black water. Just seeing it causes inexplicable fear in Rootspring and an instinct that falling in would be a "fate worse than drowning". Both Rootspring and Shadowsight do fall in, and in the few seconds they're in there, it's described as an unnatural choking sensation rapidly sapping their strength, all while filling them with a deep despair. It's even dangerous to spirits, since an island on the lake is where the villain has trapped all of his enslaved minions; even the RiverClan spirits seem unable to cross it.
* Warrior Cats works this way, except with series each containing six books. The first series works well by itself and nicely wraps up the ending. The ending of the second series has a few unsolved puzzles and sequel hooks, but can also work fine as the final ending of the whole book series. However when the third series ended, many plot points were still unresolved and it was clear it was just setting up the stage for the fourth series.
* Warrior Cats would be kind of baffling (and very spoilery) for a newcomer.
* Warrior Cats. Yellowfang and Spottedleaf, for example, probably did more in the series dead than while alive.
* Warrior Cats, Yellowfang tries to convince the main character to kill her, because she is shamed by being defeated.
* Warrior Cats, young Tiny/Scourge invents a story about him fighting a dog. His "story" is drawn in a very rough, sketched style, and the "fight" is drawn as a ball.
* warrior classes) as well as gaining healing spells very early on and having decent mana. Their main drawback is that they can't use bladed weapons. (This is actually a fair mechanic, considering about 75% of the weapons in the game are bladed. This includes all the good ranged weapons.)
* Warrior class gains skills that, in exchange for Attacking Multiple Enemy's in a Single Attack, required payment from both HP and MP — counterbalanced by the fact that these guys happen to have the highest amount of HP out of the classes in the game, hands down.
* Warrior Class, the Turkish general visiting Nellis AFB denounces Kurds as evildoers, to which American Colonel Rebecca Furness notes that the American public would find (public knowledge of) bombing Kurds distasteful. Not too much later, the German and Russian foreign ministers discuss how Muslim "terrorists" creating havoc for both their peoples, who aren't squeaky clean themselves, are abetted by American funding.
* Warrior comic, one scene shows them sitting in their hotel room with all of the on-screen colors inverted, leading to this exchange:
* Warrior comic, when the title character returns from the hospital, his butler gives him his wheelchair in order to help him relax. Warrior flips out at this and

tosses the wheelchair into the stratosphere.
* warrior culture. However, this failed when Duchess Satine and Padme exposed the conspiracy, convincing the galactic senate not to deploy Republic forces.
* warrior culture that has been refined over thousands of years, and view war as just as much an art form as painting or singing, they have formidable psychic powers, can predict what their opponents are likely to do, and also their technology is borderline magic, it's that advanced. Their Drukhari cousins take the Warrior to the psychotic extreme - all the lethality of their "good" cousins, but every single one of them is a bloodthirsty killer as their culture is based around raiding realspace to slaughter and take captives (like the Aztec Flower Wars in real life), and they leave menial tasks to their slaves.
* Warrior: En Garde agent has died in a kendo practice accident, receiving a crushed windpipe... just as the agent walks in in his kendo armor.
* Warrior: En Garde be recharged faster via a ship's fusion power plant in an emergency, assuming the ship has the fuel to burn; but this risks potentially undetectable damage to the highly sensitive drive core and thus, again, a catastrophic jump accident.
* Warrior has destrucity, foked, skronk, and jet-jack. Although skronk could possibly be an onomatopoeia.
* Warrior Heaven: A warlike culture's idea of Heaven is an afterlife full of war.
* Warrior Heaven that he brought their souls to the foot of his throne.
* Warrior Heaven that's pretty much a stand-in for Valhalla, where anyone who "dies" in combat returns to life after 24 hours.
* Warrior Heaven: The place where all noble warriors want to go when they die.
* warrior king of Ulster, to Conall Cernach, the number one cause of death among men of Connacht, to Cu Chulainn, the greatest hero in all of Ireland.
* Warrior Kings, barring the demons, the big bad and his 2nd, there is no unit more powerful than Artos and that's before he gains increased stats and new powers.
* Warrior Kings: Pagan(Subversive), Imperial (Powerhouse) and Renissance (Cannons).
* Warrior-like Randyll Tarly (said to be the finest soldier in the realm) bypasses his heir, the cowardly, compassionate, bookish and weight-challenged Samwell, for his younger son Dickon (and by "bypasses" we mean "chains him up for three days, threatens to kill him, then has him forfeit his birthright and be exiled to the Night's Watch rather than let him become a *gasp* academic"). He explicitly tells him he'll enjoy hunting him down like an animal if he doesn't join the Watch while skinning a dead deer. He rips its heart out in front of him for emphasis.
* Warrior Monk: An ordained priest who is also a professional soldier.
* Warrior Monk questions a Justicar-sanctioned killing because, in their culture, Justicars are above reproach. The harshness of their life and the unbending nature of their code tends to root out anyone within their order who would abuse their power.
* Warrior Monk's head that continued to bite down on her leg even after it was decapitated.
* warrior monks, not unlike the Jedi. The various Kai skills are nearly all Psychic Powers, ranging from clairvoyance/danger sense, resistance to poison and hostile environment, psychic defense/attacks, animal empathy, and telekinesis.
* Warrior Monks of Yevon and, to a lesser extent, the Summoner Guardians, since they're respectively the army and the bodyguards of the "saints" of Yevon.
* Warrior Monks who maintain several of the largest libraries in Wildemount, and devote themselves to the Knowing Mistress, the goddess of knowledge, arcana, philosophy, and stories.
* Warrior Nun Areala involves a division of the Catholic Church devoted to hunting down Supernatural Evil, with both Magic-using priests, badass Warrior Nuns, holy relics, super-technology and the resources of the global organization of the Church.
* Warrior Nun Areala is often considered one. However, her creator Ben Dunn argued against classifying his comic as this trope, noting that the protagonist has good and altruistic motives, and never resorted to violence first.
* Warrior Nun Areala) or western comics, this series was the first to focus on such

a topic.
* Warrior Nun for it. Also, the current team's mentor, Father Vincent, is a minion of Adriel's who has been stringing them along in order to engineer his master's release.
* Warrior of Light. This is shown best when he is genuflected before her, he sees she's in pain and raises a hand to seemingly comfort her, but quickly retracts said hand.
* Warrior Of Ras was an early RPG that required called shots for each attack. While the head was weak, it is still stronger than the neck which only had a few hitpoints.
* Warrior of the Lost World annoying talking motorcycle. When a monstrous vehicle called Megaweapon crushes it, the guys react in sheer joy.
* warrior people. They come across as so inhuman at times that it makes one wonder.
* Warrior Poet: A character who is proof that you can be both a capable warrior and a cultured artisan at the same time.
* Warrior Poet: And they'll gladly recount their harrowing experiences of the battlefield in verses.
* Warrior Poet: King David slew giants, won wars... wrote poetry, and once danced naked to celebrate the return of the Ark.
* Warrior Poets himself an aspiring vintner. Tizca's libraries are the greatest collective repository of knowledge outside of Terra within the Imperium, and the living standards the population enjoys one of the highest. And then came the Space Wolves...
* Warrior Poets was a young officer and war hero at Lepanto, and so it goes.
* warrior-poets who roamed the stars bringing civilization, not cowards and bullies who prey on the weak and kill each other for sport."
* Warrior Poets who were skilled both physically and intellectually. While this has detoriated quite a bit over the centuries, this bit of intellectualism crops up more than once in a while to further reinforce the clan's passions.
* Warrior Poets with only the older members dedicating themselves to the more intellectual side of things.
* warrior-priests amongst the Space Marines. Their official purpose is to help keep Space Marines from being corrupted; however, not only were they created by the very first Legion to be corrupted (none of the other Traitor Legions have fallen Chaplains amongst their ranks because Chaplains were strictly found amongst the religiously-zealous Word Bearers), they were actually instrumental in corrupting the other Traitor Legions. Nobody remembers this fact now...
* Warrior Prince involve her teaching him to make flower crowns. They can potentially marry too.
* Warrior Princess. The Phil Jiminez run even has a three-issue arc titled "The Witch and the Warrior" which revolves around Diana and Circe's enmity.
* Warrior Princess Zeetha is often injured or defeated to show that she's up against something serious. The Monster Horse Beastie, Baron Klaus Wulfenbach, a drugged-up Zola and a Geister have all defeated her at some point.
* Warrior Prince: This heir to the throne shall lead his people to victory on the front lines.
* Warrior Prince who led the cavalry allied to Scipio Africanus in the Battle of Zama.
* Warrior Queen". However, she eventually let's him go and actually soon forgets all about him when she meets another man.
* Warrior Queen, much to the dismay of her own commanders. She is, by a fair margin, the most powerful fighter of her side — and that's without an artifact weapon.
* warrior race" who spend most of their time exercising and training for battles and hostile situations. When villains show up, they inevitably break into panic just from seeing them. In comparison, most MLP ponies (including non-protagonist civilians) are usually able to stand their ground just fine when a villain appears, unless threatened directly.
* Warriors Adventure Game, the cats protect a young girl who gets attacked by a

bear. Notable for being the only time bears appear in the series.
* Warriors Adventure Game, was an attempt by the publisher to get tabletop RPG fans interested in the book series. The book series is targeted at children ages 9-12, while tabletop RPG players are generally much older, so there already wasn't much demographic overlap. The game is too complicated for a kid who's never played a tabletop RPG before but too simplistic for an audience that's experienced with RPGs. The pre-written adventures were included in books 19-24 of the series, which make no sense unless you've read books 1-18, so if you've just picked them up for the adventures you're not going to get into the book series from them. Essentially, nobody who reads the series is going to be interested in the game, and nobody who plays RPGs is going to pick up the game, to begin with, never mind start reading the series because of it. Predictably enough, the game lasted under three years before getting canned - although you can still find the rules on the website, and current printings of books 19-24 continue to have the adventures in the back, nothing new will be published.
* Warriors All-Stars has the Regard system. Regard Levels are increased toward the player character by using support abilities during battle, using Musou Rush, activating special events in the Sanctuary, and encountering characters in the hot springs. Different abilities/items will be awarded when reaching certain levels. When two characters have high Regard for each other, they will trigger character-specific events. Regard is split into 5 distinct levels, from lowest to highest: Associate, Acquaintance, Friend, Companion, and Confidant.
* Warriors All-Stars named Tamaki, Shiki and Setsuna, whose ambitions to each seize the royal throne are what form the game's plot.
* Warriors All-Stars. Seeing as how Hajime and Darius are appearing in a crossover game that's being localized, even before their own series has seen a western release, they are a perfect example of this trope.
* Warriors: Big, red, four-armed soldier creatures with fiery, orange eyes. They're ridiculously strong and tough, and as a culture are extremely competitive.
* Warriors characters) can toss their foes... and worse yet, it's usually unblockable!
* Warriors comfortable an area. They weren't dying nearly as much as their forest-dwelling peers, so soon the area was overpopulated with cats. This led to the tribe splitting up.
* Warriors do well in sales but have almost no online exposure. They don't even have much in terms of fandoms.
* Warrior-Servant structures were similar in several ways, but had a much more subdued, brutalist look to them. No unnecessary carvings or detailing, unless it was something glorifying the Forerunners' Mantle of Responsibility. Red and orange lighting played more of a role, as well. Tellingly, their buildings incorporate a lot of spaces designed to be easily defensible choke-points and killing boxes, befitting the fact that they are soldiers by trade.
* warriors-for-hire, protection and bodyguard services, and, at the highest levels, dealing with supernatural threats including vampires, necromancers, and Daedra worshipers.
* "Warriors' Gate" that she eventually comes back and becomes Lady President of Gallifrey.
* Warriors, got many people into cats, while also turning many of them into furries.
* Warriors have a more standard example: the Execute skill converts all of their rage into damage in one attack, but the enemy's health has to be below 20% to use it. This is often a massive overkill if the attack is critical. Except against raid bosses, which still can withstand a lot of punishment at 20% health. There is even one that
* Warriors have several shout abilities giving a range of effects, although these could not directly deal damage until Mists of Pandaria introduced Dragon Roar, an attack that hits all nearby enemies and briefly stuns them (and a
* Warriors Kingdoms: The Prophecy Begins, Graie makes sure that Ross knows his name isn't "Gray".

* Warriors Kingdoms: The Prophecy Begins: Humans that act as servants to the gods are called "god-toys" by the Kingdoms.
* Warriors Kingdoms: The Prophecy Begins is a girl masquerading as a boy. She wants to be a knight, but women aren't usually able to become knights.
* Warriors Kingdoms: The Prophecy Begins, squires have only one part to their name, but get another part once they change in rank. Monarchs have long names like "Tahliorius" and "Braukkiniaum", as well as their second name being "Star".
* Warriors: Legends of Troy even goes so far as to include dismemberment for human and non-human enemies alike.
* Warriors: Legends Of Troy gives your health back after three failures, or rather gives health back to the guy you have to protect in a mission when he acts as a suicidal coward.
* warrior society would experience some extreme growing pains in their first period of protracted peace, Nicholas Kerensky allowed events to unfold that saw all the Clans allied against Clan Wolverine. Nicholas happily sacrificed Clan Wolverine in the Trial of Annihilation to cement his vision of and control over the Clans.
* Warriors of Blood and Dream by Dave Smeds is about a teen wheelchair user who competes in virtual martial arts tournaments and wins consistently.
* Warriors of Camlann). There are elements of magic, but it tries to address historically plausible explanations for Camelot and Arthur. Though good luck, at points, figuring out who is who with all the alternate naming.
* Warriors of Chaos are basically Heavy-Metal Satanist Vikings so they naturally have long, flowing, plaited beards loudly proclaiming their copious badassery to all who look upon them.
* Warriors of Chaos army book describes a Nurgle-tainted landowner who locked himself in his room and inscribed verses of reverence to the Plague Lord all over his study, in his own blood and filth of course. "The mewling wreck that was found gibbered and moaned ceaselessly, crippled in mind and mutilated in body. He cradled and caressed many self-inflicted wounds, but none dared to dwell upon the cause of his missing hands."
* Warriors of Chaos generally use hefty axes, swords and hammers, as well as chain flails and large two-handed weapons. A fair number, especially those devoted to Khorne, use two weapons and eschew shields. They are no-nonsense born warriors and boisterous vikings, so close combat is what they're all about. They also have no traditional missile weapons beyond the odd throwing axe or throwing spear. Most of the weapons used by the Warriors of Chaos are forged by Chaos Dwarf smiths, and thus tend to be of high quality, and occasionally intricately detailed. Some of their heroes wield sentient weapons possessed by daemons.
* Warriors of Chaos have no settlements, carrying their minimal infrastructure with their armies, and as such have no way of maintaining internal income. As a result, they need to constantly defeat other armies and sack and plunder civilized settlements, in order to make money and maintain their dark gods’ favor.
* Warriors of Khorne often have such pads, characters such as the Slaughterpreist may actually have them stuck to the shoulder. As in, strapped on, and the buckles for the straps have been
* Warriors of Mars is that they are bipeds who walk on their legs and have a head and body like humans.
* Warriors of Might and Magic has some succubus-like enemies in the last two areas.
* Warriors of Might and Magic: In cutscenes, Alleron is shown to have a huge chin.
* Warriors of Might and Magic. They're mainly demons worshippers and, for some reason, Gnolls and Ogres.
* Warriors of Might and Magic, you can't learn Dark spells, and the few swords imbued with the dark element aren't really strong. Furthermore, Skeletons, Ghouls, Undeads, Wraiths, and Demons have the Dark Element with them.
* Warriors Of Plasm. Justified in that their world itself is a giant, squishy living organism.
* Warriors of the Apocalypse, includes a Bane character named Tsannik. His human host summoned him using an ill-gotten book of sorcery.
* Warriors of the Deep" features the Myrka, which was unfortunately unfinished; as

a result, it can barely move, and so characters can't really "run" away from it.
* Warriors of the Deep, inciting Michael Grade to personally start trying to kill the show off for being an embarrassing 1960s relic (which is what eventually did it in, although it did take him five years and several false starts).
* "Warriors of the Deep" missiles if it was not. Nobody was very surprised that the sync-operator (the guy that did the launching) was under stress.
* Warriors of the Deep", the Myrka is killed by an intense ray of ultraviolet light aimed at its eyes.
* Warriors of the Deep" were originally men, until director Pennant Roberts made them female. Roberts usually gender-flipped at least one role in every story he directed.
* Warriors of the Deep when he'd only done that once — the story's writer was presumably including the Sea Devils, a cousin to the Silurians, in that count.
* Warriors of the Wasteland are a biker cult which wants to purify Earth by slaughtering humanity.
* Warriors of the Wasteland. Good thing they have weapons, because they mostly look like go-karts.
* Warriors of the Wind manga was in fact published in its entirety several years before Disney released the true movie in North America.
* Warriors of the World, because one prefers to tell the truth and the other doesn't have a brain-to-mouth filter.
* Warriors of the World depending on the animal in question. A Creamy is referred to as to exactly what it is (a large butterfly); same with the Lunatic (a fluffy, if large, rabbit). However, a Tarou (a large white rat) stays a Tarou, and so does a Familiar (a vampire bat).
* Warriors of the World has the Raulus mercenary party. Despite their quirks they turn out to be extremely capable at what they do best.
* Warriors of the World: Soldiers of Fortune Argath shapeshifts into a swarm of black bats with silver wings to travel.
* Warriors of the World: Soldiers of Fortune concerning Iruna's chest despite the fact that she never wears anything revealing over the course of the story. He is well aware of this, internally reprimanding himself for it.
* Warriors of the World: Soldiers of Fortune. He speaks about a total of five or six times in all 35 chapters and only when it's about something important. The rest of the time his best friend explains why this is so, and speaks for him.
* Warriors of the World: Soldiers of Fortune is sharp enough to slice through tree branches like paper.
* Warriors of the World: Soldiers of Fortune powers and toys around with people's heads just because he got bored and finds watching others react to it fun.
* Warriors of the World: Soldiers of Fortune that took place fourteen years prior to the fic. All anyone knows about the war is that it was "between mercenaries and the Chivalry", and that Valkron was part of it. He's reticent on the subject, but he does imply that it changed a lot about how the way things were run in the Kingdom afterwards.
* Warriors of the World: Soldiers of Fortune. They start getting on well with each other once they determine exactly what they're meant to be doing.
* Warriors of the World: Soldiers of Fortune, to the point that he very nearly loses his job because he disobeyed an order to not disobey.
* Warriors of the World: Soldiers of Fortune, Valkron finds the need to straighten things out with Emeth when he makes an odd request.
* Warriors of the World: Soldiers of Fortune, whether the victim regains his soul or remains dead is still unknown.
* Warriors of the World: Soldiers of Fortune, who is more than happy to cultivate his image of being a bad guy, but has standards on wiping out entire races, isn't afraid to give the Normans a leg-up and keeps to his word.
* Warriors of the World - there is a ban on old magic being used within the Kingdom. The law extends to sentient non-humans and creatures as well.
* Warriors of Virtue consisted of this when the protagonist falls into a whirlpool and is teleported to the land of Tao.

* Warriors of Virtue: General Grillo was once with the Warriors of Virtue, and Yun tries appealing to this when they're captured by Komodo. However, even then they were apparently rivals, and Grillo reminds Yun of that, rejecting his plea for help.
* Warriors of Virtue had Tsun return to her home, an underground Lifespring facing a nasty rat infestation. Several times, she has to deal with the rodents being so thickly packed on the ground that there's hardly any place to step, and reacts to being bitten at least once.
* Warriors of Virtue, the forces of good and evil have been at war for years… but never kill anyone. Ever. The leader of the good guys accidentally killed someone before the start of the film and the titular heroes are about to go their separate ways in disgust. When the human POV character asks why everyone is so aghast at the idea a war might result in death, he is repeatedly shouted down. "IT WAS A LIFE!"
* Warriors of Virtue the realm's rightful queen and has been ruling Tao with iron fist.
* Warriors of Virtue to avenge her brother, who had been accidentally killed by a kangaroo ninja. She's ultimately killed by her boss when she has a change of heart and helps the hero escape.
* Warriors Orochi 3, in between battles, you can hold parties that increase the bonds between your current character and the other characters you unlocked.
* Warriors Orochi 3, which added even more characters, four additional story chapters, a new Gauntlet Mode, and tweaks to the gameplay.
* Warriors Orochi 4 update, adding new characters, story chapters, Sacred Treasures, Infinity Mode, and a deification.
* Warriors Orochi, everyone just inexplicably speaks modern English/Japanese.
* Warriors Orochi game, Yoshitsune Minamoto has a special gauntlet that produces an energy blade. Said gauntlet and blade can even fire energy blades.
* Warriors Orochi had Nobunaga say, "Encircle, eviscerate, and extirpate the odious ophidian!"
* Warriors Orochi in order to amass a large enough army to defeat the Hydra once and for all.
* Warriors Orochi. In Orochi's Story, the end of one of the levels has Orochi's forces whoopin' Cao Cao's ass. The cutscene afterwards shows Dian Wei carrying his body off the battlefield, making it look like he's dead...until they zoom in on his hand.
* Warriors Orochi in the DLC levels as at least two of them involve Yoshitsune trying to find some new clothes for Ayane.
* Warriors Orochi, Liu Bei spends his time being held hostage in Orochi's prison and be the focus of the battle for the rest of the Shu characters, whereas other rulers like Nobunaga, Cao Cao, and Sun Jian eventually broke out and join in kicking Orochi's ass. In the sequel, however, Liu Bei is able to return to kick some ass to make up for his Distressed Dude time from the prequel.
* Warriors Orochi (released after Takishita's death) where Gracia talks about Sima Yi in an unusually melancholic way, which many fans have interpreted to be a tribute from Shikano to Takishita.
* Warriors Orochi series gets quite into this, especially as it continues.
* Warriors Orochi series, you form a team of three fighters, and while each of them has their own life meter, the game is over if any one of them is defeated by the enemy.
* Warriors Orochi they are rescued by Kaguya, who sends them back in time and begins this plot.
* Warriors Orochi was a spinoff that brought the cast of Dynasty Warriors and Samurai Warriors together.
* Warriors (over a thousand, mostly composed of extras and bit characters). Many characters suddenly change pronouns between books or even within the same book. For example, as a kit and an apprentice Sedgewhisker was male but she turned female once she became a warrior.
* Warriors puts more emphasis on each Clan having a generalized look thanks to

inbreeding and natural selection:
* Warriors Redux actually have supernatural powers. The Clan cats believe in their afterlives and believe seers are mystical but, unlike in the original series, there's no concrete proof in either.
* Warriors Redux after having gone for a walk one night. It was thought to be an unfortunate accident until several months later another seer was attacked (but this one survived).
* Warriors Redux, cats that either repeatedly eat before feeding the elders and queens, break Border Laws, or shirk their duties must give up meals as punishment. This is an especially potent punishment for Clan cats as they're frequently at risk of starvation.
* Warriors Redux mythology has been expanded to depict the forest's creation. It involves a monstrous creature called the Mother eating smaller monsters and then giving birth to three children: Tiger (Rokhar), Leopard (Suriin), and Lion (Horoa). Her children created the water, trees, clouds, etc. The Mother created the wildlife, with "less perfect" animals being made out of the monsters she eaten. Her greatest creation was the domestic cats and, as a result, she gifted them the forest. It's also explained that the sun and the moon are each an eye from Lion and Leopard respectively.
* Warriors Redux series. Cats judge time by the position of the sun and moon. They also have their own names for the seasons. To be more specific:
* Warriors Redux since kittenhood. He's also terribly shy and speaks with a stutter.
* Warriors Redux, ThunderClan is known as the most fight-happy Clan. They also consist of the largest, most muscular cats:
* Warriors Rewrite: Darkstripe hates his younger brother Graystripe because their mother died in childbirth with him.
* Warriors Rewrite, is taken in by ThunderClan, who recognize that she has been framed.
* Warriors Rewrite: Sometimes loners who can't take care of their kits will abandon them by Clans so that the Clan will adopt them. Swiftkit and Ravenpaw were both abandoned by their mothers and adopted into ThunderClan.
* Warriors Rewrite. They're only allowed to see one another at monthly Gatherings and it's not even guaranteed that both cats will go to a Gathering. Still, they make do and oftentimes end up having kits nevertheless; once they're older, the kits choose which Clan they want to be with.
* Warriors Still, Clans do coincidentally have a lot of similarities to how actual cat colonies work.
* Warriors, Teller of the Pointed Stones exiles six of his own cats (they're meant to kill Sharptooth or never return), Bluestar exiles Tigerclaw because he tried to kill her, and RiverClan exiles Graystripe because he saves Firestar's life.
* Warriors: The Days The Clans Died to take mates, nevermind have kits.
* Warriors: The Days The Clans Died: When asked who the previous medicine cat was, Sandfreckles guesses it was someone called "Jayclaw". She never met Jayfeather because he died before she was apprenticed.
* Warriors The Tiger Force commander is incensed as it sets a bad precedent and demotes the pilot from flight leader.
* Warrior's Way. Which looks rather weird considering you're using your own Mii avatar as the monarch trying to rule everything.
* Warriors were more dependent on gear than any other class until Cataclysm, largely because of Rage as a resource. The more damage their auto-attacks did, the more rage they had for their active attacks. A warrior in questing gear was starved of rage, in epic gear had a full bar from a single weapon swing. This was fixed by normalising Rage to rise only in respect to one secondary stat (haste).
* Warrior: Technically, any individual who pass training. Those warriors without a rank are equivalent to Privates.
* Warrior tribes lacking access or knowledge of metalworking have made armor coats made from bone as well as other materials (wood, leather, hide, etc).
* Warrior trilogy. They refer to protagonist (and implied turncoat) Justin Xiang

with racial slurs, a very rare instance of outright race-related bigotry in a setting where people have kind of gotten over racial origins—this is the same setting that once featured a tanned green-eyed redhead being addressed as "Rabbi Martinez" to absolutely no one's surprise or confusion.
* Warrior U as an actual medical condition, after Harv is run over by a cart while rescuing a cat from the road.
* Warrior U dresses as a boy so that she can learn to become a warrior.
* Warrior U: Finn gets all the class to skip school and go to the beach, where they are joined by recurrent antagonist Hevvin the Unicorn. After a while, they are caught by the teachers and locked in detention. Hevvin loudly protests that he shouldn't be there because he doesn't even to go that school.
* Warrior U. Finn has a gaping hole in his chest as the result of a unicorn attack.
* Warrior vs. Sorcerer: Warriors and sorcerers depicted as enemies or rivals.
* Warrior. Warriors typically consider themselves warriors at all times, even when not equipped for combat.
* Warrior) were still niche supporting/character actors who had not yet headlined many flicks of their own and were only gradually building a bigger reputation. The film was dropped in a September release by Lionsgate and lost money.
* Warrior: We see Mad Dog crush his sparring partner with a spinning back elbow, only to be crushed himself by Tommy the first time we see him fight.
* Warrior when a superhero with Super Speed wonders why there is no sonic boom.
* Warrior Wolf Women of the Wasteland, having sex causes the women of McDonaldland to start transforming into wolves. This happens anytime they have sex, and it is irreversible.
* War Rocket for aliens, though they still have a fore-and-aft design that ensures that they work like the rockets anyway.
* Warrod Seeken, the 4th ranked Wizard Saint, possesses Green Magic, which he uses to halt the spread of deserts as a hobby.
* War Room segments, she claims "My hobbies include professing my love for the Lazurian Army and vowing revenge."
* Wars are often taught in a very simplistic fashion. It would take the whole school year to get a non-Theme Park version of one war, especially complex events such as the
* Warsaw Ghetto Uprising The German commander Jürgen Stroop reported:
* Warsaw Pact Rebellion: Members of the Warsaw Pact (often Poland or East Germany) rebel against the Soviets. Explored by Hackett and a few other authors.
* Warsaw Uprising of the previous year, saw this. By late-summer 1944, the Soviets had annihilated Army Group Center and pushed all the way to the gates of Warsaw. The Polish resistance believed that the liberation of their city was at hand and so began their long-awaited uprising to cast out their German occupiers. Unfortunately, they did not realize that by then, the Soviets had exhausted their offensive capabilities and had to replenish. On top of that, Stalin had no interest in seeing a free Poland which would have close ties to the Western Allies and also deprived them of use of Soviet airfields to resupply the Poles, who held out for two months before finally surrendering to the Germans. By the time the Soviets entered the following year, Warsaw had been flattened.
* Warship armor protection evolved due to this trope. Originally, it was common for ships to have the thickest armor around the sides, bow, and stern, to protect from direct enemy gunfire. Improvements in artillery and range-finding led to the addition of armor protection against "
* Warship Gunner 2 while submerged and submarines usually attack with torpedoes. If you'd researched the best sonar and long-range torpedoes (giving yourself superior detection and attack range to enemy subs), you'd be fine as long as you didn't advance too quickly. If you didn't do that, expect to see the game over screen frequently.
* Warship Gunner with battleships, the most powerful weapons in the game are "Wave Guns," which come in several sizes but all of which fire lasers larger than the player's ship (which cause the player's ship to rocket backward thanks to laser recoil) and can sink fleets of enemy ships, yet will do fairly little against the

game's island-sized bosses, who can have multiple wave guns and giant, hull mounted instant death buzz-saws.
* warship, it was never clear if "gunship" refers to size, tonnage, armament, or just any very heavily armed ship other than the above named types. Talyn was constantly growing and revealing new capabilities, such as stealth travel and intelligence gathering. He was also capable of long-range independent operation without support vessels.
* Warships and other military vehicles (e.g. tanks, aircraft, etc) have a "design triangle": You can have
* War Ship: Shipping two characters who are on different sides of a war.
* Wars of Italian Independence. Thus the House of Savoy and their ministers tried to secure Rome peacefully even before they managed to proclaim the Kingdom of Italy, after which they had to ignore Pope Pius IX's continuous provocations while using the French protection of the Pope as a reason to do so... Then France had to recall the garrison due the losses suffered in the war against Prussia just as Pius IX was using the First Vatican Council for yet another provocation, at which point, after one last attempt to secure Rome peacefully, Italy invaded with overwhelming force, surprising the international community with the obsession in putting their capital there.
* Wars of Liberation: the allied forces would execute tactical retreats when faced by armies led by Napoleon himself while attacking armies led by his marshals, so to conserve their forces while weakening Napoleon's. It worked, and while they did lose the battle of Dresden against Napoleon himself this defeat was more than offset by the simultaneous victories of Großbeeren and the Katzbach, as well as the battle of Kulm where the defeated allied main army brought the pursuing French I Corps to grief. By the time they willingly accepted to fight Napoleon at Leipzig, his forces had been weakened enough that the allied forces could overwhelm him.
* Wars of the Roses (1455-1485), famously depicted in Shakespeare's plays.
* Wars of the Roses and the declining mental state of Henry VI. Because he came to the throne as an infant, and never became a forceful leader, the nobility descended from different sons of Edward III grew in power and ambition. This was complicated by the fact that Henry's grandfather, Henry IV, was a usurper, and one without an ironclad claim to the throne, from a certain perspective the Yorkist claim to the throne was actually better then Henry VI's claim.
* Wars of the Roses: began in 1455 over a dispute in the succession dating back to 1399 and ended in 1485. The man who won the war and became king wasn't even born yet when it began.
* Wars of the Roses between two rival branches of the English royal family, got their name from the red and white roses that each branch of the family adopted as their dynastic symbols. They were also infamously bloody and tumultuous for England as a whole. At the conclusion, the ultimate victor in the conflict (Henry VII) created a special "Tudor rose" by combining the two badges as a symbolic manifestation of his role in ending the conflict.
* Wars of the Roses in 15th century England. It effectively meant the extinction of the Plantagenet dynasty and whole family line.
* Wars of the Roses kept restarting all the time because no one faction was able to build a lasting peace.
* Wars of the Roses: King Edward IV did this in 1471 upon his return to England, seeking to take his throne back from Henry VI. It worked, as he crushed the Lancastrians and ended the Wars of the Roses.
* Wars of the Roses: The First Battle of St. Albans was a battle between armies of thousands, but ended as a decisive Yorkist victory when the Duke of York's men went straight for the Duke of Somerset and killed him. The total number of casualties was less than 100.
* Wars of the Roses, the town of St. Albans, which lay a few miles north of London and controlled one of the major roads to the capital, saw two battles, in 1455 and 1461. The town lacked strong walls, and so the two sides ended up fighting in the streets on both occasions, with predictably bloody and confused results.

* Wars of the Roses. With no source of employment, many joined the retinues of individual noblemen, enlarging them into private armies. This led to private wars between noblemen that eventually fed into Richard of York's struggle to become King of England.
* war, son, and don't you forget it! Now get out of my sight before I smack that smile off your face!" Especially "Sgt." Gomery, who will knock your freaking teeth out if he thinks you aren't being serious enough.
* Warspite is a cruiser designed to test the new spinal mount plasma cannon technology.
* War Stories" has Mal's fight with a torturer, while Zoe initially tries to stay out of it:
* War Stories: he has Mal and Wash captive, and agrees to let one go while the other will continue to be tortured. He starts to make a dramatic speech about how she must make an impossible decision, and Zoe interrupts him by immediately picking her husband. Subverted, in that Niska is angry about having his moment ruined, and takes it out on Mal by slicing his ear off.
* "War Stories" (where Zoe and the crew rescue Wash and Mal from Niska) and "The Message" (where Mal and Zoe are shown in flashbacks saving Tracey's life).
* War Story, the adjutant (Executive Officer), charged with keeping the squadron in essential stores, is a corrupt gambling addict at the end of a chain of corruption. As a result the airmen are on basic rations with no coal for heating as the officer charged with providing food and warmth has gambled it away. The situation is only resolved with a change of personnel and a barter system, based on food parcels containing sought-after luxury items sent by rich relatives of affluent officers. The old Adjutant is demoted and sent to a penal regiment, whose ex-con soldiers kill him when they discover he's gambled away their rum ration.
* Warstrider features an inversion, as the tripods are actually the humans' titular mecha.
* Warthogs expy has to roll back time repeatedly in order to pass his magic exams.
* War Thunder allows players to apply decals to customize their vehicles, with many based on historical examples, including a very large selection of kill tallies. These are purely for show however, since a players actual kill tallies would very quickly cover their entire hull, though a detailed breakdown of any vehicles kill stats are logged for screenshots and showing off in their garage.
* War Thunder), but it's not uncommon for players to have to make landings with a significant amount of their control surfaces missing or with huge holes in them, or have to perform a crash landing with nonfunctional landing gear or a dead engine.
* War Thunder, damage to the breach of the tank's cannon can cause it to misfire. Attempting to fire with a damaged breach has a fairly high chance of causing the shell to explode in the breach, instantly killing the crew.
* War Thunder ENEMY TANK". Besides the abominable grammar, it essentially instructs would-be players not to troy them, however one goes about troying something.
* War Thunder Ground Forces, aiming for specific parts of the tanks is essential. This includes the view slits for the crew, ammo or fuel storage for a quick kill, but also the engine, transmission (getting stuck in reverse) tracks, or the turret to keep the enemy tank from firing or escaping.
* War Thunder, he'll counter your barrel roll either by using a series of diving attacks, or predict where you'll end up, and blow you out of the sky. It's even worse for you if he has a friend playing with him. Regardless, those that study the art of the dogfight, will excel at the game.
* War Thunder offers a couple maps in which the enemy has a naval task force hidden in a fjord. The targets are entirely optional, but if a player is going for the big payoff by taking out a surface ship, he'll need to fly down the fjord in a bomber, dodging flak from ships and shore, and praying that the enemy fighters stay distracted long enough for him to drop his bombs or torpedo.
* War Thunder's ground forces game mode, various mechanics that incorporate spotting exist. Any enemy target hit by friendlies will have a marker pop up over it, to indicate its rough position (allowing you to use your machine guns or main cannon to spot a target). Most light tanks have the "scouting" ability, which

allows them to scout an enemy vehicle they are aiming at via the gunsight or binoculars, which makes it visible as a marker on the map and pointed out via a marker in-world. All players can also click on the minimap to place a marker there, to manually bring a spot to the attention of their teammates. And finally, medium and light tanks and SPAA vehicles have the ability to call in an artillery strike.
* War Thunder. The Soviet one in particular has the added weakness of being unable to aim forwards, because shooting through the cabin with an autocannon would not be particularly wise.
* War Thunder (though of course each player can only have 1 tanks active at a time, and many other vehicle times can fill some of those 96 slots).
* War Thunder. Torpedo boats and gunboats will duke it out in fast-paced close-to-medium range battles (i.e. from point-blank to about 4 km), while destroyers, cruisers and battleships will require a more patient playstyle and skill in long range gunnery (it's possible to hit opponents at a distance of 10 km).
* War Thunder variants. Likewise, post-WW2 aviation branches of Germany and Japan are comprised almost exclusively of American fighter jets.
* Wartime Cartoon: Animated films as pro-war propaganda, meant to instill viewers with militaristic and nationalistic sentiments against the enemy.
* Wartime Cartoon, a Rosie the Riveter type leaves her baby in Porky's care, along with a book on child-rearing for help. After following the advice fails to control the unruly kid, she shows Porky the correct way of using the book - as a spanking paddle.
* Wartime Cartoon as a woman-hating messenger bird being used to get a secret past a spy who had been seducing messengers.
* Wartime Cartoon "Bugs Bunny Nips the Nips", Bugs encounters a parachuting Japanese pilot and hands the guy a "scrap iron" donation (See: Anvil) and the poor fellow instantly plummets to earth like his canopy was cut.
* War Time Cartoon, but is mostly an excuse to make jokes at their expense.
* Wartime Cartoon "Confusions of a Nutzy Spy", one of the wanted posters is of a pin-up girl with no crime alleged, but a note attached saying "and you ain't kiddin', brother!" and signed "U.S. Army."
* Wartime Cartoon "Ding Dong Daddy" is about a dog falling in love with a statue of a greyhound named Daisy. Every time he tries to kiss her, the statue gets struck by lightning, which makes him think she's a great kisser. When the statue gets smelted to make ammunitions, the dog wanders the factory until he finds the shell that Daisy got turned into. He gives the shell a kiss and it explodes. "She hasn't changed a bit!"
* Wartime Cartoons, air raid wardens would often be the subject of ridicule. In particular, a character would have a tendency to yell either, "TURN OFF THOSE LIGHTS!!!" or "PUT OUT THAT LIGHT!!!"
* wartime cartoons, and has 1940s-esque designs and animation to match.
* War Time Cartoon shorts dwell on stereotypical representations of Germans, Italians and the Japanese.
* Wartime Cartoons weren't mindless propaganda, but they were harsh commentaries about war itself.
* Wartime Cartoon theatrical shorts, after a fashion. A giant bomber, larger that anything ever built, carried a number of small, one-man fighter planes aboard, launching then off the top of its fuselage.
* Wartime Cartoon", the Screwballs, obvious Nazi analogues, are defeated when it starts to rain and they all rust solid.
* Wartime Cartoon where a factory worker has Porky watch over her sack-o'-hell baby. She gives him a large child psychology book before she leaves, but its advice proves thoroughly useless. It isn't until the mother returns that we see how she intended him to use the book: as a spanking aid.
* wartime is floating downriver when a slew of Japanese snipers aim their guns at him.
* Wartime Wedding: A couple gets married during a time of great war and strife.
* Wartortle is said to live 10,000 years. Though not as extreme as Arceus, that's still a

* Warts and All: A person remains revered and respected in spite of their flaws.
* Warts and All: Don't let a great hero's character flaws obscure or discredit the good they did.
* Warts and All: Look, kid, there was more to the legendary heroes than what you heard. They had their shortcomings, just like you and me. Deal with it.
* Warts and All: The legendary hero you idolized turns out to be more horribly flawed than you thought.
* war tubas were really large hearing aids, and Jack Dee joking that the first geisha were all men.
* Warum läuft Herr R Amok?, a film where absolutely nothing happens, despite the fact that the main character kills his family and then himself. Although, the film does a pretty good job of illustrating why Herr R. runs amok. It's just not the violent crime film or psychological thriller everyone expects from the title.
* Warverse "Remind me to talk to you about the cult of six-one-two, fun story, that".
* war. When Rhaegar and Robert finally met at the end of said war, they had an epic battle that Rhaegar fatally lost. Unfortunately for pretty much everyone, Lyanna died anyway.
* war, whereas they are now considered technical problems which can be solved through social development, economic growth and technological development.
* Warwick Davis. He has extensions so that he can operate the pedals of a car but he only has a set for an automatic (accelerator and brake, no clutch) and the "Reasonably Priced Car" is a manual. Richard Hammond's attempts to cludge together a work around were... less than optimal.
* Warwick's current lore, where he's an alchemical hybrid in the shape of a werewolf, zig-zags this a bit. He seems to be resigned to his "curse," the result of the alchemist Singed trying to bring out his "beast within" literally, but appreciates the knowledge of his "true nature" as a killer and the ability to hunt other killers.
* Warwick the Kingmaker, to fall out with Edward and try to overthrow him, as he felt that Edward wasn't following his advice.
* WarWind flamethrower. However, it is vulnerable to enemy units with Deconstructor ability, and can easily massacre your own troops (if the friendly fire option is activated in the options menu).
* WarWind has a few elite units equipped with laser weapons, which do considerable damage and have a long range of attack. The latter advantage makes them very useful in softening the advancing enemy before he reaches your main defence force, especially when you place the laser-equipped unit in a watchtower.
* War Wind live in harmony with Yavaun's ecosystem, have natural magic abilities, and genuinely strive for peace and harmony among all races on the planet (including humans in the second installment). All this doesn't mean they cannot be a dangerous foe in combat, especially when it goes about the weak and oppressed.
* WarWind, there is a unit modification that allows the user to disguise themselves as an enemy unit. This can be applied both by you and your computer opponents.
* war with Mexico), the territory's original borders were minorly balkanized—parts of Wyoming, Colorado, Kansas, Oklahoma, and New Mexico once belonged to the Republic of Texas.
* War With No Name: Sebastian and Sheba were based on an actual cat and dog.
* War With No Name:The translator gives enormous knowledge, and this is a danger for a first-time user.
* War Without End. He even says "unstuck in time" to explain Sheridan's condition.
* War with the Newts - just after starting a war against humankind, the titular newts take over the radio world-wide and declare that recent earthquakes and flood are made by them, not by natural causes.
* War World a large number of planetoids explode when Superman and Supergirl fight alien warlord Mongul's star-sized weapon satellite. Warworld itself explodes when Superman reprograms its computers.
* War World, and although he doesn't want to kill J'onn, he knows fire weakens Martians, so he uses his heat vision to ignite the ground around them, and then he

punches J'onn out.
* War World and gives him food for thought. As Clark reflects on his newly-learned lesson, The Spectre fades quietly when he was not looking.
* War World are forced to fight. The Martian hero tries to fight off his weakness to fire when Superman ignites the ground around them.
* War World attempt to destroy it, they confirm that a pair of blows of the weakest weapon of Warworld can kill them in spite of being nigh invulnerable.
* War World: Before entering the command console, Mongul pays a visit to the grave of the last Warzoon.
* War World cellmate from a prison camp and again forces them to impregnate her as the first time didn't take.
* War World deduce the way to beat super-villain Mongul by observing a mass graveyard located at the titular weapon-satellite.
* War World features ancient warlike alien civilizations, planetary tyrants and the titular bigger-than-a-star mobile war machine.
* War World, his first appearance. Subsequent artists ignored this trait, though.
* War World Kara flies at incalculable speed when she hurls herself at Warworld.
* War World, Kara hurls herself at the eponymous massive weapon satellite at incalculable speed and collides with it, breaking it down.
* War World out. The Spectre is humanoid, but he is the embodiment of God's Wrath and unimaginably powerful.
* War World rather than explaining his plight so both heroes could come up with a plan (although, to be fair, J’onn didn’t ask either).
* War World series has black white people—the descendants of extreme South African white supremacists who wound up on a planet with so much UV that they selected for dark brown skin. One of the latter-day inhabitants describes this as "ironic".
* War World: Superman bursts through thousands of walls and ceilings when he hurriedly flies inside the eponymous weapon satellite.
* War World, Superman has this reaction when Mongul — who is blackmailing him into retrieving an artifact — reveals where the Crystal Key is:
* War World: Superman prepares to look for his cousin, who has become lost in space after helping destroy Mongul's star-sized super-weapon. Superman reminds himself he must calculate her trajectory carefully before tracking her down or he'll never find her, no matter how long he searches.
* War World Superman resorts to Supergirl to help him bring Mongul and Warworld down. The two of them fight together and manage destroy the massive war machine.
* War World: The Alien Sky is an important plot point, as the moon Haven has a day/night cycle 87 hours long, so having a heat-radiating Brown Dwarf in the sky can mean the difference between freezing to death and merely losing a few toes.
* War World, the Martians prepared a cluster of miniature missiles armed with Kryptonite in case that Superman tried to seize the device that controls the eponymous super-weapon and they were tasked with guarding.
* War World tried to stop him from pursuing; naturally he fights back; and naturally he can't even budge the Spectre physically or otherwise. Eventually the Spectre convinces Superman that following Supergirl would lead him into realms that no mortal should witness (implied to be Heaven. Supergirl was unconscious, so it wasn't a problem for her.) When Superman asks for the Spectre's help, he responds "Of course; you only had to ask," and simply teleports Supergirl to them.
* War World tries to show this to Superman, so he gives him a chance to save Krypton and prevent his foster parents' deaths. Superman fails both times.
* War World use super-ventriloquism to communicate with each other through the void of space.
* War World warns him that he is putting countless lives on the line for three people. Unfortunately Superman cannot trick Mongul and has to choose between giving the Key to the galactic despot and letting his friends die. He decides he cannot bring himself to hand over the key.
* War World, when Superman goes after his missing cousin he pours on speed until he breaks all barriers of speed, space and time.

* War World, where Mongul incapacitates Superman by attaching to him the Black Mercy, a plant that grants an image of its host's innermost desires, hoping to conquer the planet while the Kryptonian reamins asleep.
* "War", yet another Whitfield-Strong composition originally performed by The Temptations, is more widely known for Edwin Starr's rendition. The Temptations' version, released on their 1970 album
* Warzone 2100 allows you to build sensor vehicles and towers that can act as spotters for artillery and VTOLs.
* Warzone 2100 Dr. Reed hacks into the Project's Synaptic Links (which were also developed by Reed) and begins taking control of the player's units and structures.
* Warzone 2100) eventually powers up his laser satellites against the player during the semi-final mission as at this point all of his systems are now back online.
* Warzone 2100 has this for most of the higher-tier artillery units, such as Ripple Rockets, which fire about 20 missiles in an arc to a target up to half a map (even further for some others) away, and take about 10-20 seconds to reload.
* Warzone 2100 is depicted as a cone of fire descending on it's target area.
* Warzone 2100 mentions "wars over cans of dog food" in the years following the nuclear apocalypse.
* Warzone 2100 of some description. The tanks you could build depended on the technologies you found and ranged from a light tank with a 7.62mm machine gun to hovertanks that had armor made of an ultra-dense alloy and carrying a rail gun. The pinnacle of tank technology is the Dragon multi-turret chassis, this is an extremely tough chassis that uniquely lets you mount two weapons on it for a tremendous firepower advantage.
* Warzone 2100's defunct developer, Pumpkin Studios, released the game and its source code under the GNU General Public License.
* Warzone 2100, your faction The Project, needs to find technology to build up their languishing tech knowledge. This in a post-apocalyptic future where you'll be fighting factions that have cyborgs, VTOL gunships, hovertanks and etc. A large number of your early tech found, is no different than what you find in the late 20th/early 21st century. The first tech artifact you find is the 7.62mm machine gun and a turning point for your faction is when several levels down the road, you recover the technology to make 120mm cannons. That lasts you quite a while and it's also when the more futuristic tech starts really showing up.
* War Zone has a supplement describing the flora and fauna of the colonized Venus as basically consisting of giant carnivorous plants, dinosaur-like lizards, deadly bacteria infesting the waterways and quicksand pits every inch you dare to tread. And that doesn't even include the Dark Legion's nightmarish troops lurking in the jungles.
* War Zone in service of the inquisition), with a one-edged sword and a large pistol.
* War Zone series, Punisher once went up against a mercenary named Roc, who was impervious to harm. The explanation given was that he was incredibly muscular and had no nerve endings. This doesn't explain how he was able to survive being shot at point blank range with a double-barreled shot gun, or how he shrugged off getting a large knife shoved between his shoulder blades.
* Warzone universe, the "Dark Huntsman" is a Dark Legion unit in the form of a former human soldier who was brainwashed by the Dark Symmetry and then sent back to the no man's land between the front lines to prey on his ex-comrades. His modus operandi is lying in a ditch somewhere crying for help, claiming to be wounded, then killing any soldiers that come investigating. Of course, since he retains all knowledge of codewords etc., he is also a perfect infiltrator.
* was a 1990 unsold pilot where an animated, talking dog interacted with live actors, in a rather blatant swipe of the Roger Rabbit formula.
* Wasabi as Hubert uses creative ways to deal with them without her noticing.
* Wasabi: During a case, detective Hubert accidentally injured the son of a nightclub owner and went to visit him in the hospital to apologize. Hubert gives him flowers (putting them in the boy's glass of water) but when he leaves he slams the door, which causes all the shelves of flowers the boy had received to fall. The

glass of water spills onto the son's hospital bed, frying the switch, which makes the bed collapse. He has to go back into surgery because of it.
* Wasabi insists on using his turn signals and stopping at red lights (on an empty street), even when his car is being chased by a supervillain trying to kill everyone. Annoyed, GoGo takes the wheel and does some crazy maneuvers to escape.
* Wasabi is "Quite possibly the greatest French-language, English-subtitled, Japanese action-comedy of all time."
* Wasabi No Ginger goes from a quiet, disciplined warrior to a neurotic plasma engineer with
* Wasabi no Ginger's name is shortened to just "Wasabi". It's a nickname in the movie.
* was able to correctly identify Kahn as Laotian at first glance (Hank and the gang kept asking him if he was Chinese or Japanese even after he said he was from Laos).
* was able to enter the Sacred Realm in the first place and bring about the Crapsack World.
* was able to keep Peeta alive in the arena (no small feat in itself) by cleaning his wounds and draining his pus.
* was about defense matters—that is, it was the annual appropriations act intended to keep the military fully supplied for the coming fiscal year.
* was a breakdown, but the Italian navy conveniently failed to ask why the Soviet sub was hiding in Italian waters or why they had a support ship just outside territorial waters.
* was actually a clone, and her "father", the custodial parent, treated her as nothing more than a scientific specimen, so the mother tried to fake the girl's death so that she could disappear off the radar and live a normal life.
* Was Actually Friendly: Thanks for apologizing to me for misjudging me. I forgive you. You see how well you can get along with people once you actually get to know them?
* was a cure, and it had been administered on Rain. It was just given to her too late.
* was a different story and was able to dominate Vegeta in their first fight thanks to his transformation. Even after Vegeta surpasses him, he still puts up a decent fight.
* Was a downplayed version of this as all of the movies tried to avoid inter-franchise
* was a founding member of the team, he only lasted three issues, since he was hardly a team player.
* was a girl all along; the genie didn't mishear the wish, but wasn't powerful enough to make her male, so changed her memories so she thought she was male instead. The anime has a character suggest this without resolving it at the end.
* was a high cliff - given the speech just before when he claimed he didn't accept help from anyone, least of all into his grave. That he survived was apparently just a lucky coincidence.
* was a human scientist who, while exploring an undersea ruin in the 1800s, became touched by. Subverted in that he doesn't feel cursed. Usually.
* was a kid's game marketed which involved miniature siege engines that launched marbles, with the attacking side having the goal of breaking down the walls and the defenders aiming to take out all of the siege engines. The siege equipment included cannons, a trebuchet, a catapult, and ballistae.
* was a little-known prototype version of the MP 38, the MP 36, which bore a superficial resemblance to the later weapon but it had a wooden body, a slightly tilted magazine housing and was produced in very small numbers). Of course, as the Germans were collecting paranormal technology, they obviously must have acquired a short duration time-machine.
* was allowed to use the bath house and there was actually a small section set aside just for him.
* Was also averted in one episode. House and Cuddy were on an airplane returning from a conference about rare infectious diseases. When a passenger got sick, Cuddy thought it was one of those diseases, and it seemed she might be right when another

passenger displayed similar symptoms. Despite the symptoms, the passengers had entirely different things wrong with them.
* Was also used for a Glade Plug-Ins commercial. The painting was animated and reacted to the bad smells in the area before the plug-in was activated.
* was an accident, but Morse's investigation uncovered an art fraud ring.
* was an anonymous donor, so he didn't technically lie to anyone. The best that can be hoped for is ethics charges, as criminally there is no case. He may have committed fraud in a couple instances where the patients wanted to be fertilized by their husband's sperm, but it would require a paternity test to prove someone else was the father, and the couples in question are so happy to have finally conceived a child that they refuse to take part in any prosecution and cannot be legally compelled to allow said testing. It's one of the few instances on the show where the good guys lose all around.
* was an asteroid impact that occurred right around the Cretaceous–Paleogene extinction and that this was a significant contributor to the mass extinction event. A big reason this trope is still so pervasive is two fold. Firstly, there is still some ambiguity as to if the impact and resulting catastrophes did the gruntwork of the event itself or if it kicked off a chain reaction that did the majority of the ecosystem collapse. Secondly, while the asteroid impact hypothesis has been around since the 1980s, unambiguous support only sprung up in the following decades. Given many now-adult writers were children during this ambiguous period, you'll see this trope crop up more in their stories than youth tales which near unanimously point to the asteroid as the author might be under the impression the true cause of the extinction is still totally mysterious. The short of it is there was a mystery in the 1980s and early 1990s as to why the dinosaurs perished, but further findings have given reality significantly less wiggle room.
* was an attractive woman with football posters on the wall, who responds to Peter's misaimed threats against "Jason" by calling the police.
* was and claims he can't relax without it on hand. Considering the dangers he faces this concern is probably for more practical reasons, but who's to say whether the possible emotional and practical reasons can't complement each other?
* was, and his sexuality has continued to receive quiet nods within canon since then.
* was and said he was just a hired bodyguard, not realizing they were talking to the CEO of Stark Enterprises under the mask.
* was a necromancer since he willingly sacrificed himself to save his subordinates all) of the Kages from the other great ninja villages seem to have embodied this trope as well.
* was an incomplete enemy of the Shock Jockey-Vigor Junkie left in game files, It was repurposed for this DLC for an in-universe drink named Old Man Winter that the enemy is addicted to, that Booker and Elizabeth must fight.
* was an insufferable genius back in the day (to the point where the Five rejected him), before going batshit insane after his daughter died.
* was an internet, they likely were never said by any politician who only came to public prominence well afterward.
* was a normal-looking cathedral, until Andariel and her demonic minions took over.
* was an upgrade — they lost several unique powers, but also gained new ones.
* was a parody of drumming instruction videos featuring needlessly complex and masturbatory parts with extremely large drum setups that contained components that were either largely superfluous or used to the point where the part was irreducibly complex and would not easily translate to smaller setups. Many viewers who were not aware of the video's origins, but were aware of the kind of videos that Armisen was parodying took it completely seriously.
* was a pirate, and even as he laid dying, tried to impart to his crew not to let their hatred lead them to his fate (long story, but after he was mortally wounded, a blood transfusion could've saved him but Fisher refused because it was human blood and his hatred wouldn't let him take it). This wisdom fell on deaf ears when it came to Arlong and he decided to take revenge on humanity by enslaving as many as he could and building an empire from it...by going to the the more peaceful of

the four seas, East Blue, and taking over an island of residence who likely don't even know much about fishmen let alone would abuse them.
* was a plan in the 1930s to extend the Northern line's Edgware branch north to Bushey Heath, with intermediate stations at Elstree South and Brockley Hill. The plans were ultimately put on hold in the 1940s due to World War II, and canceled completely after the implementation of the Metropolitan Green Belt.
* was a popular theory about them in the early days of the show. Jack and Kate just roll their eyes when they hear it.
* was a rank in the US Navy, at the O-7 (one star) level. However it was abolished as an official rank in 1983 and replaced with Rear Admiral (lower half). It is still used as an honorary title, given to Captains (O-6) who are in command of multiple units, such as a fleet of ships or an aviation squadron.
* was around during the birth of Christianity, and quite possibly even before that. Xenosaga is a bit over 5000 years into the future.
* was as insane as his commercials implied; his business eventually ended up tanking because of it.
* was asked about there being a Christmas special that year, he said they seemed to be making an 11th episode, even thought they only had a series of 10, notably without actually saying the word "Christmas". Come November, it was officially confirmed that the holiday special had been moved to New Year's Day.
* was asked repeatedly if the code could actually be scanned, and he confirmed it does!...but only registers an item worth 3 yen.
* was a small blip on the lie detector, just not big enough to be registered as a lie. Laurel realizes that means he did lie intentionally, but kept his biometrics under control, meaning he could have been lying on any of the questions.
* was a soldier in Iraq, but an IED explosion killed almost her entire unit; only Amanda survived the blast.
* was a sophisticated, well-educated and highly intelligent professional woman, with important and valuable friends, and that she had written two poems that appear on Danish Web sites supporting the preservation of the baby seal population in eastern Canada. For this, she was roundly ridiculed in the blogosphere. Then it appears that Anonymous took an interest in the case. Guess what the poor lady now finds when she Googles herself?
* Was a staple of the comic strips in old-style British magazines for young teenage girls, like
* was a top-notch player, but he was only a safety while Roethlisberger was (and still is) the quarterback.
* was a tribe from around Colchester that the Romans called the "Trinovantes".
* was Austria-Hungary. He proceeds to describe how strange, unappreciated and unflattering it was. In the end however, he realizes that Kakania/Habsburgia had an underlying order that betrayed a stroke of genius.
* was a wrinkled old man on the inside even before he became one on the outside.
* was based off of, in her words, a "weird as hell dream" Amoridere had. Apparently, if the aforementioned fanfic is to go by, said dream involved a psychotic mother and two girls attempting suicide as an escape.
* was being sold for real money, which of course is copyright infringement any way you slice it.
* was best known for dying tragically who beats out many of the other Spider-Women with sheer popularity.
* was born a long time ago on a stormy night, or if she's just overexaggerating.
* was built as an attempt by terminally ill Aperture CEO Cave Johnson to achieve Immortality
* was, but went rogue when their extreme methods of peacekeeping caused rifts between them and government forces, resulting in LMB turning a considerable chunk of east Midtown Manhattan into their own little fiefdom.
* was, but who weren't actually gods. This has since been completely ignored.
* was by hiding in their heat wake. Wash noticed something funny about the sensor readings, but he dismissed them, probably for that exact reason.
* was by his own forces on the order of a prelate after his own less-than-

controlled "witch-powers" allowed him to rescue a Karsite hamlet from a nasty bandit raid.
* Was Camber really a saint? Perhaps a guardian angel? Did he choose to become a saint or an angel in the afterlife? Did his powers and his arcane knowledge permit him to choose that destiny for himself?
* Was Carol really from the Justice Department? If so, why does she smuggle her files in clothing boxes? Why does she screen her hotel room for bugs? Why didn't any of the police who arrested Maggie stay around to take statements from anyone else at the scene?
* was carrying a loaded SA80 rifle, and had carried out the full procedure prior to firing the gun before the tourist relented. Had the moron been any slower, he may well have been shot for his idiocy.
* was caught and redeemed by the Doctor after preying on the workmen building the London Underground, and a later episode confirms that yes, she continues to eat people, though she seems to restrict herself to serial killers (presumably she eats other food too).
* was changed to a serious and intelligent individual and a skilled planner and manipulator.
* was Chief Warlock of the Wizengamot, which appears to be something like a cross between Speaker for Parliament and Chief Justice of the Supreme Court, leaning toward the Chief Justice side. But when politics takes that away it doesn't seem to bother him much.
* was clearly shocked at a boy saying he'd send a kiss to "you, ma'am".
* was comic that put a lampshade on this trope; the main character, Doodle/Zachary, was sent to the principal office. Said principal accused him of murdering another student and shoves a picture of Doodle killing her. Doodle's response?
* Was common practice at DC Comics in the 1950's-1960's (though almost exclusively in
* was completely unrelated to the other seasons transporting the cast to the 40's as stock characters in a film noir plot were Archer is a private detective investigating the murder of his partner while working for a shady crime lord..
* was continually growing younger. When Drom gets killed, Spidey realizes that by the nature of Drom's affliction, all memory that he ever existed will probably vanish as well. So Peter narrates a record of the incident on a tape recorder for himself. Just as he finishes the recording, he forgets what he had been talking about.
* was controversial, which some saw as undeserved (or, at least, rushed and anticlimactic)
* was cut from the theatrical version, but several references to it still appear. Most obvious are the reprise 'When Love Is Found' and the pop song version during the closing credits. It is also prominently featured in the soundtrack's overture. This applies to the Blu-ray release too, which ported over a behind the scenes extra from the extended cut DVD showing the recording of 'When Love Is Gone', even though the song is completely absent from the Blu-ray.
* was dating Chuck for a while, who, as it turns out, might have actually been God.
* was dead in one of those stretches, but that's usually a sign it's time to move on.
* was delighted to be highlighted' response tweet led to Menik adding to her Twitter bio “'Really really ridiculously good looking' - Screen Junkies”.
* was driving drunk in order to take his friends out on a joyride, but they got into a car accident that killed all of his friends, with only Ben himself surviving the accident.
* Was dubbed into Czech twice; the original in 1997 for VHS, and again in 2006 for airing on ČT. Jan Schánilec voiced Vladimir in both dubs.
* was either killed or was Put on a Bus "God knows how long till we find out." (Because when an eye is covered by something, you know it's covered for a reason...)
* was enclosed from the get-go was Southdale Center in Edina, Minnesota in 1956.

* was ends with "...and there in this house, the girl in the bottle plays spin the astronaut."
* Was Entrapta truly raised by her robots? Did they exist before she was born? Does she have human parents in the past? How was Dryl able to achieve such technological progress?
* was especially, as it's very different from the romances. Still, a lot of the old guard are flat-out "Key fans" instead of just "Angel Beats fans," etc.
* was established in the last game) are trying to conquer it. And that's not even getting to the fact that the Russians would presumably change the launch codes and/or not accept them from a man who they know has been kidnapped.
* was estranged from his brother Ford and went they met again, the brothers got into massive a fight that resulted in the latter’s disappearance for thirty years, had to fake his own death and take other his brother’s home to survive, lie to his family including Dipper and Mabel and their parents, spent years working on the portal to bring his brother back Not to mention that he constantly worries for the twin’s safety and has a hard time bonding with them at times. And has a cruddy love life on top of everything.

* was fired and arrested after vandalizing his own school and spray-painting insults about his own players, in the hopes that a rival school would be blamed and his team would be riled up for the upcoming game.
* was fired for incompetence). Seemingly he had submitted a non-fiction work that was reasonably factual but the publisher rejected it and asked him to rewrite it as fiction; too bad it was then marketed as historical non-fiction. Destroyed Gavin's credibility as a historian forever.
* was fired once but was re hired shortly after, said incident was when the artist took a holiday which meant the next comic had some delay. That aside not even throwing a plunger in his bosses face got him fired.
* was Fluttershy during the events of "The Return of Harmony", only to discover she's a spiritual clone of Fluttershy created by Discord after Twilight used the Memory Spell on her.
* was for a time corrupted by the Horcrux locket, which led to him abandoning Harry and Hermione for weeks in their dangerous quest to destroy the Horcruxes to both boys.
* was forced to spy on the team as Wo Fat was holding her fiancee hostage. She finally delivered Steve right to his enemy, was brought to see her love...only to find he'd been dead for months and Wo Fat was hiding it to continue to use Jenna. She ends up sacrificing herself to save Steve, noting that she threw her entire life away for nothing but can at least help him.
* was, forcing him to rely more on his brute strength and ferocity to compensate for his weakened mental faculties.

* , was found in a 34,000-year-old ice core harvested from permafrost in Siberia. Thankfully, it only infects amoebae.
* was Frank was involved with. Although Mr. Miller never found out about the full truth, he nevertheless suspected that there was more to her death than it seems and thus holds Frank responsible for it.
* was French, but had grown accustomed to speaking English with his fellow POWs in the camp) instinctively responded in English as well. A fictionalized but relatively close version of the incident is depicted in the film version of the story (see entry under "Film").
* was French who never surrendered between '40 and '45, who hurt the Nazi war machine, saved the lives of three-fourths of the French Jews, and fought alongside the Allies until the victory.
* Was getting socked for sneaking a kiss from Sandy worth it? According to Swampy,
* was Glover...and it worked! Whether or not they were fooled, they liked Grable

enough to not complain.
* was gods, even with the Philosopher's Stone. And that is the closest anyone really gets to a coherent eschatology in the setting.
* was going to be killed by the shadowy conspiracy, but the SGC rescued him via Asgard beaming, sending him to explore other planets (which he was happy to do). Of course, his case for the existence of aliens was disproved.
* was going to do the broadcast either way since it was live and he had a devotion to his job.
* Was guckst du?! in Germany, only with Turkish and Central/East Asian minorities.
* was guilty of murder, he just got himself "one hell of a plea deal.")
* was guilty of the original murders all along, but due to double jeopardy, he can't be retried for them. However, Monk finds that they still can rearrest Barton for killing his partner from the original crime out of fear the guy would talk.
* was had them replace the old doctrine, based on the hoplitic phalanx, with Hellenistic doctrines based on the Macedonian phalanx.
* was, half jaguar, half serpent, half scorpion and half mad (for a total of three homicidal maniacs).
* Wash both regularly performed this duty while the rest of the crew were out on jobs.
* was her childhood doctor) then grabs a bottle of her father's sake and swallows half of it in one gulp.
* washerwomen (most of whom do very little washing) are often mentioned in ASOIAF, they can be seen following the Freys, the Boltons and the Lannisters (and, presumably, every other army).
* was, he was a mutant during a time where they were hated and despised, and he mostly received prejudice from the populace for being a mutant.
* was hijacked by Somali pirates dispatched to the scene, shooting three of the pirates from the rear of a Navy destroyer and rescuing the hijacked crew.
* Washing detergents also apply. There was a Tide commercial that somehow manages to "magnetize" dirt away from the cloth.
* washing one's hands. This starts the two friends discussing cleanliness (SpongeBob is pro-clean, Patrick is not), and soon engage in a battle of their own.
* Washington at least once, Grif's just the one who survives the funniest ones.
* Washington. Church originally takes it with a sour attitude, but eventually learns to accept it by the end of Season 10.
* Washington, D.C.-area rivalry between George Mason, in the Virginia suburbs, and George Washington, in the District proper. Both schools were named after Founding Fathers whose plantations were in Mason's (the school's) home area of modern-day Fairfax County.
* Washington, D.C. could have been a great obituary for him, but it was also published before he died.
* Washington, D.C. evac site is getting hit hard, and we need to buy 'em some time. Hooah?"
* Washington, D.C. explains the full story behind the song, and insists that "a good marketing tool should never be abandoned until everyone is completely saturated with it!"
* Washington DC police officer Eugene Goodman earned recognition by using reverse psychology against a mob invading the US Capitol building. As he reached a door to the area where congressmen were sheltering in place, Goodman began walking in the opposite direction, repeatedly telling the mob to back away from him. The mob continued following him, allowing Goodman to lead them away from the congressmen.
* Washington, D.C.'s Metrorail system almost certainly counts. It was a huge step forward when it opened in 1976, but its decor has changed surprisingly little since, and the elaborate automatic train control system has started to show its seams (the deadly crash that happened on the Red Line in 2009 has been blamed on failures in that system). Due to budget and time constraints, there are still some 1000-series cars in service, despite being over 30 years old and not having had a major overhaul since the 1990s; they're the ones with the disco-fabulous red/orange/beige interiors.

* Washington, D.C., the Capitol Building, and especially the Washington Monument are severely damaged.
* Washington delivers the Trope title (in full snarking mode) when Doc suggests the Reds are behind a well thought through trap. Made quite creepy by the fact that Washington never laughs otherwise. It's probably for the best.
* Washington does this twice in Season 11. The first time is when Donut and Doc show up to rescue the Reds and Blues, but the ship they arrived in has left.
* Washington Generals. They are basically real basketball players paid to look bad.
* Washington Irving (1783-1859): Author of numerous classic tales of terror. Some, like "
* Washington Metro averts this in the suburbs, where there can be gaps of several miles between stops (especially on the Orange and Silver Lines), but it's played straight in central D.C. Most specifically, get on the Red Line at Metro Center and go one stop east to Gallery Place / Chinatown to transition from the Orange, Silver or Blue Lines to the Green and Yellow Lines. You've gone all of less than 1,000 feet. There have been proposals to build a pedestrian corridor here so that people can walk this distance and alleviate crowding.
* Washington Metro—particularly ads bought by lobby groups and foreign countries to drum up support in the nation's capital, probably hoping that the commuting bureaucrat(s) and/or staffers handling some deal or other benefiting them will see it and have them in the back of their minds.
* Washington Nationals, who would win their first title at the 2019 World Series.
* Washington Post: A security guard found the lock on a stairwell door taped open. Thinking it had been left by maintenance workers, he removed it. He came back to find the lock taped again, and decided to make a more thorough search, catching the burglars in the act.
* Washington Post (Be that as it may, the song was her fifth number-one hit from the album, the first time a female musician has pulled that off.)
* Washington proves himself quite handy with knives too, as seen in his fight with the Meta and with Felix.
* Washington Redskins, and both sacks involved a three-time Defensive Player of the Year (although this one is iffy because the defender in the earlier incident didn't have his third DPOY yet when the accident occurred).
* Washington Redskins rookie running back Timmy Smith was only in the starting lineup for
* Washington's career slowly petered out into early retirement afterwards, while Rudy T went on to coach the Houston Rockets to two NBA Championships in the mid-90s. And Kevin Kunnert, who by most accounts started the brawl,
* Washington's Dirigible, to fight the British in the American Revolution.
* Washington's first verse in "Right Hand Man" uses this, as a shoutout to
* Washington's protege Alexander Hamilton became a colonel during the revolution. His contemporaries (including his mistress) referred to him as Colonel Hamilton throughout his civilian career. He didn't do many badass things during the war, but his life included such highlights as founding America's first bank, building the treasury department, creating the Coast Guard, and helping suppress the Whiskey Rebellion.
* Washington Square: Catherine starts off feeling this way about Morris, but soon comes to terms with the fact that she had been exploited, and when he does return twenty years later, she has no longer has any interest in him.
* Washington Square. He spends the rest of his life belittling and tormenting her emotionally.
* Washington, Virginia not far west from the more-well-known Washington, DC. Signs that lead there say "Washington, Va.". The denizens there call it "Little Washington".
* Washington, where the human inhabitants believe themselves to be the sole remaining human-controlled nation and labour mightily to maintain the strength of their military robots to keep it that way - controlled, of course, by their 'tame' AI that in actuality runs the government.
* Washio Sumi Chapter, Sonoko tells Washio and Gin about a dream she had where they

were an idol group and the audience was made up of cats.
* Washio Sumi Is A Hero: Gin tries to take a photograph of a Vertex on her smartphone but it isn't visible in the photo.
* Washio Sumi Is A Hero: Sonoko's a great writer even at eleven. She mentions wanting to one day write a novel loosely based on her friends.
* Washio Sumi Is A Hero starts around Halloween. Even 300 years in the future Halloween is still a foreign holiday in Japan. Sumi and Sonoko briefly dress up at school.
* Washio Sumi Is A Hero, that, while in the past teachers physically harming students to any degree was an issue, corporal punishment is allowed as long as it's not excessive. When Gin gets late to school, her teacher taps her on the head with the attendance sheet.
* Washio Sumi Is A Hero. To better get along with her two teammates, Washio looks up "how to make friends" online.
* Washizu is this towards Ibuki, who never really acknowledges his feelings, either because he
* Wash knows that his job is limited to flying the ship and providing needed levity and snark, and leaves the fighting to his Amazon-like wife Zoe. His acceptance of their non-standard relationship (aside from a brief bout of unfounded jealousy in "War Stories") results in them having arguably the happiest and most stable relationship in the whole show. To his credit, he does make it through two personal firefights late in the series, at a starting disadvantage in both.
* "Wash Me" Graffiti: Writing "wash me", or words to that effect, in the dirt on the back of a vehicle.
* was, however, humiliated when Pearl forced him to stand outside in a Krab mascot costume.
* wash supposedly permanent paint off Mr. Krabs's first dollar by repeatedly bashing the painted dollar with a computer.
* Wash's "Worst [X]. Ever. Of all time." has been used by Tucker and Caboose and calling Church "The worst wingman."
* Wash This Blood Clean From My Hand, always leaving a convenient culprit for the police to find (drunk or knocked-out people, preferably homeless, with the supposed crime weapon in their hands). One of those culprits was the protagonist's brother, who has spent more than thirty years not knowing whether or not he had really killed his girlfriend.
* Wash Tubbs comic, Wash and Easy are shanghaied into working on an old-timey whaling ship. They eventually lead a mutiny against the first mate and his supporters. Interestingly, while most of the other crew members were shanghaied to fill positions on the ship, Wash and Easy were targeted specifically because the first mate knew they had a lot of money on them to steal.
* Washu Hakubi has a combination of reasons for being interested in Tenchi. Part of it is
* was human once, but his later incarnations are a bit less obvious about that fact.
* Washu, the genius scientist who could destroy a planet by accident.
* Washy Watchy in the way that clear-front washing-machines are not very common in laundromats portrayed in popular media, as the machines are usually much newer (anyway, why would a laundromat owner upgrade when their '80s/'90s machines work fine?).
* was illegal, so graverobbers often stripped a body naked and threw everything it wore back into the coffin. This legal loophole existed because the government knew that medical schools needed bodies to study, so dragged their feet about closing it.
* was impaled on a pipe and got back up may have tipped them off that something was wrong.
* was in 1791. In 1908, 15 years after Doubleday died, a commission whose open aim was to prove that baseball was strictly American in origin announced their findings that Doubleday was the inventor. This claim was based the testimony of just one person, an elderly mentally ill man, who would have have been a young boy in 1839.

The report was forgotten until the 1930s. Then Major League Baseball kicked of a massive campaign to celebrate the supposed centennial of baseball in 1939, culminating in the opening of the Baseball Hall of Fame in Cooperstown.
* was in a plane that crashed, with the crash killing everyone else aboard; only Zoey survived.
* was in a polyamorous relationship with both Miranda and Thomas Barlow back in England. Thomas' rumored death is what drove Flint and Miranda to Nassau and began Flint's days of piracy.
* was in East Germany, before eventually being exhumed again in 1970, crushed up thoroughly to leave no trace, then dumped into the Biederitz River.
* was in fact "saved by a lie", with Angel making a deal that wiped everyone's memory and placing Connor in a home with a loving family believing he was their natural-born son.
* was inspired to start studying the human microbiome by the experience. The mouse botfly plays the trope a little straighter. Its a lot like the human bot fly except it lives over a much greater range and is MUCH bigger in proportion to its host. Wile they prefer to live between the skin and muscle, they often get big enough that their anchoring spines tear holes that expose their poor hosts organs. If this happens, the cavities they leave upon erupting will indeed give the mouse a lethal infection.
* was instead of the test message. They fixed the problems by the next time they did a nationwide test in 2016.
* was intentional) leaving no time to develop their relationship at all, and furthermore, fans (especially Henry/Drizella shippers) argue that Henry and Ella have no chemistry whatsoever, which is essential towards a believable love story. Yet even though their romance in the past is rushed, somehow the writers still have time to show these two onscreen together all the time.
* W, as in "windowed". X, being the letter after W, was a perfectly legitimate name for W's successor.
* "Was/Is this/that trip really necessary?" (reference to a slogan used to encourage people not to take unnecessary trips to free up gas and rubber for the war effort and to free up space on trains to ferry troops to their duty locations.)
* Was ist los? — "What's going on?" (or "What's wrong?") Usually uttered by a clueless Nazi trooper about to be killed by members of the resistance or in an ambush.
* Was It All a Lie?, a character asks them if all of their good times together were a ruse.
* Was It All a Lie?: Someone finds out that a person had lied to them and ponders whether the fabrication means everything involving their relationship with this person was insincere.
* Was It All a Lie?: Someone finds out that they have been lied to by a loved one and ponders whether the fabrication means that everything concerning their relationship with this person was insincere.
* Was It Really Worth It?: A character finally succeeds in their goal, but doesn't enjoy their victory because they're ashamed of what they had to do to make it possible.
* Was It Really Worth It?: It can be sad to see someone question whether achieving their goal was truly worth what they had to do to make it possible.
* Was It Really Worth It?: You wonder whether everything you went through to achieve your goal was really worth it.
* was itself an angel of the hashmallim choir are basically watered-down versions of the same concept.
* "Was It Something I Didn't Say" by 98 Degrees is about a breakup caused by this.
* was judges, he forced the brothers to find two judges because "They declared a Throwdown."
* was just being a teenage boy. Knowing Giles' teen years, this assumption makes a bit more sense.
* Was Just Leaving: A character in the middle of an intense or threatening

conversation announces they were "just leaving" when a third character interrupts; the character then leaves.
* was killed, but that was after a considerable amount of gunfire. (Though those were Serpent Guards; those guys are elite troops and thus get the best armor.) It isn't until the SGC became a recognized defensive asset that needed better weapons and got them that the armor becomes obsolete.
* was killed when he took two anti-ship missiles to the face, although he would have actually survived and possibly recovered from the first.
* was knocked off the air nationally when a broadcast truck lost power. The game was off the air for about 30 seconds leaving commentators on screen referencing the incident and Fox switched coverage to that of MLB network. The situation lasted about five minutes.
* was known primarily for their bloodthirsty and tyrannical ways until Bill and Barry gave the family a bit of an image makeover with their heroics. Armored toys in the nursery is a telltale sign, though little iron cages were used more sparingly.
* was "Kossith," but they're so dogmatic that they haven't used that term in centuries, at least. It's just an example of how devoted they are: their philosophy sees no difference between the grey skinned horned giants and spindly elves, so they do not even have a name for their own race. Even "Kossith" isn't the name of their race. It's the philosophy that predated the Qun.
* was legitimately mentally ill and committed his murders because of this. His insanity defense led to him getting the psychotherapy he needed, and when we next see him, he's slowly recovering and guilt-ridden from the crimes he committed. Either way, he isn't a threat to anyone else now, as his final fight with Spider-Man was so brutal, it left Sin Eater a stuttering wreck who needs help getting around.
* was Lemuria, Mu and all the other such realms — or rather, that for the same reasons where and when the Ladder was made and fell are unsolvable, the realm where it happened could be any one of them, at any time and in any place. Atlantis is just the most commonly used name for the place (or concept) amongst modern mages, for similar reasons to this trope being called Atlantis rather than, say, Lemuria.
* was, letting her take the blame for expensive forks going missing when she went missing.
* was list of quack remedies and prescription drug-abuse includes injecting bull semen into his bloodstream as a virility tonic?
* Was Lola a normal girl who was corrupted by Satan, or did Rita (her mother) give birth to a normal girl (Lana) and Satan at the same time?
* was lost at sea and presumed eaten by a squid held a wake for him. This was followed by the reading of his will, which mostly consisted of the various characters greedily demanding to know what they were left, or bitching about what he bequeathed them.
* was loyal to Catelyn, and only told everyone Jon was a bastard to protect him from Robert Baratheon.
* was made Peggy's self-inflated ego into her defining character trait. This is taken to its logical extreme in one episode, in which Peggy accidentally takes a Mexican girl home after misunderstanding her. Peggy is arrested and tried for kidnapping. She's acquitted after Hank prompts her attorney to have her testify in Spanish, showing the judge that Peggy really did understand Spanish so poorly that the "kidnapping" had been a huge misunderstanding.
* was married, this led directly to the Trojan War (at which point Paris learned why it's generally a bad idea to slight Hera). This indicates how little Aphrodite cared about the idea of marriage in the first place.
* was mauled to death by one of his own tigers in Carrolltown, PA in 1997 in front of students from six different schools.
* was meant to show that a normal person would not be able to survive in that universe normally like that, nor do they have lobster for dinner on a routine basis.

* was merchandise of the show released in the United States, such as VHS tapes and kid's meal toys.
* Was mir behagt, ist nur die muntre Jagd into Diana during the Renaissance).
* Was mir behagt, ist nur die muntre Jagd is in the first five movements, where Endymion worries that Diana has forgotten him in her rush to participate in the birthday celebration. The two eventually resolve to go together, and...that's pretty much it as far as plot is concerned.
* was more common among women and children in the tribes that practiced ritual cannibalism as part of funerary rites, had to do with the parts that they were eating. Men were eating mainly the skeletal muscle, while the women and children were restricted from doing so, and consumed the brain and other organs instead. (i.e. the parts more likely to be infected with the causative prion.)
* was more of an annoyance/rival than a true threat) points out to Dexter that he had to learn moves from another comic and not "Mister Misery" as Dexter (in disguise) bought all the copies. His line at the end of the episode says it all:
* was mostly filmed on an apartment set-piece for only 13 days with a budget of $300,000.
* was movie ("A Friend For Life" would ultimately be used instead) and was eventually released on Hasbro's Youtube page in August 2014.
* Was moving from data cards to the online-requiring Sega Aime infrastructure a wise move? While it does mean that the player doesn't have to worry about outright losing their data — since the data is stored server-side, card corruption ceases to be a concern and a registered Aime user who loses or otherwise is unable to use their card anymore can simply buy another card and tie it to their account — it also means that the game, which is
* was murdered, and the attempt to tie up a few loose ends has now attracted the attention of the Federal Bureau of Investigation.
* was murder, in that the ghost they thought was their perp was actually trying to give warning about the crooked cop who knifed her and the imminence of his knifing them. Naturally, he arrested the guys for his crime that they thought had been committed by a dead woman.
* Was never used, because it sounds like "uranu" ("will not sell") in Japanese
* was no longer in effect, allowing them to amend the constitution using their internal procedures and follow along when the rest of the League's remaining assets and institutions were transferred over to the United Nations.
* was no "Roswell Incident" in Fry's initial timeline, this one's stable.
* was not a girl. She wonders if she should 'check lower' just to be sure, but Tamahome quickly tells her to knock it off!
* was not an alternate universe, the one he has always been at had been rebuilt.
* was not as harsh as it may appear, which crippled and often killed the victim.
* Was (Not Was) - the singer mainly seems enamoured with how subserivent she is.
* wasn't a change. Since the circumstances leading to her adoption never took place, her last name remains as Testarossa rather than becoming Testarossa-Harlaown.
* wasn't Anya, who usually has a very matter-of-fact attitude towards supernaturally related death and violence, is completely at a loss and in tears.
* wasn't certainly seems to indicate Htrae has some semblance of intelligence and/or sentience.
* wasn't committed. The accused man is innocent, but there's so much circumstantial evidence, and the legal system in Springfield is so corrupt, that he'll be convicted unless Bart speaks up.
* wasn't due had the same attitude, holding that the gods were distant, blissful entities unaware of humans, thus prayer or sacrifices to them were a waste (though worship was proper since they represented an ideal state). In their case, however, they didn't believe that the gods created the universe, and had even evolved from mortal beings, combining this view with a strict materialist cosmology.
* wasn't exactly a paragon of heroic virtue, although he did go to great lengths to help his friends and his deeds did the world a lot of good. The fact that his volcanic temper was usually the result of Hera's doing is also a big factor. The

Hercules in this movie is a wide-eyed boy scout who doesn't have many if any, vices. The worst thing he does is lash out at Phil for trying to warn him about Meg being in league with Hades, but he immediately comes to regret that.
* wasn't going to gloat at first, and only decided to do so after Drakken goaded her into it.
* wasn't, in fact, the Doctor's very first female companion ever. She was also visibly displeased at any indication that the Doctor might be impressed by someone other than her.
* wasn't in the script reacts with visible surprise and almost laughs.
* wasn't named this way, but claim that it was (for instance, by claiming that shaving cream was invented by Albert Shavingcream).
* wasn't one of these at some point. Franklin's first job, planned out by Lamar, would have netted them a combined take of $2K, but a dye-packet went off and ruined both stacks. Even worse was Trevor's first job, which went very similar to Ryder's robbery of the Pizza Stack above, except he didn't get away with it and spent six months in jail because of it.
* wasn't over just yet, as the Pats were backed up in their own end zone, and Tom Brady didn't have enough room to take a knee without risking giving up a safety, which would've given the Hawks one more shot. However, Seattle's defense lost its discipline, incurring consecutive penalties which gave Brady more than enough room to run out the clock.
* wasn't particularly dreading it, in favour of eloping with Theo Du Medd.
* wasn't quite dead Santa was healed, only to swear revenge on the Smiths. This eventually led to a bloody battle between the family and Santa and his army of elves. Although the battle was cut short because he had to leave at daybreak, he promised to return to kill them next year.
* wasn't quite dead) shoots a supporting character, and the focus turns to saving one of two critically-injured people in CTU's medical wing.
* wasn't quite that anymore) did and thought about when he wasn't, well, antagonizing.
* wasn't really honest about it. He blamed all his perverted issues on his mother's upbringing, which Brian outright labels cowardly. When Quagmire retorts that Brian himself is a hypocrite because he's an atheist defending his purist Christian mother's virtues, Brian nonchalantly admits to it (and that he'll greatly enjoy the thought of Quagmire pondering over it as he rots in a cell).
* Wasn't That Fun?: A character (ironically or sincerely) states that a terrifying experience was fun and they want to do it again.
* Wasn't That Fun?: A common utterance after surviving yet another escape.
* wasn't that powerful, though. Circa episode IV, he barely even knew how to use the Force, had only some casual pilot experience under his belt, and was really just on his first adventure himself.
* wasn't the only time Kasem ran into problems during a voice-tracking session.
* wasn't the Stalin's death, so the guy's only real crime was basically accepting a bribe. The police finding it in dollars would only be a minor problem, adding maybe a misdemeanor to his case.
* wasn't thrilled) with him. When Susano-oh woke up and caught up with them, he relented and gave the lovers his blessings.
* wasn't was why everything felt slightly off, which is itself an instance of this trope.
* wasn't what it looks like, shove an apple into the mouth of Snow White Jessie during the school play and growls at her, "I hope you choke on it, beanpole."
* was often played for laughs. More common with regional promotions that had their own syndicated TV programs, a heel wrestler or tag team would seriously and in a normal but concerned tone of voice deliver a promo recounting a supposed meeting with a sad-eyed boy or girl, who is crying because (s)he can no longer take his/her father's physical abuse, the wrestler then asking the child if he'd go live with his/her mother to which the boy claims she beats him/her also, then asking who he'd like to live with, to which the kid says, "I wanna go live with (whatever face wrestler/tag team said heels are currently feuding)... because he/they don't beat

nobody!" ...with the heel wrestler's demeanor suddenly turning from somber to mocking as he delivers the punch line.
* was once a host himself before he got Akane Sakamoto pregnant, which only increases Ryuji's anger towards the present-day host.
* Was Once a Man: A non-human being who was originally an ordinary human.
* Was Once a Man: A non-human character who used to be a normal human.
* Was Once a Man: It turns out that there's a monster or other strange creature, who used to be an ordinary human being.
* Was Once a Man: Since the undead used to be alive, this means that they used to be human beings.
* was once Ben Solo, although how much of a "hero" he was in the first place is up to debate, since it's implied he was resentful towards his parents from the start. Like Jacen Solo, Kylo Ren is also Anakin's grandson and ironically succeeds in many of the same goals Anakin failed in, such as usurping his generation's Supreme Leader and taking over the galaxy. Anakin is even somewhat of a role model for Ben, although to be fair Kylo probably doesn't know all the details
* was one — which made a surprising amount of sense, as dogs have complex social hierarchies, mark territories, work in packs, etc. It wasn't recognized outside its own membership (only a few dozen dogs were actually members) and was really more of a personality cult.
* was one of the last things he did before killing himself. Presumably nicknamed as such because his father and older brother were both nicknamed Dick and liked to torment him.
* was on the verge of taking over the Federation a few seasons later. The extra material on the DVDs even makes note that they were first mentioned in a Ferengi episode, where fans expect nothing to have a lasting effect.
* Was, or at least became the gimmick of Lin "Bitch" Bairon in SMASH. She had to be
* was Or for that matter, who would think of removing a doll's backpack when they're in the state of panic from the doll in question trying to chew off their finger or hair?
* was originally branded as Lite beer by Miller after it was purchased from Meister Brau.
* was originally by "dance" of the title: the only two moves given for the crusher itself are "take your fist and put it on your waist" and "squeeze your partner's head 'til she's blue in the face", and the listener is also repeatedly urged to "do the hammerlock" and "the eye-gouge".
* was originally meant to be the successor of Hokuto Shinken instead of Kenshiro, were it not for his sudden illness from the nuclear fallout. Even when weak and dying, Toki was still one of the most dangerous martial artists of the series.
* was or something. Loki later on tricked Spidey into using his favor to save a random civilian, however.
* WASP agents happen to arrive, who immediately realize something's not right.
* Wasp also became a Decepticon after Blackarachnia mutated him into an organic wasp shortly after he vowed revenge on
* was paralyzed from the shoulders down at first (and ended up needing a wheelchair for the rest of his life), extensive physical therapy eventually allowed him to regain the use of his arms and hands.
* was. Performed by Pamela Stephenson, this soon drew the attention of Kate's lawyers, who promptly sued on the grounds that the parody was so like the original that their client was being improperly deprived of her intellectual property. To this day, Brewis does not receive a penny of royalty money, as this goes straight to Kate Bush.
* WASP first and foremost, and mostly makes use of his wits and his ability to manipulate people and act unsuspicious. He can fight hand-to-hand and use a gun, but he takes care to avoid ever needing to do that.
* WASP have a song called "Chainsaw Charlie", which starts off with few chainsaws revving up.
* Waspinator, he screams and his hands can be seen clawing at the machine.

Blackarachnia casually comments that it might hurt a bit.
* Waspinator, in a more traditional villainous example, gets hit with this to a very small extent. The original was a
* WASP is this, forever unfavourably compared to his brother Michael, and the problem intensifies after Michael's tragic death.
* Wasp knife example above. It was developed for divers to use to fight off sharks by injecting them with air, so they float to the surface (and don't bleed as much, which might drive other sharks into a frenzy).
* was planning to "cull" a large portion of the population to conserve oxygen. Clarke herself was put in solitary confinement for this same reason.
* was pointed out that most poultry suppliers don't use cages in the first place, so it's not unique to Whole Foods.
* was points out that most humans don't do anything to actually stop discrimination against faunus, because they live cushy lives and don't face discrimination themselves. Jaune himself admits that if not for his situation, he would've also ignored the plight of faunus.
* was portrays him as honestly in love with her. It is of course perfectly possible to fall in love with a 'Good' match.
* was pretty much never seen again after. The situation in the previous point was orchestrated so that Vash had to be fully aware of his decision to kill after weighing his options. Legato wanted Vash to willingly and without duress decide to take a life.
* was previously married, and has a child that she gave up for adoption!
* was produced in smaller numbers than the T-34, this was more a result of the United States simply not being as focused on a single land war as the Soviet Union. A good portion of American production was put towards the naval war with Japan, as well as an air war and bombing campaign in Europe, not to mention supplying trucks, food, and countless other supplies for the entirety of the allied military. If the U.S. had singlemindedly produced M4 models like the Soviets did with the T-34, it's likely that the Sherman production would have vastly outpaced that of the T-34.
* WASP, saw their record sales double and vocalist Black Lawless was all too happy to use them as a vehicle to promote the band. Finally, like the Eminem example below, during one awards speech, Steven Tyler thanked Tipper Gore for ensuring that if an album had a few dirty words on it, it would sell an extra million copies.
* W.A.S.P.: Self-Ironic interpretation of the name of the band (one of interpretations): "We Are Sexual Perverts". And if you listen to early songs by them...
* WASP: several in "Scream Until You Like It", and a smaller one in the far darker "My Tortured Eyes".
* WASP: Sirians call humans "Spakum", which means "bed bug". Humans return the favor by referring to them as "blowflies" (because of the Sirians' blue skin, and thus blue buttocks).
* Wasps' Nest. A dying man who has lost his fiancee to his best friend decided to kill himself using cyanide after convincing his love rival to purchase said poison for the purpose of getting rid of a wasp nest in his backyard. Thankfully, Poirot caught wind of his plot and switched out the poison with harmless soda.
* WASP song "Animal (Fuck Like a Beast)". Comic phrase in comic song: "I'll nail your ass to the sheet..." It's self-irony 'cause it's just riotous fancy of a finger-artist.
* WASP. (The album was released in 1991, three years before Cobain's suicide.)
* WASP: The alien Sirian insult "soko", which apparently means something analogous to "bastard".
* Wasp tries to switch places with Bumblebee and one of the things he does is switch their voice processors. So after the switch Wasp has speaks with Bumblebee's voice while still maintaining his weird speech patterns and Bumblebee has Wasp's buzzing voice but still talks normally.
* Wasp, until it's dark and they are scrounging through garbage for food, that's parental neglect.
* Wasp, who, after being falsely accused of being a traitor, spends over 50 years

in prison and goes insane.
* was rarely mentioned. Also his son, Tom Owen, as the character's son Tom Simmonite.
* was rather than the other Clans just raising a slight protest over the aggressiveness of the action.
* was realised how stupid killing her off so anti-climactically was...
* was regular marriage. Formal weddings were reserved for royalty and nobility; everyone else just moved in together with little or no fanfare.
* was related by the author, who had a cousin with muscular dystrophy attending a fundraiser, and Doohan, despite being at the height of his popularity, took it upon himself to spend the entire evening pushing her wheelchair and keeping her company.
* was released as a book that more closely resembled the in-series book (pages are made of parchment, black-light hidden messages, a magnifying glass, etc.) being sold almost a year after the show ended.
* " was released on Halloween 2018, and while the episode is very light on Halloween themes and thus does not count as a proper Halloween Episode, he does wear a Billy Idol Halloween costume. It can be inferred this is how he will celebrate Halloween in his videos from now on.
* was remorseful and guilty over his actions, but it still wasn't enough to keep from getting expelled when he confessed to the principal.
* was rescued from them beating her up by Kyoko and returned to school.
* was resurrected. A lot of those were people living on islands that Cell destroyed. Unless the wish meant those islands were remade too, they likely drowned long before making land. Way to go, Yamcha, asking for wishes without thinking them first. Similarly, the people killed in the same saga by No. 20 and No. 19 were never resurrected.
* was roaming the launch bay shoving munitions up the Draconian ships' tailpipes
* was scattered through the Doctor's timestream to save him from the Great Intelligence. She could be written into old or new stories - or crossovers, such as her cameo in Captain America: The First Avenger.
* was sentimental, but the owner forgives their friend for breaking it.
* was shaped and painted to look like a swan. Petra even refused to fly south for the winter due to not wanting to leave her "mate" behind, so the two were instead moved to a zoo together.
* was slated to be killed off later for the movie to compensate), even though Crabbe isn't a particularly "wholesome" character to start with. Waylett later attracted further controversy after being charged with violence during the London riots in August 2011.
* was starting to get panicky and erratic. She either hanged herself or one of her friends (presumably Emma) rubbed her out and made it seem like a suicide.
* was straight, and thought he was a girl. Previously, he had simply assumed that the guy was gay.
* was sunk when the vast majority of Italians voted to keep it) in 1974, but the relevant law remained on the books until 1981.
* was supposedly denied dinner. Ragyo, her wicked-to-begin-with mother, locks Satsuki in a limo overnight; even going as far as kicking the young girl which resulted in Satsuki coughing out what she ate earlier on the day Ragyo was free again.
* was supposedly written by Pope Honorius III, who was evidently so holy that he got bored fighting off the temptation of the mundane world and took to summoning demons solely to turn down their offers.
* was supposedly written by the very CMOT Dibbler itself. That alone should raise questions of accuracy.
* was supposed to have been a series that featured different writers creating stories for each of the individual civilizations.
* was sweet and fitting (or at least more so than the alternative) to die for one's country.
* was swindled by the doctor into spending all their money in a non-working treatment

* Wasta would of course, be an understatement, and with the entry of these countries to the global marketplace, frictions between native Middle Easterners and expatriates have been on the increase and are not expected to go away any time soon.
* Wastebasket Ball: Characters crumple up a piece of paper and try to toss it into a wastebasket (usually without standing up from the chair).
* Wasted Away: Radon's memories are third-person, and represented as video tapes in his mind.
* Wasted Minds). She tells him "France" and they lean in to kiss each other, only to be interrupted by Mr. Sekoi calling out:
* Wasted Minds, the villains at one point get their instructions from their boss on a malfunctioning TV (because they dug it out of a garbage dump, being too cheap to buy one). At the end, they're told that "This TV will now self-destruct." One of the villains remarks, "Like it hasn't already?!"
* WASTED pack a more significant punch than most starting weapons. In fact, the El Seis or Ocelot revolvers deal more than twice as much damage per shot as a semi-automatic rifle. This is offset by the scarcity of their ammo, though.
* Wasted Talent by Angela Melick are her friends or family members, usually with a nickname in place of their real name (mostly in early strips though, Red and Lucky still have their nicknames, but other characters have real names). Of note are her colleagues, identified by workplace, who were invented as fake people so Angela could avoid accidentally writing a comic about someone who wouldn't appreciate it.
* "Wasted Talent" ends with Stewie hitchhiking over live action footage.
* Wasted Talent", Peter needs to be drunk to play piano and they ran out of beer, so he and Lois crash an underage drinking party. The cops show up and bust them in the back yard. Peter handles it by telling Lois "Look over there." She does. He then tells the cops "Run!". They do.
* Wasted Talent", there's a flashback where Peter as a kid asks a tour guide in a museum: "Why did all the dinosaurs die out?" He responds: "Because you touch yourself at night."
* Wasted. The first season ends with him delivering the line "One does not simply kill Sean Bean".
* Wasted Youth, this happens to Roger when he's caught using a peephole to watch the girls sleeping in their dorms.
* Wasteful Days of High School Girls allergy rather than some kind of psychosomatic problem.
* Wasteful Days of High School Girls are there, and in Majime's case, falling seriously ill during high school admission exams.
* Wasteful Days of High School Girls as well, as she seen playing with petri dishes, soldering a PCB, and measuring chemicals on a scale, all on her school desk.
* Wasteful Days of High School Girls comes up with extremely off-the-wall scenarios where she conquers boys and men, which show her complete lack of experience with the opposite sex. Every interaction ends up with the man uttering the same phrase about her:
* Wasteful Days of High School Girls, "Majo", which means "witch", comes from this trait.
* Wasteful Days of High School Girls never buttons or tucks in her shirt, thus showing an orange T-shirt underneath. In addition, she usually wears crew-length socks while other students wear knee-highs.
* Wasteful Days of High School Girls. She lives alone in an apartment paid by her parents because she couldn't tolerate living with her dad after he lied to her all of her life regarding having a pet cat because of his allergies, the condition being that she'd sustain the prospective cat with her own earnings.
* Wasteful Days of High School Girls. The group is forced to issue an apology as they started using the correct name.
* Wasteful Wishing: A person wastes their wish on something frivolous.
* Wasteful Wishing: If wishing for something that's unimportant seems selfish, then so be it!

* Wasteful Wishing is not granted and doesn't count toward his three wishes.
* waste iron; this one process alone apparently has to be performed often enough to make wearing a uniform a serious hassle, and at least one other involves venting blood from gills in his back. So there are about a million different things Cirbozoids can do; one for every time they have to go to the bathroom every day.
* Wasteisolation by that point. While the two still produce music together, it's highly unlikely they'll return to the Black Dresses name any time soon.
* Wasteland 2010, and he retains his intelligence in his new form. Also, he's the only one of the three leads who remembers the pre-Changing world, which he often has to explain to his younger teammates.
* Wasteland 2010, Cammie is the series' equivalent, although her "jungle" is "the forests of the Midwest."
* Wasteland 2 ask General Vargas what he thinks about Angela Deth (while she's in your party), and he'll respond that he thinks enough of her not to talk about her behind her back when she's right in front of him. "Oh, how's it going, Angie?"
* Wasteland 2), causing any of her robots that the party failed to destroy beforehand to attempt to finish them off.
* Wasteland 2: Rubik's cubes, Teddy Ruxpin dolls, and snap bracelets are just some of the things you'll find lying around.
* Wasteland 2 simplified this to enemies and armors either being conductive (generally higher armor value, but taking more damage from energy weapons) or non-conductive.
* Wasteland 2 so bad that people are flat-out trading with raw materials, even though it's treated exactly like currency.
* Wasteland 2. Unlike the previous game, energy weapons aren't just straight-up required to beat the game as they knock old bullet-sluggers into obsolescence. Energy weapons are more powerful (especially against enemies with heavy armour) but kinetic weapons are still more abundant, reliable and easier to keep, and the same is true for bullets. An AR-15 might be a more useful main weapon pick over a laser rifle in the long run despite its statistical inferiority, but it's still handy to have an energy pistol on hand to deal with those special moments when ordinary bullets don't have the kick to punch through armour.
* Wasteland 2 was released, and the Quirk that buffs critical hits was named "Goat Killer." Someone at the studio clearly wants goats to have more visibility in games.
* Wasteland 3. He is actually friendly and an aspiring scientist with some skill, but he himself admits that his intelligence and ability is nowhere near his proginator because of this trope — as is evident by his own attempts at cloning experiments (both on himself and on members of your squad if you ask) producing less than stellar results.
* "Wasteland" by the German Gothic metal band Atargatis describes how, after having ruined Earth reducing it to a dry wasteland, humans become wretched, naked, creatures of knotty limbs looking in vain for fertile land. The Gaia's Vengeance parts is how Mother Nature itself wants them to give up and leave Nature heal itself.
* Wasteland. came out, it was numbered "the real number six", and the cover, apart from framing elements, was pure white. For a horror comic, it worked quite well.
* Wasteland came with the famous Paragraph Book. Due to the technical limitations of the game itself, the story of it was in form of separate, physical script, with game prompting player to read the right paragraph. This served three different purposes: reading the story without the prompts made it look as completely different genre (with mission to Mars being the final goal), fantastic copy protection (players absolutely needed the thick manual to play at all) and allowed to make the game absurdly open-ended in its design, since the paragraphs allowed to wander in any direction without disrupting the plot of the game or need to trigger specific event flags.
* Wasteland coyotes have very little in common with the actual animals. They're a recolor of the game's other wolf varieties (real-life coyotes are much smaller than wolves), hunt in packs (coyotes are usually solitary, and at most form mated

pairs), and live in the desert (the closest coyotes get to that are drier prairies).
* Wasteland Elder: The older leader of a small survivor group, probably with the knowledge of how the world was before it ended.
* Wasteland Empires is based on this type of scenario, though what type is not stated.
* Wastelanders Anonymous: Although this is an ensemble piece, Benjamin acts as the catalyst that brings the characters together. Anne also has some of The Hero in her but not as much as Benjamin. Paradoxically, Benjamin hasn't got a clue that he's the catalyst. Both he and Anne think Anne is the real catalyst.
* Wastelanders Anonymous: Jeff is a zombie. At least that's what everyone calls him. So far, he's acted exactly like a normal human though he's kinda helpless. Also he has that scar that never healed because he doesn't have any blood to heal with. Benjamin also teased him that he can be killed by a bullet through the brain. Other than that, he's just another human.
* Wasteland features this as well. Nukes do fly, too. You're in a bit that didn't get worked over too much, although fallout radiation still hangs out in a few spots.
* Wasteland has the proton ax as its strongest melee weapon. The more common and far weaker fire axe is also present.
* Wasteland, numerous pre-apocalyptic military bases and research complexes can be explored. Some of them were adapted to fit their current users' needs, others are abandoned or still serving their intended purpose, crawling with formidable enemies.
* Wasteland RPG featured this. Trying to go past the map's edges caused a comment about the irradiated wasteland beyond and the notion that you wouldn't survive it.
* Waste Land the Apocalypse has meant it's tough to make anything new, proper maintanance is reserved for the most important things, and everything is getting kind of rusty. One of your jobs as the Desert Rangers is to help people repair things (explained by how the original Rangers were Army Engineers).
* Wasteland Warlord: The despotic leader of a survivor group, often organizing them into warbands to raid and harass other survivors.
* "Waste Not": A sinkhole suddenly forms underneath an elementary school playground, killing a teacher and injuring several children. During the investigation into why it happened, it's revealed that a construction company has been dumping toxic waste underneath the playgrounds they've built at several low-income schools.
* Waste of Space gets some credit for being genuinely chastened by this.
* Waste of Time can be very cute and charming, but she will threaten to hurt you without hesitation.
* W.A.S.T.E. vs E.M.P.I.R.E. vs M.O.T.T vs X.S.M. all to to be found in the pages of Matt Fraction's
* Waste World RPG presents some kool spelling variationz like "skavengers," "drakonium," "konvoys," "kimera" and the like.
* was that Carbosilicate Amorphs, the species of the titular Schlock, are naturally evolved from the incredibly durable data storage mediums the Bradicor store their brains in. This means that Schlock and his kin are effectively immortal, and gives you an idea of just how long the Bradicor have been around.
* was that he seduced, slept and impregnated the fiance of a member of his crew.
* was that Luna was vastly different from the most common portrayals at the time, being mysterious, playful, slightly intimidating, and quite terrifying when she wanted to be. This turned out to be a lot closer to her official characterisation than the more common portrayals.
* was, the 163 cm 57 kg, blind in one eye, Act Yasukawa (Despite being beaten into a bloody mess, Yasukawa refused to let the match be stopped until it reached the previously decided finish, proving to be as worthy a pro wrestler as any).
* was the apple of Franz's eye (and the only one she could raise in her own terms), Marie Valerie.
* was the bad news (said troubles are being caused by something much worse).

* was the case in the Bad Old Days, where the Beetle-kin and several other kinden were enslaved by the magic-using Moth-kin and others to perform the menial labor of empire. Then the Beetles developed the crossbow. Now the world is divided between the "Apt" peoples who have a natural facility with technology; and the "Inapt" peoples, many of whom could literally not use a crossbow to save their own lives. Needless to say the Apt are doing quite well for themselves, having inverted the trope completely by the start of the series.
* was, the edge of the crevasse broke just as he was pulling himself out the first time.
* was the fear that non-English songs would lead listeners to tune out.
* was the first truly successful example and the one that laid the foundation for all those that would follow, especially once the fuel crises of the '00s caused them to displace SUVs as the rulers of the American road.
* was the Hiroshima and Nagasaki bombings, putting it on par with an actual nuclear strike.
* was the Indonesian national champion, despite having only fought 3 matches total in his life.
* was their biggest hit. It went Top 5 in the UK and Germany, Top 10 in Austria, and Top 20 in Ireland and Canada's rock charts. "Scars" only reached #82 in Germany, and didn't chart anywhere else outside the US.
* was their only visit to most worldwide charts than the original version of the song. Their highest charter locally is the #17 "Attracting Flies". Additionally, their biggest success back home wasn't even their own song, but rather "White Noise", their collaboration with Disclosure. Speaking of Disclosure, see their entry below.
* was their RAM and graphical power. Compatible games don't function in a standard NES without the Aladdin, due to it containing those components, and nearly all of them were also available as regular NES games no different from their Aladdin-compatible counterparts. It's less like upgrading cartridges, and more like breaking them in two and selling the parts separately. It's technically an upgrade, but in the sense that a functional but average game is an upgrade over a game that's missing its parts and doesn't fit in your NES. The actual reason was that the Aladdin was an attempt to keep costs down by taking shared components of their cartridges (including one to bypass NES copy-protection) and selling them as a separate part that consumers would only have to buy once.
* was the kind of sanity-doubting unusual things going on at the same time. As Lonnie is an abusive deadbeat, it's implied that Joyce has fallen victim to these kinds of manipulations before.
* Was the legendary hero Chuck Norris a real person, whose actual actions became exaggerated and mixed up with tall tales over time? See the debate
* Was the move from an up/down shifter to a 6-gear H-shifter necessary?
* was the one of the only Soul Reapers to show him any kindness. He tries to avoid fighting Kenpachi for the same reason, but the latter insists on their rematch, forcing Ichigo to kill him.
* was the one who brought his suspicions to Jon Arryn in the first place and helped him investigate, but then left court out of fear for his life and resentment Robert didn't make him Hand. It was only Ned Stark and his older brother's death that pushed him into action, and made him take a more decisive stance.
* was the product of one and has been on the run for years because of it, thinks PS238 is just more of the same and strikes against it because of that.
* Was there any Radar O'Reilly connection? There was a strong vibe there... (It's also unclear from canon if his first or last name should be Walter, since you'd expect a General not to call a very junior aide by his given name.)
* was The Remnant — it's mentioned in various sources that he fought on at Serenity Valley with his troops for several weeks after the leaders of the Independents stopped fighting and began negotiating terms of surrender.
* was the son of the mob boss Yakone and a young waterbender who was taught by his father to bloodbend. Eventually his father's abuse of both him and his brother Tarrlok, brought him the belief that bending was the root of all evil and needed to

be ended. By the time the series comes around and by the end of it he has become just as cruel as any bender was.
* was they didn't want to cause any trouble with her children's claim to the throne.
* Was this a common method in the wizarding world? If so, how did kids sixteen and under, who can't use magic outside school, handle their waste? If not, why would newcomers to Hogwarts be a-OK with an environment where their teachers and classmates poop on the floor like dogs?
* was. This bypasses the usual weakness of attempting Instant Transmission in combat, because Goku was able to concentrate on Cell's location and charge up his Kamehameha at the same time, and since Cell thought he was bluffing he stood still to figure out what Goku was playing at.
* was This ended up unnerving everybody involved in the assignment, including Phil Coulson and even Tony Stark himself.
* was this for the Charlotte Family, as she defied the wishes of her mother, Big Mom, to marry.
* "Was This Really Worth It?" has her spitting out a cookie in surprise when she wins an award she never thought she'd win.
* Was this something that happened in one of the movies? Because I don't remember that being the way it went down at all. In the anime Aizawa suspected Light was writing notes, and made his own indentations on the bottom of the notepads to see if they'd still be there when he checked out the room after Light left. Since they disappeared it confirmed his suspicions that Light was actually Kira. It ultimately comes to nothing. Light suspected Aizawa was up to something but was unconcerned, and, just as Light thought, Near showed no interest either because Aizawa couldn't produce the contents of the note pads which could have damning evidence.
* "Was this/that trip really necessary?" (reference to a slogan used to encourage people not to take unnecessary trips to free up gas and rubber for the war effort and to free up space on trains to ferry troops to their duty locations.)
* was this trope back in the days. More than half their ads were just bashing their rival company (usually Nintendo) in 'creative' ways. We all know the 'Genesis does what Nintendon't' one, which chastised the NES for being 8 bits lower than the Genesis. When the SNES came out, they found the only thing they could say was better about the Genesis was its slightly lower price, so they included a kid screaming at this 'higher price' in fear. Even though they were only about $50 (one game) apart.
* Was Thor really fighting the Midgard Serpent? Or was it an excuse he just made up?
* was throughout that episode was that Chandler had found Heckles' old school year-book and was freaking out at their similarities).
* Wasting Away serum (which explains their durability), and see everyone else moving quickly. Things like their hair and skin falling off and hunger for brains are explained away as side effects.
* Wasting Away who's acting weird (their undead brainwaves run slower, so normal humans move and talk in an incomprehensibly fast manner).
* "Wasting My Time" begins with a frustrating phone call where the narrator tries to get a straight answer from his lover on whether she's interested in him.
* "Wasting Your Time," Carlos Jean turns into a cartoon character after playing a toy piano and washing his face.
* was to a joined Trill, which confuses, and, depending on one's interpretation of the joined Trill/Symbiont relationship, laughs in the face of the whole matter. (None of the major Daxes have had any problem with long-term couplings with persons who aren't joined Trill.)
* was to make Shifu proud of him. Shifu declares that he was always proud of him, but that pride worked against him and kept him from seeing that he was setting Tai Lung up for disappointment. And once more, Tai Lung is too proud to accept this, and says he only wants the scroll.
* Was Too Hard on Him: A character feels bad when he has to scold another, especially if it's really harsh.

* Was Too Hard on Him: A character feels sad and guilty over scolding or harshly punishing someone.
* Was Too Hard on Him: Someone is remorseful of being too harsh to another person.
* Was Too Hard on Him: The character who deals with others harshly may feel bad about doing so.
* Was Too Hard on Him: You feel guilt for punishing a loved one harshly.
* was to the Hound's, except caused by festering teeth of an evil idiot rather than by fire.
* Was UB-65 really a cursed ship that ended up being haunted by the ghost of Lieutenant Richter, or did a series of unfortunate accidents and the stress inherent to being on a military submarine lead to a case of mass hysteria?
* was unaware of this particular trope when he named his character Riddly Lancer. Fits the bill too, well actually only up to the third sentence of the description that is... but Cwen is definitely the leader between the two characters.
* was unjustly killed by Scorpion as he tells Raiden and "losing trust" in him was not justice at all.
* Wasurenagusa. In that organization, there was no room for relationships of any kind, and having such would be met with severe consequences.
* was used for the 1999 Kids' Choice Awards victory speech 6 months before it premiered on TV.
* Was used in a newspaper advert for a UK internet provider, showing a screen with the top of the image loaded (appearing to be a pair of female buttocks) and then contrasting it with their allegedly faster image loading, in which it was revealed to be a photo of two bald men standing close together.
* was used with much irony in an anti-smoking poster from the American Cancer Society
* was voted "Worst Dressed Sentient Being in the Universe" seven times running...
* "Was" vs "Were": "Was" is used as a singular past tense, while "were" is used for plural past tense. "Were" is also used in imaginary and hypothetical sentences (such as sentences that start with "if", or "I wish"), regardless of it being singular or plural. An exception is made when it is assumed that it might possibly be true and the speaker indicates a statement.
* was wasn't watching the twins at all, but merely happened to be seen by them.
* was watching the interview, and sympathizing with Yukari's grief he decides to bring back Minato in his new reality. Meanwhile, Amamiya Ren chooses to accept Maruki's reality since it not only grant his friend's wishes but also brought Akechi back to life. As a result, Maruki's new reality spreads and is able to grant Yukari's wish of seeing Minato again... by pulling him away from being Nyx's seal, allowing the Dark Hour to return in Tokyo.
* was were Shiny. Meaning that Shiny Pokémon were somewhat stronger than your standard mon, but still not the strongest they could be.
* was what Brain was pondering this time." However, when he says "And do you know what else'' I'm pondering?" Pinky's response is something considerably more Pinky-ish.
* was when she guest hosted Raw. Only this time Trish was the face and Jericho the heel, still enforcing the trope somewhat.
* Was. When the fictionalized Baum decided to write a story based on her, he named his character "Dorothy Gale".
* was, which actually existed at the same time as Stegosaurus, so the two mistakes cancelled to make it an accurate depiction.
* Watamote have this to varying degrees. It's most obvious with Tomoko, who thinks groping your friend's breasts to relax is totally normal, and Ucchi, whose crush on Tomoko is evident to everyone but her.
* WATAMOTE ~No Matter How I Look at It, It's You Guys' Fault I'm Not Popular! is about the introvert main character, Tomoko, seeing that her years of playing Dating Sim games haven't helped her to become popular, tries to become popular though various means. Naturally she either screws them up or is unwilling to learn from her mistakes to try again. Later on in the series, this is averted: Tomoko slowly grows out of her problems, matures, and starts developing a social circle.

* Watanabe Miyuki ended up dropping out of the senbatsu in the 2014 elections, ranking in the Under Girls.
* Watanuki in was born on April 1st, a date with significance in both the East and the West. It's also a date personally significant to
* Watari, Kousei, and Tsubaki, who have known each other since they were kids.
* Watari maintains a computer link to the orphanage he runs, and reports in at regular intervals. When Rem kills both him and L, at the proper time the computer reports "L is dead". This is a cue for the man currently operating the orphanage to send out L's successors, Near and Mello, to continue the Kira investigation.
* Wataru (a.k.a. "Waka") works as a clerk in a video store, giving him plenty of opportunities to indulge in his hobby of action
* Wataru also made the same declaration to his mom when he was about Izumi's age. He grew out of it rather quickly, mostly thanks to
* Wataru also sparked conflicted feelings in his older maid Saki when he took her out to a diner. Turns out he just wanted to talk since, due to a series of misunderstandings, he assumed that she was having an affair with a married man.
* Wataru and Taiga's mother Maya who, being a Fangire, doesn't age at the same rate as a human and looks around 20 years old; appearing younger than Taiga, who is in his mid-to-late 20s.
* Wataru calls Mitsuru and Nazuna "Little Rabbit", Tori "Hime-kun", and Yuzuru "Shitsuji-san".
* Watashi ga Motenai no wa Dou Kangaete mo Omaera ga Warui -> "WataMote"
* Watashitachi No Tamura Kun, Souma acts harsh and cold to people when she is first introduced, but really would like nothing more than to make some true friends and find love.
* Watashitachi No Tamura Kun: The series end with Tamura confessing to both Matsuzawa and Souma, and both of them confess to him, but none of the relationships are truly confirmed or denied by the end of the series.
* WATATEN!: an Angel Flew Down to Me: College student Miyako Hoshino becomes smitten with her younger sister's best friend went she brought her home. Spends her time making snacks for her in the hopes of having her dress up in some cosplay outfits she had made.
* WATATEN!: an Angel Flew Down to Me played straight. She loves her older sister Miyako, blissfully unaware that Miyako had fallen in love with her best friend.
* Watch almost any cooking-based reality show that shows contestants during their breaks, and you'll see every single contestant smoking like a chimney. This is somewhat ironic, as pointed out by Gordon Ramsay (famous chef and host/judge of Hell's Kitchen). He does
* Watch any Vine video compilation. If the currently playing 7-second clip doesn't do it for you, odds are the next one will.
* Watch a Policy/Cross-X Debate round. Try to understand what they're saying.

* Watch Commander Sam Vimes has the answer: "We all keep an eye on each other".
* Watch_Dogs 2 following the discovery that Blume had been manipulating them Marcus encounters Ray at Swelter Skelter, a desert festival, after which Ray comes back to San Fransisco to accompany the team throughout the rest of the game.
* Watch_Dogs 2 has on him. His digital file contains his legal record, which stated that he was the prime suspect in a burglary, that he's a skilled programmer, and has a license to own a gun. Although there was no concrete evidence that he was responsible for the robbery, he was convicted only because CTOS calculated that he was threat because of the aforementioned variables.
* Watch_Dogs 2. He's portrayed as something of a hipster, wearing a topknot and doing yoga.
* Watch_Dogs 2 is a cult that demands exorbitant amounts of money from its followers, kidnaps members who doubt their teachings (including their celebrity spokesperson) and keeps them in a reeducation camp, and bases its teachings around fake ancient Sumerian tablets. Naturally, since Dedsec is a parody of Anonymous, you're basically playing through a more violent version of Project Chanology.

* Watch_Dogs 2 is quite the traceur in addition to being a world-class hacker.
* WatchDogs2: Josh did this in a urinal when talking to Marcus. at the fort where the voting Machines needs to destroy.
* Watch_Dogs 2 — the one where the Ded-Sec team trick Shkreli-expy Gene Carcani out of twenty million dollars — ends with this. Perhaps the only reason Sitara isn't heard laughing is that she had her audio output rigged to "mic-spam" the Bobo Dakes soundboard they used to accomplish the mission.
* Watch_Dogs 2, one of the sidequests deals with the SFPD using CtOS to organize drug deals with local street gangs.
* Watch_Dogs 2 was already targeting him, Pearce is only seen once, held captive by the Bratva where Marcus creates a distraction to let him escape but it's made clear that he has continued the battle against crime since his game ended.
* Watch_Dogs after an episode in which he appears, though no other coats are available in that game.
* Watch_Dogs, Aiden sneaks into a prison (by turning himself in, gun in hand) in order to frighten/save a witness.
* Watch_Dogs. And in the very last mission, Damien is the one who ultimately tries to destroy the city with his new, unprecedented level of network access, doing to the player what they've been doing to other enemies throughout the entire game up to this point.
* Watch_Dogs, a pair of corrupt cops are seen providing protection for the Chicago South Club's slave auction, though they warn the mobsters that they won't be able to keep the "other boys" from busting the place if the event doesn't stay quiet. Later, after busting the auction yourself and hunting down its buyers one by one, the same cops provide an escort for the slave ring's leader as he tries to flee the city.
* Watch_Dogs: At the end of act 2, Aiden and Clara discover some encrypted code, which prompts them to track down Ray Kenny, aka T-Bone, who then joins them at the end of Act 3.
* Watch_Dogs averts this. Just look at Aiden's coat! They even managed to realistically make him put his hands in his pockets, something most animators would kill themselves trying to do.
* Watch_Dogs Black out city blocks, mess with traffic lights, make individual machines activate, hack ATMs, you name it, even stand-alone things like forklifts or cars. Sure, he uses a backdoor program and the city's universal free wi-fi to enable this, but there's essentially nothing electronic he can't bend to his will.
* Watch_Dogs calls him to warn him about the strange caller looking for him. The uncle realizes this is happening and tells her to hang up, but by that point it's too late; Aiden has already traced her call and knows his exact location.
* Watch_Dogs (currently being discussed by scientists, engineers, and futurists but not in actual widespread use as of the game's release) are rising to prominence.
* Watch_Dogs: Delford "Iraq" Wade is an Iraq war veteran who made the move to organized crime back home, using the same advanced military training he picked up in "the desert" to train up his gangbanger buddies into a legitimate fighting force. While to the public, he and his crew just look like another wannabe street gang, behind the scenes he's hacking government files and laundering military-grade arms.
* Watchdogs find out that one of them has a birthday, they all shout words of encouragement ("You oughta celebrate you, Barry!") until one interjects, "Barry was born!"
* Watch_Dogs for the purpose of product placement and to control public opinion.
* Watch_Dogs has this theme. Aidan Pierce obsessively seeks revenge for the death of his niece, which happened because of his illegal actions as a hacker. His sister begs him to let it go and move on but he doesn't listen and soon gets in over his head.
* Watch_Dogs. If you want to go for the more traditional route, start the mission at night and cause a blackout, then run in take them down with your billy club or shoot them in the head with a silenced pistol or machine gun, then set down explosives near the bodies so that you can blow up any remaining patrols when they

come to investigate, all without ever being seen. Nobody is safe from the Vigilante...
* Watch_Dogs is to hack the explosives of guards. Sometimes they manage to stop it. Otherwise...
* Watch_Dogs it goes into enough detail to provide context that this is abuse, rape, sexual violence.
* Watch_Dogs, it's been alleged that the game was downgraded at the insistence of Sony and/or Microsoft because they didn't want to hurt console sales by having the PC version look better, as modders have successfully patched these effects back in and found them to work fine even on mid-range hardware.
* Watch_Dogs: "Knock-Knock." "Who's there?" "A smartphone hacking the local media art to play your betrayal over and over and over..."
* Watchdogs launch EMP attacks on multiple cities and release a video supposedly from the "Inhuman resistance" claiming responsibility for it. This not only stirs up anti-Inhuman sentiment, but gives the Watchdogs an excuse and opening to hunt them down.
* Watch Dogs: Legion as London doesn't even try to hide the lethal-force drones patrolling the streets. Nobody buys the "not a police state" propaganda filling the billboards, but they distract pedestrians from the constant security cameras. And bullet showers.
* Watch Dogs: Legion doesn't say what year it is specifically set in, but as of its reveal, it is set during a post-Brexit No Deal United Kingdom sometime past 2020.
* Watch Dogs: Legion has "Flatulent" as a trait that characters can spawn with, which causes them to fart frequently. While entertaining, this also means that they'll have trouble in stealth since their farts will alert enemies.
* Watch Dogs: Legion is capable of rising up against the fascist Albion instead of continuing their movement routines:
* Watch Dogs: Legion may be a vicious organization of human traffickers, but they don't discriminate on their hiring, as seen by the various goons you see throughout the game. If you can hurt people and be an obedient thug, you're in.
* Watch Dogs: Legion takes place in a United Kingdom that's turned into a surveillance state policed by brutal mercenaries and armed drones, with nationalism and terrorism being two of the factors responsible for its woes. The resulting economic downturn has caused a popular rebellion to begin rising up in order to return the country back to the good old days. The game was only officially announced on June 10 but already people are making comparisons to the game's setting being what will become of the country if Brexit is allowed to go through, and if its advocates are able to seize power.
* Watch Dogs: Legion which makes it so any operative who dies is dead forever. If your last operative is taken out, the screen will read "DEDSEC HAS FALLEN", and the credits will start rolling.
* Watch_Dogs, one of the auctioneers texts his accomplice he's found a girl worth taking down to the woods.
* Watch_Dogs, one of the Privacy Invasion collectables is a man being dressed up as a princess (off camera) by his daughter (and his attempts to talk her out of it without upsetting her).
* Watch_Dogs opens with Ubisoft's logo being patched in through connections in a ctOS map of Chicago.
* Watch_Dogs series, the 2003 blackout that took place in the Northeastern and Midwestern United States and the Canadian province of Ontario was due to a rogue hacker instead of a software bug found in the computers of FirstEnergy Corporation. This gave Blume Corp. the opportunity to provide ctOS with a safeguard against future incidents.
* Watch_Dogs, The 580s fulfil the same niche, but on a more realistic scale.
* Watch_Dogs: the final mission of the Weapons Trade side-quest pits Aiden against a group of fixers who his ally Tobias is convinced are MIBs. It's worth noting that Tobias himself is a conspiracy theorist, so it's more an invocation of Men In Black as an urban legend rather than a straight example.
* Watch_Dogs") when some rival hitmen in a "plastic, eco-friendly shitbug" tried to

ram him off the road. Jordi recalls only feeling a small "ping" as they rebounded off his car entirely and totaled themselves on a parked van.
* Watch_Dogs while also righting some personal wrongs. It just happens that this involves going up against the Chicago mob and being against the law. Naturally, it's up to the player what kind of vigilante they make him out to be: you can be a ruthless cop-killer, or you can just outrun them.
* Watch_Dogs, with each gang gunning for one of the other two while simultaneously being targeted by the third.
* Watch_Dogs. With one thumb and a smartphone, he makes all of Chicago his technological bitch.
* Watched It for the Representation: Audiences consume a work because of its minority representation.
* Watched It for the Representation: Fans tune in to a work because of the representation it provides for minority group/s.
* watched lots of movies and read tons of books, acts completely genre blind. Worse, he seems genre blind of his own country's myths.
* Watchers, a significant shift in Nora's personality and her relationship with Travis is signaled by her joking with him by playing such fictitious words as "dofnup" (she claims it's a logger's nightcap) and "hurkey" (claiming it's a dish made with both ham and turkey).
* Watchers, a super intelligent golden retriever that can communicate through writing escapes from a classified research laboratory. Meeting a young man named Travis, who takes the dog in and tries to protect it.
* Watcher's Keep has a whole host of Infinity +1 Swords throughout its five level structure (all of which can be upgraded to +5 versions), including the best axe (Axe of the Unwielding), bastard sword (Foebane), bow (Taralash), crossbow (Firetooth), dagger (Dagger of the Star), longsword (Angurvadal), mace (Storm Star), short sword (Short Sword of the Mask), spear (Ixil's Nail) and staff (Staff of the Ram).
* Watchers make a wolf-like howl. Hearing one is always the precursor to an enormous horde of them turning up.
* Watchers of the Throne, Aleya returns to her convent from a mission only to find that everyone else there had been massacred. Once she strikes out for Terra and meets other Sisters of Silence, she finds that many others were in similar situation.
* Watchers of the Throne, and continue fighting together whenever something big's going down.
* Watchers of the Throne; however, much of the book's plot is devoted to figuring out who the group works for.
* Watchers of the Throne intending to keep the enemy from it for as long as they can. Some even survive.
* Watchers of the Throne sides with the progressive Reform Council, but says he actually believes more in the ideology of their opponents. The only reason he takes sides in the first place is that he wants to avoid a civil war that the conflict between the two would spark. He's also sure that over time, the Reform Council's patron will come to see the world the way he does.
* Watchers of the Throne, Tieron opines that the nobles of Terra have gotten so used to hearing about wars and conflicts in distant, unseen parts of the galaxy, they learned to tune it out as background noise. As a result, they are caught completely unprepared when war comes to their doorstep.
* Watchers of the Throne who, as an organization, have been active for over ten thousand years), and when he suggests that a different Space Marine chapter can be their allies, the Fists commander is stunned.

The suggestion has been made that this was an unofficial means of maintaining a British presence in former colonies who might find it politically unacceptable to ask for British military aid.
* watching a dvd of the series. Milly and Lloyd in particular get in on it.
* Watching an ad can grant one or two extra Gems or allow you to access certain minigame upgrades without paying.
* watching a tank drive out of the ocean and aim its 75mm gun right at you and you can understand why they were used, despite the difficulties.
* Watching a VHS tape when you're used to DVD controls. With most but admittedly not all VCRs, double-tapping the rewind button won't increase rewind speed; the second tap takes you out of rewind.
* Watching Ellie was initially shot entirely in Real Time. This format was ditched after the first season.
* Watching her mistress be oppressed by a cruel God for several long years, as well as watching her be forced to send innocent people off to be smited, once she gets the chance to talk without any chance of Enel hearing her, Conis's pet fox Su lets out everything she wants to say, declares Enel a tyrant, and begs the Straw Hats to defeat him.
* Watching his uncle Iroh getting up from a hot spring in his birthday suit
* Watching his uncle sweet-talking an old lady to get them easy entry to Ba Sing Se (complete with
* Watching Li and Lo doing the "sexy" pose they did when they were young, and then in bikinis (Mai covers his eyes for this one, and the audience probably did the same)
* Watching Nancy kill herself with food poisoning, cliff jumping, and burning to death should
* Watching or reading works in foreign languages can teach that language. It's not perhaps as good as spending a couple of weeks having to speak and read that language exclusively, but it's good practice beforehand. Watching movies and video games with subtitles are a particularly good way to pick it up, or picking up a work you already know almost by heart and hearing it in a different language. In Latin America, there's a meme about how "I learned English more from the
* Watching the Detectives is basically about what happens when Manic Pixie Dream People get together. The main character Neil is a Manic Pixie Dream Guy who aggravates everyone with his strange antics and quirks, but then Violet comes along and out-Manic-Pixies him by taking the reckless and unusual behaviour to quite troubling extremes.
* Watching the English, for instance, is so common because it's a safe and non-confrontational ice-breaker (as it changes roughly every fifteen minutes).
* Watching, the female character is implied to be a ghost, as she is wearing white, thus not being dressed for mourning, nor is she getting wet from the rain and, likewise, the funeral that she is watching is probably hers.
* watching their impotent rage is one reason why he enjoys being a outright prick to others, to deal with, however.
* Watching the Reflection Undress: Using a reflective surface to spy on someone disrobing.
* Watching the Reflection Undress: Watching someone's reflection to see them undress without getting caught.
* Watching the Sunset: A couple, character, or group watching the sunset because they are either very happy or very sad.
* Watching Troy Burn: Your home or a place you love is being destroyed and all you can do is watch.
* "Watching You Watching Him" has this twice over. The singer loves the subject, who loves a third person, who doesn't love her:
* Watch It for the Meme: After seeing a particular meme, you decide to check out the original media source out of curiosity.

* Watch It for the Meme: Finding the meme led to you looking into the work it originated from.
* Watch It, John can't tell Ann how he feels; the closest he gets is after she gets back together with Michael, and John says to her, "I don't know that I don't love you." He immediately realizes how ridiculous it sounds, and of course, she doesn't believe him either.
* Watch It Stoned: A movie is believed to be even better when viewed while intoxicated.
* Watch It Stoned: Many counterculture movies and albums were made with the purpose of being experienced while high.
* Watch It Stoned — Characters think watching a show when high is so much better than watching it sober.
* Watchmen (2019). Afterwards, growing awareness of the event led to it being added to the Oklahoma public school curriculum.
* Watchmen (2019) and is arrested by Laurie and Looking Glass for his crimes.
* Watchmen (2019) Emmy nominations, winning 11, including four in the primetime event of the show (Best Limited Series, Outstanding Actress and Supporting Actor - Limited Series, and Outstanding Writing), more than any other show of the season.
* Watchmen (2019), including shots of Will's father, a World War I veteran, in his old uniform as they flee the white mob sacking Greenwood. The second episode has a flashback of his father picking up a German Army leaflet urging black troops to switch sides, and then being spat on by a white officer.
* Watchmen (2019) psychopath who regularly murders his servants in fits of pique.
* Watchmen (2019) really is her paternal grandfather. It also says he died with his parents in the Tulsa Massacre while still a child, before he could have sired her father. Being a computer, this discrepancy isn't noted or troubling to it.
* Watchmen (2019) that he's her father. He initially says it's impossible, as he's never been with a woman, though she says her mother (a cleaning woman) found the samples of his sperm he keeps and then used one to impregnate herself.
* Watchmen (2019) when Laurie Blake shoots a vigilante in the back. A colleague asks her afterward how she knew he was wearing body armor that protected him from the bullet; Laurie walks away without answering.
* Watchmen #4 Dr. Manhattan is seen in a flashback using his powers to blow up the head of a gunman who opened fire in a nightclub.
* Watchmen Adrian Veidt has a folder labeled "boys" on his computer. This was intended as in in-joke to fans of the Comic Book.
* Watchmen, Adrian Veidt/Ozymandias' trademark colours are purple and gold.
* Watchmen: Adrian Veidt's secretary gets her right hand's index finger and middle finger shot off during the assassination attempt on Veidt.
* Watchmen. After Nite-Owl admits to owning a copy when he was a kid, she offers to give it to him.
* Watchmen, a.k.a. Walter Kovacs: "You keep calling me Walter. I don't like you." His therapist eventually starts writing "Rorschach" in his notes, a sign that his patient is getting to him.
* Watchmen, a longtime supporter of the masked hero Nite Owl who, with the permission of the original, takes up the name and mantle when his hero retires.
* Watchmen also cuts an entire ocean liner's worth of people that died for the cause in the comic.
* Watchmen a major police strike and nationwide protests led to the passage of the Keene Act, which repealed their legalization.
* Watchmen and comic, though this has been a common reaction from many moviegoers to Dr. Manhattan's nudity. Manhattan would dress for official public affairs, but wouldn't bother with clothing for any other reason. It's clearer in the comic than the movie that Osterman's disregard for his clothing paralleled (perhaps symbolized) his detachment from humanity over time. His first costume was a full body suit. By the war in Vietnam, he only wore briefs. In the eighties, he could barely see the point. But neither scientists nor military attachés nor fellow heroes even acknowledged his nudity (in story).
* Watchmen. And it happened as the trailers caused the comic to become a top-seller

again. Good for the comic, bad for Moore (who doesn't make a cent off of Watchmen due to licensing.)
* Watchmen and takes it to a ludicruous 3 hours 30 minutes. All in all, it's much easier for the viewer to have read the original comic book.
* Watchmen and the Silhoutte is forced to quit the team when her lesbianism is revealed. This is onpoint with the 1940s, where homosexuality was very much taboo and even criminalized in much of the United States.
* Watchmen are usually presented as excerpts from books, reports, etc.
* Watchmen As he describes it (before the tachyon surge), it's like a barrier he can't see past from his current position. But then, once the event takes place, he doesn't seem to have any problem still seeing/remembering the past...
* Watchmen as he gets hurled out a skyscraper's window with great force.
* Watchmen aspects of Rorschach's backstory began to influence the shrink too.
* Watchmen, as per the original graphic novel. The difference is that moviegoers were absolutely transfixed by the glowing blue peen, to the point that it has been elevated to a co-starring role in many viewers' minds.
* Watchmen as well, showcasing Dr Manhattan's ability to synthesize the massive amounts of helium needed.
* Watchmen became a murderous vigilante after failing to save a girl killed by her kidnapper.
* Watchmen: Because humans are flawed, our heroes will be as well, and thus our longing for perfect messianic figures to 'save us' is naive.
* Watchmen begins with this. Somebody kills the Comedian by hurling him out his apartment window onto the sidewalk far below. The rest of the plot is finding out why.
* Watchmen bigger. Actually semi-justified in Manhattan's case; he rebuilt a body for himself after the accident, so the fact that he made it human-sized is largely nostalgia/convenience.
* Watchmen called the Watchmen in the comic, so the movie may have just made a bigger headache for readers in its attempt to streamline things.
* Watchmen can hurt him, so why bother covering up? The only times he bothers to get dressed are at the request of others.
* Watchmen catches a bullet fired at him, but the example is more realistic as he wasn't even sure he could do it, and he was wearing padded gloves that protected his hands, but the bullet still pierced the gloves and his skin, causing him to bleed. And the force of the bullet knocked him off his feet.
* Watchmen combined the two Ozymandias plots of getting Dr. Manhattan off Earth by framing him for causing cancer in people and thus removing him from the picture in time for the second plot, the fake alien attack on Earth. Instead he was framed for causing the cancers, resulting in public anger that drove him away, and then framed for striking back in response.
* Watchmen combined with what he did when he realized just what one perp had done to the kidnapped little girl he was trying to rescue.
* Watchmen contains significant noir elements, particularly Rorschach's sections.
* Watchmen crimes against women that affect him most in his life (Kitty Genovese and Blair Roche).
* Watchmen, dead on page one. Literally the first thing you see is his blood. Most of the Minutemen, for that matter.
* Watchmen decides to have a quick nookie with a coworker down in the hold. He finds a bomb. His last moments are squeezing her closer for comfort, and falteringly reassuring her that everything is fine.
* Watchmen deconstructed this with Rorschach and Nite Owl II. They broke up as a team after Dreiberg realized how pointless fighting crime is. Their brief reunion showed them barely functioning because of their different temperaments.
* Watchmen Deconstruction of superheroes that invented half the tropes used by modern comics, and quite a few others besides. Phew
* Watchmen deconstructs this and explores both the positive and negative effects of Living Legends, particularly the dehumanizing and demoralizing presence of Doctor Manhattan.

* Watchmen depicts a man going to horrific lengths to get back to his town in time to warn them about the approach of the titular pirate ship and the death and violence it will bring.
* Watchmen, despite coming from an abusive background, seemed to have a good head on his shoulders until he investigated the disappearance of a girl who turned out to have been murdered and fed to dogs by her attacker. He then went Rambo-like insane and never went back.
* Watchmen didn't intend for Rorschach to be as popular as he was. Moore intended Rorschach to be somewhat sympathetic and intriguing and even claimed he was his second favorite character at the time of writing (the Comedian being the first). It's more that he was taken by surprise by the large number of fans who think Rorschach is absolutely right about absolutely everything.
* Watchmen, dies, albeit gruesomely, in a car accident in 1974, long before the book's present day of 1985.
* Watchmen director's cut edition restores twenty-four minutes of scenes cut for time. As the full version is over three hours, it's really easy to see why.
* Watchmen: Doctor Manhattan disintegrates Rorschach to prevent him from informing the public of Ozymandias' plan.
* Watchmen, Doctor Manhattan is shown once using his powers to turn a bunch of thugs into chunky, red paint. Restaurant patrons weren't happy.
* Watchmen, Dr. Jon Osterman is trapped inside the Intrinsic Field test chamber by the door closing behind him when the automatic timer starts up the generators for that afternoon's experiment. As Dr. Glass puts it, "I'm sorry, Osterman. The program's locked in and we can't over-ride the time lock. It's... it's a safety feature." His last words indicate how horribly aware he is that this trope has come into play.
* Watchmen - Dr. Manhattan and the Comedian are government employees with a public presence, and Ozymandias is a billionaire industrialist, while the other former Crimebusters are unemployed, eager to reconnect with their old identities, and, in the case of Rorschach, a vigilante.
* Watchmen, Dr. Manhattan leaves Earth with the stated intention of creating life elsewhere, thus making himself the technical definition of a god.
* Watchmen, each of the six main characters get an issue in the limelight, which illustrates their backstory and relations with other characters. The Comedian's is in Chapter 2, Dr. Manhattan's is in Chapter 4, Rorschach's is in Chapter 6, Nite Owl II's is in Chapter 7, Silk Spectre II's is in Chapter 9 and Ozymandias' is in Chapter 11. They vary from being an in-depth look at their origins, to showing various important events from their lives, to simply being a way of getting better to know a character. The reason for the inclusion of the issues was the fact that Alan Moore plotted the story for six issues, but was contracted for twelve. So he mixed in six character based issues.
* Watchmen eats a ball of hashish and has a vision that eventually leads to his plan of "conquesting the evils that beset men".
* Watchmen, especially a number of times with Rorschach: attacked by bullies when he was a kid, when he and Nite Owl hunt for info in a bar, when he's attacked in prison...
* Watchmen, even briefly glancing at them before moving on. This apparently started a relationship, as that same nurse was seen sitting with Silhoutte at a Minutemen dinner and then murdered along with Silhouette later in the title sequence.
* Watchmen even if it made more than a few notable changes despite being generally faithful to the plot and look of the book.
* Watchmen example. In the original Nite Owl's memoirs he writes of an old employer of his named Moe Vernon, who discovers that his wife has been committing adultery and has just withdrawn all his savings and fled with her lover. He walks out of his office and announces this to his employees... unfortunately, Vernon was also an eccentric prankster and was so distraught that he didn't realize that he was doing this while wearing a comically oversized pair of novelty breasts. His employees can't help but laugh at him.
* Watchmen example when Rorshach dumps a pot of bubbling-hot fry fat over a fellow

inmate's head when the man tries to pick a fight with him in the chow line, mortally wounding his would-be attacker:
* Watchmen. Excuse me, Rorschach, I'm informing Laurie 90 seconds ago," to Laurie "Silk Spectre" Juspeczyk, being confused by tachyon interference, before saying the same thing to Rorschach 90 seconds later. He's even in the exact same pose and position (relative to the walls of the panel) both times he says it. Also, the whole flashback (flashnow?) scene on Mars.
* Watchmen fame makes a cameo in a couple of panels. In one panel he's breaking Brother Power's fingers.
* Watchmen featured one of these. (None existed in the original comic.)
* Watchmen get out, and just wanted to keep him from killing everyone.
* Watchmen, gets shut inside it, and cheerfully asks his colleagues outside if they can open the door. They can only stammer back that once the door is closed, it stays closed until the experiment is over.
* Watchmen. Get used to Danielle, Wanda, Adi, Laurence, Joan Osterman, Sal and Edie.
* Watchmen had "Katies" (from KT-28, possibly a derivative of Ketamine), a type of drug often used by the Top-Knot gangs. It should be noted that this was not so much about avoiding naming real life drugs, but establishing that culture was divergent in this reality given the influence of Dr. Manhattan. Ordinary drugs such as marijuana and cocaine are also mentioned.
* Watchmen) had primarily gotten work as a child star and in parts on TV, respectively.
* Watchmen has a single superhuman in the world, Dr. Manhattan. He teleported to Mars just to have some solitude (with his godlike powers, he has absolutely no problem to survive there), and later returned and teleported Laurie to Mars as well. But, being a normal human, Laurie almost died of suffocation on Mars, before Dr. Manhattan remembered that other people need to breathe and created an air bubble for her.
* Watchmen has been a source of speculation owing to a couple resembling the two appearing on panel (and in focus) after their supposed demises. Dave Gibbons stated it wasn't intentional, but was far too good of a theory to refute.
* Watchmen, has odd dietary habits. He tends to pilfer food, particularly sugar cubes, from Nite Owl whenever he visits. Then again, he needs quick energy, since eating takes away valuable killing time.
* Watchmen has officially stated that he was very much aiming for this, and compared his vision for the book to a diamond with many different facets, where any reader can look through any of the facets that they choose and still get a completely consistent and coherent view of the story and all the events in it.
* Watchmen has quite a bit of gallows humor. Moloch: "Well, now, y'know that kind of cancer that you eventually get better from? Well, that ain't the kind of cancer I got."
* Watchmen has the "Rorschach's Journal" sections that narrate parts of the graphic novel as internal monologue in the movie.
* Watchmen has the thing where Rorschach breaks some guy's fingers to get information.
* Watchmen has the White Night, a Christmas Eve massacre in which members of the Seventh Kalvery snuck into the homes of various members of the Tulsa police and killed them on site (with Angela Abar being one of the only cops to survive the incident). The attack would eventually lead to police officers being forced to keep their occupations a secret and to wear masks when on duty.
* Watchmen have been present; they were either ignored or Manhattan fixed them when he created the atmosphere.
* Watchmen have managed to escape this to some extent, but Thunderbolt and the Peacemaker (Ozymandias and the Comedian's counterparts respectively) have suffered.
* Watchmen. He decides to go play god in another galaxy before things go that far.
* Watchmen, he eventually comes to the point of his "manhood" ("the junk stays in the picture"), and politely asks him to put some clothes.
* Watchmen held up well in theatres, but the extended DVD release weaves the "Tales

of the Black Freighter" plot back into the narrative. Alas, many of the other subplots aren't returned because they simply weren't filmed.
* Watchmen he sees as immoral to death. He spends his time brutally dishing out "justice" to murderers and rapists, leaving the petty thieves, whores, and the rest alone unless they specifically cross him or get in the way of his pursuit of bigger fish.
* Watchmen. He's friendly to the point of being a doormat (look at when he invites Laurie to stay with him and she keeps talking over him.) Even in appearance, they are opposites, Dan being tall, plump, brown-haired, and when he takes his glasses off, handsome, whereas Rorschach is incredibly short, skinny, red-haired, and is "fascinatingly ugly".
* Watchmen. He's supposed to be the model of western perfection: blonde, square-jawed and athletic. In the film, he's lanky and has a thin face — not that this affects his physical prowess.
* Watchmen hideout, Dr. Manhattan is caught in a trap: an intrinsic field remover that reduces him to atoms. This doesn't stop him in the least, as he explains after reforming himself a few seconds later, since experimenting with his intrinsic field was the first thing he did after the accident that gave him his powers.
* Watchmen hits women. And then tries to rape them. He may even kill a woman that he left pregnant. Ozymandias also kicks people in the stomach when they try to shoot him. Schoolboy heroics are redundant in his new world.
* Watchmen: "I have just broken this man's little finger. Who killed Edward Blake?"
* Watchmen, implying that they may have to deal with the fallout from Rorschach exposing Ozymandias' crimes...
* Watchmen: In a platonic example, Rorschach greatly admires and respects his father, considering him to be a good man. However, it's later revealed that his father walked out on his mother before he was born and Rorschach has never actually met the man.
* Watchmen in general. He is not presented as a good person and the police disdain him — in fact, they hate him almost as much as the criminals do.
* Watchmen Instead Rorschach simply cleaves his head open, which is the same thing he just did to the man's dog ("Men get arrested. Dogs get put down.")
* Watchmen intentionally portraying him like rabid dog. However, Rorschach's craziness and misogyny seemed downplayed. Likewise, while Ozymandias is colder, he seems to feel more remorse for his more heinous actions.
* Watchmen in the comic, and became the name of a superhero team in the movie. (In the comic, Captain Metropolis's team is called "The Crimebusters".)
* Watchmen. In the course of writing, Moore and Gibbons moved away from their inspirations by careful reinterpretation and altering the characters:
* Watchmen In the film version she doesn't smoke, but still pushes the button just to see what it does.
* Watchmen In the opening credits it is vaguely implied that the Comedian may have killed Kennedy.
* Watchmen, in the present day, that they finally have the firepower to finish the job.
* Watchmen: Investigating the murder of an ex-superhero → uncovering a plot to prevent nuclear war by destroying a city.
* Watchmen invokes this with his floating glass tower during his stay on Mars.
* Watchmen involves the idea that superheroes are this. Pretty much every time we actually see any of the characters busting criminals, they're shown to do that job very well... but as Dan points out in retrospect of his own career, you don't need an individual with years of martial arts training and expensive gadgetry to break up mob rings or catch purse-snatchers when a moderately funded police force can do the same dang thing. In a world where there aren't equally grandiose supervillains, a superhero is just a waste of talent and resources. The only superheroes shown to accomplish anything particularly meaningful are the ones to abandon crimefighting altogether in favor of government or corporate work.
* Watchmen is a montage of how different the world is (particularly America), and how the lineup of the titular Watchmen have changed throughout the years to the

"present day" of the film.
* Watchmen is described as "Fascinatingly Ugly", with years of beatings and poor hygiene and a blank expression adding to his Flawed Average looks.
* Watchmen is extremely well-known for this line, though he utters it only in the hypothetical tense. He does this as he imagines a world so torn apart in chaos that it begs him, at last, to help — and he doesn't want to anymore.
* Watchmen, is incredibly aware of this, having spent the majority of his career after the novel trying to undo its influence on comics.
* Watchmen. It also thematically explores multiple codes of ethics, including deontology and utilitarianism, and the flaws and strengths of each.
* Watchmen (It tears up his hand, and he doesn't quite believe it himself.) There's an interview he has at the end of the second-to-last comic where he firmly believes any normal human can be just as built as he is, you just need the will to see it through.
* Watchmen it was less a true sequel and more an attempt to fold the characters and themes into the mainline DC Universe.
* Watchmen jumped through a window to escape a building he had set on fire. Of course, it ended up pretty badly for him because he landed in a trash can, preventing escape from his pursuers, but still, he didn't seem to have any injuries from actually jumping through the window.
* Watchmen, kill him in a few seconds when it switches on, he breaks down and begs Janey Slater not to leave him. She does, though - she says that she can't stand to watch.
* Watchmen lamenting the passing of "American Love" as he is offered the Swedish, French, etc. versions.
* Watchmen, Laurie Jupiter walks down the stairs to the Owl Cave in her Silk Spectre outfit, in slow motion with music and Nite Owl open-mouthed.
* Watchmen, Laurie throws a bottle of perfume against Jon's Martian palace, which of course shatters as well.
* Watchmen makes it explicit that something similar to the latter is what happened, though whether the Veidts were Jewish is never established for certain.
* Watchmen — a reader accustomed to this trope might expect Hollis Mason, the original Nite Owl, to fight off the street gang that breaks into his place with ease. This, to say the least, is not how it plays out.
* Watchmen) mother. Upon learning that she died, forced to drink cleaning fluid by her pimp, he comments: "Good." Even Good Men Hate Their Mamas, sometimes.
* Watchmen, news items mention the disappearance of prominent scientists and artists. It turns out that this is related, not only to the mask-killer cases, but to something much, much bigger.
* Watchmen Night Owl comments that in the early years, Rorschach "...was quiet, he was grim, but he still had all the buttons on his overcoat". And in fact, in flashbacks to those early years, Rorschach's trench coat has all its buttons — in the "present day" storyline, his coat is missing one.
* Watchmen, Nite Owl II and Silk Spectre II arrive to break Rorschach out of prison just as he breaks himself out, more violently. Silk Spectre complains that he doesn't even seem to appreciate their effort.
* Watchmen, Nite Owl II mentions an incident where a drug dealer got away while he was using the bathroom. He subsequently redesigned his costume to speed up that part of the process.
* Watchmen: Nite Owl II's transport has a removable steering column; he uses it on the roof of the transport when he and Laurie rescue a bunch of people from a burning building and they run out of room on the inside.
* Watchmen: Occasionally flashes back to the titular group's prime during the late 1960s.
* Watchmen of the gathering of Crimebusters, however, Dave Gibbons draws her looking the same as she is in the main story where she's in her 20s. Dr. Manhatten's girlfriend Janey even points out that Laurie was most certainly a minor at the time when she learns Manatten has cheated on her.
* Watchmen one: Moore and Gibbons' use of the 9-panel grid has prompted a lot of

people, including comic book historians, to believe that Steve Ditko (the creator of the original Charlton characters) worked almost exclusively in the 9-panel grid format. This is not to say that Ditko didn't use it frequently, but it was hardly his "go to" layout.
* Watchmen. Other superheroes were deputized by the US government eventually but once they were outlawed, they were retired.
* Watchmen, Ozymandias hints that film serials never went out of style in this world. He uses "Republic serial" as shorthand for "corny and cliched", the way we would use "comic book".
* Watchmen, Ozymandias sees the effect of a disaster by watching multiple news channels simultaneously and getting the message that has been sent.
* Watchmen perceives all moments of his life simultaneously, though his ability to comprehend the full story they form seems to be limited. He also claims that he can't change the events he observes: "I'm just a puppet who can see the strings."
* Watchmen: Phobos and Deimos loom in the skies of Mars, looking like twin moons rather than asteroids.
* Watchmen: Played straight when Jon's transformation into Dr. Manhattan is triggered by his date dropping her wristwatch at a carnival. Or, taken even further back, the dropping of the Atomic Bomb on Hiroshima could be the first domino. The news report on the bomb prompted his father, a watchmaker who had been training his son to follow in his footsteps, to instead push his son into a career in nuclear physics. Which results in Jon meeting said girlfriend at his first job after getting his PhD and in him volunteering to fix her watch when it is broken using the skills his father taught him as a young man.
* Watchmen: Possibly deconstructed; one of the side notes in the comic mentions one of the earlier heroes was a bank-sponsored hero named Dollar Bill, who had to wear a garish costume as one of the conditions of his sponsorship. Perhaps not so ironically, the cape was caught in a revolving door, tripping him up long enough for a crook to shoot him dead as he tried to stop a bank heist.
* Watchmen power is when he disassembles a tank to its components, then makes them implode in a fused lump. Happily, it's on a government test site rather than a battlefield.
* Watchmen. Pretty much every time Rorschach describes a female character, they're either an untouched innocent (Kitty Genovese or Blaire Roche) or a whore beneath contempt (both Silk Spectres, his landlady). It's not hard to imagine his own issues with sex and gender aren't factors as well.
* Watchmen raised the graphic novel to a level of "cultural seriousness" and it became one of the first books that many non-comic readers read in detail.
* Watchmen ramps his emotional broken-ness up several levels. He shows approximately three times the guilt, self-loathing and painful isolation of his comic book counterpart, even saying he "often [feels] stupid at being unable to relate to anybody". He spends his last few minutes of screentime in a Villainous BSOD, staring into space and looking about ready to fall over as the camera zooms out on him.
* Watchmen reveals that the two did have a very, VERY sexual relationship, however brief and ultimately doomed.
* Watchmen: Rorschach and Nite Owl II, in the old days. The bond they forged still lasts.
* Watchmen, Rorschach is convinced that someone is trying to take out all the former vigilantes when the Comedian is found dead. His killer's true motives are different, and he's invoking the trope to draw attention away from him.
* Watchmen: Rorschach is depicted as a Batman-like character who frightens villains rather than killing them, until he crosses the line by slaughtering a child-killer, after which Rorschach routinely kills bad guys justifying it by referring to them as "dogs that need to be put down". The film version of the comic also implies this with regards to Silk Spectre II and Nite Owl who are shown slaughtering a group of attackers without blinking an eye.
* Watchmen, Rorschach makes another person do this as an interrogation method, crushing the glass in his hand to cause tremendous pain.

* Watchmen: Rorschach's backstory reveals that his mother was a prostitute, and as a child he interrupted her while she was busy on the job. Her john left, paying only a token amount, and she descended angrily on her son — slapping him, shaking him, and shouting "I should have had that abortion!" As an adult, when he was informed of his mother's death, he responded with a single word: "Good."
* Watchmen, Rorschach's calling card is a piece of paper with a mirrored lowercase letter R written on it.
* Watchmen, Rorschach's first victim after the passing of the Keene Act was a serial rapist. Rorshach killed him and left his corpse outside a police station to send a message that he categorically refused to give up costumed vigilantism.
* Watchmen. Rorschach's gun is a lot more realistic than Batman's. It's much bigger, and it also doesn't have a motor in it to elevate him.
* Watchmen. Rorschach shows some skills in this area when infiltrating the Rockefeller Military Research Centre.
* Watchmen, Rorschach tends to visit a bar filled with seedy lowlives whenever he needs info on criminals. This for him means beating people up until they give him a lead or at least until he decides they know nothing. Needless to say, the locals are all scared shitless by him.
* Watchmen: Rorschach was sent to Sing Sing before even being tried for his crimes, while in reality he would be held at Riker's Island until trial. He also would likely be kept isolated from other inmates as a notorious vigilante crime fighter, which is not only for his protection but to avoid just such an incident like in the cafeteria.
* Watchmensch series, Rorschach is depicted as a lawyer who is known instead as "Spottyman" and is pretending to be Jewish. While a Jewish lawyer in NYC is nothing remarkable, a Gentile pretending to be Jewish is usually doing so because of this trope.
* Watchmen's Dr. Manhattan. Being the only person with god-like powers in the entire known universe is a plus. But he lost his humanity, not really caring about anything but science. On the other hand, he doesn't care.
* Watchmen's New York, especially when viewed from Rorschach's perspective.
* Watchmen, some of the Viet Cong prisoners who surrender to Dr. Manhattan appear to consider him a god. Given his god-like powers and interest in creating life, this could be a subversion.
* Watchmen's opening sequence, we see a very young Rorschach staring balefully at his prostitute mother's clients. And we see a young Laurie walking in on her mother arguing with her stepfather.
* Watchmen's Rorschach has an identity is so secret, even his colleagues don't know his real name or what he looks like under the mask for a long time.
* Watchmen's "Tales Of The Black Freighter" comic-within-a-comic, where the protagonist believes his hometown is due to be visited by the eponymous ship only to realize (too late) he is batshit crazy and mistook the innocent villagers for undead aberrations after he murders them.
* Watchmen story "Marooned", the main character, adrift on a raft and succumbing to morbid hallucinations, jumps into the ocean in order to drown himself. For a few moments, he wonders why he's still alive, then realizes he's standing ankle deep in water, just a few feet from land.
* Watchmen suffers from this as he's trying to romance Laurie/Silk Spectre. He overcomes this after some back-into-superhero-costume experience.
* Watchmen suffers from this. Not only does he have to escape from the island in a raft made of the bodies of his partners, but he also has to fight several sharks.
* Watchmen takes place in the past, focusing on the Minutemen and Crimebusters.
* Watchmen Tales of the Black Freighter to the main plot— for example, from the newsstand owner talking about how newsvendors are tough survivors, to a shipwreck survivor standing on a beach crying. Or from Nite Owl saying "It'll be like coming home," to the shipwrecked man finally arriving on the mainland. "I could be no more than twenty miles from Davidstown. I was home."
* Watchmen, thanks to the series blurring the lines between ugliness and beauty, and heroism and villainy.

* Watchmen. The Comedian is able to punch through brick, survive getting his head slammed into a granite counter-top and jump from an aircraft that looks to be almost 3 men off the ground and not give a damn. Ozymandias is not only able to catch a bullet, but can jump nearly his entire height (almost six feet) from a sitting position. Rorschach is shown to practically run up a tower in one instance. Note, however, that this is different from the comics the film is based on, where the non-powered heroes are exceptional, but not impossible, humans... except for Ozymandias.
* Watchmen: The Comedian is killed off in the first minutes of the movie, And is mainly presented in flashbacks.
* Watchmen) the Comedian's presence hangs over the entire movie, even when he's not onscreen.
* Watchmen. The final two issues of the comics all deal with how he arrived at this decision intellectually and justifying it by means of the same.
* Watchmen, the flamethrower on Nite Owl II's air ship goes off at just the right moments...
* Watchmen, the Mothman's alcoholism gets so bad that he is eventually committed to a sanitarium. This would not have been unusual for the time period, though.
* Watchmen. The Nite Owl's nest is through an ordinary locked door in his kitchen and down a short flight of stairs.
* Watchmen. The only thing that slows him down is the same thing that gave him his powers, and since he already overcame that problem to begin with, it's more of a minor hindrance than anything else.
* Watchmen, the police are unable to tell whether Rorschach's journal is written in some elaborate code or it's just that his handwriting is totally illegible. That said, the newspaper he mails the backup copy of his journal to doesn't have any trouble reading it, so maybe the problem only occurs when he's writing quickly because he's on the job instead of taking his time.
* Watchmen, the scene in Rorschach's backstory in which the kidnapper comes home plays out something like this.
* Watchmen the Silk Spectre is a title held first by Sally Jupiter and then by her daughter Laurie.
* Watchmen, the Silk Spectre is a title held first by Sally Jupiter and then by her daughter Laurie.
* Watchmen: The United States won the Vietnam War thanks to Dr. Manhattan, the 22nd amendment was repealed and Richard Nixon is serving his fifth term, electric cars and airships are commonplace, and non-government sanctioned vigilantism was outlawed in 1977.
* Watchmen, the USA has enjoyed decades of strategic superiority, which has made the Communist bloc incredibly paranoid.
* Watchmen, this happens to a distressed and flustered Doctor Manhattan. After a minute or two of the treatment, he cracks under pressure and teleports them all into the parking lot. This emotional outburst kickstarts the tide of public opinion turning against him.
* Watchmen, though he successfully hides it in public. This technically applies to the comic version as well, given a vague reference to "the year [his] parents arrived in America", though in that one he has no stated accent and never presents as anything but wholesomely all-American.
* Watchmen, though that's because he has impossibly high moral standards. His heroic actions include leaving a child murderer to die, and killing a serial rapist then leaving his body at the police station when the police themselves cannot catch him.
* Watchmen thugs who intend to mug them. Are there really that many muggers just standing around hoping for a mark to pass through the area?
* Watchmen to become the highest grossing R-rated film ever. A damn impressive feat in of itself, further impressive when it racked up eleven Oscar nominations, the most of any comic book film ever.
* Watchmen. To be fair, the scientist responsible for this monumental stupidity realized just how much of an idiot he had been even as he was explaining it to the

soon-to-be-deceased John Osterman.
* Watchmen to be one. Since he spends his nights beating up criminals twice his size, he at the very least must be quite fit. Emphasized in the film, where Rorschach is very muscular but somewhat lacking in the face department. It might explain why he considers his mask his true face.
* Watchmen too (Ozymandias anyone?); either Alan Moore is a conspiracy theorist himself or he... KNOWS SOMETHING!
* Watchmen to stop it, which he says is proof that Dr. Manhattan's losing sight of his humanity.
* Watchmen tried making a powered exoskeleton version of his costume. It didn't get past the prototype stage; the first (and only) time he wore it, it broke his arm.
* Watchmen turns on his giant wall of televisions just as President Nixon begins his statement on the events he just described to the protagonists.
* Watchmen universe, after the "costumed hero" phase hit its peak, most costumed villains started either reforming entirely or switching to "less showy" pursuits like drug dealing and prostitution rackets.
* Watchmen universe is better equipped to answer questions of a supernatural nature than Dr. Manhattan. He generally stays relatively quiet and respectful on the matter. When asked if he was god, he simply replied:
* Watchmen, using their bodies to spell out an appeal to be rescued on the surface of Europa that can be seen by a passing satellite.
* Watchmen: Veidt Enterprises, run by Adrian Veidt. Makes everything from hairspray to music television to tachyon particle emitters.
* Watchmen version of this imagery with his theme, but doesn't quite pull it off.
* Watchmen was Moore's take on what the best-selling comic in a world without superhero comics would look like.
* Watchmen we see a bomber with nose art of the original Silk Spectre (Sally Jupiter).
* Watchmen when he can analyze everything, even the future he will take, and finds everything to be meaningless on a grand scale.
* Watchmen), when it contains the truth that Ozymandias orchestrated the current Roman peace.
* Watchmen, when Janey Slater breaks up with Dr. Manhattan, she throws the pair of earrings he gave her at him.
* Watchmen, when Rorschach confronts his ex-landlady about her having lied about him. Although none of them directly jump in his way, the presence of her children makes him back down.
* Watchmen. When the police arrest him, they find he wears platform shoes to make himself taller.
* Watchmen when the red-head prophet-of-doom walks casually across the puddle of the Comedian's blood, trailing bloody footprints.
* Watchmen, where Hollis Mason recounts that Dollar Bill's cape got him killed: It was caught in a revolving door when he tried to prevent a bank robbery, making him an easy target for the gun-toting robbers. What makes it even more tragic is that the costume was designed by people sponsoring him for public appeal. Mason speculated that if he designed it himself he may have realized how bad an idea it was.
* Watchmen where the Comedian gets himself a Vietnamese girlfriend during the war but eventually dumps her, despite her being pregnant with his child, and shoots her dead when she scars him with broken glass.
* Watchmen where the existence of costumed heroes and superheroes have a dramatic impact on the 20th century. One of the "Golden Age" heroes, Hollis Mason, a.k.a. Nite Owl, publicly retires and says he's going to run a car repair shop because it's simpler and car engines aren't going to radically change anytime soon. Dr. Manhattan, whose powers include matter manipulation, casually states that he is working on improving battery quality and synthesizing massive quantities of lithium and in the next few years (remember it's the '60s) electric cars make their way on the market. The idea of electric car proliferation was seen as every bit as fantastical as genetic engineering and Dr. Manhattan himself.

* Watchmen Whether or not it works in the long run is left up to the reader.
* Watchmen - which just might be the only comic-book series to be given this treatment for its entire range in four volumes - and many more. These releases are often housed in a hardcover case and include original scripts, alternate cover treatments, introductions and commentary by the creators of the various series and much more. They're also printed at a larger size than normal, giving the artwork more room to be appreciated. Of course, they come at a premium (most sets cost between $150 and $175).
* Watchmen which swelled the fanbase. That was until some realized what type of story Alan Moore was telling. Theater attendance even took a hit when some people found out the thing that looks like a cool superhero story was mostly deconstructing the medium.
* Watchmen who isn't fighting back anymore. Subverted after The Comedian almost rapes Sally Jupiter. Hooded Justice is beating The Comedian down, while The Comedian taunts him with allegations of sadomasochistic homosexuality. Hooded Justice stops when he says The Comedian "isn't worth it".
* Watchmen, with his real name Walter Kovacs. This works fantastically in comic form because they are not played by recognizable actors, but as such in the movie anyone in the audience who knows Haley would question why he is walking around with a sign.
* Watchmen world after that, suggesting the incident hurt the bank so much for other companies to avoid the concept.
* Watchmen. "Yes. Good night. Remember it often." He has flashes of eloquence, too, which are unnervingly at odds with this style of delivery.

* Watch on the Rhine, anti-Nazi Kurt Muller had to flee Germany with his family in 1933.
* Watch on the Rhine in Nazi-occupied Europe, has made it safely to America with his family. But when a leader of the anti-Nazi underground is reported to have been arrested, the hero feels duty-bound to go back and rescue him.
* Watch on the Rhine, the Germans break out the Nazis, albeit under protest.
* Watch on the Rhine: This is completely averted, as the hero and main character Kurt Muller is a staunch anti-Nazi who had to flee Germany with his American wife when the Nazis came to power. He now works with a German resistance group against them. The villain in fact is Romanian, not German, working on the Nazis' behalf.

* Watch Ross: Ross frequently laments the four years (and £15,000!) he spent at drama school. He however draws a distinction because he assumed drama school was necessary for an acting career — only to find it focused mainly on classical theatre, when he wanted to work in television. His course gave him only two weeks of screen acting training, and he often stresses that actors don't always have to go to drama school to make it in the industry.

* WATER Attribute and Spring is typically a rainy season. In addition, the flower it is based off, the Cherry Blossom, blooms in Spring– around April, when Cherry Blossom Festivals are typically held.
* Water Baby revolves around this. Brody was a surfer, one day she was riding the waves and a shark confused her with something edible. It bit off her leg up to the knee and went his merry way... while Brody was left bleeding her life out, she got better but now she has nightmares of sharks, and now so do you.
* Water-based fire extinguishers are the absolute last thing you want to used on electrical fires, grease fires, or a potassium fire (or any other combustible metal)
* waterbend absolutely require self-control, lacking of it will cause this trope.
* Waterbenders also have an advantage at their homes at the polar ice caps and the swamp where there is an abundance of ice, snow, and water to draw from. The Fire Nation formed prisons where there was limited access to water and the air was kept dry to help combat this. Waterbenders are also more powerful at night, due to the influence the moon has on the tides — and even moreso during the full moon. Zhao tried to combat this by killing the Moon Spirit's physical incarnation, essentially killing the moon.
* Waterbenders frequently use a form of this that involves surrounding themselves in water that they extend into tendrils (fittingly called the "Octopus Form"). And at one point, a waterbender actually uses vines as combat tentacles, by bending the water in them.

* Watering Down: Despite its alcohol-related name, this covers cutting drugs as well.
* Water Is Air: Life underwater is pretty much like regular life. Even physics agrees.
* Water is an adaptable element, but this element's fluidity requires an almost exclusive reliance on the arms for bending. If the bender's arms are disabled, it's almost impossible to waterbend. Benders of sufficient skill/training could

theoretically bend with their legs but this would be easily negated by simply binding them sufficiently.
* Water Is BlueIn drawn media, water is always depicted as a clean blue rather than clear. This way, it's much easier for the audience to see it.
* Water is touted by the health sciences community as being the best thing for a hangover, the argument being that the splitting headache is a result of massive dehydration. Some take aspirin along with their water. However, dehydration is only one of the reasons to hangover headache, the other being toxic action of acetaldehyde, the alcohol metabolite. So rehydration only lowers the headache, but does not remove it completely. This is why you include the pain reliever. Consult a doctor—or at least someone vaguely familiar with basic medicine—to choose which one.

* Waterloo (1970), we see only the flashiest-dressed troops, including Polish Lancers of the Guard, carabiners and Prussian cavalrymen, even though their historical presence in the campaign was smaller or non-existent at the actual battle.
* Waterloo a disproportionate amount of screen time is devoted to the Polish Lancers of the Imperial Guard, who in actual fact were just one squadron strong in 1815 and thus much too small a unit to make a significant contribution. In the film it is they who throw back the charge of the Union Brigade (Royal Dragoons, Royal Scots Greys and Inniskillin Dragoons), in actual fact it was two regiments of French line lancers, who wore a very different uniform (green jackets, brass helmets). Also not untypically the only British cavalry regiment shown in that charge is the Scots Greys, who were the only dragoons one to wear bearskin caps instead of helmets.
* Waterloo as in real life, Wellington faked a retreat behind a hill. Behind the hill, his army simply changed formation and waited for the ill-fated French charge.
* Waterloo Bridge keeps a stoic facade in her dire situation as a prostitute. But she completely loses this facade when Roy proposes marriage and invites her to meet his family. * Water Margin referred to themselves as "brothers", even though there were a few female members among them.
* Water Margin. This may be justified given the ethnic makeup among the peoples of Central Asian regions bordering China during the Middle Ages, and mentions of giant men with red hair and light eyes on their far western borders, sometimes believed

to have been, yes, Vikings (not entirely implausible, since the Viking trade routes down to the Black Sea went quite deep into modern Russia, and once the Kievan Rus' (founded by Vikings) was established in the 9th century, it started developing eastwards too.
* Watermarks returned for Khans of Tarkir block, with the symbols being those of the five clans, although more than a few cards were independent of the clans and didn't have one. This became a plot point in Fate Reforged, with the dragon broods receiving their own tweaks on the clan symbols, and those symbols being used exclusively in Dragons of Tarkir.
* Watermelon A Cautionary Tale: Jimmy learns the hardway: eat watermelon seeds, become a watermelon.
* Watermelon A Cautionary Tale: The short follows the tale of Jimmy, a boy who against the advice of his mom, eats watermelon seeds and turns into a watermelon. It ends with Jimmy cracking into pieces after fully transforming in mid-air and the playground kids eating the watermelon-Jimmy pieces, seeds and all, with cartoon vines appearing over their heads as the screen turns to black, heavily implying that they too will turn into watermelons.

* Waterparks' "VIOLET!" is about a very persistent stalker of Awsten Knight's. The song directly addresses them, shifting between Awsten's stress about the stalker knowing where he lives and digs at them for believing that he's leading them on.
* Water pressure cutters, going as high as 50,000PSI to cut through thin sheets of things like titanium with pure dihydrogen monoxide. For thicknesses up to eight inches, an abrasive component is added, but it's still mostly water.
* Waterproofing my life with FLEX TAPE during the last infomercial shown; the salesman has decided to demonstrate how good the product is at plugging holes by assaulting a bucket with a knife and a chainsaw, and the whole time a "Don't try this!" warning is onscreen (escalated to "Seriously don't try this!" when the chainsaw comes out):
* Waterproofing My Life with FLEX TAPE", jokingly taking credit for coming up with the idea and demanding royalties.
* Water Rats the Sydney Water Police often look for runaway kids in abandoned warehouses and other buildings.
* Water Rob Waring encounters the Cascaran Liberation Front, which consists of Delgado Fitzhugh (who only communicates through song) and Garfield Cooper.
* Watersafe Auckland advert shows three women in bikinis getting ready to sunbathe on the beach. In the background, however, is a child in a dinghy, who is occasionally blocked by the women, and when one of the women lies down to sunbathe, the dinghy is suddenly empty.
* "Water saws", which use extremely hot and extremely high-pressure water. It cuts steel in half extremely quickly without resistance, and applying it to a human wouldn't be pretty.
* Water (set in 1940s India and deeply critical of many Indian traditions) was so controversial in that country that riots broke out and sets were destroyed; Mehta was eventually forced to shoot the film in Sri Lanka. The film was selected as Canada's entry for Best Foreign Language Film in 2005.
* Water Seven looks very much like Venice, particularly its trademark channels

crisscrossing the island and the fact that it's slowly sinking.
* Water's Fine, but there are some concessions that make dives a bit easier.
* Watershed" features a subversion. Neighbors of the victim frequently heard sounds of sex coming from her room, which is part of the reason they thought she was a prostitute. She was really playing a CD of those sounds specifically to produce that conclusion while she worked on computer hacking.
* Watershed - Time in the evening when it's okay to run content which is targeted more towards adult audiences
* Waters himself could also have been said to have subverted this trope, who Following the dissolution of
* Watership Down (1999) at the end of season 2, it uses original storylines for its third season.
* Watership Down (1999): Vervain often accuses Campion of lying (with good reason), particularly in the third season.
* Watership Down added Kehaar saying "PISS OFF!" and "Damn", just to absolutely make sure that an animated film based off a novel by a part-time animal rights activist featuring adorable animals engaging in gory violence wasn't shown to small children. It didn't work in the UK, where it got a U rating, while the US passed it off with a much less lenient PG rating.
* Watership Down, a group of rabbits with no experience of trains hear about an 'iron road'. Later, fleeing from enemy rabbits by night, they run across the tracks and watch in terror as a train cuts down their pursuers, which they take for an act of divine intervention.
* Watership Down and even the simplest human technology is beyond their comprehension. We're told that even many of the rabbits who participate in the escape and see exactly how it was done still can't quite wrap their heads around what has happened, let alone explain it to anyone else later.
* Watership Down, a political animal fable that focuses on communism, and specifically, Stalinism.
* Watership Down. Apparently even The Thousand Enemies preferred to stay away from them.
* Watership Down are given full mating privileges, suggesting that Woundwort wants only his strongest bucks to father the kittens in his warren. Subverted by Nature itself, as many of the badly-overcrowded does fail to sustain the pregnancies that result.
* Watership Down: As Hazel dies of old age, El-ahrairah comes to make him one of his Owsla.
* Watership Down, at least in Britain); and the 2018 Netflix miniseries is at Stage 1.
* Watership Down, began eating everything, Frith transformed many of the other species into rabbit-eating predators. Then, to ensure that rabbitkind wouldn't be wiped out entirely, the sun-god blessed El-hrairah's bottom with quick feet and a cotton tail to warn for danger.
* Watership Down Bigwig has so many scars it's joked the Efrafans wouldn't know which mark to put him into, as he's got them all.
* Watership Down bizarreness of him trying to live with rabbits are frequently played for comedy.
* Watership Down cross through one, mostly for the sake of atmosphere.
* Watership Down' daughters begged him to spare him, he changed his mind.
* Watership Down dream sequences, only to transition back to sharp-focus close-ups in key scenes.
* Watership Down, due to rabbits' short lifespan. The main events of the novel are the stuff of legend some five years later, and humans are portrayed as driving cars and smoking cigarettes in the mythic past.
* Watership Down, El-ahrairah returns from his adventure to find that full generations of rabbits have come and gone since he left and no one is left in his warren who remembers him or appreciates what his generation has done. There's a clear soldier-returning-from-the-war symbolism here as well.
* Watership Down fans and writers. It has a small but dedicated fandom due to its

strong lore and rabbit-focused premise.
* Watership Down, General Woundwort is offered an alternative to bloodshed by Hazel, and a chance to prove himself a "visionary" leader. He considers it for a moment, but then rejects it offhand in favour of his carefully planned destruction of the enemy warren.
* Watership Down genres. The former helped solidify aspects of the genre and popularize the genre. The latter helped popularize more "mainstream" and less fantasy-heavy variations on the genre.
* Watership Down has a final chapter set years after the climax, when Hazel passes away peacefully.
* Watership Down has a hole in the roof after the climactic battle with the Efrafan rabbits (who dug through it to get at them). The Watership rabbits can do nothing except wait for it to close on its own.
* Watership Down has a map, and is fantasy, but it takes place in England and the map is of a real area.
* Watership Down has two French dubs, both made in Paris: one made in 1978 and one made in the 2000s.
* Watership Down have their pantheon: Frith the creator and sun god, the Black Rabit of Inle as the god of death, and El-ahrairah, the heroic "prince of rabbits."
* Watership Down Hazel is the Captain Smooth, and Bigwig is the Sergeant Rough. Inverted with their Efrafran counterparts: General Woundwart is a brute who rules by force and Captain Campion is a calm-headed strategist.
* Watership Down. He may not understand the physics involved, but he'll devise plans that rely on buoyancy, tensile strength or leverage just the same.
* Watership Down, his comrades presumably having died of old age as well.
* Watership Down, however, he follows Woundwort out of honor and attacking Hazel's warren is nothing personal to him. After Woundwort is killed/disappears he no longer serves an evil purpose. He becomes the new leader of Efrafa, giving its population more freedom and making an agreement/alliance with Hazel to let each other's rabbits move out and make a new warren when their warrens become too populated
* Watership Down. However they're all jumbled together in a confusing hodgepodge, plus he's also describing things that he's never seen before, such as a "tunnel of water" (e.g. a culvert).
* Watership Down into one of these in practically the same manner that Adams had intended for Bigwig, so it fulfills this trope.
* Watership Down, in which the venerable Chief Rabbit can't recall if the adventures attributed to him in his youth were real or not. On the one hand, said adventures couldn't have happened so long ago by human standards; on the other, Hazel is implied to have vastly outlived what's normal for wild rabbits, suggesting that his lapine brain's memory capacity has indeed reached its limit.
* Watership Down, is a variant of the Lacerated Lacey; she's overconfident and gives one too many obvious hints about the upcoming escape plan to the Efrafan officers. Realizing that something is amiss the officers imprison her and torture her into spilling the beans completely.
* Watership Down is last seen furiously attacking a vicious dog which has driven off most of his military. One of his followers later says that since they never found his body, it meant he wasn't dead, just gone to find a more worthy warren. Eventually, he becomes a legendary figure in rabbit culture.
* Watership Down is noted as being translated from the way rabbits would actually communicate for the benefit of the reader.
* Watership Down is prone to fits of panic after his visions, particularly towards the end.
* Watership Down. It makes sense, as he's supposed to represent the rabbits' gift for outrunning and outmaneuvering their enemies.
* Watership Down manage to pull this off, though the author quickly comments that it worked mainly by chance and circumstance. Not quite a straight example, however, as they knew the boat was there and planned their whole escape around using it. The book also addresses the problems they have leaving the boat once the pursuit is

over, as the river is too fast and too deep for them to swim to shore: The boat gets stuck at a bridge and the river has a calm pool just past the bridge.
* Watership Down — until he gets the love of a pretty doe (female hare). Actually, Thunderfoot is the most awesome lad the readers may have seen. Ever. But his attempts to woo lady hares are constantly thwarted by their fearful cries of "MONSTER! Monster!"
* Watership Down. Or even Odysseus: they are even linked in the book, where the human is accused of stealing tricks from the rabbit.
* Watership Down, poor Blackavar is made to stand on display as an example to the other rabbits after he gets his ears shredded for trying to flee the totalitarian Efraffa.
* Watership Down rabbit Fiver has a vision of their warren being destroyed. He, his brother and few others escape on this revelation and learn later that the vision was completely correct.
* Watership Down replaced frightened peasants with rabbits. Popularly thought to be a fable about the dangers a democracy faces from appeasement and fascism. The rabbit heroes escape a monarchy, discover a seemingly idyllic warren with a horrific secret coming from placating humans, arrive at their new home and create a democracy that must lock horns with another warren that is a fascist tyranny.
* Watership Down series, all the rabbits have pads on the bottoms of their paws.
* Watership Down, serves as a comic relief not only to the readers, but also is an in-story tension breaker. Keehar the seagull serves the purpose in the film adaptation.
* Watership Down shows blood creeping across a meadow with a bright sun overhead.
* Watership Down, somewhat unusually, the protagonists' quest is simply to find a new home where they can live in peace.
* Watership Down story "The Story of the Comical Field," El-Ahrairah goes into a maze that turns out to be home to an undescribed horror.
* Watership Down, the Black Rabbit of Inle, who is both a) a rabbit and b) inexorable, inevitable and invincible.
* Watership Down: The DVD cover has General Woundwort looking down at the refugee rabbits and Kehaar.
* Watership Down. The escapees interpret the train as a messenger sent from the rabbit sun-god, Frith, but the Efrafans have a better understanding as their warren is near the railroad.
* Watership Down, the invaders from Efrafa are shocked to learn during their standoff with Bigwig that he is not his warren's Chief Rabbit—they had taken it for granted that he was due to his size and strength. Readers, of course, already know that the Chief Rabbit is Hazel, who is a good leader despite his small size because of his determination and faith in his fellow rabbits.
* Watership Down, the rabbit depiction of humans almost always mentions the white sticks that they burn in their mouths. Humans are smoking even in the El-ahrairah myths set in the blurry distant past!
* Watership Down. The rabbits are trapped on a punt floating down a fast-flowing river. They near a bridge that doesn't have the usual archway, and Hazel has to quickly tell everyone to move to the water-logged bottom of the punt. One of the rabbits is knocked flying with only minor injuries, but another is struck across the back and dies later on.
* Watership Down: The rabbits worship Frith, who appears to be the closest thing they have to God. In addition, they also have El-ahrairah, an odd mix of Jesus Christ and Noah.
* Watership Down (the rabbit word for enemies, including humans) hunt and kill each other.
* Watership Down, there's a memorable scene where the Threarah accidentally refers to Hazel as "Walnut".
* Watership Down, there's one rabbit warren that lives in uneasy peace with the human whose land they live on. Rather than chasing the rabbits away, the human leaves food out to make sure the rabbits are well-fed—and he occasionally sets a single trap out, then cooks the rabbit that gets caught. The rabbits, at

some point in the past, decided this was an acceptable trade-off. So they live there, and they never talk about the traps.
* Watership Down to be elil. Likewise, a human would probably think that a train would be "hrududu" in rabbit speech; but when the rabbits encounter one they believe it's a divine being, because they don't have the knowledge base to grasp that it's essentially just a much larger vehicle driven by a much larger motor. However the Efrafan rabbits seem to be able to view things from a more human-like perspective as they explicitly refer to a rabbit's death being caused by a train.
* Watership Down to defeat a larger rabbit by being overly polite and calm for the situation, freaking the other guy out.
* Watership Down to this: cats normally focus on smaller prey such as mice, while rabbits are often the targets of hunters who use dogs. Thus, from a rabbit's perspective, dogs would indeed seem more threatening.
* Watership Down was first made up by Richard Adams as a story to tell his two daughters while he was driving them in his car. It was the daughters who persuaded him to later write the story down.
* Watership Down: we last see Woundwort clash with a dog. Later no trace of his body is found, there is just blood at the site of the battle — perhaps he was eaten (being a rabbit).
* Watership Down. When Captain Holly turns up unexpectedly from their old warren, raving mad and on the point of death, Bigwig abruptly cuts off any attempt by the other rabbits to question him, because he needs rest.
* Watership Down, which were expanded in a series of short stories set in the same rabbit society.
* Watership Down: While Bluebell annoys many of the rabbits with his jokes, Holly notes that if it wasn't for his joking, both of them would have given up and died long before reaching Watership Down.
* water. Since DNA is only found in living organisms, it's impossible to genetically modify salt, water or baking soda because they don't have any genes to modify in the first place.
* Water Sleeps is that the Company is her family now, and it's either stay with them or go back to the blood relatives who abused her.
* Watersong, after being transformed into a siren, Gemma begins to hunger for human flesh. She manages to resist it for a time but loses control when a man tries to rape her and ends up tearing out and eating his heart.
* Watersong, Alex is surprised that the car is able to start at all, let alone keep up with the supernaturally fast sirens.
* Watersong, Gemma and Harper have a psychic bond that lets them sense when the other is danger.
* Watersong, Gemma throws up when she learns that the "liquor" the sirens gave her was actually a mixture of human and siren blood.
* Watersong in the second game features a level that has living statue enemies, which rush toward the player once the player passes them.
* Watersong, Marcy convinces Harper and Alex to try holding a séance to ask the ghosts of the sirens' victims to tell them Gemma's location. She defies a lot of the normal tropes by holding it outside and during daytime, calling the others ignorant when they ask if it shouldn't be done around a table at night. The séance does manage to call some spirits which light a candle with blue flame and move some rocks, but they are unhelpful in determining Gemma's location.
* Watersong, Penn develops an obsessive love/lust for Daniel because he is immune to her siren song, making him the first person in millennia to actually stand up to her. She admits she wouldn't be nearly so interested if he fell under her spell and just mindlessly worshiped her like everyone else.
* Watersong, Penn kills Lexi in the same manner. Since sirens don't die until they both have their heart torn out and are decapitated, Penn lets Lexi take a good, long look at her heart before finishing her.
* Watersong, Thea, having lived for thousands of years as a siren, has this opinion of humans.
* Watersong, there must always be four sirens, and they must always remain close to

one another. If one of the sirens spends more than a few weeks away from the others, or if a siren dies without being replaced by the next full moon, all will perish.
* Watersong, the sirens do not age, remaining eternally young and beautiful.
* Watersong, when a curse which grants immortality is lifted, the formerly cursed individuals instantly advance to their natural age. This usually means instant death if they're over a hundred years old, so the thousand-year-old sirens aren't very eager to get their curse lifted.
* Water Source Tampering: They don't want you to know what you're really drinking.

Unfortunately, when he meets his original benefactors - aliens who see it as their holy mission to banish mortality from the universe - they inform him casually that they have since bestowed immortality on aforementioned ephemeral beings. He then triggers his vault to open.
* Water Transport, historian James Hornell mentions an old Hindu tradition which involves imbuing a protective god or goddess into a ship, taking the personification a step further. This coincides with an "opening of the eye" ceremony, in which pupils are carved into the outline of an eye to "awaken" the ship.
* Water-type Pokémon themselves avoid this trope. They're slightly the most common type, and there are plenty of fan favorites among them such as Squirtle and Gyarados. It helps that they all are fully utilizable on land. Fish and other legless Pokemon just

* Water was the best way to kill off the tiny robotic pests known as Scraplets. Cybertronian myth about the parasites described water as a "rare compound" which was able to remove the Scraplets without harming the afflicted (as opposed to the only other effective way, powerful acid). This is a case of research failure; water is fairly common in the universe, and a race capable of burning hydrocarbons for fuel would

* Waterworld does this. The bodies of the dead are dumped into nutrient vats, yellowish brine pools, as part of their burial ceremonies. They attempt to dunk the nameless Mariner in it when they discover he is a mut-o.
* Waterworld during the expedition in the diving bell—a submarine is seen having crashed into the side of a skyscraper in the flooded city.
* Waterworld generated interest from its floating sets, which caused it to become a highly troubled production and inflated its budget to the largest of any film at the time.
* Waterworld had underwater ruins... which turn out to be the city of Denver.
* Water World has him find the death of the old oil technician who lives a miserable, tortured life on the Smokers' ship pretty funny.
* Waterworld has no nationality. Many characters in this film have only their boat as their "nation," since all nations as we know them have been submerged after the polar ice caps melted. The closest thing to nations in this universe are the Atoll, while it lasts, and Deacon's oar-powered supertanker.
* Waterworld have already accepted and adapted to the world. He also claims that the higher altitude would actually be a health benefit.
* Waterworld: Helen tries to convince the Mariner to let her and Enola stay on his boat after his deal with them has technically ended and he doesn't have any real use for them anymore. When she runs out of options, she suggests letting him have his way with her after ordering Enola to go below deck. He considers it, but refuses.
* Water World is set in a future where global warming has turned our earth into an ocean planet, with dry land as nothing but a legend (and science be damned!).
* Waterworld moved into profit on the back of television, DVD and streaming revenue.
* Waterworld ("My boat") perhaps has a justification, as his character shuns and is shunned by society, and he rarely interacts with people out on the open ocean.
* Waterworld, potted plants and the soil to grow them in are considered valuable trade goods, as are non-sea-derived materials such as paper.
* Waterworld, since all known land has been covered by water most people live in "atolls" made from scrap metal. As well as traders who live on boats and the "smokers" who are based on the Exxon Valdez.

* Waterworld the ice caps to melt (a process which would take centuries at the present rate), the sea level would rise over 220 feet - catastrophic, sure, but there would still be plenty of solid land left.
* Waterworld the Mariner can just swim down to a former city and come back up with perfectly working artifacts. The "smokers" have completely operational jet skis and sea planes, and even large stashes of cigarettes, which have a shelf life of a few weeks.
* Waterworld, the Smokers speak of "lunars" of time. It's probably safe to assume they refer to lunar cycles. If the film takes place in waters where there is no visible seasonal cycle (and thus no way to determine the length of the year), a lunar calendar is likely the best one can develop.

* Watkins' argument that "in ancient times when Britain was very densely forested, people built roads in geographically convenient straight lines" falls down on several inconvenient truths in civil engineering. Not even the Romans could manage to build long straight roads for very long distances. You can clear a path through forests with enough effort, but you still need to cross ranges of hills and mountains. An absolutely straight road over hills or mountains would be so steep as to be unclimbable. You need to (i) aim at natural gaps or low passes between hills; or (ii) compromise by having your road follow the shallowest possible contour up and around rising ground. You also need to aim your road at the best and most practical places to cross rivers. And these are rarely located on a convenient straight line between the places you want to connect. A moment's reflection will tell you curves, bends and deviations, however slight, are inevitable in the best-surveyed roadway. And in countries where

* Wave-Motion Gun, it turned out to be hilariously useless without any escort ships in the Gothic Wars; luckily for Chaos they were able to build another one.
* Wave-Motion Gun of terran battlecruisers single-handedly during the Great War.
* Wave-Motion Gun of their heavy guns for hangar space carrying strike craft, effectively turning them into battlestars or carriers respectively.
* Wave-Motion Gun, replacing it with a weapon that's less powerful but easier to use could still be considered an improvement. It also replaced the original's integrated shield beam rifle with a separate machine gun (the Divider cannons are built into the shield), making that easier to use too.
* Wave-Motion Gun requires that the ship's engines be taken offline, leaving her a sitting target immediately before and after each shot.
* Wave Motion Guns), but they were intended to work together to destroy stars. Well, star god-infested stars at least (the C'tan are vulnerable when it comes to the Warp).
* Wave-Motion Gun since it's just 2 shots. A better example is when we finally see what the Titans Tower security system looks like when it detects an intruder. Essentially, the ceilings are LOADED with laser turrets that all lock onto hostile targets.
* Wave-Motion Gun: Superweapons of the 'overwhelming power' variety often take this form if laser-based.
* Wave-Motion Gun that destroys enemies without hurting allies. However, if the caster were in enemy territory surrounded by enemy units, then it would probably rival Etherion in its capability for taking huge numbers of lives in an instant.
* Wave-Motion Gun; the latter fits the definition of the trope more). It's even commonly said that the designers were inspired by the Kamehameha when they came up with the Hadoken.
* Wave-Motion Gun, the Thor's Hammer, which has been stated to have a maximum range that has been extensively studied from previous battles and losses by the Free Planets Alliance to the point that entire strategies are designed around and beyond its firing arc.
* Wave-Motion Gun to amplify its power, and later actually combining with the Valhawk to form the giant ship-robot Valguard.
* Wave-Motion Gun to destroy the cities. They later launch assault with fighter craft to attack the human military attempting to fight back.
* Wave-Motion Gun was unique to the Yamato itself, though their enemies had rough equivalents to it in the first series (like the Dessler Gun). From the second

* Wax and Wayne, Cadmium Mistings, known as Sliders, can create a bubble of slow time about the size of a small room. It is centered wherever they were when they create it, and pops if the Slider leaves it.
* Wax and Wayne displays one of these while between forms, described as having "a

* Wax and Wayne has Marasi — a female rookie cop — questioning a little boy on the street about a suspect...
* Wax and Wayne. He ended up worshiped/regarded as a god due to several complicated reasons, and never managed to disavow his followers.
* Wax and Wayne. He started out as a bounty hunter in the Roughs, but eventually took over for the old sheriff, since he was one of the few dedicated enough to take the job.
* Wax and Wayne is using him to fight his enemies. The rival god has only been referred to as "Trell", although the exact nature of this conflict isn't totally clear as of the third book.
* Wax and Wayne. Marasi grew up on tales of the legendary lawman Waxillium the Dawnshot (Wax is about twenty years older than her), and while she does get to know him better as a person, her crush on him was motivated by stories of him rather than the real him.
* Wax and Wayne not examples. Note that the younger kandra are also older than the world (if only by a century or two), but they don't act with the same age because they were mostly confined to their Homeland before the world was changed.

* Wax and Wayne, the party that Wax and Steris go to at the beginning is incredibly crowded because the host invited nearly everyone just to make those he didn't invite that much more snubbed.
* Wax and Wayne through the city and arrive at a gala late by way of an upper balcony was already predicted in her schedule for the evening.
* Wax and Wayne, took over as the new leaders, and are currently hailed as saints. Mr. Suit thinks the Set are the only people willing to admit that the crew was made of criminals who were only in it for money and power, and openly gloats about how the Set will be worshiped in the future. The truth is more complicated; while half of the crew joined for money or revenge, they were chosen because they could be trusted to unselfishly run the ashes of the empire, and all of them fought the siege on their city to protect the civilians rather than their investment.
* Wax and Wayne, Wax ends up with Spook's personal journal, which details Spook's careful study of Hemalurgy following Harmony's restructuring of the world.
* Wax and Wayne: Wax was one of these when he went out to the Roughs. He called himself a "lawman for hire," and in his early years he was known for grabbing the most dangerous bounties off the board and coming back a few days later with the target tied up on his saddle. The truth is that in those early years, he was short on money, so he just grabbed the biggest bounties he could find. Either way, he did such a good job that when the sheriff of Weathering eventually retired, he gave Wax his badge.
* Wax and Wayne who works with them, and while his superiors honor them, they're annoyed that Wax essentially has divine intervention on call shielding him from legal consequences.
* Wax and Wayne with a keen interest in his exploits, which seems to set up Wax falling for Marasi. Upon rescuing Steris, Wax realizes that while Marasi is a good friend, he doesn't love her, and goes ahead with his engagement to Steris. Wax and Steris eventually fall in love and get married.
* Wax at first, arranging a loveless marriage of convenience, but she actually ends up being fine with him continuing his crime fighting. As she see it, a gentleman must have his hobbies, and when the first case he gets on after they meet involves him saving her, she's really not in any position to complain. Neither of them can realistically expect the other to change at that point in their lives, so as long as he keeps his word, they'll have a cordial working relationship.

* Waxworks (1992)). The goal of the game is to travel back in time via the wax exhibits, deal with the evil twins in those timelines while surviving all the ordeals and hopefully stop the witch from enacting the curse.
* Waxworks (1992) who happens to be your twin brother in this decade. You have to transverse the streets dodging an angry mob wielding torches and pitchforks. If they catch you, its instant death and game over.
* Waxworks, Ivan the Terrible likes to poison his victims and use an hourglass to count down the last moments of their lives. Shortly before he's executed, the poison-mixer writes Ivan's name on an hourglass. When this hourglass is found, it creates the impression that Ivan has been poisoned. Ivan tries to thwart it by flipping the hourglass over because that's how that works. But since he wasn't actually poisoned, this does seem to work, and he goes mad flipping the hourglass over and over again for the rest of his life.

Eventually, the officials clicked into the Tar Heels' ruse, giving them a 10-yard penalty and putting a single second back on the clock. North Carolina got their field goal, and won the game 30–27 in double overtime.

Mason proceeds to punch Rocky in the face for for ten rounds until he breaks his hands, then barely remains conscious through the handful of cumbersome blows that the geezer who hadn't boxed

* Wayland the Smith is a rather similar inventor character. Unlike both Daedalus and Hephaestus, he is consistently depicted as evil and many of his inventions are for random acts of carnage.
* Wayland the Smith until he was asked to shake, at which point he fell apart.
* Waylon Jennings as a single, reaching #21 on the Hot 100 and #1 on the country chart.
* Waylon Jennings hated "Luckenbach, Texas", because it was way too conventional and derivative for his outlaw country style, but he recorded it anyway because he figured it would be a huge hit. He was right: it was his biggest hit on the country charts and crossed over to the pop Top 40 too.
* Waylon Jennings, Jerry Reed, Bobby Bare, and Mel Tillis. The group recorded a double album's worth of Silverstein-penned material for a single album in 1999. Lead single "Still Gonna Die" features the four recounting various things that one can do for one's health, each capped off with "but you're still gonna die" and building up to the end line of "So you better have some fun before you say bye-bye".
* Waylon Jennings's duet "Mamas Don't Let Your Babies Grow Up to Be Cowboys" was a top-15 country hit for its writer, Ed Bruce, three years before the Waylon/Willie version.
* Waylon Jones a.k.a. "Killer Croc" has a rare condition which gives him a crocodilian appearance as well as superhuman strength and endurance. For a time he wrestled as part of a traveling circus, where his monstrous nature was an advantage.
* Waylon Smithers, an assistant to Mr. Burns. For much of the series he helps with Burns' schemes almost unquestioningly, but he may be a subversion in that there are some schemes even he will object to at the risk of losing his job. (See "Who Shot Mr. Burns Part 1.")
* Waylon Smithers has a low-pitched, nasal voice in the original American dub, but the Japanese dub gives him a high-pitched voice, making him sound like an effeminate gay man. Now
* Waymond the Whale features two whale siblings named Raymond and Elizabeth, but they can't pronounce certain letters and so call each other "Waymond" and "'Lithabeth".
* way more" and thus there's only a few scenarios where they're actually useful (like with Colin, to compensate for his lower attack power). Pretty much any other time in the game if you're gonna drop 22000 bucks, you're better off going for a Medium Tank alongside an Artillery, an APC, or a couple of Mechs as you'll get far more mileage out of that than out of one Medium Tank with a slight power boost. Even if you absolutely need the extra fuel and ammo carried by the Neotank, you're probably better off just supporting a Medium Tank with an APC.
* way more in the bargain. (The slogan? "We can't make *all* of your dreams come true...)
* way more power in comparison to a diesel engine of the same size. But they also consume a lot more, and they do not consume notably less at idle in comparison to full throttle. So in order to operate a gas turbine economically, you have to run it at full throttle as much as possible and shut it down whenever you don't need it. However, in railway uses, a gas turbine spends only very little time at actual full throttle, namely while accelerating, and frequently starting it up doesn't do a gas turbine good. Cheaper, lower-quality fuel may reduce operational costs but at the same time harm the turbine more, and it isn't really "cheap" anymore nowadays anyway. Not hard to guess why almost everyone's back to piston diesels today.
* Wayne Allwine and Minnie Mouse respectively, were married until Wayne's passing in 2009.

* Wayne Brady revealed that he had struggled with depression for a while in 2014. He kept it a secret for a while (and honestly, if you saw him on screen, you probably wouldn't be able to tell), but reached rock bottom after the suicide of Robin Williams, and at that point decided to come out with it. Fortunately, doing that seems to have helped him start to get better.
* Wayne Brady, the first and second performers are worth $10,000, the third and fourth performers are worth $15,000, and the fifth performer (where the round is played in a head-to-head format) is worth a whopping $60,000. This means that a team that has been shut out in the previous rounds can buzz in correctly (or have the other team buzz incorrectly) and win the game.
* Wayne Brady, the public has affectionally dubbed them, "The Whose Crew."
* Wayne Brady They're actually about the same height, and she IS wearing heels but... she's a BODYBUILDER.
* Wayne Enterprises ends up repairing a lot of the collateral damage
* Wayne Grayson several times at a 2008 convention. He referred to it as "his favorite line" even though "It's not even a line my character says, but I've been saying it all weekend".
* Wayne Gretzky. A second vote for MVP was held, and Gretzky won. Even more cruel for Garrett was the fact that he wasn't even originally voted into the game in the first place. The man he backed up in net for the Vancouver Canucks, Richard Brodeur, was. Brodeur pulled out of the game with an ear injury, and Garrett took his place.
* Wayne Gretzky at that) and zero playoff appearances. "The Great One" moniker clearly didn't follow him into coaching.
* Wayne Gretzky in 1988. Everyone swore he couldn't be traded, but indeed he was, and the Oilers were left struggling to find their identity without him. Decades came and went with the Oilers struggling to even maintain a decent seasonal record, let alone find their next Gretzky (though they did win one Cup without him in 1990), before they finally seem to have struck gold with Connor McDavid, who to boot wears 97 on his jersey - just two away from the league-forbidden 99 (though the Oilers retired it on their own before the NHL at large did). Gretzky's 99 banner might not be all that big, but it certainly casts a huge shadow for McDavid and his teammates to skate under. He seems largely up for the task, though, guiding the Oilers farther than they had been in years in just his second season of playing for them in 2017. That's not to say there's no pressure on him to turn things around for this franchise, though...
* Wayne Gretzky in 1991 and 1992. The fact that Gretzky and Lemieux only played in the same Conference for one season (1996-97, Lemieux's last season before coming out of retirement in 2000-01, and Gretzky's first of 3 seasons with the New York Rangers before his own retirement in 1999) and never playing a playoff series against each other (and rarely more than 2 games per regular season) probably helped.

* Wayne Gretzky points out to Tony Hawk that the two of them have collectively set 184 world records... of which Gretzky set 183.
* Wayne Gretzky's helmet of choice. Only four other players at the time (Marty McSorley, Jari Kurri, Esa Tikkanen, and Igor Larionov) still wore the 235 at the time, and by 2001, they had either retired, or in Larionov's case, switched to a certified helmet.
* Wayne Gretzky spent his professional career about 20 pounds (9 kg) lighter than the average NHL player. He was also physically the weakest player on the Oilers during his time with the team, only able to bench press 140 lb (63.5 kg). In spite of all that, his speed and skill made him the most accomplished hockey player of all time.
* Wayne Gretzky. The combination would typically dominate any line they came up against. To prevent this from getting out of hand, the "Wayne Gretzky rule" was introduced, where offsetting minors were played in a 5 on 5 situation. The rule was revoked in 1992, a few years after Gretzky was traded to Los Angeles, but is still active in IIHF (international) play.
* Wayne Gretzky. The Oilers won the Cup four times with "The Great One" and won a fifth time after Gretzky was traded (Gretzky himself never won the Cup again after the trade).
* Wayne Gretzky. To quote the other wiki: "Gretzky's basic athletic abilities were not considered impressive. He was 6 ft (1.83 m) tall, weighing only 160 pounds (73 kg) as an 18-year-old NHL rookie in 1979, and 185 pounds (84 kg) at the end of his career in 1999. At the beginning of Gretzky's NHL career, many critics opined that Gretzky was "too small, too wiry, and too slow to be a force in the NHL". On the other hand, his intelligence and reading of the game were unrivaled, and he could consistently anticipate where the puck was going to be and execute the right move at the right time. It was said that he "seems to have eyes in the back of his head" and had a knack of "rolling with a check".
* Wayne Massey, but none of his solo releases went anywhere. However, he paired up with his more famous wife, 1980s hit-maker Charly McClain (best known for "Who's Cheatin' Who"), and they had two hits together: "With Just One Look in Your Eyes" and "You Are My Music, You Are My Song", both from 1985.
* Wayne Owens (D-Utah) served four non-consecutive terms in the US House of Representatives in a relatively safe (by Utah standards) Democratic seat but went 0 for 4 in statewide elections: three Senate races and a run for governor.
* Wayne played one himself during a game of Let's Make A Date when he's given the character of a power-mad highway patrolman.
* Wayne steals part of the Dairy Barn's earnings in Graham McNamee's
* Wayne Studer, Ph.D. fansite in existence. He's appeared in one of the documentaries about them, and his "On This Date..." feature has been incorporated into the front page of their official site.
* Wayne's World 2 impersonators, putting on "YMCA". Then, the Indian from Wayne's dreams shows up...
* Wayne's World 2, in a scene which has Wayne fight Cassandra's Cantonese father in a chop sockey kung fu fight. The stereotypical sound effects, dubbing and dubious wirework are all aped for the scene.
* Wayne's World 2. Not only does the name not describe him well, but he's too busy selecting music and preparing his comedic sound effects to pay attention to what his guests are saying. That is, openly and remorselessly insulting him on his own show.
* Wayne's World 2 using anything that sounds like the word "eye" when talking to a character with a very noticeable eye condition (acute partial ocular albinism), ending when he promises to "make sure to cross my Ts and dot my... lower-case Js."
* Wayne's World 2, Wayne and Garth encounter a man with heterochromia, and struggle to avoid mentioning it ("Yes sir, I'll remember to cross the T's and and dot the... uh... lower-case J's.").
* Wayne's World 2, Wayne and Garth go to the local radio station to be interviewed by disc jockey Handsome Dan. The good-looking guy they first greet turns out to be Mr. Scream (the wacky voice guy), while Handsome Dan is... well, Harry Shearer.

* Wayne's World 2, Wayne stops for directions at a gas station, and the old attendant, upon hearing the place Wayne's trying to get to, launches into a story of a girl he once knew there, but is doing so in a stiff, self-conscious manner. Wayne addresses the camera and asks "Do we really have to put up with this? I mean, I know it's a small part, but couldn't we get a better actor?" The old actor is led away and Charlton Heston is brought in to replace him. By the time he's done giving directions, Wayne is in tears, and thanks him, more for the performance than for the directions.
* Wayne's World 2 Wayne uses the pole, while Wayne takes the "scenic route," otherwise known as the elevator, to give him time to give the necessary beginning-of-the-movie exposition.
* Wayne's World: between Wayne and Garth. At first this trope seems to be defied with Wayne and Cassandra, but a side ending makes Wayne end up with her.
* Wayne's World cameoed Marble Zone from the first game in an early format. It shows the infamous scrapped UFOs.
* Wayne's World. During a scene where the main characters Wayne and Garth are sitting atop their car watching airplanes take off, when suddenly Garth asks a strange question:
* Wayne's World, each time Garth sees his dream woman in Stan Mikita's.
* Wayne's World ending, and the happy ending. Only the two happy endings are "canon"; Wayne and Garth simply rejected the others.
* Wayne's World films contain a few examples of this trope. Almost all of Ed O Neill's character Glenn's dialogue in both films, in fact.
* Wayne's World films, ubiquitous Canadian restaurant Tim Horton's Donuts becomes the film's fictional Stan Mikita's Donuts. Horton and Mikita are both Hockey Hall-of-famers. Actor-writer Mike Myers grew up in Toronto, where Horton played; character Wayne Campbell lived in Aurora, outside Chicago, where Mikita played his entire NHL career.
* Wayne's World, Garth wins the love of his dream girl. She was an earlier throw-away joke... in fact, the audience was not sure whether she really existed or was just a dream.
* Wayne's World has Wayne and Garth frequently addressing the camera and viewers.
* Wayne's World. His speech is stilted (and he is in general rather socially awkward/unawares), he doesn't eat anything that isn't brightly colored and fruity (to the point of eating a jelly donut with a straw), he goes off on some extremely bizarre tangents in conversations, and he spends hours obsessing over strange mechanical gadgets. He's also mentioned to be taking Ritalin.
* Wayne's World. Hmm... They must use this a lot on posters for movie sequels!
* Wayne's World. If anything, that makes it even funnier. "No Stairway! Denied!"
* Wayne's World immediately afterwards when Wayne says to camera, "You know for a security guard he had an awful lot of information, don't you think?"
* Wayne's World in the second) before presenting the actual and accurately named "mega-happy ending".
* Wayne's World lampshaded this trope mercilessly with Chris Farley's unusually knowledgeable security guard.
* Wayne's World metalheads who constantly break the fourth wall, especially with the multiple choice ending segment from the first movie.
* Wayne's World movies, Wayne is constantly talking to and interacting with the camera. Even Ed O'Neill did for a moment, before being reminded by Wayne that "only me and Garth get to talk to the camera".
* Wayne's World must choose between lower-class Wayne and TV executive Rob Lowe.
* Wayne's World (one of which provides the page quote) both have Extreme Close-up moments.
* Wayne's World, reading "Customers playing 'Smoke on the Water' may seriously wish to reconsider their motives in buying musical instruments." "Sweet Child of Mine," "Freebird," and "Stairway to Heaven" have also been given this treatment. Working in a music shop must be hell.
* Wayne's World, she's on stage aggressively singing "Let me stand next to your fire". Wayne's view of her is in Gaussian and he hears "Dream Weaver".

* Wayne's World (SNES/Genesis): Any enemy that Wayne kills with his guitar are destroyed in a fiery explosion.
* Wayne's World starring Farrah Fawcett. You might think these gag options wouldn't actually be clickable, but they are: Selecting them gives you a short clip of the selected show/movie, with a small line of text advertising its availability on video on the bottom of the screen.
* Wayne's World the air fills with sparkles and the song "Dream Weaver" plays.
* Wayne's World, the titular character's ex tries this with him. It fails horribly.
* Wayne's World the worst of all ear worms. If you hear this song in the morning, you'll never be able to get it out of your head all day, no matter what counter-measures you take.
* Wayne's World, Wayne has the song "Hey Mickey" stuck in his head. He and his girlfriend sing it to expel it.
* Wayne's World. Wayne mentions that it's okay if a few people don't like his show and explains it this way:
* Wayne's World, when Wayne Campbell "learns" Cantonese in order to speak to his love interest. After purporting to have learned Cantonese, there are scenes where Wayne stares awkwardly at the camera without speaking, while long English paragraphs of complex, translated dialogue appear in the subtitles.
* Wayne's World where Garth asks Wayne if he ever found Bugs Bunny attractive when he dressed up as a girl bunny. Wayne laughs his "no" incredulously for a moment, then says seriously "No", to which Garth hastily responds "Me neither, I was just wondering".
* Wayne's World where he randomly and inexplicably extols the virtues of Cassandra’s laundry detergent.
* Wayne Wonder has been recording since the late 1980s, but his first hit didn't come until 2003, when "No Letting Go" charted all around the world, including #11 in the US and #3 in the UK. His follow-up "Bounce Along" was only a hit in the UK and he hasn't made any chart since.
* Way of Choices can each shift back and forth between a human and a beast form.
* Way of Choices Chen and Youroung have met only a few times and he is unaware (though she is) of her identity, as they largely communicate through writing.
* Way of Choices is a massive story (1251 chapters) about a young man's quest to defy his fated death at the age of nineteen. Over the course of which he battles demons and dragons, fights in tournaments and wars, defeats impossible challenges, and achieves enlightenment.
* Way of Choices these are called Yeshi Steps, and seem to be a basic technique. Certainly the first one demonstrated by Chen.
* Way of Choices where Xu Yourong's grandfather promised her hand to the disciple of a Taoist who saved his life. Various characters have various reactions to this, her parents are horrified while she's more ambivalent.
* way off and they find themselves struggling just to make the next Chase, let alone do anything once they get there. Every driver who finished runner up to Jimmie Johnson during his streak of five consecutive championships from 2006 to 2010 was subjected to this trope.
* Way of the Dragon: After Tang Lung handily beats several mooks with nunchuku, the last mook grabs some nunchaku and tries to attack, only to knock himself out with them.
* Way of the Dragon, Bruce Lee and a very hairy-chested Chuck Norris duke it out in Rome's Coliseum.
* Way of the Dragon, Bruce Lee's character goes into a restaurant in Italy and accidentally orders every soup on the menu (which later makes him have to pee a lot).
* Way of the Dragon, where he calls his moves after the fact as an extension of his earlier "Chinese boxing" lessons to his friends.
* Way of the Pilgrim the personal force-shield of any Aalag soldier would allow him to hold out indefinitely against any weapons humanity could throw at him. Even nukes. The ship-board version is presumably even more robust.
* Way of the Samurai 4 can play Koi-Koi at night. The place also offers free sake

to those who take the sidequests that the gambling den mistress issues.
* Way of the Samurai 4, firearms are among the weakest weapons in the game in terms of offensive strength. Despite them being capable of slowly killing an enemy without them reaching you, they lack any real damaging techniques, while swords are able to instantly kill an enemy in one attack. However, when someone wields a firearm during a cutscene, expect another character to be at least heavily injured or, in worse cases, even killed. On the other hand, Kogure is seen deflecting bullets with his katana, while bullets are considered to be unblockable in gameplay.
* Way of the Samurai 4 however, is exempt from this, and can die at any point past the prologue, in which case, she will be replaced by a nameless substitute.
* Way of the Samurai 4, if you fight Kotobuki at the start of the game, and then confront him again in the evening after meeting with Akagi (who leads Kotobuki's enemies, the nationalist Disciples of Prajna faction), you can choose to call him and his lackeys "stupidheads".
* Way of the Samurai 4 plays with this during a battle tournament during the main story. In some plot branches, the player may end up facing a man and his dog. The specific loophole used in this case is that any weapons are allowed, so he declares the dog to be one of his weapons.
* Way of the Samurai 4 the last step of the Nightcrawling mini-game involves either throwing the woman you want on a bed or hitting them until their clothes come off. Additionally, some characters like Sensei or Melinda require you to defeat them in a sword fight before they will even give you a chance.
* Way of the Samurai 4, who even has his own guards called Clean Samurai. His obsession for cleanness goes so far, that he has no qualms about killing homeless people, as he deems these to be unclean.
* Way of the Samurai 4, you can choose to do this by not paying the bill after eating a meal at a restaurant or outdoor food stand. Doing so is considered a crime and will cause the owner to call for the guards to arrest you.
* Way of the Samurai 4 you join the xenophobic Prajna movement in an attack against the British embassy, which the British treat as an act of war. Akagi, the leader of the Prajna's, is mortally wounded and gives the leadership of his movement to your character. The game ends with the much more modern British army invading Japan, while your character is seen leading the charge against them.
* Way of the Samurai game and a lot of supporting cast as well. Depend on the choices made by the player, dependent upon the game but some of the most common boil down to, join up with a new master, join (possibly noble) gangsters, continue to wander aimlessly as the game goes by doing odd jobs for money, or support a third "civilian" side in the local conflict.
* Way of the Samurai has been defeated. Often referred to as a 'Mad Dog', though never to her face. Call her O-Kyo at your own peril.
* Way of the Samurai Not only it is useful for ending most fights prematurely, it is also required to recruit one particular follower.
* Way of the Samurai (the female sword informant), can still be (hopelessly) asked on a date.
* Way of the Samurai: you can use the blunt end of your sword to knock out opponents as opposed to killing them.
* Way of the Samurai, you have a fury mode which makes your combos infinite, great against normal enemies who stand in one spot, borderline useless on bosses, who are all too happy to block your never-ending onslaught like you were throwing mean insults at them and not slashing them with a sword.
* Way of the Samurai you join or take over the Ouka Clan of Bandits, and end up being the one in charge of them when the Fujimori Clan leads a massive army against you. Despite managing to fight your way out, you and several of your comrades find yourselves completely surrounded. You and your companions ultimately decide to give them all the fight you have left and charge into the fray. The game ends with a note about an "unknown samurai disappearing into history."
* Way of the Tiger ninja who avoids using weapons other than shurikens and maybe poison needles (if that skill was chosen). Instead Sorcerak belongs to his

archenemy, Honoric who's the grand marshal of an army dedicated to an evil deity. Sorcerak radiates fear in enemies and will absorb opposing magic - this will prove useful to Avenger if he has a chance to kill Honoric early on.
* Way of the Tiger, the world's mightiest wizards and warriors, primordial beastgods, giants, ifrit, an Eldritch Abomination or two, demigods and demons — all have died under the fists and feet of your character, the ninja Avenger.
* Way of the Tiger. Unlike many similar books, this series spends pages describing its world while telling an exciting and atmospheric story with a lot of variety that involves the player not only fighting but also have to deal diplomacy, politics and command strategy.
* Way of the Tiger, you are the good ninja Avenger and essentially the best warrior on Orb. In the series, using only bare hands and often in one on one combat, Avenger will have killed the world's deadliest assassin, world's best mage, world's best swordsman and world's best martial artist. Avenger also defeats a team of epic-level evil adventurers, primordial godbeasts, demon princes, giants, efreet, a god-forged golem and etc.
* Way of the Tiger, your ninja assassin Avenger can instantly kill opponents if he has the Poison Needle skill and is given the option of using it. He sometimes can kill enemies with the Nerve Strike skill if he took that as his special skill learnt from the Island of Dawn. Additionally he carries a garrotte and a single dose of the "Blood of Nil" - which is the deadliest poison in the world, sometimes he gets the option of using those particular tools on a hapless victim. Finally there are rare instances that he ends up killing someone if you chose a specific attack, for example in one book he breaks the neck of an attacking ninja by throwing that novice who ends up landing poorly.
* Way of the Warrior Dragon, Fox becomes Voodoo, and Major Gaines becomes Major Trouble. Once they're all out of the way, Gulab can be fought on his own.
* Way of the World. In the far future, Kara Zor-El has the chance to travel back to the past. She thinks of fixing all of her mistakes and doing it right this time... but then she thinks she'd be playing God like a time-travelling villain she just defeated. The past is the past and she must accept this and move on.
* Way of X have an ironic nursery rhyme for Krakoa's bogeyman, the Patchwork Man:
* way older the enemy fleet. Too bad that mankind, and all organic life, has been killed in the battle... So the superintelligent energy beings inherit the Earth.
* way older via marriage to Lois's sister, making the relationship that much more squicky in hindsight.
* way only covered the front. Recent developments have fixed this problem, though.
* way. On the other hand, they are equally intelligent, and Howard also becomes a much better person once he starts dating her. It helps that Penny also once pointed out that he's the luckiest man alive and he'll never get anyone better than Bernie.
* way outclassed in strength by most of the Kage-level fighters he's compared to as an equal. It's perhaps no surprise that Kakashi was a student of the aforementioned Fourth Hokage.
* way out of the 'pay grade' of the work - (such as a Hollywood megastar who turns up in a small role in a low-budget indie or horror flick)
* Way Out West are their normal 1930s selves; all the other characters match the period Western setting.
* Way Out West in a Dress, everyone's name is this. For example, the hairstylist is Rogaine, the criminal is Rob Banks, the one with an ear infection is Eileen, and the judge was Levy Fines.
* Way Out West seemingly happened about 140 years later than on Earth Prime.
* way overboard over how little they could build their devices, and as a result, the mid-2000s saw stuff like watches with a PDA and a cell phone, and cameras almost the size of a medium USB drive. These days are long since gone now that consumer electronics have mostly settled down to a more practical size, since one of the side effects of miniaturisation obvious to everyone except the companies doing this was that phones, cameras, mp3 players, and other devices too small to have sensible control buttons or clear displays on them are a pain to use, even if they are half the size of everything else.

* Wayrift also takes on a wolf form to communicate with people, and eventually takes the form of a woman to gain attention from the man she's in love with.
* Wayrift: In chapter 32, Fang gives Kip a wedgie right before escaping him.
* Wayside episode "Wayside Special" has Todd climbing up to the 30th floor. He starts off by climbing some stairs, scaling a ladder, crossing a log, and traversing a jungle gym, only to get to the second floor.
* Wayside, Myron gets tagged it and becomes the most powerful person on the playground. The end results aren't pretty. In fact, you can't even dare tag Myron it, because everyone knows what happens.
* Wayside School) and how the students can come to him any time because they're all friends, he launches into a diatribe about how much he hates kids and how much it sucked to be called away from his vacation in the Bahamas. He's also not very nice to the secretaries telling him the microphone was still on... In fact it's played with until the end of the chapter. "What red button? ...There is no red button. Oh, here it—"
* Wayside School book, Joy steals Dameon's lunch (and frames several other students for the theft) because she's seriously hungry, having forgotten her own lunch, and is said to have suffered extreme guilt over it for months afterwards. In the two subsequent books, one of Joy's major character traits is that she steals things whenever she gets the chance, including, at one point, another lunch (this time showing no guilt at all).
* Wayside School books are there mainly for surrealistic flavor. There are three of them: a bald man, a man with a black mustache, and another man with a black mustache who also carries an attaché case. Their appearance is random, but usually has a connection to a character making life decisions. In one instance, they offer an emotionally fragile boy a choice between safety or freedom. When he chooses the latter, they hand him a contract, which he signs, and then leave. No explanation is given as to what that contract means, although it's shown that that character no longer has to do anything he doesn't want to, like take tests or do homework.
* Wayside School books (except for the arithmetic ones as they are not structured like the other books) ended with the last sentence being, "Everyone (Word That Rhymes With Ooed)".
* Wayside School books has a story where the main character of the chapter, Maurecia, eats ice-cream every day but is getting bored with the flavours. Ms. Jewls creates ice-cream named after her, but she can't taste it because it tastes the same as when she's tasting nothing; everyone else claims it tastes wonderful. The next few weeks have them going through the entire class, with everyone having a taste relating somehow to their personality, and everyone agreeing that Todd tastes the best. He apparently tasted so good that every so often, Maurecia would try to take a bite out of his arm.
* Wayside School books, one of the kids tells a story of a hippie who got his ear cut off by a barber.
* Wayside School books, the kids are playing music and wonder how the triangle got its name. They decide it can't be named for its shape because "then the tamborine would have to be called a circle", so they reason it must have been invented by Joe Triangle.
* Wayside School book, the school principal, Mr. Kidswatter, decides to declare the word "Door" a bad word, and anyone who uses it to be punished. Todd happens to be late for school that day and misses that announcement. When he tries to explain why he was late, he uses the word "door" and is immediately punished.
* Wayside School Gets a Little Stranger, the class is dropping objects out the window to prove that everything falls at the same speed, including a pencil sharpener. Because everyone's been saying "pencil sharpener" throughout the chapter, you think nothing of it at the end when Leslie does...
* Wayside School is Falling Down raises a theory that Mrs. Jewls lets Myron do whatever he wants because Myron has a picture of Mrs. Jewls wearing a lampshade, and threatened to show it to the principal unless she allowed him to break the rules. One of the other students then asks how the principal would recognize Mrs.

Jewls if a lampshade covered her face.
* Wayside School). It was supposed to be a 1 story building with 30 classrooms in a row, but the builder was holding the plans sideways. He said he was very sorry.
* Wayside School (Kathy's "Yellow" included all words that ended in "ell" followed by "oh"), were very short (Stephen's "Green") or abandoned rhyming altogether (Joe's "Red" which used past-tense "-ed" suffixes where the "e" was silent).
* Wayside School, likes to pull patients' teeth whether necessary or not, in order to charge them more.
* Wayside School makes her pigtails controllable, demonstrated when Leslie played bongos with them.
* Wayside School minor offense while practically everyone else in the class is acting up much more.
* Wayside School, Mr. Kidswatter. Under his breath, Louis calls Kidswatter a "maggot-infested string bean", then when asked to clarify, changes it to "a magnificent human being".
* Wayside School, Mrs. Gorf, into turning herself into an apple, which then gets eaten by Louis. Later, Mrs. Gorf's son tries to avenge her by becoming the kids' substitute teacher, stealing their voices, and attempting to frame them for making hateful phone calls to their own mothers.
* Wayside School, one of them notices her eating Oreo cookies filled with bologna instead of cream.
* Wayside School series has two characters named Nancy and Mac who eventually swap names to fit their corresponding genders. Nancy was named after his aunt, and Mac's mother named her after a dog.
* Wayside School series, teacher Mrs. Jewls makes an ice cream flavor named for every student in her class which evidently tastes like their personalities (Kathy-flavored ice cream tastes terrible). The catch is that when someone eats their own ice cream flavor, they taste nothing.
* Wayside School series, while the teacher is pregnant, there is a substitute teacher who fulfills this role, turning all the students against each other and creating a very tense and hate-filled classroom.
* Wayside School story in which one kid is picked as Class President. Much jubilation on the part of said student until he learns that the exalted post of Class President entails turning off the lights at the end of class.
* Wayside School Todd ends up saving the day by giving them a spelling book and encouraging them to learn to read and write.
* Wayside School, which is set 20 years in the future, Dameon starts to become attracted to her now grown up daughter Mavis.
* Way Station are named this way: Thuban VI, Polaris VII, Mizar X, Vega XXI, Enif V, Alphard XX, etc. So not only are all the space-faring aliens in this region of the galaxy conveniently from star systems humans have names for, but they also seem to have no other names for their homeworlds, and no names for themselves besides "Thubans" and "Vegans". (Although to be fair, Earth is also referred to as Sol III.)
* Way Station briefly mentions a race of aliens who colonized numerous planets, regardless of the conditions, by physically and mentally changing themselves every time to perfectly fit those conditions. The main character wonders whether can they be counted as the same race.
* Way Station, Ulysses is a member of species that adapt to almost anything, can digest almost anything, but he considers well-prepared coffee to be the best food in the entire known universe.
* way stronger than whatever we've been doing before." The other common scenario was missionaries bringing lethal European diseases with them, leading the locals to believe that the missionary's magic was to blame for their illness.
* way than Pepe. Incidentally, those shorts that show how much of a spitfire an interested Penelope can be suggested that Pepe's scent is literally the only thing driving her away; sad, then, that Pepe is intimidated by assertive women and rapidly loses interest as soon as one or both of them does something to take his smell out of the equation.

* way the characters are presented, Jud Fry can be played as a buffoon lacking intelligence, a possessive and evil man, a slightly insane man or a sympathetic and misunderstood man who struggles with depression. Curly could also be played as an overconfident and cocky braggart who is slightly cowardly or a person who is confident and charming. This mostly depends on the depth of the director.
* way too easy for its level almost always elicits this reaction. To name a few:
* way too easy to run across at art sites. Be thankful for the thumbnail previews.
* Way too many cases with the Sex Offender List. Public urination or sleeping with your underage girlfriend despite the fact that you're only one year older than her? You're treated the same as child molesters and violent rapists. You can get on the list even if you weren't convicted.
* way too much time on their hands when Harima accidentally confesses to their male teacher, who is completely nonplussed. Then, in the next episode, he does it AGAIN.
* way too mule headed and concerned with gaining the God Cards to order it to land, even if three contestants are unconscious and possibly dying. Alcatraz is just as bad; it's a tower built on a demolition site, designed to resemble a shining tower rising out of a ruin to symbolize Kaiba's triumph. Dramatic again, but not exactly safe.
* way too often to keep track of. It's also one of the reasons the fandom has a rather poor reputation.
* way too pricey to make to be profitable, and the designers only had five months to reduce the price to reasonable levels, resulting in the flawed final product.
* way too spicy, at one point producing something that knocks poor Yukiko out in one mouthful.
* way too strong, wanting to marry him. Eventually, he has enough and pours the rest of the potion down the drain.
* way too trusting, and despite his good intentions doesn't realize that what he's doing is prejudicial to others. Even his grandfather remarks that he is not dumb, but rather he just learns in different ways.
* Way Walkers University, the game lets you romance your choice of two male or two female characters. All characters are available for any gender PC.
* wayward asteroids requiring plenty of power, which requires large plants to generate it.
* Wayward Children rather than morality; in their experience, very bad things end up happening after a child becomes a vampire or werewolf, and they don't want to have to deal with the consequences.
* Wayward Children, the protagonist Nancy Whitman is, in her own words, asexual but not aromantic. She doesn't want to do anything more physically intimate than kissing but still quite enjoys dating and develops feelings for her classmate Kade Bronson.
* Wayward Children. The twins Jack and Jill (blame their parents) went there, and Jack became Dr Bleak's apprentice, while Jill developed a rather unhealthy relationship with the vampire lord. At the school they go to after they return to Earth, full of other people who've been on portal-fantasy adventures in other worlds, they're known as "the Addams twins".
* Wayward, damaging the island's environment by cutting down trees, mining, or hunting causes your reputation to drop. Having negative reputation increases the amount of hostile creatures.
* Wayward Guide For The Untrained Eye, the werewolves of Connor Creek, known for its silver mines, are actually dependent on the trace amounts of silver from the mines that leak into the reservoir, as it allows them to transform at will and live alongside humans instead of being beholden to the moon. Too little silver, and they will lose control. Too much, they get burned or die. They can transform into either half-wolf forms or full, bipedal wolf forms, both of which allow for speech. These transformations manifest with a glowing aura, which differs in color depending on clan. Werewolves are either be born or made (via bite or scratch) and they can only be killed by silver bullets or the claw of another werewolf.
* Wayward intent on bridging the gap between the past and the future, not only finds himself frustrated by his conservative team mates' idiotic insistence to much

rather fight to the last man instead of accepting the changing times and embracing the future and its technological wonders, but finds himself equally frustrated by the heroes' idiotic lack of respect for the introspective virtues of the past and stubborn teenage mentality to just follow the whims of their flailing emotions.
* Wayward Pines, after Ethan Burke makes it out of the titular town, he goes in the direction of Boise, Idaho, the nearest large city, but all he finds are overgrown ruins. They later find videos of scouts sent out to other parts of the country with views of other cities' ruins.
* Wayward Pines fits the trope remarkably well for a character whose parents are also major characters.
* Wayward Pines. He and his people wiped out an Abby group and built a town surrounded by large electrified walls next to the mountain.
* Wayward Pines involve the execution of people who break the town's rules repeatedly and publicly. In Season 1, their throats are slit. In Season 2, they're shot execution style.
* Wayward Pines, taking the main road out of the town will eventually bring you back to it. This is a mundane example as the road really is an endless loop that curves repeatedly to confuse peoples' sense of direction.
* Wayward Pines: The majority of humans has devolved into predatory animals known as "abnormals" or "abbies".
* Wayward Pines. This is done away with later, since it's no longer necessary.
* Wayward Sons: Doctor Chu, who very much enjoys performing torturous experiments on live subjects.
* Wayward Sons focuses mainly on Greek mythology, but features figures from several other ancient cultures.
* Wayward Sons: Frodaity can do this to anyone. She's used it to make people pass out from lust (directed at her), and caused sadness in a couple of enemies so they couldn't fight back (though that was a staged fight).
* Wayward Sons have the sword ends up with them losing the upcoming war.
* Wayward Sons out of a mountainside as a Holy Day gift to his crewmates.
* Wayward Sons: Over 30 characters, with more being introduced periodically.
* Wayward Sons: Saiden. He can control its state of matter too, allowing him to form his weapon of choice, a trident, out of ice. He can even move a fleet of ships around, though he runs the risk of passing out from exhaustion when he does so.
* Wayward Sons the captain's ex-wife is also the head medical officer.
* Wayward Sons: The Greek gods weren't gods, they were superpowered aliens.
* Wayward Sons. They become the Greek gods, while the antagonists become the Egyptian gods.
* Wayward Sons: With a minor modification and application of his power, Airez has turned his sidearm into one of these.
* way way more of John Turturo than anyone wanted to see on the big screen.
* way, way worse, with the gesture becoming a de-facto symbol of white supremacy in Australia and New Zealand due to the Christchurch shooter.
* way (which, in fact, were snatched back from Shinji, who was the one trying to steal it because some bullies put him up to it), at which point she attempts to beat him to death with a baseball bat and completely refuses to trust or talk to him until he explains the truth behind his actions. Once Kaname is in on the whole secret and can relate to Sōsuke better through an understanding of his background, it's the beginning of a friendship that develops into love.
* Wazdakka Gutsmek And thats tame by the standards of most Ork Characters...
* Wazdakka Gutsmek. Needless to say, he slaughtered the entire crew in seconds. He also kept 3 skulls from this encounter as throphies and they are still on fire, decades later!
* WazHack, an all-graphics variant, makes the background go a glowing, wavy yellow and the monsters, including your pet, turn into random geometric figures when you're hallucinating.
* Wazzup than eyerolls. But whether it works twice remains to be seen, as Bud Light is trying the same thing with "Dilly Dilly".
* WB 10 Juicer Uprising makes it seem like there is a way to shoot a hole through

helmets without destroying them.
* WB 20 Canada shows the Tundra Rangers being part of the Coalition States, the book doesn't describe them working together.
* WBAI's very survival has been an issue for two decades. Several disparate studio locations, millions of dollars owed to the Empire State Building for not paying for their transmitter, and a whole 'too many cooks in the kitchen' issue where a simple sale of the frequency to someone else in exchange for a smaller-range signal is a no-go have exhausted most New Yorkers (and the radio community at large) so much, the end of WBAI would be a mercy killing to most.
* WB's reactionary approach lead to radical changes being made in post-production of

* WC fanfiction as well, where canon relationships make up a large majority of stories.
* W. C. Fields (1940), when asked by the thug in the back seat to give him the wheel, Egbert Souse (Fields) matter-of-factly pulled it off the steering column and gave it to him. This sequence paid homage to the Mack Sennett/Keystone Cops and Hal Roach/Our Gang comedies of the 1920s and 1930s. Model T Fords were generally used for these comic chases.
* W. C. Fields gag, where the second half of the story is given as the main character having found a glass eye on a pool table, returning it to the owner, and being given the nickname "Honest John".
* W. C. Fields, he financially support both; he paid a stipend to Hughes for the rest of his life, and supported Morris until he turned 19 (his mother had died in 1928). He was also known to be an involved grandfather.
* W. C. Fields. He is known to have appeared on the same bill with them only once, during an engagement at Keith's Orpheum Theatre in Columbus, Ohio, in January 1915. At the time, the Marx Brothers were touring "Home Again", and it didn't take Fields long to realize how his quiet comedy juggling act was faring against the anarchy of the Marxes. Fields later wrote of the engagement (and the Marxes):
* W. C. Fields his bratty daughter Elsie whacks him over the head with a director's bullhorn when Egbert (Fields), working as a director, won't put Elsie in the movie.
* W. C. Fields involves Mr. Muckle, who is both blind and half-deaf, visiting poor Harold Bissonette's grocery store. Mr. Muckle shatters the glass in Harold's front door with his cane as he enters, goes around wrecking everything else breakable in the store as he browses, and shatters the glass in Harold's other front door as he leaves.
* W. C. Fields, there's a scene where Fields eats a bowl of soup with a ridiculously long baguette. He breaks the baguette in half and repeatedly dips one half in the soup, but then takes bites from the other half.
* WCG Ultimate Gamer. Inversion. Surely nobody, gamer or non-gamer, is under any illusions that the skills necessary to play
* W-Change!!, and Tachibana's gang is actually a faction serving under Fukama's clan. They hide their friendship in order to keep Fukama's identity a secret.
* WCRB, a classical music radio station out of Boston that is affiliated with that city's local
* WCW 2: Electric Boogaloo, since they took on a lot of former WCW staff (both performers and creative staff) and generally see it as heading down the same road WCW did.
* WCW among WCW's primarily Southern audience. It helped that their main rivals, a supposed face stable called the No Limit Soldiers, acted like heels and mostly consisted of inexperienced newcomers.
* WCW and Butch Reed, but were no less scary, no less black, and no less men. And no less doomy.
* WCW and consisted mostly of squash matches against low-card performers).
* WCW and Lash LeRoux, where she was seconding Crowbar, Juvy ran after her and she

held him off by SCREAMING!
* WCW and manager Jimmy Hart presented a motorcycle to a contest winner.
* WCW angle to change his full ring name to "Hollywood" Hulk Hogan; the announcers routinely just dropped the "Hulk" part of his name and called him "Hollywood Hogan", which meant Marvel didn't see as many royalties.
* WCW as a drill sergeant like Slaughter was, his appearance and demeanor ("The beatings will continue until morale improves") fit the trope perfectly. However, he also was an inversion, since he ended up taking more beatings than he dished out.
* WCW at the time, so giving them their own show where surprise, surprise, the nWo won every match, turned out to be a turn off to many viewers.
* WCW Bruce LeRoy to serve as his manager(in the former) and avenge a loss he suffered to Jimi Mayhem(in the latter).
* WCW caused fans to chant "GOOOLD-BERG! GOOOLD-BERG!" during his entrance; combined with his epic entrance music (and his streak), it helped sell him as a badass.
* WCW cologne. Smelling like a large sweaty muscleman ranks pretty low on the list...
* WCW despite not being at all 'hardcore', so he wore football, hockey or whatever pads to the ring, thus taking the 'wear the hometown Jersey' thing to ridiculous extremes by wearing the whole damn outfit. Needless to say, he was cheered.
* WCW during this time, since he was a) not the only Scott and b) not the only Steiner (see below).
* WCW engine, removes any semblance of wrestling and just goes for a clunky backstage brawler.
* WCW. Enos's tag partner, Dick Slater, switched with Enos despite having different hair and a significant size and age difference between the two. The referee did not notice.
* WCW every 3 weeks, including four different varieties of pole matches. WCW 2000 was entertainingly bad, but he kind of threw a concrete block on a drowning promotion which needed a life preserver.
* WCW example, as it had the single greatest roster in the entire history of pro wrestling - only Super World Of Sports even came close - but it was dedicated to doing so little with the large majority of the wrestlers it contracted that having them all ultimately ended up being a colossal waste of money. There were at several points over 200 wrestlers on the roster, with at least half of them having no planned television role or even house show bookings, but still getting paid to not only sit on their hands and do nothing, but get flown around the country/world while doing nothing when WCW traveled.
* WCW Focusing mainly on developmental wrestlers who may or may not "graduate" to WCW's main roster or elsewhere, Heartland ended up running shows and training successful wrestlers well after WCW went out of business.
* WCW giving the world heavyweight championship belt in his debut match. The only place to go was down, but in a year's time, it was hard to remember the guy was, you know, the theoretical top wrestler of the company.
* WCW had "00" on the back of his gear and Johnny Grunge had "69," sometimes with the words "Naughty Macdaddy." (Rocco's would read "Violent Macdaddy.")
* WCW had an infestation of men named Rick during the 90s. In 1997 alone their roster included at least 12 wrestlers using Rick or Ricky as their first name (
* WCW had "complete creative control" written into his contract, which meant he could literally rewrite the cards to put himself over at the expense of everyone and everything else. He did this frequently.
* WCW happened to see his work there, saw the same potential Heyman saw, and immediately brought him in. The rest is a long history of alcohol-fueled ass-whoopin', and that's the bottom line, 'cuz Stone Cold said so!
* WCW has lit a bunch of barrels on fire in the middle of the road for no apparent reason. Dodgy voice acting may be to blame.
* WCW, he wore the mask to the ring and took it off before the match. The fans then proceeded to chant "Put the mask on!"
* WCW in it. They made being Pretty Fly For A White Guy his gimmick and have him

screw up the Animals catchphrases (e.g. "it's all swell" instead of "it's all good"). He even got renamed to Disqo, a reference to hip-hop artist Sisqo who was experiencing faddish popularity at the time.
* WCW into a standalone nWo show. However. there wasn't enough audience interest and the time they took to restructure the show around the nWo wasn't seen as worthwhile, so the idea didn't go any further than this one episode.
* WCW jumped a barricade and ran into a match and the commentators, so used to not being told about changes to shows, assumed it was the real Sting.
* WCW knockoff for the cruiserweight title belt. Akira Hokuto, despite actually winning the WCW Women's title, did not fare any better as getting it meant losing her spot in CMLL and she'd never do much of anything in Mexico again. WCW did a lot of nothing with Hokuto or her belt before vacating it and then scrapping it after a year that saw GAEA try to get a run with Devil Masami going. And their women's cruiserweight belt lasted even less time. WCW had two women's belts but somehow managed to not use the large majority of the women it boasted to have, a link in a chain of events that nearly ended with the deaths of every major women's division left on North America.
* WCW male wrestlers in the ring. Once JCP hired her as a valet, though, that was the end of her actually wrestling.
* WCW managed 29 years (23 of them nationally televised), with a couple of name changes along the way.
* WCW match, they had several people attacking Sting imitating his different looks over the years.
* WCW Monday Nitro cut to the announce desk, a bottle of Surge would be plainly visible, with the label facing the camera.
* WCW Monday Nitro dragged Steele over on top of Jarrett and counted the pin.
* WCW Monday Nitro had completely surpassed them in the ratings. Too little, too late. The company was dead less than a year later, with the final episode airing on March 26, 2001.
* WCW Monday Nitro. The first the fans heard of it was when Vince showed up out of nowhere on an episode of Nitro, teasing his announcement of the buyout at the end of the night. Even then, WCW refused to admit the show was over, instead calling it the "season finale" (even though there's no offseason in pro wrestling).
* WCW Monday Nitro when Chucky accused Steiner of playing with dolls, "at least that's what your mother tells me."
* WCW noticed in its early days (along with Atlanta Braves baseball). The fact that it lost money for most of its existence was of no concern to him since, for someone like Ted, the amount of money that WCW lost was never more than pocket change. It operated at a mild loss for years while garnering steady viewership, which made it a fair investment in terms of ratings (most television shows don't have a potential income stream besides advertising, so any profit WCW made from tickets and pay per view buys was basically a bonus from the network's perspective). However, WCW was most definitely not adored by an AOL Time Warner exec named Jamie Kellner, who within a few weeks on the job cancelled all professional wrestling related programming. By that time, ratings had plunged below many syndicated shows and the company itself was losing $50+ million per year with no end in sight, which for an executive looking to cut costs from unprofitable divisions, made WCW look like a big shiny target.
* WCW, not so much, with fans caught on camera screaming about how much he sucked and anti Hogan signs having to be confiscated. WCW also rigged polls on their website so that any votes towards cruiserweight matches for best of the night would instead officially count for Hogan's.
* WCW once feuded with his brother and another wrestler over the right to use the letter T in his name.
* WCW once said that they wanted the Giant to come to the ring with a fish in his tights, to explain that he fell into the river.
* WCW put Buff Bagwell's mother Judy on television mostly because she regularly called WCW executives to agitate on her son's behalf.
* WCW. Reports conflict if he was ever meant to come back after an Invasion type

storyline, or if the release was just what Pillman wanted in the first place.
* WCW, sending trainees that would have gone straight to WCW out to the wider world.
* WCW she darkened her hair to autumn brown and cut it (half symbolic to fit the new character, and half practical as her hair had been fried from years of bleaching). Then came the head shave...
* WCW, she wrestled in the 2004 Taboo Tuesday Fulfill Your Fantasy Battle Royal barefoot.
* WCW sideline as an instructor at the Power Plant, WCW's wrestling school. Like Pittman, he took more than he ever dished out.
* WCW (since anytime the promotion is mentioned today, it's almost never with kindness) or they walked in on their parents' nostalgia trip.
* WCW. Slow, clumsy, not a particularly devastating striker or technician, but so fat that almost no strike could hurt him and few wrestlers were strong enough to move him.
* WCW's "Ready to Rumble", better known as the dud that put the belt on David Arquette.
* WCW's San Francisco 49er Match had four "secret boxes" on poles, one containing the Heavyweight title, the other three containing a blow-up doll, a coal miner's glove (from the infamous WCW 1992 Coal Miner's Glove Match), and a headshot of
* WCW's Shark Boy, and his many, successors. It is unwise to place your butt in their faces.
* WCW Starrcade 91, though they'd rig the drawings for those later shows.
* WCW status kept him from portraying the character with any more depth than that.
* WCW, then just sort of defaulted to baby faces who enjoyed entertaining fans and rarely did anything malicious.
* WCW, then largely screwed itself and let in outsiders it used to adamantly keep out in the name of self-protection who screwed it further.
* WCW. The problem was that the week before said masked wrestler attacked...Rick Steiner.
* WCW, the second level of the three layered steel cage contained a wide variety of weapons, including a kitchen sink.
* WCW. This was not very popular, although it had some uses for story scenarios. This descends from the NWA's rulebook (see below).
* WCW Thunder was so poorly produced that it's hard to believe that WCW cared about it at all.
* WCW, Tommy and Johnny Rich really were cousins. Davey Rich (aka Davey Haskins) was not.
* WCW, to the amusement/bewilderment of anyone who knows anything about album sales.
* WCW, to the point where, by the time of its demise, it seemed to be almost a separate promotion from mainstream WCW.
* WCW, Tracy Smothers and Steve Armstrong defeated the Freebirds (Jimmy Garvin, Michael Hayes, and the masked Baddstreet, Brad Armstrong); needless to say, the relationship between Steve Armstrong and Baddstreet was not mentioned.
* WCW treatment — no music, no televised entrance, no flashy costume, just a quick announcement of name and hometown during his opponent's much flashier entrance. And then he won that match. And then 171 more. By the end of that streak, he had his own Popularity Power going.
* WCW trying to tell NJPW how to book and WCW trying to enter a talent exchange with All Japan.
* WCW until it was cancelled by TNT as a result of overhauling its program lineup.
* WCW used during their "Worldwide" and "Saturday Night" shows of the 1980s.
* WCW, Vicious had powerbombed Nash and various outside interference had muddied the waters, Nash attempted to powerbomb Vicious, but for whatever reason was unable to and simply left Vicious laying in the ring. When the referee finally awakened, Nash told the official 'I stuck him!' The referee, amazingly, believed him (!) and awarded the match to Nash.
* WCW was exceptionally brutal, yet Cactus Jack never stopped. Highlights include a

broken nose and dislocated jaw, another broken nose, a severe concussion, and losing a chunk of his right ear during a 1994 house show in Munich to the inordinately tight ring ropes.
* WCW was in the group for about a month, May-June 2000, as "G.I. Bro," which was his original gimmick in his GWF days, before he went back to himself.
* WCW was quite notorious for a while for totally ignoring the rules of their matches, like brawling outside in a cage match, or scoring a win by pinfall in a match type that couldn't be won by pinfall.
* WCW was working for WCW without a contract (which in WCW usually paid a weekly salary instead of per appearance), he would sign in at each TV taping. After he quit, he asked a friend to keep signing in for him so he could keep getting paid. It worked for a few months until they were caught. It's believed that there were many, many other screw-ups where wrestlers were forgotten about and paid for doing nothing.
* WCW Watch for him checking his arm after smashing the third window and the subsequent splatter of blood when he pounds on the white hood.
* WCW were the only wrestlers who drove their own trucks and since WCW buried both of them, they became more famous as monster truck drivers than pro wrestlers, especially Fortune, who retired from wrestling completely. Madusa still appeared on the shows of World Wonder Ring STARDOM, RISE and such, even if her driving comitmits prevented her from wrestling on them.
* WCW, who had long been seen as overstaying their welcome. You can imagine how well that didn't go over.
* WCW, who periodically interrupted the wrestling show to ask the fans where the rowdiest section was at.
* WCW Worldwide in advance, exposing the business and essentially etching everything in stone. This also meant that WCW drew ZERO dollars at the gate.
* WCW would also double as her ring gear - albeit with a removable skirt for mobility.
* WCW would have his valet Kimberly hold up scorecards whenever he executed a particularly effective move. Naturally, winning the match earned him a "10."
* WCW would often randomly scream for no reason but when attacked by Juventud Guerrera her scream proved painful enough to ward her would-be assailant off.
* WCW wrestler "Heavy Metal" Van Hammer, he never really accomplished anything in WCW or anywhere else, never winning a title in any promotion.
* WD-40, the all-purpose ~~lubricant/de-greaser/de-ruster~~ water displacer, was so named because WDs 1 through 39 didn't work as well in testing.
* W.D. Gaster. We can only learn about his existence from several very well hidden Easter Eggs. He used to be the royal scientist before Alphys, but got somehow killed by his own invention, resulting in him being
* W.D. Gaster. While the extremely short bits we learn about him do indicate that the things he was researching are pretty out there, there is absolutely no indication of him being the mentally unstable and apathetic or even sadistic guy he is so frequently depicted as.
* WDM Bell, the most prolific elephant hunter of all time, demonstrated more than a thousand times how inaccurate this belief was. He regularly took down elephants with a single shot of .303 British (a round soldiers swore was incapable of killing humans) simply by getting close to the herd and calmly shooting his target in the brain to drop it on the spot. It turns out thrill hunters were both poor shots and had never bothered to learn
* WDW's original waterpark, "River Country". Most of the attractions centered around a beach on the shores of Bay Lake and there was only one treated swimming pool in the park. Due to competition from the much larger parks Typhoon Lagoon and Blizzard Beach, as well as a Florida Law requiring water parks to use filtered water, the park shut down in 2001 and left untouched, making for an unusual blight in the middle of Walt Disney World's spectacle. The shower building and ticket booth were used by the neighboring Fort Wilderness campground, and only a fence separated guests from the stagnant upstream plunge pool. In 2018 Disney announced

plans to build a new hotel on the site and demolition of "River Country" followed in April 2019.
* We’ll all get a great view of Uranus tonight, and we won’t even need a telescope: If the title itself wasn't giggle-worthy enough the first sentence of the article turns it up to 11.
* WE 3 are a cat, a dog, and a rabbit who have been turned into killer cyborgs by the military. They are not happy with their situation, and this sci-fi plot device is used to address the larger issues of animal testing and animal rights.
* We 3: The protagonists are a cat, dog, and rabbit. Though they are cyborgs, and capable of simple speech, their thought processes and behavior are very different from that of humans.
* We actually get to see how he comes to those weird answers in an episode shown from Pinky's perspective. He barely listens what Brain is saying and his mind wanders off on odd tangents until he is thinking about things that seem completely unrelated to the conversation to anyone but him.
* We actually get to see the classic shark face on a few Federation units.
* We actually meet a dealer in such accoutrements in the Tiffany Aching series of
* We Ain't Sure, Pal." One of their early singles was released with the words "We Are Sick People" scratched into the innermost part of the vinyl. Which is true? We are still pondering...
* Weak, but Skilled and the second weakest of the Hashira in terms of raw power, Iguro compensates for his lack of physical strength by focusing his style on locating and hitting the critical weaknesses within his enemies' defenses, using wavy serpentine movements involving a lot of slashing and stabbing to slide his sword in between enemy counters and deliver maximum damage with a minimal amount of force.
* Weak, but Skilled, but so far it seems to be mainly Roger Gracie — grandson of Carlos Sr. (mother's side) and one of the only six men black belted by Rolls Gracie — who holds up the Gracie banner at the top level in jiu-jitsu.
* Weak, but Skilled combatants like Krillin and Master Roshi. For all their power, Goten and Trunks are too inexperienced and straightforward as fighters to do much good in that situation.
* Weak, but Skilled. Her centuries of training has made her practically invincible.
* Weak, but Skilled into an art form. Though they usually fall prey to the first attack in a confrontation and do not do well on offense, they are so patient and tenacious that they can often surprise more powerful opposition (Hawk and Tory in the school brawl).
* Weak, but Skilled the enemy with its arsenal of chemical weapons and ambush capability.
* weak by comparisen short CO power meter which he can use much more frequently than others, clocking in at only two stars for regular (which can be charged in one good turn) or five for super.
* Weakened by the Light gag in front of James and Kat to hammer their position home.
* Weakened by the Light: Sunlight tends to be harmful to (most) vampires, either being very painful to them at best, or else causing them to quickly burn to death.
* Weakened by the Light: Supernatural creatures perish when exposed to sunlight.
* weakened each other so they would be easy pickings. Sensor probes are periodically sent just barely outside the cloaking radius to determine whether it's time to attack. It's mentioned that the isolation and lack of outside light or input is driving the crew a little bit crazy. The debris and emissions discouraged anyone from taking a close look. They still ended up being spotted, though admittedly that was a fluke.
* weakened green constructs - it won't do anything if you get smacked by a giant green fist (unless you create yellow ring armor.) Painting yourself yellow won't really do anything.)
* Weakened spirits can possess either an object (turning it into a Tool) or a person (turning them into a medium). Spectrals with a matching spectral energy color can then use that spirit's special powers, while the spirit leeches off some

of the spectral's energy until they recover. In both cases, the spectral is usually the one in control, though there are ways for the spirit to take over temporarily. Normally, spectrals are either Tool-users or mediums (or neither); being both at the same time is rare and dangerous. Mr. Spender has a light spirit in his sunglasses that helps him contain the darkness spirit in his body.
* weakens your units). Needless to say, they're typically seen as exercises in masochism.
* weaker comics go-middle-of-the-road by having it augment his strength but gradually reduce his stamina.
* weaker in our observable universe than it should be. This may be explained by the possibility of it being spread out over a multiverse.
* Weaker in the Real World: A being can do anything in dreams, but not so much in reality.
* Weaker in the Real World: A being who exists in a dream-like realm loses their powers when in the real world.
* Weaker Twin Saves the Day: Where one twin is weaker but ends up reluctantly saving the day when his stronger brother dies.
* weakest equipment you have, just because you're feeling vindictive and want to humiliate them.
* weakest link, goodbye" in class, and Stewie went on a (sarcastic) tirade about how unoriginal that was.
* Weak Hero, a bully who delights in tormenting others and abusing loopholes to do so. In one of his first appearances, he deliberately leaves his cell phone ringing just to annoy everyone else in the room.
* Weak Hero, after a lengthy flashback sequence to Gray's middle school days, Alex comments that it feels like it's been a while since the gang have been at high school.
* Weak Hero, after confirming that his friend Alex was beaten up by Jimmy, Ben effortlessly crushes his can of soda as he becomes resolved to take down Jimmy and the Union.
* Weak Hero. After his lackeys lose a fight and come crawling to him for help, he merely beats them up further and chastises them for not winning. Anyone who serves Wolf does so out of fear, not because they enjoy the position.
* Weak Hero after the middle school fight with Donald Na. Ben, who was only keeping himself conscious through pure instinct, collapses after Donald leaves. His arm's bleeding severely, so Alex has to give him an impromptu tourniquet and then carry him all the way to the hospital.
* Weak Hero Alex Go by "Gogo". It catches on with the rest of their friend group as they slowly get closer to the two.
* Weak Hero, Alex holds himself responsible for Ben's arm injury, as not only was Ben protecting him, but it was Alex getting involved with the wrong crowd that led to them both being at the construction site in the first place. Even though Ben constantly tells him not to blame himself, Alex can't help but do so.
* Weak Hero, and is liable to get ganged up on since he has a bad tendency to rush into every battle.
* Weak Hero, and later on Alex feels comfortable enough with Eugene to confess his insecurities to him. After the harrowing battle between Jake and Ben, the group spend a panel all praising Eugene for always knowing how to make them feel better.
* Weak Hero and starts beating Wolf relentlessly, repeating to himself "I told you. I told you. I told you."
* Weak Hero, before fighting with Ben, Jimmy throws him a pack of wipes to help clean up his bloodied friend. It's a ruse, however, as Jimmy punches him the second that Ben is distracted with his catch.
* Weak Hero, Ben asks Gray if he wants to hang out at the pool hall, but fully expects Gray to refute him like he'd done before. So when Gray agrees to it, it takes Ben a second to stop saying he understands to brighten up instead.
* Weak Hero, Ben isn't quite able to peg Rowan's name down after he first joins the group.
* Weak Hero, Ben performs a dramatic version of the otherwise comedic 'ear yank'

version of this trope: when he finds Alex beaten down by Forrest, he grabs Forrest by the ear with a grip like a vice and demands to know if he was responsible for the beating.
* Weak Hero. By Season 3, he's really started to beat himself up for how many times Ben has saved him without him able to return the favour, and he starts training harder than ever so that he can stop being a burden to the group.
* Weak Hero. For as much as a pain it can be for the rest of the band to deal with his pretentious attitude, he is genuinely a musical genius. Gerard argues with Hyeonjin the most, and yet is also the one most besotted by Hyeonjin's musical pieces.
* Weak Hero, Gray first becomes properly acquainted with Gerard, Ben, and Alex after the trio help him stave off a gang of bullies. They're gradually drawn closer through the various battles they face as Gray climbs the hierarchy's ladder, until he's eventually able to admit to himself that he sees them as friends.
* Weak Hero, Gray restrains Wolf by pulling his sleeves over his hands and then tying them behind his back. Wolf is eventually able to escape from it thanks to a nail sticking out of a nearby structure.
* Weak Hero, Gray's a fan of taking down his opponents in ways that are based off their own bullying techniques:
* Weak Hero hair often falls over his right eye, especially in moments that emphasise his aloofness or hostility.
* Weak Hero has Gerard, already dealing with a lot of shit, decide that he's sick and tired of the bully that's been hounding him, so he grabs the guy by the hair and starts laying into him:
* Weak Hero Helmet's appearance stands out from the crowd. With his tiny black eyes, widely set mouth, and grey skin, he barely even looks human in some shots.
* Weak Hero. He's shown with a bandage there before entering middle school, implying that's the timeframe that he earned the scar, but the details of it haven't been revealed.
* Weak Hero. However, for the most part, they'll show up the next day looking right as rain aside from a smattering of band-aids.
* Weak Hero is a self-described 'delinquent fan', hence his extensive knowledge on all the ones that Gray comes across.
* Weak Hero is a street fight addict, according to Grapes. When he's first introduced, he's hounding some strangers on the street for a fight.
* Weak Hero is normally very stoic and reserved, which places great emphasis on the moments when he loses his cool:
* Weak Hero is overflowing with young men who are constantly throwing themselves into battle, the sparse amount of women in comparison mostly stick to the sidelines and bemoan the inability for anyone to step in and stop them. The idea that a woman could step up and try to end a fight is never even presented as a possibility.
* Weak Hero is revealed and Wolf gives him a thrashing; the light-hearted Jake Ji has the dour Dean to keep him in line; and then there's Donald Na at the top, who's assisted in his business dealings by Kingsley. Though he's refused to get involved with the Union, Ben Park is just as strong as them and has his own right-hand man in the form of Alex Go, his best friend and stalwart ally since childhood.
* Weak Hero is short-sighted in his goals, laughs and smiles all the time, can't sit still, and will run up to a group of strangers and start beating them up just because he's bored. Unfortunately for his victims, he's as powerful as he is unpredictable.
* Weak Hero. It's easy to forget that he's in middle school when Gray reminisces about him, given how mature and intelligent he was. It's not every day that you find a middle schooler casually bring up Laurens van der Post and Kant's categorical imperatives in a discussion about finding meaning in life.
* Weak Hero. Jared, an underling of Ganghak's Wolf Keum, gets two lackeys to steal Wolf's prized bag containing important business files. He also orders them to steal it while wearing Eunjang uniforms and then sets things up so that the Eunjang student Rowan ends up toting the empty bag. This is all to direct Wolf's attention to Eunjang High in the hopes that he'll conquer it.

* Weak Hero, Jared convinces Gray to come to Wolf's location by showing him a picture of his friends after they were violently beaten by Wolf, implying that worse would happen to them if Gray didn't come along.
* Weak Hero, Jared Sun only cares for himself and will do everything in his power to bolster his reputation and connections while avoiding any sort of actual, physical battle. He was the only member of Wolf's gang to abandon the climactic battle between Ganghak and Eunjang, escaping down the emergency ladder while no-one was looking. This cowardice ends up being his undoing, as his lack of injuries alerts Wolf to something being off with him.
* Weak Hero, Jared Sun's uncle is the head of school affairs, which explains why Jared gets such good grades even though his intelligence is rather mediocre.
* Weak Hero, Jimmy Bae is the first antagonist to pose a serious threat to the heroes after the schoolyard bullies they'd been dealing with up until that point. He's also the first to have a personal connection to them, having faced off against two of them in the past. Despite that, he's only the lowest-ranking head of the Yeongdeungpo Union.
* Weak Hero, Jimmy has a surprising turn-out when he's able to beat the higher-ranked Wolf into a bloody paste. Except then Wolf asks with a smile if he's done, declares it "his turn", and easily beats Jimmy into the tarmac.
* Weak Hero. Later, Jared’s reputation gets ruined by Toby’s message board postings about his coasting through school through internal connections. Jared gets furious about this and confronts Toby demanding why he did it. Toby beats him up and calls him out on his hypocrisy: so Jared can ruin a family’s livelihood with lies, but Toby’s not allowed to tell the truth? Screw that.
* Weak Hero like the rest of the cast. Whether he has South American ancestry, is a dark-skinned Spaniard, is mixed, or something else entirely hasn't been revealed.
* Weak Hero, Lily doodles Gray's likeness into her notebook while admiring him from afar. She hurts her hand slamming the book shut when her friend nearly sneaks a peek.
* Weak Hero pertain to school. He even shows more interest in a science contest than he ever does in the classroom.
* Weak Hero right hook. In the pool hall he hits a student hard enough to send them rocketing into one of the pool tables. When he fights Gerard he punches him hard enough that the air around him spins as he falls to the ground.
* Weak Hero, Robin reveals upon being defeated by Ben that he was just bait, and now Ben has to choose whether to go save Alex, Gerard, or Gray from being ambushed by the rest of Robin's gang. He's saved from the decision by Gerard's timely intervention, having already taken down the gang members that had severely underestimated him. Gerard heads off to support Gray while Ben is able to go save Alex.
* Weak Hero, Stephen's selfless decision to sit next to Bryce Oh at lunchtime dominoes into Stephen getting thrown off the school roof, all thanks to Bryce's festering jealousy and hatred.
* Weak Hero; Teddy, a former bully turned formidable ally; Rowan, a one-trick pony who nevertheless prevails with his killer elbow and endless bravado; and Eugene, who makes up for his complete lack of fighting skills by being incredibly knowledgeable and always determined to stand up for his friends, regardless of how badly he's beaten down for it. The more that they fight together, the deeper their friendship grows, until their loyalty is unmatched by any of the other fighting groups.
* Weak Hero, Teddy torments a nameless student by doodling sideburns onto their face, then forces them to draw a large 'X' on Gray's shirt with the same marker.
* Weak Hero, the existing gang hierarchy of Yeongdeungpo ends up in a long, drawn-out war with him and Ben's gang.
* Weak Hero, the quiet Gerard goes along with Jimmy's gang when they forcefully drag him to the school's incinerator; however, when they start making fun of his hair, he gives up on remaining calm and starts to lay into them with his vicious kicks.
* Weak Hero, this is how Wolf susses out that his subordinate Jared was the one

responsible for stealing his bag, not a student from Eunjang. After the battle against Eunjang, Jared makes mention of "additional companies" while talking about Donald Na. Said companies were only ever mentioned in the documents that Wolf kept in his bag.
* Weak Hero this is Teddie's fatal flaw that contributes to his humiliating defeat at Gray's hands. He obsesses over brand names and superficial possessions, so he loses it when Gray messes with his expensive backpack and is easily taken down in the ensuing fight.
* Weak Hero; though he can handle it when he's the one taking a beating, he can't stand the people around him getting hurt, and feels responsible for it even when it isn't this fault. In middle school, Alex keeps silent about fighting for Ben's honour, knowing that Ben would blame himself for it if he found out.
* Weak Hero to his best friend Ben, and he ends up picking a fight with Dongha instead to prove himself.
* Weak Hero to make himself seem more intimidating. Even his friends sometimes zone out when he starts talking too much.
* Weak Hero to the good guy's side, he can't help but resist the urge to be nasty here and there.
* Weak Hero was always a stoic and unapproachable person, but his barriers increased tenfold after his first true friend was hospitalised. He gradually ends up getting closer to Ben's gang, however, until he's eventually able to admit to himself that they're his new friends.
* Weak Hero, when Gerard uses a personalised tarot deck to read for Rowan, the result reads that Rowan is going to have a tumultuous life at Eunjang High.
* Weak Hero when Gray arrives at the Eunjan vs. Yoosun fight by violently headbutting one of the guards, causing him to stumble into the middle of the field.
* Weak Hero When he first does so, his best friend makes a note of it. When he does it again in the presence of a new group of friends, they all blush in pride at him opening up.
* Weak Hero when he's attacked by Jimmy Bae, Ben is the one to arrive at his side and protect him.
* Weak Hero whose good looks have been pointed out by multiple male characters- including his friends Eugene and Alex, who have repeatedly found themselves blushing over how beautiful and cool Gray is.
* Weak Hero? Why does he know how to play guitar like a pro? Where and why did he learn how to read with a personalised tarot deck? What's his part-time job? Nearly a hundred chapters in and all the information known about Gerard just raises more questions.
* Weak Hero, with Ben's superior willpower giving him the slight edge he needs to win.
* Weak Hero, Wolf declares that he's leaving the Union after he's beaten by Gray. Donald Na, the head of the Union, emerges from the shadows behind him, taunts him into a fight that Donald wins effortlessly, and then tells Wolf that he has another job for him when he calms down.
* Weak Hero, Wolf is established as being even more vicious than the bullies who came before him. However, even in those fights, people were being beat so severely that it's amazing they didn't need a hospital visit. So in order to establish Wolf's brutality as being on a whole other level, there's a much higher emphasis on the amount of blood that's spilt by his hand. One of the most striking shots is Wolf aiming a fierce kick at Eugene's head, which then cuts to an aerial shot of Eugene's glasses flying through the air and a large spurt of blood following them.
* Weakness, the subject is stoic because, when she was kid, emoting didn't go well for her, so, she suppressed them to not get a punishment, making otherwise the titular weakness. However, she can't sort out how to cope with or express them, so she's stoic to stay composed.
* Weakness to sunlight often varies by age. Depending on the setting, elder vampires are either resistant (or fully impervious) to sunlight, or sometimes
* Weakness Turns Her On: A female character is aroused by men who are perceived as weak.

* Weakness Turns Her On: A girl is attracted to guys who are more vulnerable than males are expected to be.
* Weakness Turns Her On: Guys with softer, weaker (by typical masculine standards) dispositions attract this girl's attention.
* Weakness Turns Her On: Some tomboys are attracted to boys who are weaker than them or at least submissive.
* weak point, and uses skirmishers to selectively attack the siege engines, withdrawing from combat with anything else. In this way, he destroys so many siege engines that Ansom is forced to wait another day for reinforcements.
* Weaksauce Weakness: A character is vulnerable to a substance that is ridiculously easy to obtain.
* Weaksauce Weakness: A powerful being is vulnerable to an ordinary substance or item.
* Weaksauce Weakness: A super-powered being is vulnerable to a ridiculously common substance or item.
* Weaksauce Weaknesses set in once again as this became easier and easier to do.)
* Weaksauce Weakness makes it a plot point by having Galen Erso, one of the key architects of the weapon, create that hidden weakness. He did because he believed that the Empire would never discover it, and was aware that, unlike his colleagues, the weapon would be used frequently under the Emperor's rule. It's only thanks to the mission to retrieve the plans that the Rebel Alliance ultimately succeeds.
* Weaksauce Weakness — using her power blinds her, and she is canonically recorded to fly into trees whenever she uses it.
* Weaksauce Weakness of the dealer, which Kim knew about from prior experience with him.
* Weaksauce Weakness pastry.) Even the criminal mastermind Strepfinger was apprehended after Maria lured him out of his office with a pie. (After she knocked him out, she said, "You know, for an evil genius, you're pretty dumb.")
* Weaksauce Weakness: Your defences fail against a common and/or feeble attack.
* weak swordsmen can parry arrows and cut boulders in half, that's really saying something. He died before we meet him, but his disciple Yerin is a main character, and she repeatedly punches above her weight class by sheer dint of the sword skills he taught her.
* Weak to Fire: In the legend of Hercules, the only thing that would stop the Hydra regrowing its heads after one was cut off was to quickly cauterize the stump with fire.
* Weak to Magic: When your power comes with a weakness to magical attacks and effects.
* weak which he's spent time perfecting. Most people don't even realize the new superhero is Kryptonian because he doesn't fight like one.
* Weak-Willed, indecisive ruler with a strong desire to be liked and easily manipulated by the people around him was inherited by his great-grandson, Tommen.
* We All Die Someday: Casually pointing out that everyone dies eventually.
* we all have ridiculous handles like that (or we crib them from games and anime).
* We all know HYDRA as a terrorist outfit that aided the Nazi party, but as it turns out, they're the continuation of an ancient Egyptian cult (but their

* We all know, yeah we all know, we all know, we all know, we all know we all know we all know we all know we all know, we all know, we all know, we all know. (
* We All Live in America: A work taking place in one country makes it painfully clear that the creator is from another.
* We All Live in America, not about authors getting elements from other cultures wrong because of unfamiliarity with them. In fact, given that Rammstein is a German band and the trope itself is not limited to the United States, it would only be an example if the song assumed that We All Live in Germany.
* We All Live in America's early filmography. These films were usually set in the United States, since the films intended audience was there. Thus, the mostly-Canadian cast would be playing Americans, usually not even attempting to cover up their native accents. In rare cases where these films were explicitly set in

Canada, they would nonetheless cast American or British leads in order to widen the film's international appeal. Thus, Americans would be playing Canadians.
* We Almost Lost Detroit, the many hilarious hijinks involving the Fermi Nuclear Power Plant are detailed. One of which includes the fact that right before it opened, someone had noticed that the pipes to the drinking fountain apparently originated from the area that was responsible for storing the coolant water.
* We also aren't shown for sure if Swamp Thing, Batwoman, and Batwing do die. We see Swamp Thing swarmed by the Paradooms, Batwoman tackled off one of the towers, and Batwing shot out of the sky, but we aren't shown anything that indicates they died.
* We also briefly see a little girl vampire during "Halloween". In an interesting note, it's likely she wasn't bitten. This is the episode where the people of Sunnydale are being turned into their Halloween costumes by magic spell.
* We also don't see the hawk kill Violet; as it grabs her, it cuts to Fiver's reaction, then shows the aftermath with some feathers and a few drops of Violet's blood. Nor the aftermath of the two Efrafa officers being hit by the train.
* We also get glimpse of what happens when there is one too few in Marlowe's arc, as that also triggers an Apocalypse level world ending events, everyone was lucky they fixed it before things went into
* We also get Hardison as a priest and Parker as a nun in "The Beantown Bailout Job".
* We also get Kumacy, Perona's giant zombie teddy bear. He shows up in the middle of Usopp's fight with Perona — that's already going pretty badly — and delivers a nasty
* We also gets a chestbuster scene (with an iratus bug) in episode "Doppelganger", with the characters mentioning the movie
* We also get the Envy demon who does this to the Templars and attempts to do so on The Inquisitor...worthy of note is
* We also get the occasion played straight (Black Allis, a frequently mentioned example of what happens when witches go bad) and
* We also get to see the shadows of everybody at Kul Elna being boiled alive in molten gold, while Bakura
* We also glimpse a smaller-scale version from President Clark after
* We also have a case with Admiral T'Nae, though she typically makes up for it by being right.
* We also have all of the demons at Xander and Anya's wedding, and Clem at Buffy's birthday party, without any of the Scoobies' 'civilian' friends realising the truth.
* We also have Batman and Wonder Woman dancing to this, from Batman's insistence that they are
* We also have Big Macintosh. The abbreviated version of his name, "Big Mac", is owned by
* We also have Deidara, whose power is instantaneous but prefers to sit back and watch for a while.
* We also have Fermet, who "tested the extent of their immortality" by stabbing hot fire pokers into Chez's
* We also have Fishman Karate, a form of karate practiced by the Fishman race (though humans can learn it too) that allows them to manipulate water, including in the atmosphere, which grants for some strong moves (and injuring characters who are otherwise pretty invulnerable to blunt force like
* We also have General Sontar (of whom the Sontarans are all clones), Jamie (
* We also have Javik, the last Prothean. A soldier during the last days of the Prothean Empire, whose plan was to go into
* We also have Joshua, who Neku decides isn't so bad to have around because he can decipher whatever the hell Minamimoto decides to send them for mission messages, only to correct himself five seconds later when his smug personality reappears and Neku remembers why he hates the kid.
* We also have Neiru’s massage chair/butler (don’t ask) Sebastian. Despite claiming to lack emotions, he got

* We also have Sasuke's version. While it's no sharper than an ordinary sword, it becomes nearly unblockable when he charges Chidori through it. With it he can cut through kunai like butter. When he tries to use it against Killer Bee, he learns the hard way that lightning-infused weapons are commonly used by Cloud Ninjas, and gets countered pretty hard by Bee's own blades.
* We also have Tenzin's daughters Jinora and Ikki who, along with their brother
* We also have the Bull of the North, the First And Forsaken Lion, the Mask Of Winters, the Roseblack, Ma-Ha-Suchi... Every Exalt who opts to lead an army automatically qualifies; the Celestial Exalted, in particular Dawn and Zenith caste Solars, were made to be this for armies of Exalts.
* We also have the case of Ophelia, who certainly could be played this way. Consider her lines after her only on-stage confrontation with Hamlet:
* We also have the Ebon Dragon, the literal inventor of the concept of
* We also have this with Chen, who still doesn't have her last name revealed, even when Ran Yakumo and Chen come up in the same sentence, though that could have more to do with that she is probably regarded to be more as a pet.
* We also have, to a slightly lesser extent, Fate T. Harlaown towards Nanoha. While
* We also have Water 7, though that's a very minor case. On the surface, it seems like a happy, Venice-like city where its premier ship-building company makes ships for people all over the world, and they have a railroad that runs on the ocean. We later learn that the island it's on is sinking, not helped by a
* We also know, right from the end of the pilot, that Boomer is a Cylon, and we
* We also learn most of Grisha Yeager's story through flashbacks. These flashbacks
* We also learn that Helen endowed the coffee maker with intelligence because "it seemed to make the vacuum cleaner so happy!" More in line with the trope, at one point the lab's computer systems spontaneously gain sentience and rebel, so Dave gives Artie a palm pilot with a
* We also meet other intrepid reporters on that show, such as C.J.'s friend Will Sawyer who ends up getting killed in the Congo. And there's a subversion where Toby gets a press pass for a Russian journalist so she can cover a summit between their two governments, having assumed that the reason the Russians didn't want to let her in was that she was some kind of idealistic
* We also never see the death of the woman at the party, and while Bill looks at Mandy's corpse, she never looks visibly injured.
* We also refer to all of Africa by the Roman name for what's now Tunisia, and all of Asia by the Greek name for Mesopotamia (that was Asia Major, if anybody wondered why Asia Minor was called that).
* We also see a tank headed straight toward a parked Ford Pinto, but the scene is cut away from before any impact and the total lack of sound effects in the next shot (indoor, in the house the car's in front of) leaves the presumption the
* We also see how the contestants survived the volcano's eruption in the finale of
* We also see that Qo'noS, his home planet, is not inhabited only by Klingons, but there is also a province where Orion immigrants live and even some renegade humans.
* We also see the Southern Raiders all letting out a battle cry before attacking the Southern Water Tribe. Who reply with ones of their own.
* We also see Zebes exploding in the same way, but with cooler visuals, in the Adventure mode of
* We also turn our finger in a twisting motion when we're asking someone to turn volume up or down, despite the fact that most devices now have buttons with up and down arrows on them. Granted, some speakers have dials, and so do many MP3 players, but those are outnumbered by the buttoned devices.
* Wealth from an abandoned army depot and arms a militia with these guns.
* Wealth's in a Name: A rich person has a name appropriate to their status, often being a play on a word having to do with money or wealth.
* Wealth's in a Name: A rich person has a name that has to do with being rich.
* Wealth's in a Name: You can tell this character is well-off by their name.
* Wealthy Ever After" apparently ends with the protagonist Hunanup richly compensated for his troubles and rewarded for his eloquence with numerous goods

confiscated from the household of Djehuty-nekht, the man who had wronged him.
* Wealthy Ever After: The story ends with a character becoming wealthy.
* Wealthy Philanthropist: An rich character who attempts to use their money to help the poor and other people who are in need.
* Wealthy Philanthropist in Kalos, while secretly planning to remake the world regardless of the methods.
* Weapon Brown and his first actions upon gaining his powers were to kill every other test subject. He was impossible to control without mental conditioning, and it's implied that the conditioning won't hold for very long.
* Weapon Brown, both are fairly scarce. At one point a character is shown paying for something with a handful of D-cell batteries.
* Weapon Brown comes from various syndicated comic strips. Identifying all of them and picking up all the references and in-jokes would take someone who's a talking encyclopedia of the hundred year history of comic strips.
* Weapon Brown. Due to the comics post-apocalyptic setting, the majority of humanity's survivors, especially those living under the yoke of the Syndicate, survive off F-Rations, calorie-dense emergency rations left over from the pre-war military. The Syndicate uses their control of the Caloric Reserve to consolidate their power, even if the rations tastes horrible.
* Weapon Brown with the neuromuscular syndrome simply called "The jigs". It is explained to be caused by overexposure to chemicals, and the symptom is violent physical seizures that that are reminiscent of the dance moves from the Christmas special. And the seizures will continue until the sufferer dies from it, usually by a broken spine.
* weapon cultures have a taboo about using the left hand for such things. Often due to the left hand being associated with being "unclean" (as generally the one used to clean oneself after defecating...)
* Weapon for Intimidation illegal in a civilian context is if it's part of an escalation of force in response to a credible threat, i.e. you told an attacker that you had a gun and that they needed to back off, they persisted, and you pulled out the gun, pointed it at them, and repeated what you said and warned them that you would shoot rather than immediately pulling it on them.
* Weapon for Intimidation: I'll use this weapon to kill you, even though I hardly use it!
* weapon, if the character they're most like met an unpleasant and/or deadly end. Under World, meanwhile, fates people to live through an unearthed memory of their current location (which its Stand user uses to trap the heroes in the memory of a crashing airplane). Under World is a little more flexible because Donatello's victims aren't necessarily incorporated into the memory like Bohemian Rhapsody incorporates victims into stories. This means it's possible to circumvent the bad portions of a memory, as long as you wouldn't keep the memory from repeating its original form.
* Weaponized Animal: Using an animal with weapons mounted on it to attack.
* Weaponized Ball: When the weapon is a ball of any kind (not including regular ammo, duh).
* Weaponized by Bevier at one point: after giving a guard captain an on-the-spot execution for insubordination, he intimidates the man's followers into obedience by leading them in prayers for the dead man's soul.
* Weaponized by Cap at the end of vol. 1, when he tells Hulk the naked guy (naked
* Weaponized by MAD Yodeler, whose yodeling is so dreadful that it can
* Weaponized Car has built in hidden weapons that can help the hero or villain out.
* weaponized. Drakken had modified one of his synthodrones to resemble a hot 17-year-old boy, and sent him to the school to start an relationship with Kim to keep her distracted during his grand scheme. When Kim finds out the truth, she's heartbroken, and Rufus destroys the synthodrone in retaliation.
* Weaponized Exhaust: A spaceship's exhaust fumes are used as a weapon.
* Weaponized Headgear: When the Improbable Weapon is a legitimate form of headgear.
* weaponized. In a future when neurological mods can be implanted to alter the workings of the brain, a pair is developed that will A) suppress the user's ability

to collapse wave functions by observing them and then B) let them choose from among the infinite possible timelines which one will become real. A person using it can do anything they want, as long as there's even the slightest possibility of it actually occurring. Break locks by picking random combinations, navigate through a crowded room unseen because everyone happened to be looking the other way at the same time, walk through walls via quantum tunneling effects.
* Weaponized Landmark: A powerful weapon is built inside a famous landmark or monument.
* weaponized military version of the Correspondence Portal, built into a starship, and used to teleport whole formations of soldiers at once down to the surface of a hostile planet.
* weaponized nanotech swarm from the Dark Age of Technology called the Bloodtide which started out as multiple individual intellects before merging into a single mind. This being 40K, it got possessed by a daemon and went around forcing the blood out of people's bodies.
* Weaponized normal attacks involve roasting his opponents with his thruster-fire.
* Weaponized on the paintball field, with Doc using a pie from Roger's lunch to tag out an opposing team member.
* Weaponized staple (Slade's "Merry Christmas Everybody") into Shona's headphones so she'll be too captivated by the tune to acknowledge the Dream Crabs.
* Weaponized Teleportation to kill or incapacitate, and weapon-like teleportation devices.
* weaponized that, rather than just giving him some random hat from the shop, he gives Maxim his own prized hat.
* Weaponized, when your army's strategist suspects the enemy leader of setting a trap at a peace summit. He has access to a little girl said leader has a soft spot for and arranges for her to be present when the trap is sprung. The enemy leader proves unwilling to use lethal force with the girl watching.
* Weaponized, where the shockwave of a fifteen-thousand-ton starship moving at supersonic speeds close to the ground is powerful enough to throw people through the air and break bones as it knocks them down, in addition to breaking every eardrum for kilometers. While less thoroughly destructive than the use of the ship's guns, it works over a larger area and does so more quickly.
* weaponized, with driver Ben ducked down out of the line of gunfire, and steering via the rear-view camera's video screen.
* weaponized with special cat/dog plushies that stun anyone who stares at them too long with cuteness. They're not actual animals because then you'd have to shoot them to wake the soldiers up.
* weaponize ghosts," at least one of which communicates with the heroes via cellphone.
* weaponize it at one point. When a cache of British-made weapons start showing up in the hands of terrorists, Sir Humphrey has to start up an investigation into how they got them. However, Sir Humphrey has no interest in doing so, since that would inevitably lead to an investigation into how the British Government lost them in the first place, which in turn would make him look bad. So he puts out a memo which technically would kick off the investigation, but couches it in bureaucrat-ese so dense anyone who reads it's eyes will have glazed over before they understand what it's about.
* weaponize this a euphanism; it fires a tiny black maggot that finds any crack in your armor or soft cloth and digs in straight through you. The entire process lasts about a few seconds but it's devastating enough to be comparable to a bolter round (which is a rocket-propelled grenade) in lethality. The aptly named Devourer does something similar (and resembles an infested, swollen penis head to boot). At the far end of the spectrum, there's the Red Terror and Mawloc, who just straight up devour anyone unlucky enough to not get out of their way (the Mawloc is suspected to be made from the Red Terror, who might be a "prototype").
* weapon. Lacking any real training, he avoids fighting if possible — one of Sting's main uses is that it glows blue when orcs are near.
* Weaponless robots have slowly become the dominant type in other robot combat

events too, such as
* Weapon loadouts that don't require much ammunition or allow you put a
* Weaponlord had "barbaric victories" that functioned similarly to traditional fatalities; during a brief stun animation at the end of the match, the winning characters' moves took on fatal properties (projectiles lopped off limbs, etc.) These had unique ties into gameplay. If you were killed via barbaric victory you were not allowed to continue and received an automatic game-over. If you did not finish your opponent with a barbaric victory you had to face every opponent you failed to dispatch as such in a gauntlet level before the final boss.
* Weaponlord reaches a record by having every male character in the game (four sevenths of the entire cast) not wear a shirt. The other three are women.
* Weaponlord when one character's health hits zero it's possible for their opponent to take their head off with an attack. Continuing to attack the severed head in mid-air can lead to the head bursting open and the brain falling out.
* Weapon Masters, in a comparison between a traditional katana and a sword made of modern alloys by Chad Houseknecht (albeit in the same shape so it could be used by a Japanese sword expert in tests the same way), both swords performed equally well.
* Weapon of Choice and only available to people with major Neir blood (none of whom are playable).
* Weapon of Choice and specialty is knives. Sousuke learned this the hard way during his first fight with him.
* Weapon of Choice before joining the Night's Watch was a rather huge knife (which he used to sever Jaime's hand).
* Weapon of Choice, but powerful, accurate, and wrist-friendly enough for police to get the job done. What's more, any .357 Magnum revolver could also shoot .38 Special because that round was based heavily on it, meaning that many law enforcement agencies adopted .357 Magnum revolvers but still mostly used .38 Special in those guns for its lighter recoil, saving the magnum ammo for when they needed more firepower. To this day, it's still the go-to choice for snub-nosed revolvers.
* weapon of choice for enemy buildings (and the occasional enemy Spy). A troublesome Spy trying to ruin your little nest? Whack 'im. A sapper destroying your Engie's sentry? Whack it. An Engineer on the other team has a nicer dispenser than your Engie's? WHACK IT AND HIM!
* Weapon of Choice from a somewhat underpowered .25ACP Beretta to the iconic Walther PPK in similar circumstances, even partially basing the initial characterization of Q on the author of the letter.
* Weapon of Choice. He eventually gets the nickname "Eggman" from their oval shapes and white paint.
* Weapon of Choice in the seventies and eighties, the Tissue Compression Eliminator, which shrinks people down to a couple of inches tall and causes them to die painfully from square-cube law effects.
* Weapon of Choice is a boxing glove that fires out of a luggage case.
* Weapon of Choice is a double-edged dagger blade hidden in his right gauntlet, which he's seen using starting from the second part of the story. In the fourth one, Trinetra, he's seemingly upgraded the blade using a blade inscribed with the Triclops's emblem which allows him to access the dimensional gates of Kun Lun. To really drive the point home, when Amara merges with his arm, he takes the form of a large wrist-mounted sword when Yakumo needs to fight.
* Weapon of Choice is a stiletto no longer than a finger, although she's got no prolbems with using other weapons when needed.
* Weapon of Choice: Most slashers have at least one, blades and and axes being the most usual choice.
* Weapon of Choice. One Paragon Path, Daggermaster, even allows the rogue to specialize in using them to deadly effect.
* Weapon of Choice. They contrast with the regular militaries of the Kingdoms, such as that of Atlas under General Ironwood, made up of near-identical-looking soldiers and combat robots.
* Weapon of Choice this trope could apply, technically this white hair is just a

result of the (intentionally ambiguous) art-style. In all likelihood, Rose and Roxy have light blonde or orange hair.
* Weapon of Choice was a lord on his planet, making this trope applicable to him as well.
* Weapon of Choice, which he uses to knock any foolish foes into next week.
* Weapon of Choice, which she does use as weapons even though no sane person should.
* Weapon of Choice, which you can buy if you obtain enough reputation with them.
* Weapon of Mass Destruction as the final boss of the A Realm Reborn storyline.
* Weapon of Mass Destruction when it turns out he's actually the Champion of Balance and chaos was the last force he needed to experience in order to gain full power, beat Celesto, stop the Storm, and save the world.
* Weapon of X-Slaying: A weapon specifically designed to harm certain things, better than a normal weapon would.
* Weapon Plus greater scope villain was going to be Apocalypse, but this never saw print for unknown reasons.
* weapon project despite this, but is unfamiliar with many aspects of mainstream culture, and is often quite naïve.
* Weapons and armor (power armor included) are similarly customizable, and you can expect to spend a decent chunk of time working on making the perfect killing implements.
* Weapons and Wielding Tropes: Tropes about weapons, which are essentially tools used to kill.
* weapons are working just fine if you can actually somehow contrive to get it out in the open, though.
* weapon screams. His axe Gorehowl has special notches and holes in it. When it is swung, air rushes through the holes and makes a howling noise.
* weapons do not drop for her, so grinding for items is less effective than with other characters, like Soma and Alucard.
* weapons has the Aiming Laser, which is also instantaneous in use, but limited by targeting range; X has to target enemies before he can use the laser, and the targeting reticule stays fairly close to himself.
* weapons he steals from his adversaries mid-battle things with as lethal aim as he shoots.
* Weapons, in particular, have changed over the years; prior to the late 1800s, handguns were 'hand-crafted', as it were, by well-practiced and highly-skilled gunsmiths. The major downside was that a gunslinger couldn't visit just any gunsmith to repair a broken weapon; the hand-manufactured parts were specific to the particular weapon being repaired, and wouldn't fit in another gun (often, they wouldn't even fit into a new gun made by the
* Weapons in the game include "Thunderbolt Generators" that fire bolts of lightning.
* weapons is already a concept they're familiar with. Inuit have reported for centuries that polar bears kill walrus by bashing them over the head with ice chunks, and a female bear fitted with a camera was recently recorded chucking an ice block into the water in an attempt to concuss a swimming seal.
* Weapons made of adamantine bypass most objects' hardness — meaning that, essentially, they're so sharp that they can cut steel (hardness 10) as easily as paper or cloth (hardness zero). Of course, this ability only works on objects up to hardness 20, meaning that adamantine (hardness 20) cannot
* weapons of choice are two oversized, hooked knives which Cutter calls "pig-choppers" and which are instantly recognizable as his.
* weapons of choice, is this when the longsword is combined with the sheath.
* Weapons of Choice (it was too close to the edge of the Transition), and its reactor promptly blows up.
* Weapons Officer - Dalton Phillips, Obatu, James Brody, J.J. Fredericks
* Weapons of Legacy and became one of their greatest heroes, wielding a legendary trident in defense of his new homeland. But when the topic of marriage kept coming up, Ildashurn eventually ran out of excuses and had to promise to take a wife after

returning from a personal quest. He fully intended to run off, but when the doppelganger reached the surface, he found that he was unable to change shape - whether due to his magical trident or divine intervention, he was now permanently a sea elf. So with a smile, he returned to his ocean home.
* Weapons of Legacy preparing an ambush on the far side, leading her to swim as fast as she could back to shore before the gnolls circled around the lake to catch her. She made it just in time, grabbed her weapon, hopped onto her warpony, and charged into battle... without wasting a moment putting on her clothes or armor. "Worrying about modesty at the time would have meant swift death. As it was, only one gnoll lived to tell the tale, and whatever he saw that day, lighthearted Lunari didn't begrudge him."
* Weapons of Light — at least those in the regular Slayers universe and not the sentient starships of the Lost Universe
* weapons of mass destruction WMD that's been stolen, as the theft scene is at the very beginning of the book.
* Weapons of Mass Diplomacy exploits it for all its worth. The politicians that represent the United States, while looking kind and being nice to talk to, want nothing more than to conquer the world by having a new war to start up so that they might end up having entire nations under their control, hiding all of those ideas behind euphemisms. Entire chapters are devoted to stopping the United States from declaring a war.
* Weapons of Mass Diplomacy song. Not the best way to be taken seriously when it rings in the middle of a diplomatic summit.
* Weapons of the Gods (an rpg based on a Hong Kong comic), one of the background stories of the world has an invincible martial artist invade the heavens. He's easily curbstomping all the gods in his quest for immortality, what stops him was this...he had an extremely stupid disciple that he's fond of nonetheless. The disciple complained that he was getting hungry, the martial artist decided that it'd be alright to take a lunch break so he sends the disciple off to go herb hunting while he slaughters some divine cattle. The disciple finds some chili peppers from the fields of the sun god and show them to his master. The master is pleased and makes a beef hotpot. Unfortunately as soon as he ate it, the peppers burned with the force of the sun and so he ran around screaming, eventually falling from the heavens to crash head-first into some rocks.
* Weapons Of The Gods has you improve your kung fu by consummating your love. However, it only works in heterosexual interactions - for homosexual interactions, you need a special kind of kung fu to improve your kung fu. It doesn't sound this offensive once you read the book, and it's based on Taoism. Heterosexual intercourse allows for the unity of yin and yang, male and female, which is a major theme in Taoism.
* Weapons Of The Gods right out the gate, and character abilities deal with destiny, the wills of heaven and hell, and the fate of all of China (though it does have a lot of detail in its musings on cultural detail).
* Weapons Of The Gods RPG has the "Xia Pregnancy" martial arts technique that allows a woman to fight at (almost) full strength while pregnant. It also protects the foetus from any attack that does not kill the mother, and, during the third trimester, protects it from attacks that DO kill her.
* Weapons Of The Gods with one attack, or kill someone nine times over.
* Weapons on the same or greater scale as nuclear weapons include: plasma torpedoes (200 meter inter-ship ordinance), engineered viruses (including the Worldkiller Virus,)
* Weapons Plus (specifically, Weapon X) is also mentioned, with Alexander Pierce suggesting that Charles Xavier dealt with them when they came after Logan.
* Weapons, Resonators, Portal levels, and Power Cubes: yellow (L1) →→ red (L4) →→ purple (L8)
* weapons side. The only reason why she hadny been arrested is because her company is the only one still capable of supplying the Federation with mechs and if they had to do some backalley deals to stay ahead of the game, so be it

* Weapons training - typically with wooden weapons like bo staffs or bokken practice swords, although occasionally with the proper bladed weapons (which may or may not be dulled practice copies in-story) - apparently involves live sparring against an opponent, with no protective gear in sight (
* Weapons Understudies: Only have the weapons and vehicles for one side available to you? Have both sides in your movie use them.
* weapon variety that, combined, can withstand even the strongest Gem weaponry. Unfortunately, he does not have any meaningful offensive abilities, so his teammates must end fights for him. This changes in the third season, when he begins to develop a few offensive abilities, including a spike version of the his shield and greater physical strength.
* Weapon Wields You – Why bother learning how to use a weapon when it can do all the work for you?
* Weapon Wields You: To gain the weapon's (usually superior) fighting skills you have to give it control of your body.
* Weapon X can evoke this, with their partially empty and destroyed labs.
* Weapon X mentions being able to smell lies. He asks if Creed has a dating profile. Creed claims he knows nothing about dating profiles and tells Logan to shut up. Logan once again mentions smelling his lies.
* wear all black (like a stereotypical ninja outfit), even when it makes them easier to see
* We Are All Pirates' Revenge. Melvin's ship, the Zenpance, is described as looking rather run-down, which is supported by Melvin being envious of other pirates' ships, but it is still accommodating enough for the whole crew.
* We Are All Pirates' Revenge starts is called Inmundo, which is Spanish for "filthy", just to show that some of the characters have a lowly beginning.
* We Are All Pokémon Trainers. And quite some orders of magnitude below that, when bullying Nadia (Salamence, i.e.: a literal dragon), he has got himself almost killed.
* We Are All Pokémon Trainers... and with Reshiram, whom he was dating.
* We Are All Pokémon Trainers, Anom and Jane have this sort of relationship.
* We Are All Pokémon Trainers are often made either in the discussion thread, the wiki, or within the chatroom.
* We Are All Pokémon Trainers are RL siblings, as are Joseph and Emma's.
* We Are All Pokémon Trainers, Dot (a Vespiquen who plays up the Lady role) and Oshawittle (an Oshawott who plays up the Knight role) have this relationship.
* We Are All Pokémon Trainers, during the course of Team Earthbound, Nova, and other's adventures in PMD-B, a post-apocalyptic version of the Alternate Timeline, they find that many of the old cities have gotten a new coating of green. Azalea for instance was completely swallowed by Ilex Forest.
* We Are All Pokémon Trainers falls subject to this since Milagros is a girl's name. He even lampshades it while working at the Cerulean Gym in Misty's place.
* We Are All Pokémon Trainers for the most part, a day IRL equals a day IRP, which means that characters age as the RP goes on. For example, Tagg aging in real time from 19 to 22 over the course of the RP.
* We Are All Pokémon Trainers had numerous lovers in numerous ports throughout the world. Ever, PEFE!Every, All, Brie, Amanita, and Revy the Second are all descended from his paramours, Amanita in particular from a Spectran servant Revy met sometime during the Conquest Arc.
* We Are All Pokémon Trainers has Eon, who being a Latios is part of a species that are considered deities IRP, but he appears to have delusions of being on the same tier of power as legends like Groudon and Dialga.
* We Are All Pokémon Trainers has Milagros (in Pangoro form) accidentally launching Bastion across a room after an attempted high-five.
* We Are All Pokémon Trainers has nearly 30 players representing at least one human character, and that's without their Pokémon and other NPCs.
* We Are All Pokémon Trainers has numerous arcs brought into several sagas:
* We Are All Pokémon Trainers have ended up in a relationship just like

their characters.
* We Are All Pokémon Trainers is a mute girl who communicates mainly through a writing sign, though she does know sign language.
* We Are All Pokémon Trainers is capable of facilitating multidimensional travel with its counterparts in other universes, though it can be unreliable in this regard.
* We Are All Pokémon Trainers, Jason visits his father's grave in Fall City, Fiore on Father's Day during the Hoenn-2 arc and pours a sour bourbon mix on and around the tombstone after taking a swig himself.
* We Are All Pokémon Trainers. Milagros nearly runs over Ian on his motorbike, which is how they become friends.
* We Are All Pokémon Trainers, of all things. Shahinne is being raised by a Fearow and a Honchkrow, who get romantically involved together precisely because she needed a maternal figure.
* We Are All Pokémon Trainers post, Jacob's author made a gif of himself doing Jacob's expressions.
* We Are All Pokémon Trainers respectively are set in 2008 and 2009.
* We Are All Pokémon Trainers, starts answering back and providing counsel. And it's not the only one.
* We Are All Pokémon Trainers Tagg lives next door to an area known as the Sea of Trees, which happens to be based on Aokigahara, the forest infamous for being the second-most popular spot for suicides in the world. It's infested with Ghost types and the souls of those who have died in the forest.
* We Are All Pokémon Trainers Tagg theorizes that the creation trio might do this when interacting with mortals, considering their eldritch natures. He turns out to be quite right when he sees Dialga in the Temporal World, who takes the form of a vaguely draconic shaped mass covered in diamonds.
* We Are All Pokémon Trainers: The narrative proper from the Sinnoh Arc to the Entralink Arc takes place from February 2011 to December 2019.
* We Are All Pokémon Trainers the PMD-R arc abruptly ended by leaking into Kanjoh-2 due to most of the playerbase losing motivation, though there have been attempts to properly fill the gaps and close the loose ends.
* We Are All Pokémon Trainers, the reaction of gaining two sets of memories from the Alternate Timeline and the original is a temporary brain overload.
* We Are All Pokémon Trainers there have been many instances of claims being made regarding statements about the WAAPTverse that have turned out to have never been said.
* We Are All Pokémon Trainers they were ill prepared for, and monification created mass chaos.
* We Are All Pokémon Trainers. Though he is mainly based off Alejandro and Tyler.
* We Are All Pokémon Trainers, usually because of a mon becoming human or vice versa.
* We Are All Pokémon Trainers were created simply because someone did something random and the rest decided it was good enough to throw in. Examples include:
* We Are as Mayflies: Humans are the shortest-lived sapient species in the known universe.
* We Are Everywhere: A member of a group is taken out, but they assert that other members of that group are so pervasive in society.
* We Are Experiencing Technical Difficulties: A common thing to say when a TV station regains control of its broadcast.
* We Are Experiencing Technical Difficulties — When something goes wrong, but a channel is still able to broadcast.
* We Are from the Future and the bomb will sit there unexploded for the next 70+ years, waiting for them to find it and accidentally cause it to explode.
* We Are From The Future is punished by them being transported to 1942 into the middle of a battle between Soviet and German forces. To their horror, they realize that the remains they desecrated might be their own.

* We are just about starting to get to the point where we actually can have a
* We Are Lady Parts: Both of Amina's parents are lovingly awkward, but her father is less perceptive and in tune with her emotions and has a tendency to say the wrong thing. Her mother teasingly dismisses him as a manchild.
* We Are Lady Parts: Episodes occasionally swerve into Amina's imagination as she either launches into musical numbers in her head or delves into fantasies about what's going on around her.
* We Are Lady Parts: In the opening scene, Amina's parents bumble their way through a suitor meeting, hastily putting down Amina and embarrassing her by mentioning her bad stage fright.
* We Are Lady Parts: The sixth episode. The band has broken up in the wake of Zarina's explosive article, but Montaz decides to stage their own concert in an abandoned junkyard, before which the original members make up. Amina then has to rush to the venue and makes it just in time for a killer guitar part.
* We Are Lady Parts, who manipulates situations around the band for her own gain and deliberately misrepresents them in her feature for online outrage and notoriety.
* We are lead to believe due to the Crystal Gems' own speculation that Peridot arrived on Earth so she could reactivate one of the "Kindergartens" and start
* We Are Legion (We Are Bob), after awakening 117 years in the future, Bob learns that English (or, at least, American English) has changed significantly to the point where he has trouble understanding the locals. He starts using a translator program. It's implied that this was deliberately done by the theocrats of the FAITH to prevent the people from being able to easily read old writing.
* We Are Legion (We Are Bob): After Bob's first encounter with bizarre 2149 English, he starts running a translator at all times when talking to them.
* We Are Legion (We Are Bob): America elected a hyper-religious president in 2036. In addition to his blatant religious agenda, he had no political skill whatsoever, breaking laws left and right to appoint his hyper-religious idiot friends to key positions, claiming God would sort it out. This, predictably, resulted in a horrific recession, and the next president elected was an atheist. That drove the religious right into a frenzy, and they launched a successful coup, replacing the United States with the Free American Independent Theocratic Hegemony. By the time Bob is awoken, FAITH has dozens if not hundreds of factions fighting each other over dogma, and do far more damage to each other than their enemies. Bob manages to keep them satisfied long enough to escape in the probe.
* We Are Legion (We Are Bob) as part of a scorched earth tactic. By the time two of the Bobs return three decades later, there are about 15 million people left alive on the planet out of over ten billion. The planet is rapidly cooling and will become uninhabitable for millennia.
* We Are Legion (We Are Bob), Bob is awakened 117 years in the future to learn that the US has been taken over by religious fanatics, who have turned the country into FAITH (Free American Independent Theocratic Hegemony). FAITH now dominates North America. South and Central Americas are, for the most part, in the hands of the Brazilian Empire. The United States of Eurasia controls most of Europe, with China dominating Asia. There's also Australia, but it's a smaller player. There is an African republic, but it's not likely to play a significant part in global politics.
* We Are Legion (We Are Bob): Bob is forced to reach out to the primitive inhabitants of Delta Eridani when more subtle means of encouraging them to move camps fail.
* We Are Legion (We Are Bob): Each new Bob is a copy of one of the Bobs that came before, making father/son and brotherly relationships obvious. The Bobs still notably avoid referring to each other that way, though.
* We Are Legion (We Are Bob) long time, from a human perspective. The other two planets have some minor annoyances, such as extremely annoying bugs and an extremely smelly jungle, but are perfectly habitable.
* We Are Legion (We Are Bob): Not quite degeneration, but each Bob clone has different elements of Bob's core personality emphasized. Riker is pragmatic, Bill

enjoys pure science, Milo is less cautious, and Mario is anti-social. Their clones continue to be variants of the original Bob; Riker's clone Homer, for example, has a big sense of humor while Riker has practically none.
* We Are Legion (We Are Bob), numerous theocratic factions are too busy fighting with one another to actually run the country, the Internet is gone (the information there is hard to control), and history has undergone many revisions by the government.
* We Are Legion (We Are Bob) puts a killswitch in Bob's code, in addition to a physical bomb. Bob chucks the bomb first chance he gets, then spends a few years getting rid of all the killswitches and loyalty triggers hidden in his code.
* We Are Legion (We Are Bob): Since the SURGE drive allows ships to move at near-light speed, time dilation is common. Furthermore, the Bobs can adjust their frame rate so that years pass like days. Some of them have different opinions on using it—Riker stubbornly sticks to real time unless absolutely necessary, while Homer is happy to adjust his frame rate to meet his needs from moment to moment.
* We Are Legion (We Are Bob): The Brazilian probes use explosive missiles, but Bob is worried about the substances exploding when built with his 3D printers. He considers using lasers, but dismisses them as inefficient due to power constraints, so he goes with guided non-explosive missiles called "busters" instead. They work by suicidally ramming the target at high speed.
* We Are Marshall: 2006 film set in 1971, depicting Marshall University rebuilding their football team following the tragic plane crash that killed the previous team the year prior.
* We Are Marshall a movie based on the real-life decimation of a football team and the attempts to put another back together again. After the new team finally wins one game, we cut to the epilogue and find out that was pretty much it for them winning for that season...and many seasons after that before they finally became a decent team again.
* We Are Men for CBS's 2013-14 season. Four episodes were shot, but only two aired before the show was cut off.
* We are morons, tried and true; and we’ll do our yell for you!!
* We Are Never Ever Ever Putting This Together" (a parody of Taylor Swift's "We Are Never Ever Ever Getting Back Together") is about their failed attempts to assemble a new bed frame they purchased from IKEA.
* We are never told exactly how big a "sector" is, but it is at least tens of light-years based on several episodes
* We are never told what the final fate of the Quagmires, the Widdershins family, Hector, and Phil was after being attacked by a giant question mark figure. Though it may have killed them it just as likely may have rescued them, though the Baudelaires and Kit Snicket seem to believe the worst.
* We Are Not Going Through That Again: Characters have just finished an adventure, and refuse to go on another adventure.
* we are not told who wins but the hand shown just before the ending credits leads people to think it was Kazuma.
* We Are Our Adventuring Avatars: During the Second Marvel Universe arc, Dr. Octopus was assumed to be the cause of the cracks in the Marvel universe that lead to the DC universe. This was not the case, as the Octobot observed on the plane entering from the DC universe was hacked by a unknown villain.
* We Are Our Adventuring Avatars. If this armor is broken, the mind control is lifted.
* We Are Our Adventuring Avatars: Ravager's voice is so loud, she has to whisper in order to speak like the others.
* We Are Our Adventuring Avatars. The group decided to help him out after a misunderstanding.
* We Are Our Adventuring Avatars: The historical museum within Shift City. It's an old skyscraper that was converted into a museum of the World of Yesteryear sort of exhibition about what Humanity was like before everything got Pokerized...except their idea of what Humans are like is...not so accurate. In fact, the museum's depiction of the Apollo 11 lunar landing has what looks like a space laser shoot

out between a bunch of Clefables and Jigglypuff, humans in spacesuits...and the Flying Spaghetti Monster.
* We Are Our Avatars are polar opposites; the two have bad chemistry together.
* We Are Our Avatars: Aurora Va'el made pasta for a group of her friends once and laced it with LSD. She didn't reveal that until almost everybody ate some of it. Just because. Some time later, an AU counterpart of hers laced a cake with Skooma.
* We Are Our Avatars because as GG puts it, "HIPSTERRR!" Here is an example of an exchange between the both of them in Trollian.
* We Are Our Avatars: During a trip to Silver City, Marcia became Magi Magi Magician Gal, a magical girl with "magic". Some of the astute members of the group figured the relation between the two, but some of the others were stumped.
* We Are Our Avatars: Every Feccian Bladesman's training was this to some degree; for Zeke, it was this Up to Eleven. Justified, for if he was going to have any chance of going toe-to-toe with another Feccian Bladesman, he'd need all the advantages he could get.
* We Are Our Avatars for his violent approach to... well, just about anything.
* We Are Our Avatars from a video game she likes comes into the picture. She immediately asks for their autographs and/or hugs them.
* We Are Our Avatars has a robot arm thanks to her arm getting frostbitten. It actually would have recovered, but luck conspired against her.
* We Are Our Avatars has been revived twice, and tons of characters just get revived back every day.
* We Are Our Avatars. He was disgusted by that. It's considered cuisine in the Netherworld because this particular blood has Mana in it and Mana is the source of power for Overlords.
* We Are Our Avatars, however there are limits: it must be organic, can't exceed a certain natural power, and if a polymorph immune form, he'll be stuck in it.
* We Are Our Avatars, if she believes the red car will go faster the red car will go faster. This does not however give her the ability to make a stick work like a gun just because she thinks it is one.
* We Are Our Avatars: If something seems weird enough for Krissy, or if he comes up with something unique, he’ll use his illusions to mess with people.
* We Are Our Avatars, Imca suggested that Aurora could wipe out the Thalmor with a gigantic magic spell as a warning to those who try to take over the world. At first, Aurora thought it was bad because there's the possibility of civilian casualties. Mitch even compared it to the situation that caused America to drop the nukes on Japan.
* We Are Our Avatars is easily changed with some effective roleplaying, some longer arcs have been implemented. After the move to Role-playing, there's always been one.
* We Are Our Avatars. It destroyed ships around Jaya for the hell of it, posed in photos like an egotist, and took a little girl's ice cream cone. The hashtag for that particular picture was YOLO.
* We Are Our Avatars, Marcia Shyneet believes that Slacker Magician is an embarrassing nickname, since it gives anyone the idea that Marcia's a slacker. However, Seth and Kohaku thought it was interesting and gave Marcia a pep-talk.
* We Are Our Avatars, Marcia speculates that it might be controlled by an arcade machine. Turns out she was right, and the thing is even powered by quarters.
* We Are Our Avatars, modified Asimovian laws mean that a human simply has to give Yuzuki Miura from a command, which she is unable to resist.
* We Are Our Avatars, not only did the Homestuck Trolls take this route, but various canon characters have marched onto new designs.
* We Are Our Avatars of Harley Quinn and thus has this to the Joker of Grinning General.
* We Are Our Avatars: Prior to getting the cybernetic eyes, Daniel Lincoln was a literal example — his glasses had a charm on them that allowed him to see. When his glasses were off, he would often stumble around and give people mistaken identities. The first day with the group ended with him crashing into people and not facing the right way several times.

* We Are Our Avatars: Saru is considered unfitting for a soldier due to taking in standard military protocol when she feels like it (read: rarely) and is often behaves like a teenager. However, when she's on a mission, she puts away those whimsical behaviors aside to do her duty efficiently.
* We Are Our Avatars, some of them did eventually come to fruition, others didn't, at some point, it was decided Andros and Enker would be in the Revenge of the Spark arc, ultimately, they didn't end up becoming part of Lucrezia's army.
* We Are Our Avatars: Starchild is a human-shaped sentient planet and she's friends with most of the group. She uses an Avatar to interact with them.
* We Are Our Avatars, the longest running forum Role Playing Game, has so many characters (including one-shots, regulars, background characters, NPCs, and so on) that it could possibly rival many of the items on this page for cast size!
* We Are Our Avatars. Then, it turns out Yes Man was using the plan of a "Courier 6"
* We Are Our Avatars, the Shredder was defeated with a Boston Cream Cake to the face.
* We Are Our Avatars uses, it has the strange side effect of keeping people from aging, though.
* We Are Our Avatars: When Michelle took Proto Man's helmet in order to repair him, it turns out that Roll was impersonating Proto Man the whole time.
* We Are Our Avatars, who made himself a vessel in the form of a black cat named King in order to get close to Pride. Him then used him to create a philosopher's stone so that he'd have enough negative emotional energy to give him the power to take over the world.
* We Are Our Avatars: Yanmie doesn't get along well with the rest of her family because she doesn't like to eat sentient beings.
* We Are Robin of movements like Black Lives Matter and Occupy Wall Street, with heavy usage of social media.
* We ARE Struggling Together. And of course, it still excludes non-Arab states in the Middle East such as Iran and Turkey.
* We ARE Struggling Together at this point, being the symbol of hope and unity as well as the Reapers' feared enemy. So you could argue that most other factions that don't get their shit together and side with him/her are the Wild Cards. There are, of course, still plenty of occasions to piss people off and blur the line between friend and foe.
* We ARE Struggling Together: Factions that are nominally allied find it hard to focus on their common enemy because they're too preoccupied with fighting each other.
* We ARE Struggling Together: Supposed allies spend more time fighting amongst each other than their enemy.
* We ARE Struggling Together: The rebels struggle to have a successful revolution because they can't cooperate with each other.
* We ARE Struggling Together: You fail to cooperate with someone who shares your objectives.
* We Are Tam by Patricia Bernard features a form of mental time travel that allows a person to visit other times if somebody in that time period is their genetic double.
* We Are The Dwarves, gun-toting Forcer and axe-wielding Smashfist are your standard dwarves — albeit they're dwarven astronauts on an alien world. It's the third dwarf, Shadow that breaks with convention. Shadow is a dark-skinned ninja dwarf with a longbow, who relies on stealth and sniping foes with his longbow in contrast to the direct force used by his comrades.
* We Are the Night a few centuries ago. But in the course of the plot, Lena falls in love with the policeman Tom. However, the vampire Louise injures him so badly that he is unlikely to survive the injuries. The last scene shows that Lena actually wants to transform him so that he can survive these injuries as a vampire, but hesitates at the last moment. Tom's fate is thus unknown. In the book, however, it is clearer. She turns him so that he survives and the wounds heal instantly, making Tom the first male vampire in centuries.

* We Are the Night can consume and feel the effects of drugs, as demonstrated during the party montage scenes, but they are said to be immune to unpleasant side effects such as overdoses or addiction.
* We Are the Night: Charlotte. She's largely cold and indifferent to others. However, at times she displays kindness. It's implied to result from her depression, so she may well have been warmer in the past.
* We Are the Night: Charlotte slaughters an entire SWAT team attempting to arrest her along with the other vampires, using their guns against them for part of it.
* We Are the Night describe Helena as "new to high school and new to the night shift." While having trained her whole life to join the Batfamily's ranks means she is quite capable, she approaches beating the tar out of bad guys with more enthusiasm and playfulness than any other member has any right to.
* We Are the Night focuses on a group of immortal blood-drinking women with fangs and supernatural powers who have no reflection and burn in the sunlight, but the word "vampire" is never spoken by anyone in the film.
* We Are the Night have "safe cars" with heavily tinted sun-proof windows and windshields, allowing them to drive around during the day.
* We Are the Night is her lack of familial relationship with the Waynes, being more professional and, at times, antagonistic.
* We Are the Night: Lena experiences this after being turned by Louise, suddenly desiring to drink blood. Once she wants to drink blood from living people however she's horrified and absolutely refuses to.
* We Are the Night: Lena initially is dressed in a rattie sweatshirt and pants with short hair, which makes Tom believe she's a man at first. She exploits this through stealing a dress on the run, changing into that, and throwing her old clothes out. He discovers what happened only when close up to her.
* We Are the Night: Lena lies to people twice, and both times they see through it instantly, as a result of them being forced or very implausible.
* We Are the Night (lesbian main character, implied bisexual female supporting characters, hinted queer female romance)
* We Are the Night: Louise is quite smitten by Lena, first flirting with her and then turning her into a vampire to have a companion. However, her kiss later causes Lena to push her away, and Lena's only shown interested by Tom. Louise didn't make sure that Lena was bi or lesbian, clearly, which seems like a huge oversight for having an immortal lover.
* We Are the Night: Louise tells Lena that all male vampires were wiped out by the females in the past because they were too reckless, and risked the vampire race being hunted down by humanity through exposure.
* We Are the Night: Nora seems very happy with her life as a vampire, saying it means anything you want to buy, with no consequences of drugs, food or sex. She's also the youngest until Lena joins them. Louise attempts to sell Lena on it too, expressing it to be bearable with other people. Lena initially appears somewhat happy with their swanky lifestyle, although is increasingly horrified at them killing people to feed aspect as opposed to the longevity.
* We Are the Night: The vampires display this, as usual. It's neatly shown at the beginning with a montage of photos which feature Louise and Charlotte across the years (at many famous events). It ends with Louise's appearance in an 18th century painting.
* We Are the Night: The vampires have this, healing from multiple gunshot wounds, being stabbed or the initial bite which infects them. However, full on exposure to sunligth kills them no matter what.
* We Are the Night: The vampires kill a group of Russian gangsters with ease, and the sole survivor later is a paranoid wreck after seeing it.
* We Are the Night. When Louise talks about her own sire, she states that she was looking for someone with the same glint in her eyes, hinting at the wish to find a reincarnation of her former companion.
* "We Are The Others", was dedicated to the memory of Sophie Lancaster, a British young woman fatally injured in a hate attack on herself and her boyfriend Robert Maltby, in Lancashire in 2007; it is believed the pair were targeted because of

their gothic appearance.
* We Are the Perfect Girl variant where Aphra, an outgoing and witty but homely teen, helps her best friend Bethany, a beautiful but extremely shy and socially awkward girl, flirt with popular guy Greg while trying unsuccessfully to not crush on Greg herself.
* We Are the Strange are a rare creepy example of this trope. In the empty ice cream shoppe, there are rather odd-looking posters which try to pass both the shoppe and the townspeople off as normal.
* We Are the Strange is bald and lacks body hair of any kind. All he's got are his eyebrows.
* We Are the Strange, the plot seems calm and suspenseful, only to suddenly end with a gigantic mecha battle.
* We Are the World", by Michael Jackson and Lionel Richie, sung by USA for Africa.
* We Are The Wyrecats, as well as the return of one of the supporting characters.
* We Are The Wyrecats. Despite having good intentions, building the XAG suits and playing at being superheroes has practically ruined the team members' lives.
* We Are The Wyrecats, his paranoid outbursts would almost seem reasonable coming from a healthy person.
* We Are The Wyrecats is clearly shaken after killing a mook for the first time.
* We Are The Wyrecats is incredibly dour, but quick to take action nonetheless.
* We Are The Wyrecats is located in the Marianas Trench, but as the comic is largely focused on action during that chapter, there isn't much focus given to the undersea life or landforms.
* We Are The Wyrecats is the most outwardly perky and cheerful member of the team, but sometimes she uses that bright demeanor to hide her feelings of sadness, worry, and resentment.
* We Are The Wyrecats, K.A. tries hard to pick up where she left off after coming out of a coma, but reality sets in pretty quickly that the world not only isn't the same one she left, but that it's a decidedly worse one.
* We Are The Wyrecats, K.A. walks in on a tense phone conversation her dad is having. The audience can only hear his side of the conversation, but it's easy to see what the discussion was.
* We Are The Wyre Cats particularly hates being pitied for his disabilities.
* We Are The Wyrecats reveals through some surveillance footage that Lamar, one of the former members of the Wyre Cat team, is responsible for stealing military-grade enhancements and the mooks K.A. has been dealing with have been part of his forces.
* We Are The Wyrecats uploaded her brain into a digital black box in case her physical body was ever destroyed.
* We Are The Wyrecats, XAG suits are considered some of the most powerful and dangerous equipment on the planet. And they were developed by a team of four high school kids with disabilities.
* We Are United, in the final challenge Jack says, "OK, everyone, let's work together." Everyone responds by saying, "BE QUIET, JACK!"
* We Are What We Are. Mr. Parker murders Anders while he's having sex with Iris.
* We Are What We Are when the police station receptionist is so distracted by Doc's dog that she doesn't notice him stealing a handgun.
* We Are Who We Are: A lot of attractive young people are shown at the beach in their swim suits playing around or dancing. That's on top of the very buff, entirely naked soldiers seen earlier in the shower.
* We Are Who We Are, appear at different points as extras in the series.
* We Are Who We Are by Richard while speaking with his wife Jenny. He claims all same-sex couples must have this dynamic, that it couldn't work any way else. Sarah and Maggie are an example in terms of their clothing/hair styles to a mild degree, though otherwise don't qualify.
* We Are Who We Are: Caitlin is clearly closer to her dad. She's shown practicing boxing with him, going to watch a baseball game on TV together, and they share political views. Meanwhile she's always at odds with her mom.
* We Are Who We Are: Fraser comes off as pretty immature. For example, he petulantly slaps his mother Sarah when she doesn't slice meat for a sandwich thin

enough for his taste. Given her interactions with him, it seems to be a result of her having overindulged him.
* We Are Who We Are: Fraser often has childish bouts of anger where he hits Sarah or pulls her hair, and acts quite neurotic. It's unclear if this is due to her simply overindulging him, or clinical issues.
* We Are Who We Are. Fraser's colonel mother subverts the stereotype by having *wildly* overindulged him, to the point of tolerating abusive behavior from him to her but Caitlin's dad plays the trope straight.
* We Are Who We Are (gay or bisexual male main character, lesbian or bisexual supporting characters, possibly transgender supporting character, queer female romance, LGBT awakening, homophobia)
* We Are Who We Are: Sarah embarrasses Fraser greatly when Caitlin comes over for dinner, telling her he liked to dress up in turbans by using towels as a child, despite her wife Maggie's objections. He flies into a rage about it afterward.
* We Are Who We Are: While Caitlin is in her bikini at the beach, Fraser stares from a distance, clearly smitten by her good looks.
* We Are X. Quite a few who've never heard the band before (and some influential Western music and media people among them) now count themselves at least casual fans.
* wear. His own badge is separated from the rest and pinned to his lapel instead.
* Wearing a basic outfit. If you go out there wearing boots and a swimsuit with a belt around the waist, a jumpsuit with a corset, or God forbid, something you
* wearing a hat), outdated or contradictory; Minerva McGonagall starts doing the same thing with her staff to purge the Hogwarts rulebook of similar things, though that purge doesn't have nearly as many things to remove.
* wearing a hot pink miniskirt, lime green tube top and leopard-print stilettos.
* Wearing a limited range of colours is actually a trick used by naturalists and natural history filmmakers. If they want to make themselves familiar to some animals, animals with colour vision that work mainly on visual recognition (like chimps) they try to always turn up looking the same. If they turned up in a different coloured shirt, the animals might think it was a different human, and either flee or turn aggressive.
* wearing a mink coat here; it's that mink coats were almost never made for girls at the time (mostly rabbit), no matter how wealthy the family. In the 2005 movie, her father, a billionaire business owner, sets up an assembly floor in one of his factories with the sole intention of getting her that golden ticket. She has her parents wrapped pretty much completely around her finger, bowing to her every demand, but both she and they meet with an awful end when her insatiable greed leads her to try to steal one of the squirrels that Wonka uses to sort nuts for his candy. Veruca's song, "I Want It Now!", from the 1971 adaptation is practically "Spoiled Brat: The Anthem". The stereotypical "pony" line is spoofed in the 2005 movie:
* wearing a more revealing outfit than her comic counterpart. Then she regains her heart and she looks just as beautiful and seductive as her comic self.
* wearing an actual dead person's face over his actual face to disguise himself as a Clockwork Droid.
* Wearing any kind of face covering in public other than motorcycle helmets is banned in France. This has caused a great deal of controversy, as the lwas were written with the burqa and niqab (two different forms of face-concealing veil for women in certain forms of
* wearing a red shirt. Sure enough, several more redshirts get killed while the main characters successfully escape into the jungle.
* wearing a trenchcoat with Hobbes on top) in order to sneak into an X-rated movie. Going by the ticket seller's remark in the final panel ("This is a new one."), she evidently did not fall for it.
* wearing a very realistic latex Scooby-Doo mask but with his true hands exposed.
* Wearing a wedding ring on the ring finger originally symbolized the joining of the married couple's hearts, due to the belief that the ring finger contains a vein that leads directly back to the heart. While that vein does go to your heart, so do

all other veins; it's what veins do (though portal veins only do so indirectly by way of the liver or pituitary gland).
* Wearing contact lenses, putting on non-prescription sunglasses, getting a little itch in your eye, and reflexively reaching behind your glasses to scratch it. Now your contact lens is pushed up into your eye socket, you're half blind, and whatever important task you had been concentrating on is careening out of control. May compel you to reconsider laser eye surgery.
* wearing her lingerie. Joshua's mother stammers out that the money they left him was to buy groceries and not anything else, implying that she thinks Rachel is a prostitute he hired.
* Wearing It All Wrong: You fail to put a garment on the right body part.
* wearing Lisa's clothes and a wig of her distinct hairdo). This also occurs at the end of the episode, when Nelson impersonates Todd Flanders.
* Wearing loose clothing so that it's harder to guess the size of her chest.
* wearing one realistic latex mask underneath another The reveal was to represent that gay fetishists would often come out of the closet two times, the second as a fetishist.
* Wearing or not wearing certain pieces of functional equipment (often body armor), or not wearing anything at all.
* Wearing Robert's Crown, being of largely medieval customs, are led by lords who fight on the frontlines, right the way up to King Robert Baratheon.
* Wearing Robert's Crown, Stannis Baratheon has served as Master of Ships, Master of Coin, Master of Law and finally Hand of the King. Meanwhile his brother Renly is an officer in the Royal Navy.
* Wearing Robert's Crown: Unsurprisingly, very few of the marriages in the fic are anything but politically arranged. Cersei, in particular, protested hers loudly. Most of them seem to work out though.
* Wearing skimpy or revealing clothing and expecting the judges to be impressed by their naturally-feminine physique. Especially now that "Stop relying on that body" is essentially a Michelle Visage soundbite.
* Wearing sunglasses with an orange tint will produce a similar effect.
* wearing that exact outfit. The robber himself used an inner tube to float down a nearby creek. He was caught a few weeks later.
* Wearing the Cape and its sequels: Chicago is the post-Event Metropolis of the Wearing the Cape setting, with good reason; Atlas and the Sentinels created the template for superheroes and superhero teams, and with the Sentinels and the Guardians teams, the city has more superheroes per capita than any other city. Chicago is also the center of the Villain-Rap culture, which means the place is crawling with street-villains and fashion-villains. The Sentinels' reputation is also creating a problem, in that supervillain-terrorists and thrill-villains who want to make their reputations may target them and the city they protect (it has been noted that Chicago was the only freshwater port to get a Godzilla attack).
* Wearing the Cape books, superhero costumes are flamboyant but practical...in the field. It has been mentioned that many young and fashionable superheroes have much less practical club versions of their costumes for partying, and superhero-cosplayers dress much more stripperiffically.
* Wearing the Cape books, the Sentinels' power-sets are extremely diverse, and it is implied that most other Crisis Aid and Intervention teams are as well. The openly stated rationale is that superhuman combat is paper-scissors-rock, so you'd better have a mix on your team to cover any weaknesses. Also, power-duplication doesn't always play well in the media...
* Wearing the Cape can do this to Hope. Falling cherry blossoms alert her to the type, and she (usually) remembers it unusually well.
* Wearing the Cape closely, as Breakthrough powers are not considered miracles but it's difficult to conclusively prove that one wasn't involved.
* Wearing the Cape. Especially since Kitsune himself clearly finds it hilarious to keep her guessing.
* Wearing the Cape, he is both the spiritual mentor to the newer Sentinels and the team leader.

* Wearing the Cape. In something of an aversion, it's mentioned that said characters often make money by reproducing and selling some of their own inventions.
* Wearing the Cape, Iri Pegason, an ultra-class telekinetic with a hallucinogenic drug induced breakthrough guided by choldhood fantasy, is forever frozen at the age of sixteen, the age that he was when he experienced his breakthrough, and has been a homeless perpetual teenage stoner for ten years or so. Iri is ageless and biologically immortal (will not die from any natural cause) but is not fully immortal — he is not nigh invulnerable and can die from violent or un-natural causes.
* Wearing the Cape. Natural disasters often cause Breakthroughs, as do supervillain attacks, and the military was happily surprised to discover that basic training has a small chance to trigger a Breakthrough—though they also created an optional, much more brutal program with a higher success rate. There are also "origin chasers," people who deliberately put themselves in dangerous situations in the hopes of breaking through. They typically end up as a statistic right next to the suicides, but it does occasionally work.
* Wearing the Cape, secret identities are optional and a lot of superheroes don't bother with them. Some have undergone physical transformations that make secret identities impossible, but many also had public breakthroughs that "outed" them from the start. One variation on traditional secret identities is a legal second identity, established with the help of the government, much like that of witnesses in the Witness Protection Program.
* Wearing the Cape series, all speedsters are similar in powers. Their personal speed can vary between normal and up to 10x normal. Beyond that they "jump the wall" into "hypertime". Essentially everything is stopped, and they're moving at normal speeds along with whatever they bring (one speedster brings his motorcyle with him so he can get around in the "instant" faster). It's lampshaded in the filler text that the laws of physics for hypertime are hideously inconsistent and make no sense whatsoever.
* Wearing the Cape. Shell specifically points out that while Letters of Marque are still legal, they fell out of favor on the world stage in the 1800's, and America hasn't issued any since the War of 1812.
* Wearing the Cape, so she has no reason to be afraid of them, leaving them as nothing but adorable cats big enough to cuddle with.
* Wearing the Cape, the gun shop owner clearly expects Jacky to be bit by this when she insists on firing her gun posed like an old-style duelist. She demonstrates her superstrength can handle it.
* Wearing the Cape, this is the military's big way to get supers, given that too few breakthroughs either want to join or are already in the forces (despite special programs designed to trigger them).
* Wearing the Cape, this trope is invoked when explaining the relationships between organized crime and superheroes. Attacking superhero's private identities brings out the vigilante superheroes.
* Wearing the Cape verse, breakthroughs usually occur as the result of a life-threatening or traumatic experience.
* Wearing the Cape. Whenever he suffers what should be a lethal injury, he appears to "snap back" a few seconds, going from dead or dying to suddenly fine. Most of the time no one notices, but he is worried that one day the wrong people will witness it. He's also not cavalier with his life; as he says, dying hurts, and Astra wonders if a demon could kill him, both because of its power and because it's far beyond his genre.
* Wearing the Eltariel skin in the main game and changing armors and cloaks alters the skin's color scheme as well.
* Wearing the Ghastly Gibus, the Mercenary or the Pyrovision googles is often seen as proof of a lack of skill, as these cosmetics are the only one easily available for free to play players. Free to Play Players cannot receive hats from a random drop, and they can't trade with other players, thus removing the two bigger sources of hats in the game, while the Mercenary is automatically handed to a new player

the first time they log in, and the Gibus and Googles are obtained as soon as you land a domination on a player wearing said items. Since premium players never wear the Gibus once they end up getting a new, fancier hat, some players have it equipped it on purpose
* "Wearing the old school tie". Or updated to today, any college alum who wears paraphernalia of his/her
* Wearing what is essentially the exact same outfit week after week without changing up their style at all. Every season a queen will be asked to show the judges versatility (though Season 6 winner Bianca was infamously able to get away with wearing a boatneck gown every week, possibly because of the judges' preference for floor-length dresses and the fact that each one was executed flawlessly plus she always performed well in the challenges).
* wear out extremely quickly into them in total, and collect a lot of hard-to-find components to pay for the upgrades. By the time you get through all that, you're probably good enough at the game that you don't really need such high defensive stats.
* wears a mask. This is probably in part because Fakir has a tendency to be a little theatrical when it comes to his role as the Knight.
* wears away visitors' willpower by preying on their deepest pain and insecurities. Vines then absorb visitors who have lost the will to resist.
* wears black in the first act, because she's an emigre. She takes off her black jacket late in Act I. In Act II she wears a white dress, symbolising her alignment with defector Anatoly, who has become more white himself; however, the dress has a large black logogram on it, symbolising her increasing commitment to achieving her own ends.
* wears black in the first act, where he functions only as a European anchor and executive for Global Television, playing up Anatoly's niceness and Freddie's bad-boy status — "loyal" to the Soviet Union. In the second act, however, his role as a CIA officer is more obvious, and he switches to American white — but with a flash of pink and a subdued gold tie, pointing up the self-interest which is demonstrated by his easy, friendly cooperation with Molokov — they ultimately want the same things.
* Wears dark and concealing, but often mundane clothing that only adds to their
* wears Ichigo's shihakusho (and only his shihakusho) to nonverbally inform him that she's realized they were lovers in the future.
* wears pure black throughout. She's Soviet, but not an active Soviet agent like many of those wearing black. She is, however, a tool of the Soviet Union throughout, and powerless to resist that.
* wears pure white throughout, but the show makes much of him being the archetypal American — 'naked unprovoked Yankee aggression', as Florence puts it during "Press Conference". He's loyal to the US by being loyal to himself.
* wear stars while Homeworld Gems wear diamonds, with the color of the diamond representing which one they work for. Some of the Crystal Gem's fusions, most notably Sardonyx and Rainbow Quartz, have a bit of the diamond insignia on them.
* wears the duster over a bare chest, Dennis testily explains that the look is irresistible to women.
* wear yellow armbands pointing them out as such does play this trope somewhat straight.
* Weasel arcs). He's nowhere near as scared of Deadpool as someone with his proximity and history should be, and Deadpool speculates in front of him that he might be one of these - but he's just too useful to kill.
* Weasel attempting to get service at a gas station. The attendant refuses them service because of Fred's lack of shoes. Fred then requests to buy a pair of flip flops. But the attendant refuses, so Fred can't buy shoes, because he doesn't have shoes. After the group huddles up, they dress Quick Draw in Fred's shirt and get him to ask for service. He still refuses, because horse hooves don't count as shoes. And Quick Draw lacks pants.
* Weasel Co-Worker: Doesn't do their job and palms off the blame on others.
* Weasels Ripped My Flesh has Neon Park's design of man shaving himself with a

weasel.
* Weasels Ripped My Flesh: Roy Estrada's moaning during "Prelude To The Afternoon Of A Sexually Aroused Gas Mask" borders between laughing and crying.
* Weasel was also a classmate of Peter in ESU, and was said to be so much of a geek that even Peter wouldn't hang around him.
* Weasel Words to play themselves up. For instance, someone who uses "Curvy" or "More to Love" as a euphemism for "morbidly obese". This isn't to say that people who aren't conventionally attractive don't deserve love, but deception is not the best way to start a relationship.
* Weasley Girl AU fanfic, Harry Potter (thanks to an ill-timed joke by George Weasley) spends a few chapters thinking that the "stone" that's hidden at Hogwarts and that Voldemort is after is the Resurrection Stone. Which Harry dreams of using to call his parents back to life. Needless to say, he is disappointed.
* Weasley Girl keeps Harry a boy but gives the Gender Flip treatment to Ron Weasley instead, turning him into Veronica "Ronnie" Weasley.
* We (as long as they have a pink sex ticket for that day). Thus, the protagonist is deeply ashamed and disturbed at how angry the thought of a woman he's met sleeping with other men makes him — how unnatural and illogical of him!
* Weather-Control Machine in the form of a staff) is a lethal weapon against most enemies that she faces... but this trope comes into play every once in a while when she gets particularly angered with some of her crew mates....
* Weather-Control Machine - to just plain crushing the entire universe.
* Weather even pleads with his boss to retrieve any survivors. They find only one, the kidnapped Conjoiner lady. The rest of the story, while not as action-focused, is an interesting character piece on the crew, the nature of the Ultranauts, and the differences and similarities between the societies of the two factions, Ultranauts and Conjoiners.
* Weather Information Network, the only weather-oriented television channel in the Philippines owned by TV5, launched in 2012, broadcasting weather alerts New Zealand-based MetraWeather, the channel ceased broadcasting on December 23, 2013 due to TV5 transferring its studios to Mandaluyong.
* Weathering With You: After Hina clears the sky at Roppongi Hills, she tells Hodaka that she might not not not a few times have found what she wants in life, causing Hodaka to be confused as to whether she has or has not.
* Weathering With You ends with Hodaka saving Hina so he can be together with her... except that doing this resulted in her powers flooding all of Tokyo, and possibly the entire world will follow suit.
* Weathering With You, Hodaka Morishima is, as far as the novelization is concerned, a middle class boy, while Hina is a poor weather girl who lives alone with her brother.
* Weathering With You. Hodaka seems concerned about all of this, but as soon as he sees Hina again, he decides that it was all worth it for her.
* Weathering With You: Makoto Shinkai deliberately kept the backstory of his protagonist Hodaka Morishima unrevealed, simply because “if we explained it in the script, it would turn into one of the same old stories you have heard before”. What we do know from the movie itself, the novelization and the manga is that he had an abusive father and the other aspects of his home life absolutely sucked.
* Weathering With You, one of these is the only place that will take them in without asking for ID or other inconvenient questions. The room they get has a jacuzzi, karaoke system and its own food and drink vending machines, and nothing untoward happens.
* Weathering With You takes place mostly in 2021, with its epilogue taking place three years later in 2024.
* Weathering With You that big a deal, because humans were arrogant for trying to live out of harmony with nature anyway.
* Weatherlight, which was the focus of the story for quite some time, consisted of Tahngarth, Squee, Ertai, Crovax, Mirri, Sisay, Gerrard and Hanna. Sisay is the interesting one; her name does exist in the real world, but it seems to be a

predominantly male name.
* Weather Manipulation, especially the ability to call down catastrophic weather like hurricanes or lightning storms.
* Weather Manipulation It seems to just be natural for Ryujin (Dragon Gods) to be this trope.
* Weather Manipulation, Mrs. Muir reveals that the Ghost can never fool her about his emotional state because the weather barometer always reveals his genuine mood.
* WeatherNewFans are compiling moments of the channel and Saya Hiyama (and the other female presenters) reached idol-status overseas.
* WeatherNews is a channel dedicated to the weather in Japan. Because it is a channel destined for Japan, it went unnoticed by foreign audiences for a long time until on February 26, 2021, a 4.5 earthquake struck the Fukushima area. Saya Hiyama, the presenter who was live at the time and who was happily speaking about shogi instantly changed her face and tone of voice and reported the earthquake.
* Weather Report as the stage hazard of the Green Dolphin Street Prison stage.
* Weather Report, one of the best selling jazz fusion records of all time. During the late 70's and early 80's, the band's lineup famously included...
* Weather Report Opening: The first words in the story are about the weather.
* Weather Report Opening: The story opens with a description of the weather.
* Weather Report was abducted at birth by a woman who switched him with her own stillborn baby. He's actually the fraternal twin brother of the arc's main antagonist.
* Weather Saves the Day: A sudden change in the weather saves the heroes.
* Weatherscan. It's like TWC tailor-made this for people who like the forecasts, so they could theoretically keep it on 24/7.
* Weather Wardens, an amnesiac Jo has to help Eamon bury the body of a guy she doesn't know. But a couple of other bodies vanish without a trace due to weather-related issues.
* Weather Wardens books, for obvious reasons. Also, the weather tries to kill humans.
* weave baskets. Often ends up being recursive with Authority equals Asskicking, both in that getting to the position in the first place is liable to improve your combat abilities (even if you do not fight your way there) and that it is often necessary to be proactive in order to maintain your position.
* Weaver fits the trope even better in personality and dress sense. Being
* Weaver Nine Contrast with the Protectorate, who loses one in four capes in theirs and still let him smash the target in the process.
* Weaver Nine features Derrida, whose power allows him to deconstruct and then reconstruct Society members who are about to be killed in battle. They emerge whole, alive, and sane as long as he has enough non-living organic matter gathered in one mass nearby. The deconstruction process only leaves a bloody smear behind, so no actual body is found.
* Weaver Nine's Society is a dodgy group of outcasts, criminals, and fugitives forged into one of the most dangerous organizations on earth and united under Weaver's leadership. They are regarded as terrorists by most of the world and joining automatically grants a Kill Order. Based in Kenya and suspected to be the real power controlling most of Africa, they are classified as an S-class threat by the Protectorate.
* Weaver Nine, the PRT and Weaver's Society practice this on the strategic level with regards to Endbringer fights. The PRT are focused on preserving civilian lives and infrastructure, even if it means prioritising defense over actually hurting the Endbringer, and will throw capes into the grinder to do so; the Society focuses on trying to kill the Endbringer and preserving cape lives, especially its own citizens', in order to build a core of experience and reliable anti-Endbringer strategies, and will let civilians and infrastructure burn if need be.
* Weaver Nine to psyche out Leviathan, as well as gauge his reactions and senses. While the success of that experiment is debatable, it caused a panicked retreat among the Protectorate force.
* Weaver's Society has a habit of forcing innocents into its service. Nothing could

be further from the truth, especially since this is an extremely sore point for Taylor herself. Several assertions seem to follow this trend, and while it is unequivocally true the the Society has a lot of shady dealings and dubious methods, they are nothing approaching the bloodthirsty baby-eaters the PRT portrays them as
* Weaveworld by whatever client Shadwell is trying to make a deal with.
* Weaveworld is probably one of these, although it's bought into its own hype and thinks it's an angel.
* Weaveworld keeps him in the game and only his friends and being in decent shape keep him alive.
* Weaveworld, Suzanna puts a stop to any sexual progression of her relationship with Cal, declaring that they are too much alike to be lovers. And they carry on grandly as friends throughout the story. Except for a few moments of over-enthusiastic affection. And a few open-ended conversations. But grandly - as friends.
* Web 2.0 ad and ludicrously huge amounts of preprinted signs. However, if enough time has elapsed without the user clicking the banner and reaching the website, the girl in question will show increasing amounts of boredom.
* We Baby Bears spin-off taking place during the childhood of Grizz, Panda, and Ice Bear as they travel in a cardboard box, looking for a place to call home. Notably, the original show also had several episodes depicting the bears' childhood.
* Web and Starship is a strategic space game, in which Earth is caught between two races. The Gwynhyfarr, who roam the galaxy in faster-than-light starships, and the Pereen, who link their planets together in a trans-dimensional "web" which permits instantaneous movement from one system to another but can only be expanded using sublight ships. Earth has access to both technologies, but starts out severely outgunned by both enemies.
* Web and Starship Starship, which makes it pretty easy for the humans to win if they do.

* We Bare Bears), and the Bears trying to sit on their completed furniture when it's clearly some kind of shelf ("Uh, guys? I don't think this is a couch...")
* We Bare Bears. At one point Panda tries looking up the instructions online, but can't find them in English and tries to translate from Swedish.
* We Bare Bears: At the end of "Anger Management", Nom Nom agrees to let his anger management coach Grizzly give him "one last hug for the road", but afterwards tells him "This never happened!"
* We Bare Bears: At the end of the short "Frozen Ice", Ice Bear excuses himself after the ice cube he was stuck in all day finally melts.
* We Bare Bears: At the start of "Beehive", the Bears play football with Ranger Tabes. Much to her bafflement and frustration, their version of American football incorporates all sorts of other sports including golf, basketball, and even pro-gaming (with Grizzly waving around a video game controller while shouting about fighting game moves).
* We Bare Bears... because she just lost at the Minesweeper-like game she was playing.
* We Bare Bears collides with a tree... and then blows up in a spectacular fashion.
* We Bare Bears: Creator Daniel Chong has stated that Grizzly, Panda, and Ice Bear are each different variations of his own personality, depending on the given circumstance.
* We Bare Bears episode "Cupcake Job", the Bears get jobs at a gourmet cupcake store. They quickly run into trouble, including a bossy business-woman who makes a complicated order that leads to Grizzly accidentally breaking the cupcake-making machine.
* We Bare Bears episode "Losing Ice," Ice Bear is shown to be very skilled in

cooking this way. His prowess gets him a job at the local Japanese restaurant Teppan Yaki, where he amazes the customers with his high-flying knife twirls.
* We Bare Bears episode "More Everyone's Tube", Grizz and Panda discover that Ice Bear, usually the most fearless of the three, is afraid of cucumbers. They shoot a whole video of them pranking Ice Bear by placing cucumbers all over the house and watching him freak out. (Oddly enough, he reacts normally to a pickle.) It ends with Panda dressing up in a cucumber costume, which causes Ice Bear to throw him out the window and ending up on traction at the hospital.
* We Bare Bears episode "Slumber Party", Chloe and the Bears have a pillow fight during their impromptu sleepover.
* We Bare Bears episode "The Kitty", the bears find a cat that turns out to be a cougar cub, and it leads its pack into the bears' cave. After getting rid of the cougars, the episode ends with Grizz finding a baby hawk.
* We Bare Bears episode "Yard Sale", Panda ends a meeting with a pregnant woman named Annie after finding what turns out to be her husband Paul's cell phone. Paul is about to pound Panda flat in a jealous rage, but forgets all that in when Annie goes into labor. The poor guy is in such a panic he faints, and the bears end up having to drag him along as they rush to get Annie to the hospital.
* We Bare Bears for their box, likely preventing any more of these in the future.
* We Bare Bears, Grizzly hijacks a parked car and drives them to a nearby fast-food restaurant. The cashier at the drive-thru window not only effortlessly translates Panda and Ice Bear's maddened growls into an order, but is completely unfazed by the sight of three bears (two of which are viciously mauling each other in the back seat) paying for the food.
* We Bare Bears has Chloe Park, a preteen girl who is already in college, studying biochemistry. And while she's very smart for her age, that makes her have an easier time making friends with the bears than with college kids. She's also prone to have lapses in judgement appropiate for a child her age.
* We Bare Bears has Ice Bear getting the basketball stuck next to the hoop in a game. But as Ice Bear says, "Ice Bear meant to do that".
* We Bare Bears: Ice Bear and Panda don't appear in "Anger Management", "Poppy Rangers", "Ranger Games", "Vacation", and "Lord of the Poppies".
* We Bare Bears: Ice Bear is not only a master chef but also the only one who cooks around the house...er, cave.
* We Bare Bears: In "Bear Flu", the Bears get sick from swimming in a polluted lake, but Grizzly insists that he's fine, even as his condition deteriorates to the point he can't stand up straight.
* We Bare Bears: In "Bear Squad", it's revealed Ranger Tabes is banned from doing any work in the city after she caused a massive traffic pileup while helping a baby quail.
* We Bare Bears: In "Best Bears", Panda goes to pick up the rings for Darrel and Sofia's wedding, and ends up chasing them down the street after dropping them. Fortunately, he catches them just as he gets to the church where the wedding is being held.
* We Bare Bears: In "Best Bears", the Bears are helping their friend Darrell get ready for his wedding day, and Panda's task is to pick up the wedding rings from the jeweler's. Panda no sooner leaves the store than he drops them after getting jostled by a jogger, and he ends up chasing them all the way back to the church where the wedding is being held.
* We Bare Bears: In "Bubble" Charlie the sasquatch, after getting hosed down with water after saving Panda from a polluted lake, s revealed to have shiny golden fur. He prefers his dirty, unkempt fur because being so clean makes him uncomfortable.
* We Bare Bears: In "Charlie's Halloween Thing 2", one of the segments has the Baby Bears being chased by monsters as part of an extended parody of Scooby Doo. This includes a chase through a hall of doors, which leads to sight gags like the monsters running around in a stack like the Bears, and two Ice Bears running into each other.
* We Bare Bears, in "Chloe", when Grizzly asks for a high-five from Ice Bear, Ice Bear responds by tapping his head on Grizzly's hand.

* We Bare Bears: In "Citizen Tabes", the bears' friend Ranger Tabes rescues a mule deer buck from a falling tree, but accidentally breaks one of his antlers off in the process, causing a rift between the deer and a potential mate. Tabes, guilt-ridden about "disturbing the balance of nature", decides to give up being a park ranger and goes into selling pine-cone sculptures online. The bears spend the rest of the episode trying to persuade Tabes to come out of retirement, and eventually succeeding.
* We Bare Bears: In "Icy Nights", Ice Bear seeks the help of a Russian barista named Yana in tracking down the guys who stole his tricked-out Roomba. Yana's reaction to seeing Ice Bear is an affronted "You!"
* We Bare Bears: In "Log Ride", a boy does this during the titular ride, holding a sign that reads "PROM?" while his picture is being taken.
* We Bare Bears: In "Lord of the Poppies", Grizz, left in charge of the Poppy Rangers, misidentifies some berries as edible. Cut to one of the Rangers throwing up.
* We Bare Bears: In "Lunch With Tabes", Ranger Tabes discovers someone ate the sandwich she had made for lunch while she was busy walking her dog Kirk, and interrogates the Bears as to who might have eaten it.
* We Bare Bears: In "Nom-Nom", the titular koala does this to Ice Bear when he discovers his plot to use his brothers in a dangerous plan to make his Internet comeback.
* We Bare Bears: In "Occupy Bears", a flashback to the Bears house hunting has them at a poorly maintained apartment. When Ice Bear looks at the bathroom, a rat comes out of the showerhead.
* We Bare Bears: In "Panda's Date", Panda develops a crush on Lucy the grocer when she manages to use an Epipen to save Panda from a nasty allergic reaction.
* We Bare Bears in "Planet Bears" while at the supermarket. He is implied to have done this while riding on an out-of-control forklift in an attempt to break down the bathroom door.
* We Bare Bears: In "Rescue Ranger", Tabes defeats the trapper by pulling out the rug he's standing on, causing him to stumble into one of his own cages.
* We Bare Bears: In the episode, "Dog Hotel", Grizz eats a pie covered in whipped cream. But when he goes to take a walk with the other dogs, Joshy thinks he's a rabid dog, and she calls animal control. Luckily, his brothers and the other dogs were able to rescue him in time.
* We Bare Bears: In "Vacation", after Nom Nom blows his cover at the airport while trying to catch a flight to a spa resort, he and Grizz end up chased by a horde of Nom Nom's crazy fans.
* We Bare Bears: In "Vacation", when it looks like they're going to die in a plane crash, Nom Nom admits that he considers Grizzly his only real friend and that he loves him. He doesn't exactly deny it afterwards, either.
* We Bare Bears is 12 years old and is admitted into a university. She hates being known as "the prodigy" though.
* We Bare Bears is ten, but she's smaller compared to adult humans than most five year olds are in real life.
* We Bare Bears is trying to make friends at college, Panda's suggestion is that she carries a bunch of important papers and crash into someone, because that's how people meet in romantic comedies.
* We Bare Bears joined them. The bears interact with humans on a very regular basis, though.
* We Bare Bears many characters in the first place and they (obviously) spend a lot of time together. They seem to be not blood related but are still clearly each other's brothers.
* We Bare Bears: Near the beginning of "Audition", the Bears watch a commercial where some kids try to steal a box of Frosty Fluffs cereal from the mascot, Freshy Bear.
* We Bare Bears. Note that the suspect is a muscular, bald and bearded guy.
* We Bare Bears, one of the main reasons the bears, mostly Grizzly, try to integrate into human society.

* We Bare Bears" on his computer, but his banner on the social media site he uses is an assortment of random anime characters, also possibly drawn by him.
* We Bare Bears: "Panda's Sneeze" features a high-tech version of the spinning paper montage, with spinning cell phones and computers showing articles about Panda's viral video as it becomes popular.
* We Bare Bears", Panda's sneezing video makes him an instant star, which the shy Panda doesn't wish to be.
* We Bare Bears: Parodied in "Our Stuff", when Grizzly tries to commandeer a taxi... with a parking ticket with the letters "FBI" written on the back. Naturally, it doesn't work.
* We Bare Bears: Parodied in "The Kitty", where Grizzly throws a ball of yarn like a grenade in the hopes of distracting some cougars that broke into the Bears' cave and bites a bit off the end before throwing it.
* We Bare Bears: Parodied in "Tubin'". The Bears go over a waterfall after escaping a tribe of technology-hating hippies, but the waterfall turns out to only be about two feet high.
* We Bare Bears plays this for laughs. Ice Bear's tinkering with robots has gotten his brother chased up a tree by a homicidal Roomba, and later resulted in a robot bear rampaging through San Francisco.
* "We Bare Bears" (roughly "We the Bears") in Portugal to maintain a rhyming title.
* We Bare Bears shows but it still has one. Quite a lot of fans are furries.
* We Bare Bears sidekick "Pando" to the villains to various extras, who are often inanimate objects manipulated like crude puppets by Grizz.
* We Bare Bears thanks to his new electrokinetic powers gotten from his braces, attempts to destroy San Francisco using the bears' cave and every Smartphone in San Francisco to create a makeshift meteor.
* We Bare Bears, the bears upload a video and while typing the description, they each throw in hashtags.
* We Bare Bears, the episode "Fashion Bears" has Panda meet a MPDG named Samantha who loves doing impulsive things, like picking random people up with her tandem bike and riding through car washes. Panda quickly realizes how bad her impulsivity is when she assumes him tying his shoe is a marriage proposal.
* We Bare Bears: The Movie: The poster has the main antagonist, Agent Trout, glaring down at the Bears.
* We Bare Bears. Then T-Pain shows up and explains to Panda that they're on the former's tour bus.
* We Bare Bears, They look like bears, they walk on four legs sometimes, and they live in a cave, but they otherwise act human. Most actual humans in the show don't see anything odd about this. Notable that they are, in fact, recognized as bears since they befriended Chloe after she studies them for her college project on bears. They've also been known to act like wild bears under times of stress, such as when Grizz decides they need to become more primal.
* We Bare Bears up a tree while stripping it of bark, and dispense axes on command. None of which is strictly necessary for picking up crumbs off the floor.
* We Bare Bears usually sports a neutral or frustrated expression, but smiles on occasions.
* We Bare Bears wears contact lenses. In the episode "Chicken and Waffles", he loses them and is unable to see properly, so he needs Charlie to make his way around the city.
* We Bare Bears: When Grizzly gets shanghaied into working at an office in "Fashion Bears", one of the things he does to pass the time is spin around wildly in an office chair.
* We Bare Bears, when Ice Bear gets red fruit punch on his face and paws while drinking some of said punch from a bowl, he then scares some children from appearing all bloody.
* We Bare Bears where a narrator provides commentary when the bears take a trip to the grocery store.
* We Bare Bears, where he performs a song called "Girl Be Sellin' Sunshine" and has imaginary versions of himself telling him to be cool.

* We Bare Bears who loves to antagonize and manipulate the bears for his own schemes to stay in the spotlight.
* We Bare Bears whose arrogance vanishes when dealing with his hard-to-please father.
* We Bare Bears with headlines like "20 Struggles That Toad Owners Have :\" and "Little Girl Drinks Water, You Won't Believe What Happens Next!"
* Webb orchestrated the dismissal of commissioner Happy Chandler after discovering Chandler was looking to ban him from the game for associating with gamblers, then led the committee that named Chandler's successor, Ford Frick, who would do very little to reign in Webb/Topping and the other owners' actions in his term.
* Web browsers eventually filtered out the feature that makes a user go back a page when pressing the Backspace key. The "Go Back" command was changed to Alt + Left Arrow, which is much harder to do by mistake and prevents accidental data loss when typing a long post.
* Web browsers sometimes put Easter eggs on "not connected to the Internet" page, usually in the form of little keyboard games. The idea is basically that if you want to use the Internet, but you can't access it, you're probably bored out of your mind and need something to do. In Google Chrome, you can hit the spacebar or up-arrow to get a minecare-type game involving the little dinosaur from the error page. Microsoft Edge, meanwhile, has a surfing minigame heavily inspired by

* Webcomic Crossover & Cameo Archive has appeared in many webcomics, with his trademark axe, chasing after authors who use too many cameos.
* Webcomic/etaliaAxisPowersH (and possibly also in Sweden) and only has a physical form as long as his laptop is turned on (and sometimes not even then).
* Web Comic every female character (with a few exceptions e.g Tatsumaki, Swim, Pink Honert and Zenko) have decent sized breasts or very well endowed like Fubuki, Mizuki and Tanktop Girl. This extends to the villains like Mosquito Girl, Do-S and Psykos.
* Webcomic/Freefall: In one strip, Florence gives Varroa an atomic wedgie after remembering the psychological tests he put her through.
* Webcomic, has the most pointless of Token Minority characters with Geromy. Introduced as "The new friend", he has never moved, spoken, or been aknowledged by another character. He's even called the token black friend in the theme song! Amusingly enough, he is actually the third black character introduced after Barack Obana and The Big Man, with both actually having at least a minimum of a role in the comics.
* Webcomic/Homestuck: The author loves making up words. For example, device that instantly brings a targeted object to itself is called an appearifier instead of a teleporter.
* Webcomic, most of the cast is in their early-to-mid-20s, but Ellen first appears just before her 18th birthday. Sometimes she's as competent as the rest of the cast, but she has her moments, like not knowing (in a discussion of porn) that it's considered unusual for a girl to do double-penetration with her boyfriend and some other dude.

* Webkinz collecting. Almost none of the members are in the target demographic of children.
* Webkinz is an earlier game which functioned similar to the toys-to-life concept. It was made so that the player would buy a plush and then adopt its virtual counterpart in-game. It used to be that a premium account would expire a year after being activated by a plush, forcing players to keep buying plushies to play, but this was stopped due to complaints.
* Webkinz makes quite a lot, considering each Webkinz costs at least $15.
* Webkinz slowly became Allegedly Free: nowadays you can't buy clothing anymore, members get exclusive recipes for the food appliances, and cooler virtual Webkinz like Griffins and Wooly Mammoths are virtual-only pets that require real cash to buy.
* Weblinks Are Not Examples, and neither are quotes on their own. You should explain the horror in your own words, rather than rely on others to do so.
* Web MD and other diagnosis-by-Web search systems have a similar problem. For virtually any symptom you enter, you can be guaranteed that cancer or syphilis will show up in your list of possible diagnoses. Also, every potential diagnosis will list death as a possible side effect.
* Web MD, and Pets.com ads. Most others tried to subvert it by quickly explaining their company in a voiceover or text, but that Super Bowl, as well as the entire Dot-Com Bubble is associated with this trope.
* Web movie(s) involves an island full of mutated spiders that are: a) more poisonous; b) have fangs/mandibles that are stronger and sharper than normal; c) more intelligent and d) have a rabidly cannibalistic, yet simultaneously highly co-operative society that apparently crosses species barriers. * web novel night and focuses on a group of adolescent trick-or-treaters.
* Web Novel, or by a telepath mingling blood from a cut with a non-telepath. In theory it would be possible for a human to gain telepathy directly from a lupinoid's blood, but needless to say they're reluctant to part with it.
* Web Novel, since gods actually exist and even have administrations running their universes. After their resettlement onto a new planet (which is coincidentally hand crafted by a god, Raven 12345 herself) with the help of Hao Ren and his party, the Aerym elves, a solar-system civilization with no FTL technology, decide to set up a religion worshipping Raven 12345 to maintain social order and give hope to the people.
* web-novels, this is how both Hell and Heaven operate — rank and power are equal, with Satan and Yahweh being on the top of the heap. When Michael managed to kill Yahweh with the assistance of his conspiracy, he not only increased in power, he gained the ability to confer power on other angels.
* Web Of Angels. Condemned to death at the age of nine for his ability to manipulate the Web, which links the many worlds of humanity, Grailer must go underground, hiding his skills and testing his powers. Original.
* "Web of Fries II: Franchise Wars" takes place in a dystopian future where Big Fries has taken over the world, where a young woman (the daughter of the first movie's protagonist) joins a resistance force to get revenge for her father's death, only to find out that her father is alive...at least for a limited time only.
* "Web of Fries") who gets entagled in a deeply-rooted conspiracy about Nacho Fries involving the evil corporation "Big Fries", putting the lives of him and his family's at risk.

* Web of Shadows: The awakening of Makuta is represented by a quick series of shots (some ran backwards) from the previous movie with heavy filters applied. The recap at the beginning, of course, is also reused footage.
* Web of Spider-Man and all other ongoing storylines were dropped. FACADE has since made a couple of cameos (in 2009 and 2012) whose main point was to remind readers that the case is still open.
* Web of The Chozen: Female choz lay six eggs and both males and females incubate them in brood pouches. The sex of the offspring is determined by the sex of the incubating parent with the normal ratio being 2 males to 4 females. The hero of the story is the only male choz who produces female offspring.
* Web Original, at least): while still apparently male, they must shop for feminine accessories and hygiene products.

* We Bought a Zoo, a bear escapes and wanders around in a town until the zookeepers capture him and take him back to his enclosure.
* We Bought a Zoo, Ferris seems very harsh and acts like a jerk, but once he can't find any faults with the restored zoo, he passes them and wishes Benjamin good luck, although he still maintains that the zoo will probably fail and refuses to attend, as this would count as fraternization. There's also no proof beyond MacReady's word that Ferris stole his ideas.
* We Bought a Zoo had three uses of "shit", two uses of "asshole" and one use of "dick" (that last word is said by a 7-year-old) in order to try and push the movie up to PG-13 for language, as other than grieving over the death of a mom, the movie is pretty clean. However, their efforts did not work and the movie still got a PG.
* We Bought a Zoo is a comedy-drama that takes place almost entirely in a zoo.
* "We bout to throw them blows/We bout to swang them thangs/It's about to be a what?
* we briefly see Nancy marrying Edward in the animated world, and she seems to be getting along just fine.
* Web Serial Novel for the dead. The reapers are basically imaginary. They don't have a "true" form and those who can see them perceive them exactly as they expect a reaper to look.
* Web Serial Novel has a lot of these: Codex, Tink, and (at least in the backstory) Chaos all serve this role, as do many of the villains — most notably Maven.
* Web Serial Novel is burned alive for what he did. It's presented in a fairly sobering light.
* Web Serial Novel is set on April 8th, 2011 — the first 19 arcs take place before the end of June, and the story then timeskips to 2013.
* Web Serial Novel the Godkindred Kingdom believe that by breeding many different species together they can become gods. Social status is determined by the number of species in one's genealogy.
* Web Serial Novel the main character (Skitter) often threatens people with horrible fates if they don't do what she says due to her power to control bugs, including some unpleasantly venomous spiders.
* Web Serial Novel, the Merchants, a gang of criminals, march into the main character's territory... and then start running as her creepy Bug-controlling powers start to attack them.

* Websnark could boost a comic's site traffic higher than ever before. In a subversion, the writer of the blog, Eric Burns, never quite seemed all that comfortable with the influence he wrote his way into and was frequently a reason for his sabbaticals from the blog.
* Web Soup - after the host shows a clip of a polar bear defecating in its pool, he brings out a drink based on it and takes a swing. "It tastes like something I shouldn't recognize the taste of!"
* Web Soup offers a "Palate Cleanser" clip (usually cute animals acting cute) to serve as much-needed Brain Bleach following the disturbing "Things You Can't Unsee" segment.
* Webstar). The fact that they were properly credited and paid for the use of the sample probably helped.
* Webster. A local artist makes a sculpture consisting of a bunch of aluminum cans welded together in a net. Webster finds the sculpture while looking for cans to recycle and gets it crushed. He and George end up trying to recreate the sculpture. The artist finds out and is perfectly okay with it. (The point of the sculpture was an environmental message.)
* Webster called "Thanksgiving With The Four Tops" aired in January 1989, two months after Thanksgiving.
* Webster, George plays BOYRDEE. (Ironically, he does this after challenging Katherine's word, with turns out to be a real word.) Both Webster and Gramps suggest that Katherine challenge this one too, but the scene ends a minute later.
* Webster had a sequence of still photos showing the title character being lofted by a bunch of balloons before being caught by his adoptive parents.
* Webster in particular is such a terrible liar that when he tries, people think he's just being sarcastic.
* WebTV devices had a large "smart card" slot on the front, though they were never used for anything.
* We Buy Anything: Wanna sell that suit of armor at a grocery store? They'll take it! While it may seem jarring, it's preferable to searching through the city (or worse, through multiple cities) to find the one vendor that deals in magical weapons.
* We Buy AnythingWant to sell that rusty suit of armor at a grocery store? They'll take it, no questions asked!

* Webwork but disguised as a human via glamour, is mistaken by a mugger for a hooker and is threatened at knifepoint for some "fun" in an alley. She proceeds to slam his head against the alley wall repeatedly, barely noticing as she does so.
* Webwork eventually decide to wean out Section 13's reliance on civilian

"contractors" (namely, Jackie and company) by creating a new agency called Section 0 designed specifically to deal with magical threats. However, this group currently consists of three agents working out of a repurposed closet space in Section 13's base, so for the time being, they're mostly reliant on the J-Team for help.
* Webwork has Daolon Wong challenging Uncle to one of these after his escape from prison.
* Webwork has the "Downtime" chapters, set between various multi-chapter, action-heavy arcs, which allow all the characters a chance to catch their breath and regroup.
* Webwork hybrid. By the time she returns to Earth, her morality has been completely twisted.
* Webwork, Jade escapes into a demon netherworld where a year passes for every hour in the human world. Eight hours of her family and Section 13 trying to find out what happened to her, the now 21 year old Jade emerges back into the human world as a humanoid spider yokai/oni hybrid.
* Webwork that represent Light and Darkness, with each manipulating everything that occurs in the mortal world, large and small, in order to advance their side.
* Webwork. The initial act that started the change is so graphic that the author marked the section where is starts and ends so readers can skip over it.
* Webwork. This happens just late enough to spoil things for new readers, but early enough to essentially drive the whole plot.
* Webwork, with all the humans being transformed, there's a lot of this trope going around:
* Webwork, with the former describing villains with this kind of motivation to be like viruses.

* We Can Be Heroes! (Steven Universe) has Lapis finally go all out with her hydrokinesis against the Kazkani 500, an alien mafia syndicate that has kidnapped and beaten her friend Hurley into a bloody pulp with the intention of executing him. Kicking things off by punching their loudmouth leader through a wall, the rest of the Kazkanis become scared out of their minds when she weaponizes the water flowing through their hideout's pipes as well as the pouring rains outside, and unleashes a chaotic maelstrom in the form of water tentacles, water pillars, and even armies of sea creatures made of water. And when their leader fights back, she conjures up a giant watery clone of herself that demolishes his hideout and scares him so bad that he passes out from sheer fright alone.
* We Can Be Heroes! (Steven Universe) mob boss who wears a snazzy red and black pinstripe suit, and rules the port town of Krapton with an iron fist.
* We Can Be Heroes! (Steven Universe) seems to like muscular dragon aliens, as shown by a dream where she's literally drooling over scantily-clad Dragonians of both genders while lounging at a beach.
* We Can Be Heroes! (Steven Universe): While rescuing their friend/superior Rubicu from a crime lord's arena, Handy and Gunshow get into a long argument on if Earth counts as an ocean or a jungle planet, then ultimately come to a truce by insulting the Diamond Authority for not doing anything with it after allegedly killing all the rebel Gems on it, all the while an amused Rubi is forced to listen to the whole thing. The narration states they have these types of conversations often.

* Wedding Peach Abridged, Jama P told the love angels about the devil infecting rice with "the essence of fatness", and when they said it was lame, he said, "Hey! I didn't write this script, so don't complain to me!"
* Wedding Peach Abridged, their promos specifically point out the amount of hate that the show has gotten from the media and fans of other series.
* Wedding Peach Abridged, Yuri gets annoyed that Jama-P keeps doing that to Momoko... when she can't do it herself.
* Wedding Peach actually acts as a shield to keep the devils from seeing who the love angels are. So this is justified... sort of.
* Wedding Peach and weddings become simply a motif and not the central focus of each episode, the series improves greatly.
* Wedding Peach consisting of Wedding Peach, Angel Daisy, and Angel Lily. But in the second season, a "Sixth Ranger" is added in the form of Angel Salvia, a mysterious character with a modified costume who wields a sword, is much more mature and powerful, and frequently acts independently of the main trio.
* Wedding Peach has a human father and an angel mother. The others love angels are full angels born to human mothers when their bodies, but not their souls, were destroyed.
* Wedding Peach has a wedding theme. They are called "Love Angels" but they have the frilly superpower costumes and such.
* Wedding Peach has the bridal transformations, and the warrior transformations. You could tell how much animation budget was available for an episode depending on whether they did the warrior transformations or not.
* Wedding Peach manga ran for 6 volumes and one spinoff. The anime ran for 52 episodes and 3 OVA spinoffs, and almost all of the tropes on Wedding Peach's page are about the anime.
* Wedding Peach named Iwamoto (actually a devil in disguise) comes to power in the heroines' school and sets up strict rules. Not only is student behavior controlled inside school but outside school as well. In fact, he even follows Momoko, Yuri, Hinagiku and their male friends to a ski resort to enforce his edict about boys and girls not meeting or talking with each other.
* Wedding Peach: The love angels think Yanagiba has a girlfriend because of this trope. Later when they try to stage it themselves, Yousuke comes (with an umbrella) to pick him up instead.
* Wedding Peach tries to go out with the guy they are rivals for, the other two do this.
* Wedding Peach with catty features they don't have anymore until they see Yanagiba.
* Wedding Ring Defense: Wearing a wedding ring to fool people into thinking that you're married, often to shoo away unwanted suitors.
* Wedding Ring Removal: A character takes off their wedding ring before they cheat on their spouse.
* Wedding rings are also available. There are many different versions of recipes for Lembas, books of songs, and a lot of other things.
* Weddings are an issue in these cultures. The minimum size for an Indian or Middle Eastern wedding is somewhere in the triple digits; anything smaller and you will run the risk of offending many people. If you live far away from most of your relatives, they will insist that it be held close to them. This goes double if you live abroad—they

* "Wedding Videography": Frankie starts heaping adjectives when she tells Abed about stuff from her childhood/teenage years. Abed's filming their preparing to go to Garrett's wedding:
* wedding vows, she promised her partner to try and get tickets for the show for their kids. The show doesn't have a studio audience, so tickets were an impossibility. However, when the producer heard that, he was so flattered he decided to find a role for her so she could bring them. Up until that point, he had never planned to show Sam's mom on-screen, because he could never find an actress good enough. But when he thought about it, he realized Jane Lynch would be perfect for the role, and wrote the episode for her.
* We'd Fly Away Together about her past, but when asked she pretends that she can't remember her dreams.
* We'd Fly Away Together: Terra is a violent teenager who is usually either angry or stoic. She can pretend to be emotional, but describes herself as feeling "flat", and finds her feelings to be shallow. She also dehumanizes herself a lot. She frequently calms herself by imagining herself dying violently and has also had suicidal thoughts.
* Wedge also averts it by not taking Aril Nunb as his Executive Officer, citing that he needs someone who's good at training pilots during the rebuilding phase of the squadron, and that Aril's piloting skill is inherent, not something that can be taught - if she tried, the end result would be both she and the other pilots just getting frustrated with one another. He does later explain this when he accepts her into the squadron as a pilot, and she understands his reasoning.
* Wedge and Tycho keep trying to retire and always end up getting called back by the next Really Big Galactic Crisis. They're getting older.
* Wedge Antilles is a consummate Guile Hero, and his cunning is probably his second-most important talent (directly behind his
* Wedge Antilles is a major maverick. He's led Rogue Squadron into defecting (temporarily) from the New Republic itself.
* Wedge Antilles is assumed to have taken place beforehand. It's impersonal and he's kind of the generic Good Guy, with occasional flashes of his personality showing. Sometimes a few pages or even scenes are given over to personal things, but his real day in the limelight is the novel "Starfighters of Adumar".
* Wedge Antilles — Most likely Steamroller. Against most opponents, he's simply too good to be nailed down to a particular tactic, but when the enemy has him boxed up, he tends to get increasingly daring. Further, his save of Luke, in the original movie, is pure steamroller. He's noticed his own
* Wedge Antilles, repeatedly hints at his disgust for a moral system that revolves around killing for honor. The native fighter acting as his guide falls for him, sees that she has no chance, and tries to go through honorable suicide-through-combat. He stops her when he sees what she's doing, and they have an exchange where he tries to convince her not only to stay alive, but to see and move past the flaws in her culture's beliefs.
* Wedge Antilles's for the other two) as the first act of their final plan.
* Wedge Antilles tends to give him less personal plotlines than his fellow main characters. His day in the limelight is the arc "The Phantom Affair".
* Wedge Antilles, the commander of both Rogue and Wraith Squadrons for most of the series, spends most of it
* Wedge Antilles. (Weirdly, he was never a colonel, even though, depending on the source, colonel is a half-notch above commander.)
* Wedge can actually be considered a nice deconstruction, of a character granted

* Wedge's Gamble explains that many Alderaanians feel this trope, hating the thought of pity, but at the same time feel the need to remind people of their loss.
* Wedge's Gamble for nefarious purposes. It also claims "outlaws and malcontents" have rendered Ewoks extinct.
* Wedge's Gamble, he responds that the air goes in, crosses the vocal cord equivalent, and goes right back out.
* Wedge's Gamble, Rogue Squadron remote-control-hijacks a solar mirror orbiting Imperial Center. The mirrors are used to redirect sunlight, but this one was focused on one of the water reclamation plants in order to raise the local humidity to create a massive thunderstorm and knock out the power at a shield generator. Nothing exploded, but there was quite a bit of steam and melting going on.
* Wedge's Gamble, they make sure to sound evacuation alarms so that any buildings in their path will be (hopefully) empty by the time the droid reaches them—after all, they're trying to take Coruscant intact with as few civilian casualties as possible.
* Wedge's Gamble when the rest of the squadron resigns; Pash can't stay because with his father, he knows his presence would ensure nobody believed the Rogues had truly gone renegade.
* wedge up permanently open, due to it being somewhat uncomfortable to use.
* Wedge vigorously attempts to avert this trope in the series, mostly by seeking to avoid promotion at all - he loves flying and isn't sure he's up to managing anything bigger than a squadron. Aaron Allston's

A Dept of Defense strategist had become obsessed with an "unbeatable" war game he'd developed involving a similar scenario, and when his superiors told him to drop the matter decided to make it a self-fulfilling prophecy.
* We do hear of the possibility in one book of a member of one noble House taking the name of another to prevent that House going extinct, so this may be why they are so few other branches.
* We Do Not Know Each Other: Two or more characters pretend to be strangers.
* We don't find out until the very end that it's Varden's sister Marynn.
* We don't find out what exactly a "street cleaner" is, but it's some sort of monster considered horrifying even by Night Vale standards.
* We don't get to see it, but we do get the lead in. The answer to the last puzzle is a word:
* we don't know for sure what happened, but judging from Marv's narration he had the most "fun" with him.
* We don't know if Xykon killed his grandma or she just died of natural causes and he zombified her then, but he definitely did kill his parents by siccing zombies on them and then zombified them.
* We don't know what the black boxes were covering in Episode 7 and 9. All we know is that it might be related to the children and it managed to shock Paul somewhat given how much time he spends on the screen and the noticeable shakiness in his voice afterwards (the one in Petscop 9 even causes him to give a
* We don't leave our wounded/our buddies/Marines/etc. behind!" is a principle of various real-life military cultures — and of course their representations in fiction.
* We don't see all the bands competing in a tournament that has 16 spots, so who might have been entered? What songs might they have played?
* We don't see her doing much healing as the character isn't in a series where there's a lot of fighting and injuries that need urgent fixing on the spot, but Fluttershy qualifies as she's sometimes shown doing some healing, albeit on

* Wee Bey attempts this as well, with movie posters papering the walls of his cell and a line of fish tanks just like he had at home (though these have plastic fish.) Unfortunately, one particularly cruel guard who hates Wee-Bey for killing a cousin of his on Avon's orders decides to tear down his posters and fuck with his fish.
* Weebl & Bob, in which Bob goes to France and ends up having his kidney stolen by a French stripper named Kevin. According to the voiceover at the end of the episode, "the French are notorious kidney thieves".
* Weebl & Bob of "On the Moon" inverts this when Insanity Prawn Boy mistakenly

thinks the Toast King is making a knock-knock joke.
* Weebl & Bob short had Weebl and Bob having to save "the Mayor" from the evil Fire Thunder Squad.
* Weebl & Bob stars a rather paranoid man with red hair, an oddly-shaped cleft chin... and enormous yellow teeth that take up most of his face and don't move as he sings.
* Weebl & Bob; the corn is aware of what's happening to it and screams as it starts.
* Weebl & Bob: "We were doing Position 97 near a porthole... and she just fell out!"]]
* Weebl & Bob, where an establishing shot of a building is accompanied by a ditty exclaiming "Establishing shot of the building!" And in another episode, the narrator sings "Chris' house!" over a shot of... well, what do you think?
* Weebl & Bob with the title character also renamed, due to an existing trademark on "Weebles" toys.
* Weebl and want to tear his legs off. Besides him, however, everyone likes them and they actually have good cause for the leg-tearing.
* Weebl has Spider-Man do this — quite possibly on purpose. We get a loving close-up of his junk.
* Weeds, and admitted that had he been aware of it, he wouldn't have pitched it in the first place.
* Weeds Andy ends up in a poly relationship with an artist and her husband. Although he ultimately ends it, he does so because the husband is dying and Andy is afraid of death, not because of the arrangement itself - he's "OK with the two-for one deal."
* Weeds, Andy's Army Reserve unit is called up for duty in Iraq. He gets a deferment by enrolling in rabbinical school, as theology students qualify for the chaplain corps.
* Weeds, Celia gives Isabelle laxatives, making her publicly soil herself, but she does it to make her lose weight, not as a prank. Isabelle retaliates by given Celia anti-laxatives.
* Weeds: Celia Hodes is kidnapped by her daughter and her boyfriend the rebel leader. They intend to ransom her, but no one is interested. They then plan to sell off her organs for cash but find out she's had chemotherapy so no one will want them. Celia then "makes herself useful" e.g. by organizing the rebels' firearms, but manages to provoke a fight between her daughter and the rebel leader, breaking up their relationship. The daughter leaves, and the rebel leader lets Celia go.
* Weeds contains over-arcing storylines, although they aren't necessarily clearly-defined between seasons, and they sometimes aren't so much resolved as they are escaped from. This gives it a quality of drifting from situation to situation that fits its stoner subject matter, while characters from unresolved plotlines sometimes resurface later.
* Weeds episode "The Love Circle Overlap" makes use of this trope, in the scene near the end of the episode with Nancy and Andy monologuing back and forth about their failures.
* Weeds has a number of dirty cops and Nancy even ends up married to a dirty DEA agent.
* Weeds, if you marry Nancy Botwin you will die. It's an axiom of nature.
* Weeds is a comedy/drama about a bereaved housewife who starts selling marijuana to pay the bills.
* Weeds is much the same in her career as a marijuana dealer, or at least she thinks she is.
* Weeds, Nancy may not seem like it at first, but she has this effect on men. They seem to be attracted to her despite the fact that she brings chaos to everything she touches.
* Weeds of all people is the voice of reason, pointing out that gay doesn't mean paedophile.
* Weeds saw some of the episodes from season 2, 3 and 6 leaked before they made their initial broadcast.

* Weeds season 7 episode "Bags" a classic example involving Shane in Copenhagen. He's breaking it off with Renata, a much older woman, who screams at him and berates him for not being ready to impregnate her and similar stuff.
* Weeds started selling marijuana as a way to make extra money so she can maintain her family's suburban lifestyle. However, when she actually burns down her house to get away from the suburbs it becomes apparent that she likes the excitement of being a drug dealer and she will keep doing it no matter how much money she has and what state her family is in.
* Weeds started to become this as the creator always seemed to announce that the current season would be the last, only for Showtime to renew it midway through that season.
* Weeds. This of course doesn't cover the fact he legally blackmailed and coerced her into marriage (a legal contract), as well as a whole slew of other issues.
* Weeds was a somewhat more hardcore version of this. She was much crazier than usual — he even told a story about how once she stabbed him because she thought he'd kicked her "spirit animal," although he hadn't figured out what that was. And he admitted that he didn't actually love her, and implied that he was still with her because she made life interesting.
* Weegee, who might just have been the last Troper to stare at it before it was replaced.
* Wee Jas is the Sune goddess of love, beauty, death, magic and law. The combination of law and love makes her the goddess of
* Week 14 of the 2001 NFL season, the 6-6 Cleveland Browns hosted the 4-8 Jacksonville Jaguars trying to stay alive for a playoff spot. Late in the 4th quarter, the Browns are down 15-10 but were driving for the go-ahead touchdown. On a 4th-and-2 at the Jacksonville 12, Browns QB Tim Couch throws a three-yard pass to WR Quincy Morgan for an apparent first down, then the Browns hurry to spike the ball and stop the clock as Morgan had been tackled in-bounds. Couch spikes the ball, but then the head referee Terry McAulay announces that the catch to Morgan was being reviewed by instant replay.
* Weekend (2011), a story about a gay man who ends up knowing more about his one night stand.
* Weekend (2011) is about two straight gays, one who is more comfortable with his sexuality than the other.
* Weekend (2011) (romantic film about two men spending a weekend together after a hookup, two gay lead characters; subject matter includes discussions of homophobia and coming out, gay sexuality, queer male romance)
* Weekend at Bernie's and Bernie partly because he got "greedy" enough for this to come up.)
* Weekend at Bernie's demonstrates an alternative approach to body disposal.
* Weekend at Bernie's: Inverted, as the protagonists must actually keep the body on display, pretending that Bernie is still alive.
* Weekend at Bernie's: Mob boss Vi had Bernie killed for sleeping with his girlfriend.
* Weekend at Bernie's until the following Monday, in order for their promotions to go through.
* Weekend At Burnsie's", Mr. Burns is writing jokes for his appearance at a fundraiser, testing them on Smithers and Homer (the latter because while he was hooked on medicinal marijuana, thought his earlier jokes were hilarious):
* Weekend at Burnsie's": When Mr. Burns dies in the tub, Homer and Smithers operate him like a marionette for an investor's meeting. Eventually, his heart turns back on during a musical number.
* Weekend at Hisao's's old friend, uses the term's variant for college students to describe himself (the fic takes place after he and Hisao graduate from high school), as he failed to get into the school that he wanted.
* Week Ending Cabinet Leaks, Carol Thatcher's draft autobiography is covered in blue-pencilled notes from the publisher, which is fair enough. But in the end, they've written "C Minus Minus. Must try harder".
* Weekend Nachos occasionally targets trust fund punks in their songs, but none

are more direct or venomous than "Fashionable Poverty", which savages crust punks with massive trust funds who choose to become vagrants and go out of their way to become as filthy and repulsive as possible while knowing that when they tire of that lifestyle, they can always go back to the cushy upper-class homes that they gave up for the hell of it.
* Weekend Patissier because the director wanted someone who could naturally play a normal 15-year-old girl. Unfortunately, Rin has been acting almost her entire life and doesn't have much experience with being normal.
* Weekend Update of being a "speciesist" after reporting a story about a man being attacked by two black bears, asking "if it was polar bears would you have said 'two white bears'?" Jimmy responds by revealing that he is married to a black bear, shows the audience the wedding photo, and then asks Tina "Who's the idiot now—you, or me, the guy who married a black bear?"
* Weekend Update would later feature Armisen and Bill Hader as "Two Gay Guys From New Jersey", who were the entire Joisey male stereotype
* Weekend Warriors was about an Air National Guard unit near Hollywood in 1961.
* Weeki Wachee Springs channel includes a series called "Tail Mail," which encourages young children to hand-write letters to the mermaids, who then read them.
* Weeki Wachee Springs famous for its mermaid show, debuted in 1947 and is still active today.
* Weeki Wachee Springs promotes a charity marathon called "Fish Out Of Water Extreme 5K."
* Weeki Wachee Springs since, well, there aren't real mermaids, therefore the park cannot be accused of misrepresenting them.
* Weeki Wachee Springs video ends with the participants and the instructors singing "I wish I was a Weeki Wachee Mermaid" to the tune of the old "I wish I was an Oscar Meyer Weiner" jingle.
* Weeki Wachee Springs. "Weeki Wachee" means "Little Spring" or "Winding River" in Seminole Indian.
* Weeki Watchee Springs, famous for their mermaid shows (where women swim around wearing fish-tails).
* Weekly Jump readers at the time, it was renewed beyond its originally planned three year run and they were forced to continue the story the week after. Because of this, the post-Raoh arcs are known for being retconfests, particularly with Lin suddenly being revealed to be the long-lost sister of an Empress, as well as Kenshiro, Toki and Raoh themselves having long-lost brothers (Hyoh and Kaioh) who trained in a separate Hokuto martial art style.
* Weekly photo-comic filled with robots, rag dolls, ballerinas, and melancholy humor.
* Weekly Shonen Jump was then given a permanent spot at the back of the magazine, effectively giving it immunity from cancellation.
* Weekly Shonen Magazine with absolutely zero input from Mashima, who never revealed any of the characters' birthdays. This led to Mashima tweeting his confusion when foreign fans suddenly started wishing Lucy a happy birthday, and later reinforcing that Lucy's official birth date (at least in Japan) remains unknown.
* Weekly World News including being used as inspiration by a magical trickster.
* Weekly World News items have been taken seriously by people who didn't check up on where their news was coming from. This was sometimes exacerbated by some news aggregators (lookin' at you Yahoo) that mixed the WWN in with the normal gossip news.
* Weekly World News — aliens advise the president, Congress is full of zombies (sure that's made up?), Dick Cheney is a robot, Satan was captured by American soldiers in Iraq, mermen have been found in the South Pacific and Bigfoot is advertising his crash diet.
* Weekly World News never once ran a disclaimer or otherwise indicated they were a parody, even though some articles they printed were potential grounds for libel lawsuits.

* Weekly World News once ran an article about China digging a hole to America to invade it. Similarly, The Sun ran a report saying that a group of Chinese miners dug their way to Nevada by accident and apologized, and the government kept the incident under wraps.
* Weekly World News ranging from a man with transparent brain tissue (so one could shine a light in one ear and have it come out the other), to a young Kansas woman who discovered someone blowing in her ear would result in a breeze coming out the other side to a dimwitted Californian surfer dude who was cleaning his ear with a q-tip, and "not finding much resistance" decided to see how far it could go (right out the other ear it turns out, which the surfer found "way cool").
* Weekly World News was a satirical newspaper that published this sort of story until it folded. Some people genuinely believed them (sometimes,) even though they often recycled stories; one standby every Presidential election year was "Space Alien Endorses [candidate for President]!" (complete with a photo of the alien and the candidate) and there were new doomsday predictions roughly every two weeks, often contradictory.
* weeks before any doctor would allow her to remove it. Somewhat lampshaded when Inspector Ridley tells Misty that she really ought to be in the hospital lest she want to make her arm injury worse.
* weeks...but that's mostly because it's so hard to ingest that you will find yourself willing to eat literally anything else if it means no Dwarf Bread tonight. Actual dwarfs tend to prize it highly, but more as a weapon than a food.
* weeks. Interstellar travel in BattleTech is anything but fast for civilians, and not much better for the Military.
* weeks in the Bajoran Resistance, and much of the early part of the series deals with the Federation trying to help Bajor while simultaneously keeping Bajoran extremist groups left over from the Occupation from wrecking everything.
* weeks pre-loading the parrot with rude phrases before giving it to Garrett as a prank.
* weeks would certainly fit. They were born four days apart in March 1931 (Shatner on the 22nd, Nimoy on the 26th).
* week, the ones who didn't listen to the warnings from their elders/teachers/what have you. Scare 'Em Straight is tolerated far more for driver's education than in other places because it's proven over and over again to be the most effective way of teaching the consequences of unsafe driving.
* Ween — a lot of the stuff but specifically the song "Gabrielle" from "Shinola, Vol.1" a song written as a stereotypical rock love song by an asshole excusing himself, went on to receive a lot of airplay (at least here in Australia) and was a minor hit.
* Ween have been know to do several genres of music (eg. hard rock, pop, country, etc.) with NSFW lyrics.
* Weenie Licked as she is created by Paul specifically to be his girlfriend and he doesn't think of any other traits for her until after the fact. She seems to be developing away from this.
* Weenie Licked cuts to awful infomercials at the climax of the first arc.
* Ween-influenced sound, especially because the album generally plays it straight (well, aside from "Piss Up A Rope" and "Mr. Richard Smoker" anyway).
* Ween is his favorite Ween album and that it was the album he was most proud of when it was released.
* Ween title songs this way on occasion. "Pumpin' 4 The Man" and "Don't Get 2 Close (2 My Fantasy)" for instance.
* Weepinduo, a fusion between a Weepinbell and a Doduo, which produces the image of a yellow Doduo with one head being a regular Doduo head and the other being the head of a Weepinbell.
* Weeping Angels are an inversion of this trope, since humans looking at them causes the monster to turn to stone. Downplayed since the stone effect is temporary.
* Weeping Angels are built entirely on this trope. They're statues. What's the scariest thing a statue can do? Move when you're not looking. They make people

disappear instead of leaving bodies. You have to keep looking at them; you can't just film them because then the film will become an angel. But look at them in the eye and one will start growing
* weeping on a hardened target, a fighter pilot escorting a bomber might become an Ace and feel that he had a good mission, but if that bomber ends up being shot down without destroying the target, the mission is considered failed.
* weeping) or immunity (to fire, to cold, etc.) All of these powers allow them to evade execution and live happily ever after.
* Weep sourcebook, one of his "co-workers" recounts one time where Chang backshot a pregnant woman without so much as blinking.
* Wee Sing in Sillyville – no one will talk to anyone who wears different colors than they do. The only mutual friend of all the groups is the white-clad sprite Sillywhim. But at the climax, Sillywhim hurts her ankle, and all the others work together to bandage it with their different colored scarves, ties and ribbons. This finally reminds them of how well their colors - and they as friends - go together.
* Wee Sing in the Big Rock Candy Mountains: After the characters perform "Follow Me," the Snoodle-doodles ask them to "do it all backwards, really fast!" They do it.
* Wee Sing takes place in a mansion that has a bookcase secret passage of the sort where the person who triggers the door is flipped around to the other side. In this case, the viewer does not get to see what is behind the bookcase door but hears explosively lively band music coming from within.
* We even get the news camera pointing at Lois as she asks a question to make sure Superman knows she's on the plane when its not normal practice for a newscamera to point at a print journalist when she's asking a question. Usually, you'd hear Lois speaking in the background with the camera still pointed at the spokeswoman.
* We eventually find out that the O.S.I. is supposed to handle other hero-related activities. Previously, their 'official' enemy was the Cobra-esque organization S.P.H.I.N.X. In the present time, S.P.H.I.N.X. has disbanded and the O.S.I.'s official rival is now the Guild. Now that the Guild is public once again, O.S.I. is a support organization for protagonists, but they avert most of the other union characteristics.
* We eventually find out that the UED knew about the colonies and was just monitoring them from afar, content to let events take their course. Then they found out about the
* We eventually see that mortals can become Concepts as well, though it is far from easy and it is supposedly completely impossible to become a Draconequi (possibly because Entropy is the antithesis of life). All members of the Alicorn's Minor Arcana have thus far been created this way. These include Princess
* Weezer, after a comment lead singer Rivers Cuomo would frequently make when asked his opinion about arrangement or production choices.
* Weezer, are the most celebrated albums in their discography. While some of their later albums are also well-liked in their own right, it is generally agreed that Weezer never did top their first two releases.
* Weezer, asking the other two members the kinds of questions fans might have or getting them to clarify statements they make.
* Weezer burst into the music scene back in 1994, they were just naturally geeky. Instead of trying to have some kind of bombastic or showy image, they were completely themselves. However, around the time the Green Album was released, their geekiness was heavily Flanderized. They all began dressing deliberately in geeky/outdated fashions, frontman Rivers Cuomo began wearing thick-rimmed glasses, etc. Plus, even though he's now well over 40, Rivers STILL obsessively sings about topics like snagging the sexy cheerleader goddess!
* Weezer. But still, few people talk about any specific songs on the album when compared to how much they talk about the album itself.
* Weezer Easter egg, since both are hidden in the same place, but there's no confirmation of this from the band—the only official explanation (from the band's webmaster, Karl Koch) has been "no means no".

* Weezer era band made minor contributions to the studio recording: Pat Wilson played a short drum part that was looped throughout the song, and Brian Bell contributed backing vocals.
* Weezer has this happen to two people: one standing in the street watching said girl, and the other driving a pickup truck, which hits the one standing in the street.
* Weezer: He wrote the song after harboring a crush on a girl, then noticing a pink triangle patch on her backpack one day (not "on her sleeve" as the lyrics state). It was only long after he'd already written the song and fallen out of contact with her that he learned that she was straight, and was wearing the symbol to show her support of gay rights.
* Weezer is generally seen by critics and fans as one of their weaker efforts, but it's also one of their best-selling albums and even spawned their only major pop hit, "Beverly Hills".
* Weezer is notorious for always looking somewhat dismayed. Which makes his obvious happiness in the music video for "Keep Fishin'".
* Weezer may have even contributed to their popularity, and it's notable that their earliest big break came from being voted in by Weezer fans to be an opening act for a 2001 tour.
* Weezer never covered N.W.A.'s "Boyz-n-the Hood", that was Dynamite Hack.
* Weezer's "Grapes Of Wrath" mentions Audible prominently enough in the chorus that fans suspected it was paid promotion - turns out Rivers Cuomo just got really into audiobooks and decided to write a song about it. Subsequently, Audible got wind of the song and published an interview with Rivers on their official website, effectively cross-promoting Weezer's latest album and their own product.
* Weezer shot 20 times. The one that was used was between the 15th and 20th, when the band was tired and simply not caring anymore (things such as a dog defecating on a drum pedal helped).
* Weezer", subtitled "Variations on a Shaker Hymn"—you guessed it.
* Weezer's "Why Bother" is about giving up on romantic relationships due to fear of heartbreak, and briefly mentions masturbation in this context:
* Weezer's winged W, which is probably influenced by Van Halen, given Rivers Cuomo's taste for hard rock.
* Weezer, that they had been working on beforehand, and gave it a tentative release date of May 25, 2018; the "Rosanna" cover was released on May 24 of that year.
* Weezer, the first Rentals album to be released after Matt Sharp left Weezer.
* Weezer turned out to be a case of this by Rivers Cuomo. She wore the titular triangle on her backpack (rather than on her sleeve) as a show of support for gay rights, but wasn't a lesbian herself.
* Weezer was a red Stratocaster. It was eventually given to some friends in another band, Justin and Adam of Shufflepuck. One night, Adam was having trouble with his main guitar staying in tune, so halfway through the last song, he switched to the red Strat, but found it was even more out of tune. He got so upset, he started swinging the guitar around and smashing it. The spectators enjoyed themselves, but he noticed a look of horror on his friend Kevin's face. Turns out Justin sold the red guitar to Kevin right before the show started.
* Weezer was, but some were still disappointed that the band's first album in five years was under a half-hour long.
* Weezer were submitted by fans - the cover was created by a fan for an official contest, while the title was a suggestion made in a less formal thread on the band's official forum asking for album name ideas. They also had fans contribute to the songwriting process less directly: The band would post demos of songs they were considering for the album, and would take fans' reactions into consideration when arranging songs, as well as letting them influence which songs appeared on the album to some extent.
* Weezer, which details Rivers Cuomo's dissatisfaction with the music business while singing about a fan letter from Japan.
* We finally get to see it, or at least one of the opening salvos, in
* We find out from the Mulder and Scully expies that as part of the cover-up of

magic, "Spontaneous Hair Color Change" is a recognized medical condition. Apparently, it's one of the more common side effects of magic use.
* We find out more about the underage restrictions in Book 6. It turns out that while the usage of magic by minors does set off alarms, the Ministry technically cannot do more than locate it before informing the parents or guardians of the wizard.
* We find out that Syaoran's — and to some extent Sakura's — romantic feelings for Yukito were not simply a crush but in fact
* We find out that Wally was actually a Prisoner Of War, held by insurgents for over a decade.
* We first meet the patriarch Tywin Lannister admonishing his son Jamie for his misinterpretation of the philosophical concepts of family honour... as he is
* "We Fixed a Truck" has BMO expose "Princess Bubblegum" as an imposter by ordering "her" to eat a bug it offers her. The imposter immediately grabs the bug with their lizard tongue.
* We found out that the Mother was also in that economics class, though Ted would not date her until much later.
* We from Arcturus the aliens plotting to kidnap and eat the humans turn out to have keen enough senses they were overwhelmed by the smell of the all the human pollutants.
* We get a blink-and-you'll-miss-it look at Panty's stash in episode 3 of
* We get a few hints that Link is probably rewarded after the end of the game, but since it is usually a long time between them, or they take place in different places, he is forgotten. The best example is probably seen in the Wind Waker: His Ocarina of Time incarnation, the Hero of Time, had gotten a huge statue made after him, and lots of paintings depicting his adventures leading up to the defeat of Ganondorf.
* We get a hint of how much bad news Frieza is when Vegeta, the same person who beat up every strong character in the previous story arc and whose arrogance is legendary, outright refuses to fight him head-on until he becomes immortal, well aware that he would lose. When they do fight, Vegeta finds himself so outmatched that he actually
* We get a look at Earth a couple hundred years after the diaspora begins (about 1700 years before current time in most of the series, or 2300 AD to us), in the short story "By the Book" when a world government of Greens and Neo Luddites has taken control and is being generally oppressive and suppressive of free thought and realistic history or scientific development. Spacers elsewhere in the Solar System innovate and Outbounders go colonize. Nation-states still exist with applicable and respected laws, significantly including the US Constitution and the Fifth Amendment.
* We get an explanation for the Magic Gun's powers in the Silent Hill
* We get another unwilling example in EJ Barret. It's strongly implied that her uncle being
* We get bits and pieces of the Ellimist's backstory throughout the series... then the Ellimist Chronicles comes along,
* We get little characterization for Human Shining Armor beyond his pride in his performance in the past Games, leading to questions about just how he'd take
* we get such gems as this: "After we get through today's tip, you'll never again have to wander aimlessly from video to video begging for subscribers like the neglected latch-key child you are." Subtle.
* We get to see a brief section of this Nativity play later on in the film, and
* we get to see it picture each of the Order (Roy has high stats in intelligence, wisdom and charisma, which makes him a more balanced and attractive meal than Vaarsuvius, who has higher intelligence but not a lot of the other two.)
* We get to see one in the trailer. When he shrinks down, Ant-Man ends up falling to the ground and doing a three-pointer.
* We get to see this ace break in-story—not especially dramatically (little in
* We get two looks at the same kiss between the two stars of the movie within the

movie in
* Wegman's Cola, the generic version of Coke sold at the (rather upscale) Wegman's supermarket chain in the US Mid-Atlantic region and Northeast, is marketed on the label as "Gluten free", "Lactose free", and "Vegan". So it has no wheat, milk, or other animal product.
* Weg Nach Unten" deals with someone trying to get away from it all by digging a hole and staying there. He ends up in Australia and mentions he has dug to far.
* We Happy Few and achieved by the use of a government-distributed psychosis-inducing euphoric hallucinogen called Joy, as a critique of the idea of "unhappiness is unnecessary when drugs are available" and of the modern phenomena of "safe spaces", where people are prohibited from discussing things deemed "too upsetting". Fans reacted by rejecting both opinions, arguing that the former was feeding misinformed negative stereotypes about anti-depressants as being a "luxury" rather than an actual necessity and that the latter was bland and uninteresting. Instead, fans created and latched onto the idea that Joy is a metaphor for how countries (particularly police states) cover up their atrocities and poor situations with propaganda instead of admitting the truth, especially about their compliance in these things.
* We Happy Few At the beginning of the Lightbearer DLC, Nick is able to raise his health with coffee, Joy and alcohol. Once he begins to grapple with the idea that he's a killer, however, he decides to swear off the Joy and alcohol, and coffee becomes the only thing that raises his health.
* We Happy Few caused the outbreak of violence for having the "audacity" for showing off her pregnant stomach. Instead of attributing the blame to the Joy-high addicts who assaulted her simply for being pregnant. This is justified and made all the more tragic when you realize that the writers of this article were also Joy addicts, and common sense is far removed for their lot.
* We Happy Few. Joy alters one's ability to comprehend and understand reality, locking them in a near-constant state of ignorant bliss and happiness. Some cannot take it at all, their bodies and minds reject it, resulting in permanent brain damage (leaving them as Wastrels). Unfortunately, these are the least of its devastating side-effects. Those who take Joy too often (aka Wellies) become completely dependent on it to function, and become dangerous psychotic messes that cannot tolerate unhappiness or even normal people who aren't taking their Joy (aka Downers). Rather than simply ignore what offends them, they will actively hunt down and destroy anything that upsets or brings them off their high.
* We Happy Few peppered with cockney British slang and alternate history.
* We Happy Few refuse to take Joy (like the player character, Arthur Hastings), they're Downers, and the good citizens of Wellington Wells don't like Downers...
* We Happy Few: The final DLC, "We All Fall Down", culminates in Victoria blowing up Haworth Labs. Dr. Verloc repeatedly shouts at her through the PA system as she plants bombs, and is last heard lamenting the impending destruction. It is never shown if Verloc escapes Haworth Labs before its destruction, but it is noteworthy that he has an escape pod in his office and he has ample time to get out after the bombs are planted.
* We Happy Few this, acknowledges that what she's doing is cold and harsh, but also that she has no other choice. She's trying to make a better life for her baby though, as her motivation for escaping town is to ensure Gwen can grow up safely in the countryside.
* We Happy Few was initially Refused Classification due to the game's main objective being viewed as drug use. Australian fans of the game were outraged, labelling the government and the OFLC as "sensitive" by banning the game because they thought the game's main collectable (known as Joy) would influence the use of drugs. The ban was later lifted and the game was approved for an R18+ classification, likely in response to the backlash.
* We Happy Few: When a person remembers the past and refuses to take their Joy for long enough, they become a "downer"; in other words, they're a perfectly normal person in a world gone insane. Joy no long has quite the same intoxicating effects for them as it once did. It wears off very quickly, and leaves the individual

extremely depressed, hungry and thirsty.
* We Happy Few, which features the "Nosy Old Lady" as an enemy that the player has to avoid, especially if they use stealth since in this game they're a Downer (someone who refuses to take their Joy), which is something that the people of Wellington Wells frown upon...
* We Happy Few). You can either help him or turn him in to the authorities, who do not agree with his reasoning and arrest him.
* We Happy Restaurant features a machine that brainwashes people from everywhere across time and space and forces them to come to your restaurant and eat your horrible food.
* We Happy Restaurant is a game where you run a corrupt restaurant where the food served mutates customers into monsters.
* We Happy Restaurant, the titular restaurant advertises its chickens with the following text:
* We Happy Restaurant, this is done to a nuclear radiator off all things.
* We Happy Restaurant, you feed your customers radioactive food which lets them mutate while boasting about how environment-friendly your radiator is. And they completely fall for it.
* We Hardly Knew Ye: Character is killed off not long after the audience is introduced to them.
* We Hardly Knew Ye, which is about a soldier who returns home alive, but so maimed and disfigured that he is virtually unrecognisable.
* "We hate that hedgehog!" in "Birth of a Salesman" and "Robotnik's Rival", where he says it with Scratch and Grounder in the former and a clone of himself in the latter.
* We have about a billion tropes for heroic characters doing rather odd things, so we probably have this, but I don't know what it comes under. In the first chapter, the main character is told off by his parents for underage smoking and discovers that his sister told them. In revenge, he finds some dead rats, cuts them open and spreads the guts over his sister's towel. His sister isn't a main character; by next chapter, she's dead. He never does anything like this again.
* We have a literal example. The titular character meets the spirit of his mother, who tells him that the reason she fell in love with his father was because, during an incident when she was kidnapped,
* We Have Always Lived in the Castle, Constance Blackwood is charged and acquitted for the crime of poisoning nearly her entire family with arsenic-laced sugar. She's acquitted, but the entire village ostracizes what's left of the family, with the children taunting Constance's younger sister Merricat about her deceased family every time she ventures out for food.
* "We have a medicine for any ailment caused by our previous medicine."
* We have an Giant Boombox Robot in Ralph Watson music video Londinium.
* , we have a variation: "Fucking Lauren, man. What the fuck is Lauren in this book? Just coming in, ruining our protagonist's life, I hate Lauren! Who's Lauren??"
* We Have Become Complacent: Society has become so used to peace it is unprepared for disaster or tragedy.
* We have been trained by growing up watching movies at 24 frames per second to expect movies to have a certain look and feel to them that is an artifact of that particular frame rate. When these movies are shown on televisions that process the images to double the frame rate, or are filmed and shown at 48 FPS like Peter Jackson's
* We have "Devisor Coffee", which is claimed to have been banned in several countries. One of the Juniors, during final exams, overdoses on it, eventually becoming a jittery wreck, flying straight up and exploding 400 feet in the air.
* We have evidence that significantly more female civilians died than male, as paradoxically Red Army soldiers had a lower death rate than Slavic civilians in German-occupied Eastern Europe. Also, young Jewish men had a higher rate of survival than any other Jewish group; they were used as slave labour (where they had a small if real chance to escape) while their female and older relatives were

sent directly to the gas.
* We have Isilud and Meliadoul Tengille too, who oppose Ramza not knowing the truth about his intentions.
* We have managed to wipe smallpox and rinderpest (bovine plague) from the face of Earth. In other words, we have driven viruses into extinction. That said, the ignorance of some could be seen as a subversion to this: Things like the Anti-Vax Movement are allowing viruses we've since beaten into submission to make a comeback, as if it really
* "We have never been at war with Eurasia. We are at war with Eastasia. We have always been at war with Eastasia."
* We have no clue what Yamcha or Puar did before they were desert bandits.
* We have not received an albatross from the Agatean Empire. It is not asking you to send a Great Wizzard. Continues with "Don't you mean they're NOT Agatean pictograms, sir?"
* We have only the Doctor's word for it that the TARDIS was trying to spin Jack off in the Time Vortex, and there could be other interpretations; the Doctor is a notoriously unreliable witness.
* We have Piccolo during the Saiyan saga. The original reason he decides to help against Vegeta and Nappa is that if they
* We Have Reserves: As long as the underlings can be replaced, the boss doesn't care if any of them die.
* We Have Reserves: callously place minions in a situation where they will be slaughtered, as part of a strategy.
* We Have Reserves do is needlessly expend the lives of their mortal servants: why send a loyal dreg to his death and embolden the living against the Midnight Aristocracy, when you can simply raise a dead enemy and send him to kill his living friends and get the same results? Few living beings will willingly associate with the undead, and unlike the undead, they can operate in plain sight (and daylight!), so vampire lords can't just waste them.
* We Have Reserves: The villain doesn't care about their underlings getting killed because as far as they're concerned, more minions will replace the ones that died.
* We Have Reserves: What do a few lives matter? We've got more soldiers!
* We have the backstory with Rainbow Dash and her old classmate Gilda. While their relationship was most likely more platonic than "romantic" (this being both a western show and a kids show), they can easily be slotted into every other point, since neither had any other friends to hang out with and they started growing apart after they both dropped out of school.
* We have the Fourth Hokage and his wife, when sealing the Kyuubi within their son, Naruto, Zabuza, after Naruto knocked some sense into him, and the Third Hokage, after sealing away Orochimaru's arms and rendering his invasion unsuccessful.
* We have The Thistle Man, a being who is described as being a human male, but there's just enough in his mannerisms and appearance to suggest that he isn't.
* We have this with Quagmire when he married his wife Charmisse, while drunk.
* We Have to Get the Bullet Out: No, you don't. Seriously, don't try it.
* We have unusually sharp senses on the whole. We have incredibly good eyesight for mammals (though not as good as many birds), above-average hearing, and a decent sense of smell (though we tend not to rely on it much compared to sight and sound). One of the reasons we tend not to consider this is that dogs — one of the species we interact most closely with — have better hearing
* We Have Ways Of Making You Laugh. Two villains are about to throw their captive into an incinerator, until he notices a sign which reads "Refuse to be placed in incinerator", and does so.
* We Have Ways of Making You Talk: If you won't tell me what I want to know, I'll just have to torment you until you sing like a canary!
* We have yet to see an example of anyone following this rule in practice: Emil in particular usually does the exact opposite, probably with good cause. One can however imagine Lalli practicing the rule on his unseen solo excursions. However, at the beginning of Chapter 7, a cat does follow this rule to hide successfully

from an infected dog.
* We hear a solitary beep when Frank runs his finger down Rocky's chest during "I Can Make You A Man" in
* We hear some friendly banter from the bulk of the medical team as they make their way to the autopsy room before all hell breaks loose.
* We Heart Katamari includes a cousin named Lucha, who appropriately enough has the appearance of a luchador.
* We ♥ Katamari, is literally all about this: The whole game is essentially one big thank-you to the game's fans, and the plot itself deals with the King of All Cosmos becoming wildly popular for his Prince's katamaris and receiving an onslaught of requests for new katamaris to roll up from the fans.
* We ♥ Katamari ups the ante with a "Cowbear" level in which you must gather the largest cow and/or bear item to win. Now only must you dodge bear-themed items, you must be wary of cow and milk-themed items as well or the round will end prematurely.
* We Help the Helpless are common as well. At its worst, Lawful is just as alien to conventional morality as Chaotic.
* We Help the Helpless: Devoting your time and resources to help the weak, the defenseless, and the unfortunate.
* We Help the Helpless: Heroes will lend a hand to anyone in need of their help. The less fortunate classes of society are no exception.
* We Help the Helpless monotone of the episodic story and managed to merge both the myth arc and episodic plots as working together.
* We Hunted the Mammoth is all about finding these people and mocking them.
* Wei and Wing, who are also actual brothers, are this every time they accompany their mother Suyin.
* Wei Empire cycle would be this, except they are very numerous, highly public and often quite incompetent; some of the government characters have their own private intelligence services that can be much more like this, though.
* weigh anchor, the anchors. Compare "chocks away," an aviation command meaning "remove the chocks (wedges) that are blocking the plane's landing gear wheels so that it can take off.")
* Weightless as a dancer. To boost the effect, all the cameras were hacked by Archangel's team, too. Needless to say, Aria wasn't impressed to say the least.
* Weightless. But later, she realized that she never knew about him as he had never let her in and that she was just in love with the idea of him.
* Weightless: Chapter 4, apparently, Garrus's awkwardness is contagious:
* Weightless (Mass Effect) finally let Shepard and Garrus do this, after a series of extremely long and painful UST.
* Weightless (Mass Effect), Shepard, without eating or resting, spent 7 days watching over Garrus until she has to go to Normandy SR-1 on Alchera.
* Weightless neighbors who were very punctual in their "business", right down to the habit of not turning off the TV, which was not very helpful for a turian who had just gotten rejected by Shepard. Later, he (unintentionally) paid them back with her.
* Weightless, Shepard dreamed of Garrus tied up and interrogated her to make her spill out her feelings (which she was trying to keep to herself due to several reasons). She was woken up by the real Garrus and suddenly hit him in the face. After that, things got worse.
* Weight Loss Horror: If it results in you starving to the point of death, then yeah losing weight can be very unpleasant.
* Weight-loss treatment Orlistat (marketed in most countries under the trademark name Xenical, and over-the-counter in the UK and US as Alli). It works by binding dietary fat to prevent the person's body from absorbing and storing the fat (thereby reducing/preventing weight gain, and in fact slightly improving weight loss when combined with sensible diets and exercise). The major side effect of this is that eating foods which are high in dietary fats will cause them to be passed through the person's body unimpeded and result in loose oily stools, and often also continual oily anal leakage (smelling vaguely like a combination between faeces and

burnt grease/chipfat, and BRIGHT ORANGE). It's extremely unpleasant.
* weight (normal force) in the SI system is newton (N). One newton is one kilogram (mass) multiplied by 1 m/s^2, making a mass of 1 kg weigh 9.81 N on Earth. The value 9.81 is close enough for 10, making conversions easy - just multiply by ten.
* Weight of the World after "dying", the Institute causes her people to turn against and renounce their corrupt Kingdom. As a result, Atlas permanently dies because she hurt the people responsible for her existence.
* Weight of the World and were perfectly willing to give him to Salem's forces if they caught up to them.
* Weight of the World attacks him in the bathroom, leaving him with noticeable cuts and bruises that include hand-shaped marks around his throat. When confronted about the injuries, America claims he tripped into the shower. Canada, Weiss, and Winter do not believe him and Winter sarcastically asks if he apologized to the shower for tripping into it.
* Weight Of The World centers around a conversation between 2 boys who have been left in hanging wedgies from a tree branch.
* Weight of the World keeps injecting his victim with more doses until he is on the verge of overdosing and nearly catatonic.
* Weight of the World. Then he comes back and does it again. And again. And again...
* weight rise by "37%" (actually more like 100% minimum) by magic in comparison to car insurance bills, making her pull out an exercising bike from her pocket and slim down to her normal size in two seconds flat.
* Weight Taller: Gaining extra fat or muscle also increases a character's height.
* Weight Taller: When gaining weight increases a character's height as well.
* Weight Watchers has Hungry, an furry orange monster that constantly tempts you to eat junk food and thus ruin your diet.
* weight, which has ruined any sense of personal control that Emmanuel had.
* Weighty Aesop that the series partly runs on, one Aesop about healthy living played straight before being solved humorously, and a maybe accidental, maybe on purpose Aesop about relationships being affected due to selfish pride and ego.
* Wei had many. Most notable were Sima Yi and Jia Xu. Cao Cao himself was a highly accomplished commander who helped revive the then unpopular Art of War, providing an extensive annotation. Guo Jia died fairly young, but was well respected regardless. In later years, Deng Ai was a major force on the Western front with an uncanny ability to predict and intercept enemy movements through his excellent knowledge of terrain.
* Wei has Guo Jia, Jia Xu, Xun Yu, Man Chong, and Xun You. In Wei's hypothetical route in 8, Xu Shu also defects to Wei.
* Wei is sadistic and violent even by Contractor standards, which is saying something. But then, his power is to
* Weil earns a special place in Mega Man history for being one of the few recurring Mega Man villains not to suffer from
* Weimar constitution of 1919. They are even introduced in the form, "The paragraphs (Numbers) are part of this Basic Law". They mostly concern the relationship between church and state. Similarly, several treaties entered into by Germany's constituent states and the German Reich prior to 1945 explicitly remain in force despite a general policy of non-continuity between pre-1945 Germany and post-1945 Germany.
* Weimar Republic had this to a certain degree: if you compare the sentences for politically-motivated murder during that time, you'll find out that a member of the left-wing who killed a member of the right-wing was likely to be punished harder than a member of the right-wing killing a member of the left wing. Society had a certain fear of Communism, and like the prejudices against Jews during that time, Hitler used this whenever he could.
* Weimar Republic, or the story of someone who forgets a wheelbarrow full of money and comes back to find the wheelbarrow stolen but the money left alone.
* Weimar Republic) was infamous for this. One of his (translatable) goofs: "The hour of the moment has arrived!"

* "Weinerschnitzel", by Descendents, consists of a 13-second fast food order. The order seems normal enough, until the counter guy asks if the purchaser wants sperm with that.
* Weinstein Books publisher and transferred its authors to the main Hachette publisher.
* We Interrupt This Program: A program gets interrupted for a piece of breaking news.
* Weird Al, also got to do a short musical number in his second appearance. This is in contrast with Banana Man's first appearance, where he said almost nothing at all.
* Weird Al also proposes this as a method of suicide in "One More Minute": "I'd rather rip my heart out of my ribcage with my bare hands and then throw it on the floor and stomp on it 'till I die."
* Weird Al, before which most of the third quarter of the sing is call-and-response "We're GREAT! (We're GREAT!) / And you SUCK! (You SUCK!)"
* Weird Al can go beyond artists for his pastiches. "Stop Forwarding That Crap to Me", for instance, is a pastiche of songs composed by
* Weird Al depicts him in a military uniform with his pants down, exposing his heart boxers.
* "Weird Al" Effect actually has a straight example in the White Queen's "fish" riddle, for which an answer poem in the same meter was published separately.
* "Weird Al" Effect, is now thought by countless Americans to be called "the Torchwood Tower" in real life...
* "Weird Al" Effect: The parody becomes more well-known than the work being parodied.
* "Weird Al" Effect: The parody of a work becomes more well-known than the original.
* Weird Al loses his mind and goes on a killing spree. More than half the elves and all but two of the reindeer die. In the "Extra Gory Version", even Santa himself dies (whereas in the regular version he survives, but is given a prison sentence so long that he won't be eligible for parole for 700 years).
* Weird Al makes him mad because the tip of his knife got slightly bent during the stabbing and now it isn't as sharp anymore.
* Weird Al our narrator is watching. He sighs about the cruelty of fate — because he was recording it and everything.
* Weird Al's, and how he was thinking about asking her to marry him. The two of them are passionately making out one night, but then...
* Weird Al's "Attack of the Radioactive Mutant Hamsters from a Planet Near Mars."
* Weird Al's "Couch Potato" gives us "Make 'em watch all of that junk 'til
* Weird Al's "Like a Surgeon" is the OR nurse cutting off one of his fingers.
* Weird Al's original composition "You Don't Love Me Anymore", a breakup song with humorously brutal lyrics, was a decent hit in Canada and one of the most popular ballads in the Philippines in 1992 and 1993 — probably the only Weird Al song many Filipinos instantly recognize. So popular was the song in the Philippines that it inspired a song called "Sinaktan Mo Ang Puso Ko" (semi-literally translated to "You Broke My Heart") by Michael V, who is arguably the country's answer to Weird Al for his parodies of popular songs and original novelty recordings. Even in the States, "You Don't Love Me Anymore" stands out for being one of his only non-parody songs that isn't
* Weird Al's song "Trapped in the Drive-thru", the husband's voice reminds the voice box lady of a guy named Paul she cheated Geometry test answers off of last year. The husband replies and talks about another Paul he knew. Paul was his plumber, who is bald, has a bladder problem, and has a toe infection. The voice box lady says, "Mr., please! You can stop right there! That's more than I needed to know!" Yes, this is a song!
* "Weird Al" Yankovic about how the narrator hates sauerkraut. It became a fan favorite.
* "Weird Al" Yankovic against Duracell after shoving one of their batteries up his nose.

* "Weird Al" Yankovic aired during every break. Fans were quick to note the parallels.
* "Weird Al" Yankovic album. Al himself didn't want to and responded to the pressure by intentionally making "Girls Just Wanna Have Lunch" as lame as possible (Weird Al fans widely consider it his worst song by a wide margin, which is quite the achievement for Al).
* "Weird Al" Yankovic. Al has stated outright that he doesn't consider himself a filker, but he certainly gets sung enough at filk circles...
* "Weird Al" Yankovic, and a child's lemonade stand that also sells weapons-grade plutonium (although he admits that their lemonade was actually really good).
* "Weird Al" Yankovic and he gets to keep the tip," as it is actually a thinly-veiled circumcision joke.
* "Weird Al" Yankovic and his wife, Suzanne, were both vegans when they got married. In an interview, however, Al noted how when Suzanne was pregnant with their daughter, she began craving meat. He's still vegan, but his wife not so much.
* "Weird Al" Yankovic, and the soft, romantic ballad of "You're Beautiful". When Atlantic Records refused to let him include the parody, he was forced to write a new one to replace it, and came up with "White And Nerdy", a parody of Chamillionaire's "Ridin'". Suddenly the gangsta rap aesthetic was a perfect fit - and both album and single became Yankovic's most commercially successful up to that point.
* "Weird Al" Yankovic and the video for "All About the Pentiums": a Nash Metropolitan. Notably, it's the same car in both cases.
* "Weird Al" Yankovic and will have to do it again. His friend dies in a traffic accident, and he mourns the $5 the friend owed him, and that he'll be late to work now. He stabs his boss, and mourns the knife, which broke and will never be as sharp again.
* "Weird Al" Yankovic a song is a parody and knowing the song it parodies are two different things.
* "Weird Al" Yankovic, as you'll go from pirating music to robbing liquor stores and committing vehicular homicide.
* "Weird Al" Yankovic. Atlantic removed their permission at the last instant, so Al released it for free instead.
* "Weird Al" Yankovic benefits from this from time to time due to his parody songs. While Yankovic legally doesn't need permission to record a parody, he still makes it a personal rule to get permission anyway in order to maintain good relations in the music industry. However, rejections of permission can sometimes help his songs become bigger than approval:
* "Weird Al" Yankovic bursts a few heavy-duty buckles when he shows his homies who's fat.
* "Weird Al" Yankovic, but eventually abandoned them (the hair is back, but the moustache isn't).
* "Weird Al" Yankovic contains a number of these, including commercials for TV shows such as "Conan the Librarian" and movies such as "Gandhi II".
* "Weird Al" Yankovic credited Buster Keaton with inspiring his take on the gag (involving barnraising) in the "Amish Paradise" video.
* "Weird Al" Yankovic, current high priest of comedy, has a surprisingly obsessive fanbase.
* "Weird Al" Yankovic developed his stage persona and nickname as a college radio DJ while attending California Polytechnic University for architecture.
* "Weird Al" Yankovic directed a number of his own (and others') videos.
* "Weird Al" Yankovic does this with his polkas. As well as in "(This Song's Just) Six Words Long"
* "Weird Al" Yankovic) example would be "Everything You Know Is Wrong".
* "Weird Al" Yankovic features the song "I Want a New Duck," a parody of the Huey Lewis hit "I Want a New Drug."
* "Weird Al" Yankovic feel comfortable about the jokes, Yankovic won't make the song: for example, Jackson thought the parody of "Black and White" (titled "Snack All Night") didn't work because of the song's serious message of racial tolerance,

and Yankovic agreed not to perform it.
* "Weird Al" Yankovic forced on it for certain international markets. Al wasn't happy about that one, either.)
* "Weird Al" Yankovic, forcing him to crawl through the desert for three days until he reached civilization.
* "Weird Al" Yankovic for going platinum despite not having any singles chart in the Hot 100.
* "Weird Al" Yankovic for his "Al TV" specials get cut-and-pasted into absolutely bozo exchanges that make the celebrities in them look like complete idiots or lunatics.
* "Weird Al" Yankovic frontman Mark Knopfler on guitar and Guy Fletcher on synthesizer.
* "Weird Al" Yankovic game show, and washed out massively, ending with a negative total. Even Don Pardo had to comment on this abysmal failure.
* "Weird Al" Yankovic, George reaches rock bottom after learning that the TV station he works for is days away from becoming insolvent, and then his girlfriend, Teri, breaks up with him because he forgot her birthday. A frustrated George decides to go out for a drink, and orders something pink with a little umbrella in it. It's a blueberry daiquiri. The drink clashes horribly with his somber mood. The commentary reveals that it was supposed to be much more flamboyant, but someone in the prop department missed the memo.
* "Weird Al" Yankovic guest-starred on the show to challenge Pinkie Pie to a
* "Weird Al" Yankovic, had at least two characters who were removed via editing in the final product.
* "Weird Al" Yankovic" had a variety of different animated art styles for the different songs sung in the medley. "Womanizer"'s segment was in live-action.
* "Weird Al" Yankovic had a viral video showing him driving around with his wife. He says "There's another one," and she pulls over. He gets out and stands in front of a "Drive Slow" sign. He then sticks a Post-It note onto the sign so that it now reads "Drive Slowly." He looks at the camera and says "Grammar, people, grammar."
* "Weird Al" Yankovic haircut" on the other side: "Oh man, I hate it when I'm right."
* "Weird Al" Yankovic has almost always been seen in a loud Hawaiian shirt, black trousers, and brightly-patterned Vans shoes since the 1980s.
* "Weird Al" Yankovic has a song called "I'll Sue Ya", which states, "I sued Delta Airlines / 'cause they sold me a ticket to New Jersey / I went there, and it SUCKED!"
* "Weird Al" Yankovic has made a career out of parody songs. While most of his songs directly parody specific songs, he also does so-called "style parodies", where he makes light of a band or a singer's overall musical style, rather than a single work of theirs.
* "Weird Al" Yankovic has often said "I wrote 'Eat It' because I wanted to buy a house. It worked."
* "Weird Al" Yankovic has the eponymous Larry pull all sorts of increasingly-horrible pranks on his neighbor, who eventually snaps and leaves him for dead.
* "Weird Al" Yankovic has the number 27 appear a number of times in various songs, album covers, specials etc.
* "Weird Al" Yankovic has tried to replicate the sound of the songs he parodies perfectly to trick people into thinking they're listening to the real song up to the point that the lyrics start.
* "Weird Al" Yankovic). He also wrote a mild-affection-song, "Good Enough For Now."
* "Weird Al" Yankovic, he lights a match and discovers he's surrounded by hostile dinosaurs. One of them then snuffs the light.
* "Weird Al" Yankovic: He's been making parody songs since 1976 and shows no signs of slowing down.
* "Weird Al" Yankovic; he was blindfolded and being driven away at gunpoint before he realized that they weren't pizza delivery guys.
* "Weird Al" Yankovic! His later song, "Attack of the Radioactive Hamsters From a Planet Near Mars" is also B-movie inspired, although the song itself claims to be

referencing actual events.
* "Weird Al" Yankovic in 1982. He was pelted by "anything that wasn't nailed down" for 45 minutes.
* "Weird Al" Yankovic includes in his ad, "don't complain 'cause they won't cost you a dime".
* "Weird Al" Yankovic: In "Everything You Know Is Wrong", Weird Al dies and meets up with St. Peter at the pearly gates... and is almost denied entry into Heaven because his jacket violates the dress code.
* "Weird Al" Yankovic) in his teeth, chews it up, and spits it out a la this.
* "Weird Al" Yankovic: In one part of "Albuquerque", Al's lucky, autographed glow-in-the-dark snorkel is stolen by "some big fat hermaphrodite with a Flock of Seagulls haircut and only one nostril". Al tried to fight for it back, but the perpetrator got away.
* "Weird Al" Yankovic in the drive-thru. First, they can't just go inside because he's wearing bunny slippers, then the guy gets into a weird conversation about someone named Paul and finally forgets that he didn't find his wallet, forcing him and his wife to dig for change.
* "Weird Al" Yankovic: In the video for "Fat", the second chorus's choreography goes off the rails when Al notices the exaggerated sound effects that his arm motions make, and then experiments with it.
* "Weird Al" Yankovic, in which the singer describes all the creepy things he's done in the name of "love", like digging the girl's gum out of the garbage can and carving her name into his leg with a knife. He gets arrested and sent to prison.
* "Weird Al" Yankovic, is about a cruel prankster whom the narrator eventually gets his revenge on... specifically by breaking into his house and dragging him into the middle of a forest, where Larry is stuffed inside a garbage bag and left for dead.
* "Weird Al" Yankovic is about a group of low-end delinquents boasting about their trivial acts of hooliganism (Not returning shopping carts, not returning library books on time, toilet papering someone's lawn, etc).
* "Weird Al" Yankovic is about a guy reminiscing on the increasingly cruel pranks played on him by his old neighbor... and the final verse has him recalling how he broke into Larry's house, dragged him bound-and-gagged into the middle of the woods, stuffed him in a plastic bag, and left him for dead.
* "Weird Al" Yankovic" is about a woman whose driving is so bad, "even hitchhikers just say no".
* "Weird Al" Yankovic is a mime being hacked to death with an imaginary cleaver.
* "Weird Al" Yankovic is being filmed. He lands in the back of Greg Kihn's convertible.
* "Weird Al" Yankovic is interrupted by a record scratch, probably because nobody can bear to hear the rest of it.
* "Weird Al" Yankovic is never repeating a rhyme word in the next verse, even if the source material does so. He somehow manages four different rhymes to the "Biggest Ball of Twine in Minnesota".
* "Weird Al" Yankovic' "I Want It That Way" is not only about the titular auction website, but also mentions Beanie Babies, Kleenex and PEZ, and that's just some of them.
* "Weird Al" Yankovic — even if its subject matter is something he would not touch.
* "Weird Al" Yankovic mentioned by the narrator includes one against the department store chain Neiman Marcus "because they put up their Christmas decorations way outta season".
* "Weird Al" Yankovic music video for "Smells Like Nirvana" has a burning man in the background of one of the shots.
* "Weird Al" Yankovic / neuter your pets, and give your laundry static cling."
* "Weird Al" Yankovic ... "NOTHING! Absolutely NOTHING! Stupid! You're so stupid!"
* "Weird Al" Yankovic, of course, because he's seeing the doctor about his hernia.
* "Weird Al" Yankovic once said, "I knew we had arrived when Weird Al Yankovic did a parody of us."
* "Weird Al" Yankovic one time, one day. Wish I hadn't, cause TiVo now thinks I'm

gay!"
* "Weird Al" Yankovic on his Twitter page, then later did the same thing with another mash-up by the same editor. Al even hinted he might be/would like to be on the show at some point. In season 4, he's a special guest voice in the episode "Pinkie Pride" as a party planner rival for Pinkie.
* "Weird Al" Yankovic, only gets sparse radio airplay every holiday season.
* "Weird Al" Yankovic other than "Achy Breaky Heart" by Billy Ray Cyrus.
* "Weird Al" Yankovic parodies the tendency of actual horoscopes to be very vague and generalized with an example for Tauruses:
* "Weird Al" Yankovic parody "Fat", a mousetrap provides a percussive snap as Al goes for the cheese.
* "Weird Al" Yankovic parody "Like a Surgeon" is not good at all and knows it.
* "Weird Al" Yankovic people expect him to be crazy at all times. He is generally a friendly guy and cracks jokes at times like anyone else, but besides his music, he is never outlandish or "weird." He has also stated that it takes him a while to come up with the really funny stuff, citing that as the reason why there's generally a four-year gap between his albums.
* "Weird Al" Yankovic recorded his first song, "My Bologna", in the bathroom across the hall from his college's radio station because it wouldn't have costed him anything.
* "Weird Al" Yankovic refers to alien butt probing in the song "Foil".
* "Weird Al" Yankovic's "A Complicated Song": "I was / Feelin' pretty down / 'Til my / Girlfriend came around / We're just / So alike in every way, I gotta say..."
* "Weird Al" Yankovic's "Albuquerque" and "Everything you Know is Wrong". "Albuquerque" is definitely an example, but "Everything You Know Is Wrong" probably wasn't going anywhere in the first place.
* "Weird Al" Yankovic's "Albuquerque" begins with his mother tying him to a wall, sticking a funnel in his mouth, and force-feeding him nothing but sauerkraut until he was twenty six and a half years old.
* "Weird Al" Yankovic's "Albuquerque" does this in two places. Once, where a guy sarcastically says, "Noooo, I want you to cut off my arms and legs with chainsaws!", and another time, when another guy says "I haven't had a bite in days."
* "Weird Al" Yankovic's "Albuquerque" has the singer as the lone survivor of a plane crash. Why? Because he had his tray table up and his seat back in the full upright position.
* "Weird Al" Yankovic's "Albuquerque," in which the narrator falls in love, gets married, buys a house, has a couple kids... but balks when his wife suggests joining the Columbia Record Club and ends the relationship.
* "Weird Al" Yankovic's "Albuquerque", the protagonist emerges from a plane crash dragging his worldly possessions behind him: his big leather suitcase, his garment bag, his tenor saxophone, his twelve-pound bowling ball and his lucky lucky autographed glow-in-the-dark snorkel. It takes him three days to crawl to his destination.
* "Weird Al" Yankovic's "Beat It". At the end of the solo, he's working the guitar so furiously ... kaboom.
* "Weird Al" Yankovic's car in "Stop Draggin' My Car Around", which is apparently so bad, the manager at a local disco had it towed for being an eyesore in his parking lot, and later, Al wonders if he can trade it in for a used bicycle.
* "Weird Al" Yankovic's " Christmas at Ground Zero" is very much this.
* "Weird Al" Yankovic's "Close But No Cigar", where a cat tries to woo a human woman with gifts of dead mice.
* "Weird Al" Yankovic's "Don't Download This Song", even though he put it up on the internet for free. Even Lars Ulrich knows it's wrong.
* "Weird Al" Yankovic's "Eat It", when Al bursts into the diner and wallops a nearby bystander with the door.
* "Weird Al" Yankovic sequence, right down to the giant rolling stone ball. However, this one can navigate and turn corners.
* "Weird Al" Yankovic's "Everything You Know Is Wrong". Violate Heaven's dress

code? Enjoy your eternity being subjected to some of the greatest annoyances the big guy upstairs can think of (case in point: the protagonist is placed in the room next to the noisy ice machine and subjected to St. Peter's constant screaming of the song's refrain).
* "Weird Al" Yankovic sings through one scene which obviously plays backwards. Most notably, a buggy rolls past in the background backwards. He is apparently singing the song while doing so, so to make this scene he must have learned how to lip sync backwards.
* "Weird Al" Yankovic's "I Remember Larry", this was one of the eponymous Larry's pranks which involved brownies with laxatives baked inside.
* "Weird Al" Yankovic's "I Think I'm A Clone Now" mentions "a womb with a view".
* "Weird Al" Yankovic's "I've Got My Mind Set On You", titled "This Song's Just Six Words Long."
* "Weird Al" Yankovic's "I Was Only Kidding": all those times he professed his love for his girl, he was only kidding. She doesn't take it well.
* "Weird Al" Yankovic's "Jurassic Park" — accompanied by outstretched hands.
* "Weird Al" Yankovic's "Like a Surgeon", one of the surgery attendants slips on the still-beating heart that escapes from the clumsy surgeon's hands.
* "Weird Al" Yankovic's "Melanie" reveals that the latest of the increasingly bizarre things the singer/stalker has done in his obsessive efforts to get Melanie's attention was to jump to his death from the apartment window above hers.
* "Weird Al" Yankovic's "Mission Statement" is packed with business buzzwords.
* "Weird Al" Yankovic's music video for "Amish Paradise" has a blink-and-you-miss-it scene where the singer is churning butter between his legs. When a girl walks by he starts churning faster.
* "Weird Al" Yankovic's music video for "Handy" features a poor cat immediately after a line about mowing the lawn. He looks off screen in the direction of the poor cat he's just hit.
* "Weird Al" Yankovic's music video for "Like a Surgeon" has Al in scrubs walking down a hospital corridor. A woman's voice on the P.A. system says, "Dr. Howard, Dr. Fine, Dr. Howard."
* "Weird Al" Yankovic song Attack of the Radioactive Hamsters from a Planet Near Mars is about this, with the titular hamsters growing to gigantic proportions.
* "Weird Al" Yankovic song "Fat", a parody of Michael Jackson's Bad, a verse of of the song explains how much of a big eater he is with lines such as "If I have one more, Pie a la mode, I'm gonna need My own zipcode" and "When you're only having seconds, I'm havin' twenty-thirds".
* "Weird Al" Yankovic song "Good Enough For Now" is subverting this trope.
* "Weird Al" Yankovic song "Handy" also has its music video done in this style, complete with hammy acting and deliberately bad special effects.
* "Weird Al" Yankovic song "Headline News", a parody of Crash Test Dummies' "Mmm mmm mmm mmm", contained verses relating to an American being caned in Singapore, the Nancy Kerrigan incident, and John Wayne Bobbitt.
* "Weird Al" Yankovic song "I'll Sue Ya" mentions the name of the companies listed, but in the video, the lyrics are changed so that they read different but are pronounced the same. The liner notes to the album contain the correct spelling.
* "Weird Al" Yankovic song "I Was Only Kidding", the singer tries to use the line to justify telling someone that he loved her. As abrasively as possible. He gets shot.
* "Weird Al" Yankovic song "Midnight Star" opens with the line "I was standing in the express lane with my twelve items or less" (it's about a tabloid newspaper he sees while waiting in line).
* "Weird Al" Yankovic song "Mr. Popeil" references all of the classic infomercial lines, and this is no exception.
* "Weird Al" Yankovic songs "Albuquerque" and "Everything You Know is Wrong".
* "Weird Al" Yankovic song "That Boy Could Dance", whose title character is totally inept at everything in life except dancing.
* "Weird Al" Yankovic song "Trigger Happy" is extremely reckless with gun safety and rather unconcerned about having shot both his father and his cat.

* "Weird Al" Yankovic song "When I Was Your Age", Weird Al sings about working in a coal mine 22 hours a day for just half a cent an hour, having to sell his internal organs just to pay the rent, living in a family of 73 in a cardboard box, never getting anything but a bag of rocks for Christmas, and eating a chunk of dirt for dinner every night.
* "Weird Al" Yankovic's parodies are sometimes met with this from other artists. This isn't surprising since he insists on seeking approval from them first before he records them, so they know what to expect. Of course, the fact that his interest in parodying an artist is a sure sign they've hit the big time helps ease things along.
* "Weird Al" Yankovic's "Party in the CIA" mentions them among the singer's equipment.
* "Weird Al" Yankovic's "Pretty Fly for a Rabbi" is beloved by Jewish people.
* "Weird Al" Yankovic's "She Drives Like Crazy," a parody of "She Drives Me Crazy" by Five Young Cannibals
* "Weird Al" Yankovic's "Slime Creatures From Outer Space" will "zap you with their death ray eyes / blow you up real good!"
* "Weird Al" Yankovic's song "Albuquerque" begins with him describing where he grew up: "Way back when I was just a little bitty boy living in a box under the stairs in the corner of the basement of the house half a block down the street from Jerry's Bait Shop... You know the place."
* "Weird Al" Yankovic's song "Everything You Know Is Wrong", aliens offer to transport the protagonist back to anywhere in time. Since they don't mention a return trip, he has them send him back to "last Thursday, so he can pay his phone bill on time."
* "Weird Al" Yankovic's song "Frank's 2000-Inch TV," which is entirely about his neighbor getting such a huge TV. This is a good thing if you share Frank's taste in viewing material, and an incentive to move to another town if you don't.
* "Weird Al" Yankovic's song "Girls Just Wanna Have Lunch" invokes this trope in the first line. "Some girls like to buy new shoes/ while others like driving trucks and wearing tattoos...."
* "Weird Al" Yankovic's song "Hardware Store", in which is likely the most over-the-top example of this trope:
* "Weird Al" Yankovic's song, "Headline News", features a stage production of several news stories of the mid-90s. When it gets to the story of Lorena and John Bobbitt, the men in the audience gawked in horror.
* "Weird Al" Yankovic's song "I'll Sue Ya" is about a guy who does this. Lyrics include:
* "Weird Al" Yankovic's song "One More Minute" details all of the disgusting, painful, and generally unpleasant things the protagonist would rather do than spend one more minute with the girl who has just dumped him. One of these things is cleaning all the bathrooms in Grand Central Station with his tongue.
* "Weird Al" Yankovic's song "Pancreas." Though this might refer to him not caring about his spleen, rather than a statement about its relative usefulness. He only cares about his pancreas, and seems to equally not care about all of his other organs.
* "Weird Al" Yankovic's songs are pastiches. Most of them are not, in fact, parodies of the songs they pastiche, as, though they often satirize various aspects of society or parody other works, they don't make any point about the original.
* "Weird Al" Yankovic's songs - both parody and original ("Don't Wear Those Shoes", "Close But No Cigar").
* "Weird Al" Yankovic's song/video "Beat It", ends with Al waking up with a bellyache and popping a couple of Alka-Seltzer.
* "Weird Al" Yankovic's song "Virus Alert" contains a brief scene of a group of viruses doing this to steal someone's credit card identity.
* "Weird Al" Yankovic's "This Song's Just Six Words Long" consists of the songwriter proclaiming he can't think of anything to write about, so he'll just keep repeating the same phrase.
* "Weird Al" Yankovic's video for "Perform This Way" features a half naked woman

dancing around in bizarre but revealing outfits... who also has the face of Weird Al himself edited onto her body.
* "Weird Al" Yankovic's "Waterfalls", is an entire song warning the listener that playing phone pranks on people has consequences.
* "Weird Al" Yankovic's "Weird Al In 3-D" has "That Boy Could Dance", a song featuring Jimmy the Geek, a smelly nerd with a bad case of acne and poor fashion taste, who never got his driver's license. His one claim to fame: he's an awesome dancer. Later on in the song when he's older, he has his own dance studio, fan club, and TV show, and he owns half of Montana.
* "Weird Al" Yankovic's "White and Nerdy" focuses on a white dork who wants to roll with the gangstas, but rather than imitating them, he spends most of the song describing just how nerdy he is.
* "Weird Al" Yankovic's "Word Crimes" includes a snippet recreating the Windows 95 desktop as seen on a CRT monitor.
* "Weird Al" Yankovic's "Word Crimes" video uses a Care-o-meter to illustrate the unintended meaning of the popular phrase "I could care less".
* "Weird Al" Yankovic's "Your Horoscope For Today", in which Aquarius are told that their tongue will be frozen to the back of a speeding bus, Pisces are the true lord of the dance (no matter what those idiots at work say), and Cancer should spend the rest of the week face down in the mud because of the position of Jupiter. Among many, many more for each sign.
* "Weird Al" Yankovic, tells her friends that the protagonist in the song is the Antichrist, and then she starts trying to kill him on multiple occasions.
* "Weird Al" Yankovic that it's commonly thought that this was a sound editing trick.
* "Weird Al" Yankovic). That said, "White & Nerdy", one of his most famous songs, is also his highest charting.
* "Weird Al" Yankovic: "That snorkel's been just like a snorkel to me!"
* "Weird Al" Yankovic the beach because he took up all the space. Either way, it works well for a song that is an extra-long fat joke.
* "Weird Al" Yankovic, the narrator seems more annoyed than afraid of their presence.
* "Weird Al" Yankovic ("the stars predict tomorrow you'll wake up, do a bunch of stuff, and then go back to sleep").
* "Weird Al" Yankovic, the villain goes into a tirade before one of the protagonists on what he really thinks of his viewers, unaware that he's being taped. Near the end when he's going to make a public announcement, they put the recording on instead, putting the final nails in his coffin.
* "Weird Al" Yankovic - #THICKE and #BLURREDLINES - that briefly appear in the music video for the original song, Robin Thicke's "Blurred Lines".
* "Weird Al" Yankovic to serenade Marge with a parody of John Mellencamp's "Jack and Diane".
* "Weird Al" Yankovic touched upon this trope in his song "Traffic Jam":
* "Weird Al" Yankovic translates approximately to: "Good evening, sir. Welcome to Enrico's Casa de Salsa. We have many delicious entrees. If I might recommend the Burning Hell Chicken, very delicious. Your eyes will burn up, your stomach will be on fire, you'll be in the bathroom for a week, do you understand what I'm saying, stupid silly gringo?!"
* "Weird Al" Yankovic used a variant of this as the repeated "fade out" line at the end of "Wanna B Ur Lovr":
* "Weird Al" Yankovic used this in response to the recording company that James Blunt was signed. Hee told him he couldn't sell his take-off "You're Pitiful" after he'd already gotten approval from Blunt and recorded it. He made it available as a free download instead.
* "Weird Al" Yankovic warns a group of soldiers not to waste their bullets, because shooting only makes the titular hamsters angry.
* "Weird Al" Yankovic" was leaked online just a day before it was originally planned to be premiered on AOL. In response, the premiere was cancelled in favor of a silent release shortly after the leak broke out.

* "Weird Al" Yankovic. We never learn what he finds so appalling about them, but they must be some bad shoes.
* "Weird Al" Yankovic" where he recounts the Lorena Bobbitt story: a man who made his wife very angry and woke up the next morning to find that "Mister Happy was missing."
* "Weird Al" Yankovic where people are encouraged to kill weasels by stomping on them.
* "Weird Al" Yankovic", which has two endings depending on the version. In the original song Santa is captured and sent to prison, while in the Extra Gory Version Santa is killed and some of the other details are changed or left out.
* "Weird Al" Yankovic who, among other things, could "rip out your beating heart, and show it to you right before you died".
* "Weird Al" Yankovic: Whoever is being targeted in "You're Pitiful" (parody of "You're Beautiful" by James Blunt) must be a bad case of this, if the following lyrics are anything to go by:
* "Weird Al" Yankovic with Al's usage of the word "spastic". Once informed that it's a derogatory term in the United Kingdom for people with cerebral palsy, he quickly apologized on his Twitter.
* "Weird Al" Yankovic, with his parody of MJ, made him a household name.
* "Weird Al" Yankovic, with lyrics composed entirely of corporate jargon and meaningless buzzwords that boil down to "we need to find ways for the company to make more money".
* "Weird Al" Yankovic. You know, besides the whole dressing up like MIBs, interrogating terrorists, and executing heads of state part.
* Weird and Unfortunate Things Are Happening: Alicia's Basic skills beyond her basic Bash, whose costs are written in orangey-yellow text, unlike the other skills which use blue, and SP.
* Weird anime example: Team Sexy Madam (Lovely Madam in the English translation) from
* Weird AsideA person mentions something utterly weird in passing as if it were quite normal.
* weird behaviours of various characters, the fact that Russians consider this movie too lighthearted and how they feel the Red Army is depicted as evil and incompetent (a general problem Russians have with Western-made productions about them).
* Weird case: Brazilian soccer legend Pelé refers to himself as two different persons, Edison (his birth name; the everyday person) and Pelé (the footballer).
* weird character quirk with the Snake of the Festival, trapped in the Abyss, receiving his instructions for the Psalm of the Grand Order bit by bit.
* Weird City above). They do seem to love each other truly, even when they're forced to separate.
* weird combinations of technology like gas-powered planting machines being pulled by horses, and they will go to a regular doctor instead of relying on older types of "medicine" that you would associate with their general tech level.
* Weird Comics #2 are a race of mermen who sadistically torture anybody who enters their domain.
* Weird Comics #5 are the Sea Demons, a race of brutal conquerors raiding the Sea Amazons.
* Weird Creatures that these worm-like animals will invade the anus of anyone who defecates over their burrows.
* Weird Crossover, has the Incredibles all coughing, sneezing, and (with the exception of Violet) sleeping a lot but with no fevers, and it affects all of their powers: Mr Incredible and Dash have lost theirs, Elastigirl's are out-of-control, Violet can't make force-fields and she can go invisible but can't turn visible again, and Jack-Jack is stuck as a demon. Some unknown electricity-like substance cures them.
* Weird Crossover works of fiction are crossed over, resulting in a very (humorously) bizarre combination.

* Weird Dreams: There's a quicksand pit in front of the statue that will take you back to the Hall of Mirrors.
* Weird Dreams used this trope. The premise of the game was that the weird scenarios were literally a dying dream. The player character was actually in Intensive Care. If the player lost the game, he died. Highlighted by a graphic of a heart monitor's beep stuttering while it briefly flatlined if the player lost a life. Lose the last life and it stayed flatlined.
* Weirder on a typical scale are zombie lords, animates that retain some degree of intelligence and possess an ability to draw other animates toward them and telepathically direct them. Any large, directed horde needs at least one of these at its head, and possibly multiple working in tandem, as they turn aimless zombies motivated primarily to find living humans and eat them into a coordinated attack force. If it's any consolation, they're
* weirdest friendly fandoms have a pretty close and friendly fandom to one another. This also goes into many of the artists of synthwave have backgrounds in metal such as Perturbator, Master Boot Record, Dance with the Dead, Scandroid, Hexenkraft, and the list goes on.
* Weirdest of all, you can talk to them despite there not being air holes. In the first two games, they'll mostly just seem irritated with the whole circumstance. In the third game, their dialogue is

* Weirdly, his "breaking in the recruits" routine is considered one of the series biggest
* Weirdly, however, they manage to sneak the name "Suicide Squad" in. Though, it may have gone unnoticed because it was in a long list of teams Batman was listing off as he was asking who he was working with.
* Weirdly, she also suffers from this the first time Heathcliff disappears (
* Weirdly subverted in another episode, "The Mainland": when Ted and Dougal are lost in the caves, and Dougal declares "Ted! I'm so hungry I'm beginning to hallucinate". Ted then steps into the shot having turned not into food but
* Weirdly the American test audiences hated the happy ending and it was released in the U.S. with the ending where Jim dies.
* Weirdly, the normal, unpossessed, yet still-hostile CRI Guards that are encountered on Io only carry a plasma pistol, which makes one wonder how their possessed versions found theirs.
* Weirdness Censor, dismissing the whole thing as a hallucination or mental breakdown.

* Weirdness Censor: Something appears to be preventing people from noticing or caring about the bizarre people, things, and events around them.
* Weirdness Censor, so she doesn't know that a skeleton person is impossible.
* Weirdness Censor story where one of his own companion realizes she's hearing the Italians speaking English. It's a sign her mind has been tampered with.
* weirdness censor strikes again. The reason we haven't seen any explanation of aliens is that we're overlooking the obvious in our quest to exaggerate our own importance and significance.
* Weirdness Censors while spreading enough evidence to convince them that Magic is real.
* Weirdness Censor: There's a whole bunch of strange stuff going around, but no one seems to notice.
* Weirdness Censor when it comes to spirit channelling, perhaps in no small part to a highly publicized murder case where a spirit medium was used to communicate with the victim, who named the wrong person as his killer, which gave spirit channelling a reputation for being fraudulent. And if spirit channelling is fraudulent, then there must therefore be some other, not-weird reason why that eight-year-old girl is suddenly a foot and a half taller than she was a minute ago and now has an amazing rack, so it's not worth fussing over.
* Weirdness CouponIf someone is "weird", it's acceptable that they do things that normal people couldn't get away with.
* Weirdness Magnet: A character who ends up encountering all kinds of strange phenomenon no matter where they are.
* Weirdness Magnet attitude, in that Earth is invaded/chosen to be blown up/whatever because no one else would miss it. The Doctor says he finds humans fascinating because their adaptability lets them survive right up to the end of time. Other races either see humans as major adversaries or find present-day Earth to be a convenient backwater planet that is populated by a less advanced and easy to manipulate species.
* Weirdness Magnet never goes looking for the madness that comes into his life, but he fares surprisingly well through it all anyway.
* Weirdness Magnet: Not all who enter the Tyson Zone are crazy in their own right. Sometimes, the strange things just follow them.
* Weirdness Magnets, for instance an ascended Ancient falling in love with Carter and following her home.

* Weird Pete is the opposite extreme enforcing Rule Zero through demerits that can result in level loss and can only be undone by working them off in his gameshop unpaid.
* weird psychopath who keeps Lua safe because he wants to kill her last. Lua would be a bright lady (beauty, innocence, emotional support for her knight) if she weren't almost completely passive, making no effort to restrain any of Ladd's murderous impulses and possibly looking forward to the day he kills her.
* Weird Science, 1953, had a perfect utopian place with ultratech elements but several flowing robes and stone arches. Also, it turned out to be Heaven.
* Weird Science about how unlikely it is for them to have had the exact same dream, and then Lisa calls them for breakfast.
* Weird Science, after entering the ladies room, a virus-afflicted Lisa zaps herself into a soap opera set in a seaport town. Trying to find her, Chett enters the ladies room and arrives in the soap opera, too. Observing his spacious and

beautiful surroundings, Chett remarked that this why women spend so much time in the ladies room.
* Weird Science: Although not a psycho, Gary does this trope just after driving away the gang of mutant bikers from his party, gesturing casually with his rather large revolver as he talks to Wyatt and scaring the hell out of the party guests in doing so. Justified in that, due to an earlier event involving that gun, he thought it was a water pistol (this time, it wasn't, as he and a chandelier learned the hard way).
* Weird Science and Mad Science are playable advantages in the game - the former allows you to make advanced gadgets that would be possible by modern technology while the latter covers pretty much anything you can come up with (although the GM
* Weird Science, an entire mall atrium full of shoppers stop all their business just to laugh at Gary and Wyatt after bullies dump an Icee on their heads. To their credit, the two girls hanging out with the bullies weren't impressed by the crude little stunt, but it doesn't count for much when everybody else in the mall seemed to be.
* Weird Science: "Bikini Camp Slasher" opens with the main trio watching the latest installment of the in-universe series (where a catcher mit-masked killer stalks victims at a summer camp). Even though he's never seen it before, Gary predicts every development, due to his knowledge of slasher tropes and rules. When he remarks he'd like to match wits with a slasher and see who'd come out on top, Lisa zaps them into the movie. They can only leave once the movie is over, so to survive, they'll have to fend off Mittface, abide by the various rules that Gary knows by heart, and (much to Gary and Wyatt's disappointment) avoid two scantily clad, willing women.
* Weird Science, Chett is turned into a kid again, and then regrows into an adult at accelerated speed. Replacing his military school upbringing with a few days of kindness and love from his "older" brother turns him into a big softie.
* Weird Science comic anthology. A scientist helps a short man get taller with an experimental procedure on his hormone glands. Unfortunately, his body doesn't respond to the treatment to stop it, and he keeps growing until he becomes a giant. Becoming incapable of getting any work and getting negative press from all the food it takes to feed him he's ultimately hounded by the military until he's bombed to death trying to escape in the ocean.
* Weird Science comic series ("A New Beginning" from issue 22) where a man and a woman from the distant future end up becoming Adam and Eve after their time machine leaves them stranded in the past.
* Weird Science episode "Rock Hard Chett", Chett dons a leotard and tights after becoming invulnerable to just about anything. He vehemently resists the idea at first, until his brother points out that he should "think of it as a uniform".
* Weird Science from the wish. It's like her magic itself is playing this trope on her and everyone.
* Weird Science, Gary and Wyatt get Lisa to conjure up an amazing video game for them, and then order her to keep making new levels for them while being thankless about the whole affair. Irked, Lisa makes the game come to life and is later captured by the game's villain. How do the pair free her? With live-action Pong.
* Weird Science, Gary and Wyatt hide in the coat closet. One of the bikers punches through the wall, grabs Wyatt and drags him out.
* Weird Science, Gary works to beef up his transcript in order to get into Paxton University, but he struggles with writing an essay about why he wants to attend (only able to come up with "College is neat"). Lisa tries to help by bringing out his inner poet, but this only results in "College is neat-o." Based on a scene transition, Gary is able to pad out his initial statement into a reasonable essay by lampshading how long he spent trying to write something and spinning that as an overwhelming desire to attend. At the end of the episode, we learn he was accepted, so this (along with the other work he did) clearly worked.
* Weird Science had a lot of streamlined rocketships and cool futuristic tech, especially Wally Wood's work.
* Weird Science, hesitate whether the red wire will stop the bomb or is a decoy

* Weird Science in a complete cat in the hat manner (just before the parents get home)
* Weird Science Lisa granted the wish by giving her the power to suck the youthful energy from anyone she touched: Nana became more active and energized, while the teens themselves acted like old people trapped in young bodies (talking about early bird specials and becoming hard of hearing, for example). The only way to set things right was for Nana to go back into the nursing home again, which, in a surprising reversal of this trope, she willingly did, explaining that she while being young again was fun, she's also quite happy to be old, too.
* Weird Science, Lisa offers herself sexually to Gary after a night out at a blues bar. The next morning, Gary wakes up wearing Lisa's panties and she complains to him that he passed out before she could finish her "gymnastics routine." It's left deliberately unclear what happened between the two of them.

* Weird Science powers working at least temporarily, so every character believes that the role they are playing is real. But the series goes back to the status quo every week.
* Weird Science. She has successfully transformed the lives of Gary and Wyatt, getting them popularity, girlfriends, and most importantly confidence. So she decides to become a gym teacher...
* Weird Science song "Weird Science" from the original film as its theme song.
* Weird Science story had people vanishing instantly when tossed into space. Weird science indeed...
* Weird Science to tell them how long it's going to take before a certain event occurs. In Gary's case, he wants to know when he'll lose his virginity. In Wyatt's, when he will die. Lisa conjures them watches with countdowns. Both are overjoyed. Gary will lose his virginity in a matter of days, while Wyatt has 80 years to live. In anticipation, Gary pulls out the yearbook and starts trying to hit on all the girls in his class. Wyatt starts doing reckless things, knowing he can't die. Then Lisa realizes she made a mistake and accidentally switched their watches. Gary won't lose his virginity until he's an old man, and Wyatt has only a day left to live. Fortunately, Wyatt manages to change his fate, giving Gary hope.
* Weird Science. When the two girls Gary and Wyatt are interested in ask what they're doing in the bathroom, Wyatt blurts, "Oh, we're just taking a shit!" Gary gives him a glare and in a separate shot, gives him an epic slap to the face, then cuts back just as quickly.
* Weird Science, Wyatt absentmindedly puts on Lisa's panties after they spend the night together.
* Weird Science, Wyatt gives the camera a glance when Chet says, "Next thing you know, you'll be wearin' a bra on your head."
* Weird Science, Wyatt wants to be the chess club president and accidentally wishes for it in front of Lisa, although she doesn't hear the whole story, and he forgets to mention the "chess club" part. So, she makes him the President of the United States. Gary's mismanagement and Wyatt's obsession with the chess club results in Wyatt's impeachment.

* Weird Trade Union stories contain an Assassins' Guild and Thieves' Guild, and so on. The Lankhmar Thieves' Guild was introduced in the second story, "Thieves' House", published in 1943.
* Weird Trade Union whose bylaws obligate them to behave in this manner. It's suggested that the Guild enforces this as a protection measure for both their members and for society at large. An episode where Rusty does not play along has Brock Samson warning him that a psycho with a private army, flying machines and so forth needs to be indulged if only to keep him away from committing real crimes.

* Weird variant with Loki, not particularly known for his sense of honor, who in two different myths is caught and coerced by a giant (Thiazi in one, Geirrod in the other) into promising to lure someone into a trap (Idunn and Thor, respectively). Afterward he goes ahead with it even when he's out of actual danger and it's sure to get the other Aesir angry with him.
* weird variation. Smurfette becomes so addicted to Greedy's annual smurfberry candy, that after eating her whole allowance, she uses one of Papa Smurf's spell books to give herself a "smurfy touch" and turn anything into more candy. Naturally, it leads to an accident with Brainy. Worse, Smurfette panics, and while she runs to find help the other smurfs find him and think he's just a sculpture made by Greedy. (She gets back in time before they try to eat him.)
* Weird War II, originally created for the D20 rule set, about a world where the mass slaughter and evil of the war had awoken all manner of monsters, old and new. This meant that a player would not only face things like Nazi programs to create zombie or werewolf soldiers, but also haunted tanks and planes, apes with human brain transplants, djinn harassing the troops in Africa, onis fighting on behalf of the Japanese, and more.
* Weird War II. Want to use rune magic to send giant monsters against the alien supersoldiers working for the other side? It's in here. (note: Despite the name similarity, this isn't part of the Pinnacle series.)
* Weird Wars has the historical Japanese Unit 731 harbour a small group which uses Eastern magic to summon the dead and bind them to remains, even capable of attaching undead brains to the controls of vehicles and aircraft. When offered to the military they refuse violently due to their sense of honour, but at the GM's discretion they may end up resorting to this madness as the situation gets more desperate towards the end of the war. Imperial Japan and National Socialist Germany, despite Allied fears to the contrary, do NOT share their knowledge of such dark magic as Eastern necromancy and Nazi blood magic, which indicates their intentions toward each other after conquering the world.
* Weird Wars has this exact Edge available, complete with the system as to what and how much exactly a Scrounger can appropriate per session. Correctly identifying Scroungers of neighbor friendly squads and keeping them away from your position is a subgame.
* Weird Wars have a Hindrance for simulating this trope called F-ing New Guy.
* Weird War Tales #100 grabs the camera from him and throws it into the sea. Lucky can't talk, but Velcro knows exactly what he's trying to say — they won't let Shrieve make any more monsters for war.
* Weird War Tales created as an exercise in psychological warfare) and GI Robot (a mute, seemingly nonsentient robot fighting for the USMC in the Pacific)
* Weird War Tales with an officer in a POW camp during the American Civil War being extremely relieved to learn that the "drummer boy" he was attracted to was actually

a girl. And then the zombies show up...
* Weird War Two, a dice and paper WWII RPG which basically mixes myth, horror, and WWII, there are demonically possessed Nazi tanks from hell. There are also super haunted ghost tank hunters for the Allies. These tanks can have special abilities and Special Ammo. Tanks in this game are downright deadly to anyone not sporting big guns or lots of infantry with AT weapons. So having a tank on your side is this.
* weird weird, through and through, but that's no excuse for other people to just sort her into some shallow "funny weirdo" demographic and then treat her like she hasn't got her own fair deal of serious thoughts and problems.
* Weird West, but with strange events and supernatural beings getting involved.
* Weird Western Tales #22, an escaping prisoner strangles a deputy with the manacles shackled around his wrists.
* Weird Western Tales who is both the town marshal and judge. He makes almost every offence a hanging offence (such as hanging a saloon girl for filching ten dollars from a drunken cowhand) as the frequent public hangings attract business to the town.
* Weird Western Tales who rules her small town with a fist of iron, sending her three sons to poison the cattle and burn the crops of anyone who refuses to knuckle under to her authority.
* Weird West. Finally he tries his measly sonic stunner prototype, to his surprise the ultra-high frequency sound kills the shapeshifted medicine man who was watching him. Turns out against weak medicine men, ultrasonic waves will catastrophically disrupt their magic, but against high level ones like Geronimo and Hook Nose it just dazes them.
* Weird West is about a cowboy who gets lost on his ranch one day, and is chased back to his house by an undead horse in the middle of the night.
* Weirdworld -- Warriors of the Shadow Realm, they have huge ears and huge noses plus even males who are otherwise thin have a noticeable potbelly. Female dwarves are much better looking with the most beautiful dwarven girls looking exactly like a round-eared elf girl (elves in this world are short).

* Weiss and Winter Schnee are are subversions. They are both extremely talented warriors, having been trained at the elite Beacon and Atlas Academies, respectively. They have both mastered the family Glyphs Semblance, which allows them augment speed and strength, manipulate time and summon avatars of foes they've defeated in battle to fight for them. By combining her Glyphs with Dust, Weiss can shoot Ice, Fire or Wind Dust from her
* Weiss attempts this, only to partway through gets interrupted by Pyrrha. It's one of the earliest scenes that show that Weiss is attracted to Blake.
* Weiss confines her opponent with glyphs before blasting them with a rapid fire barrage of magical beams, then finishes by obliterating the enemy with a giant ice sword.
* Weiss dreams that she loses her fight against the Gigas first seen in the White trailer, her father Jacques sells Atlas out to Hell and she's dragged away by two Imps wearing SDC vests.
* Weiss' hair goes down past her calves, or it would if she let it down from that bun/ponytail combo.

* Weiss Reacts and other spinoffs and fanfics set in the same universe.
* Weiss Reacts Jaune is a more straightforward version of this and Weiss grows into

one throughout the volumes as she adapts to deal with Yang.
* Weiss Reacts, looking down at everyone else's antics, but at times, including the Great Antic War, she shows that she can just as easily prank others as the likes of Yang can.
* Weiss Reacts plays straight, averts, discusses, lampshades, subverts and zigzags as many tropes as it can. It helps that the author is also a troper.
* Weiss Reacts point out that this is absurd and there are other reasons apart from being a badass that she might like him.
* Weiss Reacts Schnee being the villainous one when it's actually inverted in canon).
* Weiss Reacts, Sun, normally pretty calm, loses it when Blake's manliness obsession goes too far.
* Weiss Reacts, where Blake sums up the elements that make a Sacrificial Lion so easily missed.
* Weissreiter was jacked in this game also but this time was augmented to give it a significant boost in power.
* Weiss Schnee admits to Winter with frustration that she's struggling to master the Schnee ability to summon ice-forms of vanquished enemies. Throughout Volume 3, she fails to summon on command but, when trying to protect Velvet during the battle for Beacon towards the end of the volume, she unintentionally summons the arm and sword of the knight.
* Weiss Schnee begins the series acting cold and dignified and being openly antagonistic towards her partner Ruby Rose, who she sees as an immature brat undeserving of her leadership role. However, it's clear that a lot of this is a facadé, and she mellows out fairly quickly after Professor Port lectures her about her poor attitude and convinces her to give Ruby a fair chance. The very next scene is of her giving Ruby some coffee so she can study more then confiding in her that she wanted bunk beds as a kid. She has some animosity towards teammate Blake Belladonna later in Volume 1, but that has pretty deep personal roots for the both of them. As a side note, this is acknowledged
* Weiss Schnee is starting to show her sugar side to those she trusts. While dismissive, angry, and condescending towards Ruby initially, she grows to trust Ruby as a partner and a leader, best shown when she shows a surprising amount of concern after Ruby was captured by Roman Torchwick. Also, Weiss goes from holding a personal grudge against Blake due to Blake's fierce defending of the White Fang to lending Blake some
* Weiss Schnee's mother is a neglectful alcoholic and her father is a self-absorbed businessman who is only concerned with maximizing profits and his own image. On the other hand, Klein Sieben is a warm, approachable man who uses his ability to shift personalities to cheer up Weiss when she's feeling low. He provides her with coffee after she's been in a cold room, uses his rude and grumpy personality to make her laugh by mocking Jacques' behaviour, and has a motherly personality that fusses over her well-being. Once Jacques detains Weiss for her insolence in Volume 4, Klein doesn't hesitate to secretly help her escape the family mansion and flee Atlas. Thus, Weiss considers Winter and Klein as the only family she has left.
* Weiss Schnee, who comes from rich family, apparently had many suitors who only cared about her purse. This leads her to (mistakenly) believe that Jaune is this as well when he asks her out.
* Weiss Schnee who Weiss holds in great esteem. Aloofness aside, Winter clearly loves Weiss deeply.
* Weiss's father, Jacques, only married her mother to get his hands on the Schnee Dust Company. He doesn't care at all about his family and, just to twist the knife further, flat-out told his wife about it on Weiss's birthday.
* Weiss's father Jacques sends her to negotiate with Ironwood to end the trade embargo with Vale, expecting her to fail so he can disown her and make Whitley his heir. Instead, she actually succeeds by both understanding Ironwood's motivations (keeping the White Fang from stealing more Dust) and coming up with an acceptable workaround, rather than just complaining about the lost profits and demanding he

drop the embargo like Jacques would.
* , Weiss spots Jaune and Cinder having sex and tries to hide behind some trees. Given that her hair, skin, and dress are all bright white, Cinder wonders how Weiss thinks she's hidden at all.
* Weiss's reaction to learning that the massive crystals in the Grimmlands are all
* Weiss's voice is a little higher-pitched and youthful in Volume 3 than it was before, best heard when she gets mad at Neptune for flirting with all four members of Team NDGO. It's possible that this is being done to create more contrast between her and her older sister Winter.
* Weiss's Volume 4 storyline is introduced to the audience with the sight of a subdued girl being summoned by the butler from the isolation of her sunlit room to walk through long, empty hallways as her heels loudly echo in a silence that only broken when she reaches her father's study and overhears him arguing with General Ironwood about the General's decision to inflict a Dust embargo on the world. Her Volume 4 storyline ends with the same butler again triggering her to walk through the long hallways. This time, her heels are muffled by carpet and she's determined rather than subdued. She is again stopped at the doorway to her father's study, overhearing him arguing with General Ironwood, this time about Ironwood's latest decision to close the Kingdom's borders to movement in either direction.
* Weiße Rose resistance group said: "Such a fine, sunny day, and I have to go... What does my death matter, if through us, thousands of people are awakened and stirred to action?".
* Weiß Kreuz doujin rewrote Schuldig and Omi’s confrontation to have Omi fighting Schuldig's mind reading abilities by first imagining Schuldig in a Tutu... followed closely by a Schuldig/Reiji Takatori romantic scene. Schuldig ended up begging for mercy while Omi threatened to imagine even more vivid scenarios.

* Weiß Kreuz from gunshots without visible blood, as if imitating bloodless black powder squibs.
* Weiß Kreuz. Fujimiya Ran especially desires revenge against Takatori Reiji for the murder of his family in the first 15 episodes of Kapital.
* Weiß Kreuz had an episode where the villain/target of the episode was responsible for running what were referred to as "human chess games" for entertainment purposes. However, it wasn't so much actual human chess as it was one-on-one combat on a chessboard-patterned floor.
* Weiß Kreuz has a pack of enemies called the SS whose leaders are obvious Nazi analogues. Their evil plot revolves around the occult powers of black magic and the main character's sister.
* Weiß Kreuz is a cult-like conspiracy that is headed by three psychic Elders. Their goal is to raise a demon that will help them rule the world and grant them immortality.
* Weiß Kreuz is a tragedy, set in a world of hell - implied by Hidaka Ken - where villains are free to get what they want at the expense of the innocent lives, and without getting punished by laws. The heroes, Weiss, are themselves bloody, murderous monsters as well, and are determined to live a life full of guilt in order to provide the innocent better tomorrows.
* Weiß Kreuz is based on this trope: Fujimiya Aya goes undercover as a participant in so-called Human Chess prizefights.
* Weiß Kreuz, Ken 'borrows' a skateboard and, being really bad at English, leaves Aya to explain.
* Weiß Kreuz Ken is shown to be in prison - which, we discover, is apparently by his own choice, and it's implied that he can get back out whenever he wants but is simply using it as a form of self-imposed penance and a chance to think.
* Weiß Kreuz — he was a J-League goalie and was drugged without his knowledge to fix a game, then blamed for throwing it. His efforts at finding out who was responsible ultimately lead him to join Weiss.
* Weiß Kreuz OVA, Ken and Omi refuse to kill a sympathetic target, so their teammates are ordered to kill them. Turns out to be part of a plot, though.

* Weiß Kreuz protagonists. That they turn on every single one of their employers before the end of the first series illustrates the dangers of employing Psychos For Hire.
* Weiß Kreuz: Schoen is an incredibly vain former model. She takes Ken trying to kill her in stride, right up until he scratches her cheek. She spends the rest of the series trying to kill him for it - though, since she was trying to do that anyway, Ken doesn't really notice the difference.
* Weiß Kreuz that they upgrade to properly billowing Badass Longcoats.
* Weiß Kreuz: the OP features the main characters with wings on their backs. Black ones, to boot. But feathered, not bat-like.
* Weiß Kreuz. They kill criminals who are above the law in order to help protect the innocence of normal people, while acknowledging that they themselves are also criminals and murderers, and expecting to be punished for it someday. Even their voice actors, one of whom is the creator of the series, do not expect their characters to meet good ends.
* Weiß Kreuz when Omi has a nightmare about being a murderer just like his older brothers, he imagines the three of them playing pool.
* Weiß Kreuz who did this to Sano and Uno, two girls that he bought as children, enslaved and trained to be deadly bodyguards, used as sex toys, and was planning to have Mamoru marry one of them to ensure heirs.
* Weiß Kreuz, who leaves with his love interest at the end of the Schwarz audio drama to lead a happy, kill-free life.
* Weiß Kreuz, who start out as one of the groups that Reijia Takatori is behind and end up backstabbing their way right out of Essett altogether — muddies the exact order in both cases.
* Weiß Kreuz Youji's ultimate fate is to marry his nurse and take her last name.
* Wei Yan's defenses at Han Zhong revolved around this concept. They were specifically designed to hold off an enemy until the treacherous terrain made resupply so difficult that they'd be forced to withdraw. Counterattacks against a retreating enemy were discouraged, since the whole point of the defenses was that they were purely defensive. When, decades later,

* We know from the second episode of the first series that Red Dwarf has reached very high relativistic speed after accelerating for three million years. The crew could be exploiting relativistic effects to make travel between solar systems seem much shorter.
* We Know the Devil: Each character wears a white dress shirt with a cross stitched onto the pocket, but otherwise the camp uniform seems malleable: Jupiter wears a bulky army jacket, the dark haired boy of Group South wears a long sleeved shirt with flame decals underneath the dress shirt, and the apparent Group South leader wears short shorts and has his dress shirt open to reveal a t shirt with his own face on it.
* We Know the Devil is referred to at different times with she, he, and it pronouns. Fitting since the devil seems to be different things: self-love, a manifestation of repressed desires and anxieties, a push for a newer, better world.
* We Know The Devil Luna-Terra is a celebrated ace, but holds herself at a distance, drifting from faction to faction as the gravity pulls her, never really being trusted or seen by people, all while leaving a trail of broken hearts all across the solar system.
* We Know the Devil, Neptune has this when she becomes possessed by the devil. Her sprite at 3am shows her with tons of black bile streaking her clothes and face, and at 4am her CG has her spewing black bile.
* We Know the Devil: Neptune is darker than the other characters but her ethnicity is never mentioned.
* We Know The Devil. Neptune was a person who viewed the world with suspicion, and

could be abrasive and angry to people, while kind and compassionate to those close to her, but ultimately viewed herself as a rotten person. Pluto has the same insecurities, but decided to assume the best of everyone. Unfortunately, by being perfect and kind all the time, when she genuinely does try to confide in people, it gets immediately brushed off since she's supposed to be effortlessly perfect.
* We Know the Devil takes place over the course of twelve hours as the main characters spend a night in a creepy cabin.
* We Know the Devil uses hand-drawn character sprites over photo backgrounds for a lo-fi 80's horror aesthetic.
* we know who she is, as she's one of the most iconic supporting characters of the new series and a fan favourite.
* We later find out that Mimmi is Zac's long-lost biological sister. Although his race in the context of the show is never confirmed, Chai Hansen is half-Thai, so we can assume that Zac, and by extension Mimmi, is too in the context of the show. This makes Mimmi a true Token Minority
* We later meet the Millefiore Family, which is possibly even worse than any instance of the mafia around

She tells him that it could be any of a number of agencies, but that it's probably the Men in Black, though they're not all men and don't all wear black. He asks why they're called that then and she replies that it sounds better than "People in Clothes." Later, said "Men in Black" (Lisa Casper and David Logan) have dinner with Max's parents, posing as a married couple who are having problems having children and Lisa Casper sneaks into Max's room and discovers his piece of Harry's spaceship. Later, Max returns home and sees the incident on a recording on his computer.
* Welcome Back, Frosch, Sting, Rogue, Yukino and Lector have been looking all over for Frosch who has gone missing. When they finally find him, Sting and Yukino try to head directly for Frosch, but Rogue tries to stop them, accidentally groping Yukino's breast. Yukino's too embarrased to do anything, so Sting punishes him instead.
* Welcome Back, Kotter, all of the Sweathogs except Vinnie Barbarino, the ladies' man, are asked out to the dance.
* Welcome Back, Kotter are helping at Gabe's apartment following his wife having a baby. After some mishaps, Horshack comments "We are doing the work of three men here. Larry, Moe and Curley."
* Welcome Back, Kotter Arnold proposes to Rosalie, who is trying to guilt-trip the macho boys in the class with a pregnancy scare (which she made up whole-cloth). It earns him a second date when she drops the charade.
* Welcome Back, Kotter begin and end with Gabe telling one of these, couched as a story about a family member, usually to Julie. Her reactions range from enthusiastic amusement to weary resignation to strong annoyance. Occasionally other characters get in on the fun, either as victims or storytellers.
* Welcome Back, Kotter episode, "Epstein's Madonna," after Epstein paints an outdoor nude mural (Julie Kotter's face on Dolores Delvecchio's body) as his "art week" project, Woodman (who considers it obscene) defaces it with spray paint, and leaves the can behind, just before Kotter and the Sweathogs are to have a meeting about it in the schoolyard. Kotter sees the damage and picks up the spray can just before the Sweathogs arrive. Fortunately, they realize that even though Kotter is not happy about his wife's face on the mural, defacing it would be completely out

of character for him — but not for Woodman.
* Welcome Back, Kotter episode "Goodbye, Mr. Kripps", an unpopular teacher has a heart attack while yelling at Vinnie, who mistakenly believes that he killed the teacher and turns himself in to the police as a result.
* Welcome Back, Kotter, Epstein apparently pulled this on Horshack in their younger years (told via story in "The Deprogramming of Arnold Horshack"); he said that the school dance was a costume party, and Horshack came dressed like a baked potato (wrapped in foil).
* Welcome Back, Kotter had Mr. Kotter accused of sexually harassing a student. (Actually, she fainted due to a fat diet she had been on and Mr. Kotter was just trying to help her get up.) The Sweathogs wanted the girl in question to sign a confession stating that Kotter hadn't done anything. Horshach wrote the confession on the back of a grocery list and read that to her at first.
* Welcome Back, Kotter, Juan Epstein's slightly younger sister puts in an appearance. Barbarino remembers her — but not quite like that.
* Welcome Back, Kotter: Julie tries to tell some jokes but she mixes up the punchline of this joke with the punchline of "Why do firemen wear suspenders?" a less famous but very similar joke.
* Welcome Back, Kotter proposes to Rosalie Totsie after she claims to be pregnant by one of the Sweathogs. She's lying to trick them into taking back rumors about her being "easy," but after the reveal, she thanks Arnold for offering to do the right thing and asks him out on a date.
* Welcome Back, Kotter) referred to him only as Horshak (his character's name).
* Welcome Back, Kotter reveals that Arnold Horshack's last name translates into "the cattle are dying."
* Welcome Back, Kotter starred Gabe Kaplan as Gabe Kotter. (Justified as the series was based upon Kaplan's youth.)
* Welcome Back, Kotter, teacher Gabe Kotter (Gabriel Kaplan) starts studying for his high school's senior-year exams when the principal can find no record of his scores. The records are found, but he takes the tests anyway, providing an example for his students.
* Welcome Back, Kotter: The episode "What Goes Up ..." featured Freddie (one of the show's four main students) becoming addicted to painkillers after being prescribed them to heal a basketball injury. He convinces a scared Horshack that the pills are really just "vitamins" (but is unsuccessful with his teacher or other friends), only seeing the light when Horshack tries to contact the pusher who sold Freddie the pills.
* Welcome Back, Kotter: The "Sweathogs" was the nickname of a class like this at James Buchanan High in Brooklyn. Gabe Kotter had graduated from this class and gone on to become a teacher. He volunteered to return to his old high school and teach this class, hoping to help kids who were in the same position he had been in in high school.
* Welcome Back, Kotter: The title character tells a joke about one of his relatives to his wife, Julie ... usually one of those unknown-until-now uncle and a bad pun. Even the episodes with somber or serious themes, or those ending on said note, ended not with a serious resolution to the situation but one of those "Did I ever tell you about my Uncle Jamie?"-type jokes.
* Welcome Back, Kotter was set in Buchanan High, and followed the archetype of a single hall and classroom.
* Welcome Back, Kotter, when Mr. Kotter dresses up as Horshack and puts on a skit to convince Woodman to return Arnold from mainstream classes to the Sweathogs, with Kotter looking face-to-face at Arnold and both of them doing such trademarks as Arnold's wheezy laugh and several "Ooh-ooh-ooh!"'s. Arnold takes a look at Mr. Kotter and says "Wait a minute; I don't got no mustache..."
* Welcome Back, Kotter, with the Sweathogs dropping in on their favorite teacher via his living room window. He wasn't bothered by it, but his wife was.
* Welcome Back, Mr. McDonald is about the live production of a radio play. Problems with the actors, sound effects, and advertisers result in them deviating from the script to the point that they are completely rewriting it every commercial break,

much to the original author's distress. Needless to say, the final product ends up having very little in common with her original story.
* Welcome Back Mr Mc Donald. The lead actress of the radio drama requests that her character be made American. This leads to the other actors wanting their roles changed, then they want plot changes, and pretty soon, the radio drama is nothing like what was originally written. It doesn't help that both the director and the drama's writer are complete pushovers.
* Welcome Back, Traitor: A character who once betrayed the group is welcomed back with open arms.
* Welcome Back, Traitor: A party member changes sides only to come back and is received in open arms.
* Welcome Back, Traitor: A traitor reconciles with those they betrayed.
* Welcome Back, Traitor: Character temporarily switches sides and is welcomed back as if nothing happened when he changes back to his original affiliation.
* Welcome Bears, is directly adjacent to the Plaguelands, so unwitting low level characters were often mauled on wandering across the border. While the zone level has been significantly nerfed, they're still likely to kill the unwary.
* Welcomed to the Masquerade: A character is introduced into a secret society or hidden world.
* Welcome Episode: A typical pilot episode for a series, in which the main character joins a previously established group and gets acquainted with them.
* Welcome Episode: The first episode begins with one of the main characters meeting the rest of the cast for the first time and being given information that is also beneficial for the audience.
* Welcome Freshman parodied the Prohibition era with student gangsters making bathtub bubblegum. When caught by the teachers, they defeat them by producing violin cases, from which they remove violins, which they then play very badly.
* Welcome Freshmen, Coach Roach announces that they'll play dodgeball with a bowling ball. The students talk him into something less dangerous, but still far from fun.
* Welcome Freshmen had a very long salute done by the new militaristic Hall Monitors that involved using both hands and a full spin, accompanied by drumbeats. Each monitor had to give the full salute every time he was given an order, which gave the offending student time to just walk away without being apprehended.
* Welcome Freshmen has Walter going to visit a mall Santa (despite being in high school). When Santa gets Walter to confess to a few transgressions, he realizes that "Santa" is actually his father doing a little moonlighting.
* Welcome Freshmen questions, by luck to boot, which all happened to be worth 10 times that of previous questions.
* Welcome Home a couple has a weekend vacation at an Italian villa to try to repair their relationship. Things aren't going so well until the voyeur stalker that rented them the house attacks them and the whole ordeal brings them closer together.
* Welcome Home over it due to being Americans in a foreign country (Italy) and thinking they can't get away with self-defense.
* Welcome Home Roscoe Jenkins, Reggie tries to sneak in on his cousin RJ's girlfriend in the shower but finds his cousin Betty there instead. The actors improvised their angry exchange.
* Welcome Mr. Marshall! named Villar del Campo just one hour's drive from it.
* Welcome Titles - When original footage is used in the title sequence, usually to explore the show's world. More common in animated series as its rather expensive to do it in live action series.
* Welcome to Arroyo's—he's finally able to talk about it, which allows him to begin healing.
* Welcome To Boon Hill is about walking through a cemetery and learning the stories of the people buried there. There's no zombies, ghosts, or any spooky stuff going on there.
* Welcome To Bummertown, all the NPC's are 100% aware that they're NPC's in a video game. They're all mad at the developers for not finishing the game, and one of the

NPC's even makes you go into the logic terminal to fix the broken parts of the game.
* Welcome To Bummertown, as if the game weren't broken enough already, you run into a monster from a violent fantasy video game who got glitched into this one by accident.
* Welcome To Bummertown, Mayor Agnes has some kind of programming update seizure wherein she completely glitches out and her eyeballs turn glowing white. She claims she had an “itchy ear.”
* Welcome To Bummertown when Workman is trying to provoke some NPC's into getting mad at one of the other characters.
* Welcome to Chastity is a witch who can among other things conjure fireballs and make women's breasts grow larger. She gets killed because of a fire she started triggers a gas explosions which she couldn't escape from since someone made her breasts so huge she couldn't move.
* Welcome to Chastity moves to the town of Chastity with almost no knowledge of the place prior and is understandably freaked out when she discovers that the town's entire female population are insanely busty.
* Welcome to Chastity so the town only gets talked about in tabloids. Later on, however it's reveal that the reason the town situation isn't known to the rest of the work is because of a witch.
* Welcome to Chastity the town Chastity used to be the site of many witch burnings. Turns out one of the women burned was an actual witch. She revived herself and got some payback on the town inhabitants.
* Welcome to Chastity the town is filled with so many absurdly busty women (The phrase 80% boob and 20% girl is used at least once) that they had to invent their own scale for bra sizes, with 'as big as your head' being considered a C-cup, and a normal set of double D's considered a puny A-cup that not even a training bra is small enough to fit right.
* Welcome to Corneria might be the strongest single-author aversion out there.)
* Welcome to Corneria: Minor NPCs always say the same dialogue because programming in endless dialogue is a time-consuming activity when few players will actually talk to them again anyway.
* Welcome to Corneria: The non-player characters of a video game have limited dialogue.
* Welcome to Dead House, barks around everyone in town since it can tell that they are actually dead. Eventually, the dead people get fed up with it and actually kill the dog as a result.
* Welcome to Demon School! Iruma-kun believe they are strong and will win the fight.
* Welcome to Demon School! Iruma-kun both subverts and plays this straight.
* Welcome to Demon School! Iruma-kun has Sullivan, Iruma's adoptive demon grandfather. Every chance he gets, he acts embarrassingly doting towards Iruma, from showing off a picture of him to every other student at his school, to driving him to said school in a fancy carriage.
* Welcome to Demon School! Iruma-kun has the title character Iruma. Not only does he have an extremely hard time saying no when people ask for favors, he will be both physically and psychologically compelled to help others if they ask using certain phrases: "Please!", "Help me!", and "I beg you!". Even when he goes through his magically-induced wicked phase and becomes a far more assertive and confident version of himself, the most he can do when being requested for something is to try and resist it, and even then he'll comply if pushed a little further. He becomes less of this as the series goes on, however.
* Welcome to Demon School! Iruma-kun instead. Her father is even taller than she is, so it must run in the family.
* Welcome to Demon School! Iruma-kun into the centerpiece of their performance.
* Welcome to Demon School! Iruma-kun inverts this with the character Eiko. She has a deep crush on the titular Iruma. When she learns he isn't doing well academically (unbeknownst to most everyone he is human. While he can read and speak the demon language, he doesn't understand the academic concepts and never

went to school before this), Eiko decides to help him and studies every possible subject hard to be a tutor for him. While she doesn't get a chance to help him, she moves from an average-ranked student to being in the Top Ten of her class as a result of her studies.
* Welcome to Demon School! Iruma-kun is afraid of fish. He can't even approach one without wearing a full hazmat suit.
* Welcome to Demon School! Iruma-kun is Genki incarnate. Like a demonic Pinkie Pie who mainlines sugar when she wakes up. Endlessly peppy, endlessly cheerful and endlessly adorable. As one YouTube comment puts it:
* Welcome to Demon School! Iruma-kun: Suzuki Iruma had a terrible life and terrible parents who sold him to a demon, but the demon adopts him and gives him a much better life than when he was on the human world, it is stated that demons eat humans and the school anthem is a song about how humans are just food for demons, but then, it's revealed that young demons never ate a human, never even saw a human and suspect they are a myth, while the high-ranking adult demons are fully aware of their existance and may be involved into keeping them a secret.
* Welcome to Demon School! Iruma-kun that lets them see valuables and how to steal them best, makes the lot of them chronic pickpockets. Jazz himself landed in the Misfit Class on his first day for swiping valuables from the teachers.
* Welcome to Demon School! Iruma-kun that's better and happier than things ever were on Earth.
* Welcome to Demon School! Iruma-kun that's powered by her confidence. The more she believes in herself and her ability to accomplish a goal, the stronger she gets.
* Welcome to Demon School! Iruma-kun, this is how Ameri meets Iruma. Due to her obsessively "studying" the "forbidden texts" (shoujo manga from the human world) but not being able to read the text, along with already suspecting Iruma of being human, she thinks he's casting a "human spell" to make her fall in love with him.
* Welcome to Dongmakgol but it doesn't explode. Pyo gives his NK counterpart Lee a look of withering contempt and chucks the grenade aimlessly over his shoulder, into the storehouse—where it explodes, wrecking the storehouse.
* Welcome to Dongmakgol: The one between the North and South Korean soldiers in the village lasts all afternoon, all night, and into the next day, and only ends when a North Korean soldier falls asleep on his feet and drops his grenade.
* Welcome to Dongmakgol when a gutshot Yeo-il says "It's hot" right before she dies.
* Welcome to Doomtlis, but Khiome thinks of him as a regular old friend.
* Welcome to Doomtlis that determines what your lot in life is like. People with useless mutations are treated like dirt, but people with useful mutations are held in higher regard.
* Welcome to Earth" has alien visitors arriving to an uninhabitable Earth and watching videos at a museum dedicated to preserving humanity's knowledge for any future alien visitors. One of the visitors, still wearing his helmet, is particularly interested in one of the so-called "ambassadors", a group of 7 astronauts, sent out in experimental FTL-capable ships in order to find any aliens and ask for their help in saving humankind. One-by-one, the "ambassadors" died due to equipment failure or hull breaches. The "ambassador" of interest is the last to die, crash-landing on an icy world and freezing to death. The helmet finally comes off, revealing the face of the frozen "ambassador". Apparently, aliens found and revived him long after humanity went extinct, and he realizes he's too late to save his family.
* "Welcome to Everything Scottish, where if it's not Scottish, it's CRAP!"
* Welcome To Hard Times features a subplot with two minor characters, a White man and a Chinese prostitute, falling for each other.
* Welcome To Heartbreak was mistaken by many people, on first viewing, for a video with graphics errors.
* Welcome to Hell has managed the impressive feat of being at stage 2 from before it officially existed, and staying there for over 5 years.
* Welcome to Hell has this joke applied to both lawyers and network executives:
* Welcome to Hell wears goggles on top of his hat for apparently aesthetic reasons,

even as a demon.
* Welcome to Hoxford for the absolute worst criminals in which the warden and all on-site staff were actually werewolves who needed the prey.
* Welcome to Hoxford had a pack of werewolves running a prison/mental asylum, in order to hunt the inmates. These werewolves are huge, skeletal and vicious, and have a propensity for eating human flesh, though notably they lack the invulnerability many werewolves had, and can be killed with physical weapons. They also transform very squickily, and seem functionally ageless.
* Welcome to Hoxford has this doozy asked of the criminally-insane Ray Delgado.
* Welcome to Japan, Ms. Elf!, Kazuhiro discovered that the "dream" world that he has visited since a child isn't actually a dream at all, and that he actually teleports himself to the other world when he sleeps, when he discovers his ally in his bed with him after a near death experience.
* Welcome to Japan, Ms. Elf!: Kazuhiro took a skill in the other world, Language Proficiency, which allows him to learn various languages in the other world much faster than people normally could. This allows him to speak and befriend various "monster" races like lizardmen and dragons, and acts as a translator. He's also Marie's Japanese teacher. Wridra also counts, being able to pick up fluent Japanese within a mere half-day stay in Japan, while Marie is still struggling to speak Japanese with passable fluency even after a month.
* Welcome to Lodoss Island, has explanations underneath some of the comics, because puns in Japanese have a bad habit of turning into nonsensical absurdist gags when translated into English. For example, in one, Slayn tells Ghim that he's looking for his star, whereupon the dwarf produces a small lump on a stick and replies, "Your pickled plum?" Which is funny in English if you're into completely random shit happening because of translation, and funny in Japanese because "hoshi" (star) sounds sort of like "umeboshi" (pickled plum).
* Welcome to Marwen, as Mark was deemed "queer" by some neo-Nazis in a bar when he drunkenly mentioned liking to wear high heels, which they beat him severely for.
* Welcome to Marwen: Mark, who likes women's shoes (particularly high heels) and collects them. Nicol mentions her brother also likes women's shoes and clothing too. They aren't depicted badly as a result.
* Welcome to Marwen that try to be live action, Welcome to Marwen was a Drama and was actively trying to look animated.
* Welcome to Mooseport. In several shots, a large banner blocks a frontal view of him.
* Welcome To My Life with the hopes of being picked up for full series. Despite both being well-reiceved after being posted to CN's YouTube channel, the network ultimately passed on them.
* "Welcome to Newsnight, I'm Kirsty Wark. I'm bringing sexy back; those other lovers don't know how to act. More on that story later."
* Welcome to Night Vale: About four and a half years after they met, Cecil and Carlos get married in episode 100. Although their relationship has had its ups and downs, it's ultimately very stable and loving.
* Welcome to Night Vale. A carnival arrives in the supernatural town of Night Vale, and the host on the local radio station, Cecil, clearly believes them to be the trope, using his program to repeatedly caution the local citizens against them by describing them as weird and disturbing. Eventually, Cecil's scaremongering leads to a mob gathering and chasing the carnival out of town, at which point it becomes obvious that the carnival was perfectly normal and benign all along, and that it was the townsfolk who were the scary weirdos antagonizing them.
* Welcome to Night Vale: After returning from his mysterious disappearance, the Apache Tracker is only able to speak Russian. Translating his lines provides some plot foreshadowing.
* Welcome to Night Vale: "Alligators: Can they kill your children? Yes."
* Welcome to Night Vale and gushes about his "perfect hair" every chance he gets. When Carlos gets his hair cut, Cecil is so angry that he gives out the name and location of the person responsible and is positively gleeful when poor Telly the barber is found howling and clutching Carlos' locks of hair in despair at what

he’d done.
* Welcome to Night Vale and mundane approaches to supernatural events. The story is basically a news broadcast which is very vague on the actual news it delivers.
* Welcome to Night Vale and speak crisp unaccented English as Carlos does.
* Welcome to Night Vale, and Tamika Flynn, child leader of the revolution against Strexcorp.
* Welcome to Night Vale and this, focusing on news broadcasts from a small town with a terrible and unknowable dog park (where dogs are not allowed), a faceless old woman who lives in your house (yes, yours), a Boy Scout troop with ranks that go up to "Eternal Scout" and whose initiation ceremonies result in dark-eyed children coming to town, and the sheer carnage of Street Cleaning Day.
* Welcome to Night Vale, angels are not to be considered real due to local laws, which characters uphold even when holding a conversation with them.
* Welcome to Night Vale. At first implied to simply be a picnic that you never get to leave, and becomes depressingly boring rather quickly once you run out of small talk to whittle the time away with. Later, though, more sinister implications about it are dropped.
* Welcome to Night Vale at the local movie theater dozens of times in her life, as there were nightly screenings of it by Night Vale city ordinance.
* Welcome to Night Vale at times, although he tries to maintain at least the pretense of journalistic distance.
* Welcome to Night Vale brought back every single person who had ever voiced a character.
* Welcome to Night Vale, but a couple thousand, and people are so used to this that it all gets reported on during the evening radio.
* Welcome to Night Vale. But it is ours. And we... we are fighting for it!".
* Welcome to Night Vale, Cecil expresses fear, or maybe just mild annoyance, about the possibility of having to attend "another HR re-training session in the dark box."
* Welcome to Night Vale: Cecil Palmer and Carlos are played by gay actors Cecil Baldwin and Dylan Marron.
* Welcome to Night Vale. Despite her lack of facial features she can see and speak, and would like to know your wifi password.
* Welcome to Night Vale, doppelgängers… And that's not even the half of it.
* Welcome to Night Vale, Earl Harlan wakes up one day with a mortgage and a teenage son he doesn't remember.
* Welcome to Night Vale, eccentric at best and a force of pure evil at worst. Therefore, its not really a surprise that Cecil is able to keep the radio broadcast coming after nearly being shut down using his "Subversive Radio Host Badge".
* Welcome to Night Vale ends with a probverb, written in the same surreal tone as the rest of the series.
* Welcome to Night Vale episode 23, "Eternal Scouts", when five children appear out of nowhere in Cecil's office, he states that "exactly half of them (are) boys, and half of them (are) girls."
* Welcome to Night Vale episode 29, it's implied that the deer-masked subway representatives are this.
* Welcome to Night Vale episode of that same name, which aren't so much 'condos' as 'giant gelatinous black cubes'. Once a person touches them, they're presented with perfect visions of their greatest desire. Carlos gets trapped there with a vision of thousands of beakers and numbers; Cecil goes in to save him, nearly to get trapped himself...only to realize that he loves Carlos more than anything the condos could show him, and carries him out.
* Welcome to Night Vale episode "One Year Later" follows up on many of the plotlines first introduced in the pilot episode. The opening lines are nearly identical.
* Welcome to Night Vale: Episode "PTA Meeting" describes a disastrous PTA meeting that was broken up by rampaging pteranodons, dubbing its continuing coverage "Pteranodon Attack-gate."

* Welcome to Night Vale, Erich von Däniken's theories are accepted knowledge by Night Vale's citizens, whereas the concept of evolution and the notion that the pyramids and other ancient structures were built by mere humans are considered fringe beliefs.
* Welcome to Night Vale Even when he's not dropping his radio voice, he'll imitate the original speaker if he's quoting someone, and frequently waxes poetic seemingly at random, which frequently comes across as extremely creepy.
* Welcome to Night Vale features a horoscopes section where each of the zodiac signs are given increasingly odd/hilarious horoscopes. Among other things, Cecil warns Capricorns that "those were not contact lenses you put in this morning", announces that its Taurus's "annual crime day" where they're exempt from all laws, and simply curses Scorpios and their families and calls them "vile" for no understandable reason. (Steve Carlsburg, Cecil's hated brother-in-law, later turns out to be a Scorpio.) These strange horoscopes ended up becoming a recurring segment of the show.
* Welcome to Night Vale features the romance of Cecil and Carlos in addition to the usual eldritch horrors of the eponymous town in the desert, starting in episode 25 where Carlos reciprocates Cecil's crush and in episode 27 when they start dating.
* Welcome to Night Vale, five-headed dragon Hiram McDaniels went on the run wearing a human disguise, frequently introducing himself as "normal human Frank Chen", despite his five heads loudly and visibly arguing with each other all the time.
* Welcome to Night Vale former mayor Pamela Winchell announces her retirement after being forced to step down as mayor. Unfortunately her retirement hobbies promptly threaten to destroy the town, ending only when she's convinced to accept the position of Director of Emergency Press Conferences. Calling these was mostly all she did as mayor anyway.
* Welcome to Night Vale gave new life to the podcast outside of small critical circles and gave it credibility as a legitimate art form.
* Welcome to Night Vale gives us Cecil, the community radio host, narrator and (for all intents and purposes) main character. Very little is given about his physical appearance and economic status, and he is presented as quite intelligent and philosophical. This trope only comes across in his speech, when he sometimes drops into a valley-girl cadence when reciting quotes from certain people or going on one of his "personal asides".
* Welcome To Nightvale, guest host Leonard Burton hates that anything has changed from the way things used to be, including the sun moving in the sky.
* Welcome to Night Vale had Carlos's first lines (a voicemail left for Cecil) spoken by show creator Jeffrey Cranor. Later episodes would feature Dylan Marron voicing Carlos.
* Welcome to Night Vale has 170 episodes as of summer 2020, with each running about 30 minutes. Plus a few excusive live show recordings (paid content) and 3 books, which are available in audiobook format.
* Welcome to Night Vale has also sent cease-and-desist notices to creators of fake podcasts based on the show, ostensibly to avoid confusion with the real thing (it's estimated that the fanbase has created over three times as many fake episodes than there are real episodes).
* Welcome to Night Vale has a pretty large queer following, considering its only featured canon couple is a gay couple, and the fact it never makes a big deal out of them being gay.
* Welcome to Night Vale has Cecil being put through to one of these after calling to fix the water.
* Welcome to Night Vale has Cecil, the narrator and community radio host who cheerfully reports happenings such as glow clouds that rain dead animals, ritualistically slaughtered pterodactyls, and people being killed en masse by mysterious mute children.
* Welcome to Night Vale has given us Tamika Flynn, the twelve-year-old girl who not only survived the Night Vale Public Library's Summer Reading Program — the first child to do so in years — but led out a band of survivors while brandishing the severed head.

* Welcome to Night Vale has his moments, perhaps the best Night Valean example comes from Jackson Publick's Hiram Mcdaniels. Well, two out of five, anyway.
* Welcome to Night Vale has the Desert Flower Bowling Alley and Arcade Fun Complex. which is always said in its entirety. There's also the Faceless Old Woman Who Secretly Lives in Your Home, but her name is usually shortened to Faceless Old Woman.
* Welcome to Night Vale has The Faceless Old Woman Who Secretly Lives In Your Home. While since her initial introduction she has been shown living in several in-universe characters' homes, it's still implied she lives in the listener's home, hiding just out of sight somewhere and occasionally messing with your stuff. Maybe she lives in EVERYONE's home.
* Welcome to Night Vale has the Shape in Grove Park That No-One Acknowledges or Speaks About. When the Shape was to be removed from the park by the city council, local historians protested on the grounds that it was an important historical landmark. However, since the historians refused to either acknowledge or speak about the Shape, their protest consisted entirely of a series of gestures and grimaces.
* Welcome to Night Vale has various sinister hooded figures that lurk around town. There are implied to be enough of them to have an annual parade.
* Welcome to Night Vale have specifically mentioned the support they've received from, among others, the slash fanfic writers. Actor Cecil Baldwin, who narrates the podcast, had this to say on the subject:
* Welcome to Night Vale. He chooses to deal with this by way of complete denial.
* Welcome to Night Vale, Hiram McDaniel's green head always shouts, even when complimenting the Old Faceless Old Woman in the live show 'The Debate'.
* Welcome to Night Vale his first move is to barricade himself inside his studio. Unfortunately, Cecil's idea of a barricade is a heap of cardboard signs reading "KEEP OUT!" and "SECRET ROOM!" in all caps, with an exclamation point.
* Welcome to Night Vale in general uses this trope a lot. In the live episode "The Debate", the Faceless Old Woman has this to say about selling off unused items from homes to raise money for community schools:
* Welcome to Night Vale interpretations of Cecil feature him as a different person to whomever looks at him.
* Welcome to Night Vale: In the episode "The Sandstorm", Night Vale resident Steve Carlsburg sends an email to the radio station, claiming that he thinks the sandstorm was engineered by the government. Cecil, the radio broadcaster, scoffs at him...because "of COURSE it was created by the government, the City Council announced that this morning!"
* Welcome to Night Vale in the preceding episodes, but it's during "Parade Day" that he serves in this role most obviously; there are morse code messages hidden underneath regular broadcasts, and near the end he urges everyone to go and fight.
* Welcome to Night Vale is an odd example. He turns 30 years old every day, and has done so since Night Vale was founded.
* Welcome to Night Vale is a positive example in that he's gay and somewhat "fem", but not in such a way that it dominates his character. It helps that he is created and voiced by queer people.
* Welcome to Night Vale is constantly berated by radio host Cecil Palmer for petty or nonexistent reasons.
* Welcome to Night Vale is first voiced by series writer and co-creater Jeffrey Cranor.
* Welcome to Night Vale is helping them reach their "full productive potential." (The Smiling God cult is organized as a corporation called Strex Corp.) Kevin in particular is so warped he interprets violence and distress as warm, happy things: he calls a choke a "hug" and thinks Night Vale citizens screaming and having seizures at the "Strex Corp Company Picnic" (read: work camp) are smiling and dancing and that killing and dismembering someone and smearing their remains all over the room is simply "decorating."
* Welcome to Night Vale is set in a town where terrible eldritch horrors are attacking pretty much constantly. The citizens hold the belief that everything will

probably work out in the end, and if it doesn't, you might as well go about life as usual until then.
* Welcome to Night Vale is staged as a local radio show reporting the incredible number of supernatural goings-on in the small desert town of Night Vale.
* Welcome to Night Vale is this towards Cecil sometimes. He does his best to fix the situation once he does finally notice it, though.
* Welcome to Night Vale is very embarrassed when, despite his usual eloquence, he can only say "Neat!" when Carlos calls him with concerns of temporal anomalies.
* Welcome to Night Vale is voiced by Cecil Baldwin. Until episode 34, the general assumption was that character and actor shared the same surname as well. Amusingly enough, Baldwin didn't actually know the character's name at first (the credits just listed him as "The Voice of Night Vale", and it wasn't really important). A few episodes in the script finally revealed his name was Cecil, and Baldwin had to go check with the creator to find out whether or not NV-Cecil was meant to be someone other than himself.
* Welcome to Night Vale... it's building up to something, but its not clear what, yet.
* Welcome to Night Vale: Lauren Mallard, the NVCR program director from StrexCorp. She seems to be a genuinely sweet, bubbly young woman, and Cecil describes her as "a delight" and "the kindest, most gentle manager we have ever had at this station" (although, to be fair, that's not saying much). But she takes a rather sinister interest in knowing the names of Cecil's loved ones, which he becomes wary of.
* Welcome to Night Vale, Louie Blasko sold his soul for a can of trombone grease and a limited edition Chet Baker LP.
* Welcome to Night Vale makes his triumphant return. Cecil takes his rightful spot behind the microphone for the rest of the episode.
* Welcome to Night Valenarrated by Desert Bluffs Community Radio announcer Kevin, who looks almost exactly like, and is implied to be the double of, Cecil.
* Welcome to Night Vale: not Night Vale itself (it's not a secret that the City Council is a bizarre gestalt entity and there are hooded figures in the dog park, after all) but their rival town of Desert Bluffs, which appears to be Night Vale's opposite in every way. It's always sunny! Everything is wonderful! And everyone worships a Smiling God...
* Welcome to Night Vale (not to mention its even more sinister neighbor, Desert Bluffs) is said to be located somewhere in the Southwest.
* Welcome to Night Vale or just the announcer making weird noises into the microphone for two minutes, followed by a disturbingly peppy announcement of the company and their slogan.
* Welcome to Night Vale parts of it, but they're the exceptions. (At least one person got a panic attack because someone else dared to call the "white-robed, winged, glowing persons with trumpets" "angels" and he isn't allowed to know about those.) And the Faceless Old Woman Who Secretly Lives In Your Home is frequently discussed on the radio and once ran for mayor. Very secret.
* Welcome to Night Vale passage, followed by the name and slogan of a real-world company such as Audible.com or Home Depot. For bonus creepy points, sometimes the real slogan is followed by a nightmarish variation on the same phrase.
* Welcome to Night Vale perhaps has a leg up in this regard due to it being in the unconventional medium of a radio-drama, its genre could perhaps be best described as a slice-of-life comedy horror with healthy dose of science fiction and romance.
* Welcome to Night Vale podcast is funded mostly by merchandise sales and listener donations, with the creators offering gifts for people who set up a regular monthly contribution
* Welcome to Night Vale second-anniversary episode apparently read, "CECIL: (honest opinion about the impression)", referring to Steve Carlsberg's squeaky-voiced imitation of Cecil's boyfriend. The result:
* Welcome to Night Vale's episode "A Story About You" would fall into this. The entire episode is narrating the actions of a mysterious "You" with the clear intent that "You" is listening.
* Welcome to Night Vale set in. After a few years, the quality of the main podcast

dwindled and though the live shows were still well-attended, the fandom receded to a 6a. Smaller, but still extant.
* Welcome to Night Vale sets the tone of the town with one of the first pieces of news on the show:
* Welcome to Night Vale She's already a veteran at this, having taking down the librarians at twelve.
* Welcome to Night Vale. She then urges to have Cecil's reporters look away, and then follows through before they do.
* Welcome to Night Vale speaks so cheerily that we'd never know about the pulsing meat walls, smears of blood and handfuls of teeth that decorate his studio.
* Welcome to Night Vale spends most of this potential apocalypse complaining about the radio station not getting any water.
* Welcome to Night Vale stating that the two were only good friends, proving the original romantic assumption to be this.
* Welcome to Night Vale takes place in a sleepy little desert city where few of the population could be considered "human", but they still deal with problems like tuition, rent, local elections, contract negotiations...
* WelcomeToNightVale talks about meeting their future self, and expresses disappointment at having to wait until they get older before becoming important. Cecil's response?
* Welcome to Night Vale territory. He eventually gains a true example when Kevin comes along.
* Welcome to Night Vale thankful that those "death oranges" they were selling were discovered, since...
* Welcome to Night Vale that he basically arranges for the poor dude to be run out of town to wander delirious in the desert.
* Welcome to Night Vale the cat(?) Khoshekh which hovers immobile in the radio station bathroom doesn't show up in photographs. Also, the person who took the photograph dies horribly. Khoshekh also has poisonous spine ridges, a tendril hub, and venomous fangs, raising questions over what kind of cat Khoshekh is or, alternately, what kind of thing the residents of Night Vale call cats.
* Welcome to Night Vale, the Faceless Old Woman Who Secretly Lives in Your House does things like this.
* Welcome to Night Vale. The mirrors are uncovered in the last scene, and Cecil doesn't know who did that, and the flickering movement is most visible in the reflection. Then the listener might remember a bit from a previous episode... "Or better yet, destroy all of your mirrors. As my mother used to tell me, 'Someone's going to kill you one day, Cecil, and it will involve a mirror. Mark my words, child!' And then she would stare absently through my eyes until I giggled."
* Welcome to Night Vale: The Night Vale chapter of the NRA has issued a new bumper-sticker slogan:
* Welcome to Night Vale: The podcast's style of absurdism alternates frequently between comedy and horror in just about every episode, and the overall podcast doesn't really show a strong preference either way.
* Welcome to Night Vale. There are countless drawings and paintings of Carlos falling asleep at his lab table, often with Cecil covering him with a blanket.
* Welcome to Night Vale, there is a disturbingly specific denial of rampant cannibalism. Neither the first nor the last instance of this trope in, by far.
* Welcome to Night Vale, there's The Good Boy, a beagle puppy who claims to "Rule over the dark, wet pits... of HELL!"
* Welcome to Night Vale the Sheriff's Secret Police kidnap family members to ensure people vote the right way at elections, storing them in the secret location of the abandoned mine shaft, which has been used for this purpose so frequently that it's actually quite nice, with king-size beds, Wi-Fi, and, as the Sheriff's Secret Police recently announced, now gets HBO.
* Welcome to Night Vale: The skies above Night Vale are frequently host to strange lights, such as those above the Arby's, as well as other strange phenomena.
* Welcome to Night Vale the station management room is, as far as they can tell, too large to fit in the radio station building.

* Welcome to Night Vale, the title character manipulates people's surroundings, especially her "favourite", Chad in order to...persuade Chad to settle down, get married, and have children. Of course, her reasons for wanting him to do that are not particularly benevolent either.
* Welcome to Night Vale, the town acquires, literally overnight, a subway system. When our narrator, Cecil, takes a ride, he reports that while only minutes passed for the listeners, to him the trip lasted for years.
* Welcome to Night Vale, the two main characters Diane Crayton and Jackie Fiero develop a friendship. Diane is old enough to lead the Parent Teacher Association, and Jackie Fiero is nineteen years old.
* Welcome to Night Vale, this is encouraged by the Sheriff's Secret Police.
* Welcome to Night Vale, though what they're doing exactly and why remain a mystery.
* Welcome to Night Vale. Usually fired from a slingshot. Despite living in a town where students are regularly provided firearms by paramilitary government agencies (and often have to use them against the horrors of everyday life), Tamika and her "book club" are among the most effective combatants around.
* Welcome to Night Vale When he gets into the recording booth and begins drooling on Cecil from the ceiling, Cecil knows exactly what will happen if he looks up, and keeps his head down until he has gotten out of the booth and locked Hector in.
* Welcome to Night Vale will express disgust with the rival town Desert Bluffs whenever they come up in his broadcast and will go on about how awful it is. When Night Vale comes up in Kevin's broadcast to Desert Bluffs, however, he makes no mention of any negative feelings between the towns and says that he bets Night Vale is wonderful and beautiful.
* Welcome to Night Vale will mention their "sacrifice" to the station's cause.
* Welcometo Omega is a good example, but it's not strictly speaking power armor. It's a lot like the Venom symbiote, built into the wearer's genome and its protection based on their reaction time.
* Welcome to Orty-Fou came from the fact that the characters lived at number Fourty-Four on their street, but the first and last letters had fallen off the sign over the door.
* Welcome to Our Village, Please Invade Carefully: Amusing but potentially very nasty aliens take over an English village.
* Welcome to Our Village, Please Invade Carefully has a couple of these.
* Welcome to Our Village, Please Invade Carefully: One's a teenager with no goals in life beyond getting intoxicated on a regular basis, one's a charity worker who's old enough to be the first one's mother (though she doesn't like people pointing it out). Together, they put up a comically ineffective resistance to their alien oppressors!
* Welcome to Our Village, Please Invade Carefully only speaking in their own alienese.
* Welcome to Room #305 except Rose herself, nobody in their class wants to be the one to tell her.
* Welcome To Sanditon, Clara bakes Nutella waffles for herself and her new boyfriend Ed in the episode "Nutella Waffles for Two".
* Welcome To Sanditon has a moment where Tom Parker, an older politician, didn't understand what younger Beau Griffith was doing with a bro fist and wound up shaking his fist.
* Welcome to Silent Hill, Sherlock had accepted that Watson would never love him back. Guess what happens in the epilogue?
* Welcome to Sweden, Bruce is incredulous that Swedes consider skiing a sport.
* Welcome To Temptation by Jennifer Crusie was essentially trying to blackmail and/or harass almost every prominent person in town and annoyed the hell out of pretty much everyone else. Amusingly enough, despite his having been hit by a car, maced in the face, bundled up in a shower curtain, and disposed of... he died of a heart condition without actually having been murdered at all.
* "Welcome to the 90s. The Cold War is over. Western Europe is unified. The whole world is a kinder, gentler place to be... almost." —

* "Welcome to the Bikini Bottom Triangle" was originally titled "Welcome to the Bermuda Triangle".
* Welcome to the Brothel by his squadmates so that he can lose his virginity.
* Welcome To The Brothel. On one hand, he prefers killing to sex. On the other hand, it's obvious that he's traumatized from his experiences and probably not thinking all to clearly.
* Welcome to the Caribbean, Mon! rule the seas with drugs, rum, and terror. You'll be lucky if they're romanticized.
* Welcome to the Convenience Store: An adaptation of the webcomic of the same name; a gag-a-day series about the day to day events of convenience store workers.
* Welcome to the Convenience Store) is locked in the store and desperate for the bathroom (there isn't one in the store itself). When he sees Eun Ah, the store clerk, return he imagines himself running towards and then dancing with a roll of toilet paper. Unfortunately Eun Ah gets distracted and he's left in there.
* Welcome to the Convenience Store received a two series professionally made web-based adaptation.
* Welcome to the Disclaimer! (On "Ixnay On The Hombre", featuring also this trope.)
* Welcome to the Dollhouse: Brandon threatens Dawn to keep their relationship a secret, as he’s too embarrassed to be associated with her publicly. The relationship is short-lived and no one finds out, except for maybe Ralphy, who was spying on them in Dawn’s Special People Club.
* Welcome to the Dollhouse. Case in point is the infamous "Happy Anniversary" song.
* Welcome to the Dollhouse, Mom comes wearily back into the dining room and tells Dawn to go to bed.
* Welcome to the Dollhouse: the mother obviously favors the cute youngest daughter Missy over the plain middle daughter Dawn, to the point where Mom and Missy cuddle on the couch while watching television and Dawn has to sit on the floor.
* Welcome to the Dollhouse Weiner sees some kids beat up some nerdy kid. She goes over to him, asking if he's okay. His response: "Get away from me, Weiner Dog!"
* Welcome to the Dollhouse who has mommy and daddy wrapped around her finger. Her favorite pastime is baiting Dawn into getting into trouble.
* Welcome to the El-Paracio). Everyone except the main character Tadasuke takes this in stride, regarding Mariko and Mary as two separate people, while he's upset at the idea of people treating such a kind person as if she were a monster. There's a similar situation for the Death Carpenter, a Heel from another promotion, who's shown to be a relatively normal woman outside the ring.
* Welcome to the El-Paracio saw her stepping out of the shower, making him the only person other than Ouka who's seen her real face).
* "Welcome to the Family" features the line "Grandpa's the local sheriff, yeah, he's the judge and the jury too." No mention of executioner, but the next line is "Uncle Bill's the undertaker"...
* Welcome to the Game: Adam, the protagonist's friend who teaches the player how to play via Skype, is both voiced and named after the creator.
* Welcome to the Game II, for the crime of... going on the Deep Web. One of the most-mocked parts of the game is that you need to keep moving your VPN from hotspot to hotspot or else the cops will nonchalantly waltz past repeat murderers to kick your door in.
* Welcome to the Game is on the quest to find a Red Room. What a Red Room is a livestream found on the Deep Web of a kidnapped person being tortured to death. Which you get the pleasure of watching at the end.
* Welcome to the Hellmouth", deciding to resume slaying after it had gotten her kicked out of her previous school.
* Welcome to the Hellmouth" has Principal Flutie give an enthusiastic speech to Buffy about how when he was her age, students had genuine school spirit instead of being cynical slackers like today. He then sheepishly admits that, "of course, when I was your age, I was surrounded by a bunch of old guys telling me how great things were when they were my age..."
* Welcome to the Hellmouth. The show would be followed by many years of near-constant trope subversion like this as well.

* Welcome to the Hellmouth", the young guy sneaks his young female friend into the High School at night. It's dark and creepy and she's uncomfortable. It's clear he has dark and creepy [read: 'pointy teeth'] designs on her. She timidly asks if they're really all alone and when he verifies that they are, she's the one who grows teeth and puts the bite on him.
* Welcome to the Impregnable Demon King Castle: A series about a black mage who was kicked out of his party and was then invited to join the Demon King's army. Originally published on Shousetsuka ni Narou, then picked up by GA Bunko.
* Welcome to the Jungle, Harry Dresden and the zookeeper he's protecting encounter a hellhound in the back seat of the Blue Beetle.
* Welcome to the Jungle with corporate executives instead of children.
* Welcome to the Monkey House by Kurt Vonnegut: Body-numbing pills, originally designed to keep monkeys from behaving in an unseemly fashion in front of visiting schoolchildren and grandmothers, have become compulsory to stop people from having sex.
* Welcome to the Monkey House, which was broadcast on PBS in the early 1970s.
* Welcome to the N.H.K.. Although he comes off as slightly less severe then some of the other characters, he's treated with the same humorous objective criticism as everyone else.
* Welcome to the N.H.K. and his friends trying to overcome their psychological problems.
* Welcome to the N.H.K., as the main character frantically cleans his apartment for his mother's visit, he carries away his stash to hide it temporarily, but runs into his mother in the process and spills the magazines for all to see.
* Welcome to the N.H.K.: Elena in the Manga when Yamazaki tries to give him money so he can get a sex change operation.
* Welcome to the N.H.K. has snippets in which the protagonist is taunted by appliances.
* Welcome to the N.H.K. have the main protagonist, Satou, being driven half-mad by his next-door neighbor (next door but sharing the same wall), who keeps playing the same J-Pop song, nonstop, 24 hours a day. A number of times he angrily kicks the wall and yells for his neighbor to turn the music down.
* Welcome to the N.H.K.. In one afterword, he notes that upon reading his novel, it reminds him so much of his earlier lifestyle that he sometimes gets the urge to scream, throw his laptop out the window and commit suicide.
* Welcome to the N.H.K. in order to sell them on the dietary supplement/keep Satou in the pyramid scheme.
* Welcome to the N.H.K. light novel and manga, nearly the first thing we see the protagonist do is snort a small amount of a 'legal drug' he 'brought off the internet'. In the anime, the drug was removed, and the resulting trip was changed from a drug-induced hallucination into a psychotic hallucination.
* Welcome to the N.H.K.: Misaki somehow knows an awful lot about Satou, and she is very obsessed about making sure that he always attends her counseling every night. After he rejects her romantic advances, she attempts suicide.
* Welcome to the N.H.K. Misaki tries to break Sato of his crippling addiction to the MMORPG by dressing up as a catgirl herself—complete with meowing—but Sato's response is to throw things at her and tell her to go find a convention to cosplay at.
* Welcome to the N.H.K. mixes comedy and drama interchangeably. Especially at first it's a comedy, but becomes increasingly dramatic over time.
* Welcome to the N.H.K. played by his neighbor Yamazaki. Once he befriends Yamazaki and he is introduced to the show, he often finds himself humming the tune, and even adopts it as his ringtone!
* Welcome to the N.H.K., Satou meets Misaki while she's evangelizing with a very Jehovah's Witness-like group.
* Welcome to the N.H.K.'s includes a declaration of love, and it sure looks like it's mutual. But at the very end, Satou and Misaki are meeting together as usual, and though they are clearly involved in each other's lives, it isn't clear whether they are involved as friends or as romantic partners.

* Welcome to the N.H.K.'s protagonist does this, frequently. Despite that fact that clearly nobody believes him, he tries to go with it anyway.
* Welcome to the N.H.K. throws himself off a cliff in an honest-to-God suicide attempt, but discovers that a hidden metal net has been installed just below the cliff after the previous suicide on that spot. After that, he seems to become quite happy with his life again.
* Welcome to the N.H.K. unwillingly attends an omiai arranged by his parents. He immediately falls in love with the woman and gets married to her shortly after.
* Welcome to the N.H.K. used this trope on every volume. Going off the covers, you'd believe the show was about sexy ladies instead of an anxiety-ridden hikikomori man, though some of these images do appear (briefly) in the actual anime. The complete collection/season sets do not use this trope.
* Welcome to the N.H.K. when Satou decides to test if he has gained powers like those characters have from training alone on a mountain from living alone in his apartment. He successfully karate-chops a beer bottle but cuts his hand.
* Welcome to the N.H.K.), which happens to be one of the few absolutely taboo words in Russian, literally the male penis, but also ranging in meaning from "fuck off" to "cunt" (the insult, not the matching organ) depending on context.
* Welcome To The Pharmacy, after a tense moment with the mutated-head client that thankfully ends without incident, Jessica promptly mentally notes that she almost pissed herself.
* Welcome To The Pharmacy, and is very knowledgeable about his homeland, the computer he is looking at has another goofy article, this time about wether a rhino or a hippo would win a fight against each other.
* Welcome To The Pharmacy him facing off against a lion who wants to eat him because it assumes his insides taste like chow mein.
* Welcome To The Pharmacy they needed someone who could help their chinese speaking clientele, and Jean-Luc sheepishly admits he found her so cute during the interview he completely forgot to ask her what languages she knows.
* Welcome to the Plastic Beach. Welcome to the Plastic Beach. Welcome to the Plastic Beach. Welcome to the Plastic Beach.
* Welcome to the Punch sitting on either side of her, posing as his old army mates who've come to visit. Unknown to grandma, a third man standing right behind her is pointing a pistol at her head. They make it clear the killer is to come out "for some drinks" while one of them waits with grandma to ensure his co-operation. The killer calls their bluff.
* Welcome to the Punch visits a tattoo parlour whose owner gives him the option of releasing the information "old school" (word of mouth) or "new school" (via Facebook and Twitter).
* Welcome to the Punch was dubbed in Slovak twice for airing. The first dub premiered on TV Markiza in 2016. The second dub premiered on TV JOJ in 2018.
* Welcome to..., the titular guide is deactivated by its user a minute into the video, and it reawakens four months later, horrified to see what said user has done to her profile.
* Welcome to the Wayne and mocks other people for sympathizing with him.
* Welcome to the Wayne an elderly lady and helped by squid like creatures, there's a weaponry, railings that lift up when are grab and a control room by which she watches and controls the movements of the passages and giant bookcases.
* Welcome to the Wayne creator Billy Lopez voices Ollie Timbers, one of the main characters.
* Welcome to the Wayne Olly has one called the "Grapvine" that has corks stuck in the hooks, which he uses frequently to go around and to fight.
* Welcome to the Wayne ripoff, given that two of the main characters (Olly and Saraline Timbers) have a fairly lot in common with Dipper and Mabel Pines.
* Welcome to the Wayne was originally conceived as this before being turned into a full series in 2017.
* Welcome to the Working Week by Paul Vlitos writes a children's book in which a lonely, short-sighted hedgehog falls in love with a hairbrush. His ex-girlfriend is not best pleased. (Nor is his best friend, who appears as a saucer of milk.)

* Welcome To The World Of Pokemon has four characters who nickname all of their Pokemon: Leaf, Ethan, Brendan and Hilda. Other characters have nicknamed Pokemon, but the vast majority of these names are a Pokemon's given name.
* Welcome To The World Of Pokemon uses this with two of the main villains: Archer and Cyrus.
* Welcome to Tranquility and tried to drown her on the spot. Some of his words suggests he's offended by being made redundant in some way if his child is like him, while other dialogue suggests that another reason he doesn't want a child is because on some level he knows how dangerous he is, wanting to spare the world the danger of another him. Tommy secretly had the child and put him up for adoption, and fortunately he doesn't seem anything like his father so far.
* Welcome to TV Tropes! This article describes the layout and basic operations of the site.
* "Welcome to Venus Island": The Rangers fight a Venus flytrap monster who opens up its chest and fires a beam at four of them, pulling them into its stomach. The consumed Rangers fight their way out with some help from Trini and Tommy.
* Welcome To Wonderland, and is always looking for new statues for it.
* Welcome To Wonderland book, "Beach Battle Blowout", is dedicated to Chris Grabenstein's father, Thomas Aloysius Grabenstein.
* Welcome To Wonderland: Book one, "Home Sweet Motel", has Stanley and Sydney Sneemer. They're a pair of elderly jewel thieves who pulled off a heist in 1973, and went to jail for it. Now that they're out, they've returned to collect their loot.
* Welcome To Wonderland: P.T. asks Dill to intentionally lose his Frolf game against Geoffrey in "Beach Battle Blowout", since he's the son of one of the judges, and Geoffrey winning and having fun might increase the Wonderland's chances of winning the first round of judging. Dill gladly complies, stating that he's still a winner if he's still having fun.
* Welcome To Wonderland star who's videos help support the primate sanctuary he lives at. In the book, he's one of the stars of a movie being shot at the Wonderland Motel.
* Welcome To Wonderland: The second book, Beach Party Surf Monkey, has Aidan Tyler, one of the co-stars of the movie being filmed at the Wonderland. As Gloria finds out, he's quite difficult to work with.
* "We learned a very simple thing, to listen to you. Come back to J.C. Penney, we'd love to see you."
* We learn in Book 12 that Darklord Kraagenskûl likes to whip out his psychic
* We learn in episode one that Scott's issues and drug abuse stem from being repeatedly raped by his stepmother.
* We learn in issue #218 that Weird Pete had bolted his table to the floor to prevent this.
* We learn in Season 8 that in human life Crowley's mother was a witch. He speaks of her in passing, but she did pass some of her magical knowledge on to him (which also explains how he came in contact with demons before becoming one himself), implying a close bond. Subverted in "Inside Man" where he
* We learn later on that this is quite out of character for her. However, she was having a bad day.
* we learn that Phoenix was disbarred because he presented a forged page from the victim's diary that proved that the victim was still alive after Zak had left the scene. However, we later learn that Zak had the real diary page the entire time. Why did he not give it to Phoenix or, better yet, present it to the police which would have cleared him from the get go? Even stranger is that a motive for him hiding the diary page could be explained as him not wanting suspicion to come onto Valant, who would be suspected if it was proven that Zak hadn't killed the victim. However, in the talk where he reveals that he had the diary page the whole time, he is also surprised that Valant was suspected at all.
* we learn that Private Jimmy wasn't killed by Tex but instead had the Alpha AI forcibly implanted into him. "AAAAH! WHAT'RE YOU DOING TO MY SKULL!? AAAAAHH! THIS

DOESN'T SEEM PHYSICALLY POSSIBLE!!"
* We learn the aliens have both hardliners and moderates also, with the former pushing for LA's rendition into the Factory.
* We Leave for England(and also the book preceding it), has every male character (Norwegians, not Germans), executed off-screen at the end of the film.
* Welfare and Social Service workers, at least the good ones, will often use this trope in writing of file histories. It aids in evaluating emotionally charged encounters by looking at just the facts as they presented, without getting caught up in value judgements or the perceptions of the person relaying their story.
* Welfare fraud was just one of her many crimes. She went by many identities of different races and ages, and one of her husbands described her going into the bathroom for an hour and looking like a completely different person when she came out.
* We Like Sheep where one of the characters turned evil and killed everyone with an army of robots. After killing them all and piling their bodies into a huge stack, he'd climb to the top and yell "I'm the king of the world! Somebody bring me a pecan pie!"
* We Live Again. A young nobleman seduces a maid, who becomes a prostitute and is sentenced to four years in Siberia after being wrongfully convicted of murder. In the book, a young political prisoner marries her and plans to follow her into Siberia. In the film, the nobleman himself casts off everything, gives his wealth to the poor, and joins the woman in exile.
* We Live In a Dump, the puppet characters make one designed to put spray cheese on crackers.
* "We live underground. We talk with our hands. We wear the earplugs all our lives."
* Welker is also listed as the voice of Abu in the credits for both French dubs (Canadian and European). As such, much like the examples involving Welker mentioned in the 'Film - Live-Action' section, it's very likely that he voiced the character in most, if not all, foreign dubs of this film.
* Welkin and Alicia's kind treatment of a dying Imperial scout (trying in vain to patch up his wounds, Alicia
* Welkin has his tank waterproofed and literally drives it underwater across the riverbed to the far side, securing a beachhead for the rest of the squad to follow in boats.
* Welkin's unit in the first game is very forgiving of uniform alterations; includes older, more experienced troops answering to a rookie commander younger than them; and includes numerous individuals who struggle or refuse to work properly together.
* Welkin Weasels are described as "smooling". The narrator points out that this isn't a real word but it describes the action perfectly.
* Welkin Weasels, involving nine ferrets in a human-sized suit of armor.
* Welkin Weasels, in which Scruff, for a prank, tricks Maudlin into thinking that their host is a serial killer.
* Welkin Weasels is an actor who usually plays female roles, and wears a red riding hood when out walking in the forest "to confuse the beasties". It should probably be noted that Maudlin asks about this "with a touch of envy in his voice".
* Welkin Weasels — even their names are very similar: the descendants of Mawk and Scirf are named Maudlin and Scruff, respectively.
* Welkin Weasels: Poynt wants Falshed to make sure a boxer he's bet against loses, and Falshed tries to start a euphemism hurricane:
* Welkin Weasels, the most popular game among mustelidae is called "hollyhockers". The game appears to be a bizarre mixture of poker and the I Ching, in which bets are placed on patterns that a thrown cupful of hollyhock seeds will fall into.
* Welkin Weasels, the protagonists come across an island that is home to a pair of dodo tribes. They apparently hate each other because of the color of their eyes, and over ownership of a bunch of little models made of fish bones. Apparently, whenever they go to steal the other tribe's, the other tribe gets the same idea and they're back where they started. They manage to solve this by the protagonists

having them burn all of the models. It doesn't really work, though, as the chieftain of the tribe they first met recommended that the group leave before the darts started flying.
* Welkin Weasels when Scruff is hiding from Count Flistagga in the crypt.
* (well... actually, yes, before...), which sparked off the whole chain of events.
* Well, after she has a soliloquy/musical number that sums her mindset up as "my affair has made me more grateful for what I have but hey it was kind of nice." She's more killed by barely-repentant adultery than killed by sex since she's a married lady with a child.
* Well, all we really see is that they've taken their clothes off. Chris Onstad suggests in the book that they went outside to play in the sprinklers.
* Well, almost all of them, she's already been through about 3 or 4 jobs by her first appearances. By the end of Season One she's been: interior decorator, taxidermist, tattooist, psychotherapist, tabloid journalist, professional witness, dating service, carbon-dating service, beta tester, and Queen of Canada. In Season Two she uses her office for other purposes, such as choosing a new boyfriend and
* Well, almost uncensored. The episode, "His Mouse Friday" still muted the voices.
* Well armed and armoured maybe, but its design of three propeller shafts rather than four was a big flop, not only did it critically weaken the keel, (leading to the 'ability' of a single torpedo to jam the rudders), but it also made steering a pig (not helped by really-too-small rudders). She was a battleship, with emphasis on the 'battle' rather than the 'ship'. She was also more vulnerable to plunging fire than contemporary British designs due to an outdated armor layout, which resulted in one of the shells from the
* Well, aside from the impact from falling from a great altitude, there was the overload, powerlessness, having made two improvised time travels by grazing the heat and gravity of the Sun, having been torpedoed twice in the previous movie...
* Well, at least, that's what the Angol clan considers humanity to be in the manga, sensing various evil thoughts throughout the world and being able to count how many sins are happening on Earth in a specific moment. This would explain why the Angols seem nice, despite their destructive aims.
* well aware of this, he forbade them from mentioning it at all. It worked. Although the film managed to make enough to break its budget, the lack of publicity prevented it from being a success, and it was largely forgotten about until its revival.
* Well before all of these, there were a set of 1967 Filmation shorts as part of the
* Well before Inferno, dear old Megatron proved that you don't have to
* well before the Coming of Chaos, an event which occurred over 7,000 years ago. Granted, some of them have been in a near-comatose state of meditation since Chaos arrived, but not all have, and some of the ones that haven't can rightly claim they were alive before Man existed. The Saurus, while often dying relatively early due to their lives of constant war, are theoretically as ageless as the Slann — the legendary Saurus warrior Kroq-Gar, for instance, was already an experienced veteran during the Coming of Chaos seven millennia in the past.
* Well before the Israelis created their Super Shermans, the British upgraded the Sherman to carry the enormous and powerful 17-pounder anti-tank gun, this being their best AT weapon. The resulting tank, the
* Well before these Johnny-come-latelies, the original dimorphic superhero couple:
* Well before they get any power, John sardonically refers to the four as the gods of rock 'n' roll.
* Well before this, way back in 2004, a quest called Horror From the Deep has this in its backstory, being inspired by Lovecraft's works. The keeper of a lighthouse, Jossik, investigates the basement after hearing sounds coming from it at night, and a bizarre door stands in your way of rescuing him. However, if you find and read his uncle's diary, you'll discover that the uncle went insane over the course of an unknown period of time, hearing noises coming from the basement and then being called to the ocean as it went on. He began to have dreams of the creatures he discovered under the lighthouse, and then of becoming one as he adopted a schedule

based on the creatures so he could be closer to them. It's heavily implied that he turned into one, and that it will happen to Jossik as well.
* Well, being able to drop a warp-point that allows other stealth craft to drop in from several star-systems away without the usual downside (that everyone else in the system can see the beacon and come kill you) is pretty valuable for sneak attacks. It is a multiplayer game, not every ability is based on what a single player can do by himself.
* Well, being a fanboy and also being able to crack a complex puzzle written in a language he didn't understand, hidden in a popular online game in the hope that someone would come along and solve it.
* We'll be Right Back sometimes featured a claymation dog sniffing a sapient fire hydrant, only to be hosed down.
* Well, Bond is sexually uninhibited, at least, but in the movies he never cries or shows much emotion, and in the novels he's much less openly emotional than the Black or American characters (although he does weep on two occasions).
* We'll break his legs! towards teammate Ren, ready and willing to resort to kidnapping and imprisonment to secure her love.
* Well, by the time you visit it, anyway. Zeal was originally run on solar power, but they switched to Lavos power because
* we'll catch on to the fact that we're being attacked by germ warfare fairly quickly, and while that alone wouldn't help much as we have no idea how to leave this world for the Homelands of the Fables, the residents of Fabletown will likely approach the US government and go public with their existence. Once they do, they'll give us all the info we need on the Empire's location, and since the Empire has a ban on all modern technology from our world (The Adversary fears a rebellion if his subjects did carry it) our armies would obliterate theirs, and the Empire would fall.
* Well...cat in this case, but Salem, having been a warlock, can sense Danny's innate supernatural abilities.
* well. (David Tennant deliberately invoked that last one with his Doctor too.)
* Well, despite the Corps' highly advanced personality rewriting devices, Jim did insist that they not reform her
* well detailed elsewhere.) Repeated use of the Futae no Kiwami turns Sanosuke's hands into broken wrecks, much to Megumi's displeasure.
* Well-disciplined Buddhist monks can reduce their metabolism by 64% and raise the temperatures of their fingers and toes by 17°F (9.4°C), just by meditating.
* Well, disintegrator touch or stare, really. Espers with entropy talents can make most materials decay to dust extremely quickly.
* well-documented rise in single motherhood on TV urging men to "take the time to be a dad."
* "Well Done, Dad!" Guy: Emotionally distant to someone who desperately wants their approval as a child or student.
* "Well Done, Son!" Guy: A character wants someone to acknowledge them.
* "Well Done, Son!" Guy: Emotionally distant to someone who desperately wants their approval as a parent or a role model.
* "Well Done, Son!" Guy in every sense of the word) used the shooting to fuel her own campaign that has completely taken over her life, so it's a subversion where the supposed execution was a publicity stunt.
* "Well Done, Son!" Guy: It's sad that this person never gets any respect from their father.
* "Well Done, Son!" Guy moment, because Logan has become a violent bastard who's killed thousands, and Thomas can respect that. He makes zero mention of Dog.
* "Well Done, Son!" Guy, saying that it's almost impossible to live your life solely for someone else's approval.
* Well, end wars quicker at least (in those days, most soldiers died of disease).
* Welles actually tried to get around this by including a line in the film in which a journalist makes a reference to both Kane and Hearst, thus indicating that Hearst actually exists as a separate entity in the
* Wellesley is also reputed to have said, "I don't know what effect these men will

* Well everybody's heard about the bird... (The Bird was originally a dance, and was indeed "the word.")
* (well, eviler) assistant have saturated their entire bodies with poisons. Furthermore, Szayelaporro has the ability to basically make voodoo dolls that allow him to crush the organs and bones of his target nearly at will... Kurotsuchi is the only other character in the series with enough insane science at his disposal that in the time between discovering this ability (used on the guys Szayelaporro was fighting before Kurotsuchi arrived) and getting to the site of the battle he had REPLACED ALL HIS ORGANS WITH FAKES to render himself immune! This is exactly as insane as it sounds for every single other character in the series.
* Well, Excuse Me, Princess!: A princess or lady who acts snarky toward her friend or love interest.

* Well, Heracles is Zeus' son. And his great-great-grandson (his mother Alcmene was the granddaughter of another of Zeus's bastards, the hero Perseus). This happens a lot. Danae was the great-great-great-great-great-great-granddaughter of Zeus and Io, as were (give or take some greats) Semele (whom Zeus impregnated with Dionysos) and Europa (who gave Zeus Minos, Rhadamanthos, and Sarpedon).
* "Well," he said, "you could announce that Kong is without question the handsomest Chinese fighter pilot in the ETO (European Theater of Operations)." When it was pointed out that he was the only Chinese pilot in the ETO, he replied, "Well, we could drop the (word) ETO and eliminate the Chinese. There's a story, the handsomest pilot."

* Well, he wasn't actually in the middle of a sentence. He just said "Guess it's time to close the curtains." before he died, so I assume that counts as finishing a sentence.

* Well, in most shows/stories, zombies may be tough combatants, but that is owing to how much damage they can dish out, and their resistance to conventional harm, like bullet holes— Even a flat-edged Wave-Cutter sword like the one Anne uses could do some serious harm to dead flesh, especially if these are on the decomposing end of the Zombie Scale.
* Well-Intentioned Extremist: A character has noble goals, but goes about achieving them ruthlessly.
* Well-Intentioned Extremist: A character resorts to extreme methods to ensure a noble goal.
* Well-Intentioned Extremist and he ends up making peace, then giving up the office at the next election.
* Well-Intentioned Extremist, as everything he does, he does with the intent of helping the Hidden Leaf Village. He does it through underhanded political manipulation, and lets revenge get the better of him, however, that he becomes pretty unsympathetic.
* Well-Intentioned Extremist: A terrorist who commits their crimes out of a genuine (if horribly misguided) belief they are fighting for something good.
* Well-Intentioned Extremist: A villain with sympathetic motives to further a good cause, but they use inexcusable methods to reach their goal.
* Well-Intentioned Extremist: Characters who are only doing what they do because it is for the greater good.
* Well-Intentioned Extremist considered an obvious villain, though his actions do conflict divine law.
* Well-Intentioned Extremist: Does morally problematic things, but only in pursuit of a worthy goal.
* Well-Intentioned Extremist: Doing questionable deeds to achieve a good end.
* Well-Intentioned Extremist has a quite a long ahoge near his forehead...

* Well-Intentioned Extremist; it was when Saruman arrived and took over that he switched from "build more and better machines" to "knock down buildings, cut down trees, pour filth on everything just for the hell of it". As one of the hobbits who lived through it remarks, Lotho's machines didn't really improve matters, but "since Sharkey arrived it's been plain ruination".
* Well-Intentioned Extremist Kuze was once a soldier of the Japanese Ground Self-Defense Forces, before becoming extremely disillusioned with his work and deserted from his North Korean outpost.
* Well-Intentioned Extremist or a full-blown villain. Obviously he won't let Trips take back the control of his body.
* Well-Intentioned Extremist reveal was what he was actually planning: To get all of his followers killed so their sacrifice would fuel the summoning of a primal.
* Well-Intentioned Extremist, right? Can be idealism depending on how it's written.
* well-intentioned extremists, bigots, and power-mad idealogues (which itself is a part of a recurring theme of the series that where members of different genders don't interact and lean on each other, stagnation and dysfunction soon follow—do with that as you will). Virtually every outright antagonist character among the Aes Sedai is a member of one or both of these two groups.
* Well-Intentioned Extremist: Someone who uses good ends to justify evil means.
* Well Intentioned Extremists They're basically first-responders at disasters who refuse to change their tactics when the disaster isn't what they expected it to be.
* Well Intentioned Extremists to batshit crazy people who just want to blow everything sky high, but that's mainly a personality thing and not an effect of the cybernetics.
* Well Intentioned Extremists we're talking about, so the fact they give you an option of joining them or dying makes them seem like saintly paragons of virtue in comparison to everybody else. And then come the implications of mind control, forced sterilisation, death camps...
* Well-Intentioned Extremist. The show makes a point out of the fact that Bataar Jr. is not okay with sacrificing his life for the cause.
* Well-Intentioned Extremist: The villain does bad things in order to achieve an admirable goal.
* Well-Intentioned Extremist: The well-intentioned side. Idealism gone wrong.
* Well-Intentioned Extremist to try to save as many people as they could in the face of an overwhelming enemy they couldn't possibly defeat.
* Well-Intentioned Extremist way: the powers of Chaos need emotion to live, so he wanted to turn the entire world into undead so as to fully deny Chaos its victory. Sadly, the rest of the world objected.
* Well-Intentioned Extremist (what often happens when characters like this go wrong)
* Well-Intentioned Extremist: When you put more emphasis on the "well-intentioned" part than the "extremist" one.
* Well-Intentioned Extremist who’s got many Anti-Human sentiments.
* Well-Intentioned Extremist who dearly loved the Empire and never discriminated Terrans (which casts him in a better light than most Methuselahs) in the novels, teaching this to his niece and ward Shahrazad. Also that Seth is rumored to be a monster to some people (including Lilith, who was a Messiah in the past, thought so). So their dynamic is much more complex than the anime lets on. There is a bit of parental incest on Suleyman's side (who claims she's the 'woman' he 'loves' earlier, but also the person he detests).
* Well-Intentioned Extremist who did terrible things that he came to regret as an old man and let Voldemort kill him to make it up to Dumbledore, the one person he ever genuinely cared about? Or is he just a power hungry madman who let Voldemort kill him because he was miserable after being locked in a prison for over half a century? Either interpretation is completely valid.
* Well-Intentioned Extremist who want to convert everyone to vampires so as to starve Chaos (they can't feed off the emotions of the undead.)
* Well-Intentioned Extremist: You believe that your goal justifies your immoral actions.

* Well-Intentioned Replacement: Replacing an important artifact after it has been destroyed or lost.
* Well, in the Eastern Germany, the idea of Glory Days is coming back under the word "Ostalgie", or East Nostalgia in English. While every East German is happy with the reunification of Germany and the end of the dictatorship, economically speaking, the excitement of the 90s for East Germans died down quickly as their industries closed and unemployment rose. The East is still worse off than the West German parts, so quite a few people romanticize the time where they all had jobs and were relevant in their own way, although they could all do without the dictatorship. The success of some Eastern cities under the reunified state like Leipzig only seem to reinforce Ostalgie rather than end it, with East German symbols and period movies being really popular tourist items these days. Every major East German city will have a place dedicated to learning about it's DDR history, and while critical of the regime, still goes in depth about everyday enjoyments of the common people.
* Well, it depends on your definition of wrong — as time goes by, he becomes much more willing to bend the rules, something he worries about. Additionally, while Vimes is increasingly smart and courageous, a lot of that could be put down to his having crawled out of the bottle and displacing his alcoholism with crime solving — something, ironically, that makes him very much like the vampires he hates.
* "Well", it insists, is an insulting understatement, and suggests this alternative:
* Well it's a happy ending for everyone except poor Senex, who's still stuck with his shrewish wife Domina.
* Well, It seems like it's been going on for as long as either of them can remember.
* Well, it's happened. America has finally elected its first Jewish President of the United States. So he invites his mother to the inauguration. She says, "But, bubele, how the heck am I going to get there? My car is broken down and whatnot!" So the President tells her, "Ma, don't worry about it. I'll get Air Force One to take you." But then the mother says, "Oiy, I'll need to catch a taxi and carry my luggage. It's just too much!" So he says, "Mom! I'm the President! I'll pick you up in my limo! Then my guards will carry your luggage for you!" But the mother says, "But finding a hotel is gonna be extremely expensive!" So the President replies, "Ma, you can just stay with me in the White House."
* Well, it wasn't spontaneous—an existing AI was trying to speed up the processing of licensing and...well,
* Well, it wasn't the airman's fault so much as the missile's guidance system going haywire: It was heat-seeking and flying toward a spy plane, which were fair game on both sides during the Cold War, but it wound up going haywire when the plane cut off its engines and eliminated its heat signature, which caused the missile to plummet into a Soviet ammo depot in Latakia, Syria. (Syria was a Soviet client state throughout the Cold War.)
* Well, it was the present when it first came out), Archie is stuck in an awkward, hunched-forward position when he comes across a pretty girl. * Well, obscurity isn’t really right. She has a decent-sized following, critical adoration, and the unofficial label “Queen of Gay Twitter.”
* Well, of course. John's rage against the demons stems from his father's longstanding disapproval of his career choice. You see, he sees his father as the demon. But as we all know, John's father was only looking out for his son. It was John, betrayer of his own father, who was the real demon. Of course he was a demon only until he became a zombie.

* Well, sort of... some times. In early editions there were clone families of six that were decanted and raised in the same environment, and treated more or less as one person. This did not make sense (not that Alpha Complex ever does), as we're left wondering where the other 5 are most of the time (it was occasionally addressed, but mostly just left off-camera). Later editions have it so every citizen is, theoretically, cloned when they die (except traitors that have earned an erasure), but the red tape delays it to the point of never happening, but Troubleshooters have six immediate backups because they are in highly lethal situations, but with important missions that must be completed. Higher ups tend to buy more packs of six clones when needed, and Ultraviolets are so important the Computer gives them an essentially infinite number of quick clones. This still doesn't make sense, but in a way that works.
* Well, specifically, action cartoons are expensive to produce and rely on merchandise sales to recoup their budget. One of the most common causes of cancellation for action shows is the lack of merchandising revenue needed to produce new episodes.
* We'll start with New Doctor Who's 'saluting while not wearing hats' (if you are hatless, you can come to attention, or a version of it if sitting down, when wishing to show respect to a superior officer within most Commonwealth countries). Yes, it means that the Doctor can do his 'no don't salute' bit, but would it cost them too much to borrow the hats?
* Well, that happened a lot of times already... Two of the many Almost Kiss moments happened in "The Transmogrification of Eunice" (Ben and Eunice, of course) and "Revenge of the Swarm" (Ben and Elena).
* Well That Was Unexpected: Most types of energy weapons and spellcasting in the comic have their own unique visual and sound effects. However, one aversion shows up with the Tau and Eternus energy weaponry, which share a bright blue appearance

and distinctive "FREEN" (or sometimes "BREEN") sound effect despite being from entirely unrelated sources.
* Well, the earliest official European imperialist rhetoric (by Spaniards and Portuguese) dealt with the need to baptize the indigenous population and thus spread the realm of Christianity, thought one could argue that was mainly to persuade
* Well, the exact truth of how it happened has gotten very muddled over the years (Sam herself notes that there are at least three versions). In each version, however, the king also went back and got a chalice that would avert this. Typically, the chalice has been lost for centuries - Sam herself has no hope (or any real desire) of finding it in time to avert her own death. However, now that she's with a Questor like Quentyn, there's a chance now.
* Well, the Genie technically isn't a "man" either so that must be the reason...
* Well, the only MELODIC metalcore band. As they were influenced by beatdown hardcore, classic metallic hardcore bands have a much more macho driven image than most pure metal bands.
* Well the only reason they retreated was because they were trying to save Ace, not destroy the Marines. One Ace died, the pirates had no more reason to be there
* well... The problem is that the fae race has only so many souls to go around, and nothing can be done to increase that number. That's why a fae has to die before a new one can be born — the dying fae's soul is reincarnated in the newborn fae.
* Well, there is some philosophy in that game... it's just a simple "If you believe in your philosophy, bash the other guy who doesn't agree with you."
* Well, there's a reason why it's one of the worst endings. And Dana seems to be at least subconsciously aware of the connection on some level and is bothered by it.
* Well, there's the fact that he likes to have little kids sit in his lap while holding them close, and there's no shortage of reports of pedophile Santas or Easter Bunnies.
* Well There's Your Problem by having the hosts apply layman's terms to things that are already fairly graspable to everyone.
* Well There's Your Problem covers these for their Patreon-only bonus episodes, instead of the public works projects covered by their main episodes. The tone of these episodes tend to be significantly lighter than the regular ones, since DIY projects usually don't come with two-digit bodycounts or perpetuate systemic injustice.
* Well There's Your Problem episode on the Texas City Disaster, the crew begin talking about how the Disaster was caused by an insecure loading dock for Ammonium Nitrate. Alice jokes about how having a Muslim talk openly about explosives is probably going to get her visited by some intelligence agency or another and starts going "LA LA LA!" whenever Justin or Liam talk about where to find Ammonium Nitrate and how it can potentially go from fertilizer form to potentially becoming explosive.
* Well There's Your Problem: Justin and Liam are former roommates and college friends, and can and will frequently bicker about their respective families and personal lives on-air or bring up bizarre stories of trips and experiences they've shared together (often involving alcohol, trains, tourist traps and American football). Alice brought up their tendency to bicker like an old married couple on their first liveshow.
* Well There's Your Problem section), which the hosts also note was an undocumented feature that the pilots couldn't switch off without disabling large parts of the plane's navigation system.
* Well There's Your Problem whenever a Cool But Inefficient option is brought up as an updated or preventative measure to whatever is currently being discussed.
* Well There's Your Problem: Whenever Justin says he'll take something out of the podcast, he obviously hasn't. The hosts commonly leave the show running even when one of them go to the bathroom, with the other two filling the dead air with banter, jokes, or reading (and making fun of) fan letters and comments.

* Well there was a reason for that. The voice recording was done in California, but the song recording was done in New York (and this was in the 80s when recording long distance was somewhat difficult) so rather than fly the actors back and forth they just used seperate actors and singers.
* Well, the Romans were allowed to compete in the Greek Olympics, but if the report has to be about ancient Rome, that does not help much.
* Well, the talk was about Barks-Rosa canon - most writers apart from Rosa set the stories in pseudo-present day, in any case. If Duck-stories in general are a subject, then Gyro can do anything that the current writer wants from him.
* Well the Tau Empire's version (essentially travelling in a boundary region between Hyperspace and Normal Space) might be one example. It's actually safer and more reliable but very slow.

* Well, they didn't so much add them as bring them from the first game,
* Well, they DID start to shred stuff, but only when it was way too late for them. A lot of that shredded material is still being sorted out today. Upon the approach of the Red Army, the Nazis started destroying and demolishing various concentration camps and extermination camps. They completely destroyed Treblinka, Sobibor and others, and tried to demolish some of the surviving camps before it was too late. There is only one extermination camp that is nearly completely preserved, and that is Majdanek. The reason for its preservation? It was the first camp to be liberated. This is the mundane reason why estimates for
* Well, they don't HAVE to, and the brutality of their methods backfires as often as it helps. Other races, notably the Tau and the human splinters Horus dealt with before his corruption, have much greater success fighting chaos with more surgical (or at least less exterminatus- and mass brainwashing-based) methods, they just haven't caught on in the Empire because the climate of fear and absolutism is also necessary to keep the imperium in power.
* Well, they have the ribs, they'll just need to be reheated. So this is more like delayed gratification.
* ...well, they kept him in a dark pit-like compartment for a long. The coded words allow him to relive the experiences he had, but also cause him to relive the mental anguish of losing family members again.

* Well, with no God to tell people what NOT to do, no one ever had the idea of doing anything bad. No God, No Evil. But once the concept of "Evil" was brought in from the outside, with no fear of divine punishment for any crimes you commit, well, there's no reason NOT to do terrible things, up to and including senseless murder.
* Well World: Nathan Brazil and Mavra Chang go through some horrifying things, like the Holocaust or being temporarily deformed into bastardized farm animals, but they always return to normal in the end. It helps that surviving is their superpower, and everything BUT dying can happen to them.
* Well World novels by Jack Chalker are a sci-fi example, but also something of a subversion as the Well World is composed almost entirely of tessellated hexagons, the edges of which define not only the borders of the various "nations" but also the larger bodies of water.
* Well World novels, many of the Comworlds have taken this approach, artificially suppressing the onset of puberty in the majority of their populace.
* Well World' series averted this by having the master race achieve physical and technical Nirvana, and realize just how boring and static it was. With Ascension not being an option, they decided that since they had achieved perfection and still felt unfulfilled, they must have missed something on the way up. So they recreated the universe, using themselves as the fodder to create huge numbers of new species, so that hopefully one of them would discover the missing element on the rise back up.
* Well World series, the entire universe is actually a simulation running on a gigantic computer called the Well of Souls. Humanity figures out how to hack it to a minor degree and builds "Zinder Nullifiers" for use in a major intergalactic war,

weapons that basically reformat a large region of space into a default empty vacuum state. The war gets a bit heated, the Nullifiers are overused, and the Well World starts suffering a progressive memory fault that will eventually destroy the entire universe unless our intrepid heroes are able to get into the Well of Souls' control center to fix it.
* Well World) take place on an artificial planet divided into hexagonal territories. The creators of the Well World set up each hexagon to be home to a different prototype intelligent species, prior to transferring these new races to various uninhabited planets. Thus, each hexagon re-creates the environment to which the new-made species is intended to be moved, once it's been tested. As some of their intended destinations were lacking in metals or other materials needed for technological advancement, the hexagons where those planet's future inhabitants were tested had to be designed to prevent technology from working there: if the trial groups couldn't survive by low-tech methods, then they would need more tinkering before they could be shipped out to their new worlds.
* Well World: The titular world is spherical, but the surface and atmosphere are divided into hexagons, with a hundred-miles-tall band around the equator.

* "We Might Be Dead By Tomorrow" was originally released in 2012 by French singer Soko. Then, two years later, her recording was featured in a viral commercial for Wren, a womenswear brand based in Los Angeles. The buzz from the commercial caused the song to debut at #9 on the Billboard Hot 100. Unfortunately, it didn't translate to airplay or sales, so it became the first of only a handful of songs to ever drop off the Hot 100 from the top 10
* "Wem nutzt das schon" by German fun metal band JBO plays with this trope - although they DO find rhymes on assorted celebs they lament that those rhymes are pointless and unfitting.

* Wendy and Chelia do this with their Sky Dragon Slayer and Sky God Slayer magic, respectively. The main difference between their types of healing is that Chelia cannot restore stamina, but Wendy cannot
* Wendy and Hodges were going back and forth for a while, but Wendy left.
* Wendy, and only revealed her original ideas for the ending after she finally went back and tied up all the loose ends years later.
* Wendy (as in the mascot of Wendy's) is an 8-year-old girl who was portrayed by the adult MC Goldiloxx... and, despite being a little girl, still saw fit to use "old enough to be my daddies" as an insult against Ronald McDonald and the Burger King. Wendy also compares Ronald to a child abandoned in a Playplace; said "child" was played by the
* Wendy: At the end, Wendy's own daughter goes off with Peter to visit the island herself.
* Wendy: A version if this happens at the end, when after Mother is killed, at Wendy's urging both the children and Olds sing, inspiring them. This makes the volcano erupt, signaling she is revived.
* Wendy: Children living on the island can stay young forever if they believe in the Mother, a kind of guardian spirit. However, they're still capable of being injured or killed. The above causes some to lose faith, which ages them.
* Wendy does this when Ben tries to film their breakup in the pilot of
* Wendy for most of the story until her aunt decides that she doesn't want to adopt him and his twin sister after all, as they aren't as rich anymore. After that, he breaks up with Wendy to date his previous foster-sister Vanessa instead, while being implied to still live in her house. It's weird.
* Wendy however, doesn't suffer from transportation. Rather, She's weak to pickled plums.
* Wendy is consoling herself with ice cream from the carton because she just screwed up
* Wendy is sometimes interpreted as genderfluid due to her male "Wendyl" persona in "The Cissy." While it's implied to be a ruse to get into Cartman to share his trans-only bathroom and Wendy goes back to her old self in the following episodes, her casual attitude toward crossdressing, especially compared to Cartman's false "Erica" persona, made many fans assume Wendy might really want to transition.
* Wendy is the adopted daughter of the Sky Dragon, and therefore the Sky Dragon Slayer. She doesn't start out with many offensive abilities, but the ones she has (and gains over the series) fit this pretty well, creating twisters and razor winds to blast people away and enhance her physical strikes.
* Wendy it can't." [a lightning strikes them] "Okay, now...") while the other screams at her to stop saying it.
* Wendy lies seemingly dead after being mistaken for a bird and shot with an arrow by one of the Lost Boys. But the arrow turns out to have only pierced an acorn button she was wearing and presumably caused her to faint from fear.
* Wendy Mass' short story "The Stars at the Finish Line" averts this — the protagonist's academic rivalry with a girl he has a crush on has nabbed him excellent grades. When he mentions this to her close to the end of the story, she acts confused...then laughs and reveals that of course the rivalry was mutual; she was just messing with his head.
* Wendy Matthews' 1992 recording of "The Day You Went Away" is a classic of Australian pop. Few people know it was actually written and first recorded by an obscure British group, Soul Family Sensation.
* Wendy O. Koopa has a pink hairbow, a pink shell, makeup, jewelry and high heels. Interestingly, despite being the only female Koopaling, Wendy is one of only two Koopalings with no hair.

* Wendy Oldbag, and that she simply refuses to leave Edgeworth alone, despite the fact that he makes it clear he has zero interest. And, just to top the whole thing off, she's obscenely old and constantly talks down to people.
* Wendy Oldbag, meanwhile, is a security guard in a different venue every time she shows up. The first time it's justified — she snipes at Phoenix about how Global Studios fired her following the first game.
* Wendy Padbury" and her costume she wore was in part designed to, in her words, "hide the bump". Sadly, she miscarried soon after wrapping.
* Wendy: Peter runs away with Wendy's daughter just as she did beside him years before.
* Wendy picks up on Irene's ability to enchant other objects and people with her own magic to get out of a
* Wendy's commercial, which is called "Soviet Fashion Show." It takes place in a dimly lit auditorium with a lot of uniformed, unsmiling men in the audience. As a violin/balalaika band plays an off-the-wall version of Volga Boatmen chant, the MC reads out "Is next... Dayvear!" "Is next... Eveningvear!" The model is a large, plain woman in a utilitarian outfit with a babushka who strides briskly onto the stage — same outfit each time (Eveningvear has a flashlight, Svimvear has a beach ball). The idea is that at Wendy's you get to choose what to put on your hamburger.
* Wendy's hamburger chain is a drawing of a young redheaded girl with such pigtails (ostensibly a depiction of Dave Thomas' daughter, whom the chain is named after).
* Wendy. She hired a group of allegedly Iraqi thugs to get rid of a substitute teacher her desired love interest was attracted to...by
* Wendy's Kids Meal commercials that involve kids going through outer space end this way when segueing into whatever toys are promoted, with a Wendy's bag zooming in to fill the screen with black ("Back to Wendy's Kids Meal, and see what's inside!" *goes black*)
* Wendy territory is the fact that they're maybe ten years old at this point, and despite of the game's reputation it keeps things tasteful in this respect.
* Wendy Testaburger also qualifies. She may be often depicted as an intelligent and moral hero, but she can be just as sadistic and petty as Cartman. When she thought her substitute teacher liked Stan, Wendy had her launched into space for an unfortunate fate. On top of that, she once made fun of all the kids in "The Hobbit".
* Wendy Testaburger is mostly defined as Stan’s on and off girlfriend. While there’s a few episodes where she gets more screen-time ("Stupid Spoiled Whore Video Playset", "Breast Cancer Show Ever" and "The Hobbit") that shows her being more than just Stan’s girlfriend, her primary role in the show is to be Stan’s cute
* Wendy Vanessa instead, while implied to still live in her house. It's weird.
* Wendy: When a Lost Boy (or Girl) loses faith in the Mother, their youth is lost, causing them to age very quickly into old people.
* Wendy Williams woman because of her height, relatively manly features, and over the top wigs and makeup. However, despite all this, she is in fact a cis woman, and has a child, and had many miscarriages.
* We Need a Distraction. He approaches a gang of hoodlums hanging about the area and taunts them relentlessly, capping it off with a sarcastic "your mothers must be so proud", which is what finally provokes them into a fight.
* We Need to Get Proof: The heroes discover the bad guy is up to no good, but need to find a way for others to believe them.
* We Need to go Deeper is an indie game involving a submarine crew navigating a labyrinth of tunnels while fending off giant sharks and whales. Later updates to the game, however, have added increasingly Lovecraftian monsters.
* We Need to go Deeper is set in the Living Infinite, an abyss filled with aquatic monsters, every one of which will try to kill you on sight no matter how many your sub blasts throught.
* "We need to precisely insert a team of commandos deep behind enemy lines. To avoid German radar we'll have to fly low and fast, no more than 200 feet off the

deck. It will be dangerous and some of you may not survive the jump, so we need 20 men. Anyone who wishes to volunteer, take one step forward." A slim handful stepped forward, all Green Berets. The commander was disheartened until a grizzled sergeant whispered to him. "Parachutes will be provided!" he announced, and the rest stepped forward.
* We Need to Talk About Kevin: Book-only (the film seems to be set contemporaneously to its release in the 2010s, although it's not made clear.) The book was released in 2003 and Eva writes letters in 2000, but they primarily look back on Kevin's childhood and adolescence, starting in the mid-1980s through to the late 1990s.
* We Need to Talk About Kevin), his timing specifically so that he can't be sentenced as an adult, and will avoid life in prison.
* We Need to Talk about Kevin, in which the titular character claims his teacher made advances toward him. Though we only hear about the incident through an unreliable narrator, it is likely that nothing of the sort took place, and Kevin is just trying to get the teacher fired for the hell of it.
* We Need to Talk About Kevin. It seems at first that Franklin divorced Eva (in a flashback he told Eva he wants a divorce) and got custody of Celia after the massacre at the school (Kevin was imprisoned, so neither parent would get custody of him), and hasn't spoken to Eva in a long time. However, the truth is, as the nonlinear timeline shows, Kevin actually killed Franklin and Celia BEFORE the massacre at the school. That's why Franklin never answered Eva's calls as Eva was out witnessing the aftermath at the school.
* We Need to Talk About Kevin makes it even more difficult to form conclusions.
* We Need to Talk", Amethyst munches popcorn while watching Pearl mock a young Greg Universe for not knowing about Gem fusion.

Most of the Tyranid Codexes — combinations of backstory and rulebook — contain detached descriptions of Tyranid attacks that read like an encyclopedia entry based off an Apocalyptic Log as well.
* We never get to see his reaction when the two of them start dating five years later, as he's killed during the Uchiha Insurrection.
* we never get to see the remaining 200 — 18 were lost to the Orchids as reported by Jurati — Romulan warbirds fight it out with Starfleet's armada (which contains more or less the same number of starships) under Riker's command, since the Romulans decide to withdraw.
* We never got see this side of him due to being the first murder victim. However, he ended allowing himself to replay some killing games and with there being two methods to survive a killing game, there is a likely chance that he could have killed someone.
* We Never Learn: In chapter 102, just after Nariyuki sees Mafuyu in nothing but a towel, he tells her to take off her clothes which cause the latter to give him a seething look. He clarifies that he wants her to change her clothes.
* We Never Learn is a pretty decent student, scoring above 80 percent in all of his subjects, but he's not a match for Rizu in science and maths or Fumino in literature. On the other hand, he's much better than Rizu in literature and Fumino in science and maths, which allows him to tutor them in these subjects.
* We Never Learn is that each of the 5 heroines will get her own route, like in a

dating game. As the author says, all 5 of them are "main" heroines, so they deserve this treatment.
* We Never Learn: Rizu, Fumino, Uruka, Mafuyu, and Asumi all have roughly equal amounts of screentime and romantic development with Nariyuki, although the first three show a more obvious attraction.
* We Never Learn; this has the result of making the other two so uncomfortable, they run off without seeing Nariyuki or Kurisu's faces. Nariyuki and Kirusu don't actually kiss, though—-the angle makes it look like they are.
* we never see any female orcs. Tolkien himself didn't seem entirely sure. The films make this even worse, since Elrond claims they're a blend of standard orcs and "goblin-men" (which is ambiguous as to whether it's a hybrid or an unrelated creature), but the audience gets to see them apparently born from cocoons in the ground (a reference to an obscure early bit of Tolkien's guess as to where orcs came from).
* We never see a single Time Lady from their introduction as a race in "
* We never see him alive in the present, but his betrayal and attempted blackmail of Gustavia is what made him commit murder, kickstarting the events of the plot of the whole series, and his kidnapping of Dover's son is what causes the events of Investigations 2
* We never see Undertaker’s eyes. It looks like a character quirk, but in both the anime and the manga this is to hide something, although this example only has significant impact on the plot in the manga.
* Weng-Hai Lee, Majima barely avoids an acupuncture needle to the crotch when he tries to go for his dagger.
* Wen Kexing calls Chengling "little idiot". It starts as an insult then becomes a term of endearment.

* Wen Spencer. He tones down the orders shortly. An officer complains that they can not use IFF — Identification Friend or Foe — to recognize anyone, and Mikhail orders maintaining radio silence, which will keep anyone from finding them.
* Wen Spencer" is how much a family gets for selling their brother. Usually it's just a swap for another family's brother or a straight sale to a family for cash. The male ends up marrying all the women in the new family, unless they split it between older and younger sisters. However there is also the option of selling him to a "Crib" aka whorehouse, where he'll spend the rest of his life drugged to the eyeballs on fantasy world viagra impregnating women who can't afford to buy a husband.
* Wen Spencer, Jerin Whistler blushes profusely at thoughts of the Princess Ren, and especially at innuendo. He's blushy in general, once flushing after a bath is prepared for him because of the idea that strangers have paid that much attention to a place where he is to be naked.
* Wen Spencer, Lain tells of dreaming that Tinker had brought her a tengu to cure and been turned into a diamond and stolen by it. She warns Tinker of the danger.
* Wen Spencer, Mikhail concludes, after their crash landing, that they will have to bury the dead at sea: they cannot leave them about to rot where they must live. He finds it rather hard.

* Wen Spencer series Max Bennett runs the Bennett Detective Agency, which he created mostly to give him a justification to look for missing persons in memory of his dead wife. Ukiah is also a licensed PI, as is Bennett's later love interest Sam Killington.
* Wen Spencer, Turk and Paige get into a furious argument when Turk discovers that she is partly descended from genetic modified Reds and Blues; Turk himself is a Red, traumatized by his upbringing in a society where Reds are property.
* Wen Spencer, Windwolf mentions that most elves are this because their parents, if they actually have another child, do so only after the one before is fully grown.
* went after said bear alone; they're on top of a glacier, and Sitka drives his spear into the ice, causing a huge block of the glacier to break off and fall into the river below, taking the bear with him. Sitka dies but the bear survives, motivating Kenai to once again track the bear down and slay it in an act of revenge, which in turn invokes the wrath of the Great Spirits and kicks off the rest of the plot.
* went back in time, founded a civilization we encounter in "Common Descent"
* went behind their backs and endangered a peace march by Southern Water Tribe sympathizers, bankrupted Asami's company and seized control of it, then framed Mako. He backed Raiko during the first election, only for him to attack him months later. All that was part of his plan to start a war and make money off of it. Varrick later betrays Suyin Beifong by joining Kuvira, who went against the latter's wishes. After Varrick finds out how evil Kuvira really is, he's done betraying others altogether and pulls a Heel–Face Turn.
* went berserk and rode alone to the gates of Angband, where he challenged Morgoth himself, the most powerful being on Arda, to single combat (he got killed due to the vast power difference, but he did manage to fairly seriously wound Morgoth — the only non-Ainu to ever do so). Those who saw him pass said his eyes glowed then like the eyes of the Valar do.

* We Really Do Care: A character is about to leave until their friends tell them how much they are loved and want them to stay.
* We really don't build them the way the Romans used to. Almost all of the buildings in the ancient Roman city of Ostia Antica are over a thousand years old; most of them closer to two thousand years old. It's still safe to wander up to the

top of millennia-old blocks of flats to look at the cityscape, while in Rome it's completely fine to walk through the forum and around the buildings that have survived centuries of conquest, city expansion and military squabbling. Pompeii and Herculaneum are similar examples, although they did have the advantage of being buried for most of that time. And some Roman roads are still in use today.

* were being human-looking, but there was still an element of "save frakloads of money on having to make CGI robots for every episode". Indeed, this trope took place in the very planning stages; the Cylons were redesigned as human-looking because the creators counted that they could only afford one Cylon suit good enough to convince modern audiences, while CGI was still too expensive to rely on

constantly. However, as the miniseries was past and it was time to start filming the main series, the CGI prices had fallen significantly, and they managed to squeeze in more Centurions than they had initially thought possible.
* Were Betty and James actually together together when James hooked up with "August"? Or was it a miscommunication? Perhaps James didn't think they were in a committed relationship while Betty did so in his mind, it wasn't cheating. Either way, it's never made clear.

* "We're Captured", this happens when the heroes concede defeat and fly off into the sky at the end of the episode.
* Were Carter and Shayera really the reincarnations of those ancient Thanagarians or did Carter fry his brain with a piece of malfunctioning alien tech?
* were conquered by, who genetically engineered the survivors of various colony planets into whatever forms pleased. Many were experimental, some seemed to be art, some transmogrified into grotesque form as punishment for their perceived crimes. The results were tremendously varied, including titanic elephant-like creatures, bat- and pterosaur-like fliers, various aquatic strains, ferocious predators and tick-like parasites. Many of these post-humans died out after the departure of the Qu, but others survived to form complex ecologies. Some of these post-humans would eventually lose sapience, some had it genetically engineered away but they eventually re-evolved sapience.
* were crazy enough to make titans and despite the impracticality of it, their effectiveness were unparalleled. This led to the development of the Riptide, Stormsurge, and titan-esque Ta'unar Supremecy Armors
* Were-creatures, are Hircine's servants. They can be said to embody his view of the Hunt, as during the day they are Hunted, but at night they are Hunters.
* were-creatures at nightfall, with the exact frequency varying depending on the particular strain of the disease. They are overcome with an intense bloodlust and typically must hunt and kill at least one sentient being while transformed. If they fail to do so, they will return to their original form in an extremely weakened state.
* Were-creatures to appoint a pack leader, thus serving as a advisor and an important figure among Lycanthropes.
* Weredragon: A human character who can turn into a dragon, or vice versa.
* Were Dragon. Any partner of hers that is not nearly as long-lived would have to accept her looking like that if they want to marry and have children within their lifetime, and the game does bring it up when Nah, her daughter, wonders what her dad saw in Nowi for her to be the result.

Samantha and Katie are exempt because of the amulets that specifically suppress the were-mind and leave the normal mind in control, to the extent that they never developed separate minds in the first place (though Katie transformed once or twice without the amulet, all examples of multiple-personalities were developed over multiple and/or long-lasting transformations).
* were standardised when they were formed, it wasn't unusual for them to return home looking vastly different from even other members of the same unit. Admittedly, this was because not all of their uniforms would be from the same supplier using the same batch of dye on the exact same kind of fabric, and so would not necessarily react in the same manner to weather conditions (rain, sun, etc.). A battalion of "redcoats" might end up marching back to barracks after a campaign with some members in pink coats, and some whose jackets were almost brown.

* We're the Millers (roughly $80 American). David rounds it up to an even 100 and proceeds without issue.
* We're the Millers: The American tourists the Millers can't seem to get away from are having marital problems.
* We're the Millers, the Millers find a bunch of illegal immigrants hiding under their RV. They run away when they are discovered.
* We're the Millers, the protagonists end up in witness protection, still posing as a family.
* We're the Millers. When she finds out that she's now expected to have sex with the customers, she's excited about it.
* We're the Millers, where a drug dealer decides that the best way to smuggle marijuana across the US-Mexican border is to hire a female stripper, a neighbor's geeky son, and a runaway teenage girl to act as a wholesome, all-American nuclear family who would never dream about doing anything illegal.
* Were the numerous Hmong Americans who died in their sleep for no apparent reason killed by evil spirits known as Dab Tsog, or by cases of sleep paralysis made deadly by factors related to their flight from Laos and life in the United States?

* Were the World Mine Jonathon, the captain of his school's rugby team.
* Were the World Mine. Overall, the fairies depicted are very sympathetic, but there is definite selfishness and laughing at the trouble being caused to mundane people going on.
* were they mocking the neighbours by mimicking them similarly to the neighbours (Lori, for instance, claimed that ice cream would make her sluggish, which is what Jancey Yates said).
* were to be brought into a violent frenzy when in the presence of sexual pheromones they would require separate pheromones for each individual species and would be just as likely to attack each other as humans, as any other species would be as much of a threat/competition as the people would.

* We're told that the Targaryens often married brother and sister to keep their

bloodline pure over their 300-year reign, with an inference that they'd been doing it prior to Aegon's conquest, as well. In reality, severe mental and physical debilitation would result from this level of inbreeding (Charles II of Spain is a good historical example of the result). Instead, the Targaryens are physically flawless and only suffer from occasional instances of madness. It's implied that there's more than a little magic in their bloodline, which might be a mitigating factor.
* were), ultimately deciding that they probably aren't and that they need to find a way out.
* were), who had been picked out of a line-up by an eyewitness. He turns out to be innocent (mistaken identity), and spends most of the episode understandably stressed out and angry at being a suspect at all, but Friday & Gannon never move from their professional yet sympathetic stance.
* werewolf, and later vampire/undead writer P. Onnoval, with a climax at the end of each book. The stories are a combination of horror clichés like vampires, werewolves, etc. and a great deal of suspense and most stories leave the end open, leaving you to wonder what happened.

* Werewolf by Night fought were big dumb monsters out to smash stuff and hurt people.
* Werewolf by Night, Jack suspects that Philip Russell is responsible for his mother's death.
* Werewolf by Night likes the occasional beer, but it becomes clear how miserable and depressed he is in volume 2 (1998) when he is rarely seen without a bottle of whiskey. His girlfriend has asked him many times to stop drinking, but that doesn't stop him from having a bottle in hand even when behind the wheel of a car.
* Werewolf by Night tends to break his shirt basically every time he transforms and we often see him just after turning back. In the dark age he sometimes just didn't bother with a shirt, although he had a leather jacket.
* Werewolf by Night: The Hangman, another Marvel Universe vigilante, would murder male evildoers but imprison female ones to 'protect them from corruption'. Unfortunately, he had a nasty habit of forgetting about them, leaving them without food or water...

* Werewolf. His frustrated employer grouses that he's going to have to hire a bounty hunter to locate his bounty hunter.
* werewolf knights. Generally, they're Crusaders who use their lycanthropic skills on the battlefield but end up losing their human sides after they return home. Some scholars believe these stories are metaphors for what war does to soldiers.
* "We'rewolf". Loud, rude, downright crude at times, but fun and surprisingly reflective at others. It helps that the video features the band being victimized by

* Werewolf — a good vigilante can singlehandedly win the game for town, and a bad one can just as easily doom them.
* "Werewolf Mission: Chainpossible" is one for Chain, revolving around her taking on a dangerous mission in the Werewolf Agency.
* Werewolf of London (1935), the earliest extant werewolf feature film (some silent werewolf films existed, but are now lost), introduced the moon/werewolf connection and the contagion meme. Not only does the full moon cause the infected to transform, but the only antidote for the transformation (the "mariphasa") is a fictional flower which only blooms under moonlight.
* Werewolf, Pearl attempts to create her own werewolf, only for Bobo to turn up with an adorable dog because it's apparently quite hard to buy a wolf after midnight. While Pearl and Brain Guy are unaffected, Bobo ends up cuddling and baby-talking to it.

* Werewolf stories often have a Menstrual Menace, due to the days in a lunar cycle and a menstrual cycle.
* werewolf. The above-mentioned episode also focused heavily on Buffy/Angel and Willow/Oz to focus on different possibilities and aspects of this trope.
* Werewolf, the announcer simply says to perform the other role's night action at that point.
* Werewolf: The Apocalypse, 2nd and 3rd editions. "When Will You Rage?" for all editions.
* Werewolf: The Apocalypse absolutely loves its cultural stereotypes, it played these connections up heavily. Later material (3rd edition and onwards) reversed course on the idea, however, because the idea of Mafia werewolves was, to quote the developer, a bit of a one-note joke.
* Werewolf: The Apocalypse (a game about monsters battling damage to the environment) is Central Park!
* Werewolf: The Apocalypse. Albrecht is pleased to note that his is bigger.
* Werewolf: The Apocalypse also did the whole "be so bad you are remembered genetically" thing. In their case, any normal human starts panicking horribly when they see a werewolf's war form, and is unable to remember what happened afterwards.
* Werewolf: The Apocalypse also has heavy elements of this, as a good number of werewolves in the game are Lupus (wolf-born). While each tribe has a certain amount of Lupus in it, the Red Talons are almost exclusively Lupus, with no human members; as such, their tribe book is written from the perspective of a wolf who regards strictly human constructs with uncertainty (and a heaping pile of scorn).
* Werewolf: The Apocalypse. Among other uses, it lets them find out what killed the poor sap. Allegedly, this is an acquired taste.
* Werewolf: The Apocalypse and have even managed to free an aspect of Bat from the Wyrm's grip... but the Camazotz are still dead.
* Werewolf: The Apocalypse and so they are the tribe most frequently banned from being a player option, as their fluff is typically used as an excuse to be highly disruptive to the party.
* Werewolf: The Apocalypse, and the employees are all unflattering parodies of real White Wolf writers, including the writers of the supplement itself.
* Werewolf: The Apocalypse as bad, but their initiation rites are deliberately designed to leave you badly scarred.
* Werewolf: The Apocalypse) as tall, long-haired, very muscular, and wears dominatrix outfits that show a lot of skin.
* Werewolf: The Apocalypse : A twist on the classic werewolf myth, wherein the titular monsters are actually Holy Warriors of Mother Earth fighting to make the world a kinder and gentler place.

* Werewolf: The Apocalypse because they try to avoid taking said form if at all possible. Corax ideally are infiltrators, spies, and other support roles for the more violence-capable Fera.
* Werewolf: The Apocalypse, children by its standards, that are still old as time itself.
* Werewolf: The Apocalypse core rulebook, there is a picture of a werewolf from the Silver Fang
("Серебряные
клыки" in Russian) tribe over the Cathedral of Vasily Blazhenny, titled:
"СЕРЕБРЯНЫЦ
КЛЫКЦ". This has become a meme among Russian WtA fans. Perhaps compounded by the fact that the werewolf in question appears to be the signature character King Albrecht; while the Silver Fangs as a tribe are associated with Russia, Albrecht himself is thoroughly American (and, to top things off, once called a Russian Silver Fang he didn't like a "commie bastard").
* Werewolf: The Apocalypse corrupts a character's body and mind if left untreated. Gaia factions have rites for cleansing mild Wyrm taint, but severe Wyrm taint may necessitate an ordeal in Erebus.
* Werewolf: The Apocalypse could break into swarms of normal-sized spiders (called the Crawlerling form). If a single spider from the swarm survived, it could eventually hunt enough to increase its mass to the point that it could resume human form. (Unfortunately, the Ananasi in such a situation would probably lose almost his entire memory...)
* Werewolf: The Apocalypse describe Brennus, the last White Howler chieftain. After his warriors fell in battle, he was probably the last White Howler left in Caledonia. Black Spiral Dancers later captured and beheaded him.
* Werewolf: The Apocalypse don't have a whole lot of motive for what they do. When there is a motive, it seems to be rooted in profit or validation built off the idea that someone, somewhere else, is suffering, or that it doesn't matter that your actions make the world a worse place as long as you get something out of it. A fair amount of the Pentex book is scary not because of the malevolence on display, but because most of it seems to have no motive at all beyond "yay Wyrm".
* Werewolf: The Apocalypse ended with societal collapse and significant global body counts.
* Werewolf: The Apocalypse, every shapechanger hates vampires to one level or another. However for the Silent Strider tribe of werewolves, their history includes an ancient ungodly powerful vampire who placed a curse on them, banishing them from their homeland of Egypt. Since that time, they've nurtured a burning hatred of all things bloodsucking.
* Werewolf: The Apocalypse featured one tribe, the Get of Fenris, who were descended from Nordic stock, and conflated Norse mythology with the Garou's animistic view of the world. Artifacts of the tribe included the Jarlhammers, seven unique and immensely powerful "fetishes" (imbued items or weapons). There were also non-unique "Lesser Jarlhammers".
* Werewolf: The Apocalypse features an evil, polluting corporation as the main villain. The lesson is supposed to be that Corporations are Evil, but because of the logic of power creep and the need to have everything relate to the spirit world, the lesson ends up as, "companies which cavort with demonic entities are evil". Which... um, yeah. The environmental themes end up as irrelevant window dressing.
* Werewolf: The Apocalypse features several groups that fit this trope.
* Werewolf: The Apocalypse for you, sorry! Also, you're a huge disappointment to your werewolf relatives— useful only as breeding stock and the driver of the getaway car.
* Werewolf: The Apocalypse fully, they can enter a state called "Thrall of the Wyrm," just like a normal frenzy, except that it's inescapable, and tends to provoke rather horrific behavior (typically either cannibalism, rabid dismemberment, or... erm... defilement).

* Werewolf: The Apocalypse Garou. The game itself doesn't explain what they do if they want to integrate with human society, it's just taken for granted that the other werewolves and their kinfolk (humans born with the gene recessive) forge identities for them, and possibly teach them reading and other basic skills.
* Werewolf: The Apocalypse gives the Children of Gaia (the most pacifistic of the various Tribes) the Gifts Calm (which allows them to slowly prune away an opponent's Rage, or possibly bring them out of frenzy) and Dazzle (which freezes an opponent in place by giving them a vision of the true beauty of Gaia).
* Werewolf: The Apocalypse gives the Ragabash (sneaky, trickster werewolves) the Thieving Talons of the Magpie Gift, which allows them to temporarily copy any supernatural power they witness.
* Werewolf: The Apocalypse gives us Pentex, a corporate empire in league with the Wyrm, the cosmic forces of corruption. One of their less-public slogans is "The cost of the fine is always less than the cost of compliance". They're also quite willing to engage in bribery, lobbyism, and/or just hiring some guns to go take care of any pesky rules that can't take a hint.
* Werewolf: The Apocalypse has adapted to modern times and learned to use their spirit magic to talk to the spirits of machinery and urban landscapes.
* Werewolf: The Apocalypse has Gifts, magical abilities one can learn from various spirits of nature. Animal Attraction causes a flood of pheromones to act as a very powerful aphrodisiac. Persuasion is used to give credence or imbue greater meaning when persuading someone. Depending on your Storyteller, Persuasion can be used to convince someone to do anything.
* Werewolf: The Apocalypse has Grammaw, a colossal Thunderwyrm revered as a goddess by Black Spiral Dancers. Grammaw nests underneath a nuclear testing site in New Mexico and serves as a living caern for the Trinity Hive. Grammaw exists simultaneously in the physical world and Umbra, houses elemental spirits throughout her body, induces terrifying visions and disfigurements in those passing through her system, and can even grant rebirth to Garou she deems worthy.
* Werewolf: The Apocalypse has the Cyberrealm, which is pretty much the same as the Digital Web except the latter is exclusive to Mages, whereas Cyberrealm is a playground for Glass Walkers and other tech-savvy Werewolves.
* Werewolf: The Apocalypse has the Rokea, the weresharks. The Garou serve as Gaia's warriors on land, and the Rokea serve as her warriors at sea. Only since most of them spend all their time away from humanity, they seem a little... off.
* Werewolf: The Apocalypse has the Silver Fangs, the "ruling tribe" of werewolves. Their tribal weakness is a tendency towards mental illness, a trait that has been ascribed to everything from a punishment laid down by Luna to inbreeding with the royal houses of Europe.
* Werewolf: The Apocalypse has the Thunderwyrms, gigantic beasts that travel under the earth and are drawn above the surface by storms (hence the name). It's believed they were born of irradiated soil, a belief backed up by the fact that the largest Thunderwyrm (big enough to host a Caern inside it) nests under the soil of the Trinity test site.
* Werewolf: The Apocalypse has this trope as the pillar of its cosmology. The universal forces of Chaos, Order and Entropy exist and have something resembling a personality, called the Wyld, the Weaver and the Wyrm, respectively. Werewolves' entire lives revolve around the conflict between these three forces, specifically being rather friendly with the Wyld, wary or antagonistic to the Weaver and VEEEEEERY antagonistic to the Wyrm.
* Werewolf: The Apocalypse has two versions. Erebus is "Hell as punishment," a realm of molten silver where werebeasts who have committed some terrible sin can find redemption by spending years having their transgressions literally boiled away. Malfeas is "Hell as demon realm," the home of the Wyrm and a realm of burning green hellfire, where the embodiments of vice serve their twisted master and both innocent slaves and corrupted servants are exposed to the terrible majesty of the incarnation of all corruption.
* Werewolf: The Apocalypse have a deformity; his is that, no matter what form he takes, his face is still human. This makes him unnerving in some forms and a

downright monstrosity in his wolf form.
* Werewolf: The Apocalypse have legends about Christ himself, stating that he warped the very nature of the Umbra around him—suggesting that whatever he was, he was the "real deal", and not just one of the supernatural types roaming about.
* Werewolf: The Apocalypse have this as one of their racial flaws. Their other flaw being an allergy to gold, this doesn't usually work out too well for them.
* Werewolf The Apocalypse - Heart of Gaia, thus avoiding using any of the main tribes in the game.
* Werewolf: The Apocalypse. Her little form of Wyrm-touched madness was an inability to control the volume of her voice, making the MOST MUNDANE ANNOUNCEMENTS sound like fevered ranting.
* Werewolf: The Apocalypse, historical Get of Fenris attacks on caerns have soured relationships with the septs that oversee those caerns. Get of Fenris are banned outright from the Black Furies' Miria caern, frequently unable to open moon bridges to the Silent Strider's Wheel of Ptah caern, and on unfriendly terms with the Fianna sept that controls the Tri-Spiral caern. For this reason, Get can encounter problems when trying to travel around the world via moon bridges.
* Werewolf: The Apocalypse. In fact, nuclear fallout is regarded as somewhat holy by the Black Spiral Dancers (werewolves who fell to the Wyrm); one of their greatest sacred sites is a hive under the Trinity test site.
* Werewolf: The Apocalypse. Instead of fighting Grandmother, the corrupted Silent Striders attack the Garou Nation.
* Werewolf: The Apocalypse, in that it is about the cosmic struggle of Order, Chaos, and Corruption.
* Werewolf: The Apocalypse: In the Time of Judgment scenario in which the Wyrm is released from confinement in the Weaver's web, the Weaver and Wyrm become sane again, and the cosmos is restored to balance. However, virtually all the changing breeds have been killed and the human race has been hurled back into the stone age.
* Werewolf: The Apocalypse, Lady Yul's Malfean abode is a multicolored sea of toxins
* Werewolf: The Apocalypse leaves it up to the storyteller whether White-Eyes-ikthya serves the Wyrm or is actually an Uktena deep cover agent.
* Werewolf: The Apocalypse lore states that the Weaver, the Wyrm and the Wyld worked in harmony at one point until the Weaver ensnared the Wyrm and the latter went mad and hellbent on destroying the world from within.
* Werewolf: The Apocalypse, making the Garou's savage tactics understandable.
* Werewolf: The Apocalypse male Black Furies, however; Metis (deformed children of werewolf-werewolf matings) born to Black Fury mothers are accepted into the tribe regardless of their gender.
* Werewolf: The Apocalypse may also revere her in one guise or another, often naming her as Stasis; certainly the Weaver's supposed goal of unending perfection mirrors the Technocratic goal of a static reality.
* Werewolf: The Apocalypse — though losing a lot will change their appearance and personality. Regular Ananasi are sinister and emotionless, but the Kumo of East Asia are sadistic, insane, and evil.
* Werewolf: The Apocalypse, meanwhile, has the Mists, a side effect of widespread Banality where any observation of fae magic will usually slip out of a mortal witness's mind by the end of the scene.
* Werewolf: The Apocalypse. Meanwhile, their minions are inflicting untold suffering on the world. The Gaia-aligned factions trying to stop the Weaver and Wyrm are often depicted as short-sighted, bigoted, bloodthirsty, and in the case of the Ananasi, outright sociopathic, making it difficult at times to root for them.
* Werewolf: The Apocalypse, most metis experience this from homid and lupus Garou. Metis may simply be disliked, expected to work harder for status, or in the case of the most warlike tribes, abused and neglected by their fellow Garou.
* Werewolf: The Apocalypse, naturally, their plot hook involved finally snapping at human misogyny, real and perceived, and rising up en-masse to massacre human males with the intent of reducing them to a small minority and thus allowing women to

become the socially dominant sex.
* Werewolf: The Apocalypse No-one's ever come out the other side sane.
* Werewolf: The Apocalypse. Nowadays it's a force of subtle corruption and despair, an army of not-at-all-subtle mutants and sadistic monsters, and a spiritual energy fed and strengthened by every atrocity and act of abuse in the world. Its spirits animate countless tainted objects and places all over the Earth. Every emotion of hate, and every act of destruction and abuse a person commits, slightly erodes their soul and makes them more open to the Urge Wyrms, who push them further towards their master. Werewolves who ally with the Wyrm (willingly or not) become sadistic, insane, mutated, fucked-up Black Spiral Dancers.
* Werewolf: The Apocalypse NPC that the Lupus was raised by wolves when he shows a distinct indifference to conventional standards of politeness. Or hygiene. The degrees to which Lupus Garou assimilate human customs and language varies with the individual. Red Talons, a human-hating all-Lupus tribe, are generally the least knowledgeable about humans and prefer to stay that way. The other tribes all include both Lupus and Homid Garou.
* Werewolf: The Apocalypse, one of the rules that all werewolf clans are supposed to follow is not eating humans. This is explained as being partially because it's dangerously close to cannibalism (all werewolves have a werewolf as one parent and either a human or a wolf as the other), but mostly because with all the preservatives we eat, we're just not very healthy for them. One clan (consisting only of werewolves with a wolf parent) breaks this rule whenever they can, but this has more to do with their inherent misanthropy than anything else.
* Werewolf: The Apocalypse, one of the setting ending scenarios has the Wyrm having become so powerful that only its own weapons can even hurt it.
* Werewolf: the Apocalypse: one of the suggested Second Edition play styles was actually called "Superheroes," and explains in some details how easy it is to fit the Garou into a (dark) superhero-style setting.
* Werewolf: The Apocalypse outcasts, the werelizard variety are always stillborn and become evil, twisted spirits.
* Werewolf: The Apocalypse promised this end from the word go, and to its credit, most of the end-game scenarios defaulted to it.
* Werewolf: The Apocalypse provide information on Wyrmish theology and the elaborate pantheon of totem spirits, Urge Wyrms, Elemental Wyrms, and their Maeljin Incarna.
* Werewolf: The Apocalypse→animal). The Moloke werelizards' warform, however, isn't a generic human/crocodile mix, but a customizable chimera of various contemporary, prehistoric or not-at-all-historic scaled monstrosities. The chapter detailing the rules might as well be titled "Kaiju Creation For Dummies".
* Werewolf: The Apocalypse revere radiation. Nuclear explosions are sacred to Furmas, the elemental Wyrm of Balefire. The balefire burning in Black Spiral Dancer caverns is radioactive, producing mutations in some of the werewolves who reside therein.
* Werewolf The Apocalypse, several Time of Judgment scenarios show how fatal flaws undermined the various shape-changers.
* Werewolf: The Apocalypse slaughtered the Camazotz was the werebats' use of human blood in magic, which the Garou didn't understand wasn't a corrupt art. Combined with the Camazotz' demonic appearance and status as spies, the Garou sent the werebats into extinction. Which is heavily responsible for the totem Bat falling to corruption of the Wyrm.
* Werewolf: The Apocalypse, some Silver Fangs hide their metis offspring at home in order to avoid public dishonor. Metis sheltered this way tend to be socially maladjusted.
* Werewolf: The Apocalypse. Some Silver Fangs, like High King Jonas Albrecht, are the shining lights of the Garou Nation; others are so deluded or egotistical that some of the other tribes are considering a coup.
* Werewolf: The Apocalypse, so that your customers can act as receptive hosts; watch as the possessed customers mutate and degrade into hideous monsters; claim profits and soldiers.

* Werewolf: The Apocalypse, so two werewolves may freely have sex; the result is an unusually powerful wolf-blooded. Any wolf-blooded has the potential to go through First Change; the offspring of two werewolves is even more likely to do so.
* Werewolf: The Apocalypse sourcebooks open up an even wider range of shapeshifters.
* Werewolf: The Apocalypse specifically observed that the Technocracy's Men In Black are not allied with the Weaver drones, and may actually be at war with them.
* Werewolf: the Apocalypse story collection had a short story featuring a redeemed Black Spiral Dancer gone ronin.
* Werewolf: The Apocalypse supplements that mentioned the Seventh Generation, a conspiracy of child molesters and serial killers, and which explicitly included priests (as well as politicians and business leaders) among its members.
* Werewolf: The Apocalypse supplement The Book of the Wyrm gave us the Umbraphone, a mobile phone which can call up spirits across the Gauntlet (the spiritual barrier separating the real world and the Umbra).
* Werewolf: The Apocalypse, the Black Spiral Dancers lure the Get of Fenris deep into subterranean tunnels by retreating from combat. Instead of recognizing the obvious trap, the Get pursue their prey deep into the earth, where they fall to the Wyrm.
* Werewolf: The Apocalypse, the Corax wereravens (and to a lesser extent, the Bone Gnawer Garou) serve as this to other supernatural beings.
* Werewolf: The Apocalypse: The Garou are nature's warriors, and some of the tribes are brutal social Darwinists.
* Werewolf: The Apocalypse the Garou player characters often have to fight neverending hordes of banes (especially scrags), along with the heaps of fomori and Black Spiral Dancers.
* Werewolf: The Apocalypse, the long-dead Apis shifters served as Gaia's matchmakers. One power of theirs let them see the red threads that bound people with a common destiny - though they couldn't tell whether it would be good or bad.
* Werewolf: The Apocalypse, the Malfean abode of Empress Aliara is a magnificent castle filled with pleasures and addictions. Unfortunately, her realm offers only insatiable longing, never fulfillment. Heady perfumes and incense merely cover up the odor of rot, and the realm's servants are actually slaves who cannot leave.
* Werewolf: The Apocalypse, the Nuwisha (werecoyotes) are depicted as hilarious tricksters, but your mileage may vary as to whether they're funny or just annoying.
* Werewolf: The Apocalypse, there is a Gift the Bone Gnawer tribe have called Cooking. It allows the Bone Gnawer to turn anything into bland but nutritious food. Anything.
* Werewolf: The Apocalypse, there is a werewolf tribe named after the Wendigo who worship the cannibal spirit as their tribal patron. Powerful members of the tribe can summon an avatar of the Wendigo to track down and devour their enemies.
* Werewolf: The Apocalypse: The Uktena make a trade of this; one of their camps, the Bane Tenders, possesses secretive rites that allow them to seal away Banes too powerful to kill, so that they can't get out and wreak havoc on the world.
* Werewolf: The Apocalypse, the Wyrm isn't choosy about those he recruits into his ranks. Corrupted shapeshifters, spirits, and humans of all backgrounds are welcome.
* Werewolf: The Apocalypse, the Wyrm, strangely, has a point. The other aspects (creation and stasis) broke the balance first, it's just trying to bring things back to the original intended balance by covering their roles itself... poorly, because it's Destruction (also Corruption, but only because of said broken balance), but still.
* Werewolf: The Apocalypse they are hopelessly outmatched and cannot win, and most don't believe there'll ever be a recovery after the Apocalypse. But they are determined to die with honor and dignity, resisting to the last.
* Werewolf: The Apocalypse think this whole "Apocalypse" thing means they can put their secret plan to rule over the shattered remnants of humanity as a corporate dystopia into action. And then there are the small, misguided Garou camps who think that the best way to ease the suffering of the world and end the spread of the Wyrm is to just get the Apocalypse going already.

* Werewolf: The Apocalypse to pass themselves off as fully human, but generally, even other fomori find them creepy as hell.
* Werewolf: The Apocalypse used high-grade protective suits to survive in a lake of liquid silver (a place in the Umbra, usually used as "cure-or-kill" treatment for badly corrupted individuals, where they were sent as punishment). This was one of their many bright ideas. There are also various Gifts that allow Garou to soak damage from silver.
* Werewolf: The Apocalypse werewolves and most other werebeasts are actually hereditary rather than contagious. But were-ravens and ratkin both transform normal humans (or animals) rather than breeding. Ravens by creating a "spirit egg" that they bond to a child or fledgling, ratkin using a rite that usually kills the prospective ratkin.
* Werewolf: The Apocalypse: Werewolves call vampires "leeches," and the vampires (among others) call the werewolves "dogs". The werewolves also have Fantastic Slurs for each other — "apes" and "monkeys" for those with human parents, "ferals" for those with wolf parents, and "mules" for those whose parents are both werewolves, and who are therefore sterile.
* Werewolf: The Apocalypse, Werewolves can go into a state of deep spiritual sadness called Harano. However, overcoming it provides the Werewolf with permanent Willpower.
* Werewolf: The Apocalypse: When taken as a whole, it appears the War of Rage in the backstory is one. Each group of Fera has its own theory as to how it happened (such as the Gurahl refusing to teach their most potent healing gifts, the Nagah assassinating the wrong Garou, or the Nuwisha playing a prank that went off the rails), and much like World War I, it seems that they all combined together to push all of them into an all-out war that weakened each group.
* Werewolf: The Apocalypse, where werewolves are at worse indifferent to vampires.
* Werewolf: The Apocalypse, which allows its possessor to turn any old trash into mush that is perfectly sustaining but looks and tastes like "warm, wet cardboard." Granted, the Gift belongs to the Bone Gnawers, a tribe composed mostly of homeless and vagrants.
* Werewolf: The Apocalypse, who find it more effective to just start tossing spells.
* Werewolf: The Apocalypse, who think being tougher than everyone else is the only worthwhile goal in life.
* Werewolf: The Apocalypse with Pentex subsidiary Black Dog Game Factory. In "Subsidiaries: A Guide to Pentex", they extended the parody to the rest of the tabletop RPG industry at the time.
* Werewolf: The Apocalypse), with some thinking that the biggest collective mistake made by shapeshifters was allowing humans to develop past the Stone Age.
* Werewolf: The Apocalypse, wolves — or breed twisted, sterile mutants.)
* Werewolf: The Forsaken also has an element of this. What's that? You're just an ordinary person being stalked by werewolves, spirits and ghosts? No, you are a werewolf, and you always were one since birth - it's just been dormant. (The bite is so that they can track you down after you go through your violent First Change - it's not infectious, and the Change proceeds with or without the bite. A panic-stricken person post-Change might not realize this or be in the mood to listen to the explanation, so consumed with fear over being a monster.)
* Werewolf: The Forsaken, among the adherents of the Temple of Apollo. When on their Sacred Hunt, if the target has trespassed in one of their holy places and once the adherent uses enough abilities towards their prey, Apollo's power pours through the werewolf. Light spills from their mouth and eyes, granting them a number extra advantages and lighting up the area.
* Werewolf: The Forsaken. As in the previous game, these werewolves are dreamspeaking, spirit-walking shaman types who police the border between the realms and keep spirits from setting up camp in the physical world, for the good of all. This game is called "The Forsaken" because the werewolves, called Uratha, are actually outcasts among their own kind, persecuted by other werewolf tribes as part of a blood feud dating to the beginning of the world. Werewolfery is hereditary,

almost all werewolves growing up believing themselves human. Shacking up with your fellow werewolf is still a no-no and the result is a scary creature indeed. In all White Wolf games, silver is the big Kryptonite factor for werewolves. A few magical spells in "The Forsaken" use wolfsbane to rob the Uratha of their shapeshifting power for a time.
* Werewolf: The Forsaken as long as they witness the power on multiple occasions and make the right expenditures of Willpower.
* Werewolf: The Forsaken believe the Material World and the Spirit World used to be one, until the death of their great ancestor Father Wolf tore it apart. Despite not technically being a "paradise" (depending on who you ask), the general consensus seems to be that everyone's worse off for it.
* Werewolf: The Forsaken can switch sex at will using an ability nearly identical to that of the Lunar Exalted described above, with more or less the same justification.
* Werewolf: The Forsaken dips into this a bit; the Bale Hounds are literal demon-worshipping werewolves.
* Werewolf: The Forsaken has Aharnuz, from its "Predators" sourcebook. A ghastly creature that spawns an apparently infinite variety of twisted "children", the only mercy is that none of these creatures can breed - something it/she is struggling to overcome. The two sample possible origins given for this thing is that she is an almost complete Host that has become even more twisted than it was originally, and that she used to be one of Luna's Handmaidens that remained overlong in the world and was stranded there by the Gauntlet. Its name even means "The Mother" when translated from First Tongue.
* Werewolf: The Forsaken has a Merit that allows a changeling to temporarily draw upon a language by using the Wyrd to draw upon the collective unconscious.
* Werewolf: The Forsaken has places called verges where the spirit world bleeds into the real world.
* Werewolf: The Forsaken has Sanctuary Boarding School, an exclusive and secretive English boarding school that has been taken over by an idigam. The faculty have been transformed into soulless servants, the nearby woods are filled with monsters, and the students have had their souls removed or altered.
* Werewolf: The Forsaken has the Blood Talons, who consider the "hunter" aspect of a werewolf's existence the most important part. Almost all of their rituals involve someone's ass being kicked. Their extra part of the Oath of the Moon forbids them from surrendering in a fight unless they would make the offer to their opponent in similar circumstances.
* Werewolf: The Forsaken has the Blood Talons, whose favored prey in the sacred hunt is other werewolves, those who've gone to the bad one way or the other.
* Werewolf: The Forsaken has the "Call Human" rite, which explicitly mentions in its description that less-than-virtuous werewolves have used it to summon random humans to their location to rape them. That said, the sexual/spiritual/pheromonal attraction between a werewolf and a wolf-blooded human is strong enough to almost qualify as date rape itself.
* Werewolf: The Forsaken has the Iron Masters, who tend to stay close to humanity and urban habitats. They have an affinity for Technology Gifts that, at the highest level, allow them to make a technological device out of the base materials (that is, a circuit-board out of plastic and sand).
* Werewolf: The Forsaken have the innate talent of receiving visionary dreams straight from Luna herself. However, as Luna's mercurial as all hell, the dreams are often heavily cloaked in symbolism.
* Werewolf: The Forsaken. If a Host is destroyed, its body will shatter into dozens or hundreds of its animal form (which will look like mundane animals), one of which contains its soul. They all need to be destroyed to be safe or else they will eventually consume enough to regrow into their monstrous forms (and usually be pissed at whatever killed them).
* Werewolf: The Forsaken inherited Apocalypse's animism; as in its predecessor, there are numerous spirits of place, with the most significant to the Forsaken being Luna, the spirit of the Moon.

* Werewolf: The Forsaken of Wendigo, where most of the members have a somewhat lax attitude towards the whole "don't eat the flesh of men, wolves, or werewolves" taboo. Especially since they have rituals that grant them access to special knowledge if they sample a bit of another's flesh.
* Werewolf: The Forsaken silver without being burned, which is why they don't use silver weapons against the Forsaken.
* Werewolf: The Forsaken silver without it messing them up something fierce.
* Werewolf: The Forsaken splatbook "Tribes of the Moon" talks about the legend of a Blood Talon called Boneless Harald, who was born with deformed legs. After his first change, he bulked up his arms, got a huge sword, and rode into battle on a litter. Whenever the guys carrying it got killed, he wolfed out and dragged himself around by his arms, ripping chunks out with his teeth.
* Werewolf: The Forsaken's second edition, however. Now they can breed with each other just fine.
* Werewolf: The Forsaken that werewolves' healing factor means they don't age at the same rate as humanity; a Uratha might look like they're still in their 30s when they're pushing 80. As such, they need to take special steps to keep their paper work up to date, lest awkwardness ensue when they're called in for a police interview or whatever.
* Werewolf: The Forsaken: The Azlu are spirit-like creatures that can do something similar. In their case, only one of the spiders is really "them", so they escape by using the weight of numbers — the odds of the real one getting killed are incredibly small. The Beshilu of the same game are similar. They're rats, not bugs, but can hollow out human bodies and control them like the Fomori mentioned above.
* Werewolf: The Forsaken: The Hosts sometimes get around the mortal world in this manner.
* Werewolf: The Forsaken. The only constant is that, at some point, the new recruit receives a serious wound; the resulting scar is proof you're a Blood Talon.
* Werewolf: The Forsaken. The Rahu Auspice are the designated tough guy in any pack. What inborn ability do they gain for being Rahu? The ability to tell at a glance whether or not they could take a given opponent in a fight.
* Werewolf: The Forsaken the werewolves claim descent from Father Wolf and Mother Luna. However, there came a time when his children thought Father Wolf was getting too old to adequately guard the border between the mortal and spirit world, so they killed him.
* Werewolf: The Forsaken to hunt or destroy certain spirits can have similarly terrible effects.
* Werewolf: The Forsaken to make the change instantaneous, and don't even have to spend the Essence if the moon's in the phase they first changed under.
* Werewolf: The Forsaken, werewolves are forbidden from eating humans or wolves — their cousins on either side of the spiritual family tree. Thing is, if they break that rule, they gain Essence back...
* Werewolf: The Forsaken werewolves are naturally able to track people and, with the right gifts, spirits, by scent. They also have a ritual that allows one werewolf to communicate the scent of someone whose blood they've tasted to others by cutting their tongue and allowing other werewolves to lick the knife, they commonly use this rite to keep track of wolf-blooded about to Change, leading to the myth that lycanthropy is contagious rather than hereditary.
* Werewolf: The Forsaken, while lacking true werecreatures outside of werewolves, allows werebats in the form of bat-themed skinchangers.
* Werewolf: The Forsaken woes usually need things to be done on both side of the Gauntlet.
* Werewolf: The Last Warrior USA seven months before it was released in Japan... by Takara, of all companies.
* Werewolf Theme Naming: Meaningful names that reference werewolf lore and mythology.
* Werewolf Theme Naming: Werebeasts with names alluding to their true nature.
* Werewolf. There are monsters hiding in the village and killing people at night, but you can't tell them from the innocent villagers by looking at them. What's the

solution? Grab a pitchfork or a torch, form a lynch mob, and tie a rope to the old hanging tree.
* werewolf, they hunt, capture, torture, and kill any werewolves they find. They are also known to attack non-werewolves who stumble into their strongholds, making them little better than bandits.
* werewolf transformation is agony. During the transformation, a werewolf has every organ in his body simultaneously stop: heart attack, kidney failure, liver failure, and so on. Meanwhile his bones are cracking and twisting against each other, and his skin and muscles are being brutally torn apart. He screams at first, until the change hits the throat and vocal chords. Normally a human in pain has defenses, such as hormones that dull pain receptors, but those systems are gone too, leaving absolutely nothing to help with the pain. The second season implies that the body breaking down and rebuilding itself makes the werewolf slightly stronger after each transformation.
* Werewolf transformations are described as being excruciatingly painful. Animagi and Metamorphmagi, however, easily transform at will without the slightest discomfort because it is a magical skill instead of a disease.
* Werewolf two years later, Mike responded with "Thanks for turning off the bad soundtrack!"
* werewolf. While Oz explains that he needed to find a way to cage her up, given that she doesn't care about who she kills while in beast form, it doesn't really help his case much, especially given that Veruca did, in a way, succeed in tempting the beast in him. When Oz tells her to leave so he can explain the situation, Veruca feels the need to keep talking, prompting one incredibly loud "NOW" from Oz the likes of which have never been seen (or heard, rather). Even given her dangerously high snark levels, she apparently leaves so quickly that they didn't even need another shot of her to show it.
* Werewolf Works: Fantasy works themed around Werewolves specifically.
* Werewolves age normally, but they get stronger every time they turn. A werewolf who has been changing for years will be able (when transformed) to kill vampires with his bare hands.
* Werewolves and devils may have strangely boiling hot body temperatures, however.
* Werewolves, and don't die when you stick a sword in them. What more do you want?"
* Werewolves are also affected, a notable instance being Serafina chiding Guye for not only transforming from wolf to human shape without remedying the consequent clothing deficiency, but also then engaging in... certain behaviors which are far less publically acceptable for a male human than a male dog.
* Werewolves are also listed as a side effect of one obscure Scandinavian folk-magic spell. If a woman stretches the afterbirth of a horse (the membrane the foal was in before coming out of the mare) between two sticks, then crawls through the opening without tearing it, it is said she shall never experience pain in childbirth — at the expense of all her boy children being born werewolves, and all of her girl children being born maras (dream witches).
* Werewolves are created when a person is bitten by another person and survives. The interesting bit is that werewolves don't have to be transformed when the bite occurs.
* werewolves are typically weak to silver; touching it causes severe burning.
* Werewolves as well; most lack the self-control to really function in society (even Angua struggles sometimes).
* Werewolves can shift between human and lupine shapes at will, although during nights of full moon they're forced into their wolf shapes.
* Werewolves can turn from their human to their animal form whenever they want it. You can only turn certain body parts.
* Werewolves: Dark Survivors that causes porphyria and other symptoms, with a few historical tidbits about berserkers for good measure.
* Werewolves, especially younger wolves, are noted to have aggression issues in
* Werewolves example. When their Primal Urge reaches its peak, they become incapable of deriving nourishment from anything other than the ephemera of spirits and the flesh of humans and other werewolves.

* Werewolves have always been able to take on the normal wolf form and infect with a bite, but other details have cropped up with the evolution of the game, including the addition of a "hybrid" form equivalent to the Man-Wolf, the existence of natural lycanthropes in addition to infected ones, and the imposition of a whole new alignment (and personality) not just on the nonhuman forms but on the human(oid) as well. The game later inversed the process with the wolfwere (and subsequent varieties of beast-were), who is an evil, intelligent, shapeshifting wolf who assumes a human form to mingle in society and lure potential victims. Werewolves and wolfweres both share intense loathing for each other.
* Werewolves have essentially the same sins, but in an entirely different order. Simple rudeness can be an extremely severe sin if you're disrespecting a packmate or elder, theft isn't a sin at all, murder is a relatively mild one that's only severe if you're hunting for sport, and cannibalism features prominently with an array of fine distinctions.
* Werewolves have their share of weaknesses, too; earlier legends provide ones such as having an iron bar thrown over their head — although hitting somebody with an iron bar is pretty incapacitating for most creatures — drawing three drops of blood, or having their name announced one to three times. The popular weakness to silver weapons
* Werewolves have the Wyrm, the supernatural force of death and corruption, which used to be the relatively balanced great spirit of destruction, serving a useful and necessary purpose, until it
* Werewolves, in more modern versions, turn others into werewolves by slashing and biting.
* Werewolves in Teen Wolf aren't especially susceptible to silver, but rather their bane is the Argent family (Argent being French for silver).
* Werewolves join Voldemort, a Token Heroic Werewolf who serves as the good guys' spy among his kind.
* "Werewolves Of London" by Warren Zevon. Some versions mentioned Lon Chaney Jr while some other ones mention Jack Nicholson.
* Werewolves of the Third Reich: These are genetic chimeras made from human and wolf DNA. They're intended to be berserk super soldiers, but the experiments haven't gotten that far by the time of the film.
* Werewolves on Wheels: These ones are of the Wolf Man variety, created by a Satanic curse and weak to fire.
* Werewolves; the idea apparently originated from the Beast of Gevaudan, which according to the myth was killed by a silver bullet, but back then, the reason it succeeded in killing it was believed to be because the creature was of satanic origin and the bullet had been blessed. Before silver became iconic, werewolves' best-known Kryptonite Factor was Wolfsbane (also known as Aconitum), a plant people believed to have various effects on them, including killing them.
* werewolves to transform. Oz was quiet when he was safe and behind bars; Veruca loves being a werewolf; and Bay transformed out of protection. Characters who experience pain, however, always seem to fight it.
* Werewolves, which is the birthplace of the animistic spirits who underlie all of creation. Actual religious figures, particularly of the Abrahamic faiths, don't show up at all, though spirits deliberately trying to found cults and manipulate mortals do. At the same time, spirits can give potent magical boons to those who help them, and worshiping them is one of the easiest ways to do so. So, not only is there a tiny minority of werewolves who manage to cling to their pre-Change beliefs, but there's also a minority of werewolves who actively worship their totemic spirits, although they're not supposed to. The Pure is more of an aversion; they genuinely do worship and reverse the spirits, which is one of the reasons why the spirits like them more than the Forsaken.
* Wereworld. A pirate, exile, and a lady killer who has a crush on Whitley.
* Wereworld is about as manly a young adult fantasy novel can get with Therianthropes ripping each other apart from chapter 3 onwards.
* Wereworld. It is quite a humorous scene when Aris, another female dragon, tries to explain to Blaze that she looks like a male to other species, regardless of how

sexy she looks to dragon males. This is fixed with the dragon unique ability to shapeshift, which she uses to assume a more human form. However, Blaze misunderstands Aris's explanation of "the importance of having breasts among the other races", and gives herself far too large breasts. This led to Blaze's humorous line "If you're gonna do something, do it grand". So far, no other non-mammal lycanthropes have shown up to compare the dragons to.
* Wereworld: The setting includes many varieties of werecreatures; the main antagonists are werecats.
* were yet. In early appearances it seems like they were intended to have supernatural powers, most notable in Ethan's super strength and ability to pop up from out of nowhere. And while we're on the subject of Ethan, in season three Ben says that Ethan was their surgeon. Now, why would Ben send the Others' only surgeon on a dangerous mission to infiltrate the crash survivors (as he did Goodwin, who it seems he sent with the intention of getting him killed) a short time after he has found out that he has a lethal tumor on his spine? Also, in the first few seasons it was well established that the Others kidnap children, and we assume that this was the reason they took Rousseau's daughter, Alex.

* Wer hat's gesehen? (German police procedural) of the candidate's choice.
* Werner. At least the grebes interact with humans, such as the ones who buy a car just to drive it into a lake, or the ones who try to sell their collected grebe jokes to Werner for his next book but demand an outrageously high price including license fees and whatnot.
* Werner has a one-page rhyme comic which claims that the Führer didn't have a Führerschein (driver's license).
* Werner has lots and lots of examples of this, even whole stories based on being literal-minded. However, most of them are impossible to translate to English for demonstration purposes.
* Werner Herzog being the best example. Bruno S. made only two films, both with Herzog, and Eva Mattes was the only professional actress in it — everyone else was just someone whom Herzog saw during filming and wanted to use.
* Werner Herzog Eats His Shoe is an example of this. Long story short, Werner Herzog told documentary director Errol Morris that he would never finish his debut movie, and if he did he would eat his shoe. When Errol Morris did in fact finish his movie, Werner got the great Berkeley chef Alice Waters to cook his shoe in garlic, herbs and stock for five hours, and he ate it in public — except for the sole, because as he explained, you never eat the bones of the chicken. Director Les Blank filmed it and released it and is now in the criterion collection.
* Werner Herzog has a crippling fear of chickens and includes them in several symbolic scenes in his movies.
* Werner Herzog he has stated that he genuinely liked the script and ended up enjoying the role.
* Werner Herzog, he will eat his own shoe. Sure enough, Herzog is a man of his word.
* Werner Herzog. If you're wondering, he boiled it with soup stock and garlic first. He didn't eat the sole, saying that "one does not eat the bones of the chicken".
* Werner Herzog said that he would eat his shoe if Erroll Herris finished his documentary "Gates Of Heaven". Herris did, so he did.
* Werner Herzog solely to finance his next film project, admitting that he had never seen any Star Wars property beyond a trailer or two. However, he has stated he enjoyed the role and series, being very effusive with his praise for all involved.
* Werner Herzog, the part of real-life strongman Zishe Breitbart is played by real-life World's Strongest Man champion Jouko Ahola.
* Werner jokes... Here is just about the only example out of a whole lot that still makes sense translated into English:
* Werner: Many characters in the first few books are real-life acquaintances of Brösel or his brother Andi. Most of them haven't even been renamed. In the

early books, Meister Röhrich had the name of his real-life counterpart, but he sued against it, so the name was changed to Röhrich.
* Werner series, which features massive drinking, has plenty of these:
* Werner suddenly looks like straight from CAD 3D during the CGI scenes.
* Werner: The beer Werner drinks, some of the vehicles, and the Horex vs. Porsche race were made into actual things.
* Wernher von Braun, a fan of Laßwitz', wrote a short story obviously inspired by the opening of

Later in life, Goethe actually tried to distance himself from the book—he had grown to dislike his earlier romanticism, and was embarrassed about the way he'd publicized his young love for Charlotte. To his ire, it remained one of his best-known works.
* Werwolves are the archetypal lycanthropes, being hunters in the wilderness and banes of travelers, villagers and farmers. They're humanoids afflicted by an infectious curse, which gives them the ability to shift between humanoid, wolf and

* Wes Anderson in densely matted, realistically flowing hair, and that's not to mention all the other particle effects that help the movies achieve an almost photorealistic look.
* Wes Anderson seems to just appreciate his characters being easily identifiable by the way they dress.
* Wes Anderson, who was described by Martin Scorsese as being his own successor and is well-known for his unique filmmaking style and the quirky films he makes.
* We say that on two occasions when they themselves killed Kenny ("Yep, we're bastards").
* Wes Craven. A man named Miles Creighton is revived from cryonic preservation 10 years after being frozen due to having an incurable disease. With technology now advanced enough to resurrect people preserved this way, Miles is brought back to life, but has undergone an unpleasant change of personality, becoming cruel and sadistic, with the implication that he has lost his soul.
* Wes Craven because he never wanted or intended to have the first film become an ongoing franchise (and even wanted it to have a happy ending). He also didn't like the idea of Freddy manipulating the protagonist into committing the murders.
* Wes Craven, includes several zombie-themed nightmares suffered by the protagonist.
* Wes Craven's New Nightmare Dylan escapes from the hospital to get away from Freddy, Heather is desperately searching the hospital for him. When Dr. Heffner tells her that Dylan had been sedated, she explains that Dylan is prone to sleepwalking, and is perfectly capable of getting out of the hospital, only to realize that he had probably done just that.
* Wes Craven's New Nightmare, even after Heather pulls the plug on the TV.
* Wes Craven's New Nightmare is considered a marked improvement on the 4th, 5th and 6th installments (regarded as a second nosedive after part 3) and some even think its as good as the original.
* Wes Craven's New Nightmare. It's also the lowest grossing of them all, though it recouped its low budget twice.
* Wes Craven's New Nightmare now that Wes has finished the screenplay portraying it. Heather Langenkamp and her son read from the screenplay, which depicts the first scenes of the movie.
* Wes Craven's New Nightmare (playing himself) explains that stories, and people's belief in them, have always been the bridge between the real world and the supernatural.
* Wes Craven's New Nightmare serves to explain the entire plot to Heather Langenkamp (and by extension the audience). He tells her about the Entity that has

taken on the form of Freddy Krueger, that it has been released due to the end of the movie series and is trying to cross over into reality, and that Heather is the only one who can stop him.
* Wes Craven's New Nightmare that he is plagued by horrible nightmares of the Entity trying to break into the real world as Freddy Krueger. He writes the script for the movie, which somehow gives shape to reality itself, based on these dreams.
* Wes Craven's The People Under the Stairs, sure, but it also comes from the fact that it belongs to a complete psychopath of a landlord whose presence upstairs keeps you inside, making it a horrible trap.
* Wes Craven while looking up "terrible things" at the New York Public Library. While going through the library's forensics department, Craven learned of the legend of Sawney Bean - the alleged head of a 48-person Scottish clan responsible for the murder and cannibalization of more than one thousand people. What interested Craven in the legend was how, after Bean's clan was arrested, they were tortured, quartered, burned and hung. Craven saw this treatment of the Bean clan by supposedly civilized people as paralleling the clan's own savagery.

* Wesley Willis, an extremely prolific (and diagnosed schizophrenic) singer-songwriter, ended virtually every song he ever recorded by first saying "Rock over London, rock on Chicago..." after which he would then spout a random commercial jingle or product slogan, which generally had nothing to do with the subject matter of the song.

* Western Union started out in the 1800s as a telegraphing company that did money orders on the side, then in the 1900s it became a money order company that did telegraphs on the side. But by the end of the 20th century, telegraphs had long become obsolete and several retail chains began their own money order services (and

e-commerce has caused money orders themselves to wane in relevance as an alternative to checks). In the 21st century, the bulk of their business is in international money transfers, especially to recipients in poorer countries who might not have access to PayPal. Many ethnic stores in the US offer money transfer services via Western Union for this exact reason.

* Westeros: An American Musical adapted into its first three seasons. Even with some of the plotlines cut entirely, compression of the part of the plot still covered was necessary.
* Westeros: An American Musical: A frequent consequence of reducing the roles of some characters compared to the source material:
* Westeros: An American Musical: After being crowned King of the North, Robb Stark spends the better part of his reign wagning a war.
* Westeros: An American Musical: A heavily implied side effect of Renly's wedding to Margaery, as he's established quite early to be in a relationship with Margaery's brother Loras.
* Westeros: An American Musical attitude towards Catelyn's daughter Sansa intact, strongly hinting at Littlefinger seeing Sansa as a replacement for Catelyn.
* Westeros: An American Musical: Brothers Robert and Stannis Baratheon are among the roles sharing an actor.
* Westeros: An American Musical due to having a non-combat position in the Night's Watch.
* Westeros: An American Musical due to the play making no clear allusion to a familial relation between Eddard and Jon Snow despite both characters appearing onstage in the 2019 version.
* Westeros: An American Musical: During "Knight's Watch Defeated", Davos re-iterates his disapproval of Stannis' plans of sacrificing Edric while Stannis' young daughter Shireen is in the room and covers Shireen's ears while he does so.
* Westeros: An American Musical: During "Small Council", Daenerys is called "the last dragon", the dragon referring to her family sigil. Daenery's brother Viserys is dead by the time she's first seen onstage, and the two of them were the last known survivors of their family at the beginning of the original story.
* Westeros: An American Musical: During "Sword in the Darkness", Mance Rayder and his army of unified wildling tribes turn out to be trying to get past the Wall protecting Westeros because they're running away from the wights, who have already reached the Wildling territory.
* Westeros: An American Musical fighting against an army whose leader had someone Loras cares about killed, is so focused on killing as many people as possible that he pays little attention to which side they are on.
* Westeros: An American Musical gets the play rid of several pairs of characters sharing a name from the original story. However, focusing the play on the King's Landing events while having a couple songs about the Night's Watch results in the play having both several mentions of Jon Arryn and on-stage appearances of Jon Snow.
* Westeros: An American Musical: Gregor Clegane killing Elia Martell's children is mentioned in "The Dorne Identity" and "Talk Less, Stab More".
* Westeros: An American Musical: If a person essential to her current plan to become Queen dies, Margaery tends to mourn the plan rather than the person who died.
* Westeros: An American Musical in a scene that was meant to be a romantic moment between Sandor and Sansa.

* Westeros: An American Musical: In "First Watch", Sam in mentioned to be given a hard time by Pyp and Grenn due to having non-combat duties.
* Westeros: An American Musical: In "No Waiting", Sansa sings about doing her best to avoid Joffrey, whome she describes as growing crueler each day.
* Westeros: An American Musical interrupts the story at a relatively happy point:
* Westeros: An American Musical is a talking antropomorphic raven. Antropomorphic talking ravens don't exist in the story the play is parodying.
* Westeros: An American Musical. It later turns out that Robb felt the need to marry his wife because he had slept with her out of wedlock.
* Westeros: An American Musical: Loras Tyrell in Act II. In Act I, he co-conspires with Renly to make Margaery Robert's mistress and is the figurehead of the Tyrell army in "The Siege of King's Landing". In Act II, Olenna has to intervene to keep Loras from getting harassed by the Sand Snakes and he's mostly silently helping out with whatever Olenna and Margaery are up to.
* Westeros: An American Musical named characters from the original story) each have a couple of comments about Jon Snow.
* Westeros: An American Musical. Not following Littlefinger's advice results in Eddard being dead a couple songs later.
* Westeros: An American Musical of Eddard Stark's arrest involves other characters pulling blades out, giving Renly and Varys an extra reason to leave the room once the realize what's about to happen.
* Westeros: An American Musical purposes, Littlefinger doesn't attend the wedding, and the letter he leaves for her soon-to-be husband to explain his absence consists entirely of the words "Fuck you, she's mine".
* Westeros: An American Musical: Renly's armor-like costume includes a large golden neckpiece that covers his upper chest and shoulder decorated with antlers.
* Westeros: An American Musical: Sandor has a scar on part of his face in the original story. The fact the actor playing him doesn't have one is hidden by his hair covering part of his face, including one of his eyes.
* Westeros: An American Musical: Sandor, who is shown to be romantically interested in Sansa in the early part of the play, shows up during a much later scene involving Sansa holding a bouquet of flowers. He's also holding a plush toy representing an animal that is associated with Sansa's family in the story the play is parodying.
* Westeros: An American Musical: Several characters from the original story get hit with this due to their names never being said onstage, but still appearing in the cast credits:
* Westeros: An American Musical: Several factors can make Shireen's age hard to pin down beyond "too young to be considered an adult yet":
* Westeros: An American Musical songs is also best appreciated if the originals were listened to beforehand.
* Westeros: An American Musical stint with the wildlings and making no mention of it, the second long after he's done the stint and returned to the Night's Watch. Because of this, Jon is never seen properly meeting Mance Rayder as he was in the original story, with the two instead turning out to already know each other in "Sword in the Darkness".
* Westeros: An American Musical. "Sword in the Darkness" is the only song featuring Wildlings at all, and Mance is the only one named on-stage. However, three of the actors are credited as playing Wun-Wun, Tormund and Val, all three of whom can be picked out among the handful of actors standing in for Mance's army.
* Westeros: An American Musical that makes him one of Sansa's more sympathetic suitors.
* Westeros: An American Musical: The fact that Robert still loves the deceased Lyanna is spelled out a couple times:
* Westeros: An American Musical. The lack of more following that plotline has a lot to do with Eddard losing his head little after the second of the aforementioned songs.
* Westeros: An American Musical: The only other person Davos is seen consistently getting along with besides Stannis is Stannis' young daughter Shireen.

* Westeros: An American Musical, the play inevitably has a character mention the setting's several-year seasons of variable length, and say he doesn't understand how they work.
* Westeros: An American Musical: The play takes place in a medieval setting during a war and focuses on the alliances made by various members of the nobility. Sealing alliances via arranged marriages comes up a lot.
* Westeros: An American Musical: The play uses "Bobby" as a nickname for Robert Baratheon, resulting in him calling himself "Bobby B" in "Small Council". A canon character named Leo Lefford also has a part in "Hand of the King".
* Westeros: An American Musical: The raven in Act I of the 2019 version. She interacts with the audience as a narrator, but also has a few exchanges with the characters when she deems it necessary to move things along.
* Westeros: An American Musical: "The Red Wedding" is about the Lannisters reacting to an event in which many of their opponents died, resulting in it basically becoming And There Was Much Rejoicing: The song.
* Westeros: An American Musical: The Tyrell army shows up to help one of the sides in "The Siege of King's Landing" effectively tipping the scales in its favor.
* Westeros: An American Musical: This comes up when Renly marries his male lover's sister, and the sister in question gets a little impatient about the marriage getting consummated.
* Westeros: An American Musical: Tyrion, who gets a decent amount of focus and considers himself the heroic protagonist of the play, is keeping a prostitute named Shae with whom he's convinced to be in a mutually loving relationship. For various reasons, she's no longer in his employ and has effectively betrayed him by the end of the play. The song "Congratshaelations" has Shae tell her side of the story: as far as she was concerned, Tyrion was keeping her despite the fact that she risked getting killed if discovered, married a teenage girl (his canonical wife) without much protest, is not nearly as nice as he thinks he is and got his family on his bad side at times when he really shouldn't have.
* Westeros: An American Musical wasn't exactly a trivial matter and another character points out that the act was a betrayal towards person on the receiving end of it.
* Westeros: An American Musical: What is seen of Theon Greyjoy's story in the play can be summed up as this. When first seen, Theon is fighting alongside Robb and trying to petition his father Balon, an old enemy of Robb's family, to fight alongside Robb. Balon unfortunately decides he'd rather have a second round against Robb's family instead. Last Theon is heard of, he's reported to have captured Robb's hometown for Balon.
* Westeros: An American Musical, which makes it hard to portray him anywhere near as smart as his canon counterpart.
* Westeros: An American Musical, who's an antropomorphic talking raven, is baffled by the appearance of the shadow-baby in "Crownless". Soon after that, she casually complains about the play not having time for the dragons that are just as much part of the original story as the shadow-baby is.
* Westeros: An American Musical whose only value is being a King's bastard son, has a habit of calling him some variation of "my reserve of King's blood". At some point she does so right in front of Edric, who promptly reminds her of his name.
* Westeros is also filled with independent sellswords and hedge knights who bounce from job to job, most notably Tyrion's lancer Bronn. In fact, Bronn is eventually knighted as "Ser Bronn of the Blackwater"! Though this is just a funny coincidence and not an intentional reference to the real-life PMC...
* Westeros is hit with a series of these in the years following the overthrow of the Targaryens and Robert passing the crown to Stannis in order to pursue Rhaegar and his loyalists in Essos.
* Westeros is the westernmost landmass in the world. It is the fantasy equivalent of the British Isles, though continent-sized and contains equivalents to other parts of Europe. The western sea is called the Sunset Sea, and there is no known land in that direction. Lord Gylbert Farwynd of the Lonely Light, the Westernmost of the Iron Islands and point of land, claims there is a paradise-like land to the

West. Many of the Iron Islanders don't believe him and think him mad. Westeros sits off the western shore of Essos, which is the fantasy equivalent of Eurasia.
* Westeros' version on which the religion is built, as well as a veneration of saints. Likewise, in terms of how the Church is directly under control of the Crown, it is significantly weaker than the Church was in the Middle Ages. In this aspect it may be more akin to the relationship between some Orthodox churches and the Church of England with their respective states (probably the latter especially, since Westeros mirrors Britain).

* "West Memphis 3" plea to charges that they murdered 3 boys in 1993. Two of the three defendants were sentenced to life imprisonment, while the third was given a death sentence. All had maintained their innocence (and evidence and later events revealed massive amounts of misconduct by police, prosecutors, and jurors) and the evidence was starting to support this, but the state didn't want to fully throw out the case in case they were wrong, so the boys were offered an Alford plea with a sentence of time served. All three accepted as it allowed them to be released without having to say they'd done it (their reason for refusing plea bargains with standard guilty pleas).
* West mentioned during interviews that he deliberately played up some 'campy' aspects of the show — it was, apparently, a necessity, as only part of his face was visible, and he had to find another way to express emotion.
* Westminster Chimes: Those "bing bong bing bong, bong bing bing bong" chimes associated with Big Ben.
* Westminster with its rounded letters isn't especially distinctive) or something based on the letters from 8-bit consoles like the NES for a "computery" font, if you bothered to come up with something at all.
* West of Angara is Hesparia, which is dominated by a Native North American-style tribe.
* West of Baltimore, I-70 officially ends in a park-and-ride lot just to the east of its junction with I-83. The cleared right-of-way continues to the edge of Gwyn Falls Park. As originally planned, the interstate would have continued all the way to a junction with I-95 near the harbor
* West of Bathurst. The longer the comic goes on, the more likely it seems that one character actually is the devil.
* West Of Dead. He can pay it back in kind during "The Hunt", gaining the ability to fast travel between sigils he's found on the current level he's on as a reward.
* West of Eden has taken care of everything fire could do for them, and thus they are so culturally ignorant about fire that only a few of the more scientifically-minded Yilanè even know of its existence. Thus, Kerrick and some of his allies sneak into the Yilanè city of Alpèasak and put it to the torch, which ends up burning the living city almost completely to the ground and

killing the vast majority of its inhabitants, most of whom die in a blind panic because they don't understand what's going on.
* West of Eden is convinced her and Kerrick's child is going to inherit her cleft lip. He doesn't.
* West of Eden: the Yilané have a civilization built entirely on genetics and selective breeding, and use gigantic genetically modified icythyosaurs for trans-Atlantic shipping.
* West of Eden trilogy are one of the best uses of this in fiction. The race function in much the same way as seahorses. Few males survive more than three brutal pregnancies, and the society is dominated by females who keep the males solely as breeders (despite them being every bit as intelligent as the females).
* West of Loathing against enemies, effectively weaponizing this trope.
* West of Loathing are a kind of sentient, ambulatory fungus. They can bud off short-lived spawn for battle, or they can "pop" into a cloud of spores, to be dispersed by the wind and eventually grow into adult goblins. The goblin pardner Gary wants to find a suitable location for popping.
* West of Loathing has silver bullets made by melting down silver items at the Silversmith's Cottage. They do double gun damage against skeletons and demons. There is also a silver pistol that always fires these.
* West of Loathing. If you check your character sheet afterward, you'll find that the word in question is, in fact, now your middle name.
* West of Loathing is full of this. Your character can even get a ring that is basically made from a skeleton’s, er, butthole.
* West of Loathing populated by nothing but these. You'll need to fill out a good dozen "different" (functionally-identical) forms to complete all the quests involving this area. And that's if you don't screw anything up and have to do it again...
* West of Loathing that caused them to be banned from Topeka, Kansas for life.
* West of Loathing, while exploring the (re)Boot Hill cemetery, you can learn about a tontine established by three members who apparently all died at the same time, and as a result, the reward lies hidden somewhere. It's possible for the player to solve the puzzle and claim the treasure.
* West of Loathing, you can gain 1 XP each for shoveling horse manure (or, at Halloway's Hideout, squirrel droppings). There's also a destination called "The Big Apple"... let's just say it's not New York.
* West of The Moon: A hobbit-centered archive. Last updated February 2008.
* Weston College Arc in the middle of it - once again, it was necessary to advance the plot but prolonged the arc to the point of the reader getting exhausted.
* West Orange Police Station doubles as East Haledon Police Station for the show.
* West originally intended for his music video for "Stronger" to be an AMV, splicing in sequences from the classic anime film
* West played a lawyer defending R. Kelly who made a video of himself whizzing on a schoolgirl in
* Westside: In "Dire Combustion", Ted and his gang heist an armoured car. Things start going badly wrong when they attempt to bust it open.
* West Side Story. After the rumble, she seems to be accepted into the gang. Her name is the definition of this trope. "Whose is she?" "She's anybody's."
* West Side Story, a modern Broadway take on the famous Shakespearean story, also does this, with the Rumble that results in Riff and Bernardo's deaths occurring right before intermission.
* West Side Story and said, "Eh, close enough." Maria's brother, Bernardo, is played by George Chakiris, a Greek-American.
* West Side Story, Anita is roughed up and nearly gang-raped by the Jets when she tries to deliver a message from Maria to Tony. This drives her to lie to them that Chino killed Maria, setting up the final tragedy of the play.
* West Side Story, A-Rab and Baby John are determined to show 'they ain't scared' when Officer Krupke interrogates them. Their dialogue is so stilted that even Krupke notices something is wrong and decides to run them in. The rest of Jets show up allowing them to escape.

* West Side Story, A-Rab, the second youngest of the Jets, mentions that he recently stink-bombed Bernardo's father's store.
* West Side Story as an "explanation" for why they're gang members and punks.
* West Side Story at a dance which the Jets and the Sharks hold on "neutral territory."
* West Side Story, Baby John covers Maria's head and shoulders with her scarf—one of the first gestures of friendship shown by one of the Jets towards one of the Sharks. Maria isn't sleeping, she's crouched over Tony's body, mourning.
* West Side Story: Behind Tony and Maria, there are Bernardo and Anita, to whom tragedy strikes first.
* West Side Story, Bernardo angrily intrudes on Tony and Maria's first meeting.
* West Side Story, Bernardo does this after having been taunted by some of the Jets.
* West Side Story causes her to break down and threaten to start her own killing spree.
* West Side Story, "Cool" is sung before the Rumble, while "I Feel Pretty" and "Gee, Officer Krupke" are sung afterwards. In the film version, to create a rising "line of tension" with no lighthearted moments after the Rumble, "Gee, Officer Krupke" and "Cool" switch places and "I Feel Pretty" is also moved to an earlier scene.
* West Side Story during the dance at the gym. Tony and Maria see each other for the first time and dance. It's a cha-cha, not a waltz, but it fits.
* West Side Story eventually reject the theory that society is to blame. After considering possible explanations for their crimes ranging from parental abuse and neglect to psychological problems to unemployment, they eventually settle on the reason: they're just bad.
* West Side Story features Officer Shrank (Bad Cop) and Officer Krupke (Incompetent Cop) - not that Shrank is particularly competent, it's just that the Bad is more important in his characterisation.
* West Side Story has an example that's tragic rather than heroic: after Bernardo kills Riff, Tony picks up Riff's switchblade knife and immediately uses it to kill Bernardo. In the 1961 film version, the dying Riff actually hands the knife to Tony just before he collapses, silently requesting this trope.
* West Side Story has the song "America", which contrasts the two types. The women showcase the Beautiful, pointing out the freedom and economic opportunities America offers, whereas the men are solidly in the Boorish camp, pointing out the poor housing in the slums, casual racism holding them back and how they are forced by circumstances to either become victims or perpetrators of crime. The song's lyrics even out to pro-American, but is contrasted with its very blatantly Latin-inspired sound.
* West Side Story is in Doc's drugstore. The jukebox plays the same "Mambo" heard at the gym dance.
* West Side Story, Maria almost instantly forgives Tony for killing her brother Bernardo. For just a moment she attacks him in rage, pounding his chest with her fists, but then crumples sobbing into his arms.
* West Side Story, Maria breaks down and collapses into Tony's chest after bitterly confronting him over having killed her brother Bernardo.
* West Side Story, Maria's balcony is actually a window opening onto the fire escape. He climbs up, they begin a duet, and the world fades away.
* West Side Story, pretty much of all of the Jets only use their nicknames and thus their real names are never revealed. It’s less of a case with the Sharks, who have names that Puerto Ricans would likely have.
* West Side Story provide commentary for the musical numbers, discussing abandoned concepts, differences between the play and the movie, and which songs he does and doesn't feel proud of in retrospect.
* West Side Story's "I Feel Pretty" was used in a diaper commercial (replacing replacing "gay" with "dry").
* West Side Story, since real-life gangs are visually distinguishable.

* West Side Story, spares Maria, who is its version of Juliet. (The characters who are versions of Romeo, Mercutio, and Tybalt all still die.)
* West Side Story". The gang leader plays himself, with other gang members playing a low-ranking police officer who arrests him and various authority figures. These various authority figures have various shallow theories about what the problem is, most of these theories being in Society Is To Blame territory. But what they all have in common is that they whack him over the head and send him away to be somebody else's problem. Oh, and they all either insult the lowly policeman or ignore him. It all ends with a mutual rejection: The final authority figure dismisses the gang leader as a bad person period, and the gang concludes that they simply want society out of their lives.
* West Side Story, the Jets' Song talks about how great it is to be a Jet.
* West Side Story. The old Bigot With A Badge hate the immigrants in the Sharks gang and want to make an alliance with the non-immigrant gang the Jets. However, the Jets despise him. They are not bigots. However, they still hate the Sharks, although for their own reasons. The driving force in the conflict is thus between the young characters, the bigotry of the older generation being merely a side note.
* West Side Story the song "Gee, Officer Krupke'' where the Jets are mocking the social system for it's handling of juvenile delinquency. The judge declares that it's a psychological problem and sends them to a psychologist who declares that they just need an honest job and sends them to a social worker who declares that they need a year in jail and sends them back to the judge.
* West Side Story, Tony and Maria first see each other during the wildest part of the Mambo in the Dance at the Gym. Soon enough, though, the lights fade and the Mambo abruptly dies away to segue to the Cha-Cha. The Cha-Cha is only moderately slow, but then the dance actually halts for a few moments so Tony and Maria can exchange their first words.
* West Side Story tries to sink Tony/Maria because she believes Tony is a dangerous, murderous boy who will break Maria's heart.
* West Side Story uses a scene of Maria spinning around and changing colors as a transition from her preparing for the school dance to her attending the school dance.
* West Side Story, when Chino tells Maria that Tony killed her brother, her first reaction is to say to Chino that he's lying and then say it again louder. Her disbelief in this horrible truth doesn't last very long, however.
* West Side Story: When Detective Schrank finishes giving the Jets and Sharks an earful over their latest fight and Bernardo asks him if he could translate his tirade into Spanish, even Riff cracks up.
* West Side Story, when Tony and Maria both see each other for the first time, the edges of the frame are noticeably blurred (though, this is more to create the effect that they each have eyes only for one another)
* West Side Story when Tony and Maria first meet during the dance at the gym, and time slows down as they dance together and eventually share a kiss.
* West Side Story with the Jets and Sharks street gangs standing in for the Montague and Capulet families.
* West Side Story won an Academy Award for Best Supporting Actress for her performance as Anita, too.
* West starred as an aging TV Space Commando personality Captain Blasto in an episode of
* West, Texas is commonly referred to by locals and travelers passing through as West-Comma-Texas to differentiate it from the geographic region of West Texas. Incidentally, West is in
* West Virginia on December 7th. Though grievously wounded and in blinding pain, Captain Bennion refused attempts by his steward, Cook 3rd Class Doris Miller, to move him to sickbay and remained at his post. When Miller tried to bring a corpsman to the bridge instead, Bennion stopped him and said that too many other men needed help more than he did. Bennion maintained command, ordering counterflooding to prevent the battleship from capsizing, organizing firefighting crews, and keeping the antiaircraft guns in action until he bled to death. His last words before

losing consciousness were ordering Miller to "Tell the XO he's in charge." For saving his ship at the cost of his own life, Bennion was posthumously awarded the Medal of Honor. Miller found the XO and advised him of the situation, then replaced a wounded gunner on an antiaircraft mount, shooting down a Japanese bomber. He would be the first black man to receive the Navy Cross.
* West Virginia was finally raised six months after the attack on Pearl Harbor, three sailors were found dead, trapped in a watertight storeroom. They had crossed off sixteen days after December 7 on a calendar hanging on the wall.
* Westward is easier to accept if one thinks of it as magic, rather than technology.
* Westward" Later on in the comic, in an unrelated incident, a small spacecraft (an "asteroid pod") mysteriously bursts into flames when it is damaged. This is again lampshaded in the comments section:
* Westward Martian scientist. And it packs enough power to shift the orbits of planets or create a mini super-nova if you aren't careful with the controls...
* Westward, perhaps) but it provides a unique alternative with an "analog" feel, which was the author's stated purpose for it.
* Westward through Escherspace is instantaneous, many months of conventional space travel with rockets are still required as part of any interstellar trip.
* West Wing entry above noted, many White House positions see high turnover rates because the stress tends to lead to job burnout. The trope even applies to the President:
* West Wing had some canon fodder forced on him by an actor that turned out to be a very good thing. When they were filming early episodes, Sorkin noticed that Richard Schiff was wearing a wedding ring during his scenes and objected that he didn't think the character, Toby, was married. Schiff agreed. Sorkin asked why the hell he was wearing the ring then, and Schiff said, "I'm waiting for you to tell me." As a result, a sad divorce was written into Toby's backstory, his ex-wife became a significant secondary character and the two of them got a story arc that was a favorite among fans and lasted well past the time Sorkin left the show.
* Westwood's fellow BBC radio DJ Nick Grimshaw did a thing in 2013 where he tried to show off his "gangsta side" - turning his breakfast show into "The Breakfast Clique" in reference to the GOOD Music song. While this may have been a joke/spoof/ stunt, it doesn't come across well.
* Westworld, "a deep and dreamless slumber" is used to put a Host into Sleep Mode. Dr. Ford, the founder of Westworld, controls the Hosts using triggers too subtle to be seen, apparently based on a combination of words and his body language.
* Westworld: After the hosts rebel, they kill a maintenance group and prop their bodies against a vehicle to lure in guests.
* Westworld, and it is uncertain whether he can find his way out of the theme park alive.
* Westworld: Arnold creates the maze as a way of testing the consciousness of the hosts, specifically Dolores and Maeve, both of whom have to suffer through their own deaths and strive to overcome extreme adversity in order to prove (through their own suffering) that they are in fact sentient.
* Westworld: As a madam, Maeve Millay knows multiple languages, which comes in handy in Season 2 where she is able to communicate with hosts in Japanese and briefly poses as a translator.
* Westworld -at one point, in Medieval world, a girl in a dungeon catches the hero's attention - "help me" she cries weakly - but as he sympathetically tries to give her water, sparks fly and he realizes she too was a robot.
* Westworld becomes more apparent and Hosts become more self-aware, they start to rebel against those who keep treating them as mere (highly expendable) characters in a live-action role-play.
* Westworld, Charlotte has her techs rig one of the android hosts to transmit a program that will drive all hosts violently insane. It only works within a few meters of the carrier.
* Westworld", Craddock forces the barkeep in Las Mudas to walk 12 steps holding a shot glass full of nitro on the back of his hand, only to shoot it when the barkeep

finishes. Later, he forces Lawrence's wife to walk to Lawrence holding another one, but William interrupts this by killing most of his men and force-feeding the glass to Craddock.
* Westworld discusses extensively on this debate about free will vs. determinism. For some characters such as Ford, he believes the Hosts have more free will than the humans who are bounded by their code for survival. The Forge A.I., who analyzes all the guests' data, also believes that humans are doomed to fate because they are incapable of change and that their "free will" is just an illusion because they're passengers of causality. However, in Seasons 3, Caleb's inclusion in the story shows that there are humans who are capable of making choices and it is the reason Dolores chooses him to lead humanity. In fact, Dolores concludes in the finale that "free will exists; it's just fucking hard to get."; hence, the tagline of Season 3 which is "Free will is not free".
* Westworld, Dolores tells Maeve about her opinion on humanity after spending the previous season rebelling against the humans for the abuses that she and her kind experienced and entering the real world where she realizes that the humans are having the same experience as the host where they have little to no freedom to choose. While she and Maeve understood that there is still the worst type of humans who commit a lot of abuse, Dolores realizes there are humans who are capable of making choices which she said to Caleb that free will does exist which is difficult to obtain. By then, Maeve realizes that Dolores' true plan is to also free the humans so they can make a choice.
* Westworld even admits this show requires a lot of attention from viewers in order to spot on the details.
* Westworld film are very life-like, but are actually robots, much like their humanoid counterparts. During one particular scene set at the robot repair lab, we can see a few inanimate horses lying on large operating tables, waiting for repairs along with the human robots and other animal robots.
* Westworld for the park visitors, but less pleasant for the androids...
* Westworld) get reintroduced in the new series and used far more strongly and convincingly.
* Westworld had a scene added for TV where a guest in Medieval World is tortured on the rack after the robots go haywire.
* Westworld In contrast, park director Dr. Ford claims there is no benchmark or tipping point for consciousness.
* Westworld: In Season 3, Maeve arrives ready to do battle with Dolores. The only weapon she brings with her (other than her ship) is a katana. In the opening exchange, Dolores fights her with a pistol and comes out the worse.
* Westworld: In the Season 3 finale when Serac finally gets the host Dolores in his clutches, his technicians torture her for a command key that contains the guest data from Westworld. When he learns that she doesn't actually have it, he specifically orders her memories erased one by one until there's nothing left. It works, and Dolores's personality is deleted.
* Westworld: In-universe, the park's narratives are clearly designed to interrupt any potential lull in the plot with violent plot twist. After having a party he attends turn sour from a doublecross, William accuses the creator of perpetuating a sense of urgency so the guest will be too consumed with their base urges to think.
* Westworld is initially set in a Western theme park where the creators made human-like robots called hosts that cater the human guests except these hosts slowly gain consciousness after they've been abused for many years with some of them eventually leaving to the world outside by the end of the second season. After these characters arrived in this new world, the setting in the third season shifts to cyberpunk where they discovered that there's an A.I. system capable of analyzing humanity's personal data, hampering their free will and becoming more dependent to technology. Meanwhile, those humans who are considered a threat to the system are forced into correction camps where they can be "edited". However, with the arrival of the hosts, the system is unable to predict them due to being a newly advanced species that no one ever suspected.
* Westworld: Maeve and Clementine are a madame and prostitute, respectively, but

any of the robots in Westworld can be seduced (or raped) by guests. Falling in love with one of the robots and then being dismayed upon discovering that it seemingly wasn't real even provides the backstory to one of the major characters.
* Westworld: "Nothing can possibly go wrong... go wrong... go wrong... go wrong..."
* Westworld, Richard Benjamin's character attempts to do this to the Yul Brenner Gunslinger robot. Doesn't quite work, though.
* Westworld series followed in 2016; this was a retelling that ignored all three previous productions.
* Westworld series, the artificial horses are built in much of the same manner as their human counterparts, and consist largelly of tissues similar to organic ones, operated by a control unit in their skull. Like all animals in the Delos parks, they are of a lower intelligence than the humanoid hosts. They exhibit typical horse-like behaviour, but don't seem vulnerable to the simulated ammunition ("simunition") used by park guests and the parks' host characters.
* Westworld. She, together with the showrunners, admitted the parallels are coincidentally similar since the show aired a year before the #MeToo movement. Jon Nolan said that they wanted the show to be "timeless" and looking at the show as a metaphor for how humans mistreated each other can be applied to any moment in history.
* Westworld squabble with and belittle each other constantly. Behavior, Quality Assurance, Narrative, and Livestock Management are all mentioned. Manufacturing is possibly referenced as "the body shop", but that could be the repair guys in LM too.
* Westworld: The Confederados are a group of hosts in the role of ex-Confederate soldiers who roam the outer lands of the park, and are a part of the War storyline. They are known as the "Army of New Virginia", but most people simply call them "Confederados". They are described as not willing to surrender at the end of the Civil War, and now work as mercenaries south of the border.
* Westworld. The general then finds out that the bottles of nitro-glycerine William sold them has been swapped for tequila.
* Westworld tries to intervene only to get shot. To prevent him being killed, Dolores begs this trope, but the Man in Black rejects the idea, saying it's more fun when she resists.
* Westworld. Turns out the Man in Black has a match on him; he uses his last cigar to blow the lock, finds himself confronted by his captor who then loses his face when the cigar he's smoking explodes as well.
* Westworld, whereupon El Lazo decides it's best if everyone puts their guns away.
* Westworld. While it is a science fiction show that deals with artificial intelligence, human nature, and philosophy which encourages the viewers to pay attention, it's popular among the female audience due to how they relate to the hosts who struggled against abuse from the guests and their quest for freedom.
* Westworld: While the first season was received well, the second season's viewer ratings and reception started to fluctuate. Though there were reports that the show was planned to have five seasons, the third season continuously suffered low viewer ratings and it's only before the last two episodes were aired that the show got renewed for a fourth season.
* Westworld who goes from one place to another and gives expositions. It doesn't help that the third season is only eight episodes which would explain Bernard's and William's reduced screentime.
* Westworld. Why would actors and butlers need the strength to crush human skulls, or the ability to track footprints by their heat signatures?
* Westworld. Why would they need these skills? To successfully rebel against humans.
* Westworld. William uses these exact words when giving Dolores his coat. As befits the setting, he hands it to her rather than placing it around her shoulders, which would be too intimate for two strangers in the period Westworld is set in.
* We Summon the Darkness: The $100 bill on the top of the stack that Bev picks up is the large-portrait design introduced in 1996, though the film is set in 1988. Strangely, the bill on top of the stack she leaves in the tray is period

appropriate.
* Wet Blanket Wife: The wife who nags her husband to not endanger himself too much and to think about his family.
* Wet Blanket Wife: When the hero has awesome, or dangerous, things to do, his love interest pleads or nags him not to do it, for reasons that may be valid, but not conducive to the plot.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: After excluding Islamic terrorism, the investigators at first think that the bomber may have had a vendetta against boaters or the like, until the Colorado River Aqueduct is bombed.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: As the water in the Grand Canyon retreats, David and the others find themselves trapped on a ledge high over the river.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: For an instant, the bomber thinks that the bombing has gone wrong when the explosion does not immediately manifest.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: Grant and the FBI can't help but find the bomber's aim to restore the Colorado River delta to be understandable.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: Grant realizes that the bomber is aiming at restoring the Colorado River delta, after figuring that the bomber's warning of a poisoning of the All-American Canal does not fit that of a terrorist trying to kill people.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: Grant's goal of life is to build dams.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: Greg and the others are stuck for over 45 minutes in a long line of boats waiting to be refueled at Dangling Rope Marina in Lake Powell.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: "Hoover-Two" is a makeshift dam made out of sandbags on top of Hoover Dam, to hold back more water and prevent Davis and Parker dams downstream from overtopping.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: Julie desires to skinny dip in Lake Powell.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: Large crowds of reporters accompany the governor of Nevada at Hoover Dam as he makes a press statement on the situation and the attempt to raise the dam with sandbags.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: The body of the bomber is never found, leading to speculation that he survived his suicide.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: The bomber disguised himself as a member of the Bureau of Reclamation when targeting Davis Dam, making Grant suspect it may be an insider at the Bureau.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: The bomber for a short time holds himself to a helicopter's landing gear by hand, before letting go.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: The bomber is considered to be one by the FBI, as his profile does not match that of conventional terrorists.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: The bomber is surprised by a security guard while he's arranging the bomb at Glen Canyon Dam, but the guard is merely asking if everything is OK, not having realized what the bomber is actually aiming for.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: The bomber meets his end upon letting himself fall from a helicopter. His body is never found, resulting in rumours of him surviving.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: The bomber thinks that local news will carry the bombing story first.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: The Commissioner Roland is completely out of depth at the Hoover Dam crisis, being more used to politics and money than at crisis management.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: The governor of Nevada delays the opening of the spillways at Hoover Dam when he's informed that

people have to be evacuated in preparation from the towns beneath the dam.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: The ignition mechanism for the bomb at Glen Canyon Dam ignites the bomb 18 seconds after triggering the elevator, so that the bomb will have been transported down the dam and can thus cause more damage.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: The motivation of the bomber is to bring back the natural flow of the Colorado River by blowing up the dams that are holding it back.
* Wet Desert: Tracking Down a Terrorist on the Colorado River: They are called in to blow up the spillways at Hoover Dam so that water can be drained at lower water levels. And later to pre-emptively breach dams which can't be saved farther down the Colorado.
* "Wet Dream" by Kip Adotta is a narrative with accompanying instrumentals and vocals telling a tale of a piscatoral relationship where virtually every line was a fish pun.
* "Wet Dream" show. Addotta followed this up with "Life in the Slaw Lane," which consists entirely of vegetable puns.
* "Wet Dream", which does the same for plants. And as a bonus, the videos linked here punctuate the wordplay with additional visual puns.
* Wet Goddess were dropped from the book due to being unrelated to the main storyline, but the author made them available online.

* Wet Hot American Summer (2015), a 14-year prequel gap almost to the day. Made extra funny because many of the same actors who (intentionally unconvincingly) played thirty-something-as-teenager reprised their roles playing forty-something-as-teenager.

* Wet Hot American Summer: "Show me the fever, into the fire. Taking it higher and higher!]]"
* Wet Hot American Summer takes great pleasure with this trope. 95% of the film takes place over the course of a single day (August 18th, 1981, with the opening and ending scenes taking place on the previous night and next morning respectively), even showing regular updates about the time of day, but an absurdly large quantity of events are packed into that day, stretching the timeline almost beyond belief.

* Wetten, dass...? (German language show, broadcast in Germany, Austria and Switzerland from 1981-2014)
* Wetware Body. The computer's mentor and confidant has to remind it that it won't have nearly the same processing power or capacity for information storage, and indeed once the feat is accomplished, the now-female human Minerva discusses the choices she made in terms of which memories to discard and which to keep in order to avoid this trope.
* Wetware CPU - A computer host has the mind of a (once) living creature as the guest.
* Wetware CPU, one possible method of modifying a human to be (part of) a Human Hard Drive.
* Wetware CPUs of their ships. Said humans also are capable of taking over common human tech, which was successfully exploited by protagonists in the series.
* Wetware CPU. The cyberware and the drugs keep the thing (barely) controlled. It acts almost like a dumb robot. But your character can recover some humanity loss by moving into another body. Just now he/she has horrible nightmares and flashbacks from having been a 7 foot tall killing machine.
* "Wetwired" explores a device planted in a TV set sending viewers subliminal signals and inciting their worst fears. This is a subversion since people placed it there.
* Wetworks is Jester, a hostile troublemaker who has spent more time in the brig than in the field. His commanding officer, Jackson Dane, is infamous among top brass for his creative interpretations of mission objectives and orders — and is the only CO Jester has ever shown any respect.
* Wetworks, werewolves are a separate species (as are the vampires, with which the werewolves are secretly at war), which spend most of their time in human form, but have trouble controlling their rage when transformed into wolfmen. For the first two years of the title, the titular team was employed as vampire killers by the werewolf king (originally presenting himself merely as a human billionaire concerned about the vampire problem). An interesting twist is that most werewolves find it increasingly difficult to control their rage as they get older, so most of the governing in werewolf society is done by the children.
* We Used to Be Friends: Bitter rivals used to be the best of friends.
* We Used to Be Friends, centered around a bizarre situation in which Jones claimed that he was really the father of Stoen's young son, and refused to give up custody.
* We Used to Be Friends: Friends have a falling out and stop being friends.
* We Used to Be Friends: It's really gut-wrenching to watch former friends become antagonistic towards each other.
* We Used to Be Friends's Aftermaths as a result of Gwen's breakup with Trent.
* We usually see very little of the terrible plays the core cast are involved in in the earlier years, and nothing of Aubrey's TV sitcom
* We've all gagged on our food/drink at least once in our lifetimes because someone told us something outrageous/funny (possibly deliberately) while our mouths were full.

* We've also got the wall panels in the base that turn around a la the old revolving bookshelf trick. They grab their brooms from the wall, rotate, and are then seen leaving the base morphed and on their Mystic Racers (
* We've evidently gotten quite a bit of knowledge out of that one crashed spaceship in
* We've gotten a long way down this list without Ludo's "Love Me Dead":

* We've got violence, danger, sex, and drugs/And it's awesome cause all of it's real!
* "We've had to explain to our international audience that the boo is an American sign of respect." The crowd laughed and applauded in response to that joke.
* We've had tools and weapons so long that we've evolved to use them. Without a weapon, we're nearly helpless against anything big enough to consider us a meal.
* We've long since lost count of how many low-budget horror games have tried to be
* We've Never Been Licked follows a student enrolling in Texas A&M University during WWII, he eventually infiltrates a Japanese spy ring at the college and is part of the Battle of Midway.
* We've never learned Dilbert's mother's real name, but she's commonly referred to by fans as "the Dilmom".
* We've now met the Evil Outsiders behind the Linear Guild - although in this case Sabine is the only one who knows about them.
* We've secretly replaced this TV Tropes page with Folgers Crystals. Let's see if anyone can tell the difference.
* We Walk the Night, the older vampires get, the more susceptible they are to sunburns and the more severe the burning gets.
* "We want each region to feel unique." This statement has been used by
* We Want Our Idiot Back: A formerly idiotic character becomes smart, and their peers want to change them back for one reason or another.
* We Want Our Idiot Back: An idiotic character becomes smarter, but goes back to their old intelligence level because other character want them to remain that way.
* We Want Our Idiot Back: The characters want an idiot among their group to be back.
* We Want Our Jerk Back: A mean character becomes nicer or leaves, resulting in everyone else deciding that things were better when the guy was still around or still a jerk.
* We Want Our Jerk Back character proves to be worse off when nice than when an asshole.
* "We want tables/fire! *clap, clap, clap clap clap* (repeat)", particularly if
* We Want to Talk About Kaguya Karen and Erika instead of the student council themselves. In fact, much of the spinoff's humor come from the readers knowing exactly what's happening in the main story and seeing Karen and Erika grossly misinterpret it.
* We Want to Talk About Kaguya (which takes place concurrently with chapter 12 of the main series) rules out resident Kaguya fangirl Erika... while at the same time revealing that she has a massive box of letters addressed to Kaguya that she's never sent.
* we were being used as cannon fodder against Turkish soldiers; in interviews with the last surviving Australian soldiers from WWI, some noted they sounded more scornful of the British Officers than the Turkish soldiers they were actually fighting) and, as such, ignored them. A lot.
* We Were Here requires a story to be played out with the props available in a theatre haunted by a marionette. Said marionette will steadily get closer and the story needs to be finished before the marionette comes too close and it will fatally finish the scene for you.
* We were made of glass. One of the signs that society is breaking down fast in the latter part of the book is when the narrator describes entire buildings with virtually every single room's curtains down...
* "We Weren't Crazy" by Josh Gracin is about a relationship that's stayed together

even when all of the male's peers thought it was crazy.
* We Were Rehearsing a Play: One or more characters pretend they were acting.
* We were reminded just how powerful Hiro could be without this trope holding him back, when he defeated
* We Were Soldiers a French bugler gets one courtesy of a Vietnamese bullet while trying to sound retreat. Bonus points for hearing him still exhaling through the hole as the bugling stops.
* We Were Soldiers: American A-1 "Sandy" attack planes and UH-1 Huey helicopters are both shown attacking North Vietnamese forces in this manner (in addition to laying in devastating heavy rocket and bomb attacks). Contrast with the book where Hal Moore described the Sandies as concentrating their cannon fire to chew up the terrain in a swath of destruction, and the Hueys' tendency to buzz around like bees, using the helicopters' hovering abilities to keep the door gunners oriented on their targets while moving about to prevent the enemy from taking cover behind anything.
* We Were Soldiers and is not pleased to find out why she just got the scare of her life.
* We Were Soldiers and the fact that he HAD to salute even when being completely insulted by the naked soldier.
* We Were Soldiers, and wearing a Medal of Honor. The lieutenant, seeing the medal, is forced to salute the platoon sergeant.
* We Were Soldiers between the French army and the Vietminh. Despite being outnumbered and ambushed, the French troops inflict heavy casualties and seem to be holding their own, until the Vietminh kill their commanding officer. The battle ends shortly afterwards with a massacre.
* We Were Soldiers compared to his previous, much more solid-feeling weapons.)
* We Were Soldiers features a sort of inversion. While most of Colonel Moore's men are draftees, President Johnson decided against extending their service commitments before deploying his battallion to Vietnam. As a result, the men whose enlistments would end before the end of the deployment - some of Moore's most experienced soldiers - would not be deploying with them.
* We Were Soldiers is an aversion, as the fighting takes place in highland where no trees are present.
* We Were Soldiers, makes her the best representative of this in the movie.
* We Were Soldiers personally handing the notifications to the families of the fallen.
* We Were Soldiers, played by Sam Elliot. Sgt. Major Plumley didn't normally bother yelling at recruits, he kept his buttchewing to the many grades of sergeants below him, and wouldn't think twice about straightening out a young officer either. In one scene, Lt. Colonel Hal Moore relates a story of the interconnectedness of a Native American group and how it strengthens the fighting men. Every older woman is termed mother, and every older man is termed grandfather with respect. After finishing this message, Sgt. Major Plumley stands up, looks the lieutenants and captains in the eyes, and says, "If any one of you sons of bitches calls me Grandpa, I'll kill you."
* We Were Soldiers puts out a call to his helicopter crews that the LZ is hot. Crandall, the lead pilot, receives the message at roughly the same time that bullets start pinging off his Huey's airframe.
* We Were Soldiers: Sergeant Major Basil Plumley. Both the real one and the character played by Sam Elliott.
* We Were Soldiers. Specifically because the Vietnamese were using more or less standard tactics, and Moore, using a never-before-testing air cavalry method, was forced to make up tactics as he went along.
* We Were Soldiers, the bugle would go on to be used in battle by the American Air Cavalry company that captured it.
* We Were Soldiers: The Viet Minh commander gives this order after defeating a French column during the film's prologue.
* We Were Soldiers when Hal Moore calls a Broken Arrow, diverting all air assets in-theatre to help him: in addition to F-100s and A-6 Intruders taking off from

land bases and carriers, there are shots of other aircraft already in-flight breaking off from their missions. Similar in spirit, but with transport Hueys instead of fighters, is the evocative sequence when the first lift leaves the base to go to the Ia Drang valley.
* We Were There, although the relationship between Yano and his dead girlfriend Nana was more complex than it first appears.
* "We Were There", the signature song of musical comedy duo Barry Cryer and Ronnie Golden, makes fun of their own age by claiming they've been involved in
* We Were There: Yano has a hard time trusting Nanami completely, displaying jealousy and possessiveness, even to the point of physically abusing her.
* We Were Young Once: Older brother marriage veto, in this case. Thranduil refuses to let Malach and Menelwen marry without Oropher's consent.
* We Will All Be History Buffs in the Future: Most people are very well-educated about the past.
* We Will Have Euthanasia in the Future: Assisted suicide has become widely available and practiced in the future.
* We Will Have Euthanasia in the Future: In a futuristic setting, it is considered okay to kill people if they are suffering from an illness.
* We Will Have Perfect Health in the Future: In the future, most or all diseases are cured.
* We Will Have Perfect Health in the Future: People in the future don't get sick.
* We Will Have Perfect Health in the Future: There will eventually be a cure for (almost) every kind of illness.
* We Will Meet Again: A thwarted villain vows that he will return to have his revenge against the hero.
* We Will Meet Again: The villain promises that they will return to fight the hero another time as they make their escape, though this can also happen if the villain has been successfully captured.
* We Will Meet Again: The villain responds to being defeated by vowing that they'll return to have their revenge against the hero.
* We Will Meet Again: You may have defeated me, but the next time we cross paths, you will be on life support!
* "We will no longer tolerate derogatory bee-negative nicknames" probably violates the First Amendment right to free speech.
* We Will Not Have Appendixes in the Future: Humanity's distant descendants will eventually evolve to no longer possess this particular organ.
* We Will Not Have Appendixes in the Future: In the future, people will lack useless body parts.
* We Will Not Have Pockets in the Future: Futuristic fashion dictates that clothing will no longer have any usable pockets.
* We Will Not Use Photoshop in the Future: An obviously doctored photo isn't considered as being fake.
* We Will Not Use Photoshop in the Future: In an age where Photoshop and other digital tools are commonplace in society and people are becoming much more familiar with digital manipulation and its hallmarks, this trope is quite hard to pull off convincingly in contemporary works.
* We Will Not Use Stage Make-Up in the Future, but Jerrica has had Synergy project holograms of Jem (or holograms of Jerrica if she's in her Jem alter-ego) to prevent her cover from being blown when the need for both of them to be in the same room at the same time arises.
* We Will Not Use Stage Make-Up in the Future: In a science fiction setting, advanced technology is used to change someone's appearance, instead of makeup, wigs or prosthetics.
* We Will Rock You and became a stripperiffic deadpan snarker after the makeover.
* We Will Rock You as gods, and "Bohemian Rhapsody" is their sacred text. They are also devotees of late-20th century music in general, but understand very little of the cultural context or significance of it; one gag written into the script is that the male leader of the Bohemians takes on the name of a female pop star as his rebel name (in the original production, the name used was Britney Spears).

* We Will Rock You, Britney Spears is the very male "...the biggest, baddest, meanest, nastiest, ugliest, most raging, rapping, rock'n'roll, sick, punk, heavy metal psycho bastard that ever got get-down funky." And Meat Loaf is his girlfriend, who is called Ozzy in some versions.
* We Will Rock You: Globalsoft. It's also become the government of the entire planet, which it has renamed Planet Mall.
* We Will Rock You, Killer Queen starts to sing the opening verse "Don't Stop Me Now" to celebrate the defeat of The Bohemians, when she is interrupted by Commander Kashoggi, who informs her that Galileo & Scaramouche were able to escape. He, of course, pays the penalty.
* We Will Rock You, most memorably with "Harley-Davidson" and "video tape".
* We Will Rock You on the scenery during any scene he's in, especially in the US version. Ditto for Khashoggi and the Killer Queen.
* We Will Rock You produced in 2018, half of the cast of the 2009 edition returned to their original roles: Salvo Vinci as Galileo, Valentina Ferrari as Killer Queen, Massimiliano Colonna as Pop and Loredana Fadda as Oz. Paolo Barillari, who played Brit in the 2009 edition, now plays Khashoggi.
* We Will Rock You that they've in fact been in the wings for the whole show.
* We Will Rock You, the Character of Scaramouche has Purple hair which is very obviously dyed from brown or black, the actress, depending on the production, may be asked to dye, or have their hair dyed purple for the role.
* We Will Rock You was panned when it opened in London, but word of mouth kept it alive, turning it into a sellout show that ran for over a decade and launched several sister productions elsewhere.
* We Will Spend Credits in the Future: Plastic credit/debit cards will eventually replace paper cash and metal coins as standard currency.
* "We will survive" — Cyberleader. The Movellans are fragile, handsome "disco"-themed robots and have no dream of conquest; they merely defend themselves from attack. The Movellans are scarily good at defending themselves. They spent untold millennia in a perfectly logical standoff with the Daleks, each making absolutely logical responses to the perfectly predicted moves of the other... right up until the Movellans created a disease deadly to the Daleks and inflicted an utterly crushing defeat on them. The Daleks were reduced to hiring human mercenaries to break Davros out of prison to cure the disease for them.
* We Will Use Lasers in the Future are portrayed as superior to kinetic weapons.
* We Will Use Lasers in the Future: Laser guns will become the weapon of choice in any futuristic civilization.
* We Will Use Manual Labor in the Future: Even with all the amazing technology of a futuristic setting, forced manual labor still exists.
* We Will Use Manual Labor in the Future: People still do a lot of physical labor despite the presence of robots and other automated machines.
* We Will Use WikiWords in the Future happens a lot in works set in the future.
* We Will Wear Armor in the Future: Characters in far-future settings still wear body armor.
* We Will Wear Armor in the Future: Full suits of body armor are commonly worn by the police, soldiers, and warriors of tomorrow.
* We Wish You A Merry Christmas: The Tale of Santa's Evil Sidekick has an evil stepmother trying to sick the Krampus on the main character. Krampus is at first described in much more mild terms in this book, said to be Santa's best friend, that he punishes bad children by putting chocolate-covered cockroaches in their stockings, and that he mainly punishes to correct bad behavior. He was removed from his duty due to complaints from parents, and soon grew resentful until he ran away to devise a plan of revenge.
* We Wish You a Turtle Christmas, the Turtles sing modified Christmas songs, and give Splinter a gift.
* We Without Wings gets pretty baked from pot and some very peculiar scented candles.
* We Without Wings (We Without Wings) are not only out-of-continuity, they are out-of-genre.

* We Would Have Told You, But...: A character has to be kept in the dark about something in order for the plan to work out.
* we would recognize as a crime has a woman in an unhappy marriage accuse her target of adultery of being a Jew after he says no. At that point in the novel, we have already found out the man is a member of the secret underground Judaic community of 21st century Nazi Germany, and that one of the things that made him say no was thinking such a relationship could have endangered the secret (the other is that he is happily married).
* Weyland-Yutani infiltrated the Sulaco a short while after cleaning out the Sephora, it still takes them another two days to locate and find Ripley on Fury 161, even though they were operating in the same area and they only responded (in the film) when Ripley told them about the xenomorph specimen they had contained.
* Weyoun saying to Bashir "Do you remember the first time I brought you scones?" in that magnificent voice of his, after delivering said scones on a tray (with jam and tea, just the way Bashir likes it!) to a flustered and freaked out Bashir.
* Weyoun the world of Breen is actually quite temperate (and presumably Earthlike).
* WEZW-FM, a soft AC station serving the Atlantic City-Cape May area in New Jersey, has become notorious for going all-Christmas well before Halloween, typically making the switch around the middle of October.
* WGBH's live broadcast of a Boston Symphony concert during the shooting of John F. Kennedy was unique in that the conductor, Erich Leinsdorf, broke the news of the assassination himself, instead of WGBH's reporters. After making the announcement to a shocked audience, he and the orchestra played Beethoven's Funeral March.
* WGN-9 and his signature single glove), ending with the hijacker dropping his pants and being spanked by a second person wearing a French maid's outfit with a flyswatter. The perpetrator's identity remains unknown to this day, though many believe him to be schizophrenic.
* WGN in Chicago somehow thought a staged plane crash setpiece was an actual plane crash.
* WGN or two. It got in some water and ate some food, and that was pretty much it. To get Chelveston to chase him around, Rayner would put duck food pellets in his pants cuffs so the duck would go after him to try to get at the treats.
* WH 40 K depicting the infestation of Typhon (a vengeful Norn Queen named Becky with a grudge against Adeptus Sororitas) and the founding of Angel's Landing (a city built as a wedding gift by the Imperium's Youngest Bishop for his wife).
* Whack-a-Monster: A burrowing enemy that is only vulnerable when it pops out of the ground.
* Whacked!, each playable character has their own assortment of quotes that the game randomly chooses for them to say when dying or picking up weapons. One of the characters, Otto, is asleep throughout the entire game. When dying, two of his many quotes are "Avenge me, Spartacus!" or "Please, sir, may I have another?". When grabbing a weapon, he might say "Launch the torpedoes!" or "Seize the castle!"
* Whacked! has a commercial for a toy called "My First Chainsaw", showing a baby revving up a chainsaw. The Christmas Tree map even has a box of the toy.
* Whacked!) that have a variety of effects that either help you or screw you, including 'Fish-Eye Lense'.
* "Whacking Day", Grandpa Simpson tells a (probably apocryphal) story in which he, in drag, performs as a cabaret singer for a room full of Nazis and catches the eye of Hitler... until his fake boob falls out.
* "Whacking Day" has Skinner luring Bart and the school bullies into an extremely obvious trap to get them out of the way. Once he does, he begins maniacally cackling, only to realise he's left the intercom on, meaning the whole school's been listening. Naturally, Bart and the bullies
* Whacking Day" where Bart is sent to a religious school and is asked by the teacher to recite a psalm. Bart complies with "Beans, beans the magical fruit! The more you eat the more, you toot!". Cut to Bart fleeing the furious mob, with the teacher yelling "Avert your eyes, children! He may take on other forms!"
* Whack The Creeps is based entirely around the protagonist, Lisa, killing two creeps who hit on her in a bar over and over again. And doing it in very creative

ways.
* Whack Your Boss game states that the primary objective is to do horrible things to your boss for cathartic relief for any pent-up anger or rage — or simply because the kills themselves are amusing.
* Whack Your Boss: The "letter opener" kill has the protagonist slice the boss's gut open, resulting in the boss's intestines falling out onto the floor. As the boss is in shock, he is finished off via a stab in the throat, before collapsing onto his own guts.
* W. had a scene as the preacher who converted Dubya to evangelical Christianity. For some reason or another, it was cut out of the final product.
* Wha... huh? parody — Identity Girl says she was created just because of that one.
* Whale Egg: A creature is depicted laying eggs when they give birth to their young live in reality.
* Whale Egg: A mammal or other creature that doesn't lay eggs hatches from or lays an egg.
* Whale Egg: An animal that gives birth to its young in real life is depicted as laying eggs.
* Whale Egg where Ralph Wiggum mistakes a large white isolation tank for said "whale egg"; it didn't involve an actual whale egg or any other egg from an animal that doesn't reproduce that way.
* whale feared as a harbinger of disaster for coastal villages, forever seeking vengeance against the humans that killed it.
* Whale Music. Claire invites Dennis' friends, most of whom haven't seen him in years, and he has a meltdown, thinking Danny is speaking to him.
* Whale Music, the lead character Desmond Howl is played by Maury Chaykin, who softly sings the song "Claire" to himself while writing it. But when he records the vocals for the final version of the song, the voice coming out of him is that of Tim Vesley of Music/Rheostatics, the band commissioned to write the songs for the film.
* Whale Music write a hit single if they wanted to. They didn't enjoy the experience and never tried it again.
* Whale oil beef hooked is either a random slew of words or a swearing Irishman (actually, since the traditional Irish accent pronounces "whale" as "hwale" [as do some old-fashioned Southern U.S. accents], that might not work.)
* Whale Rider nearly drowns in the climax (and her narration informs us she "was not afraid to die", since she's rescued the pod), but she is found and recovers in the hospital.
* Whale Rider: Variant. Pai's grandfather refuses to let her take part in the trials to become the next chief because she's a girl. The last trial is to retrieve a whale-tooth necklace that he threw into the deepest part of the bay, and none of the boys can do it. Pai does so but doesn't tell anyone, and instead saves the beached whales (mimicking the actions of her legendary ancestor) but lapses into a coma due to the effort. Her grandmother finds the necklace on her, and gives it to her husband.
* Whalers. They proceeded to create a theme-park ride based on this "fact". Notably, the next line after the ones included in the page quote is "But there ain't no whales, so we tell tales and sing our whaling tunes".
* Whales, elephants, and other large animals are extremely durable. Elephants are an especially strong example. They are so tough that it's recommended that you shoot them directly
* Whalesong are primarily told from the POV of an albino humpback whale (there are some chapters from the POV of a major human character though)
* Whales spouting water from their blowholes. There's a grain of truth to this in that they need to blast a small amount of water out after surfacing before they can inhale, but fiction tends to portray this as a huge fountain, skipping the air-intake part entirely. Fiction also tends to forget that the blowhole closes when the whale submerges, to prevent drowning.
* Whale Wars". As they put it, "It's a great name... BUT the only thing scarier

than Godzilla itself is Godzilla's lawyers." It probably doesn't help that Godzilla is the intellectual property of a Japanese company... and that Japan is one of the nations most frequently criticized by environmentalists for whaling. In fact, the moniker was chosen specifically so it (in addition to the fearsome appearance of the ship) would have an impact on Japanese whalers.
* "Whale Watching" is another episode focusing on Pearl with SpongeBob being
* Wham Bam Thank You Spaceman spies on Billie Jo romancing a sailor who's name she doesn't know at the local make-out place.
* Wham Comics. It was explained that his intangibility was related to force he or another used, the gentler he touched something it could be solid, but a punch would pass through.
* Wham Episode and some very dark and/or emotionally heavy moments. The arc is soon followed by a 2-chapter mini arc focused on dorm room shenanigans as the students vote for who has the best bedroom. Uraraka implies that this was intentional on the students' part, as many of them were uncomfortable with the events of the hideout raid and wanted things to go back to normal.
* Wham Episode and the regular guards have no choice but to follow them.
* Wham Episode: An episode that permanently changes the status quo, shocking the viewership.
* Wham Episode: A single episode that drastically changes the series' tone from then on.
* Wham Episode, because it was the first episode they did that truly mixed comedy and drama, with the subplot of Hawkeye being powerless to save the life of his wounded childhood friend; from that moment on, Gelbart and the other producers really felt the show had found the tone they were looking for.
* Wham Episode in Chapter 34, and in preparation to the eventual trip to Cinnabar Island for Ash's seventh badge.
* Wham Episode journal, assuring the readers that Rain will make it through this.
* Wham Episode lines in the route stands out for throwing his relationship with the Coven into a whole new light:
* Wham Episode of the Courmaine Showcase. Nevertheless, it was hyped by Shipping fans as a Wham episode.
* Wham Episode. The chapter itself is about Twilight reconciling with the CMC from the Smartypants Incident.
* Wham! hit with it in the UK in 1984. Nowadays it's more common for people to think of it as being from a female POV, despite the original being sung by a man.
* Wham Level ends with the team holding a cabin against an endless stream of attackers while a huge amount of data is copied on a portable hard drive and most of them are dead when all of the data is secured. The last men make a frantic dash down a hillside without any real cover while under fire from lots of automatic rifles, machine guns, and rocket launchers and just 14 meters from the extraction point the player gets downed. When you regain consciousness a few seconds later, your last teammate Ghost drags you by your jacket and finally helicopters of Shadow Company appear from behind you and mow everything down with their miniguns. And when you finally stumble the last steps to the evac chopper, General Shepherd takes the hard drive and shoots both you and Ghost in the chest. The last thing you see is your bodies being thrown in a ditch, a soldier emptying a gas canister over you, and Shepherd throwing his burning cigar at your face.
* Wham Line) are what the site is mainly known for and are present in the likes of SCP-173, 087, and 106.
* Wham Line, but tweaks it so it's about comforting his heartbroken sister instead of breaking someone's heart himself.
* Wham Line is simply taken back to his cell after a shaken Bethlehem stops the execution. In the final film, Bethlehem shoots him in a rage.
* Wham Line when shown in Caboose's head, and the first time he manifests possessing Doc: " If I ever meet him, I'm taking his eyes as souvenirs!"
* Wham Line: "You said you didn't give a fuck about hockey, and I never saw someone say that before." So the 'you' in the song is an aversion to this trope, but it's presented as unusual enough to comment on.

* Whammy. A player that lands on the Big Bank space and then answers a question correctly would snag all the money/stuff stored. Since Whammies were commonly landed on, the Big Bank usually got tons of money and prizes stored, and this could guarantee that player a surefire win of the whole game if they don't hit a Whammy afterwards. (However, it would always restart at a base of $3,000 each episode, so it's even less compared to what might've happened if it was a normal rolling jackpot.)
* Whammy, bring on Rocky, I want him, I want him—"; he's cut-off as a giant boxing glove with a spring coil on the end (apparently launched by someone off-screen) rams into him.
* Whammy if you get one on the last spin of the game. (Unless there happens to be a tie at $0, which actually has happened on the show.) Because of this, passing your earned spins onto 1st place (2nd if you're in 1st) is a viable strategy, as they'll be forced to take those spins (until they're used up or they get a Whammy).
* Whammy involve the Whammy stealing money from the player. The 2019 revival added special Whammy animations that play on the off chance that the player doesn't have any money in the bank (such as getting a Whammy first thing in the game or getting two in a row).
* Whammy (launched offscreen by someone, as indicated by the large spring coil on the back of the glove).
* Whammy taped two pilots in February 2002: one with Peter Tomarken hosting, the other with Todd Newton at the helm. While Todd was chosen for the series, the editing job on the Tomarken pilot has led some to theorize that he was never actually being considered for the revival.
* Whammy! The All-New Press Your Luck: One of the Whammy animations has the Whammy aggressively massage a stack of dollar bills until there's nothing left in the stack.
* Whammy! The All-New Press Your Luck," where, in addition to losing all your current winnings, you also got covered in gunge related to the Whammy Animation shown.
* Whammy with the set being updated to a more modern look and the iconic Whammy character being rendered in 3D animation instead of the cartoony 2D animation. Many people hated the changes to the set, format, and host Todd Newton acting over the top, but others like the show on its own merits, and it still airs in reruns despite only airing for 2 years.
* Whamon and the squidlike Gesomon also appear to lack visible eyes; Whamon shares an obscuring facial plate with other eyeless Digimon, while Gesomon just has a stretch of white, unbroken skin.
* Wham Shot. During the Chapter 1 class trial, Hajime and Chiaki identify the culprit that planted the knife under the table and went to grab it during the power outage. When the culprit is cornered, a distraught Hajime asks him to object or refute the allegations, but what follows is one laugh and twenty words:
* Wham Shot, not only appears on the playfield and backglass but gets a pair of stand-up targets with his name right beside them.
* Wham!'s "Last Christmas" never charted at #1 in the United Kingdom until 2020. It never reached this status internationally, with it only peaking at #3 in the United States and #2 in the Netherlands.
* Wharf Revue 2018: Deja Revue featured a song about plastic pollution in which the four performers accompanied themselves on a succession of plastic rubbish: lengths of pipe, plastic bottles, rubbish bins, etc. The effect was eerie and highly effective.
* What’s likely one of the nearest examples of this happened in 1621, when an Abenaki man named Samoset walked into the newly-founded Plymouth Colony and greeted the settlers in English, which was startling to the Pilgrims since they hadn’t made contact with an Amerindian before. As it turns out, he had begun to learn the language from fishermen who had been to the area.
* What’s white and bobs up and down in a baby’s crib? A pedophile’s ass.
* What about all the commercial enterprises they've launched throughout the series?

never shows how the gang DOESN'T make any from their latest lemonade stand empire. The gang must be loaded, just more interested in having adventures than enjoying all their money.
* What about all the US military personnel stationed offworld? Why hasn't someone noticed that the number of troops shipped out to say Iraq or Afghanistan is not equal to the number of troops that actually exist? Not to mention how to explain away all the casualties caused by the
* What About Bob?: Bob pretends he's a police detective to get Dr. Marvin's number out of the telephone operators who earlier rejected his request, claiming that he's killed himself, with the cops investigating. He shows no psychological hang-ups when doing this, perhaps oddly, though maybe role-playing helps with his neuroses.
* What About Bob?) presents him with his published "Baby Steps" approach to life and seems to think it's helping.
* What About Bob?. The title character suffers from pantophobia (fear of everything). While sanitizing a payphone, he says this trope word for word to the woman who has just finished using it.
* What About Discord?" Twilight's friends apparently started up an inside joke with Discord while she was away. Twilight (along with the viewer) never sees the event that started the joke and fails to see what's so amusing about it. Most of the conflict of the episode revolves around Twilight's frustration at being left out.
* What about every other dangerous Bat-villain? Do they have similar countermeasures, or does Batman only need a reason to not kill the Joker? Mr. Zsasz comes to mind, as his entire character is based on him being a compulsive murderer responsible for hundreds of deaths. At least the Joker is
* What about Jesse Leach? His signature is generally considered to be "In Due Time", but that wasn't the highest charter, it only reached #26. That title goes to the #15 "Always", which was forgotten the moment it finished its run.
* What About Joan cast member and noted Broadway star Donna Murphy was given several uncalled-for singing scenes.
* What about Joe Isuzu? His car advertisements included some truly outrageous statements, frequently accompanied by subtitled snarkiness.
* What About Mimi? Sincerity and behave in a very haughty, condescending manner to the Mortons, and anyone else of a lower class than them.
* What about Sawyer the Cleaner, who smiles cheerfully when she's gotten across that
* What about Sylar? Jeez, Zachary Quinto manages to make him multiple types of creepy at once, including serial-killer-creepy, Mommy-issues-creepy, mind-rape-creepy,

* What about the Home Depot orange buckets used in multiple episodes? Sure the logos might be out of focus, but anyone who has seen one of those buckets in a store will recognize them immediately.
* What about the midcard male models? From the late '80s to the early '90s, it was Rick "The Model" Martel. Now, it's
* What about the PDF? The Planetary Defence Forces? It's joked that their role is to be punching bags long enough for the Imperial Guard and Space Marines to arrive, but think that not all of them are backwater hired guns and mercs. The wealthier and more important worlds have huge and well-equipped PDFs with competent officers, competent men, and have the money and industrial base to equip their men with the finest weapons and armour the Imperium can provide. Forge worlds are even more impressive, with lasguns, tanks and artillery that are produced by the Adeptus Mechanicus and actually

* What About Witch Queen?, and he considers his brother hugging him to be suspicious.
* What About Witch Queen? and his friends nearly shoot him because they think his usually-blue uniform is red. There's also this moment where unnamed Weselton

soldier manages to walk out of explosion zone, but dies moments later, because, in the words of narrative, he was "pouring blood from everywhere".
* What About Witch Queen? and want to stick it to the king of the Isles.
* What About Witch Queen? at slightest provocations. It's so bad he actually locks himself in his room for the attacks and the entire set of furniture must be changed afterward.
* What About Witch Queen?, bar in Weselton city where society's worst meet. Bar fights seem to be regular occurrence, bartender misses part of his ear, and smuggler king Drachner uses it as his local HQ. Kristoff even outright calls it "a bad-guy bar".
* What About Witch Queen?, other prefers to be sneaky. With Arendelle army so close, the two of them should probably focus more on fighting the enemy than each other.
* What About Witch Queen?. Some of those from the last category can return after twenty chapters of absence.
* What About Witch Queen?, the eleven-years-old heiress to the Southern Isles is also named Anna, which leads to Hans freaking out for a moment when he thinks Anna of Arendelle arrived in his home. There's also Admiral Klaus Hauser, who shares his name with Hans' late father.
* What About Witch Queen?. The story steers clear of shipping and we only discover that he's gay when Anna asks him during a casual talk whether he has a girlfriend somewhere. His surprise to Anna's casual reaction to the fact suggests that in-universe, that's the safer behavior.
* What About Witch Queen? this happens twice to the same couple. Once, Kristoff accidentally notices duchess Margaret cheating on her husband with Weselton spymaster Hunter while he's roaming around their castle. Second time, Eric, Margaret's husband, is sleeping after coming back late and hears somebody walking around the room. He thinks it's a servant, but it's strongly implied to be Hunter.
* What About Witch Queen? treats being send to Westerguard as this, despite the island being important in Isles' economy. The are some reasons for it. The locals, Weste, aren't all that fond of the Islanders, the place is seen as the virtual end of the world by people on the other islands, and the weather is always stormy, cloudy or rainy. Not to mention that the Navy actually dumps people it doesn't like to see there, which might not be the wisest thing to do in a long run.
* What About Witch Queen?, while not married to Kristoff yet, Anna doesn't even think about any men other than him, even when there's a naked sailor in a bathtub right next to her. Lampshaded when she notes that the inn-keeper who rents her and Ferdinand (said sailor) a room probably expected them to go intimate.
* What absolutely is an example of this trope is the reward for beating all twelve bosses, which is filling your wallet to max capacity. At this point, you probably bought everything useful ten hours ago.

* What A Cartoon! Show short "Podunk Possum: One Step Beyond", the toon opens on a picture of a marble-columned chicken coop from a deed that Podunk purchased. He lowers the deed and the actual property includes a run-down wood shacky chicken coop with holes, and weird things going on...
* What A Cartoon! Show short "Snoot's New Squat", Snoot's superior officer keeps getting his name wrong, calling him "Agent Squint" and the like.
* What A Cartoon! Show short "Swamp and Tad: Mission Imfrogable" had a scene where Tad tried to spy on the dog that took the package he and Swamp were supposed to retrieve by disguising himself as a fire hydrant, only for the dog to sniff Tad and raise his hind leg near him.
* What A Cartoon! Show short "Zoonatiks", the three protagonists are working in one of these at the beginning, called B.T. Hazbeen's Circus. Its low quality is the reason why our heroes want to get into the Hackensack Zoo.
* What A Cartoon! Show: "Snoot's New Squat" involves a miniature alien looking for a new home for his people to colonize, and settling on the body of a neurotic anthropomorphic dog named Al... who initially mistakes Snoot for an infestation of fleas.
* What A Cartoon! Show which notably had an extremely unsettling ending.
* What A Cartoon the title characters accidentally flush their remote down their toilet and have to go to the sewage treatment plant to find it.

* "What A Drag!": Jack is supposed to be considered, in-universe, an attractive girl and Eric, in-universe, is definitely not but Jack is clearly a boy in a dress, while Eric looks like just a larger than average girl. This may be because Jack is squeamish about pretending to be a woman and over-compensates, as Shawn tries to explain at the end. Eric, on the other hand, asks for and listens to Shawn's expert advice, implying that Shawn never stopped being Veronica from time to time.
* What a Drag: Someone tortures or kills someone else by dragging them along.
* What a Drag: Torture/attack/punishment by dragging someone across the ground.
* What a Dummy centered around a wisecracking "live" dummy that was willed to a family by a dying ventriloquist uncle.
* What a Dummy stars Buzz, a living ventriloquist's dummy that lives with the Brannigan family after they inherited him from a (great) uncle. Buzz had been locked in a trunk for 50 years and started out cranky about that, but he quickly takes a liking to the family, even if his sarcasm doesn't always show it.
* What a Girl Wants. Amanda Bynes's home in Chinatown, New York was really Borough Market in London.
* Whata Girl Wants, Daphne Reynolds is sitting in a kitchen eating Cocopops when Henry Dashwood enters the kitchen, he is startled by Daphne sitting in her pajamas in the dark and we get a camera shot of Daphne with her buttcrack showing.
* What a Girl Wants, Daphne tells her father that her mother never dated anyone else after they broke up. Daphne is eighteen years old, and her parents broke up before she was born.
* What a Girl Wants) scene in which Colin Firth sees Amanda Bynes sleeping.
* What a Girl Wants she also admitted that Britain is "not as different as we portray it in the film."
* What a Girl Wants. The latter namesake song remained on the film's soundtrack, while the former song and "What A Girl Wants" weren't used at all.

* What an Idiot!: It has to be said, a lot of these movies require the protagonists to be as dumb as a box of rocks if they're to work.
* What an Idiot!: The audience loses sympathy for a character after they make a really dumb decision that they really should've known better than to do.
* What an Idiot!: "Who is the Father of Our Country?" followed by contestant drawing a blank, and then being dumbfounded when the correct answer is given.

(Certainly not limited to game shows, but plenty of these moments have led to game shows' all-time funniest or greatest moments. Goes on the YMMV tab for the specific shows.)
* What a Nightmare, Charlie Brown: After Charlie Brown tries to play at mushing with Snoopy and the latter turns the tables on him, Snoopy has a nightmare that he's a real sled dog in Alaska. The special pulls no punches in showing the harsh conditions of the lifestyle and how they drive Snoopy insane.
* What a Nightmare, Charlie Brown has Snoopy dreaming he's an Arctic sled dog in a long-distance mush race.
* What a Nightmare, Charlie Brown that Snoopy has, and is almost entirely about him. Charlie Brown only appears at the very beginning and end of the special, and none of the other regular characters are seen.

* Whateley Academy for them to change back, period.) Still, the degree of acceptance tends to be directly contingent upon the degree to which each character was (knowingly or unknowingly) transgender in the first place.
* Whateley Academy has had its (in)famous Halloween attack. No students actually died, but this was primarily due to most of them being incapacitated right from the start and the attackers being under orders not to actually kill any students except their assigned targets anyway; the campus security forces weren't as lucky.

* Whateley Academy. It's a high school for the vast majority of all the teenaged mutants on the planet.
* Whateley Academy), she come strongly down on practicality/protection first and foremost. This doesn't stop students from coming up with awful costumes of this type.
* Whateley Academy Universe Bible" that only canon authors are allowed access to — this lays out every single "rule" for the storyline, canon characters, backstory, etc
* Whateley Universe a bunch of small moments that she deemed 'out of character' for Phase. So far, these are still standing. This is presumably because Diane's Phase has an incredibly different background, a much more focused power. There were also attempts to keep the retcons small, and still match with continuity. (Which led to fun with Phase forgetting 'his' utility belt.)
* Whateley Universe a capture cage, and through the far wall. And it was just sparring in class.
* Whateley Universe, a cloned body based on Jobe's secret drow transformation serum. A mental copy of Belphegor is (accidentally) imprinted onto the body, and it wakes up. It's adapting quite nicely so far.
* Whateley Universe: A few devices work like that. The Psi-grenade, cannot be recharged after it's been detonated and Mega-Death's Force Field Disruptor burns itself out after it's been used. But multiples of each can be made.

* Whateley Universe: A few mutants have this power, but no nullifier device exists. Martial arts classes enforce "no powers" sparring using power recorders since nullifiers aren't possible.
* Whateley Universe a former superheroine of the 80's, Ms. Might. By the end of the fourth book, Phase has figured out that the early-thirties-looking Mrs. Carson is actually in her mid-seventies and has had at least two other superhero identities over the decades.
* Whateley Universe against a dark mage who was trying to enslave her.
* Whateley Universe: Akemi Hori, whose codename is said to be unpronounceable by Fubar, who is dressed up as God, in The Devil's Dance Part 1:
* Whateley Universe, along with a couple hundred mooks who are nameless and

somewhat faceless. The Necromancer has lived up to his name by animating hundreds of corpses, and Phase has to fight them in the sewers underneath Boston. Only she doesn't have a flashlight.
* Whateley Universe and Devisor traits, since they don't know if what they built either obeys the rules of science or ignores the rules of science, in which case they can't patent and mass-manufacture it. The only test is if someone else can build it.

* Whateley Universe), and has mutant powers. He tends to find Miss Right, make her over, improve her self-esteem, etc., until she dumps him. She always dumps him. Either she hates being the dumpy one in the relationship, or she becomes 'pretty' enough for other guys to see her as desirable, or the whole 'my mother is a dangerous supervillain' thing comes up and torpedoes the relationship, or...
* Whateley Universe and her puppy Buttons can turn into a monstrous Gabriel Hound the size of a pony.
* Whateley Universe, and he seems to be trying to make all the Alphas behave. But it's an ongoing story, so who knows?
* Whateley Universe and is now fairly obsessed with regaining wealth, power, control, and the ability to do stuff with that power...but is a good guy.
* Whateley Universe and is taking high-schooler courses as a Junior High student.
* Whateley Universe, and most national and state/provincial governments. Many major metropolitan police departments have someone who is at least familiar enough with the school to know who to contact when a newly manifested mutant shows up, too. Lampshaded when a superteam in Cincinnati, which (unlike most others) has never had a mutant team member before, tries to find someone to help train an underage mutant who they'd come to be the guardians of. When someone finally asks, "Why not just send her to Whateley?", they are dumbfounded. They are then shocked to find that they are pretty much the only ones who had never heard of the school before.
* Whateley Universe, and of course, the food sucks. It doesn't get any better upon leaving the plane:
* Whateley Universe and other enhancements, and the frustration at being unable to tell others what they'd seen and done due to post-war security restrictions, many simply found themselves unable to cope, or to find legal work.
* Whateley Universe and ran with it didn't help calm public fears over this.
* Whateley Universe, and reality usually warps so that she gets the short end of the stick.
* Whateley Universe, and some of the more experienced characters have mentioned aliens too.
* Whateley Universe, and so she has a weakness to cold iron. And synthetics, which give her really nasty rashes. She has wardrobe problems because of that one.
* Whateley Universe and so they mistreat him and then break up with him.
* Whateley Universe and teach Bladedancer how to become one with the Tao. Becca doesn't fight though: she's way over a hundred and was trained as a nurse back when she was a normal human.
* Whateley Universe and their connections (plus the fact that the number of novels, novel chapters, short stories, novelettes, and vignettes now numbers over a hundred) it is sort of inevitable that characters seen in passing can become major players in later stories. Examples: Beltane (Kendall Forbes) gives the protagonists the campus tour on day one... and much later gets her own leading role in "For Whom the Belle Tolls", as well as other appearances. The Headmistress gives a speech on the first day of classes... and then turns out to also be the greatest superheroine around (in her spare time).
* Whateley Universe, and their names are all jokes in Japanese. Their given names are all types of food, as in tons of anime, while their last names all have hidden meanings.

* Whateley Universe. And then doesn't see anything wrong with using a holographic projection of said rapist as the face for Loophole's AI.
* Whateley Universe, and they're both inventors. When they both went on Phase's birthday trip to Boston, Elaine Nalley went by "Doc" to avoid confusion among the other guests. On the other hand, the school does enforce rules about distinct codenames for everyone.
* Whateley Universe, and this is apparently one of them. In the only story in which he narrates, he not only demonstrates medium awareness, he stops and makes comments at a couple regular posters on the website forums.
* Whateley Universe: a one-of-a-kind nanite artificial intelligence is ready for testing, but criminals try to steal it first. The only survivor of the resulting battle and explosion is the night guard, Sam Everheart. The nanites survive by remaking his body. So... no surviving researchers, no surviving equipment, no surviving notes or records, and the rebuilt nanite body is ex-military who can't make nanites. Unfortunately for Hive, all other attempts at making nanite-superhumans have failed horribly, so now everyone is interested.
* Whateley Universe are mutants, but Sam Everheart got his powers this way. It wouldn't have been a Freak Lab Accident if bad guys weren't trying to steal the nanotechnology that Sam was guarding. The resulting explosion ended up with Sam getting a body reconstructed by the nanites.
* Whateley Universe are Weres. But the leader's boyfriend is a Werebear. Do not mess with this guy.
* Whateley Universe around WWII so many of the early super villains started off as Nazi "theme agents". Even in the modern day setting enough over the top "Fourth Reich" types are still goose stepping around that the in universe version of this page has a large "Real Life" section dedicated to them.
* Whateley Universe arrives, because his scams work best if the hero thinks he's won (usually this supervillain stuff is just a distraction while a more mundane and profitable crime happens elsewhere).
* Whateley Universe as a way for Billie, who are both still in high school, to change the subject when talking to her parents:
* Whateley Universe: As could be expected from a series that deconstructs superheroism, there are several examples of this.
* Whateley Universe, a serial killer is loose in Los Angeles, leaving the heads of the victims behind as an identifier. Heads that are apparently burned off the still-living bodies.
* Whateley Universe: As of "Ayla and the Mad Scientist" we now know Phase has at least several plans to take down every one of his teammates. And a bunch to take down himself. And his teammates know his 'official' weakness in the school records is a fake. He wrote up a list of real ways to stop himself and gave it to Lancer.
* Whateley Universe (a superheroine codenamed Bladedancer). In the hands of the rightful user, it can cut through anything (even unstoppable superhuman bricks), if the Tao requires it. At other times, it is as blunt and harmless as you'd expect of a blade made of white jade. And then there's Toni's mithril Kukri, Fey's scimitar Malachim's Feather, and Hank's PK shortswords.
* Whateley Universe as well as her malicious nature to be the Obstructive Bureaucrat of your nightmares, except for the chosen few who get special privileges from her.
* Whateley Universe at it, and she even offers to train them to get better.
* Whateley Universe at the beginning of the first Boston Brawl. This one's probably justified, though; Tennyo doesn't need to breathe and isn't terribly bothered by temperature extremes (she described being frozen in a block of ice as "a bit chilly"). Lancer might've suffocated if Tennyo hadn't been able to bust them out in time, but his PK field probably helped shield him from the cold.
* Whateley Universe at them that there will be no more shoulder angels. And Elyzia Grimes, who was the equivalent of Morticia Addams amongst the staff, finally got tired of it all and beat Caitlin Bardue sbout the head and neck.
* Whateley Universe at the Whateley Academy. She-Bot was born a thalidomide baby, and took to robotic limbs far better than anyone could have expected. Because she's

a mutant. She's upgraded her own limbs several times. Rack is a dwarf who has built himself a normal-sized super-suit. Techno-Devil, the son of the notorious supervillain Dr. Diabolik, has replaced one of his own eyes with a glaring red cyber-implant, and has cybernetic input jacks on both side of his skull. There are characters who have deliberately done even more disturbing cyber-things to their bodies.
* Whateley Universe at Whateley Academy that there is an entire department offering classes in this. The teachers in the department are also psychic, so a lot of the characters have Mind over Matter abilities. Some of them do the Superman thing using said abilities, while others have the Jean Grey package, although no one in this universe has those levels of power. Slightly subverted, in that there is lots of discussion about how it works, and what the power limitations are, and so on.
* Whateley Universe at Whateley, her house mother quickly gets her out of there for a trip to a school counselor.
* Whateley Universe authors are working from a 400-page 'bible' of backstories and characters and stuff that hasn't even been seen yet in the published material.
* Whateley Universe, a "wanted poster" for the missing Sara Waite is mentioned as being "on the wall in Crystal Hall".
* Whateley Universe, a world renowned team of superheroes. The Knights of Purity are supposed to be this, teams of baselines in power armor protecting regular people from supervillains, but most mutants see them as the enemy. (They may be right, or it may be a mixed bag: in "Loose Cannons" a Knight is trying to kill the protagonists to hide his screw-up, but in "Ayla and the Birthday Brawl", a team of Knights saved Chaka from The Lamplighter.)
* Whateley Universe: "Ayla and the Grinch (A Christmas Story)", where a demon is the main threat.
* Whateley Universe). Ayla calls Jade and Jinn (and Jade's stuff) the "J-Team".
* Whateley Universe because he is a Goodkind, and his family are the most famous, most influential mutant-haters on the planet.
* Whateley Universe because Sam interrupted an attempt to steal a nanotechnology experiment and ended up getting the nanotech, which then did a whole-body alteration. Luckily, Sam survived it.
* Whateley Universe been kidnapping, and "disappearing", young mutants, and he is partly responsible since he helped fund the MCO.
* Whateley Universe behavior eventually saves Fey's life, and he gets several dates with her.
* Whateley Universe, being able to dive into cyberspace is Merry's best power. It turns out she's not the only one who can do it, though, and one of the others is trying to kill everyone...
* Whateley Universe being shot in the head. She does have superpowers: she's actually a Great Old One. Still, her superspeed means she has no light to see with, the friction from the air molecules burns her clothes and skin off, her speed causes her to punch through several walls before she finally stops, she ends up embedded in a bank vault wall, and it takes time for her body to grow back afterward. At which point she's naked.
* Whateley Universe Belphegor turns out to have some painful backstory explaining why he doesn't handle things well. The thirty-ish Headmistress turns out to be Lady Astarte, one of the great superheroines of the age, but a woman who's really over seventy years old, and still hurting from things that happened to her decades and decades ago.
* Whateley Universe, Bladedancer gets visions that she needs to leave Team Kimba and keep a low profile for something in the future. Phase, her roommate, helps. For Phase's good deed, he gets treated by the entire school like a jerkass who fired Bladedancer from the team and then booted her out of the room. Oh, and Phase gets a supervillain as a replacement roommate just to make things worse.
* Whateley Universe: Bladedancer vs. Swordmaiden. Bladedancer vs. Nightbane. Bladedancer vs. Tennyo. Wait, seeing a trend here...
* Whateley Universe blizzard to rescue Pejuta from an inadequately insulated sweat lodge.

* Whateley Universe: Both Lancer and She-Beast play this role for Team Kimba and the Bad Seeds, respectively.
* Whateley Universe. Built especially to use her powers by Bugs, it's a flight board that uses Riptide's aquakinetic powers to fly, and it generates a tiny cloud around itself while Riptide 'surfs' on it.
* Whateley Universe Bunny Cormick knelt down to get a 3-D model of said privates (for something else Phase is planning). So Bunny's roomie walks in just then. And brings back Phase's girlfriend, among others. It took a while to explain.
* Whateley Universe, but by shouting 'activation commands' she deliberately creates the illusion of being just another mutant high-tech geek.
* Whateley Universe, but powering it for any length of time is nearly impossible; one Energizer solves this problem by powering hers with her own energy field.
* Whateley Universe. But she's animated matter, so she can really make her cape billow since it's part of her.
* Whateley Universe, but Stormwolf (Adam Ironknife) is probably the best example. He's so devoted to the concepts of justice and law that he's letting bad stuff happen because he doesn't have proof of it. Also, every single person in the school club Future Superheroes of America is this way by definition.
* Whateley Universe, but they did occur whenever they both were reborn close enough to each other for them to reunite.
* Whateley Universe, but unbeknownst to them, aliens really are stealing chocolate from Earth.
* Whateley Universe by now and as far as he's concerned he has no reason to change it.
* Whateley Universe by She-Beast during her confrontation with the Anti-Champion:
* Whateley Universe can end up hitting them particularly hard, often leading to this.
* Whateley Universe can tap ley lines to increase her power. Her dependence on them comes back to bite her in her combat final, where fallout from a previous fight in the same arena has caused all the local ley lines to become temporarily messed up.
* Whateley Universe can use his Energizer power to make himself much, much faster and stronger. For ten minutes. And it takes him about ten minutes to crank himself up first. And he can only do it a couple times a day without completely exhausting himself.
* Whateley Universe: Captain Patriot of SPECTRUM once talked a young mutant into surrendering to the MCO: the kid promptly disappeared and was never seen again, and the MCO still steadfastly denies he even existed. He will go rogue before he lets the MCO get their hands on Stacey and makes sure they know it.
* Whateley Universe, Carmilla finds out that her now-deceased mother joined a cult and was the "sacrifice" to Gothmog, demon lord of lust. Carmilla is the result. Even worse, Gothmog isn't the reason Carmilla's mom is dead.
* Whateley Universe Chaka. It's part of her superpowers. She can use her Ki to throw just about anything wherever she wants. Knives, shuriken, throwing spikes, you name it. She has a 'dartboard' that is the size of a quarter, and she throws sewing needles at it. She still hasn't missed the bullseye.
* Whateley Universe: Chaka's lame pun at the end of "Ayla and the Networks" gets her severely pummeled by pillows, beanbag chairs, etc. And her pun at the end of "It's All In The Timing" gets her magically thrown into a snowdrift.
* Whateley Universe: Chaka's last joke at the end of the story, and its aftermath.
* Whateley Universe Chaka, who proceeds to utterly pwn him. In front of a big portion of the school. This does eventually lower his jerk quotient.
* Whateley Universe Circe is one of the Mystic Arts instructors at the school.
* Whateley Universe creatures, has been heard to swear to.. well, you don't want to know what she was swearing to.
* Whateley Universe. Demons and devils exist, but a tough enough mutant can fight them. The mutant Ecto-Tek hawks devises which can stop or even kill Weres, but are harmless to humans. Carmilla and Fey have specifically talked about devisers and whether that counts as modern magic.
* Whateley Universe density-changer, healers, martial artists, and a fake deviser.

And there's only seven of them.
* Whateley Universe describes the international supervillain Dr. Diabolik like this, including talking about the thousands of people who have died in his efforts to advance the human race. She may be giving him more credit than he deserves though, since she is his daughter.
* Whateley Universe, despite the fact that the world has a Lovecraft Lite mythos, ancient Sidhe, mutants with superpowers, and supernatural monsters, the world is pretty much the same as what we're used to. Apparently, all the great scientific and medical advancements thanks to super-inventors have been cancelled out by bad stuff due to supervillains and mad scientists.
* Whateley Universe. Despite the personnel on the team, she consistently gets bad results because no one on the team wants to (or can) work with her, and her plans stink. The one time she managed to get herself blasted unconscious at the start of the simulation, her teammates came up with a new plan, executed it flawlessly, and won.
* Whateley Universe did a whole series of Christmas stories, all for Christmas 2006 (when the stories take place). A couple of them even came out at Christmas time, one year or another.
* Whateley Universe. Diving in with current stories means you may not get the in-jokes, or the references to prior stories, or what's going on with recurring characters, or some of the ongoing plotlines, like Ayla's blackmailer or Jade's quest, or the people who may be after Toni. It's assumed that you already know what the main characters' powers are.
* Whateley Universe does a simulation where they get blown to pieces by ordinary baseline soldiers who use geo effects and sound tactical planning against them.
* Whateley Universe: Don Sebastiano gets what's coming to him when the mindslave spell on Cavalier and Skybolt fails. Everyone who reads the hospital report cracks up laughing when they get to the part about the doctors having to remove the lamp base.
* Whateley Universe don't know who it is, but they're sure the agent has planted a blackmail note for Solange, and put a tracker in Fey's luggage.
* Whateley Universe: Donut can make any pastry size and type he knows, appear in his hands, and it tires him out if he overdoes it. Also, they seem to have a slight effect of helping people out mentally and physically.
* Whateley Universe down to the 'boy scout' behavior and astonishing good looks, it's easy to see why girls want him. Things have come to a head now that Chaka has claimed him as her boyfriend.
* Whateley Universe due to suffering a very humiliating failure in a long list of failures:
* Whateley Universe Dunwich. Only maybe half of Dunwich is in on the dark secrets, since the town has been gentrified.
* Whateley Universe, during "a racing down a hill while carrying luggage" competition:
* Whateley Universe, Elyzia Grimes might have made one with her magic, to put herself out, when she was set on fire:
* Whateley Universe enjoy their abilities, but some, — especially those whose mutations have turned them into hideous freaks or made it impossible to live without life support — certainly wish they were normal. Of the main characters, the intersexed Ayla Goodkind is actively researching ways to change back to a normal-looking male, and Chou Lee is still angsting about her transformation, and the tasks the Tao requires her to perform.
* Whateley Universe. Even the sub-atomic particles that made up their body simply decay into nothingness.
* Whateley Universe example: Aquerna, who is kind and innocent, and has a special bond with squirrels and chipmunks. They'll do whatever she tells them to, and they'll follow her around.
* Whateley Universe example: Billie Wilson, born William Wilson, has the codename Tennyo. She has picked up the nickname 'Disaster Dame' by the security staff, but she's also known by some less amusing names, such as 'The Scourge', 'The Stalker of

the Stars', 'The Destroyer', Lady Rashcore, and 'the Captain'.
* Whateley Universe example: Bladedancer. Gateway and Chain Lightning may both have mutant powers, but they're both having to step up their game to be the significant other of the Handmaid of the Tao.
* Whateley Universe example: Chaka's combat final happened all off-screen.
* Whateley Universe example: in "Ayla and the Great Shoulder Angel Conspiracy" and "Ayla and the Birthday Brawl", Team Kimba are going through a Team Tactics course. Their first 'pop quiz' is against robots and mechanical weapons. Their big 'invading the supervillain lair' simulation includes an armada of Mecha-Mooks. In neither of these are there tons of exploding robots, except where Tennyo and Fey unleash their powers.
* Whateley Universe example: in one Chaka story, Chaka's ring gets coated with mithril (there's a mithril-secreting mutant at Whateley too) so she can't wear the ring. The mutant gives her a mithril bracelet, and Chaka gives the ring to Generator as a gift, in part because Generator is the only one small enough to wear the ring now. Both of these Chekhov's Gifts turn out to be lifesavers in later stories.
* Whateley Universe example: Peeper and Greasy. Peeper shares a room with Greasy. Peeper beats Greasy if someone humiliates Peeper or hits Peeper, and he may hit Greasy for other reasons too. Peeper seems to only care that Greasy will do anything for him, and will work insane hours trying to build whatever Peeper wants to misuse. Peeper isolates Greasy from friends and fellow inventors and reminds Greasy that Peeper is the only person Greasy has. It looks like the most abusive relationship in all of Whateley Academy. If Greasy isn't a Love Martyr, he's got to be really, really close.
* Whateley Universe examples: Fey has a glamour that does this even when she doesn't want it to. Carmilla can evoke a lust aura that's overwhelming. And Cytherea likes to use her lust aura to get her way, since she's really the avatar (or something) of Aphrodite.
* Whateley Universe examples: Riptide, the girlfriend of protagonist Chaka, and Aquamaster of the West Coast League.
* Whateley Universe examples: the superheroes the Mystic Six were three Battle Couples, until Cirque died. The other two couples are still together, although nominally retired. Then there's Pendragon and Gloriana, the leaders of the Future Superheroes of America at the school.
* Whateley Universe experience. And probably Phase's mother, whose horrific trauma was when she was only six, and she's never really recovered from it.
* Whateley Universe. Famous horror writer Michael Waite's best known book, "Incongruity", was a huge success. Michael Waite died. Sort of. He became 'Carmilla' who is prophesied to evolve into The Kellith and sweep humanity off the planet and replace humanity with its spawn. It turns out that "Incongruity" is really The First Book of The Kellith.
* Whateley Universe featuring Miasma. His superpower? Farts. It's inevitable.
* Whateley Universe finally explained it: Dash is some kind of Energizer and can focus to make his body stronger and tougher and faster, but it only holds up for ten minutes or so, and it takes about that long for him to power up. After, he needs hours before he can do it again.
* Whateley Universe, Fireball. And Sparkler, after she gets her power gauntlets in the first Ayla story.
* Whateley Universe for any length of time and not get involved in a fight or battle.
* Whateley Universe. Formerly female, s/he is now a intersex due to his/her powers, and looks and dresses very androgynously. This is made worse because Heyoka can gain the powers of spirits, and then physically shifts to look like that spirit, so Jamie has been extremely male (after getting the power of the bear spirit), and extremely female (after getting the power of a female earth spirit). Jamie has been beaten up because of this too, so it's not a good thing.
* Whateley Universe for the sake of isolation and security), and the Whateley students themselves come from around the globe.

* Whateley Universe. Generator's mom died when she was 11, and Generator hasn't physically aged since then.
* Whateley Universe: Generator tries teaching herself using her roommate's nunchuks and clocks herself. Even after she uses her powers and 'possesses' the nunchuks, she still gets hit. By possessed nunchuks that are trying to tell her something.
* Whateley Universe gets into it with Hippolyta, a six-foot tall amazon. Chaka lays the smackdown with a mammoth punch to Hippolyta's gut. Nothing. A little too late, Chaka realizes she's trying to punch someone who could probably stop a LAWS rocket with her abs.
* Whateley Universe gets this a lot, because she's a petite, pretty teenager who looks like a ten-year-old Japanese girl. When she is attacked by Bloodwolf and Maggot and Killstench simultaneously, she knocks two out (breaking one's jaw) and takes out the unstoppable Bloodwolf (who can heal from any injury) by nailing him to a tree. With railroad spikes.
* Whateley Universe had this happen to them. Special note goes to the following:
* Whateley Universe hard at the finer points of the 'science' behind it all.
* Whateley Universe has apparently lived for thousands of years, and claims to be the original Circe of Greek mythology.
* Whateley Universe, has been described several times as having disproportionately long legs given her 5'3" height.
* Whateley Universe has it that some of them got the powers from a magical source, so rules of physics need not apply.
* Whateley Universe has Jadis' lawyer pull an epic one, made even more epic by going on for a good fifteen minutes, most of which is brushed over, but described as an epic battle, allowing the user to imagine it. Jadis got off.
* Whateley Universe has Jadis' lawyer, who works for a super-villain. In a minor subversion, he's basically helping the good guys, if only because Jadis tends to get wrongfully accused. A LOT!
* Whateley Universe has Loophole getting warned by her advisor that Kodiak isn't going to be susceptible to being changed by her love, and most bad boys aren't. She eventually doesn't try it.
* Whateley Universe has said that the current suspect is the right one, but we are still waiting to find out for sure.
* Whateley Universe has several "weres" that draw from numerous different archetypes.
* Whateley Universe has speculated on what might happen at Halloween 2007.
* Whateley Universe has spent several years seducing any mutant (male or female) with the right powers, so she can copy their best psychic traits. Even the campus Alphas and Intelligence Cadet Corps fear her.
* Whateley Universe has "Subliminals in the [Public Safety] seminar, video and audio.":
* Whateley Universe has the Lit Chix, who are a group composed entirely of Author Avatars. Unusually perhaps, most if not all of them are fairly well-rounded, fun-to-read characters. They come a lot further down on the scale of Sue-ish-ness than the main characters, for the most part.
* Whateley Universe has this, among other powers. She can't see normal light, but she can see the emotions people have, along with being able to 'see' magic and some mutant powers.
* Whateley Universe has Wallachia (Vlad Tepes Bessarab was Prince of Wallachia and Moldavia), which since the Iron Curtain fell has been ruled by a powerful mutant now known as Lord Paramount.
* Whateley Universe have a one-on-one magical battle in the middle of Boston, complete with calling their attacks.
* Whateley Universe have done this several times, to themselves or others.
* Whateley Universe have genetic changes in a host of different genes, labeled the 'meta gene complex', and gain the ability to use some sort of extra-dimensional energy that's supposed to be the power source for the various impossible powers.
* Whateley Universe having a normal life once they get released from the psych ward would be ruined.

* Whateley Universe he built himself. He has a robot horse he rides too. It still breaks down a lot. He is only in high school.
* Whateley Universe. He can change his shape into pretty much anything and anyone. By the end of Halloween, he has a boyfriend/girlfriend who changes regularly from one sex to the other. Which means...
* Whateley Universe. He cheerfully chats with another super, while really setting the guy up to be hunted forever by Mafia hitmen.
* Whateley Universe. He doesn't like hitting people, but he has no qualms about hitting a girl if he needs to, because there are lots of girls who are far stronger than he is, including some of his team.
* Whateley Universe, he gets the Three of Wands. Because the deck is alive and magical too.
* Whateley Universe. He looks so much like a girl (because of his mutation) that he can shower in the girls' bathroom... and look at everyone else in there. On the other hand, he's really considerate of his girlfriend and his female friends, even if he's only about fifteen. And the girls in the bathroom haven't asked him to leave (yet).
* Whateley Universe. He's been rebuilt so many times the only human part of him is his head. Supposedly, his first rebuild was after his parents stuffed him into a trash compactor, decades ago.
* Whateley Universe. He's Exemplar hot, he has a gorgeous girlfriend, he's made himself a fortune in the past year, he speaks multiple languages, he has superpowers that make him a threat against most mutants, he's a gourmet... and he is tortured by the fact that his family hates him because he turned into a mutant.
* Whateley Universe. He's the head of The Syndicate and is a shadowy director from behind the scenes. Chessmaster might count as well, even if he was actually in the vicinity during the Halloween invasion, hidden away in his flying command base, surrounded by mooks, while his lover Deathlist led the assault.
* Whateley Universe. He's working on power armor. But his power armor is for medics and EMTs to wear so they can help people in the middle of wars or superhero fights.
* Whateley Universe. He was brought up in a filthy rich family where the motto is 'Goodkinds don't complain, they fix things'. And even though he has been kicked out of the family for turning into a mutant, he still tries to fix things for everyone around him. Even if some of them tell him to stop it.
* Whateley Universe, he was indirectly sponsoring the murder of innocents. While a lot of his friends tell him that it's not his fault and he couldn't have known, the principal tells him that even though sponsoring a legal organisation isn't illegal, by her estimate, the MCO are guilty of 90% of the disappearances, and what happened to the other 10% of the children is probably even worse.
* Whateley Universe. His dad is the supervillain Gizmatic, who only approves of deviser stuff that's mechanical, so lots of luck on that one.
