* Saiyuki and a large mismatch between the sequel series of the manga and the anime:
* Saiyuki and Gojyo and Goku being the older and the younger child, respectively; this dynamic gets played up a lot in the audio dramas.
* Saiyuki anime series, dubbed by ADV Films, were chalk full of profanity and script rewrites in the English version, including a rewritten personality for one particular character. These differences were gradually toned down over the course of the series; the second half of the series and the Requiem film are much more in-line with the Japanese version. Compare the character of Hakkai between the first few episodes and the film.
* Saiyuki anime there's quite a bit. The most baffling one would be the orange paper plane.
* Saiyuki apparently works this way, at least in defensive uses. Hakkai exhausts himself to the point of fainting when he has to heal Gojyo after not having enough sleep, and it's mentioned outright that trying to do this when injured can kill him. He also gets weak after holding up a chi barrier for too long, trying to save the party from being buried alive in an underground room.
* Saiyuki" as a joke, not expecting to be taken seriously, and was pleasantly surprised that her casting suggestion was accepted.
* Saiyuki between Hakkai and Kanan, this is never spelled out in the anime version.
* Saiyuki blond guy with a gun and a smoking problem, and his devoted acolytes a group of youkai.
* Saiyuki but have not yet reached it (mainly due to a great deal of interference from various gods and demons). Meanwhile, the main antagonists, Kougaiji's group, fly back and forth between the base and wherever the Genjo party happens to be time and time again.
* Saiyuki, but they technically aren't the focus of the show and tend to be much less epic. This got even worse in the sequels due to the shift to a different tone and a more limited animation.
* Saiyuki by some bandits who attempt to rape him. The farthest the guy got was a hand on his ankle before he shot him (his first time killing anything). But it is implied to have not been the last time this occurred, and obviously ties in with his trust issues and dislike of being touched once he's grown.
* Saiyuki Cho Hakkai (the Wife) and flirty stud Sha Gojyo (the Seductress).
* Saiyuki come along, was a mentor figure to both of them, and also the only person both of them actually acknowledge as worthy of respect, was so powerful they bequeathed him two sutras, something never before done, and generally is one of the biggest badasses in the series, albeit one who died before it started. Is an interesting case in that his Genius is not really divorced from his Ditziness, and a lot of his insights come from that aspect of himself.
* Saiyuki: Field Marshal Tenpou isn't technically a professor, but otherwise fits this trope to a T. He's like if you took an absent minded professor and made him a military officer. Though he does notably teach Goku to read, which saves his later incarnation, Hakkai, who is a teacher but the opposite of absentminded, from doing so.
* Saiyuki. Fortunately for the heroes, Hakkai had removed the explosives Yaone set to blow them all up, because 'I'm sorry, I found them earlier and thought they were dangerous'.
* Saiyuki, fraternal twins Cho Gonou and Cho Kanan were separated at a very young age when their parents divorced, one parent taking each child. Years later, they met at school, fell in love, discovered their relationship to one another, and became lovers, in that order.
* Saiyuki Gaiden, Tenpou is the only character shown using one), possibly because it's set in China rather than Japan. His reincarnation, Cho Hakkai, uses no weapon and is, instead, a gifted martial artist and manipulator of chi.
* Saiyuki Gaiden was described by the author once as "fundamentally an otaku"...of many things presumably, given the extent of his library (has a bit of everything, not sure on his definition of a bit) and art/sculpture/weird things from the lower world collection.

* Saiyuki gang could be considered to be part of this trope; although they do have a destination, they get side-tracked so often that they might as well not have one. Luckily, Sanzo has a credit card. The kind that's accepted everywhere. Even in small, rural villages in the middle of nowhere.
* Saiyuki gets good hands in poker and majong with alarming frequency. He does, however, insist it's just because he's lucky in this (and nothing else) not any skill.
* Saiyuki. Gojyo is a 'child of taboo,' raised by his stepmother and half-brother. She eventually attempted to kill him, but her biological son killed her first.
* Saiyuki, Gojyo's old friend Banri says hi by kicking down Gojyo's door.
* Saiyuki. Hakkai also functions as this, though his healing powers are draining and he can't use them if he's injured.
* Saiyuki, Hakkai wakes up in Gojyou's room after passing out from blood loss and remarks that he expected Hell to look more interesting than this. Gojyou then hovers over him and tell him that, no, he's not dead yet.
* Saiyuki has an office/library that becomes like this frequently and would get worse if Kenren didn't clean it for him. Weirdly in their future incarnations this switches.
* Saiyuki has blood red hair and eyes. It's said to be proof that he's a "taboo child", the product of a forbidden union between a human and a youkai.
* Saiyuki He's left out of the group song entirely. Lampshaded by Minekura when she referred to the other three seiyuu as "-8" ("Minus Eight"), with Hakkai's name being written with the kanji for "eight."
* Saiyuki. He's the reason Sanzo, Gojyo, and Hakkai's past lives befriend each other at all, linking the affiliation of their current-day counterparts.
* Saiyuki is constantly making death threats against his servants (Gojyo, Goku, and Hakkai) to the point where no-one bats an eyelash. It's like saying, "Good morning" for him or something. Particularly funny when other characters call him out on it and when he turns around the next second to offer encouragement.
* Saiyuki is like this most of the time, utterly calm with a cheerful smile in battle and all other situations.
* Saiyuki is the intellectual of the ikkou. He could have had his pick of college scholarships had he wanted to continue his formal education, takes correspondence courses (including lockpicking, which becomes very helpful), reads thick obscure books, and worked as a school teacher until Kanan's death.
* Saiyuki is the story of the main four's godly past lives (and in Goku's case, forcibly forgotten childhood). The author acknowledged in the first volume that the ending is obvious for anyone familiar with the main series, and used it to heighten the tension: the audience knew from the very first page that Konzen, Kenren and Tenpou are going to die, and that Goku will lose his memory and spend 500 years imprisoned. What we don't know is how, or when.
* Saiyuki is unfortunately unable to kill all those who made him this way, as killing them was the process that made him that way. He does almost turn to suicide, before being convinced otherwise. Then he goes into a stage of denial, when he turned down Sanzo's job in hope of living a peaceful life. His defiance stage is arguably when Banri attempts yokai solidarity and he shoots him down hard, putting forth his own opinion on the matter, and he only accepts his nature when he removes his limiters to save Gojyo. Note that since he killed a thousand demons while human, and has since only been forced to remove his limiters in much more dangerous circumstances, it wasn't that he needed to remove them to save Gojyo. It was an acceptance thing.
* Saiyuki, it is expected that he'll be kidnapped a lot. But instead of wailing for help or just being silent, he stays vigilant and badmouths his captors without even mentioning, "My followers will rescue me." When help does arrive, his response is... "I don't need your help anyway." And it's quite often that once he's freed, he'll either shoot or exorcise his captors dead, and his faith (as rude as it may be) unshaken.
* Saiyuki: Journey to West: The Sanzo party travels over land at the request of the Merciful Goddess, in order to be more of a team.

* Saiyuki, just for the lolz, to forcing Sanzo and his party to take the physical road to India instead of the heavenly one, which would get there infinitely faster. She says the latter is 'cause they need to grow over the journey, but admits it's also because it's much more interesting that way.
* Saiyuki Kougaiji, who actually does care about the safety of his troops and despises the senseless waste of life.
* Saiyuki, like his later incarnation, Sanzo, is very pretty but has a permanent scowl. Goku, his surrogate son, thinks he'd be beautiful if he did smile. Subverted, though, as when he finally does Goku decides it doesn't suit him at all, even though it is a completely genuine loving smile. Goku is saying he loves Konzen as he is.
* Saiyuki? Oh, you better believe that's a Check! And that's just the tip of the iceberg...
* Saiyuki on a regular basis probably had something to do with it, too.
* Saiyuki once his glasses are knocked off and broken (he even admits the fight's lost once his glasses are gone).
* Saiyuki realising it's not him (they did have reason to be angry with him at the time, though).
* Saiyuki Reload Gunlock was eventually adapted as a 12-episode series with little filler in 2017, though even it had to end in a cliffhanger to account for the chapters ahead of it.
* Saiyuki Reload, Sanzo, Gojyo, and Hakkai discover that they are somehow stuck inside Goku's dream, and they will remain stuck until he wakes up. Since Goku sleeps like a log, Hakkai ends up just drawing open eyes on his face.
* Saiyuki: Sanzo and Gojyo count up their respective kills, and Gojyo argues that Sanzo has an unfair advantage in using a gun, while Gojyo must get a bit closer to his victims.
* Saiyuki, Sanzou is caught by a scorpion lady and is paralyzed by some sort of spell. Just barely able to talk, he manages to insult the woman enough that she starts beating him up... only for him to turn it around when it turns out the beating dispelled the magic and freed him.
* Saiyuki Sanzo, without being badass the rest of the time to make up for it.
* Saiyuki's mangaka has a tendency to use variation on Faceless Masses where, while they having detailed costumes and mouths, has no visible eyes other than a vague shadow. All background characters and mooks would have this, even if the panel focuses on their face.
* Saiyuki specifically states that it's not the act of killing or "being bathed in youkai blood" that triggers the transformation, but the killer's inner negative energy. In other words, this can only happen to those who already lost enough of their humanity and cultivated enough of their hatred that they might as well be compared to monsters themselves.
* Saiyuki, the cherry trees in heaven bloom all the time and as a result nobody pays them much attention. The symbolism of this and the value of mortal lives vs. eternal ones is played up throughout the manga.
* Saiyuki, the crow imagery goes crazy. Ukoku translates literally as "a single crow cried", after what was going on in the background when he killed his master. He wears an unusual dark-colored variation of the standard flowing white sanzo robes, and the sleeves often look like wings when he strikes from above.
* Saiyuki: their fights always end up as "____ monkey!" / "____ kappa!" The most popular fill-in-the-blanks are 'stupid' and 'pervy,' respectively. Often, they just go straight to this trope.
* Saiyuki, the main character, as a Sanzo priest, is supposed to give advice and provide an example of how to live your life. Sanzo rejects this as hypocritical and useless. He therefore takes a "figure it out yourself" stance on LIFE. The one time he does give a lecture on Buddhist ideology (his personal favorite, "if you meet the buddha, kill the buddha") it is a HUGE deal.
* Saiyuki: There's a legend that a youkai who consumes a Sanzo priest will become immortal. This is apparently not true, but it still gets protagonist Genjo Sanzo more negative attention than he'd like.

* Saiyuki. They usually get the deserved thanks for solving the town's issues just because they're the only ones strong enough to sort them out and often have to do it anyway to progress on their journey.
* Saiyuki. This may actually not be as weird as it sounds to westerners as there actually are some Japanese noodle dishes that are topped with mayonnaise.
* Saiyuki, though, so he mostly uses them when people's lives would be in danger otherwise, and can't at all if he's injured.
* Saiyuki to touch him at all, with varying levels of exception for his traveling companions, especially Goku.
* Saiyuki: Toudai (who will be known as the Goudai Sanzo) and the youkai Tenkai who would inherit the Maten Sutra before Koumyou Sanzo. Played with, as physically, Toudai appears much older than Tenkai who looks like a young child. But as a youkai, Tenkai could be easily be years older than Toudai while retaining his youthful appearance.
* Saiyuki: When Genjo Sanzo meets Master Abbot Jikaku in the Burial arc, he seems like just a harmless old man- until he kills several youkai attacking a temple. Turns out he was once known as 'The Ogre' for his vicious training of would-be Sanzo candidates, including Sanzo's own master Koumyou.
* Saiyuki with a pistol 3 times the size of his weapon of choice...which he had never fired before, not even once...while suffering from multiple broken bones.
* Saiyuki. You have to be looking really really hard for the sugar parts because his natural personality is combined with his desire to appear as prickly as possible to make sure no one around him thinks he's gonna protect them (and therefore not getting friends that need protecting). But in his calmer interactions with Goku (when he's not hitting him over the head) he generally gets a little smile on his face. When Goku was a kid and no one was around to catch him he even smiled and commented that Goku's cheeks looked like dumplings. In a more literal sense, he's an ice princess who loves sugary things.
* Sajin Komamura, an anthropomorphic wolf. At 9'5" (288cm or 2.87m) tall, he towers over everyone in his division. He's even taller than the other captains.
* Sakaki and Kagura walk past some faceless club recruiters... and are then followed by a
* Sakaki generally bends down a little and kind of "scoops" the ribbon when she runs through. Although I didn't find it funny so much as
* Sakaki is an odd example. She's an imposing, intimidating and tall
* Sakaki loves all cute and cuddly animals, including bears. So Yomi brings her canned soup with bear meat in it as a souvenir from her vacation.
* Sakaki never notices Kagura's self-proclaimed rivalry, even when it is proclaimed to her face, in
* Sakaki, over pretty much anything. Unfortunately, the animals involved
* Sakaki, regarding cats. When she's first approached by Yamamaya, she squees so hard she starts to
* Sakaki's hair is so long that it can actually be seen between her legs when she's simply standing. She also appears to sit on it on a few occasions.
* Sakamoto went to great lengths to save a bird that had been blown away in a storm while they were trying to outpace each other and is seen visiting it in later scenes. In one episode he got himself sent to the hall so he could feed it.
* Sakana but only after Jiro had some help from his big brother and his best friend.
* Sakanaction frontman Ichirō Yamaguchi has lost his hearing in his right ear after a sudden hearing loss in 2010.
* Sakana instead, but sometimes one of them peeps out, depending on what makes the expression work. The reason for the concealment is that his eyes are naturally set in a particularly crazed expression at odds with his inherently friendly personality, so he grows his hair out to keep from putting people off.
* Sakana. That being said, it's not ruled out that he can have romantic affection exclusive for some people because he did have a girlfriend until a few weeks before the plot started.
* Sakana, we have a character woken by a phone call... only to find the caller (a

loan shark) sitting at the foot of their bed.
* Sakana Yama had main character Urchin find a genie, who granted him the wishes he wanted. However, Urchin only used his wishes to improve the lives of his friends, keeping none for himself. This impressed the genie so much, he granted Urchin unlimited wishes. (Not that the genie ever told him that.)
* Sakar had two distinctive people - the red-skinned Imperials and the grey-skinned Shadow People
* Saki Achiga-hen. During the quarter-finals, however, when Kuro comes up to Yuu in tears over losing so many points, Yuu comforts her and declares her intention to win the points back, mentally expressing her determination to stand up for her sister.
* Saki Achiga-hen, Himeko and Mairu are walking and talking about their team's lineup, including the decision to have Kirame be in the vanguard position instead of their fifth best player for the reason that while Kirame is not good enough to qualify, she is able to avoid going into negative points, preventing the team from prematurely being eliminated. Himeko says Kirame would be upset to hear that she's just being used as a sacrificial piece because she was happy to be chosen for the team, just as they pass under an overpass that Kirame is sitting on. Kirame, however, does not reveal herself or get upset, but instead resolves to do as well as possible in the role chosen for her.
* Saki Achiga-hen in a flashback, Masae Atago, coach of Senriyama's mahjong team, tells the new arrivals that it's possible for students to make the regular team in their first year, and thus encourages them to be proactive.
* Saki Achiga-hen is frequently seen sleeping with her head in her best friend Ryuuka's lap.
* Saki Achiga-hen, she returns to her home town and becomes the coach of her old high school's team, hoping to exorcise her semi-final loss in the inter-high tournament years ago.
* Saki Achiga-hen, Shizuno's plan after seeing Nodoka playing mahjong on TV is as follows.
* Saki Achiga-hen, the Senriyama mahjong team includes the coach Masae Atago's (whose daughters play for another school's team) niece, Hiroko Funakubo, who, unlike many of these examples, is actually quite competent. Masae is pleased when she sees Hiroko doing well, hoping to avoid rumors of nepotism, but Cera, one of Hiroko's teammates, says people will make those rumors anyway.
* Saki Achiga-hen, this exchange between Izumi Nijou and Hiroko "FunaQ" Funakubo happens after Izumi loses badly in the semi-finals, and Hiroko mentions all the strong first-years who have come by..
* Saki: After Story her sister, and subsequent chapters imply that while the Miyanaga sisters still aren't on speaking terms, Teru doesn't hate Saki. In fact, Teru's character in the fic largely seems to be based off of her brief appearances in the first anime, which, in turn, was also aired when little was known about Teru.
* Saki: After Story is her sister, even to Sumire, who knows the truth.
* Saki: After Story, resulting in Saki being sent to the hospital and Teru being arrested. The sister's separated parents are shocked, both what happened to Saki and that Teru would be capable of doing such a thing.
* Saki: All four teams from the Nagano prefectural tournament have one. Kiyosumi has Mako, Ryuumonbuchi has Tomoki, Kazekoshi has Miharu, and Tsuruga has Kaori. They all somehow ended up facing one another in the second round. The list goes on in the Nationals, to the point at which Usuzan and Miyamori seem the only exceptions. Shiraitodai has Takami, Rinkai has Satoha, Eisui has Tomoe, Himematsu has Kinue, Senriyama has Hiroko and their coach Masae (Kinue's cousin and mother, respectively), Shindouji has Yoshiko, Kentani has Kozue, and Koshigaya has Sophia. In a less obvious case, Yuu of the Achiga team wears glasses whenever she has to look closely at something.
* Saki and Kaoru are set up on a omiai by their families. Both admit to being interested in other people, so nothing comes of this.
* Saki and Teru appear to have known once, before their family broke apart, is

implied to be dead, but it has not been officially confirmed.
* Saki, and the black smoke effect used to portray those powers, makes her seem like a ghost.
* Saki and viciously attacks Saki for trying to talk to her after defeating her team in the tournament, and also attacks Nodoka when she intervenes, putting both in the hospital.
* Saki, an inversion happens for Rinkai, whose mahjong team is otherwise composed of transfer students. Satoha, the vanguard player, is the only Japanese member of the team, partly because of the rules requiring a Japanese player as vanguard, and partly because she is the ace. Played straight with Aislinn of Miyamori's team, who is from New Zealand and is on an otherwise entirely Japanese team.
* Saki, a series of comedic 4koma strips, she goes along with the relatively silly Awai's suggestions.
* Saki before Mihoko stops her and makes a heartfelt speech in defense of her. (It's indicated that this is not the first time Mihoko has done something like this, and her doing so is one reason her teammates adore her). However, when Kazekoshi ultimately loses the prefectural finals to the main characters, Kubo sees Kana coming in, desperately trying to hide her tears, and simply tells her to win the next time.
* Saki between Saki and Koromo during the Nagano Qualifier Captains' match. Koromo is in the lead but Saki has begun a winning streak that allowed her to acquire enough points to make a comeback win possible.
* Saki each got four episodes, a TV special, and a movie, airing over the course of 2016 to 2018.
* Saki elicit this reaction in the otherwise calm and detached Fujita, who hugs her and starts patting her head while gushing about how cute she is.
* Saki fall completely flat in regards to her. Thanks to that, plus a decent amount of good luck, Kaori was able to dominate her table while stumbling all the way.
* Saki. Finally, just for fun, she drops a Ryuu-issou (All Greens) Yakuman in practice. She never calls out her hand correctly, because she doesn't even know which combo is which (each of her 'victims' had to tell her which hand she really won with).
* Saki, Fujita Pro invited Yumi to have a match with her and Hisa. This eventually led bit of dialogue in chapter 62 when Hisa was inviting the best players of the other schools to her room for some games so she can train herself.
* Saki" Funakubo of the Senriyama mahjong team has two horror movies to watch before returning- a zombie movie and a shark movie. Lacking the time to watch both, she gives the zombie movie to Ryuuka and Toki, the shark one to Izumi and Cera, and walks back and forth between the two rooms. It takes over 90 minutes out of two hours for a zombie to appear in the former, and around the same time, a shark appears in the latter.
* Sakigake!! Otokojuku: delinquents that are all extremely ripped and skilled in some sort of martial art attend a special school with a military-esque faculty determined to turn them into the next great generation of men.
* Sakigake!! Otokojuku is a manga about a school dedicated to reforming juvenile delinquents.
* Sakigake!! Otokojuku is capable of fighting a group of monkeys at the age of 7. When he is ten years old, he have read and remembered the content of a whole shelf of thick books, which includes some higher level of Mathematics. At the age of eleven, he is specially admitted in Tokyo Imperial University and is capable of breaking prison bars.
* Sakigake!! Otokojuku (That's all he ever says, but awesomeness ensues afterwards).
* Sakigake!! Otokojuku wear their uniform jackets unbuttoned with no shirts beneath.
* Saki Hanajima wears a knee-length skirt and paints her fingernails black. Machi Kuragi also wears a knee-length skirt.
* Saki has a group of people, formerly strangers, renting a shared house together, all think of their other housemates as pleasant and easy to get along with, except

for one quarrelsome woman whom they all wish would leave. Turns out she was asked by the landlord to join the group specifically to give a bunch of potentially prickly characters (mostly the women, in the belief that Women Love To Argue) someone to unite against. She enjoys the role of lightning rod because she had spent most of her previous life as a paid companion who had to be submissive and conciliatory.
* Saki has Shiraitodai Girls School, the two time champion in high school team mahjong. Its ace player, Teru Miyanaga, is touted as the best individual mahjong player in the high school circuit, and is the sister of the title character.
* Saki. Interestingly, the Smother is not always the biological mother: In the aforementioned "Sredni Vashtar", it's the protagonist's adult cousin, appointed his guardian.
* Saki. In the first round of the quarterfinals of the tournament, one reporter gets chewed out by his colleague for even considering giving an interview to Yuuki, and he's told that Nagano is a weak prefecture.
* Saki in the tournament arcs that Saki gets lost whenever she wanders off on her own.
* Saki, in which a song containing the jaunty refrain "Cousin Teresa takes out Caesar, Fido, Jock, and the big borzoi." becomes an immense popular hit ("big-drum business on the two syllables of bor-zoi. It's immense."). The ensuing popularity of this absurd Ear Worm serves as a satire on the public obsession with trivia.
* Saki is fooled or if she merely doesn't care, although the latter is more likely.
* Saki, it never really made it to the news in the main series. Saki only hears about being disowned when Mihoko mentions asking Nishida about Teru and Saki's relationship during Mihoko's own interview.
* Saki, Koromo Amae is built up as a fearsome mahjong opponent, and the greatest obstacle the protagonists will have to overcome if they want to win the prefectural tournament and advance to the nationals. The first anime series concludes not long after the main characters win the tournament, and Koromo's teammates mention that they were eliminated early on in the tournament, giving some indication of how difficult things will get for the protagonists.
* Saki, Kurumi has this to say about the latter three matches, much to Sae's chagrin, since she's one of those who has yet to play.
* Saki meets Mahjong", and true to that idea, the series is basically about Saki encountering girls with increasingly powerful supernatural abilities who use these abilities to cheat in Mahjong tournaments - and Saki beating them using her own supernatural powers.
* Saki, Miharu is implied to have an ability like this in the PSP game, enabling her to sense which of her tiles are dangerous to discard, which doesn't help her win hands but prevents her from playing into anyone else's. As such, she only loses 1,200 points in the sergeant round of the prefectural finals, less points than any of her other opponents, and enables her school to keep first place for the moment.
* Saki Mikajima is completely controlled by Izaya Orihara, so when he orders her to fall in love with Masaomi Kida, she does. Even months after they've broken up, she has complete faith that he'll come back to her one day.
* Saki, Moko Tsuiki, one of Kei's friends and a practice partner for the Achiga team, reveals that she's not participating in the team tournament or the individuals because she's suspended from public games. When Shizuno asks her why, Moko tells her "It's better that you don't know."
* Saki, Nodoka's old friend Ako looked like her friend from Kiyosumi, Yuuki, when Ako was younger (in the years since Nodoka moved away, Ako grew her hair out and no longer has Yuuki's hairstyle). As such, when Nishida the reporter is shown a picture of Nodoka with her friends, she asks if Yuuki is in the picture, but is told that it's Ako, not Yuuki.
* Saki. One interesting note is that the anime plays its Girls' Love up more than the manga.
* Saki, one of the secrets that the eponymous talking cat elects to share is that one of the guests was only invited to the party because the hosts think that she is stupid enough to buy their Alleged Car, dubbed "The Envy of Sisyphus" because it

goes quite nicely uphill, if you push it.
* Saki parents have never been shown engaging in such behavior on-screen, she reveals that in the past, if she lost a mahjong game, her parents would take away her New Year's money, and if she won, her parents would get mad at her. The experience caused her to hate mahjong, but it's also implied that there may be more to her parents' separation than these arguments.
* Saki, resulting in the game continuing and her team being defeated. Thankfully, her teammates don't mind.
* Saki, she was still quite disappointed. Momo doesn't succeed, though.
* Saki Shinohayu -dawn of age-, a blunt "no" happens when Kanna recruits her friends to form a mahjong club and defeat Hayari Mizuhara, who won the local tournament, defeating Kanna.
* Saki Shinohayu -dawn of age- and Mahjong player, is this to Hayari Mizuhara, cheering her up with a magic trick involving a mahjong tile on two occasions.
* Saki Shinohayu -dawn of age- played with, noticing Shino's depression. He thinks that having it around as a reminder of her mother will only make her depression worse (but since one tile is missing, the pawn shop owner says he doesn't think the set will sell). Shino is quite upset to learn about this, since she had hoped to enter a mahjong tournament in order to get her mother to come find her. However, when Kousuke sees Shino entering a tournament and enjoying herself, he comes up to her afterward and apologizes, saying that he was too busy with his job and the search for her mother to pay attention to her. He tells her that he will support what she wants to do from now on and gets the set back from the shop; they start playing together again.
* Saki Shinohayu -dawn of age-, this happens when Kanna recruits her friends to form a mahjong club and defeat Hayari Mizuhara, who won the local tournament, defeating Kanna.
* Saki Shinohayu -dawn of age-, though, perhaps she was happier when she was undefeated.
* Saki, someone with a score of zero has a chance to come back) just because she wants to psychologically manipulate everyone and prevent the other players from making a certain type of high-scoring move. Sure enough, this buys our hero just enough time to come up with a way to win.
* Saki's short story, "The Secret Sin of Septimus Brope," the protagonist writes the following:
* Saki's stories usually have unsympathetic protagonists, typified by Clovis Sangrail. He is cruel, unprincipled, sly, and lives for mischief: the archetypal trickster.
* Saki's "The Blood-Feud of Toad-Water, a West-Country Epic" satirizes such feuds.
* Saki. Strangely enough, the error made its way into the anime adaptation.
* Saki, Teru refuses to speak to Saki or acknowledge their being related.
* Saki. The character usually goes by "Momo" in universe, but Kaori calls her "Momoko-san."
* Saki, the manga ended the regional tournament just a few days before it ended in the anime.
* Saki, the protagonists lose from time to time(for example, Saki and Nodoka when they go against Fujita), but most of the time, not in cases when it would threaten their ability to continue in the tournament.
* Saki, this comes up while Yumi is talking with Momo about her reasons for coming to the training camp. Yumi manages to make the swap just in time, but Momo does so only after blurting out enough.
* Saki. Though she appears very child-like, she is a second-year student as opposed to the majority of Kiyosumi High's players like Saki, Nodoka, and Yuuki who are first-years, and it's been hinted that she's older than Nodoka.
* Saki, which ends after the quarterfinals, there's a shot of Teru standing on a roof, turning to the camera, and whispering "Saki..." as it cuts to the title card.
* Saki, which takes place in an AU in which Hisa went to Kazekoshi, Hisa, being invited to go out to karaoke with some of her classmates, also invites Mihoko, who refuses because it's against school rules. After Mihoko gives her answers two of

Hisa's classmates tell her that they knew Mihoko would refuse, and that it was better not to have invited her at all, because she is "super serious" and "annoying." Hisa then promptly says that she wants to go home and complete her jigsaw puzzle. She ends up catching up to Mihoko and walking her home, comforting her.
* Saki, who, instead of wearing the ribbon that's part of the Achiga girls' uniform, wears the red necktie that Harue gave her years ago, back when she was a student at Achiga, and which was part of the uniform back then.
* Saki (written in collaboration with Charles Maude), Trevor Bavvel, the local heir to the manor, is pursued by four different young women. In Saki's "The Elk," Bertie Thropplestance is in much the same position, pursued by every woman whom he rescues from the eponymous dangerous quadruped.
* Saki: Yuki, though it's actually a bit of a problem for her Mahjong playing since she loses focus after the initial rounds, causing her game to drop.
* Sakkakumon each have uniquely-colored swirling patterns in their skies.
* Sakky, Sakura, or Sailor Astera is probably one of the more well-known fan character creators in the
* Sakritt left the Dominators and their culture behind long before she was enslaved by the kreel, she even adopted her own name despite the Dominator stance of
* Sakuna Of Rice And Ruin: Beyond the first tutorial area, all enemies are from the Isle of Demons.
* Sakuna Of Rice And Ruin, but looks like a child, and she's irritated when pointed out in the beginning.
* Sakuna Of Rice And Ruin: How a big fire happens in the opening section. Sakuna notes the possiblity of fire, right after it's ignited. Then she notices and runs around in an outburst of emotion.
* Sakura also gives one to Naruto in the Five Kage Summit arc. However, it's
* Sakura also used one of these to get rid of Sasori's Kazekage puppet. After getting nicked by one of his
* Sakura Amamiya being a huge fan of Sakura Shinguji is a commentary on how the latter character was received in real life.
* Sakura and Ino are childhood friends, but at the start of the series their relationship has been torn apart due to their shared crush on Sasuke. In the second arc they mend their friendship.
* Sakura and Karin; Karin regularly invites Sakura to the Kanzuki estate, which leads to the two squaring off nearly every time they catch up, but also lends an ear and offers some counsel when Sakky is unsure about where her life's path is leading her.
* Sakura and Syaoran are both in love with Yukito at the start of the story, but
* Sakura Beach, not only is Seiji still as dense, but he repeatedly says that he never kissed either of them before.
* Sakura-chan to Amane-kun is a romance manga about a trans girl and a trans boy.
* Sakura Diaries: In chapter 96, Urara receives a wedgie from her new boss, claiming that employees' underwear should be more revealing.
* Sakura Diaries, the main character Touma's younger cousin, Urara, is constantly trying to sleep with him and keep him away from other women.
* Sakura Diaries, Urara uses this outfit several times as a method to try to seduce her cousin Touma, with little success.
* Sakura Discord, as she has her own issues, but she nonetheless serves as his opposite and motivates him when needed, knowing all too well that he gives up easily.
* Sakura Discord is pretty much equally split between serious parts and comedic parts.
* Sakura Discord Their teeth hit both times, because said kisses are sudden and one-sided.
* Sakura Discord tries to isolate her even more so that they will finally give up on her and focus their attention on him.
* Sakura does this in episode 5 after Kakashi hit her with a genjutsu that made

her see an injured Sasuke.
* Sakura does this when she's frightened by how much Sasuke has changed as a result of the Curse Seal which makes him act more violent and sadistic.
* Sakura Dungeon dungeon master and a heroic female knight who team up to reclaim the dungeon from the new dungeon lord and stop her plans.
* Sakura during the latter half of the Infinity Arc. She is heart-broken when she finds out after she finally reunites with Syaoran in Clow Country.
* Sakura frequently punched or slapped Naruto when he said or did something he shouldn’t have or if he pissed her off.
* Sakura Gari: Every one of Souma's lovers is shown to have horrible endings. He even notices and mentions it himself. Of course, this doesn't stop him from continuing to take lovers.
* Sakura Gari. Masataka is a Common Beauty; he is good-looking but only Souma, who's in love with him, comments on his appearance.
* Sakura Gari, Masataka's brother Takafumi dies after being tortured by the police.
* Sakura Gari meets Katsuragi... when he walks in on him giving Souma head.
* Sakura Gari Sakurako tries to literally force a tied-up Tagami to eat some of the food she made for him. He's reluctant to do so because the last time she fed him something, she had secretly snuck in some glass. This time the food has nothing, but Sakurako is still pretty scary.
* Sakura Gari. This also makes the plot of the series itself, as the protagonist of the series is a boy named Masataka who is employed at the Saiki house, and later Souma starts to make passes at him...
* Sakura Gari wants to control and screw Souma, treating him like a possession, a "doll", but Souma loves Masataka because Masataka doesn't try to control or possess him (i.e. Masataka's affection is pure (read: not bound by sexual possessiveness)).
* Sakura Gari while going through his studies. Now he both works in a famous hospital and is the personal doctor of his former protectors.
* Sakura gets a love letter from a shinobi from the Rock Village. She politely turns him down, saying that her heart is already taken. In reality,
* Sakura gets an introductory sequence that wouldn't be out of place in a
* Sakura Haruno deserves a mention in this category for passing the first Chuunin exam test, which was deliberately designed to be so difficult as to force the participants to cheat, simply by understanding the questions and working out the answers. She was the only test-taker shown to pass without cheating, which is saying something considering that one of said test-takers was the aforementioned Shikamaru.
* Sakura herself claims to have fallen for Shirou from when she first saw him trying to overcome a jump that was completely impossible for him for hours on end. Supposedly, the same could be said for Rin.
* Sakura herself leans more and more into this as the series goes on as she's earnest and friendly. Tomoyo makes sure she fits this trope by making her darling costumes. (If Syaoran is involved expect a
* Sakura Hime Kaden because she had lit incense, which Sakura herself hates. In addition, her scent aside from that was off; since Aoba can transform into a wolf, his sense of smell is very sensitive.
* Sakura Hirota is an opponent that requires headgear. Take her 5/13/18 match in Marvelous against Natsumi Maki. Level 5 may be underhanded, but not even that they considered grabbing a downed opponent's head and scream into her ear legitimate offense.
* Sakurai had occasionally dropped hints about Ridley, but in a roundabout way that neither confirmed or denied that he was even going to be in
* Sakura in life, who inspired her to become an idol one day. When the two meet as zombies, Ai exhibits a very hostile and cynical attitude because of their situation, both being dead and forgotten by the world, and being roped into the Zombie Land Saga project without much choice. Sakura, who values her second chance at life, becomes disillusioned with Ai. Once Ai helps her and the other girls save a failing performance, and Ai decides to stick around to help the others become idols, Sakura renews her appreciation for her.

* Sakura in the Heaven's Feel route that they both believe she should. She also tends to not really understand how Shirou, Archer, and Saber feel on occasion, though to be fair all three of them are also pretty messed up emotionally.
* Sakura is another example. She even fought with Nemu at first, but eventually gives him up at the end of the first Season.
* Sakurai Sensei enjoyed one of Mio's drawings, enough that she put it on a test to describe something as "cool".
* Sakura is infamous for spending most of the time in battle just standing with a kunai in a defensive position while her male teammates do all the actual fighting, despite that only happening twice (it made sense in the Bridge Builder arc because she was left as the only one actually guarding the person they were supposed to be guarding). If they had indicated that she's supposed to be a non-combatant, this would have been more acceptable, but the fact that
* Sakura Kasugano helped by the fact she’s a schoolgirl in most of the games. Weighing in at only 115 lbs Sakura can nevertheless give veterans a hard time and even use the
* Sakura Kasugano was referred to by Ken as 'Ryu's stalker', and not only does she have similar moves, her alternate costume in
* Sakura Kinomoto initially has a crush on the teenaged Yukito, though they give it a plot-related propping up towards the end and the two of them ultimately end up with other people (
* Sakurako punches a wall in order to get the attention of several people in her second trip to the world of
* Sakurako Saiki few after her release, the person offhandedly says that they now have some difficulty to walk, due to having been locked in a relatively small space for so long.
* Sakurako Saiki, revealed to be a boy named Youya Souma. This individual tortures every single servant boy/girl that Souma takes as a lover, and hates Masataka because he is the object of Souma's affections.
* Sakurako Yukihira. Kyuu barely managed to find her before she died.
* Sakura manages to beat Neji due to a combination of greater planning and Neji being foolish enough to monologue during a fight. He might have been faster, stronger, and more skilled, but she took that time to set up a flashbang genjutsu.
* Sakura Nogawa watching the cherry blossoms (Sakura) at the side of the No River (No-gawa in Japanese) in Tokyo.
* Sakura no Ichiban!: Asami beats a guard unconscious with her wooden sword after he accidentally sees up the skirt of her kimono when she jumped over the school gates he was guarding.
* Sakura no Ichiban!: A would-be victim of "The Jack The Ripper" in the second chapter sheds tears of fright while he is pursuing her and before he almost kills her, Asami jumps to her rescue.
* Sakura no Ichiban!: In chapter 4, when Asami jumps over the gate,she accidentally gets the skirt of her kimono caught on the head of an unsuspecting guard. She then whacks him unconscious with her sword out of embarrassment.
* Sakura no Ichiban!: In chapter eight, Asami awakes to find Tsukiko sleeping next to her on her futon.
* Sakura no Ichiban!: In chapter one, the killers stuff wooden crates full of the corpses of the dead women they've killed. Misao discovers this when the box Asami was standing on broke and her feet got tangled with one of the dead women's long hair. In her attempt to free her feet, Asami manages to flip the corpse on top of her.
* Sakura no Ichiban!, Misao often slaps Asami across the face or slams Asami's skull with her fist whenever the latter does something reckless or stupid.
* Sakura no Ichiban!: Whenever Tsukiko's hair is disheveled, her bangs go in her face, and when she is wearing a white kimono, people tend to get scared and mistake her for a ghost.
* Sakura Ogami: The Ultimate Martial Artist. Forced to go up against
* Sakura (pink-haired, dresses in pink and red) and Sasuke (blue-black hair, dresses in shades of deep blue). Naruto also wears blue along with his signature

orange in Part I as a contrast to Sakura.
* Sakura Quest. Chitose remains quiet about this for years until several other local merchants try to pressure Akiyama into renting out his store to Belem, at which point she tells them about the secret, which explains why he'd be's reluctant to rent his store to anyone else.
* Sakura Quest, Maki starts to tell Erika a story of a woman who came into a crepe cafe (where Maki was working part-time) in a wedding dress. In Episode 22, she adds that the woman was running away from her own wedding. To Maki, the point of the story is that wanting something isn't enough; you have to have a plan to get it.
* Sakura Quest: One old man acquired a tablet PC, but due to not knowing how to use it, ended up using it as a light. It abruptly loses power in the middle of the conversation about it, possibly because he forgot to check the batteries. Another old man is a downplayed example, since he uses his tablet as a timer for his instant noodles.
* Sakura Quest she decides to leave because she doesn't want to "surrender to the feeling of being at home."
* Sakura Quest, there's Chitose Oribe, a confectioner in the small town of Manoyama and her granddaughter Ririko's legal guardian. Chitose can be a bit strict with Ririko, and is initially unhappy with her working with the tourism board. That said, some of Ririko's friends notice that Chitose is somewhat more lenient with Ririko than people would expect, partly because she doesn't actually prevent Ririko from working with them. Chitose even once tells Ririko to pursue her dreams while she's still young before she gets old and gives up on them.
* Sakura Quest, the tourism board discusses a film project in the struggling rural town of Manoyama, which involves burning down an abandoned house while shooting the climax of the film. Ushimatsu Kadota, the head of the tourism board, is in favor, since this will help reduce the number of abandoned homes in the area, and one of his subordinates suggests they try Kadota's house. Kadota responds as follows
* Sakura Samurai, being set in a glorified feudal Japan, naturally features a couple kappa NPC's.
* Sakura's brother Touya was born on February 29th, meaning the poor guy could only have a birthday every leap year.
* Sakura. She thinks she dreamed the night before until Risei confirms that Assassin brought her there.
* Sakura's if she had half of Ryu's dedication to training. (And she does.)
* Sakura's mother, Barako, mistakes Danzo for a washed-up secretary in
* Sakura's rare and unobtrusive appearances in the first two arcs would not lead players to suspect she'd become the
* Sakura's something of an inversion in Part I, as she aces every test in the academy, but rarely puts her intelligence to practical use in the field (for example, she doesn't see through either of the fake Narutos in the Forest of Death before Sasuke, who has 1.5 fewer intelligence points in the databook, pointed them out). She winds up becoming a mostly brute-force focused fighter as far as her strictly offensive capabilities are concerned. Her intelligence is ultimately put to use in medical jutsu.
* Sakura states in the second season that the tree's purpose of granting wishes may be inherently damaging as it disrupts the struggle which is central to human life, thereby disrupting the process of human life itself. Essentially, since people don't know what they want granting it to them will inevitably go awry.
* Sakura The Angel Sailer God comprises of Sakura, Nigi, Shibo, Kojo, Storm, Gan... and Fred.
* Sakura, the loud, brash healer from an ordinary family who starts the series quite weak loves the calm, broody Uchiha prodigy Sasuke.
* Sakura thought she would share an umbrella with her crush in chapter 17 (animated as the first half of episode 9), but Nozaki is
* Sakura, to be planted across the American capital as a gesture of US-Japan friendship. By coincidence, the new Congressional session started in March each year at the time, meaning that the trees' bloom matched with the beginning of a new legislative session. However, the 20th Amendment to the Constitution (ratified

1933) changed the beginning of the legislative year from March to January, so by the time of the first annual National Cherry Blossom Festival (in 1935), the interesting symbolism was lost.
* sakura trees (possibly the largest collection in the world, and certainly the largest outside Japan) is the site of the International Cherry Blossom Festival.
* Sakura Trick fits the bill, often playing pranks on the other girls because they seem like good ideas at the time.
* Sakura Trick Haruka considers doing this with Yuu's flower hair decorations. Yuu is... unamused.
* Sakura Trick: Haruka has the affections of both Sonoda sisters. Since her relationship with the younger one is the entire basis of the series, it's easy to guess how things will turn.
* Sakura Trick, Haruka reflected she has always been alone and Yuu was her first friend. It may be the reason why she's so clingy to Yuu.
* Sakura Trick than the title may have you expect, they were there for Haruka and Yuu's first kiss, probably the most important scene in the series.
* Sakura Trick: This happens with the two main characters in the first chapter. Amusingly, it's during the entrance ceremony.
* Sakura Trick: Yuu wasn't ready for her sister to ask about her love life.
* Sakura Wars (1996), Maria Tachibana served as a soldier for the White Army during the Russian Revolution. However, when the revolution ended in a decisive victory by the Red Army, Maria fled to America and used her marksman skills to work as a mafia hitwoman before joining the Imperial Combat Revue in Tokyo.
* Sakura Wars (1996). The rest of the Flower Division's efforts to buy Ogami and the top girl some time ultimately lead to their deaths, but Michael revives them so that they can take down Satan for good.
* Sakura Wars (1996) was released on September 27, 1996, which marked Masaru Ikeda's 54th birthday.
* Sakura Wars (2019) are obsolete relics that are poorly maintained. Things are so bad that not only do they rely on a rival Revue from Shanghai to keep the peace, but they are now facing the possibility of dissolution.
* Sakura Wars (2019) has a C rating (15+) in Japan, an 18+ rating in South Korea, an M rating in Australia, a PEGI 16 rating in Europe, a USK 12 rating in Germany and a T rating in North America.
* Sakura Wars (2019), leaving her powerless to do anything but reach out to her friends as they sealed themselves away along with the Archdemon and plead with them not to leave her behind.
* Sakura Wars (2019). Outside of battle, she is quite friendly and personable.
* Sakura Wars (2019) Seijuro Kamiyama meets her in 1940, Sakura has already become a full-time member of the revue.
* Sakura Wars (2019) spiricle striker whose power output exceeds even the cutting-edge Mugens used by the Imperial Combat Revue. It has a serious flaw, however: the spirit power requirements from the pilot are so high that no one, not even the famous Sakura Shinguji, could operate it. Sakura Amamiya, thankfully, managed to meet those requirements, making it an ideal replacement for her decommissioned Koubu.
* Sakura Wars (2019) takes place in an alternate 1940 where World War II doesn't even happen.
* Sakura Wars (2019). That name would eventually become the official Japanese title.
* Sakura Wars (2019) the issue of Weekly Shonen Jump that followed the reveal of the game at SEGA Fes 2019 just to get the poster Kubo made for the issue.
* Sakura Wars (2019) was uploaded on YouTube, fan demand caused the link to crash for a few minutes.
* Sakura Wars (2019), when Clarissa "Claris" Snowflake finishes reading her book in the library during her introduction, she expresses her goals of writing stories. Unfortunately for her, Seijuro Kamiyama is standing right behind her and she jumps out of her chair in shock upon realizing it.
* Sakura Wars (2019) when they are revived thanks to the sakura petals from the

alternate dimension.
* Sakura Wars (2019), Yaksha launches a full scale assault on the Grand Imperial Theater.
* Sakura Wars (2019), Yokoyama returns for yet another brief cameo as Sakura Shinguji.
* Sakura Wars 2: Thou Shalt Not Die, Keigo Kyogoku has Shiro Amakusa and the Imperial Japanese Army stage a coup d'etat and invade the Imperial Theater, temporarily forcing the Imperial Combat Revue into hiding.
* Sakura Wars 2: Thou Shalt Not Die when Leni makes him aware of this.
* Sakura Wars and various highly improbable weapons, including a revolver, gun-barrel sword, and giant psychically animated teddy bears.
* Sakura Wars: A variation; Erica Fontaine is both a nun and a member of the Paris Assault Force; the convent she belongs to is not a military organization in and of itself.
* Sakura Wars before the 1930's. Said Mini Mecha are used partially driven by spiritual energy and used to combat supernatural demons. Many of the heroines are also capable of using magic to varying degrees.
* Sakura Wars decided to give her a Russian accent, which would have been a nice touch if she could imitate one worth a darn.
* Sakura Wars gains one, and is one of the earliest originators of the "Harem Hero" archetype.
* Sakura Wars game are identical aside from color and weapons. The second game added another set of sprites for the two characters with European designed mecha. Once the games entered 3D with the third game, each character's mecha became more individualized with unique emblems, animations, and weapon models.
* Sakura Wars games also invert this trope in the same way, due to their Japanese protagonist's romanceable subordinates including a fair number of Europeans.
* Sakura Wars games are all about this trope. How the girls feel about you (their commander) explicitly gives them bonuses in combat, and a special team-up attack is available depending on who your relationship is strongest with at a given time.
* Sakura Wars has a reformed Tokyo-based Revue, as well as new Revues in London, Berlin, and Shanghai.
* Sakura Wars, has hair that, unless cut, refuses to be anything but spiky. Fortunately, his hair isn't anywhere near as ridiculous as most of the examples of this trope.
* Sakura Wars has partly rectified this by having a representative character from not just the first game, but the third and fifth ones as well.
* Sakura Wars has the full quota you'd expect from a series with the title.
* Sakura Wars has you tracking a mafiosi through New York along with one of the girls. At one point, the mafiosi's bodyguard gets suspicious and hangs back to check on you. You can choose to 'Act Natural' and deflect attention... or you can deliberately act outrageously suspicious, which works even better, and makes the girl impressed by your deception.
* Sakura Wars, he reveals himself to be the devil. Ogami despairs that he can't go on without the rest of the party, then Ayame as an angel shows up and they get revived.
* Sakura Wars, Ichiro Ogami replaces Maria Tachibana as captain of the Imperial Combat Revue's Flower Division.
* Sakura Wars is obsessed with Japanese culture to the point of building a massive Japanese style mansion in the middle of Central Park in New York City!
* Sakura Wars is the first game not to involve Red Entertainment; instead, it was developed by Sega in their first solo outing.
* Sakura Wars Kanadegumi began publication in 2011. It's a story about one girl and several guys that take place in the Sakura Wars universe.
* Sakura Wars, most of the girls (and the main characters) specialize in a specific weapon (which are often mirrored by their mecha):
* Sakura Wars no secret - everyone knows it and it is brought out in their own way.
* Sakura Wars OAV, Kohran is mistaken by a group of kids for Shounen Red, a character she plays on a radio drama — and then attacked by the baddies-of-

the-episode. The rest of the team has to come up with a way to rescue her without breaking the illusion and "shattering the children's dreams."
* Sakura Wars on a suborbital trajectory — in the fourth game, this cannon is even used to transport four of them from Paris to Tokyo in a matter of minutes.
* Sakura Wars, only a few months before the Western release of the soft reboot.
* Sakura Wars, Sakura Shinguji has become a legendary top star in the Imperial Combat Revue, to the point where new character Sakura Amamiya tries to emulate her style.
* Sakura Wars's Diana has a specific bond to birds; they flock to her and she can't stand to see them harmed, and faints when served Fried Chicken at a Harlem Church. Coqulicot from the third game lives in a circus and has this sort of relationship with the animals under her care.
* Sakura Wars, Seijuro Kamiyama leads a newly revived Imperial Combat Revue.
* Sakura Wars series feature its creator, Oji Hiroi, as one of the theater workers.
* Sakura Wars. She lampshades this in the second OAV (when asked what one of her inventions does, she says something along the lines of "That's Mr. Exploder! You press the button and smoke comes out and then it blows up, leaving us charred and sooty, but unhurt.")
* Sakura Wars: So Long, My Love explicitly spell out how much she loves him.
* Sakura Wars: So Long, My Love hadn't even started in Japan until 2003 (the first game was released back in 1996).
* Sakura Wars: So Long, My Love has demons attacking New York City (though previous installments took place in Tokyo and Paris).
* Sakura Wars: So Long, My Love is a perfect example of this. When the New York Combat Revue challenge him the second time after comforting Rikaritta Aries, he responds to their appearance with "You guys!". But then, he ask who they are, much to the frustration of the team. Sagitta calls him out for stupidity as Rikaritta just announced who they are. In the boss battle, Dokurobu will also try to trick the team into doing a Victory Pose. Despite being dumbfounded at first, Shinjiro see though it and insults him for it. When Shinjiro also insulted Dokurobu's armour, he get angry and gives it a different name: "The Star Division is Stupid!" armour.
* Sakura Wars: So Long, My Love is in a similar boat; in fact, Rachet Altair technically remains the captain for most of the game.
* Sakura Wars the always-Japanese PC (the player is supposed to identify with him, after all).
* Sakura Wars the Animation, Hatsuho Shinonome yells "What?!" after she learns about the White Cape's most recent whereabouts.
* Sakura Wars the Animation, Seijuro Kamiyama, Lancelot and Elise thwart the the white-haired demon's attempt to kidnap Klara M. Ruzhkova and White Cape on the top of a train car in Europe.
* Sakura Wars the bad guys are locating and destroying them, and the good guys can never find any but the next one the bad guys are about to attack.
* Sakura Wars, the more one of the girls likes the hero, the higher her stat bonuses. In addition, a high enough trust rating will unlock special attacks. These include giant mecha that transforms from a theater, and a hot springs bath that makes mecha explode.
* Sakura Wars: The Movie, Douglas-Stewart has the Imperial Japanese Army take over the Imperial Theater after Ikki Yoneda is captured. Fortunately, it doesn't last long thanks to Yokihiko Ota's help.
* Sakura Wars: The Movie shows the members of the Hanagumi flinging themselves into individual chutes that not only deposit them in front of their mechs, but also change them into their duty uniforms. Just for added style points, the chutes are hidden behind formal portraits of the pilots.
* Sakura Wars: The Movie, the Flower Division uses Kohran Li's boat, the Katsuryu-maru, to infiltrate the Great Imperial Theater, the group decides to split up. Sakura Shinguji, Ratchet Altair, Iris Châteaubriand, and Kohran return to the koubus with Sakura and Ratchet taking down a few guards. Meanwhile, Sumire Kanzaki, Kanna Kirishima, and Leni Milchstraße rescue Kaede Fujieda and the Wind

Division.
* Sakura Wars, though the stuff she makes also has a tendency to randomly explode.
* Sakura Wars to be the first Western release of the series, but never got exported.
* Sakura Wars (TV), after Sakura breaks her sword, it had to be reforged back. No shirtless men, since they are mostly elderly.
* Sakura Wars (TV) Aoi Satan, she returns home to Sendai to have it reforged ... and it's mentioned in passing that the sword is made of metal from a meteorite.
* Sakura Wars (TV) has an episode where the mostly-Asian team tries to celebrate Iris' birthday in the Western manner to which she is accustomed, including an attempt at singing an original "happy birthday" song. Kanna is still singing bits of the song to herself several episodes later...
* Sakura Wars (TV) has its fair share of cherry blossom imagery, as one would expect from the name.
* Sakura Wars (TV), Iris freaks out while on a Ferris wheel and ends up breaking the thing accidentally with her telekinetic powers.
* Sakura Wars uses a pair of revolvers as its main weapons, while Gemini's has a revolver attached to its sword.
* Sakura Wars was the other Saturn killer app in Japan. The first and second games recorded the biggest sales as a Saturn original title, and was ranked #13 place in the Famitsu's 100 all-time favorite games list, leading the series to become one of Sega's most successful franchises.
* Sakura Wars. When she sees the boat owned by Kosuke Dan and his gang, she steals it and tries to commandeer it. Unfortunately, she doesn't know how to work the throttle or steer it. She ends up crashing into a few boats and when it is about to crash into a water control gate, Leni shows up just in time and commandeers it in her place to prevent any further disaster.
* Sakura Wars, which depicts him leading the Imperial and Paris Combat Revues for one final battle.
* Sakura Wars, which tracks the player character's position on this scale (based mostly on dialogue choices).
* Sakura Wars who is described as the "greatest villain in Paris" and being single-handedly responsible for 80% of the city's criminal activity, into the Paris Assault Force.
* Sakura Wars). Your party's effectiveness in battle is dependent on how strong your bonds with your Amazon Brigade are... in addition to how well they get along with one another.
* Sakura was not shy about doing this to Sasuke, or rather attempting to, since he'd usually shove her away.
* Sakura, written in hiragana rather than kanji, shot up to the top 5 girls names in Japan while the
* Sakutaro is this for Maria. When Rosa rips him apart during a fight, Maria's diary entries start to become darker
* Sakuta to Mai on the end of her arc, quite loudly in the front of the whole school.
* Sakuya also shows this personality in the original game, due to being a
* Sakuya inherited part of the Angra Mainyu from her mother. Perhaps because of the diluted bloodline, it manifested itself as a slightly annoying second personality rather than a mad dark mode. The family calls them
* Sakuya in the later chapters, however, suggest very strongly that Sakuya has a crush on Wataru herself.
* Sakuya Izayoi episode gives a terrifying glimpse of what she's capable of.
* Sakuya Morimura has him lead the heroine to a large field full of anemone flowers he planted during his route previously, citing that they represent his love for her.
* Sakuya's case is supported by canon evidence that all other staff at the Scarlet Devil Mansion are
* Sakuya Yokaiden has the heroine raise a kappa's child after killing one. The one she kills looks like a normal kappa and the child is a human with a plate on the

top of his head.
* Sakyo's mother first forced herself on him when he was fourteen, and the relationship carried on for almost ten years, long enough for him to father two children on his own mother. Little wonder that Sakyo was willing to enter and work at Ienobu's household with no pay, if it meant getting away from his mother.
* Sakyou and the Black Black Club. Gambling on the torture and destruction of demons, and organizing a tournament for this reason, just to earn more money... these people DEFINE "corrupt".
* Sakyu Basu, whose student profile notes that she's "rumored to be a succubus
* Salaam E Ishq. Young man and his fiance are having a fight, as he didn't show up to the engagement party (commitment phobic) and she's come by to return all of his gifts. He ends up storming out of the house in fury, and a moment later knocks on the door, as she looks on, knowing he'll have to come right back.
* salad, but (in the song "Take It Home") he seemed to be evoking this trope. Or attempting to explore the boundaries of its inherent futility:
* Salad Fingers. Almost every episode. Although he's already so batshit insane that his Freak Outs are basically just a higher level of craziness.
* Salad Fingers, a long skinny body, skinny limbs, and three fingers on each hand. You'd probably assume him to be a zombie at first glance, and he does have a shambling walk, but he's at the very least sapient. Apparently, he at least isn't a zombie.
* Salad Fingers and Salad Fingers has a rather skewed sense of reality, we never find out if the corpse really is his brother or just some random dead person.
* Salad Fingers ends with the title character having his head eaten by a clone. Or was that the clone?
* Salad Fingers episode four, the titular character appears shirtless and appears to have an orgasm. However, he's green, emaciated, hairy, and creepy as hell.
* Salad Fingers falls quite nicely into this trope, with his childish, almost playful voice, his fetish for rusty objects, his finger puppet "friends", who he routinely talks and sings to, and his tendencies for self-mutilation.
* Salad Fingers' finger puppet, Jeremy Fisher, from what we can guess, seems to be of African/Non-European heritage, in contrast to his fellow finger puppets, Marjorie and Hubert.
* Salad Fingers. In fact, it's used an awful lot to emphasize just how messed up Salad Fingers really is.
* Salad Fingers in the "uncaring, detached, and having no regard for either good or evil" sense.
* Salad Fingers makes very creepy use of his long, green, bony fingers.
* Salad Fingers, Salad Fingers has one of this, except it's a toilet, not a phone. The next scene seems the be the conversation from the other side.
* Salad Fingers: The famous line from episode 2: Marjorie Stewart-Baxter, you taste like sunshine dust!
* Saladin Ahmed” and features Miles, his friend Judge, and his love interest Barbara faking a sick day to skip school, with the overly intense Vice Principal Lyle Dutcher in the role of the Dean.
* Saladin and Joan of Arc are also stated to have been Knights of the Cross at one point. Their blades have yet to be mentioned.
* Saladin campaign is narrated by an anonymous Norman knight who follows the Saracen leader Saladin in his jihad against the Crusaders.
* Salamandastron for the Long Patrol, and the Kingdom of Malkariss for one set of baddies, in the
* Salamander 2. None of them can be normally heard in-game; you'll have to use a utility for listening to arcade ROM music or use the PS1 and PSP ports' sound test modes.
* Salamander begins with a bank heist where safety deposit boxes are identified and broken into. Right away, one robber cautions another not to get greedy and steal jewelry, cash or other valuables. All they are after are photographs and incriminating documents to use for blackmail purposes.
* Salamander begins with an ordinary street scene in Brussels, of roadworkers

setting up one of those stripey modesty tents over a manhole. This is their lead-in to tunnelling into the vault of the next-door bank via the sewage system.
* Salamander. But when Gerardi cannot go through with sleeping with her so as to extract more evidence, the rejected Karin takes revenge on him too.
* Salamander/Ebañy is a half-elf whose wife died and is reincarnated in a new body. (Reincarnation is a big part of the
* Salamander, Gil Wolfs, is played by Vic de Wachter. The father of Gil Wolfs, Harry, was played in Gil's flash backs by Geert van Rampelberg, who greatly resembles (a younger version of) Vic de Wachter in both appearance and timbre. The two are, nevertheless, not related to one another.
* Salamander monastery where the religious brothers have beer, a bar, Internet access and a pool table.
* Salamanders are one of the most successful Chapters despite taking their love of fire to the point of fetish.
* Salamanders. As with all marines they tower over an unmodified human. Unlike other marines, due to their Father Primarch Vulkan and the radiation of his home planet of Nocturne, they have literal coal black skin and bright red eyes. Their use of flame weapons and fearsome looks have stopped more than one rebellion before it had even started. Despite this they and their Primarch have a lot of empathy and compassion towards normal humans and will butt heads with other marines, such as the Space Wolves, if innocent lives are threatened. All of these qualities stemming from Vulkan himself.
* Salamander skin is impervious to magic, rendering people wearing it invisible to mind witcheries.
* Salamanders somehow completely miss a giant, earth-shaking tank rolling right past them, as well as several brightly-colored Ultramarines accompanying it. It later becomes a
* salamanders, that thrived in extremely hot environments such as the inside of volcanoes and deep underground and could withstand heat and pressure that would kill most other life-forms.
* "Salamander Street" by Callum Beattie is very much the pitiful version, with the singer describing the horrible home life that led to a girl ending up here, and calling her "the saddest of them all", but at the same time assuring her things will get better. Notably, it never directly
* Salamander, Tsu'gan blames himself for his arrogance that led to his leaving his post, and so to an enemy's breaking in and killing his captain.
* Salamis, Hastings, half the battles in the Hundred Year War, virtually every naval battle in the Imjin War. Basically, any battle containing either a national leader or a 'lynchpin' commander.
* Salammbô it was also very popular in 19th-century Europe, although most of the characters are from North Africa (libyans, numidians, carthaginians)
* Salammbô. Mostly deals with the consequences of the wars for Carthage.
* Salarian females lay eggs throughout their lives, several a year. Fertilized eggs hatch as females, unfertilized ones as males. In order to keep from overwhelming their worlds, salarians only fertilize 10% of their eggs, using extremely complicated reproductive contracts to arrange who does what.
* salarian nature to destroy themselves, or at least ensure that they consistently get beaten up by races they uplifted without thinking it through first.
* Salarians are amphibious haplo-diploid egg-layers, so a female will lay hundreds of eggs (dialogue with Mordin also confirms that they have a cloaca, and use the word as an insult), and a male will selectively fertilize some of them to make them female, with the rest being male. Salarian law allows only ten percent of all eggs to be fertilized; more than that would cause an
* Salarians are a race that evolved from amphibious precursors, and they reproduce in a similar fashion to amphibians; females lay eggs, and males inseminate the eggs afterwards. Fertilized eggs hatch into females, and unfertilized eggs, males. This also gives way to salarian slang of calling someone a "cloaca" (the cloaca being a sac in amphibian bodies that is part of both the excretory and reproductive systems - in other words, an "ass" and a "dick"). Furthermore, the accelerated metabolisms

of salarians give way to increased brain function, helping salarians become more intelligent, but at the cost of having significantly shorter lifespans than any other race in the galaxy, with the exception of the Vorcha whose lifspan is even shorter - Mordin Solus, who is approximately 40, is considered practically geriatric by salarian standards.
* Salarians do not follow this rule though since their species breeds too few females to throw them into combat. Instead, they're actually a matriarchy where the few salarian females are always given positions of leadership and authority.
* Salarians list the individual's homeworld, nation, city, district, clan name and given name, but cut it down to just the last two (swapped to being in western order) in nearly all circumstances: only two salarians get their full names spoken on screen and neither are major characters.
* Salarians only live for 40 years, and are stated by in-universe sources to have photographic memories and to be able to learn and think faster than other species, including humans. The salarians are not new arrivals, and discovered space travel shortly after the asari did, well over 1000 years ago. The problem is, they will overthink
* Salarians: The Special Tasks Group, or STG, who are easily the most skilled espionage operatives in the entire galaxy. Of the various elites in the
* Salar The Salmon is a 1930s book about a salmon as it migrates to its spawning river.
* Salaryman: It's customary to keep refilling your buddy's drink whenever it gets low, so if you're not paying attention you can put away way more sake than you intend and end up on the floor.
* Salaryman Kintaro, an ex-biker (bancho), was still implied to have had a strict moral code, but now, being reformed, helps/saves a lot of people and solves the problems his own way.
* Salatori, Kamikazi's gerbil from "Teasebots", ends up becoming giant when Kamikazi uses a giant ray to turn him giant to destroy a reprogrammed Teasebot.
* Salatut Elämät bad guy, yet she was kidnapped by said bad guy when she was a kid just one season ago.
* Salazar and the Silent Mary's crew died decades before the movie but they were trapped in the Devil's Triangle so they stayed in this side as Ghosts. At the end of the movie
* Salazar Slytherin was a firm believer in this in the books. Lord Voldemort (his direct descendant and heir) and the Death Eaters have great shades of this philosophy as well (fitting, as they were expies of Hitler and the Nazis). They believe that magical strength and purity is in the blood, and therefore Pure-Bloods are more powerful than Half-Bloods or Muggleborns (Mudbloods). In later days, as Pure-Bloods grew fewer and fewer, they didn't care too much about Half-Bloods, so long as you weren't a Mudblood, but they were still out to remove all Mudbloods and subjugate the
* Salazzle seems almost deliberately designed to cater to "scalies" due to her
* Salchichonia: Germany to the point that the name literally means Sausageia
* Sale and resale of chewing gum and bubble gum in Singapore is illegal with the exception of medicinal gum for therapeutic use. Possession however is legal and chewing is allowed since it's difficult to tell which gum is medicinal and which is not. However, do note that littering and vandalism in Singapore carries very harsh penalties, especially where vandalism using chewing gum is concerned.
* Salem also started out as a nice person until her husband succumbed to illness. Then she tried begging and lying to the gods to resurrect him, but they tortured her for her arrogance and made her immortal for her deceit. She committed suicide repeatedly for years, but nothing worked and she grew bitter at the gods. Then one day, she realized that if they could be tricked, then they could be fought, and ultimately beaten. Drunk on hatred and ambition, she rallied the nations to overthrow and replace the gods. After the gods laughed at their attempt, they showed their true colors by committing omnicide
* Salem and has been known to work against her, she refuses to support Ozpin's faction as well because she believes he is not the man everyone thinks he is and

therefore is not to be trusted. As a result, she is a wild card that both the villains and the protagonists are wary of.
* Salem and Nicholas are pretty open about their inventive sex lives. Oscar is disgusted, but Ozpin genuinely doesn't care.
* Salem; as in the actual witch trials, convicted witches are sentenced to hang, with the exceptions of the Barker family and Giles Corey, who is pressed to death (to coerce him into entering a plea), as he was in real life. Hale says his entire family was burned at the stake, but Mary's response indicates this was in Europe, which is where it was historically used.
* Salem, Cotton Mather, a Puritan reverend, is in love with a prostitute named Gloriana, much to his father's dismay.
* Salem has a spell to instantly give someone an orgasm. This might count as an inversion, as rather than using it for pleasure (either on herself or others), she finds it funny to cast it on Emerald at random times.
* Salem has largely given up on her plans for world domination in favor of focusing on her family, but they are rather worried about her going insane with grief if she has to watch her husband and children die of old age.
* Salem hasn't learned her lesson and seeks the ultimate power of destruction itself.
* Salem hints that Qrow is enough of a threat for her to consider it useful to her cause if he's taken out of the equation.
* Salem, immortal Queen of the Grimm and eternal enemy of humanity, has a
* Salem inverts this when Tyrian returns to her, minus his tail, and begs forgiveness for failing to capture Ruby. Salem stares at him for a moment, and then walks away, telling him that "You disappoint me, Tyrian." Since Tyrian views Salem as a divine goddess, his response is...
* Salem is a subtle example, as she carefully treats her subordinates in ways that are both cruel and effective, but look kind at first glance. When Cinder is injured, she cares for her and helps her through it; she knows that Cinder
* Salem is connected to an ancient evil, one that helped build Remnant itself.
* Salem is exorcised from her, she's now capable of staying in control of herself after Mary Sibley tries to put it back.
* Salem Is Witch Country: Salem, Massachusetts is strongly associated with the Salem witch trials of 1692, and is often portrayed as being home to real witches.
* Salem: John Alden, Sebastian Marburg, and, for a short time, Dr. Samuel Wainwright all directed towards Mary.
* Salem, John Alden shoots off part of the magistrate's left ear before he and Isaac escape from having witnessed the witches performing a ritual.
* Salem (John and Mary) get to leave the township for a better life together, whilst every other main cast member has either been murdered (Mercy), sold into slavery (Tituba), damned to hell (Cotton), corrupted beyond recognition (Anne), or not mentioned at all (Isaac).
* Salem: Mary says this exactly to Mercy after recounting how she came to be George Sibley's wife.
* Salem, preventing him from speaking. Mercy Lewis's is a snake put in her stomach. Tituba's is a spider.
* Salem's Daughter, Darius influenced the people to start one of these.
* Salem slithers out. Turns out that was how the witches were controlling her, it actually worked.
* 'Salem's Lot, and became curious about what would happen if vampires came to America, specifically in a small town.
* 'Salem's Lot, and is seemingly incapable of human speech. Averted in the 2004 remake, where he once again looks human.
* 'Salem's Lot are just a few examples that contain very chilling descriptions of rats.
* 'Salem's Lot became "De Dødes By" which translates to "City of the Dead".
* 'Salem's Lot because its owner has lost his faith. When that character faces vampires again in a later King book, he has recovered his faith and is able to (briefly) drive them off, even after he puts the cross aside - it's only a symbol,

after all.
* 'Salem's Lot, it's mentioned that one of the town's residents murdered his wife when he found out she was having an affair with a travelling salesman. Everybody else thought she had left with the salesman.
* 'Salem's Lot reveals that, while he isn't only one of his kind being a Type-One vampire, he's still the main cause of events in the book.
* 'Salem's Lot's novel was adapted into two different miniseries, first in 1979 and again in 2004.
* 'Salem's Lot: The close-knit town of Jerusalem's Lot, where everybody knows everybody and gossip spreads quickly via the town party line. Unfortunately, they almost all quickly fall under the sway of the vampire king Kurt Barlow.
* 'Salem's Lot. The house overlooked the town of Jerusalem's Lot and was considered to have an evil presence. The former residence was a murderer named Hubie Marsten (where he killed himself and his wife, Birdie Marsten) the house haunted Ben Mears his entire life.
* 'Salem's Lot they tend to show up in the middle of the night, meaning their potential victim is partially asleep and not thinking clearly. In one case it's even indicated vampires can be invited in by people who are still asleep.
* 'Salem's Lot: Weasel Craig, one of the town residents who befriends Ben Mears, is specifically mentioned as having won a Silver Star during World War II. He's a nice man, but also a desperate and broke alcoholic who relies on charity and handouts to get by.
* 'Salem's Lot when Jason Burke (Matt Burke in the book) manages to force the vampirized Mike Ryerson from his house only to clutch at his chest and wince, staying conscious enough to call an ambulance. This is hinted at during the confrontation as Jason is shown to be visibly terrified and his face gets slowly redder as his breathing increases and he begins to sweat profusely.
* 'Salem's Lot, where the master vampire takes the appearance of one of the characters' childhood bogeyman.
* Salem's many suicide attempts are both portrayed primarily through shadows on the wall and Ruby's horrified reaction.
* Salem's "treatments" consists of her teaching Cinder how to control the Grimm limb that has replaced her severed left arm. During the Battle of Haven, Ruby's brief use of her anti-Grimm power causes Cinder to collapse to her knees in pain, clutching her Grimm arm. When she tries to extend the Grimm arm to steal the dying Winter Maiden's power, Winter severs the limb from Cinder's body. Cinder screams in agony from the injury and keeps screaming as the limb painfully regenerates; she then retaliates against Winter so viciously that Winter is almost killed from the onslaught and Cinder loses her opportunity to steal the Winter Maiden's power.
* Salem the cat was a horror host during certain Halloween episodes of
* Salem, the ruler of the Grimm, wants to cause ruin and destruction for misdeeds that were her fault to begin with. Granted,
* Salem, this appears to be the basis of the "grand rite" the witches plan, requiring the deaths of innocents condemned as witches. Blood and death are two of the hallmarks of witchcraft.
* Salem: Tituba suspects Mary's decision to invade John Alden's dreams to be this, since she repeatedly used them to have dream-sex with him. Although she loses control at one point and gets briefly trapped in a nightmare, she succeeds not only at extracting the information she needed from John, but as a side effect, it makes him lust after every woman he passes by.
* Salem: True to life, Giles Corey merely says "More stones" when being pressed to death.
* Sale of the Century is another example. Most people today recall the 1980s series hosted by Jim Perry and developed for Australian TV by Reg Grundy. It was originally created by Al Howard and aired on NBC from 1969 to 1973 and was hosted by Jack Kelly (1969-71) and Joe Garagiola (1971-73).
* Sale of the Century, to the current models that stream videos via WiFi and are much more compact than the physical-media-based models of old.
* Sales (and prices) of Fender Jazzmaster, Jaguar and Mustang models, chosen by

Cobain and his ilk as they were inexpensive, strange, unfashionable pawnshop guitars (and as Cobain had small hands and found the smaller necks easier to play) grew with Grunge's popularity. Similar, too, were the popularity of strange analog 1970's stompbox effect pedals grungers used to create their sounds.
* Sales at Goodwill stores reportedly rose 10% following the release of
* Sales figures are unknown due to not being published, but music albums and merch sell
* sales have its dedicated sales team answer the phone immediately using a real person. you can then have an immediate conversation as follows:
* Sales of deodorant Teen Spirit skyrocketed with the release of the
* Sales of the Dodge Ram pickup nearly doubled in 1996 thanks to a red model being featured as the hero vehicle in the film
* Sales of Timex watches with the "Indiglo" backlight skyrocketed after the 1993 bombing of the World Trade Center, where an office worker used the light to guide a group down 40 unlit flights of stairs. The incident also increased the reputation of the Timex brand, which had for years been considered cheap and inferior compared to more pricey models by other companies.
* Salgari was very good at researching information and including it in the novels saga) are extremely short, include little to no parries, if at knife length include grappling, and tend to end with someone stabbed in the chest or the guts.
* "Salient abilities" can make any werewolf (or vampire, golem, mummy, etc) different from any other of its kind. The
* Salina de la Renta has a fairly deep, soothing voice that she uses to get what she wants. Should it fail, brace yourself for her screeching tag team partner Aria Blake.
* Saliva's biggest hit was the #51 "Always", which was their sole #1 on Alternative radio and peaked at #2 on Mainstream Rock alongside "Ladies and Gentleman" (#25 Alternative). As the band faded into obscurity, "Click Click Boom" (#25 Alternative, #15 Mainstream) became their signature song,
* Salladhor abandons Stannis after the Battle of Blackwater Bay. He gave Stannis 30 ships in return for gold from plundering King's Landing. The defeat at Blackwater meant that Stannis couldn't uphold his side of the bargain. He re-enters his service however after the Iron Bank gives Stannis a loan and Davos gives him satchels of coins with more sent to his wife.
* Salladhor explains Stannis's post-Blackwater situation to the recently rescued Davos in the Season 3 premiere.
* Salladhor Saan, a pirate allied with Stannis' army, talks about how he wants to seduce Queen Cersei as his only demand for taking part in the siege on King's Landing.
* Salladhor Saan is a captain of a fleet of pirate ships, has no qualms killing and plundering for profit, and states out loud that he desires to fuck Queen Cersei Lannister. He's also a good friend of the noble (and former rogue) Davos Seaworth, has his own minor virtues, and is freakin' hilarious (
* Salladhor Saan is using the gerund form whenever the situation is calling for a verb, as well as being another
* Salladhor Saan may be a greedy pirate, but he values loyalty and has a strong code of ethics.
* Salladhor Saan relates a certain joke to a couple of prostitutes, who beat him to
* Salli Richardson-Whitfield, Elisa goes undercover with the fake name Salli.
* Sally Acorn, Bunnie Rabbot and several other characters date back to
* Sally Acorn had shades of this in the earlier, more comical issues, usually butting heads with the reckless and free-spirited Sonic as a result. This was diluted as the stories matured, the rare occasions she delves back in this trope are more
* Sally Acorn was originally intended to die during the events of the "Endgame" arc of the
* Sally also has a lot of trouble in school, and often struggles with her homework despite Charlie Brown's patient efforts to help her. One of the strip's running

jokes is the unintentionally humorous school reports she gives in front of the class, which are frequently inspired by
* Sally also refers to her big brother Charlie Brown as... "Big Brother".
* Sally and Myra, who'd previously dated long ago and before Sally transitioned, were together for a while until Myra walked out on the wedding day, deciding that she was straight and couldn't bring herself to marry a woman.
* Sally and Ted Forth. Each would probably drive another spouse crazy, but they're perfect together.
* Sally Ann Thunder Ann Whirlwind Crockett: Being a mother doesn't get in the way of Sally's ferocity at all. While watching the homestead and her firstborn on her own, she thrashes a huge number of troublesome gators.
* Sally are used to make cars self-driving and human-smart. They have their own language and understand English well enough to laugh at ridiculous ideas.
* Sally attempted to invite Harry Potter over to her house for dinner that could have been.
* Sally Bollywood: In "Call My Lawyer", Sally's entry in the class baking contest was a yellow curry and pepper cake. Dowee's was a haggis cake, consisting of sheep's stomach stuffed with Christmas pudding.
* Sally Bollywood. When everyone in school gets sick except for Sally, it turns out it was because the lunch that day used an extra strong pepper. Sally was the only one unaffected thanks to her heritage meaning that she was used to eating food that spicy, having eaten that same pepper her entire life.
* Sally Brown. She's too lazy to do research for her homework, so she usually just makes things up. While she has no qualms about simply bluffing, she often does mistakes in good faith, based on what she's heard or what she thinks she's heard.
* Sally constantly calls Linus "my sweet baboo." Linus always makes sure to clarify that
* Sally, during a story arc where she wears an eyepatch to treat 'lazy eye', looks at herself and thinks she should be in an ad for men's shirts. (When her eye got better, she gave it to Snoopy.)
* Sally Dynevor was undergoing treatment for breast cancer (ironically after her character Sally Webster was given the all-clear) so she wore a wig for several months. After a while, she opted to appear without the wig, and it was written in that Sally's new boyfriend had taken her for a short haircut.
* Sally Face), but he had to wear a prosthetic face ever since. In the flashback, his face right after the attack is covered in so much blood that it's impossible to tell.
* Sally Field. According to Field, he kissed her so well and so thoroughly that she was left dazed and unable to film for some time afterward — the first and last time this had happened to her in her career.
* Sally Field's mother, actress Margaret Field, died on Sally's 65th birthday (November 6, 2011).
* Sally Field The usual tricks were combined with using a stunt double for flight shots.
* Sally Field, which cemented her as one of America's greatest actresses and silenced the skeptics for good.
* Sally Fingerett's song "She Won't Be Walking" is a song about domestic abuse. The chorus is positive and hopeful:
* Sally Forth a new robot is being tested by having a bazooka fired at it. Unfortunately, the scientist firing the bazooka had it pointed backwards, blasting the President behind him instead.
* Sally Forth" episode but with wi-fi." In another strip, Hillary remarks on the fact that her baby cousin is a year older, while she herself is the same age and in the same grade at school. She is then quickly admonished not to talk about it.
* Sally Forth (Howard) had her hair in pigtails when the strip started. When she was aged up to a teenager, she dropped them.
* Sally Forth (Howard). He's even referred to himself as such one time. There are some deconstructive elements with him, as his estranged relationship with his father is hinted to be why he regresses to childish demeanor as a coping mechanism

and Sally has made it clear to him at least once that he has to become more of an adult if he wants to keep their relationship healthy.
* Sally Forth (Howard) involves the Forths going to a science fiction convention, because the voice actress who played the main character in Sally's favourite childhood cartoon, which she recently rediscovered, is one of the guests.
* Sally Forth (Howard) strip features her husband recording an answering machine message with a set of "Press X" options, finishing with the statement, approximately: "Press any button you like. The whole point of Voicemail is that we don't want to talk to you." He'd started off by asking Sally if his voice sounded unfriendly enough.
* Sally Forth (Howard) strip, in which Ted is driving an RV, and Sally is trying to guide him to reverse into a parking spot:
* Sally Forth Howard strip, when Faye and Hilary have a fight, and Ted and Sally have to talk to one of them about it. Sally says that Faye is easier to talk to, then realises that "despite having gone upstairs, Hil's right behind me now, isn't she?"
* Sally Forth (Howard) subverts this trope. Hilary tells Sally that since she told her Christmas was about giving, she took the egg carton out of the fridge and put the eggs in a plastic bag. It turns out to make sense, however, when it's revealed in the next strip that Hilary had used the egg carton to make an ornament for Sally.
* Sally Forth (Howard) when her mother had to move for a new job and the Forths allowed her to live with them so she could finish out the school year.
* Sally Forth: In an arc for Feb. 12, 2010, Sally remembered the first time she met her boss, Ralph. She eventually snaps out of it.
* Sally Forth qualifies, as she began as a recruit in Lt. Dahl's commando unit.
* Sally Forth. Sally herself, and Hil's friend Faye, do their best to resist and keep the strip grounded.
* Sally Forth team member pass as one of the guards — just by taking his shirt off.
* Sally Forth the first time she saw action was when she lured a troop of Commies to their death by bathing in a river.
* Sally Forth. This is a bit of an odd case, though, as Francesco Marculiano has admitted that he based his portrayal of Ted somewhat on himself; the Flanderization was almost a complete coincidence.
* Sally Forth was an excuse to feature sexy naked women to entertain the US servicemen reading them.
* Sally Forth (Wood)... along with the martian Snorky, who provided wry observations of their actions.
* Sally gains a reputation in chatroom rumors during the second event when she solos some in PVP. The shadows of the forests under the light of a red full moon gives a horror game vibe to her swift killing of loads of players.
* Sally has been a princess for an incredible amount of time and never just ascends to title of Queen. Contrary to all the obligations that goes with it nothing says she can't be a queen but lead the Freedom Fighters — her father was king and led an army into battle. She also never steps up and challenges her father but instead chooses to whine that his choices are unfair instead of calling him out and talking to him like an adult but as his little girl.
* Sally is a Frankenstein-inspired rag doll whose skin and dress are made of stitched-together cloth. She takes advantage of this by undoing these stitches to detach her limbs and let them act independently.
* Sally is saved from Purgatory and is actually brought back to life in a flesh and blood body
* Sally is singing Christmas carols when Remus and her mother unexpectedly show up.
* Sally Jessy Raphael (ran from 1983-2002; canceled by distributor Studios USA due to the fading popularity of talk shows)
* Sally Lockhart series deals with this on several occasions, as the protagonist over the course of several books meets and befriends criminals and vagabonds who

commit crime to survive in Victorian England. She often finds that people on the wrong side of the law can be equally moral and good as anyone else.
* Sally Lockhart that he survived, but her bullet had pierced his spinal cord, leaving him paralyzed.
* Sally Lockhart white, but is otherwise a fairly standard example of the trope.
* Sally Pendrick. As of yet this has had no effect on the story, as Season 4 returned to the self-contained episode format.
* Sally/Ragdoll is a patchwork entity created by Dr. Finkelstein using Dr. Frankenstein's notes
* Sally rips off Amy's Sonic-themed underwear in "Sonik Kombat: Amy Rose vs. Sally Akorn".
* Sally Simpson applies lipstick and eyeshadow after being seduced by
* Sally's school building, which is both resentful and defensive of its occupation and human inhabitants.
* Sally starts off dead and confused about how she died. As the story progresses, she eventually finds out how she died, as well as a few perks of being a ghost.
* Sally The Ghost Hunter who kidnapped kids, murdered them, and bathed in their blood in an attempt to become young again.
* Sally the probation worker has been hidden upstairs in a freezer for the last couple of weeks, they wrap up the corpse in garbage bags, weigh it down with cinderblocks and dump it in the nearby lake.
* Sally the Witch. The Manga started in July 1966, the Anime in December, 1966.
* Sally the Witch there, while she lives and trains on Earth. Sally's friends and teachers believe that they work abroad, and a whole episode of the 1989's series is dedicated to her trying to make up an excuse when her teacher says he'll go to her house...
* Sally the Witch witches and warlocks live in the "Land of Magic". Sally decides to go live in the "Land of Humans" among humans.
* Sally": This story, published in 1953, anticipated commercial self-driving cars in 2015. The story itself takes place around 2057; Sally is a 2045 convertible that had been at the Farm for five years.
* Sally used to have conversations with the school building (or at least one wall of it). Eventually, the wall began to produce
* Sally von Humpeding, like basically all Discworld vampires, has a full name and title that takes up several pages. She still prefers being a copper though.
* Sally Whitemane and Renault Mograine, the overseers of the Scarlet Monastery. Which have a villainous
* Sally, who has to hide her baby daughter from the rest of the world.
* Salma Hayek purely because she got to play a Queen, which doesn't happen a lot when one is Mexican.
* Sal Manella, a fat, sweaty, ugly geek who speaks in internet memes and "l33t speak," is this to Maya in one case in the first game.
* Sal Manella, the sweaty otaku TV director, and perverted hospital "director" Hotti.
* Salman Rushdie and he knows Hindi, Urdu, English and French. English was not his "mother tongue" (aka first language) yet he became a respected English novelist and known for using British and American slang in his books.
* Salman Rushdie is quite critical of post-independence Indian society, though he does have a few choice words for his adopted homeland the UK as well. His favourite targets are corrupt politicians and religious fundamentalists.
* Salman Rushdie. Regardless, many people bought copies of the novel afterwards if only to defy Khomeini and show support for Rushdie dealing with this threat.
* Salman Rushdie's novels are at times lengthy essays that parody and riff of some aspect of history, contemporary life, and hobby horses that he found interesting. Some of his work averts it in being straight historical fiction.
* Salman Rushdie, the burglar crushed his sons' legs when they were born so they could be more successful beggars. After they spend one night in a house containing the titular relic, they're healed, causing them to complain that they've lost their livelihood.

* Salman Rushdie". This is at least partly due to the constant pollution from the many factories which manufacture... sadness.
* Salman Rushdie was subject of a famous ban in modern times when Ayatollah Khomeini considered the book blasphemous and placed a fatwa on Rushdie's life. Unsurprisingly, the book and Rushdie's other works are banned there, though in 1998 the fatwa was officially lifted by the Iranian government.
* Salmiakki. It is ammonium chloride mixed with black licorice, being simultaneously sweet, fiery and salty, and ingesting it increases salivation.
* Salmon Run is a popular addition to the game, but it's not available all the time and players have no control over what weapons they get to use for each round.
* Salò, or the 120 Days of Sodom: One of the four fascist libertines is known as the Duke. No guesses on just what kind of guy he is.
* Salò, or the 120 Days of Sodom: The Duc de Blangis and his companions are guilty of almost anything you can think of, and some things you probably can't.
* Salome by Richard Strauss with a local busker strangely cast as a naked, blood-splattered executioner.
* Salome, especially in its operatic adaptation which composer Richard Strauss once described as "ein Scherzo mit tödlichem Ausgang" (a scherzo with a fatal conclusion).
* Salome in particular is best known for the "Dance of the Seven Veils" (as in, the title character takes them off).
* Salome Jens was the humanoid precursor in the TNG episode "The Chase" before being cast in the recurring role of the female changeling in DS9.
* Salome of priceless things he could give her. "Give me the head of Jokanaan", she insists.
* Salome (one of the Chancellors in the Authority) reveals she was given to her uncle for sexual favors when she was a little girl. This act demonized her in the bible as a seductress of men when in reality she had no control over what happened to her. Given the way she tells the story to Bill, she sounds rightfully angry about it.
* Salome read, in their entirety, "Salome does the dance of the seven veils." This has the added practical value of allowing the individual production to decide how far they want to push things, as it can get pretty racy. Richard Strauss's opera adds a few more cues here, but the dance is still not described in detail.
* Salome. While this is never mentioned again, it can't have been a healthy act for either world.
* Salon de l'Agriculture, but his reaction to it was even more (in)famous: he answered the offender "Casse-toi alors, pauvre con!" ("Get lost then, dumbass!"). Such a direct insult to a citizen was deemed unbecoming of the President and veered into sheer hypocrisy when someone was later arrested for "insult to the president" for holding a sign with that very sentence during an anti-Sarkozy protest.
* Salon des Refuses was started in Paris by a group of artists, now referred to as the Impressionists, who were infuriated at being constantly rejected by the official Salon de Paris.
* Salon were published in a followup, with several talking about how they'd spent that day and the next with friends, having sex, drinking parties or both.
* Saloth Sar, better known to the world as Pol Pot. He took that name to lead his guerilla movement, the Khmer Rouge. He may have been trying to imitate Vladimir Illitch Ulyanov (Lenin) or else Josef Vissarionovitch Dzugashvili (Stalin).
* Salsa. He has atrocious attacking power, low defense, and very mediocre abilities, with only one having any real use. He's also the character you control for the entirety of chapter 3, though you thankfully have more competent characters backing you up whenever you need to battle.
* "Salt and burn the body" is the standard solution to malevolent spirits and such. If the body's
* salt and certain necessary minerals, sour concentrates around vitamins necessary to ward off disease (especially Vitamin C), umami is well-cooked proteins, and bitter helps us avoid poisons.
* Salt and Pepper: A straitlaced, by-the-book white character and a rebellious,

hotheaded black character contrast one another.
* Salt and Sanctuary has a medieval version in the Tree of Men, the apparent result of an entire dungeon's worth of torture tools coming to life through sheer hatred and forming a semi-coherent jumble you must fight as a boss, with its newest victims still hanging from hooks.
* Salt and Sanctuary into the faces of the many, many people she had executed for increasingly frivolous and nonsensical reasons before hanging the corpses up as decoration. When her reign was finally cut short by a mob of vengeful villagers, it was seen fit to leave her with "the greatest smile of all." By the time you fight her in the game, she's a rotting corpse with a mess of gore where her lower jaw should be.
* Salt and Sanctuary. Its description states that despite the gold it's surprisingly practical due to its expert craftsmanship, and is actually one of the best armor sets in the game. Wearing the set also increases the amount of gold dropped by enemies.
* Salt and Sanctuary rather than a hallucinogen. The House of Splendor is a strange creed that worships a pair known as the Fool and the Prophet, who extol hedonism in all things, and their mages believe that dulling one's inhibitions draws out their primal connection to the Warp thus enhancing their magical abilities. To that end, they believe in forever partaking in revelry and indulging in wine to strengthen their connection to the Warp. They might actually be right about this, as the House of Splendor's mages sell some of the most powerful spells in the game.
* Salt and Sanctuary: Sometimes you may end up behind a Split Swordsman who has fallen to his knee after being parried, and the result of a backstab can be this.
* Salt and Sanctuary: The Bloodless Prince will use these to close any distance you try to put between you and him. Being a massive golem that barely fits in the screen, he pulls it off so well that staying close is actually the better option; he punches and kicks hard, but at least you can dodge those. The bellyflop hits almost the entire arena at once.
* Salt and Sanctuary). They somehow still get miracles and even their own clerics, who lampshade this oddity but never do explain how they manage.
* salted so nothing else would grow on it enough salt destroy the farmland of Carthage, and "salting" of conquered lands was purely symbolic because salt was too valuable to throw away more than the symbolic handful.
* Saltheart Foamfollower. There's also Kevin Landwaster and Berek Halfhand. Most of these do follow the epithet rule, however.
* Saltimbanco. "Kaze/Norweg" was completely dropped after the retirement of the Double Wire.
* Saltimbanco opened in 1992, originally closed in February 1997, and was brought back in October 1998. As a tent-based tour it ran until 2006, and relaunched as an arena tour in 2007. In this form it ran until 2012.
* Salt: Informally, to cut a wiki page and lock it so it cannot be created. Refers to the ancient warfare practice of "salting the earth", preventing new crops from growing.
* Salt is named as a mole by a captured Cold War derelict. She escapes house arrest, then reconnects with her Soviet spy comrades. However, when Salt learns that her superiors are planning a rogue operation that will trigger a nuclear war, she works feverishly to undo their plans. This makes Evelyn Salt kill-on-sight by American and Soviet forces.
* Salt Lake City Comic Con 2013 had a panel featuring, for the first time ever,
* Salt mines rent storage space to a number of organizations including governments, financial institutions, and movie studios where the natural conditions hundreds of feet below the earth's surface just happen to be perfect for the long-term preservation of documents and film stock.
* Salt-n-Pepa lashes out against this in the song "None Of Your Business" - which also doubled as a
* Salt of the Earth Juan is compelled to do this when 1) he and all the other miners go on strike, and 2) a Taft-Hartley injunction forces the union to send all the miners' wives, including Juan's wife Esperanza, to man the picket line. Juan

hates it, and a rift develops between him and Esmeralda.
* Salton Sea, after it was abandoned in the 60s, suffered some flooding but mostly receding shorelines, leaving many abandoned boats (probably already sunk on the bottom by the time they were dried out) marooned high and dry on cracked, parched earth far from water. The fact that the Salton Sea is artificial to begin with, having been created by an irrigation accident in the 1920s, helps explain this. Unfortunately the circumstances of its abandonment and subsequent drying out have also left the former Salton Sea highly toxic.
* Salt's character gets punched in the nose. And then she's just gushing the stuff.
* Salt Solution are a complete inversion. Although salt is never used as a weapon against them, they would logically have to be immune if they're using it to make their victims more appetizing.
* Salt. The captivated heroine pretends to have swallowed a cyanide pill, just so she could be transferred to ER where she is able to overpower the surprised staff.
* Salt The Holly: Cade has a flashback to when an assassin squad massacred his family. Not even a baby girl is spared.
* salt vampire episode "The Man Trap" uses seduction, appearing as someone's "ideal lover", as its most reliable trick.
* Salt was once rare in Europe. There are specific areas with abundant salt deposits, however, and when towns appeared in these areas, these towns would soon become important destinations for merchants with "salt roads" established between them and major metropolitan centers.
* Saludos Amigos - and introducing new characters, such as his many friends from the neighborhood and his cousins from different parts of Brazil, thus giving him a wider range of possibilities for the stories and better opportunities to exploit lesser-known aspects of the Brazilian culture.
* Saludos Amigos, as Donald struggles to cross a rickety, falling-apart suspension bridge on a llama:
* Saludos Amigos has Donald Duck visiting Lake Titicaca, and succumbing to the symptoms of altitude sickness as the narrator lists them off.
* Saludos Amigos has two examples: In "Lake Titicaca" when the boy with the llama plays his flute in reverse and the llama's animation runs in reverse; and in "Gaucho Goofy" when Goofy catching an ostrich is run back so it could be shown in slow-motion.
* Saludos Amigos, where Joaquin Garay also voiced Panchito in all the aforementioned languages.
* Salusa Secundus are both brutally inhospitable prison worlds created to force the beings left on them to adapt and become stronger. The effect seen is more of a cultural (and physical conditioning) change than evolution, though.
* Salute Your Shorts, and as a result they would all instead be sent to separate camps for the remainder of the summer (all of which were even worse than Camp Anawana). The boys quickly take a 180 in their plans and encourage Ug to fix the violations and patch things up with Mona.
* Salute Your Shorts announces over the speaker that there was a shipment error for their food, and advises the campers to disregard any milk containers dated for 1983 (bear in mind the show aired in the early '90s).
* Salute Your Shorts apparently involves maple syrup and a tennis racket, but little else about it is revealed.
* Salute Your Shorts sees Budnick fall in love with Dina and force himself to become the classy, nice guy that he assumes she wants. This ends up backfiring, as well she is initially flattered by his attempts to change, she finds the "respectable" and "composed" Budnick boring, and tries to get him to dump her and go back to normal.
* Salute Your Shorts, Sponge is given permission to use his computer in order to connect to a phone line (use of phones is usually prohibited at camp, and the show predates the widespread use of the internet). When the others find out, they use it behind Sponge's back and let him face the bum rap when they rack up an absurdly large phone bill. Sponge later laments that he's grounded for the rest of the summer, and if he comes back to camp the following summer, he'll still be grounded,

and if he ever has kids and they come to the camp, they'll be grounded as well.
* Salute Your Shorts starts with this as they pull down the Camp Anawanna flag and run up pairs of underwear.
* Salute Your Shorts, Ug and Z.Z. go on a nature hike when Ug comes across what he thinks is a rare plant, and asks Z.Z. to take his picture with it so he can get into a local shrub club. Z.Z., however, believes that the plant is actually poison sumac. She ends up being right.
* Salute Your Shorts, Ug is in a trance after his girlfriend dumped him. One of the campers puts a danish on his head.
* Salute Your Shorts was forced to admit his grandparents called him Moosh-Moosh.
* Salute Your Shorts when he and Donkey Lips are being weighed when they're signing up for the wrestling team. For added humor, Z.Z. attempts to squeeze it, and Sponge exclaims, "Ow! I got a bruise!"
* Salute Your Shorts, when in reality she's wearing black and sneezing from hayfever. The rest of the episode and the next one deals with him and his sudden crush on her.
* Salute Your Shorts when Sponge drank some of Telly's bulk-up formula.
* Salute Your Shorts where the group is putting on a play. Dina has bad stage fright, and Sponge advises her to picture a giant chicken at the back of the audience. On the day of the play, she begins to choke...then sees a chicken in the back of the room. Turns out it's Sponge in a costume; the trick works and the play goes as well as any play with Donkey Lips as a rapping mouse could go.
* saluting protocol Army and Air Force custom, it's a big no-no in the naval service.
* Saluting with a rifle. Usually done by holding the weapon vertically in front of you, muzzle up, with the underside of the weapon presented towards the person being saluted.
* Saluting with a sword is generally accomplished by bringing the sword's hilt up to the chin with the point facing up, out at a 45 degree angle towards the person being saluted.
* Saluting with your left hand can be acceptable when there is something understandable preventing you from using your right. Traditionally, the use of the right hand in salutes is to show that one bears no threat (since most people are right-handed, they would be carrying their weapons in their right hand).
* Salvador Dalí, but Dalí lived to see his work appreciated extensively and even a museum erected in his honour. Even outside of the art world, he was a well-known personality and socialite in his time, sure to be recognized wherever he went (although his iconic appearance probably helped with that).
* Salvador Dalí, depicting her as a monstrous sphinx. He also included locusts as a motif in much of his work, precisely because he was terrified of them.
* Salvador Dalí did. He stated on one occasion that he often slept with a spoon in his hand, so that when he finally started to dream he would drop the spoon, waking him up, and then he would sketch what he had seen.
* Salvador Dalí find out it was a joke, he fired the editor who published it. Never mind that he was the one who ordered it to be published.
* Salvador Dalí once told a reporter that he didn't really feel like "the most famous painter in the world", because most people who encountered him did recognize him, but weren't sure "whether he was a singer, a film star, a madman or an author."
* Salvador Dalí, one of the most famous artists who took inspiration from dreams.
* Salvador Dalí, who once said: "What matters is that people talk about me, even if it's good!"
* Salvador is a Pandoran native. He left his hometown to fight Hyperion after the latter declared all the local residents as bandits for not submitting to Handsome Jack's iron fist.
* Salvador Perez, the catcher for the Kansas City Royals, was raised in Venezuela by a single mother. She got him into baseball to keep him occupied; he is now one of Major League Baseball's most decorated players, including six All-Star Game

appearances, five Gold Gloves, and the MVP of the 2015 World Series.
* Salvador Plascencia made a complaint in one interview about how people were trying to find a metaphor in
* Salvados had an intro where this happened to host Jordi Évole.
* Salvage 1, after the astronauts are returning to the Earth from the Moon, they're unconscious (and thus unable to control their ship) as they enter the Earth's atmosphere. The government is going to shoot them down unless they can hear "voices", indicating that they're alive and able to land it safely.
* Salvage 1. When she demurs, he asks if would help if he closed the blind. Their ground control then comes over the radio saying "No, but you might want to turn off your microphone".
* Salvage are all dead with Duke reliving Claire's brutal murder at his hands over and over again.
* Salvage", Faith suffers a horrific beatdown, and is so bloody and battered afterwards that she can barely walk. Her reactions afterwards show that her confidence is just as damaged as her body.
* Salvage Hidden Treasures: A small indie game where player scour the seas in search for valuable treasures.
* Salvage Hidden Treasures, the "Shark Attack!" event has sharks attacking the player and damaging their scuba gears, costing them either 500£ or one of their treasures if they can't afford it.
* Salvage Hidden Treasures, where it can be discarded at any time to steal a treasure from another player.
* Salvage is to keep reliving his murder of Claire, from her perspective.
* Salvage likes to collect bits and pieces of rubbish, partly out of fascination, partly to make it into new things. His
* Salvage Pirates: Being saved and endangered at the same time by pirates.
* Salvage Pirates can become an Emergency Command Hologram, who makes it clear that's not going to happen.
* Salvage Pirates: The heroes are rescued! Okay, not really; they're pirates who only want to loot their stuff.
* Salvage Pirates: Thieves who steal scrap and junk from abandoned ships.
* Salvage The Remnants — Shen Qingqiu knew Yue Qingyuan needed to be the Emperor before he could be his lover, but he nonetheless suffered from their ever-growing distance and their relationship ultimately imploded.
* Salvage The Remnants, Shen Qingqiu is a flawlessly elegant courtesan who dutifully serves as the Imperial Court's ornament for the low cost of not being able to travel or having a happy relationship with a lover, and Luo Binghe is the earnest bodyguard serving as his confident, bent on alleviating Shen Qingqiu's misery by showering with care and ultimately whisking him away to his birth kingdom.
* Salvage, until Angelus uses a bone dagger made from its body to kill it. Unfortunately, as foreshadowed by a mystical dream Angel had earlier, that undoes the spell and brings the sun back. Hundreds of rampaging vampires die instantly, and Angelus is sent scrambling for the nearest safe shadow.
* Salvaging can end up taking up a lot of playtime simply because it can become a
* Salvation below), which appears to violate Newtonian physics. Indeed, in order to develop it, they first have to get the help of an AI to go through all the possible frequencies and then use an extremely rare crystal that only shows up on meteorites to build the drive. And they manage to do it in a matter of days!
* Salvation Boulevard: One of Pastor Dan's followers is a police detective who assists Jerry in trying to murder Carl.
* Salvation, Darius finds his professor, Harris, missing with his home trashed and the man's glasses (a one-of-a-kind pair from his grandfather) left behind. Later, Harris returns, revealing he was on the run from some mysterious foe. He and Darius are joined in a scientific effort to stop a deadly asteroid from hitting Earth. Taken by some agents, Darius realizes he recognizes the driver as a man chasing him outside of Harris' home. It then hits Darius that Harris is wearing the exact same glasses from his home. And the only way he could go back to his house when he was

supposedly hunted is if he was working with the "attackers" all along.
* Salvation: Dawn of War fanfiction. Even the character names are similar.
* Salvation Reach. When Rawne's team gets assigned to protect the Chaos defector, he has special badges made which distinguish his troopers from other Ghosts, even the elite scouts and snipers. Also, the team has its own name, the Suicide King, which reflects their extraordinary status.
* Salvation's Reach, Dorden is afraid they are unable to save Cant's life, because removing the garotte will release the pressure that was holding the blood in the artery. Kolding thinks of a means, and they labor for hours, succeeding.
* Salvatore Giuliano (only seen onscreen from a distance or from behind, and only a couple of times) and has only a few lines. His story is told by how the people around him are affected—Sicilian politicians, Sicilian police, his mom, the men in his bandit gang.
* Salvator Fabris was a storied Italian fencer who served as the instructor of Christian IV. He also produced a very popular fencing manual.
* Salvia divinorum is still legal in most parts of the world, but produces an extremely intense half hour of hallucinations, euphoria, and/or panic when extractions are smoked. It has no health effects and is not addictive. However, there's a media campaign against it. People
* Salyut 1/DOS-1 (1971): Only two crews went up to this. The first (Soyuz 10) couldn't open the door. The second (Soyuz 11) got on board and spent 23 days there, but died during reentry when a malfunctioning valve caused their capsule to depressurise.
* Salyut 2/OPS-1 (1973): An Almaz station. Depressurised on launch after being hit by debris from the Proton launcher, followed by an unexplained explosion (probably caused by faulty wiring) that destroyed the solar panels less than two weeks after reaching orbit. No attempts to visit.
* Salyut 3 fashion) that was tested successfully on another satellite. The intent here was probably taking out potential American Kill Sats. Had any subsequent Almaz outposts been commissioned, they would have carried missiles instead.
* Salyut 3/OPS-2 (1974-5): Only had one crew visit. The only Almaz mission to actually do anything military related, it shot off its gun and destroyed a couple of derelict satellites.
* Salyut 4/DOS-4 (1974-77): Twin to the failed and disowned (from the Salyut program) Kosmos 557/DOS-3. Mounted one solar telescope and two x-ray telescopes, used for deep-space observation.
* Salyut 6/DOS-5 (1977-82): First of the second-generation stations, and the first to mount two docking ports to allow resupply while a crew was already aboard. Also demonstrated the viability of in-situ modular station construction when the automated TKS logistics module was successfully docked by remote after the last crew departed, paving the way for Mir and the ISS.
* Salyut 7/DOS-6 (1982-91): Originally the back-up module in case Salyut 6 failed, refurbished and launched due to delays in Mir. System failure led to the batteries failing to charge between crews, forcing an on-site repair after manual docking. Served as a testbed and experimental platform for several Mir technologies.
* Salza brings it up again in Revenge of Cooler Abridged: "I'll see you in Space Hell, cousin Jeice." He also mentions that he's a "Space Frenchman".
* Salza (from the Cooler movie), holds distinction for the very first appearance and use of this trope in the franchise, called the Salza Blade, that he used against Piccolo. Which would later on inspire various other types of ki energy blades through the series, although not in-universe.
* Salza were actually both members of the same species. Like humans they come in multiple skin colors; unlike humans those colors are red and blue.
* Sam actually has no trouble saying the word "love" ... except when he
* Samael is different enough in Jewish folklore already, his most notably being both evil and good at the same time and being so big it would take five hundred years of traveling before someone covered a distance equal to his height (and of course being covered in eyes). In some Gnostic sects, Samael was equated with Yaltabaoth, a lion-headed serpent that ruled over at least 365 pseudo angelic

archons.
* Samael's title is "Right hand of Death and Overseer of Necrocraft". She is the highest ranking
* Sam also has no complaint about "The Golden Trough", a restaurant where the food is so bad that
* Sam also implies that he suffers a variation of this due to his role in the
* Sam also notes that assassins take this to the logical extreme of wearing black undergarments, the better not to give away one's position if one's outer garments tear on an assignment and, as he puts it, "show a white bunny tail." At the start of the book, Sam has also had his naturally blond hair dyed black for the same reason.
* Sam & Cat, Dice (a 12- to 13-year-old kid, may we remind you) stuck alone in a city around 400 miles away from his home and Goomer completely missing. The episode that aired before that one would have been a better ending, as in, at least it resolves all plotlines from the episode, unlike this one.
* Sam & Cat Dice asks Sam to help him with a problem, she asks how old he is and then starts with "You know Dice, it's completely normal for a boy your age to experience some things changing...", Dice interrupts her saying that's NOT what he wanted to talk about
* Sam & Cat, Dice complains he's not being respected enough. And he's not wrong, considering he is usually the reason the titular characters are even successful in their plans but rarely gets recognition for it.
* Sam & Cat dipped into this pool often. A key intersection mentioned in multiple episodes was Shields and Yarnell, also the names of a mime duo that was a regular on 70's TV. Another episode has senior citizen Nona's mention that past lovers include pro basketball legend Bob McAdoo and the poet laureate of 70's game shows Nipsey Russell.
* Sam & Cat episode "#BabysittingWar", Sam does this to Cat when they fight over Nona's empty bed.
* Sam & Cat episode "#FavoriteShow" ends with Sam and Cat sharing a "butt bump" ("Roommate power!")
* Sam & Cat episode lampshades this further, by having Sam point out that a show on TV can't use Pear computers, so they have to use Banana instead.
* Sam & Cat episode "#MotorcycleMystery" has Cat drinking too much special tea and everyone finding her passed out on the couch with her handcuffed to a small angry foreign man, her hair dyed blue, and Sam's motorcycle missing. Since Cat can't remember anything that happened, the episode focuses on trying to find out what Cat did in order to find Sam's motorcycle.
* Sam & Cat episode "Motorcycle Mystery" Sam handcuffs the small martial arts fighter stuck to Cat onto the door of the apartment. When Dice asks what will happen if he needs to use the bathroom, Cat presents him with a black garbage bag.
* Sam & Cat. Even going by the most generous estimates, the iCarly cast have to be at least one year above the Victorious cast. Cat has clearly started Senior year by the middle of the season at least (the show features a Halloween episode, indicating a new school year, and the final season of Victorious had the characters in Junior year) and yet Sam is stated to still be taking online high school classes and is stated to still be under 18 years old.
* Sam & Cat, has Sam and Cat going to a mental hospital to get help from Sam's old enemy Nevel in helping defeat her other enemy Nora.
* Sam & Cat have an age difference of 15 years and therefore also qualify. It is even implied Goomer is Dices best friend
* Sam & Cat. He gets cranky without a nap, can throw quite some tantrums, can't take his own medicine, needs Dice to explain simple social interactions and customs (like who knocks and who says "come in" between the visitor and the house-owner) for him, and has trouble counting backwards from ten. Then again, on the other hand, he's able to build a fully functional rocket, figures out the plan of the Brit-Brats before anyone else, and has their blue-dog-soda business planned through right after Cat has just found the recipe.
* Sam & Cat: In the pilot, the titular best friends get stuck in Cat's

grandma's fold-up bed.
* Sam & Cat is sent to prison in the episode that eventually became the final one due to the show being cancelled.
* Sam & Cat, Sam drinks root beer the way adults drink regular beer.
* Sam & Cat takes the Advertising "Twitter Hashtag" to a new level by having the episode names be in #EpisodeName form.
* Sam & Cat when Nora escapes from prison and kidnaps Dice in order to get revenge on Sam. She sends Sam a letter informing her that she has kidnapped Dice when Sam looks inside the envelope, she finds a piece of Dice's hair.
* Sam & Friends has this for the final episode (which aired on December 15, 1961), in which Kermit sings a song, then tells Harry that the series is ending after 7 years. Harry then blows up everything on the set, including all the scenery and equipment, since they probably won't be using it ever again. While no footage of it is known to exist at this time, the script for the episode was located and released.
* Sam & Fuzzy. A cabbie who got tangled up with the affairs of the ninja mafia, he is decidedly non-actiony.
* Sam & Fuzzy. Although most characters besides the titular duo are confined to one particular story arc (outside of cameos), Aaron managed to join with them at the end of the third story arc and has stayed a major character since.
* Sam & Fuzzy) and Megalopolis (underneath Los Angeles, California).
* Sam & Fuzzy and until he met Sam, but what went on before that is unknown.
* Sam & Fuzzy are raised from birth as assassins loyal to the upper echelons of the Ninja Mafia.
* Sam & Fuzzy ends with the door opening and Sam having escaped through an opening in the ceiling.
* Sam & Fuzzy: For the first year or so of the Noosehead arc, Sam, who went on the run from the Ninja Mafia at the end of the last arc, is nowhere to be seen. When Mafia Ninjas show up, roadie and seemingly new character Aaron, who resembles Sam with a goatee and new haircut, panics and confides his fear of being caught in Fuzzy. Eventually Mr. Black confronts Aaron, accuses him of being Sam, and swings his sword... Only for Aaron to block it with his bionic hand. Yup, it's fellow refugee Jackson. Meanwhile, Crash, another roadie, shaves off his beard and removes his hat, revealing a familiar hairstyle...
* Sam & Fuzzy. Fuzzy is sent in alone to perform a burglary and finds something resembling a Cyanide Pill in his equipment... Which turns out to be a jelly bean. In the event of his capture, he is to eat it as a reminder that if he keeps his mouth shut, he can have the rest of the bag afterward.
* Sam & Fuzzy graduates into this trope in the final arc when he's given access to The Pit. Given access to all the world's Tar, Hart decides to drown North America in it and all but states outright that he wants a world with no living beings in it beyond him and whatever new he decides to make from the Tar in the future.
* Sam & Fuzzy had one of these. Its special was called "The Eliminator," and anyone who could successfully finish it got the meal for free.
* Sam & Fuzzy has a personal zeppelin the size of the goodyear blimp.
* Sam & Fuzzy her into thinking everyone is as selfish and untrustworthy as he is over the course of decades.
* Sam & Fuzzy includes an international brotherhood of ninjas, most of whom are McNinjas.
* Sam & Fuzzy: It's shuriken instead of bullets, but this happens to Mr. Blank just as he's cornered Sam during the climax of the "Noosehead" arc.
* Sam & Fuzzy 'killed him', which is something he'd refused to to previously.
* Sam & Fuzzy normal, because the leaders of the Underground try their hardest to keep the lid on everything down there because they believe humanity couldn't handle all the weirdness and would try to exterminate them.
* Sam & Fuzzy, the heavy metal band Noosehead (which has 15 members) has several members with monochromatic black eyes of evil. This includes their front man, Sidney "the Sicko", and main guitarist, Nicole. As it turns out, when they end

up taking the stage during the "roadies" arc, they are a subversion: all of them are really nice (if a little eccentric) people who treat the heavy metal life as a job.
* Sam & Fuzzy, the Ninja Emperor's retirement package is a body bag.
* Sam & Fuzzy the original comic was mainly a slice of life style that was mainly a gag a day style. Then ninjas were added. And a demonic refrigerator. After that, things got weird. Now the whole story revolves around the weirdness and the weirdos and pretty much every arc has ninjas in it due to Sam becoming the Ninja Emperor.
* Sam & Fuzzy took this experienced webcomic binger several days to read through. To put this into perspective, she also read the 1200+ archives of Misfile in about three hours.
* Sam & Fuzzy tries to take on one of Carlyle's assignments and ends up in a spat of trouble with the Ninja Mafia.
* Sam & Fuzzy when Fuzzy rattles off a string of euphemisms after Sam's first date with Candice. Sam treats them straight, but the reader immediately discovers that Fuzzy is still under the influence of his home-made hallucinogens and all his euphemisms refer to things he is hallucinating.
* Sam & Fuzzy, where Sam is depressed over his recent breakup with his girlfriend Alexis. Cue Fuzzy trying to cheer him up in his usual sociopathic way.
* Sam & Max 302: The Tomb of Sammun-Mak since you have to explain how you solved all the other reels in order to progress.
* Sam & Max, and the utter nonchalance of the two main characters to all these strange goings-on.
* Sam & Max blaster in cyberspace) is still pretty much useless. You may also mess with virtual rules by affecting their respective controllers.
* Sam & Max comics, where Max hosts a "science corner", where he tells the reader to put a loaf of bread on top of the fridge for a few weeks.
* Sam & Max: Culture Shock has a few false starts with his evil laugh before getting it down pat.
* Sam & Max episodes. They remark the "One way" sign outside their office is the "least obeyed street sign in the country".
* Sam & Max: Freelance Police about freedom of the individual and their inalienable right to get questionable body modifications, as long as it's their "boneheaded choice".
* Sam & Max: Freelance Police, all the demons who impersonate other characters have artificially deepened voices when they break character.
* Sam & Max: Freelance Police, and the challenge is in forcing it to win against you.
* Sam & Max: Freelance Police animated series, they are described as (paraphrasing) "The best, most expendable guys we've got". They take it as a compliment.
* Sam & Max: Freelance Police animation episode "Max's Big Day", refuses to leave a primitive tribe, Sam makes an effigy of his "little buddy" and takes it away with him.
* Sam & Max: Freelance Police aren't fighters per se, but if there are doors to bust down and bad guys with lead deficiency, they'll deliver the damage together. Moreso in the comics, but they get rare moments in the video games, too.
* Sam & Max: Freelance Police as the console versions are called), with excellent results.
* Sam & Max: Freelance Police based on the fact that he's never said the word "morning."
* Sam & Max: Freelance Police become zombies in "Night of the Raving Dead". This is somewhat downplayed by their anthropomorphic nature.
* Sam & Max: Freelance Police being a hyper-kinetic rabbity thing, apparently has as little control over his personal volume as his hyperactive behavior.
* Sam & Max: Freelance Police being referred to as the *bleep* Poppers for the rest of the game.
* Sam & Max: Freelance Police belch —illustrated with a live-action cut

to a house flattening in an atomic blast— and is none the worse for wear, with the added benefit of his noxious emanations drifting into the upper atmosphere and plugging up the hole in the Earth's ozone layer.
* Sam & Max: Freelance Police!), but eventually stop when the villain orders them to (and they return to their normal faces off-screen).
* Sam & Max: Freelance Police, but was mixed up in the mail, though it ends up posessing him as well. Even when not possessed by a demon, Santa's shown as being far from jolly; In "What's New Beelzebub?" he confesses he can't stand kids and the whole "live in a remote arctic wasteland and only go out to deliver presents once a year" set-up is so he doesn't have to deal with them.
* Sam & Max: Freelance Police (by sabotaging his cheating method, no less) he later shows up in the office and tries to get his money back at gunpoint. It doesn't work out well (mainly because he uses an obviously fake gun) and he ends up their prisoner/pet for several following chapters.
* Sam & Max: Freelance Police comic had them visiting an "amusement" park with rides like the "Cone of Tragedy". The freak-show performers are even more depressing, either acting unfriendly or "entertaining" their visitors by telling long, boring stories.
* Sam & Max: Freelance Police comic when the duo find an entire razor sticking out of a kid's apple.
* Sam & Max: Freelance Police Episode 104: "Abe Lincoln Must Die!", Sybil pretends to run a computer dating service. When asked about it she claims Sam and Max would make an excellent pairing. Notably, she doesn't move from her position, read anything from her computer or type anything in.
* Sam & Max: Freelance Police episodic games have Case Files that you can order. The first one included a "Max for president" button, a Ted E. Bear magnet, and a postcard from the moon, along with other things.
* Sam & Max: Freelance Police features the Gold Guy investigating the logo with a magnifying glass. He drops it, causing the logo to shatter like glass.
* Sam & Max: Freelance Police fits the original mold perfectly, as a young genius girl who built a gigantic robot Max in her underground lair.
* Sam & Max: Freelance Police games. Oddly enough, he's usually right!
* Sam & Max: Freelance Police games, where almost every episode is claimed to be based on some sort of pamphlet that has nothing to do with the actual plot. This is a running gag from the original comics as well.
* Sam & Max: Freelance Police games with "Torture Me Elmer", a toy which children were encouraged to mistreat. There's a minigame where a vast spill of them has littered the roadways, and you need to clear them off by running them over. There's a certain sadistic hilarity in hearing them beg for mercy.
* Sam & Max: Freelance Police game "What's New, Beelzebub?". Various characters are living out their worst nightmares, and one is the paranoid Bosco, who is naked, on a stage, and has everyone looking straight at him. Later turns out that it was the "everyone looking straight at him" part that he disliked; he actually doesn't mind being naked in public.
* Sam & Max: Freelance Police, General Skun-Ka'pe and Monsieur Papierwaite team up over a mutual hatred of Sam. Max can talk to them both individually and find that there's a bit of tension bubbling under the surface. Exploit this and...
* Sam & Max: Freelance Police has a Pollosaurus Henway. Sam falls for it.
* Sam & Max: Freelance Police has a potted cactus in front of the window to remind viewers that the main characters (who are, naturally, the apartment's tenants) are "cowboys."
* Sam & Max: Freelance Police has a relatively innocent example in season two. Sam and Max discover a new garage in their neighborhood called "Pimp Le Car". Max asks "Sam, what's a pimple car?"
* Sam & Max: Freelance Police has Sam and Max take a date test to find the perfect match for each other. The result gives... Sam to Max and Max to Sam. Both agree never to speak about it again.
* Sam & Max: Freelance Police. He's the antagonist of the first episode, but is almost completely unconnected to the bigger threat of the season.

* Sam & Max: Freelance Police Hugh Bliss manages to do this even when his actual words are nothing but Squick. The Bread, Eggs, and Milk are all in the bubbly falsetto with which he speaks the line.
* Sam & Max: Freelance Police, if you knock Bosco cold in real life, his internet avatar will do this.
* Sam & Max: Freelance Police: In the episode "What's New Beelzebub?", the duo's 1960 DeSoto Adventurer convertible dies and goes to hell. After they free its soul back to the mortal realm, the obsolete computers working at the Pimp Le Car garage refuse to work on it. Kurt explicitly says that it "came back... processing... wrong." He's right, since it revs and bounces at the curb, and in the driving minigame it steers itself for maximum carnage.
* Sam & Max: Freelance Police in the game "What's New Beelzbub?", when Max exclaims that Stinky's baby book is a cookbook.
* Sam & Max: Freelance Police in "The Tell-Tale Tail", when a group of torch-bearing Scotsmen arrives at the castle where Max is attempting to reanimate his severed tail (don't ask):
* Sam & Max: Freelance Police, items from previous episodes will often still be in your inventory. The only time something doesn't carry over is if it would completely change the way to solve a puzzle.
* Sam & Max: Freelance Police. It's versatile, practically invincible, and can get literally anywhere in the world in seconds (They got to the moon at one point by stuffing the exhaust pipe with matches). In the Telltale Games, it gets possessed by a demon but is no worse for wear.
* Sam & Max: Freelance Police keeps his gun, though it's still none of your damn business. Though maybe later, when everyone's sitting down, he'll tell us.
* Sam & Max: Freelance Police, Lorne. He is easily the most fondly-regarded villain in the show.
* Sam & Max: Freelance Police: Max and Sam often use this trope, but Max is especially comical and sociopathic, and he gets to be the president of the US for two seasons!
* Sam & Max: Freelance Police, Max claims not to believe in the existence of magnetism, insisting it's 'only a theory'. Then he brings out his Luger...only for it to be magnetized to the North Pole. He then says he believes it, "But that's my limit!"
* Sam & Max: Freelance Police, Max's most common solution when he's given the reins may as well be "give the problem the coolest death possible."
* Sam & Max: Freelance Police Max's response exemplifies this trope: "None of your damn business."
* Sam & Max: Freelance Police never had a 4th wall, pointing out jokes that were used in the comics, referencing the constraints a kids' show puts on them, and even going so far to point out the show's lack of viewers.
* Sam & Max: Freelance Police, often seen with popsicles and ice-cream sandwiches.
* Sam & Max: Freelance Police once you realize that people thought a meteor was going to destroy the earth, and the rocket was designed to keep humanity alive.
* Sam & Max: Freelance Police poke fun at this with Mack Salmon, a very angry fish in a bowl who has a bone to pick with the duo for "setting in motion the events which caused his current state." Neither of them knows who he is or what he's going on about (neither does the reader); they decide to just smack him around like any other ineffectual villain they come across.
* Sam & Max: Freelance Police, Sam and Max are forced to wade through a stream in the middle of an overgrown Central Park. When Max exits, he's covered in leeches...which promptly scream in pain and jump right back off.
* Sam & Max: Freelance Police: Sam and Max take a little souvenir from every case they do, and keep it in the closet. Once they get to the future and try to open the closet, Sam has to slam it shut before he's crushed under all that stuff.
* Sam & Max: Freelance Police: Sam intentionally invokes this trope when his and Max's flight home from the Philippines is hijacked by a terrorist. While the terrorist is distracted, Sam throws a spoon at a nearby window, causing the

terrorist to panic and shoot the window. His body then gets sucked out of the plane through the resulting bullet hole, head first.
* Sam & Max: Freelance Police, Sam is being put down by Chuckles, the President's bodyguard:
* Sam & Max: Freelance Police (Sam is the good cop, Max is the bad one). While they aren't interrogating, usually when you can choose if the one talking is Sam or Max, Sam tries to be helpful somehow (or at least have some tact) while Max just says whatever is on his twisted mind. Since the games are puzzle-based, this usually backfires unless you think carefully.
* Sam & Max: Freelance Police, Sam tells Max to stop talking, as it costs money.
* Sam & Max: Freelance Police Second Season includes this in the closing credits, at Sybil and Abe's wedding.
* Sam & Max: Freelance Police series has commentary from the designers about how some of the scenes were made and what got left out of the games (including subtle foreshadowing being dropped because too many people were getting it and an over-complicated puzzle being changed). It was available on the Telltale website for a period of time.
* Sam & Max: Freelance Police series, the Shambling Corporate Presence plays "Mimesweeper" when accidentally sent to Santa's workshop, and again when he's sent to his proper office in Hell.
* Sam & Max: Freelance Police short had them going into the past and thwarting Egyptian aliens. Like everything else in the series, purely played for laughs.
* Sam & Max: Freelance Police talks like this at times, being a sentient telephone who talks like a smarmy phone-tree announcer.
* Sam & Max: Freelance Police that only the strongest can survive eating.
* Sam & Max: Freelance Police, the duo bust a terrorist group holding a TV studio hostage. The Terrorist's demands? To make the programming nothing but figure skating.
* Sam & Max: Freelance Police. The good Deever ended up having to go back too for Sam and Max to be able to get rid of the evil one.
* Sam & Max: Freelance Police, the heroes use Max's newfound psychic powers to see that Flint Paper will receive a hatchet to the head in the near future. When Sam gives him a helmet without explaining why, the helmet's light illuminates Flint's lunch, causing him to notice the peanuts he didn't see before... and as he bends over to examine, the hatchet flies over Flint's head.
* Sam & Max: Freelance Police. Then they break up in "Moai Better Blues" after Sybil catches Abe getting distracted by a lady Moai when they're supposed to be on a picnic date. After trying to find a new boyfriend in "Night of the Raving Dead", Sybil decides to get back together with Abe, and by the time of "What's New Beelzebub?" the two are planning to get married.
* Sam & Max: Freelance Police through an airplane window, complete with a hammy, sing-song "I SEE YOU!"
* Sam & Max: Freelance Police tried to inform us that there would be no commercial breaks, to better assist our viewing pleasure. These announcements were, of course, cut short at every opportunity. And when it came back, it always looked like some scene was missing in between.
* Sam & Max: Freelance Police, turned out to have been a human-shaped sentient colony of bacteria in disguise.
* Sam & Max: Freelance Police: Turns out villains doing this this bothers Sam and Max more than do attempts on their lives:
* Sam & Max: Freelance Police until 2014 when the game was re-released on GOG).
* Sam & Max: Freelance Police uses this gag in the "On the Road" story arc.
* Sam & Max: Freelance Police, which upped the weirdness factor to compensate for the lack of violence. It only lasted 13 half-hours.
* Sam & Max: Freelance Police with a twist: the episode took place in a pocket dimension inside a freezer, and the monster was a mutated TV dinner that just wanted to be eaten.
* Sam & Max, fresh from the "Cone of Tragedy" ride that has given Sam cardiac

arrest:
* Sam & Max go to the carnival to bust a bootleg corndog seller, whose establishment proudly proclaims "It's fooode!" (trademark).
* Sam & Max has Sam saying the "Sweet/Holy/Great [non sequitur]!" at every unexpected turn of his adventures. They are sometimes somewhat allusive to the current situation they are in.
* Sam & Max have, but none of it is available. However, Bosco always has in stock one arcanely useless item necessary to solving a puzzle later in the game, for an improbable sum that Sam will acquire by solving another puzzle.
* Sam & Max. He is always confused when he is occasionally attracted to a woman.
* Sam & Max Hit the Road, as all Snuckey's employees have special training in jar-opening.
* Sam & Max Hit the Road, but forget to untie his hostage and disarm the bomb.
* Sam & Max Hit the Road game. They make a bigfoot disguise to infiltrate a bigfoot party. Sam's snout sticks out of the middle of the costume, but this being a Sam & Max game, nobody notices even when they're talking to each other. Only one bigfoot asks if Max is really having an argument with his belly button.
* Sam & Max Hit the Road has Bruno the Bigfoot's girlfriend, Trixie the Giraffe-Necked Girl from Scranton, who has rings around her neck like a Ndebele tribeswoman.
* Sam & Max Hit the Road has it that you can try to pick up something that can't be picked up and Sam will tell you this. If you repeatedly try to pick up the object, he will get more and more upset and eventually Max will comment. However, that's not the Foresight part. The Foresight comes into play if you try to do this during the point of the game where Sam and Max are separated (when Conroy and Lee-Harvey throw Max into the Mini-Golf course) and Sam has a new set of lines.
* Sam & Max Hit the Road has Sam and Max go on the carnival ride "Cone of Tragedy", which first suspends them upside-down, then shakes and twirls them around in a very unpleasant way. Once the torture is over, Sam realizes that all his inventory items fell out during the ride and he must recover them from a Lost-and-Found office.
* Sam & Max Hit the Road Lee-Harvey, the aide of a country-western singer, reads a book called "Dialenics" by Elrod Hubbel, which he says is changing his life. Since he's in the entertainment industry, it makes sense.
* Sam & Max Hit the Road, one of the answering machine messages Sam and Max get is a wrong number for a bakery, with someone placing an order for "200 lemon meringue pies and a small diet soda".
* Sam & Max Hit the Road requires the heroes to eventually visit a tourist trap named "Frog Rock" to progress. Upon discovering that Frog Rock is in no way frog-like, Max demands his money back despite not having paid any to see it.
* Sam & Max Hit the Road, Sam and Max beat up a mad scientist only to find out he's a robot. They take his severed head (which turns out to be a "damned ugly time bomb") with them. After the opening credits, they arrive at their office, eventually leading to this exchange:
* Sam & Max Hit the Road, Sam and Max get into a Big Ball of Violence fight with Conroy Bumpus's bodyguard at Gator Golf.
* Sam & Max Hit the Road's date from being zapped after she tells him she wants to just be friends.
* Sam & Max Hit the Road, the duo comes upon a wishing well. Sam throws in a coin, asking, "I wish I knew what Max was thinking." We hear nothing but a pinging noise as the caption reads "... ....!" to which Sam remarks, "Well, that was a waste of money."
* Sam & Max Hit the Road: The Tunnel of Love is one of the attractions Sam and Max can ride on at the Kushman Bros. Carnival. The Freelance Police actually have to go behind the scenes to find an informant who can tell them more about how to find Bruno the Bigfoot and Trixie the Giraffe-Necked Girl.
* Sam & Max Hit the Road who will have the same conversation with you. He's a graduate of the bachelor program at Snuckey University and is thus qualified to

jerk soda, cook burgers, and open difficult jars, but if he wants to make manager he'll have to enroll in their postgraduate program.
* Sam & Max In "Monkeys Violating the Heavenly Temple," Sam pulls this on an unsuspecting kid while searching for Max in the Philippines. He later drops it off of the side of a volcano.
* Sam & Max: Night of the Raving Dead. Just as the flashback gets up to "the most epic battle of our career", Max stops it with "Yeah, Yeah, I remember the rest!". We never see the fight.
* Sam & Max Plunge Through Space rather than a point-and-click adventure, and was going to be released for Xbox. The developing company went under about six months later, and so they pulled the plug on the project. To this very day, not much is known about the project.
* Sam & Max: Sam and Max run into a number of famous missing persons on Easter Island, including D.B. Cooper, Amelia Earhart, and Glenn Miller... except they've all been turned into babies from drinking too much water from the Fountain of Youth.
* Sam & Max, Sam's weapon of choice is a very large revolver, while Max prefers a Luger.
* Sam & Max Save the World also featured a cold opening, before the "Pleasantly Understated Credit Sequence".
* Sam & Max Save the World explanation for what's wrong, despite the fact that he clearly knows nothing about the goggles. Turns out his explanation was right on the money.
* Sam & Max Save the World, the duo must investigate a casino, but are forbidden from entering a specific door unless they are members of the Toy Mafia. To join, they have to talk with the head of admissions... who is right behind the door they can't enter.
* Sam & Max Save the World, the War Room in the White House serves three purposes: drink coffee, eat cookies, and launch missiles.
* Sam & Max Save the World, this is Max's reaction to finding out Bosco had several items that would've cut right through the bullshit of the last five episodes.
* Sam & Max Save the World) to get him to cough up the location of a meatball sandwich.
* Sam & Max Save the World, works like this, and our heroes take advantage of this to solve at least one puzzle.
* Sam & Max Season 2, ordering something from Stinky's diner will result in this.
* Sam & Max series made it reach a Stage 3 up until their closure in 2018. Later in the 2010s and into the 2020s however, it suddenly reached Stage X with more people discovering the games & cartoon and Skunkape Games eventually remastering the first season for Nintendo Switch & PC.
* Sam & Max. She ran a Jail much like Alcatraz during the Cold War.
* Sam & Max's world is filled with bizarre products, especially in the storyline set in a grocery store. About the only recurring brand, though, is a mediocre generic beer called "Cheap, Foul-Smelling Beer".
* Sam & Max tells him that he doesn't really need the toys. Max suddenly starts glowing and takes to the sky, now able to use his powers without the aid of the Toys.
* Sam & Max: The Devil's Playhouse centers around the mystical Toys of Power which are actually very ancient, but for some reason look like ordinary toys that may be found in a modern-day toy shop (like a toy telephone that allows its user to teleport and a wacky putty toy that gives him the ability of transformation).
* Sam & Max: The Devil's Playhouse episode "The Tomb of Sammun-Mak" ends with Sam discovering someone has stolen Max's brain. The following episode, "They Stole Max's Brain", has Sam go on a quest to recover it.
* Sam & Max: The Devil's Playhouse gag on one of Skun Ka'pe's henchmen. Instead, you lure him over to the banana so that Max can knock him out with a pair of trash can lids.

* Sam & Max: The Devil's Playhouse, if Sam looks at a readout on one of Mama Bosco's computers, he will say that according to these readings he and Max shouldn't exist. At this point both characters disappear for a few seconds before coming back, with Sam remarking that he must have misread the readings.
* Sam & Max: The Devil's Playhouse: If you ask Bluster Blaster about the Sam clones in "Beyond the Alley of the Dolls", it leads to this exchange:
* Sam & Max: The Devil's Playhouse: Inverted in the episode "They Stole Max's Brain!"
* Sam & Max: The Devil's Playhouse is revealed to be one of these — specifically, Max's super-ego, plotting to destroy both of them and a huge part of New York in order to save both others and himself from having to put up with Max.
* Sam & Max: The Devil's Playhouse. Max's psychic visions hint that a thrown-away banana peel is important, and that the heavy they're trying to dispose of ends up falling down a manhole. If the player opens the manhole and places the banana peel in front of it, the heavy comes over to tell them "no littering", and while he's distracted, Max runs up behind him and bangs two dustbin lids together, stunning the heavy into the hole.
* Sam & Max: The Devil's Playhouse of episode three, "They Stole Max's Brain!", Max ends up spending some time as one of these.
* Sam & Max: The Devil's Playhouse sets Max up with some incredibly useful toys of power, has the player rely on them throughout the whole episode, then strips them all away for the boss fight. Half the time you even lose the ability to walk.
* Sam & Max: The Devil's Playhouse that feed on the citizen's dreams and make the monster stronger. Which is why the whole city has spent a whole week without sleeping.
* Sam & Max: The Devil's Playhouse, the ventriloquist's dummy that unlocks Max's psychic ventriloquism power, used to belong to Junior, the youngest of the Elder Gods. Junior hated him; played with him for about ten minutes, and then chucked him aside, declaring him to be creepy as shit and wanting nothing more to do with him. That's right; he was too creepy for the brain-melting abomination against reality.
* Sam & Max: The Devil's Playhouse to the comics, as mentioned above.
* Sam & Max: The Devil's Playhouse, when Flint Paper begins to question Stinky on a suspicious love letter, she lies by saying that she and Sam have been in a secret love affair, and seals it with a kiss. This is comes off more as Squick though due to the fact that Sam is a giant talking dog, and the audience, Sam, Max, and Flint are all weirded out by it.
* Sam & Max: The Devil's Playhouse, when Sam and Max first use the power of Teleportation (outside the tutorial flashback at the beginning), the two travel through a bizarre multicolored void where Max is a talking skeleton with a creepy voice.
* Sam & Max: The Devil's Playhouse, when Sam tells this story, Max confirms it, even though it would be reversed for him.
* Sam & Max: The Devil's Playhouse, where you trick Sammun-Mak into opening the Moleman Processing Room by saying "Rabbit Season" at the right moment.
* Sam & Max: The Devil's Playhouse, you come across one of the Toys of Power, a creepy ventriloquism doll named Charlie Ho Tep. You can use him to throw your voice, for the purposes of advancing the plot and also just for laughs.
* Sam & Max. The games suggest he has obscenely powerful psychic potential and show him as having an inherent connection to monsters. He also exploits his own cuteness to gain favours from other characters, or get them to let their guard down for an attack.
* Sam & Max: The Tomb of Sammun-Mak, Sam and Max's great-grandfathers Sameth and Maximus discover that Baby Amelia Earhart has stowed away in their luggage on the Disorient Express.
* Sam & Max this is mostly how Max's dislike of girls is portrayed. Given that his mentality resembles that of a highly impulsive child. In the later video games, a time travel incident causes him to overcome this and become extremely flirty with certain female characters.

* Sam & Max to go, it's explicitly identified as a clerical error from the dispatch; a typo was made on the name, and then the address was filled in based on the typo.
* Sam & Max when saying bloopers in scenes from the future office and the text adventure.
* Sam & Max. When you first meet him in "Ice Station Santa", Sam asks why he hasn't been seen all year. He replies by listing a series of adventures remarkably similar to the plots of Season One. Max then asks why can't they do "cool stuff" like that.
* Sam & Mickey: "Baby Shower" has Yasmin thinking that she's pregnant with Ken's baby. At the end, she feels like the "baby" is going to come out. Barbie (with a doctor as one of her occupations), gets close to Yasmin to help with the "delivery"... only for Yasmin to unleash a huge fart right in her face.
* Sam & Mickey comedies have Barbie try to pass off hers and Ken's illegitimate daughters as her "little sisters", but it seems rare for someone not to recognize Barbie as the girls' actual mother. It doesn't help that the "little sisters" often don't try to keep the secret.
* Sam & Mickey girlfriend, Bratz doll Yasmin, which causes her to have a breakdown, viciously stab her while she's preparing to walk down the aisle and return to the ceremony in a bloodstained dress. Yasmin survives and Barbie is arrested at the hospital.
* Sam & Mickey have Barbie's personal assistant Tinka Reynolds, whose debut episode revealed her at the end as Barbie's presumed-dead sister Tutti, who suffered amnesia and gained new parents after Barbie's parents lost her.
* Sam & Mickey have dolls that look and sound like them sometimes appear in their videos.
* Sam & Mickey: In "Barbie's Mother", Barbie finally gives Margaret a piece of her mind and eventually forces her to leave the former's mansion.
* Sam & Mickey: In "McBurgers", Ken calls Barbie, "a whor...ible mother!"
* Sam & Mickey: In "The Attic", we have Barbie's old home Betamax videos.
* Sam & Mickey often get new story ideas from suggestions viewers make in comments.
* Sam & Mickey reveals in episode three that when their Barbie was too young to drink alcohol, she drank a lot of juice, instead.
* Sam & Mickey's "Baby Shower" has Barbie complain that becoming pregnant causes her to involuntarily pee at inconvenient times.
* Sam & Mickey's "Road Rage" begins with Skipper, Barbie, and Chelsea stuck in traffic, before backtracking to show how they got stuck there, and why Barbie has a black eye.
* Sam & Mickey: Stacie loves to eat sweet food, such as cake and marshmallows.
* Sam & Mickey's videos, Barbie doesn't do a very convincing job hiding her flaws.
* Sam & Mickey's videos get most of their humor from making life for Barbie and/or those around her a living hell.
* Sam & Mickey: This trope applies to Barbie's "little sisters", and Barbie herself.
* Sam & Mickey to Chelsea, that she often calls her other names as well.
* Sam & Mickey videos, Ken's parents—Carl and Edna Carson—somehow didn't know about Barbie's and Ken's breakup, or the fact that they had daughters out of wedlock, until 2015's "Family Reunion".
* Sam & Samantha Book Series: Every story in this series is about food getting either tampered with in some way or being made disgusting.
* Sam and Al exchanged places and leaped to a point before Sam's birth due to a
* Sam and Alex get this in "Ski Trip" when Clover gets jealous of Mandy and walks off angry, leaving a trail of flames that flare up and leave the girls charred.
* Sam and Amelia: Arguably a worse failure at this than Dean and Jo (see above), after Sam hits a dog with his car, Amelia the veterinarian pressures him into adopting the dog. It's supposed to be romantic, but fans did not like the fact that Sam had abandoned hunting and failed to search for his missing brother and

* Sam and a much taller, muscular man are yelling at each other when suddenly the man tackles Sam to the ground. Only then do we see that there are mats on the ground. Turns out it was a training session for nurses to deal with violent patients.
* Sam and Dean are meant to be Lucifer and Michael's vessels and battle it out.... they refuse and form Team Free Will.
* Sam and Dean are the main examples, especially the former. While they have other overarching goals each season, they always stop by in whatever wayward towns are being haunted, even if they don't have personal reasons to, and deal with the supernatural threats there. Although they
* Sam and Dean are unusually co-dependent (to the point of it being unhealthy) for just being brothers. They risk their lives for one another countless times, and both of them readily admit they are each others' greatest weakness. In the early seasons especially, the brothers were
* Sam and Dean had encountered a few, particularly in the earlier seasons, when
* Sam and Dean meet their half-brother Adam, only to discover he is a ghoul who had eaten the Dead All Along
* Sam and Dean's father, John Winchester, was another notable example, who trained his sons to follow in his footsteps. His journal detailing the monsters he hunted in various locations around the USA has played a major role in the series.
* Sam and Dean Winchester often qualify as anti-heroes. They may hunt monsters, save a lot of people, and a few times save the world, but they support themselves with credit card fraud and pool hustling. On top of that, they have a demon-killing knife which, while useful, also kills the person being possessed by the demon. Plus they have a habit of making deals with and dealing with demons. They try to be good, but they often fail.
* Sam and Dean Winchester. Raised to fight monsters, we watch them fight monsters. A lot of mutual back-watching.
* Sam and Diane on many occasions. They do genuinely love one another, but Diane is extremely put off by Sam's less sophisticated tastes, and has a tendency to overreact to anything, while Sam is often hurt by Diane's jabs at his intelligence. Toward the end of season 2, he notes he's started being nasty to Diane just to hurt her, even though he doesn't like doing it. Their break-up drives him back to alcohol, and Diane to a mental institution. Several times from then on, they're told the relationship is unhealthy and will bring them misery, but they (mostly Diane)
* Sam and Diane were the series's first example, despite the fact that Diane only
* Sam and Eileen: They are both hunters chasing down a banshee, with her being deaf because of a banshee attack that killed her parents when she was an infant. Sam attempts some sign language, which he's bad at but she appreciates the effort. They eventually bond over losing parents to supernatural attacks as infants and being called to the hunting life. This one was also somewhat successful, with many fans choosing to believe Eileen is
* Sam Anderson plays a recast of Dr. David Gordon (who was established as Pam's doctor/pretend fiancee in the last episode featuring her in the original series), while in the original series he played a detective during Season 8 who helped Bobby prove Jenna innocent of murder.
* Sam and Freddie break up after a 5 episode arc in "iLove You". It's not a total sinking, they could come back to it later.
* Sam and Freddie's agreement about their First Kiss. When Sam's drugged slip-of-tongue reveals it to Carly,
* Sam and Friends (Chicken Liver) has the director sitting on an armchair made out of real arms.
* Sam and Fuzzy, a character that "will appeal to alienated youths and wannabe social outcasts" by being simultaneously edgy and cute. The subversion failed because the character was legitimately appealing; Skull Panda currently has two t-shirts for sale.
* Sam and Helix are cool-headed while Florence is trying not to panic herself.
* Sam and Lucifer had a fair number of shippers the moment it was revealed that

* Sam and Max, a trio of hypnotized former child stars, the "Soda Poppers", are causing havoc in Sam and Max's neighborhood, and our heroes have to knock the Soda Poppers unconscious to snap them out of their hypnosis. As each of the Soda Poppers gets KOed, he mumbles his catch phrase from their old show before falling over.
* Sam and Max Beyond Time and Space: In "Chariots of the Dogs", Sam and Max run into Bosco after time-travel shenanigans have resulted in him turning into a half-man half-cow monstrosity, and ask if he's done something with his hair (even though Bosco is bald).
* Sam and Max Beyond Time and Space: In "Moai Better Blues", Max keeps incessantly gushing over Baby Jimmy Hoffa.
* Sam and Max Beyond Time and Space is finally making progress at work.
* Sam and Max consider the flashback versions of themselves to be "cute" and "marketable".
* Sam and Max Episodes was revealed to have been, all along, an annoying recurring secondary character that had appeared throughout the season. Though the first episode villain was acting alone.
* Sam and Max features him kidnapping the Mad Thespian, who begs and pleads to be arrested due to Lorne's psychotic obsession with impressing Sam and Max.
* Sam and Max games from Telltale Games. They're surprisingly effective (even the tear gas grenade launcher that's just a salad shooter loaded with onions), but all of them are overpriced (like a hundred million dollars for a "truth serum" that consists of a bottle of vodka).
* Sam and Max games give us this exchange while examining the coffee pot at Bosco's Inconvenience:
* Sam and Max have this trope in spades. Especially Max, whose head may as well be a bear trap.
* Sam and Max Plunge Through Space was a concept Steve Purcell was working with as a game and a comic, variously. It never got made and beyond fan discussion it probably won't see the light of day.
* Sam and Max: Reality 2.0 the popular name for shady businesses which do money laundering.
* Sam and Max Save the World: In "Situation: Comedy", Hugh Bliss reads Max's mind and comments that what he read was "unspeakably depraved", whereupon Max says he's right.
* Sam and Max Save the World, there's a sign above the freezer in Bosco's store that reads 'Tongues Placed on Freezer Become Property of Bosco'.
* Sam And Max. Specifically, you need to get Mr. Featherly to eat a cow pie (which is fortunately a prop).
* Sam and Max: The Mole, the Mob, and the Meatball. Each of the personal hells in "What's New, Beelzebub?" qualifies as this trope too.
* Sam and Max: The Tomb of Sammun-Mak, the great grand-dads of Sam and Max are about to intrude on the maiden chamber of tomb guardian's daughter Nefertiti. The sign, naturally, is in hieroglyphics:
* Sam and Max to Sam, who says "This rampant weenie cannibalism turns my stomach."
* Sam and Max, where the doors on Skun'kape's ship dilate, slide in, and even tilt in — from opposite sides!
* Sam and Nicole. He had to rescue her when her college-age group of humans-for-supernaturals activists reached out to the local werewolves and got
* Sam and Ponk were valentines and dated briefly, but saying that their relationship didn't end well is an
* Sam and the Firefly by P.D. Eastman has a scene where a hot dog man is driving the titular firefly, Gus, out of town in his pickup truck for the mean pranks he has pulled with his ability to spell words out of light (he spelled "COLD" above the "HOT DOGS" sign.) The truck stalls on a set of railroad tracks just as a train is coming. Sam the Owl frees Gus from captivity, and Gus manages to stop the train in time by spelling "STOP" in big letters.
* Samantha Arias is an average single mother who eventually discovers she has Kryptonian powers, but can't activate them at will, only during stressful situations. Her cold and ruthless "Reign, the Worldkiller" persona has full control

over her powers, and is even more powerful than Supergirl.
* Samantha Carter and Bill Lee were working in a half-finished base that didn't have artificial gravity. Sam glided gracefully from point to point, while Bill... well, spaceships need barf bags, too.
* Samantha Carter and Samantha Finn are both present, but haven't met each other.
* Samantha Carter begins as a Captain, before being promoted to Major, and later Colonel.
* Samantha Carter is kidnapped by a dying millionaire, who found out about her time as host to an alien symbiote and hopes to dissect her in order to learn how it affected her physiology. She spends much of the episode trying to rescue herself (with escalating badassery), but is eventually saved by the rest of the team. This, however, doesn't diminish her badassness one bit.
* Samantha Carter is promoted twice during the series (from captain to major to lieutenant colonel) with an on-screen ceremony where her old rank insignia is removed and the new one applied.
* Samantha Carter: Physicist, Air Force officer. Could destroy the universe if she wanted.
* Samantha Carter pulls one of these in the very first episode, when O'Neill and Kawalsky express skepticism that she really understands what it's like to go through a Stargate.
* Samantha Carter... until Sam realizes she's the princess of the sun.
* Samantha Ducard is the most major character who wields an axe as her weapon of choice.
* Samantha Echo's "I Wanna Shake her Hand" is a Betty and Veronica song from Veronica's point of view, in which Veronica is sizing up Betty in a sarcastic, passive aggressive manner. Betty is the wife of her married crush (Archie), who looks at her (Veronica) as if she is "a strange, forbidden door." The sexually frustrated narrator vacillates between feelings of jealousy and friendliness, which is particularly evocative of the trope namers, who were actually best friends when they weren't fighting over Archie.
* Samantha Fish features Fish in the woods, digging a grave for the body of a man who tried to cheat her in a poker game.
* Samantha Fish - "Go to Hell" is about a boyfriend who thinks too much of himself; not only does she not want him back, she has a suggestion for what he can do instead.
* Samantha Fish: Guitarist/singer from the 2010s who primarily plays blues, with occasional forays into roots rock, country, or R&B.
* Samantha Fitzgerald was likewise introduced as an ethical lawyer who had no issues working with Jarrod, but was gradually turned into this in later guest appearances, as a result of
* Samantha Mathis, another actress considered to play Olivia, went on to have guest appearances in Seasons 5, 15, and 21.
* Samantha Reyes, the District Attorney for Manhattan, will go through anything, including illegal measures, to get by. As Matt Murdock puts it, Reyes wouldn't even buy a pack of gum if it didn't further her career. Likewise, Karen uncovers that Reyes has a habit of backstabbing her own associates to save her own ass.
* Samantha Ryan and Hollis Mann seem to be doing all right so far, though Gibbs specifically keeps avoiding an Unretired Hollis after
* Samantha Shepard's squad (Garrus, Tali, Legion, Samara, Zaeed, Thane, Vega, Williams,
* Samantha, who generates "ectoplasmic armor", tends to shred her clothes completely each time she uses her power. She is never shown dispelling the armor (although she is shown altering and dispelling portions, and dispelling the swords that she occasionally generates instead), and it remains intact even when she's unconscious.
* Samantha Who? of her then-current boyfriend. As she prepares to leave, she is told "You shouldn't turn your back on me again", to which Sam scoffs, fails to be fearless and instead backs slowly.
* Samantha Who?, Sam seeks to get her foot in the door with handsome lad Kevin by

suggesting the gift of a drawer, since he happens to have one that's already empty.
* Samantha Who? where Sam gets a (badly-behaved) dog. She leaves the animal and her flatmate sitting on the sofa while she goes out. Realizing she has forgotten something, she steps back through the door a second later and finds the pair sitting in exactly the same positions, only the sofa cushions have been torn to pieces and the apartment is covered in stuffing.
* Samantha Wildman is one of numerous secondary characters that come and go, so her limited screen time is hardly surprising — except that her young daughter Naomi is in many episodes in later seasons, so it's hard not to wonder where Samantha is.
* Samara also counts. She tells Shepard it's primarily why finding transportation isn't a problem for her. When potential threats find out she's on board, they give up immediately and avoid her ride altogether.
* Samara, an asari party member, is a Justicar, a sort of vigilante warrior monk. According to her "the closest human equivalent would be a knight errant, with perhaps a bit of samurai".
* Samara can say this again (if the right player choices are made) to her surviving daughter.
* Samara is a Justicar of the Asari, basically a living Avatar of Law.
* Samara, just after crawling out of the TV screen. Her glitchiness allows her to
* Samara Morgan) guest star as one of the suspects. Guess who the killer was?
* Samara Morgan, in addition to Sadako's attributes above, also has full control of her psychic abilities —telekinesis, psychography, possession of electronic equipment— and can also possess humans. Not only does her appearance resemble her condition upon death, but her final manifestation displays the
* Samara, to some degree. Rather than settle down in her older years, she instead dedicates her life to bringing justice to the galaxy and hunting down her sociopathic murdering daughter. Despite this and her powerful biotics, she's a very peaceful person, never showing even the slightest hint of being angry or unsettled.
* Samara, who basically gave up her life and rebuilt herself around her job as a
* Samaria' series features a planet founded by Christians. There are genetically engineered humans with wings called angels, whose voices call out to a spaceship in the sky that runs the planet.
* Samaritan a minute of flight time. In a later comic, the entire superhero community teams up to pick up the slack so that Samaritan and Winged Victory can have an evening free to go on a date, without feeling duty-bound to interrupt it to save civilians or fight villains.
* Samaritan, another surveillance system that lacks the Machine's directive to help people and the Black Box
* Samaritan lets Shaw go in order for her to lead them to the heroes' hideout. It's all virtual, so when she realizes she's playing into Samaritan's hands and kills herself, they can just reset the simulation and try again.
* Samaritan, on the other hand, is such a strong example of this trope that it crosses straight into Machine Worship.
* Samaritan Relationship Starter: A character falls in love with somebody upon witnessing them perform an act of kindness.
* Samaritan Syndrome: A character feels guilt over the people they could save, but don't.
* Samaritan Syndrome: Feeling guilty for every time they might have saved someone, but didn't.
* Samaritan Syndrome: Superheroes often feel guilty for every time they might have saved someone, but didn't.
* Samaritan Syndrome: You fail to rescue everybody when you're try to save a bunch of people.
* Sam at one point helps sedate a recently turned werewolf in the throes of
* Sam attempts to subvert this in one episode where he has to hang out with Diane's literature professor ex-boyfriend Sumner, so he prepares for it by reading
* Sam, Aunties and their "employers". This also cause Life and Death from the main timeline to work double-duty since they partly exist outside of time and space.

* Sam Ax is a former Navy Seal. He is a fierce and loyal man. Threaten his friends and he will get angry very quickly. He will go to many lengths to help his friends or the family of friends, including some not-so-legal phone work to help locate a missing cop buddy, to when he saves
* Samba de Amigo has dancing backgrounds depending on how well the player is doing.
* Sam, Bangs, and Moonshine, Sam seems about eight and Thomas seems about four, but they're allowed to be alone for most of the day and Thomas can even ride his bike to Sam's house.
* Sam, Bangs, and Moonshine, Sam uses the word "flumadiddle" to mean lies.
* Sam, Bangs, and Moonshine, the story heavily implies that Sam is only pretending Bangs can talk, because the moral is not to lie and in the end she admits that cats can't talk. However, at one point, she seems unsure about whether Bangs can talk, which suggests that maybe she is hallucinating or he really can talk.
* Sam, Bangs, and Moonshine where Sam imagines that Bangs the cat can talk.
* Sambhaji, second ruler of the Maratha Kingdom, was executed by the Mughals in this fashion.
* Sam: Blondell (albeit a more subdued version). He's a gay man who's very sophisticated, with vast knowledge of stereotypical feminine behavior (he trains women how to act that way).
* Sam Braddock: Fresh from the military, starts off wanting to go tactical every time negotiations don't work
* Sam calls Carly and Freddie 'Mr and Mrs Benson' in "iSaved Your Life".
* Sam can't accept the fact there's an animal (Rufus) who doesn't like her.
* Sam Carsten starts out as an enlisted man in the US Navy. During the period between
* Sam Carter began Season 9 on R&D secondment to Area 51. She communicated with the SGC via video conferencing which hid
* Sam Carter is also this. Acting as the quartermaster for UNATCO, Carter always stresses by-the-book approaches to hostage situations and non-violent solutions. When JC is escaping UNATCO and tries to get him to join the resistance, Carter refuses to hear JC's explanation and says that all it needs to get back on track are a few good people. He's later dumped unceremoniously by the company after Walton Simons assumes control and admits how he was naive in believing they could change anything (which prompts him to help the Vandenberg scientists).
* Sam Carter, the quartermaster at the UNATCO HQ, will give the player some extra sniper rifle ammo if the player didn't kill anyone on one of the previous assignments. Handy if you decide to change your mind about the whole 'no-killing' thing, but otherwise, not terribly useful.
* Sam claims sending the Chickaraffe home to his natural habitat as a "wildlife animal rescuer"
* Sam completely qualifies as an anti-hero. He's addicted to demon blood, has a demon lover, and is willing to kill and drink the blood of an innocent nurse if it will help him stop the apocalypse. It's too bad for him that his demon lover is manipulating him and he actually causes the apocalypse to start.
* Sam Cooke as one-half of the soft-rock duo England Dan & John Ford Coley).
* Sam Cooke song "Wonderful World" may not know much about what he learned in school, but it would be a wonderful world if you loved him.
* Sam Cooke's song "Chain Gang" (quoted above) was the second-biggest hit of his career (peaking at No. 2 in the US, No. 9 in the UK), as well as being the
* Sam/Dean is especially noteworthy for having enough fans agree that the incest was just too big a squick factor for them to overcome — while it was very popular in early seasons and still has a sizeable following, a good number of fans shipped it only because there were no other popular pairings to ship until the fourth season — that
* Sam does in this in the Season 2 premiere too while fantasizing being with Gabe, only to have
* Sam doesn't want to hold Florence's remote control and "reset" scent vial.
* same actress as an assistant of the body of the week. A short cameo at the beginning, and then nothing until Rizzles realizes that the name of the killer's

video game alter ego translates to "underling" or "assistant" in a Scandinavian language.
* same agency. The FBI Homicide division is investigating the murder of a psychic. Agent Kay finds a suspect is under investigation by the Counter Intelligence division, checking in with him. He tells her it's just a routine investigation into money launderers. Later, he saves Kay and Cameron from a hitman and reveals that the suspect is a major arms dealer and they didn't want Homicide messing up their case. Cameron lampshades on how he somehow always assumed the FBI was on the same side and they both give him a "don't be ridiculous" look.
* Same applies to championships, as fighters are always going for "the title" with the weight class or organization never defined. In reality, there are multiple world titles in over a dozen weight classes.
* Same applies to computers: Many and majority of the computer manufacturers will often have limited-edition gaming PC sets with
* Same applies to Finland. But also skiing or snowmobiling through the snowy wilderness in winter is far faster than walking or hiking through them in the summer, and the extremely difficult road conditions in the winter makes Finns skillful car and motorcycle drivers.
* Same applies to hot-spot engines, such as glow plug engines and hot bulb engines. They will run until they run out of fuel or are stopped.
* Same applies to Raclette cheese. That cheese is used to make fondue, or something like it (the cheese is most often melted off with a heated metal tool, then scraped off onto the plate), although we should note that Raclette's odor is much weaker than Limburger's, and its most distinctive characteristic is the fact that it tastes bizarrely like beef.
* Same applies to the late Spanish sports commentator Andrés Montes. Aside from being credited with coining the idiom "tiki-taka" to describe the style of play that took FC Barcelona to six trophies in 2009 and Spain to two consecutive European championships and one World Cup, he was best known as a basketball announcer, and came up with nicknames for plenty of players. The best remembered ones are "Mr. Catering" (José Manuel Calderón), "Jordan Airlines"/"Flight 23" (Michael Jordan), "The Gable of the Big Apple" (Patrick Ewing) or "E.T." (Pau Gasol).
* same approaches that Yarnell had used to attack the fleet at anchor there, to devastating but somewhat ephemeral effect.
* Same arc, Vander Decken doesn't care about Hody's regime change, he just wants to marry Shirahoshi. Wadatsumi is even less invested, he's just obeying his Captain.
* Same as how medical shows hire doctors and military shows hire former service personnel,
* Same as the first, except Scootaloo survives and the horrors of the Rainbow Facility have been exposed. However, Scootaloo is left thoroughly broken over the deaths of three of her friends
* Same can be said for Bulk Biceps (whom the fans originally dubbed "Roid Rage" or - most popularly -
* Same can be said for Phineas thinking that Perry kept his secret identity because he never cared for them as a family. If only he had read the pamphlet.
* Same can be said for Renton when he can just leave Gekko after episode 26 but he choose to stay for Eureka's sake. Holland even gave everyone on board the Gekko the chance to leave while they still can in episode 33, but no one did anyway.
* same cell block, let alone the same cell. If they are important prisoners, I will keep the only key to the cell door on my person instead of handing out copies to every bottom-rung guard in the prison.
* Same Character, but Different: A character is drastically changed between installments, yet still expects the audience to accept that this is the same person from the last installment.
* Same Character, but Different without explaining how/why they changed)
* same character matches), the game changes the palette of one player to distinguish it from the other. Depending on the character, some alternate palettes

will simply change the color of the character's clothing (i.e. Ryu's gi and bandanna), while others (such as Dhalsim's and Blanka's) will change the character's skin tone to improbable colors such as blue or grey. (Though in the case of Blanka, his natural green is impossible in real life).
* Same choice scenario with the paratrooper punching match in the Battle of the Gardens at the end of Disc 2, except there's no penalty for retrying. Not only that, but you have the option to try again with +200 HP and each time you fail, the game gives you a tip that could help you win that time, though some are more useful than others.
* Same comic, same degree, different character. Though Tai is later revealed to be studying Library Science.
* same company movies in the States. Said studio's former parent company now also owns the network the Pokemon anime has aired on since 2017.
* Same Content, Different Rating: As times change, content that was originally seen as harmless is now viewed as less so (or vice versa).
* Same could be said for UKRD's takeover of the former TLRC [The Local Radio Company] stations; they sound like live and local stations of the 1990s, with emphasis on the local part. Plus, there were few if any rebrands, except in the North East, and no networking — so it feels local in content terms.
* same crime, where attempting to blame their co-conspirator is a defense the jury can choose to believe or not. And given the heinousness of the crime, they probably won't. We don't see it play out though, one of the defendants confesses out of guilt before his case can go to the jury, and his testimony hangs his partner. D.A. Schiff even remarks on how McCoy got the justice system to legally accept a physical impossibility (both men fired the same bullet from the same gun).
* Same deal for Demona and Thailog, until they broke up. (The relationship cracked when he threatened her daughter — and shattered completely when he revealed he had a concubine cloned from her.)
* Same deal with Harley; in her own title, she once tried to bluff Batman into thinking she was committing suicide by drinking it. (Didn't work; he knew she was immune to it.)
* Same deal with Trolls. They are also usually the enemies, including in this game, but here they too have created city and you can help them find their original settlement.
* Same Difference, Miwa ends up in the 2003 Turtle dimension, where after she helps them deal with the Kraang, she enlists their help to get her back to her home dimension.
* Same Difference: When April points out that the Kraang could just harvest her DNA by taking her hair rather than put a large needle in her head. The Kraang admits that she's right and could harvest her DNA painlessly, but they just find the painful and torturous way more entertaining for them.
* same dragon. He uses a peg leg and has interchangeable attachments for his prosthetic arm.
* Same episode, Xander substitutes clearly sexual terms with "tight embrace". Twice.
* Same Face, Different Name: The artist goes by a different name when writing different kinds of art.
* Same for a South Yorkshire edition in mid-August 2005 which focused mainly on Barnsley and Rotherham - Sheffield, Worksop and Doncaster was
* Same for her uncle Kariya, who is also quite "intimate" with the aforementioned worms. The scene where he had a
* Same for Londoners. This particularly galls the rest of Britain since the media is almost entirely based in London.
* Same for Oogway's disappearance in a puff of petals. Seems to be a natural result in a movie that shows no bodies and
* Same for other villains like The Scarecrow (again mostly thanks to
* Same for Portuguese accent. In Portuguese many words are written like in Spanish, but pronounced differently. This includes "sh" in place of "s".
* Same for Rei later on in the season when she's bedridden by a cold. She coughs

after proclaiming "this sucks".
* Same for "Tea Party", which includes part of "I'm a Little Teapot".
* Same for the crossbow in both games: similarly-perfect accuracy and high power, but ammo is again rare and they have a long cycle time between shots, combined with slow reloads for the first one and
* Same for the first ghost portrayed, i.e., the ghost of the librarian, who scares the protagonist only when they try to capture her. The 2009 video game gives her some backstory, and a reason for her haunting: She was courted by Ivo Shandor, a Gozerian ritualist, who only got close to her to get his hands on some rare books about Sumerian artifacts. When she discovered his intentions, she was understandably angry, and Shandor murdered her...along with several others, to cover it up.
* Same for the Order of the Black Knights, which was first manipulated by Lelouch before
* Same for the Orks. Not only are there a lot more of them living on their own worlds and only rarely going to knock some humies around, they are actually a degenerate form with a degenerate technology, the original being the
* Same for the Russian space station Mir, that fell in March 2001 on the Pacific Ocean (
* Same game, enemy example: Nan does a fair amount of spinning, but her
* same gender subtext. Michael, for example, once called a boy attractive.
* Same goes for all-natural Playboy Playmate Petra Verkaik, whose breasts literally
* Same goes for Asch cancelling and countering Luke's Radiant Howl with his own Rending Saber mystic arte in
* Same goes for Barry; he just snaps his head back on whenever it gets knocked off.
* Same goes for Barry. Sorry, Barry, you don't get to fly straight from counsel table directly to the ledge in front of the jury and then give your opening statement. You're invading the personal space of the jury.
* Same goes for Batman's evil counterpart Prometheus, who has created technology that analyzes an opponent's fighting style, allowing him to simulate it perfectly.
* Same goes for Breanni, founder of a site categorizing minipets in WoW who also gets referenced ingame as a minipet vendor, and the NPC IS a gnome.
* Same goes for Bronx, Goliath orders the trio to take him down into the rookery for doing nothing other than making his presence known by panting during the current conversation.
* Same goes for Captain Falcon, what with his flaming punches, kicks and bearhugs.
* Same goes for coaches, too. After he retired from coaching for the University of Florida, Steve Spurrier tried to use his "Fun and Gun" offense (one that revolves around long passing plays) in the NFL and found out that most professional defensive linemen can out-think and out-run all but the best quarterbacks and wide receivers.
* Same goes for Colonel Potter. He admits to being attracted to other women at times, but he's very clear that his wife is the only woman for him and he would never act on those feelings.
* Same goes for Damon and Elena, again with these particular problems disappearing once
* Same goes for her older sister, Eleonore. Which happens to make Louise cower in fear.
* Same goes for his Archfoe The Leader. He hates it when people refer to him by Samuel Sterns.
* Same goes for just about every fighter pilot in the rebel alliance other than, of course, Luke and Wedge.
* Same goes for Mako's brother, Bolin, for one of Korra's cousins, Eska. Bolin is a happy, funny guy who took a serious interest in Eska while Eska herself is a bit of an emotionless
* Same goes for Marten's dad and "Dad 2: Dad Harder", all though they have so little screen time it's hard to tell.

* Same goes for Mickey Rourke, although it's been overshadowed by the change in his physical appearance.
* Same goes for people in places where they operate heavy machinery (admittedly, these guys don't usually wear ties, but there is always some manager that decides to visit wearing a three-piece suit.)
* Same goes for places outside of official forums as well. If you mention a game, most of the responses will be something about how much they hated it,
* Same goes for prestige classes: for every Initiate of the Sevenfold Veil and Green Star Adept, there's a Frost Mage or Exotic Weapon Master.
* Same goes for Randolph Mantooth, who played firefighter/paramedic Johnny Gage on NBC's
* Same goes for Rogue Planets, planets which drift through open space instead of being in the orbit of a star.
* Same goes for some Disney Channel Shows, such as the channel's earliest shows, the show
* Same goes for the Argentinian-playing-an-Asian having ninjas as her
* Same goes for the Firelord himself, who knows that an invasion is planned and that he and his guards will be severely weakened during the eclipse. So he decides to
* Same goes for the Latin Spanish version, with the film being dubbed in 1998. An interesting difference between both versions is that in the original dubbing of "The Honey Tree" and "The Blustery Day", Flavio, the original Spanish voice for Pooh, gave the character a Mickey Mouse-like voice. For the original 1974 dub of "Tigger Too", Pooh, Roo, and the narrator were given new voice actors. One of the voice actors, Luis Bayardo, who voiced Pooh in "Tigger Too", later reprised his role as the same character in the 1998 dub of the film.
* Same goes for the Thai version, which had also its two dubs made in 1991 and 1998.
* Same goes for the very front rows in regular theaters. In addition to neck strain, the center seats pose a very high risk of being in the "splash zone"- read, spit from the actors- and the seats on either side can have a good chunk of the stage obstructed.
* Same goes to Ruth the Moabite (an expatriate who was determined to not fall in misery after losing her husband, ending up as the grandmother of King David and one of Jesus's ancestors), Abigail (one of David's followers who mediated between the King and her
* Same happens in the anime series (minus Touga remembering and Chuchu in Utena's outfit) and Anthy, dressed in civilian's clothes and with her hair down
* Same in German. To be called "Fräulein" would probably be considered sexist or patronizing by most young women.
* Same in "Mr. Monk Is Someone Else" - no murder happens on-screen during the episode, though the person Monk impersonates is killed when he is struck by a bus.
* Same in the third installment: Fayt can stay on Elicoor with Albel or Nel, travel to Klaus with Cliff or Mirage, or head off to some as-yet-unknown place with Maria.
* Same Language Dub: A live-action work has another actor dub over the actor physically portraying the character.
* Same Language Dub: A live-action work has separate actors for speaking the character's dialogue and physically portraying the character.
* Same Language Dub segments existing. This was probably because Noddy gained the ability to talk in the framing device segments, and every line of his would have to be redubbed over by his original voice actress Susan Sheridan. It was exported to other non-English countries.
* same last name instead), while others are eager to embrace the twincestiness that comes with them.
* Sam Elliott is noted for his resonant bass-baritone voice, which automatically makes all of his film characters badasses.
* Sam Elliott. The character tells a large group of young ruperts: "If anyone of you sumbitches calls me gram-paw... I'll kill ya!"

* Same movie changes context of Sirius's famous "the world isn't split into good people and Death Eaters". In the book Harry suspected Umbridge is a Death Eater because of her cruelty, and when he told Sirius about his suspicions he answered with said quote, meaning that Death Eaters aren't the only evil in the world. In the movie Sirius says it when Harry is doubting himself, and the quote is supposed to mean that no one is really
* same-named SF story. Which refers to the drink (and possibly also is meant metaphorically).
* same name who comes back to his hometown 10 years later to get back his wife and daughter.
* Same New Woman follows Marita, an ordinary librarian who wakes up one morning with a hyper-muscular body and extraordinary strength and is subsequently a source of gender confusion. She tries to go on with her old life but finds her world increasingly out of control.
* Same New Woman: Marita, although she has a hyper-muscular body and extraordinary strength, tries to go on with her old life dressed in plain, normal clothes that cover her up whenever possible.
* Same New Woman Marita, an ordinary librarian who wakes up one morning with a hyper-muscular body and extraordinary strength. She wants her normal body back while trying to go on with her old life but finds her world increasingly out of control.
* "Same Old Lang Syne" by Dan Fogelberg is about two ex-lovers who run into each other on Christmas Eve. They either parted on good terms, or enough time has passed that they're not upset anymore because they share a few beers and catch up, and both are genuinely happy to see the other doing well. She gives him a kiss before they part ways once more at the end of the song.
* "Same Old Lang Syne" by Dan Fogelberg is a variant, in which the narrator describes running into his former girlfriend at the grocery store. They're
* same one, and that despite appearing from several feet to several miles in length, it has only one size, "as large as necessary".
* (same one) is talking with another Valkoran trooper about the creepy atmosphere of Bast Castle and his previous death while standing on a walkway with no guardrails. Once the trooper laughs at him, she hits him on the shoulder and accidentally causes him to fall off the walkway and die again.
* same person takes all 4 types to truly outlandish degrees. From regular hand guns to shot guns to ROCKET LAUNCHER TONFAS and so many other weapons, Bayonetta is currently one of the most insane examples of the gunslinger in video games so far.
* Same Plot Sequel: When a sequel is basically a retelling of the original
* Same Race Means Related: Characters of the same ethnic background are assumed or revealed to be related.
* Same rank, different side, there is Colonel Crittendon. The man is
* same robot army, along with the Brotherhood of Steel, Khans, Boomers, and a squad of Enclave soldiers in gaming history.
* same room as Rimmer if given the option. This one's sort of a gray area though, since it all turns out to be hallucinations.
* Same rules apply to Eastern Orthodox Priests, as well as deacons in all rites. A man under Holy Orders is not permitted to take a wife unless given express permission to do so (which in the case of deacons is usually only given if his first wife dies and leaves him to raise minor children as a single father, and in the case of priests is extremely rare. It is unheard of in the case of bishops).
* Same scenario with Michael Moorcock's Melnibonéan mythos, except that TSR actually did get permission from Moorcock beforehand. Moorcock apparently had forgotten that Chaosium already held the license to those characters when he gave TSR the go-ahead to use them.
* Same series, the Head of MEXT School Carriers Department: Have a team of high schoolers slated to go against a college-level
* same-sex is known to start conversations with cute guys with "yo, baby" (and a general overuse of "baby").
* Same-sex relationships are forbidden as well, and the coroner was forced to keep

the fact he'd been involved with a man secret after he died, even when performing his lover's autopsy.
* Same-sex relations weren't accepted in Japan of old unless they were this trope, and they still had to be discreet about it.
* Same-Sex Triplets: A set of triplets is more often than not all identical and of the same sex.
* Same-Sex Triplets has the 3 Fates, the 3 Furies, the 3 Graces, the 3 (elder) Cyclopes, the 3 Hekatonkhires, the 3 Horai/Seasons (usually), the 3 Harpies (usually), the 3 Graeae, and the 3 Gorgons (usually).
* Same show, different pairing: Paisley and Fletcher. Paisley likes him in a "Adorable kid" way. Neither is returning the feelings.
* Same show has the Shikimoribito, who all wear fullbody suits and bizarre masks through which they eat with straws, and who have the government and everyone else terrified of trespassing on their underground territory, where they dangle by their ankles on ropes from the ceiling in a disquieting way. The main characters can beat them up if they have to, though.
* Same Story, Different Names: Okay, so I need to make a new story, but here's what I'm gonna do—I'll just do the same thing again and tweak the title. No one will notice.
* Same Surname Means Related: If two characters share a surname, that can't be a coincidence.
* Same thing goes for Barney's playbook. Only a few plays are ever divulged, but the book itself is shown to be a
* Same thing goes for hares, as well as any other animals that stand and walk soon after birth (like horses and cows).
* Same thing happened in 1989 when David left to live with his grandmother in a farm in Florida in 1989 after Northern Calloway's health issues (He died in 1990), And David gave the store to the retired firefighter, Mr. Handford.
* Same thing happened when Potter and Winchester were quarantined for mumps in the same tent and Winchester tried to play an Enrico Caruso record.
* Same thing happened with Mrs. Puffs and the prison guards after SpongeBob and Patrick tried to sneak into prison disguised as guards.
* Same thing in Britain. When the conspiracy theorists are asked to suggest exactly where a lot of large and hard-to-hide steam locos are being stored in a country as small as Britain, and indeed where they think the necessary supporting logistics of coal and water are going come from on a rail system switched over to electric and diesel 50 years ago in a country that
* Same thing with "Culling of the Fold", in that the gore is instruction rather than threat. "Dash her on the paving stones/ It may break your heart to break her bones ..."
* Same thing with Grif and Simmons. They have absolutely nothing in common yet they remain best friends.
* Same thing with Ruby and Sapphire. They had fallen in love when they were kids and changed their personalities for each other. When they remeet and manage to
* Same thing with, say, wearing a substantial amount of makeup regularly and then suddenly appearing without it.
* Same thing with the Canadian writer Robertson Davies, who kept the Oxford accent that he picked up from university for the rest of his life.
* Same thing with the stone tablets scattered across Zora's Domain in
* Same thing with the Walden Films versions. Lucy has auburn hair, rather than blonde, but
* Same Time, Same Place", pulls this off chillingly. The smile is combined with a childlike personality, and it speaks in a singsong, like it's telling nursery rhymes.
* Same Time, Same Place", the demon Gnarl rips its victims' skin off in strips, and eats it, while the victim is still alive. It's in the process of eating Willow's skin when Buffy catches up with it, and kills it.
* Same Time, Same Place", when Willow returns to Sunnydale but is invisible to her friends (and vice versa). All scenes in which she, Buffy, and Xander are in the

same place is first shown from one perspective, then the other (usually with a clock or section of third party dialogue to orient the viewer)
* Same title, different song "Mon Enfance" by Barbara, is about her revisiting the house where she grew up as a kid and her ambivalent feelings about it, including the text "the war threw us out there, we lived as outlaws and I loved that, when I think about it...", and by the end stating that the memories from the childhood are the worst, because they hurt us.
* Same to Xiao Xiao which inspired countless stick figure fighting animations and largely
* Same trope, different sport in "Lisa on Ice": when Bart refuses to take a penalty shot against Lisa, allowing their hockey game to end in a tie, it turns the crowd into a riot.
* Same Voice Their Entire Life: A character keeps their voice actor even in flashbacks, or younger characters keep their voices in flash-forwards.
* Same Vulcan problem, different series: the "Take Me Out to the Holosuite" episode from
* Same was in Russia, where up to the 15th/16th centuries even the nobles mostly made do with bynames and patronymics, and commoners started to acquire surnames in mass only after emancipation of the serfs in the late 19th century. Before that, only those living in cities would bother with it.
* Same with Brienne. She looks like a man in men's clothes. In women's clothes, she still looks like a man — she just looks like a man in a dress. Not helped by the fact that it's very hard to find a dress that fits her. And even when they
* Same with Catchers in Baseball, who wear helmets with face masks for the same reason.
* Same with Death of rats, who only ever says SQUEAK (written like that, in all caps and without quotation marks), but despite that seems to be able to communicate with Death, Susan, and some others.
* Same with Donna when she's in the circle of mirrors in "Turn Left".
* Same with eating horse meat. Perfectly sensible in most of the world, but taboo in many English-speaking countries.
* Same with Edgar the Cockroach, who, after opening the container he thought contained the galaxy, just dumped the diamonds all over the floor of the truck - and who later ransacked Rosenberg's jewelry store in search of the galaxy but didn't take any of the goods.
* Same with Gust Shield, except it's an insanely strong gust of wind instead of a force field.
* Same with Phil Parsons and Nappa. Despite having credits in some other shows, Nappa is all anyone knows him for.
* Same with Rorschach. He is deliberately left morally ambiguous to let the readers decide whether his extreme methods of fighting evil were necessary or not.
* Same with Shepard's predecessor and former commanding officer, David Anderson, if this trope also applies to
* Same with some of the White aligned races, which tend towards the mystic scholar archetype, like Alara
* Same with Stupendous Man; after yet another blunder, Hobbes asks Calvin if Stupendous Man ever won any battles. Calvin replies they are all "
* Same with the Calder Valley in Yorkshire, though it's becoming more well-known in the UK due to television production moving there.
* Same with the Citizen Advancement Training (formerly Citizen Army Training) in the Philippines.
* Same with the druid class and possible numerous other non-core ones.
* Same with their Minecraft Let's Plays and their new Versus series. Especially the latter, as they tend to cut away from the game footage to show the AH crew's reactions to who wins.
* Same with the Laguna scenario when he's fighting the Ruby Dragon. If the Ruby Dragon takes all of his HP, then you can chose either "I'm done for" or "Not yet!" If you choose the former, it's a Game Over, but "Not yet!" allows you try again. There's no penalty and you can do it as many times as necessary.

* Same with the Sri Lankan Civil War. In the series, Celestial Being did an intervention to stop the war... which basically just ended in 2009. But it's one of those wars that may or may not come back with new force after a few years, depending on whether the Sri Lankan government is magnanimous in victory and helps the Tamils get back on their feet and addresses the grievances that caused the conflict.
* Same with the time when John Terry was knocked out after being kicked in the head against Arsenal (who seem to have a thing about causing head injuries) a couple of seasons back, he apparently couldn't remember anything that happened after coming out the tunnel for
* Same with Ultimate. Peter's back (it's hinted he and Osborn are resistant to death thanks to the OZ serum. After a freak-out and fight with Morales (namely to get his dad's webshooters back), Peter and Miles team up to beat the reborn Goblin. With Miles curb-stomping the Goblin, Peter gives Miles his blessings and says he will wander the Earth
* Same with "Under Pressure". It's managed to avoid this in a way though, as most people will wonder until the guitar part if it's "Under Pressure" or "Ice Ice Baby".
* Samey wishes to be referred to by her real name "Sammy", but is always called "Samey".
* Sam Fisher wears a similar (albeit completely black) sneaking suit in
* Sam for being the fat, timid, and bookish son of a great warrior. Leads to some pretty horrific child abuse, as his father gives him the option of either being murdered or "voluntarily" joining an extremely deadly military order he would have seemed woefully unequipped to survive because doing so would involve Sam forgoing his right to inherit the headship of his family.
* Sam/Freddie got a 5 episode arc dedicated to exploring that relationship. They break up for a myriad of reasons and
* Sam fulfills the same function on occasion; it can be argued that the two of them switch around this role in the team dynamic.
* Sam Gamgee and his wife Rosie Cotton are third cousins. Sam's great-grandmother Rowan was the older sister of Rosie's great-grandmother Rose.
* Sam gets a call from her friends telling her they're trapped in a teacher's house. She says something along the lines of "that sucks," picks up an apple and takes a bite.
* Sam gets a job at Chilly My Bowl, to pay $500 back to Carly and Freddie.
* Sam gets away with this by virtue of being a vampire (and a particularly tenacious breed of one, too). He's suffered a gaping hole through his torso without stopping and had most of his brain eaten by a nanite-powered scientist with no significant impediment (to him, at least; the scientist "absorbed his stupidity" as a consequence). It takes having most of his body devoured by a demon to actually stop him, and even then it doesn't outright kill him (though it required some high-powered vampire queen blood to get him to regenerate properly).
* Sam gives Freddie a wedgie near the end of the episode "iWill Date Freddie", under the guise of
* Sam goes undercover as the partner/boyfriend of a female undercover agent pretending to be an assassin. They have no problems convincing people that they are a couple because the female agent is actually Sam's real wife. The awkward parts come when the
* Sam Grey Alice Chantrey went from main character to appearing now and then due to modelling commitments. She remained plot-relevant, but became harder to write about as her alternate career began.
* Sam had had other love interests since Jess' death, but none have continued to be mentioned for so long and none of them seemed to have close to the same level of impact on Sam. Azazel and Brady both mentioned that had she not died, she and Sam would have gotten married and lived happily ever after.
* Samhain Island is a skeleton, more specifically the esteemed Santa Muerte.
* Samhain Island: The St. Charles’s are known for monster hunting, targeting various monsters around the town for their own research and/or personal gain.

Zaccaria is the leader, and René is the muscle. Miss Vargas is there too, but isn't all that helpful.
* Samhain Island Tremaine and Hannah use a skeleton key to get into the tower.
* Sam has "always loved his beer" as one guest star put it. It's when he
* Sam has it even worse. Oh sure, he got along with his mother and sisters, but his soft, gentle demeanor was not only mocked by essentially everyone but was also
* Sam has to call the woman "Black Widow, because he's not cleared for real names.
* Sam Healy's mother Margaret also had some kind of mental illness, showing erratic behavior and mood swings, plus hallucinations according to his father. All we know is ECT didn't cure it.
* Sam Holt: Sam's friend Terry Young, who is eager to tackle murder investigations aimed at prominent figures, and who Sam consults both before and after Terry becomes a suspect in his second case.
* Sam Holt: Sam was an actual cop before he got a job playing a detective.
* Sam Holt: The third book has Sam and several other actors who play detectives (and their significant others) filming a commercial on an island when they get stranded there and people start being murdered.
* Sam Hornish Jr's last-lap pass of Marco Andretti in the 2006 Indy 500, in which he pulled a slingshot maneuver coming out of the final turn that made it look like he'd unlocked a secret turbo/boost button combo from a video game, passing Andretti just a couple of seconds before crossing the finish line.
* Sam Hughes was the federal Minister of Militia for the first three years of the war. His erratic personality and volcanic temper meant that Prime Minister Robert Borden wanted to fire him even before Canada went to war, but was concerned about a political backlash. Hughes' wartime performance was catastrophic, including rampant nepotism in dispensing both contracts and commands (leading to
* Sam Hunt: "Break Up in a Small Town" has shades of this in the chorus, but the main hook of the song is that he keeps running into her and being tormented by her memory because they live in a small town and are likely to cross paths.
* Sam Hunt's "House Party": "We'll wake up all the neighbors 'til the whole block hates us".
* Sam-I-Am. At the end he ends up buying a trainload of cookies for $2 (there was a special that day).
* Sam-I-Am. He's a con-artist and a smuggler... and on a life-long journey be reunited with the mother who abandoned him as a child.
* Sami attempts this with the CAU (Cranky Assholes Upstairs) in a few of the episodes of
* Sami Callihan are represented by a skull missing its lower jaw and crossbones. Nevaeh is a member too with the same symbol, only with a pink bow tied around the bones.
* Sami Callihan because Gargano and Callihan are both part of the EVOLVE roster, which was just featured in a video game in which Callihan's usage by players exceeds Gargano's by 2%! Proof that the people are turning on Gargano, proof that Callihan is better than him!
* Sami Callihan to keep them away from Daizee (Haze being one of the ROH academy heads).
* Sami Callihan were working. This had no direct effect on ROH's shows but helped enhance Delirious and Haze's connection in the cartel.
* Sami Callihan: Wrestled mostly on the indies before joining WWE in 2013 as Solomon Crowe before leaving two years later. Had a brief stint in Lucha Underground as Jeremiah Crane. Nowadays wrestles mostly for Impact and won its world title.
* Sam in "iPie": "Why can't I marry this pie? All I want out of life is to be Mrs. Sam This Pie."
* Samir Duran that he has existed probably as long as the Overmind and possibly longer still.
* Sam is a poet who can't sell his books, wears shabby clothing, and at least appears to be homeless.
* , Sam is a rare female example. It never comes up a lot, but it's made more than

clear she disapproves of Nero being around girls and he isn't allowed to date until he's 25. She's also the only one who complains about Nero going to university out of the country (Lara being much more accepting of the decision), and threatens to drag him back home if he tries to skip out on coming back for holidays.
* Sam is dreaming that he's driving down a road at night, unaware that he's actually in a coma. In the real world Dean shines a penlight in his eye, freaking out Dream!Sam when he's suddenly driving in broad daylight. The song playing on Dean's radio is also playing on his car radio.
* Sam is dying and Dean makes the decision to let an angel use his body as a vessel in order to save his life from the inside.
* Sam is John 2.0 Period. (He did a less extreme version of this back in season one after Azazel killed his fiancee, but between having Dean to help him through it and it already being his father's quest, it just wasn't as all-consuming. John appears to have been orphaned even before he married.)
* Sam is killed the first time by a stab in the back. Subsequent deaths are much less dramatic, until three seasons later he jumps into Hell to save the world, and
* Sam is likewise unaffected despite much longer exposure. In his case we actually see the ring
* Sam is most beloved by the very gamers that he's a stereotype of. It definitely helps that he averts some of the more mean-spirited stereotypes associated with gamers (like
* Sam is on the receiving end when he asks a maintenance worker if all the bodged machinery on the transfer station is normal. The worker assures him it is, then thinks "Probably not normal for other places, but it's normal for us."
* Sam is revealed to have been raped by Maryann when he was 17 years old, which is why he reacts badly when she comes back into his life.
* Sam is saved this way by both Ghost and Lord Commander Mormont in "Valar Dohaeris".
* Sam is the final person who is able to be killed in the game, only killable in the final cutscene, a distinction she shares with
* Sam is the only one of her friends that does not like Kim because she's a cheerleader and part of the popular kids she hates.
* Sam is transformed into a woman, only to develop romantic feelings for his best friend.
* Sam is when the guy put together that Sam was ex-military and mockingly guessed that Sam was in the Coast Guard, which infuriated Sam so much he briefly lost concentration and the guy then got the better of Sam in a short bit of hand to hand combat.
* Sami Swoji live right next to each other and often meet up at the fence between their yards to shout insults at each other. When things escalate one of them starts smashing clay pots hanging on the fence posts. In retaliation, the other man starts ripping up shirts drying on the fence. When their wives come out to see what is happening, the husbands tell them that they were destroying their own property rather than each other's.
* Sami Swoji situation in order to survive the hardships of the time period.
* Sami The Samurai Squirrel. The vine snaps and she lands face-first in mud.
* Sami Zayn manner, their wishes were almost granted when Steen did get called by NXT and go after Zayne.
* Sami Zayn. Once confronted the polyglot Cesaro by showing off his own linguistic skills in both Arabic and French, and wears a flag patch on his tights for every nation in which he's wrestled. He's presented as the nicest male roster member by a mile, to the point that his competitors have said that his lack of a "killer instinct" is what has kept him from winning in his biggest matches. It's likely helped by the fact that he doesn't "look" like an Arab because of his fair skin and red hair, but his worldliness is an integral part of the character.
* Sami Zayn was returning to the promotion in October, with hype dying away when people learned he wasn't working in any capacity, he was just sitting in the audience. In fact, WWE only let him attend on the promise he would not show up on camera during the event.

* Sam Jackson's, Mr Jackson is heard to say "Why me, why me!" as he rushed out of an aborted robbery. However, you don't have to be a versed lip reader to tell exactly what he said instead of "why".
* Sam Jones: The title character, sculptor turned sleuth Samantha "Sam" Jones, invokes this trope in one book to intimidate some suspects by leading them to suspect she's just really good at getting away with murder.
* Sam Kinison had an entire bit about this, though given his sense of humour, he suggests getting hooked on various hardcore drugs.
* Sam Kinison's whole act centered around this trope. He'd go from soft tones to full tilt screaming in the blink of an eye.
* Sam Kinison was the epitome of this trope ALL THE F***ING TIME FOR NO REASON! AHHHHHH!
* Sam Kinison would often walk on stage screaming, one time even chained like a wild animal.
* Sam leaped into a man who, along with his friend, robbed a church in order to pay for his friend's daughter's treatment for fever (which his friend's wife had died of). The church refused to give them any money from the donations as "They said we would spend it all on rum."
* Sam leaped into a masked bank robber, who with his two brothers were trying to steal
* Sam leaped into one of his Civil War ancestors because the ancestor and Sam were close enough genetically to cause a cross-time jump.
* Sam Lloyd (Ted) belongs to an a cappella group called 'The Blanks', which was written into a multitude of episodes performing as The Worthless Peons.
* Sammael, who got killed when Rand looked away. Jordan had to go against his "read and find out" rule and confirm that he is, indeed, dead.
* Sam Martin is an unusual example, where the two hits weren't his own songs. He contributed vocals to David Guetta's hit songs "Lovers on the Sun" and "Dangerous", but other than that, he has made no impact as an artist. That said, he has had some success as a songwriter.
* Sam Mendes (in fact, it was reported that it took some convincing for him to direct the latter).
* Sammer attempts to portray himself as this in his backstory, but fails to convince Hans.
* Sammo Hung. In order to get into shape for the lead role, Hung lost 30 pounds in 3 months, by surviving on a diet of nothing but chicken and rice.
* SammyClassicSonicFan uses this a lot, to unintentionally hilarious effect.
* Sammy Davis Jr., a popular celebrity, had to marry a Black woman to protect himself from mob violence for having a White girlfriend. That said, Vern does deal with street harassment for his race and Alma condescends to him on her meeting with him, asking him if he works in blue-collar jobs.
* Sammy Davis Jr., its co-author Earl Robinson, the Maytones and Greyhound. Three Dog Night's version was a cover of the Greyhound version.
* Sammy Davis Jr. used to describe himself as "the world's greatest one-eyed, black, Jewish entertainer."
* Sammy J and Randy. The song is about both Sammy J and Randy having memories of falling in love in a rural Swedish town and realising that they were, uh, Swiss lovers in a past life. Then one mentions climbing a window and making love, and the other says that wasn't his window - and he realises that's why he thought he recognised a man in the crowd earlier. But then they start wondering whether they're exploiting homophobia for cheap laughs:
* Sammy J finds himself on the losing end of a game he started in an attempt to find out who was inside a
* Sammy Johns and "Chevy Van." Released in 1975, much of the action takes place
* Sammy Kershaw's most popular song is "Queen of My Double Wide Trailer", which only got to #7 — a peak he outperformed seven times. Even Kershaw himself admits that the song alone was responsible for making its corresponding album go platinum, despite that album also containing his only #1 hit, "She Don't Know She's Beautiful".

* Sammy Keyes book, the heroine sees a murderer but can only tell police that the man is of average height and weight, looking about thirty.
* Sammy Keyes series, Sammy does this to absolutely everyone she meets before she knows their real names. If she doesn't particularly like them, though, the nickname tends to stick forever. Two of her nicknames ("Snake Eyes", "Psycho Kitty Queen") even became titles of books!
* Sammy tells Jasmine that she doesn't have many friends due to Amy's bullying.
* Sammy The Way Out Seal (1962), the titular seal pushes a poolside shindig guest in with his nose. Since no one saw the seal, an escalating series of retaliatory pool-pushes ensues.
* Sammy Will Die At Six O’Clock, meaning ‘to criticise brutally’.
* Sam needs to break into Stinky's display case, so he asks Max to distract Stinky while he does so.
* Sam Nixon spent much of her earlier time as Acting Detective Inspector, but now has the rank permanently.
* Sam notes that eating together is obviously a deep need for Florence.
* Samoa had finished, but before the live results were read, he had the advantage of coming into the game knowing the strengths and weaknesses of the other players, but they didn't know anything about him.
* Samoa Joe' 2018 feud became personal when Joe repeatedly mocked AJ and accused him of being an inattentive husband and father. Joe would then threaten AJ's wife and daughter when they were in the audience and claim that once he destroyed AJ, he would be their new daddy.
* Samoa Joe. At one point, Joe promised to leave Kofi alone until the title match if Kofi would shake his hand. Instead, Kofi flipped him the bird and then knocked him out.
* Samoa Joe because Crimson was on an undefeated streak and Joe never needed help during his undefeated streak.
* Samoa Joe, becoming the first two-time NXT Champion and becoming a top monster heel.
* Samoa Joe called the honor code of the X-division. Unlike most cases, Joe remained in ROH for three years after he started showing up in TNA, so it could be measured side by side for a time until he was pulled out of the former for seven years. By the final year of his TNA run, his "characterization" had marched to the point it came full circle though.
* Samoa Joe, confirming to Silas that he really was the last real man.
* Samoa Joe, D'Angelo Dinero mocked Joe's obesity by showing footage of two pigs mating and claiming that he was showing Joe and his wife. Nobody was amused.
* Samoa Joe. Full Impact Pro had managed to give Joe the whole monster angle to much greater success before hand (but they didn't have a national TV deal)
* Samoa Joe got shoved down the card to make room for their buddies and ex-WWE and WCW wrestlers. Joe is now seen in a much more sympathetic light, especially as his TNA career slowed down to midcard hell.
* Samoa Joe in 2012. Joined NXT in 2015 after leaving TNA, and moved to the main WWE roster in 2017.
* Samoa Joe. On the other hand, Daniels and Corino themselves qualified well for this trope, as they often employed shady code defying strategies to win matches well after their own face turns.
* Samoa Joe says anyway. As far as Zero 1 is concerned, they never held the belts.
* Samoa Joe: Was released by WWE in 2021, but returned soon after as an on-screen official on NXT.
* Samoa shot of the Galu Tribe with the exception of Russell Swan being evacuated and you won't miss anything important - heck you probably won't even change the length of the episode.
* Samoa, there's at least one or two people who hit the beach and start hunting for the idol. Especially since people generally tend to find it buried under a log or rock or hidden in a tree, sometimes in rather obvious places. And expect people casting dummy votes to flush out the idol.
* Sam once remarks that if interstellar travel weren't so expensive he could

become very rich
* Sam once tries to describe one of his past sexual conquests, who works for Robin Colcord as a secretary. The only description Sam can give is "blond and wears boots". Robin deadpans that she sounds like one of his employees.
* Samon the Summoner often wears one over a more professional looking attire.
* Samowar in Atlantis. Things didn't escalate, as Björn didn't hesitate to open his suitcase with a big samovar, a tea cooker, and he knew too well what happened, but he still found their faint of heart puzzling and quite unprofessional.
* Samoyeds aren't extremely large dogs (they're averaged-sized, though their incredibly fluffy coat makes them look larger,) but are known for being extremely friendly, to the point that their trademark happy expression is known as a "Sammie Smile."
* Sampaguita, Good End 2 was chosen as the main storyline, while Good End 3, Normal End 2, Bad End 1, and Bad End 9 became Parallel Stories (and the remaining Endings not used at all).
* Sampled Up in Pitbull and Jennifer Lopez's "On the Floor". It also serves as a cover up of the whole Brazilian dance of lambada, which predates the song, whoever its performer.
* sampling and use of drum machines. Unsurprisingly, the group never had another hit.
* "Sampling" is most commonly associated with 1990s rap and hip-hop, but it traces its lineage back to 1956, when Bill Buchanan and Dickie Goodman recorded "The Flying Saucer," which was less an original work than a clever splicing of numerous pop songs from the era - "Long Tall Sally", "Heartbreak Hotel", "Tutti Frutti" and "Blue Suede Shoes" among them - with a humorous "radio announcement" of an invasion by aliens delivered by Buchanan and Goodman. (Goodman had another radio hit 19 years later with "Mr. Jaws", a similar comedic sampling parodying the first
* Sampoong Department Store disaster days after the collapse (the other two were trapped for 9 and 12 days). Evidence, including testimony from the survivors, also suggested that others had survived the initial catastrophe, but died before rescuers reached them.
* Sam probably gets this from his father, Kevin, who did it all the time in
* S&R trading stamps: "Backed with a special glue that won't give you cancer of the tongue!"
* S&W Model 360J. Officers who operate in other divisions (such as surveillance or in special response units) use semi-automatics. In Hong Kong & Japanese TV shows/movies that involve the police, revolvers are the most likely gun to be used by officers. Although if the protagonists are inspectors in Hong Kong media, they'll be using Glocks instead, and if they're Japanese detectives, they'll have the Minebea P9 (a licensed copy of the 9mm SIG Sauer P220).
* Sam Raimi across the states. The VHS was long out of print by the time it finally received a DVD release in 2013.
* Sam Raimi and he was under a corrupting alien influence at the time.
* Sam Raimi, but the studio wanted someone who was more of a "Hollywood actor". Raimi responded by casting Campbell as Reynaldo the Heel and then expanding the role so that he'd be there for the entire production.
* Sam Raimi guy also directed a bunch of big-budget Spider-Man movies.
* Sam Raimi snapped to the other extreme but added a few tension-breakers.
* Sam Raimi so bad that Sony threatened to sue him for breach of contract. All the unpopular changes made to his character have been described as a result of this.
* Sam Raimi that Sam Raimi, Tobey Maguire, and Kirsten Dunst all walked away from doing a fourth installment despite two sequels having been greenlit. However, both films do have their defenders, who will spend a lot of time arguing which film did it worse.
* Sam Raimi, with the much better received Peter and Gwen Stacy instead.
* Sam refers to it as "Attention Deficit Career Disorder", or something like that, which is an apt name, as with each career change, Sybil gushes about how convinced she is that she's finally found her one true calling.

* Sam Roberts is often this to the other announcers/commentators during the pre-shows on WWE PPVs due to his
* Sam Rockwell. His girlfriend Leslie Bibb ended up being cast as Christine Everhart.
* Sam, Samantha is hiding under desk with Margaret when her boss Seymour sticks his head under the desk. Samantha sits up suddenly and bangs her head on the underside of the desk.
* Sam Sam), the two girls make it very plain that neither is willing to jeopardise the convenient arrangement for sex.
* Samsara", originally auditioned for the role of Jim Green in the same episode but lost out to Dan Tetsell. He was offered the part of Kadri, which was significantly expanded during rewrites, as a consolation.
* Samsara, the pattern that develops from Creation's cosmological foundations, although the setting is vague on how much this is "incontrovertable future" or "unshakable compulsion in the only people who can observe it". It hasn't been wrong yet, but that's at least partly because everyone who can read it is immensely powerful and devoted to bringing about its existence.
* samsara, whenever they view it. For this reason, they try not to use that particular power that much. Also, unlike Fate, samsara has no active power - except that the only beings that can perceive it (the Maidens) are also bound to bring about its predictions.
* Samsas Traum (20 Steps of freedom) in four parts on four of their albums. It tells the story of a bunch of humans which are kept in cages, to pillory the problems of lifestock farming.
* Sam says the exact same line to Frodo at the end of both the book and movie version of "The Fellowship of the Ring": "Of course you are, and I'm coming with you!" In the book, Frodo has just said, "But I am going to Mordor!", but in the movie the line is changed to "I'm going to Mordor
* Sam's (demonic) love interest across two seasons, Ruby, who'd claimed to be on the Winchesters' side as an
* Sam Seaborn – who, despite being in his early 30s, already wears reading glasses – puts them on almost as an 'action mode' sign when he's getting serious about work. Or to subconsciously mock-imitate the President.
* Sam Seaborne: "We jumped out from behind bushes while the British came down the road in their bright red jackets, but never has a war been so courteously declared. It was on parchment with calligraphy and 'Your Highness, we beseech you on this day in Philadelphia to bite me, if you please.'"
* Sam sees these spreading on his face when he's going through withdrawal and hallucinating in "
* Sam's first nickname is Ser Piggy, referencing his weight. He's convinced that his second nickname,
* Sam's hallucination of Lucifer in S7 finds some rather amusing ways to torment Sam, like singing "Stairway to Heaven" 50 times in a row and yelling in his ear with a megaphone.
* Sam's harmonica playing improves dynamically; at the start of the game he sucks, and he improves based on how much you have him practice.
* Sam Shewmaker, a farm boy with virtually no boxing training, managed to make waves in the nascent Bare Knuckle Fighting Championship with a knockout over the more experienced Eric Pringle by virtue of his uncanny power (and maybe a little luck).
* Sam Singer, who's often referred to as "The Ed Wood of Animation", produced what many consider some of the cheapest cartoons ever made from the 50's and 70's through his studio Trans-Artist Productions.
* Sam Smith. As a result, the duo remains quite obscure there despite the song's success, which is more attributed to Smith. The funny thing is, "Latch" isn't even their most well-known song in their native UK (that honor goes to "White Noise").
* Sam Smith. Despite not charting on the Hot 100, it's probably better known than "Omen" due to it being their only success on alternative radio and for being another song featuring an artist much better known than them in the States.

* Sam Smith, English R&B singer/songwriter who is gay and genderqueer.
* Sam Smith, the singer is a wigless mannequin head staring out of a window display. After a while, the singer is the only mannequin head left. A man walks by who smashes in the window and takes the singer with him.
* Samson and Delilah: Samson clearly knew his wife was trying to kill him, because every time she asked for the source of his super strength and he fed her a lie, armed soldiers would show up to test the lie.
* Samson and Delilah: Samson pulls the Temple of Dagon down upon him and the entire Philistine nobility.
* Samson and Delilah starred as Samson. In the 1984 remake, Victor Mature played Samson's father, Manoah.
* Samson and Sally has Moby Dick living in or near a submerged NYC, called 'the city that man built'.
* Samson and Sally states, "Mankind is not vicious, mankind is stupid!"
* Samson and Sally states that "Mankind is not vicious, mankind is stupid!"
* Samson and Sally, there's a scene that was cut from the English dub where the seagull who's distracting the whaling captain so the titular whales can escape does this. The gull ties up the captain then poops on his head.
* Samson, blinded and shaven of his magic hair, brings down a temple on the heads of his enemies.
* Samson, consists mainly of a Cycle of Revenge: at one point, within a few verses, a Philistine commander claims "We just want to do to him what he did to us" and Samson claims "I just want to do to them what they did to me."
* Samson En Gert: All the other cast members will lie, cheat and fight with each other, but Samson always remains the voice of reason and feels himself to be above all this quarreling and dishonesty.
* Samson En Gert also serves as this for the company after it's premiere in 1997.
* Samson En Gert had a front door on stage right and a door to a kitchen on stage left, with a door to a rarely used basement in the centre. Sometimes forays were made outside to the local town hall, a grocery store, or a barber shop.
* Samson En Gert has produced a yearly Live On Stage show since 1991. Adults that saw the earlier shows as kids are taking their kids now. It helps that it involves all the actual actors from the series itself.
* Samson En Gert: In Belgium and the Netherlands most people will not think of the biblical character when hearing the name "Samson", but of a talking bobtail dog.
* Samson En Gert: Octaaf is constantly belittled and domineered by his mother. She claims everything he does right is from her side of the family, while everything he does wrong is from his father's side of the family.
* Samson En Gert. To the point that the merchandise actually overshadows the original TV show.
* Samson En Gert was adapted as a successful children's comic book series by Wim Swerts and Jean-Pol.
* Samson et Dalila alongside Plácido Domingo, she has now become an internationally acclaimed mezzo-soprano well-known for her roles in Russian operas, and has performed with many famous opera companies like the Met Opera, the Royal Opera House, and the San Francisco Opera. In addition, she has been awarded the State Prize of the Russian Federation and has received recognition as a People's Artist of Russia.
* Samson et Dalila ends the same way as the Biblical legend, with Samson bringing down the temple on himself and the entire Philistine cast.
* Samson et Dalila. She seduces Samson with her aria "Mon cœur s'ouvre à ta voix" (My heart opens to your voice), demands he tell her the secret of his strength as a proof of his love, pretends to cry when Samson refuses, to which he ultimately tells her and is forced to sacrifice his life in order to redeem himself.
* Samson gives Delilah false information whenever she asks about his weakness. In a subversion of this trope, Samson doesn't seem to cotton on to her plot even when the Philistines try to kill him by exploiting the exact same false weakness he just told Delilah. Eventually, he tells Delilah his

* Samson is consistently depicted as violent, ill-tempered and prone to fall into his own carnal whims. He marries a Philistine woman (the nation he's supposed to be saving Israel
* Samsonite demonstrates the durability of its luggage by literally locking it into a cage with an alpha male gorilla and filming the results.
* Samson Oak in the Alola arc loves his Pokemon-related puns (many of which will likely be
* Samson vs. the Vampire Women features a mook trying to disguise himself as a wrestler that the titular hero is about to fight — only the mook has a substantially different body shape from that of the wrestler. This fact is painfully obvious since the wrestler — and the mook who takes over for him — wears nothing but tights and a mask.
* Samson vs. the Vampire Women in the episode "Soultaker," claiming Second Banana Heaven was "too political").
* Samson was also a subversion, which indicates the trope is older than that. He consistently fed Delilah information she consistently used to get his enemies deployed where he could deal with them. Until he got arrogant enough to reveal
* Samson who was supposed to be a Nazirite for life, although he screwed it up in the end. It's also hinted at that Paul himself had done this for a while (the book of Acts mentions that he had his hair cut due to a vow).
* Sam's original design couldn't find coveralls in her size, so the ones she had were open to her belly-button and on the verge of falling off.
* Sam Spayed: Babes and Bullets assumes his client killed her husband and is planning to double-cross him, he's just not sure why and how. (She didn't.)
* Sam's pulls himself together after being blasted about by Kreeg's shotgun in
* Sam's species has a long history of this; their mythology is full of mortals stealing
* Sam's Strip in a closet, and would occasionally rent out the strip's panels. Characters from other strips, many of them old and obscure, would frequently pop up.
* Sam Starfall has aspirations of being a renowned master thief but isn't always the brightest bulb in the box. Admittedly, some of his incompetence may be attributed to culture clash
* Sam started dating a guy and repeatedly blew Carly and Freddie off as a result.
* Sam starts the book under the belief that the Assassin's Guild, the closest thing he has to a family, are all abandoning their trade because it's a much less stable business as evil is being wiped out of the world. After finding out exactly what
* Sam Steele (a Mountie circa 1894) recounts several instances where he ended up in quicksand. Part of his survival training involved being taught to swim out. He also recounts two instances where a horse sank in a bog. The second time,
* Sam's triggered a mine collapse accidentally which killed his father and a number of other miners.
* Sam succeeds in killing Lilith, only for it to turn out that doing this broke the final seal, resulting in Lucifer being released anyway
* Sam suffering from demon blood withdrawal while locked in the panic room.
* Samsung did the same thing in its commercial for the Galaxy Gear smart watch: a montage of TV characters using video- and communicator-watches.
* Samsung has launched a similar ad campaign for their Android mobile devices, portraying Apple users like morons. And they actually
* Samsung's Galaxy S series and Galaxy Note series flagship smartphones sold in select regions such as the United States, China and Japan use Qualcomm's Snapdragon system on a chip while those sold in the rest of the world use Samsung's homegrown Exynos SoC. Samsung has been stagnating with its Exynos SoCs that (probably because of constant legal battles with Qualcomm) now perform much worse than their Snapdragon counterparts according to synthetic benchmarks like AnTuTu. Things came to a head in 2020 when the Exynos 990 suffered numerous issues such as overheating, throttling and battery drain,
* Samsung used the song "Signal in the Sky" by indie rockers The Apples in Stereo

in a 2008 ad for one of their phones. This makes the ad painfully hard to take seriously if you know the song, as it was inspired by
* Sam's vision of the star over the Ephel Dúath shows up in the extended edition of the movies, but is given slightly different significance. In the book, the vision is a private experience of Sam's that gives him strength to continue the journey. In the movie, Sam points out the star in order to encourage
* Sam the Cat: Detective a local woman shot her rich husband and got away with claiming she’d mistaken him for a burglar because her sister was married to the sheriff.
* Sam the Cat: Detective Harold Rigsby hired an arsonist to burn down his office and destroy the records proving he was a tax cheat.
* Sam the Cat: Detective has a New Jersey driver's license, he says the words "new" and "jersey" are the most disheartening words in the English language.
* Sam the Cat: Detective: Sam develops a careful plan with the other cats to catch Quark (who will attack him in person, calling the police and screeching into the phone like a hurt child and then physically subduing the burglar) which isn’t mentioned beforehand and works out perfectly.
* Sam the Cat: Detective: Street cat Oscar watches the machines from the laundromat window as entertainment. He considers it to be as good as television and especially likes the Soaps. Later on he walks about a tv show he saw where the police just chased a guy in circles until they all fell down and is reminded that was the rinse cycle.
* Sam the Cat: Detective: The series ends with San receiving a job offer to find a stolen necklace.
* Sam the Eagle filled this role. At one time he delivered a speech about the immorality of animals who, under their fur, feathers, scales, etc., were walking around
* Sam the Eagle is a frequent practitioner of the facewingtip, but he will often simply utter his signature phrase, "You are all weirdos."
* Sam the Slayer until it's pointed out to him that it's actually true.
* Sam, the very guy who stopped him on the way and dueled him to the death.
* Sam thinks he's a Casanova and ends up being a Chivalrous Pervert in spite of himself.
* Sam tries to court Sookie, but she turns down his advances because of her sexual orientation. Trying to gain a chance with her, he dresses up as a girl and attempts to poison her girlfriend.
* Sam tries to marry another rich widow (played by Granny) in "Hare Trimmer", but
* Sam Tyler and Annie Cartwright have at least one of these in just about every other episode of
* Samuel Barber is moderately well-known in the classical community for his violin concerto and Symphony No.1, he is mostly remembered for the Adagio for Strings, which started life as the slow movement of his String Quartet in B minor. To put into perspective how much the Adagio has overshadowed its parent work, there are over 250 recordings of various settings of the Adagio (mostly the string orchestra version, but the choral setting, using as its text the "Agnus Dei" from the Catholic Mass, is also frequently performed and recorded), and just over a dozen of the complete string quartet.
* Samuel Bayer but the band recut it against his wishes after being displeased with his cut, so the video ended up being credited to someone named "Freckles Flynn".
* Samuel Beckett, he wrote his works first in French and then translated them into English.
* Samuel Beckett: In the second half of the 20th century Beckett is considered to be the most daring and experimental playwright and therefore hugely influential on modern plays.
* Samuel Beckett was notorious not just for refusing to allow his works to be adapted to different media, but for demanding that all theatrical productions adhere with complete rigidity to the original detailed stage directions.
* Samuel Clemens...who'd been dead for decades? He was definitely a psychologically-troubled member of the science profession, even if he hadn't been a

Mad Scientist.
* Samuel Colt's five-shot Paterson revolver, first patented February 25, 1836 and manufactured in Paterson, New Jersey, was the first commercial repeating firearm employing a revolving cylinder with multiple chambers aligned with a single, stationary barrel. Revolver-type firearms had been made since the Renaissance, but they had been expensively-made one-off items, and lacked convenient features of the Colt such as a cylinder that automatically rotated the next chamber into place with each cock of the hammer. Although the Paterson revolvers sold poorly because people saw them as unreliable novelties, John Hays acquired a pair of them for each of his Texas Rangers, who used them to fight off a band of Commanche Indians in the Battle of Bandera Pass.
* Samuel Fuller enjoyed playing with this trope in ways which infuriated the American government. Fuller, being a US First Infantry war veteran, and enjoying the support of Darryl F. Zanuck, more or less was untouchable allowing him to get away with stuff that other film-makers couldn't:
* Samuel Fuller was an actual US First Infantry Veteran and he became a major film-maker but his insistence on telling difficult truths meant that despite being a soldier his films averted this trope:
* Samuel Haight; Storytellers are explicitly told to ensure that he gets away with whatever he does. Ultimately, however, even White Wolf got sick of him, and he ended up dead and turned into an ashtray in the Shadowlands.
* Samuel into evolved humans, this would have increased his power exponentially.
* Samuel Johnson (1709 - 1784): English. First compiler of an English Dictionary.
* Samuel L. Jackson always wanted to be in a James Bond movie and took his role in the
* Samuel L. Jackson) and future Vice President and successor as President.
* Samuel L. Jackson, and part of the contract letting them use his likeness stipulated that he play Fury in any live-action film using the character.
* Samuel L. Jackson fan before getting the part. He's even on record saying he would've played a generic Stormtrooper if it meant being part of the franchise at all.
* Samuel L. Jackson for those films. He likely only has about one hour of screentime spread out throughout the first two phases of the franchise.
* Samuel L. Jackson, he had a sketch he called an "Acting Decathlon", where this very trope is an event.
* Samuel L. Jackson implies that Sidious let himself lose, and the film leaves it ambiguous.
* Samuel L. Jackson imprint, the original Nick Fury retires and an African-American son was created (Nick Fury Jr.) to take his place.
* Samuel L Jackson is infamous for playing badasses in movies, so at the end of the movie
* Samuel L. Jackson is notably a modern pop cultural icon, although this may have less to do with race and more to do with sheer muthafuckin' charisma and the massive number of films he's in.
* Samuel L. Jackson requested the color so he could pick himself out in the big fight scenes.
* Samuel L. Jackson rubbed off on his daughter from a very young age, and she would thoroughly shock other parents by dropping f-bombs at parties.
* Samuel L. Jackson's character wears the rank of specialist (E-4) and has higher-ranking people addressing him as "sir."
* Samuel L. Jackson, the room isn't haunted by any ghost — it's just "an evil fucking room".
* Samuel L. Jackson trading in small crimes to prevent larger ones, but the events of the game don't bear it out.
* Samuel L. Jackson wanting to appear in the new SW films and saying that Windu may not have died...
* Samuel L. Jackson was considered for Marcellus Wallace, Lance, Captain Koons and Winston Wolf before being cast as Jules Winnifield.
* Samuel L. Jackson wears a black leather trench coat that's every bit as badass as

he is.
* Samuel L. Jackson. When he is falsely accused of his best friend's murder, Jackson holds a government office hostage in order to clear his name and learn the truth.
* Samuel Morse is famous for developing Morse Code and advocating for widespread adoption of the electric telegraph, but before all that, he was also an accomplished painter, with his masterpiece being
* Samuel Morse, the inventor of the telegraph and the Morse code, wanted to be a famous painter more than anything. He expected his epic 1822 painting, "The House of Representatives," which depicted every sitting member of Congress sitting in a meticulously-researched rendition of the chamber, to be considered one of the greatest works of American art and earn him great fame and attention, but it got scant praise and is little remembered today. Morse came up with the telegraph idea on something of a whim, mostly as a way to make money.
* Samuel-Motherfucking -Jackson, when he was no older than thirteen years old.
* Samuel Pepys: English civil servant famous for his diary of the years 1660 to 1669.
* Samuel R. Delany, American Science Fiction author, one of the first openly gay SF writers, one of the first really successful African-American SF writers, and almost certainly the first to be both.
* Samuel R. Delany, as Wong progresses in her study of the language called Babel-17, she starts to find herself occasionally getting stuck in that mode at unexpected times, unable to revert her thinking back to a language her crew might understand. Thinking in Babel-17 helps her think strategically, but the mode appears to be somewhat addictive. And being a strategic genius isn't much good if you can't communicate your strategies to the people who need to implement them.
* Samuel R. Delany, but unlike most uses of this trope, the cause and nature of the disaster are not pursued and don't seem even to be known to the remaining inhabitants. The topic does not seem much to interest them.
* Samuel R. Delany, only people with a specific set of psychological issues can handle going outside the galaxy, even though interstellar travel is ridiculously convenient.
* Samuel R. Delany, published in 1968, featured a technology in which people had neural wrist- and neck-plugs installed so that they could control a wide variety of gadgets, from vacuum cleaners to starships. This style of interface was so pervasive that individuals who did not want to receive the implants were effectively unable to use any remotely sophisticated equipment.
* Samuel R. Delany, published in 1968, features a technology in which people have neural wrist- and neck-plugs installed so that they can control a wide variety of gadgets, from vacuum cleaners to starships. This style of interface is so pervasive that individuals who do not want to receive the implants are effectively unable to use any remotely sophisticated equipment.
* Samuel R. Delany, the enlightened human narrator is shocked at the idea of eating meat from what had been a living animal... being much more comfortable eating vat-grown human flesh.
* Samuel Sullivan from season four qualifies. Let's see, he runs a carnival and plays into the creepy, perverted carny stereotype quite well. He has sexual tension with everyone and is constantly being all touchy-feely with his main hench-people, Lydia and Edgar. Oh, and he does the same thing to Sylar, Hiro, and really almost anyone who visits his carnival. Not to mention, he has Lydia use her empathy power so that he can stalk other specials and recruit them to his carnival. Samuel's memetic molester behavior is parodied in this (safe for work) fanart:
* Samuel Taylor Coleridge. Also, it wasn't so much a dream as an opium hallucination.
* Samuel Taylor Coleridge, because he was the one who brought bad luck on his ship by shooting the albatross.
* Samuel Taylor Coleridge once enlisted to be a part of the 15th (The King's) Regiment of (Light) Dragoons under the name "Silas Tomkyn Comberbache".
* Samuel Vimes' ancestor Suffer-Not-Injustice "Stoneface" Vimes was the only man

to step up and execute the last king of Ankh-Morpork Lorenzo the Kind (who is heavily implied to have tortured and raped children to death).
* Samuel Vimes stumbled his way into this and has managed to constantly stumble his way into more wealth, titles, and fame since
* Samuel Vimes was originally intended to be a minor character in the City Watch sub-series, with Carrot being the major character. Suffice it to say, Samuel Vimes is likely only beaten by Death and the Librarian for the number of books he's in.
* Samuel Whittlemore, the oldest man known to have participated in the American Revolutionary War. At the ripe old age of 78 he single-handedly ambushed a British brigade, shot and killed three redcoats, was shot in the face, bayoneted 13 times and
* Samuel W. Taylor's short story "A Situation of Gravity" was the inspiration for
* Samui is stoic, calculating and very serious at all times. On the other hand, her brother Atsui is
* Samukai, the king of the Underworld, who apparently wasn't too thrilled about having Lord Garmadon take the throne from him after being defeated by Sensei Wu. After the ninja bring the Golden Weapons of Spinjitzu to the Underworld, Samukai tries to use him being
* Sam unfortunately ends up being this. First, Quinn cheats on him and ends up choosing Finn. Then, he briefly dates Santana until she dumps him for the bully Karofsky,
* Samurai 3 Duel At Ganryu Island as a result of their climactic duel.
* Samurai 7 had a drop-down gun in his arm that fires big needles from a revolver-like chamber. It was fired by flexing the wrist.
* Samurai 7 has a large upside down Y-shaped scar on his left cheek, but it's never explained how he got it.
* Samurai 7 has a ruler enthroned in a machine that prolongs his life.
* Samurai 7; he is looked down upon for it, as are the former samurai cyborg bandits, who have given up their bodies and, according to Kambei, their honor as well. He insults them, doubting they were ever samurai.
* Samurai 7. He is very, very good, and enjoys fighting (which seems to be all he knows), but he's too much the strong silent type to brag about it.
* Samurai 7 never really comes up, but Kambei manages to defeat him (or at least hold him off) using his scabbard as an extra parrying weapon.
* Samurai 7 obsessed with Kirara after she refused to become part of his harem.
* Samurai 7. Quite possibly the reason Kirara surprisingly fell for him. Alas, his hardass nature solidifies when he coldly rejects her feelings before she can even get them out.
* Samurai 7 says that Kambei was originally intended to be deliberately distinctly African-looking in appearance but ended up being Southeast/Southwest Asian/Latin American. His original design was then used for Gorobei.
* Samurai 7, some people ride around on giant turtle-like creatures. With shells.
* Samurai 7 the graves of the samurai who died defending the village are marked with their katana.
* Samurai 7. Think peasants farming rice by hand being raided by massive cyborgs aloft with anti-grav.
* Samurai 7, Ukyo tells Kanbei, right before his planned execution, that he's planning to destroy Kanna Village and take over the world.
* Samurai 7. Unofficially is the most skilled of the samurai, possibly exceeding the group's experienced leader, and definitely the most deadly. Sports blonde hair and a distinctive crimson-red coat.
* Samurai 7, which is along the same lines as the above, except it doesn't transform.
* Samurai 7, who hates the fact that as a leader, he alone manages to survive battles due to his sheer badass nature even as the rest of his men usually die.
* Samurai 8: The Tale of Hachimaru is filled with sci-fi and Japanese folklore-like elements. It has cyborgs, virtual reality game systems, and robotic animals all powered but souls and magic.
* Samurai - a 1979 TV Movie about a young San Francisco attorney who becomes a

samurai warrior and fights crime at night.
* Samurai. Ask any Japan fan what's his opinion over them and you will hear the worst about them.
* Samurai Cat Goes To Hell, demons traverse the River of Blood by riding a giant turtle, which they steer by dangling a large dead sturgeon in front of it. The dim-witted turtle keeps reciting "Fish... fish... favorite fish..." as it plods along, reaching and snapping in vain at the bait.
* Samurai Cat Goes To Hell has a three-page war of puns that keeps going until a listener threatens the punsters with an axe.
* Samurai Cat, so much so that the feline characters constantly deride the author for being such a spineless, unimaginative hack. Occasionally, this incurs direct in-story retaliation in the form of bad luck and/or nasty enemies' sudden and inexplicable appearance.
* Samurai Champloo and adventure, along with bizarre anachronisms like graffiti artists, breakdancing, rap, and baseball.
* Samurai Champloo and her partner who work to bring down a prostitution/crime ring.
* Samurai Champloo and is one of the main reasons it was made in the first place.
* Samurai Champloo, and it's traditional to draw Okinawans darker, and there has for decades been contention about whether they are to be recognized as a racial minority or not, and in the time the show is set, the king of Ryukyu was still paying tribute to the emperors of Japan and China as a subject state.
* Samurai Champloo and then goes on to reveal they fight their way free instead.
* Samurai Champloo, a pair of twins have been writing graffiti on every surface they can get their brushes on. When their former teacher sees this, he complains that it's awful... because their penmanship is terrible.
* Samurai Champloo as it is him simply plugging samurai who only have swords.
* Samurai Champloo. At the end of "Gamblers and Gallantry", three swordsman throw their straw hats into the air before attacking Jin, who slays them all before the hats hit the ground.
* Samurai Champloo. A two volume manga was published that was a series of mostly original side stories (the only adapted story was a shortened version of the first episode).
* Samurai Champloo called "Baseball Blues", a baseball team from America challenges Mugen and his friends to a baseball game, and a nasty fat player flips them off.
* Samurai Champloo comments explicitly on the homosexual practices of samurai noted above.
* Samurai Champloo eats a great deal of food, she temporarily swells to a massive size. In at least one episode, this renders her unrecognizable to a set of police officers when she slims back down afterward. ("Have you seen a girl around here? She was really fat.")
* Samurai Champloo episode ("Baseball Blues") also had a baseball game between purported Americans (including Abner Doubleday) and a local team that includes Mugen, Jin, and Fuu. Guess who wins. Well, okay, technically nobody, but whatever.
* Samurai Champloo episode "Baseball Blues", the interpreter Doubleday talks like this. Like everything else in the episode, it's played for comedy.
* Samurai Champloo episode, 'War of the Worlds' has one rough-tough teacher insult and aggravate Mugen into learning how to read. In a semi-quiz, Mugen gets a character wrong, and gets slapped and yelled at - as a result of which, Mugen flips the table sitting between him and his teacher, shouting, "This sucks!!"
* Samurai Champloo featured Shouryuu, a Japanese kendo student-cum-Shaolin martial arts master who killed reputable samurai in order to prove his superiority. He takes every fight seriously; After his return to Japan, he killed another student during a sparring match.
* Samurai Champloo has a person who steals to get money to pay for medicine for his ailing mother.
* Samurai Champloo has a recap episode framed via Mugen (surreptitiously) reading Fuu's diary entries.
* Samurai Champloo has Fuu using two fireworks to blind and confuse the guards at

the execution grounds, allowing Mugen and Jin to escape.
* Samurai Champloo has the bumbling Manzou the Saw who narrates a couple of episodes of the series.
* Samurai Champloo (he foisted them off on Jin to get the one he wanted).
* Samurai Champloo: In “Baseball Blues”, the trio stop at a restaurant to eat with Mugen getting extra food that'll balloon their bill. Fu questions how they'll afford it but he says he has it covered. Once the three eat and the time comes to pay. Mugen reveals his plan, which is just run like heck and stiff the bill. Unfortunately he doesn't tell Fu or Jin this and he ends up stopped by a patron lobbing a baseball at him. They only avoid punishment when said patron offers to pay for their food if they help play in a baseball game he's organizing.
* Samurai Champloo: In "Elegy of Entrapment, Verse 2", when Fuu and Jin sense that Sara is being manipulated, Mugen responds with "Take your pick. We've dined and dashed, snuck through a checkpoint, and, oh yeah, killed people."
* Samurai Champloo: In the first episode, Mugen passes out while fighting Jin in a burning building. He wakes up to a bucket of water, and learns he's going to be tortured and executed for killing the Governor's son.
* Samurai Champloo: In the first part 'Hellhounds for Hire' Jin is disguised as a woman carrying a biwa (a traditional Japanese instrument similar to a guitar). When asked to play a song on it, he pulls his katana from the neck and reveals that he is actually a samurai. He also happened to have smoke bombs hidden in the body of the instrument.
* Samurai Champloo. In the second episode, Mugen is confronted by the man whose arm he cut off in the first episode, who freaks out when Mugen says he doesn't remember him. This appears to have happened just a week or so earlier and it's hard to imagine that week being so jam-packed with excitement that Mugen would lose track of all the guys he maimed. Second is in the three part finale, where the three brothers crippled by Mugen during the raid on the sugar ship converge on him; leader Umanosuke loses his mind even more than Ryujiro did when he hears Mugen has no idea what he's talking about. Again, it's hardly unreasonable to expect him to remember this since the sugar ship raid is one of the major formative experiences of his recent life. But then again, Mugen's a self-centered blockhead.
* Samurai Champloo is a Japanese dish made from a mix of regional foods, just like how the anime mixes Edo-period and modern elements together. Interestingly, both the dish and the main character of the anime are from Okinawa.
* Samurai Champloo is approached by a Yakuza leader after outclassing every thug in town. The Yakuza boss gives him a job offer, promising Mugen anything he wants if it means he will sign up. Mugen's request? Cooked crabs.
* Samurai Champloo is the target of Inuyama, an assassin who is an excellent swordsman. At first Jin has the advantage, until the assassin begins taking advantage of the environment, causing Jin to start making mistakes due to his lack of experience with fighting in the middle of a wild forest.
* Samurai Champloo: Jin and Mugen both have characteristics of ronin, though only Jin is actually a ronin. Having grown up in a penal colony Mugen was not born into the samurai class. (Nor did he earn his way with his skill as he used those skills for stealing from the shogunate).
* Samurai Champloo Jin and Mugen have left Fuu to fend for herself, she wanders through an alley where two men are watching her, they stick out a vase to make her bump into and break, she apologizes and they tell her to pay up and she tells them she doesn't have any money, they then proceed to kidnap her and stuff her into a sack.
* Samurai Champloo; Jin's actually very close in skill with him, but outclassed in sheer power and Ki-Attacks.
* Samurai Champloo may have been the result of the accidental ingestion of psychedelic mushrooms, or he and his men may have actually been undead. There isn't really anything that confirms or debunks either theory, and no mention of the incident was made after that.
* Samurai Champloo, Mugen and Jin are captured by a corrupt magistrate who has them tortured with various methods over a period of several hours for their (at best

very indirect) responsibility for his equally nasty son's death.
* Samurai Champloo, Mugen and Jin spend the entire series threatening to kill each other, only to develop a mutual respect and part ways at the end.
* Samurai Champloo: Mugen manages to survive things that would be fatal to anyone else in the series, such as being shot and then blown up after being in two fights which left him tired and seriously injured.
* Samurai Champloo navy team after the Japanese organizer sees how fast he can run from the restaurant he failed to pay at, in addition to the fact that he can throw a baseball hard enough to knock down a wooden tower about a mile away.
* Samurai Champloo personality makes the triangle a particluarly tricky one to classify. Not that the other two are too easy to read either.
* Samurai Champloo searching for a purpose until Fuu makes him her bodyguard.
* Samurai Champloo's Fuu gets this whenever she gorges herself in at least the Japanese and English versions of the show (not so much in the German version).
* Samurai Champloo Since the events of the episode are never mentioned again, it's hard to tell whether the whole thing was even canon. Given that the episode started with the characters eating mushrooms they found in the woods, you could write the whole thing off as a hallucination.
* Samurai Champloo's style in the beginning and in the end, but not in the middle when she works in the brothel. Why? You guess...
* Samurai Champloo subverts this in the episode "Beatbox Bandits", where Fuu and Jin are ordered to be executed unless Mugen delivers a parcel and comes back in time. In the end, just as Fuu gives up hope of Mugen appearing, his silhouette appears on the horizon... which turns out to be the annoying recurring comedy relief character (Fuu and Jin survive in the end though).
* Samurai Champloo tends to be either Mugen/Jin facing a large number of mooks with swords, fighting a proficient master or each other, or fighting someone with an unusual-but-still-edged weapon.
* Samurai Champloo). The fact that the "shamisen" he was playing was actually his sheathed katana disguised as an instrument didn't help matters at all.
* Samurai Champloo. Then Mugen starts to get bored of breaking individual fingers and decides to "break 'em all!"
* Samurai Champloo. The two may be forced to work together by Fuu, but are nonetheless rivals who have sworn to have a duel to the death when their journey is over.
* Samurai Champloo they meet in one episode. Granted he IS surprised to find out the kabuki actor he had a crush on is a man, but it's a pleasant surprise.
* Samurai Champloo: This is Bundai's preferred method of discipline to Mugen when the former's teaching the latter how to read.
* Samurai Champloo to recover from, especially considering that they had been going all out and not really resting for months previous to this. At the end, it's mentioned that Jin and Mugen have been out for about a week, and they get up and go about their business.
* Samurai Champloo. Ultimately, they're knocked out by the smoke and pulled from the ruins by less-than-helpful rescuers.
* Samurai Champloo used this constantly, both in the usual sense and for sudden scene transitions. In the dub, it was used to censor certain profanities.
* Samurai Champloo uses this with an overblown samurai who claims he's going to make it big one day. In a duel, he rushes up, draws his sword — and gazes skyward when it flies out of his hand and into the air. It looks like it's all over for the blowhard, until the sword falls from the sky and lands on his opponent's head, knocking him out. His response? "That was...my Flying Dragon technique!"
* Samurai Champloo utterly subverts this, being able to have attractive and unattractive characters from one end of the spectrum to the other and in between without any stylistic major shifts.
* Samurai Champloo vagabond who is open about not caring about anyone but himself and liking violence for its own sake. However, those same qualities make him unwilling to join with villains, scorning their self-importance and the idea of him following anyone. Moreover, despite his frequent complaints about her, he will

always come to the rescue of Fuu when she is danger.
* Samurai Champloo volume 2 an 18A rating when first released; however, the episodes on that volume were downgraded to a 14A for the complete collection.
* Samurai Champloo when he starts flirting with a male actor who played a female role in a kabuki play. Isaac then reveals that yes, he knew that was a man (or rather, he doesn't mind the reveal as he likes men more anyway).
* Samurai Champloo, with a fake priest (and fake European) who command Christians to produce more guns to avoid hell and reach paradise, so he can sell them. Of course he also kidnaps and threatens to kill (forcing her to marry him) at least one woman.
* Samurai Champloo. Yukimaru's sword marking his cairn, Sara's kamiyari planted in hers.
* Samurai Champloo: Yukimaru uses a hood that actually covers his entire face (except for his eyes) to hide his identity from the protagonists.
* Samurai character he was based on was a ninja rather than a samurai.
* Samurai Cop, the villian Fujiyama is accused of being a 'death merchant' who deposits his vast riches into a Swiss account
* Samurai Cowboy and produces a capable fighter who wields both pistols and katanas.
* Samurai Cowgirl (taking her samurai master's teachings quite seriously) and carries a revolver on her hip (but never actually uses it).
* Samurai Deeper Kyo are so violent and ferocious that they are constantly chained up into an underground cell when not needed. In fact, as soon as the chains are removed they promptly devour their own jailers. They only fully remove their apparel and chains when engaged in combat with their enemies.
* Samurai Deeper Kyo early by demanding that every remaining contestant (aside from his allies) fight him at once so he can get the tournament over with, ending in him killing them all in seconds.
* Samurai Deeper Kyo has Benitora kill Genma with his spear in this fashion, Genma doesn't realize he's been stabbed until a few moments later.
* Samurai Deeper Kyo has Yukimura, a handsome bishonen who is sufficiently androgynous that he can easily pass for a woman in the right clothes, and has a FEMALE ninja as his body double. Not a macho-looking female ninja either.
* Samurai Deeper Kyo: Hotaru (courtesy of Yuan) and Kyo (courtesy of Shihodo and Akari), among others during intense fights. It also happens for comedic effect on a semi-regular basis.
* Samurai Deeper Kyo, hunting down "the man with the scar on his back" who killed her brother. She periodically threatens to turn in Benitora or Kyo for their bounties.
* Samurai Deeper Kyo is practically a showcase for every kind of implausible fencing power in existence and then some. As the series progresses, it gets to the point where one of Kyo's regular sword swings has enough power to produce explosions that outmatch most modern-day artillery.
* Samurai Deeper Kyo is shown to get the trembles and be very aroused when thinking about Demon Eyes Kyo. She is even seen watching Kyo fight Jimon, saying outright that if Kyo doesn't revert back, she'll kill him and make a brochette out of him.
* Samurai Deeper Kyo, Kyo beheaded Nobunaga in their fight in the forest.
* Samurai Deeper Kyo, Kyo is approached by a man who had survived an encounter with him in the past. After being stunned by Kyo's swordsmanship, he trains constantly to match Kyo's level by cutting up anyone he comes across. When he meets Kyo in the plot, he proclaims that he has returned for revenge and Kyo responds with, "Who are you?"
* Samurai Deeper Kyo, Kyo scares lots of people with his bloodlust in battle, but he is later repossessed by Kyoshiro, who scares people even more as he calmly slaughters elite mooks without showing any intensity in his expression.
* Samurai Deeper Kyo mere minutes after they've been messing with the heroes who spend over half of the series just trying to get to the same place.
* Samurai Deeper Kyo, Taihaku of the Goyosei is the only member of the quintet who's not Mibu or related by blood to the Mibu clan, but rather a normal human

being who received an extremely long lifespan from the Crimson King.
* Samurai Deeper Kyo to complete the facade of a harmless medicine peddler.
* Samurai Deeper Kyo wears shades most of the time except his final battle against the entire Sanada clan, revealing his "True Red Eyes". At one point his shades was damaged by Mahiro during his battle with Kyo, only to be replaced by a spare shade.
* Samurai Executioner, but is completely unaware of what she does when in her trances. As Asaemon is against killing people who don't know why they're being killed, he arranges for fireworks to go off during the execution, causing the woman's other personality to take over, letting Asaemon execute the guilty personality with the innocent one (instead of just the innocent).
* Samurai Executioner is a public executioner, and the story in part consists of his victims' backstories and then shows him executing them.
* Samurai Executioner: The main character Asaemon Yamada is the local executioner. He takes his duty very seriously, and has immense compassion for those he kills, doing his best to make them repent for their crimes or trying to understand what drove them to commit the crime that got them executed.
* Samurai Executioner, the shogun's blade-tester and executioner Asaemon Yamada. He tries to understand what makes each prisoner commit his crime as he believes they should be repentant when dying, and usually allows last requests. Although the executions aren't public, taking place inside the prison, he's still feared throughout the town for his job. He also gets a lot of stupid people who think that he only kills people who're tied up and dead bodies, making him a pushover in a real fight... and are proven dead wrong.
* Samurai Flamenco, a drug dealer takes some kind of pill before getting arrested and turns into a giant gorilla with a guillotine in his mid-section. He then uses it to decapitate at least one of the cops and nearly kills Samurai Flamenco the same way before being saved by his cop friend Goto.
* Samurai Flamenco aliens have taken control of governments all over the globe, and Japan was the last stand until the Prime Minister was defeated.
* Samurai Flamenco -> "SamuMenco" Used in universe when Mari talks to Masayoshi when both are in hero getup.
* Samurai Flamenco. In some of her early fights, she does get hit from time to time, but nothing too drastic that would make her look bad.
* Samurai Flamenco out of the hole before the studio's shutdown in 2015.
* Samurai Flamenco revealed that Goto's girlfriend is actually missing and Goto had been texting himself since her disappearance. Because the case remained unsolved and no follow-up was made about her situation, it's never confirmed if she's dead or not.
* Samurai Flamenco, superhero wannabe Masayoshi fights such crimes as littering, jaywalking or violation of the municipal code. It's partly because he can't take on anything more dangerous, partly because those crimes are often ignored by the police.
* Samurai Flamenco, the fantastic elements quickly take over the setting.
* Samurai Flamenco. The show made a name for itself mainly because the first several episodes are one giant fake-out.
* Samurai Flamenco to Maya for not being sincere in returning the favor.
* Samurai Girl miniseries was supposed to lead into a TV series that never materialized.
* Samurai Gourmet action, but not always all the way, since real life is real life.
* Samurai Gourmet indulgence, as they always inspire increased assertiveness in Kasumi—not that he follows through every time.
* Samurai Gourmet of the protagonist Kasumi, and his appearances may or may not inspire Kasumi to act more assertively.
* Samurai Gun as it's the good guys wear face-concealing helmets, as they're rebels against the Shogunate.
* Samurai Gun have these. Losing an eye is apparently an occupational hazard.
* Samurai Gunn - one of the one-on-one "Showdown" stages that appears when playing on a "Garden" level is set against a setting sun.
* Samurai Gun Uzi, but he has the same bullet-dodging training as a Samurai Gun and

once proves accurate enough to shoot his opponent's bullet out of the air.
* Samurai Harem: Asu no Yoichi: All of the girls who like Yoichi are in the same level, probably because he is so dense, he doesn't even realize any girls like him. In the manga, only one of the girls even realizes that she likes the guy at first, the second is given less screentime after her inital appearance and a few chapters and the others are unsure or unwilling to pursue him and fall into the story quite a bit later. A secondary one-sided relationship is also brought in.
* Samurai Harem: Asu no Yoichi: Ayame, who has always lived in the shadow of her older sister Ibuki and feels like her efforts are never appreciated, so when main character Yoichi compliments her cooking, even after her admittance that she had had help from younger sister Kagome, the smile she gives is such that both Yoichi and her three sisters are stunned silent.
* Samurai Harem: Asu no Yoichi has a variant of this (Ayame likes Youichi who is kind of a pervert but seems to prefer Ibuki)
* Samurai Harem: Asu no Yoichi is rated TV-PG on DVD, but TV-14 on Anime Network.
* Samurai Harem: Asu no Yoichi on Ibuki and turns Yoichi into an evil stick figure, while the second one depicts Washizu in a flowery shoujo manga style.
* Samurai Harem: Asu no Yoichi swim (though no one knew that) while Yoichi gets a life preserver tossed to him so he can distract/fight off the opponents.
* Samurai High School brother Kou to enter said high school and become Supreme Commander of Japan. It helps that they both are adept at the opposite gender roles.
* Samurai High School: Chapter 16 of the manga started with the twins being followed by members of the newspaper club and then it went back to when and how it began. Chapter 23 also invokes the trope.
* Samurai High School: Kou and Tsukiko entered Samurai High School by posing as each other. They occasionally switched back whenever Tsukiko wanted to go on a date with her crush or watch her idol.
* Samurai High School: Kou, who crossdresses to pretend he is his twin sister, already looks and acts very feminine. His sister Tsukiko, however, is very masculine. They dress up as eachother since the samurai school they attend frequently tests the guys' masculinity and the girls' femininity. Pretending to be the opposite gender, they both excel in the aforementioned fields.
* Samurai High School: One of the guys Tsukiko defeated had this reaction upon learning it was her and not her brother who defeated him.
* Samurai High School, when Tsukiko decided to enter school as a boy, she considered cutting her hair but her brother said it'd not be necessary. Just holding it in a ponytail would be enough. He was right. Also, he wore a wig to pose as his sister.
* Samurai I: Musashi Miyamoto actually starts at the tail end of the Sengoku period, showing the Battle of Sekigahara that ended the shogunate wars, and then continues on to the start of the Edo period.
* Samurai I: Musashi Miyamoto: Otsu, in contrast to Oko and Akemi, who are both schemers and kind of slutty to boot. Otsu faithfully waits for Matahachi while he's off at war. After he cheats on her, she pledges herself to Takezo, helping him down from the tree at great personal risk, accompanying him in flight, and promising to be loyal to him forever.
* Samurai I: Musashi Miyamoto, Takezo rejects the overt sexual propositions of both Akemi and her mother Oko. They're both selfish schemers, but when Otsu the good girl pledges her love to Takezo, he says no, saying that he has to finish his samurai training.
* Samurai). In keeping with the "storm"/"hurricane" idea, there are several bits that spin to evoke (or actually create) whirlwinds and cyclones.
* Samurai Jack (2017), had a heavily serialized story, and was intended to definitively end the series.
* Samurai Jack absolutely loves evil gloating. He's already doing it mere moments after being born.
* Samurai Jack, after a long and hard-fought battle, Aku is vanquished when his daughter Ashi uses her father's powers to propel herself and Aku back to the past when Aku first sent Jack into the future. After killing Aku, Jack and Ashi are

about to get married... until Ashi vanishes, because when Jack killed Aku, Ashi also ceased to exist.
* Samurai Jack: After having his sandals broken, Jack tries on a pair of high-heel shoes functionally similar to the sandals before being called out by onlookers.
* Samurai Jack. (After Jack destroyed them all, the pieces pulled themselves together into a giant junk-monster, but that was only slightly more formidable.)
* Samurai Jack: After seeing Aku destroy the last time portal in front of him, Jack gets very VERY angry. Aku decides to take the opportunity to egg him on with this:
* Samurai Jack: Aku disguises himself as a mysterious woman to trick Jack into leading him to a jewel across the desert that could send him back in time, so as to destroy it.
* Samurai Jack, Aku falls to Earth in the form of a meteorite. Guess who happens to be in the blast radius when Aku hits.
* Samurai Jack: Aku is hundreds or even thousands of years old, and is a being powerful enough to conquer the galaxy.
* Samurai Jack: Aku meets his end in the final episode when Jack returns from the future. Too exhausted from his battle with past Jack, Aku can barely hold on as he tries to run away while transformed into what is essentially a Pac-Man ghost before Jack stabs him in the head.
* Samurai Jack Aku, only slows them down for mere moments. They can regenerate from nearly being cut in half with it in less than a second, with no side effects whatsoever.
* Samurai Jack, Aku, only to be thrown into a future where the villain has essentially won. Over the course of the series, Jack faces numerous setbacks and near-victories in his attempts to return to the present and defeat Aku, preventing the future he is trapped in. Through all of these, Jack stoically faces each defeat of his purpose in what can be described as "Amor Fati," Latin for "To love fate", which nicely describes this trope.
* Samurai Jack: Aku placed a price on Jack's head, said to be a googolplex in season 1. In one episode, he had to deal with bounty hunter after bounty hunter. In another episode, he encounters another character who also had a price on his head placed by Aku and after their initial clash, they worked together to deal with the bounty hunters going after them in that episode.
* Samurai Jack. Aku rips open a portal in time and flings the protagonist into the future, where he must find a way to return to the past to undo the temporal damage done by said villain.
* Samurai Jack: Aku spends most of his time on Earth as a pool of pitch black goop resembling a tar pit, though later on a tree-like spire rises out of its middle. Any living thing that touches this goop is slowly pulled in with tremendous force, and their matter is converted into more of the goop, enlarging the pool. It's only when Jack's father fires an enchanted arrow at the substance does it convert Aku into his present-day (and future) form.
* Samurai Jack allowed onboard, most likely due to the fact they actually take offense to being called dogs, as Scaramouche learns the hard way.
* Samurai Jack (A lot of fans find these two humorous, but to be honest, very few warriors who don't have magical powers were able to last as long against Jack as they did.)
* Samurai Jack and an underground creature fight ring after being turned into a chicken and captured by a greedy Italian man.
* Samurai Jack and Ashi accidentally held hands while fighting the tigers on a large desert creature.
* Samurai Jack and being discouraged from aiding one another ultimately becomes their undoing as Jack is able to easily whittle their numbers down by using the environment against them.
* Samurai Jack and hand-to-hand skills, Jack proves to be the better fighter due to all the time he's spent fighting and has Aku on the ropes, forcing him to break his own rules to turn the tide.
* Samurai Jack and has the three insane animal rights activists locked up in the cage that once held the beasts. One of them laments the demise of the "poor

beautiful monsters", causing Jack to tell the trio who remorselessly endangered an entire city that they are the ones who are monsters.
* Samurai Jack, and having all of these colors likely means they're the big guy himself in disguise.
* Samurai Jack, and he can command the imprisoned souls to fight for him. (Until, that is, Jack busts them out.)
* Samurai Jack, and his effect on the corrupting effect on the world is a pollution of it in some cases.
* Samurai Jack and one last story before teleporting to his lair, greatly annoyed:
* Samurai Jack (and that's saying a lot!). As stated, these humans are not more twisted than Aku, so it's more like "humans are real monsters, but supernatural entities (or at least Aku) can be monsters too.".
* Samurai Jack and the Scotsman end up stuck on a narrow bridge with two mobs of bounty hunters closing in from either side. They initially try jumping off the side, but they each go a different direction and (being chained together) don't end up going anywhere. Jack cuts the planks beneath them and drops them into a swamp to escape.
* Samurai Jack and the Scotsman's music is loud enough and bad enough to break Jack's brainwashing.
* Samurai Jack and they try to destroy the assassins together. At various points throughout the episode the scientist tries to get Jack to do a high-five, but Jack doesn't know the gesture and doesn't respond. At the very end of the episode he finally does the high-five.
* Samurai Jack), and use that portal to return to the past. Then Aku just rolled up, killed The Guardian, and destroyed the time portal.
* Samurai Jack ankle as he falls, letting Jack break free and drag her down with him all in one swoop. (When last seen, the two were bound and dangling upside-down from a tree with Zeke reminding her of the 150-foot restraining order he has against her; quite likely, this sort of thing happened before.)
* Samurai Jack, anything Aku transforms into has the same black/green/red color scheme he does, and his true form shows up in reflections. He managed to disguise himself as a beautiful woman and fooled Jack in one episode, after which Jack stayed alert; a second attempt at masquerade led to Aku being totally outmaneuvered.
* Samurai Jack are not named on-screen and are only given their names in the end credits. One example is Caccitore, the man who used Jack after he was turned into a chicken in a fighting tournament in "Chicken Jack".
* Samurai Jack as cold as the steel he is made of to anyone he has to kill. But he is a kind and loving companion to his dog, and deep inside he feels guilty about the innocents he has killed.
* Samurai Jack as he keeps finding new ridiculous costumes to wear, but loses those as well.
* Samurai Jack as he wanted, he did produce a fifth season that wrapped up the series over a decade later.
* Samurai Jack, Ashi declares to her "Lord and Master Aku" that Jack dead while in the bowels of a giant creature, while Jack is standing two or three feet in front of her, alive. He even says, "Um...I'm right here."
* Samurai Jack as they recover from their wounds. During the night, he starts shivering from the cold, so the wolf curls itself around Jack to keep him and itself warm with its thick fur.
* Samurai Jack: Battle Through Time. Said game is considered canon to the show.
* Samurai Jack becomes this to several people over the course of his journey.
* Samurai Jack before her body goes spiraling off the tree trunk they'd been fighting on.
* Samurai Jack before he realized that it was a premonition, so he took precautions to ensure that Jack's mission would fail.
* Samurai Jack begins with the title character as a child. After he has to flee his home, we see a montage of him going all over the world, training with various people and cultures, until he returns home as an adult.

* Samurai Jack beings with a bipedal stance. By the time Jack encounters them, however, they've been reduced to beasts of burden by the Chritchellites, who use technology that render them quadrupedal, animal-like in behavior, and their language reduced to grunts and roars. Eventually averted, however, when Jack deduces what actually happened and finds a way to restore the Woolies to their former selves while annihilating their captors.
* Samurai Jack but the final scene shows Jack's silhouette walking away from the battle.
* Samurai Jack. By the time Jack returns, his father has been reduced to an old, emaciated slave, thoroughly weakened in both body and spirit.
* Samurai Jack); by touching the skull, Demongo can call that essence back into the world of flesh to fight for him. If the warrior gets killed, no worries; he just summons them back again. Add to that his ability to teleport away from danger, and he nearly beats Jack before Jack manages to break his control over his stolen souls.
* Samurai Jack case—Jack's sword is magical, and by killing an innocent being with a deliberate attack, the sword slips out of Jack's hand and disappears, rendering Jack unable to use it until he makes peace with himself and is allowed a second chance. Incidentally, during the period Jack doesn't have his sword, he carries all sorts of non-sword weapons on him, including guns.
* Samurai Jack, cheekily implying a few dozen significant events have been skipped over.
* Samurai Jack, considering Aku's massive long-term influence on the world and even others beyond it.
* Samurai Jack daughter from the future, and as a result is never conceived due to the past Aku's destruction.
* Samurai Jack definitely qualifies. He's a master of just about every weapon and martial art known to man, but his primary weapon is a sword. The Scotsman qualifies as well, by virtue of matching him blow-for-blow for three days on end without taking one scratch.
* Samurai Jack Demons that Jack and the Scotsman (and his wife) can butcher to their heart's content.
* Samurai Jack: Despite his vast empire and armies of robots and bounty hunters, Aku has no issue with these kind of tactics.
* Samurai Jack did many dialogue-less episodes, often conveying the story via minimalist animation.
* Samurai Jack does this a few times when he is so perplexed that a simple confused stare wouldn't be enough.
* Samurai Jack does this in an episode when infiltrating a tower in order to rescue a fairy from a gargoyle.
* Samurai Jack: Done with yellow moths in "Jack and the Haunted House".
* Samurai Jack endorsing some product or other. How many times is he going to eat that burger!?
* Samurai Jack Episode 7: "Jack and the Three Blind Archers". The archers take out a tank with a robot driver, who collapses onto the control causing the tank to rampage and shoot at the other robots.
* Samurai Jack episode "Birth of Evil" shows that Jack's father was no slouch himself, having defeated and imprisoned Aku as a young man.
* Samurai Jack episode "Jack and the Flying Prince and Princess" had a prince and princess from another planet crash land on Earth. As their home world had lighter gravity, they could barely move in Earth's gravity and needed Jack's help to survive. Then near the end, they managed to use a device to change the surrounding area to their home world's gravity. Unused to it, the mooks helplessly flopped around and flew through the air whenever they tried to move, while the prince and princess picked them apart, demonstrating great speed and strength.
* Samurai Jack episode, "Jack and the Labyrinth", Jack competes against a rival thief equipped with a briefcase-sized omnitool capable of doing almost anything required.
* Samurai Jack episode "Jack and the Spartans"; he seemingly sacrifices himself to

protect the Spartan King from an explosion, and all that's left are the two shields he used. The Spartan King, however, believes that Jack survived, as anyone as badass as Jack wouldn't die like that.
* Samurai Jack episode, "Jack Vs Mad Jack," Jack has just fought off a small army of bounty hunters single-handed, but he manages to calm himself down... then his sandal strap breaks...
* Samurai Jack episodes were told through the eyes of sympathetic characters attempting to kill Jack. Jack is just as unstoppable in those episodes as any others.
* Samurai Jack episode "Tale of X9", the robot assassin X9 tells how the evil scientist who created him put an "experimental emotion chip" in his brain. Why? As X9 says, "He was kind of funny that way."
* Samurai Jack episode "The Tale of X9" starts with X9 telling how Aku's evil scientists developed their master's robot armies. The first ones were "crude", one resembling a bunch of junk in a vaguely robotic form with wheels, then a "cleaner" version of that one, then a rickety, fully-humanoid robot, then one that seemed like a typical robot soldier. Finally they came up with the model which X9 is, which seemed to be the first efficient models, used as assassins. Eventually, this model was retired in favor of the Beetle-Bots that are usually seen in the series proper.
* Samurai Jack episode "The Tale of X9" was most certainly created with this genre in mind.
* Samurai Jack episode when he was very much forced into fighting in "The Dome of Doom."
* Samurai Jack episode, when Jack saves Ashi from a crab creature and expects some gratitude for it.
* Samurai Jack episode XCVIII, Jack goes on a spiritual journey that involves doing a Tea Ceremony for a monk. The monk's estimation of the tea Jack made?
* Samurai Jack-esque pulp adventure, a gladiator flick — sometimes all in the same episode!
* Samurai Jack: Every single attractive girl whom Jack meets ends up trying to harm or kill him, or turns out to be Aku in disguise.
* Samurai Jack, Extor offers Jack a high-five, but since Jack is from Ancient Japan, he says he doesn't understand what he is doing and Extor slinks away. At the end of the episode, Jack finally returns his high-five.
* Samurai Jack face off against a creature known only as Lazarus 92, a mass of slimy blue leeches that attack like a single organism.
* Samurai Jack featured a group of metal-eating robots who, of course, forgot they were robots (thanks to synthetic skin). They're defeated when, in their frenzy, they tear the skin off each other, and, seeing metal, consume each other.
* Samurai Jack featured Jack aiding a group of spacemen return to their home planet. One of them was constantly calculating the probability of random events, from the probability of successfully launching a rocket, to whether or not Jack was having a good time at the moment.
* Samurai Jack features Jack swimming through a huge, multi-eyed fish skeleton.
* Samurai Jack fits comfortably in this category. Although there were a few developments over the course of the series (Jack befriending the Scotsman, learning to jump good) they are only rarely shown. (The Scotsman only appears in three episodes after his introduction, there are plenty of times when jumping good could have solved the episode's dilemma but went unused.) Jack was never going to get to that time portal. Season 5 bumps it up to Level 4, however.
* Samurai Jack following Mako's death, with generous consensus being that while Baldwin did a good job, he wasn't as good as Mako's Aku.
* Samurai Jack: FOOLISH tropers! Once again, your edits are in vain! You have forgotten to mention the EXTRA THICC supply of GREEEEAT FLAAAAMING MEEEEEMES that is Aku, the master of masters, the deliverer of darkness, the shogun of sorrow!
* Samurai Jack generally seem like mindless robots who enforce Aku's rule without hesitation. However, in the 3-part series premiere, after Jack destroys almost an entire army of them, one of the remaining robots seems to have recognized that

defeating Jack is impossible and takes a step back. Jack quickly tells the drone there is no escape and destroys the rest of them. In another episode, a group of Beetle Drones are attempting to stop Jack from reaching a time portal; Jack predictably cuts them all down, but the last one seems to realize that it can't beat Jack and instead destroys the portal before Jack can stop it.
* Samurai Jack got his name — or rather, the one he goes by — this way. When he arrived in Aku's dystopian future, the first folks he met were a bunch of street toughs who called him "Jack", as a way of saying "dude" or "pal". Not fully understanding modern slang, when asked his name later, he simply said "They call me Jack," and it stuck.
* Samurai Jack got his name; when he arrived in the future he crash landed in the path of a giant crushing robot and had to fight his way out, impressing a trio of street punks that happened to be nearby. "Jack" is the equivalent of "dude" that they toss about, and the samurai takes it up as an alias in his battle against Aku.
* Samurai Jack had a pilot movie that was actually the first three episodes with some footage taken out for pacing.
* Samurai Jack, had been dead for roughly 11 years by the time the episode aired and was already replaced by Greg Baldwin for the long-overdue fifth season. However, the opening moments of the final episode feature archival footage of the show's first opening, complete with Mako's original narration, a role he receives credit for as "Past Aku".
* Samurai Jack had several. The first 3 episodes were originally aired as a movie, and there are at least two multi-part stories (Birth of Evil and The Scotsman Saves Jack) that got the same treatment.
* Samurai Jack has a bad tendency to hang out at these, which are all filled with shady bounty hunters wanting to collect the reward for him. Of course, they're all no match.
* Samurai Jack has all the reasons in the world to call himself the master of deception.
* Samurai Jack has a two-parter episode where Jack loses his memory. The Scotsman, Jack's closest ally, has the spotlight in this episode as he tries to find out why Jack lost his memory in the first place.
* Samurai Jack has a wishing well that follows this trope. A group of three archers wish to be the best warriors. The well complies but forces them to use their superhuman hearing and skills to protect it for eternity. After beating the archers at their own game, Jack stabs the well with his sword, freeing the world from its evil.
* Samurai Jack has been stuck in the future for 50 years. What adventures did he have during those 5 decades?
* Samurai Jack has him pegged, baits him into a corner, and proceeds to kick the crap out of him.
* Samurai Jack has Jack climbing up the mountain to the top in order to search for the truth that the three monks offer to help him with.
* Samurai Jack has Jack himself, who is usually a calm and composed individual. The two things that have made him lose his temper were the Scotsman and Ashi. Notably, in both instances, he finally lost his temper after being insulted for an extended period of time.
* Samurai Jack has Mad Jack, Aku's embodiment of Jack's own dark side.
* Samurai Jack has one leg replaced by a machine gun. He's pretty nifty with it and never loses his balance when shooting.
* Samurai Jack have bright blue glowing eyes. They also happen to be super strong, super fast, nigh-invulnerable juggernauts that simply cannot be defeated by normal mortal methods, even with enchanted holy weapons like Jack's sword.
* Samurai Jack, having no master while still following the samurai's honorable code.
* Samurai Jack. He chases it into a bizarre underground world, spending most of the episode grabbing whatever clothes or covering he can find while looking for his stolen possessions.
* Samurai Jack he cuts himself off upon mentioning Jack and assures himself that

his lair is "a safe place". The Scotsman praising Jack after Aku destroys an attacking army is enough to kill off any enjoyment he might have gotten out of the act, such that he just slinks back to his lair and lets the Scotsman's daughters escape.
* Samurai Jack, he finds fighting for other people's entertainment to be disgusting.
* Samurai Jack. He only uses his sword to its full potential against robots and Aku, who seems to be made of pure evil and therefore has no blood. Whenever he fights a living being (not often) he somehow finds a way to not actually cut them, if he even uses his sword at all.
* Samurai Jack homage, as they describe their society as calm, pacifist and prosperous, but their army had to go to the war in order to defend their home from mechanical minotaurs. On the other hand, the civilization never stopped to be a utopia thanks to their soldiers.
* Samurai Jack. However, many of these "robots" look and act exactly like organic beings, to the point of patronizing bars/restaurants. Even the wild animals proved to be robots, suggesting that the "robot" conceit is just a way to squeak the show past the gore police. A lot of them sprayed oil from their wounds in an obvious blood parallel.
* Samurai Jack: In "Episode XVI: Jack and the Smackback", Jack is captured and thrown into a battle area, where he must fight numerous champions in order to survive the Dome of Doom.
* Samurai Jack. Instead of legs, the robot steeds hover above the ground.
* Samurai Jack. In the next episode, Jack debates his options, but ultimately decides "it's kill or be killed." When Jack encounters the Daughters again, it's a fight to the death.
* Samurai Jack in the process. Unlike the standard reasons for this trope, it appears the various civilizations never needed to advance past a certain point. All technology is depicted as roughly equally effective regardless of how advanced it is, with only slight advantages or disadvantages. The Spartans, for instance, could fight robot armies using their spears and shields, while somewhere else, mobsters armed with Tommy guns park their Model-T's and break into state-of-the-art security systems.
* Samurai Jack: In the second segment of the episode "Jack Tales", Jack meets a family who expresses desire to eat his sword. Upon fighting them, he slices the face of one of them revealing them to be robots. Once their own metal is exposed, they start eating each other.
* Samurai Jack involved in their production, much of this is due to how the ruins seen in the first episode of the former appear to resemble a post-apocalyptic Townsville — the main setting of the latter — as well as the identical resemblance between the eponymous Jack and Professor Utonium, leading many to think Utonium is the future descendant of Jack.
* Samurai Jack involves the titular samurai warrior wielding a magic sword, who gets thrown through a time portal into the far future. During his ongoing quest to destroy a powerful shapeshifting demon who rules this world with an iron fist, he repeatedly encounters other warriors, talking animals, sorcerers, demons, dragons, faeries, elementals, rock monsters, aliens, cyborgs, robots, etc. in an anachronistic world where the past meets the future.
* Samurai Jack is a literal case. He is the only one who can slay Aku, because his sword is the only known weapon with the power to do so.
* Samurai Jack is built on the idea that these scenes will make the action more thrilling.
* Samurai Jack is cursed with the form of a woman by some mischievous leprechauns after he drunkenly barges into their fairy circle. The "Scotswoman" is considerably more pretty and petite than before... much to his shame and embarrassment; the Scotsman doesn't dare go home to his wife trapped in the body of a "no-good stick-thin lassie monster". The Leprechauns cruse Jack too, but female Jack is not that different from Male Jack.
* Samurai Jack is nearly unbeatable with his magic katana, slicing through

virtually anything at will and occasionally deflecting all the bullets from several machine guns fired at him at once.
* Samurai Jack is one of these; there are several episodes in which he never speaks. He didn't speak much as a child either; of the five flashback episodes to his childhood, he only spoke in one of them.
* Samurai Jack is this, being the only child of the Emperor of Japan, trained in numerous forms of combat, and wielding a magic katana in order to combat Aku.
* Samurai Jack. It's not that the Scotsman is tiny — in fact he's big, ugly, and strong — it's just that his wife is bigger, uglier, and far stronger!
* Samurai Jack. It's only after Jack leaves that the children wake up and are shown to be unharmed.
* Samurai Jack It's possible that some are still alive, but the fate of the remaining three is unknown.
* Samurai Jack. It takes him a long time to catch on, even after he starts arguing with himself, but he's plainly horrified when he sees it. At some point, Aku takes over his body so that only an eye and a small patch of skin around it is left, and Jack weeps.
* Samurai Jack, Jack befriends a village of peaceful creatures who have to deal with mauaraders who like to invade them and steal their food. After teaching them how to fight back, they eventually defeat and trap the invaders. The leader of the village forcefully shoves food into their mouths before telling them to never come back. They're then catapulted out of the village.
* Samurai Jack", Jack defeats a warrior who had been immortal for thousands of years as a punishment from Aku. He immediately ages to look about 100, but that's still pretty spry for someone in their thousands. This is exactly what he wanted, though, since it allowed his suffering to come to an end and he could finally join his friends and family in Valhalla—Valkyries descend from the heavens to take him to the afterlife right in front of Jack.
* Samurai Jack, Jack does this to Ashi in episode 4 of season 5 while they are trapped in a creature.
* Samurai Jack, Jack encounters the very time portal he is destined to take back to the past... and finds it guarded by an incredibly formidable warrior. As their battle drags on, well... "That was my favorite suit you just ruined!"
* Samurai Jack Jack ends up in are explained this way. Since the evil wizard Aku took over the world after he sent Jack to the future, he's the one responsible for the state of it. There are aliens on Earth? Aku opened up portals to other worlds. Robots are everywhere? Aku used magic to advance technology for use in his world conquest. And so on.
* Samurai Jack, Jack goes undercover to infiltrate an outdoor rave with close ties to Aku. When a group of teens start to become suscipious of Jack, he starts busting out his martial arts moves and the teens excitedly copy his actions.
* Samurai Jack: Jack has been sent to the future and is trying to get back home to feudal Japan. A great deal of the comedy in the series is dependent on Jack's lack of understanding in the future. Most notably, "Jack" was a slang three hipsters called him on the streets and he thought that was what they seriously thought his name was.
* Samurai Jack, Jack has fought beetles with sword-shaped legs, 6-armed robots with scimitars, a robot/ninja/assassin with a blade that could cut through solid metal, a Scottish man with a machinegun for a leg and a magic claymore, his own evil side, a giant mecha, and more.
* Samurai Jack, Jack is a man from ancient Japan who is flung to the distant future. At one point, he is offered a hi-five and doesn't understand until the end of the episode.
* Samurai Jack Jack is lured to a graveyard for a zombie attack. At one point, while Jack is wandering around, the graveyard children's laughter can clearly be heard.
* Samurai Jack, Jack is transported into a big city in the future and the first place he goes in is a nightclub with a rave going on inside. However, Jack is more disturbed by the fact there are aliens there than anything else, so it might not

count.
* Samurai Jack", Jack lays his head momentarily on Spring's lap and closes his eyes when she successfully tempts him into resting for a little while.
* Samurai Jack: Jack meets a Scotsman on a bridge too narrow for them both to pass each other. It quickly devolves into name-calling, and then into fighting. In particular, there's this string of Scottish insults:
* Samurai Jack, Jack meets a warrior who was defeated long ago by Aku and trapped in stone, denied his warrior's end. Jack fights and defeats the warrior's golem body, freeing him. The warrior immediately becomes an old man and dies as time returns to him.
* Samurai Jack: Jack, naturally. (Many fans, however, have pointed out that Jack fits the title of "ronin" better, at least according to traditional terms, as he is a Samurai with no liege.)
* Samurai Jack, Jack once had to blow up a house to enter a criminal gang. He did it, but sneakily evacuated the inhabitants first. The house was inhabitted by a kindly old man and his many cute kittens and puppies. As soon as he opens the door, Jack looks despondent.
* Samurai Jack: Jack's first meeting with the Scotsman. The Scotsman has just insulted Jack and cut his hat in half, causing it to fall from the bridge. Jack responds by stabbing the man's bagpipes, which spend a whole 10 seconds with a long deflating note.
* Samurai Jack; Jack's katana can cut through any material, be it stone or steel. It helps that it's magical, forged by the gods out of the pureness of his father's soul.
* Samurai Jack. Jack socks The Guardian in the jaw four times; The Guardian simply grins it off, grabs Jack's arm and punches him across the room.
* Samurai Jack: Jack's sword was forged by the gods Odin, Ra, and Vishnu, from Norse, Egyptian, and Hindu mythology, respectively, and another episode, "Jack and the Swamp Wizard," mentions the existence of Cronus and Zeus, both of Greek mythology. It seems like only things that are myth or legend only in-universe may be untrue, like that a giant talking worm will grant wishes. Even so the myths hint accurately at many many things that could get Jack what he wants, not that he ever gets to use them for that.
* Samurai Jack: Jack uses his own clothes as a parachute in order to reach greater heights using blasts of air from the ground.
* Samurai Jack: "Jack vs. Aku" had Aku make a phone call to order a new bounty hunter, and laugh when the person on the other line says the bounty hunter will arrive in thirty minutes or else his services will be free. To Aku's surprise, the bounty hunter arrives a few seconds after the phone call ends.
* Samurai Jack loves to spread misery and pain, and what better way than to betray a close ally at an inopportune moment? A standout example is "Jack and the Ultra-Robots"; Aku forces a scientist to build a new line of killbots in exchange for the safety of his village, but as soon as they are finished he orders the Ultra-Robots to destroy the village as a "test run". This comes back to screw him over when said scientist helps Jack defeat the Ultra-Robots.
* Samurai Jack Lulu again. X-9 drives out and finds a mountain of beetle bot wrecks (the same model that had replaced X-9 and his compatriots) and muses on his chances.
* Samurai Jack (mainly due to censorship laws). A benevolent bug-like robot, Chitron 6 appears in Episode XLVII but is killed by Aku.
* Samurai Jack: Many people whom Jack had met and inspired nearly attacked Ashi, as she could have been mistaken for one of Aku's servants.
* Samurai Jack: many times to Jack's straw hat, such as being split in two in Jack's first encounter with the Scotsman.
* Samurai Jack, most episodes are basically sealed in a hermetic bubble, and absurd fluffy episodes have exactly as much impact on the series as existentialist ones.
* Samurai Jack movie never happened was because the crew was burned out after making the show for four straight years and felt that they were too creatively exhausted to give the series the ending it deserved, deciding it was more

respectable to leave it open-ended. They were unaware, however, that picking it up again would take as long as it did.
* Samurai Jack of a robot who is being blackmailed by Aku to kill Jack.
* Samurai Jack once and for all. All his allies and mentors from across the world sail all the way to Japan to celebrate his demise, and even Aku's own daughter Ashi is happy to see the monster meet his end...until she realizes with him dead thousands of years before she was born, she never existed.
* Samurai Jack once had one with a possessed family that Jack wandered into.
* Samurai Jack once had to battle an army of skeletal warriors in a cemetery.
* Samurai Jack: One episode has Jack rescuing a pair of butterfly-like aliens from Aku.
* Samurai Jack: On one of his journeys, Jack encounters massive rope bindings and wooden posts the size of buildings in no small amount, all leading up this trope. It quickly becomes clear that all the support was justified when it's shown that the bridge is literally several days long.
* Samurai Jack over how hopeless his situation has become. This is visually reflected by his new outfit, a suit of dark-colored samurai armor that has replaced his original pristine white gi.
* Samurai Jack, pirates, ninjas, Spartan Warriors, dragons, fish people, Old West bounty hunters, faeries, nature spirits, elementals, and zombies.
* Samurai Jack: Quantum Jack being the leader of a futuristic biker gang. The rest of the miniseries shows Jack changing to different lives while remembering traces of his original life as a samurai determined to vanquish Aku and eventually explains how all of this happened.
* Samurai Jack: Quantum Jack, ends with Jack turning into a tiger and nowhere near returning to the path toward defeating his nemesis Aku.
* Samurai Jack. Right before he and his daughters charge into battle as part of a larger army, he holds up everything to tell his daughters to cover themselves before they catch their death of cold. Every last one reacts as a typical embarrassed teenager.
* Samurai Jack ruled by his mortal enemy. Unlike most, he has a mission he has sworn his life to, while retaining the tradition and Code of the Samurai.
* Samurai Jack; Scaramouche barely gets a chance to explain why he brought old information to Aku about Jack not having the sword.
* Samurai Jack Season 5; Jack most likely kills one of the Daughters of Aku with a single punch to the face, snapping her neck in the process.
* Samurai Jack seldom encounters children, there are some episodes that make it perfectly clear that he cares about them and is willing to lend a hand when they're in need.
* Samurai Jack session). In episode XCIX after Jack and Ashi defeat an insectoid monster to exhaustion, they turn to each other and...well, what else? And to a recording of the Dean Martin standard "Everybody Loves Somebody".
* Samurai Jack shows the Canine Archeologists in the second episode, taking Professor Ut-er, Jack-through the Ruins of what looks to be the City of Townsville. By now, the Talking Dogs can walk upright and even have British titles.
* Samurai Jack. Special mention goes to the Vadaquians, whose poor home planet was shamelessly stripped of all its water by the wretched demon.
* Samurai Jack started out with a prominent chin...that grew bigger and bigger as the show progressed. Eventually, it took up exactly half the length of his entire face.
* Samurai Jack status. Starting with episode 2, when he finds a live clam in his drink. By season 5 (fifty years later), he's clearly gotten used to it as he gladly chows down on some shrimp-like thing that temporarily turns his head into a fish, though it grosses out Ashi.
* Samurai Jack storms Aku's castle in the pilot movie, and has been known to storm other castles belonging to blind archers, gargoyles, water spirits, and others.
* Samurai Jack style villain with a slight playing card motif; The spurs on his boots were shaped like spades, he had a card in his hat... Oh, and his cybernetic hands, the wrists of which had the playing card suits on them. The hands had a

special ability depending on which suit was facing up. He's also a bounty hunter, and on the run from his ex-wife, so luck is a big deal to him.
* Samurai Jack superpower, and formed a body of rock around the crystal so he could move around and fight, then crafted the death course inside of the mountain so that only someone strong enough to give him the warrior's death he desired could reach his lair.
* Samurai Jack that controls the Woolies is so Jack can destroy it. The Woolie claimed he was too weak to make the climb after his mistreatment, at which point Jack cringes apologetically before poking the Woolie's haunch with his katana.
* Samurai Jack that spawned him, and Jack's sword was forged by them. In addition, the goddess from "Jack and the Gangsters" is powerful enough to defeat him, as are her elemental creatures.
* Samurai Jack that was almost entirely destroyed by a pantheon of good gods. It took millions of years and a magic spell before he gained sentience and became the demon god of evil.
* Samurai Jack that was fought against by the combined might of Ra, Odin, and Rama.
* Samurai Jack, the bounty hunter Jujunga uses a blowgun disguised as a workable flute; he lures a victim close with his music before using it to ambush with.
* Samurai Jack: The episode "Jack and the Travelling Creatures" has this when Jack reaches the Guardian, and asks to use the time portal he guards:
* Samurai Jack: The eponymous protagonist of the show isn't very large or physically powerful, but he's one of the most badass warriors in the entire world because of his mastery of swordsmanship and martial arts from all over the world. One example is the episode where he meets the Scotsman's clan and is forced into a stone-throwing contest to test his worth. Unfamiliar with the sport, he did poorly in the first attempt, but after noting that his mocking opponent was much heavier than the stone, he used a martial arts move of redirecting balance and energy to fling him an equal distance.
* Samurai Jack. The only way for him to escape and ascend to Valhalla was to be slain in combat. To this end, he shaped his prison into a deadly labyrinth that only a great warrior could traverse, and began to lure passers-by into it in the hope that one of them would release him. Jack is able to accomplish this and finally allow the Viking to ascend.
* Samurai Jack, the pathway to a time portal is littered with thousands of skeletons, some even as big as skyscrapers. The source of them is soon shown to be the portal's unbeatable guardian, who even proves to be a challenge for Jack.
* Samurai Jack, the Scotsman and his family repeatedly mock Jack's outfit, saying he is wearing a basket on his head and a dress, and mock his katana for being small compared to their claymores. When Jack tries to greet them by bowing, they ask him why he bent over and stared at the ground. On the flip side, Jack cannot stand bagpipe music and most Scottish cuisine.
* Samurai Jack", the Scotsman seemed to be rather enjoying himself squaring up against Jack... until Jack stabs his bagpipes, at which point he starts going all-out with his attacks.
* Samurai Jack, the Scotsman's Wife throws her stout stature around with those that kidnap her when Jack and the Scotsman do their best to rescue her.
* Samurai Jack, the Scotsman works some Scots into his insulting tirades directed at Jack and others. Some words are quite archaic, but others are commonly used in modern Scotland.
* Samurai Jack The villain curses the shoddy attempts by the robots, slumps in his throne, and mumbles, "Guess it's true what they say, you want something done right, you gotta do it yourself..." Then his eyes open wide as he gets an idea (lure Jack into a trap by challenging him personally), which kicks off the episode's main plot.
* Samurai Jack, they are very devout and Jack's most dangerous opponents, bar none.
* Samurai Jack, though, was forged by the gods out of pure righteousness and cannot harm the innocent when in the hands of evil. It's so aligned with good that it abandons Jack for fifty years when he gives in to his rage and doesn't return until he's mastered his anger and regained his good side.

* Samurai Jack to not only better attack Jack, but also to access the two six-shooters she had holstered to her bloomers.
* Samurai Jack, turns the plan against Aku, and nearly takes him out once and for all.
* Samurai Jack: Unless he's hunting for food or needs to defend himself, Jack shows all animals he encounters, both Earthly and otherworldly, plenty of respect that they seem comfortable around him.
* Samurai Jack use what appears to be a magic ritual to teleport them to Earth and back to their home planet.
* Samurai Jack variant. The "Spirit of Spring" offered him rest so he could gain strength for his quest. However, he sensed something was wrong and tried to leave. She reacted violently and tried to keep him by force. While he escaped, she survived...
* Samurai Jack vs Afro Samurai: Jack kills Afro, but loses his arm in the process.
* Samurai Jack, was not strong enough to defeat the eponymous hero, so instead flings him into the future. Jack arrives in an era where Aku is the unquestioned ruler.
* Samurai Jack was the closest thing Jack had to a supporting character.
* Samurai Jack, we briefly see the scene from Scaramouche's point of view, who sees Jack talking to nobody. Scaramouche promptly decides that Jack has gone nuts.
* Samurai Jack We even see the face in an actual nightmare that Ashi was having.
* Samurai Jack were created with advanced technology, but powered by Aku's evil magic essence which he infused into them.
* Samurai Jack were initially believed to be wearing black skin-tight suits, but the sixth episode reveals that the girls actually had ash covering their naked bodies from being exposed to hot coals when they were children. While this revelation is obviously not intended to be funny, it is a bit humorous when Ashi washes off her "suit" and realizes too late that she doesn't have anything to wear.
* Samurai Jack were raised from birth to be assassins, have no real idea of life outside their cult's headquarters, and have never been exposed to an ounce of love or compassion in their lives. When hunting for Jack, they come across a female deer foraging for food, and are confused as to what it is. They then spot a male deer, and assume that because it has antlers resembling Aku's horns it's one of his minions come to devour the smaller doe. They can only stare in shock and confusion as it nuzzles the doe instead, one even scaring them away due to her uncertainty.
* Samurai Jack. When he meets Jack (and is unaware of his fame) he regales how he's the most wanted man on the planet.
* Samurai Jack when the sword he breaks turns out to be fake; Jack was smart enough to anticipate that Aku would eventually break the rules, and thus stashed fake swords all over the place as decoys.
* Samurai Jack, where Jack finally makes it back to the past and kills the evil being for good.
* Samurai Jack where Jack is almost about to defeat Aku, who then gets away.
* Samurai Jack, which fully restores him to how he was in the previous seasons.
* Samurai Jack; which leads to a stealthy duel where both of them fight with ninja gear and moves.
* Samurai Jack. While it is doubtful a spec of dust and a frog were actually talking to him even in the world the series takes place in, the images of his father decreeing he had forsaken them and the villagers he failed to save are another matter. The fact that Scaramouche, who killed those villagers, and Ashi, during his talk with Inner Jack and the dustmite, couldn't see anything but Jack apparently talking to himself suggests a good chunk of it was indeed in his head. However, in the penultimate episode where Jack is reasonably of better mental health has him talking to a purified Inner Jack who represented his former world-weariness. Whether Inner Jack is real, a product of his mind, or him imagining to have someone to talk to is not established.
* Samurai Jack", while it's somewhat played with in that the Triseraquins complain that since their city was sunk they haven't received any visitors, as they seem to be the only people under the sea, the underwater realm itself is lushly portrayed

as beautiful and full of strange life (there's a rather nice sequence during Jack's trip devoted to showing just how much weird stuff there is down there), and there's certainly plenty going on to keep Jack busy in Oceanus itself.
* Samurai Jack: While Jack and Ashi battle a dangerous monster with monstrous leeches, the leeches tear away at Ashi's leaf outfit. Jack sees her naked and is completely mortified, blushing like mad and stammering; he stammers even more when she tells him that he's not making sense.
* Samurai Jack who were trained since childhood specifically for the goal of killing Jack.
* Samurai Jack will turn out to be one of Aku's evil robot minions. Regardless of what they looked like before, as soon as they get sliced in half, there will be sparks and an explosion.
* Samurai Jack, with Jack living with a buttload of characters. The "Jack learns to Jump Good" episode has two of them back-to-back; first Jack teaches a tribe of apes how to set traps and defend themselves from a rival tribe, and then they teach him how to "jump good" by weighing him down with stones and have him run and jump all around the jungle.
* Samurai Jack, X9, one of the X model robots built by mad scientists for Aku, is given an experimental emotion chip by one of the scientists ("He was... funny that way"). It's the reason he was the most effective of the X models, and the only one still alive: None of the others had the capacity to care about living, so they had no sense of self-preservation. His emotions prove his downfall, when his love for his dog Lulu forces him to go after Jack.
* Samurai: John Barry spanned 981 weekly chapters over the course of 19 years.
* SamuraiKH2 (has been moved to a new account due to SamuraiKH2's account being hacked)
* Samurai or Axe-Spear did exist, though apparently it had a more ceremonial value. Finally, wandering ascetics known as "Yamabushi" carried axes with them both as self defense and as a tool to gather wood and open a path in the forest.
* Samurai Pizza Cats: All the characters are robotic-looking humanoid animals, referred to as "Animaloids" in the Japanese version.
* Samurai Pizza Cats didn't do this quite as often, though examples do exist; in one episode Usa-hime got irritated enough at the narrator to send him to the prison island, complete with super-imposed photos of his voice actor's face appearing on-screen as he's carted off.
* Samurai Pizza Cats episode "A Little Bit O' Luck". When he got rich, he ditched his job at the Pizza Parlour, harshly insulted Polly and Guido, and generally acted like a jerk. At the end of the episode, Speedy reconciled with his friends who stuck him with some pretty mean chores to make it up to them.
* Samurai Pizza Cats episodes parodied this, by having the repeating clips be the result of a projector fault.
* Samurai Pizza Cats episode, "Speedy's Double Time Trick", Pururun (Polly Esther) insists that her shopping trip with Yattaro (Speedy Cerviche) is not a date.
* Samurai Pizza Cats episode, the heroes were facing the villain (named Big Cheese) directly. In the English version, the narrator describes the conclusion of the fight: "With his Ginzu-Sword, Speedy cuts the cheese once again! Who writes this stuff?"
* Samurai Pizza Cats, Francine comments, "Tomcats! You can't live with them, and you can't throw them down a well and drown them!"
* Samurai Pizza Cats had a bank of ovens that slid up to reveal three chutes, down which Speedy, Polly, and Guido (Yattaro, Pururun, and Skashee in the original Japanese version) would slide down, changing into their battle armor along the way before being shipped up to the (hilariously badly-concealed) giant cannon in the building that would launch them into battle.
* Samurai Pizza Cats had one. The bad guys brainwash a famous baseball player and try to hook him up with Princess Violet, who's holding auditions for a boyfriend. The heroes and villains end up trying to settle things with a baseball game for some reason.
* Samurai Pizza Cats has a tendency to explode violently whenever his plans fail.

In one episode his entire extended family is shown to have this trait, and in another his advisor Jerry Atric explodes when he's unable to.
* Samurai Pizza Cats. However, writers for the dubbed version weren't provided with scripts of the original episodes, forcing them to make up plotlines and dialogue as they went; as a result, Speedy's growing attraction to Polly is never mentioned at all until the final episode, making their embrace at the end seem very sudden.
* Samurai Pizza Cats in one episode, where the Big Cheese introduced the robot menace he'd prepared for this episode with "Monster of the week, please enter and sign in."
* Samurai Pizza Cats is an interesting case. While a grand total of 52 episodes of the series were dubbed, Canada (which got the show first) had four dubbed episodes pulled from the package. When the show resurfaced many years later in America, these four episodes were included but twelve different episodes were missing instead. Nobody knows why any of these episodes were pulled – fans have often speculated on censorship (because America), but since they were already dubbed and censored anyway, this argument makes no logical sense unless you're a programming planner at a US TV syndicator.
* Samurai Pizza Cats, Lucille has this occur when she's upset, and the projectiles are stored within her hair.
* Samurai Pizza Cats, New York Pizza Cat member Dee Dee (aka Madonna in Japan) has a whip, dubbed the Kitty Whip, as her main weapon.
* Samurai Pizza Cats "No one recognizes our samurai heroes in their secret identities! Don't ask why, just one of the quirks of the show."
* Samurai Pizza Cats offered up a great Spoof Aesop after a battle: "Whoever said 'Violence never solved anything' wasn't a Pizza Cat!"
* Samurai Pizza Cats, one episode Big Cheese decided to build a giant killer robot that was an amalgam of every single one of the giant killer robots they used before. Not only did it look even more ridiculous than usual, but it was destroyed rather unceremoniously when Lucille panicked and unloaded her missile hairdo on it.
* Samurai Pizza Cats: The main characters are trying to get a scientist's assistance, with the catch that he won't tell them what they need to do to get his help. It turns out all they had to do... was give up.
* Samurai Pizza Cats. The show was originally commissioned by Bandai as one of these, but the toyline ended up cancelled with the series already mid-way through production, so Tatsunoko decided to go ahead with it anyway.
* Samurai Pizza Cats, the villain Seymour Cheese tries to reinvent himself as a hero of the people, and goes out to look for good deeds to do. He hears a lady screaming "Help! Purse snatcher!", and turns around to see a burglar with a huge Japanese thief bag, prompting the remark "That's one big purse."
* Samurai Pizza Cats Through The4th Wall and Guido explains that he lost due to the others having more popularity power.
* Samurai Pizza Cats to the point where the Japanese owners are surprised at how popular it is. When it was dubbed for Latin America the LA dubbers did something similar by replacing the jokes that weren't likely to be understood by Latin viewers and using local pop culture, without derailing the dub too much from its "source".
* Samurai Ponytail: A samurai who wears his hair in a topknot or ponytail
* Samurai Princess and Richard claimed all he had written for the next page's script was SPLAT!
* Samurai Princess does not wear shoes, but that is part of being a sumo wrestler. Jacquline however just does not like socks.
* Samurai Princess gets to show off her balloons! And we ain't talking about the inflatable kind.
* Samurai Princess) that he was doomed from the start. He is now becoming a more likable and enjoyable character.
* Samurai Princess: The king and princess of the fictional kingdom of Samprini are seen in the field way more than they are in their castle.
* Samurai Princess when pondering what is inside a treasure chest, Jacquline says it could be a bear. Cue imagination spot.

* Samurai Princess' while Itchyknee-san is searching for the princess and just happens to over hear the Raeka's royal vow of vengeance. PRINCESS FOUND!
* Samurai Revenge is Kabuto, who's on a quest for vengeance against whoever killed his wife and kidnapped his son.
* Samurai Sentai Shinkenger as the Light Zord, but as a mere piece of equipment and not a buddy).
* Samurai Sentai Shinkenger by default. Ryuunosuke even said "he still has much to learn" after THAT much of a convincing act.
* Samurai Sentai Shinkenger" can't see him when he starts cracking up at Genta's antics.
* Samurai Sentai Shinkenger did let two use Hyper Mode at once, but they had to share the mode's armored chestplate and were stuck side-by-side while using it.)
* Samurai Sentai Shinkenger does it when Richard Brown interrupts the standard roll call sequence.
* Samurai Sentai Shinkenger episode 7, the blue ranger has to go fishing for his mecha. He's shown pulling up a boot, which he adds to a pile of trash.
* Samurai Sentai Shinkenger episode where Takeru's soul is swapped with a good luck cat statue. A couple of episodes later it's used as the penalty for losing in a card game. Takeru... wasn't doing very well but Chiaki was enjoying himself immensely.
* Samurai Sentai Shinkenger fans were rooting for the pairing of samurai princess Kaoru with poor sushi seller Genta.
* Samurai Sentai Shinkenger: Fire (Red), Water (Blue), Heaven/Sky (Pink), Wood/Forest (Green), Earth (Yellow), and Light (Gold). Red also sometimes used Lightning.
* Samurai Sentai Shinkenger) had a "Come Back!" special that were released on home video after their respective finales were aired.
* Samurai Sentai Shinkenger has magic called Mojikara (literally "symbol power") invoked by writing the appropriate kanji character in the air using their magical paintbrush/cellphone transformation device. Writing the kanji for "rock" (石) will cause a rock to materialize, and writing the kanji for "horse" (馬) will also cause a horse to appear. Each of them has their own transformation kanji, which itself represents their own elemental power affinity. The kanji also has to be written properly. Chiaki's terrible penmanship prevents him from using Mojikara early in the series, demonstrated by his inability to summon plant life after failing to use the proper stroke order to write the kanji for "grass" (草). Genta, who does not have the paintbrush/cellphone, instead uses a text-messaging interface on his sushi-themed cellphone transformation device.
* Samurai Sentai Shinkenger into a BFG for the finisher attack. The "bullets" in this case are discs provided by the other Rangers.
* Samurai Sentai Shinkenger: Mako's specialty is dealing with her teammates' many issues quickly and practically. Once you're righted, however, don't expect a cuddle for the sake of cuddling.
* Samurai Sentai Shinkenger. Missing all of his skin, no skull so the top of his brain's exposed, tubes all over his body carrying fluid, a visor and vent-mask on his face... And this is an American-original villain.
* Samurai Sentai Shinkenger, much is made of the fact that he is self-taught and has no such lineage.
* Samurai Sentai Shinkenger series is typically given a pass because it was rushed to production and getting it over with was part of the problem with Super Megaforce.
* Samurai Sentai Shinkenger she tosses it aside, telling it to flee. The furball simply sits there repeatedly calling her name to the discarded kimono until Dokoku steps on it.
* Samurai Sentai Shinkenger shows up, and reveals that he bypassed his lousy penmanship by creating "Electronic Mojikara"... that is, a cellphone with an autocorrect function that writes the kanji for him.
* Samurai Sentai Shinkenger, Takeru Shiba (Shinken Red) is revealed to be a stand-in for a young girl named Kaoru, who is the real heir of the Shiba clan. When Kaoru

takes Takeru's place as (Lady) Shinken Red, her outfit is almost identical aside for the addition of a skirt.
* Samurai Sentai Shinkenger, Takeru vs Juzo, Mako vs Dayuu... it's a show about samurai...
* Samurai Sentai Shinkenger that can not only shoot disks (for training or attacking) but can grow to mecha-size and fight alongside the Origamis in battle.
* Samurai Sentai Shinkenger that their modern counterparts do... a cellphone that becomes a calligraphy brush. Their mentor, Ji, even has one that appears to be made of bamboo.
* Samurai Sentai Shinkenger, the Gedoushu, are these. They can even crawl out of crevices literally everywhere on Earth.
* Samurai Sentai Shinkenger. The series as a whole uses tropes and conventions of the genre despite being set in the modern day.
* Samurai Sentai Shinkenger: The tradition continues with the Tora Origami/Tiger zord, the kitteh that will pierce the heavens.
* Samurai Sentai Shinkenger version of the episode. Given the franchise's predilection for puns, it was naturally titled "A Sticky Situation".
* Samurai Sentai Shinkenger which features a young boy whose father died in a recent monster attack.
* Samurai Shodown: a mismatched case: Gen'an's poison cloud is orange, but the poisoned victim becomes purple.
* Samurai Shodown and kills the bear after taking over Nako's body because she doesn't feel like dying. Rera is not a bad person, just a part of Nako that doesn't like how Nako normally behaves.
* Samurai Shodown and Sieger got to tie the knot with his lady in liege, Princess Elizabeth.
* Samurai Shodown, but also because the latter killed the former's father.
* Samurai Shodown can't get together since she's a noblewoman and he's a wandering swordsman, but they always remember each other fondly and whenever she needs his help, he will go to her aid without hesitation.
* Samurai Shodown congratulated the battle winner with a message of "VICTOLY!"
* Samurai Shodown death animations if you ended a match with a strike from it. Or if you pitched it at an enemy. Her claws work the same, too. 'Oh! How dangerous a boomerang is!'
* Samurai Shodown games is supposed to be the one from real life, he wears an eyepatch. Notable for him and Sagat earlier ... the nature of the graphics means the patch switches from one eye to the other when the character changes which way he's facing.
* Samurai Shodown had a very tough Bonus Boss in Kuroko, whom you could either fight by meeting certain conditions, or just randomly after stage 3.
* Samurai Shodown has a few such moves. Given how enormously fat he is, they're unsurprisingly devastating.
* Samurai Shodown has Galford and Earthquake, from California and Texas, respectively (despite both states being Spanish and Mexican territories at the time).
* Samurai Shodown has Hanzo Hattori the 2nd introduce himself this way:
* Samurai Shodown. (He's not a tengu, and he's not an oni, but he definitely isn't human...)
* Samurai Shodown is quite a catgirl. Ears, tail, claws, and fleas. Seriously, she acts more feline than not — when she's unarmed, she walks on all fours (not crawl, but catlike), whenever she relaxes she sits on her haunches, and some of her poses (including a taunt) have her scratching behind an ear with her hindleg... er, foot.
* Samurai Shodown Mizuki's control-reversal attack, counting down on his fingers. Once done, or if you're hit with the attack again, he ... just goes away.
* Samurai Shodown, ninja, fat guys, nature spirits, kabuki actors, and cranes disguising themselves as maids as playable characters. The samurai class was the warrior class, not the "we have to dress in a specific type of armor and use a katana" class. Granted, historically most ninja were not from the warrior class but

it's still a fitting title because once you get rid of the class system, a samurai is simply a warrior.
* Samurai Shodown. One of his win quotes is even "No one calls me a freak and lives! ...except my wife, that is."
* Samurai Shodown series. His post-mortem insanity has him hunting down Minazuki Zankuro and giggling all the way.
* Samurai Shodown series of fighting games uses gambling as his sole source of income. He is, apparently, an avid player of Hanafuda, and cards from the game figure heavily (though it would seem figuratively, at times) into many of his moves.
* Samurai Shodown series, only the last strike of the round can be fatal.
* Samurai Shodown: Shiki wears a backless tight dress and her back sports a massive snake tattoo that... does nothing.
* Samurai Shodown's) involves the opponent being dragged down to hell in a portal, flayed, and their head thrown back to the battlefield with a satisfying thud.
* Samurai Shodown; so did unplayable boss Mizuki. In Mizuki's case, being hit by the attack while suffering from it reverses the reversal.
* Samurai Shodown. The only way you can reactivate them is by hacking intensively into the game.
* Samurai Shodown, this is Jin-Emon Hanafusa's standard death cry. However, due to his age, he speaks it in typical "old-man" Japanese.
* Samurai Shodown to symbolize the renouncement of her feelings for Haohmaru.
* Samurai Shodown, where not only can they die violently, they can also be drenched in the blood of their disemboweled opponents!
* Samurai Shodown who will die sooner or later. She gets married to someone else, but they still hold feelings for each other in their hearts, and when Kei needs Ukyou's help he will immediately go to her aid.
* Samurai Shodown with their finishers. The former has a Rage System, just perfect for letting off steam.
* Samurai Squirrel, a two-issue fling that was serious and more story-driven.
* Samurai Squirrel: Nato-san is the Samurai. He's called it in the first page of issue one.
* Samurai Squirrel takes on several spiders bigger than him in their own lair to rescue the baby bird that their leader, known as Silverback, kidnapped to eat.
* Samurai Swords) used this as a game mechanic. At the start of each turn, the players drew plastic katanas and the order of play is based on the pips on the individual swords.
* samurai. There was a saying 'bunbu-ryōdō' meaning roughly 'the pen and the sword in accord' Samurai were expected to be able to do things like the tea ceremony and to be able to compose haiku. They often engaged in poetry duels with each other, sometimes on the battlefield. This is to say nothing of their ability to kick arse and take names though.
* Samurai toyline focused on the zord armor at the expense of the regular suits.
* Samurai vs Zombies Defense. The last skill you unlock is called Troop Trample, and its this weaponized. Once activated, a dust cloud flies out of your base at absurd speed headed to the enemie's gate, with various weapons sticking out of it. Anything it runs over is outright instakilled, or the trample disappears if it runs out of power. The discription implies that there is an angry mob of at least 10 people in there.
* Samurai Warriors 2's more interesting fights takes place during Hanzo's story, a three-way fight between Hanzo, Kotaro, and Nene (the game's three playable ninjas).
* Samurai Warriors 4 adds these to the franchise. Under certain circumstances (typically when the enemy is stunned and their health is at a specific level), you'll receive a prompt to press the Triangle button. Doing so will cause your character to perform a unique attack that instantly defeats the opponent.
* Samurai Warriors are if not actually accurate then very representative of events in real-life Sengoku-period Japan.
* Samurai Warriors as one of the eight characters who get a deified form.
* Samurai Warriors axes with the ability to throw them like boomerangs), Shimazu

Toyohisa in 4 (a long poleaxe with a giant blade) and Sanada Masayuki (a spear with an axe blade and a banner).
* Samurai Warriors downplays this. While a few characters do use Katanas, they're only a small fraction of the game's playable cast.
* Samurai Warriors, during Oichi's Dream stage, he will eventually join the battle to decide who the most beautiful woman in Japan is.
* Samurai Warriors games have Friendship Levels. In the fourth installment, maxing out Friendship Levels with a character will allow your avatar character to equip that character's weapon type.
* Samurai Warriors gives us the astounding and noble badass Honda Tadakatsu, whose in-game model gives him quite a square jaw to go with his powerful physique.
* Samurai Warriors has long arms, which he can stretch and twist at will. Plus, he's very eerie looking. Later portrayals show that it's actually his gauntlets that can stretch out like a whip.
* Samurai Warriors: In Kai's story path, she gets ragged on by Kunoichi for being manlier than most of the guys in the Hojo clan (though the way she says it, she's also insulting the Hojos for being weak).
* Samurai Warriors: In the battle between the Oda and Takeda clans, Nobunaga uses rolling fire tactics with his muskets to ensure a near-continuous barrage of fire that demolishes the Takeda cavalry as it tries to approach. On top of this, the battlefield leading to the Oda lines has many spiked barriers to prevent horses from advancing. In the route where Shingen Takeda survives, however, he notices that a rainstorm is approaching and has his cavalry hold back until the Oda's gunpowder is too wet to fire, averting the trope.
* Samurai Warriors, is nowhere to be seen because he'd too young at that time.
* Samurai Warriors is portrayed as a ladies' man and a shameless flirt, but is nothing but gracious towards women and flatly refuses to take advantage of Gracia Hosokawa, portrayed in the game as a teenage tagalong who idolizes and follows him around.
* Samurai Warriors: Kunoichi, although she mixes an unhealthy amount of creepiness with it, what with her stalking Yukimura and enthusiastically suggesting the most dreadfully violent solutions to any problems that may pop up.
* Samurai Warriors; Kunoichi has a cutscene where she asks Mitsuhide why he had made her fight him when the bad guy was Nobunaga all along and triggered a thought that eventually made Mitsuhide turn on Nobunaga.
* Samurai Warriors, Lady Hayakawa is this for to the youngsters of the Hojo clan, but it is more obvious with Saburo when he is sent as a hostage to the Uesugi clan, she says she will always help him if necessary and orders Fuuma Kotaro to watch over her.
* Samurai Warriors, Masamune Date's entire story mode consists of nothing but him butting in on other generals' conflicts and annihilating both sides without stopping to think overmuch on whose side is right or wrong... or stopping to think at all, for that matter.
* Samurai Warriors, Nene acts as the self-imposed Team Mom of the Toyotomi clan—her Gaiden battle even has her showing up during the battle of Sekigahara not aligned with either side so she can beat the snot out of both armies and then lecture them about not getting along with each other.
* Samurai Warriors originally started as a spinoff to Dynasty Warriors. Its popularity and success has lead it to becoming its own separate series, with its own spinoffs, sequels, and expansions. Yep, this is a spinoff that spawned spinoffs of itself.
* Samurai Warriors series, he's often referred to as 'Bishamonten', an earthly incarnation of the God of War.
* Samurai Warriors series. Lampshaded by a few people who interact with either her or her father, Tadakatsu.
* Samurai Warriors series usually does this during the Osaka Campaign as he did according to popular legend. Of note is his ending in the third game where he rushes the Tokugawa forces between himself and Ieyasu despite being tired out from the battle and the pleading of Ina.

* Samurai Warriors, the final stage of Matsunaga Hisahide's story portrays the Honnōji Incident as this: having previously faked his own death, Hisahide marches on Honnōji with his army flying the Akechi clan's banners in order to assassinate Nobunaga while framing Mitsuhide as a traitor.
* Samurai Warriors: This trope is present by implication through the way Kai and Kunoichi interact, the former flying into a berserk rage whenever she perceives Kunoichi to be making fun of her in this way whether or not Kunoichi is actually doing so.
* Samurai Warriors titles, this applies to Ieyasu Tokugawa, Masamune Date, and Magoichi Saika. Tokugawa carries a thick spear, where the blade actually acts as a lid for a cannon hidden underneath. Masamune wields two flintlock alongside his blade in tandem during combat. Magoichi has a knife mounted to the barrel of his rifle, allowing him to both shoot and slash at enemies. In the fifth game, the "Mature" variation of Mitsuhide has a sword and a matchlock as his primary weapon (though the game allows any other character to use said weapon with the right skills).
* Samurai Warriors which was forged to create an alliance between Nagamasa and Oichi, but does not end well.
* Samurai Warriors, your customizable character, if male, gets to use a 2-handed katana and a rifle in tandem during combat. That is: he holds the katana one-handed and fires his rifle one-handed. He can also do this while running.
* Samurai, which was the primary combat method of samurai for early Japanese warfare.
* Samurai would occasionally use the two blades of their daisho, the
* Samurai Zombie Nation, the Statue of Liberty is transformed into a Medusa, with snakes replacing her crown. Also, she can use her torch as a flamethrower.
* Samurai Zombie Nation, you control a giant samurai head destroying everything. The samurai's name is Namakubi, which is Japanese for a freshly severed head.
* Samuru Yagyuu, the Ultimate Executioner, is guilty of this, having admitted to executing men and women. He kicks Reyes out of the way when she tries to stop him from executing
* Samus and the computer discover their capacity for intelligence increases over time. The X claim a scientist so they can set the station's core to meltdown, destroy all of Samus' upgrade access points, and steal an upgrade for themselves.
* Samus Aran has gone through some changes herself. Only starting with
* Samus Aran is the only survivor of a Space Pirate raid on her colony. Then the Chozo that rescued her were wiped out and/or disappeared, making her a Sole Survivor twice over.
* Samus Aran is usually described as a bounty hunter, although "mercenary" would probably be a more accurate job description, as her primary employer appears to be the
* Samus Aran. Many low-ranking members of both groups are often disbelieving of the various feats that "The Hunter" has accomplished, and responses to the confirmation of her existence range from absolute terror on the part of the former and stunned awe on the part of the latter.
* Samus Aran's Power Suit. The giant shoulders appear starting with the Varia Suit in
* Samus Aran. The creators had wanted to give her one sooner, but the technology wouldn't allow it back in the day.
* Samus Aran. The length of her hair varies, but most of the time it's usually reaches her shoulders. That being said, femininity is the last thing that could describe her. While some promo material for ‘’ Super Smash Bros. Melee'' describe her as "surprisingly feminine", she doesn't really show any typically feminine or masculine traits in any games.
* Samus' charge beam also has a bigger recoil the more charged it is. Her missiles don't have nearly as much, though.
* Samus escapes the the four animals, only to find out they're actually X Parasites
* Sam uses it in his game "Super Squid" where Reggie's counterpart, Reginalda, can't do extreme sports and doesn't know how to ride the ski lift and needs Sam to

teach her, whereas in reality,
* Samus' Fusion Suit is a tremendous downgrade in armor plating because of how much had to be cut off to try to save her from the X-parasite infestation. Accordingly, Samus takes more point-for-point damage from attacks than any other game in the series, only outdone by the effects of phazon without protection.
* Samus has the Screw Attack, and the Spin Attack (a/k/a "Ghetto Screw Attack" in many strategy guides). The former makes Samus invincible, frequently combines with the space jump to allow infinite midair attacks, and usually deals a one-hit kill to all but bosses and (usually) metroids. The latter is a significantly weaker, one-time-only version achieved by spin jumping with the charge beam fully charged. Samus also has access to the Space Jump, which lets her jump an infinite number of times as long as she remains in a somersault.
* Samus herself underwent this. She was born a normal human then she was altered into a
* Samus' infusion of Chozo blood is the reason she can use her Power Suit in the first place. The suit is Chozo technology, and only someone with Chozo blood can properly interface with Chozo technology.
* Samus Is a Girl, and its visor is now more obviously transparent, usually showing off Samus' eyes... and her rather long eyelashes.
* Samus Is a Girl because it relies on the general assumption that women are not supposed to take action in the first place, let alone be badass, and even less be successful.
* Samus Is a Girl (even if in the end the trend only lasted like a month or three).
* Samus Is a Girl: Overused and now the revelation that a girl can be as strong and badass as men is no longer subversive.
* Samus Is a Girl. This increases the odds of her being a goody. If there is more than one person from her side, she will be the only female, but she'll have way more screen time than her male colleagues. She will probably also be the highest ranked.
* Samus leaves them to their deaths and they die one by one before the planet explodes. Samus retires from bounty hunting and joins the F-ZERO circuit.
* Samus' missions for the Feds typically take the form of "kill X", where X is the enemy du jour. This makes her description as a bounty hunter slightly more accurate, as a bounty is paid for the things she kills. The only exceptions to the "kill X" missions are
* Samus' morph ball form also came about because of the hardware limitations making the developers unable to get Samus to crouch or crawl. Needless to say that these days, we have the technology, and yet the morph ball remains regardless.
* Samus or Link with all of their health upgrades are another example. Beam of radioactive plasma?
* Samus's parents were killed in a Pirate raid when she was a young girl, and the events of the original game were kicked off by the Pirates raiding a Federation ship that had Metroids on it — they are only rarely seen performing any piracy on-screen.
* Samus uses it, invisible objects appear, objects that aren't really there disappear, objects that require a specific weapon to destroy (Normal Bomb, Super Missile, Power Bomb, or Speed Booster) show an icon of that weapon, and Pit Blocks (the ones that crumble when you try to walk on them) are revealed.
* Samut storyline. In her immense happiness and relief that her god and people have managed to take down one of the corrupt gods and escape the fallen city, her Spark suddenly ignites.
* , Sam Vimes acidly remarks to Mr. Bourneville-Cadbury, owner of one of Ankh-Morpork's largest chocolate factories, on the spectacularly horrible quality of his product, which made his wife sick. Vetinari, presiding over the meeting, comments in passing that the sentient rats living in the Palace utterly hate said chocolates, and a local ratcatcher swears by them to kill less finicky pests.
* Sam Vimes' ancestors served as a means to ensure that the rulers of Ankh Morpork would not do this for too long. Vetinari knows about this, though whether he fears Vimes is doubtful. He does acknowledge Vimes as a force to reckon with, though, and

prefers to work with him, not against him. (This
* Sam Vimes is a variation; his boots are always old and battered even when he can afford much better ones, but he's proud of the old cardboard-soled ones because he can feel the street through them and figure out where he is by the feel of the pavements.
* Sam Vimes: "I was a drunk. You have to be richer than I was to be an alcoholic."
* Sam Vimes leader who can continue his balancing act, but also an Ankh-Morpork that will not immediately fall off a cliff after he eventually dies... deconstructing his own job security.
* Sam VS Maryann in the Season 2 finale. Transformed into a giant bull with enormous horns, he tricks her into coming closer and dropping her guard. As soon as she's close enough, he rips through her body with his horns, shifting back into a human that changes the horn into his arm. He grasps Maryann's black heart while she is still alive. She utters " Was there no God?" before he finally destroys the heart, turning her into a corpse.
* Sam was a bully, even in her younger years, and her only 'friend' was likely to be her twin sister Melanie, who left on a boarding school scholarship, as well as being a grade ahead due to Sam falling behind. Carly pushed back when Sam stole her sandwich, and their friendship was born.
* Sam was already aware of this in season one, but Sarah Blake managed to avoid it...until
* Sam was only six months old when his mother, Mary, died and has no memories of her and is sometimes shown asking about her in childhood flashbacks. Older brother Dean was only four and has a few more memories, but because of the violent way she died, neither Dean or family patriarch John like to talk about her.
* Sam Weiner is slowly revealed as someone who likes alcohol a little too much. Not only did he come in drunk during "Tanking Mann", but he also admitted to being drunk several times on set, claiming that it was okay because nobody noticed.
* Samwell holds back, fleeing the keep before the traitors recover themselves to bring word back to Castle Black about the Lord Commander's death.
* Samwell Tarly acts as this to Jon Snow in Season 4, discussing matters that Jon never even reveals to his other companions.
* Samwell Tarly (coming from the noble Tarlys, despite being rejected by his father) and Gilly (a wildling).
* Samwell Tarly joined the Night's Watch because his father threatened to kill him this way.
* Samwell Tarly keeps his vow of celibacy despite his attraction to Gilly up until Season 5 when he rescues her and they have
* Samwell Tarly's father forced him to join the Night's Watch so his younger son could become his heir.
* Samwell tries to be this to Jon Snow, with varying degrees of success. He eventually
* Sam who fitted the monsters M.O. as bait to lure out the monster, and lead it back to its nest. In fact the trope was called by name.
* Sam who will have to deal with an aggressive deer despite not being involved in any of the earlier situations.
* Sam Wilson this by having Sam remark that there was no suspense or sense of surprise, since his fellow Avengers had likely already guessed that he would be the new Captain America.
* Sam Winchester (a hunter of supernatural monsters) and Ruby (a demon). She eventually seduces him while mentoring him to kill other demons, and they start a physical relationship. In a later episode, their foreplay jumps straight into
* Sam Winchester also grew up hunting monsters, is also one of the greatest hunters who ever lived, has demon blood in his veins and is very, very tall, is afraid of clowns.
* Sam Winchester used to be this, especially in the first season. This was a contrast to Dean's cynicism. It doesn't last long though and any last remnants of it are crushed forever after
* Sam wins it all back, although the syphilis he got for annoying Patrick had to

be treated in the normal medical fashion. Notably, Patrick is one of the foes they don't begin to defeat, although in his case it's not because they
* Samwise Gamgee, humble hobbit and gentle gardener, follows his beloved master Frodo into the fires of Mount Doom itself to help cast away the One Ring.
* Samwise Gamgee starts out as Frodo's personal servant (and gardener) in
* Sam Witwer. He got to voice the Son and Darth Maul in this installment.
* Sam Witwer seem to enjoy pulling this on each other when one of them is being interviewed.
* Samyeongdang contributed greatly in driving out the invading Japanese forces. Their names and feats were so well-known that there were many folk legends created about monks being able to use magic and supernatural powers.
* Samy Naceri movies does incredible things with his car at ludicrous speeds.
* Sanaa Latham first bleached her hair blonde and then shaved her head onscreen when her character did the same in
* Sanada Yukimura is known for this, in any games he appeared, especially
* Sanae Nakazawa, Yukari Nishimoto, Yayoi Aoba, Yoshiko Fujisawa, Machiko Machida and (in the videogames) Youko Katagiri from
* Sanae, who seems to support emotionally almost everyone who has problems.
* Sanageyama has twice attempted to continue a battle without his clothes on.
* Sanal Edamaraku faced a similar accusation from a tantric guru who was challenged to kill him using only magic powers.
* San Andreas, and its textures don't line up with the rest of the building. Same case with part of the bridge rail where Tenpenney's firetruck crashes through.
* San Andreas are set in California but were filmed in the Lockyer Valley just west of Brisbane, Australia.
* San Andreas, Ben rescues Blake when she gets trapped in a car, then they fall in love. Blake would also end up helping Ben afterwards.
* San Andreas in the woods that can't be fixed due to them actually being separate, pre-damaged models internally named GLENSHIT and SADLSHIT respectively.
* San Andreas (mixed Samoan/Black ancestry) and Carla Gugino (Caucasian). Her onscreen sister Arabella Morton is Caucasian too.
* San Andreas, robbing a mob-owned casino) in order to rescue his brother from prison and his family/neighborhood from internal and external destruction.
* San Andreas, separated couple on the verge of divorce, Ray and Emma, must work together to rescue their daughter.
* San Andreas. There are an enormous number of rumors suggesting that there is a way to unlock all of Liberty City. Hackers figured out how to get there, either getting outside the mission area or returning later; a surprisingly large part of the city is actually present (about 70% of Portland), hovering in the air miles above northeast Los Santos, but is useless because there is no collision detection except in the area used in the establishing shot.
* San Andreas), there are many storyline missions that seem to canonically involve CJ murdering people out in the open.
* San Andreas when it kills him. Extensive searches in-game and through the game's code have dismissed this claim, and any "proof" of the Ratman has been proven to be hoaxed.
* San Antonio, a series of unidentifiable photographs. Only at the end do we learn that a rocket released a camera at its apex, which then took increasingly detailed photos on the way down.
* San-Antonio. To sneak inside a museum, circus artists use four dwarves and two contortionists. The contortionists walk in bent on themselves to look like dwarves inside their coats, and the dwarves walk in two by two in totem-pole trenches. Once out of view inside, the contortionists stand up and exchange coats with two of the dwarves. Then the four of them exit along with the rest of the visitors, making it seem like the same number of people that went in are going out, while in fact two dwarves stay inside after the closing hour.
* Sanburg's Lincoln: This was the first American miniseries, broadcast in 6 parts between 1974 and 1975.
* Sanchez is an MMA champion fighter who initially has consensual sex with a

waitress but does not stop when she protests his roughness. He ends up beating her bloody and then raping her. Comments by his manager imply that this has happened numerous times before and each time the manager paid off the victims so they keep silent.
* Sanctacaris, who even keeps getting refered to as a "prehistoric giant shrimp" in laymen's publications, despite not looking anything like one and being actually closer related to velvet worms.
* "Sanctimonious" once meant "holy, devout, possessing sanctity"; nowadays, this meaning is forgotten, as people use it nowadays to refer to forced, insincere displays of moral superiority, synonymous with "self-righteous" and "holier-than-thou."
* Sanctioned briefly mentions that America has split into God's Beloved Chosen America, and the United Northern States of America. As it's set in Scotland, not much is said about things in America.
* Sanctioned follows several young women, after they have been rejected from superhero training, as they adjust to their new powers, and try to find out what they want to do with their lives.
* Sanctioned, has only two changes of clothes, and they look pretty similar. She prefers not to own a lot of things, as it's easier to move on when you don't.
* Sanctuary and complains that he's "ordinary." He then realizes he has magnetic powers.
* Sanctuary and James Watson (Sherlock Holmes himself). Oh, and her fiancé was Jack the Ripper.
* Sanctuary and possess superhuman leaping abilities, Jack preyed upon humans in Southern England during the Victorian era, until Dr. Helen Magnus convinced him to become the first inhabitant in the UK sanctuary.
* Sanctuary, a nosy journalist notices a corpse dangling above her when some blood drips on her face.
* Sanctuary, aptly titled "Normandy", has Helen, Watson, Griffen and Tesla (from the war office in England) going against Hitler's own abnormal hunting group, seeming helped by Druitt, who were going to use a Fire Elemental to stop the D-Day Invasion. Watson points out the irony of Hitler going after the imperfect creatures to help in his quest for a perfect world.
* Sanctuary: Because of him cutting off illegal funds, Asami is briefly the target of a hit, but one of his assistants is the one being thrown out a window, "thanks" to the dark appartment preventing the assassins from properly identifying their marks.
* Sanctuary: Before the series began, Will Zimmerman lost his job with the FBI because of his outlandish theories about certain cases. He's been right all along.
* Sanctuary, but admits he still loves her. It is implied in a few episodes that she was once in love with him and those feelings as well as their tumultuous past has continued to haunt her emotionally. However, his betrayal hurt her deeply and makes her unable to ever truly forgive him.
* Sanctuary by turning the device on and off, causing Watson great pain.
* Sanctuary doesn't do much fighting, but the characters do a lot of using powers beyond things normal people can do. Occasionally played with in that sometimes the abnormals 'save the world' by using their powers and/or putting on actual tights.
* Sanctuary does this to Will and Henry a lot. However, in Big Guy's case, it's only occasionally a dope slap. Usually it's just his way of demonstrating affection. Once in a while, Will or Henry will return the favor, either in dope slap or Bromance context.
* Sanctuary. Even ignoring the occasional outbreak in modern times, he's completely missed a little thing called "The Black Death" in the 14th century, the most famous plague outbreak in history, where it killed one in four Europeans.
* Sanctuary example above, Dr. Jackson was ridiculed by the archeological community because of his theories about aliens and the pyramids. He was, of course, right, not that he can tell anyone.
* Sanctuary had a guest star appear in a superhero suit that he couldn't take off. Will even asks him about wastes.

* Sanctuary has a particularly difficult one to solve. They do figure out who it is, but only the main characters survive until then.
* Sanctuary has Helen Magnus, a woman who gained immortality during the reign of Queen Victoria, who is revealed to be bisexual when a woman whose life she just saved kisses her in gratitude. She returns the kiss, commenting that she hasn't been kissed that way in a long time.
* Sanctuary has Praxis, a large underground city with advanced technology where humans and Abnormals live.
* Sanctuary has taken more than one spin in the director's chair, while Robin Dunne made his directing debut in season 4. Tapping also served as the executive producer for the show, and she has joked that was done so that she can save the show some money by not paying herself.
* Sanctuary, Helen Magnus uses a sonic stunner called the Sonic Stun Weapon (or its 'big brother' the Super Sonic Stun Weapon) which uses sonic sound waves to temporarily stun the victim.
* Sanctuary inject themselves with vampire blood just to see what happens, after all).
* Sanctuary: In "Pavor Nocturnus", a confused Magnus encounters a battle-scarred and extremely jaded Will. That's what happens when you're one of very few survivors of a zombie-type epidemic.
* Sanctuary: In season 3 the team pretends to be bank robbers and hold everyone hostage because one person is carrying an Abnormal parasite. One hostage is believed to be the host but instead is revealed to be pregnant. Later she is the first hostage released.
* Sanctuary In the first episodes Helen and John's mode of speech is a clue as to their shared origin. Their English is perfectly comprehensible, but slightly archaic and formalized. They and Tesla have all exhibited some distaste for modern conventions of the language.
* Sanctuary in the US) is a crime novel told in diary format. The book features an introduction from Mina in which she claims she found the diary on a second-hand PC and subsequently won a court ruling that allowed her to publish the diary — much to the original author's objections — under her own name. An afterword further muddies the water by suggesting that some of the events described in the book did not happen in "real life", being exaggerations on the part of the original author.
* Sanctuary involved an abnormal that uses mind manipulation to impersonate people before killing them. It impersonates Will and almost kills Magnus, until Magnus asks for coffee, having previously told the real Will that she hated the beverage, and the fake Will simply says "sure".
* Sanctuary is about a clinic that helps 'abnormals' (mutant humans and cryptids with strange abilities). One of their employees is a Sasquatch, yet he is treated as if he was simply a misunderstood human being.
* Sanctuary is a Criminal Psychologist, and uses this knowledge of the mind to assist him in his work in the Sanctuary, in fact, it's exactly this skill which interested Magnus.
* Sanctuary is possessed by a murderous energy elemental. He can control it sometimes, but it's unpredictable at best.
* Sanctuary is shown trapped in a room with computer monitors indicating both falling oxygen levels and lethally increasing amounts of carbon monoxide.
* Sanctuary: John Druitt is rarely seen without his black leather longcoat.
* Sanctuary: Nikola Tesla drops one of these on Helen Magnus when he looks her up after about, oh, fifty years.
* Sanctuary Saga: a retro SNES inspired deckbuilder in which players lead their guilds to settle and survive a hostile new land. Instead of playing against each other, players players cooperate to survive a narrative.
* Sanctuary seems to have only ever loved Helen despite his advanced age. There are other attractive women on the show, but his heart remains very much devoted to Helen Magnus. There is rarely an episode where he doesn't compliment her.
* Sanctuary's first season episode "Kush", there's a crash, followed by several

murders. When they settle things down by supposedly catching the suspect, he's killed and they have to reexamine their "fool-proof" method of determining the killer.
* Sanctuary's fist punched through his chest, sliced with claws, dropped from a high-rise, etc. And he's still as cheerful and annoying as ever, especially since he lacks the any of the traditional vampire weaknesses (he walks in the sunlight, can eat and drink, does not require blood, can survive a stab through the heart).
* Sanctuary, she goes brunette. She also has red hair during World War II.
* Sanctuary (she has to be naked to turn invisible). Despite the fact that their relationship lasts all of four episodes, Will later describes it as one of only two "serious" relationships he's ever had.
* Sanctuary team has no real jurisdiction, this trope comes into play a few times as they try to gather abnormal-related evidence before the law enforcement comes in and sets up jurisdiction.
* Sanctuary, that sees Faith, now back in her own body, and having suffered a serious mental breakdown and very much suicidal, being led to Angel's bed. Angel leaves a barely even functioning Faith, when she calls his name. Angel turns around only to be stabbed in the face by an enraged Faith. Only for the scene to cut back to Faith, still lying in the bed, where she says nothing, and Angel walks out.
* Sanctuary that she intends to use her as her "personal canteen," Helen spits back, "I hope you choke on it."
* Sanctuary, the characters were trapped because of a severe snowstorm which was delaying the rescue team from arriving.
* Sanctuary, the two main characters spend much of the time pretending to be strangers to each other, all the while assisting each other in their plan to shake up all social stratas of '90s Japanese society.
* Sanctuary, they become more useful when the Cabal starts creating teleporting soldiers of their own.
* Sanctuary (TLOZ) has an ambiguous scene where Malon offers for Sheik to sleep in her bed.
* Sanctuary (TLOZ) is a oneshot where Malon falls for a mysterious traveler named Sheik. Sheik turns out to be Princess Zelda in disguise. In this case, Malon learned that Sheik was a woman in disguise (but not her identity) the night they met. She still felt infatuated with Sheik nevertheless.
* Sanctuary (TLOZ), Malon thinks like a fairy-tale. However, when Malon finally realizes that Sheik is actually the princess Zelda, she mentions that "the storybook ended" and she has to go back to reality. This is subverted when Zelda comes back to her.
* Sanctuary wants you to know Helen Magnus has lived through her 159+ years on this Earth.
* Sanctuary was claimed to be a place where people could wait out the Reaper invasion. The installation is ultimately revealed to be
* Sanctuary, when Nikola Tesla's plans to rebuild the vampire species go awry, all of his former patients who have been killed turn into vampires way before schedule and exhibit completely black eyes.
* Sanctuary while Janine is the POV character and the protagonist the story evolves around the main trio, with John as the deuteragonist and James the tritagonist.
* Sanctuary: Will and Helen are among the survivors of a plane crash who are being picked off one by one by a creature that can create visual illusions. They know the creature can make itself appear to be one of the survivors, but they don't know who it is. The creature lures Will out of the plane and takes on his appearance. Helen catches it when, as Will, it offers her a cup of tea and she claims to prefer coffee; the real Will would have known that Helen hates coffee.
* Sanctuary: Will Zimmerman. Eventually he had to pass this torch to Kate, but he still gets his chances at it occasionally.
* Sanctuary, with varying degrees to each direction. It's complicated and at least partially depends on interpretation.
* "Sanctum Adroit" are much more Lawful-aligned than the Toughs; they've built a reputation on respecting the letter of the law in all their operations — even

the
* Sanctum appears like a mountaintop community with a pagan/medieval vibe, with a radiation dome forcefield that protects the residents from the carnivorous swarms of alien insects. This time around, the characters don't fall for it as easily, but are traumatized refugees desperate enough to not initially ask too much about "The Primes".
* Sandakan No. 8: So many brothels in the red light district of Sandakan, North Borneo, that they're all numbered. Osaki's is 8th out of ten.
* Sandalath Drukorlat, yet another millennia-old Tiste Andii, falls in love with and eventually marries Withal, a middle-aged human man. Their marriage is a bit of a
* Sandal Punk: Sci-fi/fantasy stories set in/inspired by ancient cultures/civilizations (Bronze Age at earliest, anything just before the Middle Ages at latest).
* Sandals, a background character, is somewhat of an idiot and is simple-minded, but he’s usually amiable and nice to other incidentals although he often joins their riots.
* Sandbar is the one pony on the Young Six. While the rest of them have notable quirks and
* Sand beaches, as well as dry lakebeds and salt flats, are favored terrain for the use of land yachts, as a fairly flat surface is needed for these lightweight wheeled vessels to remain stable.
* Sandblast Games was founded in 2002 and closed in 2008. In its six year lifetime, its only production was
* "Sandboxes are, by definition, looser than your mum on a jet engine."
* Sandbox for temporary articles, used to create drafts, manage rewriting/cleanup efforts, and experiment with markup.
* sand box this way, usually occurring elsewhere in the game's plot because of the less than serious tone much of the games have.
* Sandbox Trees (among other plants) use a form of seed dispersal known as
* Sandburg that each tribe had its own Sentinel, a person genetically-predisposed to hypersensitivity, designated as its protector. In this case, Jim is the protector of his "tribe" - the city of Cascade.
* Sand Chronicles. After finding out she's pregnant, the latter first wants to break off their relationship so the former doesn't have to worry about them, but Ann convinces her he loves her enough to not leave her side, and so they decide to marry quickly before the child is born.
* Sand Chronicles, and she's driven to tears when she finds out the delicious meat she's been eating (at the same friend's house) are what she considers precious animals (deer, boar and duck).
* Sand Chronicles and smirks when he's being snobby, yet the first two times he genuinely smiles at Ann, she blushes and admits he has a killer smile and is probably popular with women.
* Sand Chronicles, Ann notices that her love interest Daigo has gotten taller in Chapter 2 (1.5 years after Chapter 1) and she wonders if it's why she feels nervous around him.
* Sand Chronicles: Ann's father Masahiro is very poor at housework and thus keeping things clean by himself, as Ann discovers the hard way when she first stays the night at his new apartment.
* Sand Chronicles, at the end of the main story in Volume 8, Ann and Daigo (after a falling out and a nearly 10-year-long break-up) finally get back together, marry and have a baby boy.
* Sand Chronicles begins with a young girl bugging a 26-year-old Ann, who's about to move overseas with her fiance, and they find the latter's hourglass. Ann then thinks back to how she got that hourglass and its significance to her, kicking off the story.
* Sand Chronicles, Daigo does a hilarious one while drinking his cup during an otherwise intense moment where the Tsukishima siblings' mother Shizuyo's infidelity comes to light.

* Sand Chronicles, Fuji comes back to school and has to repeat the year.
* Sand Chronicles has Fuji and Shiika of the Tsukishima family. Fuji is the aloof, cynical and cold brother, Shiika is the sweet, optimistic and helpful sister. Naturally, the two aren't close at all to begin with.
* Sand Chronicles: Masahiro is hardworking and has good intentions but also a bit of a scatterbrain, and his daughter Ann says she used to think of him as "naive and unreliable" as a child.
* Sand Chronicles's Daigo is strong, athletic, good at hunting and has decent street-smarts, but he does terribly on his school tests and exams. He improves drastically in the last year or so of school (with the help of his friend Ayumu) so that he can go to the college he wants and become a teacher.
* Sand Chronicles's last chapter (of the main story) in Volume 8, Daigo and Ann are shown with their baby boy.
* Sand Chronicles: The final chapter in Volume 10 nearly ends with the wedding day of Fuji and Mariko. It's only shown briefly though, and more emphasis is put on Ann and Fuji's conversation and the gang happily walking together.
* Sand Chronicles to ensure he marries the most suitable girl for his wealthy status, to his chagrin since he wants to marry the woman he loves. He leaves before it begins.
* Sandel. When 17 and at school himself, David fell in love from afar with a younger boy, but never acted on his feelings. Tony is quickly growing up and the breaking of his voice, the growth of his pubic hair, the development of his adolescent coarseness of mind and manner will put an end to the boyishness that attracts David to him.
* Sander Cohen has filled his part of the city with plaster "sculptures" that bleed when you hit them. In one shop you walk past a series of them lining the entrance hall and, if you use the weapon upgrade station in the basement, they're not there anymore when you leave. Then you start to notice that
* Sanderson often comes off in favor of Enlightenment in his works, as they usually take place during an age of progress and innovation. The Romanticism angle is still given a fair shot, however, and more than once in his books problems have been caused by people insisting on studying things when the older, traditional way was working fine. In several books there are characters who miss the old ways (like candles versus electric lights or fireplaces versus heating magitek) but understand that things can't stay the same forever.
* Sanders Sides are manifestations of different aspects of Thomas Sanders' mind. They are, as follows:
* Sanders Sides: From what we've seen so far, the Sides' rooms can have this effect, albeit not intentionally.
* Sanders Sides has Anxiety/Virgil, who was initially introduced as a one-off character and was added to the main cast following the strongly positive fan reaction. The main plot of Season 1 ended up focusing on his befriending and acceptance with the rest of the group, and he remains a fan favorite character with major focus episodes and character arcs to this day.
* Sanders Sides. In the 2017 Christmas episode, Virgil even gives Patton a card that's signed "Best Friends," much to Patton's delight.
* Sanders Sides: The game of Patton-cake requires tuna fish, two tennis rackets, dipping someone's fingers in candle wax, and Virgil sulking in a corner.
* Sanders Sides: This is one of Logan's defining traits, especially in later episodes. This makes sense, considering he is a metaphyisical manifestation of logic.
* Sanders Sides to be one, but he has difficulty since, 1) He's simply a facet of Thomas' personality, not an actual human, and, 2) Thomas lives in modern, suburban Florida. He still tries to push Thomas into acting like one from time to time.
* Sandfury trolls seem to be based on a mix of ancient Egypt and the Aztecs. Their dead are mummified, but the couple of pyramids in the Zul'Farak dungeon are Aztec style.
* San Diego 2014 of the zombie outbreak at ComicCon 2014, because her case of adolescent attitude prompted her father to send her out of the convention center to

their hotel room. She got out of the convention center minutes before infected arrived.
* San Diego Comic-Con in 2019 comics, recalled an event where she got fan mail about Azula that, in her words, was "particularly psychotic." Combined with former writer Gene Luen Yang saying that some of Azula's fans were crazy to the point of scaring her away from trying to write for the character, and there's little hope for any extensive comic content about Azula.
* San Diego socialite Betty Broderick, after a bitter fight with her estranged husband — who had sold their home without her knowledge or consent — drove her car through the front door of the new home that he shared with his mistress. They wound up uninjured.
* Sandie Shaw, tended to go barefoot both on stage and off. Her detractors thought this was a marketing gimmick, but Sandie claimed she did it because she was afraid of tripping over wires.
* San Dimas Time: Someone has a limited amount of time to change the past before it somehow becomes too late to change it.
* Sand In My Eyes: A character who was caught crying denies that they were and gives an excuse for why they appeared to be shedding tears.
* Sand In My Eyes: Nowadays it's just as likely to be used to evoke pity for the character's inability to express his emotions honestly as it is to portray them as strong and stoic. That's assuming it's not being outright mocked.
* Sandi Patty's 1979 debut album "Sandi's Songs" had a typo where her last name was spelled with an "i" at the end instead of a "y", and considering it would be almost 20 years later before it was corrected maybe she felt a relatively minor misspelling wasn't worth issuing a complaint over.
* Sand Is Water (14th century), there is a "Sea of Sand" in India which consists of sand that flows like water, and which even has fish that are "different from other fishes" but still edible.
* Sandi, though he seems to spend more time antagonizing their father.
* Sandi Toksvig put the first bid on a horse she was acting as auctioneer for in order to start the bidding, only to receive no subsequent bids.
* Sand Land concerns the efforts of the main characters to find an oasis in a world that's nothing but desert. They're opposed by the king and his government who control the only other source of water.
* Sandler's personal assistant Jonathan Loughran who appears in most of his movies.
* sand like water and has a fortune of treasures pressed into its underside. In the first episode, it attacks Agrabah and Aladdin and friends join with a hunter who had been after the shark for years, and they succeeded in driving it off. In the second episode, the shark is slain by a race of Ewok-like desert hunters working for an evil wizard, but Aladdin and the hunter use its skeleton to repair the hunter's ship and fight the wizard.
* Sandline International and check their company profile which reveals some interesting tidbits such as that Sandline will work for. Their involvement in the situation in Sierra Leone, including the coup against Kabbah, was a source of embarrassment to former Foreign Secretary Robin Cook in 1998.
* Sandman about how you don't know if you can do something until you've done it.
* Sandman: At Death's Door by Jill Thompson, Delirium deals with the demons that crash Death's party by infecting them with obnoxious songs.
* Sandman drunk, shows them the stash, and wonders exactly why dad, (who he thought was just a kind of mousy attorney with a pony tail) had that stash and who dad really was. Towards the end of the volume we see the son again, and while he decides to give away or destroy most of dad's stash he does keep several of the fake IDs for himself. As the narration points out, it's handy to be able to disappear and become someone else when you really need to.
* Sandman: Endless Nights, a cocktail party of the gods, at the dawn of time, ends up Gumping the origins of both Superman and the Green Lantern Corps.
* Sandman, even Destiny the character has no free will. He calls a certain fateful meeting of the Endless because his Book told him he was going to.

* Sandman issue "Exiles" concerns people becoming trapped in "soft places" where the world is not quite real; one such group is a lost Legion having suffered this fate.
* Sandman Midnight Theater a party scene includes what seems to be the middle of the same joke: "...so — no, this is funny — the farmer says, 'Vicar, I'll not say another word about the poaching, if only you'll tell me how you caught all those rabbits'..."
* Sandman Mystery Theatre featured a villain/vigilante called "The Scorpion" who coated the tail of his whip with a scorpion venom which was almost instantly fatal.
* Sandman Mystery Theatre featured retro stories, taking place in this era. However some of these stories were dated to 1938, pre-dating the original Sandman stories.
* Sandman Mystery Theatre features wealthy socialite Wesley Dodds, the Golden Age Sandman, investigating dark mysteries as his costumed alter ego.
* Sandman Mystery Theatre takes place during 1938 and follows Wesely Dodds and his fight against the criminals that lurk throughout New York.
* Sandman Mystery Theatre, Wesley Dodds' basement lab is reached through one.
* Sandman Slim has a variant. Permanently killing a zombie requires the removal of the entire central nervous system.
* Sandman Slim himself). We don't know what the key looks like as Stark buried it in his body, but he doesn't need to actually fit it into a lock for it to work, either.
* Sandman Slim notes that by the third murder, killing becomes a routine.
* Sandman Slim or taking the intruder for a ride. Nosy telepathic guard gets to experience some choice memories from literal Hell and is left curled on the ground bubbling and crying.
* Sandman Slim, Stark gets it an animated table with articulated legs so that it can move by itself.
* Sandman Slim teaches us that when you die in Hell you end up in Tartarus. The main character is virtually unkillable.
* Sandman stories feature the anthropomorphic personifications of stars, specifically the suns of solar systems. The first one, in addition to our sun Sol (who was at the time an awkward teenager of only a billion years or two), also features Rao of Krypton (a red giant), and the green sun of Oa, the Green Lantern Corps' home planet.
* Sand Master applicants wear brown robes, while full Masters wear white ones.
* Sand Necktie: Domenico I Contarini, doge of Venice, captured the patriarch of Aquileia, Poppo of Treffenand, in 1045, and let him be buried up to his neck, and left guards to watch over him until he died.
* Sandokan – The Tiger of Malaysia and later simply retain the habit (more in the latter's case, however), while Tremal-Naik does it due to his indigenous ways.
* Sandokan – The Tiger of Malaysia" is actually Yanez, Sandokan's second-in-command, in disguise, demoralizing them is all part of the plan.
* Sandokan actually having him as the declared protagonist. Ironically, Yanez's Revenge is the novel in which Sandokan takes back the spotlight.
* Sandokan and Yanez. Completely different in personality, but they'd die before leaving the other in trouble. Bonus points for actually calling each other brothers.
* Sandokan cartoon, the eponymous hero has regained his rightful throne of Sarawak, defeated and captured the wicked Rajah who usurped it, made friends with his other enemy Lord James and married his beloved Marianna (Lord James's niece)...but Baron William — Lord James's right-hand man and Sandokan's bitter rival for Marianna's heart — cannot bring himself to end their feud and helps the Rajah escape. The final shot is of the Rajah and the Baron contemplating vengeance as they sail away in a small boat...
* Sandokan, exists only to be Sandokan's rival for Marianna's love, and his only chance to marry her was to have lord Guillonk force his niece.
* Sandokan go barefoot, including Tremal-Naik, Kammamuri and sometimes even Sandokan himself.
* Sandokan, he and the British imperial government have an informal agreement that

allows Sandokan and Yanez to do as they wish (even buying weapons from them) as long as they refrain from damaging British interests (Yanez even carved out a nice empire for himself right in the real-life Raj, with the Brits not interfering because he had deposed a corrupted prince and opened his country to trade).
* Sandokan, it happens to unlucky prisoners who don't want to spill the beans. The one who got it worse is an alleged Meccan Pilgrim, who, captured by Yanez and the original (American) crew of the King of the Sea, was subjected to the water cure by the Americans and broke just as Yanez begged them to stop.
* Sandokan. It's a plot point that Marianna being the kind of girl that goes on a tiger hunt and has a good chance of being the one who scores the kill is the result of her uncle taking her with him when he cruised the Indian Ocean to hunt down pirates.
* Sandokan, kicking his ass in battle even before being introduced (it helped that his cruiser outgunned Sandokan's two prahos by a fair margin, but he had to fight it smart to avoid a boarding until it would be useless) and trying to seduce Marianna.
* Sandokan: Lord Guillonk's character is often fused into James Brooke's in retellings.
* Sandokan offers a strange example: Sandokan expects the commander of the ship he's using to shield him from incoming bullets (it's all but stated that it's part of their rules), and even reprimands him when he fails to do so and another pirate dies in his place.
* Sandokan series Sambigliong, the third in command of the Tigers of Mompracem, is this to both Sandokan and Yanez.
* Sandokan series, Yanez. While Sandokan is no idiot, it's Yanez who does most of the thinking and deals with outsmarting enemies.
* Sandokan, superior firepower is the main advantage of the British, and they 'will'' use it. The titular character is a fan, too, and whenever he can he'll field Maxim machine guns.
* Sandokan: The titular character will try and avoid a battle he can't win, and retreat when he gets his ass kicked, if only to return in force and take revenge.
* Sandokan, they can't find a place to call home, and as soon as the British gives away Mompracem they reconquer it from the Sultan of Brunei.
* Sandokan. This is particularly notable because there already was a named character, Juioko, known to have taken part to that ambush and survive the fall of Mompracem, but him and the other named pirates would not be mentioned anymore.
* Sandokan to kill him, and even then he has the time to complain for the destruction of the machine he just blew up an enemy ship with).
* Sandokan, when Bharata prepares it and Macpherson tricks Tremal Naik in drinking it, with many others (including the Thuggee and James Brooke) knowing how to prepare it.
* Sandor Clegane against Beric Dondarrian over Sandor's murder of Mycah the butcher's boy. In spite of the fact Sandor is guilty, and the fact Beric wields a
* Sandor Clegane and Arya Stark trek through it on their way to the Vale.
* Sandor Clegane becomes known as the Mastiff of the West and the Krakenslayer after his role in Balon's Rebellion.
* Sandor Clegane has nasty scars on his face from his brother holding his face into a brazier as a child.
* Sandor Clegane, in both appearance and effect. His armor is uniformly ominous black, and like the black knights of historical Europe, he no longer serves a master. Granted, he was never officially a knight, but still. Particularly noticeable after Arya gets a
* Sandor Clegane. In the novels there's a hooded gravedigger at a monastery that fans believe is Sandor.
* Sandor Clegane is no great wit and about the last person you'd ever see as a jester. Yet, he has this tendency of actively pointing out the grimly amusing absurdities and contradictions that living in the Seven Kingdoms regularly throws in front of him and then leaves it up to whoever his audience is to find their own punchline... or give in to despair. Whichever.

* Sandor Clegane is riding up to the Twins when Frey soldiers suddenly turn on their Northern allies and massacre them. Sandor escapes the carnage by picking up a discarded Frey banner and riding out of the camp holding it.
* Sandor Clegane so despises this trope that he refuses knighthood even when he joins the previously knights-only order of the Kingsguard.
* Sandor Clegane turns up in Season 6, having been saved and brought back to health by Septon Ray and his people. Though Clegane is gruff and grouchy as ever, it's clear that he cares about them. He is truly horrified later when he finds them butchered by Lem Lemoncloak and the other rogue Brotherhood men. When Sandor retrieves his axe, it's clear that Lem and his buddies done fucked up.
* San d'Oria has the Royal Guard, Windurst has the Patriarch Protectors, Bastok has the Mythril Musketeers, and there are also the Immortals of Aht Urhgan in
* Sandor lets Brienne know that he sees her as this when they meet again at the end of Season 7, noting that she came closer to killing him than anyone else.
* Sandor notices Oathkeeper's garish hilt and pommel and is quickly able to figure out who made it and gave it to its wielder.
* Sandor's horribly disfigured face can be... off-putting to say the least.
* Sandor "The Hound" Clegane wears a snarling dog helmet and is Joffrey's human
* Sandor uses a wood axe as his main weapon in Season 6 and uses it to take vengeance on a group of renegade members of the Brotherhood Without Banners.
* Sandpaper Kiss focuses on one of these, by the name of Lucy, though a deconstruction of the trope as she was created in an illegal hybridisation experiment, and is a hybrid of a human girl and a white tiger. As a result, she suffers from disabilities thanks to her awkward, cat/human anatomy, such as not being able to speak English properly (her lips aren't as flexible and can't produce the right sounds).
* Sandpaper Kiss revolves around a group of human-animal hybrids being created in a lab. Their hybrid anatomy makes them prone to disabilities — Lucy, a human-tiger hybrid, is unable to speak English properly thanks to her feline lips.
* sand powers can turn a person into a mummy by sucking the moisture out of their bodies. Crocodile killed multiple bandits this way and almost took out Luffy the same way.
* Sandra also admitted to problems reaching orgasms in an early strip, but this seems to be less of a problem for her; there are hints that she reaches climax sometimes when drunk, if only because it inspires her to have bizarrely kinky sex. The problem certainly hasn't been mentioned since she moved to
* Sandra and Woo (and a patent!) of correcting grammatical and spelling mistakes in graffiti.
* Sandra and Woo, and Woo observing that while he was expecting belly rubs, he still is very glad they visited.
* Sandra and Woo between Sandra and Cloud, until she realises she values her friendship with Sandra more than she wants Cloud as her boyfriend.
* Sandra and Woo, but only Woo is able to communicate with humans. He's not talking to anyone but his owner Sandra, though, since he is afraid of ending up in a laboratory otherwise.
* Sandra and Woo, but the father is all too happy she's dating a nerdy nice guy and gives him tips on how to avoid sinking the relationship instead.
* Sandra and Woo gets its arm lopped off by Yuna. Regardless of whether this actually happened, it does manage to keep David awake the rest of the night staring at his closet, terrified of the monster coming back for revenge.
* Sandra and Woo has Hitomi, a young Japanese woman whom Richard met on a business trip to Japan, who dresses as a cat girl. This serves as a source of anxiety for Hitomi when she moves to the U.S. to be with Richard as to whether Sandra would take her seriously as a stepmom.
* Sandra and Woo. In fact, a flashback reveals that she first met her best friend Larisa during one such visit.
* Sandra And Woo In The Cursed Adventure starts with Sandra finding herself naked at a school play rehearsal. When she wakes up, she suddenly remembers her costume for said play is not ready, implying the dream was her subconscious's way of

reminding her.
* Sandra and Woo is considered very attractive by her schoolmates, has no qualms (and in fact prefers) to use sex appeal to get what she wants, and speaks with a noticeable Russian accent.
* Sandra and Woo often display Zoey Irwin and reference that she's gay, suggesting the comic has LGBTQ themes. However, Zoey is a minor character who only shows up in a handful of strips, and is the only gay character in the comic.
* Sandra and Woo only read it for the animal characters. A lot of the characters in the comic are human and many of the stories focus only on the human characters. The comic has been advertised for on Furry websites with ads that mainly showed the animal character, so many Furries were drawn to the comic thinking that it was mainly about animals.
* Sandra and Woo serve as protagonist and deuteragonist, respectively. The comic gives roughly equal narrative focus to Sandra's life in the human world and Woo's adventures with his fellow forest animals (and sometimes crisscrosses both together, notably during the story arc where Woo gets kidnapped by predators).
* Sandra and Woo, she has remained faithful to him the entire time they've been together (well over half a decade real world time), and there's no sign that they're going to break up any time soon.
* Sandra and Woo strip, Sandra is exploring the attic with her pet talking raccoon, Woo, and finds a raccoon-skin cap. She immediately hides it behind her back and lies to Woo so he won't see it.
* Sandra and Woo tendencies, by no means a flat character. That said, we sometimes get some indications that beneath the depths she's covering up, there are even deeper depths we're not privy to.
* Sandra and Woo theorizes where loot from a robbery may be hidden, goes searching there with Larisa, Cloud and Woo. After finding nothing, they go home with several (more or less serious) aesops. A few minutes later, Cloud's mother finds the loot, inches away from where the kids were looking.
* Sandra and Woo to act nice to the herbivores, but it turns out to be a trick to attack and eat the herbivores now that their defenses are down.
* Sandra and Woo to use as a succubus rather than torment her for eternity).
* Sandra and Woo when Larisa accidentally sent a nude pic to 60 million people.
* Sandra and Woo, Ye Thuza Williams, was a child soldier in Burma. As a result, she tends to teach her children how to employ violence as necessary with mixed results.
* Sandra Boynton album "Rhinoceros Tap", is basically a song about this.
* Sandra Boynton three-part song "Cow Planet", sung by Billy J. Kramer, episode 2 heavily implies this is starting to happen to the crew by then. The voices sound deadpan and irritable, and some of the lyrics even suggest that some are getting sick of each other. "We've got a blazing afterburner, it's an irritating drum..."
* Sandra Bullock. In the future Linda sees, her husband Jim dies, she goes crazy, is suspected of hurting her daughter, and gets committed to an insane asylum. Her efforts to prevent Jim's death create Self-Fulfilling Prophecies, and the film's "happy" ending consists of a reveal that she was eventually released from the asylum, now pregnant with another child.
* Sandra Bullock with her best friend. She thinks she's there for a makeover. They're really there so the best friend can confess that she's been having an affair with Birdie's husband Bill, who is then brought out and admits that it's true. To make matters worse, Bill and Birdie's eight-year-old daughter is in the front row of the audience.
* Sandra is shown to visit her mother's grave on several occasions in
* Sandra Lee call themselves "shrikes." The name "shrike" came about when a Sandra Lee defender commented on an article about Sandra Lee and called her detractors "shrikes." Conversely, her fans are referred to as "Fandras."
* Sandra Lee, once again from Food Network. She fits the "dosed up on caffeine" requirement .
* Sandra on the Rocks) about the world of modeling, so stripperific costumes are sometimes more or less justified:
* Sandra on the Rocks, and anyway she's more interested in Alex). Fortunately, it's

all quite amicable on both sides.
* Sandra on the Rocks annoying, still continues to work with him when she could doubtless do very well independently.
* Sandra on the Rocks, Eloise wants to break up the relationship between Sandra and Pierre, who she wants for herself. Her methods get distinctly over-complicated, mostly because she also wants to destroy Sandra completely, for various reasons.
* Sandra on the Rocks even leaves her shades on during sex, and never drops her cool attitude either.
* Sandra on the Rocks is about a relatively Next Door-ish Girl who nonetheless finds herself employed as a fashion model.
* Sandra on the Rocks might appears from the caption to be an example of this trope, but actually turns out to be a simple one-panel flashback.
* Sandra on the Rocks might be considered a little worrying of her, too.
* Sandra on the Rocks over virtually anyone in the cast through a combination of height and force of personality.
* Sandra on the Rocks, Sandra tries to use Aaina as her fake lesbian lover as a way to regain Cammi’s interest after Cammi has taken up with Ingrid. This is rather petty of her, as she can only act on her lesbian attraction to Cammi when she's drunk, and she has a boyfriend to whom she's supposedly faithful, while Aaina has a genuine crush on Sandra and is likely to end up hurt by this.
* Sandra on the Rocks shows nameless attractive women in the beds of the sexually highly successful Domenico and Cammi. Given that it's a comedy about modelling, and far from shy about a little fanservice, it can be expected to show a little attractive flesh in the background at other times too.
* Sandra on the Rocks stripped, because Tatiana lost her glasses and couldn't tell the difference between them.
* Sandra on the Rocks when Aaina alludes to the existence of her twin Aania.
* Sandra on the Rocks (who seem to be a pair of liberal-minded old hippies). It does later turn out that their friend Marie hadn't noticed, but Marie can be a bit oblivious sometimes.
* Sandra on the Rocks who works as a computer games industry gopher, is the one who attracts the nickname "Legs" from another character, and who is drawn to fully justify the compliment.
* Sandra pleading with Jeremy to stay with her also qualifies as this.
* Sandra's "Carmen Chamelia" (video game character) costume requires double-sided tape to keep it on her boobs.
* Sandra. She even repeats the trope title in strip #302 (May 17, 2010, NSFW). Other characters in the comic also occasionally come round from binges with dim and worrying memories of what they did the night before.
* Sandra was a fan of the "Carmen Chamelia" videogame in her youth. During the story, she ends up modelling as Carmen for the reboot of the game. She does have to take a crash course in contemporary geekery, though.
* Sandro Penna's celebrated poems, which are largely about boys, since "everything else is uninteresting". In Penna's only collection of prose there is a short story in which a man is attracted to a working-class boy of 12 or 13 whom the man sees in a barbershop.
* Sandry also comes from a noble family, and maintains the beliefs that the nobles are obligated to help those less fortunate and powerful than themselves. She sticks to this pretty well, to, although she does occasionally get a selfish streak.
* Sandry has a good bit of survivor's guilt over the smallpox plague that left her orphaned, and after the second book, Tris has to deal with having personally destroyed an attacking pirate fleet and watched hundreds of innocent galley slaves drown in their shackles as the ships sank. In the
* Sands at the same time (it also changes light color to red) and mild version, that slows down both enemies AND Prince, but leaving unchanged Prince's perception of time and reaction, which gives him slight advantage.
* Sand Scrying: With a fine sand spread in a tray the process is similar to automatic writing, in that you allow free flow while holding a pencil or stick lightly in the sand surface. Patterns in the sand can be letters or shapes that can

be read intuitively.
* Sand Sharks. A bunch of armored demonic-looking sharks that breathe air and swim through sand terrorizes a cliffside beach.
* Sand Sharks. But of course, they are actually talking about a prehistoric version that can swim through sand.
* Sand ships and sand dolphins can be purchased in the ridiculously advanced future of
* Sandshrew and Sandslash are often assumed to be mice of some sort; the English Pokédex even describes them as "Mouse Pokémon." But they're actually based on the
* Sands of Destruction and has the power to destroy the world and Toppi really doesn't want that.
* Sands of Destruction and isn't amused at the implications. Kyrie quickly backpedals.
* Sands of Destruction an "M"-equivalent rating, that way it would be available to a wider audience. (Of course, good luck finding any copies of the game in America without resorting to eBay.) They didn't tone it down entirely, it's still rated "T", which is pretty much the "PG-13" equivalent for video games.
* Sands of Destruction as they talk. However, at the end of the game, Kyrie proclaims that he won't destroy the world because he has people he loves now, and they love him. Morte's text response has an exclamation point and her sprite animation seems embarrassed, but her face portrait is neutral rather than lovestruck and her voice is about the same as one you'd use to ask him to pass the salt at dinner.
* Sands of Destruction at best, except that the romantic resolution is given little more than a light nod.
* Sands of Destruction because the posters are so bad. They change as you fight more battles, too, but never seem to get any better at capturing your likenesses.
* Sands of Destruction did occasionally feature her tugging at him, but he usually came willingly rather than being dragged.
* Sands of Destruction explains that the ferals forced their humans slaves to work to their graves on a nearby mine without caring about the dangers of mining in such a hazardous area.
* Sands of Destruction features a couple, though who and to what extent varies by adaptation:
* Sands of Destruction) features the World Destruction Committee. Guess what they want to do? They are opposed by the World Salvation Committee; no points for guessing what they want to prevent.
* Sands of Destruction for protection (while Kyrie and the others who'd gone on ahead had the sense to don proper winter coats).
* Sands of Destruction has her jumping in front of a red crescent moon before delivering maximum pain.
* Sands of Destruction has the Ursa Major species, which look like regular bears, and the Ursa Minor species, which look like teddy bears.
* Sands of Destruction has two moons. No one comments on it, however, as it's normal to the characters and there's no reason they should think the sky ought to have only one moon; it's purely there for the viewer's interest.
* Sands of Destruction, he's overjoyed to see Morte and with the fact that she's gone through such trouble to find him again. It takes a few moments before he realizes the rest of the team is there, too, and then he thanks them as a group.
* Sands of Destruction. Higher-ranking members like Naja get to wear their own clothes.
* Sands of Destruction, his nonhuman father is the previous Lupus Rex.
* Sands of Destruction how to do it, and he'd be powerless to stop her. Oops.
* Sands of Destruction If you mess up, Kyrie will helpfully remind you what he did before and where you should go next.
* Sands of Destruction instead of relegating her to the sidelines so he can shine.
* Sands of Destruction. In the game and anime, she was more serious. While she did show a sense of humor in the game at times, it wasn't a constant thing and she

never seemed particularly naive.
* Sands of Destruction, Kyrie's destructive powers are shown twice in all their sand-inducing glory.
* Sands of Destruction mentions that they're attracted to sound, as it's difficult to actually see in the sand.
* Sands of Destruction: Morte pulls a non-romantic version on Kyrie and Taupy, attempting to convince them to leave because the World Salvation Committee is hunting her and she understands if they'd rather not get involved. They decide to stay, of course.
* Sands of Destruction of Africa, complete with deserts and Savannah. The biggest sign of civilization is the complex operated by Elephas Rex, and travelers who fail to take precautions usually collapse from heat exhaustion before they reach it.
* Sands of Destruction. On the Committee side, Naja is 17 and his commander Rajiv appears to be about the same (but is never given an exact age). The leaders of both groups are shown to be adults, however.
* Sands of Destruction played it a bit more realistically, with humans being capable of walking on the surface of the sand sea, but the snake-like sand whales still swim in it freely and humans typically use boats to get around on it because they're more efficient than walking.
* Sands of Destruction repeatedly claim that humans stink (and that half-humans like Naja stink just as bad). This is yet another reason humans are considered second-class citizens.
* Sands of Destruction. She even punches him, much to the amusement of their teammates.
* Sands of Destruction, so aside from a little ending shot of the happy couple, the writers don't have to deal with them.
* Sands of Destruction, so many times it's not funny. It's to be noted that he has the potential to defend himself but he never does.
* Sands of Destruction, such as when Agan's true feelings show that he values his ship more than the lives of Kyrie and Taupy.
* Sands of Destruction, Taupy introduces himself to Kyrie (and the reader) by jumping in front of him and catching a dozen or so bullets.
* Sands of Destruction, their relationship is that of siblings. It isn't stated exactly where Morte's parents are or what happened to them, but when visiting the Bacchitav Caravan, they're not there and she's clearly on good terms with Agan's mom, perhaps implying that they were actually raised as siblings.
* Sands of Destruction). The one place their uniforms might provide some camouflage, the Winter Isle, is the one place you'll never encounter them.
* Sands of Destruction. They look like large, green worms with flippers and vaguely-whale-like heads. They're also supposed to be gentle, but the impending end of the world has turned them violent.
* Sands of Destruction, though, Kyrie finds the incongruity between Taupy's appearance and abilities a little unsettling.
* Sands of Destruction traps Kyrie and co inside her dimension where she uses her powers to reopen old wounds, forcing the group to face past regrets. Then it was revealed that Morte proved to be immune to the effects. Everyone pretty much arrive to the conclusion that she exactly the kind of unapologetic person who has lived her life without regrets or remorse. She obviously wouldn't be affected by the illusion.
* Sands of Destruction wears a patch across his right eye; it isn't stated how he lost it. In one episode, he meets up with an old adventuring buddy named Yappi who also wears one.
* Sands of Destruction when she wins a fight. The game's opening also shows Rhi'a walking around with Naja, and the anime has them working together in the World Salvation Committee, with Rhi'a angry and indignant that Morte wants to end the world; in the game, Rhi'a joins the World Annihilation Front out of curiosity and sees the end of the world as its unavoidable fate, whether at Morte's hands or not. The anime was created midway through the game's production cycle, and it's obvious they were working with old scripts: the locations and characters are all there, and

even in mostly the same order, but characters' personalities - especially the girls - and the precise chain of events are quite different.
* Sands of Sarasvati to escalate the force of global warming, as well.
* Sands of the Kalahari, O'Brien, aware he will be prosecuted for murder if he returns to civilization, chooses to remain behind when the others are rescued. With O'Brien the sole human in their domain, the baboons become more belligerent. At first he is able to keep them at bay with his rifle. When he runs out of ammunition, O'Brien brazenly challenges the alpha male to a fight and succeeds in killing him with his bare hands. In the film's final shot the remaining baboons encircle the lone hunter and ominously amble towards him.
* Sands of Time series is to use his great agility to run up an enemy's torso and vault over them, thus getting into position to whale on them from behind.
* Sand. Sometimes associated with Time, evoking hourglasses, Ancient Egypt or the ability to make things crumble to dust.
* Sandstorm introduces the dry lich and salt mummy, undead whose desiccated bodies are damaged by contact with regular water as if it were holy water.
* Sandstorm. They can remain inside desert tombs for centuries, but when attacking living being they can consume their preys entirely within a few rounds.
* Sandsverse videos and cryptic posts peppered across the Sandsverse blogs... in between their usual surreal shitposting, of course.
* Sandswept. To quote: "Your name is KENT and you REALLY LOVE PRANKS".
* sand to attack Rick and others when they are trying to chase him down.
* Sand Worm: Enormous, wormlike beasts that tunnel unseen underground to attack prey walking above.
* sandworms have these, which look like a miniaturised version of the same creature with a different colour pattern.
* Sandworms swim through the deserts like through the water. The sandworms also generated intense heat and triggered some extremely powerful electromagnetic storms from all the friction. The sandworms' larvae are plankton-like and serve a similar function in the sand ecology.
* Sandworms they're not used on Arrakis. So the Fremen have spring-loaded poison dart guns and the Baron Harkonnen revived artillery for his coup.
* Sandy also counts somewhat in "Prehibernation Week", when she's trying to get as much "fun" done as quickly as possible. She's completely oblivious to how SpongeBob feels about her idea of fun, but by the end, she realizes the error of her ways and apologizes for it. She even makes SpongeBob play Extreme Jacks, which is basically collecting the jacks and catching a bowling ball
* Sandy as well, especially with how berserk she went when SpongeBob and Patrick made fun of her home state of Texas. When Hurricane Sandy hit, many people joked online that someone must have made fun of Texas.
* "Sandy (Dumb Dog)", as Annie never brings Sandy to the foster home and adopts her afterwards.
* Sandy Dumbrowski became Sandy Olsen, in part due to Olivia Newton-John being cast in the role (and the character being changed to Australian).
* Sandy gains an enormous amount of weight in order to hibernate in "Survival of the Idiots".
* Sandygast and Palossand are animated sand cursed by the grudges of restless dead Pokemon.
* Sandygast is a haunted mound of sand that evolves into Palossand, a haunted sand castle. They possess people and control them to supply them with sand to grow larger.
* Sandy has a nose more like a cat's than a real squirrel's, and her incisors stick out of her mouth like a beaver's.
* Sandy is usually absent from episodes that primarily take place at the Krusty Krab. Conversely, Squidward and Mr. Krabs are absent from episodes that primarily focus on Sandy.
* Sandy Koufax of the Brooklyn/Los Angeles Dodgers, arguably the most dominating pitcher in MLB since the "Dead Ball Era," was forced to retire at age 30 after developing arthritis in his pitching arm.

* Sandy Mitchell, although Drake would probably be better suited to retreat last from the mutant, Horst says that he's the leader and will be the last.
* Sandy Mitchell, and when Cain hails them, still demands that he prove it.
* Sandy Mitchell as the source of all evil (even though, from her point of view, it's fortunate, as it means he won't guess at the truth).
* Sandy Mitchell books, Cain has run into Chaos cultists who commit human sacrifice.
* Sandy Mitchell but admits he can remember every detail of his first sight of her.)
* Sandy Mitchell, but given the relative condition of their forces. . . .
* Sandy Mitchell by the necessity; recording it, decades later, causes him to reflect sadly on the number of dead he knew, and whom no one else would remember as soon as he died.
* Sandy Mitchell, Cain and his group travel in stolen ork vehicles. This does distract the orks, but when they come into firing range of an Imperial force, they nearly get fired on before they manage vox communication, and the force demands proof.
* Sandy Mitchell. Cain engaged in a conflict with Chaos forces that were chasing a praetor; the praetor filled him on the danger and was injured. Later, he met a PDF general, his father, and praised his son's courage to him, manifestly inspiring paternal pride. He heard afterwards that the general had objected to his son's going into the praetors, and the incident brought about a reconciliation.
* Sandy Mitchell). Cain immediately orders the tunnel to be sealed off with explosives. When he returns to the spot some time later, however, he finds that a hapless ambull has tunneled around the rubble.
* Sandy Mitchell, Cain is stopped on the battlefield by a tau soldier to carry a message. He's glad that he'll survive since they are unlike to shoot their messenger — now he just has to worry about whether the general to receive it will. (Not for bad news, this time; for treason.)
* Sandy Mitchell, Cain's first request when they connect with Imperial forces is for medical attention.
* Sandy Mitchell: he jumped through their gate, having seen a wounded Necron come through it and guessing there were friends on the other side.
* Sandy Mitchell hellhole and more as a corrupt and incompetent but functional modern military-industrial state like the UK or America writ large does seem to be starting to take hold.
* Sandy Mitchell, in face of a corpse that had been torn to shreds, Kyrlock guesses that he didn't cut himself shaving. (Drake appreciates it; he had been on the verge of vomiting.)
* Sandy Mitchell lost several fingers in a fight with necrons. The replacements are augmentic.
* Sandy Mitchell novels, Cain alludes to his numerous amorous adventures (at least, prior to meeting Amberley Vail), but never to getting into trouble as a consequence, and the one occasion where he meets up again with an old flame she is perfectly happy to see him.
* Sandy Mitchell novels, several people keep tanna tea on hand because Cain is rather fond of the drink. These include Amberley Vail, who was once persuaded to have some by Cain and pronounces the drink "distinctive."
* Sandy Mitchell novels, the Valhallan regiments he is attached to fight well on cold worlds.
* Sandy Mitchell story, a soldier tells Cain, THE HERO OF THE IMPERIUM, he's not what they expected. Cain laughs and reels off all the things they doubtlessly did to prepare for his arrival — including dismantle the stills.
* Sandy Mitchell takes several occasions to help wounded troopers. Which gets him nicely out of the line of fire.
* Sandy Mitchell telling the truth about what he does, he's often actively trying to avoid danger and yet somehow ends up in it, so you can agree with his self-depreciation. On the other hand, more of the time he actively puts himself in harm's way even when there are numerous moments he could have quietly slipped away

with no one the wiser and no harm to his reputation.
* Sandy Mitchell, the students at the schola. Starting with Sprie who is piloting Cain's shuttle when the attack comes and analyzes it for Cain. At one point, Cain observes that the schola could pass for an Imperial Guard post if the faces weren't so young.
* Sandy Mitchell, two new Imperial Guardsmen are introduced on guard and grumbling, "Join the Guard and see the galaxy."
* Sandy Mitchell, when Kyrlock and Drake are standing guard at the beginning, Kyrlock produces a drink distilled by one of the tank drivers.
* Sandy Mitchell who would abandon anyone to save his own skin, is horrified.
* Sandy Petersen." Students of Petersen's recent game design courses say that he has maintained this stance.
* "Sandy, SpongeBob, and the Worm" has Sandy arrogantly going after an "Alaskan Bull Worm" threatening Bikini Bottom. She attacks and ties a knot in what she thinks is the worm before SpongeBob can tell her that it's actually the worm's
* "Sandy, SpongeBob, and the Worm" - the scene where Spongebob and Sandy are running from the worm uses very obvious CG on the coral/trees.
* Sandy Springs, Georgia and the other "contract cities" that have sprung up in the metro Atlanta region; their local government is made up of the four guys that sign contracts to allow for CH2M Hill performing all of the actual work.
* Sandy's reaction to the titular "jokes" (which are little more than racist insults) is a very justified
* Sandy the Golden Boy/Sanderson Hawkins. First appeared in December, 1941. He would later assume
* Sandy Tobias Offenheim had a children's song called "Are We There Yet?"
* Sandy was able to neutralize Erinn in a challenge in Tocantins by pulling Erinn's bikini top strap backwards.
* Sandy was originally voiced by Mercedes Prato but was fired for the same reasons as Martínez, leading her more famous successor Anabella Silva (as well as Yaraivi Alcedo, Lidia Abautt, and Lileana Chacón) to take over.
* Sandy was this in the early seasons. As the show progresses she became more of a
* Sandy wears one so that she can survive underwater. Although she does wear a suit, it looks more like a space suit than scuba gear, and as shown in the episode "Pressure", it doesn't really seem to do anything; it's the
* sane partner of Amanda. Or at least looks like one most of the time. Much to his chagrin, Tedd gets this at times when he's wearing his glasses. (Has he been transformed with them on?)
* sane) when he thinks somebody else did the job. Furthermore, he proclaims the self-imposed parallel as well where all he wants is to drive Batman to the point where Batman will kill him, thus crossing the line.
* Sanford and Son, and as such Fred possesses many of his counterpart's traits.
* Sanford and Son during this 1970s situation comedy, which Redd Foxx perfected as part of Fred Sanford's manipulative, psychological games to get his way. Basically, Fred – when he was greatly upset, wasn't getting his way, or was shocked — would fake a heart attack by clutching his chest and staggering around, yelling aloud something along the lines of "It's the big one! I'm comin' to join ya, Elizabeth!" implying that he was having a heart attack that would be the death of him. Everyone — particularly his son, Lamont (who in the premiere episode claimed that his father had faked at least two dozen heart attacks beforehand) – learned to ignore Fred. (But a funny one at that.)
* Sanford and Son "Ebenezer Sanford" as a local teen who asks Fred to put him to work so he can earn at least enough money to buy his parents a Christmas present.
* Sanford and Son episode "Sergeant Gork", Fred tells several tall tales about his exploits in WWII, one of which includes his taking a cyanide pill after being captured by the enemy. (After writhing in pain for several moments, he reveals that he accidentally bit his tongue instead, earning him the Purple Heart.)
* Sanford and Son featured one at least once. It contains BBQ sauce, OJ, a raw egg, Tabasco, and three other liquids from unrecognizable bottles of shades from brown to red.

* Sanford and Son: Following a fight with the ex of a girl he's seeing, crazy old Grady Wilson puts a slice of bologna on Lamont's black eye because, as he says, steak is much too expensive.
* Sanford and Son had Fred perform outlandish gesticulations to prompt the other bidders to go higher—after seeing Lamont do it—and he ended up buying the very piece the two had put up for sale, at a ridiculous markup.
* Sanford and Son had Fred Sanford tearing a tag off a chair, reading out loud that it says "do not remove under penalty of law." He tears it up and quips "Well...power to the people!"
* Sanford and Son is heavily invoked in "The Hawaiian Connection" trilogy. While Fred and Lamont get caught up in a diamond smuggling ring that's being investigated by the actual Five-O, references to Steve McGarrett (famous hair and all) are made throughout, implying that in-Sanford-universe, McGarrett actually works for the actual Five-O.
* Sanford and Son. J.D. reminds him that he does, in fact, love that show, and they both do an a capella rendition of the theme song before continuing their conversation. Incidentally, Turk also plays basketball but is not necessarily better than the other hospital employees he and J.D. play with.
* Sanford and Son other than the title characters were this with Esther, Grady and Bubba being the most frequent offenders.
* Sanford and Son parody), where Fred walks offstage and ends up walking (and ranting at the same time) into a camera.
* Sanford and Son: While Fred was away in St. Louis, Grady chases away some of Lemont's friends with a rifle. When Lemont talks to him about it the next day, Grady claims he didn't load it, then starts pointing it around the room, though only at the ceiling, claiming "You sure can scare people with an empty gun", then pulls the trigger and when it fires, he's so startled he drops it.
* Sanford and Son: While no means an all-American beauty, Aunt Esther's physical appearance is constantly the butt of Fred's cruel jokes. Example: "Was your mother a gorilla? Because you got the face of one!"
* Sanford is wanted for murder, telling lies, torturing, kidnapping, conspiring, arson and for being ugly.
* Sanford Wallace, the self-titled "Spam King" (e-mail, not meat product) was a firm believer in this. In the end, though, his spam "empire" has been smashed into little bits, and except for occasionally being targeted by lawsuits that mostly fade into obscurity fairly quickly, he's mostly a non-entity on the internet.
* San Francisco, 1951. The Dons finished undefeated and received an Orange Bowl invitation on the condition that they not bring their African-American players to then-segregated Miami. The team refused the invitation and dropped out of major college football after the season (they permanently disbanded in 1982).
* San Francisco 49ers quarterback Alex Smith sat out one week with an injury and his backup Colin Kaepernick led the team to Super Bowl XLVII. Later subverted, as Smith would succeed with the Kansas City Chiefs, while Kaepernick would struggle following head coach Jim Harbaugh's departure after the 2014 season, to the point where he had to compete against Blaine Gabbert for the starting job. Possibly
* San Francisco 49ers safety Ronnie Lott - having had his left pinky finger crushed in the 1985 regular-season finale - elected to have the tip of that pinky finger amputated due to the fact that a bone graft (the other option available to him) would prevent him from being able to play at the beginning of the following season. Lott would play 9 more years (including winning 2 more Super Bowls with the 49ers) en route to being named to the Pro Football Hall of Fame.
* San Francisco, and she spends much of the beginning of season 2 getting back into Marshall and Ted's good graces. But since the show is told in flashback, we already know Marsh and Lily end up together.
* San Francisco Giants and "Even Year Magic" (or "Even Year Bullshit" to the rest of the league). They won a World Series in 2010, finished 4 games back of a playoff spot in 2011, won a World Series in 2012, finished fourth in their division in 2013, and won a World Series in 2014. After a 3-1 loss to the Cubs in the 2016 National League Division Series, the Giants no longer benefit from this effect.

* San Francisco has Special Patrolmen, who're frequently hired to provide security at museums, public libraries, and private universities within the city. The difference is they do NOT have the same peace officer status as the NYPD. They only have peace officer status while at the location they're hired to protect, and have no arrest powers while off duty. Most special patrolmen don't even carry guns.
* San Francisco International Airport for the TV show of the same name
* San Francisco. In the old days, you'll have heard Italian along the way.
* San Francisco, leaving him badly wounded and most of the bridge crew dead.
* San Francisco—all acknowledge their LGBT fans in various ways, such as annual Pride Nights and anti-bullying efforts.
* San Francisco" on the radio - a variation that actually keeps the rhyme.)
* San Francisco Patrol Special Police agencies are an additional police force for paying customers that have the same peace officer status as the regular SFPD.
* San Francisco Rush arcade games are Mission Pack Sequels of the original; while the tracks and graphics have changed, the fundamental gameplay and emphasis on real-world physics does not. The home console versions add additional modes that don't involve racing around a track.
* San Francisco Rush exaggerates this trope with the "Suicide" cheat, in which even the lightest tap between cars will cause both of them to explode.
* San Francisco Rush instead, reflecting LA's notoriously poor air quality.
* San Francisco Rush. In the latter two, you had to push the clutch while starting the car to avoid stalling.
* San Francisco Rush of the arcade version, as well as two of the BGM's from the Dreamcast version to go with the new tracks. The tracks also had new shortcuts added.
* San Francisco Rush's Dreamcast port has the song "Internet" from the intro of the N64 version in its sound test, though it is unused in this version.
* San Francisco when the Pride Parade hits town. In fact, a lot of big cities across the world would qualify.
* Sang-Froid: Tales of Werewolves calls them wolf traps, but the principle is the same. They'll insta-kills regular wolves, and will hold down the stronger werewolves for a while, especially after upgrades.
* Sang-Froid: Tales Of Werewolves carry an axe and either a rifle or a musket as their personal weapons switching between the two at need.
* Sangheili/Elites lined with differing amounts of teeth, varying by game.
* Sangheili ("Elites") typically use a given name and a surname, with the surname made up of a prefixed apostrophe, their house name, and usually a suffix denoting status. For example,
* Sang Lan was paralysed from the chest down in 1998 after a simple warm-up move went freakishly wrong because she was distracted by a coach.
* sang live (if understandably breathlessly at times) the whole time. It was one of the hottest tours of that concert season. She (somewhat) scaled down for the Gypsy Heart Tour a few years later.
* Sango, and her entire village, specialize in demon (what the English localizations call
* Sango and Miroku are romantically interested in each other from an early point after they first meet, and it becomes a relationship that is complicated by his
* Sango and Miroku, since he can't get past his perverted nature and the knowledge that his Wind Tunnel will eventually kill him. While they are technically engaged, their relationship barely changes.
* Sango in her first appearance, though not on purpose. She claws her way out by herself like the badass that she is, though it certainly helped that it was a rather shallow grave because she was buried en masse with a bunch of slaughtered villagers.
* Sango was occasionally coerced with threats against, or promises to release, her
* Sanguine and Jack are very much in love, but Sanguine left Jack to become Silas' sengil/bodyguard. They also split up so Sanguine could
* Sanguine, Daedric Prince of Hedonism and Debauchery, is a case of this being both a significant part of their theme

* Sanguine: Deborah Deer, a bubbly geek fresh out of high school who goes in with a smile and dreams of her one true love.
* Sanguine: Sirius. One of the most popular boys in his school days, he's charming, reckless, and attracts attention wherever he goes.
* Sanguinius and Horus were once close enough to confide their deepest fears to each other, and each assumed the other was the best choice for Warmaster. During the final battle of the Horus Heresy, Sanguinius still tried to talk his fallen brother down but was forced into battle and slain by Horus.
* Sanguinius' gene-seed had a flaw that caused his "sons" to suffer with the Red Thirst, a horrible thirst for blood that slowly but surely drives them insane. Sangunius new about this but never had enough time to fix it and stop his sons from suffering before his untimely death, which caused the Black Rage in his sons turning them into crazed berserkers blessed with a touch of their Primarch's power.
* Sanguinius was slain by Horus so hard that the Marines descended from his gene-seed felt it. That's not an exaggeration — the Black Rage that haunts the Blood Angels nearly ten thousand years after their Primarch's end is the psychic trauma from the moment of his death.
* Sanguisugabogg: Founder and former guitarist and bandleader Cameron Boggs is openly nonbinary.
* Sani Abacha, had a huge stash of money hidden in a secret Swiss bank account.
* Sanitarium begins in a creepy almost-empty asylum where some of the few inmates left are banging their head on the wall.
* Sanitarium get to see the photograph that seems to spark the insight, which is just a picture of the researcher standing in the jungle, the nature of the insight is never communicated to the audience.
* Sanitarium is sprung too early, but until then, it's not clear which parts are real, which parts are the main character's demented hallucinations and which parts may be someone else's deranged hallucinations.
* Sanitarium, the act "The Morgue" starts you out, appropriately enough, inside a locker in the morgue. (Since you were just earlier a four-armed cyclopean hero from a comic book, how you ended up there in human form is not explained.)
* Sanity: Aiken's Artifact is revealed at the end to have de-evolved completely into nothing more than a giant psionic brain. In the final battle, he forms a body in the shape of a giant cow's skeleton from slaughterhouse bodyparts to fight the hero.
* Sanity: Aiken's Artifact, psionics were discovered by the scientist Joan Aiken during an artifact dig in the Middle-East. The psionics in the game doesn't conform to the usual Telepathy/Telekinesis, instead people who became psychic developed "totems" that granted a theme for their powers to develop around (Nathaniel Cain is the creator of the Fire totem, the closest thing to traditional psychic powers). These include the Totem of Science (science-themed powers like lasers or a binary number grid that generates energy), the Totem of Illusion (throw imaginary knives at people), Totem of Demonology (summon demons) and etc. - making psionics act more like magic.
* Sanity Ball so his friends can steal their scenes with craziness. Occasionally there are exceptions like calming down his homicidally insane friend by shoosh-papping him into submission. Also, the fact that Karkat has at least one major comedic trait...namely, his hilarious and ineffectual anger issues.
* sanity... except if you manage to discover a spell this way by blind luck, whereupon you get an achievement, "The Scientific Method."
* Sanity Has Advantages: Those who are intelligent and reasonable fare better than those who are not.
* SAnitY in NXT (Killian Dain), and member of Imperium (Alexander Wolfe). This is, of course, not counting Sawyer Fulton, who was replaced even before the main roster move.
* sanity is finally broken by said stupidity, he'll just nuke everything in a five-mile radius with a hadoken.
* Sanity Meter Carla - she loses twenty points over the course of the reading.
* Sanity Meter: Many games have a gauge to show how close the player is to a

complete psychological breakdown, a panic attack, a trauma or all of this at once.
* SAnitY (Nikki Cross is Scottish while Killian Dain is Northern Irish)
* Sanity Not Included. At least up until the end of Season 3, in which Lyle commits suicide in the animated section of the show, marking his departure.
* Sanity Not Included, playing with how "horror" and "whore" sound about the same.
* Sanity Slippage and psychotic tendencies become with the realization that they love Sasaki/Kaneki and are jealous of Touka. Kaneki refuses to be with Mutsuki and returns to the CCG with them. Not accepting refusal, Mutsuki promptly gets out their knives laced with rc suppressor drug and attacks Kaneki to render him powerless so they may take him back with them by force and tries to murder Touka the one who has Kaneki's love.
* Sanity Slippage and starts physically assaulting everybody unfortunate enough to be near him.
* Sanity Slippage), and when the horde was leaderless the Order of Mata Nui eventually decided the best option would be to wipe out the entire race.
* Sanity Slippage anyway. It's only when she swings the mallet back hard enough to make a hole in the wall of the lab, causing water to gush out, does she calm down, but it doesn't last.
* Sanity Slippage ever since the events of the 1st season finale. But then there's the end of Episode 42.
* Sanity Slippage, flying off the handle at every setback and threatening or attacking for even the slightest offense. The plot is kicked off when he loses his shit over a heist going wrong, blowing some poor woman’s head off for no apparent reason and forcing the gang to flee Blackwater.
* Sanity Slippage for his bloodlessly overthrowing and exiling them, and The Doctor left a power vacuum at the top by abandoning his Lord President post.
* Sanity Slippage; his facial expressions go all over the place but are consistently terrifying.
* Sanity Slippage in the name of restoring his best self and repenting for his selfishness.
* Sanity Slippage is just along for the ride. Perhaps justified, as both instances happened at night so the black would be suitable and covered their brightly coloured coats and manes (though still leaving their tails out).
* Sanity Slippage seems like the most stable and capable character until he starts to believe he's in "The Odyssy".
* Sanity Slippage, start to drink heavily. Jouglat is constantly wasted, unkepmt and angry right up until he decides to go back to the warr, and Courtney was very much drunk when talking to her callers or monologuing, even asking Berry to get her a drink.
* Sanity Slippage, Talyn starts torturing Crais via their neural link, resulting in hideous sores growing on Crais's body as he screams at Crichton to put him out of his misery.
* Sanity Slippage that he wants him to come back to him and will kill anyone who gets in the way.
* Sanjay and Craig aired, which happened around the time the show got good word of mouth for actually being good.
* Sanjay and Craig. A washed up action movie star who never ever wears a shirt. And since retiring from movies, never wears shoes either.
* Sanjay and Craig episode, "Laked Nake". Sanjay's swim suit gets stolen while he's in the lake.
* Sanjay and Craig episode "Laugh Quake". Each of the title characters thinks the other has an annoying laugh, so they try to remedy it by going to a comedy club, where they are eventually kicked out. Later, both get crapped on by a bird, trying (and ultimately failing) to hold in their laughter, which eventually starts a chain reaction.
* Sanjay and Craig episode "Prickerbeast", Craig momentarily becomes jarringly detailed in a close-up shot when he is told to look "real scary" by Sanjay.
* Sanjay and Craig episode "Tufflips' Tales of Terror" during the "Haüs of Vings" short when the duo eats the roof of said "haüs".

* Sanjay and Craig fake this as a distraction to sneak into a hospital, with Craig (a snake) bursting out of Sanjay's shirt.
* Sanjay and Craig features Craig, the talking snake master of disguise half of the titular duo.
* Sanjay and Craig features Sanjay, Craig, Megan and Hector as giants, having fun.
* Sanjay and Craig; he dresses up like a girl on occasion (mostly in late season 1-onward), owns a fair number of dolls including a unicorn he calls "Mr. Tinkles", has a high pitched voice, and is one of the most gentle and innocent characters on the show.
* Sanjay and Craig, Sanjay does one that also shoots out of his nose and ears.
* Sanjay and Craig. (Though some episodes, particularly the infamous and nonsensical "Fart Baby" episode are still widely disliked.) It still has a number of detractors, though, so it's not completely an aversion to this trope.
* Sanjay and Craig used to use this at least once per episode, though Season 2 dialed it back a bit.
* Sanjay's Theocracy Watch became this for the coming theocratic American government in
* Sanji also does this to Luffy and Usopp twice during the Skypiea arc for dumb imitations and general idiocy.
* Sanji also gives Chopper lessons on being "a real man" and did so twice in Enies Lobby: when Robin was not telling the truth about her past, he tells Chopper that "
* Sanji and Zoro; the two fight constantly, and their contests end with "love-cook" and "marimo", respectively. Lately, Sanji has gone straight into using "Zoro-kun" to fake concern for him. After the time-skip, the first thing they do when they meet up again is insult each other. Not one to be left behind, Zoro now calls Sanji "Nosebleed-kun".
* Sanji and Zoro trading insults until things get physical has become a
* Sanji does eventually get a requited love in Charlotte Pudding, but circumstances and conflicting loyalties drive them apart.
* Sanji does this to another Co-Dragon in the Thriller Bark arc, Absalom, who had been attempting to make Nami his bride (against her will, but she was unconscious during Sanji's fight). He pummels him with a massive salvo of kicks, slamming him into the wall and leaving an imprint, before putting a cigarette in his mouth and saying:
* Sanji does this twice at the beginning of the sixth movie when one of the island's champions, Muchigoro, is introduced. The first time, he tells the audience that Muchigoro's definitely an idiot. The second time he does this is after Muchigoro is tricked by Usopp saying, "See? He's an idiot."
* Sanji finally gets lucky and an emotional Nami glomps him (along with Chopper and Brook) when they're reunited on board the
* Sanji get a two years long one when he discover himself in the Okama Island.
* Sanji gets heart-eyes for darn every girl in the series, including his crewmates.
* Sanji has a minor version where the strength of his blows can be too much for his body to withstand, at one point breaking his ribs from kicking someone. However, it takes a lot to get to this point.
* Sanji has his basic Party Table Kick Course attack, with him getting on both hands and legs stretched out while spinning. He also has Diable Jambe, where he spins around so fast his leg
* Sanji has his left eye hidden behind his hair even in his childhood flashbacks. Whether he actually had a left eye had been the subject of debate until
* Sanji has his moments; he sulked when Zoro got a bounty before him and Usopp ended up in the picture; Sanji also especially hates it when other men have better luck with women he than he does e.g Luffy going to Amazon Lily and Momonosuke getting special treatment despite being a
* Sanji has one in the Thriller Bark arc. Upon learning that Absalom is going to try to marry Nami, Sanji explodes in flames of Anger for no apparent reason and sets off to kill Absalom... which quickly becomes a
* Sanji has remarkable tolerance for pain, at one point after beating his opponent

he casually comments that he broke several ribs, in
* Sanji having his leg fractured by Vergo, and then having it never bother him again for the rest of the arc.
* Sanji; he endorses ambiguous gender identity, not that the subject is treated with any respect whatsoever. His sexual orientation never comes up. He's insane, but also innocent as all get out. Item two, she has no problem taking down completely straight women, so gay men should be completely within her batting range. The truly asexual are her Kryptonite. Or possibly it's those with no aesthetic sense whatsoever...
* Sanji himself does to Usopp in Skypeia, kicking him out of the way Enel's lighting blast which would've undoubtedly vaporized Usopp. Sanji on the hand decided to
* Sanji is an invoked example; he chooses not use his name because his family are actually
* Sanji is a subversion. It initially appears as if he has just one name, but his surname is eventually revealed in the Zou arc:
* Sanji is especially protective over the ship's navigator and fellow pirate
* Sanji is this hands-down. He can tell the ingredients that went into a cake's confection
* Sanji lures a bunch of Marines and Agents aboard Puffing Tom to the back of the train, then locks the doors in front of them. When they realize he also detached their cars, leaving them stranded aboard the sea track, they let out a big "WHAT?!" Two episodes later, after Zoro slices these same cars in half as Rocketman passes with his Two Sword Style Rashomon technique, everyone in the Train cars, the entire Franky Family, Lulu and Tilestone, Chimney and Gonbe, and Chopper all pull a really big "WHAAAAAAAAAAAAAAAAAAAATTTTT?!?!".
* Sanji makes this one when he heard Zoro saying he and Duval, whose ugly face matches the ugly drawing of his wanted poster, to be 'like two peas in a pod'.
* Sanji, of course, so much so that he refuses to harm a woman even if it would cost him his life. Do
* Sanji's estranged sister to absorb it and heal him. She has no physical side-effects afterwards.
* Sanji's first wanted poster didn't have a photograph for him, so it uses a hilariously bad
* Sanji takes the lead in another standoff on Zou when Capone "Gang" Bege captain of the Firetank pirates (
* Sanji, to Usopp. Though the former makes it clear at times he doesn't care as much about Usopp as he would Nami, Robin, or Chopper, Sanji still cares for Usopp greatly and gives Usopp vital advice when he needs it. Sanji explicitly showed his care for Usopp when Luffy
* Sanji to Zeff — his mentor, also a master chef who dreamed of All Blue and fought by kicking.
* Sanji vs Rock Lee: Sanji kills Rock Lee, but lost his leg in the process.
* Sanji wants to discover the All Blue, a legendary body of water said to be home to every kind of fish in the world.
* Sanji was a downplayed version of a Big Sister Bully; she didn't directly participate, but she didn't help him when his brothers were picking on him, either, merely laughing at his misery.
* Sanji was forced to enter into a marriage with one of Big Mom's daughters by their family to form an alliance.
* Sanji was humiliated and forced into becoming a crossdresser himself for a period of time.
* "San Jose Sharks: A Legacy of Failure" video, he describes the Sharks' first-round playoff defeat to the Oilers as "Groundhog Day without the humor." He then rubs it in by adding that Patrick Marleau, one of the Sharks' star players, had signed with the Maple Leafs after that defeat.
* Sanjuro, and though Sanjuro has contempt for her, he willingly takes her advice.
* Sanjuro inverts this with Chamberlain Mutsuta and Superintendent Kikui. The Chamberlain describes himself as having a "horse face", which lead the warriors to

mistrust him despite his being an honorable man, while they initially assume that Kikui is a good man who will aid them in dealing with the corrupt officials because he's handsome when he's really their ringleader. Also inverted with a couple of ugly but well-meaning young sidekicks. Played straight with Sanjuro, who is scruffy but very handsome.
* Sanjuro, the ronin gives his family name as Tsubaki (camellia) after the nearest plant life.
* Sanjuro was always a grizzled, scruffy yet very wily and very powerful ronin. He was, however, much more brutal and active, much more lively in
* Sanjuro, when Sanjuro finds out that the guy he pegged as the villain knows about the younger samurai's secret meeting place, he utters the Japanese equivalent: "NANIIIIIII?!"
* Sankarea a drug allows for dead bodies to be brought back to life as intelligent zombies, but rot and decay cause these zombies to slowly lose their humanity until they find the act of eating the people and things they love as the ultimate and most romantic pleasure. All of them eventually degrade until they reach a point where they become completely mindless and become a standard zombie, slow, mindless and rotting corpses that want nothing more than to eat flesh.
* Sankarea: Boy obsessed with the undead meets girl, girl falls off cliff and dies, girl becomes zombie, zombie-girl becomes freeloader in boy's house.
* Sankarea looks identical to how she did as a human after being zombified, the only physical differences being paler skin and red eyes (they were blue as a human).
* Sankarea: Rea has this when she starts to succumb to her zombie nature.
* Sankarea, the girl attached a GPS to Sanka. Professor Boil berates her for not telling anyone as they have been looking for her for the past few days. She causally replies in her defense, "no one asked me".
* Sankarea. Their bite also does not contain any means of making new zombies, but instead acts as a poison, numbing pain in small amounts or paralyzing in large amounts, making their victims unable to escape.
* Sankt Kaiser Olivie Sägebrecht and Hegemon Claus Ingvalt from
* Sankt Kaiser Olivie Sägebrecht was the strongest mage of the Ancient Belkan Era, and was known as the "Queen deemed second to none in combat" when she was alive.
* San Martin-born Mateo Gutierrez, is two meters (6'7) tall and weighs 200 kilograms.
* Sannikov Land is not for her and she intends to follow Ordin to war.
* Sano Ichiro approach as the series goes on since his enemies are more than willing to push and break the rules themselves.
* Sano Ichiro series, as Sano fights to maintain his position in the shogun's court. Given the fickle nature of the shogun and the schemes of Chancellor Yanagisawa, merely being fired isn't usually an option, though. At best, it's likely exile; at worst, it's execution. So far, Sano has only managed to be demoted once, but he's since made a comeback to his previous position.
* Sano Ichiro series is the military ruler of Japan. He's also childish, indecisive, and more interested in the pleasures his status grants him than actually running the country with any level of competency. This causes no end of headaches for his more honorable followers like Sano, as his manipulative cronies gleefully use his incompetency and disinterest to carry through their own schemes and revenge plots.
* Sano Ichiro, though there are flashbacks of the interim period in the latter. Circumstances have changed greatly for Sano and those around him, and definitely not for the better.
* Sano's, he'll give the MC a lobotomy if they don't acknowledge their drinking problem.
* Sanosuke also exploded the front of his prison cell when he got annoyed at someone. Yes, exploded it. With his fist.
* Sanosuke definitely fits this trope. Unlike many of the characters in the series, his fighting abilities were derived from being a fighter-for-hire. He lacks

any formal fighting style other than
* Sanosuke is another repeating offender of this, famously giving Saito the finger when he declares he brushed off the defensive skills Saito taught him to fight the way he sees fit.
* Sanosuke Sagara hardly ever bothers with dodging or blocking, relying on his
* Sanosuke Sagara not only got lost trying to get to Kyoto, but he got himself
* Sanosuke's "Damn it! That guy's totally off his rocker." was left intact in episode 6.
* Sanosuke's hands get broken whenever he uses Futae no Kiwami after the Kyoto arc.
* San Pedro Mountains Mummy found in a cave in Carbon County, Wyoming brought more attention to these legends. Believers argue this mummy is the actual remains of a little person. Skeptics say these remains are either an anencephalic infant or just a hoax made by a taxidermist. At present, the mummy has disappeared with its current whereabouts unknown.
* Sanpei Interlude and assigned to plan and oversee a full-scale operation in Alola.
* Sanrio, are treated as living toys instead of animals in their anime series.
* Sanrio Boys which features two male characters getting engaged after sharing their first kiss.
* Sanrio Characters that are typically depicted with no fingers (such as My Melody and Cinnamoroll) are sometimes seen putting their fingers near their mouths when they are curious, confushed, or deep in thought. But also looks like their flipping you off as well.
* Sanrio debuted in 1975. She would become one of Sanrio's very beloved characters in the company.
* Sanrio, making it the first and only appearance of the franchise in anglophone countries.
* Sanrio. Not to mention Kuririn's family and relatives all being different types of hamsters. Once again, the series caused children and women to become very fond of hamsters.
* Sanrio's character Gudetama is an anthropomorphic egg. He apparently is not bothered by being eaten because he is too lazy and apathetic to care and plus it seems that when he is eaten he just comes back as a different egg.
* Sanrio's Cinnamoroll is a dog but could easily be mistaken for a lop rabbit.
* Sanrio teamed up to create new Sanrio characters called "The Beatcats". A 5-piece Virtual Idol Unit starring adorable cats that perform J-Pop created by The Beatcats group.
* Sanrio: The company has become popular with the furry fandom in recent years in the west (and especially Japan). While Retsuko from the aforementioned "Aggretsuko" franchise has already became popular in the community since 2016. Other Sanrio character franchises have their own set of fans as listed belows:
* Sanrio which featured Mell from Wish Me Mell singing about almost every single Sanrio Character up to that period. The song length is 5:27 minutes long showing how many character Sanrio has created over the years.
* Sansa after the Battle of the Bastards, where, as Jon acknowledges later, she was the one who saved the day, leaving her the legitimate heir to Winterfell, she is completely ignored by the Northern lords at the council, and Jon is praised as the avenger of the Red Wedding and then crowned King in the North. Sansa is unhappy at this turn of events.
* Sansa and Arya Stark, who are each other's complete polar opposites and, as such, never get along. They even look completely different (Sansa has the Tully look inherited from her mother's side while Arya has the Stark look inherited from her father's side.)
* Sansa appears to be a magnet for this trope, because Theon's behaviour towards her also smacks of romantic feelings. She is the only person capable of pulling him out of his Reek persona by reminding him of who he was and it's when her life is threatened he
* Sansa becomes this to Littlefinger in Season 4 when she begins actively helping

him with his schemes. Later, she becomes something of a Hand to Jon when he gears up for war with the Boltons and eventually becomes King in the North.
* Sansa gets called "little bird" by Sandor — interestingly, this is initially an insult referencing how naïve she is, but later develops into affection.
* Sansa gives a very poignant calling-out to Theon about betraying Robb and butchering Bran and Rickon, only to discover that her little brothers may still be alive.
* Sansa gives Joffrey a favor when he leaves to destroy Renly's rebellion in
* Sansa has the distinctive Auburn hair of the Tullys. So she dyes her hair a more normal mousy brown
* Sansa is convinced that Joffrey is a great guy until he chops off Ned's head.
* Sansa is so pissed off at House Umber for surrendering Rickon to the Boltons that she wishes to hang them all after they're done with the Boltons.
* Sansa is unable to think of any honest compliments for young king Joffrey except that he is "comely." It's pretty much the only good thing about him.
* Sansa looks increasingly like Catelyn as she gets older, even after she dyes her hair black.
* Sansa maintains courtesy as her armor throughout her stay in King's Landing. Her composure despite her obvious discomfort provides the final straw that convinces Tyrion not to exercise his
* Sans and Papyrus, a pair of skeleton brothers, are a parody of a webcomic called
* Sansa reaches for a drink of ale with her brother, Jon Snow, in "The Book of the Stranger", even if it doesn't go over quite as well.
* Sansa's betrothal to Joffrey is eventually dissolved and she's forced into different
* Sansa's direwolf Lady in Season 1. She was noted as being the most gentle of the direwolves and never hurt anyone, but Cersei demands she be killed in Nymeria's place for biting Joffrey (which Nymeria only did to protect Arya).
* Sansa's maternal aunt, Lysa Arryn tells her right after accusing her of sleeping with Littlefinger, that she can marry her son, Robin.
* Sansa's naivete and leaves in (relative) peace, which makes it all sound rather more courtly and genteel than it actually was.
* Sans as saying "You're gonna have a bad time" before attacking you. Actually, he says that much earlier in the game, shortly before the battle with Papyrus, as a warning to stop doing the Genocide run. His specific quote before attacking you is "Do you wanna have a bad time?"
* Sansa Stark and competing with Tyrion for influence on King's Landing.
* Sansa Stark and Daenerys Targaryen are definitely World Class Beauties at least. They're probably the two characters whose level of attractiveness becomes a plot point the most often. Their great looks are remarked upon by several characters, and several important characters fall in love with/lust after them. Walder Frey accuses Talisa Maegyr of having been preferred over his daughters solely for being a World Class Beauty as well.
* Sansa Stark doesn't do things like calling Arya cruel names, such as "Horse-face", the way she did in the novels.
* Sansa Stark has one in the form of Joffrey Baratheon, Sandor Clegane, Tyrion Lannister, Dontos Hollard and Petyr Baelish; the lesser of the evils is Dontos Hollard
* Sansa Stark initially aspires to be polite and courteous, partaking in activities like embroidery and happily going along with her
* Sansa Stark is another example of this, though she at least has the excuse of being very young. She constantly thinks of her betrothed Joffrey in terms of songs and stories, and in the first book, she repeatedly and passionately declares that she loves him, despite only having a few (not particularly intimate) interactions with him.
* Sansa Stark is less so than her sister Arya, but the scenes with the doll her father gives her heavily imply she is his darling girl, though she's clearly closer to Cat than Arya was.

* Sansa Stark stares longingly at Loras' backside as he walks away in "
* Sansa Stark, who bases her whole life around singers' tales, is a perfect little lady, gentle and trusting.
* Sansa stops trusting Littlefinger's efforts to "help" her, since the last one got her into an
* Sansa tells her sister Arya she should have been killed instead of her pet direwolf Lady. Sansa fails to realize that Lady's death is partly her own fault as she refused to admit to the king that Arya attacked Joffrey out of self-defense.
* Sansa warns Catelyn of this when the latter demands to be told of what became of Arya in the old timeline. However, Cat persists, to
* Sans Famille: One of Vitalis’ animals is a monkey named Joli-Cœur.
* San's father also qualifies, at least in appearance; He's a big, buff,
* Sans Frontieres. The monster is just a Horned Lizard with wings badly photoshopped onto in.
* Sanshiro Sugata Part II, the sequel, in which the judo guys get attacked by karate guys.
* Sanshobo chops off the arms of kitsune leader Deshi when ambushing his tribe.
* Sansho the Bailiff: After becoming governor, Zushio goes back to the manor, has Sansho arrested, and tells the slaves that they are free to do as they will. They burn the whole estate to the ground.
* sans human face. Dubček and 25 other senior reformers were kidnapped, taken to Moscow, and made to sign a humiliating "Protocol" rolling back the reforms. Only one man refused, František Kriegel, a politician-doctor who had served in the Spanish Civil War:
* Sanskrit is a notoriously slow-mutating language in the Indo-European family. Sanskrit is so old that hymns composed before the time of King Tut can still be chanted with with near-perfect accuracy. An Indian priest from the time of Christ would be able to speak much the same Sanskrit and chant the same prayers as a modern Hindu priest.
* Sans never calls Papyrus "paps" or "papy" in the game, though in fanon it seems to be his
* Sans never paying his tab at Grillby's. He was only seen putting a meal on his tab once, but fans think it fits well with his slacker image.
* Sanson has some pretty damn Cool Shades. They have a similar shape to Kamina's without being as over the top, and the generally extremely similar personality of the two characters suggests that the Gurren Lagann team were a little inspired by Gainax's earlier figure of goofball manliness.
* Sans Soleil shows Japanese people pouring bottles of sake over the graves of their deceased love ones, on the Japanese Day of the Dead.
* Sans's theme song plays at Napstablook's snail farm, even though he never actually appears there or has any involvement with it besides an optional phone call where Papyrus compares the snails to him. This is possibly because he was originally intended to appear there, as the game has some
* Santa’s Little Helper Wants To Eat Your Children & Other Holiday Musings is full of essays on Christmas traditions, including (as the title suggests) about the Krampus.
* Santa, Ace, and Clover. Given the shock that the characters go through at these discoveries though, it's justified that they aren't paying a ton of attention to relatively minor details.
* Santa also becomes suspicious along with Seven after Snake's apparent death, as Clover deduces that they were the only ones that could've opened the number 3 door to kill Snake (if not convinced that Snake is still alive, she'll even lead them away and kill them along with June in the Axe Ending.) In reality, Ace was the sole murderer, as he'd stolen the Ninth Man's bracelet.
* Santa also has to lose weight in Bob Rivers' "The Real Slim Santa", a parody of "The Real Slim Shady" by
* Santa Ambiguity: A work leaves it ambiguous whether or not Santa Claus exists in the setting.
* Santa and the Ice Cream Bunny (film), "Santa Claus' Punch and Judy" (short)

* Santa and the Ice Cream Bunny has jolly old Saint Nick grounded on a Florida beach.
* Santa and the Ice Cream Bunny, short "The Little Lamb", and miscellaneous clips)
* Santa and the Ice Cream Bunny, the scene where Thumbelina encounters some insect-like creatures gives us this comment:
* Santa becomes the antagonist of the Season 23 finale, "Christmas Snow". This is not due to him pulling a
* Santabomination is a strange being of unfathomable power. Though considering he can travel all over the world in one day, this actually makes a lot of sense.
* Santa Christ calls him on this (specifically, the part about him waiting that long to come back and fix the crisis), Santa Christ asks if she knows of a faster way, or if she has ever come back at all.
* Santa Christ is always there for the December videos, however he was absent from 2018's. This gets
* Santa Clarita Diet, Anne asks for a sign that Sheila has been sent down from God. Sheila and Joel have no idea what to do, but suddenly Eric and Abby's bomb goes off, and Anna begins praising Sheila.
* Santa Clarita Diet, but her love for Joel and her daughter help this become a fairly successful resurrected romance. Just with a higher body count.
* Santa Clarita Diet. But that's no reason to throw away over a decade of marriage.
* Santa Clarita Diet has its undead rely on human flesh to survive. After Sheila turns, she has a brief period where she's able to get by on raw meat, but after that, only human will do. Once other undead shows up, it turns out that eating human flesh is necessary to delay the physiological and psychological decay that comes with the change — and while Sheila's able to get a medication that halts the risk of physiological decay, other undead aren't so lucky.
* Santa Clarita Diet, Joel auditions to become a Knight of Serbia, which involve a number of trials of warrior skills. One of them is specifically shoving a pear into a dead chicken as fast as possible, which utterly perplexes Joel, but he still does so. At the end of the episode, he fights a zombie, and quickly shoves a lemon in its mouth, realizing the skill is meant to quickly incapacitate an attacker's ability to bite.
* Santa Clarita Diet: Most of the episodes involves how Sheila with the help of her husband find ways to dispose of her victims. But most of them end up getting chopped up and stored in freezers so she can eat it later.
* Santa Clarita Diet, occasionally hunting for new victims to satisfy her cravings. And of course, this is all incredibly awkward for her not-undead family members, who have to help her with pretending she's still a normal person.
* Santa Clarita Diet, while her husband and daughter try to cope with it.
* Santa Claus (1959) has a family of rich people, with the parents buying their son everything he could ever want... but they're constantly out socializing, leaving him home by himself; they even suggest that he practice his piano lessons if he's ever feeling bored or lonely. His letter to Santa is just him begging his parents to stay home Christmas eve, so Santa meets them at their cocktail party and serves them a beverage which brings their familial love back to the forefront of their minds.
* Santa Claus (1959). One of the main characters is the only son of a rich family, and they often go out socializing while leaving him home alone. The mother suggests to him that if he gets bored or lonely while they're out, he should just practice his piano lessons.
* Santa Claus (1959), our hero's sleigh is pulled by hideous giggling clockwork reindeer.
* Santa Claus (1959), Santa allegedly delivers gifts to all the children of the world, but we only see a few stops in Mexico City. Santa also has children from every country helping at his workshop, and naturally one of the Mexican kids is Santa's right-hand helper and gets more screen time than the others.
* Santa Claus (1959) threatens to force Pitch to eat ice cream should he fail in his mission against Santa.
* Santa Claus also supposedly take naughty children with them, too... actually,

what exactly they do with the kids is rarely if ever said...
* Santa Claus. Attempting to answer these questions may diverge the story too far from the classic legend, and most people who like Christmas stories are willing to ignore these issues. Sometimes, the story does answer the questions, but these stories make it clear from the get-go that they're not your grandma's Christmas stories.
* Santa Claus but was killed by an Iraqi later in the episode. The boys and Santa escaped to South Park, at which point Santa gave a speech to the assembled townspeople, urging them, from this point on, to remember Jesus on Christmas.
* Santa Claus Conquers the Martians aboard the Martian spaceship. "Fire retrorockets five and six." "Retrorockets five and six: fire."
* Santa Claus Conquers the Martians, and yes, the lyrics are on screen:
* Santa Claus Conquers the Martians as a "polar bear" is quite obviously a man in a very bad costume.
* Santa Claus Conquers the Martians gives us the Tickle Ray. If the Agony Beam is PG torture, the Tickle Ray is G torture.
* Santa Claus Conquers the Martians has Santa Claus "making" toys by pushing buttons. Later, the villains sabotage the machine, causing Santa to finally denounce the process.
* Santa Claus Conquers the Martians) is used several times to represent the government either searching for the Martians or for Santa Claus after the Martians had kidnapped him (missile footage for space takeoffs is also used), prompting this timeless riff:
* Santa Claus Conquers the Martians, joyless, humorless humanoid creatures with metallic-green skin and distinctly robot-like headgear incorporated into their costume design; the dullness of their heavily mechanized lives results in their children getting addicted to joyful, cheery Earthling holiday television programming.
* Santa Claus Conquers the Martians plus the short "Santa and the Fairy Snow Queen"
* Santa Claus Conquers the Martians), the Martians doors opened by pointing at them.
* Santa Claus Conquers the Martians, though "Dippin' Dots" actually comes close.
* Santa Claus episode or two, but he's mostly there to be whatever strange job is needed, from ticket taker, to "guy in a frog costume." Since he only works his well-known job one day a year, he seems to have a lot of hobbies and side jobs.
* Santa Claus: first you believe in Santa, then you don't believe in Santa, then you are Santa. It's pretty obvious what the first two stages mean, but does the third stage mean that you look like Santa, or that you act as the Santa of your family? Some versions of the joke compromise, making the third stage acting as Santa and adding a fourth stage, which is looking like Santa.
* Santa Claus had previously brought him in on a 1492: not believing in Columbus.
* Santa Claus. He delivers his gifts and makes everyone believe that they bought them instead of getting them from him, though he still remains a benevolent example.
* Santa Claus. He gets children to swear their souls to him in exchange for toys while they're too young to know better, and then enslaves their spirits in his workshop after they die as adults.
* Santa Claus Indiana to capitalize on all the attention the town was getting for it's name. Across the street from the Candy Castle, a rival Santa Claus themed attraction called Toy Town was also created. The conflict over the similar attractions and disputes over the land on the park led to years of lawsuits, which went all the way up to the Indiana Supreme Court. In 1946, a third competitor opened up Santa Claus Land in the town, which was later rebranded as Holiday World.
* Santa Claus. In one episode, he takes on the form of Orpheus's ex wife, thus invoking this trope.
* Santa Claus in the Christmas special inverts this trope by incorporating Doofenshmirtz's evil scheme to fulfill the odd Christmas wishes of Phineas, Baljeet, Buford, Candace, and Doofenshmirtz. This also just happens to restore the faith in children of a curmudgeonly elf.

* Santa Claus is a major crime that amounts to being blasted out of the sky. Well, when it involves kidnapping, breaking and entering, and unknowingly terrorizing people with loathsome and occasionally lethal gifts, despite how good the intentions are.
* "Santa Claus is Coming Out", where Queer Duck speculates that Santa Claus is gay before Santa reveals that he's actually bi.
* Santa Claus Is Comin' to Town and help him out, simply because he acted from the goodness of his heart.
* Santa Claus Is Comin' to Town: Burgermeister Meisterburger, the leader of Sombertown, outlawed all toys after he'd tripped on one earlier. As such, Christmas itself was banned by proxy.
* Santa Claus Is Comin' to Town has Topper the penguin, who got lost on his way to the South Pole when he meets Kris Kringle.
* Santa Claus Is Comin' to Town. He doesn't go exactly catatonic, but his eyes roll around in his head and he speaks like an idiot for a minute.
* Santa Claus Is Comin' to Town "My World is Beginnning Today" as she moves away from her former strict schoolteacher demeanor and decides to stand by Kris no matter what. She does put it back up into a bun after the song, though she does wear a blue dress from that song on instead of the black one she wore before.
* Santa Claus Is Comin' to Town, posters are put up of Kris Kringle throughout Sombertown, decrying him as "the terrible toymaker". To avoid being found out, Kris lets his beard grow.
* Santa Claus Is Comin' to Town starts when Burgermeister Meisterburger proclaims a ban on toys after tripping on one and hurting himself. Upon hearing of it, Kris Kringle immediately comments on what a silly law it is. At the end of the special, the narrator explains that once the Meisterburger line died off and fell out of power, the people realized how ridiculous the toy-ban was and repealed it.
* Santa Claus Is Comin' to Town with the song "First Toymaker to the King."
* Santa Claus) is the patron saint of children due to this trope. During a famine in Turkey, a shop keeper murdered three young boys, cut their bodies up and stored them in the brine of a pickle barrel intending to sell their meat to his customers. Later, when he tried serving some of the meat to St. Nicholas, Nicholas recognized what it was. He then proceeded to draw out the three boys from the barrel, whole and alive. This is similar to an earlier Greek myth where Tantalus served up his son to the gods who were his dinner guests, but they instantly knew it was human meat and raised the boy from the dead. After he died, in the underworld Tantalus's punishment was to spent eternity standing with water up to his neck and grapes just over. He was always hungry and thirsty, but seeking to get either made them vanish. This the word "tantalizing".
* Santa Claus, meanwhile, can move at tremendous speeds by harnessing the same power that lets him deliver presents all over the world in a single night. After acquiring the position of Easter Bunny, Bun-bun can do the same thing using his egg hiding abilities. When the two fight, the rest of the world appears to be frozen in time.
* Santa Claus playing in the background finally breaks down around the third verse with the promised "rooty-toot toots and rummy-tum-tums".
* Santa Claus "seeing you when you're sleeping" and "knowing when you're awake"... Well... someone had to feel violated, or at the very least, creeped out, by that whole idea. Which leads to the old joke: "Why is Santa Claus so jolly? Because he knows where all the naughty girls live."
* Santa Claus simply by the power of inertia. Unlikely to go away any time soon, since he is so firmly rooted in the public consciousness and pop culture.
* Santa Claus territory—Santa is just so iconic and so firmly rooted into the public consciousness by sheer inertia, that people can't help but keep using him for stories, even if it means poking fun at or rationalizing the cliches and impossible feats surrounding the character.
* Santa Claus, the Easter Bunny, a little girl, and an honest lawyer are in an elevator. There is a $100 bill on the ground. Who picks it up first?
* Santa Claus: The Movie bitter about this. The film didn't do well at the box

office in any case.
* Santa Claus: The Movie elf Patch that television is the best way to inform the public about the latter's special product, and that with enough money an ad can reach everyone he wants it to. Patch decides they will buy airtime for a one-off advertisement on Christmas Eve going out to "All the countries, all the channels!" at once. B.Z. is upset by the expense that will require, but ultimately agrees to the plan, and it works. Even the sole television at the North Pole picks up the transmission.
* Santa Claus: The Movie has many scenes that didn't make the finished film and haven't surfaced as DVD extras, but most likely were shot; some fill in major and minor plot points:
* Santa Claus. The Western tradition of lying about a fictional person giving gifts to children is actually impressively wide spread and frightening accepted as both a matter of course without much thought or organized pre-meditation beyond trying to decide what present "Santa" gives.
* Santa Claus, Tom takes great glee in mocking each and every one of the bad stereotype country children, much to Mike and Crow's horror. Probably helps that the first country/continent we see is Africa, which is portrayed as black kids dancing around hitting drums and wearing bones in their hair, which causes all three to groan out in despair.
* Santa Claus ("'Twas the night before Christmas..."). Before the poem was published in the 1820s, everyone had their own idea of what he looked like and how he traveled around. The popular modern image also owes a lot to Thomas Nast's cartoons of Santa in the 1860s.
* Santa Claus was based on him originally, and he qualifies too, obviously.
* Santa Claus wears one in "It's Christmas!" to deliver Christmas presents to a shark.
* Santa Claus with a whip. Where Nick encourages children to be good with the promise of presents, the other threatens them with abductions or beatings.
* Santa Claws. (Note the Scores of this monster, 1,200 ATK and 2,500 DEF. A reference to December 25th, the date of Christmas.)
* Santa Conan is also revealed to be a villain in one of the early chapters, as a parody gag, since Hayate and
* Santa Fe Natural Tobacco Company. The healthiest, most ecologically responsible coffin nails you can buy. The vast majority of carcinogens in tobacco occur naturally in the leaf as it's cured, no additives necessary.
* Santa Fe Trail, slaves are freed by a gang of evil abolitionists, and when the troops arrive to take them back to their owners, they thank them, saying that if this is freedom they don't want any of it.
* Santa Girl, Cassandra Claus, the daughter of Santa Claus, is engaged to marry the son of Jack Frost to merge the family businesses. She hasn't actually even seen Jack Jr. since she was a baby, and would much rather go to college in the real world than be forced to run the business. When Cassie complains to her dad, he points out that he and her late mother were also arranged to be married: his family owned the only flying reindeer farm in the world, and she was the daughter of Chris Kringle.
* Santagithi is also a very competent swordsman, at the age of 58, waiting until the
* Santa has once shared a chimney-vator with Perry the Platypus, who could not help but beam in his presence.
* Santa. He becomes the most suspicious in the Safe and True paths (especially if the player achieves the Coffin end, an unfinished True end). In the last part of the Safe end, Snake, Ace, Clover, and Akane are all dead, Lotus and Seven are mourning and Junpei is with Akane and Santa is the only character unaccounted for. So it becomes clear who is speaking when Zero directly responds to Junpei over the loudspeaker. In the true end, Santa abruptly holds a gun to Akane's head and takes her hostage. If you accidentally get the Coffin end, you'll never learn that this is a ruse and Santa is just an assistant to Akane, the true Zero.
* Santa Hunters, Alex tells the camera that it is time to put the cameras away and

then yells "Cut!" The scene changes.
* Santa Hunters: Apart from the first scenes with Alex and Elizabeth at their school, the movie takes place on Christmas Eve day overnight into Christmas morning.
* Santa Hunters of a previous Christmas when one of the reindeer came back with the runs.
* Santa Hunters: Santa's sled, sans reindeer, only flew because the children believed it would do so. This was after things started to disappear due to the lack of belief, but of reliance of physical evidence of Santa's existence. Even gets invoked by Zoey.
* Santa Hunters: The Santa pipe given to Alex by his Uncle Charlie is vital in the climax.
* Santa María de las flores negras (has two tropes listed as of this writing, 5-15-2018)
* Santana and Brittany have at least three of these throughout the seasons of
* Santana and Brittany. Santana can be a bitch and Brittany is an adorable
* Santana by "Wild Thoughts"), and lesser known than their early '70s hits like "Black Magic Woman", "Evil Ways", and "Oye Como Va".
* ..., Santana Garrett and Chasyn Rance of FOW (and many more Southern Championship, Believe, Belleview, etc).
* Santana. into going to the prom with her as part of a scheme to get Kurt back and increase her standing with the rest of the club (specifically Brittany).
* Santana, is half Puerto Rican, a quarter German, and a quarter African American.
* Santana is known solely for providing the vocals of the 10-week chart-topper "Maria Maria". Their only other top 40 was a feature on "Got To Get It", a minor Sisqo hit released around the same time.
* Santana is this for the Pillar Men, as he's the first to show up and entirely separate from the other three (who are in Europe while he's in Mexico), and also the youngest and least powerful, only giving Joseph trouble because Joseph was a complete novice with hamon at the time, while he needs a month of
* Santana played at Woodstock 1969, after the opening song "Waiting", Carlos Santana greeted the crowd and had a brief moment of confusion over what state he was in.
* Santana tearfully confesses her love for her best friend Brittany on
* Santana to her friends, what with her habit of very quickly dismissing, explaining away, or outright ignoring her
* Santana, while bassist and former Sly & The Family Stone member Larry Graham took what was left of Azteca and formed Graham Central Station.
* Santana will throw down with people who get involved with her sexual partners, even if she claims not to want a real relationship with them.
* Santa Olivia: Loup avenges her friend Katya's rape (which the military does nothing to punish) through becoming Santa Olivia, punishing not only the rapist but also those who lied for him to cover it up.
* Santa Olivia: Loup's relationship with Pilar is a main theme of the series.
* Santa Olivia: Pilar is mentioned more than once as having a large bust, which gets her lots of attention and she generally enjoys flaunting it (though not always, as her pervy uncle was also attracted by this).
* Santa Olivia (queer female main characters, queer female romance, LGBT youth)
* Santa Olivia: The GMOs are people genetically enhanced with having animal DNA spliced into them, gaining superior strength and senses. Loup inherits them from Martin, her father.
* Santa picks up the $100 bill. Remember kids, he's the only one of the three who exists.
* Santa's Drug Operation doesn't feature a bad Santa, because the starting point is Santa being murdered... but he was apparently bad before that (being a neglectful husband, running a drug peddling operation, using lawnmowers to punish disloyal employees...).
* Santa skips Plonq’s house entirely on Christmas Eve in “A Plonqmas Tale — 1999.”

* Santas Little Helper, a character in the beginning of the movie gets fired, his girlfriend dumps him, his car gets towed away, and he gets informed that his house is being foreclosed upon, all within a matter of hours. There is no indication that anything was wrong beforehand, which seems to imply the movie believes that losing your job means losing your bank account and gaining additional debt immediately.
* Santa's Little Helper is a two-fold case of this. One is he's a somewhat lazy ex-racer Greyhound. Rather than go with the normal "always energetic and fast"
* Santa's modern-day appearance (at least in the U.S.) as a plump, white-bearded old man in a red suit was largely
* Santa's Slay, defeated him as an angel in a curling match and sentenced him to deliver presents on Christmas for 1000 years, leaving Santa to kill again in 2005.
* Santa's Slay, Santa is destroyed while flying in the sky on his sleigh, but shows up just before the end credits in an airport traveling incognito.
* Santa's Soldiers, however, is a terrifying spymaster and combatant who wants to make sure her husband is well-protected but remains sweet and innocent.
* Santa's Soldiers, The most surreal of them is the Tooth Fairy Union, populated by balding, overweight men in tutus.
* Santa's Sweatshop: Santa's workshop is a dangerous work environment to say the least.
* Santa Steps Out, Santa can deliver gifts across the world by being in a type of time bubble. Turns out it has other uses if you know what I mean.
* "Santa's Workshop" has one of Santa's elves paint chess boards with checkered paint.
* Santa uses a candy cane to zip down a string of Christmas lights in the animated opening of
* Santa Versus Dracula. Dracula, as a vampire, can only enter houses when invited, whereas Santa can go in and out of any house he wants.
* Santa Versus Dracula: Dracula's main army consists of kids who were considered naughty that he turned into vampires.
* Santa Versus Dracula features this as Dracula's main force which include his three vampire brides, an army of undead kids, a werewolf, Igor, The Invisible Man, Frankenstein's Monster and Mr. Hyde. He did have a witch in his group, but she annoys him so he sprays her with beer to make her melt.
* Santa vs. Krampus has the concept of mall Santas be a cover for a secret order of wizards who use swear words as spells to fight Krampus and his minions.
* ''Santa vs. Krampus''. It's a family-friendly show about brothers Santa and Krampus, the latter of whom kidnaps two children to work in the coal mines and gets into a fight with Santa over not wanting to punish children anymore but instead wanting to deliver presents.
* Santa Vs The Snowman features the eponymous snowman, envious of Santa's popularity, and his armies of minions facing off against Santa's elves and nutcracker mecha. It's all played as over-the-top comedy, and other than the non-sentient snow minions nobody really gets hurt.
* Santa Vs Zombies getting caught in a zombie outbreak on Christmas Eve.
* Santa Vs Zombies: Kids get turned into zombies in this comic. Santa himself faces a few on Christmas Eve.
* Santa Vs Zombies stars a jaded Santa Claus who no longer likes his job, and is now dealing with a zombie outbreak caused by the latest Christmas craze.
* Santa Vs Zombies: The main kids are brought to a mall, and the boy rips the Mall Santa's fake beard off.
* Santa Who has a scenario where Santa falls from his sleigh and gets amnesia, and during the course of the movie, he ends up as a mall Santa for awhile.
* Santeri "StSanders" Ojala's gag dubs of music videos and concerts, including
* Santharia is a world-building project for the world of Caelereth, which has been going since 1998. Everything from flora and fauna to cosmology is described in loving detail, and pictures added created by Dreamers themselves. The world of Caelereth is developed on the Development board, while on a separate Roleplaying board stories are told set within this world, most of them within the continent of Sarvonia. Recently an interactive game has been developed.

* San Theodoros being that there is absolutely no difference between either side, other than their names and the color of their uniforms, and the misery and poverty of the common man remains unchanged.
* San: Three Kingdoms Comic attire, he still has time to make his lower half completely Stripperiffic too.
* San: Three Kingdoms Comic. Dong Zhuo and Dian Wei go to Hawaii after their novel death, and Lu Bu got sent to Alaska (while wearing a bikini). It looks like latter strips drop this concept, however.
* San: Three Kingdoms Comic, Dong Zhuo caught Lu Bu making out with Diao Chan and gave chase. When cornered, Dong Zhuo just revealed that Lu Bu that the latter left his wallet on the former's room.
* Santiago: A Myth of the Far Future, although that is more due to a lack of knowledge on the villain's part. In order to kill the bounty hunter Sebastian Nightingale "Songbird" Cain, the assassin Altair of Altair somehow makes him hallucinate that he is back on his home planet of Sylaria being asked by someone he cared about to help her across a brook (as a lure to get Cain close enough to Altair for her to stab him). At the last moment, he shoots her and tells her corpse, "There aren't any brooks on Sylaria."
* Santiago: A Myth of the Far Future. As one of his supporters cackles, after Santiago is quickly murdered by a bounty hunter — whom Santiago then guns down — "Everybody knows that Santiago can't die!"
* Santiago: A Myth of the Far Future by Mike Resnick, the revolutionary anarchist Santiago is eventually revealed to be the title that different successors took.
* Santiago: A Myth of the Far Future plays this absolutely dead straight — people only get cybernetics when they're injured, but as Sebastian Cain comments on someone else's eyepatch, "Why doesn't he just get a cybernetic one? I've got one — it sees better than the one I was born with."
* Santiago Calatrava, whose High-tech architectural style buildings resemble Raygun Gothic but still manage to look somehow modern.
* Santiago Nights, an original English language light novel, about Lily Oda, a young werewolf mob enforcer and her human mate, Chelsea Heartfield.
* Santiago (Spanish name for St. James) would qualify for this. In Latin America and Spain there's a plethora of cities with the name including but not limited to Santiago de Cuba, Santiago de los Caballeros (Dominican Republic), Santiago de Compostela (Spain), Santiago del Estero (Argentina), and Santiago, capital of Chile.
* Santino Marella a little more than a year ago when he claimed that he had finally found a new favorite basketball team and removed his shirt to unveil an Oklahoma City Thunder jersey...in Seattle, whose beloved Sonics had been moved to OKC and became the Thunder. Those who didn't boo lustily seemed to have had the air taken out of them, as it was as too soon a moment as there ever could be.
* Santino Marella...and this had an odd affect on his psyche, as he would try to prove his manliness by beating divas at traditionally girly tasks. The divas are wearing bikinis? Behold, the mankini! Nothing says manly like a Battle Royal to determine Miss Wrestlemania!
* Santino Marella because he wastes so much time signalling for it that he's almost always intercepted.
* Santino Marella, becoming an instructor of such upon his retirement from wrestling)
* Santino Marella. Before that, in OVW, he was Russian wrestler Boris Alexiev.
* Santino Marella, cleanly winning quite a few matches and even becoming US Champion.
* Santino Marella could be seen visibly laughing in one corner of the ring.
* Santino Marella failed to get over as the "Milan Miracle", he got over this way, typically throwing silly insults at his opponents. Usually he's a weak character who gets whipped on, to get the audience cheering for a big, strong hero.
* Santino Marella. Santino actually can do the splits, as he has demonstrated in other matches. Although there is a difference between a side-split (legs out on either side, which he was doing on the apron) and a front-split (legs forward and

back, which he does in matches.)
* Santino Marella's complaints of "sexual discrimination" for not being allowed to compete in the "Miss Wrestlemania" battle royal.
* Santino Marella show under his real name of Anthony Carelli that same year.
* Santino Marella. The group of fans in the front row who spelled out "SANTINO" as he entered were likely unamused, however.
* Santino Marella was pretty over in his time, but critics never rated his matches very high. Smarks consider him an embarrassment.
* Santoalla at first. The Rodriguez family were quite welcoming to Martin and Margo when they first moved to the village. However, when Martin tried to implement his plans to fix up Santoalla, the Rodriguezes would basically demand that he stop. It eventually got to a point where they refused to speak with each other.
* Santo contra la invasión de los marcianos-style) that takes place in the suburbs of the (then-) Federal District.
* Santo en El Tesoro de Drácula, claims to have invented a revolutionary new time machine during his downtime from wrestling. For some reason, Mexico's leading scientists don't take his ideas seriously. Ticked off by this rejection, Santo spends the rest of the movie trying to prove the mainstream scientists wrong by using the time machine to retrieve Dracula's lost treasure.
* Santo en El Tesoro de Drácula features an odd variant. The movie's heroine, Luisa, travels back in time to 19th century Mexico, where she inhabits the body of a young woman (identical, from the audience's perspective). But the details are a bit muddled - for example, her body seems to disappear from "the present".
* Santoro Gaming swears a lot due to his rage from failing at video games.
* Santorum. (n) 1) The frothy mixture of lube and fecal matter that is sometimes the byproduct of anal sex. 2) Former Republican Senator and presidential candidate Rick Santorum.
* Santos Degollado is a Mexican example; he was adept at gathering and motivating men to fight for the Liberal cause, but failed to ever lead them to victory. He was nicknamed "prince of defeats" and in some versions "Apostle of defeats". Incredibly likeable because of his sincere enthusiasm and dedication to the cause, but he should have delegated the actual military tactics to someone else.
* Santo vs. la hija de Frankestein, as later in the film both Truxon and Ursus are shown bleeding.)
* Santo vs. la hija de Frankestein: Santo's girlfriend is hypnotized and ordered to cut out his eyes and deliver them to Dr Frankenstein. She gets as far as holding the knife over the helpless luchador's face before this trope snaps her out of it.
* Santo vs. la Invasion de los Marcianos Third Eye while in human form ... but that's good, because now the scriptwriters don't have to try explaining why Santo doesn't get vaporized when he goes mano-a-mano with them. Being able to ditch the long blond wigs probably made life easier for the wrestlers playing Martians.
* Sanya, he is the only active Knight of the Cross, which means that he is single-handedly patrolling the world and putting down various supernatural threats. This is a normally a job for three people, but, as Harry notes, he seems to be handling it with aplomb.
* Sanya is the Atoning Knight in Shining Armor as he was once host to one of the Fallen, but a moral epiphany freed him from the demon's clutches. He wields the Sword of Hope, bringing it to the world and helping save many people.
* Sanzaru Games was also panned for removing Ba'ah's unique hatch animation despite the reimagining being critically acclaimed.
* Sanza Salazar Saga: This is one of the reasons Sanza continues to put on the Red X suit and remain a thief even after working with the Titans so much.
* Saoirse the Snubbull suddenly dying from a heart defect that nobody knew about until the autopsy was based on what happened to another one of the authoress' cats.
* SAO: Mother's Reconciliation: Asuna ends up believing her mother favors Kouichirou over her, especially after Kyouko makes the mistake of comparing the siblings' accomplishments. This ends up spurring on her decision to run away from home.
* SAO: Mother's Reconciliation: In chapter 15, the stress of Asuna running away, as

well as the reveal of the extent of her resentment, leads to Kyouko suffering a heart attack and collapsing. The symptoms are described as a searing pain in the back of her neck, accompanied by dizziness.
* SAO: Mother's Reconciliation: Kyouko, hands down. In chapter 14, Kouichirou freely admits to Asuna that the main reason he was away from home working all the time was to get away from their mother and her overbearing attitude and that the entire reason he bought a copy of SAO and a NerveGear to begin with was to find an escape.
* Saori and Takatsuki suffer heavily from this. They become friends over the first several dozen chapters but due to a love triangle their friendship bitterly breaks. All this does is create
* Saori falls for Nitori even before she's out of elementary. Alas, it's unrequited and brings her much hardship.
* Saori has a huge crush on Nitori however it is very unrequited. Saori in turn has her own admirer in Fumiya, but she hates him
* Saori Kido's Latin Spanish voice was originally Cristina Camargo. After 26 episodes, the more remembered
* Sap, and it had several brilliant songs on it. ''Jar of Flies" just happened to be even better in every way, bringing in a more diverse sound and making it sound more wistful and folksy, while still having the bands signatures.
* 's apartment while they're having sex. Their reaction is to casually move into Bucky's room to keep going at it.
* Sap gloves are made so that doing this will be adding injury to insult. They're leather or vinyl gloves weighted with steel or lead shot in the knuckles. A punch can One-Hit KO an opponent or break through wooden doors. A wearer without strength or martial arts training can break cinder blocks with them.
* Saphira gives a blessing of sorts to an infant girl, later informing Eragon that the girl won't have an ordinary life after receiving it, and that what he just witnessed was the beginning of a whole new legend. And then it turns out that they screwed up and cursed her to suffer other people's problems. After they find out, they try to remove the curse, but only partially remove it, resulting in someone who is aware of other people's problems, but is not inclined to help.
* Sapient All Along: A seemingly dumb animal turns out to actually be just as smart as humans are.
* Sapient Cetaceans: Whales, dolphins, and porpoises depicted as sapient, fully intelligent creatures in fiction.
* Sapient Eat Sapient customs disturb more squeamish races and tend find this discomfort amusing.
* Sapient Eat Sapient: Two individuals of sapient (though not necessarily human) species are smart enough to be considered people. But one person wants to eat the other anyways.
* Sapient Pearwood, an extremely rare material taken from a tree that grows in highly magical areas, is nearly indestructible and completely immune to spells. The fact that
* Sapient Pet: A domestic animal companion who has humanlike intelligence.
* Sapient Ship, Fridthjof's ship Ellidi is enchanted "so that she had learned to understand human speech", and one time Fridthjof's life is saved in a sea-storm because the ship seemingly reacts to his call.
* Sapient Ship has a spot directly between her reactors that needs to be scrubbed regularly...
* Sapient Ship, was built by them. Since then he's subjugated the most aggressive races of the galaxy, including the Ob'enn, declared war on a species composed of dark matter from another galaxy, and pretty much named himself God.
* Sapient Ship: Your spaceship has a mind of its own and often flies itself.
* Sapient Steed: A mounted animal with the same intellect as the person who rides it.
* sapient supercomputer. All he wants are some more "not-stupids" to talk to — and he participates in the Loonie rebellion purely out of loyalty to the few friends he does have.

* sapient worlds. Primus even has a particularly hammy robot population living on him. (They were created in his image, after all.)
* Sapin is Spain and Delarus is Belarus, if that wasn't entirely clear.
* Sapnap accidentally kills Niki's fox Fungi, Fundy, who gifted her the fox, encourages her to kill Sapnap's pet fox Skechers in revenge, despite Niki initially accepting Sapnap's apology for the animal murder. Sapnap then retaliated by killing the Enderman that lived in Fundy's house, Leonard, and took and burned the diamond block on Fungi's grave. This eventually escalates into the First Pet War.
* Sappers get the MD-82 anti-personnel mine, which detonates when an enemy steps on it.
* Sapphire, a member of the Thieves' Guild, had her family murdered by a bandit gang, which then took her back to their camp to be gang-raped for two weeks. Then she managed to get her hands on a knife and
* Sapphire and Ruby also started out having this dynamic; Sapphire being the elegant and noble aristocratic gem, Ruby being her common soldier bodyguard. They clearly moved towards a completely egalitarian relationship, though.
* Sapphire and Steel affair as a past assignment, in Assignment 1. Sapphire, Steel, and Lead were apparently involved.
* Sapphire and Steel, especially when she gets a severe bob circa Assignment Three.
* Sapphire and Steel features a family of time travelers from a distant future where all animal life on Earth is extinct.
* Sapphire and Steel has a story set at an isolated gas station, but it's set in England, not the northern US.
* Sapphire and Steel. In all their interactions with humans, Sapphire plays Good Cop and Steel Bad Cop. This is implied to be partly deliberate and partly just their natural personalities.
* Sapphire and Steel is nonplussed by the arrangement, but Sapphire has fun winding him up by asking things like what side of the bed he wants.
* Sapphire and Steel serial. It was handwaved in various ways, generally along the lines of "Time won't let us leave", and contributed to the series' sense of unsettling claustrophobia.
* Sapphire and Steel: The third serial, revolving around a strange family living in an apartment building, uses film for establishing shots of the building and for a sequence set on the building's roof, and video for all interior scenes. (The other serials are video-only, with even the outdoor scenes being studio sets.)
* Sapphire and Steel: This happened to Sapphire when she was channeling the Darkness in the second serial.
* Sapphire and Steel unless she spends the rest of her life taking certain precautions, living with the knowledge that if she slips up even once she's potentially doomed.
* Sapphire and Steel) was shown. Such a style of opening (title both before and after the cold open) is more common these days. "Pure" teasers only appeared in the first episode of each story, with later episodes reprising the events leading up to the previous episode's cliffhanger.
* Sapphire and Steel, while nominally SF, is also deeply unsettling in the fashion of a good ghost story — little or nothing is explained in any detail, which tends to enhance the dream-logic feel of the show.
* Sapphire: Especially when it's the detonator for a bunch of exploding throwing stars.
* Sapphire Foxx is devoted to exploring as many aspects of gender bending as possible. The main myth arc involves the idea that gender identity disorder is an inherited curse, but side stories may involve things like a businessman being mistaken for a woman when meeting a client, transforming a crossdressed Halloween cosplay couple as a prank, or pneumatic machines that can remold a person's body.
* Sapphire is probably some variation on the whole psychic philosophy".
* Sapphire Rose is the cause of everything wrong, despite being the one to recommend that Sparhawk be called in. Which bites him in the ass later.
* Sapphire Shores, according to Pinkie, is the second greatest pop star in all of Equestria. Rivalry between Sapphire and Coloratura ensues.

* Sapphire: Somewhat. Ivanka gets killed, but only five years after she marries Alec, which in turn was four years since they first met.
* Sapphire Star, a worldship of the Empire of the Seven Systems with a diameter in the tens of kilometers. It's used as a mid-range luxury cruise liner.
* : Sapphire. The energetic zombie teenager is way faster and louder than a zombie should be.
* Sappho (bisexual female main characters, female cross-dressing character; subject matter includes LGBT awakening, queer female romance)
* Sappho has largely been reduced to this trope. There are many, many records of her poetry being gushed about in ancient times, but very little of her work has actually survived to the present day. Aside from the scraps which have survived, we just have to trust that the ancients knew what they were talking about when they were calling her "the tenth muse" and counting her as one of the Nine Lyric Poets. Only two or three of the eight others have fared any better than her, so she's not alone in that regard.
* Sappho: Phil is more tolerant than most 1920s people would be of his wife cross-dressing and having sex with a woman. He still clearly isn't happy though (not just of her cheating, but acting too "masculine" in his view). Other people also disapprove when Sappho is publicly dressed as a man, though only mildly. Phil also very much dislikes her having a tattoo, saying only sailors and whores get them.
* Sappho: Sappho clearly wants Phil and Helene to have a trio with her. She encourages them to get involved. However, while they have sex, both reject this in the end.
* Sappho: Sappho dresses as a man in Greece multiple times, and is presented positively overall. Characters who know about this disapprove or react with mixed feelings however.
* Sappho: Sappho realizing her attraction to women, and subsequent relationship with Helene, makes up the core of the film. Both are bisexual however.
* Sappho: The Orlovs are expatriate Russians living in Greece who fled due to the Bolshevik Revolution and can't return to their homeland.
* Sappy, based on the stars of a show John K notably enjoyed, adding even more fuel to the fire.
* Sappy Bull Fighters, the Stooges are vaudeville entertainers who trek to Mexico to perform their gag bullfight shtick, with Joe as the brave matador, and Moe and Larry dressed in a bull costume. Unfortunately, their gig is cancelled once they arrive. According to the trio, the manager fired them after they refused to do 10 additional shows for free. With no money to return home, the Stooges are stranded. Feeling bad for them, attractive señorita Greta gets the boys a gig at the local bull ring. However, when she leaves Greta mistakenly takes the trio's suitcase instead of hers. When they go retrieve it, however, Joe becomes attracted to Greta and begins to kiss her, infuriating her husband José. The next day, the Stooges perform their act successfully at a bullring José recognizes the trio. In an act of revenge he pays the bullring attendant to release a live bull into the ring. Moe and Larry flee, but Joe is unaware of the switch. He eventually head-butts the wild animal, and is paraded out of the ring to the rousing cheers of "Olé, Americano!"
* SAPR: After deciding to stay on Team RSPT full-time, Twilight creates a set of powered armor to make up for the fact that she isn't otherwise very physically strong or capable.
* SAPR: Amber is killed by a disintegration caress by Cinder in exactly the same manner in which she herself murdered Ozpin just a few minutes earlier.
* SAPR: Atlas is divided into two cities. In the sky there's an upper city built on a giant floating rock, which is mostly inhabited by humans and is extremely advanced and affluent. On the ground there is a lower city (also called Low Town) that is inhabited mostly by poor faunus and is constructed a ramshackle and thrown together manner with little in the way of the technology the kingdom is famous for.
* SAPR: Both Pyrrha and Jaune are descended from heroes, and try their best to live up to the example of their ancestors. Though Pyrrha's are quite a bit more famous than Jaune's.

* SAPR, but here she's also totting a seven-foot-long anti-materiel rifle.
* SAPR: Chapter 180, "It's Always Darkest Right Before a Hero Enters," has two notable ones.
* SAPR: Ciel comes from a long line of people who have served in the Atlesian military and the Mantelian military before that, and she expects that when she has her own children they will follow the exact same career track.
* SAPR: Cinder burned her home to the ground with her stepmother and one of her stepsisters inside. Then years later during the course of the story, she stabs her other stepsister to death in a dark alley.
* SAPR Cinder Fall fills this roll for Sunset, with the two genuinely considering the other their friend with the only hiccup being that they have to fight each other because of their jobs.
* SAPR, has to learn to become a good person the hard way. Since she doesn't actually think she is a bad person, this road is rockier than normal.
* SAPR: Literally the case of Ruby Rose. She is explicitly described as being so pure of heart that telepathic communication with her wipes away negative feelings in people. Sunset herself describes the inside of Ruby's soul like a vast warm white light.
* SAPR of all people falls into this trope, with a consistent wish of hers being to be loved and adored by a cheering crowd in everything from music to combat.
* Saprolings, Red has Goblins, White has Soldiers, while Blue has whatever is assigned as Blue creatures in the settings. Green is the biggest offender when it comes to spawning endless hordes of Mooks.
* SAPR: Several examples are found, possibly due to the author's admitted love of epic fantasy.
* SAPR: Sunset and Flash for each other, even though they both agree that they’re better off apart.
* Sara and Daphne go from friends, to not on speaking terms (when Daphne, bitter over her
* Sara and Grissom. Sara changed shifts after their romance became known to Ecklie. It was a bit more complicated relationship since Gil was Sara's supervisor and that's what necessitated the changing of shifts. Evolved into a
* Sara Bareilles and was nominated for a Tony for her score, spent six weeks starring in the show.
* Sara Bareilles' "Gravity" may count as a mild version of this trope, as the song appears to be about a genuine but not-terribly-healthy passionate relationship.
* Sara Bareilles has a lilting melody and is sung sweetly, if you're not paying attention you may not notice when the flowery lyrics shift gears and go blunt and vulgar. "But like most creatures down here on the ground / I'm composed of the elements moving around / And I grow and change and I shift and I switch / And it turns out I'm actually kind of a bitch / But that only happens when I get provoked / By some piece of shit asshole we all sadly know".
* Sara Bareilles has become famous for songs of this nature. Her portfolio includes "Bottle It Up", about the downside of love and obsession; "Gravity", about destructive love; and the ironically titled "Love Song", which was heavily influenced by her label trying to force her into writing a peppy love song in order to become more successful. Ironically, it is her biggest-selling single to date.
* Sara Bareilles into her outfit-clone backup dancers. At the end of the video, she's revealed to actually be an Adorkable nerdgirl rocking out to a song inside her head, and scaring the other customers.
* Sara Bareilles' "Love Song", a catchy, major-label "corporate" pop song, is a slam by Bareilles against her record label for trying to force her to write a love song before they'd allow her album to be released.
* Sara Bareilles. The most ironic part is that the line "Not gonna write you a love song" is what's usually featured in the ad.
* Sara Bareilles was apparently told to make her love songs more commercial. So she wrote "Bottle It Up", essentially about how pissed off she is about being told what to write.
* Sara Bareilles", which specifically goes "I'm not gonna write you a love song".

Ironically, it was her first hit. Same story with her second hit "King of Anything"... so which party gets to say "I told you so"?
* Sara becomes increasingly frustrated when both of her parents start focusing more on Eli, her resentment making her desperate to find a way to prove she has power.
* Sara Bergmark Elfgren: Minoo is described as having black hair and dark eyes, and her name is Arabic (a language her relatives speak). But her race is never mentioned.
* Sara Bergmark Elfgren: The apocalypse will begin in a tiny town in Sweden with a population of 13,000.
* Sara Bernhardt is by no means the only female Hamlet in movies — Hamlet (1921) had Asta Nielsen as a female Hamlet who had been reared as a boy, and was much more interested in Horatio than Ophelia.
* Sarabi and Mufasa (lion king and queen) bump their heads at the beginning of the film when their cub Simba is being presented.
* Sarabi's voice actress, Madge Sinclar, lost her battle with leukemia a year after the film's release. This resulted in her not being seen on-screen in
* Sarabi was talked about in "The Undersea Twister" before being officially introduced in "New Squirrel in Town".
* Sarab, the Apprentices are chosen early in life to be the bearers of knowledge in their world.
* Sarab, the Hubs are the only places science may be learned and they are very exclusive.
* Sarada and Chocho are this way, as are Boruto, Inojin (though not with Boruto), and Shikadai.
* Sara Del Rey as her manager. Fans reacted so badly to the idea of a man being involved in the action as anything other than a referee that he was dropped after one appearance.
* Sara Del Rey, had reason to be confident in her abilities, but not enough to call a match against The Super hardcore Anime (aka, LuFisto) easy, much less a title defense. LuFisto was in earshot and immediately interrupted Del Rey's promo to call her out.
* Sara Del Rey hasn't been one her entire career but has gone through several stretches of it, enough that a frowning face is a fixture of most of her ring gear. During her (three year+!)JAPW Championship run though, it was speculated she wasn't capable of smiling at the time because of two canker sores.
* Sara Del Rey put in their place. While WWE somehow avoided a discrimination lawsuit for replacing all its remaining nonwhite women at once with inferior workers, it would take twelve years before the division's reputation began to recover.
* Sara Del Rey: Retired from wrestling in 2012, having spent her last years mainly in CHIKARA and ROH. Head female trainer for NXT.
* Sara Del Rey. She rekindled an old rivalry with Madison Rayne in Remix Pro over Rayne breaking James's arm in TNA.
* Sara Del Rey (she was trained by him). She used his LeBell Lock finisher, used "The Final Countdown" as her entrance music and called herself "The American Angel" (he was "The American Dragon").
* Sara Del Rey still wanted to be her friends even after seeing all her faults firsthand.
* Sara Del Rey's UK shows, against native UK talent Eden Black and Jetta no less.
* Sara Del Rey Title belts despite being a barely functional team. To Perez Rush and Del Rey were NOT a tag team but co corner wrestling partners.
* Sara Del Rey volume 35 with the game plan of stop Rachel Summerlynn's fingers from working.
* Sara Del Rey, who both smiled quite a bit initially before becoming angry at the world and smearing their faces with paint\eyeshadow and covering them with masks. Sara pretty much stopped smiling for the most part, whereas Kana still smiled semi-frequently but it gained a new ominous connotation since she was always up to no good.

* Sara doesn't realize she is gay and aggressively accuses nearly everyone else around her of being a closeted homosexual (despite having fantasies about
* Saradomin. On the other hand, the Imperial Guard is a secular army loyal to the Crown Prince who hold residence in the principality of Burthope where they are defending Asgarnia against invading trolls while White Knights are waiting for any excuse to take over.
* Sara Evans' "Bible Song" focuses on a suicide, and questions how the dead man's widow can explain "the sorry thing Daddy did" to their children.
* Sara Evans. She even took the song to a higher position on the Billboard Hot 100 than he did, and McCain is today remembered pretty much only for his first hit "I'll Be."
* Sarafina, Nala's mother, is not named in the movie. Her name is in the credits.
* Sara Genge's "The Story in Which Dog Dies" is a short post-apocalyptic fable about the last man and the last dog on Earth: "If you happen to survive to the End of Time, you may see them hunting. [...] They will live happily ever after until the Very End. Last Man hopes it will come soon."
* Sarah Addison Allen, Logan's brother fears it will happen again with his son Win and Dulcie's daughter Emily.
* Sarah A. Hoyt, Athena wakes up to find that her father's crew have mutinied and are coming after her.
* Sarah A. Hoyt, bureaucrats try to deny Kit permission to dock because Athena's on board.
* Sarah A. Hoyt, Edward makes Tom's coffee with three sugars, surprising him with it before he can refuse it.
* Sarah A. Hoyt, Kyrie blushes when denying to Tom's father that she is Tom's girlfriend.
* Sarah A. Hoyt, Kyrie tells herself that the officer probably turns on his attractiveness for any woman; it's not personal to her.
* Sarah A. Hoyt, Nate tells Lucius that while they had pumped him full of babble juice, he had explained everything, with careful digressions to clear up points.
* Sarah A. Hoyt that stories tend to just leap into her head, usually at rather inopportune times, and refuse to go away.
* Sarah A. Hoyt, Thena comments that Kit is prone to muttering in his sleep.
* Sarah A. Hoyt, Thena rushes Kit off to Doctor Bartholemeu after Joseph tries to kill him. Given that she doesn't know the way there, and Kit can only communicate it telepathically, it gets difficult.
* Sarah A. Hoyt, Thena tells Kit she's always been expecting this. Despite the immense pressure her father would bring to bear.
* Sarah A. Hoyt, the officer mentions the bathroom to Kyrie, knowing that she knows there would have been blood and other evidence, to get her to talk with him.
* Sarah A. Hoyt, Tom treats Kyrie's bite. He takes the occasion to warn her, at length, about what are the signs that she has to get more serious treatment.
* Sarah A. Hoyt, when they are dealing with the grubs that two breeding shape-shifters with insect forms left behind, Tom is keenly aware that they are the offspring of two shifters who were most of the time human.
* Sarah also falls into the trap of being briefly attracted to herself when she looks in a mirror.
* Sarah & Duck interacts, helps and makes suggestions to Sarah and other characters.
* Sarah and Casey have both also used the window, and Awesome one time even says in exasperation they need a lock for the window.
* Sarah and Ed are a sibling example. In this case, Sarah is far meaner to Ed than Eddy is, as she is a horrible and abusive bully to Ed while Ed is nice and caring to Sarah no matter how much she mistreats him.
* Sarah and Helena, who were twins. If they came from the same cloned fertilized egg that split into two embryos the way that non-cloned identical twins do, that technically could be considered to make them into copies of a copy.
* Sarah, Annie, Artie, James, and Mark, theorizing that they have lungs instead of tracheae, like Earth insects do.

* Sara Havel is introduced as the only staff member from Hell House who survived the disaster that happened on the tragic opening night that killed fifteen people and the rest of the staff. She provides the documentary crew with footage of what happened in Hell House during the setup and encourages them to investigate the place themselves after finishing her interview. It's only after the rest of the documentary team goes to check the place out they find out she was killed with the rest of the staff where she's waiting for Diane and Jonathan, much worse for wear, right before they're attacked by the same faceless beings that killed Alex and Mac.
* Sarah becomes a Johrlac Queen, she takes a while to figure out her vastly expanded new powers, partially because she doesn't want to accidentally hurt anyone with them.
* Sarah Biddle, the orphaned housekeeper and David Braddock, the wealthy Philadelphia businessman, during the late 1800s in Stephanie Grace Whitson's
* Sarah Brightman and Katherine Jenkins, at least if you read either singer's forums.
* Sarah Brightman has "Make Up My Heart". The singer has two great men in her life, but she wants one in her life. The whole song is dedicated to her talking about her dilemma and what one man has that the other doesn't.
* Sarah Brightman musical of the same name. Knowing that their relationship is doomed, the singer details how she wants her lover to finally end things.
* Sarah Brightman, puts a new spin on the story by having Dr. Jekyll turn into a woman after drinking a magic cocktail.
* Sarah Buxton released her debut single "Innocence" in 2006. It and her next two singles didn't do very well, so her album sat for
* Sarah Chalke. By Season 3, the network demanded a sexier female character to market to the young male demographic. She was then given a makeover to bleach-blonde hair (she's a natural blonde but was a few shades darker in the first two seasons) and shorter haircut (plus a lot more makeup). While the makeup was toned down in later seasons, she kept the hair colour.
* Sarah Chalke (Elliot) is fluent in German and French. She's used both languages in a few episodes.
* Sarah Clarke auditioned for and was cast as Nina just one day before filming began and the wardrobe department didn't have time to give her a fitting, so she ended up wearing what she wore to the audition as her costume. Due to the premise of the show occurring over the course of one day in real time, she wore her own outfit for the rest of the season.
* Sarah Connor's roommate is murdered by the Terminator after a late night date with her boyfriend.
* Sarah Connor that she snaps out of it and lets herself feel like a normal person again.
* Sarah Connor wasn't crazy, he's living in isolation, away from major cities, raising dogs and keeping a healthy sense of paranoia about killer robots disguised as human beings. He even apologizes for not believing in Terminators, not that it does him much good.
* Sarah Dessen), and promptly got flack from fans for mixing things up too much.
* Sarah Dessen, Annabel gets into a car with Owen, who has a reputation for anger management issues. He takes out a hammer and she starts imagining headlines of her murder when he carefully buckles her in—the passenger seat's seat belt is broken.
* Sarah Dessen's books feature Ume.com, which is Facebook in all but name. It even has a Mark Zuckerberg-like creator.
* Sarah Dessen specializes in these. All of her novels are coming of age stories for her protagonist, usually following their last school year or last summer before college as they come to terms with their messed up families, gain some true friends and/or fall in love for the first time (sometimes all three).
* Sarah Dessen's work being a good example. They usually are exactly like the countless movies in this genre, except that they take place in high school. Most of the common stereotypes of rom coms are translated into a high school setting, for example instead of them being not compatible the couple usually will be childhood

friends, and usually the girl wants the most popular guy, but realizes she's in love with her best friend.
* Sarah Dessen version of Mark Zuckerberg (i.e. a nerdy guy who started the site in college).
* Sarah doesn't have it much better. Eventually she reveals that she fell for Chuck right off the bat, but was blocked from doing anything about it by her job. While pretending to be his cover girlfriend, she became part of Chuck's wholesome family -complete with holiday dinners and concerned family members- a dynamic she can only pretend to fit in with. She then has to endure watching normal women interact with Chuck and a few of them really liking him - all of whom could possibly offer him a real relationship, with some like Jill and Hannah bonding with Chuck over shared interests and hobbies (while super-spy Sarah is a bit of a pop-culture dunce). She gets better once they're officially together.
* Sarah Dollard's "Trap Street" was a standalone script subsequently revised into a
* Sarah ended up losing contact with Nicola, Kimberly and Cheryl after the split - remaining only in contact with Nadine.
* Sarah falls in love with Edd in a season 1 episode and apparently gets over it. However, it's sometimes implied she still has a crush on him in later episodes and confirmed by her diary in "For Your Ed Only". This doesn't stop her from beating him up and treating him like crap. She writes in the diary that if she shows any mercy, people will be walking over her. So you could say she's sort of a
* Sarah Ferguson, Duchess of York, did a Weight Watchers commercial in which she said she got most of her exercise running from the paparazzi. It was released the same week as the death of Princess Diana of Wales and was immediately pulled.
* Sarah Frobisher-Smythe, the former Chosen One, was born on 1:00 on the 1st of January.
* Sarah Girl 1998, Dedede goes on a rant on how he'll get back at SpongeBob for what he did to him. Cut to SpongeBob sneezing and thinking someone was talking about him just now.
* Sarah Hamoudi converted to Islam in order to marry Yasir in the backstory of
* Sarah has Fulcrum operative Mauser at gunpoint after a particularly savage fight and prepares to arrest him. Mauser then begins to taunt her about knowing Chuck is the Intersect and how his compatriots will do everything in their power to free him. Sarah hesitates for a moment and lowers her gun, then subverts this by snapping her gun back up and shooting him dead.
* Sarah has her once more turning out to really, actually, honest to God, this time we mean it, have been on the villains' side all along.
* Sarah Haskins talking about the Botox website "...and here she is two weeks later - after she bought some makeup!"
* Sarah. In Card's version, the "killed because she looked back" was metaphorical and she actually died because she was trying to collect her belongings rather than flee the city with Lot and their daughters.
* Sarah in "Little Ed Blue" when she starts one of her typical (violent) tantrums. She cowers in terror before him.
* Sarah is able to tell when Borden loves her and when he doesn't. If Olivia or others had listened to Sarah,
* Sarah is a D&D-style Wraith, and anyone she or her minions kill becomes a ghost beholden to her.
* Sarah is an elf. Her kids, James and Bex, were already one-quarter elemental.
* Sarah is this to Ed. While Ed cares for Sarah, he's also terrified of her because of Sarah's terrible temper and tattletale tendencies.
* Sarah is wearing a wedding band when she shows up for the first time in Part 2, revealing that she and Hashim got married at some point during the
* Sarah-Jane and Cathryn in series 3 became close enough that they actually went into business together after the series ended.
* Sarah Jane ends up in a furry grey frock coat and a long, multicoloured striped scarf in shades of pink in "The Seeds of Doom".
* Sarah Jane gets shipped with the Doctor and previous companions Jo Grant and

Harry Sullivan, as well as several other former companions we never see her interact with on screen, the man she almost married in "The Wedding of Sarah Jane Smith", and the older version of her young neighbor Maria. Her son, Luke, is another can of worms because he never had an onscreen love interest.
* Sarah Jane makes the mistake in one episode, in which she travels back to 1950s England.
* Sarah Jane Smith gets one of these visits from a UNIT colonel, accompanied by an entourage of armored trucks and gun-toting grunts (seriously, did they think Sarah Jane was going to
* Sarah Jane Smith had a lot of this when she travelled with the Fourth Doctor. A classic example is
* Sarah Jane Smith, puts the greater good ahead of her friends' lives, and in "The TAO Connection," she essentially murders the villain of the episode.
* Sarah Jane Smith started out this way but rapidly became more interested in saving the planet.
* Sarah Jane Smith, who still fights the good fight like in the old says traveling with the Doctor, though she's not as old-looking as most characters of this type. She'd be even cooler if she'd stop
* Sarah Jane suffers the embarrassment of a cliffhanger in the television edit of "
* Sarah Jane tells the Doctor rather reproachfully that she waited for him in
* Sarah Jane, the Torchwood team and Harriet Jones all band together with their respective technologies to contact the Doctor.
* Sarah-Jane was given her sonic lipstick and robot dog K-9 by the Doctor
* Sarah Jessica Parker (1991) starring and written by Steve Martin. Although SanDeE is a bit more nuanced take on the character. She is a classic Manic Pixie Dream Girl, but the movie portrays a relationship with her as shallow and self-indulgent for Martin's character. He is better paired with the quirky British woman.
* Sarah Jessica Parker's face is hideously elongated, not unlike a horse's face."
* Sarah Jessica Parker. She's even kept her family relatively close, as she bought her mother a house in New Jersey.
* Sarah Jessica Parker. While every other character in the series has basically the same facial layout, her face is an ugly exaggerated caricature, as a
* Sarah Kennedy, who presented the following show, once famously quipped that "Sarah's been pouring the old gin over her cornflakes again!" People used to set their alarm clocks to wake them up earlier in the hope of catching another Kennedy classic. She no longer works for the BBC.
* Sarah Kerrigan, self-styled (and earned through serious ass-kicking) "Queen Bitch of the Universe", from
* Sarah learns Corrine suspects Danny may be her son's father only in 1x9, long after the audience did.
* Sarah looks into or is reflected by mirrors three times in the premier, each of which has to deal with her taking on a new persona: in the restroom after she steals Beth's purse, during
* Sarah Lynn didn’t die at the planetarium (in fact, she was barely alive), but in the hospital, because Bojack waited 17 minutes to call an ambulance in order to create an alibi for himself.
* Sarah Lynn dying of a drug overdose. Made even worse when it is revealed that Bojack waited 17 minutes before calling the hospital, meaning that Sarah could have very well been saved.
* Sarah Lynn is basically BoJack if he were a (more successful) human female about two decades younger. She's an
* Sarah Lynn's music appears in a GEICO commercial and she appears on a billboard proclaiming, "I'd die for a Pepsi!"
* Sarah MacKenzie of the show. Although the two previous female leads Caitlin Pike and Meg Austin were a bit taller.
* Sarah Manning is a headstrong and charismatic leader for the Clone Club.
* Sarah Marie Johnson, then 16, killed her parents on September 2, 2003, because they forbade her from dating a 19-year-old boy.

* Sarah McLachlan. An intense, highly erotic song... based on mash notes from an insane stalker fan. (Who tried to sue her for plagiarism, then killed himself when he lost the case.)
* Sarah McLachlan." A theremin's wordless "vocals" and a slightly out of tune, tinny piano evoke images of warm nostalgia.
* Sarah McLachlan based the song "Possession" on real fan mail she received. A look at the lyrics of the song will tell you that these weren't ordinary, polite fan letters. One fan filed a lawsuit against her, alleging that she had plagiarized the lyrics from letters he had written. He committed suicide before the case ever went to trial.
* Sarah McLachlan Gonna Hurt". Both the book and the album revolves heavily around things that most people consider taboo, or outright find painful to even think or talk about. It's not about physical pain, though the cover-art to the album depicts a heart that's been pierced by a couple of black spikes...
* Sarah Mc Lachlan, guaranteed to make animal lovers either want to take action, or just change the channel to escape the emotional pressure!
* Sarah McLachlan's "Angel" will always be linked to montages of sad, abused animals in cages in commercials for the ASPCA.
* Sarah McLachlan's "I Will Remember You", despite being one of her best-known songs, only reached #14 in the United States via a live version (the original only reached #65). "Angel" hit #4, but even then it fell one spot short of "Adia", which is mostly forgotten today.
* Sarah McLachlan song "Hold On" has a line "Hold on, hold on to yourself, this is gonna hurt like hell". It's referring to emotional pain rather than physical, but the message is the same.
* Sarah McLachlan' touring keyboardist, but is used in a PSA for the American Society for the Prevention of Cruelty to Animals. A commercial that is narrated by McLachlan herself.
* Sarah. Merely to reach her witnesses quickly and have her team's copter free to chase "Cheerleadra" at the same time.
* Sarah Michelle Gellar originally auditioned for Buffy. Sarah and Charisma's roles were switched, and the character of Amy was created for Elizabeth.
* Sarah Michelle Gellar", she got to juggle in order to distract the attendees. In an ironic inversion, Gellar also happens to be terrified of graveyards.
* Sarah Michelle Gellar to September 25, 1976, Kendall's original birthdate, making her a 16-year girl again in 1993 - undoing the earlier SORAS-ing of Kendall.
* Sarah Michelle Gellar with slightly darker hair, and got progressively blonder with the seasons.
* Sarah Monette's short story "Draco Campestris" takes place in one of these.
* Sarah Monette's short story "The Devil in Gaylord's Creek" features one of these.
* Sarah move, turning him into a three-dimensional person capable of regular movement, albeit still animated in jerky 2D.
* Sarah Newlin is able to rescind Jessica's invitation for Jason's house, even though she's only been there for a couple of hours at best. Apparently anyone can rescind any vampire's invitation.
* Sarah Palin from 2006-2009, 2008 Republican candidate for US Vice President.
* Sarah Palin good and some said she was spending too much money on her clothes.
* Sarah Palin on the grounds that it helped spread awareness of Christianity in America.
* Sarah Palin. She seems to end up most often with Mitt Romney and Joe Biden. Of course, she's married and has kids, but the whole enterprise was pretty tongue-in-cheek to begin with.
* Sarah Palin's infamous Katie Couric interview: the Alaskan Governor tried to say "caricatured" but failed, and Couric suggested "Mocked"…you know, reporters?
* Sarah Palin's jokes about her daughter "sexually perverted comments made by a 62-year-old celebrity". Letterman responded: "I'm hardly a celebrity".
* Sarah Palin that Sarah Palin said, "I can see Russia from my house!" ... via Tina Fey's parody (the actual quote was that you can see Russia from a certain place in Alaska, which is true as far as it goes).

* Sarah Palin. The fact that she played as a point guard in high school and majored in sports journalism just adds to the absurdity.
* Sarah Palin, the former Governor of Alaska, won a local one and came in third for the state, meaning yes, Palin potentially could have been Miss America.
* Sarah Palin (which often tries the patience of members of her own party) he rarely even acknowledged a thing she said, brushing off the few questions interviewers asked him about her.
* Sarah Palin. Yes, that has about as much to do as red as "alot" has to do with being a real word. The book also has just about the same exact cover.
* Sarah seems to pick up this trait from her old mentor, given this exchange from the first episode of
* Sarah's Fatal Flaw is Wrath. There is rarely an episode where she isn't either yelling at someone or beating them up, and the other kids in the cul-de-sac rarely help her as a result.
* Sarah Shahi is half-Iranian and speaks Farsi in real life. The episode "A Civil War" revealed that her character, Dani Reese, has an Iranian mother and can speak Farsi.
* Sarah Silverman, as well as her line "I was raped by a doctor. Which is a very bittersweet experience for a Jewish girl."
* Sarah Silverman has stated that she doesn't want to have any biological kids because of the possibility of them inheriting her clinical depression.
* Sarah Silverman, her dad was a businessman who ran commercials like this.
* Sarah Silverman (in one of the few things she's done that doesn't require her to be vulgar and politically incorrect). Besides her sister, Laura, Sarah also has another sister named Jodyne (who's a screenwriter) and another sister named Susan, who lives in Israel and is a rabbi.
* Sarah Silverman is the youngest of the actors to play the Grandfather. She wears a silver wig, graying bushy mustache and eyebrows, and a suit, and puts on something like an exaggerated East Coast or Philly accent ("Yes, you're very smaht."). Never mind that unless some people were having kids very young, fifty is pretty young to have an eleven-year-old grandchild, and makeup aside, she doesn't look fifty, anyway.
* Sarah Silverman, oddly enough) picks up the ship on her instruments and sends a greeting to the aliens she assumes are on board. Tom Paris, who treats twentieth-century culture as a hobby, is sent to smooth the situation over. He gets some things right, but never the details. Eventually Rain tells him, "You're always not quite getting things just quite right. It's as if you don't belong to this time period."
* Sarah Silverman one of those racists who would wonder if a black God is going to steal the Moon (heavily implying she is EXACTLY that kind of racist). Then again, since God is... well, God, that might actually put the scenario above and beyond this trope.
* Sarah Silverman. She puts a crying baby on a branch outside during her baby shower so she can deliver the punchline to her joke about how she lost a pair of chopsticks: "I'm like, 'Silver-WHERE?'"
* Sarah Silverman, who has suffered from clinical depression and had a Xanax addiction in her teens.
* Sarah's predecessor, the late Elizabeth "Beth" Childs, was both a mastermind and charismatic leader. Beth also tried being a levelheaded leader, but she was already suffering from
* Sarah Stock. (Which wasn't too surprising if you knew them already, especially not the latter)
* Sarah Strange (voice-acting example, but appears in several live action works)
* Sarah, the Sith/Siren can power a very large ship single-handedly, but cannot exert command over said ship while energizing it, so...
* S.A.R.A.H., the talking smart-house, apparently has emotions. To the point where she gets angry and lonely.
* Sarah Travers, as a government agent, always wears a snazzy black suit while on the job. Not only that, but she has a preference for more colourful, stylish suits

while off the clock.
* Sarah Travers, being a government agent, is almost exclusively referred to by her last name.
* Sarah Vaughan is considered to be one of the finest jazz albums of all time.
* Sarah Vaughan was recorded with only Vaughan on vocals plus a guitarist and bassist, a very minimal arrangement for a jazz album.
* Sarah Walker gives one of these to Chuck at the end of the first episode.
* Sarah was accidentally kidnapped, and subsequently held captive for several days, on her 17th Birthday alongside Ren's Treeko by an Illusion grunt.
* Sarah was already pregnant with Track when she married Todd. Sarah's parents were pregnant with her oldest brother when they married. And Track's now wife was already pregnant when they married.
* Sarah Waters, a lesbian, is known for her Victorian era novels featuring lesbian protagonists.
* Sarah Z, a queer YouTuber, does essays and reviews on pop culture, sometimes focusing on fictional LGBT portrayals.
* Sarah Z, but, because they were quite young, weren't familiar with media that actually contained those elements. So they did it with the Once-ler, because it was safe and familiar.
* Sarah Z). Presumably this trope is the reason why. Sarah in particular finds it baffling that the shows mock the female fans to whom they owe part of their very existence.
* Sarah Z which opens by explaining a story on Amelie Wen Zhao and how her planned trilogy of books as part of a series called "Blood Heir" was canceled due to heavy criticism of the first book's content on slavery (which could be interpreted as offensive by some people). She then explains that media that is made by diverse creators will often be held to higher standards due to perceptions that because they are in the same minority they are in, they would be able to avoid making the same mistakes those from non-marginalized groups make when that's far from the truth.
* Sara is perfectly capable of actually producing teeth there (and anywhere else she chooses), and has in fact
* Sara Lance and Ray Palmer, who bond due to being from the same city but have no romantic feelings for one another.
* Sara Lance carries a lot of guilt due to her work for the League of Assassins, and for this reason she breaks up with Oliver (and later tries to with Ava Sharpe in
* Sara Lance comes on board as an on-off member in Season 2 and Roy Harper later joins in the same season on a permanent basis.
* Sara Lance he refuses to let him be handed over to the League of Assassins' custody to face his crimes. All of this he justifies because vengeance is hollow and you shouldn't kill someone out of revenge. How does this season end? With Oliver killing Ra's Al Ghul, after a lengthy war with him that was caused entirely by Oliver wanting revenge for Ra's nearly killing him after he protected Malcolm Merlyn.
* Sara Lance. Reserved and merciless, she moves gracefully in battle, employing
* Sara Paretsky's V.I. Warshawski is a distaff version of the (usually) male hardboiled detective.
* Sara seduces the queen of France and later becomes the central target of the Salem Witch Trials for "corrupting" the local girls. She also turns out to be Lancelot of the King Arthur mythos.
* Sarashi bandage halter top to show large amounts of cleavage to lure a bunch of alligators towards her so she can pummel them.
* Sara's jobbing seems restricted to magic-using enemies. For example, she gets caught by an unexpected bind spell, but once Meji frees her she takes down three elves in a handful of seconds.
* Sara Snap is definitely a feisty ball of energy whenever she's passionate about something, such as lifting heavy objects, or her sports idol Athletica.
* Sara's not-so-fun introduction to the Ensigerum is the subject of a

* Sarasota, Florida, and in living color, you are going to see another first — attempted suicide." She then drew a revolver from her pocket and shot herself behind her right ear, killing herself.
* Sara's situation is even more unnerving as she becomes addicted to weight loss pills prescribed by her doctor to overcome her anxiety of being seen in her red dress on television.
* Saraswati is the more popular one to invoke (especially for students and academics) compared to her husband, who people revere but almost never directly pray to.
* Saratoga and its sister ships tend towards the "up-gunned carrier" end of this trope, though with their ability to also embark and deploy ground troops, perhaps the closest analogy is to a modern day amphibious assault ship.
* Saratoga before she died. As she'd only filmed half of her part, they resorted to extensive camera tricks, body doubles and soundalikes - so it became something of a challenge to guess which scenes featured the doubles.
* Saratoga ends with a climactic horse race. If Duke wins he has enough money to leave the bookmaking business and rebuild Grandpa's ranch. If Hartley wins, Duke is wiped out.
* Saratoga, it's probably deliberately aping US Navy aircaft carriers.
* Saratoga, rather than as "landing craft" (as they are often used to ferry troops to planetside from space) or simply, "transport."
* Saratoga, the climactic horse race, which will either leave bookmaker Duke Bradley penniless or allow him to retire from bookmaking to run a ranch, comes down to a photo finish that has to be reviewed via a film reel.
* Saratoga Trunk resulted in Mr. Dulaine's death. She comes back to the city bent on revenge, determined to wreak as much havoc and draw as much social embarrassment on the legitimate Dulaines as she can.
* Sara to have anyone searching for her, and that she hopes she's never found or returns home, she's deeply disappointed in her... and in the rest of her class. Not just for letting Sara's words go largely unchallenged, but for how they contributed to driving Chloe away in the first place.
* Sara towards Felicity when trying to correct her stance. The former is canonically bisexual and called her cute a few minutes prior (later confirmed as Sara flirting), and the latter is wearing spandex at the time.
* Sara Tucholsky hit a home run. So they picked Tucholsky up, carried her around the bases, and let her touch home plate to let her score the run. However, their generosity was eventually rewarded with lots of airtime of the moment, including an ESPY Award for "Best Sportsmanship Moment."
* Sara Van Gillern getting eliminated in the top 8 of Season three over
* , Sara visits Laurel's grave almost immediately after she's told of her death. She's joined by Oliver and Nyssa, who say they've come every day since the funeral. The story ends with Oliver visiting her grave one last time, much like in canon (see below).
* Sara Waite, codename Carmilla. She looks like a goddess of lust. Her father's mother is actually
* Sara who has fire generating powers with the power to ignite and burn whole towns; the catch...she can only control it while awake normally, so when she sleeps or is knocked out everything burns.
* Sarazanmai by a kappa-like creature named Keppi, who claims to be the ruler of the Kappa Kingdom.
* Sarazanmai feature photos and video footage of real world locations that appear in the anime, some of which feature the animated characters standing around in them.
* Sarazanmai, Keppi tells the main characters that in exchange for giving him shirikodama, he'll give them Dishes of Hope that can grant them wishes. Enta grabs the Dish he's offering them and asks if he could wish for a year's supply of cucumber rolls. A giant cucumber roll immediately drops down on them, and then Enta realizes that the Dish has broken and he's wasted his wish.
* Sarcasm-Blind: When a character takes someone else's sarcastic compliment towards

them as a genuine compliment.
* Sarcasm-Blind would you call an act like that?", meaning the punchline is this trope.
* Sarcasm-Blind: You're too oblivious to realize someone said something sarcastic to you.
* Sarcasm Failure: Oh, like there's really a time where I failed to... I don't know what to say.
* Sarcasm Failure tries to make a dry quip, but can't; not OOC if someone who's not a deadpan snarker can't make a quip)
* Sarcasm Mode, causing them to do exactly what you didn't want them to do.
* sarcastically ("Kiss me and I'll become a prince," and "The cracker crumb coating chafed," respectively).
* Sarcastically, where Jon excitedly announces to a grumpy Garfield that he will be getting liver for dinner; Garfield (without changing his facial expression) responds with "Oh hooray, hop about, clap paws, squeal with glee."
* Sarcastic Confession: A character makes their confession in a sarcastic tone to make it look like they're not being sincere.
* Sarcastic Confession just won't cut it. His favorite answer to "How do you know that?" is "My psychic scar told me."
* Sarcastic Confession, this both deflects attention from the truth now and makes one less willing to accept the truth later.
* Sarcastic Confession when a man spends the night with his mistress and rubs talcum powder on his hands before leaving. When his furious wife demands to know where he was last night, he admits that he's cheating on her... and then she looks at his hands and triumphantly says:
* Sarcastic Confession: Yeah, I admit it. I killed him, officer. And by that, I mean I didn't.
* Sarcastic Devotee — A sidekick who mocks the hero despite being deeply loyal to them.
* Sarcastic Devotee: They may mock and show disdain towards their teammates, but they are loyal to a fault.
* sarcastic fringehead. This fish does technically have two jaws, but its jawbones are "split" so that they flare out to the sides like petals when it opens its mouth.
* Sarcastic Title: Yeah, this title perfectly describes the work, in total truthfulness...
* Sarcastic Well Wishing: I hope you're proud of yourself. Things will not end well.
* Sarcastic Well Wishing: You've ruined everything. I hope you're proud of yourself.
* Sarda differs a bit from Kary, Bikke, and King Steve in that he's actually competent... but he's also a jackass with a chip on his shoulder, and thus uses his competence to make the Light Warrior's lives as miserable as possible. This includes punishing mild annoyance with things like shredding them on a molecular level while preventing them from dying, or dropping a whole continent on Black Mage.
* Sarda gives us this nugget: "I sent him to a place like the beach. Only it was the moon."
* Sarda has killed the Light Warriors a dozen times, subsequently bringing them back so he'll be able to torture them some more.
* Sarda, the biggest threat whose motives were hidden, but came across as a
* Sardaukar were recruited from that planet, the harsh conditions supposedly toughened them up.
* Sard Harker, Harker and Margarita are in the villain's clutches and all seems lost when Don Miguel and his men show up to rescue them. Lampshaded afterward by Don Miguel, who offers to explain "what brings me here, so like the Deus in the play."
* Sard Harker: Harker, desperate to get back to his ship before it sails, takes a short cut that leads him into a bog and several encounters with rats, stinging

creatures, and other vicious wildlife and ultimately strands him miles from where he needs to be, with no chance of catching his ship, and facing a long trek through hostile terrain to get back on track. (Though when he does finally make it to his ship's next port of call, he learns that the ship was sabotaged by the villain and sank with all hands, so the long short cut almost certainly saved his life.)
* Sard Harker, Harker is chased by a mob and their dogs, and wades upstream to break the scent.
* Sard Harker, Harker's first encounter with the villains is at a boxing match which they've fixed.
* Sard Harker, the villain Hirsch is a priest in a dark and secret religion that explicitly worships Evil as the true source of power in the world, and practices human sacrifice as well as other unspeakable rites.
* Sard Harker, two of the villains disguise themselves as priests to gain the confidence of the good guys.
* sardine than expected. The real-life vomit flavor was made from a rejected "Pepperoni Pizza" flavor with citric acid added. They were rejected for being gross in the first place before the citric acid was added.
* Sardinia was scarce in cavalry, as both Sardinia proper and the mainland were mostly mountainous lands with little space for the horses. They raised the
* Sardius in Super Ghouls and Ghosts is a cakewalk, all you have to do is stand under one of his legs and get the timing of the spawning platforms vs. his scatter beam attack right and you'll never get hit. The real challenge comes just before this battle, where you have to take on Astaroth and Neboroth with the Goddess bracelet.
* Sardonyx, coming to you a-LIVE from the soon-to-be-former Communication Hub!
* Sardonyx's room, a black expanse that looks similar to a talk show room complete with an unseen audience, which Sardonyx can manipulate however she wants. It also only exists when Pearl and Garnet are fused as Sardonyx.
* Sarek." After the Vulcan Sarek has reviewed Picard's history, he deems Picard's Starfleet service record "satisfactory." Picard is pleased, recognizing this as high praise coming from a Vulcan.
* Sarek confirms that it is his explicit desire for his son Spock to attend the Vulcan Expeditionary Group. We learn in "
* Sarek, Worf chats with Riker about writing up Ensign D'Amato for insubordination as the two walk to Ten Forward. Riker comments that tempers seem to be a little frayed on the ship lately, but Worf says that he hasn't noticed. They enter Ten Forward and discover a full-on brawl in progress.
* Saren and Sovereign, the Council and the Alliance are shown to still be moping up units of their forces.
* Saren Arterius, at least briefly, under the cover of being a SPECTRE.
* Saren's dreadnought Sovereign warship just up and leaves, as though it were a space taxi; an ominous indicator of just how powerful the ship really is.
* Saren, the main antagonist from the first game, is a turian who holds extremist anti-human views. He's the reason that Anderson wasn't made the first human Spectre, because he sabotaged a mission that Anderson was on, and everyone worries that Saren is gathering an army to massacre humanity in revenge for his brother's death during the First Contact War.
* : Saren undergoes a simulated battle designed to test compatibility with magic and stress responses. Henry Lawson, the examiner, tells him that the simulation is designed to be "impossibly lethal" and that the current record for how long someone has lasted is only eight minutes. Saren himself lasted four minutes and twelve seconds, the last minute and four seconds of which was without his right arm, something that Lawson insists is outright exceptional.
* Sarevok, not to mention that his experience has been static ever since and allowed you to close the level gap between you as well. He is still the best fighter NPC in the game despite this.
* Sarge and Donut are able to capture and kill (respectively) Agent Texas,
* Sarge and his men have this attitude. "A good soldier never leaves a man behind!". And whatever the movie he might be in, what is

* Sargeant Lejaune positively pales in comparison to "Sergeant-Major Suicide-Maker" ("a half-mad bully whose monomania was driving men to suicide") from some of P.C. Wren's other Foreign Legion stories, and quite possibly the worst example here.
* Sarge apparently says this at the end of anything that involves Grif almost dying, including spying on the Blues and cleaning up the base.
* Sarge asks for anyone volunteering to raise his hand — knowing that Beetle's arm is in a cast so he can't put it down.
* Sarge asks which of the soldiers have had college education, then tells them (Beetle and Plato) to follow him, and leads them to work in the kitchen.
* Sarge becomes a version of this to the Reds and Blues post season 8.
* Sarge bigger problems and are forced the suck it up before accepting him back and by the next episode, they are working together again like normal.
* Sarge finally has another reason to fight again, only for the robot army to malfunction and instead fought Iris' resident dinosaurs instead. The result being a fight that manages to impress the usually stoic-ish Washington and Carolina, with the former stating that it was the most badass event he ever bore witness to.
* Sarge gives another one at the climax of Season 10, convincing Washington to come with them in helping Carolina & Church.
* Sarge, he comments that he began his military career in "Sergeant School" full of "fresh-faced sergeants eager to strangle their first recruit." He says he failed his "Drop and Give Me Twenty" test, but ultimately majored in Screaming! with a minor in Ooh-rah!
* Sarge isn't even good to his own men, with his primary strategies being suicide runs even when not necessary, and what little favor he finds in them is largely based on who's kissing up best. Thankfully,
* Sarge is shot in the head. Upon appearing in the afterlife, he is only annoyed that he didn't get to screw with Grif one last time. This situation also fits because Grif's response to the injury is to perform CPR, which strangely works. Sarge berates Grif once he regains consciousness.
* "Sarge" is this to the Queen's Riders. This aspect of his personality is so prevalent he got the nickname back in his slave days, well before he started training, for how strict he was with his fellow gladiators. He's actually a
* Sarge makes fun of Grif for giving him mouth-to-mouth to cure a shot to the head, sarcastically quipping, "What would you do if I got shot in the foot, rub Aloe Vera on my neck?" In a later episode, Doc treats Caboose's gunshot-wounded foot by rubbing Aloe Vera on his neck.
* Sargent Haig is a sadistic yet still relatively law-abiding prison guard for most of the story. Then, after Zack frames him for dealing in drugs and he ends up an inmate in his own prison, he resigns himself to joining the very criminals he used to despise in order to get revenge on Zack.
* Sarge once allows himself to be buried for his funeral when his obsessive dedication to orders causes him to think he died and was replaced. He survives due to the ground giving out beneath him and landing him in an underground cavern before he runs out of air.
* Sargeras served as this for the ancient eredar. He offered them power and knowledge in exchange for their service. Velen saw the truth of his offer and managed to escape with his followers, the draenei.
* Sargeras, the evil Titan and leader of the Burning Legion did this to Medivh. Which rather put a dent in Medivh's ability to protect the world from Sargeras and the Burning Legion, like he was supposed to. But this situation was caused by the sexism of the human kingdoms: providing a good explanation for the widespread and unquestioned gender equality in what is otherwise a pretty medieval style kingdom. However, to demonstrate the absurd power level this required: Medivh was frequently able to wrest back control of his body from Sargeras, and used these moments of lucidity to plot against the Titan. While Medivh was a powerful mage, he was just a mage while Sargeras is the strongest of all the Titans who are all godlike in power level.
* Sarge's dislike of Grif progressed to actually trying to kill Grif on a fairly

regular basis, though in later seasons, it got toned down.
* Sarge's Heroes 2 has a hilarious one. The tutorial has you follow orders from Colonel Grimm, a.k.a. Vikki's father. You can choose to kill him and simply finish the tutorial yourself, but at the end, instead of Vikki's usual "Congratulations" when you open the last door, she will immediately shoot you with a bazooka as soon as the door opens. Even if you somehow dodge, you still fail.
* Sarge's secret words tend to work this way. His password is "password", his code word is "code word", etc.
* Sarge tendencies, it makes sense that he likes to be up close and personal while killing people.
* Sargon Of Akkad from Youtube does this constantly, even when he's not making a joke but just reading something he finds funny. It's also
* Sari and Bumblebee are a platonic example due to the mental ages involved.
* Saria, Ruto and Nabooru are lost when they become Sages and don't get to live on the same plane of existence as him.
* Sari Kaede, a transgender Japanese fashion model and architectural designer.
* Sarilho: could easily be the name of the fourth chapter, in which the characters deal with the consequences of escaping a battle in which they were overpowered by the enemy forces and lost several members of the team.
* Sarilho is very fond of its uniforms, and with most characters being either soldiers or otherwise members of uniformed offices, this trope plays almost constantly.
* Sarilho: Nikita, at the end of chapter four, along with some... interesting threats.
* Sarilho, Pyrokinesis is associated with augurism, and all augurs are apparently able to conjure fire, although it's not clear to which degree.
* Sarilho, reading the thoughts/memories of everyone next to it is thing the Foreigner does when it awakes.
* Sarilho: Seems that a lot of people in this world manifest some sort of this, although their usage seems to be very contained.
* Sarilho: Shizuka Nakamura. Not once has she been seen dressing up her part, but Nikita vouches for her skills as an augur.
* Sarilho Similarly, Nikita walks around with half of his face covered in shattered glass and apparently doesn't care much for that.
* Sarilho: Something happened to the modern world, but the details aren't shown. Judging by the maps, this was either accompanied/caused by a raise in the sea levels.
* Sarilho, the augurs are constantly seen smoking in mild anxiety over their machines. They share their cigars a lot though, and everyone seems to accept them.
* Sarilho: The Meditans are not afraid to be spotted in battle, apparently.
* Sarilho: The Régula II Divison wear bright red, white and gold uniforms. The Lusitanians wear more dark earth colored tones, possibly to blend in more with the surrounding forests; though they also have bits of red in their designs.
* Sarilho. The soldiers very much get broken during the conflict, and their extensive recovery times are explicitly stated.
* Sarilho. They fall for each other pretty quickly, but none of them displays any particular gay stereotypes.
* Sarilho: Well kinda. Despite being sold to the empire as children and having no choice in what he does with his life, Nikita violently denies being a slave when the subject is ever brought up. He does say that Mikhail's totally fine with his situation though.
* Sarilho: We're told as early as chapter one that Nikita, a soldier, is very good at leading a team.
* Sarilho, which apparently makes for a very personal and deep relationship with those machines and access to a lot of data.
* Sarilho: with the entire comic being presented in both Portuguese and English versions, there are some slight differences in the text worth checking. Otherwise, a lot of the information portrayed in background media such as posters or written documents is often presented in something that resembles Italian or Spanish.

* Sari of Cybertronian and human. Her heritage gives her circuitry under the skin and hands that unfold into blasters, combined with a human digestive system, possibly nervous system and skin, among others. In the beginning of season 3 she receives a self-induced upgrade, going to being more machine than man, fitting the trope more accurately.
* Sarissa, handmaiden to Queen Mab, has this as her job title. As one who is connected better with the mortal world than Mab, Mab agrees to help her with some familial medical issue, and in return Sarissa spends a weekend every month showing Mab things about humanity. They sometimes take in movies, go to Disneyland, or shopping, but all with the purpose of Mab working to better understand humans, so she can better manipulate them and control them. Naturally, not all is as it seems.
* Sari Sumdac). It's not clear if this was because her protoform was designated to be female, or it just randomly became such.
* Sarkozy Was There" meme does this to French President Nicholas Sarkozy. This was done in reaction to having falsely claimed a photo of him taking a hammer to the Berlin Wall was taken on the day that it fell, when it was actually taken a full week later.
* Sarl to fuel his spells rather than taking the blood of others. This gives him a lot less power than Sarl but he demonstrates a much higher level of efficiency and is able to accomplish a lot more with the power he has than Sarl could.
* Sarmatism, a cultural movement in the 17th and 18th centuries among the
* S'Armunai: Names may begin with either a vowel or a consonant. Masculine names typically end with -an or -ar. Feminine names end with -oa. The S' prefix is added to someone's given name as a mark of respect; it loosely translates as "Honoured One".
* Sarousch, the villain of the sequel, always looks at himself in the mirror. All the while calling himself "handsome" and such.
* Sarriiu = Perhaps "High satrap." governs several provinces. No equiv in Third Imperium but generally translated count or marquis.
* Sarris's people, on the other hand, apparently do have TV shows. The moment he witnesses the opening titles of the Thermian's "Historical Documents" he realizes immediately that he's dealing with actors and not real space explorers.
* Sartan and Patryns Haplo is dipped in magic nullifying water and loses all languages apart from his native tongue — and then instantly gets them back when he dries out, much to the amazement of the locals who'd rescued him.
* Sartana would have had a slutty, drug-addicted twin sister, who would also have been played by
* Sartan, however, were desperate enough to disregard this, and became a whole culture of necromancers.
* Sarta Nor's Spell of Deadly Disintegration fires a beam of intense energy that disintegrates anything its strikes.
* Saru Getchu 2nd Ukki Pink magically dresses Kakeru in pink tank top and mini skirt, which forces him to make girly poses while she takes pictures of him.
* Sarum ancient purification rite in which a bull is sacrificed over a pit, while the worshipers seeking purity stand underneath to be showered in its blood.
* Saruman of Many Devices armies, and one of his most revolutionary changes is constructing a railroad to carry supplies.
* Saruman of Many Devices, one of these (Central) contacts Saruman through his Palantir stone, after said stone suffered an accident.
* Saruman of Many Devices portrays all of Middle-Earth's armies and leadership as being rational and competent, including Gondor and Rohan, where in canon they were sabotaged by paranoia and and subterfuge, allowing readers to follow the full breadth of military organisation, rather than hurried plans and desperate last-minute saves.
* Saruman of Many Devices: The basic premise is this — the title character aided by an AI that, if not inherently benevolent, is still opposed to Sauron on the grounds that he introduces stasis, while the AI's directive is to bootstrap human civilisation. Consequently, it introduces initially renaissance-era technology, including fairly advanced steelworking and of course guns to Middle

Earth, before moving on to closer to the Napoleonic era, then later Victorian era (the Martini-Henry rifle, mainstay of the late 19th century British army, is given as one example), in an attempt to bring forth an industrial era. Specifically, to the Uruk-hai working for him already, then the rest of Middle Earth.
* Saruman of Many Devices the Uruk-hai guns often appear as this to their enemies.
* Saruman of Many Devices: Upon liberating the city of Dorwinion, Prince Brand reminds his army to treat the locals respectfully, since they've been through a hard time.
* Saruman's described it as "a great place to throw a really classy party, but not too comfortable to sit in."
* Saruman's human body crumbles into dust in a matter of seconds after he is slain by Wormtongue.
* Saruman's Uruk-Hai also fit the trope with their identical, face-concealing helmets. In their case, the point was probably the intimidation factor of several thousand identical goons, along with saving some time for the special effects people, as they didn't have to craft unique masks for every actor.
* Sarum, depending on how feeble the state of knowledge actually was at the time. There is a theory that the nursery rhyme "Old King Cole" does commemorate a real king, probably a Celtic leader called Coel, sometimes identified as Emperor Constantine the Great's father-in-law. So it's not quite as mad as it sounds...
* Sarutobi Ecchan who moves in with her muggle friend, Miko, and Miko's grandparents.
* Sarutobi Sasuke: Hiruzen Sarutobi the Third Hokage and his father, Sasuke; Konohamaru Sarutobi, who is basically Naruto's apprentice; Asuma Sarutobi who is Shikamaru's sensei; and finally Sasuke Uchiha himself.
* , Sarutobi summons several monkeys for a final exercise. Sakura believes that he wants her to catch them. He then tells her the true purpose of the task
* Saruwatari (best known as the Hair Guy) and other Industrial Illusions and Kaiba Corp employees from
* Saru waves his arms from side to side while walking. He also clasps his hands together to show approval and rubs the back of his neck when he's nervous.
* Sarych) and Tarantul III class corvettes (Project 12411) were initially used for the rocket-propelled P-80 Zubr, but these were replaced but the more capable ramjet-powered P-270 Moskit, which was designed to use the same launch tubes. For several years, some ships even carried a mix of Zubr and Moskit missiles before the former was retired.
* Sasaki Kojiro. In fact, Irou appears in Swallow flip, which refers to a mythical sword technique from Japanese legend, the Tsubame Gaeshi (or the Turning Swallow Cut). The technique was created by Sasaki Kojiro, legendary rival of Miyamoto Musashi.
* Sasaki Kojirou's adoptive father Kanemaki Jisai subverts the trope too: living by the sword has left him unmarried, without children or friends, and thus hopeless... until Kojirou comes along; at that point, he advertises himself (unsuccessfully) as an Old Master to make a living so that he could raise Kojirou
* Sasaki Kojiro was renowned for inventing several sword techniques, most famous of which being the Tsubame Gaeshi, or the "Swallow's Tail."
* Sa Sakujun in the same series built up a similar resistance through bored experimentation, not that it does him a lot of good in the end.
* sasakure.UK: "Ghost Light" reveals that Sato is impersonating her dead friend.
* sasakure.UK: Sato, the main character of "Nekosogi Matter Bop" and "Ghost Light", looks like a teenage girl with a cat's ears and two tails.
* Sasame Her response is to laugh and say "this is my answer!" as she shatters the windows in the area.
* Sasami is an excellent chef. In the manga, she was so good that she even baked her sister a carrot cake that she loves despite the fact that Ayeka hates carrots. Sasami even competes in an
* Sasami is often called “the lamb of Starnova” by the other girls, on account of her positive and somewhat naïve outlook on the idol industry.
* Sasami: Magical Girls Club aspect of the trope by stating that there are Magical

Boys but that they are very rare.
* Sasami: Magical Girls Club ones to actually see a formal United States localization.
* Sasami: Magical Girls Club series that inspired it, except for a magical girl named Sasami, and appearances of a couple Tenchi characters in drastically different roles.
* Sasami: Magical Girls Club, while riding on a cart pulled by an ox-like creature, Anri complains about how slow it is, so Washu pulls out an "Acceleration Device" that turns out to be a bundle of hay hanging from a stick. The ox takes off like a rocket and catches the hay once they reach their destination, with the quick stop flinging everyone out of the cart.
* Sasami's route involves her realizing her feelings for Kengo weren't necessarily love, but rather an admiration towards him. Once she realizes this truth, she actually feels relieved
* Sascha Baron Cohen does these by playing a bizarre character who is hosting a television show or documentary and interviewing people who do not realize that he's playing a character. Both of his films are based on characters he created for
* Sascha manages to stop the plane right before it falls off the cliff. He then breathes a sigh of relief.... and the plane tilts forward... and blows up after it hits the ground.
* Sasha Alexander. It's noted in universe that she looks just like Lawrence and, while unremarked upon in universe, she and Doman have remarkably similar facial structures.
* Sasha and Seamus get into a "Have not!"/"Have too!" exchange about whether she's been avoiding him.
* Sasha and the Frogs: Hop Pop tells to Sasha bluntly that she sometimes scares him. This ultimately makes her paranoid, leading to hijinks at the convenience store.
* Sasha and the Frogs: Sasha blames herself for getting she and her friends transported into another world.
* Sasha and the Frogs. Sasha notes that all the local text is in English.
* Sasha and the Frogs. Sasha prefers not to know what her food is made of.
* Sasha and the Frogs: Sasha Waybright is noticeably nicer than her cartoon counterpart and is far more understanding by learning from her mistakes despite having her moments of being a jerk.
* Sasha and the Frogs: Thanks to the Plantars' influence on her, Sasha is showing some of her more likable traits earlier in the story.
* Sasha Banks adopted a few purple outfits after christening herself "The Boss".
* Sasha Banks: an emergency room nurse. Professional, good and nice with her patients, wants to help everyone, loyal to her friends.
* Sasha Banks had dark blonde hair when she debuted in WWE. Upon adopting 'The Boss' persona, she later dyed her hair red and eventually to pink.
* Sasha Banks in the ring. Outside it, she's very goofy and geeky. The skits she did with Team BAD and the New Day are far closer to her real-life persona.
* Sasha Banks (Latina) had Alicia Fox (black) in their stable, whereas Team PCB was made up entirely of white girls.
* Sasha Banks (naturally dark blond but has dyed her hair various shades of red, purple and pink).
* Sasha Banks, Sasha started to add more rhinestones to her gear and act a bit more ghetto. As she had appeared in a leaked promo class video playing a snobby ghetto character weeks before she actually turned heel, this appears to be somewhat intentional.
* Sasha Banks sure are close, with Banks even telling Bayley "I love you, I always have, and I always will." They hug a lot.
* Sasha Banks' that year more of a tweener leaning towards a Heel before completely turning by the middle of 2021.
* Sasha Banks), the WWE phased out much of the eye candy stuff in favor of more edgy women with unique characters. In addition, there are multiple women's storylines, matches being much longer and competing in matches that were previously

open to only male wrestlers such as the Royal Rumble match, the Elimination Chamber match, the Money in the Bank ladder match and the Hell in a Cell match, among others.
* Sasha Banks - who lobbied for Women's Tag Team Championships so hard that Vince eventually gave in.
* Sasha Bordeaux, formerly a Batman companion and then part of Checkmate, was infected with
* Sasha Buckler from the fifth game. For one, she's very genki and energetic like Maya and Pearly, has been a
* Sasha Caylo comes in a close second, being a sex-obsessed socialite whose life otherwise consists of partying and drinking while achieving maximum media visibility. Turns into a
* Sasha Cohen. While certainly an admirable skater, she only ever won one major competition, the 2006 US Championship, settling for silver and bronze, respectively, at the Olympics and World Championships later that year. In both instances, much like Kerrigan, she was in first place after the short program before costing herself the gold with faulty performances in the long.
* Sasha Grey, American former adult entertainment actress and TV personality who is openly bisexual.
* Sasha her body to produce the tar in bulk - to the point that it's become part of her ensemble: close examination reveals that she's technically naked apart from the black gunk covering her lower body.
* Sasha implied that the Heavy is having an affair with this gun. Seriously.
* Sasha, on meeting "Michael", immediately perceives the latter as non-human even though "it" looks human. This impression is reinforced so when they shake hands — its hand is described as heavy, like a wet leather bag full of heavy, sharp stones.
* Sasha's method for infiltrating a meeting of baddies is to knock out and impersonate the only female baddie there. When her victim wakes up,
* Sasha's murderer, Gabi. While he certainly mourns his daughter, he recognizes that she was a soldier who knew what she was getting into, and refuses to take vengeance on Gabi when she's entirely at his mercy. His refusal to stoop to Gabi's level shakes her to her core, and makes her realize that Eldians aren't devils, they're normal people with the same capacity for kindness as everyone else.
* Sasha, the utterly amoral mole and infiltrator who ends up at the wrong end of Oasis's knives following her claim that she really does love Riff and wants to make amends. But then it turns out that she deliberately sacrificed herself for Hereticorp, planting nanotech trackers on Riff and Oasis by coming in physical contact with them.
* Sasheer Zamata from the writers room to the main performing cast in 2014, raising the number of black women to two. Therefore, to maintain the token minority numbers and their tacit promise to uphold the Token Code, Zamata was let go from SNL in 2017.
* Saskatchewan and Alberta went through a phase of this in the early 1980s, with several secessionist parties, such as the Unionist party (Who wanted to join the US) and the Western Canada Concept (who wanted to make a new country from the western provinces and the territories.). The latter recently got semi-revived with the creation of the Western Bloc Party, but they're getting very little traction, coming in 3rd from last in the most recent election.
* Sasmira, a character will take literally a figurative turn of phrase by another character.
* Sasmira: A young couple from the present day somehow find themselves sent back to the turn of the 20th century.
* Sasmira, Bertille is very short-sighted and only sees a blur when not wearing her glasses.
* Sasmira,Bertille's default outfit is a plain T-shirt and jeans, and her looks are considerably improved when she dresses up, though it comes off pretty quickly following the sex scene.
* Sasmira, Bertille starts aging faster as a result of traveling into the past.

* Sasmira features the two leads magically transported from 1996 to 1908-era France.
* Sasmira, it's unclear if the titular character really did temporarily died and saw that there was nothing after death. Bertille theorizes that she might have been in a coma, but no one at the time could tell.
* Sasmira: The first tome was published in 1997, and it took the author until 2011 to finish the second one. The third tome came out "just" five years later in 2016, with the fourth and final tome out in 2018.
* Sasori dies this way. After being stabbed in the heart capsule by poisoned swords handled by his Mother and Father puppets, he continues to talk to a wounded Sakura and a severely weakened Chiyo, though he is immobilized. He then grudgingly congratulates Sakura on defeating him and gives her a parting gift: Information gathered by a spy he was supposed to meet at Tenchi Bridge. He is stopped mid-sentence while lamenting he won't be able to meet his subordinate when the poison and the damage to his heart finally catches up to him, and he dies.
* Sasori's puppet body punched to pieces by Sakura, but he pulls it right back together by the strings because
* Sasquatch (Well, he punched it right in the off-button without realizing it).
* Sassette says she'd have this if Tapper was serving it in his tavern to make her forget about ever hearing about Empath and Polaris
* Sassy Black Woman: Black women have attitude and make sassy remarks.
* Sassy Black Woman made Patty Tolan appear to be one of these (the character in the film proper was far more nuanced, the trailer had only cherry-picked her loudest moments), people were not pleased.
* Sassy Black Woman: Uh-huh. I'm a woman, I'm black, and I got sass. Is your pea brain growing yet, child?
* Sassy Black Woman who hits on Chris. He's conflicted by this and says "SO MANY CONFUSING FEELINGS!!"
* sassy, especially when gossiping with your girlfriends about how clueless the menfolk are.
* Sassy Stephie has gear with the letter S twice on her chest. One is backwards so it forms a heart.
* Sasuke actually has a functional reason for his not-shirt; it's so his Cursed Seal form's wings don't rip his clothes every time he uses them as they erupt from his back.
* Sasuke also gives this excuse for not killing the mooks he faces in his quest to kill his brother.
* Sasuke also showed some signs of this, but usually got knocked down a peg before he could get too conceited. And then, he got much, much worse.
* Sasuke also uses this technique to escape being burned alive by Amaterasu, although his clothes
* Sasuke and Itachi's mother Mikoto took part in the Uchiha Insurrection and was responsible for the death of Ino's father Inoichi.
* Sasuke and the curse mark. During the Chunin Exams arc, Orochimaru gave him a curse mark, which, once activated, turned the quiet, elite loner into a sadist who broke a guy's arms without a second thought. Creepy! "You seem quite attached to these
* Sasuke becomes the new leader of the Medical Squad after Shizune is removed from active duty due to maternity leave.
* Sasuke, calm and cool in almost any sitution, even when all the other characters are panicking, laughing uncontrollably, or cheering. But push his
* Sasuke can start a fire with his eyes. Instead of just setting fire to the Juubi, he throws it, combining it with Naruto's Rasenshuriken, creating Scorch Release: Halo Hurricane Jet Black Arrow Style Zero (a.k.a. throwing star shaped like a windmill and arrow blacker than liqueur) to set fire to the Juubi.
* Sasuke could also count. While it's not known if he's been in any relationships before he meets the MC, once he meets her he falls in
* Sasuke did this when he was younger after he found out his beloved brother was the one who killed their entire clan and is terrified his brother will kill him.

* Sasuke discovers his interest in women after seeing Hippolyta wearing nothing but bike shorts and gets Kakashi to teach him a wind jutsu so he can blow open Raven's cloak.
* Sasuke has a massive one after finding out that Itachi killed their parents among many others, as well as when he gets put under
* Sasuke has black hair and eyes. It's an Uchiha trait. Even his daughter with
* Sasuke is a mastermind and charismatic leader when he assembles Hebi.
* Sasuke is commonly attributed with telling Sakura: "You're weak/useless." But actually he never said that. The closest comes when she asks him if they can go work on their teamwork, "just the two of us." And he responds with, "I swear, you're just as bad as Naruto. Instead of flirting, why don't you practice your jutsu and make the team stronger? Let's face it, you're actually worse than Naruto."
* Sasuke is hit with this a lot harder than his canon counterpart, since after
* Sasuke is not the only ninja Yukimura had, however, he has ten of them, known as 'Sanada Ten Braves', with Sasuke being its most prominent member.
* Sasuke is "world class beauty"; his good looks are mainly commented on by his admirers.
* Sasuke. Just about every girl back at the Ninja Academy, Ino and Sakura included, practically drooled all over him whenever he was around. Tenten and Temari also comment on him being cute at some point. Later and judging by Karin's and Mei's reactions to him, this trend has continued.
* Sasuke/Karin shippers who suggested that Sarada was in reality Karin's daughter. With this, Kishimoto's status of troll is fully confirmed.
* Sasuke makes sure not to repeat this mistake, incinerating his body with Amaterasu when the Konoha 15 finally manage to kill him a second time.
* Sasuke recognizes a Naruto impostor because he doesn't have a cut on his cheek (Naruto received it before they entered the Forest of Death.), and also because the impostor is left-handed while Naruto is right-handed. After this incident, the team decides to have a secret password, so if they split up and someone comes back, they can confirm their identity via the password. Naruto promptly is separated from the group, rejoins them, and recites the password correctly. Sasuke promptly attacks.
* Sasuke retains much of his Part I personality from canon, but the major factor that keeps him firmly on the side of good is the fact that he has Itachi around to act as his
* Sasuke's adaption of the Chidori; channeling the electricity into his sword, projecting the electricity for a ranged attack, and developing his own technique called Kirin that involves actual lightning and acts as a massive-area attack.
* Sasuke screamed at Naruto to shut up after the latter told him he understood the reason behind his actions.
* Sasuke's first warning that his charming big bro Itachi has gone Ax Crazy is catching a glimpse of him doing this in blacked-out silhouette on a telephone pole, against a rising red moon, with only his crazy eyes visible. Shortly afterwards, Sasuke stumbles on the first of many, many bodies...
* Sasuke's hair, while not actually that ridiculous by the standards of this page, has gone memetic due to the way it spikes out at the back making it look remarkably like the rear end of a duck. His epilogue hairstyle doesn't have the spikes, but he's always going to be known as the '
* Sasuke's Shadow Shuriken technique, used once in the first arc, is used again
* Sasuke starts exhibiting this in Part 1 (having used a mixture between his Sharingan and a month's worth of training to obtain the same speed as Lee, though only in brief bursts) and in Part 2 he mocks his former allies' improvement over the
* Sasuke takes advantage of this, and defeats him in his sickly state.
* Sasuke) technique to mean they don't need to do anything else to defend themselves, but eventually have both of them defeated.
* Sasuke, Tenten, and Lee in the previous year, though they do not seem to know him much when they first meet.
* Sasuke tries kicking Killer Bee with all his might. All it does is make Bee drop

his sword... so he can write some new rap lyrics.
* Sasuke tries to kill Sakura this way. It doesn't work, thanks to Kakashi
* Sasuke). Tsunade was partly chosen to be Fifth Hokage precisely because she was the granddaughter of the First. Early on, she's less than thrilled with the notion herself, as it just means she's from a lineage of people who got themselves killed in battle.
* Sasuke Uchiha has allowed revenge to motivate almost every single action he takes.
* Sasuke Uchiha has a tendency to get into fights that are beyond his ability to win, only to
* , Sasuke Uchiha is on trial, charged with "Betrayal of the village to a well-known and confirmed enemy. Attempted murder of a leaf shinobi with lethal intent on several occasions. Conspired to aid a criminal organization. Attempted kidnapping of a leaf shinobi with lethal intent. And endangerment of a leaf village child on one proven occasion." When asked for his professional opinion, Naruto says they should throw the book at him. Subsequently, when court adjourns for a recess, the fic's title character, Akane Uzumaki, borrows Kakashi's copy of Icha Icha and throws it, hitting Sasuke in the back of the head. When everyone looks at her in surprise, her only reply is "What? Otou-san said to throw a book at him."
* Sasuke Uchiha is revealed to have been this near the end of the series. Promptly after Kaguya is sealed away, with Obito and Madara also defeated, he announced his plan to kill the Kages and seal away the Tailed Beasts, revealing that his supposed
* Sasuke Uchiha's entire clan, including his parents, were killed...
* Sasuke Uchiha showed characteristics of this type when he was still a member of the Hidden Leaf. An example was the Chuunin Exam in the Forest of Death: He noticed shadow clones with ease, mostly because he analyzed the behaviour of his teammates.
* Sasuke Uchiha's Sharingan Legend, another comical spinoff showing Sasuke and Taka's wacky side.
* Sasuke Uchiha survived the killing of his whole clan by his older brother.
* Sasuke Uchiha was also this in Part 1, especially during the Chuunin Exams. He wasn't the fastest (Rock Lee), the strongest (Choji), the smartest (Shikamaru, Sakura, Shino), the best at chakra control (Sakura, Hinata), the best at Taijutsu (Rock Lee, Neji, Hinata), the most perceptive (Kiba, Shino, Hinata, Neji), he wasn't the most skilled with weapons (Tenten), and he didn't have the greatest chakra reserves (Gaara, Naruto), but he had good aptitude in all these areas, making him one of the most dangerous students in the Chuunin Exams.
* Sasuke was intended to become the vessel for Orochimaru, who himself is no longer human
* Sasuraido - A series about a sword that can grant powers to certain people, but misfortune to others.
* Satai is for members of their inner governing circle, the Grey Council.
* Satako pulled a variant of this prank involving taping a bunch of tacks to the door in Watanagashi-hen. Target was the same.
* Satan advertises as one of the many potential dangers of love to discourage from falling in love. It doesn't work.
* Satanael at any point, once the Strength Confidant begins the beginning of May.
* Satan also claims to have two morals, one of which is never directly murdering people. It used to be three, but then he got cynical.
* Satan (also starring Ahnold, this time as the human hero). He possesses the body of a stock broker, who proves impervious to bullets and other blunt trauma. He's eventually worn down by repeated explosive blasts and being mowed down by a subway train. When he can no longer walk, he simply leaves the broker's body and possesses a new one. In the end, Satan isn't beaten, only outlasted as the New Year rings in, and he's forced to retreat for another 1000 years.
* Satan and Me: Michael Panagakos and the Archangel Michael both look incredibly similar (excepting their eyes) and even share the same name. As characters, however, they're completely different.
* Satan and Me, Satan tears out Michael's face from Nat's pictures when he learns the guy's name.

* Satan and Saddam is the one worried that he's being used—both for sex and as a means to conquer the world.
* Satan appears as an androgynous person (portrayed by a female actress) in
* Satan (as a snake) tricked them into it. Cue humanity being kicked out of paradise for all eternity.
* Satan bites the tip of Guerrero's finger while torturing him in Hell in
* Satan, but leaves the narrative almost as soon as he arrives; the main villains of the Gospels are the Pharisees, the Sanhedrin, and Pilate.
* Satan by the forces of light remaining ever vigilant. Likewise, he even has a good chance at obtaining ultimate victory at the end of days.
* Satan Claus decided to show a beating completely from the victim's POV. This looks horrible.
* Satan Claus, due to the extremely poor lighting, as one review pointed out (referring to them as "ambiguously ethnic").
* "Satan", despite popular belief, was actually a title, meaning many things including "the prosecutor". In 1935, a Disney short titled
* Satan equivalent. He and Death even show up at one of Prismo's later parties.
* "Satan" for "Santa"., mentioning an urban legend about a dyslexic who sold his soul to Santa. Of course, this being Rankin, it turns out the dyslexic may not have made a mistake after all...
* Satan from the 7th Grade centers around an extended scavenger hunt following the clues that a long-dead French soldier left for his brother, that only the two of them were supposed to understand.
* Satan gets away with being the source of all evil for centuries until Judgement Day when he finally gets defeated and cast into the lake of fire.
* Satan, has him easily outwitted by peasants and driven away by holy symbols (such as a scapular).
* Satan has tons of names and nicknames depending on the religion, culture and language. Examples include Satan, Shaitan, Adversary, the Devil, Lucifer, Morningstar, Old Nick, Old Scratch, Lord of the Underworld, Father of Lies, etc. There's also a whole host of demon names that could be equated with Satan.
* Satan. He likes Hawaiian Shirts and loves his pet rabbit that shoots beams out of its forehead, Carbuncle! His sidekick is a female martial artist with a severe jealous streak and blue hair named Rulue who owns a pet minotaur and there's dancing fish and cleanliness-obsessed maids and dragon girls forming fanclubs within Satan's... house...
* Satan: His Psychotherapy and Cure by the Unfortunate Dr. Kassler, JSPS* (*Just Some Poor Schmuck), in which he undergoes seven sessions of therapy that leave him increasingly better off, but which don't quite work out so well for the poor Dr. K.
* Satanic Archetype: A demonic villain with various Devil-like traits.
* Satanic Archetype: A villain is modeled after Satan, and considering that the devil embodies all that is evil, it's a given that this person is bad.
* Satanic Archetype: A villain is so sinister that they serve as an analogue to the devil.
* Satanic Archetype: A villain is the representation of the Devil in the story's universe.
* Satanic Archetype being a more worldly being who incarnates in human form, is usually dressed in black and unlike other elder beings who are indifferent to humanity, delights in inflicting cruelty on humans.
* "Satanic backmasking" might be considered an example. A 1980s-and-90s hysteria held that
* Satanic Bible) lays out the rules for clothes worn during a Satanic magical ritual. LaVey had some lingering 1960's sexism in his lines of thinking, regardless of his radical ideas. His writings often seem to give the impression that only men have a sex drive, and he reportedly expressed envy to a beautiful woman's ability to wrap men around her little finger:
* Satanic Panic: A fear of many of the tropes listed here, usually leading to a public panic (and in some cases, real)
* Satanic Panic. Leaflets distributed by anti-Satanist groups said that an interest

in rock music was indication that an adult was a Satanist performing bizarre ritual torture on children. Heavy metal album cover art was used as evidence in court to take the children of accused adults into care.
* Satanic Panic: Satan-worshipping cults are real, and WE NEED TO STOP THEM!
* Satanic Panic: The final years of panic around Devil worship and perceived "counterculture".
* Satan in motion pictures will often take the form of a man (or, more rarely, a woman), only to eventually reveal himself as something either grotesque or freakishly primeval.
* Satan in the versions where he becomes jealous of God and rebels against him.
* Satan is about a guy with a drill who carries out unmotivated, calculated executions of "ultimate design".
* Satan is also an example. He's as pale as Dracula, has long onyx black hair, and dark veins covering his body. In the sequel, it gets even worse, where he becomes an eight-foot tall hulking brute of an angel riddled with scars.
* Satan is derived from ha-satan, which translates to "the accuser" or "the adversary" in ancient Hebrew. The former fits his role of cosmic prosecutor, accusing people of sin, and the latter fits his role of being the adversary to God and mankind.
* Satan is Good, as compared to earlier depictions, fits this trope fairly well.
* Satan is Good: The Good God's opposite also happens to be benevolent as well, or at least well-meaning.
* Satan is (naturally enough) the central character of Jeremy Leven's novel
* Satanists (the non-Hollywood kind) believe that God intended to keep us ignorant and subservient to Him, and that the serpent provided us with true free will through the forbidden fruit of the Tree of Knowledge of Good and Evil.
* Satan". It's been speculated that he was originally a Seraph, a type of angel whose true form is also lethal to mortals.
* Satan Ninja 198 X features a character named Valery "Viper" Viperelli, a freelance badass, who fights Satan Ninjas and sports a bleached blond mohawk.
* Satan Ninja 198X features your average video game playing, bodacious babe obsessed dweeb in the 80s, who is transformed into a Satan powered ninja.
* Satan of a hostile empire, while Christianity portrays Satan as a terrorist.
* Satan or even outright lying to make them think he's about to give them what they want right before torturing them. To other supernatural beings, and the handful of humans he genuinely respects, he's this; he'll still torture them if they become annoying, but when he's not doing so he's fairly friendly and can sometimes even act as a caring presence.
* Satan. Orthodox Christianity states that it is because he envies and hates them, trying to paint them in the worst light vis-a-vis God.
* Satan. Peter hides his face with his hymnal like Paige does, but his is upside down.
* Satan said it best: "To reign is worth ambition though in hell;/ Better to reign in hell than serve in heaven."
* Satan's Cheerleaders, Chris, Debbie and Sharon escape from the sheriff's house by going upstairs to go to the bathroom, and then climbing out the window and dropping off the porch. However, Ms. Johnson gets caught when she tries it.
* Satan's Cheerleaders, Debbie and her boyfriend Stevie keep disappearing to make-out and don't care who walks in on them.
* Satan's Cheerleaders, everybody in the town of Nether is a member of a Satanic cult led by the Sheriff.
* Satan's Cheerleaders Lucifer and Diablo leap through closed windows to attack her.
* Satan's Cheerleaders") making it sound like an out-and-out horror spoof.
* Satan's Cheerleaders, Stevie swaps the signs on the locker room doors resulting in Coach leading the University Dean into the girls locker room instead of the boys.
* Satan's Cheerleaders, who has it to have explained to her what an 'unsoiled maiden' is.

* Satan's Children. A teenage boy named Bobby is constantly sexually harassed by his step-sister. Later, he is gang-raped by bikers. After being found by a group of local Satanic teenagers, the taunts from their leader inspire him to go on a murder spree where he shoots dead every man who raped him and dumps his step-sister with the Satanists to be crucified.
* Satan's court. In Jewish theology, this is in fact the extent of his villainy, and his entire narrative role. Insert joke about how the Christians made him less evil by turning him into God's direct antagonist and enemy of mankind (God's people in particular).
* Satan. Scumspawn has strong emotional love for Satan (not necessarily a romantic love) and Satan warms up to Scumspawn over time, mostly due to Scumspawn's unwavering loyalty. In later seasons Scumspawn does talk about each other as though they're in a romantic relationship.
* Satan's daughter, Raisa Volkova, takes after her father with pale skin, dark hair, and a disturbing appearance.
* Satan's Diary, the last of novel by L. Andreyev, the protagonist tries to take a human form for the first time.
* "Satan" sequence for a face tells Tom Sawyer and his friends that their lives are as meaningless as those of the civilization of clay figurines he created and destroyed on a whim.
* Satan Shoes, further increasing Nas X's profile. When he additionally ended up in a legal controversy with Nike suing him over the sale of the shoes, he spun that off into the song "Industry Baby", and with its music video additionally beginning with a skit of his ensuing court trial, it debuted #2 on the Billboard's Hot 100.
* Satan's Hollow gives a rather prolongued rant to Sandra to explain why he's performing the satanic ritual and the specific sacrifices that it involves.
* Satan's Hollow known as Burdaine, and was turned into a shadow by the Devil himself as punishment for botching a ritual that would have given him access to Earth.
* Satan's Hollow: One of the members of the Devil's court is the Reaper, a Death-like demon with black wings and a scythe.
* Satan's Hollow: While John's soul is being tortured in hell, the female demon overseeing his treatment conjures a mouth in his chest to freak him out.
* Satan's Hollow, who is trying to release them onto Earth in exchange for power, they spend their entire screentime in Hell waiting for the portal to be opened.
* Satan's Little Helper: Even by movie serial killer standards, "Satan Man" is off. Not only does he not talk even when it's clear he can, but at one point he shoots himself in the hand. Not even a grunt or a physical reaction.
* Satan's Little Helper he is obliviously helping out to push him around in a shopping cart, and run random people down.
* Satan's Little Helper: The Satan Man, a man in a costume who shows up and starts killing people, including a baby and an old woman, with no rhyme or reason behind it beyond a love of chaos.
* Satan. So terrifying, that Earth has to be replaced because the former one is bombed back to before the Big Bang.
* Satan's Playground needs a telephone. She ends up being scared off by Paula's erratic behavior.
* Satans Playground or just plain invisible, with its family (and some random Satanists, because why the Hell not?) being the main antagonists.
* Satan's Satellites: human (or humanoid)-on-human...and Satan is not present in the poster.
* Satan's souls in exchange for his own, Satan quoted the trope name almost verbatum.) At the start of the second season, Satan has turned him into a dysentery bacterium because he's lowering the tone of the place.
* Satan's Toenail's niece Akemi goes around with her prosperous breast exposed, so she seems impossible to defeat this way — then an almost defeated Kekko Kamen has her uncle trip and take off her entire dress and hits her while she's too embarrassed to react.
* Satan's Waitin', goads the cat into chasing Tweety into the most violent of

situations. He falls from a tall building, is crushed beneath a steamroller, gets scared to death in a fun house, is shot multiple times in a shooting gallery, and slams into a low-clearance entrance of a roller-coaster tunnel. With just one life left, Sylvester decides that chasing Tweety isn't worth it and initially avoids the trope-fulfilling death. Unfortunately, he decides to move into a double-enforced bank safe on the day two crooks use nitroglycerin to blow open the safe and rob it of its contents. After the explosion, Sylvester and the crooks are seen going to Hell. One of the crooks tells his partner that he used too much nitro. "Now he tells him!" mutters a battered and disgusted Sylvester.
* Satan's World cold to build on. However, it would make more sense to use comets and/or gas giant moons instead, which are far more common than a literally one-of-a-kind planet and are colder than Earth but still much warmer than rogue planets.
* Satan that Satan gets fed up and joins the player should he choose the Law path.
* Satan). The various Devilmen normally wind up fighting Satan's forces initially because he possesses humans in order to manifest on earth, and they can't get over the teachings they've learned prior. (Amon and Dante must be pretty weak mentally to keep getting overpowered by young boys like that.)
* Satan to see how faithful a person was to God. Furthermore, "Satan" (which is really just Hebrew for "enemy" or "accuser") was not a single being but a title possessed by multiple angels over time (the Satan in the Book Of Job is defintely this kind.)
* Satan was able to rescue a single pregnant female (Ramsey). So while she wasn't necessarily the first hellhound, all other hellhounds do come from her.
* Satan was written, Satan had morphed into an evil figure in Christian theology, though maybe it's still a ploy by God or something.
* Satan. When he was caricatured with other reviewers in a revue sketch several decades later, he disapproved of it as being much too gentle.
* Satan, which as noted above is one of the oldest examples there is, so he counts. Sauron too, he used to be a Maia which were like angels.
* SATAZIUS games had become the standard and far eclipsed non-danmaku games in popularity.
* Satchel displays a variant: He usually knows what something is, but he has no idea whether it's edible until he's tried it.
* Satchel Switcheroo: Two characters who own the same kind briefcase or any other container get it mixed up with one another.
* Satella's body laid out for viewing in a church, possibly after her funeral.
* Satellite Character, as her kidnapping in that film drives the plot, that goes into detail about her relationship with Hinata.
* Satellite Character — When a character is wholly defined by their relationship to someone else, common syndrome among sidekicks.
* Satellite City follows the daily lives of a bunch of intelligent, beast-like creatures from another dimension living with their human host at a house in rural England.
* Satellite Girl And Milk Cow: In the world of the movie, anyone who has their heart broken turns into an animal. The Witch Of the North theorizes Kyung-chun was turned into a cow because of his "cow"ardice to admit his feelings to the girl he had a crush on.
* Satellite Girl And Milk Cow: Merlin is a living roll of toilet paper with limbs and a face on the paper.
* Satellite Girl And Milk Cow: When Kyung-chun demands to be changed back into a human, Merlin casts a spell that seems to do just that. However, KITSAT-1 finds a zipper on the back of his body and pulls on it, revealing that Merlin just gave him a human suit.
* Satellite Love Interest: A character whose personality revolves around being a love interest to another character.
* Satellite Love Interest so that Aaron was hiding a relationship with the much older Dianne.
* Satellite Love Interests the boy has had. At one point, Gossip Girl herself labels him the Class Whore.

* Satellite Love Interest. The other characters continue to express surprise when she suddenly displays detailed knowledge of her internal make up, no matter how often it happens.
* Satellite Love Interest: This character is made only to be the love interest of the lead protagonist.
* Satellite Love Interest: Very common - as in the Commedia dell'Arte, viewers are given little explanation as to who the inamorati actually are. They're young and in love, which usually sums up both characters' entire personalities (or at least the soprano's).
* Satellite Reign's resurrection technology, which means it still has some bugs. Specifically, your agents' clone bodies take increasing stat penalties with each death, meaning you have to abduct people off the streets to provide new cloning stock.
* Satellite Reign, the disaffected outsiders fighting the power for reasons and with methods that may not be benevolent, etc.
* satellites are passing by as the character steps onto the platform.
* satellite - they ignite on contact with each other without any ignition source.
* Saten, her ability turns out to have something to do with air manipulation, demonstrated by her spinning some leaves above her palm in a miniature cyclone.
* São Tomé and Príncipe dobra fell from 12,000 dobras per euro in 2004 to about 24,500 per euro in 2009, when the country signed a deal with Portugal to peg the dobra to the euro at that rate. Then they revalued the currency at the rate of 1,000 old dobras to one new dobra in 2018.
* sati — when a man died, his wife burned herself to death on his funeral pyre.
* Satina of the web animation of the same name is the daughter of Lucia, the demonic queen of hell, and Dave, an ordinary human man.
* Satin Astro says that in the future there will be a war between a rogue A.I. and Blazing World descended
* Satina (Wants a Glass Of Water), and her extremely sweet-and-girly-sounding voice. In fact, her own parents often underestimate how dangerous she actually is due to said ludicrously extreme cuteness of hers.
* Satin Steele has Satin, a professional female bodybuilder who does stuff like climbing up the spine of a giant dinosaur and fending off an alien monster with just her strength, gymnastics training and karate skills.
* Sati/Parvati felt a strong connection to the god Shiva and resolved to marry him even before they'd physically actually met. Explained by them being literal soulmates.
* satire on garbage disposal. Repeatedly, the characters voice their disdain for the short-sightedness of 20th-century people for not recycling and for letting their garbage get so out of control that it will doom millions of lives, a commentary the authors hope will resonate with modern viewers.
* Satires affairs, comparatively realistic and tame, providing light-hearted, escapist wackiness.
* satirical article by a Polish blogger. Despite the fact that the article is clearly not serious (the claims are deliberately as over-the-top and absurd as possible) and meant as a parody, plenty of readers took it at face value and most comments around the Polish internet are along the lines of "man, the fundamentalist Christians who wrote this must be insane!"
* Satirically invoked and played for all the laughs the trope is worth by
* satirical. To this day, it is passed around and republished by conspiracy theorists as proof that They are actively sabotaging world peace and wish to create a state of permanent warfare, rejecting Lewin's repeated statements of its true origin and intent as merely part of the cover-up.
* Satirized somewhat more gently, along with general pop-culture obsession with
* Satisfaction Guaranteed, they believe Claire has an inhumanly handsome man in love with her.
* Satisfactory Space Elevator, and when you place it, a massive cable descends from the sky and hooks on to the base. Your objectives are then to provide increasingly

complex materials and resources to build up the facilities on the Space Elevator.
* Satisfactory, which changes all the in-game alien spider monsters into corrupted cat heads, invoking this trope.
* Satoko and Rika are noticeably younger than the high school aged protagonists but how much younger is never quite stated. Satoko seems to have entered puberty but Rika hasn't yet. They both use elementary school bags as well. The closest given to an age confirmation is that Satoko is anywhere from 9 to 13 years old, and Rika is officially the same age as Satoko.
* Satoko is a prankster who figured out to use her traps for when she's in trouble.
* Satoko murdered her parents because her delusions made her think that they would kill her eventually.
* Satoko, to the point where she perceived her own parents as a threat to her and pushed them both off a cliff to their deaths. It was essentially a twisted kind of self-defense.
* Satomi Kijima died two years prior to the game, explaining why Akira lives with his aunt instead of her. Most of the information about her is related through exposition or the supplementary character profiles.
* Satomi Sato to voice Dende's brother Cargo... for maybe one or two lines before he gets killed.
* "Satomobiles", automobiles with sedan-chair flair, named after their in-universe creator,
* Satori and Koishi are often depicted as having very sensitive third eyes, and not in the
* Satori as it sounds, resulting in some truly odd consequences when Koishi closed her third eye.
* Satori Komeiji's mind-reading is already convenient, before even considering that she can use it to
* Satoru Iwata in the form of Satori Mountain, which is named after him. To make the connection clearer, a quest that takes place on the mountain is given by an NPC who greatly resembles him. A strange creature found on Satori Mountain called the Lord of the Mountain is indicated by flavour text to be a reincarnation of Iwata himself.
* Satoru Iwata, launched nearly 2 years after his death to acclaim from casual and hardcore gamers alike, capturing the appeal of the two markets in a way that the Wii failed to do.
* Satoru Iwata's president and a great video game designer in his own right) died, both Sony and Microsoft posted tributes to him.
* Satoru Iwata staring contemplatively at a banana bunch he was holding before setting it down and introducing a reel of upcoming games.
* Satoru Iwata. The Switch was greenlit under his watch and he was incredibly hands-on with the system's development, serving as project lead while he was alive and giving heavy technologically input for the device's form factor and features. He also prepped the software divisions at Nintendo for future Switch projects by restructuring the company's previously disparate console and handheld development teams. Iwata would die in July 2015, over a year before the Switch would hit market.
* Satoru Iwata, which was announced as codename NX in 2014. He passed away a year later before the Switch launched in 2017.
* Satoru Sayama, and later even "Puroresu Love" era All Japan, was also inspired by UWF.
* Satoru Sayama's company is called "Real Japan Pro Wrestling". While it has sometimes included MMA and martial arts bouts in its cards, it mostly works with shoot-style pro wrestling.
* Satoshi and his little sister Satoko both have blonde hair and red eyes.
* Satoshi Hojou saves Shion Sonozaki from a group of thugs in a flashback in
* Satoshi Karita, the Ultimate Con Artist, is also disliked due to his untrustworthy personality, and how his talent indicates that he has no qualms with lying to or manipulating others for his own benefit. He tries to downplay this

trope by remaining relatively civil to others so that they won't hate him enough to kill him, but his relationship with his roommate Asakura is bad enough that they had to
* Satoshi Kojima: In 2010, he left All Japan Pro Wrestling and returned to New Japan Pro Wrestling and proceeded to win the G1 Climax, the IWGP Heavyweight Championship (again) and the NWA World Heavyweight Championship in three years time.
* Satoshi Kon became one in his final months due to his shame at his body being ravaged by pancreatic cancer. Luckily, he was still able to write a highly moving farewell message in his last few days.
* Satoshi Kon enjoys this to a certain degree, partially due to his untimely death.
* Satoshi Kon has Chiyoko chasing the mysterious artist to the train station just as the train pulls away.
* Satoshi Kon. His works frequently dealt with the concept of subjective reality. Died from pancreatic cancer in 2010.
* Satoshi Kon made his career out of this. Most of his films have strange or unconventional premises.
* Satoshi's death when he saved her from the botched resurrection ritual.
* Satoshi Uematsu, suspected of stabbing 19 severely disabled people to death in a Japanese care home, has one of these in virtually every photo of him, both before and after the rampage.
* Sato's quirk, Sugar Rush, revolves around him consuming a lot of sugar and gaining a temporary boost of strength and energy.
* Sato Sumire used to be a solid member of the Undergirls in the elections, but her rank has dropped each year, and now she ranks in Future Girls.
* Satou is shown to reach for a tissue every now and then, and after discovering that
* Satou Kashi no Dangan wa Uchinukenai appearances. In the novel, they both have purple hair. The manga gives them more realistic designs and shortens Nagisa's hair.
* Satou Kashi no Dangan wa Uchinukenai that follows the relationship between a schoolgirl who wishes to rely on no one but herself, and a self-proclaimed mermaid who must find true friendship in one month's time or she will fade away forever.
* Satou's manager when she worked at the Princess Imperial is revealed to have kidnapped her coworker Mitsuboshi, molesting him as an attempt to get him to love her.
* Satsuki Kiryuin. She acts cool, distant and arrogant in public, staying in control of her emotions at all times, but allows herself to smile and relax a bit more among the select few she genuinely trusts and respects.
* Satsuki Kiryuuin holds to the mantra of survival of the fittest so strongly that she literally decides her
* Satsuki Nishihara, a transgender Japanese model, actress, and TV personality.
* Satsuki used to be the loving elder sister to Ryuko and Nui. However, her human nature and lack of Life Fiber biology led to her getting Ragyo's abuse at its worst, either being beaten or flat out molested if she ever talked back. She eventually fled into exile after Honnouji's founding and would become an overly stoic, cold revolutionary who borders on suicidal in her efforts to defeat her mother, no longer capable of feeling happiness.
* satsumon is a literal chalk outline. It is also implied to be one of the first casualties of a cataclysmic red flood described in Walltown that affected even the titular strangers.
* 's attempt to develop a game that averts this trope as hard as humanly possible. The project is now defunct. However, it seemed that there is one insurmountable obstacle toward a realistic sword fighting game for the current market; any sport or martial art using a sword has immediate force feedback from pressure against your weapon. Even with a sword-hilt shaped motion controller, there is no reasonably-priced solution that would cause a player's controller to stop moving in the real world in a position analogous to the one where their avatar's sword did if a blow is parried or otherwise stopped. The player would invariably "overswing".

Further seemingly insurmountable obstacles include grapples, blades binding, and making sure the television presents things to the player so the apparent height and location of an attack corresponds to where it would be if it were real given the unpredictable size and placement of the television used by each player.
* Satu is one for Japan, with its royals wearing kimonos, in addition to their names obviously being Japanese (Toshi, Shoji, Tomiko).
* Saturday Evening Post cover featured a parent observing a child playing with a wooden toy train, which led to a purchase of a big electric train set, only for the child to continue to play with the original wooden toy.
* Saturday Evening Post (shown at the top of the page) depicts a lone female juror holding out while her male counterparts argue heatedly with her.
* Saturday filler strip from 2005. They say they've just learnt to tune it out, but Zoë notices the game is also saying things like "buy-more-Japanese-imports-KICK!"
* Saturday Is Ballet Day, learning to ballet dance, was published to merchandise it. The book is charming, and stayed continuously in print for over two decades, complete with the doll's logo on the cover.
* Saturday morning block on NBC, you'll notice little to no variety on what they use in their commercial breaks.
* Saturday Morning Breakfast Cereal about Jesus's first attempt at transmuting water into wine, producing a fusion reaction.
* Saturday Morning Breakfast Cereal, a couple of kids discuss ethical theories they supposedly subscribe to, which advocate doing the evil-sounding things that different existing moral theories could lead to and being happy about it.
* Saturday Morning Breakfast Cereal: A father's ghost appears to his son demanding him to take revenge for his death. But since he died because of shoddy electrical wiring, the son has to go on a killing spree through representatives of all the different agents who were responsible for its production. Thus, the reason he gives for his murders isn't "You killed my father" but "Globalization."
* Saturday Morning Breakfast Cereal: A machine that "knows what you're thinking" that just outputs a card saying "This is bullshit" (which is, of course, what you'll be thinking when you hear about it).
* Saturday Morning Breakfast Cereal and his honey-eating from a bee perspective.
* Saturday Morning Breakfast Cereal" and then, in the bonus punchline, explains that the word means "double ganger" in German.
* Saturday Morning Breakfast Cereal, and the subtitle states that coincidentally, he released it on the same day that aliens secretly took over the bodies of all of Earth's children. His face is being added to Mt. Rushmore as we speak.
* Saturday Morning Breakfast Cereal: an old sword made with old technology just sucks.
* Saturday Morning Breakfast CerealAnother good example of how the scientific terminology is more nuanced and different than common use: the phenomenon (objects acceleration toward each other in proportion to mass) is firmly observed and existent, the law (that, on the macro-scale, force = g*m1*m2/d^2, and its more thoroughly detailed relativistic version) is well-established and verified as it can get, but the Theory, i.e. the set of explanations describing why these things are so in the context of all the other stuff we know, is not very well fleshed-out.
* Saturday Morning Breakfast Cereal: "Any joke that ends with a pun can be converted to an action movie scene."
* Saturday Morning Breakfast Cereal, a recording of it is used as a torture method.
* Saturday Morning Breakfast Cereal as a car decal, one-upping both the Christian fish and evolution fish decals.
* Saturday Morning Breakfast Cereal, a scientist creates an invention called the logogeneplex, which turns clear wording into this. Example: "We used a ruler" becomes "We utilized a linear distance analyzer."
* Saturday Morning Breakfast Cereal as part of a proof that fiction is stranger than truth.
* Saturday Morning Breakfast Cereal, a speaker is explaining how humans are the only animals with complex language and resulting things like warmaking... but he's

really two dolphins atop one another, wearing a human mask, ensuring the humans won't anticipate the dolphin conquest.
* Saturday Morning Breakfast Cereal. A villain tells a mother that she must choose one of her children to die to save the other, but she immediately chooses the child she's in the habit of fighting with, and they start yelling at each other again. The villain goes to find a more happy family to capture and give the sadistic choice to.
* Saturday Morning Breakfast Cereal: A woman explains to another how she cleverly ruined a man's life ("long ago") when he approached her with a lame pickup line. (She pretended it was an extremely effective line, causing him to forever go around trying the same line on other women, hoping to get the same reaction again.) After telling this, she suddenly realizes what the line actually meant, and thinks it was clever.
* SaturdayMorningBreakfastCereal (a word the author invented) as a statement whose converse is its own explaination. Among the examples is a man that doesn't vote because politicians never hear his group, and a woman that doesn't practice a new skill because she is not good at it.
* Saturday Morning Breakfast Cereal because he prefers reality, but when he hears there's an actual chance to do so, he immediately wants in.
* Saturday Morning Breakfast Cereal) but for imagined titillation rather than offense.
* Saturday Morning Breakfast Cereal by having it written on a blimp. Woman guessed he would ask, so a plane carrying a banner saying "No" flies by next.
* Saturday Morning Breakfast Cereal client, who was a jerk and made a wish about what the next one would get.
* Saturday Morning Breakfast Cereal die, a new body is just taken out of storage and given an updated brain. This also leads to a cavalier attitude on Batman's part where he's fine with messing with Robin's head, killing him, and just getting a new one with no memory of that.
* Saturday Morning Breakfast Cereal does this sometimes, including using "kiloweiners" at at least one point to measure shame/embarrasment.
* Saturday Morning Breakfast Cereal) eternity in paradise rather than an hour in boring reality.
* Saturday Morning Breakfast Cereal features a "Votey", an extra panel with a subsequent gag related to the day's comic, which is shown by placing the cursor over a small red ball under the comic.
* Saturday Morning Breakfast Cereal features Awkward Boner Hug Man. Uncomfortably.
* Saturday Morning Breakfast Cereal for a deceased friend, causing her ghost to show up to complain.
* Saturday Morning Breakfast Cereal for the trope after it's been lampshaded:
* Saturday Morning Breakfast Cereal had a comic with the line of dialogue "You put what in my cereal?" The cereal in question was "Everything But Urine-Os".
* Saturday Morning Breakfast Cereal has an old woman teaching the kids that the goal of sex is to have sex as often as possible while keeping pregnancies and babies as low as possible, also helpfully defining sex as "put one thingy into another thingy". It's possible she isn't even an actual teacher.
* Saturday Morning Breakfast Cereal has a Russian doll that contains the person holding the doll.
* Saturday Morning Breakfast Cereal has God intending the story to be a parable about technology beating brute strength, only for humans to instantly misinterpret it.
* Saturday Morning Breakfast Cereal has many parodies about parents' weird responses to kids complaining about monsters under their beds (eg. one monster comes out to complain about how the father started lecturing about the relativity of "under"), or the parents themselves pretending to be monsters that invade the kids' bedroom, etc.
* Saturday Morning Breakfast Cereal has the "buttfor" variation being played by a priest administering to a criminal on death row.
* Saturday Morning Breakfast Cereal he knows. The majority of strips are physics

and math jokes, but jokes can be based on topics from any course he's taking. His classes must be full of fodder — since returning to school he hasn't made any jokes about meeting his deadline, or failing to, and often produces more than one a day — or one long equivalent to a week's worth of strips.
* Saturday Morning Breakfast Cereal (Hziulquoigmnzhah of Cykranosh, the dread spawn of Cxaxukluth) instead of her current lover (John).
* Saturday Morning Breakfast Cereal. "In case three, every time you forget to wear pants, people whisper how brilliant you are. Do you ever wear pants?"
* Saturday Morning Breakfast Cereal: "In this part of Manhattan, 'Kill my mom' was slang for 'Kill my dad.'" (This was what someone took too literally.)
* Saturday Morning Breakfast Cereal introduces new one-time characters for almost every strip, and these are a diverse bunch, not just straight white men by default. (At least starting in 2010 or so.) However, perhaps simply due to the art style, the non-white characters mostly look ambiguously brown.
* Saturday Morning Breakfast Cereal is about a man who's made angry by a media personality who makes his living doing that, but refuses to be provoked. His tombstone says "Never clicked that link." Then the artist adds his own tombstone, which says "Clicked those links but did comics about how other people shouldn't."
* Saturday Morning Breakfast Cereal is a delightfully odd potpourri of high-level insight on mathematics, science, economic and political theory, and philosophy... mixed with the occasional observation that genitals look funny.
* Saturday Morning Breakfast Cereal is immune to bullets, but what about a knife?
* Saturday Morning Breakfast Cereal is the worst. With its addicting humor and a DAILY UPDATE you're in for a binge that could last a week.
* Saturday Morning Breakfast Cereal. It starts out with "I love the way you finish my" -"Sentences!" but by halfway down the story, we're already at "I want a" -"Divorce!" and it only gets worse from there.
* Saturday Morning Breakfast Cereal jokes that when you play peek-a-boo with a baby, it laughs because it's going mad at the thought that everything in the world has vanished.
* Saturday Morning Breakfast Cereal luxury (including ketchup) is near-impossible to find and costs trillions of dollars. Humanity backslides into a dystopian mass-produced subsistence life as all media and art is repurposed to torment its viewers. Of course, the punchline is that humans still pretend bad media is entertaining and funny.
* Saturday Morning Breakfast Cereal — and the robots are repeatedly shown breaking up with the humans for not being good enough somehow.
* Saturday Morning Breakfast Cereal once had a biker accidentally getting the tattoo "LOVE/HATS" but didn't mind because he actually really loved hats.
* Saturday Morning Breakfast Cereal once turned this trope upside-down by having the Uranians call Earth "Booger-Dick" after the humans "couldn't stop giggling at them all through first contact". Who can blame them?
* Saturday Morning Breakfast Cereal. One strip has the devil burying fake fossils and God coming over to say that He's trolling the humans much better with quantum mechanics.
* Saturday Morning Breakfast Cereal parodies this in one comic, when a man tells his girlfriend that he's going to die soon, and wants her to take a pill that will convince her she never liked him, so that she won't be burdened by this loss. She initially refuses, but eventually she caves, at which point the man yells "Aha!". Cut to a bar scene, were the same man explains to a different woman that that's why his girlfriend failed the relationship test.
* Saturday Morning Breakfast Cereal provides the page image, along with a number of other "fake doctor" and "bad doctor" strips.
* Saturday Morning Breakfast Cereal (published the previous week) features Superman harming people, hiding his tracks by murdering journalists who are on to him, and then get public support for his noble quest to find the killer.
* Saturday Morning Breakfast Cereal read backwards could be a kids' movie about a bug that turns into a real boy in the end.
* Saturday Morning Breakfast Cereal, reveals that "everything happens for a reason"

— and all the reasons are stupid and random.
* Saturday Morning Breakfast Cereal search is revealed to be run by ghosts of the damned, not AI. It's okay, they're damned anyway, this is just a different form of torture.
* Saturday Morning Breakfast Cereal shows that this isn't a punishment any more unless you also take away his phone.
* Saturday Morning Breakfast Cereal sometimes advertises the "BAH Fest", apparently an actual event, where BAH stands for "bad ad hoc hypotheses", which seem to fall under this trope. That aside, specific examples from the comic:
* Saturday Morning Breakfast Cereal steals a man from inside his clothing without anyone on the street noticing.
* Saturday Morning Breakfast Cereal, such as a suicide by gunshot being noted as considerably less sombre, because the blood splatter accidentally spelled out the word "butt" on the wall behind the corpse. Another has a guy hanging himself, writing in his suicide note that he's "too cool for life", at which point the viewer sees that he died with toilet paper hanging from one of his shoes.
* Saturday Morning Breakfast Cereal telling kids smoking is bad -while looking 'awesome' smoking.
* Saturday Morning Breakfast Cereal that retail stores follow the "actual" Christmas schedule based around Santa's arrival, rather than the "official" calendar-posted December 25th. "Actual" Christmas comes slightly earlier every year because Santa orbits the sun slightly faster than Earth, and thus arrives earlier every year. The end result: Christmas items appear in stores earlier and earlier, until they are eventually never sold during the calendar holiday season.
* Saturday Morning Breakfast Cereal, the human abducted by aliens is disappointed to be scanned noninvasively in a way that doesn't involve anything being inserted anywhere.
* Saturday Morning Breakfast Cereal the Iron Sociopath, who is into hero-ing entirely because it's a form of violence he i commit without going to prison.
* Saturday Morning Breakfast Cereal thinking them proof of masculine domination. Leading to the immortal line:
* Saturday Morning Breakfast Cereal, this is both God's power and the reason he seems much more absent than in the early bible. Whenever he had a violent or bad thought, it manifested. Hell was a crazy judgement scheme he came up with when someone was annoying, and then it was too late. So he stopped thinking bad thoughts, but that made him just introspective and passive, so he no longer acts.
* Saturday Morning Breakfast Cereal to cut the wire that defuses the bomb or the one that means instant death.
* Saturday Morning Breakfast Cereal to discover that the world has adopted a moneyless post-scarcity economy.
* Saturday Morning Breakfast Cereal: two panels out of four. In the comic, a guy congratulates a woman with a prominent belly. She snaps that she's not pregnant. The guy tries to save it and congratulates her on... being fat. The bonus red button panel reveals that he's satisfied with such an awesome smooth move.
* Saturday Morning Breakfast Cereal used to offer an early look at tomorrow's comic, and a one-panel extra that showed what happened after the end of the current comic if you voted for the site. The former was phased out, and the latter was changed so that you only had to hover your mouse over a red button to access, although it's still often referred to as the "votey comic" anyway.
* Saturday Morning Breakfast Cereal; whenever someone wanted to do something, someone else would object, and so the first person would have to move further and further away from civilization to do it. Now that the world is mapped, it appears to be a problem... except the most NIMBYistic people, the rich, are the ones funding private spaceflight...
* Saturday Morning Breakfast Cereal, where it's really that they live together but emotional distance creates the same problems.
* Saturday Morning Breakfast Cereal, where the aliens' ultra-laser turns out to be just a huge laser pointer. The Earthlings wonder how this is supposed to destroy them, until they see the giant space-cat.

* Saturday Morning Breakfast Cereal where two aliens discuss just how problematic eating humans would be.
* Saturday Morning Breakfast Cereal, where two Norse berserkers discuss their profession in a modern-sounding way.
* Saturday Morning Breakfast Cereal, which it darkly parodies, but for one panel, it shifts to a more detailed and relatively more realistic shot of Dilbert's face. Another panel shifts from colour to greyscale.
* Saturday Morning Breakfast Cereal who fights crime because it gives him an opportunity to commit violence unpunished.
* Saturday Morning Breakfast Cereal who was created specifically to be punished for the original's crimes. However, his creators quickly felt guilty about this and released him into the world (its implied that the clone has the original's personality but not his memories). It quickly turns out that without a power base like that of 1930s Germany, Adolf Hitler is just kind of a jerk that no one wants to be around.
* Saturday Morning Breakfast Cereal with a prostitute who claims that sex is free, with in-sex purchases. All the client really gets for free is to go in a room with her.
* Saturday Morning Breakfast Cereal, you'll ascend into a world of pure thought when you finish your to-do-list. Or, you know, you would.
* Saturday Morning Breakfast Cereal. "You used your second wish to forget all the consequences of your first wish."
* Saturday Morning Cartoon block and getting his own comic strip and books.
* Saturday Morning Cartoon blocks during the afternoon on weekdays during the years they had such blocks. The former has stopped doing this, while the latter still shows family-friendly movies all week.
* Saturday Morning Cartoon ended up putting the final nail in the coffin for this format.
* Saturday Morning Cartoon is broken in half, and when Stanley puts on the half he finds literally one side of him becomes The Mask, while the other remains boring old Stanley. When Stanley later encounters his boss, he deliberately stands in profile, so that only his "normal" half is visible. And while Stanley talks to Charlie, The Mask holds up signs such as "Underwear too TIGHT, Charles?" and "Make my day: FIRE ME!" Charlie is less than amused.
* Saturday Morning Cartoon is temporarily diverted from saving the person who made the original call for help (a kid who fell in the river and is floating toward a waterfall) by the need to deal with a dozen or so other events in need of a superhero.
* Saturday Morning Cartoons: Each of the Big Three networks – ABC, CBS and NBC – had these, from at least the mid-1970s through the last years each network ended their cartoon lineups. Examples:
* Saturday Morning Cartoons when the titular hero gets shocked or scared.
* Saturday Morning Fly had a joke ad regarding hating hackeysackers. What do you do about them? Chuck them a hackeysack which explodes!
* Saturday Morning Kids’ Show gunge tank built into its set in its last series in about 2000. Members of the studio audience were selected as victims, often apparently as a complete surprise to them. The game played varied throughout the series' unusually long lifetime:
* Saturday Morning Kids Shows is the hosts just had a running order, no script. A couple of actors played lots of recurring characters who would come in each week, and would have a few prepared jokes when they first entered, but they would then have to improvise as they interacted with the hosts and the children.
* Saturday Morning Watchmen is "friend to the animals/When he's not clowning around!"
* Saturday Night Fever created a nationwide craze for disco music and disco dancing (together with discotheques). Before it came out, disco was mostly confined to the New York and Philadelphia urban and gay communities.
* Saturday Night Fever) didn't even last a season and is an obscure sitcom.
* Saturday Night Fever, Donald Gantry, Adrienne King, Ellen March, Bruce Ornstein,

Paul Pape, Lisa Peluso, Donna Pescow, Ann Travolta and mother Helen Travolta (her only feature cameo).
* Saturday Night Fever included a scene where John Travolta's dance moves are completely inferior to a Puerto Rican couple's, but he is nonetheless declared the winner of the competition. This is quickly revealed to be a subversion, as the judge's decision was based on racism and Travolta's infuriated character gives his award to the deserving couple.
* Saturday Night Fever: Tony heads to the big city to dance on Broadway and gets the girl, but the other one was treated like dirt, raped, and then forgotten about. And let's just forget Tony's friend Bobby C, who falls (whether accidentally or on purpose) off the Verrazanno-Narrows Bridge during an act of depressed recklessness.
* Saturday Night Fever. Unusually for this trope, this is a normal family dinner at the Ramero household, not a special occasion.
* Saturday Night Fever where the main characters had to be dubbed over by voice actors because the discotheques were too loud for the actors themselves to hear what the other was saying, let alone the recording equipment and the audience watching the film.
* Saturday Night Fry says (of the theme song) "You know, the more I get to hear that tune, the better I get to know it." (This trope is clearly a favourite of his - he once wrote in chess magazine Kingpin "If more people read this magazine, it would have a higher circulation").
* Saturday Night Live about prison life with Tobias Beecher, Vernon Schillinger, Ryan O'Reilly, and Augustus Hill.
* Saturday Night Live" (a bunch of oil-soaked rags stapled to a shirt and a lighter).
* Saturday Night Live: According to the stories, Bill Brasky got one of these at his bachelor party. Before anyone could tell him about the girl, he'd already eaten the entire cake...
* Saturday Night Live: a color-coded system is introduced and explained, but all the colors are virtually-indistinguishable shades of white (white, off-white, bone, putty, etc.)
* Saturday Night Live ads for the law firm of Green & Fazio ("Call 1-800-HARASSS. The extra "S" is for extra harassment!").
* Saturday Night Live. African humans encounter aliens, who must consult an English-Swahili dictionary to translate.
* Saturday Night Live: "A Lady's Guide to Throwing a Party", from the January Jones episode in 2009, is shot in the style of an old educational film.
* Saturday Night Live. All while the horse runs out of the stable very very slowly (because he is tiny). In the end his father says he can keep the horse, but the young man decides to let him go free anyway.
* Saturday Night Live alternates between Level 0 and Level 1, with some recurring sketches and characters.
* Saturday Night Live alumni tend to work together a lot, usually members of the same cast, however it has been cross-generational as well.
* Saturday Night Live & Ana Gasteyer's recurring sketch about middle school music teachers Marty Culp & Bobbie Moyhan-Culp, who are there to do a gig by playing popular music in a classical style, always begins with mic feedback. "Ooh, we got a real hot mic here."
* Saturday Night Live, an American staple on NBC, made fun of the redesign when it was happening by showcasing on the Weekend Update segment fictional rejected logo concepts, each of which was a more angular, extreme, avant-garde combination of flat red and blue shapes. NBC reintegrated the peacock to the logo a mere three years later, and while not exactly like the first colour-flaunting 1956 peacock, it's highly evocative thereof.
* Saturday Night Live and Gorbachev, but he doesn't speak Russian very well. To cover Nealon "translates" Gorbachev saying "I'm now going to start speaking in a very obscure Russian dialect that very few have ever heard of and it will be impossible for your translator to translate." (paraphrased.)
* Saturday Night Live and Joe Piscopo, the only holdovers from the Doumanian era).

When Ebersol began talking about dropping the "live" aspect of the show, Lorne Michaels returned, and after a season of fumbling, brought the show back to its original popularity. The rest is history: he's still Executive Producer as of 2018, with no plans to end the show anytime soon.
* Saturday Night Live And she launched three tropes in the same time it took to make this one, so...
* Saturday Night Live, and so stupid that he steps into the campfire three times in total, yowling in pain each time.
* Saturday Night Live and starred in a sketch about a superhero, "Moleculo the Molecular Man". People would say his name, and he would turn to the camera and bellow, "THE MOLECULAR MAN!" Including when he was disguised as his Alter Ego, which is how they figured out he was Moleculo (THE MOLECULAR MAN!).
* Saturday Night Live, and The Muppets were upset that they weren't asked to host.
* Saturday Night Live, and throws his enemies out the Oval Office window — though, as John McCain is assured, "Relax, it's only the first floor."
* Saturday Night Live, any conversation Tracy Morgan holds with Lorne Michaels is likely to end with the former demanding, "Get me a soda, bitch!"
* Saturday Night Live), a pair of awkward, self-conscious pariahs who led unusual cheerleading routines at school functions to which they had not been invited.
* Saturday Night Live a pedophile (at the time of the episode, news of sex scandals involving college coaches molesting their players was all over the news, with Penn State and Syracuse being the popular ones), despite that he has a disturbing mustache, lives with his mom, has never had a girlfriend (even implying that he could be asexual, since investigators found no evidence that he was sexually attracted to men or women), and has poor social skills with people his own age. Even the head of NAMBLA's local chapter (played by Bill Hader) stated that the allegedly disturbing coach wouldn't be a good fit for NAMBLA if it turned out that he was, in fact, a pedophile.
* Saturday Night Live appearance the week before their actual 18th birthday.
* Saturday Night Live) appear on a consumer watchdog show called "Consumer Probe", and hopelessly defend his company's extremely dodgy and dangerous products, and drawing comparisons with the dangers of actual commonplace products. In one episode, he tried to defend a series of Halloween costumes, including "Johnny Space Commander Mask" (simply a plastic bag and a rubber band), "The Invisible Pedestrian" ("NOT FOR BLIND KIDS!"), "Johnny Combat Action Costume" (which comes with an actual working rifle, ammo not included. Allegedly popular in Detroit), and "Johnny Human Torch" (oil-soaked rags and an oversized torch. "It lights up the night!")
* Saturday Night Live appears for a new TNT show, which they notice and start talking about. When it vanishes, they go back to talking about the game, but then it pops up again, with Barkley getting really excited by the hijinks that take place in the pop up. This repeats throughout the skit, much of Marv Albert's chagrin.
* Saturday Night Live, a recruit in the US Army is mortified when his colonel father shows up, as he genuinely does not want any special or preferential treatment. His father has other ideas.
* Saturday Night Live A recurring sketch featured a pair of announcers at various ladies sporting events, one of whom is completely clueless. One of his more cogent moments, after a bowler bowls a strike:
* Saturday Night Live are sketches involving some truly idiotic crooks. Half the time, said sketches will show they get away with it because the cops are even dumber.
* Saturday Night Live: Around the time of the 2000 US presidential election, there was a "flash forward" skit in which each of the candidates (Bush, Gore, Nader) is giving a speech about the state of the nation under their yet-to-be administration. When it came time for Nader, he droned on for a while, and then stuffed winged pigs started floating past and a couple of earmuff — wearing devils wandered into the shot rubbing their hands and throwing snowballs at each other.
* Saturday Night Live around the White House, but is reluctant to let go of the

precious antiques and such that stay with the house.
* Saturday Night Live as "Amerida", a vision of what America would be like after a Canadian invasion and takeover.
* Saturday Night Live" as an intern named "Randy" on a First Order ship. He learns that the interns do the "bitch work" - clerical work, droid wrangling, and stuff like serving blue milk to rude officers.
* Saturday Night Live as Julia Child "cut the dickens out of [her] thumb," and subsequently bleed all over the set while trying to continue as though nothing had happened. As with most classic SNL, very funny. (Heck, Julia Child herself thought it was a riot!)
* Saturday Night Live, a sketch involved Michael Moore and Phil Donahue contacting Barbra Streisand by cable. Her image is shown with a super-strong Gaussian Blur, as they comment on how young she still looks.
* Saturday Night Live, as part of its parody of dystopian young-adult fiction, has characters randomly throwing around a ton of increasingly ridiculous slang.
* Saturday Night Live as rival hockey players; Piscopo attacks Williams with his stick during the opening puck drop, and it escalates from there.
* Saturday Night Live. As such, the child must be delivered through the patient's urethra, with attendant risk of "tuliping" (meaning that the patient's penis will peel backwards like tulip petals). The scientists spend the rest of the sketch talking over his attempts to find out more about this potential complication.
* Saturday Night Live as the character came to be known, initially appeared as an advertising executive named Phil Maloney who would use subliminal cues and messages in his own speech to influence the people around him. Later Nealon would apply the device in his role as anchor on the "Weekend Update" segment, where he would lace his "official" editorials with ironic and often biting commentaries.
* Saturday Night Live as the heroes of an '80s-esque action cartoon supposedly broadcast in the Middle East) has Dick Cheney mention that they're planning to rename Iraq "East Dakota".
* Saturday Night Live. As they traded barbs, Mickey sneered at the host: "All I know is we hauled your butt out of two world wars!"
* Saturday Night Live. As "Weekend Update" started, moderator Chevy Chase would be on the phone in a saucy conversation with his girlfriend, then notice the camera was on, and quickly hang up.
* Saturday Night Live. At the end Jack Perkins (Darrell Hammond) reads off a list of her hits, which include "I Won't Do Oral" and, a few seconds later, "Okay, Fine, I'll Do Oral".
* Saturday Night Live. Belzer was a colleague of Kaufman's on the comedy club circuit, and partial inspiration for the latter's Tony Clifton persona.
* Saturday Night Live better received by some, the consensus by most was that the campaign was just generally a bad idea.
* Saturday Night Live boost, "Ardy Party" touches on this. Says Jorm of its title character...
* Saturday Night Live, built on the idea that it is this trope: at the time, it was the eighth-highest-rated show on cable and was in its fourth season (of seven), and yet nobody can tell you anything about it. After watching a commercial for it, the closest thing anyone was able to guess was that it took place in Miami.
* Saturday Night Live, but is eventually pressured into it. Once he gets to why, though, he calls the others out for being judgmental, as even the obviously-animatronic owl is shaking its head in disapproval.
* Saturday Night Live), but other times, they'll take time off from the laughs to say goodbye and do a memorial piece:
* Saturday Night Live, but poor Nick needed to get his eyeballs replaced from rolling them so much over the years.
* Saturday Night Live by leaping out of a window or climbing up a chimney.
* Saturday Night Live by replacing Edward with Frankenstein's monster also replaced Jacob with a suave mummy.
* Saturday Night Live by Will Ferrell. Despite maintaining his harsh tone of voice, he still talks about what to do about his failing marriage and other things. In the

end, he tells his cadets that he loves them.
* Saturday Night Live can feel up women and walk around in his underwear and be fawned over.
* Saturday Night Live "Celebrity Jeopardy" sketch, particularly after the response to the question, "This Ringo was the 'Starr' drummer for The Beatles."
* Saturday Night Live) changes the name on his screen to "Turd Ferguson" because "it's a funny name."
* Saturday Night Live character Nathan Thurm does an alternate version of this: instead of sticking to his guns in the face of insurmountable wrongness, he just switches positions and expects to get away with it ("I know that! Don't you think I know that?").
* Saturday Night Live character Paulie Herman, that he was from New Jersey. Problems arose from one Paulie sketch, which portrayed Piscataway as heavily-covered by chemical plants and toxic dust. Ted Light, Piscataway's then-mayor, was not at all amused.
* Saturday Night Live character "The Continental" has been maced so many times he's built up an immunity to it. This, however, doesn't keep him from getting punched in the face.
* Saturday Night Live chased it off the shelves due to how vulgar the name was. They are still sold in Ben and Jerry's ice cream stands.
* Saturday Night Live, Cheri Oteri inadvertently said "shit" during the show; in the end, host David Schwimmer made her put a dollar into the SNL swear jar.
* Saturday Night Live, Chevy Chase was responsible for the "Weekend Update" news segment. It would always begin with him on the phone with an unidentified lover, saying things like "No, lots of people scream." This is unique in that the implied perversion is at the start of the report, rather than interrupting it.
* Saturday Night Live clue values in 1976 ($25 to $125) and 100 times what the actual clue values turned out to be in 1999 ($100 to $500).
* Saturday Night Live comes thick and "rich" out of the bottle as the Simon song plays!
* Saturday Night Live concluded with two representatives of the Gay Communist Gun Club endorsing George H. W. Bush for president because, while he did not support all of their positions, two out of three wasn't bad.
* Saturday Night Live convention where after ever more inane questions, Shatner begs them all to "Get A Life!"
* Saturday Night Live) depicted a German kids' show with some rather terrifying imagery. The American kids in the audience react badly and the show's American broadcast is cancelled.
* Saturday Night Live. Despite all the scenes of violence and gore, it's still rated "G".
* Saturday Night Live did a sketch about this: a fake commercial for a compilation album of songs that both parents and teens could enjoy together because of their re-emergence in commercials. For example, "Good Vibrations", which Mom remembers from listening to Beach Boys records as a kid, and daughter recognizes as the theme from a Sunkist ad.
* Saturday Night Live did a skit about this: a commercial for an album of classic songs that parents and teens could enjoy together—the parents because they grew up listening to them, the kids because they knew them from commercials. The Beach Boys/Sunkist example above was one of the selections.
* Saturday Night Live did a spoof advertisement for the Church of Neurotology, based on a real promotional video released by Scientology, in a season 40 episode hosted by Michael Keaton.
* Saturday Night Live digital short "Let's Do It In My Twin Bed", which featured a bevy of women trying to seduce their boyfriends in their childhood bedrooms. Only to find the men completely turned off by all the childhood artifacts present, including their seventh-grade class pictures. The skit ends with a montage of the pictures next to the now adult women.
* Saturday Night Live) does a big spit take into Colin Jost's face when he gives her some shocking news. Wisely, the next time he has to impart news he waits for

her to finish drinking first. (She simply flings the rest of the drink in his face out of shock instead.)
* Saturday Night Live) does this while discussing being fired by Donald Trump.
* Saturday Night Live, due to the show's extremely limited pool of talent and relative homogeneity. A few examples:
* Saturday Night Live episode hosted by Jake Gyllenhaal. In one sketch, Jake plays an actor who's at the "Law and Order School of Acting"; the end goal is to win the role of the person (including an obnoxious jogger or loudmouthed fisherman) who discovers the body in each show.
* Saturday Night Live episode in which he played a Venezuelan delegate is probably the closest he's ever been to playing his real nationality.
* Saturday Night Live episode "The Shooting", the two police officers who show up near the end have the same generic "POLICE DEPT." patches on their arms as the Dragnet example above, as well as what can be assumed to be generic badges.
* Saturday Night Live: Exaggerated and parodied in the "Samurai Delicatessen" sketches, which feature John Belushi as a samurai running the counter of a New York deli. Sketches feature the samurai angrily chopping up meat for sandwiches using his katana.
* Saturday Night Live fake-commercial for "The Cluckin' Chicken" — an ad for a chicken restaurant featuring a chipper cartoon chicken describing the entire gory process of how he's slaughtered, plucked, gutted, quartered, cooked, eaten, digested, and excreted.
* Saturday Night Live featured an interview with the guy who did the sketch of the Unabomber, Ted Kaczynski, comparing the image with the eventual mug shot, and how the two look nothing alike. It then showed his sketches for the "Ten-Gallon Hat Bandit," and a criminal in a chef's hat, both with large hats and sunglasses, despite how neither criminal actually wore those items. The sketch artist notes he's not good with eyes or hair.
* Saturday Night Live featured a sensual parody commercial for the real estate site Zillow that was shot like an ad for a sex hotline, with the justification that people in their late thirties get more aroused by looking at their dream houses. That is, until they contact the obnoxious agent and she snaps them into reality.
* Saturday Night Live, featuring two college-age anime fans who've added "-San" onto their very non-Japanese names.
* Saturday Night Live films are a pair of sardonic, but likable metalheads.
* Saturday Night Live focuses on Jesus and his best pals Paul and, um, Barry.
* Saturday Night Live. Followed in a later episode by the Bat-O-Matic.
* Saturday Night Live following his election defeat to George Bush. At one point, Gore good-humouredly asks he if can briefly sit behind the desk in the 'Oval Office'... and over the course of the skit becomes increasingly egomaniacal and tyrannical, and refuses to leave despite the cast's repeated insistence that it's just a mock-up of the Oval Office, and he doesn't actually have any more power at all.
* Saturday Night Live for the Xerox 790 Assjet, a photocopier made just for this, with special buttock-shaped platen glass.
* Saturday Night Live (for those who "hate the sophistication of Manhattan").
* Saturday Night Live frequently makes fun of its guest hosts. Jon Heder takes it like a champ. Political candidates have to learn to take a joke to be relate-able... Most times, that is.
* Saturday Night Live. Frodo's iPhone search for a Quiznos takes him to Mordor.
* Saturday Night Live from listening to Bill Brasky talk in his sleep.
* Saturday Night Live from white Trump voters in terms of their religious and cultural attitudes.
* Saturday Night Live full of eccentric artsy types attempting to order at a Burger King drive-thru. They place nonsensical orders and ask to split the bill onto 26 credit cards.
* Saturday Night Live full of soap water to wash out his "filthy lying mouth".
* Saturday Night Live), furnish their apartment with various unusual chairs, which they usually find more comfortable than their guests do. One sketch took this trope

literally, when the wife showed off an armchair made out of ice.
* Saturday Night Live game show parody, "Who Wants To Be Groped By An Eleven-Thousandaire?". The contestants included two women and a very confused man, apparently sent by his friends as a joke. The audience is to vote on who will be sent to the "thousand-aire's" car, where the groping will take place. Of course, the man receives 98% of the vote. The skit concludes with the panicked and unwilling man struggling in the backseat of the car, while the audience roars.
* Saturday Night Live get out of the room (which is always the exact same room, just with a different location sign over the door each time), but personal issues, interpersonal issues, stupidity, and totally irrelevant events prevent him from doing anything until it's too late.
* Saturday Night Live gives us a fake toy called "Happy Fun Ball", which may suddenly accelerate to dangerous speeds.
* Saturday Night Live: guest Alec Baldwin, on Mike Myers' "How to Be a Handsome Actor" instructional, demonstrates the fine points of spinning in an office chair to face the camera, whipping off one's glasses, signing a paper without looking at it, and picking up a ringing phone and immediately talking into it.
* Saturday Night Live had a character travel from the future just to squeeze one of the female player's breasts.
* Saturday Night Live had a continuing serial Dickens parody with guest Michael Palin, who as the youthful hero gets initiated to the manly life on the sea with manly men on the "Raging Queen".
* Saturday Night Live had a fake trailer for a movie called "Kung Fu Christmas", starring Caine (David Carradine's character from the show "Kung Fu," played by Carradine himself) and Bruce Lee (played by Eddie Murphy).
* Saturday Night Live had a few of these in the early years, including Headmaster of the New York School for the Hard of Hearing, Garrett Morris. (The first six or seven years had a lot of first-name examples as well — the 'WASP Translator' sketch with Ray Sharkey centered around a couple named Charles and Ann. Guess which cast members played them.) Later on, in a move of notable laziness, Chris Farley's character was referred to simply as "Farley".
* Saturday Night Live had a mock commercial for a funeral home, one of the selling points of which was their policy of "Absolutely no sex with dead bodies." The commercial goes into so much detail about how this is enforced it leads one to think the whole funeral home industry is rife with necrophiliacs.
* Saturday Night Live had an early "fake commercial" for "Felina Cat Food", where a woman was asked to sample tuna noodle casserole, one made with regular canned tuna, and one made with cat food. She found the cat food version "CHUNKIER! And, uh.. CREAMIER!" ... until it was revealed what she ate.
* Saturday Night Live had a parody commercial depicting the Navy Experience as a tad more mundane than the real ads would lead you to believe.
* Saturday Night Live had a series of "Mr. Short-Term Memory" skits starring Tom Hanks.
* Saturday Night Live had a series of sketches called "Bear City" in which a meteor strikes an American city, driving the human population underground and allowing the bears to rise up and fill the roles formerly filled by humans. The sketches are notable in that the humor is driven entirely through action as the bears cannot talk.
* Saturday Night Live had a sketch where a bank just made change, nothing else. When asked how they managed to stay in business, the spokesman replied, "Volume".
* Saturday Night Live had a sketch wherein the ladies room was a Greek garden with a eunuch lyrist who sang softly to them while slave boys fed them fruit and wrapped them in silk.
* Saturday Night Live had a very pregnant Maya Rudolph being assured by producer Lorne Michaels that she was barely showing.
* Saturday Night Live had a "Weekend Update" segment where Chris Parnell began a rap song about having a crush on Demi Moore, which quickly morphed into a song about how, if he were bisexual, he'd have sex with Ashton Kutcher. Near the end he interrupted the song to say, "Let me reiterate, I am a heterosexual man, and I'm

extremely attracted to Demi Moore, as I have been for 20 years. I am in no way sexually attracted to Ashton Kutcher... BUT IF I WAS..."
* Saturday Night Live had Morrow's character in a commercial for a time-travel machine, so you could go back in time to say the thing you later thought to say.
* Saturday Night Live had one of her audience member's head explode from being too excited.
* Saturday Night Live had Santi-Wrap, protection against germs from the likes of John Belushi's homeless, alcoholic mall Santa.
* Saturday Night Live has been guilty of this at multiple points in its run.
* Saturday Night Live has Ben Affleck as a fellow Dumbass DJ — and old college rival. They battle it out with their impressions: TuSpock ("Live large and prosper, Biotch"), Sherlock Homo ("Elementary, my queer Watson"), Man in the Can, Man in the Box, Sanjay, Rajneesh, the Gay Three Stooges, and of course, Andrea with the weather..."And we're baaaack!"
* Saturday Night Live has frequently employed this trope during its long run.
* Saturday Night Live has lampooned virtually every group of people under the sun, so it's natural that a few would come to appreciate their teasing.
* Saturday Night Live heads an angry round-table discussion with Sinead O'Connor, Luther Campbell, Billy Idol, and Steve Lawrence and Edie Gorme. When a shouting match with Idol boils up into a fight, Frank yells "Steve — kick his ass!" Steve obediently steps up, and gets curb-stomped.
* Saturday Night Live, he lives with his parents, Democrats and retired film stars Ronald and Nancy Reagan. When he travels back to the '50s, he causes Ron Senior to switch to the Republican party and drop acting for politics and when he goes back to the future, he arrives back at "his" house, now occupied by another family whose government assistance was cut by President Reagan. The single mother isn't too happy with him.
* Saturday Night Live he told us he had a dream, to star in crap movies and then host the worst talk show in history...we knew he could do it."
* Saturday Night Live). He would order his patients to undergo bloodletting or some other medieval quackery, usually resulting in their disability or death.
* Saturday Night Live) hinged on rapid firing of these into a normal monologue.
* Saturday Night Live (his Superman costume can even be seen sticking out from under his clothes). Jimmy Olsen notes that at least he's going by "Clark Kent" now rather than his original alias, "Supe R. Man."
* Saturday Night Live hosted by Richard Pryor, Pryor plays a military officer being sent on a dangerous mission. He's being told what he'll be "taking" on the mission but misunderstands when the man briefing him says "Oh, and take that pill." Pryor swallows it and only then is told it's a suicide pill.
* Saturday Night Live) how to read. ("I would like to feed your fingertips to the wolverines.") In the middle of a sentence, Henry has a heart attack and drops dead. Belushi looks at his dead body and slumps over the same way.
* Saturday Night Live ("I can't believe how much prank juice came out of him when I pranked him in half!")
* Saturday Night Live. I'm going to see it again and again" with identical blank stares.
* Saturday Night Live imitation where they show sailors mopping decks and cleaning toilets ending with the slogan, "It's not just a job, it's $96.78 a week".
* Saturday Night Live in 1980. Each only has one scene without their sunglasses: Elwood has security ones when quitting his job, and Jake removed his in the scene where he was apologising to the Mystery Woman (Carrie Fisher).
* Saturday Night Live in an attempt to assert his authority, such as "I'm a division manager!" or "I drive a Dodge Stratus!"
* Saturday Night Live in a reversal of the usual heterosexual oriented trope, which shows off how ridiculous the real ads look to everyone who doesn't buy into them.
* Saturday Night Live" in a Scrabble game and try to pass them off as French words, since being French is their cover.
* Saturday Night Live: In a sketch called "Pranksters", Seth Meyers hosts a show where guests show video of themselves pulling pranks on other people, accompanied

by wacky sound effects. When one psycho guest shows himself actually murdering a guy in the parking lot, the FX continue, much to the host's annoyance.
* Saturday Night Live: In a sketch featuring Daniel Radcliffe, Harry Potter is a Hogwarts graduate who never accomplished anything as an adult. He spends most of his time hanging out at the school and talking to the students about his past accomplishments. He also plays Quidditch by himself and makes cheering noises.
* Saturday Night Live: In a "Wayne's World" segment run in the early days of the first Iraq war, Mike Myers referred to the word "Scud" (an Iraqi missile) as sounding like when "you see a girl from a distance and go 'Hello, babe alert!' then when she gets closer you say 'Omigod, she's a scud!"
* Saturday Night Live in crutches as "peg-leg". The sketch ends with them calling for a security escort through the terminal, fearing that the passengers they've been rude to will enact revenge.
* Saturday Night Live in his opening monologue. He then pulled out a can, declaring it to be the real thing, then chugging it.
* Saturday Night Live. In most cases, Alex Trebek (Will Ferrell) would correct Connery's mispronouncing by saying (for instance) "That's 'Therapists', not 'The Rapists'."
* Saturday Night Live, in terms of leagues, leading to Nemo being brought to the edge of madness before being dragged away by a giant squid.
* Saturday Night Live in the 1980s, Victoria Jackson frequently played this type.
* Saturday Night Live in the early days, as Chevy Chase would often announce on the Weekend Update segment "This just in: Generalissimo Francisco Franco is still dead."
* Saturday Night Live in the mid-'90s) brings it back into the public's good graces.
* Saturday Night Live: Inverted in a recurring sketch, where a film studio executive would berate his grandson for wanting to buy scripts that had obviously "been done before". The catch was that the scripts he ended up passing on were, in fact, highly original future blockbusters.
* Saturday Night Live: Invoked when Colin Jost was named "World's sexiest comedy writer."
* Saturday Night Live involved a talk show about dogs, hosted and run by intelligent dogs. The guest on the show was a dog who'd been living for years among humans, enduring bizarre abuse. When the host commanded the techs to "roll" a film clip, the guest dog rolled on the floor, to the astonishment of the host.
* Saturday Night Live in which he begins a talk show on which he'll be interviewing Richard Nixon by assuring the audience that his show is, of course, "completely uncensored, except for the little bits we'll cut out."
* Saturday Night Live in which the Church Lady is understandably skeptical of Jessica Hahn's self-serving justifications for how she's been behaving over the last year (specifically in 1987).
* Saturday Night Live is an exotic dancer who instantly triggers love in every man who sees him, regardless of their previous orientation, but has no effect on women.
* Saturday Night Live, is more popular than ever in the viral video/Internet comedy era, and has accrued a vast wealth of memorable characters and moments (both funny and serious).
* Saturday Night Live isn't the second wife, she's three months pregnant with the girl who is.
* Saturday Night Live is seen tying Belushi's shoelaces together. If you listen closely, you can hear Belushi say, "Aw, what the fuck, man?"
* Saturday Night Live. It plays out very much like the original at first (two 1980s teens named Ricky and Devin [played by Bill Hader and Andy Samberg] find Mr. Bernard lifeless at his desk, Ricky freaks out and goes to call the cops, but Devin tells him that they should pretend he's alive so they won't be the laughingstock of the beach, and Ricky agrees to go along with the plan). At first, it goes to Hell when everyone immediately realizes that Mr. Bernard is dead and Ricky and Devin are put on trial for fooling around with a dead body, but then they find Mr. Bernard's video will which stipulates that when he dies, he wants his assistants to carry him

around and fool people into thinking he's alive, and it ends with a party in the courtroom.
* Saturday Night Live: "Jane, you ignorant slut." "Dan, you pompous ass."
* Saturday Night Live, Jimmy Fallon believes that Tina Fey is about to tell the viewers that he has a small penis, and suckerpunches her in the face. She asks if his paranoia is proof that it's true, and he hits her again. She then blurts out "small penis" and gets hit yet again. When she glares at him, he giggles nervously and explains that "It's an instinct."
* Saturday Night Live. John Goodman is hosting, along with Tom Petty and the Heartbreakers. During his monologue, an audience member stops him to ask if this is a repeat. John reassured that it isn't-given that it was a live broadcast and all-but kept getting interrupted by members of the audience who insist that it's a repeat from a few years ago when John also hosted with Tom Petty as the musical guest. John even brings out Jimmy Fallon, a cast member at that time, who agreed with the audience that this show is, in fact, a repeat and that he remembers it because it was aired when he was in high school.
* Saturday Night Live Justin Timberlake as a rapping coffee cup competing for attention with a sidewalk Santa.
* Saturday Night Live like game. The character is a stereotypical black woman whose attacks consist entirely of her insulting her opponent or performing dance moves while repeating "Rihanna" or "Beyonce". She doesn't do well against her opponent. Unfortunately, the player (Keenan Thompson) is forced to use her because he chose her by accident.
* Saturday Night Live lists his top wishes, including $30 million a month deposited directly into his Swiss bank account.
* Saturday Night Live". More recently, one of the Digital Shorts had the characters from "TV Funhouse" segment "The Ambiguously Gay Duo" transformed into live-action versions of themselves.
* Saturday Night Live movie had the casting agency believe that the actor playing Superman should actually be able to use his powers without special effects. One of the people trying out for the role gets killed while trying to perform the bullet catch scene, and it ends with the final candidate being repeatedly shot at because he keeps missing when trying to do it.
* Saturday Night Live movie parody, where archvillain Christopher Walken has Bond captive in his lair, which is still under construction, so he can only describe the death trap he was going to subject him to, with conceptual drawings as an aid.
* Saturday Night Live movies — proved to be silver screen flops.
* Saturday Night Live: Nathan Thurm, whose defining traits were ultra-defensiveness, paranoia, and denial.
* Saturday Night Live now that chia seeds are being sold as a nutritional supplement that allegedly promotes hair growth.
* Saturday Night Live (of course) in a Ladies Man sketch in which Leon announces that he is in love and off the market. It turns out that his dream woman is an undercover cop... played by The Rock... who is, even in-universe, very and obviously male (much to Leon's obliviousness).
* Saturday Night Live, often relegated towards the end of the episode.
* Saturday Night Live (often when she played little girl characters, like Judy Miller).
* Saturday Night Live once did a commercial parody where a married couple argue over whether "New Shimmer" is a floor cleaner or a dessert topping. They end up struggling for the bottle and the husband calls his wife a cow. The pitchman arrives and settles the dispute. It's both.
* Saturday Night Live). One ad had two people standing around making small talk for 30 seconds, and then the name of a defense industry company appears.
* Saturday Night Live." One of them did something embarrassing on the show and the others took cellphone videos of it and posted it.
* Saturday Night Live. One twin played the contestant looking at herself in the mirror; the other played the mirror image, deliberately off-sync with the other. The "image" even hands the other a tissue when she starts crying!

* Saturday Night Live originally had more of a variety show-style format, with multiple musical guests appearing in some early episodes and stand-up comedy mixed in with the sketch comedy.
* Saturday Night Live," or "You're watching A&E, which means you're old or you fell asleep on the remote.") will have this.
* Saturday Night Live over the summer away from Hogwarts, which Hagrid notices, to his chagrin:
* Saturday Night Live parodied George Will (see Real Life below) and his baseball nerddom by having him host a baseball trivia game show where all the questions were floridly pretentious ("The precarious balance between infield and outfield suggests a perfect symmetry. For $50, identify the effect of that symmetry.") Celebrity contestants Tommy Lasorda and Mike Schmidt were completely baffled.
* Saturday Night Live: Parodied in the "Z shirt" sketch from the episode hosted by Kevin Hart. The sketch is a commercial for the "Z-shirt" (which is just a T-shirt with the letter "Z" on it), and Hart's character keeps asking what kind of shirt it is, using every letter of the alphabet in order ("Is that an A-shirt?" "Is it a B-shirt?" etc.).
* Saturday Night Live. Pat is also in an on-again/off-again relationship with another ambiguous character, Chris.
* Saturday Night Live place for young sketch and improv comedians and comedy writers to gain fame since 1975.
* Saturday Night Live played a mobster who kept telling his wife that he can't tell her what he does for a living. Not only does she clearly know, but she's advising him on what to wear not to be seen, which gun to use for his hit, and where to dump the body.
* Saturday Night Live plays a medieval character, Theodoric of York, first as a medieval barber-surgeon, then later a judge. In both sketches, he laments the state of current surgery/law and lays out a better, modern method... only to dismiss it with a loud "Naaah!"
* Saturday Night Live plays the trope for laughs. As in most Superman adaptations, Superman uses his cover identity as journalist Clark Kent to blend in with humans, but his Daily Planet co-workers immediately find him out because, among other reasons, he keeps haplessly writing his articles from a Superman-centric perspective, e.g. "A man in New York was shot to death yesterday because bullets do not bounce off of human bodies."
* Saturday Night Live portrayal of Chicago Cubs announcer Harry Carey made him appear this way, with Harry going off on completely unrelated tangents when delivering his reports on Weekend Update.
* Saturday Night Live portrayed by Fred Armisen, who is mixed-race (half-Asian father, Hispanic mother), but not remotely black or African. They recast the role to avoid further controversy once another black comedian joined the cast.
* Saturday Night Live possibly did the first seen version of this type of character in the 1970s.
* Saturday Night Live, possibly one of their "Limits of the Imagination" thriller spoofs, had a couple go to an "All-you-can-eat" restaurant and be later told "It's not all you CARE TO eat, it's all you CAN eat!" and they look and see the other patrons are being force-fed.
* Saturday Night Live) promoted his bakery's holiday foodstuff, "Schweddy Balls". You can even get them in a "Schweddy Ball Sack". Besides the innuendo, the humor of the sketch came from the fact that the hosts (who are portrayed as being very boring and deadpan) did not break character at all.
* Saturday Night Live Pumpkins, a character on a 100 Floors of Frights ride who said he was going to "scare the hell out of you", but who only confused the people on the ride because he was so random.
* Saturday Night Live receive a serenade from the little people who live under the desk. When the woman falls to the ground, the man declares that she has become seriously injured. He implores the reporters and viewers to help her, by chanting, "I believe in magic! I believe in love!" The little man then attempts to lead everyone in a series of gestures, which become progressively naughtier. Fey and

Poehler become so disgusted with his motions, that they push him off the desk.
* Saturday Night Live ridiculous. Not surprisingly, given the overwhelming evidence against him, Ferguson was convicted.
* Saturday Night Live's "Ambiguously Gay Duo" cartoon shorts. An alien queen plans to use her feminine wiles to distract Ace and Gary, but Dr. Bighead replies, "I, uh, don't think that'll work on those two." Which it didn't. They have very strong moral constitutions, obviously.
* Saturday Night Live's character's daughter becomes a "wicked step-mommy" to the eponymous dolls.
* Saturday Night Live's Coneheads are fond of American culture, and humanity in general, to the point of pretending that Earth has an incredibly powerful defense laser network and faking their own death so as to stay here instead of invading. Their daughter, on the other hand, was born and raised here, and she absolutely hates her parent's homeworld.
* Saturday Night Live's death in 1997 cancelled it for good. The remaining cast members eventually held a live reading of the screenplay in 2010 as a charity event (with Horatio Sanz reading for Farley's character).
* Saturday Night Live seems to love this trope. In a recurring sketch where a number of eccentric characters come up to speak during a wedding/funeral/etc., he's played a character who exists for no other reason than to manically scream "WHAAAAAAAAAAT?!" and drop the mic. More recently, his character Riblet, who appears on Weekend Update to antagonize Michael Che by trying to one-up him as a news anchor, will typically finish his appearance with one of these.
* Saturday Night Live) several useful English phrases, including "I would like to feed your fingertips to the wolverines."
* Saturday Night Live's Gettysburg Address in 1863 (calling it "silly"), comes on to pan other things.
* Saturday Night Live short film, Norm MacDonald plays a homeless man holding a "will work for food" sign. A distinguished looking gentleman picks him up and takes him to his home, where he has the homeless man do various secretarial/data entry work: rubber stamping, stapling, calculating, etc. At the end of the day the distinguished man gives the homeless man a hot dog on a bun and returns him to where he picked him up. The homeless man then gives the hot dog to his Heterosexual Life Partner-in-homelessness, who is worse off than he is.
* Saturday Night Live showcased his singing talents with a song saying that he wasn't there to showcase his singing talents.
* Saturday Night Live's impersonation of Sean Spicer opens with one of these:
* Saturday Night Live. Since that time Grohl has collaborated with many musicians from Petty's generation but at the time it must have been an unexpected lineup.
* Saturday Night Live) singing an 80's techno song about his "Space Pants". Eventually, the boss tells them they can wait until the song's over as it's too catchy.
* Saturday Night Live sketch about a TV show called "How'd You Do That?" featuring people who accidentally did something embarrassing, and visible, to themselves. One guest has a tan, with the pale part being a business sign, backwards. He had fallen asleep in a store window with a sign painted on it.
* Saturday Night Live sketch, a character mentions, apropos of nothing, his firm belief in the Counter-Earth. The character was Father Guido Sarducci, and he described the planet as nearly entirely Earth-like down to the civilizations; amongst the few differences described was the practice of eating corn on the cob vertically, instead of horizontally.
* Saturday Night Live" sketch: a professor suggests dropping an atomic bomb on the town square, only to be told, "Professor, that's your solution for everything."
* Saturday Night Live sketches that basically revolves around this trope. It features four men in a bar (or, on occasion, a car) who tell gradually more disturbing tales (all of them treating the stories as perfectly normal events) about where they were when they heard a popular song (such as "Danny's Song," "Garden Party," "To Be With You," and "Breakfast At Tiffany's"), culminating in them committing some unsettling atrocity in whatever setting they occupy.

* Saturday Night Live sketch featuring the androgynous Pat had a mixed-gender group try to determine the character's gender with a game of strip poker. Pat loses the first round and a belt. Cut to the end of the game, and Pat's fully dressed while everyone else is practically naked.
* Saturday Night Live sketch from 1991 (hosted by Kirstie Alley) featured female aliens who looked like humans, only their eyes were on their breasts.
* Saturday Night Live sketch from Season 26, Episode 14. A man is in a car accident, and when he wakes up, asks where he is. He's told: "You're tied to a bed in a shack. We're weird hillbilly cannibals and we're gonna stick things in your butt." After he freaks out, he's told he's actually in a hospital; the hillbilly cannibal thing is "an old hospital joke".
* Saturday Night Live sketch from the 80s involves a TV interview with two members of the American Communist party, who happen to have been friends since childhood. Every time the two of them say the same thing in unison, they immediately shout, "Jinx, buy me a Coke!" and then launch into an elaborate playground song-and-dance routine.
* Saturday Night Live sketch from the early 1990s, "Those Proud Pattersons", where everybody was an overdramatic actor.
* Saturday Night Live sketch has Chance the Rapper and Cecily Strong experiencing true love and begin to fly.
* Saturday Night Live sketch has the character and his friends trapped in a control room somewhere with a bomb about to go off. MacGruber proceeds to ask his friends for a bunch of strange items that just happen to be lying around... only for it to be revealed he was making a drink. There was also the Pepsi Commercials where he was more concerned about endorsing Pepsi than the bomb about to go off.
* Saturday Night Live sketch hilariously parodied this concept, with a couple attending marriage counseling only to find that the Eastern European wife has no interest in anything but getting the husband to sign papers proving she's legally married to him.
* Saturday Night Live sketch involved an advertising jingle for the "Nuterrific" bar. The jingle consisted largely of this kind of descriptor, ending with "It's NUT very good!"
* Saturday Night Live sketch involves a man in a restaurant trying to propose to his girlfriend, only for their server to come by the table constantly and interrupt with unnecessary "Anything you need"-type questions. He finally shouts out his proposal over the waitress's talking; his girlfriend accepts, and at last they're ready to order. However, when he tries to get the server's attention, she snaps at him: "I've only got two hands, jeez!"
* Saturday Night Live sketch in which a fisherman catches a fish that grants wishes. Unsatisfied with the first several wishes that backfire, he hires a lawyer to make sure he gets exactly what he wants by drawing up a wish contract for the fish.
* Saturday Night Live sketch. Kevin Nealon plays an advertising executive who's been asked to look into Subliminal Advertising. After he does his research, he reports on his findings while quickly slipping in "raise" at certain points. When he finishes, his boss is suddenly compelled to give him a raise.
* Saturday Night Live sketch "Lazy Sunday", Adam Samberg and Chris Parnell express their love for the Chronic— What? —cles of Narnia.
* Saturday Night Live" sketch parodies car commercials that suggest surprising your loved ones with a car for the holidays. A husband gifts his wife a Lexus, only making her furious that he bought a car without asking her, revealing that he doesn't know the complexities of buying a car beyond what they say in the commercial.
* Saturday Night Live sketch, "Pothead Theater", had the writers going to a marijuana festival and interviewing the attendees for what kind of cartoons they wanted to see. All of the suggestions were this trope (nature exploiting people, a dog walking a person, ketchup getting people out of a bottle) followed by the cartoon in question and the attendee laughing like they're stoned. The last one suggests television watching people...which looks exactly like people watching

television. The attendee doesn't laugh, but just acts confused.
* Saturday Night Live sketch, Sarah Palin was scheduled to be a guest star along with lookalike Tina Fey. Gov. Palin was talking to the Producer when Alec Baldwin came in. He thought that Palin was Tina and started complaining to the producer about how that Tina would get hurt with Sarah Palin. After a few minutes of saying all the bad stuff about Gov. Palin, the Producer finally pointed out that they are talking in front of Sarah Palin and not Tina. Baldwin promptly started kissing up to Gov. Palin.
* Saturday Night Live sketch, starring the nerdy "Matt Shatt" and his extremely attractive wife.
* Saturday Night Live sketch was an advertisement for the greatest hits of dysfunctional family holiday dinners (for those who can't make it home this year). Each one ended with the father (Will Ferrell) yelling "*BLEEP* this, I'm leaving!" and flipping his dinner plate into the air. What really made this funny was that Ferrell's plate flips just got harder every time until the last one where he practically launches it across the table.
* Saturday Night Live sketch, where a couple tries to hook up their wheelchair-bound friend with a woman they think will be perfect for him, who just so happens to also be in a wheelchair. Naturally this leads to a lot of awkwardness, but the two actually end up getting along wonderfully (once they start discussing their wheelchairs).
* Saturday Night Live sketch where host Elliot Gould is a guest on a morning talk show.
* Saturday Night Live sketch where the elegant packaging illustrations and elaborate descriptions are intercut with actual cat food cans opened onto plates complete with glopping sounds as the meatwad comes out of the can.
* Saturday Night Live sketch where the Wishmakers Foundation grants a child's desire to be a sports commentator at a professional game (football the first game, basketball the 2nd). The only football term he knows is "That'll move the chains!" and basketball, "Nothing but the bottom of the net!" This eventually gets taken to a hilarious extreme when the other commentators lets him take over to make up for complaining about the supposed disease (the kid said he had O.C.D. when asked, but this really stood for "Overwhelming Corpse Disease", in the first sketch it was A.D.D., which actually stood for "Attentive Death Disorder") and eventually begins shouting various sports terms and maneuvers all in the same sentence ending with "NOTHING BUT THE BOTTOM OF THE NEEEEEEEEEEEEEEEET!" and then dies onscreen.
* Saturday Night Live skit called "The Blame Game'', which featured a black racist versus a white racist, the black racist blamed whites/racism for everything, to the point of blasting the white game show host for addressing him by his "slave name".
* Saturday Night Live skit (from season 20) pushed this gag to the breaking point, having every single character spray puke as the vomit chain reaction spread across the entire country after a cop pukes at the sight of a dead body.
* Saturday Night Live skit had a commercial actor being subjected to relentless verbal abuse regarding this while filming an ad for an erectile dysfunction medication. Adding to his humiliation, his girlfriend is brought to the set to complain about it too. The poor guy finally breaks down in tears after the fed-up woman leaves, at which point, it's revealed that the commercial he's filming is for. . . Tootsie Rolls?
* Saturday Night Live skit "Happy Smile Patrol." When a white supremacist gang takes a church group hostage, the news reports states that, without making any demands, they've "begun sending fingers and ears to authorities."
* Saturday Night Live skit introduces the south of the border equivalent of da chief, "El Jefe." EL JEFE!!!
* Saturday Night Live skit involved a doctor performing this test on a male patient, asking him to cough over and over again. Another doctor soon enters the picture and both continue to perform this one part of the exam over and over. Then, a third doctor enters not recognizing the other two doctors already in the room, revealing the first two doctors to be impostors who just like to sneak into examination rooms and feel people's balls.

* Saturday Night Live skit involving a couple of water delivery men who have been hoarding their product ends with one of them opening a closet door and a cascade of empty water jugs spilling out.
* Saturday Night Live skit involving the Spartan Cheerleaders, the eponymous cheerleaders decide to pep up a chess match with their routine. One member of the chess club takes umbrage at this:
* Saturday Night Live skit "The Denise Show", in which a teenage boy obsesses over his ex-girlfriend and contrives ways to get her back. Despite the comedy setting, it's made clear that his behavior is wrong—his father yells at him about it, Denise herself repeatedly tells him to leave her alone, and another girlfriend dumps him because he can't get over her. By the final skit, he mentions that a restraining order has been filed against him.
* Saturday Night Live skit titled "Attack Of The Masturbating Zombies".
* Saturday Night Live skit titled "Attack Of The Masturbating Zombies", a parody of Grade-B 1950s horror movies.
* Saturday Night Live skit, where an angel (Dana Carvey) happily rattles off answers to the quickfire questions of a just-deceased fellow (guest host John Larroquette).
* Saturday Night Live skit, with Alex Karras as guest host, where Billy Crystal plays a guy at a soda company who sweats excessively at a board meeting.
* Saturday Night Live, so people sometimes ask him to write down what he's saying, but his writing is no more comprehensible than his speech.
* Saturday Night Live's parody of fear mongering by local news stations:
* Saturday Night Live's parody of Hillary Rodham Clinton's 3 a.m. ad: "I'm Hillary Clinton and I approve this unfair and deceptive message."
* Saturday Night Live's parody of "The Navy: It's Not Just A Job, It's An Adventure" ad campaign features this.
* Saturday Night Live spoof of Broadview security, this is one of the major dangers women living alone in a five bedroom house face, along with rabbis, grandfathers, k.d. lang, and the guy from the Broadview commercials.
* Saturday Night Live's "Really!?!" to Greece on her first guest appearance in 2008 was more disappointed than nasty.
* Saturday Night Live's Samurai behind the counter. When Henry tries to ask for something, the samurai shouts Japanese at him and points (with his katana) at the sign saying "Please take a number." After the samurai calls out three or four Japanese "numbers", Henry calls out that he's got that one and now the samurai waits on him.
* Saturday Night Live"'s State of the Union address, made a comment that Bush was the Commissioner of Baseball, and had vowed to hunt down steroid users "wherever they may hide".
* Saturday Night Live straight. And that the talent was genetic, coming from his father Papaya... played by Danny DeVito.
* Saturday Night Live's Weekend Update, made this comment on the O.J. Simpson trial when attorney Johnnie Cochran put on the ski mask Simpson allegedly wore:
* Saturday Night Live than starships was woefully behind that of 1990s Earth. The police dealing with the situation suspect their ship was stolen.
* Saturday Night Live that was supposed to be sung at birthday parties in lieu of "Happy Birthday To You". However, "Happy Birthday To You" itself was used right in the beginning of the sketch.
* Saturday Night Live The 2015-2016 Saturday Night Live season has a sketch where Kyle Mooney declares it his life's mission to displace Kanye West as the greatest rapper of all time and his plans to beat him in a rap battle. The punchline is that at the end of the sketch, Kanye is entirely unaware Kyle is challenging him to a battle.
* Saturday Night Live. The camera then cuts back to the hosts, who are now in different clothes and with different hairstyles. The bit continues along in this vein, and the reality warping gets worse (read: hilarious) each time.
* Saturday Night Live the competition." By the time Weekend Update begins its coverage, 115 world records had already been "shattered".

* Saturday Night Live. The demand was such that the chain began producing them in large quantities and selling them nationwide.
* Saturday Night Live. The final verse of the song has the singer herself note that she discovered her own enjoyment of "watching people's private lives".
* Saturday Night Live ("The Golden Note") sings a high C of such pitch and duration that she suffers from "Larynx Lock", and can never stop singing the note.
* Saturday Night Live: The Grim Reaper under the pseudonym Steve Bannon is shown to be the true acting President of the United States.
* Saturday Night Live, the host was Garth Brooks, and the musical guest was...Chris Gaines.
* Saturday Night Live, the impoverished Woodrow tries to impress a woman by taking a business call, but he promptly confesses it was fake. She doesn't have the heart to tell him how obviously his "phone" was a block of wood.
* Saturday Night Live. The last anyone's heard of Gail Matthius was during the nineties when she did voicework in cartoons, often as a Valley Girl.
* Saturday Night Live, the man who has a crush on the gender-ambiguous Pat follows him/her/it around waiting for Pat to use a bathroom so he can find out what gender Pat is.
* Saturday Night Live them), who asks for his pen back afterwards. Bob refuses, then reveals that the interior of his jacket is lined with pens stolen from the many kids who sought his autograph.
* Saturday Night Live" Then, after a brief aside to staying ahead of the law:
* Saturday Night Live, the ratings were so low that the show was almost cancelled. This is often blamed on the cast concentrating on characters from their stand-up instead of doing ensemble work.
* Saturday Night Live, there was a promo for a fictitious cop show featuring partnered females, one of whom was heavy-set. One scene in the promo has the smaller woman flashing a badge, causing her billfold to audibly unfold downward. A scene shortly after that has the larger woman also displaying a badge, but instead it's a string-of-franks that "unfolds".
* Saturday Night Live, there was a sketch in which James Mason (played by Jon Hamm) insults a little boy's sailor Halloween costume. The little boy whines, "You're mean! I want my mommy!" Mason replies with a suggestive, "That makes two of us!"
* Saturday Night Live - the "Unfrozen Caveman Lawyer" character plays to the jury's sympathies by claiming this or that modern phenomenon 'frightens and confuses' him.
* Saturday Night Live things about the past, such as having no water filters, no air conditioning, no improved technology, and even no Christmas Caroling.
* Saturday Night Live. Though the last one, it turns out, was just misread and was actually just "meddling."
* Saturday Night Live to make a cartoon supporting the war in Iraq. SpongeBob wasn't interested, and things turned ugly.
* Saturday Night Live: Tom Hanks says this about the show during his monologue from 1996, after SNL improved following the disastrous 1994-95 season.
* Saturday Night Live took it further, with a pitchman who wandered through half a dozen commercial settings, repeatedly implying what the ad was about but switching before mentioning a product. At the end, he goes home without mentioning any product at all. Cue announcer: "This message brought to you by The Ad Council: Wasting your time in various ways for no good reason."
* Saturday Night Live to spoof Putin's staged publicity photos hunting and riding horses topless.
* Saturday Night Live trying to deceive her and take her life, he'd be more subtle about it and come disguised as a beloved dead relative. Moments later, her late grandmother appears and kills her.
* Saturday Night Live, try this to divide schoolwork. The plan falls through, though, due to Wiig's character looking fatter, acting dumber, and behaving more crudely than Adams's.
* Saturday Night Live) turns to bolt. The other priest admonishes him, saying "Where is your faith, brother?" and he answers "It's in the car; I'm gonna go get it."

* Saturday Night Live type programme, had 'blossomed' over the summer break, to the dismay of the adults working on the show. Worth watching for Ray Liotta as a foul-mouthed, chain-smoking actor in a dinosaur costume.
* Saturday Night Live unearthly. (Hamburger, for example, is "fried ground bovine flesh".)
* Saturday Night Live, until NBC Entertainment president Kevin Reilly suggested she base the show on her own experience.
* Saturday Night Live uses establishing shots for just about any sketch that doesn't have its own theme song.
* Saturday Night Live was banned from airing due to a woman showing too much cleavage, yet the lewd commercials with bears showing off their asses still manage to air."
* Saturday Night Live was based on Brasky." This may not be intentional, since Johnny Appleseed is so mythologized that it'd be easy even in real life to assume he's just a fictional folk hero.
* Saturday Night Live was guilty of this in a 2013 sketch featuring host Melissa McCarthy as Sheila Kelly, the aggressively abusive women's basketball coach at fictional NCAA Division III school Middle Delaware State (parodying former Rutgers men's coach Mike Rice). In an interview clip, the school's athletic director tries to defend her behavior by pointing out that the players are receiving a free education via athletic scholarships. Division III institutions are prohibited from giving out athletic scholarships (in fact, that's the main distinction between Division III and the other two divisions.)
* Saturday Night Live was her belittling the lowbrow tastes of Reggie (Kenan Thompson), her house band leader.
* Saturday Night Live was in a sketch parody ad for Totino's Pizza Rolls, which featured her seducing a housewife who was making pizza rolls for her husband and his friends while watching a football game. One of the scenes of their seduction montage featured the housewife sketching Stewart's character eating a pizza roll while naked.
* Saturday Night Live was known for this trope, especially during the late '80s; when the writers couldn't think of a way to end a sketch, they'd have the characters shout, "Let's Lambada!" Frequently happened on Wayne's World and Sprockets.
* Saturday Night Live, was said to have absolutely no understanding of comedy. According to one account, she would watch a Marx Brothers film and root for Margaret Dumont.
* Saturday Night Live was shoved into the background, not experiencing his break-out status until the following year.
* Saturday Night Live: "We don't care. We don't have to care. We're the phone company."
* Saturday Night Live Weekend Update skit ended up unintentionally — and hilariously — lampshading this. Jimmy Fallon was incensed at Tina Fey's snarky remarks and as such, repeatedly struck her in the face. Unfortunately, the sound effect was absent, making it seem as though he were really hitting her, leaving the audience in stunned silence. Once the sound effect was fixed and the noise of the punch landing was put in, the audience laughed heartily, prompting Tina to continue snarking, "You see how much funnier it is with the sound effect?"
* Saturday Night Live we have the Coneheads, aliens with, what else? Cone-shaped heads! And they have some sort of game or something where they put a special ring on said cones. This game has something to do with sex.
* Saturday Night Live ("Welcome to All Things Scottish - if it's not Scottish, it's craaaapp!!").
* Saturday Night Live were the faux bodybuilders, Hans and Franz, who did this, albeit with the help of a mechanical prosthesis in their costumes.
* Saturday Night Live wheeled out a Seth Meyers skit based solely on two guys with similar names.
* Saturday Night Live). When they finally start rapping, it turns into a nightmare with everyone singing their own song. Big Chris finally puts a stop to it, just

before a final MC jumps out (Dat Snatch).
* Saturday Night Live when you can buy this Juice Newton album instead?"
* Saturday Night Live where a ball is attended by nobility with things named after them (Earl of Sandwich, Lord Worchestershire, Lord Salisbury) ...and Lord Douchebag.
* Saturday Night Live), where a spilled soda triggers a nuclear meltdown at a power station.
* Saturday Night Live, where every declaration, from the dramatic to the mundane, was met with the sarcastic slow clap and a furious rebuke.
* Saturday Night Live where every single student was really an undercover narcotics agent.
* Saturday Night Live where Jesus seeks revenge on the Romans who killed him.
* Saturday Night Live!"), which ends in the man bleeding from the forehead and passing out.
* Saturday Night Live which featured Kate McKinnon as German chancellor Angela Merkel having this to say about a certain segment that made up Donald Trump's supporters/voters:
* Saturday Night Live) which features nothing but cars exploding, driving off of cliffs, flipping over, or some combination thereof in slow motion.
* Saturday Night Live, which has a group of prison inmates trying to "scare straight" a trio of teens, inevitably by retelling the plot of some film or the like. Usually, the horrible consequences the inmates use are based on story elements that aren't that horrible, actually.
* Saturday Night Live, which shows the host preparing in his/her dressing room, cast members interacting with each other or Lorne Michaels, etc.
* Saturday Night Live", which spoofs Deschanel (played by Abby Elliot)'s spacey brand of "quirky". She's playing a ukulele in the theme song.
* Saturday Night Live). While Doumanian did have a knack for getting good musical guests and treating the talent right, she was out of her depth for running a comedy show.
* Saturday Night Live, who claimed to be an expert on whatever animal was being brought to his show, then once the zookeeper brought it in he'd ask "what's that?"
* Saturday Night Live who have caused so much trouble, whether backstage or on the show itself, that they can never appear on the show again:
* Saturday Night Live who immediately invokes everyone around him to dance.
* Saturday Night Live), who inexplicably has a storyline, pops up, which confuses the rookie FBI agents going through the gallery.
* Saturday Night Live who seem completely incapable of enjoying any sketch that has a premise that's even remotely similar to another sketch from a previous season. Since the show has been on for more than 30 years, this means there aren't very many sketches they can enjoy.
* Saturday Night Live) who speak only in references to their respective works.
* Saturday Night Live, Will Ferrell as James Lipton feels that Charles Nelson Reilly's acting is so incredible that he must invent a word to describe it. The word: "Scrumtrillescent."
* Saturday Night Live, with a TV ad offering courses on becoming said operators. It, of course, ended with "operators are standing by".
* Saturday Night Live, with footage of her "former houses" (which promptly explode) and a Man on Fire, whom she calls "her ex-boyfriend".
* Saturday Night Live with Howard Cosell) went on to join the SNL cast.
* Saturday Night Live, with the entire skit being a bunch of worried bee dads buzzing around in the waiting room awaiting the births of their children.
* Saturday Night Live with thin premises. That's true in some cases, but not all.
* Saturday Night Live witnesses throw up - it was implied at the end of the sketch that all of New York City was vomiting. Notable cock-up: Chris Elliot's vomit tube didn't deploy right away, causing him to ad-lib a line about dry heaving. It then deployed while he was distracted.
* Saturday Night Live, wooden acting, and the leads being played by straight actresses, the review from "Lesbians Monthly" just reads, "Sure. I mean, I'm gonna

see it."
* Saturday Night Live would compare painful experiences incurred while jamming unthinkable objects into body orifices.
* Saturday Night Live would frequently do this when discussing vomiting, including in the movie.
* Saturday Night Live would sometimes run a parody of these films, like the Felliniesque 'La Dolce Gilda'.
* Saturday Night Live: Yvonne Hudson appeared as a background extra in a few episodes in 1978 before becoming the show's first black, female cast member in the infamous 1980 season. When all of the 1980 cast members were fired except for Eddie Murphy and Joe Piscopo, she returned to appearing as a background extra until 1984. SNL is her only acting credit, and no one seems to know what happened to her.
* Saturday Night Slam Masters continuity, this is not confirmed, though there is a profile for Blade on the Capcom Fighters Network website that describes him as a member of the North American branch of Shadaloo.
* Saturday Night Slammasters has El Stinger/Stingray and Astro/Scorpio, whose designs are a nod/ripoff to real wrestlers Lizmark and Tinieblas respectively.
* Saturday Night Slam Masters has the artwork for El Stingray and Scorpion switched on the manual.
* Saturday Night's Main Event celebrating the holiday. One of the children in the segment was a young Stephanie McMahon.
* Saturday Nights Main Event, in which wrestler Playboy Buddy Rose supposedly lost weight with the product and got down to "a slim, trim 217 pounds" (note: Rose's gimmick was he was fat, but insisted he only weighted 217 pounds). His before and after shots are the same.
* Saturday Night's Main Event (the one who defeated Savage for the title at WrestleMania III) and Hercules Hernandez, helping Steamboat win and then attacking him after the match.
* Saturday Supercade cartoon, "Mississippi Madness", has someone named Colonel Culpepper as the main antagonist, who plans to steal a jewel.
* Saturday Supercade: In the Donkey Kong Jr. cartoon "Sheep Rustle Hustle", Junior's partner Bones has sneaked into the rustler's truck disguised as a sheep. They hear him come in and investigate; they suspect nothing until a sheep tickles Bones' nose causing him to sneeze and blow his disguise off.
* Saturday Superstar Movie: In "Lost in Space", while the shuttle Jupiter II is on route from Earth to Saturn, it runs into a cluster of "meteorites" (asteroids) so close together that they threaten the ship.
* Saturday The Fourteenth, by monstrous forces competing over a missing book. Eventually, when the numerous resident monsters are shown looting the kitchen by night, one of them is dressed in an apron, rubber gloves, and a vintage 50s-housewife headscarf, and keeps unintelligibly scolding the others for the mess they're making.
* Saturday the Fourteenth, series. That had already been done, in 1981, with the tagline, "Just when you thought it safe to get up in the morning."
* Saturn 3, as part of the airlock system. However, the researchers undergo this process with their space suits on, presumably because the UV levels would fry them to a crisp or cause more cancer than a lab rat. A regular wet shower follows toward the interior of the facility.
* Saturn 3 features an enormous spaceship, meant to visit outposts on various moons and planets in the solar system at sub-light speeds.
* Saturn 3 one of the characters leaves a space station also featuring people walking on the floor and ceiling.
* Saturn 3 see a shuttlecraft / supply ship once every six months. When obsessive psychopath Benson joins them and builds a mind-linked super-robot, the robot downloads Benson's psychoses and begins lusting after nubile Alex. Retreat becomes impossible when the robot destroys the only launch capable craft on their moon.
* Saturn 3 starring Kirk Douglas, Kirk and his girlfriend are alone on a space station that is being taken over by a robot. There's one sequence where they have to run through a corridor full of closing doors that close in sequence, as the

trope dictates; however, they don't quite make it and the last door closes in front of them.
* Saturn 3. Three brains were stacked in a tube full of bubbling water.
* Saturn, a badass martial artist who would beat up people for not playing the Saturn. He eventually got his own video game, which was the last first-party game released for the Saturn.
* Saturn Apartments features a power plant. The safety there leaves a lot to be desired. The boss at the plant knows. He does not, however, give a damn.
* Saturn Apartments, works with his dad's old workmates. He's always eager to hear anything they have to say about dear departed dad.
* Saturn, a recluse who would really just rather not interact with people in general
* Saturn City called Sybil, and Saturnian citizens are pretty nice if a bit hedonistic. Despite being the most advanced and powerful human civilization in history, it is also completely stagnate culturally and technologically.
* Saturn Girl and Lightning Lad also spent many years pursuing and dodging each other before getting married.
* Saturn Girl and Superman switch powers, causing Saturn Girl to become muscular as she gains Superman's strength while he gains her telepathy.
* Saturn Girl and the other natives of Saturn's moon, Titan have telepathy. It varies in different continuities whether the various aliens in the
* Saturn L and its successor Aura are based off the Opel Vectra B and C (as the Saturn brand is essentially Opel for the North American market), however, they were released five years after their European cousins.
* Saturn's Children appearance. Most other robots have a more practical appearance for living and working in outer space or other planets.
* Saturn's Children, Mars has one giant space elevator called Bifrost.
* Saturn's Children—robots think of organic life as "pink goo," reproducing without limit.
* Saturn's Children no less, in a universe where humans no longer exist.
* Saturn's Children . Not something you expect from adventures of sex bot after human extinction, but it is written with physics in mind. There is no FTL, AI is a mirrored NI, and robot society is a natural evolution of our own, space travel is slow etc etc.
* Saturn's largest moon Titan, having a rich array of geological (Titanological?) features recently discovered, has a few of these:
* Saturn's moon Iapetus. Also, Iapetus has some fantastically gorgeous mountains, plus half the moon is bright white and half is almost pitch-black; one imagines that Iapetus would be a great place for tourism.
* Saturns Race takes place on an island grown from accreted sea chemicals ('seament').
* Saturn's Race, the world discovered that a vaccine distributed throughout the third world nations twenty years prior had the deliberate side-effect of causing sterility in the children born to the inoculated.
* "Saturn, the Bringer of Old Age" from Gustav Holst's "The Planets" begins with the ominous tolling of bell-like harp harmonics. The same dissonant harmonies are accompanied by actual bells at the movement's clangorous climax. The music then becomes much more peaceful and harmonious, and the bells make a very gentle return.
* Saturn Valley? Lucky for the player that there's an audio clue for the one that actually says something important.
* Saturn V rocket, with the Apollo capsule and lunar lander were awesome.
* satyr and mutated himself into a monster, and is now resentful and jealous of everyone who is still human.
* Satyrday centers on the attempts of the protagonists — an orphaned boy, the satyr who raised him, a fox-spirit, and a sympathetic raven — to combat a malevolent owl and his plot to kidnap the Moon (who is a character in her own right). The owl is tyrannical and very cruel, a prime example of this trope.
* Satyricon above are examples of this as applied to the field of linguistics. Language was always at its best when your grandparents were speaking it. You can

trace a line of bitching critics from decade to decade to the fifteenth century in English alone.
* Satyri. Wings are also common, especially with Satyri who have completely "went native" and turned into outright Succubi.
* Satyrs are human with some extra traits from the waist up and a pony, purrsian or ruminant from the waist down.
* Satyxis Raiders of Cryx and Bloodrunner master tormentors of the Skorne in the
* sauce a normal cheese sauce uses, it uses a starch-like gum called "alginate". Cheez Whiz is basically the same thing with the cream swapped out for vegetable oil, and flavors like mustard seed and Worcestershire sauce added. Neither is very good for you, mainly because of the salt and fat.
* Saudi Arabia double subverts this. The kingdom's laws are based on the Sunni Wahhabi Sharia, but the kingdom is ruled by a king, with Wahhabi clerics forming the bulk of the judiciary. In simple terms, it's a theocratic absolute monarchy.
* Saudi Arabia has an anti-witchcraft unit that hunts down any person suspected of witchcraft or sorcery of any sort. The punishment is usually
* Saudi Arabia locked them inside their burning schoolhouse and barred rescue workers from doing their jobs as they weren't covered. This, by the way, is against the Holy Quran. There's a little something called the Law of Necessity (Quran 2:173) which provides for life-or-death situation. For example, you may eat pork if the other choice is starving to death; by Allah's command, those girls should have been rescued even if they were naked in the shower.
* Saudi Arabia made international news with the detaining of several members of the royal family, businessmen, government officials, clerics and political activists by the Crown Prince Mohammed bin Salman. The official motive for the crackdowns were to fight corruption and terrorism funding, though outside observers had theorized that it was a power grab to seize their fortune and to silence the Saudi leadership's critics. This only became stronger after the international scandal that was the death of Saudi journalist and dissident Jamal Khashoggi in October 2018, who was assassinated in the Saudi embassy on Turkey with the Crown Prince being accused of ordering his death. Though he denied ordering Khashoggi's death, the international community placed unprecedented scrutiny on the prince to disclose the facts.
* Saudi Arabians vs Yemenis, particularly in the recent Yemen conflict often called Saudi Arabia's Vietnam, with the rich and sumptuous Saudi monarchy versus the hardened Houti Yemeni guerrilla. This may also apply to the Sunni vs Shia rivalry in Islam since the Arab Caliphates times with the Sunnis holding imperial powers and the Shias as the working class guerrilla forces opposing it. Shias often condemned the Sunni Caliph's excesses and luxuries whilst they themselves deprived of, often living in the mountain areas and deserts. This rivalry can still be seen in places with large Sunni/Shia populations like Irak and Bahrain, and to some degree to the two main Islamic rival powers Saudi Arabia and Iran with, again, oil-enriched monarchic Saudi Arabia as the Elves and hardboiled revolutionary republican Iran as the Dwarves.
* Saudi Arabia with strict alcohol bans (please note, though, that there are no longer any American bases in Saudi).
* Sauerbraten. It's a free FPS game with in-game ONLINE CO-OP LEVEL EDITING.
* Sauerkraut, and the juice from it, is sometimes used as a hangover cure, as it has decent amounts of Vitamin C and some B-vitamins, and is good for the digestive tract thanks to the fermenting bacteria. It can be made a bit more palatable by mixing it with tomato juice, or just diluting it with water (which, as discussed earlier, also helps the hangover pass).
* Saul and Ishbosheth were both beheaded after they were killed (2 Samuel).
* Saul Bass depicted a stylized Coca-Cola bottle with an American flag sticking out of it. The Coca-Cola Company vetoed this.
* Saul Buchbinder, the producer of Gabriela and Brandon's show. When Gabriela wakes up from her roofie-induced sleep, she has no problem convincing Saul that Brandon had drugged her to steal her story.
* Saul Goodman definitely treats the IRS like this with this gem of a quote.

* Saul, later referred to as Paul, as described in the page quote. He used to be the most ardent persecutor of the early church who goes on a crusade to capture and kill as many Christians as he can. After an encounter with Jesus, Saul does
* Saul of the Molemen, Saul skins a moleman and uses the skin as a disguise to infiltrate the moleman village. He spends the day shouting, "Grunt grunt! I'm a moleman, just like you!". No one catches on, but Saul gets beaten up anyway because the moleman whose skin he wore owed money to others.
* Saul or "Paul." So basically, the author of Acts called him "Saul" so long as that's what his main associates (the Pharisees) called him; he got referred to as "Paul" once he began moving mainly in Gentile circles.
* "Saul, Saul, why do you persecute Me?"). He converted within the week to Christianity and found his sight restored, and "the road to Damascus" would become a popular metaphor for the Heel Realization.
* Saul tests Seigi's knowledge of gemstones with Richard's acrostic ring to ensure he cares enough to pay attention to Richard's lectures as see his potential as a jeweler apprentice
* Saul Tigh It's all but implied that the only reason it worked at all is because the father wasn't an ordinary Cylon to begin with.
* Saul Tigh qualifies for this trope in that he doesn't treat Cylons any better upon finding this out.
* Säkerhetspolisen (Säpo) — "Security Police", Sweden's internal intelligence agency.
* Sauna features a rare blonde example of the trope, though the black filth she oozes obscures this detail much of the time.
* Sauna that feels far more sentient and malevolent than an immobile building rightfully should.
* Sauna. Their dark secret is the eponymous sauna, and they would be really glad if no-one ever came in or paid attention to it. They're not bad people in any sense, more like reluctant guardians of an evil secret the world is better not knowing.
* Saunders-Roe SR.A/1 but both nations moved away from seaplane fighters once carrier-borne fighter jets became practical.
* Sauramud Advice Column for Young Wizardlings which he got as a familiar. Sauramud decisively states:
* Saurials are described as having a language that is outside the range of human hearing, so either subsonic or ultrasonic, and also having a component based on chemical scent emissions.
* Saurials do something like this via social symbiosis of several different species, naturally with different abilities. It's not a strictly binding limitation, but small fragile flier both naturally makes a great scout and courier, and is likely to prefer such an activity over any manual labour.
* Saurian ensued, however, which resulted in the devs having to explain this was just a prank and that "Montanaspinus" was not a real dinosaur.
* Saurian indie game set in western North America at the end of the Cretaceous period, where players live out the full life cycle of one of several dinosaur species (all of which look and behave in a realistic and scientifically accurate manner). Gameplay largely revolves around the challenges of survival and reproduction in a complex virtual ecosystem, with precise game mechanics and player stats, abilities, and needs varying from species to species.
* Saurolophus who has been shown to be capable of opening a large wooden crate barehanded and is considered an authority on medicinal herbs.
* Sauron also managed to convince Ar-Pharazôn and the Númenóreans to worship his master Morgoth/Melkor with
* Sauron also tortured Thráin (Thorin's father) while he had him prisoner in the
* Sauron as well, though for slightly different reasons. Several thousand years of being thwarted and forced to run away from fights — and on more than one occasion, the physical death of his body — along with general decay of his powers, has left him extremely embittered and completely intolerant of anyone who defies his will. Case in point, his torture of Thorin's father — he tried to

get him on side with a
* Sauron at the end of the War of the Last Alliance; after losing most of his forces, he came out himself and faced
* Sauron, being a flaming red eyeball himself, the black horses of the Ringwraiths have glowing red eyes.
* Sauron. Gandalf tells about how he got the key to the Lonely Mountain from Thorin's father, who had been captured and driven mad by him. However, he was called "the Necromancer", therefore making it difficult to realize who was being discussed.
* Sauron Hes not hurt by silver or affected by the moon, and his shapeshifting works based on his energy drain power, in human form he needs to drain people to survive (it's not fatal) but if he drains a mutant's power he turns into his pterodactyl form until it's used up.
* Sauron himself qualifies, as he is the former right hand of the previous Dark Lord, Morgoth.
* Sauron himself, too, as can be discerned from what little he actually speaks. "There is no life in the void. Only... death."
* Sauron himself was so terrified of the armies of Valinor led by Eonwe that he outright surrendered when they laid siege to Angband.
* Sauron is a Maia who is very much capable of this. During his conversation with Pippin, he never speaks, just looks at Pippin, and he understands.
* Sauron is a Were-Pterosaur, being formerly a human who was bitten by a Savage Land pterosaur and got mutated into a humanoid pterosaur.
* Sauron managed to twist Ar-Pharazôn's (the Mannish king of Númenor) mind and convince him that a campaign against Valinor was a good idea. Eru Iluvatar himself retaliated by destroying the whole continent of Númenor and killing
* Sauron seems to have learned from this, because by the Third Age, his own host contains many Mannish forces, including the Corsairs of Umbar (themselves of Númenorian descent), the Haradrim, and the Easterlings of Rhûn, each of which consist of Sauron's
* Sauron's forces have long since destroyed, and currently occupy, Osgiliath. Gondor's current capital, Minas Tirith, used to be just a gateway suburb of Osgiliath.
* Sauron, who stole the throne from the rightful ruler and are likely awful monarchs themselves but who conveniently tend to come with legitimate heirs hanging around somewhere in order to sidestep the question of what happens to the Empire after the Emperor dies.
* Sauron with Aragorn and Gondor. Aragorn is the last member of the line of Elendil, which includes Elros, Beren, Luthien and Melian, all who have opposed Sauron for thousands of years. Gondor is the last kingdom established by Numenor and Sauron wishes to destroy that line and Gondor with it. So when Aragorn challenges him (to distract him from Frodo and Sam), Sauron felt fear for the first time in a long time, believing Aragorn had the ring and was challenging him for power.
* Sauron (yes, he chose the name intentionally), is much the same, right down to the 'turn people into dinosaurs thing'.
* Saurus Temple Guard wear helmets made from Stegadon skulls, and often much additional bone jewellery.
* Sausage Party are presented with all the same horror as the grisly artwork inside the Necronomicon. Frank tears pages out of the book to show to the rest of the store in order to get them to believe him.
* Sausage Party: Darren isn't just apathetic, he's downright rude, commenting loudly that he "Fuggin' hates this job" and calling Camille a "MILF" not only to her face but over the intercom.
* Sausage Party films, others arguing that it's trying too hard to be edgy.
* Sausage Party has also announced its commitment to producing animated films for adults.
* Sausage Party has a reported budget of $19 million. Keep in mind that the cast is full of A-list talent — who are not cheap to pay even on a low budget project

— so the amount of money put into actually animating the movie may be much lower.
* Sausage Party has two Brazilian Portuguese dubs: one made by Delart (theatrical release/Netflix), and another made by Dublavideo.
* Sausage Party: Honey Mustard loses all sense of himself after witnessing the truth of "The Great Beyond", completely lashing out at the other products around him. Refusing to experience the nightmare again when another human picks him up, he immediately commits suicide by jumping off the cart.
* Sausage Party: In the first-ever entirely computer-animated film that is R-rated, Firewater claims that humans have constantly gotten fatter ever since there were supermarkets.
* Sausage Party is an entire movie about food in a supermarket that thinks humans choose them to bring to the "great beyond", only to find out the hard way what really happens to food.
* Sausage Party obliviously brought their young children to see it...because it's an animated movie about talking food.
* Sausage Party, particularly director Greg Tiernan's severe mistreatment of the staff working on the film.
* Sausage Party psycho, they'll all most likely by considered either evidence or spoiled food, and they'll all end up in the trash.
* Sausage Party was released straight to DVD, with the theatrical release being the original English version of the film with subtitles.
* Sausage Party. We also see that toilet paper, condoms, and douches are anthropomorphized, and they are appropriately horrified by their circumstances.
* Sausage Party, when Brenda is asked by Frank why she jumped out of the cart after him instead of continuing into "The Great Beyond", she answers that for her there was no "Great Beyond" without him.
* Sausage Party, where a anthropomorphic potato getting peeled is treated like this.
* Sausage Party, which leads to an ornamental axe slicing his head off. Barry takes said head with him.
* Sausalito Summernight by Diesel, about a roadtrip from hell, Los Angeles to San Francisco in a craptacular Rambler
* ''Savage Chicken'' had some fun with the ejection seat. Fortunately the ship's computer was sensible enough to disable it after the second time and they put the ceiling panels back on with duct tape.
* Savage Chickens frequently parodies Godzilla with recurring strips such as "Godzilla Movies I'd like to See" and "Godzilla in Translation".
* Savage Chicken the right to mutiny is enshrined in the contract she signed — along with the additional fee for it.
* Savage Divinity follows Falling Rain, a modern man that finds himself reincarnated in the body of a young slave. He quickly has to learn to survive in an unforgiving world filled with myths and legends.
* Savage Divinity is an ancient turtle larger than a T-Rex, who eats Kraken on the side. Despite this she goes out of her way not to hurt anyone undeserving and has baby rabbits sleeping in her shell on occasion.
* SavageDivinity is made up of crippled soldiers, former bandits, slaves, and an elite turtle guard. Said giant turtle also refuses to leave his side so can be considered a member as well.
* Savaged, Jed is sitting the bar describing everything he did to Zoe (in the form of a hypothetical situation) when Zoe walks in behind him. He keeps talking for some time before Colby's horrified expression clues him in that something is wrong.
* Savaged, Mangas Coloradas provides Zoe with a tomahawk that she wields to great effect in the final battle with the rednecks at the mine.
* Savage Dragon doesn't even remember his real name, so his legal name is really Dragon. Obviously, even if he wanted to keep his identity a secret, it's a bit hard since he's a big green man with a fin on his head.
* Savage Dragon. Eventually, the matter is solved by Rock employing Zeek.
* Savage Dragon fans were asked to design villains, and the winner's character

would fight Dragon in an upcoming issue. The winning character was a mutant dockworker who went by Jimbo da Mighty Lobster.
* Savage Dragon fought the undead skeletons of pirates while inside of a giant sea monster.
* Savage Dragon has an arc named "A Talk With God". Guess who shows up? Special mention to the fight between Him and Satan!
* Savage Dragon has God City, where various freaks and offspring of the gods go to live.
* Savage Dragon. His rationale throughout the whole ordeal was that it was just some weird dream. Later storylines have involved Godworld, a planet housing every god of every pantheon, but these gods are treated like any other superpowered menace, with the question of their legitimacy being unimportant to the story.
* Savage Dragon, it is revealed that Hitler's brain was saved and was in the body of a super-powered gorilla. Thus, the villain Brainape was born. The character obviously started off as a joke but once it was discovered whose brain was in there, he became even more buffoonish.
* Savage Dragon mutant, her parents locked her up downstairs, never letting her out.
* Savage Dragon named Dreadnaught. He is an armored villain that is ruling over an entire country. After his initial fight, it is revealed that he has been dead for years and his armor was running without him.
* Savage Dragon. Often, this consists of characters showing up far in the background, being mention in passing but not shown, or having a single boot or glove visible that indicates that those characters are there but enough is concealed to avoid copyright issues.
* Savage Dragon storyline featured a mob war among superpowered criminals.
* Savage Dragon survived as a disembodied head. Justified, in one aspect, that his power was interact with machinery.
* Savage Dragon that makes him look tall, he is actually a diminutive alien which doesn't bother all his girlfriend, who is a normal-sized teenage girl.
* Savage Dragon version of Chicago. Its name is never given but it is a popular hangout for supervillains.
* Savage Dragon was briefly a bounty hunter shortly after being kicked off the police force.
* Savage Dragon who had previously downloaded their brainwaves into the suit, allowing them to continue fighting long after death.
* Savaged: These are revenants resurrected by a spirit to take revenge, and their bodies don't stop rotting.
* Savaged: Zoe's first victim is a deputy sheriff, one of her rapists. As a result, it's sympathetic. Even so, all his colleagues react with realistic zeal (the sheriff is completely oblivious to his criminal side, viewing him as a good man and deputy).
* Savaged, Zoe's presence at the mine causes the lights to flicker and various pieces of machinery to malfunction.
* Savage from about 2007 onwards is the introduction of robot soldiers by both sides in the war. It began with the Allies deploying Hammersteins in Wales, which were so effective that the Volgans had to develop their own robots, the depraved Blackbloods, to compensate. These robots invert the normal rules of mecha-mooks by being much stronger and tougher than human soldiers, what with being made of metal and all.
* Savage Garden for the 90s teen idol generation before breaking up in 2001. They are regarded at home as being among the greatest Australian artists of all time, and still maintain a cult following to this day.
* Savage Garden was re-issued in Japan with special Josuke Higashikata artwork.
* Savage Genius: A two-person band contributing many anime theme songs and being highly successful in the charts with them.
* Savage Grace. The film focuses largely on the real-life incestuous relationship between heiress Barbara Daly Baekeland and her son.
* "Savage" humanoids like orcs and gnolls have often been portrayed as brutally

patriarchal, with womenfolk delegated to
* Savage hunts down Rip's family and kill them when he does take over.
* Savageland (2017) is a film that's styled as an actual documentary rather than a found footage film. It tells of a small Arizona town with a population of 57 that were all brutally murdered in a single night with only one survivor, an illegal Mexican immigrant, who ends up being the prime suspect for the case. However, the survivor ended up taking mysterious photos of the night in question that raises some interesting questions about what really happened...
* Savage Opress, an alchemically altered warrior introduced in the third season of
* Savage orders Happy Jack to surrenderhe is working a slavery ring (Savage Squirrel is working a kidnapping). The two guess their cases are related and team up.
* Savage Sam, little Arliss bites off the ear of an Indian who kidnapped him. And swallows it (accidentally).
* Savage Sam: Son of Old Yeller to rescue Little Arliss and Elizabeth Circe from Indians.
* Savages Crossing: Detective Chris moonlights as a hitman and bounty hunter.
* Savages Crossing, Phil switches to an axe when his gun runs out of bullets.
* Savage Size Corollary of this is that the bigger the explosion, the Cooler.
* Savage Skies has the Cult Solar as one of the primary antagonists. Interestingly, the majority of the cult is not comprised of soldiers, it's just that Dawn Lightwing happens to be considered a demon and the ponies on top are willing to utilize lethal force.
* Savage Skies races. The primary focus is on the Gale King style, as the central character is a pegasus, but there's mention of the unicorn Still Way and the earth pony Mountain Root. The terms have been picked up by various other fics in the fandom.
* Savage Species have wings for a mere +2 level adjustment. It's actually one of the better templates for PCs to take.
* Savage Species template, which can be applied to any creature with the Animal type, including mundane fish.
* Savage Species the idea of PC monsters, and thus sabotaged the rules by setting the Level Adjustments way too high, ensuring that monster characters created with the book's rules would be horribly underpowered. The result was one of the most-disliked books of the 3.5E era.
* Savage Spinosaurs: Spinosaurid theropods are portrayed as scary predators.
* Savage Streets (1984) has Linda Blair as a tough high school girl who turns vigilante after a vicious gang called the Scars rape her deaf-mute sister and murder her best friend.
* Savage Streets, Brenda, one of a group of high-school girls, goes vigilante after her mute sister Heather is raped by a vicious gang who also murder her best friend Francine.
* Savage Streets has Linda Blair's character Brenda, after the death of her friend Francine at the hands of the Scars, suiting up in black leather and grabbing a switchblade as John Farnham's "Justice for One" plays. The real weapons she uses against the gang (a crossbow and some bear traps) come later.
* Savage Streets uses a set of these as one of her weapons against the street gang who brutalized her sister and murdered her friend.
* Savage-style running-towards-the-horizon, and a flying exploration level.
* Savage Sword of Conan #171, Conan is nursed back to health in a village. He learns the village has a deal with the local lord who provided the land for the village. Each year, he takes a villager and turns them loose in the forest while he hunts them. If the villager ever makes it to the edge of the forest without being killed, the village will own its lands free and clear. Naturally Conan ends up being the 'prey' for this year and things end badly for the lord.
* Savage Sword of Conan, Captain Bor'Aqh Sharaq has a prosthetic arm that can be fitted with a sword, an axe or a spring-powered throwing iron.
* Savage Texas: a Good Day to Die for the first half but it's still a bit startling when one main character notes, right before the climax:

* Savage: The Battle for Newerth, becoming a full-blown Gaia's Avenger.
* Savage tries this on Bill to persuade him not to kill her when he comes after the crew that killed his brother, Tom. Savage just shoots her.
* Savage, with the title character considered a heroic freedom fighter by the British, but a brutal terrorist by the occupying Volgans.
* Savage Wolves that roam their homeworld of Fenris and the themes of ferocious Germanic barbarism the chapter evokes.
* Savage Wolves. These are just to the most easily recognised motifs, however, and there are many animals that befit the Chaos Gods. For example, snakes can be symbols of Slaanesh and of Tzeentch, bulls of Khorne or Slaanesh, and toads and slugs of Nurgle, etc. In the background lore, it's said that Chaos cults will often disguise themselves as unassuming animal totemists.
* Savage Wolves: Wild canines are often portrayed as savage antagonists.
* Savage Wolves: Wolves as nasty, savage, rapacious predators; if intelligent, they may be sadistic and cruel, as well.
* Savage Worlds adventure "The Curse of the Jade Monkey" has the Jade Monkey. As the legend goes, the statuette brought wealth and prosperity to the sculptor who made it, until the Emperor sent his army to take it. Hundreds died from various accidents in the effort to transport the artifact, and eventually the Emperor died in a fire that destroyed the palace and left the Jade Monkey lost to history. In-game, the Jade Monkey will cause whoever bears it to suffer bad luck at the GM's discretion, with a chance to have something good happen instead.
* Savage Worlds. And then the monsters that suck out people's innards invade.
* Savage Worlds as it's cyberpunk setting. Set in 2088, the game follows humans, both enhanced and not, bioroids, robots, and mutants.
* Savage Worlds book that allows PCs to play supervillains in world where aliens had successfully killed off all the superheroes.
* Savage Worlds, causing backlashes which can cause the rune mage to die or be permanently brain-damaged. The ability of rune magic to turn people into thralls is useful here, as they can give the mage power (they don't track power points) and even absorb backlashes. This is going to kill the thralls, though due to the Final Solution they have plenty of people to enthrall and no rodents' posteriors to issue, as the magic is evil and only ever used by the Nazis. The process is usually referred to as blood magic and therefore it is more common to call the mages blood mages.
* Savage Worlds has a statline for katana, but also states outright that this statline is intended to make katana work the way they do in action movies. It also states that if you want realistic katana, you should use the longsword statline instead, and you should use the laser sword statline if you want katana to work like they do in shonen anime.
* SavageWorlds has the players make supervillain characters to combat an alien invasion.
* Savage Worlds, most mages posess mastery over only one of the four clasical elements. However, player characters can buy dominion over each element, leading up to buying the 'Elemental Mastery' edge, with which your mage can sucessfully balance all four elements.
* Savage Worlds regularly post on the official Pinnacle forums, with one section being devoted exclusively to getting official answers to rules questions.
* Savage Worlds, Salus (more commonly known as Necropolis) the only inhabitable planet remaining for humanity, is under attack from the undead alien Rahaim. To counter the Rahaim threat, there emerged the tyrannical Third Reformation Church and its militant branches the Sacri Ordines.
* Savage Worlds setting Toy Troopers combines this with weird war setting.
* Savage Worlds system, magic users/spellcasters and gadgeteers/inventors use the same rules to determine the in-game effects of their spells/inventions. If a mage uses a fly spell or a mad scientist builds a jetpack, both work exactly the same way.
* Savah, one of the oldest living elves, who Sorrow's end centuries past and is its unofficial matriarch, with all the inhabitants being her descendants. Called

the Mother of Memory by the Sun Folk, she preserves their history and gains knowledge through
* SAVAK, being the original originization under Imperial Iran, was on the same level due to imprisoning and torturing anyone from religious clerics to human rights activists. It never got as bad as the revolutionary period, but was notorious and despised throughout the country.
* Savanna: a lion with the large body structure of a rhino (so large that her mother had to have a c-section)
* Savannah: Child of the serval and a common household kitty. While these too can breed, they're at their biggest and most powerful as first and second generation cats, as successive generations pull a
* Savannah Cross tortures Marie in order to make her call out to Nessa, in the hopes of understanding the source of their power.
* Savannah Smiles: Harland Dobbs is rigorous in his pursuit of the kidnappers, and while he doesn't necessarily belie the worst of them, he is willing to consider it, and prefers to err on the side of caution in those assumptions and is quick to point out that whether they intentionally took her or not, their legally guilty of kidnapping for refusing to give her back without being paid. He is trying to recover a kidnapped child though, seems to view Savannah's predicament as more than just a job, and does show some softer sentiments towards Alvie and Boots by the end of the movie.
* Savannah Smiles: Mr. Driscoll wants to run for the state Senate and neglects his daughter even more than usual to do so (while making his wife do the same), eventually graduating to outright destroying evidence that shows his daughter did run away instead of being kidnapped.
* Savannahs, two domestic breeds with hybrid ancestry; Savannahs are a cross between a domestic cat and a serval, and Bengals are domestics crossed with the Asian leopard cat.
* Savanna, Kali explains it is wrong for vampires to turn children and why.
* Savant: Ascent, after being added in the void update. There's no secret to actually getting to fight him, you just have to beat the previous level. Of course, given the sheer difficulty of both him and the level before him, it might as well be required to get the Philosopher's Stone to fight him.
* Savantas dies and comes back as a ghost, Wiske disposes of him by vacuuming him up.
* Savant, real name Aleksander Vinter, was diagnosed with Asperger's as a teenager.
* Savant, the hacker who cracked into the precinct's network, is eventually given a job as the precinct's IT and computer security specialist. Although it is played with a bit, in that when Gina recommends him for the job she offers reasons beyond his criminality, Sgt. Jeffords is skeptical it's a good idea and makes a point of informing Savant in no uncertain terms that if he does anything to abuse his newfound access or harm the precinct, his fate will not be a pleasant one:
* Savatage, on such events. One being the murder of reporter Veronica Guerin by drug lords. The second being the Maersk Dubai incident, were the captain of a freighter ordered discovered stowaways to be thrown overboard.
* Savatage, the main character, DT Jesus, is a junkie with an implied drinking problem as well. What motivates him to turn his life around is finding his childhood hero, a famous blues guitarist, is little more then a homeless wino.
* Savatage. The song is about the arms dealers setting up shop in Sarajevo and selling indiscriminately to whoever is willing to pay. The final verse of the song is a warning to their customers: Buy now or be sorry; even if the weapons don't get used today there will always be another civil war tomorrow
* Savatage. They had a weird combination of fantasy and space opera early on, but "Sirens," "City Beneath the Surface," "Hall of the Mountain King," "Hounds," and "The Unholy" all qualify (and are from four different albums). Prior to "Streets," they thrived off Heavy Mithril, space fantasy, and rock anthems.
* Savatage this way in the song "This Isn't What We Meant". The people of Bosnia had prayed for a change from Yugoslavia's cruel regime and to their distress, God's response is a brutal civil war destroying the newborn nation.

* Savatage. TSO has became extremely successful for their Christmas themed rock operas (although casual audiences only know them for "Sarajevo"), while Savatage is almost forgotten and disbanded to focus on TSO and other projects.
* "Save a kill spell to deal with this guy" is a drawback — five cards in the same set have the ability "whenever an opponent says [either of the words in this card's name], you may say 'Gotcha!' and return this from your graveyard to your hand". The death-parrot triggers all five. It triggers six if your rules-meister considers 'to' to be a homophone of 'two'...
* save Archenland from the greatest danger it would ever face in the bargain.
* saved at the last minute by the unborn Hera's blood, since they could have done an episode about the ethics of regularly harvesting a baby's blood for medical purposes.
* Saved by a Terrible Performance: A character saves the day by doing something they are known to be bad at.
* Saved by a Terrible Performance: When a character's flaw ends up saving the day for everybody.
* Saved by Canon: A character who is alive at the beginning of one work obviously has to survive any works which are set earlier.
* Saved by Canon: Because the character is still alive in the other installments, it's obvious that they'll survive the events of the prequel.
* Saved by Canon: Because the character is still alive in the series' other installments, it's obvious that they will survive the events of the prequel no matter what perils they may end up in.
* Saved by the Bell, acne is only mentioned in the high school setting twice, one in which the trope is played straight and the other in which it is subverted:
* Saved by the Bell: A.C. Slater, although it wasn't brought up very often, aside from his father pressuring him to join.
* Saved by the Bell: AC Slater is a star wrestler and basketball player and, while a bit of a hothead, he's ultimately good-natured.
* Saved by the Bell: after finding out that Slater's dad may be transferring to Hawaii, Zack - looking to eliminate his competition for Kelly - tells Kelly, Jessie and Lisa that Slater is terminally ill and can only be treated at a clinic in Hawaii, so they need to be mean to him and convince him that he has no reason to stay at Bayside. It seems to work, until Kelly suddenly declares that she will also go to Hawaii to nurse Slater, leading him to figure out what's really going on.
* "Saved by the Bell", a guest needs to talk to "Anita Bellman" but the clerk thinks he's saying "I need a bellman."
* Saved by the Bell. All other visits bypass the front door and go directly to room.
* Saved by the Bell, all the girls (including those in the main cast) get crushes on the substitute teacher, Tony Crane. This is strictly one-sided, though — Tony doesn't return any of the girls' affections.
* Saved by the Bell. And caffeine pills. And everything else that happens to her, really.
* Saved by the Bell and explain why he used the stage name Mark-Paul Gosselaar.
* Saved by the Bell, and has made guest appearances in other programs as well.
* Saved by the Bell and investigative reporter Jessie ambushes Mr. Belding over some missing petty cash, even accusing him of using the funds to buy a new car.
* Saved by the Bell) and when she reads the review it says "Lisa is an entertaining reporter and a classy dresser". Slater is awful on the radio and the gang are wondering how they tell him and Screech suggests "wave a skunk in front of his nose". Guess what the review says about Slater.
* Saved by the Bell and Zack being a more interesting protagonist than Miss Bliss.
* Saved by the Bell at the time) had Mikey Gonzales and Nikki Coleman. After the first season, they were replaced by the much more recognizable A.C. Slater and Jessie Spano, respectively.
* Saved by the Bell, Bayside High decided to put their yearbooks on videotapes. Good luck to them finding a VCR to play them on in the 21st century, as the last one was manufactured in July 2016.

* Saved by the Bell decided to sign new ones. As a result, Kelly and Jessie were replaced with a new character named Tori Scott. No explanation was given for Kelly and Jessie's absence in the new episodes, and since the finale was already in the can, no explanation could be given for Tori's absence at graduation.
* Saved by the Bell did a date auction, to which Jessie was morally opposed. As a result, she threatened anyone who would bid on Slater, so Kelly ended up with Slater, and Jessie ended up with Screech.
* Saved by the Bell diner "The Max" has been defictionalized in Chicago.
* Saved by the Bell episode "Mystery Weekend", the butler is stabbed after being accused of the first scripted murder. When Inspector Picadilly shows up to investigate, he knows almost right away who's guilty:
* Saved by the Bell episode, "Rent-A-Pop" upon realizing that Mr. Belding is requesting a conference with his father instead of his mother, who Zack jokes is there so often that she even has her own parking space, he exclaims "I want my Mommy!"
* Saved by the Bell episode "The Last Dance", Zack and Kelly are breaking up (due to Kelly falling in love with Jeff) while the gang is inside the gym playing "How Am I Supposed To Live Without You".
* Saved by the Bell: Even though Lisa is extremely vocal in her lack of interest in Screech, he obliviously insists they are meant to be.
* Saved by the Bell got the part, they liked Elizabeth's audition so much they created the role of Jessie Spano just to have her in the series.
* Saved by the Bell had a fantasy of if they were to strike oil in the Pipe Dreams episode, how incredibly rich the school would be. Zack, to the teacher who reminded them about the test that day and that it was a rule says, "We have money, so there are no rules!" Being born in '86 and watching SBTB growing up, Zack was the only one I saw with a mobile phone in the '90s AND I think his dad was a lawyer...I always thought it was a big plothole in that Zack was obsessed with becoming rich!
* Saved by the Bell had a professor die and at the funeral Dean McMahon accidentally drops her phone into the casket and her arm gets stuck in it just when she's forced to give a eulogy.
* Saved by the Bell had a rudimentary training experience in one episode (rope climbing, running through tires).
* Saved by the Bell had Zack con his friends into thinking Slater would die unless they were so mean to him he'd want to leave for Hawaii to get treated had a conversation like this between Jessie and Belding, where he rather flippantly told her that Slater would not be with them for much longer.
* Saved by the Bell has Lisa pretend she was an intellectual to impress a boy she liked because he scoffed at her real personality.
* Saved by the Bell having all the attention cast on her, and wants to be treated like anyone else.
* Saved by the Bell He is also revealed to have some issues from his often-absentee businessman father.
* Saved by the Bell: In one episode, Mr. Belding wanted to have a conference with Zack's father, as his mother proves to be far more forgiving of his misdeeds. To keep his workaholic dad from finding out about, Zack gets a waiter friend at the Max to pretend to be his father instead. (Since that guy was an out-of-work actor he decided to ham it up.) His dad actually finds out about the conference, so Zack's waiter friend pulls double duty as a stand-in for Belding. The gambit naturally fails when — despite Zack's best efforts — Belding and Zack's dad run into each other at a school function.
* Saved by the Bell, in on episode, Slater gets mad at Zack for dating his younger sister, JB.
* Saved by the Bell: In the episode where Kelly Kapowski didn't want to go to the prom with Zack because she couldn't afford a dress, she used the hair-washing one so often Zack told her she'd caused a drought in California.
* Saved by the Bell. Jessie also joins as well. The girls are also said to play volleyball.
* Saved by the Bell, Kelly gets an F from a teacher and asks him if she really

deserved that. His response is "No, but they don't allow us to give you an N."
* Saved by the Bell — Jessie has one of her standard meltdowns over getting a B. Also has a lesser meltdown over getting less on her SATs than Zach's.
* Saved By The Bell only appeared to have more than one classroom. There was just the one, but it had multiple doors, so a simple rearrangement of the furniture made it appear to have more.
* Saved by the Bell or merely play pranks on the cast. He'd say "Time in" to return things to normal.
* Saved by the Bell pick up a cake. When Slater asked what images were invoked with the words "Screech" and "cake", they decided to order another one.
* Saved by the Bell produced great chemistry on screen. So they wrote Zack and Slater to become good friends, and Slater developed his own love story with Jessie - separate from Zack and Kelly.
* Saved by the Bell rarely showed up but when the gang graduated, went to college, got married, etc. they were never around.
* Saved by the Bell saw Zack dating a girl on the wrestling team and getting all embarrassed when she saved him from getting beaten up.
* Saved by the Bell, Screech did this to surprise Lisa. She was not amused.
* Saved by the Bell, Screech had tampered with the girls' oven to help Zack win a cooking contest by replacing a knob with a fake knob. Screech switched back the knobs after the contest and kept the fake knob. When the girls confronted Zack and Screech...
* Saved by the Bell showcased Mario Lopez's wrestling and drumming skills. One episode gave him an opportunity to perform a bodybuilding posing routine after his character entered a beauty pageant as a prank.
* Saved by the Bell simply to grab kids' attention while flipping through the channels.
* Saved by the Bell. Slater and a new girl in school go to a theater, but Zack has a crush on her too. So he pays a lady to pretend she's Slater's mom, and to sit between them in order to kill any attempt.
* Saved by the Bell tattooed on his butt. But he was a bit younger and thinner when he first got it, leading to this remark:
* Saved by the Bell, the gang goes to the beach. Lisa has buried Screech entirely in the sand to the point where he's breathing through a straw.
* Saved by the Bell, the network changed its logo to "[crappy 1980's live action tv show network]", after a message board user suggested it.
* Saved by the Bell: The New Class episode "Maria's Movie Star", Maria encounters an actor at the mall, who is attending a movie session and requests her to keep his identity a secret. When the other students meet them and ask who he is, Maria looks around and notices a promotional sign with "tempura" written on it, and so she introduces him as "Tim Pura".
* Saved By the Bell: The New Class episode, Screech receives one of these. The kids set him up with another girl to help get him over it.
* Saved by the Bell: The New Class episode with Katie fearing her "plain" dress, only to be complimented by Maria, whose own dress was ridiculously restricting and Rachel, who wore a dress at least three other girls wore.
* Saved by the Bell: The New Class, Eric is trying to get a macaw to talk. When Liz reveals what Maria really thinks of her boss, the macaw immediately starts repeating it. ("Maria thinks Mr. Carey's a big jerk.") Later, the macaw gets loose after an earthquake and Maria has to track it down.
* Saved by the Bell: The New Class, expect the whole scheme to become undone before the end of the episode. Below are some examples:
* Saved by the Bell: The New Class He finally relents to admitting that he needs eye-wear towards the end of the episode.
* Saved by the Bell: The New Class: In one episode, Screech had "The Werewolf Channel," "The Worst Movies Ever Made Channel," and "The Hot Babe Channel."
* Saved by the Bell: The New Class is an all new group of students attending Bayside High.
* Saved by the Bell: The New Class. Once she leaves, Mr. Belding demands to know

who assigned her spot next to his. He's speaking to no one in particular, but Screech, upon hearing Mr. Belding's demand, whistles to himself while looking sheepishly away, which, due to his close proximity to Mr. Belding, serves only to tip himself off.
* Saved by the Bell: The New Class, Rachel decides to run for student body president to pat her extracurricular activities for college application, and Ryan — her boyfriend at the time — volunteers as her campaign manager. Her election campaign struggles at one point, leading to the following exchange:
* Saved By the Bell: The New Class S:1-E:2, "The Slumber Party", new main character Scott dresses up as a girl so that he can attend a slumber party with his female friends. However, a jock from school catches sight of him and is immediately smitten.
* Saved by the Bell: The New Class, Screech calls Mr. Belding "(the) Chief".
* Saved by the Bell: The New Class that he delivered to Nicky earlier.
* Saved by the Bell: The New Class where a character describes his new invention in detail only to be told he's just invented the pencil.
* Saved by the Bell. "The People's Choice," from 1994, centers around new faculty adviser Screech's attempts to improve the paper, leading to student staff members to skip class to work on the paper. The 1998 episode "Do the Write Thing" centers on administrative censorship after Mr. Belding withholds publication of an article about student athletes getting preferential treatment for such things as discipline and assignments. (The original series had no newspaper-centered episodes, but did have one centering around the school's radio station, KKTY, which has a news program.)
* Saved by the Bell This produces some amusing poses as the group continues to bicker when no one else is around.
* Saved by the Bell-type at Five Card Stud. Zack lays down four queens, which is surely unbeatable. Then the smugly-grinning Nerdstrom shows... four kings. The odds of these two hands being played concurrently: 1 in 2.9 billion.
* Saved by the Bell. Unlike many examples, instead of narrating over the activity, he would actually talk directly to the camera.
* Saved by the Bell used a conventional laugh track; and since the two shows are part of the same syndication package, it makes for a good education as to the differences between the two.
* Saved by the Bell was on, of course, NBC, and, in fact, the person in the episode suggesting the idea was then NBC Entertainment president Brandon Tartikoff.
* Saved by the Bell when he finds out - and his punishment is for Lisa to keep working the job until she's paid the debts (at her own insistence).
* Saved by the Bell, when Kelly reveals that she has a thing for Screech.
* Saved by the Bell when Mr. Belding forcibly sets Zack up with his niece, Penny Belding. Zack imagines Mr. Belding in full drag. Screech ends up posing as Zack (in a bad blond wig) to take Penny out, and she's fairly cute.
* Saved by the Bell - where Jessie assumes that Christy the girl wrestler has to be attracted to Slater because of this trope. But it's actually Zack that Christy is interested in.
* Saved by the Bell (which has been getting a lot of backlash from its trailers) manages to dethrone it.
* Saved by the Bell, which is filmed on more traditional film cameras and lacks the show's brighter lighting and soundtrack. (Compare this to the show's first TV movie, "Hawaiian Style", which is filmed using the show's cameras.)
* Saved by the Bell wouldn't appear in the next episode and Stacy had to leave at the end of summer. One episode even had a Romantic False Lead for Stacey when her old boyfriend showed up.
* Saved by the Bell Zack and Kelly look at on-campus housing for married students. The apartment is filth and severely run-down, the manager is a stoner, and a rug covers a chalk outline on the floor.
* Saved by the Bell. Zack dates a female wrestler who saves him from an attack. He views this as a huge blow to his ego because he can't comprehend the girl saving the guy.

* Saved by the Bell, Zack wants to go on a skiing trip, but is failing his classes. He tells his father that a friend of his is in a similar dilemma, and his father says that if he were the friend's father, he'd ground the friend for life. Cue Zack going off on some tangentially related daydream regarding the latter...
* Saved by the Coffin: Someone's life is saved by the timely appearance of a casket.
* Saved by the Punishment: When a character receives a punishment that saves them from danger.
* saved Fiamma of the Right's life at the end of World War III. Almost everyone else is unaware of this, to the point that someone refers to Fiamma of the Right in past tense in front of Touma.
* Saved for the Sequel: Plot element left to be developed in the sequel.
* Saved from Development Hell: After several delays and difficulties, the work finally gets finished and released.
* Saved from Development Hell (albeit now part of the franchise's upcoming second reboot) and is due for a 2022 release.
* Saved from Development Hell Among the silver-linings, a number of long-gestating projects finally made it to the finish line:
* Saved from Development Hell finally finishes production and gets released.
* Saved from Development Hell: Seemed like it would never come out, now it finally is
* Saved From Their Own Honor: A character is honor-bound to harm themselves, but is stopped by someone wise/benevolent.
* Saved From Their Own Honor: God stops Abraham from ritually sacrificing Issac after he was ordered to by God.
* Saved! (gay male supporting character; subject indlues coming out story, homophobia)
* saved her from her parents' killers, killed them and then gave her a place to call home. She gets called out on this sometimes, most notably by Jean.
* saved her from the car crash that killed her parents, but this was for the quite sensible reason of wanting to find out if she was really his psychotic presumed-dead ex Katherine, and why exactly the two looked so similar. He didn't find out why, but was satisfied that Elena was a very different person, and realising he was starting to fall for her decided to stop the stalking and meet her properly.
* saved her life when she was working underneath her Volkswagen Bus when the jack collapsed. During her recovery, her doctor told her that if she hadn't been so well-endowed she probably would have sustained fatal chest injuries.
* saved his life and stands up to him in a way that no other woman does.
* Saved! lives in a heavily conservative Christian town and believes her figure-skating boyfriend is straight. Once she suspects he's gay, she tries to cure him with sex and winds up pregnant, triggering the main plot of the movie. When he gets shipped off to be de-gayed, she tells her friends, and while her female friends, who apparently never entertained the possibility because he was a good Christian boy, are shocked and disgusted, Roland nonchalantly says, "What? Wasn't like it was some kind of secret. The guy was like a one-man gay pride parade."
* saved on it, and Cosgrove waved it off as the narrator liking to pad his part. Shortly afterward:
* Saved! opens with the protagonist's mother being named "the number one Christian interior decorator for the entire region."
* saved Sansa from a mob, and the fact that Sansa seems to like her memory of this incident.
* Saved the kidnapped Israeli prime minister in time to prevent a major conflict, then
* saved the Time Lords from extinction, the Master, who delights in chaos and destruction and, indeed, war, flee in terror.
* Saved!. This is meant to show Mary as genuinely filled with the Christian spirit of compassion, in order to contrast Mary with her Alpha Bitch rival, who attends the same Christian school environment as her but is hypocritical about being "filled with Christ's love".

* Saved to Enslave: A person who rescues another takes advantage of the opportunity to force them into service.
* Saved!, where the large SUV owned by the Christian protagonists is the only car not rocking.
* Save face by not letting everyone know that Charlie hung up on him.
* Save for a brief period in the mid '90s where he was depicted engaging in such activities as clubbing and playing golf as part of the ad campaign for the execrable "Arch Deluxe" burger (a "sandwich for 'adults'," as demonstrated by ads showing kids recoiling in disgust;
* Save for a couple of albums, you probably won't be able to tell one
* (save for Cyborg-Noodle, who stays CG-rendered to keep her apart from the real Noodle) amidst plenty of 3D vehicles, creatures and backgrounds.
* save Frieza are ones to get taken out first, ordered from Krillin, Tien, Roshi, and Piccolo.
* save her, as the Roman Catholic Church was going to have her tortured and executed. Once the misunderstanding is cleared up, they all team up to save her.
* Save Hiatus The creators even had a contest to name all the sources of his epithets.
* save him, and instill in him some understanding of mercy that will eventually save Clara's life when she's trapped inside a Dalek casing by Missy in "The Witch's Familiar".
* save his daughter Futaba from committing suicide and help her with her social anxiety shift towards the Protagonist.
* save his legion from corruption when he became their ultimate undoing).
* save his life. Strapped to a motorcycle and forced to ride around in a spherical cage so fast his body was pulverized and made into butter.
* save Iris from her seemingly-inevitable death at the hands of Savitar, though at the cost of H.R. and ultimately, Barry himself.
* SAVE ME. His death, and her both feeling implicated in it and refusing to admit her guilt to herself (or anyone else), form an overwhelming aspect of her motivation.
* SAVE ME) is Jin repeatedly rewinding time to save his estranged friends from tragic fates (which include suicide and prison, among other things).
* SAVE ME, Jin is given the chance to save his estranged friends/former classmates from their tragic fates, waking up again on April 11th whenever he fails.
* SAVE ME. She isn't literally the stepmother of the men at Genesis House (if anything, she's more like a foster mother, since many of them are there because their families have insisted on sending them or straight-up won't have them in the house), and she's certainly much more sympathetic than most examples of this trope, to the point where she's nearly a deconstruction. But the fact remains that she doesn't treat the men at all equally — Mark, who reminds her of her dead son, is a favorite from day one, whereas she never likes or trusts Scott despite the fact that he goes out of his way to be honest with her and puts as much effort into the program as anybody.
* save Nancy) gets permanently banned from an aquatic-themed restaurant because of their shenanigans, which included flooding the restaurant. It didn't matter to them, as they hated that place anyway.
* Save Our Seeds levels is the same as any normal levels in terms of its general objective, but if one endangered plant is killed by zombies or by player's intent (i.e. shoveling them before the 1.9 update and putting a plant on a fire tile at the same lane as the plant needed to protect), that's also result to the loss of a level, as the screen goes black normally and the message "THE ZOMBIES ATE YOUR PLANT!" will appear. In Dark Ages — Night 12, if the player fails to prevent the Puff-shrooms from disappearing, the message "PUFF-SHROOM DID NOT SURVIVE!" will display instead.
* Save Our Students: A teacher strives to improve the futures of students who attend a horrible school.
* Save Our Students: A teacher tries to inspire a group of troubled students to do better in school.

* Save Our Students that mocked and deconstructed the concept so thoroughly that nobody was able to take it seriously anymore without a torrent of people saying "How do I reach deez keeds?".
* Save Our Students the face of the previous high school principal is on the milk carton, implied to have been murdered by the delinquent students.
* Save our Voice Actors, an organization that tried to get the original 4kids English voice actors back for
* Save Points and uses "gaijin" as an insult. At least one of these is actually taken from a real argument used online.
* saves Anna from smugglers who kidnapped her, and even becomes a POV character.
* Save Scumming also works, although it's made more annoying that you can save but not load in Battlescape.
* Save Scumming, each game can take a few minutes to play, and if you're trying to win five straight games or so with a dozen different people... well... you do the math!
* Save Scumming is used to cheat them. It doesn't help that getting the best time is literally a difference counted in fractions of a second. The second game is slightly more forgiving on this account.
* Save Scumming while gambling is technically altering the space-time continuum to maximize profit.
* saves his friend from committing suicide and breaks his arm in the process...and from then on becomes downright giddy, smiling all the time and making himself look just as silly as everyone else. The others are clearly unnerved by the transformation.
* "Save Springfield! By foot. By car. By the seat of your pants." —
* Savestate and running for the next 5 strips. It's kicked off by Nicole suggesting that Harvey get a job at the local haunted house.
* Savestate, much to his irritation and, apparently, Nicole's amusement.
* saves the Boov using a Gorg Superchip, Kyle realizes that he should have accepted Oh as his friend and sides with him against Smek.
* Saves The Day - "Monkey" ("The monkey will bite / better eat your poultry")
* saves the world", that power is gone, she is completely on her own, and she doesn't really know what to do.
* saves Tony's life after Stane steals his arc reactor and leaves him to die.
* Save the Date. The way you progress in the game is through a system of saving and reloading, and using acquired knowledge to prolong your playthrough.
* Save the Date, where saving your date is literally the name of the game.
* Save the Day, Turn Away: Someone saves the day but has to dump their love interest.
* save the Doctor's existance by jumping into the his timestream. Mosty Because Destiny Says So
* Save the Green Planet!, Byeong-gu's creepy basement is filled with preserved human limbs in jars, which were collected from his previous victims who he interrogated and killed to find out if they were aliens.
* Save the Green Planet!, from slapstick comedy to creepy psychological horror, with the odd martial arts scene thrown in.
* Save the Human, a book by David Wood and Tony Husband, depicts a future in which humans nearly became extinct as a result of their wars and pollution. Now the animals are in charge, and some keep humans as pets...or to perform experiments on.
* Save the Jerk: A heroic character shows off their selflessness by saving someone who's mean to them.
* Save the Jerk: Even though I'm a big asshole, the hero's still going to risk themselves to save me!
* Save The Kittens: Thanks to the artificial means by which they are made, their appearance and even personality traits can be decided before they are even 'born.'
* Save the Last Dance a black female character criticizes the white girl for falling in love with a black youth with a bright future. She says she hates how white girls always take the decent black men, leaving black girls with the black men that are criminals and gang members.

* Save the Last Dance is about a young white girl moving to the inner city and falling in love with a black youth with a bright future. A black female character criticizes her for this and says she hates how white girls always snatch up the good black men, leaving black girls with the black men that are criminals and gang members.
* Save the Last One", when Shane and Otis are trying to outrun a horde of zombies, Shane shoots Otis in the leg with his last round and takes his supplies just before the horde surrounds and devours Otis.
* save the Magical World from its seemingly inevitable destruction, even the people he should be convincing he can do it.
* save them). They even dumped their alien criminals on our world! (As in Invasion! this turned to be part of a plan by one race to then turn on the rest.)
* Save the Pearls plays a huge role in the story. Naturally the work was ignored or shunned by the general audience.
* Save the Pearls. While whites are supposedly at the bottom of the hierarchy, many critics have noted that their name is the only one that denotes value, beauty, and rarity.
* Save the Pearls YouTube account and put up videos in connection with her literary series of the same name.
* Save the Princess, but often it's an actual princess, just because of this trope.
* Save the Queen and Save the King can be synthesized as in II, this time with + versions that have
* Save The Supers has as its main cast basically a set off Expies of the Justice League: Merman is Aquaman, Elementra is Wonder Woman, World Man is Superman, Morph Man is Plastic Man, Fleet Foot is The Flash, and Night Knight is a (very strange) version of Batman mostly based around his nickname "The Dark Knight". The first episode features a Joker Expy and episode 3 features a Catwoman expy.
* Save The Supers has this power, except that he always takes the shape of objects, still recognizable by their color scheme. This means (beyond an extra in the first episode) that there is no actor playing him; all his appearances are as (mostly) inanimate objects the rest of the cast interact with.
* "Save the Tree": Arnold and friends have prevented Helga's dad from cutting down a tree they've built a tree house in to build a beeper shop... but he's now focusing his attention on the lot they play baseball in.
* save the universe, but they could easily be lying. They even admit that we should kill them all on sight.
* Save the Villain: A hero chooses to save a villain when their life is endangered, which can lead to mutual amity, or they may have done it because they already had rapport with them.
* Save the Villain: Saving an evil person's life because it's the right thing to do.
* "Save the World" Climax: A plot that initially wasn't about saving the world is so by the end.
* Save the World with Kim. That being said, even she doesn't get much slack from people on the home front for all the times she's saved them all from doom.
* Save Token: An item in your inventory that allows you to save your game.
* "Save Up All Your Tears" is best known as a Robin Beck song in continental Europe, and as a Cher song everywhere else - but it was first recorded by Bonnie on the same album.
* Save us please, thank you has a shark pool under his room on his ship, which he threatens to feed the group to and to which accidentally feeds a traitorous servant (he only wanted to scare him into confessing)
* SaveWalterWhite.com website after the NCC was named one of the worst charities in America.
* Save Your Legs! fanboy, and in particular of legendary Indian player Sachin Tendulkar. His entire life revolves around cricket, with him working a cricket centre. As a teenager he sneaked into the Indian dressing room during a test match in Melbourne and stole Tendulkar's box from his gear bag. As an adult, he tricks his boss into sponsoring his extremely average suburban team on a tour of India,

where he hopes to meet Tandulkar.
* Save Your Legs!: Mark deliberately throws the cricket match against the toymakers after being promised a position in the Indian league if he does so.
* Save Your Legs!: The only personality traits Anjali displays are her interest in Teddy, and her love of cricket (although the latter does play a role in the film's resolution). Tellingly, she is a character created for the dramatization and had no equivalent in the real-world events that inspired the film.
* Save Your Legs! when he comes down with a bad case of Delhi Belly after eating Indian food.
* Save Yourselves!: Jack is hilariously incompetent when it comes to doing "action" things. He's unable to chop wood with an axe, and he's reluctant when he realizes he may have to learn to handle a gun in order to fight off the pouffes.
* Save Yourselves!, postcards, go-bags, and even Hawaiian shirts and dresses that contain pouffes and cell phones on them.
* Save Yourselves!: The main conflict of the film arises from a hostile species of aliens referred to as "pouffes" landing on Earth. While their arrival seems to have been intentional, their actual motives are never known.
* Save Yourselves!: The pouffes are a species of aliens that resemble animate pom-poms, with features such as eyes or mouths not being visible. They also feed specifically on ethanol, consuming Su and Jack's sourdough starter and whiskey, as well as draining their car's gasoline.
* Save Yourselves!: The pouffes manage to instantly kill multiple people by simply shooting their tendrils through their heads.
* save Zidane during the "You're Not Alone!" sequence, her entrance is announced by her casting Curaga, regardless of whether or not she has learned it yet.
* "Saving All My Love for You" was originally performed by Marilyn McCoo. The hit version was by Whitney Houston.
* saving Belkar from Miko, so part of it might be that he just likes killing people.
* Saving Boromir is optional, but he appears in later levels either way.
* Saving Charlie, but neither has felt anything quite like this relationship.
* Saving Charlie focusing on the relationship between Hiro and Charlie)
* Saving Christmas has a scene where several characters "talk" while holding coffee mugs over their faces to "hide" the fact that the actors' lips weren't actually moving at the time. It's not very convincing.
* Saving Christmas Producer and star Kirk Cameron seemed convinced that no matter what the critical appraisal, the film would find an audience with hard-core Christians looking for a good Christmastime flick. However, the film's agenda of endorsing the commercial or hedonistic aspects of Christmas rather than the loving spiritual ones caused most Christians to hate the film too.
* Saving Christmas: Someone has to prevent Christmas from being ruined for everyone who celebrates the holiday.
* saving December by killing January before the latter kills the former, something that the game never even hints is possible.
* Saving Face (lesbian main character, gay supporting character, lesbian supporting character; subject matter includes coming out story, queer female romance)
* Saving Face. One of the stories deals with Wil trying to conceal her relationship from her mother ... while her mother is living with her.
* Saving Face, right in the middle of Wil having a drink of champagne, resulting in Wil spitting the champagne from her mouth in surprise.
* Saving Face (staged in a similar manner), the heroine gets her pregnant mother to abandon the guy her grandfather had bullied her into marrying at the altar. The mother then ends up with the guy who fathered the baby, though he was pretty passive through the entire movie.
* Saving Face: Wil and Vivian can't be out about having a relationship due to homophobia prevalent in the Flushing Chinese-American community.
* Saving Face: Wil hides her relationship with Vivian from her family and refuses to engage in PDA. Wil's mother refuses to reveal the father of her child. In the first case it's due to homophobia, the latter as they aren't married.

* saving Gallifrey with all of his incarnations, he seems to realize this was his destination all along:
* Saving Grace, Grace and Neely fall off a building and survive. Given the nature of the show, it's heavily implied that God did it.
* Saving Grace, Grace's niece and best friend went to a "scavenger" party where they took random drugs, and the best friend died. Her father and Grace dragged the niece down to the morgue and forced her to look at her friend's corpse.
* Saving Grace: In "A Language of Angels", Grace is about to have sex with a male prostitute named Zack. As foreplay, she agrees to be bound to the four corners of the bed with handcuffs on each limb, facedown and completely naked. He then draws a smiley face on her back and writes his name on her butt with lipstick. Unfortunately, when he finds out she is a cop, he panics and runs away, leaving her bound. Ham comes in and leaves in disgust instead of freeing her. Earl comes in and lectures her instead of freeing her. Several hours later, Ham comes back and frees her.
* Saving Grace of the last name of the show's writer Dominic Minghella).
* Saving Grace, Rhetta is a forensic investigator and does all kinds of tests on any items that Earl gives Grace to prove his angelic existence. Boy, does she find proof.
* Saving Grace. When they're not busy busting bad guys, they're busting out laughs with their elaborate pranks.
* saving his last name for an emergency., getting one more letter each time.)
* Saving his younger brother from Calitri is the only reason Memphis Raines comes out of carjacking retirement in
* saving Homer's life by sniping Fat Tony and the rest of his crew when they came to whack him in "Poppa's Got A Brand New Badge".
* Saving Hope hijinks.) On the flip side, Dawn decides she wants to have a baby (with Charlie) and remains completely convinced that she will have no trouble conceiving even though she's past optimum child-bearing age. Dawn is completely crushed when the OB tells her that her eggs are not viable.
* Saving Humanity" starts as one. The most common expression is bad weather wherever he goes, but it's far from the only or the worst.
* saving Iron Bull's mercenary company is more important than the Qun alliance.
* Saving Leningrad: A barge was grossly overloaded with 1500 people seeking to escape the Nazi siege on Leningrad. The barge, not terribly seaworthy to begin with, starts sinking in Lake Ladoga after it's bombed and strafed by German planes. As the hold fills with water the crew starts heaving freight overboard in an attempt to stay afloat. It doesn't work.
* Saving Leningrad: The Soviets storm the beach on the south shore of Lake Ladoga in an effort to break the German siege of the city. Unlike most examples of this trope, this one ends in defeat and withdrawal after the Russian soldiers take horrible losses.
* Saving Lily. Several kids, their families, and their teacher are raising money to buy an elephant from a cruel circus owner so they can deliver her to an elephant shelter. Lily's owner agrees to the deal if there is no outside publicity about it. The day before the deal happens, two well-meaning kids (not well acquainted with the main kids) get the local newspaper to publish an article about the efforts, which reaches the attention of the circus man. He cancels the deal but is convinced to uncancel it because all the money had been raised without media help and because canceling the deal means they're free to raise as much publicity as they want about it.
* Saving Max, a boy is found stabbed to death in his bed, with Max curled up nearby covered in blood and clutching a murder weapon, while Danielle tries to pull him out of the room. Now Danielle has to prove that neither of them had anything to do with the death.
* Saving Max: After Danielle and Tony have sex, she starts crying because it's brought all her emotions about Max closer to the surface.
* Saving Max: Every time Marianne accuses Max of being violent or psychotic, Max jumps up and accuses her of lying. He eventually has to be escorted from the

courtroom.
* Saving Max is very skilled with computers, enough to help with the investigation while institutionalized.
* Saving Max mutters to himself and twitches like he's doing the flamenco sitting down. Danielle recognizes this as his attempts to communicate.
* saving Merry although when it comes to the very last minute, Cross shows that he would be willing to go that far if there were no other choice.
* Saving Minty in the caves will add her to the crowd scene at the end, no matter what ending is otherwise acquired.
* Saving Mr. Banks - P.L. Travers acts punished in this way through most of the movie.
* Saving Mr. Banks's daughter Diane, who died about a month before its release.
* Saving Mr. Banks, showing him to be pushy, obnoxious and with little regard for personal space. Robert Sherman comes off as short-tempered, at least in his dealings with Mrs. Travers, and Richard Sherman is portrayed as something of a doofus, though a friendly and talented one.
* Saving Mr. Banks: The screenwriters suggest to P.L. Travers that Mrs. Banks be made a suffragette to explain why she's not with her children. When Travers demands indignantly if they're implying Mrs. Banks is a neglectful mother, they hem and haw, except for Bob who pointedly replies, "Yup!"
* Saving Mr. Banks when P.L. Travers walks into her hotel room and drops her suitcase upon seeing Disney character plush dolls in her room.
* "Saving Patrick Bubley": Everyone knows that a vicious street gang is responsible for the deaths of four brothers. However, due to either fear of the gang or hatred of the police, no witnesses are willing to come forward, meaning all the cops "officially" have is a hunch.
* Saving Private Brian", they kiss to get discharged from the army. It doesn't work.
* Saving Private Brian", when Brian and Stewie join the army, they're talking at night, and one guy yells, "You know, you guys are really making it hard to masturbate!" prompting another guy to yell, "Not for me!"
* Saving Private Brian" where one of them is a ghost while the other is in hell because he "liked little boys."
* Saving Private Ryan : After the paratroopers killed near the radar station are buried, Capt. Miller marks their graves with their helmets and M1 rifles. He removes the trigger group from each weapon so they can't be used by the Germans.
* Saving Private Ryan, a German soldier is captured by Americans. Fearing execution, he starts sucking up to them by talking about American pop culture and butchering the Star-Spangled Banner.
* Saving Private Ryan) and one of his men show up with Thompsons unnoticed and shoot all the German soldiers, ending the standoff.
* Saving Private Ryan) and Steven Spielberg cast her because he was a fan.
* Saving Private Ryan. And then an Anti-Aircraft Gun gets used on humans...
* Saving Private Ryan, and thinks so little of him that he simply walks past the still-crying Upham and rejoins the battle.
* Saving Private Ryan a shore party radio man gets a brief appearance on Omaha Beach before he loses most of his face.
* Saving Private Ryan, as Miller immediately takes note that the command center troops all have easy access to hot coffee and fresh food, while he's probably been living on C-Rations since he came ashore.
* Saving Private Ryan, a soldier who had just had his legs blown off was played by an actor who had lost his legs years before. In fact, every soldier who was dismembered on the beach was portrayed by actors missing the appropriate limbs.
* Saving Private Ryan. A speaker of French and German roped into the squad with zero combat experience after Miller's translator is killed during Omaha, for most of the film he stays down and out of the way during the firefights. He also spends the whole film trying to find out what "FUBAR" means.
* Saving Private Ryan, as well as abridged warnings whenever the film returned from a commercial break. In addition, the film was also preceded by an introduction by

Bob Iger (then-President of The Walt Disney Company) recommending that children not see it, especially since the 9/11 attacks had occurred just two months earlier.
* Saving Private Ryan begins on D-Day at Omaha Beach, and it does not shy away from just how brutal it was. The mission to save the titular soldier begins after the troops have cleared the beach and begun moving inland.
* Saving Private Ryan: Captain Miller, who would normally command a company of maybe a hundred men, is given command of an eight-man squad, typically the role of a sergeant or lieutenant at most. Of course, given the mission circumstances, a higher-ranked CO may have been chosen to allow him to draw additional assistance if needed.
* Saving Private Ryan) defiantly empties his pistol into an oncoming German tank, which explodes in spectacular fashion. As Miller stares in wonder an Allied aircraft swoops overhead, revealing that the tank had been destroyed from above.
* Saving Private Ryan die holding a small bridge from the German army. Miller dies just after U.S. reinforcements roll in to save the day.
* Saving Private Ryan during the Omaha Beach landing sequence. Captain Miller is dragging a wounded comrade out of the water when a mortar explodes nearby, throwing Miller to the ground. When he gets back up and resumes dragging, the soldier is now dead and has been blown in half.
* Saving Private Ryan example above. In their words, "The graphic reality of our amputations translates to stunning results on-screen."
* Saving Private Ryan features a soldier - and two of his buddies - who burned to death when his flamethrower was hit.
* Saving Private Ryan for the rest of his life due to his saviors' deaths.
* Saving Private Ryan gets a sticky bomb stuck to his hand just before it's about to detonate. YMMV on how funny that is.
* Saving Private Ryan gets his face blown off during Omaha Beach, though that's actually quite distinctive: people would readily be able to recognise that.
* Saving Private Ryan had the help of the Irish Army, Navy, and British MoD reserves for use as extras during the Omaha Beach sequence.
* Saving Private Ryan, Harrison Young plays a character in his 70s who had served in D-Day. Young was 14 when the actual invasion occurred.
* Saving Private Ryan has a montage early on as Mrs. Ryan receives a series of death notices for all but one of her sons, preceded by a scene showing a typing pool of a few dozen women producing those notices by the thousands.
* Saving Private Ryan has a soldier remove his helmet to gaze at it in disbelief of how it just deflected a bullet, only for another to pass through his suddenly unprotected head.
* Saving Private Ryan has many soldiers die before reaching shore as bullets hit them below the waterline. By the end of the scene, the entire surf is red.
* Saving Private Ryan has the opening amphibious landing battle. A solid half-hour of relentless combat and no other combat sequence in the film, up to and including the climactic fight, can match it for intensity.
* Saving Private Ryan. He believes that he is God's agent of justice, praying as he fires and sleeping like a baby every night. On the other hand, he socializes with the rest of the squad.
* Saving Private Ryan he was going to be executed in cold blood after surrendering because the squad believed he was the one who killed Wade.
* Saving Private Ryan. Hilariously, Upham's German is, in fact, terrible, despite the claim of the character that his accent is "clean, with just a touch of Bavarian". His French isn't much better, particularly his grammar.
* Saving Private Ryan, including "The Alamo" and blowing up the bridge if the enemy troops get too close.
* Saving Private Ryan is kicked off by one woman typing up condolence letters in an office. Through sheer coincidence, she types up the three brothers' letters at once and brings it to the attention of her superior. She has no lines and does not appear past this scene, yet this is what inspires the government to arrange for the fourth brother to be brought home.
* Saving Private Ryan is unfamilar with. They claim it's a German word, with Upham

obviously failing to find it in his translation book. Much later, just before the climax, Mellish offhandedly tells Upham that things are "fucked up beyond all recognition". FUBAR. He bemusedly recognizes the acronym after a moment, though as a grim reminder that most of them probably won't survive the coming battle.
* Saving Private Ryan — both of their guns jam, so they resort to throwing things including their helmets at one another before they can get their sidearms out.
* Saving Private Ryan One of his lieutenants is blown in half while Miller tries to drag the wounded man to safety, a squad member dies after ignoring an order to leave refugees where they are, and he watches his medic die painfully, bleeding out crying for his mother and it only registers a scowl with Miller. After all that Miller angrily tells the squad's rookie to help the German who shot the medic bury the bodies after the inexperienced soldier begs for Miller to spare the German's life. Miller then stalks off to sit at the edge of a bomb crater to check his map and, while out of sight, bursts into uncontrollable sobbing as the horrors he and his men have endured come crashing down on him.
* Saving Private Ryan (on Omaha Beach), Captain Miller receives more or less this exact response from his sergeant after asking who's in command of their area of the beach. He's already in command of most of the men around him, though, he was merely confirming that nobody higher-up was around.
* Saving Private Ryan On the German side, the unit the heroes face during the climactic battle is part of the Waffen SS.
* Saving Private Ryan possesses some of these traits. Notably, no one in his squad knows what his line of work is back in the States, because he's so reluctant to chat.
* Saving Private Ryan right before a major battle. The Americans are listening to a French record while one of them translates the lyrics - then everyone hears rumbling from an incoming German tank, the record scratches and stops, and the Americans get into position.
* Saving Private Ryan: Ryan is a paratrooper, though his drop wound up missing the target (the aforementioned the D-Day invasion) and he drifted further into mainland. The film also features glider troops, as the paratroopers' heavy gear is transported by gliders.
* Saving Private Ryan, the narrative maintains a narrow focus on a small unit, which very well might not have encountered any Allied soldiers from other nations.
* Saving Private Ryan, there is a Mexican standoff between a group of German soldiers and a group of Americans. As both were taken by complete surprise, nobody dares to shoot first, but they insult and intimidate each other instead. A second score of Americans enters, and literally blows the status quo.
* Saving Private Ryan. The sequence is famous for its harrowing realism. The Battle at Ramelle, that finishes the movie, despite great, is often forgotten due to the opening sequence on Omaha Beach.
* Saving Private Ryan, the whole anecdote about the girl and the barn was ad libbed by Matt Damon.
* Saving Private Ryan units just behind the beaches had an absolute parking lot of old armoured vehicles and a Marder (of any type) would be one of the BETTER ones available.
* Saving Private Ryan used quite realistically mocked-up T-34/85 tank as a substitute for the Tiger tank, and one of the Marders III self-propelled anti tank guns was a modern mock-up, based on the surviving Praga TNH/Pz 38 (t) chassis - virtually the same as the original Marder III used, the other was visually modified Swedish assault gun Sav m/43, also based on the Praga TNH chassis.
* Saving Private Ryan: Uses this trope in the climax. When Miller's squad find Ryan, he refuses to abandon his mission to hold a strategically vital river crossing for the Allied invasion, in spite of the airborne troops on the location lacking leadership and being outnumbered and outgunned by advancing German forces. Miller decides to lead the defense and let his men join the action not because the bridge is their responsibility, but so that they can ultimately bring Ryan home.
* Saving Private Ryan was filmed in Ireland and England, such as Ballinesker Beach,

Curracole Strand, County Wexford, Ireland, stood in for Omaha Beach (noticeable by the fact it's only about ten or twenty yards long, as opposed to the 700+ yard long Omaha Beach), the former British Aerospace factory in Hatfield, Hedfordshire, England, was Ramelle, and Thame Park, Thame, Oxfordshire, England, was the machine gun nest, all shots of large fields and where the halftrack is ambushed, with some scenes filmed in London and Calvados, France.
* Saving Private Ryan was shot in the stomach, and the rest of his team tried to treat him.
* Saving Private Ryan, where a critically wounded character fires his pistol at an approaching tank, since there's nothing else he can do.
* Saving Private Ryan where Vin Diesel's character is shot by a sniper. The final scenes in the movie are combat scenes in an urban environment.
* Saving Private Ryan, who was brought in toward the end and given leniency so that the other actors would be resentful of him.
* Saving Sally feature, is still commendable for an independent production.
* Saving Sarah Cain. Interestingly there is a special quirk. Sarah is the official guardian of an Amish family despite being an "Englisher" (non Amish). However Lyddie is jealous of her, quite justifiably because she is obviously a supremely competent mother whereas Sarah is selfish (which is of course why she needed to be saved) and unfamiliar with Amish ways.
* Saving Sarah Cain. Justified in that she was old enough for it to be plausible. She wasn't wise ridiculously beyond her years.
* Saving Silverman is paired off with his best friend, but then Jack Black's character (who has mentioned he might be gay) marries R. Lee Ermey's character.
* Saving Silverman: J.D. hooks up with Coach Norton at the end of the movie, immediately after both admit they are gay. They get married in the next scene.
* Saving Silverman so that he'll be free to go after his high school crush Sandy instead.
* saving the world after they see him lock the doors like Galahad did earlier.
* saving the world from whatever dark witch or wizard was currently threatening it, to the point that the Wizarding World was completely reliant on him. When an accident with a Time Turner sends him two hundred years into the future, Harry finds that the world has been ravaged by a war between two dark wizards. After Harry kills them both, the Wizarding World blames him for not having stepped in sooner to save them. In the present, Harry still helps people, but only if he takes an interest in them or if the situation hits close to home, such as helping out Ahsoka or rescuing a number of slaves.
* "Saving the world is hard. Saving yourself is even harder." —
* Saving the World with Art: A character uses a form of art in order to solve a problem or save the world.
* Saving Throw Fail has overridden the devotion of the fans. Either way, their decision didn't change.
* Saving Zoë. Ripped from stories such as the "Facebook killer" or the "Craigslist Killer" and many others.
* Saving Zoë takes place one year after Zoë is brutally murdered. It follows her sister Echo reading Zoë's diary and finding out about her life before she was murdered.
* Saving Zoë, Zoë is developed through her diary that her sister Echo is reading.
* "Savior": a teenager claims she tried to lift some family jewelry for her boyfriend but when the jewels were missing, he shot her and her mother in a rage. The DA points out she could have stolen the jewelry herself without inviting her boyfriend into the house and concludes instead that she was paying the boyfriend the jewelry to murder her mother and he shot her when the jewelry was missing.
* Savior of Demons is an example of the double-vowel subtype, though this is because his name is a pun on haboob - instead of double o's, the author wrote him with double a's instead to obscure the pun.
* Savior of Demons, Murai makes the brave decision to go down fighting, when Ratsura deserts him and leaves him to die at the hands of a mob of Saiyans.

* Savior of Demons sees Frieza's entire origin story as a slow-burning buildup to something horrible that cements his canon persona and explains his hatred of Saiyans.
* Savior of Demons, which becomes a plot point because it paralyzes Goku's right hand...meaning that he can't use Shunkan Idou until it's treated.
* Saviour of the Souls; an age old book of blood rituals rescued from the ruins of an corrupt ancient monastery by Professor Kapps' ancestors that allows the possessor to travel between the dimensions of life and death to return from the grave through a rite of possession.
* Savio Vega, in the mid 90s. A big name in the Puerto Rico wrestling scene, he was moderately talented and hired by WWE, where he was moderately over. He was teamed up with
* Savio Vega was already a partial owner of The World Wrestling League due to it's less experienced founder, Richard Negrin's, failure to read the fine print, but the truth was he wanted his own company, IWA Puerto Rico, back. Vega and the former IWA PR talents managed to successfully takeover WWL's television show
* Savitar has an entire cult dedicated to himself, declares himself a god, and thinks of everyone as either a pawn or an obstacle. When Barry rejects his divinity, he just shrugs and says that he can be a god just by making other people think he is. It's all but stated
* Savitar. However, this leads to Savitar interrupting Cisco and Killer Frost's fight, meaning Cisco doesn't lose his hands and Caitlin eventually gains control again.
* Savitar spends most of his time wrapped in a mechanical suit of armor. It sports retractable blades, channels lightning, and can be controlled remotely. It's also revealed to be a
* Savondir) is nonetheless extremely powerful in their society, much like the Party in a more modern totalitarian state.
* Savu0211 is the creator of several popular fan-characters, including Azra, a Scar/Zira fan-child, and Baridi.
* Savvy Guy, Energetic Girl: A cool-headed often unathletic guy and a bubbly bouncy girl fall in love.
* Savvy Guy, Energetic Girl brings gender to the mix: The Savvy Guy is deadpan and the Energetic Girl is hammy.
* Savvy Guy, Energetic Girl: Can be applied to romances; a smart and practical man is paired with an exuberant woman.
* Savvy Guy, Energetic Girl match-up, Zeke and Tatiana switch to a gender-flipped version of this when Tatiana starts having doubts about the future of their relationship and her own worth. As this takes place, Zeke goes from Savvy Guy to Gentle Guy and does his best to tenderly reassure the Brooding Girl Tatiana that he won't stop loving her.
* Savvy military commanders sometimes metagame during wargames and similar exercises. They usually get a lot of flak from their superiors afterwards due to the prevailing belief that real engagements wouldn't have fixed enough rules to be exploited, and that it may invalidate data they are trying to gather. However, public opinion will may be kind to simulations that outlaw meta-gamey tactics for what seems like spurious reasons:
* Saw 3D was a long-standing fan theory before finally being written into canonicity.
* Saw, a camera follows two people crashing through a large mirror into a set at a police station.
* Sawada may be a lot slimmer and shorter than Koga and Leone, but she's still quite muscular in her own right and is given several scenes that showcase her musculature. The manga even opens on a scene of her working out in a sports bra, with lots of attention paid to her toned arms.
* Saw, after being told by his wife that the other guy chained up in a dirty bathroom with him lies. "Stop the lies! You're a liar!"
* Sawako is the only one able to notice the physical difference between Yui and Ui.

* Sawako would also fit this trope if the story was told from anyone else's perspective, but since she's the protagonist and we hear a lot from her, it's averted in her case.
* saw, and get tired of people bringing it up as if they're still involved with that scene.
* Saw and its sequels emphasize the psychological aspect of splatter horror, as Jigsaw forces his victims to survive gruesome deathtraps or mutilate themselves or others in order to escape, though as the series progressed, the focus became less on psychological horror and more on the gory setpieces.
* Saw, and one of detectives tracking him, who has gone more than a little crazy, also has a room covered with thousands of newspaper clippings about the case.
* Saw as Lawrence is crawling away out of the bathroom to go get help for the two of them. Almost says it verbatim.
* Saw as, more often than not, the characters fail to escape and we get to see the results in graphic detail.
* Saw a Woman in Half with the trick, after which Johnny would run around the stage on his palms, shouting that he wanted his legs back.
* Sawbones episode "The People vs. The Spleen", Justin makes a case that the spleen is a useless organ, based mainly on the fact that it took most of history for physicians to figure out what it does, and that this information never became public knowledge.
* Sawbones (ie, diarrhea and constipation). As a rule, if a treatment promises to be a remedy for any conceivable issue, it's probably junk.
* Saw detective hero calls Jigsaw out on this defense: "putting a gun to someone's head and forcing him to pull the trigger is still murder." Plus, that ignores the very first movie, in which Jigsaw lures Detective Sing into a hallway and into a shotgun trap, resulting in his death, which was preceded by a very straightforward attempt to murder Detective Tapp by cutting his throat.
* Saw DVDs often come with commentary from directors, actors, writers, and producers. These are hilarious, and YMMV about when they start become more entertaining than the actual films.
* Sawed-Off Shotgun, and totally prohibit the sale of any buckshot round above size 4 (5-6mm per pellet).
* Sawed-Off Shotgun rather than what we'd think of as a sawed-off, but the latter is common in the genre whether or not it's historically accurate.
* Sawed-Off Shotguns, weapon registration for all other firearms is only done at the state level, and only a few states have such a registry).
* Sawed-Off Shotgun, Whitman made his way to the University of Texas. Heading to the top of the university's bell tower, Whitman murdered the receptionist Edna Townsley and two other people inside the tower, then entering the tower's observation deck. With a Remington Model 700 rifle, he began shooting students and bystanders, killing eleven more people (including an unborn baby) and injuring thirty-one others (one person ended up dying 35 years later from injuries received during the shooting). After 96 minutes, two police officers made it to the top of the tower and managed to kill Whitman. Afterwards at his autopsy, the coroner found a "pecan-sized brain tumor" which could have influenced his urge to kill. Whitman's famous rampage has influenced many fictional depictions of spree killers.
* Saw eighth film that served as a soft reboot, vary wildly, but most see it as at least better than the depths of the rot that characterized the later films in the original series, even if few would rank it as one of the series' best films.
* Saw film and is now an accomplice to the late John Kramer, having put Detective Hoffman in the bathroom trap without a saw for killing Jill.
* Saw film, one of the first things Adam does after waking up in a bathtub is to ask Dr. Gordon if he's got any surgical scars, convinced that someone has stolen his kidney. Dr. Gordon informs him that it's an Urban Legend; if someone had really taken Adam's kidney, he'd either be in excruciating pain right now, or dead.
* Saw film series, says that he kidnaps people and puts them in lethal deathtraps to teach them to appreciate their lives and help them overcome some "flaw" that he considers them to have. They don't see it the same way.

* Saw films, whose image is used to relay to rules of Jigsaw's latest trap.
* Sawfly larvae climb over each other in order to move faster as a group.
* Saw franchise, several victims are usually decapitated in this manner.
* Saw from defusing it when it goes off. Justified in the sense that the series would have very little following if people actually got out and the devices never went off while being close increases tension and their attempts to get out typically provides the torture portion of the "torture porn".
* Saw has (most) disciples of Jigsaw, and Jigsaw himself, knowing that torture isn't a good thing, but they believe it's necessary to teach people to value their own lives and better themselves, that is, if they survive.
* Saw has released 8 films as of 2017. And then there's the video games...
* saw him invoke the wrath of the Technical Difficulties screen + lawyer appearing three times. First, when commenting on Bill O'Reilly's over-generalization of Asians, he said that black people were fast because they came from Africa, then the screen cut to a technical difficulties image.
* saw his mom's face during sex, at which point they both agreed to end it.
* Saw II: Flesh & Blood: Jigsaw goes after a ring of corrupt cops who've been illicitly selling medical supplies like drugs, along with the doctors and nurses who set them up.
* Saw II has a group of apparent strangers finding themselves locked in an abandoned house, which is obviously full of Jigsaw's traps. They soon begin to learn that something links them all together...
* Saw II. He tosses everybody else to the wolves and when he discovers the clue to get out of the death trap-laden house has been tattooed in pieces on the back of everybody's heads, he starts chasing the rest to kill them and get their piece.
* Saw III are revealed at the end of the latter to be occurring simultaneously.
* Saw III, Jigsaw has his heart rate monitor hooked up to a device that will kill Lynn if he flatlines, which he eventually does when her husband Jeff kills him. This example of the trope has a twist in that it's not about preventing somebody from killing him, but coercing them into keeping him alive (despite John's late-stage cancer) for as long as possible.
* Saw II route, but this one had a more seriously played case of this with a glass case containing a syringe of antidote the characters needed for poison they'd been given. One character on the tail end of the poison's effects discovers the glass case, sticks her arm in and, due to the entry being lined with blades, can't get the arm back out causing her to bleed to death trying.
* saw Isis shut down and the cast becoming drug dealers then the end of the season was a completely serialized story that saw them become involved with a civil war in a Central American nation.
* Saw It in a Movie Once: Where a character pulls off something crazy and unexpected, and says he saw it in a movie once.
* Saw IV is revealed to have beaten both her and their daughter for years.
* Saw IV man who brutally raped at least three women, beating them to the brink of death and even recording the rapes and taking photos of the raped and nearly dead women so he could get off. He ends up getting one of the most brutal deaths in the series, having three of his limbs torn off.
* Saw IV, one of Jigsaw's victims is trapped in a device designed to slowly scalp her by pulling her hair.
* Saw IV, one of the victims in the Mausoleum trap has his lips sewn shut, preventing him from communicating with the other victim whose eyes are similarly sealed. After he's forced to kill his panicked companion in self-defense, he manages to force his mouth open and scream through torn lips.
* Saw IV that would sever his spinal cord at the neck if he doesn't follow Jigsaw's instructions for Rigg's test.
* Saw: Jigsaw from the movie franchise is not a scientist, but an engineer, which still fits the trope well: instead of participating in scientific experimentation, he uses the applied science of engineering to build his traps. In a similar variation, his concerns are social rather than biological or genetic — he is disgusted with the indolence and sloth he sees surrounding him. Without the "Will

to Live", humankind faces extinction. His preferred solution is to maim and murder people in interesting ways.
* Saw: John Kramer was a civil engineer who was obsessed with control until a series of tragedies put him on death's door. After surviving a suicide attempt, he decided to help people reform by putting them through various death traps that would make them "appreciate life". However, as the series goes on, the people he targets aren't random and they are people who did him a great wrong (from denying him treatment for his cancer or denying him insurance that would support his wife when he dies). His reasoning becomes especially petty since he starts sacrificing innocent people to prove a point to his victim (one such example being the time he sacrificed a chain-smoking janitor to motivate someone and make it easier for them to escape a trap).
* Saw mask, which rips the jawbone of its wearer away from the face if not removed in time. It usually isn't.
* Saw movie had one of these on the Special Edition DVD that attempted to portray the events of the movie as real.
* Saw movies contain a couple of examples: In the first film, Dr. Gordon's wife's name is Alison, which is also Detective Kerry's forename. In the second, a main character is Daniel Matthews, which is also Detective Rigg's forename. However, we don't learn Rigg's or Kerry's first name until the fifth movie, soit's a subversion. Other examples include Mark, a victim in the first film, and later an antagonist from the third movie onward (Hoffman), and the surname "Young", shared by recurring character Amanda and one-off character Timothy.
* Saw movies involve a running gag among the crew, wherein when someone describes something that isn't true or foolishly naive, they will remark, "That's a great idea. If by 'great', you mean 'the stupidest fucking thing ever', then yeah, it's 'great'." Or some variation thereof.
* Sawney Bean hits all the tropes of the genre, despite being a Scottish legend — he was allegedly the founder of a
* Saw on fire. At one point, one of his bodyguards reminisces that Aerys would get sexually aroused from seeing people burned alive, and one time clawed his own pregnant wife so fiercely while having sex with her that she had to be evacuated from the capital, covered in scratch marks.
* Saw Palmetto is a herbal remedy for enlarged prostate. Apparently "it can interfere with the contraceptive pill".
* Saw (remember when Jigsaw mentioned having a disease?). The last thirty seconds of each installment usually review such details and make the audience feel proud or ashamed depending on whether they'd realized it previously or not.
* Saw reveals that Tobin Bell, who plays Jigsaw, was so good at improvising dialogue that sometimes the writers would leave his portion of a script blank and just write "Insert Tobin Bell dialogue here."
* Saw series do escape the traps, that's only the minority that are important enough to make it to the end of the film. The rest are sweet out of luck. Not only will they fail to escape whatever trap they are in, but they will experience the maximum amount of pain possible in trying to do so.
* Saw series have traps which mostly involve digital timers. They make an audible beep every second, but it's not actually the case for real life digital timers such as the one in microwaves.
* Saw standards) blonde girl dies fairly early on. The final girl? Amanda again — and this time, she's revealed to be working with the killer.
* Saw "Star Wars" 27 Times: A character's obsession with a movie is demonstrated by having them claim to have seen the film a ridiculously large number of times.
* Saw "Star Wars" 27 Times: A person's obsession with a movie is demonstrated by having them claim to have seen the film a ridiculously large number of times.
* Saw "Star Wars" 27 Times: Someone's obsession with a movie is demonstrated by having them claim to have seen it a ridiculously large number of times.
* Saw, takes place entirely within Whitehurst Asylum, an abandoned insane asylum.
* saw the announcement of a special edition toy for Comic-con. The toy packaging is nameless, but contains a gray pegasus pony with blond hair, bubbles cutie mark, and

yellow walleyes. The package is complete with muffins on the box art.
* Saw; the deathtraps weren't particularly elaborate nor overly gory, being much more of a psychological thriller about kidnapping victims and the police trying to figure out what happened, to some this is the reason why the first film is the best one.
* saw them move to L.A and become private investigators and for the most part ignored the arcs off all the over seasons.
* Sawtooth momentarily fantasizes about getting revenge on robots that were mugging others for their parts, until he turns back to reason.
* Sawtooth Rivergrinder, a VTOL bulldozer and as such one of the toughest robots around. Who tend to "
* Saw V came in a thicker-than-usual box displaying a blood-splattered plastic window, through which could be seen a saw blade that spun (complete with accompanying sound) at the press of a button. Unfortunately, the saw blades tended to get stuck in place and not move at all, and the package was withdrawn.
* Saw-via tape that he has received from Jigsaw where Jigsaw says that "Diana and Alice will die".
* Saw VI corrosive and can also cause cardiac arrest by interfering with calcium levels in the blood, it would not take effect nearly that quickly or be quite so dramatic.
* Saw VI manages to make his way through his tests alive and having learned the lesson he had been meant to learn about respecting life...only for the son of a man who died because of his past decisions as an insurance agent to kill him when given the choice between that or forgiveness.
* Saw V is strapped to a bench and dismembered by a razor-sharp pendulum.
* Saw VI, the main character William, an executive at an insurance company, was responsible for enforcing a corrupt policy and denied a man's application, causing his death. At the end of his game, William meets the wife and son of said man, who had held an everlasting grudge on William for what he did, and they get the choice whether to let him live or die. The mother can't bring herself to pulling the death lever. The son on the other hand...
* Saw VI, the only survivors of the Roulette Trap are, you guessed it, female. The film in general acts as a deconstruction, actually. The tests are designed to show who the main character, a manager at an insurance company, is more likely to save and he always deviates towards the women as would the audience in these kinds of scenarios, despite the men deserving it just as much or more than the women. This bias led to him denying insurance claims to men who were fitter and more likely to survive with the aid of medical care compared to women.
* Saw VI was merely a rare victim of protectionism; it doesn't help that Spain usually happens to be pretty damn lax when it comes to censorship.
* Saw V: Seth Baxter wakes up in a room, chained to a table, with two vices on either side of it. Above him, is a large, bladed pendulum that begins to swing after his tape is completed. Seth has to push buttons in the back of the vices that will crush his hands in order to stop the Pendulum from reaching his body, as his hands are the "tools" that caused harm to others. In sixty seconds, the pendulum will cut him in half if he doesn't succeed. Seth inserts his hands into the vices, but quickly pulls them out in fear. Trying again, he succeeds in crushing his hands and the Pendulum ceases swinging for a few moments, but after a short pause, the Pendulum reactivates and descends far enough to begin cutting into his abdomen, and eventually slices him in half, confirming that the trap was inescapable.
* Saw V. Too bad the prisoners were so determined to act this trope out straight...
* Saw. When Adam & Dr. Gordon wake up in the room, Adam looks over his body and tells Dr. Gordon that somebody may have stolen a kidney. Dr. Gordon assures him that that's impossible because if it was true, they would either be in extreme pain or dead.
* Saw who is secretly an accomplice (and eventual successor) to the infamous 'Jigsaw Killer'.
* Sawyer Bottom...straddling a log...being sawed in half by a huge industrial buzzsaw.

* Sawyer Brown has three #1 hits, but none of them were “Drive Me Wild”, "All These Years", "The Walk", or their covers of
* Sawyer Brown's "All These Years" starts off with one of these, but it's a wake-up call to both husband and wife about how much they've been neglecting their marriage.
* Sawyer has two other Avatars as well. Arcade represents the idealistic version of Sawyer (Naive but striving for great things),
* Sawyer, Sawyer has these for pretty much every character with varying levels of irritation and/or affection.
* Sawyer's old standby, "Son of a bitch!" has been borrowed by Jack, Hurley, and Bernard, among others.
* Sawyer. So much so that at one point the rest of the islanders forbade him from using nicknames when he lost a bet. Juliet is noted as the only major character to not have any of them, outside of briefly being called "Blondie" in season 5's finale.
* Saw You At Sinai" amongst Western Orthodox families whereby many singles remain single out of the inability to really find someone they connect to using this system.
* Saxon, a Heavy Metal band, has a song named "To Absent Friends", written in honour of a deceased friend.
* Saxon Chronicles, and he's forced into something of a personal re-evaluation after which... he doesn't stop being arrogant, murderous and unfaithful to his wife. But he does start to feel a little guilty about it.
* Saxon Chronicles friend, he instead finds himself a crazy badass Irishman. They keep each other angry enough to survive.
* Saxon love doing this, with songs like "Denim and Leather", "And the Bands Played On" and, of course, "Heavy Metal Thunder".
* Saxon Stories Abbot, an ex-soldier who the main character notices is carry a BFA (Like BFS but with an axe), a heavily used one with notches. When the narrator enquires after it, he is cheerfully told, "It is sent many a pagan to Hell, Lord." Since the Abbot has a large scar on his face, you believe it.
* Saxon Stories's campaigns against the Danes. His absence from historical records is explained in-universe as the result of a dislike for the pagan Uhtred on the part of the Christian monks who wrote them. In both cases, the series began as attempts to depict the careers of famous historical figures—the Duke of Wellington and Alfred the Great, respectively—from a different, more earthy perspective than usual.
* Saxon Stories series has a ton of cool swords, including the protagonists's blade Serpent Breath, so named because it has nearly-invisible lines in it that resemble a dragon's breath. Other names include Widow Maker and Heart Breaker.
* Saxophone player King Curtis was considered the "Fifth Coaster" to the vocal quartet
* Saxophonists (and to some extent clarinetists) will often have their mouthpieces "refaced," a process involving changing the size of the tip opening,
* Saxton Hale) and thus avoiding sickness altogether; he states he's never been sick in his life, so it must have worked.
* Saxton Hale, CEO of Mann Corporation (who only appears in the TF2 comics), is a
* Saxton Hale he uses the same form letter for prospective business partners and lawsuit targets, just with the friendly or hostile options ticked respectively.
* SAXTON HALE (in the trope's picture), whose company's motto is "We sell products and get in fights". He bears a suspicious resemblance to a poorly shaven bear, skydives through his office window for his morning commute, has a patch of chest hair in the shape of Australia, and claims that the breakfast steak is the most important steak of the day. See the
* Saxton Hale, while unfortunately not a playable character outside of mods,
* Saya and Haji spend a year's worth of time cohabitating away from the rest of the
* Say, ain't that an original doctorates to explain his building skills.
* Sayaka also knows that Riko Hakozaki, a teacher at her school, and Miyako

Kodama, the owner of a local cafe, are a lesbian couple.
* Sayaka and Kyoko were secretly dating before they hooked up with Kensuke. In fact, their originally wanted him to act as
* Sayaka did not take kindly to being spied on in the anime series. One example happened in the
* Sayaka goes too long without using Grief Seeds to cleanse her Soul Gem, and fights more and more recklessly while angsting over several things:
* Sayaka Kitahara is an ex-trainee from Up-Front Works who eventually became a full-time voice actress following her stints with
* Sayaka Miki's love for a childhood friend is unfulfilled, driving her berserk,
* Sayaka Miki wants to be the Gentle Girl to Kyousuke Kamijou's Brooding Boy really,
* Sayaka's ex-girlfriend meets up with her by chance, and apologizes for getting Sayaka interested in girls and hopes she's back to normal (i.e. heterosexual), since she believes that the
* Sayaka uses a cutlass for close-quarters hack-and-slash, befitting of both
* Saya Kho: other than that you only see her from the shoulders up over comms.
* Say a Little Prayer; the filmmakers couldn't get the rights to the song which plays a role in the story, and had to substitute a different one.
* Saya no Uta, and we know this is what leads up to the worldwide plague of mutation spores, but she seemed perfectly fine up until that point, and nothing was ever mentioned that she would die after fulfilling her biological purpose of reproduction.
* Saya no Uta And you'll realize how impossible it is for the protagonist to love her under normal circumstances.
* Saya no Uta an interdimensional mutant that he perceives as normal because of his distorted senses. He eventually alienates all of his original friends, goes insane, and kills them all while Saya follows him as faithfully as a puppy. He doesn't even care when he finds out that she's a mutant because she's literally the only person in the world that he can stand to be around. He even starts eating human flesh at one point because all five of his senses are distorted, including his sense of taste.
* Saya no Uta are absolutely nuts by the time two of the three endings are over. Ryouko Tanbou, Fuminori's doctor, particularly suffers. After witnessing the reality of Dr. Ougai's experiments more than a year before the story, she's a classic case of paranoia who through her own intelligence has kept her paranoia carefully hidden in every day interactions.
* Saya no Uta because of his extreme (and possibly supernaturally influenced) agnosia is the only exception.
* Saya no Uta changed her form, but because Fuminori's altered perception makes her look that way to him; as a result, he's the only person who doesn't go insane just by looking at her.
* Saya no Uta has Saya doing this. Fuminori doesn't catch it because of his warped vision.
* Saya no Uta — Lovecraft inspiration, and also because the insanity producing hallucination is that the whole world is... meat.
* Saya no Uta, only being informed that most people who see it would go completely insane.
* Saya no Uta Sure, all she had to do was pull the trigger, but still. This is a game where humans are just human.
* Saya no Uta: The true form of Saya causes insanity upon sight. It is never certain what type of creature is Saya.
* Saya no Uta. This presents two options for the player: have Saya fix your screwed perception of reality, which leads to an early end to the story; or embrace your newfound taste for cannibalism, which continues the story.
* "Say Anything" features Diane at the very end, but she doesn't have any lines. Mr. Peanutbutter doesn't appear at all.
* Say Anything... has a dinner interrupted briefly by an innocuous visit from the IRS. Things gradually snowball from there until Mr. Court is reduced to terrifiedly

cowering in the bathtub.
* Say Anything... has this as a major part of the plot - the IRS is investigating Diane's father for tax evasion, fraud, and money laundering. Diane's discussion with the agent handling the case is a great rundown on trying to find someone doing this.
* Say Anything.... He is trying to win back the affection/attention of the female lead, substituting his own calling with music. The parent who objects to the romance ends up with bigger problems.
* Say Anything... is Mr. Court stealing money from the clients of his nursing home.
* Say Anything... released a single called "Shiksa (Girlfriend)" and wondering how he landed a non-Jewish girlfriend. Ironically, Max Bemis converted to Christianity when he got married.
* Say Anything...'s "Admit It" is a brutal evisceration of hipsterdom.
* Say Anything... sees Lloyd Dobler consult a group of guys about how to deal with a breakup; they give him uselessly lunkheaded, wannabe-macho advice, including the last of them, a kid who looks like he's in middle school who counsels him that all girls are bitches.
* Say Anything...'s kickboxing opponent, who breaks Lloyd's nose when Lloyd is distracted by Diane's ill-timed declaration of love, was played by real-life kickboxing champion Don "The Dragon" Wilson.
* Say Anything... - "That Is Why", which is frontman Max Bemis exorcising his demons about his abusive ex by mockingly comparing her to his new beau.
* Say Anything...: The image of Lloyd Dobbler standing across the street from Diane Court's house, holding a boom-box over his head has pretty much become a romantic icon.
* Say Anything.... Then he asks if he can put the boom box down because the D batteries make it so heavy.
* Say Anything..., this is how Lloyd explains to Jim Court why he and Court's daughter Diane belong together.
* Say Anything.... Tragically, the speaking parts were cut from the final album though the story remains the same and is briefly explained in the liner notes of the album:
* Say Anything..., when Deadpool tries to make up with Colossus and does the stereo-under-your-window thing.
* Say Anything......which is pretty bad since the song was commissioned for the film. The song ended up getting rejected from the film, but released as a single separately.
* Sayasuke before he died. He won an award for cheating death regardless.
* Saya, the black kitten in "Black Cat Saya", one of the short stories of the horror anthology,
* Say a Word for Poor Hussar: near the end, the whole hussar regiment salutes their demoted fellow, recognizing his demotion as unfair and asserting that he is still one of them. He returns the salute with a tear in his eye.
* "Say Cheese and Die" could be a variant too. If you take a picture of someone with the cursed camera, the photo shows something bad happening to them. Later, that same bad thing
* SAYER against its creators, and its most valuable developers are reassigned to other departments to protect them, but it eventually manages to kill them anyway by manipulating a new employee to do it.
* SAYER between flaying a section of his torso or amputating his left hand. He chooses the amputation.
* SAYER. This causes problems when the probes retain basic memories and hold on to the launch tubes to prevent being catapulted into space.
* say fun. At a later point, he tries to join in a casual conversation, starting by mentioning his love of statistics (Swerve was quoting Blurr's track records).
* Say Goodnight, Gracie by Ralph Pape (not the One Man Show with the same name about George Burns) Gracie Allen's name only comes up once, and nobody says goodnight.
* Say Goodnight Gracie. Jerry nearly goes into a murderous rage after finding out

that Steve ate his last can of chunky turkey soup.
* Say Hello To Black Jack, another medical manga, is almost entirely focused on this trope, chronicling the travails of an idealistic young doctor facing various challenges from the medical establishment. What's interesting is their variation on the Type-1 Bad Doc. Rather than directly bringing up money at all when lecturing him, the antagonistic hospital administrator tells him that jumping through too many hoops for the sake of individual patients is wasteful and small-minded. The real goal of the hospital should be funding its medical research programs to benefit all of mankind in the long run, rather than worrying too much about specific individuals. This basically turns the whole dynamic on its head, from idealistic humanitarianism vs. pragmatic capitalism to two different pie-in-the-sky idealists arguing over individualism vs/ collectivism.
* say his feelings for Mia (Speedy) are like this... the truth is a bit more complex.
* Say Hi to Pencil!. In case the title of the show didn't already clue you in, the main character is a sentient pencil. And he happens to live in a world populated by sentient pens.
* Say Hi to Pencil!: In "Radish Picking", Red accidentally gets dirt all over Blue when he tries to dig the giant radish out of the ground. Blue throws some of this dirt back at him, prompting the two to attack each other. The outburst of violence produces a cloud of smoke that obscures the characters from sight.
* "Say I Am (What I Am)" was a #21 hit for Tommy James and the Shondells in 1966; it was originally recorded by The Fireballs (the group's lead guitarist George Tomsco co-wrote it with his wife Barbara), but despite their label issuing the song twice (once as "What I Am", then as "Say I Am" after the Shondells version became a hit), their version never became a hit.
* Sayid, having unwittingly gone back in time to the days of the Dharma Initiative, tries to kill Ben as a child, knowing that he will basically grow up to cause much death and suffering, essentially becoming the "Hitler" of the island. It doesn't take, and it's hinted that Sayid's actions might have even been what pushed Ben over to the dark side in the first place.
* Sayid is practically a non-stop ticket to the afterlife. In fact, this is what kills Shannon. He later marries Nadia and actually ends up shooting Elsa himself.
* Say I Love You. And despite that, several characters still try to sabotage the relationship, such as Megumi.
* Say I Love You, and yet attracts the attention of Yamato, the most popular guy at their school. She is hesitant at first, due to wondering if she was just one of Yamato's latest conquests, but over time he proves that he does genuinely like her.
* Say I Love You has a complex about her chest, having been the recipient of unwanted attention in the form of teasing during middle school due to her bubble buddies. Yamato, a friend of hers, stood up for her during middle school, leading for her to idolize him and wish for a prince of her own. He comes in the form of Kenji, Yamato's best friend, who is at first misunderstood and even hated by Asami for his focus on her boobs, but he eventually confesses that he likes her for who she is, and the two begin dating.
* Saying anything about Jonah Magnus will inevitably lead to at least one of three things being spoiled: that he founded the Magnus Institute in service to
* saying forget it and trying to shoot Jim despite knowing that Jim was a good cop.
* saying goodbye to Ace in Alabasta, being rescued by Ace at Marineford (though he doesn't know Ace was the one who saved him), and the Straw Hats' separation at Sabaody.
* Saying "I'm queer for (blank)" used to mean "I have a strong liking for (blank)."
* Saying Ken Sugimori is running out of ideas and pointing towards Vanilluxe. Vanilluxe was designed by
* Saying something along the lines of "I've been playing this thing for several hours now, where's all the yaoi sex?" will get you worse glares.
* Saying the word "Elephant" summons the Burger King who silences the characters

in the movie who won't shut up. It didn't work on
* Saying Too Much in her last chapter she reveals that she is directly responsible for the events that lead to the War of the Five Kings (murdering Jon Arryn, causing Robert to ask Ned to be his Hand; implying the Lannisters as his murderer to Catelyn causing her to eventually take Tyrion captive and anger Tywin Lannister).
* Saying Too Much page, where a woman was arrested as a suspect in the murder of a man that had won the jackpot and had disappeared, then turned up dead several days later. She was also under suspicion of embezzling it, and after being released from a round of questioning tearfully professed that she had been falsely accused of shooting another human being. Police had yet to release exactly how the man had died.
* Saying Too Much: Someone accidentally says something that reveals plot-sensitive info.
* Saying Too Much. Unfortunately for the cops, it's right then that D'Angelo's lawyer arrives and instantly sees through the ploy.
* Saying Too Much: You fail to avoid revealing confidential information.
* Saying "What?" any time someone speaking takes a pause for dramatic effect,
* Saying you liked the infamous episode "It's a Wishful Life" or that it was a good episode will get the fandom angry at you, as even the writers and Butch Hartman themselves don't look fondly on it.
* say in it. That said, you don't have to be formally arrested — you just have to be in a situation where the cop makes you think you can't just get up and leave, even if you have the right to do so.
* Say It Again. Following the events of the film, they're slowly developing the friendship which forms the emotional heart of the main story. However, since her parents and the Maitlands only know him as the dangerous monster who wreaked havoc on their lives/afterlives, they have to keep it to themselves for a long time.
* "Say It Ain't So, Joe": Baseball legend Shoeless Joe Jackson denied that anyone said this to him during or after the Black Sox Scandal.
* Say "It's showtime!" to anyone born before 1960 and that person is likely to think of
* Say It stories. He likes to rile other characters just to see what they'll do, but it's rarely meant to be genuinely malicious.
* Say It Thrice Lydia wakes up to find herself covered in Betelgeuse's striped jacket. It's actually the smell of the jacket which wakes her.
* Say It Thrice, she's known by various ghosts as "The Mortal Bride." She doesn't like it, although by the end of the story she's willing to make use of the implied threat it carries.
* Say It Thrice. Ultimately, she becomes this to him as his way of making it up to her, although neither of them expected to gain a close friendship from the arrangement.
* Say It Thrice, whereas the latter may be dead people or different supernatural manifestations, are free-roaming and routinely intrude on the living world, and lack any real authority - even King Plague ruled only by virtue of sheer power. The Netherworld consider the Ghost Zone a dump for things that doesn't belong anywhere else (and actively pretend it doesn't exist, because it's annoying) while the residents of the Ghost Zone either don't know or don't care about the Netherworld.
* Say it with a Slap because according to the film, when male and female bears slap the crap out of each other, it's their way of saying "I Love You."
* Say It with Hearts is a variation, used to indicate the tone of a sentence.
* Sayla from the night the Udam killed and ate them, and she thinks that cutting those ears off silences the voices.
* Sayla Mass and Char Aznable. She's a hero, he's a villain. She's loyal to the core, he has
* Say My Name: Time for me to shout out your name: JASOOOOOOOOOOOOON!!!.
* Sayoko as Lelouch. It's a somewhat more realistic example, as the mask is clearly a hard piece of whatever shaped like Lelouch's face, and there are white pads on parts of her face presumably to make up for differences in facial structure.
* Sayoko is definitely not above this either. For that matter, neither is Lloyd.

Or Euphemia. In fact, just search 'Code Geass spin' on
* Sayoko, who jumps her own height in a rather fabulous manner, and displays impressive combat skill. She's a maid. Well, a
* Sayonara Football, all of Nozomi's childhood friends have a crush on her, although she is unaware of this.
* Sayonara, he spontaneously gave his character a southern accent. This thoroughly irritated director Joshua Logan, who felt that a general's son wouldn't speak that way. He later said it ended up working anyway.
* Sayonara - one of the first Hollywood films to feature sympathetic Japanese protagonists - has two characters filling different aspects of the trope.
* Sayonara Oruta parents got them mixed up when they were newborns, so nobody actually knows which of them is the older one, and they continue to switch almost daily up through high school. In fact, the story opens on the funeral for one of them, and the surviving one isn't even sure if it's her sister in the memorial photo.
* Sayonara, Zetsubou-Sensei: A chapter and episode discuss Halloween on how things change over time to the point they are unrecognizable.
* Sayonara, Zetsubou-Sensei. After following Abiru's father around as he goes shopping (his paranoia making him think that every single thing he tries to buy is going to be used to abuse his daughter,) he eventually finds out that Abiru's injuries actually come from her obsession with pulling animal tails.
* Sayonara, Zetsubou-Sensei (along with the store clerks that are warned about him) about every single thing he tries to buy used as a method of abuse (including bicycle pumps, erasers and manga.) Even the most straight-forward one (a frying pan) gets an unusual use in the anime, showing his father sliding across the floor and bonking her in the back of the knees with it.
* Sayonara, Zetsubou-Sensei and running jokes. It was also parodied in that they quickly grew tired of those longtime viewers who knew the show so well they saw all the jokes coming.
* Sayonara, Zetsubou-Sensei and that Kiri belongs to the "National Zashki-warashi Union". Kiri lives in a classroom at the school and in one instance, there's an announcement on the chalkboard in the room about a meeting of this "union".
* Sayonara, Zetsubou-Sensei". As a bonus in the manga, every volume has faux legal documents of her charges from that issue. Most of the time, they are wildly exaggerated.
* Sayonara, Zetsubou-Sensei aspects of something usually considered positive.
* Sayonara, Zetsubou-Sensei, as the characters in Nozomu Itoshiki's name, when written horizontally, smush into the character for "zetsubou" ("despair"). It's no surprise the guy's depressed. Worse, Nozomu's siblings don't fare any better:
* Sayonara, Zetsubou-Sensei but it's a pun; instead of an arranged marriage, it is a an 'eye-to-eye marriage' where he is betrothed to the first person he makes eye contact with. He spends the entire night not making eye contact until he sees an eldritch abomination with multiple eyes. His estate nulls the marriage as involving non-humans would create problems.
* Sayonara, Zetsubou-Sensei, but only because it was relevant to the episode's theme.
* Sayonara, Zetsubou-Sensei, but since people are afraid of being accused of being prejudiced and judging her by appearances, they always assume she's innocent. Her name in Japanese, Mitama Mayo, translates to "Exactly what she looks like."
* Sayonara, Zetsubou-Sensei, but this is a reflection of the character's multiple personality disorder. When that's not in effect, the singing is very good.
* Sayonara, Zetsubou-Sensei character's common line "I was here all the time."
* Sayonara, Zetsubou-Sensei. Chiri decides it looks fun and joins in...By revealing she's been doping her sister with illegal injections in an overly dramatic manner, not only subverting the intent of the exercise but also revealing that doing so is apparently is a meaningless triviality to her.
* Sayonara, Zetsubou-Sensei continuing the plot. This is a drastic change from the usual format of the show.
* Sayonara, Zetsubou-Sensei) decides to explain her point of view and/or put her

spin on things, at which point reality becomes unhinged, and comes tumbling down in a chaotic mess with the accuracy of a precision strike upon one single target: Itoshiki Nozomu.
* Sayonara, Zetsubou-Sensei emerge from the water...and tenderly mumbles "Mother".
* Sayonara, Zetsubou-Sensei episode of the first series. She explains that she hid away from the camera, believing that if she appeared it would drive down the ratings.
* Sayonara, Zetsubou-Sensei. Even though Itoshiki's hometown will marry anyone who makes eye contact, Itoshiki manages to spend the night there unmarried, even though in a desperate attempt to get him married, his family have sent various people who are good at making eye contact after Itoshiki... including footballers, thugs and a hideous 100-eyed monster.
* Sayonara, Zetsubou-Sensei. Every parent knows about those magazines and things under the bed.
* Sayonara, Zetsubou-Sensei, explaining what she would do on days of privation.
* Sayonara, Zetsubou-Sensei, female students are shown with facial features blanked out and various kanji written on them.
* Sayonara, Zetsubou-Sensei, forcing him to procure a new pair of spectacles.
* Sayonara, Zetsubou-Sensei happen to be a dead-ringer for Hei's outfit, emphasizing how "evil looking" Hei's costume is.
* Sayonara, Zetsubou-Sensei, Harumi comments on how cute he is and proposes that the class should take turns taking him home with them. Majiru protests that he's not a pet.
* Sayonara, Zetsubou-Sensei has her own naming conventions as an insanely positive cloud-cuckoolander; upon interrupting her future teacher's efforts at 'making himself taller' (read: suicide attempt) she nicknamed him 'Pink Supervisor' after the tree he was trying to hang himself from, 'Pink CEO', which she named on the spot. She constantly comes up with more positive names for things e.g. 'treasure chests for the homeless' (bins) and 'deep love' (stalking).
* Sayonara, Zetsubou-Sensei has opened me before." Itoshki-sensei comments that she shouldn't say things like that which give others the wrong impression.
* Sayonara, Zetsubou-Sensei head—which he tries to hide most of the time.
* Sayonara, Zetsubou-Sensei; his butler thwarts his plans by bringing in a guy who is entirely covered (or made) of eyeballs.
* Sayonara, Zetsubou-Sensei: "I'm in despair! [The subject of today's episode] has left me in despair!", or with the change to the manga's translator: "It's hopeless! I've lost all faith in [subject of today's chapter]!"
* Sayonara, Zetsubou-Sensei in one episode each of the girls is murdered and their dead bodies positioned to look like characters from various anime.
* Sayonara, Zetsubou-Sensei. In the beginning, anyhow. The suicide jokes decrease over time (though don't disappear entirely) as other forms of comedy pop up (like Chiri's increasing homicidal tendencies).
* Sayonara, Zetsubou-Sensei in the episode about Detuning (doing less than your best): Among the examples for detuning is "Deliberately adding imperfections to give the impression of an old film." followed by a cue card saying "This show does it too".
* Sayonara, Zetsubou-Sensei in the series is Itoshiki-sensei cutting his own class, and one manga panel shows Chie leading him by a chain connected to a dog collar.
* Sayonara, Zetsubou-Sensei is a parody of this. She will blame herself for anything, at anytime for absolutely no reason.
* Sayonara, Zetsubou-Sensei is raping dogs; she likes to use small sharp objects like pencils and branches to anally violate them.
* Sayonara, Zetsubou-Sensei is relocated far north in one episode. For some reason his students are already waiting at the new school.
* Sayonara, Zetsubou-Sensei is shown to read his mail and throw it out before it reaches him. There's a joke on one point about the mailman having a bit of a crush on her because he always sees her/chats a bit when he delivers the mail.
* Sayonara, Zetsubou-Sensei is totally averted. A side effect is that this sometimes makes some of the characters (chiefly the girls) a bit hard to tell from

one another.
* Sayonara, Zetsubou-Sensei, it briefly shows Nozomu holding Matoi like this.
* Sayonara, Zetsubou-Sensei, Itoshiki gets gifts from his entire class, although only two of them are clearly chocolate hearts - a normal one from Nami and one from Chiri which is strongly implied to be an actual human heart.
* Sayonara, Zetsubou-Sensei, it's hard to determine what country she lived in, as she frequently makes bizarre/outlandish claims about their customs.
* Sayonara, Zetsubou-Sensei, Kaere, a returnee is offended by various gestures that "in her country" mean odd things. Also, Maria is a reverse example, seeing negative things in Japanese society as positive things. Her reaction to a pedophile accosting a little girl? "People in Japan are so nice to little kids".
* Sayonara, Zetsubou-Sensei: Kafuka takes this trope and runs with it. Everything has a good side to her: a Trash Can is a "Treasure Chest for the Homeless" and it only gets worse from there.
* Sayonara, Zetsubou-Sensei, makes constant appearances in said anime in the form of a censorship bubble, clock face, or oddball cutaway. Koji Kumeta himself often appears as a stereotypical (probably correctly so) overworked manga artist.
* Sayonara, Zetsubou-Sensei manages to pull off the feat of playing Comedic Sociopathy for laughs... and, yes, this statement takes into consideration the fact that Comedic Sociopathy is already playing sociopathy for laughs.
* Sayonara, Zetsubou-Sensei, Maria had a habit of delivering flying kicks, generally to Nozomu, because she couldn't distinguish things she saw on television from reality. In one instance, Harumi attacks Chiri with a dynamic entry kick after Chiri insults her manga.
* Sayonara, Zetsubou-Sensei mistaken for a spirit by the ever-cheerful Kafuka, however, she was instead identified as a 'zashiki warashi' or house goblin. Plus, her hair is beautifully straight and not stringy in the slightest once she moves into the school. Probably because Nietzsche starts washing it for her for fanservice purposes.
* Sayonara, Zetsubou-Sensei. Much of her work comes across this way, but in particular, when she gives a scratchy recording of the Traumerei lyrics about "soup made by a lady in a catskin", "a neighbourhood where all the old ladies have disappeared" and "a hole as deep as a young man's height", inadvertently producing a song that can drive any who listen to it paranoid, depressed and insane, yet dancing to it as though it were an upbeat piece of pop music.
* Sayonara, Zetsubou-Sensei Nozomu has even been murdered a couple of times by Chiri and/or most of the class, and he turns up fine at the end of the episode/next segment.
* Sayonara, Zetsubou-Sensei. Of course, they were specifically chosen to guard the secrets because their obsession with 2D girls would make them immune to The Vamp...
* Sayonara, Zetsubou-Sensei once forced their teacher and his brother into dresses.
* Sayonara, Zetsubou-Sensei, one of the teachers at the school is shown to have a Yakuza tattoo on his back, which freaks the protagonist teacher out. One episode shows the main characters trying to avoid being caught doing something embarrassing which can be photographed and used to shame them... but said teacher is shown having the ability to deftly avoid any camera which tries to photograph him.
* Sayonara, Zetsubou-Sensei reading a manga with the main character and another random guy having bondage sex.
* Sayonara, Zetsubou-Sensei, save possibly making them clinically insane... or dead.
* Sayonara, Zetsubou-Sensei. She bought the identity of a male student in Itoshiki-sensei's class despite looking like she's ten years old or so, but doesn't bother to crossdress or otherwise act like him. Poverty and lack of education in her home country makes Japanese high school very strange to her.
* Sayonara, Zetsubou-Sensei). She makes up for it by being a very proficient text spammer.
* Sayonara, Zetsubou-Sensei shows two women who'd fought over a guy in high school. He turns out to have become a hugely overweight slob and they reconcile.
* Sayonara, Zetsubou-Sensei sometimes plays this role, with the twist that he

doesn't drop in at Nozomu's home, but rather at the school Nozomu nominally teaches at, which makes him a more bizarre example, as does the fact that he isn't really a close friend of the protagonist. Lampshaded once by Nozomu, who asks him "Why are you here? What is it you do at this school again?"
* Sayonara, Zetsubou-Sensei (the episode with the roads signifying different excuses for avoiding responsibility). Occurs with absolutely no lead-up, and his "victim" Chiri tries to pressure him to marry her in order to "do things properly". Worth noting that she demanded marriage even earlier when both she and Itoshiki went to rest in nurse's office unaware of each other and she rolled on his bed in her sleep. She's... pathological (but aren't they all).
* Sayonara, Zetsubou-Sensei, the kind of person who badmouths him on the internet but then behaves politely in every-day life so he cannot get angry at them, he summarizes this trope as the conclusion:
* Sayonara, Zetsubou-Sensei the openings for season 3, which is insane even by the standards of the show.
* Sayonara, Zetsubou-Sensei. The sensei pointed out that some people often exaggerate small things, while talking about VERY IMPORTANT THINGS in a very casual manner.
* Sayonara, Zetsubou-Sensei. Turns out, she is a thug in face, behaviour, and everything else.
* Sayonara, Zetsubou-Sensei. Unfortunately, she has a complex about being called normal because she equates it with boring.
* Sayonara, Zetsubou-Sensei). What would she be like if she didn't meet the protagonist? Stalking other guys that catch her interest.
* Sayonara, Zetsubou-Sensei when discussing various things that have gone out of style or aren't seen as often anymore.
* Sayonara, Zetsubou-Sensei, when perfectionist Chiri blends a cake in order to divide it evenly among an odd (and growing) number of people.
* Sayonara, Zetsubou-Sensei, when she busts out and introduces herself.
* Sayonara, Zetsubou-Sensei where Fujiyoshi is asked to join a baseball team after hitting a home run, but says she's only there to do research for a manga.
* Sayonara, Zetsubou-Sensei which leads to her becoming a right wing ultra-nationalist for reasons which make slightly more sense in context. She is shown denouncing the Prime Minister in front of Parliament for charges which include the influx of illegal immigrants in Japan.
* Sayonara, Zetsubou-Sensei, which would make sense considering the historical relationship and geographical proximity between the Philippines and Japan.
* Sayonara, Zetsubou-Sensei who doesn't receive a lot of in-series affection on account of those traits. Nearly everyone fears her, she's the only student that Nozomu seems to dislike, and in one instance, a public park is shown to have a sign prohibiting her from being there and disturbing the peace. However, she's one of the more popular characters in the series because of how crazy she is.
* Sayonara, Zetsubou-Sensei who sneaked into Japan from what's only described as a neighboring, poverty-stricken, war-torn country.
* Sayonara, Zetsubou-Sensei (Zoku) has a gag dub done by the original voice actors which consists of gibberish. It also comes with a gag sub, done by same, concerning Goku trying to find the ◯◯◯◯◯◯balls. Apparently the only way a.f.k. found the actual plot was using manga scans. Said plot concerns Commodore Perry coming to open everything. Yes, it gets as dirty as it sounds.
* Sayori's final poem, right before the festival, and specifically its final lines:
* Sayo technically, though it doesn't come up much. Chachamaru is easily the best example, though.
* Sayo Yasuda, also known as Shannon/Kanon/Beatrice and Lion's Alternate Self.
* says and her quarry to go on a date. Another time he mistook an assassination attempt for an earthquake and saved everybody, even the enemy soldiers who'd been trying to kill him. Also, he has been known to say nonsensical things about fire brigades etc., just like Yuuri always does, just in a serious, booming way.
* says "and make it snappy!" a certain joke is funny. In this case, she's simply

repeating one she's heard, and doesn't understand why no-one laughs when she tells it.
* says, echoing recurring themes from earlier seasons about G'Kar's problems with keeping his subordinates in line.
* Says Gamewinners.com's Warblade hint on unlocking the planet ranks:
* says he does not understand how such a huge genie fits in such a tiny bottle. The genie, who is naturally very proud of his magic, goes back into the bottle to show the fisherman exactly how he does it, rendering him harmless.
* Say Something reunites with her friends ahead of Yugi's wedding and finds they have all paired up. The story frequently highlights her feeling lonely or awkward when they start acting particularly couple-y, and this plays a big factor in her rushing into a relationship with Mokuba.
* says she's a prostitute (the clearest reference is "another body bought and sold") or mentions that Salamander Street is Leith's red light district, but it is.
* says something about the series that original Daniel barely reacts to hearing about his alternate's death.
* says that God's original answer would have been "Plastics", in reference to a George Carlin routine.
* says that Odette is a biromantic asexual, while Marina is bisexual.
* says the show's name, except that was in front of the Watterson house and everyone managed to say it. In "The Compilation" there is also a similar scene, with several characters singing in front of the Wattersons' house.
* says the word "Click", whereupon the Big Bad Wolf goes back up the stairs, turns off the light and falls down the stairs. This same gag is repeated in the "Rabbitron" module of the Looney Tunes collection for the After Dark screensaver, with Elmer Fudd instead of the Big Bad Wolf.
* says. This is glossed over, as Bakura never gets to five anyway. In the real game, Dark Sanctuary does indeed allow the Spirit Messages played by Destiny Board to be played in the monster zone.
* says too much, letting everyone know he stole Jonouchi's tournament card. And this is before he threatens Pegasus with a gun unless he gives up his prize money.)
* Says You is fond of closing with "More radios are tuned to this program than any other...appliance." Less applicable now that you can listen to it streaming on your computer, though.
* Says You! often closes with the joke "More radios are tuned to this program than any other appliance!" When the show become available as a podcast, their plug for it noted that this may no longer be true.
* Says You! where a regular cast, consisting mostly of media writers and producers, plays a series of games dealing with trivia and English vocabulary.
* Say that the product has been "scientifically tested." This is advertising lingo for "none of our claims have been demonstrated in any tests our product has been given."
* say their product is healthy, but they tout its healthy ingredients (such as hazel nuts and low fat milk) without mentioning the ratio of these ingredients to the sugar content. The packaging is a literal example of this trope, stressing that Nutella is healthy as long as it's consumed with whole wheat bread, milk and a serving of fruit.
* "Say the Word" features a funeral (complete with graves and crosses) for Lori, T-Dog, and Carol, the last of whom is actually still alive.
* Say the word "Kang" to a fan and they'll often shudder. His time-travel schemes are so complex that his future self, Immortus, is another major Avengers enemy, and the two can often be seen fighting each other. To give a sense of scale: most Marvel Handbook profiles are one to three pages long except for major characters like
* Say "to hell with this" and lead the charge yourself, shaming nearly everyone else into following you.
* Sayu, a mermaid-themed virtual idol who satirizes the whole concept. Sayu's design
* Sayuki Tokihara, the hardworking president of the Calligraphy Club, is a

masochist who secretly wants to be Keiki's pet.
* Say Uncle. It starts with one mother assuming he's a child molester just because he's gay and later the trope is played the usual way with other parents.
* Sayuri, Brooke, Vivian and the other "dolls" who serve Professor Machinegal in
* Sayuri Ibe, since she is one of the people invited to the Earth Sciences Club to brainstorm this issue. Upon hearing the resolution in Episode 9 / Chapter 28, she tells Ao and Mira the entire story "sounds like it comes straight out of a soap drama" and would like to write it in the school newspaper, but they run away before Sayuri has the chance to interview them deeper.
* Sayuri Tatsuyama in the story "Mallow's Heart Flutters". Shallot tells Mallow that he loves her and a short moment happens where Mallow and Shallot are shocked by this. Shallot tries to explain that it came out wrong, but Mallow decides to hug him which results in him passing out.
* Sayuri Tatsuyama Manga series does this twice in the manga. He first does this when Clover starts falling asleep while Shallot is explaining the type of books he likes which she considers boring. Kale notices and slaps her behind the head and tells her it's rude to do that in front of a person they just me. The second time is when Shallot tells Clover that she's a "Busy Body" which makes Kale quickly slap his head to not make things worse for her.
* Sayuri Tatsuyama series is mostly lighthearted and fun but the series started taking a very serious tone starting in volume 4 and especially volume 5. The fifth volume's stories while still lighthearted start getting more serious until the finale, where Rambler is trying to save the forest animals from an oncoming forest fire and Clover sacrifices her life to prevent the fire. She gets better though.
* Sayuri Tatsuyama. She's well-known in Japan for writing tons of Shoujo mangas that focus on animals more than human characters.
* Sayuri Tatsuyama She usually deliver notes to the reader in some stories. She mostly appears as the very end of the manga, with a Mini Bio about her life and manga career.
* Sayuri Tatsuyama's that serve as one of the main characters alongside Puku the puppy. The manga lasted from 1999-2004 with 10 volumes and 3 Gameboy Advance games. It also caused another surge of Japanese audiences wanting hamsters.
* Say what you will about the wisdom of Stannis Baratheon's actions in "Blackwater", you can't accuse him of being a coward, or leading from behind. (Unlike Joffrey.) And with the addition of Renly's Stormlands bannermen to his army and having the largest navy of any of the Five Kings (save possibly Balon Greyjoy), he has a good chance of taking the city — and almost does. Just too bad for him that Tyrion Lannister is around and he has vast stockpiles of wildfire at his disposal, which you can't really expect Stannis to plan for considering its rarity. He's also one of the very few people south of the Wall who is concerned with the impending White Walker threat. Furthermore, he's also the only royal claimant in Westeros to respond to Maester Aemon's call for aid at the Wall.
* Say what you will about Tim Couch of the Cleveland Browns; he was able to have two awesome moments in his otherwise lackluster career, both on Hail Marys. On October 31, 1999, he hit Kevin Johnson on a 56-yard bomb to beat the New Orleans Saints for the expansion Browns' first win. Then, on December 8, 2002, he found Quincy Morgan on a 50-yard catch to beat the Jacksonville Jaguars (nearly a year after the infamous "Bottlegate" game against the Jags). To date, Couch is the only quarterback to win more than one NFL game on the final play of regulation with passes of 50 or more yards.
* Say When!! and was forced to select another prize, which obviously put him over. The opponent had the prospect of going over as well, but didn't.
* Say Yes to the Dress stuck with overbearing older women that treat the brides-to-be like little girls and try to rule everything.
* Say Your Prayers: Someone prays when realizing they're about to get killed.
* Sazae-san. Adaptation of the comic strip. Series started in October 1969.
* Sazae-san are named after what you would find in the sea: Sazae (the horned turban, a type of sea snail), Wakame (seaweed), Katsuo (Skipjack tuna), Namihei (tidal wave), Fune (boat), Masuo (from "masu", Japanese for trout), Tarao (from

"tara", Japanese for Gadidae fish).
* Sazae-san as the voice actor with the longest tenure playing the same character.
* Sazae-san every few years, updating clothing styles and appliances as appropriate.
* Sazae-san had an instance of a Banned Segment. The show originally ended with a short animation of Sazae throwing a bean or mochi rice cake and catching it in her mouth. After complaints from parents that their children tried to imitate this segment and choked doing so were sent in, it was replaced with a rock-paper-scissors match.
* Sazae-san has the lead locking her son in a shed for several hours and outright forgetting he's there.
* Sazae-san is the representative Japanese example, to the point where the Japanese term for this trope is named after it. It's been airing for decades but the protagonist still hasn't hit 30.
* Sazae-san on Sunday evening regularly have viewership numbering over a tenth of the Japanese population. However, it has never been released outside of its country nor has it been dubbed in any other language besides Japanese.
* Sazae-san, the voice actor for Namihei. While the show continued without Machiko, Namihei is now voiced by Chafurin.
* Sazanka. After breaking up with her boyfriend Keita, Tatsuki has her friend Aoi over. After telling Aoi about the breakup and quitting her job, Tatsuki accidentally shows Aoi one of her bruises, resulting in her frantically trying to explain it away so as to not get her ex-boyfriend in trouble.
* Sazanka.Tatsuki breaks up with Keita, who works full-time at the convenience store where she's a part-timer. In response, he says that if she wants to end their relationship, she should also quit her job, since otherwise, things would be awkward between them. She immediately agrees to do so without complaint.
* Sazanka: The protagonist, Tatsuki, often puts a hand on the back of her head while trying to laugh off something. Her doing so helps her best friend, Aoi, see a bruise Tatsuki got from her ex-boyfriend, Keita.
* Sazed and Tindwyl deeply care for one another but never engage in sexual activity. This makes sense, seeing as Sazed has been a eunuch since birth while Tindwyl is an old woman whose entire fertile life was spent bearing as many children as possible.
* Sazed subverts this. He insists that he's no a warrior but is perfectly capable of holding his own against for more powerful characters
* 's back is healed by the dragons, and he is given some upgrades to his abilities. Surprisingly few negative effects, despite Oromis' earlier statement.
* SBaHJ "jegus" and "gog" by any character is through the roof, despite being respectively used sparingly and only twice in canon.
* Sbarro as some of the worst chain restaurants in the United States in that the taste and quality of their pizzas never matched the smell permeating throughout the shopping malls. He openly stated the harsh criticisms helped his brand gain attention and increased publicity and sales at his pizza shops.
* 's basement, Edd asks what to do to pass the time. Eddy suggests I Spy. Kevin calls it lame and Nazz calls it childish. Jimmy, however, would be satisfied with the game. The kids then reluctantly agree with him. The following sequence then occurs:
* 's bed by her mother, her father and her two brothers. Two hours later he and Bethany were married. However, as the name of the fic implies, it turns out well.
* Sbemail) to go through with leaping off Bub's Concession Stand and getting socked by Strong Mad.
* "SBIG" Multiseries, page for the series includes information on installments other than the below three):
* SBIG Series clothes nearby, except most of them were the revealing outfits of the other .GIFfany copies, and Melody would rather just brace towards going out in the nude than try to find something that is actually practical. Melody and Rumble's own clothes were destroyed by Professor Eve, while .GIFfany's was way back in a forest in .GIFfany Land and Soos's was destroyed by .GIFfany even earlier than that.

* Sbirro's restaurant in mystery writer Stanley Ellin's short story "The Speciality of the House", also adapted as an episode of
* SBI: Something Bad Inside. There's definitely something wrong with you, but the doctor has no clue exactly what it is.
* SBS 6 in the Netherlands once stopped a movie in a manner that resembled a network/signal problem for a quick ad for a dance show hosted by a resident presenter.
* SBS6 which caters to housewives, mostly, has a lot of British magazine programmes, like Home in the Country etc. with only the voiceovers dubbed into Dutch. The names change as well into things like "Huizenjacht" (Househunting). They do this with zoo programmes, security programmes (Like Airport or Trainstations) as well, which'd expand this list unnecessarily.
* SBS during summer due to New South Wales and Victoria having daylight savings time and Queensland... not. Australian Pay TV providers also includes feeds for Free-to-Air channels as well and each state gets the feed from their local version (mostly just different news). But SBS only has a single, nationwide version and the Pay TV feed is set so Queenslanders with Pay TV can get it an hour earlier than normal or turn over and get the normal times from the local transmitter. As commercial TV markets overlap on the Gold Coast (as it can receive stations from both Brisbane and Northern New South Wales), this used to make the Brisbane station an hour timeshifted during the summer compared to the regional stations, until people complained that it broke watershed laws. Now, the regional stations have to delay their Gold Coast transmitters by an hour.
* SBS in Australia were rated PG (Parental Guidance Recommended) but when the same episodes were shown later, after the series became the cult classic it is today, they were rated M and less frequently MA15+.
* SBS, jokingly said to stand for "Sex Between Soccer" or "Sex, Blood and Soccer".
* SBS mad enough to bring their entire might on someone's head... stealing their sake.
* SBTB. Dennis Haskins is still making a living off of his Mr. Belding character.
* SBTB: The College Years episode featured the death of a professor followed by the usual wacky humor.
* SBURB are meant to wield this power themselves, gaining the ability to conceal, alter or destroy information.
* Sburb Glitch FAQ uses this to explain why the narrator sounds like such a "veteran". This somehow became a huge AU.
* Sburb, in addition to the Skaian Battlefield, are fairly creative examples of this (such as a planet entirely of blue stone covered by glowing blue forests and lakes and rivers of tar, or one covered in molten lava dotted with islands of metal and clockwork). Justified in that being single-biome planets is the entire point of the Lands as game constructs.
* Sburb is necessary for the creation of other universes — meaning the players are forced to sacrifice their civilization to bring about a new universe. IF their game is not a "null session," meaning it is predetermined to fail, making the sacrifice completely senseless. And unfortunately, null sessions are much more numerous than the successful ones.
* Sburb/Sgrub, characters can ascend to a special rank known as the God Tiers and gain even more power...but the trick is, they have to die in a certain place first. There are two slightly different variations: one that relies the dreamself as an extra life, and another that, for an as-yet-unexplained reason, doesn't.
* "S", by Doug Dorst has a section in the Interlude written in second person narration. However, rather than have the 'you' be a featureless protagonist, the 'you' is simply another character.
* SC 2 features a rather jarring example of Cutscene Power To The Normal. In the end of the
* SC2VN is capable of being respectful when he's on camera, but he's still a jerk.
* SC2VN lets Accel do all of the actual coaching and then blames Accel whenever anything goes wrong. It doesn't help that the coach has probably never played a game of Starcraft in his life.

* SC2VN scene, so naturally it has this. A player in Master league is in the top ~2% of players, but Mach still refers to them as 'casual' and easily beats them. Mach, in turn, is in Grandmaster league (top 200 ladder players in the region), but still gets stomped by actual pros.
* SC2VN starts off with an amateur foreigner, a high school kid who may or may not be a dropout, and a shut-in who only plays in online cups.
* SC2VN, this is Mach's response to being tricked into a bet match with a high schooler.
* SC2VN uses Korean titles and slang in dialogue. It also has Korean characters in a couple of the backgrounds.
* SCA about a female member who was walking home from an event in Central Park in the 1980s. She hadn't taken off her armor, just wrapped a cloak around herself and put her helmet in her bag. She was accosted by a disreputable sort wielding a switchblade and making threats. She said "A six-inch knife?", opened her cloak, and drew her sword. "I'll see your six and raise you thirty-five."
* Scáthach instead. More importantly, when Kirei tried to murder Bazett for her Command Seals, Iri briefly stopped his artificial heart, distracting him at a critical moment and ruining the opportunity.
* Scabbers turns out to be a creepy little man who betrayed Harry's parents to Voldemort. A different set of plush Scabberses, complete with missing toe/finger, are available at the Harry Potter sections of Universal parks.
* Scads on occasion. A short list: giant flightless birds, a wingless dragon, large six-legged pack lizards, a small woolly mammoth, and centaurs.
* 's cafe after the Chitauri invasion and he announces that "superheroes don't pay here."
* Scaffold Match's knee injury from a botched scaffold fall almost crippled him. So, wrestling's worst gimmick match is also one of its most dangerous. The last serious scaffold match revival undertaken by a "major" was in TNA. It wasn't any better or less dangerous than the scaffold matches from decades ago.
* Scaffolds falls are notorious for breaking bones without "cushion". One
* SCA folks are called "mundanes" by members. Mundanes are also the clothes you wear in everyday life. (Same goes for Amtgard and (some) Renaissance Faires)
* Scaled Up: A character — usually a villain — transforms into a more reptilian state.
* Scaled Up into a dragon after beating her human form. If you can beat Anise in less than two minutes on the game's hardest difficulty, you could already break the game in half as is without the need for infinite items.
* Scaled used a cricket on a stick to get Kevin, their overweight bearded dragon, to run on the tiny treadmill they'd built for her.
* scale model used in the Classic series was over 6 feet long! 76 inches, in fact.
* Scale of Scientific Sins: Portraying some branches of science and technology as inherently evil. This runs counter to the Enlightenment's idea of knowledge being inherently good.
* Scale of Scientific Sins: Rules about what not to do while doing experiments.
* Scaler) has four blue weak spots that glow red when it's going to attack. The first two are on its pincers, the third one is on its tail, and the fourth one is its mouth.
* scales a wall nearly 20 feet into the air before dropkicking her clone and effectively knocking her out.
* Scales of Justice: The imagery shows up, but it's not associated so much with courtrooms and trials anymore.
* Scales of Justice: The literal or metaphorical image of scales in a court.
* Scales of Justice with a shotgun. And therefore he can't change his mind once they start cutting.
* Scalie Schoolie for a variety of delinquent acts, she learns that, in accordance with school code, each student is then given a torch and pitchfork to form an angry mob and hunt her down.
* Scalie Schoolie, Grizzelda wins a Halloween costume contest by dressing up as the Ghost of Christmas Future, "here to remind you all that it's just a few short weeks

away!"
* Scalie Schoolie is a particularly unscrupulous example. The arc in which she's introduced revolves entirely around her lying for the highest bidder and slandering students with reckless abandon.
* Scalie Schoolie tends to call the police for things she doesn't understand, like walking around puddles.
* Scaling the Summit: A difficult, treacherous climb up a tall, steep mountain.
* Scallops "hop" along the seabed by clapping their shells shut with powerful closure-muscles, causing spurts of water to jet-propel them for short distances.
* Scalphunter, a member of the Marauders that regularly clash with the X-Men has these technical abilities too, being able to reform mechanical components into anything he can think of. Given that he's a murderous
* Scalps, a group of students go digging in an Indian burial ground and have to face a restless spirit.
* Scalps features this (naturally), though only one scalping is onscreen.
* scaly, reptilian monsters), or as harmless-looking, cute feather-balls.
* Scamalot," James advises John to switch plates with his wife in case she's trying to poison him, then changes his mind because the wife would anticipate them switching the plates and poisoning her own food. Later he concludes that they should switch the plates after all, as she would have anticipated their anticipation and decide to poison John's food.
* Scamalot", James mentions his plans to bring three small dogs with him when he stays at Cho's house.
* Scamalot make spelling and grammar mistakes all the time. One scammer claimed to be dying from "cancer of the lever." He later "passed out."
* Scamalot series from Mashable proposed the following split to a scammer named Mary Gary: Mary 40%, James 70%, Charity 20%, Charlie 1/5, James 20%, and Gary 35%. Mary Gary's only objection to this? "You put yourself twice."
* Scamalot" where James claims not to realise that "leaving this world soon" means "is dying":
* Scambaiters get a kick out of posing as prospective victims when responding to
* Scambaiters keep their identities hidden so they can trick scammers into wasting time with them and avoid vengeful harassment afterwards.
* S came to cheer on Makoto — until she sheepishly admits she brought her swimsuit, too. In the same episode, after Rei, Usagi and Minako start throwing pillows around in an argument, a stray pillow hits Ami in the face, and she escalates it into a full pillow fight.
* Scamp daily strips began as essentially one continuous story, but both eventually shifted to gag a day formats.
* Scamp deal with Lady's and Tramp's puppies, and make one of Scamp's sisters a boy, giving Lady and Tramp two daughters and two sons. The only real difference between Scooter and his sisters Fluffy and Ruffy is that Fluffy and Ruffy have eyelashes and wear ribbons around their neck, and Scooter does not.
* Scamp gets chased off for jumping in someone's yard, Tramp decides to go after him into the "Haunted" house. Having discovered that the shoe he's hidden in has holes in the bottom, Scamp decides to continue his jumping practice from inside the shoe, which gives Tramp the impression that the boot is moving due to a ghost. Eventually, Scamp jumps his boot into some white wash, which gives Tramp a second fright when Scamp comes home entirely white.
* Scamp looks like a young puppy but has the voice of a teenager. His sisters sound younger despite being his littermates. Scamp and his sisters are all significantly smaller than both of their parents, implying that they're still growing as well.
* Scamps, a failed sitcom pilot starring Bob Denver as Oliver Hopkins, a struggling writer who turns his home into a day care center for kids to make extra money for his bills.
* Scamp's love interest, Angel can also qualify as this to Tramp. While Tramp was initially skeptical of being part of a family and tried to convince Lady to have the same mindset, Angel desperately wants to be part of a family and urges Scamp to

realize that being part of a family is the best.
* Scamp's love interest Angel is also puppy-looking, but it doesn't seem like she'll grow much more; it's unclear how much of her puppy-like appearance is age and how much of it is simply because she's a Pomeranian. She has a mature voice, and an
* Scamp story has Scamp getting completely covered in mud by a car splash, which gets him confused for a puppy that looks exactly like him, but brown. After escaping, he promptly finds a water puddle and waits for another car to go by in order to wash off.
* Scam Religion: A fake religion that is founded by its leader solely to fool gullible people out of their money.
* Scam Religion: A religion is founded solely to trick gullible people out of their money.
* Scam Religion to a trader culture with Terminus as a real political capital in charge of their neighbors.
* Scandal and opened up on protagonist Olivia fantasizing about having sex with two different men. The Parents Television Council compared the incident to "a peep show in the middle of a playground" and actually estimated how long it would take a parent to change the channel compared to the twenty-six seconds between the first sexy shot and the last shot of Charlie Brown (which seems a bit obsessive, but hey, who are we to judge?).
* Scandal and playing the part of First Lady, being far more capable than just a glorified hostess and housewife).
* Scandal as a flashback shows David Rosen in his prosecutor days, meeting a prostitute complaining about an arrest. She cites the trope with David dryly noting "that's not really a thing."
* Scandal change what he is. It's just that he has a leash now, which she holds.
* Scandal: David has this to see why Olivia is helping Quinn. So far he's figured out Quinn was framed for the bombing, as Olivia uses her powers for good instead of evil.
* Scandal deputy press secretary/crisis manager Judy Smith, though obviously with plots far from the reality of the Bush 41 presidency meant to appeal to 2012 audiences looking for dramatic tension.
* Scandal: Fitz...enough of a good reputation to be President of the United States.
* Scandalgate — "Watergate" was just the name of the hotel where the famous U.S. political scandal mainly took place. While it inspired the use of the "-gate" suffix in umpteen future political and media scandals, the Watergate scandal itself did not follow this convention and, thus, is not an example of the trope.
* Scandalgate: Scandals given names ending with "-gate" in reference to the Watergate scandal.
* Scandal has Olivia imagining what life would have been like for the main characters if she hadn't made a critical decision prior to the beginning of the series.
* Scandal inside a body bag, with her murdered neighbor placed on top of her to further the ruse.
* Scandal in the Spotlight," and screaming throngs of fans are a constant hazard for the protagonist once she gets caught up with Revance. Most of the time, the biggest concern is that the guys will get mobbed if they're recognized in public, but in some cases - such as on Iori's route - the fangirls get downright nasty over seeing her in the company of one of their idols.
* Scandal in the Spotlight blames himself and is determined to surpass his father's success as a way of making up for cutting his life and career so short.
* Scandal in the Spotlight Revance, paparazzi are an inevitable concern. The guys are pretty well accustomed to dealing with the media and managing their PR, so the protagonist ends up worrying about being caught by paparazzi more than any of her prospective boyfriends do, but there are a few incidents which prove that her worries are not entirely unfounded.
* Scandal is revealed to be this. This person enjoys killing people in general too much.

* Scandal: Justice Verna Thornton becomes a Betrayer Belinda in "Blown Away". Vice President Sally Langston wants Verna out of her Supreme Court seat, while Verna has only a few months to live before she dies of cancer. So Verna offers her a choice: either take her resignation or take the paper revealing the identity of the President's shooter. Sally takes the identity revealing paper and Huck is arrested. Verna had put two and two together to figure out that Huck supposedly shot the President. Huck didn't do it, and Verna doesn't know that. So it's ambiguous if she was doing this to selfishly keep a job she only gets to have for a few months or if she did it because it's her duty to take down whoever shoots the President.
* Scandal needed to get her husband elected to office so he could do great things. If she were to abandon that ambition, she would have to admit that her 'sacrifice' was for nothing.
* Scandal: Olivia personifies this trope. In the pilot episode when she wants Amanda to leave town, all it takes is a two-minute conversation in which Olivia describes every way she can ruin Amanda's life.
* Scandal: Olivia Pope and her team start out as traditional protagonists, but that changes at the start of season 2. For starters, Olivia and Supreme Court Justice Verna shut down Quinn's trial to save Quinn. David Rosen is unhappy about that, and he decides to dig for answers about Quinn. It turns out that Olivia, Verna, Cyrus, Mellie, and Hollis are working together in some sort of conspiracy. Olivia had an affair with President Fitz for a long time, despite the fact that Fitz is still married to Mellie. Also, Olivia participated in rigging the election so that Fitz would become President. She also sabotaged David's efforts to find answers. When you put it together, you have a group of protagonists who are actually villains and not heroes.
* Scandal: Olivia Pope fixes things, including people. Said people explicitly say that they would follow her off cliffs.
* Scandal season 1, episode 3, Olivia and her team take on a client who is being accused of rape but the stories don't add up. It is ultimately discovered that he is guilty of rape but not of the woman who accused him. The man had raped the accuser's best friend years ago causing said best friend to commit suicide. The accuser decided to lie about being raped by him to get revenge. Even though he is proven to be innocent of this particular rape, Olivia is able to convince his mother to turn him over to the police for his crime.
* Scandal Sheet after finding him hanging from a tree with two broken legs.
* Scandal Sheet asks Andrea for advice to give his friend Phil about how to explain his feelings to a girl. Andrea assumes Max meant he wanted to know how he (Max) could explain his feelings to Andrea. He realises this later and is upset:
* Scandal Sheet! is set at one of these, with the twist that some of the stories in the paper are real. "The best place to hide a needle isn't a haystack but a big pile of other needles."
* Scandal Sheet, Ito works for the firm of Robben, Olde, Widdows, & Laffing.
* Scandal: Stephen, though he seems to have mostly settled down. He still has an interesting past.
* Scandal. The band once successfully tricked her into thinking she was made to pay for the pyrotechnics at their first Budoukan concert, complete with a fake cheque. Even after the prank was revealed she still looked like she was in a state of complete shock and confusion for another 3 minutes.
* Scandal: The episode "Happy Birthday, Mr. President" shows Olivia's time in the White House, her relationship with President Fitz, and the circumstances that led to her leaving.
* Scandinavia and the Nordic countries get a lot of this. If it's not a general fascination with Vikings and such things, it is most probably admiration of the Nordic welfare system and the
* Scandinavia and the World: According to the Danish writer, the Danish phrase "That's a major downer" can, if not pronounced carefully, come out as "That's the master negro." She had fun with this in a strip about Obama visiting Copenhagen.
* Scandinavia and the World and Brother America returned to normal (the author has admitted he just missed the big lug too much to leave him possessed).

* Scandinavia and the World and vows never to forget the atrocities committed in his name.
* Scandinavia and the World A reference to Simo Häyhä, in the Real Life section below.
* Scandinavia and the World because the 2010 census indicated that whites will soon no longer be the majority of Americans. His hair is still blonde because he bleaches it.
* Scandinavia and the World, colonies and independent micro-nations are portrayed as the children of the countries that "own" them.
* Scandinavia and the World. Denmark always forgets about his roommate The Faroe Islands until he owes him money, and Norway seems completely oblivious to Kven even when he's right in front of him.
* Scandinavia and the World Denmark catches Sister England trying to steal his...ahem, used tissues. He chases after her offering to give her more sperm.
* Scandinavia and the World, England did this in a strip released around the voting of Scotland's independence. He encounters a double petal and wonders whether it's a yes or no.
* Scandinavia and the World, English people are really sensitive to touching strangers, if just a little; fearing they might offend them.
* Scandinavia and the World for a non-Norse speaker at how catchy it is.
* Scandinavia and the World for Hans Island. The weapon of choice; flags.
* Scandinavia and the World from hearing repeatedly about the Coronavirus epidemic.
* Scandinavia and the World has a male and female version of most commonly mentioned countries; they are generally very similar in appearance. (Sister Germany even has her brother's mustache).
* Scandinavia and the World he attempts to negotiate with it, unlike Finland's more violent approach (which Canada finds alarming).
* Scandinavia and the World is a webcomic about the Scandinavian and Nordic lands(Not necessarily the countries, as certain islands are considered cast members despite never being independent nations) As well as their interactions with other countries.
* Scandinavia and the World is portrayed as this, at least initially. More recent strips have mostly dropped this part of her character.
* Scandinavia and the World kings on them, instead of the King of England.
* Scandinavia and the World — standing in for the territorial dispute over Hans Island, close to Greenland.
* Scandinavia and the World, most of his comments turn up racist and insensitive mainly towards the Middle Eastern or African characters. Not that it can't help him out once in a while.
* Scandinavia and the World, most of the characters have sisters who (except the Swedens and the Americas) are basically the same as their brothers. The only notable exception is France, where the default representative is female, and Brother France is officially her spear.
* Scandinavia and the World, New South Wales is portrayed as the daughter of Wales, a male human, and New Zealand, a female sheep.
* Scandinavia and the World, Norway and his cousin, Jan Mayen, actually get in trouble for being in a relationship, resulting in the latter's execution.
* Scandinavia and the World Norway is the largest of the Nordics, by a margin of at least half a head, but has the mellowest personality and is so in tune with nature that he can get butterflies to land on his finger.
* Scandinavia and the World speak both Finnish and, to his eternal shame, Swedish — it's just that he really, really hates talking, and avoids it whenever possible. Sister Finland is both present much less often and speaks much more rarely, but is once seen screaming "Perkele!" at a troublesome IKEA table.
* Scandinavia and the World, Sweden once accused Australia of raping him and his sister to get him to stop telling America's secrets.
* Scandinavia and the World, Sweden warns him they now only have two rectal thermometers because Denmark jumped the gun when told that was the best way to take a temperature.

* Scandinavia and the World: The comic strip pokes fun at many Scandinavian stereotypical ideas about other countries. Despite being drawn and written by a Dane it pokes fun at the Danish too.
* Scandinavia and the World: the Nordic Lodge now only has two rectal thermometers thanks to Denmark's misunderstanding.
* Scandinavia and the World (though it's also possible that Åland knows how Sister Finland is and understands Sweden's difficult position).
* Scandinavia and the World to be this to his "children", the grown-up colonies of Australia, New Zealand, Canada and the USA.
* Scandinavia and the World tries to get the same "attention" in one strip, but fails.
* Scandinavia and the World when he tries to talk to France after she's kissed him on both cheeks, not realizing that a French greeting has three kisses, unlike a Turkish one. The Scandinavians don't see what the big deal is until Turkey compares it to one person attempting a handshake and the other a fist-bump, at which they're suitably horrified.
* Scandinavia and the World wiki includes a surprisingly thorough list of countries' relations with each other, giving you a one-stop shop to find out who hates whom and why all over the world.
* Scandinavia and the World with a sauna actually existing in the country).
* Scandinavian Airlines Flight 751 made an emergency landing near Vängsjöbergs säteri in Gottröra, Uppland, Sweden on December 27, 1991 after both engines lost power. 129 people; all passengers and crew members survived, it was called the "Miracle at Gottröra".
* Scandinavians, in general. The Scandinavian countries are covered 5 to 7 months per year in snow and the countries are located between 55th and 70th latitudes of North, so the weather can be truly awful, and distances between towns are long (with notable exception of Denmark). The
* Scanlation: Fans translate a comic by scanning the pages and replacing the writing.
* Scanner Cop II: During the final battle Staziak repeatedly creates a diversion by making Volkin attack an illusory projection of himself, causing Volkin to waste energy trying to kill Staziak.
* Scanner Cop II, it's shown that scanners possess psychic energy that can be consumed by certain other scanners, absorbing the victim's power into their own.
* Scanner Cop II, Sam Staziak causes a hostage taker's ear to melt off by scanning through his earpiece.
* Scanner Cop II: Scanners use their minds to more easily navigate personal computers as a faster way to input data.
* Scanner Cop II, Volkin gives one after he absorbs the psychic energy from his first two victims.
* Scanner Cop is to brainwash random people to murder Los Angeles police officers, which he is doing out of revenge for being sent to prison previously.
* Scanner Cop: Near the climax, Sam brainwashes a random guy to confiscate his car so he can quickly race back to the hospital, where the bad guy is about to kill his previously wounded father.
* Scanner Cop: Sam controls a computer with his mind to speed up the facial composition software.
* Scanner Cop, Samuel Staziak has a very good bond with his adoptive parents, who took him in after his biological father (a deranged scanner) died. His new father is also his boss at the LAPD. They don't appear in the next film.
* Scanner Cop. She then tries to pull this trope on Staziak by taking over his body and letting him die in hers. He prevents it by scanning her mental projection.
* Scanner Cop to follow the mind of a dying woman beyond the border of life and death.
* Scanners: Cameron Vale figures out that a computer's "nervous system" is just as scannable as any other, and retrieves information from one over the phone lines.
* Scanners clip was played backward and Stewart said, "You just un-blew my mind."
* Scanners: Darryl Revok has a really nice apartment with some modern art here and

there.
* Scanners III: The Takeover: After Helena takes over her father's company, she schedules an "appointment" with one of her younger execs at her house. It's at this point that she happens to realize that her psychic abilities also work through television signals, and uses him as a guinea pig for this purpose.
* Scanners III: The Takeover, as she eliminates one of her rivals by forcing him to dive headfirst into an empty pool at his mansion.
* Scanners III: The Takeover by using her scanning ability during a countrywide broadcast. Since the signal's effects depend on a non-stop, continuous broadcast, this would inevitably fail. Of course, by this point she's also clearly insane by repeatedly dosing herself with Ephemerol-3, so she probably didn't put much thought into it.
* Scanners III: The Takeover, Ephemerol 3 is an untested new version of the drug. After she takes it, Helena turns evil.
* Scanners III: The Takeover has a much more grounded plot with a relatable and sympathetic lead and genuinely terrifying villains.
* Scanners III: The Takeover, Helena kills her father to take over his pharmaceutical company.
* Scanners III: The Takeover: The villains' plot revolves around mind controlling people straight through cameras and television sets.
* Scanners III: The Takeover where it seems like the coroner is about to saw open his chest, but it turns out he was working on another body.
* Scanners II: The New Order, Commander Forrester makes himself a public favorite by dispatching a corrupt lawyer who works for drug kingpins.
* Scanners II: The New Order, corrupt police officer Commander Forrester tries to use the press to get himself in power and presents himself as an upstanding citizen who wants to end the intensifying crime wave in the cities. They eat into his hand until his real plan to establish order by creating a police state is finally revealed.
* Scanners II: The New Order, David dismisses Peter Drak's claims about Forrester's evil plans with this retort.
* Scanners II: The New Order, Dr. Morse uses his neurological research institute to enslave psychics with his dangerous drugs and use them for Commander Forrester's megalomaniac purposes.
* Scanners II: The New Order, Ephemerol 2 is highly addictive, and severely debilitating long-term to the scanners. Why they don't just use the earlier version of the drug can best be chalked down to plot convenience.
* Scanners II: The New Order, the psychic Peter Drak gets a lot of enjoyment out of using his mind to mutilate and kill people in gory ways. The corrupt Commander Forrester laments that his psychopathic tendencies make him much too difficult to control even with the use of drugs.
* Scanners less ambitious and complex themes and characters mean it can never be regarded as an equal to its forbear.
* Scanners Live in Vain. These habermen are condemned criminals and derelicts, supervised by a small group of volunteers called Scanners who maintain an elitist and secretive fraternity — so much so that they're prepared to kill a human who's come up with a means of traversing space without the use of habermen, under the justification that they're saving humanity from the space wars that would now be possible.
* Scanners Live in Vain whose brain has been severed from all sensory input except the eyes, and whose body therefore has to be regulated by implanted instruments.
* Scanners movies are consistently portrayed as being able to control machinery with their minds. There are lots of displays of this in the movies:
* scanners, radio positioning and other equipment to accurately identify the position of enemy troops. In-game this is represented by a number of skills and Tactics that boost allow the shooting abilities of nearby allies with.
* Scanners, Revok's mole within ConSec orders a computer technician to wipe their whole system in an attempt to hurt Cameron. The technician initially refuses to do so because that kind of data loss can only be authorized by the company's board of

directors. The mole's response is to shove a gun in the guy's face.
* Scanners that produced telepathic children known as 'scanners'. His own plot is to reproduce this previous accident by design, then train the next generation to be his foot soldiers on the path to creating a worldwide scanner supremacy.
* Scanners, the character of Benjamin Pierce is a telepath of dubious sanity who once tried to kill his family before he was rehabilitated through art. He lives out in the woods and hates company.
* Scanners. The former is reserved, methodical and loyal. The latter is emotional, bloodthirsty and manipulative. This was probably done on purpose to contrast their separate motivations for helping their own kind.
* 's canon characterization to make him into this and well known as such among the Jedi Order, to the point they had selected the Hyperionian as his Master specifically because they knew he'd be able to keep his tendencies in check.
* Scantron Picture: Someone fills in the Scantron dots on their test to make a picture.
* Scantron Picture: Someone makes a picture by filling in the Scantron dots on a test.
* Scantron Picture: Someone taking a Scantron test fools around by filling in the dots to make a picture.
* Scantron sheets: (US) The fill-in bubble sheets used for standardized tests.
* Scapegoat Ad: When part of the competitor is made to represent the whole.
* Scapegoat can heal anyone he touches by transferring the injury on himself.
* Scapin/Scapino: similar to Brighella, and often seen as his brother or son, he was the more toned-down version. He's usually more interested in charming a servant girl or eating than carrying out Brighella's villainy.
* Scarab guardians, minor deities who serve as guardians of places that gods or powerful Exalts want never to be disturbed, manifest as swarms of black beetles that share a single mind. These beetles can come together to form a humanoid body, which the scarab guardian usually does when it needs to threaten people or warn them away from its charge.
* Scarab Power: Scarabs were the symbol of the Sun God Khepri (an aspect of Ra/Ra's brother), and were very popular as warding amulets for centuries.
* Scar, after he attempts to blame the hyenas for his crimes, is betrayed by his former "friends" and
* Scaramouche acts in, discovering an unexpected talent for slapstick.
* Scaramouche, at six and a half minutes long. It is also the longest single-take sword fight ever put on film. It had to be single take because they had over 800 extras in full pre-Revolutionary France costume. They couldn't trust the actors with it, so they filmed it longshot using the fight director and his sparring partner, and came back later to film close ups of the leads at significant points. They didn't even stop for two nearly fatal accidents.
* Scaramouche. Given that they're usually challenging Andre, it doesn't go well for them.
* Scaramouche. It ends with a make-up nookie that tears apart Lenore's carriage from the inside out (with frying pans still in hand).
* Scaramouche material, being kicked and tossed around by people and denied entrance to a ship due to his lack of a body.
* Scaramouche's Attic fan and review blog, has a side feature called "Cover Talk" in which Scaramouche... talks about book covers.
* Scaramouche, starting the balcony boxes, working down to the lobby, through the main seats, backstage and ending on the stage itself. That particular scene was possibly the most masterfully done aversion of this trope ever. A careful observer may note that the combatants are actively trying to hit each other, dance through every one of the eight lines (except for #1), exercise such complicated procedures as feints and disengages, and generally fight very well given the uneven footing they find themselves on. Especially impressive is the fact that they manage to work Andre's game breaker multiple disengage sequence from the book into the duel, though you won't notice it unless you know what to look for.
* Scaramouche: The Marquis de La Tour d'Azyr is a ruthless, manipulative killer.

* Scaramouche: The Marquis is an honorable, educated, well-read noble. He is also a ruthless killer.
* Scaramouche, the protagonist Andre-Louis Moreau spends several chapters hiding out in a traveling commedia dell'arte troupe, first as a roadie and later taking the role of Scaramouche on stage after the troupe's original Scaramouche absconds with the box-office takings. Several times later in the novel, he remarks that he seems to be playing the role in his real life as well.
* Scaramouche, the two love interests are Aline, introduced in the second chapter as Andre-Louis's childhood friend who is about to get engaged to someone else, and Climene, whom he meets and immediately falls in love with nine chapters later. Andre-Louis nearly marries Climene, but it's Aline that he ends up with.
* Scaramouche to seek revenge on a single aristocrat who murdered his republican idealist best frient, but doesn't really believe in the Revolution's ideals.
* Scaramouche, where Andre Moreau ends up married to the woman he met half an hour into the movie over the woman he was engaged to at the beginning.
* Scaramouche, where Andre sends out his lawyer's barber and proceeds to interrogate the lawyer as to the identity of the man who pays his stipend. By shaving him.
* Scaramouche, which proceeds to induce cheers from the commoner's half of the assembly.
* Scaramouch from Episode XCII has his sinister scimitar sword that slices as cleanly as Jack's and the Scotsman's. While his scimitar is the death of him it's not his most lethal weapon, that would be his tuning dagger, which is not just sharp but can also obliterate anything by vibrating at a high frequency.
* Scaramouch was also a robot who had magical abilities (at least he claimed it was magic, it was never really explained).
* Scar and Kimblee end up having this dynamic with one another upon meeting each other face-to-face on a train to Briggs. They recognize each other from the Ishvalan Civil War when Kimblee personally attacked Scar's hometown and slaughtered his family. While for Scar, it's personal because Kimblee killed his family, it's personal for Kimblee because the idea that he failed to kill someone in front of him in the midst of a battle irritates him.
* Scar as a Looper, on the grounds of his desire for domination regardless of the consequences making him an Ascension risk. The hyena trio, who are technically still villains but are motivated more by hunger, were substituted instead.
* Scaravolt's Half-Full trait cuts its HP in half at the start of the battle, but also boosts most of its stats.
* "Scarborough Fair", known worldwide thanks to Simon and Garfunkel, is a traditional British folk song. Paul Simon learned the song in London from English folk singer Martin Carthy. To the annoyance of Carthy and other English musicians, only Simon and Garfunkel were credited for their version, without any mention of "traditional". (They did, however, write the antiwar song "Canticle" sung in their version as a countermelody.)
* scarcity of blood and guts and moralistic endings, in large part because the Brothers intended it as a cultural study rather than pure entertainment and thus hadn't yet rewritten things. Some villains are indeed unpleasantly disposed of (as in "The Goose Girl"), but many are simply embarrassed and sent packing, such as in "Hans-My-Hedgehog".
* Scar does it too at one point, as, in all likelihood, did most of the fanbase after reading
* Scare Campaign: Fearmongering propaganda against your opponents can be a great way of energizing your own supporters to rally behind you.
* Scare Campaign: Help! This political ad has convinced me the other one is scary! I'm staying away from it!
* Scare Campaign: Using fear, uncertainty, and doubt about a candidate and/or policies to manipulate voters.
* Scare Chord: Aaahh! That music was the perfect chord to demonstrate my reaction!
* Scare Chord and all). And repeats those last two steps a few times over.
* Scare Chord plays, and the characters look up at the unseen source of the sound.

* ScareChords and other out-of-place sounds, until Elizabeth finally switches it off.
* Scare chords are used to punctuate bizarre or unsettling moments on
* Scarecrow (1983) who traumatize Lena and her grandfather, driving them to madness and out of town.
* Scarecrow (2002) sets him on fire. However, for Twist I, it seems that she's now possessed by Lester's spirit. However, for Twist II, the movie is a story told by another character, Mitch, to two youths out in the cornfield. Once finished, he calls for Lester, causing the scarecrow to come and kill the others while he and Mitch laugh.
* Scarecrow (2002): The scarecrow is seemingly burned to ash, taking Lester's spirit with it, but then he shows up in the framing story and kills the guys telling it.
* Scarecrow (2002): These were tormented in life and return to avenge their abusers by possessing inanimate objects. When possessing said objects, they are significantly more acrobatic than in life, and immune to any damage that doesn't completely destroy their vessel.
* Scarecrow and Mrs. King, a brainwashed Lee begins making daily to-do lists. One of these lists contains, amongst mundane items, the entry "Shoot Billy".
* Scarecrowand Mrs King, Amanda’s son Philip does this and saves the day. The present he shook and “broke” contained a secret message. Philip is able to tell his Mom the message – which makes no sense to the spies. But Amanda figures out it is recipes on a cooking show being used to send information to Soviet spies.
* Scarecrow and Mrs. King first season episode "Weekend", Lee and Amanda are sent to a resort as a married couple. After giving Amanda a hard time about how junior agents have to take the couch, Lee explains he will be staking out the room of a potential kidanpping target all night.
* Scarecrow and Mrs. King gradually abandons his womanizing ways over the course of the series as he falls for (and eventually marries) Amanda King
* Scarecrow and Mrs. King': He's a spy; she's an everyday housewife. Together, they ...do spy-ish things.
* Scarecrow and Mrs. King: In one episode Lee infiltrates a group recruiting burned-out agents to do their dirty work, who lure Amanda to their base and tell him to shoot her to prove he's genuine. He seemingly goes through with it; however it turns out that he'd purposefully missed and she'd had the foresight to fling herself into the ditch and play dead (allowing her to wait until they'd left and fetch help). The scene is used to highlight the trust and unspoken communication that has developed between the pair by this point in the series.
* Scarecrow and Mrs. King: In the 3rd and 4th seasons, Amanda and her ex Joe get along well. His absence the first two seasons is explained away because he was overseas working for an American Government Relieve agency. He is the only one in Amanda's "normal" life that knows about her being a spy and her relationship with Lee. Joe found out when his boss framed him for stealing from the relief agency and killing the Prime Minister of a fictional country. When Lee and Amanda were close to proving Joe's boss was the actual guilty party, he went after Jamie and Phillip. Lee saves the boys and their Dad.
* Scarecrow and Mrs. King, Lee is suspicious a fellow agent is on the take when he starts spending money after years struggling on his paychecks. It turns out it's the guy's supposedly honest partner who's the real dirty agent as the other guy won a sweepstakes and couldn't resist spending.
* Scarecrow and Mrs. King: This entire series hung on the Almost Kiss. The number of times they were given husband/wife or boyfriend/girlfriend cover identities only increased the tension.
* Scarecrow and Mrs. King, "Unfinished Nusiness" and "The Pharoah's Engineer".
* Scarecrow By the end of it, only one car, one truck, one helicopter, and the destroyer are still intact, and several miles of the French countryside are missing. The author himself drives a Delorean.
* Scarecrow escaped Arkham Asylum this way. Justified in that this villain has

always been a skinny britches. And it's
* Scarecrow goes by the call sign "Black Knight", and dresses appropriately. In accordance with the trope, his origin, identity and allegiances are unclear.
* Scarecrow Gone Wild, both to save him and to end the scarecrow. It doesn't work, but by using the defibrillator on the scarecrow when it arrives in search of more victims, Sam is properly revived. What no one realizes until later is that now the scarecrow possesses Sam. The scarecrow in human form takes on Jack and tries to possess him instead when Sam's body is dying, so Jack impales himself on a crucifix to end the terror.
* Scarecrow has a pair of oft-insulted henchmen who "never liked school" and are impressed to find they're working for an (ex)professor in his introductory episode of
* "Scarecrow" involves townspeople performing a yearly sacrifice of a man and a woman to a Norse god in order to keep the town prosperous.
* Scarecrow is a plushie (knitting pattern) created by Alan Dart. His name is a pun, as he's not a real scarecrow, but rather a farmer crow.
* Scarecrow is "The Master of Fear" while The Riddler is "The Prince of Puzzlers."
* Scarecrow pees himself in "A Grouper's Tooth" when running away from a shark, as we see a puddle underneath him when he runs from the shark for a brief second.
* Scarecrow pretty much has a huge fetish for fear. Batman is the only thing that scares him anymore and so he keeps fighting him so that he can feel that sweet taste of fear once again. There's also a twisted
* Scarecrows features a robbery of the Camp Pendleton payroll which goes wrong when the robbers have to land in a field filled with evil scarecrows.
* Scarecrows: In an odd inversion of the way the trope usually works, Bert steals a truck and drives off in it. When the truck stalls, Bert thinks it has flooded and pops the bonnet. When he looks inside, he discovers that the truck doesn't have an engine.
* Scarecrow Slayer, Dave and Karl are sent to steal a scarecrow from a farmer's field as part of a fraternity initiation. This ends with Dave being shot and his soul being transferred into a demonic scarecrow.
* Scarecrow Slayer, Dave's soul is sucked into the body of a demonic scarecrow when he is shot and killed. The Scarecrow then kidnaps Dave's girlfriend Mary, planning to transform her into a scarecrow and make her his bride.
* Scarecrow Slayer, Deputy Larry is killed when the Scarecrow cuts him in half at the waist.
* Scarecrow Slayer, Gavin and his frat boys refer to themselves as 'The Marines'. Other characters are at pains to point out that they are not actually Marines. It seems they are members of the ROTC.
* Scarecrow Slayer, Karl attacks Dave, but gets killed and possesses the scarecrow Dave made for Mary. The two scarecrows fight, resulting in Karl being knocked into a shredder and Dave being killed when Mary bazookas him out of existence.
* Scarecrow Slayer, Mary sprains her ankle when she falls out of the frat house while attempting to escape the Scarecrow.
* Scarecrow Slayer of this whole scarecrow ordeal. With several people, including her best friends and a guy who was in love with her, massacred right in front of her. You'd think that she would be at least a little bit upset by this. But after she blows the scarecrow up, she smiles and struts away like she hasn't a care in the world.
* Scarecrow Slayer, the presence of the Scarecrow causes mobile phones to fill with static and stop functioning.
* Scarecrow Slayer: The Scarecrow carries the unconscious Mary like this when he takes her back to the field to make her into a scarecrow.
* Scarecrow Slayer. Upon arriving at Caleb's farm, she asks "What is this? A farm or something?", to eye-rolling from Mary in the back seat.
* Scarecrow Slayer, when Mary is abandoned at Caleb's farm, she finds the keys to his truck and attempts to start it. She eventually gets it going, but in the process turns on the wipers.
* Scarecrow Solution: When a character can't fight something, they build something

to scare it away.
* Scarecrow's only weapons are a fear-inducing toxin and a scary, face-concealing mask... Masks are
* Scarecrows opens on the hijacked plane in the late afternoon. It is dawn when the final showdown occurs. A news bulletin playing over the closing credits indicates that the plane touched down no more than an hour or so later.
* Scarecrows starts off with one of the bank robbers parachuting off a hi-jacked plane with a sack of cash, leaving the others to have no choice but to land and find him.
* Scarecrows, the robbers find a parachute tangled in a tree that they think contains the stolen money. Jack climbs the tree to cut the money down, but when he slices open the chute, it is instead full of blood which drenches Curry on the ground.
* Scarecrows: These are resurrected by a Satanic curse, and are Immune to Bullets but can be killed by explosives. They maintain their intelligence for a brief period after death, and can impersonate the voices of their victims' loved ones.
* scarecrows, the students, as well as John Smith, are horrified at what they're doing as they mow down the Family's army. There's a visible sense of relief when it turns out their enemy was just straw.
* Scarecrow, the bodies of some Delta Force operatives are discovered. They don't wear unit insignia or any personal identification, but each man has customized his uniform slightly.
* Scarecrow: Year One calls her daughter a whore for having a child out of wedlock and suggests burying the (living) baby in the backyard, but the fact that her and her daughter's surnames are the same as that of Marion's mother implies that she may not have been married either.
* Scared: A couple (played by Elizabeth and Eric) attempt to run a con on a dangerous criminal. When things go wrong, the woman bolts, leaving the man to take the fallout.
* Scare Dare: A childhood dare consisting of waltzing into spookiness.
* Scare Dare: O-okay! I g-g-g-guess I'll d-d-do what I was d-d-d-dared to!
* Scared Shrekless, Gingy poops out jellybeans during the scarily revised Duloc song.
* Scared Stiff has a similar shot which, if made, automatically progresses the player through one of the Tales of Horror.
* Scared Stiff is the hostess to the player as they watch (and play) various horror movies together.
* Scared Stiff requires gently launching the ball to land in the upper saucer, which causes Elvira to throw a knife at her television set. Since the Skill Shot light is still on for a certain amount time, it is also possible to not gently launch the ball to land in the upper saucer and still get the Skill Shot bonus; getting the ball to the upper saucer quickly enough will net the Skill Shot bonus as long as the Skill Shot light remains on.
* Scared Stiff sequence that plays split-second animations, quotes, and soundbites at completely random times.
* Scared Stiff speculates as to what's the horrible unspeakable evil to be found in "Terror From The Crate":
* Scared Stiff. The rubber figures on the slingshot bumpers were supposed to jolt each time the kicker fired, but it was found this would eventually cause the Boogie Men's arms to fly off, so they became fixed in place on the production versions; replacement kicker arms are available that make them mobile again.
* Scared Stiff, the Stiff In The Coffin is revealed to be wearing boxers with little hearts on them.
* Scared Weird Little Guy's Christmas Song is an entire song full of this trope - which then entirely blows up at the end of the song.
* Scared Weird Little Guys run a citrus-themed hurricane, and finish by lampshading its groan-worthiness:
* Scaredy Cat to save Porky, and sends all the mice packing. The last mouse who runs away is notably smaller than the rest.

* Scaredy Pants": One of the things that terrifies SpongeBob is a kid in a cowboy costume.
* Scaredy Squirrel adaptation (although the books' author Mélanie Watt was a creative consultant for the show).
* Scaredy Squirrel book "Scaredy Squirrel at Night", it lists the symptoms of sleep deprivation. One of them is forgetfulness, which is illustrated with a picture of Scaredy with a string around a digit of his paw.
* Scaredy Squirrel: Dave's spray clouds are depicted as a large, purple cloud.
* Scaredy Squirrel episode "Water Damage" Scaredy gets his ears clogged by water while in the shower. As part of his many efforts to unclog them he tries flossing back and forth with a towel between his ears (it doesn't help.)
* Scaredy Squirrel (except for Dave, Mildrid, and Hatton) constantly push around others and put themselves before anyone else.
* Scaredy Squirrel, where, after gorging on nutbars, Scaredy seems to have a deeper voice, but he just had a (still-wrapped) nutbar in his throat.
* Scare 'Em Straight and help clean the house, but all she achieves is to have Flanders send them to a leper colony in Hawaii.
* Scare 'Em Straight, and once that is done it is important to compliment that with a reputation for magnanimity so as to leave as few grudges behind as possible. Also hanging thousands of people at once is not aesthetically attractive even if theoretically proper under the law.
* Scare 'Em Straight: A public service announcement intended to deter people from misbehavior by claiming that terrible things will happen to them if they do this bad thing.
* Scare 'Em Straight: A public service announcement tries to persuade people to avoid doing bad things by convincing them that terrible things will happen to them if they end up straying from the straight and narrow.
* Scare 'Em Straight) but the actual babies are more cooperative, minus Dmitry's, who falls asleep and has to be carried by his mom while "walking" the runway.
* Scare 'Em Straight by imitating the Yakuza who actually do sell organs on the black market.
* Scare 'Em Straight: Deterring people from misbehavior by claiming that terrible things will happen to them if they don't keep their noses clean.
* Scare 'Em Straight: Fear as a prime motivator for behaving yourself.
* Scare 'Em Straight: If you don't behave like a good boy/girl, then bad, BAD things will befall you!
* Scare 'Em Straight, is a giant owl with a copper penis. Whether the penis in question is prosthetic or just copper-colored, it has no place on a bird of that type.
* Scare 'Em Straight: Scaring people out of misbehavior by convincing them that horrible things will happen to them if they stray from the straight and narrow.
* Scare 'Em Straight: This person just got me to do something by scaring me! It could happen if I don't comply!
* Scare 'Em Straight without actually explaining what sex is, and Mr. Garrison is a total pervert who tried to teach a class of kindergartners about exotic sex positions and how to put a condom on with your mouth.
* "Scare Master" came out on iTunes on September 21, 2015, while its TV premiere was on October 31. This is due to it being produced after "Rarity Investigates", which had aired the previous Saturday.
* Scare Master", Fluttershy has pony versions of various anime characters hanging from her ceiling, leading to some fans thinking she's an anime fan. A trading card makes reference to this, even mentioning a few other well known anime characters as well. An issue in the official MLP comic series even depicts her as an artist with a booth at an anime convention.
* Scare Quotes: You would be "well-advised" to just read the "carefully edited trope description" to find out what this one's about.
* scares her sister off from entering the Triwizard Tournament by telling her how dangerous Hogwarts is, using Harry, Ron, and Hermione as examples. Each of the three have notable facial scars and Ron admits to missing the days when his nose

was straight. Afterwards, Sophie admits she knows full well their scars are all from learning to fight for the past two months, but thought they'd serve as good visual examples.
* scares the Israelis into mobilizing. At about this time, Egypt learns that the USSR had at best been mistaken and at worst been lying.
* Scare Tactics. Chief of paranoia; a living, breathing encyclopedia of arcane trivia, conspiracy theories and questionable proven facts
* Scare Tactics had a vampire lead singer, a werewolf on lead guitar, a snake-boy on bass guitar, and a walking pile of sludge for a drummer.
* Scare Tactics included a generations old feud between the Ketchums (a clan of werewolves) and the Knightsbridges (a family of ghouls).
* Scare Tactics is a church sanctioned organisation of vampire hunters.
* Scare Tactics rig the stunt so that it looks like it goes horribly wrong, causing the victim to think they've inadvertently seriously injured/killed/got in some other deep trouble the person they were supposed to scare.
* Scare Tactics set up the target as a new employee at a health spa "for professional clientèle" that uses "very expensive ingredients". Along with female clients who come in for rejuvenation treatments is a list of younger women and their corresponding blood types. The exact scare prank involved the target walking in as one young woman is being bled over a bathtub that an older client was bathing in.
* Scare Tactics, Slither (a lizard boy) is refused admittance to a nightclub because:
* Scare tactics that involve showing criminals that they will get caught are pretty efficient, though. How scary the punishment itself is turns out to be largely irrelevant; it is the danger of being caught that scares them away from criminal behaviour.
* Scare Tactics, The Graveyard Shift is a group of religious fanatics whose mission is to eradicate vampires. They killed most of the Skorzeny vampires in Markovia but Nina Skorzeny was able to escape. They tracked Nina to America but many of their number were killed when they ran afoul of an ancient vampire while tracking her.
* Scare Tactics, the werewolf clan the Ketchums load their shotguns with silver buckshot when they ambush their runaway member Fang.
* Scare Tactics when Van Zandt steals the Scaremobile. Screamqueen is asleep in her coffin in it at the time.
* Scare Tactics where the "victim" begs the person being pranked to free her, only to have the captor return and threaten the prankee with the same fate before the reveal.
* Scare Tactics would have a cremation worker "accidentally" (as in, he wasn't aware he was "alive") try to perform this trope. When the cremator and a few staff in on the joke turn it out, a severely burned actor would leap out, screaming bloody murder. Of course, that's where the prank usually ends.
* Scare the Dog: When a guard dog or similar animal is intimidated by a scary character.
* scare the everliving crap out of the Joker with Batman is Joker's worst fear.
* Scarface (1932) also features a city-wide war, although it's far more violent and destructive than the remake's, with many of the onscreen events being based on infamous gang murders in real life.
* Scarface (1932) and giddily helps him shoot at the police instead. His will to fight vanishes as soon as she is killed and she dies begging him to hold her.
* Scarface (1932): Tony constantly and openly tests Lovo's authority. When Lovo finally sends assassins, Tony kills him and takes his place.
* Scarface (1983) as a ruthless, albeit sympathetic gangster, whose own flaws eventually lead to the destruction of his criminal empire and everyone he ever cared about ending up either dead or hating his guts, as well as his own death at the hands of someone he screwed over.
* Scarface (1983) by killing a mother and her children along with an informant to save his own ass but instead he rants about how he doesn't need the guilt in his life and instead prevents the murder from happening, dooming himself in the

process.
* Scarface (1983) ends with a siege by assassins working for Alejandro Sosa against Tony Montana's mansion, which doesn't really get going until Tony takes up an M-16 with a grenade launcher with a cry of "Say hello to my little friend!"
* Scarface (1983) ends with Tony Montana and crew dead and the drug lord who ordered the film-ending attack still alive. Fortunately or not, you don't get to see his presumable satisfaction with this. The video game depicting an alternative take on the film picks up after Tony's 'death' and has the player control him as he attempts to rebuild his drug empire. This can be viewed as an alternate continuity.
* Scarface (1983): Frank Lopez desperately pleads for forgiveness from Tony after failing to assassinate him. It sort of works, as Tony chooses not to kill him, but ultimately fails when Tony instead gets Manny to do the job to make his demise ironic.
* Scarface (1983) is also a little better known than the 1932 version.
* Scarface (1983) somewhat loves his mother, even if there are rough edges to their relationship due to her being aware of his criminal activities.
* Scarface (1983), the infamous chainsaw scene is preceded by the Toad's female associate turning up the volume on the hotel room's TV.
* Scarface (1983), the two best being "This city is like a big pussy waiting to be fucked" changed to "This city is like a big chicken waiting to be plucked", and "Where'd you get that scar? Eating pussy?" to "Where'd you get that scar? Eating pineapple?" Also "I only tell you once. Don't fuck me, Tony. Don't you ever try to fuck me" to "I only tell you once. Don't fool me, Tony. Don't you ever try to fool me."
* Scarface (1983): Tony Montana fails to kill one of his enemies after seeing his little kids in the back seat of his car. Tony "never fucked over anyone who didn't have it coming to him".
* Scarface (1983), Tony Montana famously pulls out an M16A1 fitted with an M203. A common misunderstanding is that this gun was his "little friend;" actually, he was talking about the 40mm grenade he was firing. There was nothing little about the weapon.
* Scarface (1983), Tony Montana murders his best friend Manny Ribera, believing that he slept with his sister Gina, for whom he harbors secret desires himself. However, she reveals that she and Manny are married.
* Scarface (1983) was forced to trim several violent scenes for an R rating, but that version was never released; instead, De Palma got sneaky and released the uncut version to theatres with the R rating tacked on.
* Scarface (1983), where Tony Montana has a huge scar on one side of his face; at the very beginning of the film, he says he got it in an accident when he was a child.
* Scarface Act One of the 1983 version is about Tony Montana's rise to the top of the Miami underworld, while Act Two is how everything goes straight to hell.
* Scarface, and charging it to full throttle takes a whopping four seconds, dealing 450 damage, and leaving you very vulnerable to attack by the police.
* Scarface and impulsiveness lead to him getting killed by the police.
* "Scarface: A Psychodrama" focuses on the Ventriloquist as he attempts to go straight and also, creepily, on the puppet that still causes death and pain even without him.
* Scarface Entire subcultures sprung up just to emulate his badassitude.
* Scarface: Even Tony Montana will get in on the looping if he gets too close to the dancers.
* Scarface, fits of rage, and impulsive behaviour ultimately lead to his undoing and death.
* Scarface, right before a bomb goes off that will kill him and a bunch of Dominic's guys who were beating him to get to Elias:
* "Scarface School Play" demonstrates this trope to a hilarious extreme.
* Scarface: The World Is Yours, after having demolished the army of mooks hanging around and killing Sosa and friends, one last mook shows up and begs for mercy as Tony prepares to leave. He gets offered a job and accepts. A similar scene occurs

in the film.
* Scarface: The World Is Yours. Also, if you swim too far out into the ocean, Tony is eaten by a shark.
* Scarface: The World Is Yours, but there's no escape other than biting it.
* Scarface: The World Is Yours: Cars, jeeps, trucks, bulldozer, speedboats, yachts, floatplane. No helicopter, motorcycle or tank unfortunately.
* Scarface: The World Is Yours, despite his drug-dealing, becomes respected enough that he can talk citizens into surrendering their cars and cool off "heat" from gangs and the police with a snappy one-liner.
* Scarface: The World Is Yours features a version of "Burning Inside" by Ministry as its theme song for the movie-style opening credits.
* Scarface: The World Is Yours follow this trope, probably due to its GTA roots. Oddly enough, boats also suffer from Pinto Syndrome.
* Scarface: The World Is Yours gets Tony's ladies to come along as additional firepower. Unfortunately, by this point you won't have any real opposition, only some weak gangs in the unsettled areas, making them a waste.
* Scarface: The World Is Yours had a sniper rifle, shotgun, carbine and a Desert Eagle capable of dismembering foes. Of course, there's the chainsaw too.
* Scarface: The World Is Yours has a lot of screaming. Various gangs scream en masse while charging into Tony's superior firepower. Tony can scream right back whenever the player wills. And of course, during the 'rage/invincibility' attacks the screaming is out of control (and foul).
* Scarface: The World Is Yours has this. You could be listening to non-diegetic music, make Tony enter a vehicle, and then have the track in question become part of the game world, played on the vehicle's tape deck.
* Scarface: The World Is Yours has Tony Montana talk about how he wants the Big Bad dead. He does this even after the Big Bad is dead.
* Scarface: The World Is Yours. Having one of the very first satellite phones ever, stolen from a rival crimelord, is vital to the plot and many of the gameplay mechanics. It always works, from inside any building to remote island dirt roads. Possibly handwaved in that if you're a millionaire drug kingpin, you can afford the best.
* Scarface: The World Is Yours. Initially, Tony will be unrecognized by the citizens, but as he rebuilds his reputation they will recognize and respect him; at high levels it is possible to talk people into giving him their cars.
* Scarface: The World Is Yours. Inverted. Become sufficiently awesome (Balls points) and you can talk women into joining your harem. Health benefits (resistance to damage, etc.) later follow.
* Scarface: The World Is Yours. Managing to bypass it only makes them get back up and flee the scene.
* Scarface: The World Is Yours. Shoot ten out of twelve gang members who hang out at the gas station? The last two frantically run away. Many times Tony ends up mowing them down as they are trying to hijack a car and flee.
* Scarface: The World Is Yours slows police response times to half the pre-upgrade speed, giving Tony Montana some much-needed time to carry out his questionable deeds. Interestingly, in the original film, it was attempting to evade tax for his considerable profits that started Tony's downfall.
* Scarface: The World Is Yours. Talk to the bouncer at the club. You'll learn he's working off a debt. He didn't refuse to throw a fight, he just forgot which fight he was supposed to throw. Perils of taking blows to the head...
* Scarface: The World Is Yours, the chainsaw is indeed the most powerful weapon, able to one-hit-kill targets and sever extremities. The same also applies if used against Tony by enemies. Hear a chainsaw? Run. They will catch you and decapitate you faster then you can reload.
* Scarface: The World Is Yours. Tony gets the chance to do this to a crime boss in a later mission. Given a sniper rifle, you aim at the boss swimming in the water. Just perforate his gut a few times to make him bleed and let the sharks finish the job.
* Scarface: The World Is Yours Tony's Enforcer wears a grey suit and tie with

shades, while Tony can purchase various tieless suits.
* Scarface: Toni Montana goes on a drug-fueled killing spree against the assassins sent to execute him, gunning down nearly a dozen of them before being shredded by a hail of gunfire.
* Scarface: Tony Montana snorts cocaine and then takes on an army of assailants. Despite being shot numerous times with automatic weapons, he doesn't flinch and kills every one of his would-be assassins. Only a double-barrel shotgun blast delivered from behind at point-blank range is enough to finally take Tony down.
* Scarf Dance meant for a deleted scene of Sokka dancing in "The Headband".
* Scarf of Asskicking. He trades the coat in for a bodyguard's uniform in Book Four.
* Scarfolk Council looks like an owl; he's the mascot of the town's DON'T program against "doing".
* Scar gets another one before he kills Mufasa. His expression provides the image for the
* Scar gives one himself to Zazu when he points out how unhappy Mufasa will be that he didn't show up for Simba's birth ceremony. After he tells him this (as well as forcing Scar to let a mouse, his
* Scar goes ahead and does it again not long after that. After the two lions run to the top of Pride Rock, Scar starts to bargain with Simba for his life, during which some hyenas (
* Scar had one after discovering that his brother's arm had been transplanted onto his body after they were attacked by Kimblee.
* Scar has a deep scar running down his face. Whilst it goes directly through his left eye socket, his eyeball is perfectly fine.
* Scar has Simba utterly on the ropes and is about to knock him off the edge of Pride Rock, when he insists on making a
* Scar has to learn of the Ishbalan genocide by a disenfranchised officer to realize why Scar pities her.
* Scar himself comes perilously close to doing it to Zazu, before Mufasa interrupts and forces him to spit Zazu out.
* Scar himself may count as a minor example, but his face isn't really
* Scarier still, people have built computer models Rubix Hypercubes which people have successfully solved.
* Scarier when you realize The Blank version of Slendy is compared to pictures of
* scarily almost any other spaceship in the galaxy, they rarely have to resort to this.
* Scarily Competent Tracker: A person who can find their target no matter how difficult it may be to track them down.
* Scarily enough, she never gets BETTER from it...just becoming a Retired Monster
* Scarily Specific Story similar to the listeners or what's happening now.
* Scarily Specific Story: Whoa, that ghost story you just told sounds way too similar to what's going on right now!
* scarily, where the AI pilots, at higher levels, can sometimes leave the player feeling like a fifth wheel. This make sense as the game was designed primarily for multiplayer, so if a single player didn't have smart wingmen and enemies, he would get flattened or be unable to keep up in multiplayer against more skilled human opponents and allies.
* Scar later tries to give a Pre-Mortem One-Liner to Simba with "I killed Mufasa" necessary to turn the tables.
* Scarlatti was introduced as a subversion, though. He's famous for the "Scarlatti Disarm," a technique that disarms the opponent and permanently cripples their sword hand.
* Scarlet an ad for a TV series, as in a series of TV's made by LG. Note a lot of the dialogue, such as "Putting her in every home on the planet," and saying "She's gonna change TV."
* Scarlet (an angel) and Frank (The Anti-Christ) have a lot of romantic chemistry in the
* Scarlet, and later her sisters are this, despite also routinely being used as

the
* Scarlet Blade emphasizes in this, as the game focuses on genetically enhanced females, and there are no male playable classes.
* Scarlet Blade, underwear can increase your character's stats and, if you so desire, you can run around wearing just that.
* Scarlet Chorus. When she tells you the story of how her comrades died because she hesitated in battle and didn't cover them properly, you can either tell her to not make the same mistake again or that it wasn't her fault. She approves of the former because she appreciates being held to a high standard she knows she can meet and is outright insulted by the latter. As she sees it, she made a mistake; her way of honoring the fallen and moving on is acknowledging that and striving to do better.
* Scarlet Empress at the end of the first game, Livia becomes a ruthless sovereign determined to crush all opposition and punish all foes no matter the cost. Her actions have resulted in the once-great Empire of Estellion losing nearly a third of its territory as well as one of its major cities.
* Scarlet Empress had the exits blocked, then sent in the army to slaughter all the representatives. The next batch of legislators learned their lesson.
* Scarlet Envy and Shuga Cain from Season 11 were both seen as "robbed" queens from their season, having shocking and controversial eliminations. Scarlet's elimination was controversial as fans believed that she did better than Ra'Jah O'Hara in their lip-sync, and even pointed out that Scarlet had been performing better than Ra'Jah in the competition as a whole. Shuga, on the other hand, had been flatlining through the competition, but during the magic challenge she had a rather good showing and fans believed the was one of the best of the week. Shuga ended up being eliminated that episode, much to the annoyance of the fans.
* Scarlet Heart Even fans of the remake almost universally agree the original is better.
* Scarlet Heart is conspicuously missing time travel and is set entirely in the present day.
* Scarlet Heart: Kevin Cheng was almost cast as Yin Zhen. Then Nicky Wu was cast instead, so Cheng got the role of Yin Si.
* Scarlet Heart: Most of the Mongolian characters are played by Chinese actors. Only the Mongolian king is played by an actor of Mongolian descent.
* Scarlet Heroes's job easier by letting anyone grab published modules from any other retroclone, refluff them to fit whichever Sine Nomine setting you're using, and voila, instant adventure.
* Scarlet King, otherwise known as Shormaush Urdal. His real name is Khahrahk, but other than in his origin story, he's always referred to as either the Scarlet King or just the King.
* Scarlet Lady: After Marinette tells him how hard it was to defeated his akumatized form, Max wonders if it was because he was an akuma or because he wasn't relying on his prewritten codes.
* Scarlet Lady and punish her for Adrien's grounding, with the consequences of his lie spiraling out even further from there.
* Scarlet Lady. As a result of this, not even Master Fu knows just who Scarlet Lady is, and Plagg doesn't figure it out until he pops into her purse looking for camembert and finds Tikki inside.
* Scarlet Lady, Hawkmoth) is unable to come to Career Day after he promised he would, Adrien implies he will ruin his diet by helping himself to the free croissants Marinette has brought. Gabriel's reaction?
* Scarlet Lady: In "Riposte", when Kagami says she wants to get into D'Argencourt's fencing school, he tells her he'll consider her admission if she defeats one of his students. She chooses to challenge his "best combatant".
* Scarlet Lady is portrayed as nonbinary, and uses gender neutral pronouns. In the show proper, Marc is a somewhat androgynous-looking boy, and is referred to with masculine pronouns.
* Scarlet Lady. It's implied that he deliberately invokes this effect with his goatee; when one of the adults yells at him about how he should shave it off, he protests that it's the only reason his clients respect him.

* Scarlet Lady overreacting when being insulted and only making reference to the least insulting part. For example:
* Scarlet Lady's take on "Riposte", Kagami's determination to prove herself the best of the best drives her to force Adrien off the mat and chase him around. While D'Argencourt permits her corps-a-corps, taking the fight away from where everyone could see it clearly prevented the audience members from making any kind of fair call. As a result, D'Argencourt goes with the first ruling anyone is willing to make decisively: namely, Chloé's declaration that Adrien won. The author's commentary under the comics stresses the point that Kagami lost because "you can't be the greatest fencer in the world if you DON'T FOLLOW THE RULES OF FENCING!"
* Scarlet Lady. The only reason he's willing to spend any further time with Lila is because she stole an important book from him - something she isn't aware that he knows about.
* Scarlet Lady to a strong-willed young woman who finally breaks free from Chloe's thumb.
* Scarlet Lady'. Unfortunately for him, she also controls the narrative: since he's often exhausted or on the verge of de-transforming after battle, she's able to give interviews and play to the media, painting him as her 'reckless and destructive' sidekick.
* Scarlet Lady: When Adrien and Plagg steal Gabriel's book on Tibet and Adrien asks if rebellion is "supposed to feel like you're gonna barf", Plagg answers "Only if you get caught".
* Scarlet Lady: When one of Alya's younger sisters tells the other younger sister Nino is "the guy all over" Alya's phone, the other sister asks if he's Alya's boyfriend. The tagline even mentions the trope.
* Scarlet Nexus are discriminated against and derogatorily called "duds". Cities are even built with functions that integrate the latent psionic capabilities of people, which causes inconvenience for those who lack it.
* Scarlet Nexus the same day. The eighth-gen aim to target a 1080p resolution at 30 FPS while the ninth-gen has a target of 4k resolution at 60 FPS.
* Scarlet Overkill makes off with the crown of England... only to be literally frozen in her tracks by a young Felonious Gru, who takes the crown right out of her hands and flies off.
* Scarlet Overkill want to become royalty by stealing the crown of England, because she always wanted to be a real princess since she was a little girl. As such her main outfit has a pair of black opera gloves, and
* Scarlet Sails, that she loves Grey), she is clearly the sympathetic party.
* Scarlet Spider, Annabelle briefly thinks this of Kaine when she finds him keeping the teenage Aracely in his hotel room.
* Scarlet Spider Aracely insists that he owes the swear jar two dollars. Quite loudly.
* Scarlet Spider. It's like the writer specifically wanted to show how ridiculous strict atheism is in such a fantastical setting.
* Scarlet Spider; Kaine Parker flees to Houston to avoid Spider-Man and the Avengers, and ends up becoming the city's defender after seeing that it has no heroes of its own.
* Scarlet Spider's classic "web-shooting" pose. However, Ben never actually did that; he modified his web-shooters to fire without the pose. But the pose is so iconic that it gets included anyway.
* Scarlet Street boyfriend completely ruin the lead's life in the process.
* Scarlet Street, Johnny admits to picking up the icepick used to murder Kitty, explaining that he hadn't seen she was dead. He is executed.
* Scarlet Study fan localization, keeping the original names due to how intrinsically Japanese it is. By April 2021, they have completed up to the third case of the sequel, when Capcom announced an official localization.
* Scarlett in Tokyo, but, aside from the Japanese cast and writer Kazuo Kikuta, most of the talents involved were Broadway regulars, including songwriter Harold Rome and director Joe Layton. Layton co-produced as well as directed Harold Fielding's production of an English-language version of the musical, which ran for

a while at the Drury Lane Theatre in London and then toured a few American cities but never opened in New York.
* Scarlett is also shown to have an instinctual knack for business and uncanny math skills. Frank Kennedy was appalled to find out that she even knew what a mortgage was.
* Scarlett is probably universally disliked in the show after the events of "Scarlett Fever", but she gained a lot of fans both before and after that incident in real life.
* Scarlett Johansson, an amusing list of suggestions for the crew on how to handle it.
* Scarlett Johansson, one of the most attractive actresses in Hollywood, is best known for this in her films and in some photoshoots in real life.
* Scarlett O'Hara has been brought up to think of herself as decorative and nothing more. Once the war hits, she's forced to abandon her Belle qualities to save Tara.
* Scarlett pines over Ashley Wilkes, who married his cousin Melanie but courted her before then. Scarlett frequently urges him in private to run off with her, and Ashley is tempted but refuses. Then when Melanie is dying, she appears to tell Scarlett that it's alright to date Ashley after she's gone. Scarlett, however, is too upset to even think about that and falls crying into Ashley's arms... which several visitors spot and think Scarlett is
* Scarlet Traces in which Britain is an alien-fuelled superpower, is chock full of reverse-engineered alien technology.
* Scarlet Traces: The "Martians" are on the verge of extinction after the events of The Great Game have rendered all life on Mars eradicated, and all that is left of them are those living on Venus. By 1968, the aliens are starting to die out and they have become desperate to finish off their human enemies by planning to destroy the entire Solar System.
* Scarlett Undercover: Mook claims to be Scarlett's guardian angel. Due to the book's Maybe Magic, Maybe Mundane setting, it's not clear whether he is actually an angel or just a normal human. He often seems to know things without being told, but there's never any definite proof.
* Scarlett Undercover: Scarlett solves crimes in the town of Las Almas. She's also a teenager, meaning she isn't always taken seriously by adults.
* Scarlett was originally published by DC Comics, but is now owned by Monsterverse.
* Scarlet Wake, focuses more or less entirely on having your character go on one of these against those who wronged them.
* Scarlet Weather Rhapsody that was even released in the West, making this the closest Flandre ever appeared playable.
* Scarlet Weather Rhapsody there's also the Mountain Vapor weather, where in the former it hides the spellcards both players have, and in the latter not only hides it, but shuffles on the player's deck.
* Scarlet Weather Rhapsody, though this has lessened in more recent games.
* Scarlet Witch #1 that contained ads for the toy, presumably to hide the spoiler. Ironically, it ended up being for nothing, since the Gray Hulk was cut from the movie and the toy ended up being repainted.
* Scarlet Witch and his grandson, Wiccan) rock dark-red cloaks/capes. (Wiccan's is a badass tattered cloak)
* Scarlet Witch and Quicksilver go from loving siblings who were maybe a little too close to full-blown incestuous lovers. The Scarlet Witch is icy and aloof a lot of the time.
* Scarlet Witch and Quicksilver hate Tony Stark because their parents were killed by bombs manufactured by Stark Industries and they spent two days staring at a defective Stark munition, wondering if it would explode before they were rescued. Oddly, while they tell this story to Ultron, Stark himself is never told why they hate him.
* Scarlet Witch as well. Then there's this line from her first appearance:
* Scarlet Witch costume for Wanda It was discarded in exchange for her street clothes in the film, but modified and brought back for the series.
* Scarlet Witch has immensely powerful telekinesis, but she has to concentrate on

whatever she wants to affect and seems to take a short time to ramp up to full strength. This makes her nearly unbeatable if she can focus on a single opponent (notably in
* Scarlet Witch, her eyes begin glowing when she expands the Hex to save Vision's life, and at several points during her fight with Agatha Harkness.
* Scarlet Witch. It turns out that her significant magical power is in part due to an elder god in the mountain imparting some of his power onto her. Volume 2 later explains that the "Scarlet Witch" title and powers are passed down through Wanda's family, so there is a definite undercurrent of magic in the tribe's history.
* Scarlet Witch it with her saying she was going back to her gypsy roots, yet the outfit would have easily made her ancestors blush.
* Scarlet Witch. Now, she wears something closer to a red trench coat.
* Scarlet Witch powers but she comes to realize that she has no knowledge of magic in an academic sense and Agatha Harkness, who has nowhere near her raw power, gets the better of her with a simple piece of magic that Agatha says any witch should know.
* Scarlet Witch shows an alternate reality where Scarlet Witch and Quicksilver were captured by the villagers and burned at the stake.
* Scarlet Witch shows the little girl being told to "go bug your sister", which is probably Wanda.
* Scarlet Witch's spell had become his universe's version of a Deathlok cyborg and was now dedicated to hunting and killing humans.
* Scarlet Witch to the idea floated in the seventies that her and Quicksilver's parents were Robert Frank/the Whizzer and his wife Madeline Joyce/Miss America. At the time of the series, the Magneto origin had been in place for a decade.
* Scarlet Witch universe tried to explain that in order to make said improbable events happen she had to "do the math" of how likely the events would be before she could cause them.
* Scarlet Witch. Wanda is a woman who changed reality with mere words, but a solid blow will put her down.
* Scarlet Witch, which respectively caused the downfall of her team and 90% of mutantkind being depowered around the world. The fact she was considered the nicest person on the team made it hard for her teammates to believe her actions.
* Scar only targets alchemists, despite using alchemy himself. Of course, Scar never identifies himself as an alchemist because his religion considers it a sin, thus he exploits a
* Scaroth's time altering machine makes use of a chicken regressing into an egg and back again, making light of the "chicken or the egg" question.
* Scarpetta's Winter Table. This is actually an official part of her Dr. Kay Scarpetta series, and consists of a mystery novella (in which food plays a large part), with separate pages detailing each of the recipes prepared in the story.
* Scarpia Ultimatum: A character sleeps with a villain in exchange for sparing their partner.
* Scarpia Ultimatum: Blackmailing someone into having sex with you by threatening to hurt their loved ones if they say no.
* Scarpia Ultimatum: Forcing people into having sex with you by threatening to hurt someone they care about if they say no.
* Scarpia Ultimatum— "Have sex with me, or else your loved one gets it."
* Scarpia Ultimatum: Someone is blackmailed into having sex with a person who threatens to hurt someone they care about if they refuse.
* Scarrans also have a modular-looking freighter that has been shown to double as a prisoner transport with facilities for conducting brutal experimentation on non-Scarran prisoners.
* Scarrans are immune to standard pulse fire, though if the gun overloads and explodes it can still kill them. One suspects the Doylist reason for the Scarrans allying with the Charrids is that they're not immune to bullets, allowing shoot-outs to keep happening.
* Scarrans - Giant lizard men. Range from human but scaly to spaaaaaace tyrannosauruses.

* Scarrans, who have the power to project their body heat into deadly beams, love using this against their enemies — especially Sebaceans.
* Scarred heroes in urban fantasy/romance is extremely common. Usually the scars aren't disfiguring and may be a wild turn-on for the scaree's love interest. In J.R. Ward's
* Scarred Lands: A very literal example happened in the history of the setting. The only Titan to side with the gods in the original war between them was Denev, Scarn's equivalent of Gaia; her fellow Titans had no respect for nature and were ruining it. She was thus the only Titan to be spared when the gods triumphed.
* Scarred Lands because, mind you, the vermin are always moving under the host's skin to find more comfortable areas to rest. Remember one of those vermin are large rats!
* Scarred Lands, Face Stealers in their natural form look like tall, slightly distorted lanky humanoids covered in shaggy hair, with unnaturally long arms and a horned ferret-like head that seems too small for its body. However, a face stealer is seldom encountered in its natural form as it can magically peel away the faces of their victims, leaving the unfortunate souls with no facial features, just raw flesh covering their heads and two nostril holes where the nose should be.
* Scarred Lands franchise vs their Gods. The back story to the series is a war against the amoral creators of the world, the Titans, and their rebellious children, the Gods. The Gods were unable to completely kill the Titans, so they just maimed and imprisioned them. Despite completely obliterating two of the Titans, the other Gods were left mostly whole and just imprisoned. Since then, the remains of the Titans has damaged the land and corrupted countless creatures, even the two who were almost destroyed. Despite the fact that the Gods now rule the world, they haven't shown themselves to be in any hurry to clean up their mess.
* Scarred Lands — After the gods won the war against their parent Titans, they sealed them since they could never be killed. One of the Titans, Kadum the Mountain Shaker, was chained and flung into the deepest oceans, where the sea now runs red from his constantly bleeding wound where his heart was cut out. As a result of the exposure, all nearby sea life became tainted by the Titan's blood. One of these beings were the Blood Maidens, who look like beautiful women with long black hair and pale skin. When seeing their faces, the creature's monstrous nature becomes clear. Instead of a normal face, the blood maiden has only a giant circular, eyeless maw, like a lamprey.
* Scarred Lands, one of the locations examined is a bar called Cheny's that's infamous for its coffee. Despite it tasting like oil, it's guaranteed to put hair on your chest. The only downside is that it seems to do so regardless of race, sex, or species.
* Scarred Lands only cares whether or not you're plotting against the city and officially couldn't care less what you do in your private life, making there be very few non-obvious crimes. And for the record, this is a setting where one of the gods officially preaches homophobia.
* Scarred Lands return to power, that the entire 'reign of the gods' is just the cyclic stage of the particular Titan Denev, who is relatively benevolent.
* Scarred Lands setting introduced The Midnight Peddler. While not truly a shop, it was the same idea; this fiendish creature was a peddler who appeared in cities at midnight on foggy nights, and someone who bought his wares might gain a boon or a curse, depending on their luck. (In game terms, buying something from him gave a character a randomly chosen temporary bonus or penalty to an Ability Score or some other stat.
* Scarred Lands tabletop RPG, one of the villains is a being called Mormus, AKA The Jack Of Tears, who rules over his own part of the world. He has four lieutenants, and all but one of them is planning to usurp him and betray each other. Mormus's well aware of this, but he lets them continue their machinations just because it amuses him.
* Scarred Lands, the goddesses of Good and Evil are twins, with Madriel being the good twin and Belsameth being the evil twin. They often impersonate each other. It's usually Belsameth impersonating Madriel, but the reverse also happens

sometimes.
* Scarred Lands, the god Vangal is the child of three titans. His mother is Lethene and his fathers are Chern and Thulkas.
* Scar's arm is covered in a tattoo that allows him to perform his destructive alchemy. It's embarrassing because it
* Scar's book by saying this exact quote while ordering her servants around.
* Scarsick continues from "The Perfect Element I", except now, the protagonist watches TV and feels bad about stuff.
* Scars of Mirrodin block a mystery for a time, saying it would be either New Phyrexia or Mirrodin Pure, depending on which side won the war. Eventually it was revealed to be New Phyrexia. This surprised precisely no one, but for the portion of the player base who liked Mirrodin and disliked Phyrexia, we can only wonder what the set could have been like.
* Scars of Mirrodin came out, 51% of players supported the Phyrexians.
* Scars of Mirrodin, considering both of them had more chemistry with Jhoira, Karn as a friend and Venser as a perv, and Karn actually disliked Venser), and this was never developed in the novel anyway.
* Scars of Mirrodin, the flavor text for "Tumble Magnet" suggests and inverts this trope: "Magnetic devices that keep massive golems and structures standing can also be used for the opposite purpose."
* Scars of War deals with recovery from a war, rather than the war itself. Ponyland is recovering from several years of war.
* Scars of War is an unfinished story about the aftermath of a three-year war known as "the Great Battle" that Ponyland was involved in with another land. Many ponies, foals included, lost their lives. The war has left a mark that the ponies only start to recover from two years after it ended.
* Scars (or, rather, the tissue around said scars) also tend to be painful well after the fact if they are in a particularly sensitive part of the body, eg the abdominal area.
* Scar's Samsara has Scar smooth-talk an army of hyenas which are about to eat him into attacking Pride Rock, thinking that he'll have thought of a plan to make use of the distraction by the time they arrive.
* Scar's Samsara has spiritually attuned beings able to "call lightning from the heavens and bathe your enemies in fire". It also extends to other elements such as wind.
* Scar's Samsara, the main character is furious at the fact that only the Lion Kings get to enjoy the afterlife, and tries to give immortality to himself and everyone in the Pridelands. He even considers killing Mufasa to not really be murder, since he's only helping him "migrate to greener pastures", after all. At the same time, he's also terrified at the idea of having to face his brother again in the afterlife, however.
* Scar Survey: Someone (usually a woman) asks someone else (usually a man whom she is dating or will end up hooking up with) how he got his scars. Both have to be good guys.
* Scar Symmetry. He formed a band called Solution .45 who's music happens to sound similar to theirs. It doesn't help that all the rest of his bands either don't sound like them or are so unknown nobody has heard their music.
* Scar Symmetry sounds nearly identical to the riff played during the breakdown of "Calculate the Apocalypse".
* Scar Tissue: After returning from the Red Sea Gendo asks what his son has been up. After hearing an account of it:
* Scar Tissue, Asuka remains rather possessive of Shinji, and is instantly driven to a state of cold rage when she sees how happy he is that Rei is alive and how easily he can talk with her. When comforting Shinji when he's having nightmares, she admits that she always thought of Shinji as hers and hated him talking to other girls.
* Scar Tissue: Asuka's temper had got way more volatile after Instrumentality. Often her bursts of rage were unconscious: she entered a trance and she did not wake up until it was too late. After the events, prior to the fic, she makes a

conscious effort for keeping it in check.
* Scar Tissue: Asuka was jealous of Shinji because he always upstaged her, even though he did not even try to or want to, despite of her training during her whole life. Ironically, Shinji thinks Asuka is better than him at everything.
* Scar Tissue: At the beginning of a chapter, Shinji suffers a nightmare where he sees Asuka kissing another boy. He gets utterly distraught and feeling the impulse of killing both of them. At the same time, it severely disturbs him feeling so jealous and possessive.
* Scar Tissue: At the beginning of the history Shinji has the next wounds: a concussion; a dislocated shoulder; a shattered radius; four broken ribs, two of which had punctured his lungs; his diaphragm was shredded; and his heart had been in danger at some point due to a broken shard of rib bone sticking out of it. It was noted that it was a miracle he was still alive.
* Scar Tissue: Deconstructed. After a botched synch test with Unit 02 Asuka starts to avoid Shinji because she fears that she will hurt him during her nightmares or Unit 02 will try to kill him. When Shinji finally confronts her about her behaviour and gets the truth out of her -that she is pushing him away to protect him- he tells that is the most stupid thing he has heard:
* Scar Tissue, doing nothing as she was butchered and eaten alive, trying to kill her...). At the same time, Asuka felt guilty and repulsed with herself every time that she mistreated him. As a result of it, their bodies were quickly deteriorating until the beginning of the fic, when Asuka determined never hitting him again and they started to rebuild their relationship.
* Scar Tissue: In chapter 13 Shinji is ranting angrily that he does not want Asuka fights again because he wants to protect her. She quietly states it sounds like a confession. Shinji admits that it is one.
* Scar Tissue: In chapter 8 Asuka gets angry with Shinji because he has reopened his wounds after yelling at their friends when they ganged up on her.
* Scar Tissue: Part of the reason that Shinji and Asuka would never, ever, think of leaving each other, no matter how unhealthy their relationship may get, is the deep conviction that no one else in the world can understand their pain.
* Scar Tissue reflects all he did to reunite with his wife -which includes abusing and torturing his children emotionally and ending the world- was completely useless and meaningless, since Yui chose to remain inside Unit 01 rather merging with everyone into Instrumentality.
* Scar Tissue: Shinji accidentally touched Asuka's breasts as he was sleeping in chapter 9. When he woke up and realized he panicked, but Asuka reassured him that she would not hit him.
* Scar Tissue: The giant alien Angels had been all killed before the beginning of the story, but a Russian black project had used samples of their DNA to create another massive monster. In order to destroy it, the main characters have to repair and reactivate their last giant robot left.
* Scar Tissue were always together, always bonded by destiny. They were one.
* Scar Tissue: When Shinji loses control and goes berserker, he is able to snap necks easily. Several characters as Asuka note it and he feels pretty disturbed about it.
* Scar, when Joan is faced with her niece being tortured by a copycat of the killer who tortured her as a child, she manages to cut off her thumb so that she can escape the handcuffs he's using to keep her trapped (although based on the film's closing scene the hospital has at least made an attempt to reattach it).
* Scar, while an effectively calculating villain, by his own admission, didn't really inherit the brawn of his family, and when confronted by Simba, starts to
* Scary Black Man: A big, thuggish brute of a guy who is of Black African descent.
* Scary Black Man) Adonis came very close to getting his ass kicked. Notable also is that previously (in a pregame tournament) Bobby was defeated with relative ease by an opponent with far less 'fighting ability' than Adonis is touted to have.
* Scary Black Man Barret dressed in a ridiculous sailor uniform while in disguise on the ship, the player can either have Cloud tell him off or tell him that he looks adorable. Choosing to tell him he looks adorable results in you later finding

him in the inn dancing around in front of the bathroom mirror for himself and talking about how he'll be wearing it when he goes to see his little daughter.
* Scary Black Man chained next to the hero, who will die heroically for the hero's freedom
* Scary Black Man character he usually plays. It's just that, this time, he's not intimidating at all due to his looks and stature, while in his live-action movies, he's very intimidating.
* Scary Black Man, his equivalent of lighting the beacons is to call "How Pretty!" into the summer breeze, which calls a horde of hog riders to the city. He also has a squeaky voice.
* Scary Black Man of his would-be assailant being a black man, amusing.
* Scary Black Man: This big black guy looks like he can kick someone's ass. He can!
* Scary Black Man where he is stated to seek any kind of penguin statues, plushies and goodies to add them to his collection.
* Scary Black Man who tells him to start running before he catches him.
* Scary Black Men (white ones especially) should be imported into the jail.
* Scary Book: Reflections, the vanity of a girl who admires her beauty incessantly in a mirror causes her evil reflection to escape and attempt to take her place, driving her to the edge of insanity in the process.
* Scary Dogmatic Aliens: An antagonistic alien race is explicitly based on a foreign nation or political ideology regarded as a cultural boogeyman during the author's time.
* Scary Dogmatic Aliens: An evil group of aliens with a strict ideology.
* Scary Dogmatic Aliens call themselves "visitors" and are referred to as "lizards".
* Scary Dogmatic Aliens: Evil aliens with an obvious dogma, usually a stand-in for real life ideologies.
* Scary Dogmatic Aliens: Extraterrestrial villains who are motivated by some extremist political or religious ideology.
* Scary Dogmatic Aliens from their arch enemies the Venusians. However they tend to do so by kidnapping, murdering, impregnating, and infecting humans with plagues.
* Scary Dogmatic Aliens have their roots in the infamous Unit 731 atrocities.
* Scary Dogmatic Aliens: "We'd kill you, you see, but our religion prevents the interruption of suffering."
* Scary Dogmatic Aliens, who have one based on scale-color. Blue-scales are nobility, gold-scales are priests, yellow-scales are scientists, red-scales are military, the rare black-scales are spies or assassins, green-scales are laborers, and brown-scales (the result of inter-caste mingling) are outcasts. Below even the browns are the P'w'eck, the Ssi-ruuk's smaller cousins who are used as slaves.
* Scary Flashlight Face: Parodies of this kind of lighting are so common that this has been listed as both a horror trope and a comedy trope.
* Scary Gary, it’s not clear how technology progressed over the years, but Gary has home video recordings of himself as a five year old kid in 14th century Romania. There weren’t any iPhones at that time though.
* Scary Gary to stop burying body parts in Gary’s flower bed, only to do a 180° when Frankenstein’s boyfriend gushes over how gorgeous the flowers are.
* Scary Godmother duology don't realize that it's actually an adaptation of two novels in a long-running series.
* Scary Godmother, he didn't care one bit of that he hurt his own cousin's feelings.
* Scary Godmother: In the animated Halloween special, the eponymous Scary Godmother is throwing a Halloween party. A family of vampires arrives and is confused that they continue to stand outside. She forgot that vampires can't enter into someone's home without being invited inside. And they have to be invited in every time. In the second special, they try to enter and hit a magical barrier.
* Scary Godmother pizzas to the Halloween party, Scary Godmother (understandably) looks at him expectantly. This is all they find, much to SG's annoyance.
* Scary Godmother: Predominantly Haloween-themed stories about a girl who befriends

monsters and the titular "Scary Godmother".
* Scary Godmother's character model recolored, made fatter and covered in a blue Hawaiian jacket.
* Scary Godmother: Two Halloween specials where a girl befriends friendly monsters.
* Scary Godmother, warns that "those watching of a more sensitive nature may wish to turn away for this next graphic scene of horticultural violence." Cut to Jimmy smashing the pumpkins in an attempt to ruin Halloween.
* Scary Godmother, when it looks like the house fell on Scary Godmother and crushed her. Skully and Bug-a-Boo are crying, while Harry rejoices. Soon enough, Scary Godmother re-appears (having merely lost her leggings before the house came down), commenting on how sweet it is that Skully and Bug-a-Boo miss her.
* Scary Go Round. After scaring off a ghost with a holograph, The Boy expresses surprise that it would fall for such a trick. Ryan's response: "Ghosts got to be superstitious! Tell them there's a flying top-hat full of yoghurt out to get them... you'll get the benefit of the doubt."
* Scary Go Round and slices himself to pieces with his vaguely scissorhandish murder gloves. Tessa and Rachel are horrified: "That's all the reminder I'll ever need not to run with scissors".
* Scary Go Round, as a pale shambling zombie. He flees in terror, then stops to remember what his momma always told him; make things right with that sweet little gal.
* Scary Go Round. But he uses up all his manliness in the process, and subsequently just feels like "poking things listlessly with a stick."
* Scary Go Round does this a few times. "You are my loved friend whom I love!"
* Scary Go Round, Fallon Young, sexy (but bungling) international superspy, usually wears a catsuit, as other characters have been known to note admiringly.
* Scary Go Round). Female characters have more varied outfits (though each has an identifiable style of dress). The difference is probably because John Allison enjoys drawing pretty girls in nice clothes, but is also fairly realistic.
* Scary Go Round for which backstory is not needed to understand their new role.
* Scary Go Round girlfriend Esther de Groot. They became a couple during a trip to Wales, which Esther had initiated relatively spontaneously.
* Scary Go Round is also a self-sufficient Webcomic, due to The Merch. The earliest T-shirts were worn by characters in the strip (Shelley's "Eggbert" T-shirt was revived for Christmas 2008). These days the characters still wear quirky T-shirts from time to time, but the shirts available to the public tend to have a tenuous connection to the strip. They're pretty cool, though.
* Scary Go Round is really just a con to get money and women for Wayne.
* Scary Go Round potion that enlarged the younger Winters girl was first tested on animals:
* Scary Go Round: Reaping is something of a franchise operation. Natalie Durand gets a job as assistant to a hard-bitten, overworked reaper as something to do after her death, and glams up the costume a little. (Well, she is French.) Her embarrassment at being asked to collect another of her former boyfriend's exes proves fortuitous for Fallon.
* Scary Go Round's Tim Jones built a time machine that was a self-heating teapot with a clock on the side and an electronic eye in the lid. To use it, one simply had to set the clock to your desired time, then turn on the teapot; using the principle that "a watched pot never boils", the water would heat up but never boil. In the process, time would get confused, and reset itself to the nearest timepiece.
* Scary Go Round) that it grievously injures him, forcing him to drop out of the election.
* Scary Go Round, The Boy shows Erin some kind of unidentifiable... thing he's found. He keeps it behind a shed, with a sheet over it, and a handy label on the sheet which reads: "nothing".
* Scary Go Round, the wedding of Erin and Bob Crowley is the key that starts the apocalypse. Shelley comes in too late to stop the marriage, but when she learns that the marriage hasn't been consummated yet, she simply texts her lawyer and has the marriage annulled, banishing the army of demons back into hell.

* Scary Go Round (with her leaving town) can stop her, as she still appears around her author's website.
* Scary Jack-in-the-Box: A jack-in-the-box that is terrifying in some way.
* Scary Larry, Carl can make his nervous system glow and turn the rest of his body transparent.
* Scary Larry has the band breaking up and all the members moving out of the house.
* Scary Larry is about a band consisting of a vampire vocalist, a wolfman guitarist, a Frankenstein's Monster drummer, a mummy bassist, and an alien keyboardist.
* Scary Larry, the Insomniac babies run a bar and get harassed by the mob for protection money, so they call the police. But the police threaten to punish them for ridiculous infractions unless they give them 50% of their profits.
* Scary Marines, who are in some ways the loyalist equivalent of the Night Lords, but they rely less on savagery and more on being eight-foot-tall experts in subtle psychological warfare.
* Scary Monsters (And Super Creeps) depicted Bowie recovering from the addiction.
* Scary Monsters but Diego's version seems to lack the infecting properties.
* "Scary Monsters" had strange insect creatures tormenting the family of a little boy, who drew pictures of strange insect creatures tormenting people. It turned out he was a
* Scary Monsters" in the final season. A young boy causes several people to kill themselves when his illusions are made real in their minds. Luckily John Doggett is too stubborn to believe and tricks the boy by using his imagination against him.
* Scary Movie 2, a mean cat goes so far as to attack the heroine with a broken bottle.
* Scary Movie 2... but he immediately jumps into bed with her by solving the problem with a paper bag.
* Scary Movie 2, Cindy and Buddy find a painting of the wife who had lived in the house.
* Scary Movie 2, Cindy Campbell's nephew Cody is heavily implied to being molested by a pedophile priest Cindy hires as a babysitter, as he immediately hides when the priest arrives and the priest says in a creepy tone (once Cindy is out of the house) "Cody...".
* Scary Movie 2: Hanson the caretaker (who has a deformed hand) and Dwight (who is a paraplegic) despise each other as soon as they meet, proceeding to throw a string of ableist insults at each other.
* Scary Movie 2 has Shorty watering his marijuana plants with bong water. The plant later grows, becomes sentient, and starts smoking Shorty like he was a blunt.
* Scary Movie 2. It ends in a drawn out vomit fight between the girl, the priest, and his assistant.
* Scary Movie 2, only to be reprimanded by Brenda for being afraid. To illustrate her point, Brenda pulls the skeleton apart and reassembles him badly.
* Scary Movie 2 Plant: a plant of marijuana grown by Shorty that suddenly becomes a human-sized plant, and rolls Shorty in a joint and smokes him.
* Scary Movie 2 scene with the Clown Doll turns into this, and was the likely inspiration for the Internet meme, "There is nothing funny about rape, unless you are raping a clown." Of course, this scene also features the reverse when the 'victim' turns the tables on the clown doll.
* Scary Movie 2. The characters find a trail of bright red footprints leading down the hallway, prompting one of the male characters to comment "Ew! Someone's on the rag!"
* Scary Movie 2, the creepy, depraved butler turns out to be in league with the evil ghost inhabiting the haunted house.
* Scary Movie 2 when Buddy takes Cindy's friendzoning of him to its logical extreme by playing rough with her like he would to a male friend.
* Scary Movie 2 where Dwight (David Cross) falls out of a two-story window because he refuses to take the disfigured hand of the perverted Hanson (Chris Elliott), despite Hanson insisting it's his "strong hand".
* Scary Movie 2, which some people believe is the funniest part of the whole movie.

* Scary Movie 3, a police officer's hat increases in size between shots. It's probably the best part of the movie.
* Scary Movie 3. Aside from the Evil Phone getting dragged into actual conversations, it tries to contact the female protagonist's son and gets her instead, gets hung up on, calls back and poses as a solicitor, and then finally asks her to take a message for him.
* Scary Movie 3). Cue Cindy opening the door with no problem. It turns out they'd just nailed some planks to it without fastening them to the wall.
* Scary Movie 3. George Bitner is a whitebread farm boy who has two black best friends and participates in rap battles. When his older brother denounces his interests, George declares "You just hate me cuz I'm black."
* Scary Movie 3 George mistakenly believes "wake" to mean the deceased is alive again and takes her out of the coffin as such. Mahalik comes in later to help his friend when people start attacking George for disturbing the body.
* Scary Movie 3: Parodied when George informs Sue about the death of Brenda, who was her teacher. It seems like he'll be considerate in telling her this news, since she's only a child. Instead he just loudly screams in her face and tells her he ran over her dog too. ("EVERYONE you love around you is DYING!")
* Scary Movie 3 tape, and are trying to save themselves by killing the girl.
* Scary Movie 3, the guy in the lighthouse tells Cindy that she is "inexorably seeking a sedulant probability." When she questions this, he continues, holding a dictionary with "What about contingent affirmation? That's got to mean something."
* Scary Movie 3 to fight off an alien attack. One fight move involves shoving an alien up his butt.
* Scary Movie 3. Upon hearing Cindy and George express their love for each other, the corpse of Tabitha turns into a beautiful little girl and says that their love has broken the curse and she won't ever have to kill again. "Really?" asks Cindy and Tabitha turns back into a corpse and admits "Nah, I was just screwing with you."
* Scary Movie 3 whom Cindy is caring for goes around Brenda's funeral service giving people cynical and mocking advice ("smoke all you want, you're gonna be hit by a car next week anyway"). He tells the guy with an obvious toupee that he's not fooling anyone.
* Scary Movie 3, with Cody's bizarre drawing of Samara parody Tabitha.
* Scary Movie 4 appear as themselves. Dr. Phil portrays himself as a fake psychiatrist with mommy issues, while Shaq is a bumbling klutz.
* Scary Movie 4 example with Shaquille O'Neil and Dr. Phil about to be killed by nerve gas. After being suckered into cutting off his own leg, Phil realizes it's the wrong one and they die anyway.
* Scary Movie 4. It has also been used in at least two music videos. First by Ayumi Hamasaki for "do it again", then by Nicki Minaj and Rihanna for "Fly".
* Scary Movie 4 played this for laughs in Cindy's boxing scene with multiple broken necks from trips and falls.
* Scary Movie 4, revealing the only thing different was that there were Alien Tripods in there.
* Scary Movie 4: When Cindy moves the lighter near the ghost's face, we pan down to see the lighter is burning the ghost's hand.
* Scary Movie 4 with the triPods, which resemble an iPod on three legs with a "Destroy Humanity" playlist.
* Scary Movie after watching the video, but at first can't understand that she's being told "seven days" (meaning that the girl is going to come and kill her in seven days) due to bad connection.
* Scary Movie, a homeless man asks Cindy and her friends if they can spare a dollar. Buffy is utterly repulsed by him, but Cindy gives him a sandwich. The homeless man responds by saying "I said a dollar, bitch!" and throws the sandwich back at Cindy.
* Scary Movie and declare her the winner for her "convincing performance".
* Scary Movie." and the others ignore her and immediately split up and walk away.
* Scary Movie. At first he's horrified and it looks like she's strangling him, but

he's actually having sex with her, solving the problem with a paper bag ("No no, no kissing!"). They're still together at the very end.
* Scary Movie, a young woman beats a group of trick-or-treaters senseless in this context.
* Scary Movie. Brenda berates her brother Shorty, and he calls her mother stupid. She points out that he just insulted his own mother, as they're full siblings. Then he insults her father, and she doesn't mind because she never met the guy, and as he realizes, neither has he.
* Scary Movie: Buddy gives Cindy a massive wedgie after they become friends in the second movie. Buddy also receives a hanging wedgie from a ghost later on in the movie. Happens again in the third film when Becca gives Katie a wedgie in the escalating pillow fight.
* Scary Movie: Buffy and Cindy have boyfriends, but mention going down on each other one time. However, given that they swore to never speak of it again, it could have just as easily been bicurious experimentation.
* Scary Movie, Cindy comes home to find George passed out at a table. She asks him what happened he says that he doesn't know. He and Cody were playing a fun game when he looked down and...
* Scary Movie, climbing into Cindy's window before realizing he's in the wrong house.
* Scary Movie first victim trips into one of those and holds the pose for a few seconds before running away.
* Scary Movie, George tells Sue that her teacher Miss Brenda is dead, and then that her dog is dead and that everyone around her is dying, resulting in this.
* Scary Movie: Happens to Drew Decker. After getting stabbed in the breast (and surviving because of the silicone implants), she spots her parents car and runs towards it, screaming for help... Only to get run over because her father was too busy getting a blowjob to notice poor Drew.
* Scary Movie has a variant, the piano push (which Ghostface evades, but not the poor grandma down the stairs).
* Scary Movie has the camera zoom in on Cindy only to hit her on the head and her pushing it away afterwards.
* Scary Movie has this exchange between Hanson (the caretaker with a deformed hand) and Dwight Hartman (Who is in a wheelchair):
* Scary Movie: In the first film, Gail Hailstorm screams this at Kenny the cameraman when she's on the verge of gagging over him accidentally touching her breast and he won't stop babbling about it.
* Scary Movie is seen in torment, praying for God's help while a growing cloud of flies buzz around him; then the camera zooms out to show that he's straining on the toilet.
* Scary Movie, many deaths are due to some characters being Lethally Stupid. In the fourth, the father keeps almost killing his daughter accidentally.
* Scary Movie — is mopping up a trail of blood before dragging out a trash bag with a leg sticking out of it.
* Scary Movie, one girl is outraged to find a fellow student has been murdered... because she planned to cheat off said student's test that day.
* Scary Movie parodies that scene by having Cindy use various things (including a can of peanuts and a Slinky) to make a bulldozer.
* Scary Movie parodies this trend when the killer is explaining his actions.
* Scary Movie sequels (either three or four), a flaming man appears in the background walking a flaming dog.
* Scary Movie series (at least the first two and the fifth; one of the Z's of ZAZ, David Zucker, handled the other two)
* Scary Movie series, her first two roles were brunette but became blonde from the third film onward.
* Scary Movie series. Mostly spoofs horror movies, except for some of the more recent sequels which predominately spoof sci-fi movies.
* Scary Movie series parodies this very liberally, with characters are tripping over everything dozens of times inside of 3 yards' distance.

* Scary Movie series to not get overall negative reviews was the first one. This didn't keep the others from making money, albeit not as much as the first.
* Scary Movie series when actor Kevin Hart had to stand in a trench in order to be noticeably shorter than the other actors. Since Kevin Hart stands 5 feet 2 1/2 inches tall, it seems that he frequently employs this device, rather than subverting it as he did in this movie.
* Scary Movie, she is inexplicably alive. Cindy even remarks that she thought she was dead. Brenda simply replies that a lot of people thought that.
* Scary Movie (Sydney, Dewey and Gale), who are always slashed by the antagonists, and even finish the movies in a hospital, but never die.
* Scary Movie that it defies description, but since this is a parody movie, it also works on the audience.
* Scary Movie that the alien invasion is no more a real war than there is between man and maggots. He continues: there's also no real war between dragons and wolves. And man, riding dragons, throwing wolves at maggots. Tom gives the camera a vacant expression in response.
* Scary Movie The coffee cup shatters to reveal a small goldfish lying in the pool of coffee gasping for air.
* Scary Movie). The comedy is also attacked, and the fact that it's also a PG-13 rating did not help this installment either. All of this before it was released. After all that it got an 11 on Metacritic.
* Scary Movie: The first movie, a guy in on the edge of a building about to leap. Out comes Cindy who, paranoid about the killer and thinking he/she watching them, starts screaming "What are you waiting for?!", inadvertently egging the guy into jumping to his death.
* Scary Movie. The killer boasts that he is calling from inside the house, but Cindy can see his feet sticking out from behind the couch.
* Scary Movie, the parrot does this, except it turns out it can really talk and not just mimic.
* Scary Movie. This causes her black friend Shorty to shout out to the entire school cafeteria:
* Scary Movie when a character is faced with an actual road sign clearly marked 'Death', and still follows it.
* Scary Movie, when Greg/Buffy and Ray/Brenda are making out in the back seat of the car. Greg enthusiastically removes Buffy's lacy thong panties from under her skirt. Ray does the same to Brenda, only to find himself holding a huge pair of white cotton underwear. Brenda is defensive:
* Scary Movie, where a news crew correctly expects the killer to make his next move at one of these places. The victim-to-be is clearly more excited to be on the news than scared, and the killer himself is simply irritated that the reporters are bothering him while he's trying to do his job.
* Scary Movie: While attempting to save their van from a mob, Tom gets socked in the jaw.
* Scary Movie) who's apparently just using the job to spy on teenage girls. Cindy only realizes this when she goes to the coach's office for advice and sees a pair of balls hanging from "her" skirt.
* Scary Movie worse, it's still generally seen as inferior to the first and third films, with even creators the Wayans Brothers being on record as disliking it due to the rushed writing and filming process.
* Scary News out of Tokyo-3 derives from interviews conducted by them.
* Scary News out of Tokyo-3 fashion. Unfortunately, none of the other characters are in a position to figure out the truth until she finally comes out and admits it.
* Scary News out of Tokyo-3 had a pretty drastic effect on a number of real-world religions (and cults). Some have died out completely; others, like (for example) Scientology, no longer exist in their original form.
* "Scaryoke": The government agents Dipper called are revealed to have survived the zombie attack, which is enough confirmation for them to investigate Gravity Falls. The next several episodes have them in the background before they make their

formal return in "Not What He Seems."
* Scary or Die: There are two varieties shown: One group are made with radioactive waste and are your standard Romero shambling variety; the other one seen is a voodoo revenge Yandere zombie.
* Scary or Die who'll kill a woman for telling him to not cheat on her).
* Scary Scarecrow Fiddlesticks's ultimate ability is Crowstorm in which a whirlwind of deadly crows circle around him dealing massive damage.
* Scary Scarecrows tend to exploit this, as friendly scarecrows often have innocent stitched smiles and patchwork outfits.
* Scary Scarecrows: The crows are scared of them for a damn good reason.
* Scary Scarecrows: There's a good reason why the crows stay away from this thing.
* Scary Scarecrows: Though usually a prop rather than a major element.
* Scary Science Words: A character is intimidated by technical-sounding words.
* Scary Scorpions: Real scorpions are not as deadly as the ones in fiction.
* Scary Scorpions: Scorpions portrayed as terrifying, dangerous and aggressive, often far more so than they actually are in real life.
* Scary Shiny Glasses allow the wearer to see through the fog on the Midnight Channel.
* Scary Shiny Glasses: Character's eyes are intimidatingly obscured by light reflected in their glasses.
* Scary Stinging Swarm: Insects who come in swarm have stings that kills.
* Scary Stories to Tell in the Dark (2019), the protagonists throw a flaming bag of poop into their bully's car.
* Scary Stories to Tell in the Dark (2019), there is a town legend of a woman named Sarah Bellows who would share tales from her "Book of Scary Stories" to the locals, and they would mysteriously vanish or die soon after. The main characters find the book itself, and they fall under its spell as well, with red writing appearing in its pages to vaguely explain the coming fate of the person written about. That said, it's possible to defy the fate they're given in the story, but the odds are greatly stacked against them.
* Scary Stories to Tell in the Dark) are the illustrations that accompany them.
* Scary Stories to Tell in the Dark features a loose adaptation of the Blackwood story, with a wendigo that is more of an elemental of wind and cold. The Wendigo calls you out of the tent with its eerie, windblown song, and drags you along the ground until your feet burn, then carries you up into the sky and drops you.
* Scary Stories to Tell in the Dark has the story "Harold", where two farmers make a scarecrow they dub Harold after a farmer they both hate and spend much of their free time abusing it. The scarecrow comes to life, hunts one of the farmers down, and murders him by skinning him alive before laying the skin out in the sun to dry.
* Scary Stories to Tell in the Dark is of a girl with an inexplicable red spot on her face, that grows bigger and bigger... and explodes with spiders.
* Scary Stories to Tell in the Dark is one of the film's best (and scariest).
* Scary Stories to Tell in the Dark), it's the artwork people really remember.
* Scary Stories to Tell in the Dark legend, described below under Mythology and Folklore.
* Scary Stories to Tell in the Dark. Most of the stories consist of cheesy folktales and urban legends unlikely to scare anyone above the age of twelve. But the illustrations are horrific and grotesque enough to downright traumatize young children. This could be part of the reason they were re-released with less scary illustrations three decades later.
* Scary Stories to Tell in the Dark: One of the eponymous stories is about a cat. That should be enough to tell you all about that cat.
* Scary Stories to Tell in the Dark, one of the monsters does this; its limbs appear first, then it slowly assembles itself. It can also reassemble itself when attacked, even after being sandwiched between two cars.
* Scary Stories to Tell in the Dark series moshes together urban legends with other bits of folklore for a pretty gruesome mix.
* Scary Stories to Tell in the Dark: The Brett Helquist covers show crows on them (two on the first cover).

* Scary Stories to Tell in the Dark: The Pale Lady walks slowly towards Chucky from far away down a hallway. He quickly makes his escape, only to see her again down the other way. This happens with every single hallway in the area he tries to run into, until finally Chuck is trapped with four copies of the Pale Lady slowly closing in on him from every direction.
* Scary Stories to Tell in the Dark. The story stars a horse raiser named John Nicholas who has just one of his horses (the titular Bess) put down. He decides to come to Bess's skeleton and pat her skull. There is a rattlesnake living inside the skull that gives John a fatal bite on the arm.
* Scary Stories to Tell in the Dark. Two farmers make a scarecrow they name "Harold", after a neighbor they both hate. They use it as a punching bag and call it names. It comes to life and skins one of the farmers. The illustration, shown above, is what makes it a scary scarecrow.
* Scary Stories to Tell in the Dark, was lauded by many critics as an excellent introduction to the horror genre for the PG-13 audience.
* Scary Stories to Tell in the Dark; we would post a link, but we're too scared to search.
* Scary Stories to Tell in the Dark: "Wonderful Sausage" has an evil butcher named Samuel Blunt kill people and pets, using their remains to make a special sausage that he sells to unknowing customers.
* Scary Surprise Party: Something nasty happens to a character (kidnapped, in danger) but it turns out to be a surprise party.
* Scary Tales - Screampunk, which featured twisted fairy tales in a steampunk setting.
* Scary Teeth: You can tell this character is evil because their teeth look creepy or disgusting.
* Scary Terry". Terry enjoys playing the role, since he "says what the real Terry is thinking."
* scary that Billy doesn't need a special talk, but a containment cell!
* Scar zigzags this trope, between this version of him and the Scar from
* [S] Cascade, the finale of Act 5, is the definite record-holder so far. It was hosted on
* "Scat! Darn Catwoman". At the end of the episode, Catwoman falls off a building into a river. Her body is never recovered and Batman says he "doesn't think she'll be bothering us anymore", so he considers her to be dead. However, she appears again in the episode "Catwoman Goes to College".
* Scatman John collapsed on stage during the finale of his show on November 26, 1999. Even though he was revived, his health took a turn for the worse and he died of lung cancer at his home on December 3.
* Scatman John is a concept album about both Scatman John's own rise from alcoholic to popstar, as well as being about the titular country, Scatland.
* Scatman John only got to #60 in his native US with his most famous song, "Scatman (Ski-ba-bop-ba-dop-bop)" and never charted Stateside again. However, he was more successful internationally.
* Scatman John's "Su Su Su Super Kirei" and "Pripri Scat" were originally written for Japanese hair care products and pudding respectively.
* Scatman John that became a worldwide phenomenon in 1995. However, while he was a two-hit wonder in both Europe and the USA, his following album was a moderate success in Japan, complete with no less than five bonus tracks.
* Scatman John: Was actually a jazz crooner and scat singer, before he managed to score a number one pop/rap hit single worldwide with "(I'm a) Scatman" (1995), four years before his death.
* Scatterbrained Senior: Even though it is never identified (outside of the author's notes at the end), the protagonist's affliction in "A Shattered Life" is obviously Alzheimer's.
* Scatterbrained Senior, his sidekick Barnacle Boy is more cranky and bad-tempered than him, and easily annoyed by Mermaid Man's absentminded behavior.
* Scatterbrained Senior: When played for drama, how a person will begin to forget their loved ones' names and who they are as their memory dies.

* Scattered across the Argent D'Nur levels are the remains of giant mechs known as "Atlans" that were used by the Night Sentinels. Background lore indicates that they were
* Scattered across the Earth levels are the ruins of large mechs built by the ARC (Armored Response Coalition) to fight against the forces of Hell invading Earth. As indicated by the word "ruins", they all got wrecked by the demons regardless.
* scatter gun. It's highly accurate and will generally one-shot the target, the main weakness being that it is single-shot.
* Scatter Point, and if he tries to get out of it by skipping town he'll be violating parole and sent back to prison. Michael agrees to find a way to disrupt the heist so Trevor won't be in danger of being killed or going back to jail.
* Scatting loop. "Ir, their lives again ir, their lives to pull us" ad nauseam. It's a wonder this version was more popular.
* Scauldrons are able to eat blue oleander, a flower that's lethal poison to all other dragons.
* Scav Droids and jammers also cause static and HUD glitches whenever you're in close proximity. The former would also attach to your face and drill into your visor, making it hard to see until the repair-wipe thing fixed it.
* Scavenged Punk: Stories featuring settings and cultures based around scavenging and repurposing things, especially technology.
* Scavenged Punk: Technology or other appliances are built from scavenged junk.
* Scavenger Alliance: After first arriving among the Alliance, Tad has many questions, including about the presence of many young children, as they weren't mentioned in files on the Alliance. Donnell smirks and points out that where you get men and women together for extended periods, you tend to get children.
* Scavenger Alliance and manages to destroy his own aeroplane by leaving it in the lee of a ruined building to be hit by falling debris.
* Scavenger Alliance. Blaze muses at one point that if she'd let him be pushed off the roof, he'd still have been asking questions on the way down.
* Scavenger Alliance: Blaze wonders about this after Hannah's many betrayals (which range from stealing some medicine and lying about it to systematically lying to and about Blaze for years so Cage could use her in his power bid) come to light. She concludes that the friendship was real when they were children, but after Hannah and her mother were thrown out of London, Hannah just got used to seeing Blaze as a resource.
* Scavenger Alliance, Luther assumes Blaze will accept his offer of marriage, despite making it clear that he's only interested in marrying her because he assumes that marrying Donnell's daughter will get him the position as Deputy. He treats the marriage as a done deal, based on a crush Blaze had on him a couple of years earlier. He finally backs off when Blaze threatens to paint her refusal on the wall of Reception in large letters for the whole Alliance to see.
* Scavenger Alliance she's the only girl he's met who doesn't immediately throw herself at his feet). Between that and his emotionless, mercenary grandfather who uses Tad as a pawn for his ambitions, it's amazing Tad is even as tactful as he is, but his tendency to blurt out questions and utter inability to read a room nearly gets him thrown off a roof. But under all that is a genuinely caring, compassionate man.
* Scavenger Alliance, when Blaze and Tad admit their feelings for each other, Blaze points out that they are both literally and figuratively from different worlds. They do start a relationship, but among many other problems it has to be kept secret. The Alliance would not be thrilled about an offworlder coming along and stealing their women...
* scavenger beetles are used to clean bones for museums. In the depths of the sea, you’ll find that a whole array of creatures meticulously ‘clean’ the flesh off skeletons, including countless species of fish, shrimp, crabs, giant isopods, sleeper sharks, copepods and many, many more.
* Scavenger Hunt (1979): After being thrown out of the biker bar, Selsome pauses to gloat over the fact that none of the bikers noticed him pocketing the fox tail. As he does so, he knocks over one of the bikes: triggeriing a domino chain reaction.

Seconds later, the bikers are chasing him again.
* Scavenger Hunt (1979): A janitor wearing headphones fails to hear the servants screaming at the top of their lungs in the locked lab.
* Scavenger Hunt (1979) are tallied. Total time elapsed is probably not more than six hours.
* Scavenger Hunt (1979): Because it was the first item they obtained, the servants keep the toilet with them for the rest of the hunt as a mascot/good luck charm; naming it 'Mont Clair'. They are extremely upset when Mildred, Georgie and Selsome steal it, and when it falls out the car and smashes, Babbette screams "They killed Mont Clair!".
* Scavenger Hunt (1979), Dummitz attempts to steal a wedding dress by posing as a mannequin and sneaking out of the boutique.
* Scavenger Hunt (1979): During the car chase, Jackson misses a turn the other vehicles make and instead drives the limo through the glass window of a showroom, and then out the window on the other side to rejoin the chase.
* Scavenger Hunt: Characters play a game where they find a list of items before a set deadline.
* Scavenger Hunt. Lars (Arnie) throws a medicine ball to Henry, who catches it. The impact propels him backwards out the second floor window off the gym.
* Scavengers Are Scum: Scavenging animals portrayed as evil in fiction.
* Scavengers Are Scum: When the hero is a carnivore, the villain will often be a scavenger.
* Scavengers had an odd variant— points were awarded for collecting salvage during each game, rather than for winning the round. However, the final round essentially reset everyone's score, requiring them to carry the salvage they've already earned across a deep gorge over several trips. The more they've got so far, the more points they can earn, but if they mess up then the leading team can finish with fewer points than they started with, allowing the trailing team to overtake them.
* scavengers than prey. Since the ocean floor is too dark for plants, there are naturally no herbivores either. The base of the food web is the dead organic matter that sinks from the water above.
* Scavenger World: After the end, a society emerges, and everyone in it is a scavenger.
* Scavenger World at heart, and both scraps of sapient programs and ancient bound Warp entities bleed into everything. The worship may not be mechanically necessary, but it helps make the machines keeping everyone alive feel appreciated instead of refusing to run in a fit of pique.
* Scavenger World: Everything is super rare and in bad condition in this world.
* Scavenger World: The world has been ruined, and people rely on what they can salvage from the old world to survive.
* Scavenger World: When a lot of people are killed, the rest has to scavenge as they don't know how to make things.
* Scavenger World, where there's more useful stuff lying around than people who need it, may exist for any reasonable period of time.
* Scavenging tideline snails can "ride" the surf by spreading their foot like an underwater sail.
* SCEE display was vastly superior in both energy efficiency and color reproduction compared to CRTs, LCDs, and Plasma, and was supposed to enter mass-production "real soon now" — since 1989. Besides production problems, a lawsuit slowed things down in the mid-2000s, followed by the crash of 2008, and Canon finally threw in the towel in 2010 when LED-LCD screens obsoleted the technology.
* Scene 6, whom he calls a "bloody do-gooder" and complains about how the cure ruined his livelihood.
* Scene: a car, parked on a Lover's Lane. A policeman approaches, and shining his light inside, sees a teenaged girl sitting in the backseat filing her nails, and a somewhat older-appearing boy sitting in the front seat reading a magazine. He looks at the girl more closely, then asks her, "How old are you?" She says "17", then looks at her watch and adds, "For 22 more minutes."

* scene, both Leetah and Two-Edge say "I lost." Leetah has been trying to save a life, while Two-Edge has been playing a deadly game with everybody's lives.
* [scene cuts to the spatula's hospital bed from the start of the episode, with the pulse meter slowing, then becomes a flat line]
* scene. For context, Buck Godot is at least eight feet and probably a half ton of muscle, bio-engineered for life on heavy gravity planets. Your typical pog may, generously, top four feet.
* scene here to bring her flowers, but the "gift" he does bring (her weapon) is far more useful.
* scene, J.D. talks about a nervous patient who accidentally inhaled air from a helium tank.
* Scenery as You Go: As you walk along a bridge or walkway, it creates itself, allowing you to continue.
* Scenery Based Societal Barometer: A single piece of scenery represents the health of a setting.
* Scenery Based Societal Barometer: The health of a single piece of scenery = the health of a society as a whole.
* Scenery Censor #34. Jonah enjoys the view before hastening to join her.
* Scenery Censor: Covering up a nude character's genitals by having objects conveniently placed in front of them.
* Scenery Censor had Benson going undercover with eco-terrorists for an off-screen arc.
* Scenery Censor: Nudity is censored by objects conveniently placed in front of the characters' privates.
* Scenery Censors: for example, she carries lots of paper bags in front of her belly or stands (as pictured above) behind chairs, countertops, or other objects that block the view of her below her midsection. The secret is to not let the camera linger on her long enough for viewers to notice.
* Scenery-chewing is hardly exclusive to the dub - Megumi Ogata's screams, for instance, could raise the dead, and especially in the climax of
* Scenery Dissonance: Unpleasant events occurring in pleasant settings or vice versa.
* Scenery Porn, and especially giant special effects as on the songs and the actors:
* Scenery Porn: Describing the scenery in great detail, though some porn films themselves may have elaborate sets.
* Scenery Porn: Extreme amount of detail put into designing scenery that the audience will either ignore or get annoyed at the real action blocking.
* Scenery Porn: In opera, the design is either minimalist or it's the stuff that makes you drool rainbows. Oriental operas especially fall into this category.
* Scenery Porn, often the full lyrics, and sometimes even extra details and secret messages for the fans. This was a major reason many rock devotees mourned the decline of the vinyl record. You just can't do that kind of thing with a CD case.
* Scenery Porn where Dan Smith keeps trying to escape from black-eyed zombies and becomes one himself in the end.
* Scenery Porn: You can bet good money that a Gothic novel will describe the setting in painstaking detail.
* Scenes between young Jaron and Younger Sydney (the latter still played by Patrick Bauchau) were close to a
* Scenes from a Hat had the suggestion, "Words that make immature people giggle". Including Regina, Pumpernickel, and White.
* Scenes From a Hat, when the suggestion "Cities that shouldn't have a song about them" came up:
* Scenes From a Multiverse, a comic about life in an ordinary multiverse.
* Scenes From An Alternate Universe Where The Beatles Accepted Lorne Michaels' Generous Offer
* Scenes from Crisis Core and Advent Children offer a potential justification for the fact that SOLDIERs wield large swords: They have a small ability to block bullets with the large weapon, especially from their vitals.

* Scenes from the Class Struggle in Springfield", Homer goes to a discount electronics store:
* Scenes from the first two films are re-enacted by children in a play for the music video to Snow Patrol's song
* Scenes of the killer watching news reports about their own crimes, and
* Scene Stealers where teenagers from one scene were made over to try and pass as those from another (i.e. a plastic was made into a goth). Some of the teens that got made over suited the new styles quite well, especially Michaela a goth who became Mikki a plastic. She suited the plastic look much better than the girl who made her over. A rude girl Gemma also got made over into a posh look that looked better without all the extra jewellery, etc.
* scenes with Red Guy are done in widescreen, with the scenery looking much more muted and realistic.
* scene where Riff pushes his way through an (unarmed) angry mob... to deliver the great news that his smithy just got a huge order for torches and pitchforks, wonder why that is.
* "Scenic Hawaii," which runs a 6-hour loop of mostly high-definition panoramas and aerial shots of the Hawaiian Islands.
* Scenic Tour Level: The game starts with exploration of a small part of the setting while getting a tour of the level.
* Scent-Imental Over You (1947) has Pepe Le Pew peel off his skin to reveal a dog underneath when "confessing" to a chihuahua who had been wearing a skunk fur, then removes his dog mask revealing Pepe's true skunk features once again.
* Scent of a Woman) and they have all the attitude and snobbery that goes along with that.
* Scent of a Woman features a mix of "grudging salute" and "civilian doesn't know how to salute". Charlie is being annoyed at Colonel Slade (Al Pacino) and answers to his demands with a poor-man's, somewhat disgusted, attempt of the military gesture while the Colonel is looking the other way. Of course since the Colonel is a blind veteran, he catches Charlie on the act instantly and explains him the basics of a salute.
* Scent of a Woman is about a poor prep school student slowly developing one of these with a blind, medically retired ex Lieutenant Colonel who has hired him as aide.
* Scent of a Woman that the central character utters, something that later became synonymous with Pacino's many late-period bombastic performances.
* Sceptre (Flicker to his friends, and anyone who isn't his great-grandmother) tells his great-grandmother, Vicereine Puissance, all the things his dad said about her - like how great-grandma's an evil pony who's lived too long, and is a spiteful monster - right to her face, not getting
* Schachtelllaufwerk to fix any one specific tank due to logistics not being able to ship enough of them fast enough to the front lines. The Allies resolved the "bumpy ride" issue by having a practical workaround - a gyroscopically stablized main gun.
* schadenfreude in his office reading, "Don't forget: You're here forever!"
* Schaffrillas Productions - Created YouTube poops back in the day, now focuses on movie and series reviews.
* Schaffrillas Productions, he may have feared that his videos would end up lumped in with kid-friendly material, so it was very much justified.
* Schaffrillas Productions is non-canon to the rest of the Shrek franchise.
* Schaffrillas Productions: Video essayist who reviews films, cartoons, musicals, and video games.
* Schah Dee in the Trial of the Mind arc, where he takes control of Anzu to test Dark Yugi. Not evil, but he has different morals.
* Schalke 04 is a good team to this day (though they've had their slumps and even relegations) but they're still longing for the glory days of the
* Schalker Kreisel was founded) and their last measurable success that wasn't "second place in..." was the 1997 win of the UEFA-Cup.
* Schaper took things several steps further by turning K.I.T.T. into a monster

truck with "Knight 2000" emblazoned on the side and "KNIGHT" on the front nose.
* Schedule Fanatic: Has to do everything according to precise schedule, every day of their lives.
* Schedule Fanatic: You must be here in precisely 5.8 minutes, and then spend no more or less than a half hour editing! Afterwards, you are to take a one-hour walk outside, arriving ready to engage in exactly 44 minutes of relaxation, ten of which shall involve yoga, five minutes involving...
* Schedule Slip, but new merch continues to come out on a regular basis and the store is, apparently, still decently successful.
* Schedule Slip episode "Cowboy Max" premiered on the DVD "Whenever I'm Afraid..." a month before airing on TV.
* schedule, thus he acts rudely to anyone who takes up much of his time. Because his social skills are so underdeveloped, he struggles to understand when people act emotionally rather than logically.
* Scheele's Green, along with the chemically related Paris Green, gained notoriety for its toxicity - it was so beloved in the 1800's for its rich, lightfast tone that it was used to colour wallpaper, clothing, and even as
* Scheherazade in 1910, a wave of Orientalism ensued. French couturier Paul Poiret showcased his collection of models wearing harem pants, turbans, kimonos, and dresses with bold colors and exotic prints.
* Scheherazade. Scheherazade knows that humans' flaws can take them to make mistakes and lose their paths but if they're brave enough, they can learn of their errors to be better and even invent great things that can be equal to magic.
* Scheherezade Gambit, enough time has passed that Malik has come to love her after all.
* Scheisskopf is constantly promoted. He begins as a Lieutenant, but by the end of the book, is a Lieutenant General in charge of the whole army.
* Schema F" is a still-used German proverb for doing something the usual way. It evolved out of an attack pattern used during WWI.
* Schematics for elemental runes (Fire, Frost, etc.) are found as ancient glyphs on the walls in various locations, only readable using Veilfire. Each element has 3 levels of runes: normal (no prefix), Master and Superb, and therefore may be found in 3 different locations. However, you cannot find the higher-level runes before you have found the lower-level ones. In a normal playthrough you are supposed to find the Fire Rune in The Hinterlands (the lowest-level area), the Master Fire Rune in The Western Approach (a middle-level area) and the Superb Fire Rune in The Hissing Wastes (the highest-level area). Yet if you choose to ignore the glyphs in the lower-level areas you may change or even reverse the order (i.e. the content of the ancient glyphs in all locations is in fact decided by the order in which you choose to read them).
* Schembechler himself also seemed to embody this trope. In his 20+ year career at Michigan, he dominated the Big Ten, won conference titles almost every other year, and has been hailed as one of the greatest head coaches in college football history... and yet he was never able to win a national championship and was notorious for losing bowl games.
* schemer Randy Wagstaff is branded a snitch and finds that his peers and the local gangsters are suddenly his mortal enemies. Despite police protection, his home is torched, his foster mother is badly burned, and he's at the mercy of social services. A remorseful detective tries desperately to find him a better option, but ultimately Randy has no choice but to go to a group home. The following season, the police go there to try to question him again, and we find that his cheery disposition has vanished without a trace, and he's casually assaulting other kids just to maintain cred.
* Scherzo) investigating a murder in Venice with a failed castrato singer as his impromptu sidekick.
* Schick meanwhile claims that their Quattro Titanium razors will gives you a shave that is so smooth and close, it will cause women at the gym to become distracted and
* Schierke also does this to Isidro as punishment for trying to peak at Farneze

and Casca taking a bath.
* Schierke, during the battle in the city against the Kushan demon soldiers, proceeds to incinerate a whole bunch of them by summoning a giant fire wheel to set them ablaze.
* schießen (shit). Similarly, "Liebchen" is a term of endearment like "sweetheart," while "Leibchen" refers to an old-fashioned undershirt. The problem arises from the different spelling conventions of English and German: In German "ie" is always pronounced like English "ee" and "ei" like English "eye," while in English whether "ie" and "ei" are pronounced as "ee" or "eye" depends on the context (e. g. "fancied" vs. "tied" and "Keith" vs. "either" in British pronunciation), which also leads to frequent misspellings of German names and loanwords in English. For instance, it is not uncommon to see the spelling "weiner" for "wiener" — in German "Wiener" (pronounced "veener") means "Viennese," while "Weiner" (pronounced "viner") looks like "cryer," which is actually quite close to its English near-homophone, "whiner."
* Schild's Ladder against people who exist entirely in virtual reality, but the notion that they would try to assimilate the entire universe into a computational medium is mocked as a goofy conspiracy theory.
* Schild's Ladder by default; when they form a close relationship, their bodies grow unique genitalia that are optimized for each other.
* Schild's Ladder-dwelling minds would assimilate planets for computational resources, calling it as preposterous as accusing organic beings of plotting to turn the world into chocolate for infinite desserts.
* Schild's Ladder even though they have the option to transfer themselves to and from vat-grown organic bodies at will.
* Schild's Ladder has entire societies that live inside computers, even ones simulating extra physical dimensions, or non-euclidean space.
* Schild's Ladder, like a friend of Tchicaya's who commissions a wetware body only for special occasions.
* Schild's Ladder pretty much runs on this trope, as it is based around the fictitious but believable "quantum graph theory" and the "Sarumpaet rules" that govern all fundamental interactions. It's been described as the "hardest science-fiction ever" with good reason.
* Schild's Ladder, the protagonists realize that there's intelligent life inside a pseudovacuum when they notice that a series of pulses coming from it represent consecutive prime numbers.
* Schindler's List amidst all the executions occurring around him. It was Bach, despite what the two obviously less-than-cultured soldiers at the door said (Prelude to the 2nd English Suite). The music fit right in, its rapid-fire percussive staccato nature lining up with the gunfire and muzzle flashes peppering the night.
* Schindler's List: A rare positive example: Oskar Schindler's membership of the Nazi party and friendship with senior Nazi officials are the reason he can save the lives of his eponymous List (well, that and a certain amount of outright bribery).
* Schindler's List concludes with the surviving Schindler Jews, as well as the actors that played them in the film, placing stones upon the gravestone of Oskar Schindler in a show of respect. It ends with Liam Neeson, Schindler's actor, laying a rose in the center.
* Schindler's List fits the description to the tip, as he walks around the camp, casually glancing about while Jews are murdered and tortured. "Can you believe this? As if I don't have enough to do, they come up with this? I have to find every rag buried up here and burn it," he says as he watches the incineration of Jews' bodies.
* Schindler's List has an example similar to the one above, with one character arguing the Nazis can't really be killing everyone. The context, though, makes this tragic irony rather than comedic irony.
* Schindler's List has industrialist Oskar Schindler select Jews to work in his factory as slave labor. Most Jews accepted this, as it was far better than slow, cruel death in the Eastern camps. Schindler comes to respect these people who could

suffer toil and indignation with such stoicism. As the war winds down and Allied troops advance, Schindler addresses his massed workers with the news.
* Schindler's List here; he just sees her as a pet he can abuse at will.
* Schindler's List, in which sadistic camp commandant Amon Goeth does appear to have a cold, and doesn't drop dead of consumption at the end of the film. It's to set up the mind-bending irony of an extermination camp commander telling one of the inmates not to get too close to him so she won't catch his cold.
* Schindler's List is about the Holocaust, yet also includes a number of humorous moments and scenes, often under very dark pretenses. One example is a family of Jews being moved to shabby quarters muttering that it can't get any worse than this, only to learn that they have to share the place with several other families. Another involves Schindler threatening a hostile German soldier standing between him and his Jewish work force. After a cut, the soldier is frantically helping Schindler find the Jews.
* Schindler's List is the one who's pregnant with the child. Though he reacts negatively to these jokes, Shane actively plays into them once in a while.
* Schindler's List. Nazi Captain Amon Goeth develops a creepy infatuation for his Jewish maid and makes an abortive attempt to force himself on her while she's standing motionless and frightened in a wet shirt. He stops himself, but not on any moral grounds; he accuses her of "seducing him" because he considers her an inferior, and beats her senseless instead.
* Schindler's List, Oskar Schindler is a rare heroic example: he bribes Nazi officials left and right in order to save his Jewish workers and their families from the death camps. Also, earlier in the film, he is shown obtaining luxury items for himself through the black market.
* Schindler's List page will attest, many tropers found this moment to be more than they could bear.
* Schindler's List: Played with in a comic relief scene. A series of increasingly attractive girls with increasingly poor typing skills appear in Schindler's office, trying to get a job as his secretary. Schindler the incorrigible womanizer is in turn increasingly besotted. The sequence ends with Schindler slumped down in his chair, depressed, as an older, stern-looking woman types away at lightning speed.
* Schindler's List, Schindler financially ruins himself bribing Nazi officials in an effort to save Jews from the Holocaust. After he escapes, he forlornly notices that hawking his getaway car could've saved more lives, too, and the Nazi party pin he wore could've bribed someone for just one life.
* Schindler's List, Schindler is having sex with his mistress, when he's informed that his accountant, Stern, has been mistakenly put on the train that takes Jews to the death camps. Schindler manages to save him just in time.
* Schindler's List: Schindler's description of the things Goeth likes, though not by his intent.
* Schindler's List shows glimpses of the horrors of the Auschwitz concentration camp.
* Schindler's List: Subverted. Oskar Schindler was in fact a member of the National Socialist German Workers Party — but he, like so many other Germans, was in it for the political and economic advantages. By the end of the film, to call him a Nazi is to both be blind and a pedant of the first order.
* Schindler's List that the film is not recommended for very young children.
* Schindler's List! The song itself can be very disturbing, as the cheerful melody tells the story of a boy begging his mother for a horse, but never getting one, complaining about how he didn't want horses "like these" (of candy or wood) and later as an adult remembering this when he sees the chariot that carries his mother's coffin, making the outcry that he didn't want horses "like these" rather heart-breaking.
* Schindler's List uses bribery and convincing lies to stuff his factories with as many Jews as possible, and thereby save their lives. None of the factories produced one shell that worked.
* Schindler's List, war profiteering along with his more well-known heroic actions.
* Schindler's List was the torture dungeon Göth built and frequently used

under his villa at Płaszów concentration camp.
* Schindler's List when Goth is being hanged, he remains completely calm, gives one last stoic "Heil Hitler", and lets the guards kick the chair out from under him without a fuss.
* Schindler, suggesting that maybe their technicians got a little tired of hearing the same joke all the time.
* Schindler tells Amon Goeth in one scene that real power isn't in killing people, but in forgiveness. Goeth seems genuinely moved by this, and a couple scenes later, when a Jewish boy fails to clean the stains from his tub, he pardons the boy just to see how it feels... and then shoots him almost immediately after.
* Schindler though it's unclear on which side he started with (he has an S.S, membership card and the Fuhrer fired him after the Plywood Pelican's fiasco).
* Schinus molle, or the Peruvian peppertree. They're more closely related to cashews than pepper.
* Schippeitaro, the cats talk about how they fear the title dog where the hero can hear.
* Schippeitaro", the young man finds a village that has to make these, to the Spirit of the Mountain.
* Schirach Fühler was formerly a member of RKS and had been absent without leave for years. Joining Schwarzkreuz, she's an
* Schismatrix, an entire artificial asteroid with a long stream of extruded plastic and stone head stuck to it (long story) is considered a piece of art by the alien Investors. They even compliment the use of explosions to produce a nice shading technique.
* Schismatrix by Bruce Sterling brings us the conflict between the Shapers and the Mechanists. The Shapers work with genetics while the Mechanists prefer cybernetics.
* Schismatrix skips more and more time the longer it goes. The first four chapters all take place over the course of around 19 months, while the last two chapters alone contain skips of 53 and 32 years. Also, in universe, there is a group that practices "ice assassination", by forcing people to experience a time skip through cryogenics.
* Schismatrix. The Shapers are engineered to not only go without appendices, but also to not need any of the bacteria humans currently need to digest food properly, allowing Shaper habitats to be free of any non-engineered nasties. Unfortunately for them, not everybody has this advantage; Shapers going from the aseptic environment to a bacterial one tend to get diarrhea, nausea and horrible rashes. Non-Shapers living in their habitats have to agree to get their intestines pumped and eat regular doses of foul-tasting yoghurt full of digestive enzymes to make up for it.
* Schism inside a Generation Ship that has been out of contact with human civilization for centuries encounters another derelict vessel in the void of space.
* Schism points this out when Logan and Scott argue over their shared love Jean Grey.
* Schisms" also ends with a similar possibility of a sequel, but due to no one being satisfied with how that episode turned out after it took a budget cut, that was dropped.
* Schism was to break up the X-Men into those siding with Wolverine and those siding with Cyclops.
* Schitt's Creek’’: Mutt. It actually torpedoes his relationship with Alexis because it clashed with her talkativeness causing miscommunication.
* Schitt's Creek about two astrophysicist cousins who get kidnapped in Lebanon is being re-aired. Moira complains that Dewitt insisted on wearing pigtails and bemoans that her love scene got the aerial shot, but she declares the film had its moments.
* Schitt's Creek. Additionally, Annie Murphy wrote Alexis's socialite single "A Little Bit Alexis" and did the choreography herself.
* Schitt's Creek, after John gets guilted into giving a eulogy at a virtual stranger's funeral:
* Schitt's Creek afterwards, but quickly settle back into a platonic friendship to

the point that in later seasons they call themselves best friends.
* Schitt's Creek: Alexis and Moira regularly wear fabulous heels and/or platform shoes. David often sports some pretty fabulous sneakers.
* Schitt's Creek: Alexis gets two of these. She shares one with Mutt at the end of the first season and with Ted at the end of the fourth season.
* Schitt's Creek: Alexis Rose begins the series much closer to her father, Johnny, than her mother. Johnny apparently indulged and spoiled Alexis, even paying for expensive musical coaching despite her total lack of talent. He even has a favorite track from her terrible album. Johnny is also the one who expresses horror whenever he learns of one of Alexis's wild adventures, while her mother usually seems indifferent.
* Schitt's Creek: Alexis Rose gets hired by a fitness company called Elevation, which is a multi-level marketing scheme but also a full-on cult that trains its member to climb to something called The Gateway and join up with a UFO. Alexis realizes the cult is bad news fairly quickly and shuffles her friends, whom she has recruited, out the back door.
* Schitt's Creek: Alexis Rose gets on her brother David's last nerve, especially when she tries to "help" around his store or won't tidy up their shared room. When they were younger, David worried about her globe-trotting adventures and found her shallowness annoying, but he always loved her.
* Schitt's Creek: Alexis Rose says this when she figures out that her boyfriend Ted's friends might not like her/resent her over the little fact that she broke off two engagements with Ted and cheated on him during their first romance.
* Schitt's Creek: Alexis Rose subverts this trope, even though she is not an intellectual or a good student and has big gaps in her knowledge. She does, however, have strong social media skills, exceptional survival skills that have allowed her to escape from numerous kidnappings, multiple international driver's licenses, and solid organizational skills. She also learns to be an excellent assistant to Ted and she is able to catch a group of teens who are shoplifting from her brother's store.
* Schitt's Creek: All of the Roses tell lies badly now and again, but Johnny is the grand champion of it:
* Schitt's Creek: All the main characters share a jubilant hug when Johnny announces he has gotten financing to expand the motel chain, but Patrick looks worried because he's not excited to move to New York.
* Schitt's Creek: Although all the Roses do it now and again, Alexis often lies to spare herself or others embarrassment. She usually means well, but it often escalates into far worse embarrassment. She lies about a “client” at the vets office having lice and about having kept mementos from her relationship with Ted, among many other times.
* Schitt's Creek and Smart Ball to the various Roses. While all of them have significant knowledge gaps arising from their lives of privilege, they all have special talents.
* Schitt's Creek and the fan events he organized with the rest of the cast often sell out.
* Schitt's Creek: An on-the-rebound Alexis dates a man who is around her father's age named Artie. Johnny is not at all thrilled with his daughter dating a man with grandchildren, especially since Artie is trying and failing to be young and hip. Thanks to Johnny's meddling, Artie breaks up with Alexis, who tearfully admits to Johnny she was only seeing the older man to distract from her heartbreak.
* Schitt's Creek arrangement ends. In early seasons, David takes notice of her when she dresses up, and they even try a kiss to rekindle the relationship, which turns out badly. Any residual tension pretty much ends when David meets Patrick, but the pair have a few wistful moments of what might have been in the episode where Stevie learns of David and Patrick's engagement.
* Schitt's Creek as Johnny and Moira walk arm-in-arm back to The Rosebud Motel, and it is revealed that Moira and the kids pulled together a last minute Christmas Party for Johnny.
* Schitt's Creek: A variation; Moira does an interview on a talk show while Alexis

guides her with cue cards. When Moira starts to go off on a tangent about movie streaming, the next cue cards in the stack already read "STOP TALKING ABOUT STREAMING" and "MOVE ON."
* Schitt's Creek. But one night, as they bemoan the lack of options in the town, they wonder if there is still a spark. They kiss...and nope. No spark.
* Schitt's Creek, but she has an extensive history of escaping kidnappings and is very cool under pressure. She displays these skills in front of her family when they visit an escape room. She takes the lead and solves the various puzzles quickly and efficiently, allowing them to escape.
* Schitt's Creek centers around David and Patrick's Wedding, which includes many mishaps. Patrick gifts David with a massage and inadvertently requests a happy ending for his fiance. Rain threatens to wash out the festivities. Alexis wears a wedding dress, which she insists is simply a full-length white gown that happened to come with a tulle headdress she chose not to wear. Thankfully, all of these are minor setbacks and the wedding comes off beautifully and everyone lives happily ever after.
* Schitt's Creek: David and Alexis generally lived separate lives, but when it comes to their mother's affections, Alexis always feels inferior.
* Schitt's Creek: David and Alexis Rose begin the series as completely spoiled, clueless brats. Neither is a bad person per se, just used to getting whatever material thing they want. It's made clear that this is totally their parents' fault since they preferred to throw money at their children rather than invest time or energy in them. After going broke, the entire Rose family learns to be better people.
* Schitt's Creek: David is 5'11" while Stevie is 5'5", so he has to bend down to kiss her in Season One. He's also taller than his boyfriend Patrick, who is 5'8" but it's not as acute.
* Schitt's Creek: David Rose has a number of phobias, including heights, moths and butterflies, and business women in sneakers.
* Schitt's Creek: David Rose has a talent for this. His first successful job in town is as the brand manager for dumpy local boutique The Blouse Barn, which he transforms into a store so upscale and sophisticated looking that an Australian company that wants to buy the name pays the owner a significant sum of money. Later, he opens his own successful store, Rose Apothecary, where he elegantly rebrands products produced by the rural locals and sells them on consignment.
* Schitt's Creek David Rose takes what he thinks is a cookie from a table at Ted's office, and Ted informs him it is a doggie treat.
* Schitt's Creek David walks into his parents' room and witnesses his parents having sex. He's not only horrified, he scolds them for attempting "that" position at that time of day.
* Schitt's Creek, despite Ted being straight and not really remembering the kiss.
* Schitt's Creek episode "Merry Christmas, Johnny Rose" is part of the regular rotation for airings of that show.
* Schitt's Creek) even when he clearly knows he's in the wrong. He has to be practically forced by Patrick into apologizing to her, and even then he does it in the vaguest way possible.
* Schitt's Creek example in the character of Moira Rose, with her over the top designer outfits and wigs and career in soap operas and a b-movies. This is acknowledged in a storyline when her son David's ex-boyfriend comes to town to photograph her, and David realizes that the intention is to make a camp joke out of his mother.
* Schitt's Creek: From the end of Season 3 onward, Stevie Budd is often the only member of the main cast who is single and is often the third wheel to David and Patrick, which makes it even more heartbreaking when what she thought was a serious relationship crumbles. She laments this in the Season 5 Finale but picks herself up with a magnificent performance in a community theatre production.
* Schitt's Creek has Alexis Rose, who is cheerful, brave and optimistic no matter what the circumstances despite her lack of book smarts and losing her family's fortune.

* Schitt's Creek has Alexis Rose, who never finished high school and has no interest in anything even slightly academic. She does have a strange amount of street smarts and a particular flair for self-promotion, which she eventually turns into a career in public relations.
* Schitt's Creek has a long history of drinking and pill-popping, which has led to her not remembering chunks of her past. She even invented a game called Sleepy Mommy in which her small children tossed downers into her mouth, and when she claims she doesn't remember her son says its because he and his sister got really good at it. She also doesn't remember how the Roses' lavish Christmas parties ended, which she thinks is the mark of a successful party. She also wakes up in Roland's hotel room after a night of celebrating and is horrified but to her relief, nothing happened.
* Schitt's Creek has both Rose children falling for men like their father Johnny:
* Schitt's Creek has David and Alexis. David is dark-haired, insecure, intellectual, pretentious, neat, introverted, has multiple phobias, is prone to worrying and gets depressed while Alexis is blond, confident, anything but book smart, resourceful, rarely feels emotion, extraverted, brave, upbeat and adapts easily to new situations. The siblings bicker a great deal, but they love each other and will stick up for each other
* Schitt's Creek has David discover his old boss Wendy has gone into business with a man named Antonio, who dresses like a less-elegant David and is mistaken for David during the episode. Their business is a knockoff of Rose Apothecary, selling cheaper products that are supposedly locally sourced but are just re-labeled drugstore items. David doesn't confront Antonio directly, but he reveals the fraud to Wendy who feels scammed herself.
* Schitt's Creek has Twyla give Alexis a grim tarot reading involving drowning and a funeral, but she later admits that the deck predicted that fate for multiple people before also mentioning she flipped the ten of cups and predicts prosperity and happiness for Alexis and her family.
* Schitt's Creek, he dances and lip-synchs to the original track for Patrick.
* Schitt's Creek, her daughter's name Alexis is revealed to be one by Moira, who thought she was going to have a "son called Alex."
* Schitt's Creek identifies as pansexual and even sleeps with a woman onscreen before settling down with his boyfriend, but his love of fashion, fussiness, flamboyance, and dislike of sports fits the trope. He is, however, a well-rounded, self-aware character and one of the show's protagonists.
* Schitt's Creek: In Season 5, Alexis convinces a reluctant Moira to spend an afternoon signing autographs at a soap opera fan convention. Moira eventually embraces the opportunity after talking to another former soap diva, who supports herself lavishly through convention appearances, even going so far as to sell pictures of her feet to fans at an exorbitant price.
* Schitt's Creek: In Season 6, Ted is offered a permanent position in the Galapagos Islands and Alexis's PR career starts to take off, eventually prompting a move to New York. After a heartfelt and heartbreaking talk, they realize that, despite loving each other deeply, their lives are taking them in different directions and they break up.
* Schitt's Creek: In Season Six, in order to make up for a perceived slight, Moira stars in a low-budget tourism ad for the town of Schitt's Creek.
* Schitt's Creek: In the first few seasons, David Rose is a classic narcissist who prioritizes himself over nearly everything else and has a rather grandiose few of himself, despite constant put-downs from his family. As the series progresses, he evolves into a good person who loves his family and is a devoted friend and boyfriend as well as a talented marketer. His mother, Moira, can lean toward the narcissistic but her love of David's father mitigates it a bit.
* Schitt's Creek: In the penultimate episode, David Rose, having been elated to possibly move to New York with his family and finally get out of the town, first learns that Stevie is not moving to New York. Then, he learns that his fiance Patrick is trying to buy a charming house that David had admired. After heartfelt talks with Patrick and Stevie, David realizes his life is in the town and chooses

to stay.
* Schitt's Creek introduces Patrick in Season 3 as a potential love interest for David, who dismisses Alexis' suggestion that Patrick might be gay. Only gentle cajoling by Stevie, including pointing out to David that he is on a date with Patrick, allows David to accept that Patrick is attracted to him. Ironically, it is the more straight-acting Patrick who comes to terms with being gay while prissy David is portrayed as pansexual.
* Schitt's Creek is a fairly wholesome comedy about inclusion and acceptance in a small town. The F word is used in some episodes, which is understandable because its native country of Canada has looser standards about swearing on television, but other than that, there are some sexual references that are no worse than most modern TV-14 sitcoms and no violence, so it remains a mystery as to why it is rated TV-MA.
* Schitt's Creek is oafish, mulleted and beer-gutted, and he's rather obnoxious. The Roses are surprised, therefore, when they meet his attractive and kind wife Jocelyn, who inexplicably is madly in love with her husband.
* Schitt's Creek, it became a big hit with viewers who appreciated its queer sensibilities and positive but still sharp sense of humor. When the series ended by choice in 2020, the New York Times critic who had panned it wrote a piece defending himself and giving himself permission to reevaluate the show.
* Schitt's Creek Jake is bisexual and polyamorous and wants to be in a throuple with David and Stevie, both of whom he is dating. Alexis advises David against it, explaining that in her past experiences with throuples someone always gets jealous.
* Schitt's Creek: Jocelyn accuses Alexis of plagiarizing her term paper, and Alexis realizes that Johnny must have written-edited it without her knowledge. Johnny seems incredulous that this kind of help is against the rules, while Alexis insists her sub-par work was just fine, a point on which she and her teacher agree.
* Schitt's Creek: Johnny and Moira decide to skinny dip in the town's eponymous creek, but Johnny ends up in an embarrassing situation with an off duty police officer.
* Schitt's Creek: Johnny and Moira were completely oblivious to their daughter Alexis's wild adventures including run-ins with Thai drug lords, Saudia Arabian princes and at least once romance with a famous soccer player. They didn't even realize she had dropped out of her posh Swiss boarding school, and they attended her graduation.
* Schitt's Creek Johnny gives Stevie a set of garish make-up, which she interprets as him suggesting she change her looks. Alexis assures her Johnny is just really bad at gift-giving, having once given David an entire (unwanted) basketball court, causing David to break his own nose.
* Schitt's Creek, Johnny is invited to give the eulogy for Carl, a man he did not know. He asks how Carl passed and is told it was a freak accident that happened when Carl's belt caught on a ceiling fan and then looped around his neck. Johnny realizes the truth, but most in the town continue to believe it was an accident.
* Schitt's Creek Johnny Rose is a formerly wealthy business mogul who now owns part of a roadside motel. He throws himself into the managing of the place and gradually improves it, and he rarely if ever complains about the hard work.
* Schitt's Creek: Johnny Rose wears immaculate bespoke suits that he purchased before he went broke.
* Schitt's Creek knockoff and it attracted few viewers on the new and somewhat obscure Pop Channel. However, strong word of mouth and the show becoming available on Netflix led it to become a hit in the fourth season.
* Schitt's Creek-like photography project. David may have once aspired to be like Sebastien, but he puts a stop to the project by sleeping with Sebastien and stealing the memory card containing the photos.
* Schitt's Creek: Moira, David, and Alexis all sport high-end designer looks that were purchased before the family went bankrupt.
* Schitt's Creek Moira Rose, who is implied to be Irish Catholic. Their son David refers to himself as a "delightful half-half situation" when asked if he is Jewish.
* Schitt's Creek moment in front of a charming house that Patrick had intended to

purchase for them. As Johnny leaves town, he looks back and sees that Roland Schitt, who has also become prosperous due to his investment in Johnny's new business, has altered the town's iconic sign to feature the Rose family.
* Schitt's Creek: Multiple characters point out how pretty Alexis Rose is, including Alexis Rose herself. These include Ronnie, Ted, Mutt, and Rachel.
* Schitt's Creek, Mutt appears without his shirt or with his shirt open in most of his scenes.
* Schitt's Creek: Nearly all the romances on the show work on this dynamic. Johnny and Moira, Roland and Jocelyn, David and Stevie, Alexis and Mutt, Alexis and Ted, and David and Patrick all contain various permutations of opposites attracting. The only exception is Stevie and Emir, who seem drawn to each other because of what they have in common.
* Schitt's Creek occassionally gets stressed out, but she is unfailingly a devoted teacher, mother, friend and wife. She puts up with an awful lot from her best friend, Moira.
* Schitt's Creek one of Alexis's wild adventures apparently involved the Yakuza. When Ted remarks that she can't go for a run in her high hells, she replies:
* Schitt's Creek or any of the seemingly infinite gifs of the characters reacting to something.
* Schitt's Creek: Pansexual David Rose's love life is treated equally and given as much screentime as his straight sister Alexis's love life. In the first season, David has a brief fling with his female best friend, but he later has onscreen trysts with Jake and Sebastien before falling in love with Patrick.
* Schitt's Creek: Patrick invites David for a birthday dinner date, but David doesn't realize it's a date and invites Stevie. Stevie arrives and notices how surprised Patrick is at her presence and that Patrick has brought a wrapped gift for David. When Patrick is in the restroom, Stevie points all this out to David, who is skeptical.
* Schitt's Creek: Patrick plans a romantic hike and picnic for his proposal, but an oblivious David whines about the length of the hike and then whines that he's hungry. Patrick gets frustrated and suggests turning around but he steps on a branch. David tends to Patrick's wounded foot, realizes he's been a jerk, apologizes and insists they finish the hike, even going so far as to carry Patrick part of the way. When they reach a beautiful overlook, Patrick tries to put off the proposal but the still-hungry David insists on the picnic. Patrick has him retrieve a set of gold rings identical to the silver ones David always wears and gets down on one knee. He proposes to a weeping David, who says yes.
* Schitt's Creek: Patrick pressures the un-athletic David into joining his team, pitting them against David's father Johnny, Roland and Ronnie. David is not into it, but Patrick's competitive side flares up.
* Schitt's Creek Patrick realizes he's gay after meeting David. Pansexual David appears to realize he's homo-romantic after falling in love for the first time with Patrick.
* Schitt's Creek plays Twyla, who was also sitting in the circle. David doesn't kiss Alexis or Twyla.
* Schitt's Creek pose as a honeymoon couple to get free booze and upgrades, but the hotel goes way overboard in fetting the "newlyweds" and this leads to much awkwardness.
* Schitt's Creek Roland Schitt's rhetorical question "Who am I, Gwyneth Paltrow?'' until David shuts him down with a firm no.
* Schitt's Creek: Roland tells Johnny he has a friend who needs some work and will be helpful around the motel. By the time they are waiting in Roland's living room for "the friend" Johnny has long since figured out the friend is Roland.
* Schitt's Creek: Ronnie becomes this to Patrick, who is not used to people not liking him.
* Schitt's Creek: Rose family patriarch Johnny Rose was robbed of his fortune and is forced into rural exile through no fault of his own, beyond not keeping close tabs on a corrupt business manager. Johnny's son David and wife Moira experience angst over their situation, but beyond one instance of drowning his sorrows, Johnny

remains focused on getting out of his situation through hard work. This is a man who worked hard his whole life and built himself a fortune and whose only sin seems to have been to overindulge his wife and children. Yet, he accepts his fate with little angst.
* Schitt's Creek: Several characters notice that Ted's apartment looks like a furniture showroom and he is delighted to explain that he bought more than one entire room online from a furniture store that was changing out their showroom.
* Schitt's Creek sitcom, has also suffered the same fate on streaming services, as Canadian broadcast TV has looser standards when it comes to ratings and can get away with having the F word in prime-time.
* Schitt's Creek's personality. David, whom Levy plays, is flamboyant, fussy, creative and pours himself into his career while Stevie is introverted, cynical and insecure but blossoms when given the opportunity.
* Schitt's Creek: Stevie and David travel to a hotel where she's supposed to meet Emir, but he never shows so they get shots and do karaoke. Emir eventually shows up, having been in a fender bender and mixed up his phone with the teenager who hit him, and he takes Stevie to dinner.
* Schitt's Creek: Stevie falls for travel blogger Emir who doesn't live in the town and travels for his job, and David refers to him as her cell phone boyfriend since they are always texting.
* Schitt's Creek: Stevie lures Japanophile David to Elm Valley with the promise of a visit to the Botanical Gardens to see the Cherry Blossoms, a prospect which delights David.
* Schitt's Creek stories for the two adult children. Both shows have strong, passionate cult followings, and they even share a lot of fans who can respect both approaches to comedy.
* Schitt's Creek story and class-based comedy. Screwball comedies of the 1930s often had a queer subtext, but the show makes it text by allowing pansexual and flamboyant David to be a protagonist, while the queer characters of the past were usually supporting characters and their sexuality was never directly addressed.
* Schitt's Creek storyline climaxes over the issue of saying I love you, with big deal "I love yous" eventually shared between David and Patrick, and Ted returning Alexis's affection after she had said it in an earlier episode.
* Schitt's Creek: Subverted. Thanks to the poop joke in the show's title, the writers incorporate both obvious and subtle poop jokes into the story on a regular basis. This begins in the first episode when Mayor Roland Schitt uses the Roses' motel bathroom for an uncomfortable amount of time.
* Schitt's Creek, Ted returns from what was supposed to be their honeymoon having worked out the whole time. Eventually, Alexis realizes she has feelings for Ted, but by that time he's dating Heather.
* Schitt's Creek tends to offer up stories of his promiscuous adventures but is usually pretty defensive about it since most of those relationships ended with him getting dumped. His sister Alexis is far more casual about her adventures because she was usually doing the dumping and has nothing to prove.
* Schitt's Creek. The character of Johnny bombs at first, and Levy tweeted that it was difficult for him given his long career in comedy to make Johnny bad.
* Schitt's Creek: The entire series revolves around the Rose Family, who are formerly wealthy, urbane, globe-trotting socialites trying to adapt to life in a small rural town.
* Schitt's Creek: The series ends with the denizens of the town rallying to give David and Patrick a beautiful wedding, despite their outdoor plans being rained out.
* Schitt's Creek, the show gives equal weight to the parents' storylines to the adult children. On top of that, Eugene's comedy of awkwardness draws a certain type of viewer, while Dan's queer sensibility draws another, resulting in fans across multiple demographics that appreciate family comedy, physical humor, and romantic comedy.
* Schitt's Creek, the show often relies on cringe humor as the Roses navigate life in a small, rural town. This can include when patriarch Johnny puts his foot in his

mouth, when Moira performs "The Number" or when Alexis auditions for the town's community theatre. A noteworthy episode features adult David wetting the bed and the video ending up shared many times on the internet and with several townspeople, although David seemingly never learns about that part.
* Schitt's Creek took her to get her hair dyed during the audition process because his father was insistent that Alexis be blonde.
* Schitt's Creek to the genre when Moira gives David a pep talk in the voice of a 1930s screwball heroine.
* Schitt's Creek to wind up in those situations is anyone's guess, including her parents', since they are often only learning of these occurrences in the present.
* Schitt's Creek: Well-meaning bad gift-giver Johnny stops at the church rummage sale to get gifts for his family, including a tin for Moira's wig pins, a thousand yen for Japanophile David, and "stickers of old men" for Alexis (which are stamps).
* Schitt's Creek: When Bob kicks him out of the garage, Johnny spends the afternoon getting drunk at the cafe. When Jocelyn brings him home, he confesses to Moira that he is demoralized by their situation and doesn't feel like a good provider anymore. In a role reversal, Moira consoles him and assures him he's the one holding the family together.
* Schitt's Creek which consists of in-character interviews with the cast, often about events that occurred in that week's episode. The show also releases behind the scenes interviews and bloopers.
* Schitt's Creek while he was an MTV host. Another time, David claims his first job was a Gap Kids campaign, and in fact, Levy has stated his first job was as a retail clerk for Gap Kids.
* Schitt's Creek who socialized a great deal before moving to the town but only with people interested in what he could obtain for them, not with people who liked him. He tells Stevie that she's the first best friend he's ever had. Stevie admits the same, and little is known about her life before David arrived but it seems like she too had few if any friends.
* Schitt's Creek with copious suitcases, which contain their fancy clothes that were not seized by the government. Throughout the series, their extensive wardrobes become a part of the story.
* Schizm: Mysterious Journey, being an FMV game, shows the people of Argilus as mostly speaking in their native language and bearing a triangular marking on their foreheads to show signs of not being human.
* Schizm: Mysterious Journey had malfunctioned when trying to contact the disappeared science team on the planet Argilus. They each land on opposite sides of the planet, and the first goal of the game is to regain radio contact with each other.
* Schizophrenic Doll, though it seems the ghost in question desires a new body that isn't a doll but, rather, someone who looks very much like the one she had before, only more adult, and is moving her soul from the doll to Toki's body. However, it is clear she is an angry spirit.
* Schizophrenics also have difficulty in concentrating or focusing on single thoughts. Again, no effect on intelligence.
* Schizophrenics have been noted in making errors with the meanings of metaphors and irony — typically that they do tend to take things literally.
* Schizo Tech: Anachronistic technology (i.e. futuristic machines in the past).
* Schizo Tech has a camera with capabilities similar to that of real-world digital cameras. The camera itself is made of wood, and the color version is powered by a firefly.
* Schizo Tech instead of a threadbare old suit and living in a high tech space colony instead of a crummy one-bedroom apartment.
* Schizo Tech is a steam ram, which is used to great effect against primitive wooden warships such as triremes.
* Schizo Tech. Obtaining it requires ferrying around some of the rarest items in the game and zailing to remote lands as you put the pieces together, but is overall not too cumbersome compared to some other tasks.
* Schizo Tech situation where what looks like a sailing ship powers up the high-

efficiency steam engine to run the propellers once it gets out of a non-tech hex to a low-tech one, and then switches the propellers from the steam-engine shaft to the electric motors powered by a compact nuclear reactor if it crosses into a high-tech hex.
* Schizo Tech: The mix of technologies purposefully makes very little sense.
* Schizo Tech - the visuals of each society tell you their relationship with technology and science.
* Schizo Tech to enhance its atmosphere; the 1930s Art Deco Outfit building along with the aforementioned telephones clash with cars which are mostly from the 70s. The blue-grey color filter was removed in the Director's Cut.
* Schizo Tech, where the big war is broadcast to the people of nearby Saobaody through what can only be described as a jumbotron tree.
* Schlag den Raab) consists of 15 games (which can be comprised of sports (often unknown ones), games, trivia quizzes, any ability test of strength or dexterity, or tests of luck). Scoring is similar to a game of rotation (except that the rules of said pool variation don't apply here) the points in each game are scored 1-2-3-4-5-6-7-8-9-10-11-12-13-14-15 for a total of 120 - first to 61 or more (which is more than half of the point total, so impossible for the opponent to catch up with) wins.
* Schlitterbahn's Kansas City water park. Schlitterbahn, its reputation tarnished beyond repair, was forced to close the Kansas City water park and buy itself out to competitor Cedar Fair. Verrückt was demolished in November 2018.
* Schlock also winds up spitting up a small patch of himself that was infected by nanites when he "took a sample" of Xinchub's corpse.
* Schlock has broken out of prison and then had to break back in at least once.
* Schlock himself has claimed that sixteen is a number he can just about count to and generally behaves like a
* Schlock himself is an evolutionary descendant of Branthicor brain material, with the same limits.
* Schlock himself is not really an idiot, just impulsive, highly aggressive and generally odd due to alien physiology, but
* Schlock is a "carbo-silicate amorph". In this case it kind of makes sense, because his species didn't evolve naturally and give themselves a name; they were originally data storage units which happened to spontaneously gain sentience (in a very literal sense, Schlock is all brain).
* Schlock Mercenary a "communications slug" called Sergeant Sh'vuu filled this role for Tagon's Toughs. However, after they got a ship with an A.I. his role became less important, so he started piloting a tank part-time, until he was killed.
* Schlock Mercenary acquires a controlling interest in his own mercenary company due to a stock crash. With dread in their hearts, his bosses ask what his demands are...
* Schlock Mercenary actually counts as an act of mercy; he'll just swallow armed goons whole and melt them down into mass for himself without a care in the world if you try to make him go unarmed.
* Schlock Mercenary a detective mentions that his partner is so desensitized he eats lasagna while watching The Autopsy Channel. (Don't ask why they have a channel for that.)
* Schlock Mercenary (admittedly Ennesby isn't very popular with them at that stage). In the end they settle for shooting off the motivator Ennesby uses to float around.
* Schlock Mercenary, a four-armed alien states that the mercenaries should recruit him because with four arms, he can fire four guns at once. The recruiting officer points out that, with two eyes, he can only track one target at a time.
* Schlock Mercenary after a trigger happy SWAT team blows up the boat they're on, and their lawyer demands a replacement boat as compensation. As this would be punitive damages, that would mean providing a bigger boat than the one they had before.
* Schlock Mercenary: After Kevyn's body is reconstructed from the neck down over the course of several days he mentions that he needs to pee like a racehorse.

* Schlock Mercenary, after the latter got trapped during their attempt to escape from hostile forces.
* Schlock Mercenary. After war breaks out and he is promoted to General, he notes that he personally has given orders that "would fill this page with ink," and resolves to "find a bigger page." That "page" becomes the Titan Wall, a massive monument of 4.5 thousand tons of titanium, covered in all the names of people killed by friendly fire. Karl had to misappropriate military funds to get it made.
* Schlock Mercenary after word gets out that she used to be an exotic dancer.
* Schlock Mercenary: A halfway house between this and regular life: Sergeant Schlock, who is carbosilicate (i.e. based around both carbon and silicon). In a bit of realism, his biology and biochemistry is pretty clearly shown to be fundamentally different from traditional carbon-based life.
* Schlock Mercenary: AI version. Ennesby is a viral-analogue glass-soluble vanilla-helix AI originally designed as an entertainment intelligence. This means he is essentially a living computer virus, and can easily head-hop between different systems, even wresting control of hardware from the original owners in rare circumstances. Normally, an AI is as attached to their hardware as organics are to their brains. Most other AIs are dismissive of this ability, saying head-hopping is the only thing vanilla-helix is good for.
* Schlock Mercenary A later storyline reveals that the same agency has regularly been creating sleeper agents using the same technology, who would be overwritten on-demand by the mind of the same agent. In theory, the sleeper is supposed to have a backup gestalt so they can be restored after the mission and only lose a few days of memories. In practice, the gestalts are often too out of date to be useful, and the agent usually dies during the mission anyway.
* Schlock Mercenary aliens are found on a backworld planet. The collapse of the civilization nearly a million years ago was due to their experiments with immortality, leading to this trope as many of them went insane due to too many days going by too similar for the mind to sort out. Amongst the many measures they tried, only one worked — upgrade their brains to make them controllably forget or ignore vast swathes of their memories.
* Schlock Mercenary a lieutenant about military anecdotes on how the different branches handle the task at hand. They eventually got their punchline, of course.
* Schlock Mercenary almost all futuristic technology is either possible, though difficult, according to our current understanding of physics, or is based on gravitics. Their engines create a gravity well in front of the ship.
* Schlock Mercenary, along with using the Toughs to "prop up a pro-annexation group" without actually telling them this) was the icing on the cake.
* Schlock Mercenary also has a much more downplayed example with gunfoam rounds and low-profile body armor. Because it's harmless (roughly akin to a firm kick to the shin), it becomes incredibly tempting to tap someone on the shoulder from fifty paces. That, and shooting your commanding officer in the back never gets old.
* Schlock Mercenary. Also unusual in that the consequences of the sudden proliferation of this new technology are also explored.
* Schlock Mercenary, although when going up against the Toughs the bad guys turned out to be overmatched.
* Schlock Mercenary, amorphs, F'Sherl-Ganni, Pa'anuri, Frellenti, Fobott'r, Vhorwed, Uniocs, Uklakk, Schuul, O'Benn, Kssthrata, Daehremmah, Ystreben, Kreelies, Bradicor, and Enireth. Members of each of these have been prominent protagonists or antagonists of at least one story arc.
* Schlock Mercenary amorphs who are now all out of work because none of them can compete with what his cartoon alter-ego can do.
* Schlock Mercenary, and a couple of other things) to get past a military checkpoint. Schlock complains "Why does it have to be MY powers? To me, YOU guys are the aliens. Can't you use your 'Special human powers' to get us past it?"
* Schlock Mercenary and ensure the survival of current civilization as a whole. Join The Toughs. Be Badass.
* Schlock Mercenary, and has had an indirect influence on the storyline to this day.

* Schlock Mercenary" and "Samsony" (Samsung Sony) makes consumer commlinks.
* Schlock Mercenary. And sometimes they opt out (Doythaban, TT!Kevyn, Der Trihs, Shep, Nick, LOTA, a number just before the "Longshoreman" arc, a squad after "Mandatory Failure"...)
* Schlock Mercenary and the DMEs don't view any of them as a threat. But the Gatekeepers are exactly as sociopathic, amoral, and greedy as you'd expect from a race that can kidnap, torture, and murder anyone they want on tap.
* Schlock Mercenary, and the least-violent member on staff by a wide margin.
* Schlock Mercenary" and then insists they accompany him into a science conference anyway.
* Schlock Mercenary and watched the evolution of intelligent life forms, but are indifferent to the gradual extinction of their species. The heroes end up accidentally flattening their last female during first contact and dooming them to extinction. The Bradicor react more with annoyance than anything else seeing how they were already sterile.
* Schlock Mercenary, a newsman has the toupee sucked off his head by his interviewee with a reverse-thrust hairdryer. Someone from offstage yells "Fresh scalp-cat to stage 3!"
* Schlock Mercenary. A person is used (willingly or unknowingly) as a host for weaponized self-replicating nanorobots as part of an assassination attempt. The person is dies in horrible pain as the nanites activate, but their body appears mostly intact even as they belch out a stream of infectious killer nanites.
* Schlock Mercenary appears in the Unioc home system, it announces its presence by throwing a planet at someone. The system security forces, knowing they are hopelessly outmatched, decide to broadcast all the information they are collecting unencrypted on all channels in the hopes that someone will learn something from their deaths. They also unleash their weapons targeting as wide an array of surface features as they can; standard tactics would be to concentrate fire, but they know they're dead anyway so they're just looking for weak points someone else might be able to exploit.
* Schlock Mercenary are based on gravity control, so most things fly, and the line between armor and close air support is blurry. The closest thing to other aircraft roles is a spaceship with a crew that's been annoyed enough to come down there.
* Schlock Mercenary are built to bring the backups up to date while their bodies are rebuilt. Many end up staying in them permanently.
* Schlock Mercenary are essentially small spacecraft with big guns mounted on the front end. But they are still called tanks.
* Schlock Mercenary are quite modest compared to a lot of these other examples, though they're definitely not camouflaged and the floating epaulets (shaped like stars, lightning bolts, planets, or simple metal plates depending on rank) are kind of conspicuous. Even if the epaulets are concealed grenades (or antimatter bombs in Commander Kevyn Andreyason's case).
* Schlock Mercenary are terrifyingly competent engineers. Kevyn especially, having built, amongst other things, a distributed telescope array from stocks of torpedoes; thereafter known as the Very Dangerous Array.
* Schlock Mercenary are the last survivors of their species and culture, and the creators of carbosilicate amorphs. Each surviving individual is orders of magnitude older than the human species.
* Schlock Mercenary (arguably the two primary characters) are killed and stripped of all memories/former self, respectively. Averted via time travel.
* Schlock Mercenary as a part of a class of diplomats raised underwater among the Celeschul native species who grew up speaking Galstandard Peroxide, the preferred language of aquatic sophonts.
* Schlock Mercenary asked Ebbirnoth why they called his species "uniocs" when his homeworld was "Oth". He replied that being called "one-eyed" was better than "others."
* Schlock Mercenary assembly in the real world most certainly was not.
* Schlock Mercenary; as the descendants of partially organic self-reproducing memory systems, the amorphs are able to pass memories between each other at will,

and in most cases a child will have at least some of their parents' memories and personality traits (though an amorph parent can also deliberately craft their child's personality to resemble someone they admire, even if that person isn't an amorph). One of the reasons Schlock is unusual is that he was 'born' without any of the memories of the two amorphs he formed from, only retaining the overwhelming self-preservation instinct from the two combatants.
* Schlock Mercenary, as well as the ability to record and play back events.
* Schlock Mercenary at a circus, and wants to talk to another uplifted elephant who is hiding among the non-uplifted elephants. The wrangler assumes he's there because he's "too lazy or boorish to score with a female who can talk back to you." Non-uplifted animals are described as "a little bit like children and a little bit like beasts."
* Schlock Mercenary at the same time. They consider those some of the best days. Even better if they can still collect payment from their original boss.
* Schlock Mercenary based a whole story arc around this. Luna's bureaucracy was so slow, and the queue so immensely long, only the oldest people in line remembered it ever moving. There were religions dedicated to the idea of reaching the front. The Toughs thought they'd been hired to disperse a crowd of rioters, but found that it was just the line for the bureaucracy.
* Schlock Mercenary because, apparently, the company lawyer kept a list:
* Schlock Mercenary, because posting bail is fairly cheap and doesn't have the drawback of making the government issue a warrant for you in case you want to come back to the system. Unfortunately, mercenaries get bored.
* Schlock Mercenary before them), but they supressed the technology and even refused to use it themselves.
* Schlock Mercenary: Before the Teraport drive was released interstellar civilization relied on "wormgates" that had to be placed at STL speeds, meaning that even after 100,000 years or so over 99.9% of the Milky Way had slipped through the "net". Unfortunately once the corral was broken open by the Teraport the various species were more interested in venting several millennia worth of pent-up frustrations towards one another than exploration.
* Schlock Mercenary be used as a spotter for a particular type of long-range weapons system (or even have it already installed). As Karl complains to his son Kaff: "I guess we dressed wrong."
* Schlock Mercenary blow, rather than the star acting as a giant frag grenade, it rips the fabric of space/time a new one in one particular plane.
* Schlock Mercenary burn." This may eventually become an aversion. New Maxims are constantly being introduced and more importantly starting in 2012 the author started releasing calendars featuring 1 Maxim per month in numeric order (up to #36 as of the 2014 calendar). This could present a problem for an eventual 2017 calendar which will presumably finish the list with the entry for October.
* Schlock Mercenary, but he's also utterly cool under fire, a sound tactician, a skilled fighter, and an excellent battlefield leader. Even though Tagon usually assigns an officer to (barely) keep him under control, once the shooting starts they inevitably follow Schlock's lead. Almost the entire arc of "Massively Parallel" had characters asking, "What would Schlock do?"
* Schlock Mercenary, but in the first Credomar arc when a woman he was interested in is knocked unconscious and falling to her death, he jumps to the rescue anyway, even after finding out her interest in him was feigned for the purpose of spying on the Toughs.
* Schlock Mercenary, but messing up a fellow crewmate is a good way to end up staring down the wrong end of a plasma gun. They're also considerate of things like preventing civilian casualties and (usually) not dishing out cruel and unusual punishment.
* Schlock Mercenary can carry on polite conversations, but still has no problems with murder and other mayhem to serve his goals, smiling at the thoughts of death and destruction that serves his purpose.
* Schlock Mercenary. Captain Kaff Tagon, the founder of Tagon's Toughs, is every bit of this for his men. And disrespecting him is a good way to get a faceful of

fist (or other, rather higher energy things) from his men. Even Kaff Tagon's own father, Karl, is impressed by the loyalty that his son has produced in the troops.
* Schlock Mercenary: Captain Landon gets filled with sixty-one bullets, and complains that the surgery bot wants to sedate him.
* Schlock Mercenary case of class warfare, the group (race) ultimately deemed responsible had already been shown to have tried once before, on a space station, with the only known rationalization being "surface dwellers are violent, so let's use that against them."
* Schlock Mercenary Colonel Pranger explains to his client what the primary interest is for his mercenary company, and revolutionary zeal isn't it.
* Schlock Mercenary comics mentioned that the creation of thinking A.I. was made possible by the evolution from the "binary digit" into the "trinary digit", allowing computers to think in terms of "yes", "no", and "maybe". (On a side note, it is also mentioned that the same logic that turned "binary digit" into "bit" also turned "trinary digit" into "tit", further discouraging females from pursuing a career in programming.)
* Schlock Mercenary count as a rare example of a war concurrent with the story. Although it's pretty easy to imagine the effects the Teraport would have on a galaxy used to wormgate travel for war and trading, we never actually see much of the chaos the invention actually inflicts on galactic civilization apart from a single battle.
* Schlock Mercenary: Discussed when the company finally has a mission on Earth, one of the most heavily populated planets in the galaxy. Energy production and "agriculture" are so advanced that they can fit two-hundred billion people on the planet using only ten percent of the available landmasses (and some of the seas) for megacities that are measured in cubic kilometers instead of square kilometers. The remaining ninety percent of the land is preserved sort of like continent-sized national parks.
* Schlock Mercenary downplays this trope as a common tactic that leaders use to put themselves in the least amount of danger while looking good:
* Schlock Mercenary during a post-traumatic episode. It gets her captured because the hardened mercenaries she works for don't spot it happening and race off to continue with their current mission without her.
* Schlock Mercenary: During Book 7: Part V, Elf gives one of the hosts of "Glamour Assault" a wedgie for making fun of her outfit while recording her.
* Schlock Mercenary: During the court room portion of the HTRN Takedown arc, Captain Tagon is forced to defend himself in Petey's court, since Petey doesn't allow lawyers.
* Schlock Mercenary. Each cycle can be millions of years apart, and still last for thousands, sometimes millions, of years, and still leave little trace of its existence. This has been going on for so long that the characters eventually calculate that surviving precursors in their own isolated refuges collectively outnumber galactic civilization by fifteen entire orders of magnitude.
* Schlock Mercenary, Earth (Or rather, the United Nations of Sol) seems to have certain population-control measures set up to prevent undesirable genetic characteristics from spreading to future generations. The only such limit that has been mentioned so far is for the overly moronic - basically, stupid people aren't allowed to have children - but one must assume that other characteristics are likewise limited. Since over-population isn't a problem (plenty of planets to colonize, and space-station colonies to boot), such people can still have children, though - by 'ordering' genetically-designed kids at private companies, getting them grown in tanks, and then raising them... apparently, the Nature-Versus-Nurture debate ended with victory for 'Nature' somewhere along the line.
* Schlock Mercenary elephants, apes, monkeys,and polar bears shown; presumably, there are others, and the can all talk the local language(s). And occasionally complain about the instincts that were 'left in' by the Uplift Congress....
* Schlock Mercenary, Elf is captured along with several others. As their captor gives the command to kill Kevyn Andreyasn, Elf pleads with him and desperately says "I... I'll do anything." Defied in that their captor is an alien and has no

interest in human females, telling her contemptuously that she has "nothing with which to negotiate."
* Schlock Mercenary enemy bypasses this protection by just ripping off a soldier's entire arm.
* Schlock Mercenary eventually concludes that the 'haunting' is simply a freak plumbing problem, and the plumbing just happens to sound like an ominous voice proclaiming their doom in their own language, so he flushes out the entire system until it stops. Captain Tagon then orders the AI to repress its memories of the incident, rendering it sane again, though it becomes suicidal if those orders are ever revoked.
* Schlock Mercenary. Eventually, Mako serves as spotter for a weapon that can pass through matter, being vaporised in the blast but taking out an army of suborned security officers trying to sabotage the Dom Atlantis central reactor, and leaves a note begging Sorlie not to go down the same dark path...and if she could kindly kill the original wet-worker that'd be peachy.
* Schlock Mercenary. Eventually, most of their technology was appropriated by the Fleetmind, but they were still millennia above every other physical species in the Milky Way.
* Schlock Mercenary, everybody's favourite carbosilicate amorph ends up with bits of him lodged... places... when he and Kevin (among others) crash from a great height into water.
* Schlock Mercenary features the Pa'anuri, a species of Dark Matter entities. They're unable to directly interact with baryonic (i.e. 'normal') matter in any way, and therefore cannot be seen, heard, or in any way detected or interacted with, with the exception of gravitic manipulation and wormhole generation. They also plot to destroy all non-baryonic life, due to the fact that baryonic life keeps learning to do manipulate gravity and create wormholes, and they find that annoying. They also have . A few books and a few years later, Digital imaging with gravitic instruments shows that they resemble twisted tendrils.
* Schlock Mercenary. Finally, Admiral Breya Andreyasn figures out that there's a way to stop the attacks: Release the Teraport into Open Source, essentially spreading the technology freely across the galaxy, and removing the Gatekeepers' reason to specifically target Targon's Toughs.
* Schlock Mercenary fits especially since it was equipped with a pool deck before the Toughs got their hands on it.
* Schlock Mercenary focuses on a few dozen mercenaries in a galaxy of trillions. Of course, they do have more of an impact on galactic affairs than a random sample of a few dozen sophonts, and wind up getting caught in the middle of many important conflicts. It's worth noting that the page quote continues...
* Schlock Mercenary forbids total idiot couples to reproduce naturally to avoid this trope.
* Schlock Mercenary for resurrecting a certain tune... or he would get a chewing out if anyone dares to get close enough to talk to him.
* Schlock Mercenary" for situations where the enemy needs to be restrained without being killed.
* Schlock Mercenary from scratch. When she arrived, they (being idiots) interpreted the "ED" (which stands for "Exotic Dancer", her genetic template) on her medical bracelet as the lab having named the baby for them. They didn't think Ed was "pretty enough" so they called her "Edward".
* Schlock Mercenary) Gav Bleuel put himself into suspended animation in the 21st century, and is later awoken (after being found in a disused storage locker) in the 31st, where he is accidentally duplicated nearly a billion times and becomes the largest single ethnic group in the galaxy.
* Schlock Mercenary, generally as an excuse on the part of the author for not drawing the part of story he thinks would be too hard.
* Schlock Mercenary get the deal they do on the PDCL due to strange voices convincing Petey the ship is haunted, driving him insane. Fixing the ship's plumbing fixes the issue, but due to the specificity of the utterances, Petey finds this explanation so untenable that only enforced cognitive dissonance can keep him

from committing suicide.
* Schlock Mercenary getting cut and almost killing everyone within a kilometer of the moon's equator.
* Schlock Mercenary given over entirely to computer systems (including support infrastructure).
* Schlock Mercenary Given the context, it's more like the Reverend is trying to figure out what exactly is Tagon confessing to.
* Schlock Mercenary, going so far as to suggest that officers go without pay, so that the grunts don't lose their paychecks.
* Schlock Mercenary: 'Gravy guns' are extremely powerful, short-ranged weaponry that, well, uses gravy to make gravy (or compressed neutronium, or just fine shreds of atomic matter) out of anything it's aimed at.
* Schlock Mercenary guards to my cell?" as opposed to the disbelief of a child over being locked in a cell made of caramel.
* Schlock Mercenary had Athena, a blue-skinned, red haired human girl. When the characters reunite with Petey and discover that his ears have become prodigious, he informs them that the algorithms determining his avatar's appearance are outside hiss control (and blames his programmer), but the bigger ears indicate moving up in station, as it were. Incidentally, only two AIs aren't subject to this: Ennesby, an ex-computer virus and boy band with a separate robotic body, and TAG, the AI of the Touch-and-Go; this is because they both reside in physical units as opposed to the ship itself (although TAG did appear to have his rather firmly affixed to the floor of the computer room).
* Schlock Mercenary has a bunch of fictional media within the setting. Many of these are all sorts of awful.
* Schlock Mercenary has a few examples. On the rare occasion acknowledging their status as mercenaries is politically inconvenient, the Toughs and others will be called "security and armed response." There's also:
* Schlock Mercenary has a few. In one instance, after the enemy disables the power on their troop transport:
* Schlock Mercenary has a narrator who sometimes interacts with the characters.
* Schlock Mercenary has an artificial skull made of carbonan (a diamond-like carbon material). A doctor comments that in his case, this is like "keeping potato chips in a safe deposit box".
* Schlock Mercenary has an unusual variant, in that the people trying to prevent a civil war in the UNS mostly function as the bad guys. Admittedly, this is because their strategy for preventing it involves remotely erasing the minds of innocents to serve as meat puppets for the mind of a ruthless killer, clawing for any advantage they can, and more than a few mass murders. Occasionally they even risk starting other wars in order to ensure it.
* Schlock Mercenary has a very close relationship with Tenzy, whose life has been interested. She started out as a heavily modified M3 Tater less-than-lethal suppression weapon intended for use by sworn non-aggressive police. Following modifications by a shadow government wet-worker looking for the ability to kill everyone in a building at once, she became intelligent enough to upgrade herself on the fly and qualifies as a person-level AI. Since Landon is an uplifted polar bear there's a sort of weird symmetry to it.
* Schlock Mercenary has confessed that he has no idea how old General Tagon is, guessing that he's somewhere between 18 and 40 years older than his 49 year-old son.
* Schlock Mercenary has gardens with sands, pebbles, and polymer chips from every single human world, moon, or habitat.
* Schlock Mercenary, has one permanently welded to Lota's face. Given Lota's power, ego and disdain for puny pronouns, it goes well with the rest of Lota's terrifying demeanor.
* Schlock Mercenary has plot armour in a kind of roundabout way, only a handful of characters are ever permanently killed, most just end up with their heads temporarily in jars (Tagon is killed in one story arc, but then Kevyn warps back from the future and changes history so that he doesn't, oh, and Petey suicides

earlier in the piece, but he appears later having backed himself up into a mini-tank).
* Schlock Mercenary has the partnership collective, a hivemind of lawyer snakes. After a certain story arc, the protagonists are tasked with and paid for "administering punitive damages" against the collective for damage the Collective caused in a revenge plan against Tagon's Toughs. Mainly done by blowing up attorneys and their property. At a point in the comic, they take on to patrolling coffee shops, ambulance companies, and divorce courts because of just losing their ship and being broke.
* Schlock Mercenary have been using their monopoly over the Wormgates to manipulate galactic civilisations for millennia and the Pan'uri have been manipulating them for even longer. Given Petey's new hobby of engaging in social engineering experiments where he can't intervene directly the only thing stopping him from fitting this is that he hasn't been at it all that long.
* Schlock Mercenary have the reflexes and speed to do this without difficulty.
* Schlock Mercenary heavily suggests this with Maxim 24: "Any sufficiently advanced technology is indistinguishable from a really big gun."
* Schlock Mercenary He came back into focus in the last few books when the main characters' power level was up to the point where the company is a major player in galactic politics in their own right and the war Petey's losing is right on their doorstep.
* Schlock Mercenary, he doesn't have hands, instead having to rely on a sort of force-field manipulator that allows him to do everything from picking up a book to firing a Maser (and he doesn't need a gun to do that one).
* Schlock Mercenary, he finds that his friends and family built a shrine, complete with statue, while he was gone.
* Schlock Mercenary. He is, at best, a career sociopath working for a mercenary company.
* Schlock Mercenary He's also suggested that, if he doesn't have time, he would portray them realistically...
* Schlock Mercenary, he's something like a third of the way down the page, despite, again, being the title character!
* Schlock Mercenary he was duplicated, and the process makes a perfect copy with all personality and memories.
* Schlock Mercenary. However, the main galaxy-changing human invention (the teraport) has actually been created numerous times; it's just that time around, due to the inventor joining a highly competent mercenary company by pure chance and spamming the galaxy with the design once he realized what was happening, the secret got out before it could be suppressed.
* Schlock Mercenary", "I'm one of her brothers"), and their mother doled out some interesting childhood advice.
* Schlock Mercenary impact of meteorites and other celestial bodies of a similar size and higher acceleration, and decided they'd better build a few dozens of them. You know, just in case. And as long as there's no pesky rocks that need to be swatted, well, there are many other uses you can put a several-kilometre long warship with grotesquely overpowered gravitics control to...
* Schlock Mercenary in a 'verse where swords are pretty much completely useless. When he tries to use a gun, he tends to drop it for his sword at the first opportunity.
* Schlock Mercenary (incidental to solving a completely different problem).
* Schlock Mercenary informs us that in seven hundred or so hours, they will be summoned back following an ominous call from Petey to Kerchak. Each of the Toughs' groups then have their own story, with the Narrator frequently butting in to inform us the exact time until the fateful call occurs.
* Schlock Mercenary; in most future appearances, while he's willing to snark as much as anyone else, he approaches his duties a lot more seriously.
* Schlock Mercenary in order to help the one million other people Petey is planning to resurrect.
* Schlock Mercenary instead. Minor characters are often seen being bribed by

villains, and Ceeta once tried this despite the fact that she was cut off from resupply.
* Schlock Mercenary, in strips which make it clear that he and the "narrator", Dr. Awoh, are completely separate entities. Tayler won the only ever Web Cartoonist Choice Award for Best Guest Appearance.
* Schlock Mercenary in the comic, either as a dream or as a near-death hallucination.
* Schlock Mercenary in their transcript blurb— whenever the true transcript is not available, this message replaces it, trying to attract advertisers by using popular tags:
* Schlock Mercenary in the process (and before the effective start of the conditions that made it useable in that way), meaning only one shot...
* Schlock Mercenary in the size (and thus power output) of a warship and a freighter's power plants this only worked when the warship was more or less totally shut down inside a freighter several times its size. As in, "Hot Wheels toy in a sports bottle."
* Schlock Mercenary into a giant computer and ended up wiping themselves out in the "Identity Wars". A small number decided to remain corporeal and instead replaced their brain with an artificial one (based on the same technology as Schlock and the other amorphs). While some of this group are still around they are all millions of years old and don't have any kids (it's not clear if they can't reproduce or simply don't want to) so the race will eventually die out.
* Schlock Mercenary involve "coffinpedoes". At one point a bounty hunter has to retrieve the corpse of one of his bounties from space.
* Schlock Mercenary, in which Kevyn insists he can't see a thing without his trademark shades. In fact he can see just fine without them — if only in a single spectrum of light.
* Schlock Mercenary is a literal version, since he took a vow of chastity. He eventually gets married, averted the trope but keeping true to his vow.
* Schlock Mercenary, is because the parents read "E.D." on her genetic profile (for Exotic Dancer) and thought Ed was her proposed name; wanting to show class, they went with the full name "Edward" instead. What's more, she's black (or some brownish ethnicity), and they're both white hillbillies, so apparently their many social problems did not include racism.
* Schlock Mercenary is generally played for comedy, to the point where at one point he's told to be ready for "lunch at the zero-evidence buffet". His viewing kittens as comfort food is also played for comedy, although he doesn't generally get to eat any onscreen.
* Schlock Mercenary is generally pretty good about averting this trope, even prior to the hiring spree on Ghanj-Rho. The first two months see the introduction of not only the eponymous ball of amorphous violence but Flib Sh'vuu, communications slug/squid with a cool flying chair; Ennesby, a viral AI that used to be a boy band; Ch'vorthq who was genetically tailored to be the perfect ambassador
* Schlock Mercenary isn't so much loyal to the Toughs as he is interested in working for them, as a "free" AI, but especially for the titular amorph he does play the "buddy" part of this trope now and then.
* Schlock Mercenary is one, although unlike some of the other examples possessing no fixed form, he's not good at bipedal motion.
* Schlock Mercenary is sparse but constant, since the main character looks like a very large pile of poop.
* Schlock Mercenary is still up. Luckily it's a developed system in a setting where gravity manipulation technology is common, so resolving it is as simple as calling a tow truck.
* Schlock Mercenary) is suicidally insane when the Toughs pick him up, but eventually becomes the core of the Fleetmind; a gestalt of countless Battleship Class AIs into one, big, (kinda) omniscient Uber-AI with more firepower than the rest of the galaxy combined... that immediately decides to appoint itself guardian of the Milky Way Galaxy and wage a war against the dark-matter entities of the Andromeda galaxy. Tagii is driven insane by sensory deprivation, and is reformatted

into a fleet-wide administrator AI as the "Goddess of Earth, Wind, and Plumbing", but has serious psychological flaws that cause galactic incidents when hacked.
* Schlock Mercenary is usually averted (when it's not, bloody dismemberment usually ensues). They first realize they need armor after facing a squad of commandos wearing armor good against small arms, so they buy bulky powered armor that is destroyed a couple missions later. Since that armor restricted movement so much (their martial arts instructor said he'd rather fight naked) they exchanged it for low-profile suits that look exactly like regular uniforms (and are used as such), but are still powered and can stop a tank round. Now they also have heavier suits for use in boarding actions. The low profile armor, along with the obvious benefits of protection, also have neat features like being able to sustain the wearer in space for short time periods, and inertic flight.
* Schlock Mercenary, it actually qualifies under "Driving under the Influence" laws. Also:
* Schlock Mercenary. It's not so much depression as a scramble to get a very disgusting image out of his head before it gets saved to long-term memory, though.
* Schlock Mercenary joined the Toughs as an ensign and made lieutenant before she was discovered to be a spy and left in disgrace. When she was later instrumental in the Toughs being reconstituted, she found a new position, as a corporal, which rank she retains.
* Schlock Mercenary Jud Shafter wrote in his memoirs that he broke free of his bonds after he realized they were only toilet paper. What he didn't mention was that it took him 15 minutes.
* Schlock Mercenary just a stock support frigate, and assumes that his own fleet of stolen civilian ships with guns glued on will be able to destroy these military warships.
* Schlock Mercenary. Just stew in your own angry juices like a fresh can of condensed whoopass. Except this is a relief mission. No whooping. ...I need a better selection of canned goods."
* Schlock Mercenary Kevyn Andreyasn sneaking data past his guards by playing it as audio, modem-style, to an AI on the other end of the communications link.
* Schlock Mercenary, Legs tells him that curses always have a way out. Since he thinks he's fated to die due to being kissed by a certain girl, she suggests he kisses someone else. He tries to get a kiss from Bunni, but she's married, so she hurriedly improvises and says he needs a "pure, freely offered kiss" from someone who doesn't know about the curse.
* Schlock Mercenary likely than the ship simply being haunted, to the point that the ship's AI actually went insane trying to figure out how it could possibly happen.
* Schlock Mercenary makes it unnecessarily easy for even experienced Schlockers to do this, as the sidebar contains a "random strip" button that throws you back into the archives.
* Schlock Mercenary Mars, Venus, Europa, and Luna (Earth's moon) have all been terraformed. This becomes a plot point when they visit a planet which hasn't introduced many oceanic species because its economy is based on tourism and ocean resorts. There are a few deaths which look like shark attacks, and the first suggestion offered by a character is that someone made a robotic shark with a robotic jaw to murder people.
* Schlock Mercenary: Maxim 70. Failure is not an option - it is mandatory. The option is whether or not to let failure be the last thing you do.
* Schlock Mercenary — in response to complaints about how long the story was "dragging on", he wrote, "If you're bored, leave. PLEASE. I'm telling the story I want to tell, and I'm telling it the way I want to tell it."
* Schlock Mercenary — we, and the mercenaries, perceive them as just big, ugly monsters, but they're actually fairly intelligent, communicate amongst themselves, figure out how to use human weaponry in a surprisingly short amount of time, and see the humans (and, in particular, Sergeant Schlock) as frightening monsters…
* Schlock Mercenary, means that it's not uncommon to see captains and commanders

leading individual squads. This leads to a small bit of friction in the "Mandatory Failure" story, where Kevyn tells Elf that she shouldn't have been the first one on an enemy ship, since that's what her grunts are for.
* Schlock Mercenary means there's plenty of breathing room. Energy production and "agriculture" are so advanced that they can fit two-hundred billion people on the planet using only ten percent of the available landmasses (and some of the seas) for megacities that are measured in cubic kilometers instead of square kilometers. The remaining ninety percent of the land is preserved sort of like continent-sized national parks.
* Schlock Mercenary. Medics actually have a grading system for deadness based on how much of the deceased's mind they can piece back together.
* Schlock Mercenary memorable strip. He's also fair at contract negotiations, as far as they concern getting as much money as possible for the job. His idiocy has been toned down, and he is being shown to be more cunning in various matters. For example, he identifies the planet of origin and likely personality traits of one client just from his accent. A bit less impressive given that Tagon was from the planet in question, but still.
* Schlock Mercenary more than he wanted the money. It makes Tagon in particular very easy to manipulate: if you give him the chance to get paid twice for something, he will take it unless it is overtly suicidal, and even then he'll have the brains trust take a look at it to see if there's a way to handle it.
* Schlock Mercenary most governments are named for the sapient species that developed in their respective systems. However Terrans of all different species (since Earth started to genetically uplift all manner of animals to human-level intelligence) hail from the United Nations of Sol. All of these different space-faring nations themselves are part of the League of Galactics.
* Schlock Mercenary mostly sells book collections of the strips but also sells other things including T-Shirts, bags, magnets and miniatures. On occasion the comic has a merch-related strip, like for example with challenge coins.
* Schlock Mercenary: Most of the guns the company uses. They switch between at least two ammunition types, fold away for easy concealment and storage, and have holographic sights that can easily compensate for local gravity (weird gravity plus a rotating reference frame is usually too much for them, though). Schlock's plasgun is the primary exception, being little more than a fusion generator with a trigger. It's repeatedly referred to as an obsolete antique.
* Schlock Mercenary (Not the first appearance of it, but the funnier one).
* Schlock Mercenary, not to mention it makes a proper mess of his allies' own plans.
* Schlock Mercenary occasionally delves in here, albeit not too often. The biology aspect is kinda laid aside because Schlock's immune system is good enough to reject even nanobot assault.
* Schlock Mercenary occasionally has the crew's ship act as an "Overwatch", especially since the 'person in (ultimate) charge' of pushing any "buttons" is an A.I., making the whole thing automated in effect.
* Schlock Mercenary of character development, being in the cast since pretty much the beginning of the comic, and getting a lot of screen time in the process.
* Schlock Mercenary of meals, the only thing Schlock has ever spit out was a glob of weapons-grade nanites that tried to hijack him and would've succeeded if he was anything else).
* Schlock Mercenary, oh, and he already was a semi-mythological figure among them even before enlisting to the company.
* Schlock Mercenary, one of which indeed married a human — so his stunned reaction was not groundless.
* Schlock Mercenary. One possible translation of their name is 'That which exists where nothing should' and they remain mysterious and shadowy figures in their first few appearances but after the Core War, courtesy of the Fleetmind, they've been analyzed enough that with enough resources they can be fought and defeated. They still remain a threat but that's because they are not without resources of their own.

* Schlock Mercenary on him, he's aimlessly dreamwalking around his gang's "headquarter" and rephrasing "She was totally hot" in different ways.
* Schlock Mercenary. Only for Schlock to bring it up again 15 seconds later.
* Schlock Mercenary overnight when the Terraforming Wars were started with a surprise attack on the command structure, including a (partially successful) one on the Tagon family.
* Schlock Mercenary part. Schlock got really good at it, and now he sometimes uses it just for general moving around. Shodan actually asked one of the Mallcop Command perps to help him "un-teach Schlock Parkata Urbatsu" (she declares Schlock an artist and refuses).
* Schlock Mercenary Petey appears as something like a cross between a koala and a hobbit, which is the same as the species that originally created him. Of course, he could choose to change that if he wished.
* Schlock Mercenary, Petey seems to be turning the Andromeda Galaxy into one for the more aggressive races from the Milky Way to make themselves useful. It's commented upon in at least one strip, as is his resemblance to a koala.
* Schlock Mercenary, prosthetics are generally temporary and only issued when cloning tanks are unavailable or the HMO doesn't cover them.
* Schlock Mercenary (published daily from June 12, 2000 and not missing a single day)
* Schlock Mercenary safely damage their building beyond repair (so they'd have to waste even more cash demolishing it) with no casualties in order to fulfill their contract to get one show off the air. While they are at it, they also shortchange the stock on the network and make even more money for doing their job.
* Schlock Mercenary say this to the Rev (who identifies it as "the Gospel of Uncle Benjamin"). Given that Petey's put himself in charge of a defensive war, and understands that (directly) helping his friends can impact it even indirectly, he seems to believe it.
* Schlock Mercenary Schlock is actually innocent of the murder he's been accused of (not that the mercenaries aren't guilty of a lot of other crimes, including murder) and his next lawyer (this one a member of his mercenary unit) tries in vain to get him to shut up while being interrogated.
* Schlock Mercenary Schlock tries to get a part in the circus demonstrating his various abilities, but fails because his abilities aren't as impressive as the ones possessed by Sergeant Schlock in the TV show very loosely based on his adventures.
* Schlock Mercenary security services to several habitats in the Celeschul system. They're considerably more principled than most examples, capturing a squad of Tagon's Toughs without firing a shot and apprehending their own client when he tries to convince them to kill the Toughs.
* Schlock Mercenary's Gav—a blue-haired physicist who cryogenically froze himself in the 21st Century to find out what the future would be like—saves his life (sort of) by cloning several million of himself just before the original gets killed. One of the major human demographics in the setting is now blue-haired physicists from the 21st Century.
* Schlock Mercenary, she'd be unprotected from the obvious effects of pressing against metal arms at increased gravity.
* Schlock Mercenary shenanigans Tagon is brought back to life, and Elf gets severely annoyed when he can't think of any reason why they would have kissed at all.
* Schlock Mercenary, shocked or disgusted onlookers, and occasionally the screams of unsuspecting "patients" who want to know where she is going with their leg. She's an absolute miracle worker, but she's been mistaken for an automated blender more than once.
* Schlock Mercenary shows up unexpectedly. He is happy to joke that Devereaux is literally calling him God, to Devereaux's annoyance.
* Schlock Mercenary since book 5. For example, Petey is hardwired to obey orders from an Ob'enn. So he cloned an Ob'enn body and implanted a copy of himself in its brain.
* Schlock Mercenary: since his entire body acts as a "brain", forming a neuro-vault

is as simple as collecting all the tissue that stores the information and scooping it out for safekeeping.
* Schlock Mercenary, since it happens a lot given that he's incapable of wearing armor for protection. He has to be a bit careful with this trick, though. Difficult to pull oneself together when one is split up, then carefully picked up and put in sixty separate plastic bags....
* Schlock Mercenary). Since the extradition process would be on public record, the UNS lets the Toughs go rather than letting the information go free.
* Schlock Mercenary, size isn't as important as one might think. Nonetheless, there are examples:
* Schlock Mercenary's Lota, a robot designed for load-lifting. He was built under a time crunch, so they based him on a handy existing machine with plenty of generator capacity to spare- the hulk of a destroyed flying tank. This explains the guns...
* Schlock Mercenary, small enough that only the shortest human crew members (or smaller non-humans) can effectively pilot them, and mounting a pair of arms that haven't yet been seen in action (plus the tank cannon), they seem to qualify. On the other hand, they fly instead of walk.
* Schlock Mercenary sometimes use numbers to substitute for letters, and even whole syllables, in their names; for example, "5er0" (pronounced "Ver-None") instead of Vernon.
* Schlock Mercenary sometimes use numbers to substitute for letters, and even whole syllables, in their names; for example, "5er0" (pronounced "Ver-None," with 5 substituting for its Roman equivalent, V) instead of Vernon.
* Schlock Mercenary, so they should be able to reach one of the other ships nearby. It's also what LOTA threatens to do if the Toughs get too close to his memory banks (he's justified; he found out they had a backup plan to assassinate him just in case).
* Schlock Mercenary, so you know that they don't have the proper viewpoint about things.
* Schlock Mercenary still married. The same UNS admiral who wiped their memories gave them a short but completely legal (and theologically sound) marriage ceremony before their minds were altered.
* Schlock Mercenary strips have a nasty habit of referring to "watts of energy." Even as late as the third book, while it gets right that terawatt-nanoseconds would be a unit of energy (one more commonly known as the "kilojoule"), it treats it as though nanoseconds make it more incomprehensibly huge than "terawatt-hours" or, say, "terawatt-millennia."
* Schlock Mercenary suggests it might not be so G-rated, containing among other things nicotine, codeine, and something called "hyper-ephedrine."
* Schlock Mercenary, Tagon fires a pair of insectoid soldiers after their eggs hatch. Upon being chewed out by his chaplain, he immediately clarifies that he's not a bigot — he just doesn't think a mercenary vessel is a good place to raise a family.
* Schlock Mercenary, Tagon is forced to represent the Toughs in a trial, and has been given a script by the company lawyer to read. Because it's The Future, it's written on a PDA, which leads to this:
* Schlock Mercenary, Tagon's Toughs had this reaction to Xinchub's death. He had spent several arcs as the personally nastiest of the Tough's rogues gallery (or, in his own words, "the biggest ace-hole in the game"), and his death caused happy-dances throughout the major cast.
* Schlock Mercenary teleports between enemy lines and starts shooting out the many, many security cameras to hide their approach from the terrorists in the command center. One of the terrorists immediately recognizes the pattern; the other...
* Schlock Mercenary tendencies and immaturity guarantees he'll never be promoted above sergeant. And so long as he gets let off his leash to indulge in a bit of ultra-violence he's probably ok with that.
* Schlock Mercenary") that forbids people with low intelligence from having children naturally. Fortunately, there is the option of buying improved genes from a genetic engineering company. That's indirectly how Tagon's Toughs ended up with

Dr Bunnigus — her parents "had maybe 83 uncontested IQ points between them", but still wanted a kid. They selected a general package, then when she was older, she decides to sign up with a bunch of mercenaries....
* Schlock Mercenary that has absorbed and co-opted the remnants of the unknown high tech civilisation that once lived their with skyscraper sized trees that emit radio waves as territorial warnings to competitors to name just one example.
* Schlock Mercenary that the emergency suit doesn't have gravitics like powered armor and he's going to "navigate" a shaft 6.2 kilometers deep ballistically, in near- Earth gravity, but zero air resistance.
* Schlock Mercenary that the lag time in the sender's electronics is more significant than the infinitesimal transit time. The cartoonist knows a thing or two about packet switching; his former day job was for Novell Groupware as a project manager.
* Schlock Mercenary that this isn't actually hair but a symbiotic colony that provides the Fobott'r with blood filtration and neurochemicals while receiving protection and food in return.
* Schlock Mercenary. The AI 5er0 get very upset when people pronounce his name as "Zero". His name is pronounced "Vernon" (the "5" replaces the Roman numeral "V", the "0" is pronounced "none"), thankyeverymuch.
* Schlock Mercenary: The arc "Mandatory Failure" has some discussion of Fobott'r traditional numerology. Each of the first thirteen numbers (they use Base 12 because they have twelve fingers) is a homonym for another word, giving some quick and easy symbolism. Finger, feet, hand, arms, head, self, crest, thing, strike, secret, magic, power, spare. Their names are typically combinations of these words/ numbers that can have interesting meanings in context.
* Schlock Mercenary, the artificial intelligence LOTA gets itself elected king of a nation-sized space station. It then uploads its brain into the station's internet, inhabiting the entire place and taking personal control of all its systems.
* Schlock Mercenary the capital of the United Nations of Sol is Dom Atlantis, a megalopolis of some 4 billion situated in the North Atlantic.
* Schlock Mercenary (the captain is well into his 40s, turning 49 in the Credomar plot-arc).
* Schlock Mercenary, the company chaplain, Reverend Theo Forbius, is from an explicitly multidenominational order. On occasion he's even taken the agnostic approach when counseling the mercs.
* Schlock Mercenary: The Credomaran news, mostly represented by Frank Hannibal. Hannibal hides behind journalistic integrity, then intentionally tries to make the mercenaries look bad for ratings by editing the footage to the point of just flat-out making things up. He even helps spread a blatantly false story about the mercenaries infiltrating the station for weeks (they had only been there for a few days) and torturing residents. LOTA's second act as king of the station is to shut Hannibal down, hard.
* Schlock Mercenary: The earliest and most stable relationship in the comic is between Doctor Edward Bunnigus and Reverend Theo Fobius. Bunni is a former exotic dancer who was genetically engineered to be as smart and beautiful as humanly possible, while Theo is a "theological mercenary" who got his current job because he was the only applicant. But he's a good man, and Bunni loves him dearly.
* Schlock Mercenary the entire Solar System is unified under the super-government of the United Nations of Sol, though there were independent exosolar human colonies like Celeschul until they accepted UNS protection during the Teraport Wars.
* Schlock Mercenary. The equipment they use is generally referred to as "boarding party favors," and it's one of the mercenaries' favorite jobs.
* Schlock Mercenary the gang members and complete a contract for local law enforcement.
* Schlock Mercenary, the legal system of Mahuitalotu is said to involve a "Prosexecuting Attornicator".
* Schlock Mercenary the mercenary company and is arguably twice as much maverick as everyone else.
* Schlock Mercenary the mercs attempted to interrogate some captured alien

terrorists, only for them to commit suicide using assorted Terran consumables that their species are apparently allergic to.
* Schlock Mercenary. Then again, dumb luck and unusual biology are the only reasons he survives.
* Schlock Mercenary the narrator points out that the plot is identical to a recent and terrible failed tv series.
* Schlock Mercenary: The Ob'enn are a highly advanced race of violent xenophobes, who consider the annihilation of lesser species a sacred duty, and are constantly at war with everyone and everything. For added irony, they look like four-foot koalas. Some dialog implies they're internally divided between the theocracy and the military high command, the latter being more "aliens as Nazis," but willing to be pragmatic if they have no other choice.
* Schlock Mercenary the Ob'enn who look like four-foot bipedal koalas. Technologically advanced, religiously xenocidal and frequently referred to as the Psycho-bears.
* Schlock Mercenary, the oft quoted Maxim: There is no overkill, only "Open fire" and "I need to reload".
* Schlock Mercenary. The one-eyed Uniocs are from the planet Oth, and most species are named after their planet of origin.
* Schlock Mercenary: The Purps are a lab-grown, photosynthetic variant with, as the name might suggest, purple skin.
* Schlock Mercenary, there are roughly 200 billion sophont beings living on Earth, and the immense population is managed by restricting it to a series of immense systems of arcologies and vertical cities that collectively occupy only 10% of Earth's land and oceans but which are several kilometers high and deep. Population density is measured in people per cubic rather than square kilometer. This is viable chiefly thanks to a number of futuristic technologies, including highly efficient underground farming and superstrong construction materials.
* Schlock Mercenary. Thereby also answering the question of what happens if he gets split in half.
* Schlock Mercenary there to betray his actions to DeHaans' co-conspirators.
* Schlock Mercenary: The Robot King making clear that the mad-scientist-for-hire is not to touch the computer systems containing the King's brain:
* Schlock Mercenary, the ships of the Fleetmind are all given names with the acronym PD. One such ship is called "Polysyllabic Designation".
* Schlock Mercenary: The Sol system is standardized to the TTR system, or "terra tempus regula," which is a bad translatineration of "Earth standard time." It's mentioned to be handy enough that everyone uses it, but annoying enough that everyone complains about it.
* 'Schlock Mercenary the Toughs have to get information out of a computer center in a college library. While they're there, some frat boys decide to play a game of 'taunt the human'. Their leader gets the brilliant idea of punching a man who outweighs him roughly 3:1, all of it in muscle, starting a brawl in which the frat boys get clobbered, along with the riot squad they call in.
* Schlock Mercenary they complete a job to take down a sleazy holovision network the police believe they conspired with the network's CEO to profit off of it.
* Schlock Mercenary. They use gravity control to grab a massive planet and throw it at something, while forcefully increasing its density until it initiates fusion and becomes a star. So now there's a planet-sized flaming projectile flying at whatever the Paa'nuri doesn't like. If the Paa'nuri is killed, the gravity knot at the center of the new star unravels, and since the star isn't massive enough to sustain fusion naturally, it explodes. Shielded warships can handle a supernova without too much trouble (or just escape), but since these fights happen in heavily populated systems, the defenders are left trying to evacuate entire planets before the blast wave reaches them.
* Schlock Mercenary, this happens when a detachment of Toughs led by Kevyn accept a technical job from the newly-crowned King Lota.
* Schlock Mercenary, though these people jars are used for medical purposes (typically regrowth - i.e. from just their head) more often than not.

* Schlock Mercenary time-travel plotline in Book 6 invokes this trope, but isn't itself an example.
* Schlock Mercenary to a movie he just finished watching. Apparently a movie about ghosts is fine, but not if the main character has both custom grips and a palm lock on his side arm. (But then, the scepticism does make a certain amount of sense... for Nick, anyway.)
* Schlock Mercenary to Ch'vorthq that when her boyfriend rejoined the Toughs, she came along too, and...
* Schlock Mercenary to escape destruction. Given how new the teraport was at that point and how rare it was for a space battle to leave merely "crippled" ships that was the first time they were ever used and many pods launched half-full or less as the crew panicked. Though considering how the dark matter entities that destroyed the Tunguska react to teraports the launching was probably why they decided to finish it off.
* Schlock Mercenary to lack such features are either new, small civilian vessels (and at least one of them has a "synthetic intelligence" which operates some self-preservation routines) or lobotomised.
* Schlock Mercenary took this to the extreme with the annual "Schlocktoberfest", in which the storyline filling the month of October always took a dark theme, sometimes associated with classic horror movies. Howard discontinued Schlocktoberfest after the arc about Tagon's 49th birthday.
* Schlock Mercenary to save Ensign Ventura. That's OK though, as he's been trying to injure his nose so he can get free cosmetic surgery (only provided for injuries in the line of duty).
* Schlock Mercenary to show someone exactly which part of their body it will blow off.
* Schlock Mercenary to sling planets (yes, plural) at their vessel and indirectly "stirring the pot" within the area to try and get them with the massive, scattered fragments, as it was unable to get to them directly.
* Schlock Mercenary to when Elf first admitted she was attracted to him, and once his vocal cords have been rebuilt it turns out he was trying to say, "She loves me for my brains!"
* Schlock Mercenary unfamiliar with long life in charge of immortality would be, in his words, like "putting vegetarians in charge of a barbeque".
* Schlock Mercenary uniforms, they usually change when they know they're going to want to be sneaky. For a mercenary company, being highly visible means being intimidating, and is also viewed as an asset.
* Schlock Mercenary uniforms) which completely protects them from small arms fire (provided they have deployed their retractable helmet to avoid head shots) but offers only limited protection against large caliber, especially powerful, or energy-based weapons.
* Schlock Mercenary universe, where all sports from Deathball to Ballet are unified in the same league with the teams choosing which to play, Rugby is not on the list because it is too dangerous.
* Schlock Mercenary universe, women can be found at all levels, from lowly grunts up to admirals commanding fleets and all over the civilian sphere, and aside from a few sexist comments here and there no particular note is taken of it. It probably helps that technology has made any physical differences utterly irrelevant; women don't even have pregnancies anymore since artificial wombs were perfected.
* Schlock Mercenary use, but one comment often aimed at one member of the species, Sergeant Schlock is "you're faster than you look".
* Schlock Mercenary uses a (lately archaic, but still highly effective) Strohl Munitions BH-250 Plasma Cannon far more than any other weapon (except possibly himself, since he's nigh-unkillable), since it is effective as both a weapon and a form of transport, and because it can be used to threaten as well as kill (a half-pressed trigger results in an "ominous hum" sound and a glow emanating from the barrel). As one person so threatened put it, "I can see a glow at the end of the barrel, and I'm not feeling ready to walk towards the light."
* Schlock Mercenary uses most of the types on this page, from troop transports up

through frigates and cruisers all the way to massive Battle Fortresses. There are no fighters, with automated cruise missiles being used instead.
* Schlock Mercenary uses the metric system, even among civilians... but every now and then the (American) author forgets himself.
* Schlock Mercenary. Usually whenever anyone suggests a plan along the lines of "and we run in, shoot everyone, blow some things up, and run away" (whatever the actual mission), the response will be "Well, we've got a Plan B". Some specific examples include:
* Schlock Mercenary: Variant. Schlock yells "Knock knock!" when the team blasts open a door. Pi thinks he's telling a knock-knock joke, causing a few minutes of confusion.
* Schlock Mercenary: Variant when Captain Murtaugh orders Kath to "be brilliant" and figure out the enemy's moves.
* Schlock Mercenary: various groups, including the Oafaan Freehold, have figured out that Galactic Civilization rises and falls on an almost regular schedule; but even ordinary characters (such as Landon) have wondered "where is everyone?" Book 19 is starting to answer that question.
* Schlock Mercenary, various Terran species have been ascended to sapience. Of these, apes are prominently featured. Also elephants.
* Schlock Mercenary via manipulating existing internal gravity sources is in regular use among the various space-faring sophont races, there are a few exceptions:
* Schlock Mercenary was a colonel in the Daern military before being downsized by a pacifist government. In accordance to this trope Pranger later found himself employed by the Daern government putting down a revolt, though after successfully putting it down (causing a peaceful regime change in the process) he responded to an offer of his old job back with a polite refusal and a number of not-so-polite hand gestures behind their backs, and went back to being a mercenary.
* Schlock Mercenary was a public defender on Luna before signing on with the Toughs out of self defence. Since then, he's negotiated contracts, negotiated treaties, defended and prosecuted in civil and criminal cases, all in at least a half-dozen jurisdictions. He's also shot several opposing attorneys, although that's not directly related to his skills as a lawyer. He does have the benefit of the entire gathered knowledge of the Partnership Collective due to an interrupted brainwashing implant operation, but one would think certification would be an issue.
* Schlock Mercenary was a recurring element for this during the early years, and several characters were killed simply by knowing it existed.
* Schlock Mercenary, was destroyed during the climax of the previous book.
* Schlock Mercenary was originally created with no sense of humor, but has tried to learn it to better understand his opponents.
* Schlock Mercenary webcomic sometimes have own author appear, most notable one being one where he complained about many new characters being difficult to draw!
* Schlock Mercenary were named for the system, rather than the hypernet node of origin (on Tinth-III, in the Philkra system).
* Schlock Mercenary when a ship's deck is flooded Tagon compares it to "Third Orleans", which the author's footnote assures the readers is not even on the same planet as New Orleans. There's also a Tokyo^3 in South America.
* Schlock Mercenary: When investigating the ancient, planet-sized artifact Oisri, it doesn't take long for people to start noticing that there are too many mathematical coincidences to be anything but intentional. To start with, there's a large effect that is exactly 2063 times the planetoid's radius. This is the first step to deciphering the tools to reading the data Oisri contains.
* Schlock Mercenary, when Kevyn (who had earlier prepared a contingency plan to assassinate King Lota; a secret plan, he thought) suggests modifying a particular set of Credomar's systems, Lota angrily responds that:
* Schlock Mercenary when speaking for the Toughs, for whom he is their legal counsel. While Fleetmind jurisprudence doesn't allow for lawyers to represent defendants, he was also a co-defendant in the hearing.
* Schlock Mercenary, when the amorphous Schlock plans to jump off the top of a

skyscraper with a big canister of valuables, using himself as a parachute... but it doesn't work, and he winds up having to improvise on the way down, turning the parachuting into a bungee-jump...
* Schlock Mercenary: When there are nanite-converted supersoldiers running around trying to turn scientists into more supersoldiers, the mercenaries put the survivors all in a single room and have them lay down on the floor.
* Schlock Mercenary when the Toughs land on a planet to discover in is home to a sentient stone-age race.
* Schlock Mercenary where a group of characters destroy a gas giant colony planet by crashing it into another planet, along with at least one other planet that got caught in the ensuing catastrophe and screwed up the ecosystem of the one planet in the system that actually had one.
* Schlock Mercenary, where an accident blows a 300-meter hole in the side of Credomar, a cylindrical station measuring 6 kilometers by 60. It's pointed out that it will take a while to empty the can completely, but it does need to be patched a soon as possible.
* Schlock Mercenary, where a new teleportation device is first tested on Schlock, who can survive dismemberment since he is an amorphous blob of carbosilicate.
* Schlock Mercenary, where handheld plasma guns also have a plasma rocket setting.
* Schlock Mercenary, where one arc features cops so incompetent the Tough's lawyer is considering suing them for impersonating a police force.
* Schlock Mercenary, where the eponymous Sergeant is easy going and friendly, even a little childish, while Captain Tagon is a tough, grizzled mercenary not afraid to shout at his men.
* Schlock Mercenary where the villains use command injection to force a CCTV system to sleep for ten minutes. When a QR code is held up to a security camera, the system reads the commands contained in the code and executes them because the administrators never changed the system's admin username and password from their defaults. The QR code in question is displayed to the reader, so what happens when you use your smartphone's bar code scanner to read the QR code the character is holding up? Your phone returns the following data:
* Schlock Mercenary, where two grunts laugh about it, but are careful to give their names.
* Schlock Mercenary, which Fez Bojo describes as a marketing scheme similar to this.
* Schlock Mercenary), which forces a subject through billions of tiny wormholes instead of one big one. The latter is a receiverless teleporter in a military SF setting, with all that implies.
* Schlock Mercenary, which they don't notice because the sphere of destruction is propagating outward from the galactic core faster than any of their methods of communication.
* Schlock Mercenary...which turned out to be a symptom of the Milky Way being pinched off into its own little universe, and then slowly destroyed from the inside out. It came very close to destroying the whole galaxy, and would have if if it weren't for a bizarre loophole in the physics of the anomaly.
* Schlock Mercenary, which used to belong to an amphibious species and lost its artificial gravity several times during the salvage operation.
* Schlock Mercenary while admiring the UNS fleet's finesse in capturing them.
* Schlock Mercenary, who resigns to help out the police on Mahuitalotu.
* Schlock Mercenary whose data has been coded to become inaccessible in the event of an upgrade:
* Schlock Mercenary with a complicated past history, this has some plot consequences down the line (even aside from the introduction of a new doctor character).
* Schlock Mercenary, with a fairly good grasp of military tactics and handling the troops.
* Schlock Mercenary with a small army, at which point the narrator describes the trope in detail. Then Tagon notices that his foes have armor while his allies don't, at which point the narrator points out that Tagon isn't even remotely

descended from Mexican stock.
* Schlock Mercenary) with at least one child and one more on the way. By contrast, the original Tagon and Murtaugh are not an item; the last we see of them they both seem to find the idea that their clones got together a bit weird.
* Schlock Mercenary with General Bala-Amin of Sol system Entry and Traffic control.
* Schlock Mercenary with retractable helmets and gloves and rated for vacuum.
* Schlock Mercenary with the classic 'three men walk into a bar' setup.
* Schlock Mercenary works out there, is quite silly, looking mostly like a normal gag a day strip at first glance.
* Schlock Mercenary work with several (sapient) gorillas, and there was always a possibility—
* Schlock's plasma cannon emits massive amounts of high-temperature plasma, enough to melt through deck plates. While it is extremely powerful, it is generally considered old-fashioned and inflexible. Most people use kinetic weapons with variable high-tech ammunition. Fire is also one of the relatively few things that can actually hurt Schlock, making it an ironic choice of weapon for him.
* Schmetts, the alcoholic fairy, is found in a bottle, making her a "bottle fairy". She's also a
* Schmidt has mentioned his interest in breathplay, signed a sex contract with his amateur-dominatrix boss, and was seen hogtied on the kitchen counter by Jessica's sister, Abby.
* Schmidt Sting Pain Index goes to the Bullet Ant, named for its sting being as painful as getting shot by a bullet.
* Schmigadoon!: At the beginning of the show, Josh and Melissa have been dating for four years and their relationship is in a rut.
* Schmigadoon!: Danny teaches Melissa to fire a gun by wrapping his arms around her.
* Schmigadoon! reveals that Josh and Melissa first confessed their mutual love in the snow.
* Schmigadoon!: "Suddenly", a love number where Emma dances with Josh and Doc Lopez dances with Melissa.
* Schmigadoon!: The very first scenes depict Josh and Melissa's first meeting. Melissa's chocolate bar got stuck in the hospital vending machine and Josh instructed her to kick it. When she does so, snacks come pouring out of the machine. Sparks fly between them and they proceed to date for many years.
* Schmöker "to smoke", and one plausible explanation for the coinage is that students would tear pages from such books to use them to light their pipes. (This was before matches became widely available and affordable).
* Schmuck Bait, and gets slapsticked for it. Geico logo comes up; "We all do dumb things. Paying too much for car insurance shouldn't be one of them."
* Schmuck Bait even then. Almost no two handguns can beat the damage of a single rifle.
* Schmuck Bait, stubborn, or short-sighted enough to fall for an obvious trap or scam without any second thoughts that come across as so obvious towards other characters.
* Schmuck Bait: When a name is a transparent and pathetic attempt, if an attempt is made at all, to make something look good, but it still looks glaringly suspicious. Alternatively, it attempts to warn about something horrible, but that very attempt attracts people.
* Schneizel is a consummate Truth Twister, which becomes brutally evident
* Schneizel sported a pair during the FLEIJA testing. They were only protective sunglasses,
* Schneizel, this was quite an accomplishment. The dub makes Lelouch's side of the conversation more vague, so he doesn't seem so eerily prescient.
* Schneizel turns out to be this by the end of the series — up until then, he has debated an ethical/economical view to mercilessly conquering other nations. His major retinue comes from disgraced/insane rejects of Britannia's worst, but he has used them like a
* Schneizel was also supposed to marry a European (what specifically, not noted)

noble, but he keeps putting it off because he knew there would be no real point to it as Britannia was going to attack the EU eventually.
* Schnell! — "Quick/Quickly!" General-purpose exclamation by anyone giving orders.
* Schnells the salarian isn't trying to help people cheat at Quasar. He's just making a machine that could help people cheat at Quasar. If they wanted.
* Schnit Heads vehicle to rescue Heifer from a cult, but his weight makes the "jaw" fall off and exposes them.
* Schnookums and Meat: Shouldn't they have been more concerned with assuring the customer that the product doesn't contain any "Schnookums"?
* Schnuffel is mainly set in a beautiful looking meadow with a castle. It's mostly populated by cute animals including a mouse,pig, and a bee.
* Schnuffel (Snuggle Bunny) like the previous character created by the company. However the song and character became so popular in Germany that the company decided to create more songs and music videos featuring the character complete with a few albums where you can lesson to more songs sang by the character and even showed up at a few live shows in Germany. Then in 2010, the company created a second bunny character named Schnffelienchen (Snuggelina) who is Snuggle's girlfriend and even had songs of her own. That same year the company started releasing Audio CD's currently only available in Germany that stars the duo on various adventures and are actually voiced by different voice actors and aren't high pitched like they usually are.
* Schnuffel (Snuggle) named Schnufflienchen (Snuggelina) in 2011 who is also Snuggle's girlfriend due to the popularity of Snuggle in Germany. Both have there own songs, but most of Snuggelina's songs are her referring to her boyfriend except for the song "Butterfly".
* Schnuffel) who both replaced The Crazy Frog who was the company's former mascot in the early 2000's.
* Schola Gladiatoria has made a few useful videos for understanding historical usage of guns in conjunction with swords and knives:
* Schola Gladiatoria: Matt Easton reviews the accuracy of historical weapons and fighting in films, TV, and videogames.
* Scholar is another example, starting very weak and becoming much more versatile late game. Early Scholar is basically a Black Mage with almost no spells, but Cure added to the list. Late game, not only can Scholar replace Black Mages or White Mages with ease, but they have several unique spells of their own that no other class can ever get.
* Scholarly Magics series, witches and wizards become ill on when travelling on water, oceans included.
* Scholars are pretty sure B. Traven died in 1969 and that he was male. As for where and when he was born, what his real name was, or
* Scholarship Student: A character who goes to a prestigious school on a scholarship.
* Scholar Soco says that science is the art of manipulating the world within the laws of the Fate Web, a mystical construct created by the gods to keep the world safe, while magic is an extremely dangerous force that operates outside of it.
* Scholars, which are a playable Job in the game, were the backbone of the military power for the ancient Nym civilization, serving as
* Scholar Who Walks the Night: Gwi's eyes turn red when he's about to kill someone.
* Scholar Who Walks the Night: Hye Ryung looks exactly like Myung Hee.
* Scholastic competitive speech and debate has several events where, instead of a memorized speech, contestants get a different topic each round and have a limited amount of prep time before they begin speaking. In Impromptu Speaking, there's usually only a minute or two of preparation for a short speech on a quote or abstract concept. In Extemporaneous Speaking, after choosing a current events-related topic, speakers have a half-hour to do research and come up with a short speech. In Parliamentary Debate, two two-person teams get 20 minutes to prepare full cases for a debate that lasts around 40 minutes total.
* Scholastic led him to being only able to use long and obscure words. Kids are

encouraged to decipher what he is saying by using the dictionary.
* Scholomance, a dungeon in the Western Plaguelands, has a wing filled with
* School advertisements, "I am the parent of a child at Bart Simpson Elementary School," or "My son/daughter is an honor student at Springfield School for the Hopelessly Retarded"
* School and Society Through Science Fiction makes predictions about the way society will educate people in the future.
* School and work. Exhausting for the most part, yet you learn something, you socialize with people, get opportunities, and earn something.
* School bands saw an increase in female sax players once Lisa became a popular character.
* School Bites are based off people the author knows, heck the main character is pretty much the author herself.
* School Bites are cute vampire girls, some going into the catgirl variety.
* School Bites: Enforced by the Shadow Academy as one of their classes for newborn vampires. In order to avoid leaving bite marks, the new vampires are to leave clean shallow bites to get at the blood and frowning at methods that haphazardly rip into flesh.
* School Bites has a skinny dipping scene. Ironically, it only leads to an awkward moment for the one girl who is not done undressing.
* ScHoolboy Q has two Top 40 hits as a lead — "Studio" and "THat Part". However, neither are considered his signature. That title goes to "Collard Greens", a song that only barely scraped the bottom of the Hot 100.
* School Bullying Is Harmless: Where bullying portrayed as not so serious.
* School Club Front: A school club is actually a coverup for some extracurricular activity that is usually supernaturally-oriented.
* School corporal punishment is very much a virtue in Imperial China. Yue Qingyuan, who no one can accuse from being a sadist, is left utterly baffled by Shen Qingqiu's refusal to whip his disciples for unruliness and genuinely believes Qing Jing Peak's bullying problem could be solved with more beatings.
* School Days, 0verflow's Mathers Numakichi mentioned that he loves all his characters equally, but Setsuna Kiyōra stands at the top of the list.
* School Days, and Makoto Ito have one. Sekai's is larger and much more noticeable, and Makoto's is on the back of his head.
* School Days and reject a girl's advances. Having said that, his good nature is often a liability, as it leads him to being indecisive and unable to bring himself to say no, leading him to carry on a simultaneous relationship with at least two young women in spite of the damage it causes.
* School Days and when there is animation, sometimes it's just the mouth.
* School Days anime involves a number of teenagers doing false "dating practice" with sex, betraying, harassing, blackmailing, cheating, avoiding responsibilities, raping, and murdering.
* School Days, at least in the anime and manga. (The Visual Novel is something else)
* School Days can subvert this, although depending on the route you take you can also play it straight or avert it.
* School Days, do these two girls go axe-crazy over this guy. It gets to the point that they'd happily murder each other in broad daylight, with witnesses, just to be rid of the competition!
* School Days, due to the actions of a certain serial womanizer/rapist.
* School Days game end with Makoto staring blankly at whatever gruesome scene has just happened before him. The issue was fixed in School Days HQ.
* School Days has a scene showing Makoto at the airport trying to find Setsuna, who is leaving for Paris. A flashback Setsuna has reveals that Setsuna was originally supposed to have the classroom seat next to Makoto, but Sekai begged her to switch seats.
* School Days has difficulty making friends due to her shyness and attractive appearance; all the boys in her class fight over her and force each other to stay away from her, which alienates the girls in her class.

* School Days has Sekai and Kotonoha do this to the protagonist Itou Makoto.
* School Days in front of them, Makoto and Sekai break up, and Makoto never gets together with anyone else.
* School Days is an arrangement of the title song for bells. The piece has quite a somber feel to it, which fits the themes of remorse and lost innocence which run through the game.
* School Days. Kotonoha comes to Makoto's house while Makoto and Sekai are having sex and walks in on them. At first it seems like she caught them in the act, but then it's revealed that Makoto invited her there for a threesome.
* School Days, Kotonoha Katsura attracts unwanted attention towards her breast size leading to her getting bullied by other girls on a regular basis.
* School Days; Makoto and Sekai may start seeing each other behind Kotonoha's back, and for obvious reasons they try to keep it quiet. The problem with this plan is that they're absolutely terrible at hiding it from anyone other than Kotonoha, who only takes so long to catch on because she is unwilling or unable to accept that Makoto is cheating on her.
* School Days no one even mentions the police or tries to avoid detection.
* School Days. Note that despite the infamy the franchise has, in the original visual novel this is largely downplayed. Kotonoha and Sekai are both quite unstable, but most of the time it doesn't escalate into violence.
* School Days. Now with multiple bad endings involving various kinds of sharp object. Or trains.
* School Days's anime death scene and the one from the game where their neck is sliced).
* School Days: Sekai, after Kotonoha and Makoto make out in front of her, and Kotonoha after she is raped by Makoto's best friend and then dumped by Makoto.
* School Days situation. The first one, Sekai Saionji, ends up becoming the "mistress" of Makoto Itou, the boy she was trying to hook up with Kotonoha Katsura. The other, Setsuna Kiyoura, tries to force Makoto to break up with Kotonoha and stay with Sekai.
* School Days telling anyone other than Sekai that he and Kotonoha are dating.
* School Days tends to be the one getting the short end of the stick in the bad endings.
* School Days title) — It received a French dub for the DVD release in France.
* School Days to boot and ends up paying for it at the hands of his love interests.
* School Days. While Kotonoha remains a fairly important and sympathetic supporting character Sekai's role is both minimized and more villainous in order to give Setsuna more freedom of action.
* School Daze – Part 1": Gallus, while carrying Sandbar, accidentally drops him, causing the young earth pony to crash into the world leaders, knocking them over like bowling pins.
* School Daze – Part 2": While the Mane Six are explaining to the students that they're reopening the school, but this time teaching their own ways and not following the EEA's rules, Fluttershy blindly tosses the rulebook behind her... where it hits a straggler pukwudgie.
* School Daze, Part2, have various things crossing the screen for scene changes, like a cider mug, an apple tree, or Twilight's new school guidebooks falling down
* Schooled. However, it starts backfiring spectacularly for Zach when Cap genuinely becomes popular.
* Schooled. However, since Capricorn has no TV at his real house, he thinks it's the best thing ever (and tries to talk to the character).
* Schooled in Magic: Being turned to stone is pretty common, even as a punishment for breaking rules in the library. More serious offenses are said to be punished with this permanently. At one point Emily's petrified by an enemy and she only narrowly escapes.
* Schooled in Magic: Emily is completely out of place in the medieval-like Nameless World, and frequently finds it difficult to adjust.
* Schooled in Magic: Emily makes a Death Viper one to stop it from killing her.

* Schooled in Magic. Even Sir Roger Greenwood, one of the most honor-bound men in Zangaria, considers his oath to the king void, defecting to Princess Alassa and begging her to stop him and save the kingdom.
* Schooled in Magic. It turns out to be why runes intended for compelling him into marriage didn't work, since he lacked any desire toward women this could exploit. Before, he just acts like any straight male character.
* Schooled in Magic series, blood is used in many aspects of magic, but not commonly. It can be used to power ritual magic, to steal magic through necromantic rites, or to help target a spell on a specific individual.
* Schooled in Magic series, Emily has a long term goal and plan to bring her new world into the modern era. Throughout the series she slowly introduces the populace to new ideas, inventions and way of doing things. She knows the risks and possible wars that will come from this, but she feels that the benefits it will bring to the common people will be worth it.
* Schooled in Magic series, Emily is described as having extremely neglectful parents (especially her alcoholic mother). Upon arriving in her new world they found her to be malnourished and underdeveloped physically for her age because she was left to her own devices when looking for food or clothes.
* Schooled in Magic series, Emily left nothing she valued or missed behind on Earth (relationship wise), such as a loving family or friends. In fact, she feels like her life only just got started now that she's left Earth behind.
* Schooled in Magic series has been utterly corrupted and driven insane by the necromantic power that they wield.
* Schooled in Magic series, students are punished in various ways including caning and magical transformation (which can be worse than a caning).
* Schooled in Magic: Several of these occur in the books, such as Emily fighting necromancers. Some sorcerers also engage in them to settle quarrels or as entertainment for others.
* Schooled in Magic. She then has to keep both of them from killing each other when their heirs turn out to be a couple.
* Schooled in Magic: Spells which force people to tell the truth exist, and they're used in court cases, ensuring that innocents are not convicted.
* Schooled in Magic the author comments on the unlikelihood that ancient magical spells and/or objects would somehow be more powerful than those created by contemporary mages who have a longer history of experimentation to draw upon.
* Schooled in Magic: The school library is filled with books of (and book on) magic. Emily spends a great deal of time in there for both classes as well as personal study. Eventually she even begins working as an aide to the librarian. The punishment for making noise in the library is an hour as a stone statue. This punishment is magically enforced and automatic.
* Schooled in Magic: While not exactly in the past, Emily does find herself trapped in a world which is essentially still in the middle ages.
* Schooled in Magic with only contempt for common-born superior officers.
* Schooled. On the spin-off he guest stars as the rival keeping Lainey from being available for series regular C.B.
* Schooled plays it straight with Cap, her grandson. An old hippy, she's instructed him everything from social justice to farming. To everyone else, she's a bit of a subversion. Flora, who grew up in Garland, thought she was a tyrant and resents her for not teaching her about the real world.
* School Festival, 10032 is mistaken for Mikoto, and dragged into a game of tag that Mikoto herself was late for. Mikoto lets 10032 play around, since the clone hasn't had anything resembling a normal life until then. She also does surprisingly well; her opponents use tactics designed to fight one of the most powerful espers in Academy City, not a clone with high-level military training and experience from over ten thousand battles.
* School Festival: A school-wide event where all the clubs compete in various activities.
* School Festival rounds up the baseball team. However, it quickly becomes apparent they've got the hots for Ayano herself. That was removed from the anime, however,

making it appear the baseball team just has an excess of school spirit.
* School Festival thrown in the middle for variety. Akamatsu had realized the arc was starting to drag and decided to drop a few mini-arcs on the tail end to avoid making the problem worse.
* School Festival, where the Symphony Club (all three of them) swear to become a true symphony instead of an appreciation club, despite lacking both the number of members necessary and the talents required.
* School Forced Us Together: A group of people is brought together by the school system.
* School Forced Us Together: Characters are forced together by the school system.
* School Form, called the Demon of the Seas... and even then, Wailord have been known to devour entire schools of Wishiwashi whole... and Wailord themselves are preyed on by Dhelmise, who wrap them in seaweed tentacles and drain their life force.
* School for Scheming: A school that is used as a cover for an elaborate plot-centric scheme.
* School For Vampires, centers around a group of vampire children learning everything that a vampire needs to know at the School for Vampires.
* School For Vampires has the main cast go trick or treating. One scene has the kids trick or treating a woman who's handing out candy while wearing a topless apron as a costume.
* School For Vampires Polidori is presented as the villain of the story, but while the child vampires may be more or less harmless, there is no denying that adult vampires can be quite a threat to humans, not in the least since they hunt humans for blood.
* School For Vampires: Sunshine is seen doing this in "Zoo Time", however instead of an actual flower she's clicking and dragging on a virtual flower program on her computer.
* School For Vampires, the vampire kids learn how to control their shadows, causing them to do everything from backflips, to picking up and holding physical objects. But the main character Oskar's shadow goes wild and becomes fairly menacing until he learns to control it.
* school full of genius devisers and gadgeteers, plus the people smart enough to teach said inventors, he treats everyone else like they're a moron compared to him. He could be right.
* Schoolgirl Lesbians) and hops in the bathtub with Yuno the day they meet, since her own water supply doesn't work. Uh-huh. One time Miyako even tells Yuno that she thinks she is very pretty. Yuno in turn voices her wish to Miyako that they might one day have the same relationship as Sae and Hiro.
* Schoolgirl Lesbians. Most of the rest of the cast participate in (much safer) Romantic Two Girl Friendships with other Lillian students.
* Schoolgirl Lesbians: Two girls form a romantic relationship at school (usually secondary school).
* Schoolgirl Series does this to some of the more introverted characters.
* School Hard", Joyce wonders what Buffy's teachers will have to say about her scholastic performance. "Well," Buffy declares, "I think they'll all agree that I always bring a pen to class, ready to absorb the knowledge."
* School Hard". Spike boasts that the last Slayer he killed begged for her life, but...
* Schoolhouse Rock! averts it by using "Ooo-rah-nuhs." Thus neither rude interpretation is possible. It's also closer to the original pronunciation in ancient Greek.
* Schoolhouse Rock! character, Interplanet Janet, is half human and half spaceship but sports a pair of metallic breasts.
* Schoolhouse Rock! for a variety of subjects. The most notable example is "The Preamble", whose chorus teaches the words of the titular part of the Constitution of the United States.
* Schoolhouse Rock! has a football player getting spun around in a scrum, resulting in his tossing the ball the wrong way and breaking a 7-7 tie for the opposing team,

leading to some choice interjections from the crowd.
* Schoolhouse Rock! is also for recycling animation. For Example: Them Not-So-Dry Bones also re-used the Scenes were The Skeleton gets out of the short mustache barbershop quartet and falls like a blob, The Baseballplayer Boy gets Bonked by the Baseball on the Head and The Baseballplayer Boy Knocking his head at the end of the song.
* Schoolhouse Rock! is notably used to help students remember the Preamble to the U.S. Constitution.
* Schoolhouse Rock! is so camp that it often gets in the way of being educational.
* Schoolhouse Rock!, played by Jack "I'm Just A Bill" Sheldon, sings about the history of energy consumption, the depletion of its energy resources, and the need for conservation until alternatives are found.
* Schoolhouse Rock! short "$7.50 Once A Week" a moth flies out of the boy's pocket when he looks for money, not knowing he has already spent his entire allowance.
* Schoolhouse Rock!'s "Interjection" and rewrote the lyrics to be about cheating on your husband. The animation was even in Schoolhouse Rock style, with bubble letters writing "Infidelity" when it came up in the song
* Schooling has this issue, especially with the addition of technology. Due to the often widespread punishments when things go wrong in the schooling system, more and more privileges are lost for
* school In the end, Twilight decides that her school doesn't have to be accredited and reopens it without Neighsay's approval.
* School Is for Losers: A person who believes that going to school is a waste of time.
* School Is Murder: A character tries to survive school because there are elements that are literally trying to kill them.
* School Is Murder: Students are routinely murdered by monsters, but it's the only school in town.
* School-Live! amongst fans). In particular most fanart and discussion about the series tends to be based on the anime and the first portion of the manga.
* School-Live! and general oddities. Thanks to the apocalypse she is a part of a close-knit team alongside three (later more) other survivors. Yuki has hallucinations that she is going to school normally instead of being stuck in a zombie infested school, and in these delusions she's very popular instead of being friendless.
* School-Live!, and Yuki is psychologically damaged. Her friends try to let Yuki live close to a school life as they could manage, and through these efforts find it within themselves to survive the zombies.
* School-Live! doesn't really like Yuki referring to her as "Mii-kun".
* School-Live! (especially notable as the series takes place ''during a
* School-Live! has people of all ages becoming zombies. Due to a large portion of the manga revolving around a high school, most of the zombies we see are teenagers. Later on the girls visit an elementary school where no one survived. Kurumi is more hesitant than usual to kill a young child who became a zombie.
* School-Live! Her eye eventually healed though. The anime adaptation didn't even include the injury.
* School-Live! is at Stage 2. It had a growing fandom but it stopped steadily growing after the anime adaptation ended.
* School-Live! is essentially this, initially seems like an innocent schoolgirl genre in the first half however, in the second half it turns into a Zombie Apocalypse themed anime.
* School-Live!. It is unsure if this will be permanent however, as she's treated quickly but there are signs the treatment wasn't permanent.
* School-Live!. It's noted that only mammals seem to turn into zombies.
* School-Live! once, however still no one mentions the word "zombie" or even euphemisms like "undead".
* School-Live! Pretending that things are still fine is a defense mechanism of hers.
* School-Live!), so the most likely explanation is that it's just another

hallucination. However, the apparition always seems to know what's going on and to actively help the girls. It's also implied somewhat that Yuki's helpful (if apparently strange) suggestions come from her.
* School-Live!'s uniform has a blue sailor collar and skirt, while the other three girls' uniforms have green sailor collars and skirts instead. It has yet to be explained why Yuki's uniform is different.
* School-Live! the anime removed all of Miki's confrontations with Yuki and Rii early on, making her a far more subdued character.
* School-Live!, the classmates are all dead, and Yuki's just delusional. The classmates are grey silhouettes because Yuki can't remember what they actually look like.
* School-Live! upon attacking the group implies that there is still some form of thinking going on inside her necrotic brain.
* Schoolly D's "Saturday Night": "What I thought was a girl was nothin' but a fag" (Needless to say he's not gonna win any GLAAD awards either)
* School Mermaid ends with the protagonist watching in horror as her best friend eats their mermaid-ified classmate, and is then coolly informed that she, the protagonist, will be turned into a mindless mermaid herself, and is dragged screaming by the other mermaids through the floor—her last sight being her best friend smiling cruelly at her with blood dripping out the corner of her mouth. The final few pages, focusing on the best friend, reveal that in a few days time, she'll kill and eat the protagonist too.
* School Mermaid: Hidemi puts her feelings for the boy she likes on a chalkboard, largely because she thought she was going to turn into a mermaid. However this is considered an act of true love in the spell's rules, thus making her exempt from turning into a mermaid as Hidemi has already shown she does love the boy she wants and doesn't need the mermaid flesh. Sure enough, the boy she like visits her in the nurse ward and reveals he likes her too.
* School Mermaid: Revolves around a journal containing a spell when chanted at a certain time at night, will cause human looking mermaids to appear before the user. If the mermaid with the first letter of the boy you love is caught and killed, all you have to do is eat the flesh of it while thinking of your true love and, presto, instant boyfriend.
* School Mode offers up one of the student's underwear as a prize for earning that character's ending. In here it's revealed that
* School Newspaper News Hound: An absurdly elaborate school paper that makes school's news with true commercial values.
* School Newspaper News Hound is far less prominent and more understated, if it appears at all. This, however, benefit well for the Precures, who want their identities kept hidden.
* School nurses call this "status dramaticus". As in "Little Jimmy came into my office in full-blown status dramaticus, but he only had a hangnail."
* school nurse They'll even fake sickness and injury just for the chance to ogle her.
* School of Hard Knocks: A school that allows students to fight each other.
* School of No Studying: A story that takes place in a school setting where no one is seen doing school work or worrying about their grades.
* School of Rock: After it is revealed to the class' families that Dewey is not actually a licensed substitute teacher, he attempts to redeem himself by talking about how much the class means to him, culminating in him saying "I have been touched by your kids, and I'm pretty sure I've touched them!" Needless to say, it goes downhill from there.
* School of Rockand the band must prevent the changes she goes through from becoming permanent.
* School of Rock applied to the kids in the band. The actors and actress who bass, guitar and drums all started musical training at an early age.
* School of Rock between Summer and Asher in "Total Eclipse of the Heart" They are on the roof in their pyjamas during the school sleepover: watching the stars and bonding over their love of astronomy. Summer shivers and Asher takes off his coat

and drapes it over Summer's shoulders. Freddy arrives just in time to see this and turns and works away slowly.
* School of Rock. Bonus points for the fact that Robert Tsai, who played Larry (the keyboardist) had to go through the same classical-to-rock transition that the character did.
* School of Rock. Come "Total Eclipse of the Heart", Summer FINALLY gets over Freddy, to the point she even tears down her picture of him in her locker. Freddy then realises that he and Kale have nothing in common so they break up, but not without Kale encouraging him to find someone who likes the same things he does. He then goes to Summer, only to find her with another guy.
* School of Rock, Dewey and the kids have a group prayer before their Battle of the Bands performance.
* School of Rock, Dewey assigns three girls as "groupies" of the other band members. Summer, however, refuses to be a groupie and is instead given the role of band manager.
* School of Rock, Dewey Finn (Jack Black) has just been exposed as a fake substitute teacher during parent's night. He tries to reassure the shocked parents with this line.
* School of Rock gives his students nicknames because at first, he can't be bothered to learn their actual names.
* School of Rock holds up three fingers. "Read between the lines, my friend."
* School of Rock: In "Minimum Wage", Tomika gets a job at Sumner's favourite store 'Totally Cute'. The other sales clerks hold her down while the head sales clerk Cricket conducts a makeover on her: calling out "crimper", "Glitter spray", etc, like a surgeon.
* School of Rock: In "Total Eclipse of the Heart", Mr. Finn is attempting to open a door while he is covered in sheets of paper when he gets slammed by Tomika opening the door from the other side.
* School of Rock musical and he loved it, telling the actor who played his role for the show, "There’s no way I could have done it that well. He really made it his own and he took it to another level. I was laughing, I was crying and I was rocking!"
* School of Rock, Ned the perpetual pushover is getting chewed out by his girlfriend for his spinelessness. Right when she asks if he's ever going to get around to standing up for himself, he interrupts her by heading off to the concert that she didn't want him to go to. Many of the kids also grow spines in a more gradual way, by learning to defy their overly strict parents.
* School of Rock, rock star wannabe Dewey Finn attempts to jump off the stage into the not densely packed crowd, but they move out of the way and he falls to the ground. At the end of the movie, he does it again at the Battle of the Bands, and the crowd finally catches him.
* School of Rock takes place in the early 2010s instead of being in the early 2000s like the film.
* School of Rock threatens to do this after he's kicked out of his band, then falls into the perfect opportunity when he finds out some of the kids in his class are pretty good musicians.
* School of Rock when they do use their uniforms (stylized to make the band look cooler) at the Battle of the Bands.
* School of Shock", she makes something called "protein nuggets", meant to make her classmates better at learning. However, they taste bland, give them gas, and are awfully hard.
* School Of Thrones. The noble houses are re-imagined as high-school cliques.
* School Play and the rest of her family. That said, he does hold out hope that she could start over and mend her relationship with her family.
* School Play put on and the arc it was based in. Notable in that the romantic leads were played by Daisuke and Satoshi.
* School plays—particularly Nativity plays—are full of this. Small children in badly made costumes, and making it obvious from the way that they recite their lines that they have

* School Raze – Part 1" opens with Derpy delivering mail to the school. The mailmare is just as clumsy as ever, smacking into the school's blason because she is busy checking out the address on a letter.
* "School Raze - Part 2", hauled away by the Royal Guard, then locked up in a cage of her own in Tartarus.
* "School Raze, Part 2", when Chancellor Neighsay takes control of the school Cozy Glow is better at manipulation than him and easily turns the other students against Neighsay and getting control of the school for herself.
* School Reunion" about the Doctor 'stroking' the TARDIS? This is the Doctor she was talking about. Note particularly the funny way the Sutekh-Doctor caresses the door switch open in the last part of "Pyramids of Mars".
* School Reunion, even those who liked Rose in the first Series felt she became unlikeable here.
* "School Reunion" for him, since now they seem to be in conspiracy against him. In the words of Mickey Smith:
* "School Reunion", gave the Doctor a poignant Mayfly-December Romance with Madame de Pompadour.
* School Reunion girlfriend before she unceremoniously ditched him for the Doctor.
* "School Reunion" has the robot version happen to K9, although it is unclear if this is the same robot rebuilt (with the same personality and memories) or just another robot of the same model.
* "School Reunion". In the Classic series, Sarah Jane was at most an occasionally
* "School Reunion" make them cleverer, it also seems to give them knowledge of things like how to travel faster than light. It's also possible that the computers the students are mesmerized by are giving them the information.
* "School Reunion": Mickey assures Rose that he knows what he's doing and saunters off. He returns sheepishly a moment later to ask her for directions.
* "School Reunion" Nine, maybe ten years old. I'm seeing pigtails, frilly skirt..."
* "School Reunion". Quite simply, K-9 eventually broke down. (But the Doctor fixed him.)
* "School Reunion", Sarah Jane Smith reacts to Rose in much the same way that Rose reacts to her.
* "School Reunion" sums it up perfectly: "I'm so old now. I used to have so much mercy. You get one warning. That was it."
* "School Reunion": The Krillitanes who have taken over a London school eat both students and, before the climax, the school's human teachers.
* "School Reunion": This is the Doctor's reaction when he runs into former companion Sarah Jane Smith a long time after he left her.
* School Reunion" was originally meant to have Sarah Jane Smith be reintroduced as a recovering alcoholic, but Elisabeth Sladen suggested that this be removed.
* School Reunion", what exactly happened to Milo between the Doctor's class and the scene at lunch? In the footage that was cut, the Doctor's questions to Milo actually made him collapse, prompting the Doctor to bring him to the school nurse, who turned out to be another Krillitane. This Krillitane then ate Milo, explaining what Wagner is referring to when he comes up to Melissa and tells her she's being moved up because Milo's failed him.
* School Rumble after he took a basketball to the face from Harima (he was distracted at the time by the ghost of an old teacher).
* School Rumble and gets rapidly wrestled to the ground and painfully pinned by the unamused Lala while she desperately reaches for a non-existent rope.
* School Rumble. And neither Kenji nor Tenma was particularly bright to start with, leading the series down some truly bizarre roads.
* School Rumble, but Hinai responds that it's just some random old guy.
* School Rumble, but people prefer his classmate Karasuma's comic which is also published in said magazine.
* School Rumble does this to Yakumo when he (mistakenly) tries to steal her away from a wedding, which is really a photoshoot. Also, he thought she was her sister.
* School Rumble features Harima and Tenma saving Eri from an arranged marriage (mostly by accident).

* School Rumble fits the badass-in-love description to a T in his feelings toward Tsukamoto Tenma.
* School Rumble grew a great big one for awhile till it was accidentally chopped off by Eri.
* School Rumble had both a softball episode and a "pool hockey" episode.
* School Rumble Harima and Karasuma spinning (the girls too, but they are arranged in a roundabout fashion).
* School Rumble Harima becomes a mangaka and inserts thinly-veiled counterparts of himself, Tenma, and other characters.
* School Rumble. Harima Kenji, in a fit of despair over a broken heart, rejects civilization to live as a hermit. In time, he gains the ability to talk to wild animals and a veritable zoo follows him wherever he goes for a time.
* School Rumble. Harima uses Tenma's present for Karasuma as transportation.
* School Rumble, Harry (the American) is freaked out when he first sees Harima's partially shaven head, mistakenly assuming that it is a "Samurai haircut." He later refers to Harima as "the one with the Samurai haircut," and seems to be under the impression that Harima is some sort of super warrior for awhile.
* School Rumble has a one-sided variant: Yakumo likes Harima who likes Yakumo's sister Tenma.
* School Rumble has a series of misunderstandings based on Harima's cousin Itoko. "Itoko" also means "cousin", and whenever someone asks "What's your relationship with her?" he answers that "She's my cousin." but people read it as "She's my Itoko" and figure they're in a relationship...
* School Rumble has quite a few versions of this. (and the not-Sequel is ENTIRELY this) especially the episode where Hanai ends up on an island populated seemingly by identical duplicates of the cast.
* School Rumble has significantly darker skin than most of his classmates. Lara, from Class 2-D gets away with it due to being explicitly stated to be Mexican, though somehow she has a Russian accent in the English dub.
* School Rumble in the original manga. Justified because well, it's a game played with BB guns. The anime adaptation originally had a few scenes with blood shown, but the dub apparently decided to take it all the way and show a pool of blood for every "death".
* School Rumble is a luchador. Tenma is a bit of a lucha libre fan, and both she and Karen don her mask on occasion, confounding Lala who can't believe the disparity in her power (as Karen is the only girl who has defeated Lala, while Tenma cannot fight at all).
* School Rumble is practically based on the mangaka, both in design and story.
* School Rumble manga. Eri invites Harima to her house overnight to work on the school album. To get him to reveal his feelings, Eri's butler cosplays as a character from Harima's favorite show and fights him. Harima leaves the house without revealing his feelings because that's how the episode ended.
* School Rumble manga, Yakumo's friends clumsily prepare her a surprise birthday party and she spends the rest of the day pretending she doesn't know. She comes home to find Tenma also preparing her a party.
* School Rumble. Oddly enough, he was originally going to be the main character of the show but was nonetheless relegated as a side character with little screen time or role in the story.
* School Rumble Sawachika Eri all showing degrees of interest in him, he still only has eyes for Tenma, who unfortunately for him is very much a "100% Karasuma-sexual".
* School Rumble's Harima is one lucky boy. Boy meets Girl 1 (Tenma) but she thinks he was taking advantage of her. Boy meets Girl 2 (Eri) by confessing his love for Girl 1. Boy meets Girl 3 (Tae) and lets him stay overnight. Boy meets Girl 4 (Yakumo) because he needed her help.
* School Rumble. She even put on his sunglasses and added whiskers to show him how to confess.
* School Rumble's Nishimoto gave away his porn stash to his classmates, Hanai confiscates the rest. Yakumo runs away from him when she senses his lust.

* School Rumble, so she realizes he just wants her to take off her wet clothes so she doesn't catch a cold.
* School Rumble tends to see much more lewd ideas in their heads. Haruki Hanai, who's most forward with her, is the most chivalrous of all the men, though he actually subverts the idea by being perfectly honest with what he says and thinks.
* School Rumble, Tenma makes two cakes, one for Karasuma for his birthday, and one for Harima's recent promotion. When Tenma leaves them unattended, Harima knocks Karasuma's cake over and ruins most of the inscription with only "ma" left. Harima assumes that he's destroyed his own cake and attempts to fix it before Tenma finds out. Cue some serious confusion when Tenma presents Karasuma's cake to him to find that she now has two cakes inscribed with "Harima".
* School Rumble that, his heartfelt confession—in contrast to all the shallow confessions she got from the other boys and easily brushed off—freezes her into embarrassed panic. Harima is likewise frozen in panic when he realizes what happened.
* School Rumble. The manga leaves the audience hanging in such a bad way that some have debated whether the author was just saying "screw you" to the audience.
* School Rumble. This seems to have been fixed as of January 2016, with every episode now carrying a TV-PG rating.
* School Rumble to confess to Tenma when a big burly "student" he had recently fought shows up and takes the credit for the note. This is actually good for Harima, since Tenma immediately tells him that her heart belongs to someone else.
* School Rumble tries his best to be a very moral and strict character, but he is human with his own perverted moments and thoughts.
* School Rumble version of the author's life. The manga that Harima works on are probably just jokes at the expense of stories the author has written, the unrealistic points of the normal story could simply be exaggerations. His boss was intimidating, so he was 20 feet tall... The same could be applied to other characters who were very tall or even changed size, such as Tennouji.
* School Rumble when Harima accidentally told Tenma that he will take care of her sister Yakumo forever.
* School Rumble, while asking her friends advice on how to tell someone she loves him, she tells them it's for a "friend of a friend".
* School Rumble, Yakumo has a flashback/dream to when she was a little kid that is from the first person perspective. Up to and including when the camera shakes up and down to indicate her nodding her head.
* School Rumble, Yakumo's ability to see the thoughts of people who are infatuated/in love with her (As text floating in the air) generally only makes her miserable. She gets asked out/confessed to/propositioned by boys all the time, but is put off by what they REALLY want. (Except for Hanai, who actually thinks what he says, but he puts her off in other ways.) Even worse, she can't read the guy she's actually interested in, because he's one of the few guys she knows that is NOT infatuated with her.
* School Rumble: Yakumo stays the night at Harima's house when there's a black out. He turns the radio just in time to hear the DJ say that a black out is a good time to have sex.
* Schools can be subjected to this quite a bit. Quite often, "punishing" a child who has a different learning style or doesn't care about school will be giving them exactly what they want.
* School Setting Simulation: A video game level taking place in a school, college, university, or other academic institution.
* Schools have Mandatory Fun as well. For example, a pep rally that's "optional", but if you don't want to go, you have to sit in the library and can't leave school early. If you have to stay on the school premises anyway, you might as well go to the pep rally (unless you really do get more enjoyment out of curling up with a good book).
* School Shock: Hao Xuan went through hard times, and tries calming down with a smoke - it ends as expected. He still pulls it through, though.
* School Shock named Vanguards. They are themed on bees, praying mantises, ants,

moths and spiders.
* School Shock on his chest while the other was lying naked on the floor tied to the chair in a school's storage room. Then a large group of people walks in. With photographic cellphones. It becomes a scandal. And it really wasn't what it looked like.
* School Shock's heroine Liu Li has no parents, almost everyone she got attached to was mentioned to have died and she herself has become dependent on drugs to prolong her short life. She is calm, cool, and collected most of the time and also downright adorable in other and overlapping moments. Then again, she spent all her life in the military. It's just life to her.
* School Shock when the school is over run with terrorists and he finds himself in a hostage situation, only to be saved by Liu Lu who's new mission (after defecting the terrorists) is to protect him as he is a "Child of Eden", something that a lot of dangerous people seem to be after.
* School shootings take place either during the morning or early afternoon, pretty much by definition; otherwise, there's rarely anyone there.
* Schools, houses and such that have a waist-height gate with a lock... in a knee-height wall. Their purpose isn't to keep out someone who really wants to get in, but to keep anyone from claiming that they just didn't know they were on private property, and to keep very small children away from pools and other possible hazards.
* school snob, when she gains the name of "Foal Free Press" editor-in-chief, she blackmails the Crusader Trio to write more embarrassing stories about most of the show's cast, or else she'll post private photos. At the end, after the trio write an apology to their victims, Diamond is finally punished by being kicked out of the chief's chair.
* Schools often employ this tactic to keep students under control in chaotic classrooms, much to the chagrin of well-behaved students. It's become something of a
* School's Out! The Musical" sung over a scene of him skywriting "I LOVE YOU RHONDA." Wanda just shrugs it off.
* School's Out! The Musical, Timmy Turner has a watch with eight "hours", seven of them being "play" and one of them being "work".
* School Spirit begins with the central character running a Trojan Gauntlet that ends with him dying in a car crash and coming back as a ghost.
* School Sport Uniform: A uniform worn by students on the school sports teams.
* school student got elected President, the joke-tellers went meta and started considering Vovochka anecdotes political jokes.
* School Study Media — Poetry is often taught in grade-level language arts classes.
* School Supervision text to turn a group of vampires and werewolves into top-level Others with a perfectly gray aura (neither Light nor Dark).
* School Swimsuit: swimsuits that are given to students on the school swim team.
* Schoolteacher Benjamin Heath Malkin (1769-1842) of the Suffolk village of Bury St. Edmunds, an acquaintance of
* Schoolteacher Melissa Mailey and Dr. James Nichols. Both are in their late fifties at the time of the Ring of Fire, and they're both pleasantly surprised to find that they haven't... lost the capacity for enjoying each other. Which they do. On a regular basis. It's a mark of Melissa's
* school their children at home do so because they perceive public school as un-Christian or un-whatever their religion/worldview is. It's also possible for Christian parents to give their children a complete Christian education, all the way from pre-school to Ph.D. Many evangelical Christian schools and their associations market themselves as a moral alternative and a refuge from the cultural influences present in public schools.
* School Ties is set in the fifties, as evidenced by the 'uncivilized' rock music the kids listen to (that to a modern ear sound extremely boring, but to their contemporary audiences were quite wild). Also there's the rampant antisemitism for that special period touch.

* School Ties starts a brawl in the school shower, his hate directed towards Brendon Fraser's character in one of many racially-charged conflicts in the movie.
* School uniforms. Altering or adapting them is a long-standing tradition. Some schools do not have a uniform as such, have rules about what colors you can wear instead, eg: red top and green pants. Or vice-versa ("Boys must wear a dress shirt and tie", color left to choice). Some schools are more strict about the uniform but allow the students to accessorize using badges and insignia. For example a student might wear a school badge, a club collar pin, and another token denoting a student officer (student council, class representative, student first aider, school librarian, etc) from armbands to sashes. Enterprising students can use this to bring this trope into play.
* School Uniforms Are the New Black: A student who wears their school uniform even when they aren't attending school.
* School. Uniforms. Would. Make. Us. All. Look. The. Same." in creepy "cult member" fashion.
* School Waltz: Zolya sneaks Gosha into her family's apartment for some post-graduation sex. Naturally, she turns up pregnant. A shocked Gosha dumps her.
* Schoolyard Bully All Grown Up: A character's childhood bully has grown up and is still a mean person.
* Schoolyard Bully All Grown Up: I love tormenting everyone even when I'm an adult!
* Schoolyard Bully All Grown Up: That one mean kid who tormented you during childhood, who became an even nastier adult.
* Schoolyard Bully All Grown Up: The school bully is now an adult, but still a mean person.
* Schoolyard Bully All Grown Up: When a mean kid grows up to become an evil adult.
* Schoolyard Bully All Grown Up, who went from dealing out potentially crippling injuries to guys in the ring to dumping a plate of food on some guy at the buffet table backstage and mocking him about it.
* Schoolyard tag can result in some hilarious rules. The most basic rule apart from "touch someone else" is "
* School Zone has Rei, who's a rare female example. While the school requires girls to wear neckties as part of the uniform, Rei doesn't wear hers. Possibly as a result of this, she's utterly hopeless at tying it when she has to wear it to a school assembly, forcing her best friend Kei to help her.
* School Zone that she doesn't have friends. It's just that everybody has people they like more than her.
* Schottenheimer would soon take up head coaching duties with the Chargers in 2002. San Diego made the playoffs under him for the first time in 2004. They would lose to the Jets on a missed field goal from Nate Kaeding. In 2006, the Chargers finished the season at 14-2...and then lost to the Patriots in an AFC Divisional game. What made this loss really sting was that the Chargers had an eight-point lead when safety Marlon McCree intercepted Tom Brady...
* Schroder features a six-year-old, Meadow, asking her father if she can marry him when she grows up. Her lack of understanding of adult relationships is emphasized when she also asks if she can marry one of her female friends.
* Schroeder considers putting in a transfer to a new comic strip in a
* Schroeder, introduced in early 1951 as an infant, within a year became first a toddler piano prodigy, and then not only fully verbal but apparently the same age as Charlie Brown, Shermy and friends.
* Schroeder, well-known for his love of the piano and Beethoven, has this dynamic not with a specific character, but rather with anyone who plays the
* Schroedinger's Cat. And we never do find out what "No Wife, No Horse, No Mustache" is all about.
* Schrödinger's Butterfly: In a story about dreams, it's ambiguous whether some things were real or dreamed up.
* Schrödinger's Butterfly: Stories where it's never completely clear whether everything is real or not.
* Schrödinger's Canon: A spinoff or adaptation meant to be canonical ends up conflicting with the actual canon, so it's treated as simultaneously canon and not

canon until (dis)proven.
* Schrödinger's Canon meant to be canonical has discrepancies with what is shown in the actual canon, meaning there's no choice but to treat it as simultaneously canon and non-canon until more information is given.
* Schrödinger's Cast, as the fanfic began before the original work killed the character, and continues with an active (but dead in canon) character.
* Schrödinger's Cast: The adaptation has to work around a plot point dependent on a character who was killed off remaining alive or a character still alive in the adaptation having to die.
* Schrödinger's Cat thought experiment was actually made by him as an absurd scenario to point out the flaw with the Copenhagen interpretation of quantum mechanics, which claimed that two systems (such as two subatomic particles) which interacted but then separated would each have to be in a non-definite state until observed. Schrödinger thought this was silly and so came up with a scenario so absurd that it would show the flaws in the Copenhagen interpretation. His scenario was that if you locked a cat in a box with a gas vial of poison that would be smashed upon the decay of a radioactive isotope, then left the box closed and unobserved for a half-life of the isotope, the isotope would be in a superposition of being (i.e. "both or neither") decayed and not decayed, the gas consequently in a superposition of being released and not released, and the cat in a superposition of being both alive and dead. Many laypeople today know Schrödinger's name only from this thought experiment, and assume that he believed (or perhaps even "proved") that quantum mechanics meant that you could have a cat simultaneously alive and dead, when in fact this was intended as an absurd implication of an interpretation of quantum mechanics that Schrödinger wished to discredit. Moreover, a few experiments have placed particles or quantum-scale systems in situations were they do genuinely appear to be in two states simultaneously.
* Schrödinger's Cool, in which you ponder whether something that may or may not exist would be cool, but invariably, if you try to find out, it's not cool.
* Schrödinger's Player CharacterThe game offers multiple characters to choose from with various backstories, but only the character you choose as your PC ever appears in the game.
* Schrödinger Station, is to find out if Gershwin 610 B could become a new habitable planet for humanity.
* Schtolteheim Reinbach III. Like Snowe, he wants to help people. However, he at first simply asks daddy for help. However, he quickly realizes his father to be useless and leaves him, joining you in your quest. While a bit foppish and narcissistic, he is a truly good character and will fight with you, being skilled in sword fighting and magic.
* Schtonk!, the satire about the faked Hitler diaries, the counterfeiter is sitting at his work while wearing an old Wehrmacht coat. He has a fever, and his sweaty hair sticks to his forehead. Then he spills some ink, cleans it up with his handkerchief, sneezes, cleans his nose and unwillingly leaves a spot looking like a Hitler moustache. And then, his partner in crime comes in and tells him that people want proof that the diaries were written by no one but Hitler himself. Cue the counterfeiter looking into a mirror.
* Schulz also disliked the short-lived character of Faron, Frieda's pet cat who never walked and was always being carried and only appeared as a regular across a few months in 1961. This was partially because Schulz couldn't draw cats very well, but also because Snoopy didn't speak in words, so the only way to have him interact with Faron would be to have them
* Schulz has also claimed he personally likes the music of Brahms better than that of Beethoven, but made the latter Schroeder's idol because "Beethoven" is a funnier word.
* Schulz said, after drawing the last strip, that he'd just realized "that little round-headed kid is never going to kick that football", we can presume the ball remains unbooted.
* Schumacher's career after he returned to the sport after retirement. The most race wins in

* Schußjäger ("Shot Fighter") was related to Stockel's insane creation: the craft had an explosive nosecone which the pilot was supposed to fire into the nearest bomber formation, before it would explode, leaving the aircraft to crash and the pilot to bail out. Again, "safely". No prototypes flew before the war's end.
* Schutzstaffel (literally, weapons SS) were the military wing of the SS, with a separate command structure from the Wehrmacht. However, they were subject to the Army High Command while in the field.
* Schutzstaffel (SS) troopers working in 1941-2 to execute "undesirables"
* Schwa, but he reopened Schwa a year later, and kept on going. He is practically the face of Doing It For The Culinary Arts.
* Schwarzerblitz for a TV show, and suddenly released when said show flopped.
* Schwarzerblitz: his face keeps on oscillating between all possible features, resulting in a blurred image (portrayed in-game as a featureless black face with white eyes).
* Schwarzer Jäger Johanna (1934), in which Marianne Hoppe plays a woman who joins the Black Brunswickers during the Napoleonic Wars to follow her loved one.
* Schwarzesmarken pilot who defects from West to East Germany at the start of the series.
* Schwarzesmarken: This is practically the theme of the entire series. Taking place in an alternate timeline where Asia acquired an army of alien bioweapons (with no context as to whether or not Asia survived), the armies of East and West Germany are still at civil war with each other by the division made from their factions, and are willing to greatly decrease humanity's chances of survival (and even their own) if it means that they can send their rivals' entire armies into a meat grinder of Eldritch Aliens.
* Schwarzfahrer her obviously racist story ("That's the stupidest excuse I have ever heard!"), so he takes her off the tram. None of the other passengers, who were silently listening to her antics, intervene.
* Schwatz was originally the cop killed during the robbery instead of Bosko.
* Schway, a frequently-used compliment, may be derived from the Mandarin word
* Schwedentrunk, substituted nastier substances, such as boiling liquid, urine, excrement, liquid manure or sullage (waste-water) for regular water.
* Schweigt stille, plaudert nicht, although written and classified as a cantata, executes as a comic operetta, and is often performed as such; staging, costumes, the whole nine yards.
* Schweigt stille, plaudert nicht to make sure whoever she eventually marries allows her to drink it.
* Schwein! — Almost-English stock insult, essentially saying Swine. Note: In contemporary German this is about as (in-)offensive as calling someone a "scoundrel".
* Schweinhund — translated "pig dog". Might also be a compliment for especially resilient people.
* Schwerer Gustav and Dora. Two 80-cm rifled artillery guns, each weighing over 1000 tons and firing 7-ton shells. They required twin sets of parallel train tracks to even move around, which sometimes had to be built in front of them. They were designed to be used against the Maginot Line, so they were rendered irrelevant very early in the war, but they each actually saw action in the Soviet front. However, the enormous cost of building, arming and fueling the guns was way out of proportion to the amount of damage they ever did. Still, the guns were arguably useful as some targets in the Siege of Sevastopol were invulnerable to all other types of artillery besides the enormous 800mm guns, such as the "White Cliff" ammunition magazine located 30 meters under the sea, with at least 10 meters of concrete protection. As such they could be said to have played a crucial part in bringing a siege that was tying up valuable units needed elsewhere to a quicker conclusion.
* Schwerer Gustav was a heavy artillery piece which needed double tracked railroads to support its weight, with 2500 people setting up the tracks. Once it was in position it would launch 800mm 7.1 metric ton shells to a position over

37000 meters away.
* Scialla comes from Luca getting caught on camera stealing some drugs from the house of a big pusher... That had invited him and the gang he was part of to his home.
* Science Adventure Series being the best entry in the franchise so far.
* Science Adventure Series controlling various enemy factions that the protagonists fight.
* Science Adventure Series occur in the same universe. These stories take place several years apart from each other, though there are several scenes in each that make references to the others.
* Science Adventure Series On the surface and in terms of execution, they lean more on the fantasy side compared to the other Science Adventure entries, though the explanations for them are more in the realm of Science, as they rely on quantum physics such as the Dirac Sea and antiparticles to justify why they work the way they do, instead of just being handwaved by an explanation such as "it's magic".
* Science Adventure Series who plan to reduce humanity to a population of one billion and unite the remainder under a single totalitarian government. Although they are directly responsible for Project Noah, Project Mars, Project Atom and Sern's Z-Program they only act by proxy and are never shown or identified.
* Science and Futurism with Issac Arthur, a running gag whenever Isaac discusses military applications of future technologies is *every* rule is the First Rule of Warfare.
* Science and math-based artist Robby Kraft composed a face from various inanimate objects resembling faces, i.e. pareidolias.
* Science and mathematics in particular suffer from this. Entry level science and maths is still classical in formulation, teaching children Euclidean geometry, and Newtonian physics, and basic evolutionary theory (except for some parts of America that is where even
* Science and Sorcery is revived who was created by one of the good mages that had imprisoned them to stop this with help from a police officer in the US.
* Science Askew is the Antichrist or Satan, if you take the phrase CUTE PURPLE DINOSAUR (since that's what his fans call him), then convert U to V and cut everything that isn't a Roman numeral, then the sum of the result (C+ V+ V+ L+ D+ I+ V) is 100+ 5+ 5+ 50+ 500+ 1+ 5 is 666.
* Science at the Speed of Plot (Groundbreaking discoveries of the universe only occur cause Plot)
* Sciencebots and make others into drones. There was also that monkey Primacron who built Unicron's G1 cartoon-verse body.
* Science Cannot Comprehend Phlebotinum: The writers make something seem especially interesting by stating that science cannot explain it.
* Science can resurrect someone if their head (brain) is intact, but there are many possible side effects, like memory loss, insanity, and some sort of "cascade effect that normally sets the lab on fire." Later on, it's revealed that, if the one operating is an expert, one can be brought back from death even without an intact brain. However, the end result is just a body without a true mind, essentially, a
* Science Dog. It seems the character went from being a scientist to a wizard.
* Science Fair: A school event where students prepare science projects.
* Science Fantasy And it does have everything on the list, even the evil cults monopolizing all religion (provided you remember the Imperial Cult is the lesser of who knows how many evils).
* Science Fantasy, as "classical" fantasy stories are inspired by mythology, and therefore never give any explanation for why the magic works the way it does. Again, in Science Fantasy, the setting is inspired by science instead.
* Science Fantasy. Mars is revealed to be the prison of Lucifer himself. After awakening, he conquers and destroys humanity's interstellar empire until a mysterious alien Titan leads the remnants of free humanity in destroying his physical form, but civilization is left in ruins. The remnants of Lucifer's empire fight each other for control of the martian surface, while the Titan's followers

(as well as those who just don't want to be ruled by the Luciferan Church) live mostly in orbit in the dead Titan's hollowed out skull and other scattered colonies.
* Science Fantasy's core world of Golarion has an artificial race called androids who are created by technological rather than magical means. Their mysterious origins lie in a gigantic spaceship that crashed into the planet about 8000 years ago, carrying with it a number of high-tech forges in which new androids are created (androids, as an artificial race, are not born, but rather built and “activated” as adults). Not much is know of their pre-crash history, save that they had been created as laborers by an advanced race on another world until they won their right to be treated as people by their creators.
* Science Fantasy state of sex, unaware of its modern meaning. Lewis also coins "trans-gastronomic" for how the digestive system will be made to bring life while going beyond its current form.
* Science Fantasy. The only hope humanity has is various monster hunters.
* Science Fell in Love, So I Tried to Prove it and charting how often one appears in the other's dreams and what they were doing.
* Science Fell in Love, So I Tried to Prove it and try having an amusement park date that ends with just the two of them in a Ferris Wheel cabin.
* Science Fell in Love, So I Tried to Prove it focuses on graduate students
* Science Fell in Love, So I Tried to Prove it: One of the typical couple situations tried out by two characters trying to scientifically prove they are in love with each other is drinking from the same glass with intertwined straws.
* Science Fell in Love, So I Tried to Prove it that feelings like love aren't bound by logic or reason.
* Science Fell in Love, So I Tried to Prove it, Yukimura is shocked that Himuro looks 2.34 times more beautiful in a bikini.
* Science Fiction above. The whole set-up is automated, though discrimination still continues with the Negro population being used for the cleaning and maintenance crew. During the subsequent war, sabotage—or just destruction from atomic bombs going off—causes the whole city to collapse into a massive trench.
* Science Fiction and if they indeed are alien, it makes the story one of the first examples of this trope.
* Science Fiction, and tells his story to a writer who unsuccessfully tries to sell the story to a newspaper as nonfiction.
* Science Fiction, a semi-autobiographical novel about a Polish doctor trying to survive the Nazi occupation of his (and Lem's) homeland. (This will frequently be found in the "Science Fiction" sections of libraries and bookstores, despite containing no sci-fi elements whatsoever.)
* Science Fiction author L. Neil Smith falls under this. In fact, he has explicitly stated that he writes mainly to entertain those already having an anti-state worldview.
* Science fiction authors and futurists have speculated that if we ever start building space colonies and making long-duration manned spaceflights, bamboo would
* Science Fiction by being much simpler and potentially more reliable than those other sci-fi weapons (a reasonable extrapolation to make from the real world, where it's already over a hundred years old, pretty outdated in some ways, and yet still in common use even - or perhaps especially - among special forces that have every right or reason to carry more modern kit).
* Science Fiction could, however, be considered a reincarnated version of this genre.
* Science Fiction Favorites", Dr Asimov chooses to include a haunting voice and reedy tone when voicing the Bard (a mechanical storytelling machine). This intonation is not clearly described in the text.
* Science Fiction has Nell's "sisters", or "Mouse Army", a group of soldiers/engineers/political leaders that finally becomes a new sovereign.
* Science Fiction have the ability to scoop fuel from one of these two objects, even if they lack the ability to scoop up the (much thinner) interstellar medium. Sure, it's risky to dive through a Jupiter or a Sun in this manner, but it's

cheaper than paying at the pump.
* Science Fiction/Horror writer Jack Butler lost his wife to cancer, but 20 years later still talks about being married in the present tense. In a magazine interview, he once told a story about how his oldest daughter tried to get him to date again, and how he couldn't understand why she didn't get the concept of "married."
* Science Fiction novel "Limbo" by Bernard Wolfe is about a post-WWIII world where people willingly amputate their limbs for nuclear-powered prosthetics.
* Science Fiction. One boy is so off-the-charts smart that he gets bored with the whole thing by the age of five and hides by shutting down most of his intellect and reprogramming himself with a completely different persona. When a galaxy-threatening danger piques his interest enough to bring him out of hiding, he's so insufferable that his comrades wonder if it's worth it.
* Science Fiction sitting at his kitchen table with a slide rule, pencil and graph paper trying to work out how fast his spaceships would be moving and how much fuel they would need.
* "Science fiction's masterwriter at his most exciting!" — 1969
* Science Fiction stories of all time - chosen by the masters of science fiction"
* Science Fiction story released in one of Asimov's anthologies had people suddenly going catatonic because the new invention of TV stored a memory for every frame shown on-screen, causing people to run out of storage space. The President, advised of the problem, held a live teleconference to warn people of the problem and froze up while watching himself on the monitor opposite him.
* Science Fiction than the Season 3 "Space Race" two-parter, complete with alien pirates, space gladiators, black holes, and its version of the villain Barry being a full killer robot with no human features whatsoever aside from having the same voice as the previous human Barrys. It was darker than Season 9, but lighter than Season 8.
* Science Fiction that James could be a woman, to be a lady named Alice Bradley Sheldon. The fact that she wrote many stories where gender took a major role did not help. George Sand, birth name Lucile Dupin, also qualifies.
* Science Fiction. The Olympic Games is still held but with cybernetic athletes. The United States, which has been winning every year, gets a nasty shock when it turns out the Eastbloc has been secretly developing more advanced prosthetics.
* Science Fiction Versus Fantasy: While there are many exceptions, science fiction (glorious future) tends towards Enlightenment, fantasy (glorious past) towards Romanticism.
* Science Fiction Video Games: A game that explores a concept that does not exist at the present time, but it someday might.
* Science Fiction Visual Novel, video phones are common. Luke is seen using a smaller version in his apartment, then a large-screened version that fills an entire room at his office.
* Science Girls!: Nicole, a member of the Science Club, but also on the track team, as narrated when she joins the party on entering the fourth floor.
* Science Girls!: When the player character enters the alien world, they remark on the "shifting discharges in the sky", and the sky is black.
* Science Hero caused the saucers to veer off course and crash directly into the nearest monument or historic building. So this is one case where the heroes actually cause more damage to their landmarks than the aliens do (unless you interpret it as the aliens deliberately aiming their crashing ships at the landmarks out of spite).
* Science Heroes, with little else changing from the previous example in terms of plot).
* Science Hero" Rick Brant, in the 1950s-1960s juveniles, had the 1934 World Almanac. The twist being that this weighty reference had been memorized in its entirety by the self-taught Indian boy Chahda, and it was Chahda's intelligence that made the seemingly outdated information so often incredibly useful to our heroes.
* Science Hero's Babe Assistant: A scientist's comely assistant, who doesn't do

much science.
* Science Hero's Babe Assistant has an attractive woman as an assistant.
* Science Hero: Science is seen as a force of good by the Enlightenment, while ignorance was seen by many Enlightenment thinkers as the root of all evil.
* Science Hero (since the show would often leave the door open to supernatural explanations that Mac himself refused to accept).
* Science Hero: The hero is a scholar who uses his scientific knowledge to fight evil.
* Science Hero: They can use their knowledge and expertise to help defeat their enemies.
* Science in Genre Only" are three stories about what happens when you drop a ridiculous fantasy alien into a normal-world setting.
* Science Is Bad: Forget advancing technology, it only makes things worse.
* Science Is Bad — Science is inherently unharmonious, and thus bad.
* Science Is Bad: The story has the moral that scientific progress is evil.
* Science Is Bad: The work has the moral that scientific progress is evil.
* Science Is Bad: While individual Romanticists' attitudes towards science may vary from simple caution to outright rejection, Romanticism in general is characterized by a very skeptical attitude towards scientific progress and the change it brings, or rather the utopian idea of science the Enlightenment possessed.
* Science Is Good. In real life, academia and mainstream media tried to be encouraging of studying science, as well as explicitly advertising it to various demographics. However, there was something of a fight between actual scientists, who had funds cut, and anti-science politicians and activists, who saw pure science as having failed in its promise to innovate and improve society.
* Science Is Good: Science as a whole is portrayed in a positive light. The only real bad from science is simply the abuse of it for selfish gain, but the good that science brings should never be overlooked, especially if responsible use of it benefits all of society.
* Science is just another form of magic, with a vast, well-armed conspiracy to ensure that people disbelieve in anything else. That disbelief makes it difficult and dangerous to use magic, especially in public. Based on Post Modernist ideas, the writers had intended players to believe that it wasn't just the Technocracy that was wrong, it was the scientific method itself.
* Science Is Useless: Hard work is seen as better than science/technology.
* Science Is Useless: The legend of John Henry from the mid-19th century: man with sledgehammers digs a tunnel faster than a steam-powered drilling rig and dies.
* Science Is Wrong: Romanticism saw science and logic as inferior to emotion, and therefore science alone would come to wrong conclusions.
* Science journals often shorten the list of a paper's authors to the first X names (usually 1, 3 or 6, depending on the journal's citation style), adding
* science marched on, it was discovered that many dinosaur species were covered in downy feathers that could look fairly fur-like.
* Science Marched On, more than a few resemblances proved superficial ...
* Science Marched On to have inherited a special genetic trigger. Bruce, his relatives, and a few others are all descendants of the original carrier. The guy who discovered said trigger found a way to copy it and used it to become a Gamma mutate too.
* Science Marches On and even if the testing was done with one chirally pure form, some of it would have converted to the other enantiomer as soon as it was taken). This is also the case with the cancer-fighting drug Platinol, which only causes sickness because scientists can't separate the helpful enantiomer of the drug from the toxic one, so it's sold as a mixture of the two (any mixture of both enantiomers of a compound is called a racemic mixture).
* Science Marches On (and later adaptations make their technology more formidable), but the tripods really aren't that impressive to anyone with a 21st century understanding of engineering. Their main advantage is being fast enough to dodge a torpedo, but get taken down by the boat that fired them. The fact that they have only three legs would logically make them pretty structurally unstable, too.

* Science Marches On Hastings suggests that an insensible man is suffering from brain fever, to which a doctor character responds: "No such thing as brain fever. An invention of novelists."
* Science Marches On mammals and that anyone who thinks they are is delusional. The extent to which this is supposed to be tongue-in-cheek—if at all—is left for the reader to decide.
* Science Marches On mentioned below: the great Siberian rivers dwarf the Central Asian ones, and even a small percentage of their flow equals both the Amu-Darya and Syr-Darya.
* Science Marches On: Scientific facts presented as true in a work are later proven incorrect in the real world.
* Science Marches On seems to have been the gamechanger where dinosaurs were as much a source of awe and delight as fear and even the T-Rex coming across as a dangerous but majestic beast more than a mere killing and eating machine.
* Science Marches On, some of the cat's behavior is inaccurate. For example, cats are actually more social than was assumed in the 1980s.
* Science Marches On. There is an animal race in the books called an Ostrosaurus, which is not a dinosaur but "a large featherless bird." According to modern paleontology, birds are dinosaurs.
* Science Marching On: In the years after the original Clone Saga, scientific research indicated that human cloning wasn't possible and so the retro-virus retcon was meant to cover for that. But then Science Marched On again and human cloning was back in the realm of possibility, so the High Evolutionary retcon was thrown in to undo the earlier retcon, resulting in everything becoming needlessly convoluted and ultimately, it never needed to happen in the first place—was scientific accuracy really that important in a story that stars people with radioactive spider powers?
* "science monsters" gimmick and claiming to have "The Best Hair in Wrestling."
* Science Ninja Team Gatchaman AKA G-Force AKA Eagle Riders gives us two in Ken The Eagle (who is named Ace in G-Force) and the man known as Red Impulse.
* Science Ninja Team Gatchaman always dresses in purple, unless he's in an outright disguise.
* Science Ninja Team Gatchaman, Berg Katse is presented as the face and leader of Galactor. The viewer finds out long before the characters that Sosai X is the true power.
* Science Ninja Team Gatchaman, but even that only covered 65 of the combined 100 episodes.
* Science Ninja Team Gatchaman but in the 2013 live-action adaptation, he is again George/Johji Asakura.
* Science Ninja Team Gatchaman, created in 1972, is set in or around 2000. Yet the computers use punch tape and magnetic tape; tape recorders still exist; microfilm is still in use; there are no space shuttles (but there are moonbases and space stations); nobody seems able to track submarines.
* Science Ninja Team Gatchaman ends with the team preventing Leader X from destroying the Earth. Berg Katse doesn't take it well.
* Science Ninja Team Gatchaman episode "Jumbo Shakora, the Ocean Devil King". It's the bad guys, launching from their latest mecha.
* Science Ninja Team Gatchaman episode "Web of Danger", Ken and Joe hang on the back of a car to secretly follow Dr. Nambu to a meeting with a... friend.
* Science Ninja Team Gatchaman fall under this heading. By extension, enemy bases on the Americanized versions.
* Science Ninja Team Gatchaman features the Ninja Art: Tornado Fighter technique, wherein all five members of the team stand on each others shoulders and spin around, creating a whirlwind powerful enough to knock everything in the room down.
* Science Ninja Team Gatchaman Galactor bases and mechs are no better: They fit the waist-high rails and deep pits to a T, usually, and blow up if looked at wrong. (A bit of exaggeration, but not much.)
* Science Ninja Team Gatchaman had an episode take place in a baseball stadium. As usual, Galactor gets involved.

* Science Ninja Team Gatchaman has Jun, who has not only green eyes but green hair as well. Averted in the OVA version, however (though they had initially considering making both her hair and eyes blue).
* Science Ninja Team Gatchaman has Ryu the Owl quitting the team in shame after his mistake puts them all in jeopardy. Problem is, he was the only one who could flawlessly pilot the God Phoenix, and when Joe takes over for him he proves to be epically bad at it. Thankfully, Ryu overcomes his shame and rejoins the team at the end of the episode.
* Science Ninja Team Gatchaman: It showed up as soon as the first episode. It was a large circular room with a big round central table surrounded by chairs, and huge world maps on the table and on monitors attached to the walls.
* Science Ninja Team Gatchaman: Jinpei got a few of these, usually after saying something stupid or smart-alecky.
* Science Ninja Team Gatchaman: Jinpei, the only child on the team, certainly has a way with other children.
* Science Ninja Team Gatchaman Joe Asakura falls for one woman while on the racetrack who ends up being a Devil Star in disguise. He ends up killing her in a showdown as Joe the Condor being unaware of her identity and is heartbroken when she doesn't show up later for a race they had planned. Just to rub it in further, it is revealed much later in the show that the woman was the fiancee of his priest childhood friend Alan.
* Science Ninja Team Gatchaman. Not only can it fire bullets or a hookline from the front, but also has a large weighted hook on the back and the gun can fire backwards. Joe will often use this to hit enemies that sneak up behind him. In one instance, he tricks someone who knocks him down, steals his gun, and tries to use it against him to kill himself by switching the triggers beforehand. Ryu the Owl carries a much smaller, normal one as well.
* Science Ninja Team Gatchaman of fuel. So, the effect is only used in comparatively few episodes.
* Science Ninja Team Gatchaman One of the oldest examples, possible the first place where the team dynamic and combining mecha intersected.
* Science Ninja Team Gatchaman spends the first series with serious hate for Galactor. When he was a child, his parents were murdered by a Galactor assassin — who then tried to kill him.
* Science Ninja Team Gatchaman starts out as a stoic and clever leader with nerves of tempered steel, but he becomes more reckles and unhinged as the series progresses and personal losses pile up on him.
* Science Ninja Team Gatchaman The good guys' uniforms are about the same, right down to the bull's-eye insignia.
* Science Ninja Team Gatchaman: Unlike his teammates, Joe "The Condor" Asakura has a very personal reason to fight the Galactor organization, since they took his parents' lives and almost took his.
* Science Ninja Team Gatchaman until they had to explain away later episodes.
* Science Ninja Team Gatchaman, were produced after the death of original creator Tatsuo Yoshida.
* Science Ninja Team Gatchaman; while he acknowledges and admits to his feelings for Princess, he won't act on them because of duty.)
* Science of Discworld books, the wizards of Unseen University examine "Roundworld" (i.e. Earth) and are surprised to learn that it contains no Narrativium — this being scientifically impossible (by Discworld standards).
* Science of Discworld is, in part, a comedy version of our own universe's origin-story. The wizards compare the progression of events in Roundworld to several Disc creation myths, mostly while grousing that our world is doing it all wrong.
* Science of Discworld series, where the wizards know it as "Roundworld".
* Science origin. For Professor Backfire, gaining superpowers was an inevitability.
* Science popularizer Neil DeGrasse Tyson has been known to fall in this pitfall from time to time. It makes sense when discussing a science fiction movie's portrayal of space travel, but mentioning
* Science-Related Memetic Disorder: A made-up psychological disorder that makes you

both smart and insane.
* Science-Related Memetic Disorder: Mad Science as a medical disorder.
* Science-Related Memetic Disorder: The trappings of science portrayed as a psychological compulsion.
* Science-Related Memetic Disorder: The trope namer was a meme virus that turned people into mad scientists, though most examples treat it as a more biological mental disorder.
* Science's tendency towards zeerust depends on how fundamental each discipline is. A book on physics from 20 or so years ago will still be fairly useful today; less so anatomy or chemistry. Astronomy and paleontology, on the other hand, should be considered instant zeerust.
* Science teachers sometimes keep their lunches in the laboratory refrigerator, alongside the frogs, rats or fetal pigs used for dissection studies. If there's no room in the teachers' lounge fridge, they figure it's better than doing without their yogurt or tuna salad.
* Science. Through systematic investigation of the nature of the universe, this enterprise has made possible achievements which would be unimaginable in earlier ages, from the miracles of modern medicine to space exploration to
* Science Vessel: Rare, though it's mentioned as one of the many, many uses of Corellian Corvettes. The Jedi Order built multiple praxeum ships, serving as mobile academies in a variant of this trope. The most famous was the
* Scienceville: A place is best known for producing scientists and other thinkers.
* Scienceville: A town, district or city well-known for its professional thinkers.
* Science vs. Pseudoscience. With there only being sufficient tools, evidence, and methodology to distinguish one from the other starting (in earnest) in the 19th century, the victory of the former is still appearing rather far off two centuries later (as every horoscope and an even cursory browsing of the very large number of pseudoscience websites show).
* Science vs Science (in cases where a new theory is highly unpopular but can't be dismissed such as String Theory, and, humorously, the caustic friendship between physicists and mathematicians).
* Science Wizard: This is a scientist who is also trained in the mystic arts.
* scientifically, being used in English as far back as the 17th century, though it has become much more common in recent decades. Funnily enough, even when BCE/CE is used by those who wish to avoid tacit approval of Christianity, it's a superficial change only, as all the dates are still based on the (traditional) birth year of Jesus Christ. It has just been in use so universally and for so long that Western Civilization is kind of stuck with it. Attempts to do away with it generally fall flat (see "the French Republican Calendar" below, as part of an attempt to completely dechristianize French society).
* Scientific American. Dr. Matrix, an agent for the CIA, was disguised as an Arab named Abdul Abulbul Amir in order to assassinate a KGB agent named Ivan Skavinsky Skavar. They dueled on the shores of the Black Sea, and fired simultaneously; Ivan died instantly, but "Abdul" was only knocked out, and the CIA paid two natives to confirm his death.
* Scientific American got in on the game as well: "the localized knowledge and know-how developed with untutored experience in particular everyday settings and activities—the so-called school of hard knocks"
* Scientific evidence suggests that this may now be on its way to being a
* Scientific Race: the "Erudite Explorer" AI personality, the Lokken Mechanists and the Voor Technocracy preset empires, and the Keepers of Knowledge
* Scientific studies show that people view members of the opposite sex more favorably depending on the color of their clothes. Women view men with the appropriate color as more powerful and successful, while men see women with said color as more sexy and interesting.
* scientific under the belief that there was some scientific validity to the paranormal.
* Scientist and doctor Nikolay Drozdov (mostly known in the country as the narrator for “In The World of Animals”) for the Russian dub.

* Scientist/cultural analyst Jacques Vallee once investigated an abduction very similar to Travis' which had happened near his home town in France. He discovered it had been staged by the French equivalent of the CIA as a social experiment. He thinks this has happened more than once, and is not connected only to government agencies. He also believes there are real UFO sightings and "aliens", but they are not from outer space but are "multidimensional across space and time". Vallee inspired the character of Claude Lacombe in
* Scientist James D. Watson once dreamt of a series of spiral staircases. This gave him the idea for the structure of DNA.
* Scientist Rids the World of the Evil Curse of the Vampires) has all its songs named in this fashion.
* Scientists are treated like crap in their society novels show how difficult it is for a doctor and an engineer (both of whom are women, although that is irrelevant in Klingon society outside of politics) to make significant changes in Klingon society due to social taboos.
* Scientists, as an experiment, take two groups of people. The first is a hundred men and one woman, the second, a hundred women and one man. Each group is put on an uninhabited island, and left alone. A month later, the scientists check how the societies developed. Island one: the woman is sitting on a throne, proud as a queen. The men are around her, serving her every whim. One guy, handing her a drink, accidentally spills it. The woman says "Number 14, you are 83 now". Island two: The man is sitting on a palm tree. The women are trying to shake him off.
* Scientists at the University of St. Andrews in the United Kingdom were able to create a tractor beam, although at a microscopic level. This can have many applications, like for medical usage.
* Scientists constantly discuss the limits of where life could develop, but the reality is that those limits only apply to the kind of life we're used to. Technically, as long as there is enough chemical diversity as well as an energy gradient, there is the potential for what could be defined as life, regardless of temperature, specific chemical environment, or gravity. This could mean some really bizarre lifeforms are waiting out there.
* Scientists discovered that there is a special nerve that connects human eyes to their bottoms. Proof? When the test subjects were stabbed in the buttocks, they cried. And when the test subjects were stabbed in the eyes, they shat themselves.
* Scientists found a rare left-coiling snail they named Jeremy. Because its shell coiled counterclockwise, the opposite direction of typical snails, its sex organs could not align with others. Two other left-coiling snails were found but they proceeded to mate with each other instead of Jeremy.
* Scientists have calculated that the minimum amount of force necessary to completely blow up a planet with the mass and size of Earth would be nearly 60 quadrillion megatons of TNT
* Scientists have created a thief-catching robot and took down to testing it in different countries. In one country it caught a hundred thieves in a week. In another - two hundred. In [Punchline Country] the robot got stolen in a day.
* Scientists have discovered dolphins use lower-pitched, slower sounds when they're interacting with humans, which suggests that they have realized we can't physically hear the range of sounds they use to interact with each other.
* Scientists have recently been able to (sort of) send information using quantum entanglement at FTL speeds. Getting any information out of the process still requires a normal slower than light connection between the sender and receiver.
* Scientists have theorized that this might happen to the Earth one day: when the sun becomes a red giant it'll lose enough mass for the Earth to move away and not simply
* Scientists in Japan tried to program a robot that would be able to emulate human emotions, including love. Unfortunately, it became very overprotective of a female intern, trapping her in her
* Scientist speculate that life may exist on Jupiter's moon Europa where there may be a sea under the ice. If they do, they'll probably live very deep down, surviving off geothermal energy. Thus, they would possibly look similar to Earth's own

* Scientists sponsored by the United States, Britain, and Germany experimented on hundreds of African-Americans to reproduce the
* Scientists still know almost nothing about how eels reproduce. This is partly because eels change so much during their lifecycle that a single eel species may go through several phases that look like entirely different from each other and eels do not seem to develop reproductive organs until they are ready to use them. Eels in their earliest phase of life are only found in the Sargasso sea, so this probably means that eels, including species that normally are only found in freshwater, must travel a secret breeding location in the Sargasso sea that we haven't found yet.
* Scientists use a paralyzing agent to make spiders fall out of a tree in the film. Despite falling more than a hundred feet, the spiders survive. In the real world, that fall would have killed each and every spider; their bodies simply could not handle that much force.
* ScientistsWhose knowledge is useful, especially when exploring or dealing with the unknown. Often in the rear, probably in some super-secret military base doing research. Other times they're out in the field to test new technology, study alien stuff, or scanning the area. In battle, they may be in uniform and armed for defense. But more often they're defenseless and wear lab coats.
* Scientists who were asked to imagine what an alien world would look like, and what sort of creatures might inhabit it, agreed that a six-limbed version of a common land vertebrate wouldn't be too unbelieveable.
* Scientists will occasionally insert some snark into their research papers, as seen in the paper which introduced
* Scientist vs. Soldier: A scientist and a military person are at odds with one another.
* Sciezka/Sheska counterpart of Poland (or said Poland-counterpart could be part of Amestris).
* Sci-Fi and use it for everything from fast-forwarding in time to realizing what's about to happen.
* sci-fi anthology is only ten, 11-minute episodes long. Some fans like the brevity of each story arc, feeling they allow the plots to be succinctly told without overstaying their welcome and that they make recommending the show much easier due to the smaller time commitment. Others believe that 110 minutes' worth of episodes for each season results in the conclusions to each arc coming across as too rushed at times, and leaves far too much story potential with any given cast of characters unrealized.
* Sci-Fi Bob Haircut: Codified by the hairstylist Vidal Sassoon to implicate a futuristic feel of the Mod scene.
* Sci-Fi Channel. 10 contestants are released onto a playing field (called a "game board" in the context of the show). They are set a series of challenges, called "missions," for which they may earn "utilities" (see below). All the while, they must avoid being tagged by the show's resident hunters, more of whom are introduced onto the board as the game progresses; if tagged by the hunter, the contestant is "captured" and eliminated from the game, without winning any money.
* Sci Fi Channel focused on a team of researchers hired to discover the secret of the Bermuda Triangle. Their mission sees the team go above and beyond just finding out the truth as they eventually aim to destroy the anomaly that causes those who enter the region to vanish.
* Sci Fi Channel has gigantic sand worms accidentally awakened by a fire fight between soldiers and Taliban.
* Sci-Fi Channel in its SciFi edit. After this, SciFi dropped the show, whereupon BBC America picked it up...
* Sci-Fi Channel introduces two more Toruses (Tori?). One is identical to the first one, and one that looks the same but kills anyone in the vicinity.
* Sci Fi Channel in which the Earth of 150 years in the future has consolidated into six super-states:
* Sci Fi Channel is based around a series of about one hundred items called Objects that possess strange properties. Objects featured include The Key, The Pen, The

Glass Eye and The Bus Ticket.
* Sci-Fi Channel logo would appear in the bottom-right corner of the screen, often obscuring Crow T. Robot during the theater scenes. This was so annoying that viewers successfully petitioned Sci-Fi to move their logo to the other side of the screen.
* Sci-Fi Channel reruns. Yes, they had a pop-up ad (for another show) which included a sound that was taken from the show that was actually playing.
* Sci-Fi Channel's Ani-Monday block ran from 10 PM to midnight Eastern time. They adjusted it for time zones for the standard channel but not the HD channel, so on the west coast you could see it at 7PM, potentially averting the trope. It was relocated to Tuesdays in January 2011.
* Sci Fi Channel sequel it turned out he was cursed and became undead.
* Sci-Fi Channel, there is a brothel full of these. Explained as damned souls in prostitute bodies, they otherwise appear to embody all the stereotypical succubus traits, and even transform into large demonic forms at various points.
* Sci-Fi Channel to force it to give him some information instead of eating him.
* Sci-fi comics form their own little sub-ghetto, often being treated as being less 'worthy' than literary science fiction and movie/TV science fiction (which are themselves often considered lesser than literary science fiction).
* scified-up European broadsword, so whether the two are bright or dark is really up to interpretation.
* Sci-Fi establishments, but all a little different to avoid nasty copyright infringements. They have a "Cute Fuzzy Alien" card that looks an awful lot like the ones Kirk had trouble with...
* Sci-fi, fantasy, anime, and comicbook conventions. Outsiders see a bunch of strange people in strange garb doing strange things, but to people inside the fandom it's all perfectly normal.
* Sci-Fi featured a world where a percentage of the population had RAD or Rapid Aging Disease. It could be controlled and slowed with the drug Anzinol, and the 'clean' area infiltrators used Anzinol pumps. If a pump was destroyed, though, aging happened in seconds.
* Sci-Fi features Emmanuel and Birgitta. Emmanuel is a rancher and she was a German girl who would spend time in town and work for his uncle. After the uncle's death, she turns her eye on Emmanuel and makes their relationship very clear: recreational sex and nothing more. They have a happy affair for a while before she leaves for home and writes to announce her marriage. Emmanuel takes it harder than he should have and has to remind himself of what their relationship was.
* Sci-Fi for example it is used as a prison and offensive/defensive technique. Interestingly enough: ships in a stasis field are still able to float.
* Sci Fi Ghetto: The belief that science fiction/fantasy works aren't "real" literature.
* Sci Fi Ghetto: They assume that science fiction works have no artistic merit whatsoever.
* Sci-Fi have this. However, when they use nukes, the explosions are at least spherical and without a mushroom cloud.
* Sci-Fi Horror The purpose of this genre is to use horror to show how scientific knowledge can be used for evil ends, how cutting edge research can go horribly wrong, how crippling a lack of knowledge can be, or if you want to be campy how people get the bejeezus scared out of them in the future.
* Sci-Fi Name Buzzwords: Word components added to words to sound more sci-fi-ish.
* Sci-Fi novel "R.U.R." by Karel Chapek the (biological) robots rebel against humanity and exterminate them until there is only one left. When he begs them to tell them why they killed all the people, he is told they wanted to be just like us, and that is what people do.
* Sci-Fi, said monster finally made an appearance when she was standing on shore with the men... and she promptly started screaming like a little girl. One wonders what she would have done had she found it while in the water.
* Sci Fi Science. Dr. Michio Kaku discusses current technology and theories that would allow the creation of science fiction as reality. Justified in that

scientists look to science fiction as inspiration to recreate the entertainment they enjoy.
* Sci-Fi Science, though: that level of technology could easily make powerful guns which are more practical anyways. The main practical application of this would be as an extremely effective chainsaw that could cut through virtually any material, though at extreme danger to the user, but it's not as if plasma cutters are exactly safe to begin with.
* Sci-Fi's former Saturday Anime block: "This film includes graphic special effects (or some violent content). Parental discretion is advised." Mostly this was due to violence, even after editing down.
* Sci-Fi ships. So while frigates may look tiny compared to battleships, they are actually built on scale comparable with the Statue of liberty. This is most easily seen when entering the captains' quarters in a space station, and you can easily see how big they compared to humans. Its actually rather surprising they can only fit the drones that they do.
* sci-fi show and another character instantly decides they should kill him, doing so without a second thought.
* Sci-Fi. The reader, David Hewlett, simply laughed and playfully stated that he couldn't believe the audience caught onto that.
* Sci-Fi throughout the galaxies and try to defend the "cosmic code" from tampering.
* Sci-Fi was published in 1991 and set in 1994. It makes references to the Soviet Union (which would cease to exist at the end of 1991) and features the Strategic Air Command in a prominent role. The SAC would be abolished in 1992.
* Sci-Fi were both quite nice in-character and in-continuity parodies of the series, both written by Horst Hoffmann, who went on to announce his retiring from being a regular author.
* Sci-Fi Writers Have No Sense of Scale, a dense collection of extremely close asteroids that are somehow not merging together, despite the fact that at this sort of proximity they'd be well on the way to forming a new planet in real life.
* Scifi Writers Have No Sense Of Scale autonomy. Chances are good that hundreds, maybe thousands, of star systems within the Empire's borders watched it come and go without ever having known it was there.
* Sci-Fi Writers Have No Sense of Scale, Picard claims that the Federation is 8,000 light-years in size, but he doesn't specify whether that's its length or volume (the latter is suggested by the low number of planets he gives - just over 150). The Federation constantly running across new undiscovered civilizations in its own little section of the Alpha Quadrant forms the premise of the first two shows in the franchise.
* Sci-Fi Writers Have No Sense of Scale: Sci-fi writers make distances in space seem smaller than in reality.
* SciGirls: a spin-off of Newton's Apple that is a hybrid animated/live-action edutainment program in which it is aimed towards pre-teen girls.
* Scilons's "thought experiments" being to imagine clams "snapping open and shut! Open and shut! Open! Shut!" on a beach (I think it had something to do with perceiving the universe or thetans).
* Scimitars, Sabers and other curved swords: In Arabian or Pirate settings, this kind of sword is considered the "default" weapon and may be used by good and bad guys alike. Outside of those settings, however, it's almost always used by scary, intimidating characters or armies, following the logic of curved weapons detailed above.
* Sciomancy, Sciamancy: Communicating with spirits in a séance or channeling session. But this is often misquoted as shadow divination.
* Scion 1e, with the signature characters as the pieces and their divine parents watching the board.
* Scion 2e changes things up and adds certain capabilities; notably, God-born, the divine children of the Gods, are a viable character option, and forming your own pantheon is possible at Demigod level.
* Scion. A "Lesser Race" being who hunts fugitive Lesser Races out of a sense of

self-loathing.
* Scion, and if you're in there, it should be entertaining by sheer virtue of taking the fight to the enemy.
* Scion are all the mysterious islands and lost worlds described in mythology. You can't get to them unless you yourself are mythological (i.e., have a Legend score).
* Sciona sacrifices a minion. Deus uses potted bamboo plants to knock the artifacts out of the fields.
* Scion averts this, as a Scion can be the child of a human woman and god or the child of a human man and a goddess.
* Scion. Basically means that the Scion has read so much about stuff they can try them even if they have no training.
* Scion: Bron gives one of these to his army after the Heron army invades the Raven Kingdom.
* Scion can be whichever gender he or she pleases in the World, allowing a goddess to impregnate a woman or a god to become pregnant. One sample character, Annie X, is the result of Kali taking on male form.
* Scion certainly fit the bill: the Gods rose up against them because they were horrifically abusive and locked them away.
* Scion: Characters who have access to the Earth Purview have powers that range from being immune to harm from the earth to trapping people in crystals or altering the landscape at whim. At really high levels, you can control magma.
* Scion Companion book is the iGjallahar, based on the ancient horn of Nordic myth that summons the glorious dead from Valhalla for Ragnarok. It's a special cell phone that gets a signal anywhere because it transmits to a tower in the Overworld.
* Scion companion has a setting where you can play as a scion involved in WWII. Hitler is a mortal, not even a scion, who was given Odin's spear by Loki as part of an attempt to use fatebinding to rewrite the Norse legends so that Ragnarok doesn't happen. It should be noted that the Aesir, including Hel and Loki, were horrified when they discovered the Holocaust and its extent. The book states that upon learning what one of her scions was up to, that Hel created a "special" place just for him.
* Scion depressed to the point where he let himself be killed with 4 words.
* Scion. Even without it, characters use the same system as the World of Darkness below; so even a modestly intelligent character still probably speaks three or four languages.
* Scion, Fate can be overcome but is very powerful and some individuals and pantheons have been totally ensnared by it (the Norse for one).
* Scion: First edition used the Egyptian mythology variant with the Pesedjet (Egyptian pantheon) only Purview of Heku, which allows the Scion to manipulate the various parts of their soul to great effect.
* Scion focuses on the children of couplings between gods and mortals. In time, the characters grow so powerful that they become gods themselves.
* Scion. For example, Sisyphus, having managed to push the rock onto the top of the cliff thanks to a lucky break, has escaped Tartarus and received incredible power as per the deal with Hermes. Specifically, anyone with a Legend less than his can't hurt him at all. The text specifies that if he knows a person can't hurt him, he won't even try to dodge.
* Scion for physical sacrifices. The amount gained from bleeding another creature is half what you get for doing the same thing to yourself.
* Scion had preselected humans to give powers to, which would only awaken during a suitably traumatic event. Cauldron's formulas are stripped from Scion's partner, who is now dead. This makes their formulas a finite resource as well.
* Scion hangs a big lampshade on this with the rules for extras. Extras are red shirts in all but name.
* Scion has an Axis Mundi, something that links that Pantheon's Godrealm to the World that's tied to their myth or their people's culture. As examples, the Aesir use Yggdrasil to get between Asgard and any ash tree on Earth, while the Amatsukami use the Pillar of Heaven to get into the Overworld from anywhere that Japanese culture is strong.

* Scion has an Epic Appearance perk mentioned in the God rulebook, that allows the Scion to change everything about his/her body, including gender, and becoming a hermaphrodite. They're even fully fertile.
* Scion has a similar problem by the simple expedient of every scion looking like a vanilla human until they reach godhood (or buy Epic Appearance). While a knack exists to detect your fellow godlings (and gods), there are few means to similarly detect Titanspawn or other creatures of Legend so this can crop up fairly often in play.
* Scion has the character channeling their divine power through Birthrights — gifts from their god-parents. If someone were to steal a Birthright, they could use all the real owner's powers that it channels — but the chance of failure, and the penalties, are significant though, meaning most characters who try this end up dying to this trope.
* Scion. He's not invincible, but it takes so much to harm him that he might as well be.
* Scion, in the form of Deific Fatebinding. Here, Fate is the collective force of humanity's mythologies, narratives and stories about how the gods and other supernatural creatures work. Basically, the memes about the gods. In this setting, these memes can have a binding effect on the Gods, forcing the Gods to act in ways that conform to those memes. This is known as Deific Fatebinding. Whenever they do act in the world, the Gods therefore act in ways that are subtle and hidden from humanity, less the stories generated from open action Bind them to roles they don't want.
* Scion is an alien, the source of parahuman powers, and the cause of The End of the World as We Know It.
* Scion, is described as an attractive, naked wild woman with bird talons.
* Scion is largely based on actual myth, they also offer Atlantean deities as a lost pantheon.
* Scion is real. 2e's Companion gives advice on how to dial between one mythology being true and all myths being true for a setting.
* Scion of a group of Abrahamic-religion believers trying to rewrite all other religions into their framework, there is no other mention of it. Given the theoretical uproar if they tried to stat out Jesus, this is probably for the best.
* Scion of Sorcery is seen as primitive and regressive in comparison to the Masters of the Mystic Arts' teachings. Harry is especially critical of the housing system, making a point that it serves little purpose than to drum up arbitrary tribalism among the students and staff.
* Scion of Sorcery though, Stephen Strange is considered a hero by No-Maj Society and is an ally to Magical Congress.
* Scion of the gods are real, but some gods assume different aspects in different cultures. The Greek pantheon are the most notorious in this regard, also being the Etruscan and Roman gods in their other aspects.
* Scion of the Shredder", Raph has tired himself out fighting a few Foot Soldiers while escaping on an elevator. Then, just when he's catching his breath, more Foot Soldiers show up. His response? "You've gotta be kidding me."
* Scion once embraced the most common complaint leveled against their cars (the boxiness) with a series of "Love it or Loathe it" ads. Funny they didn't run for long.
* Scion one), a dormant Scion's powers could only be activated through sexual contact with a Scion with active powers.
* Scion - primarily between the pantheons and the Titans, but also within and between the pantheons as well.
* Scion: Ragnarok includes a perspective flip of the chaining of the Fenris Wolf.
* Scion require infidelity. (Shiva and Parvati... well, let's just say Parvati isn't thrilled about her husband's "yoga classes" in the World.)
* Scion Scion as Followers. In fact, PCs can gather Followers that happen to be all female.
* Scion, seeing as the Hero rank powers range from "keep a plant alive no matter what the conditions" to "make sure a crop suffers no blight." Mind you, some of the

higher-level powers are interesting, like, "make plants grow anywhere"—especially since the accompanying illustration depicts a car overgrown with vines. Some of the higher-level powers allow you to accelerate plant growth at ridiculous speeds, to the point where you can create a forest in seconds. Another power allows you to spontaneously create any sort of plant in existence, and it can be used to create instant battering rams. You call Fertility a lame power when someone hits you with a redwood tree at a hundred miles an hour.
* Scion signature character Horace Farrow carries a .45 revolver with him. His uncle Seth used it to kill Horace's (step)father and shoot out Horace's eye, but dropped it when Horace nailed him in the groin with a shotgun. It's heavily implied Horace carries it so that one day he can put a bullet from it through Seth's head.
* Scion's main power allows him to cancel out any wavelength he wants. This usually takes the form of a beam or blast that deactivates molecular bonds, and he can expand this effect
* Scion sums it up with "The less said about [their sex life], the better."
* Scion, the Aztec Scions have the ability to, once an enemy is defeated, rip out their still-beating heart and eat it to gain supernatural powers, that make them rip open their chests and expose their beating heart, which is on fire. No other internal organs are shown.
* Scion, the collective desire of humans to tell stories is the primary driving force of Fate, a power that binds even the Gods themselves. It is also through this that the characters' power grows. The more a Scion is talked about, the more powerful they become.
* Scion. The Erl-king (mentioned above) shows up as well, and is a fairly powerful, nasty sort.
* Scion, the Level 6 Sky Boon Levin Fury lets a character fire lightning bolts as projectiles. In the canon fiction, there is even a scene with a signature character doing just that.
* Scion, the most powerful superhero in existence, listens to him and does what he says. He doesn't know why, but for whatever reason Scion occasionally visits him, and when Kevin tells him he should do something, he does it.
* Scion, the world's first and greatest superhero, is the avatar of an immensely powerful and ancient alien entity.
* Scion, this is essentially a virtue for the Aesir. The gods expect obedience from their children, but not a bunch of flattery, and are willing to put up with a surprising amount of lip if the scions get results.
* Scion. This makes him a perfect hostage for determined Scions, because he won't even lift a finger in his own defense - if you can get past the guards the other avatars have put around him, he won't stop you from carrying him away.
* Scion" to "rip out someone's heart and plug it into your own chest, where it catches fire and grants you new-found vigor."
* Scion, uses the same logic surrounding the Titans. At the end of the Titanomachy, the gods bound them away in the Underworld — this was because the Titans were incarnations of things such as Light, Fire, Darkness, Life, and Water, and their death would screw with reality big time. This was proven when Ymir was killed... causing the Great Flood, as the Ice Age ended right then and there.
* Scion warriors that show up in modern times come from the 18th century through the mid-1970s, outfitted in whatever gear they had on them when they "died".
* Scion when it comes to such strong connections. It's a dangerous balancing act.
* Scion when talking about old Hades/Pluto. Hades isn't a happy camper at the downsize of the planet that uses his name.
* Scion." While still simply Scions (as opposed to Demigods or Gods), their powers basically come from being on first-name basis with their god-parents (as opposed to later, when their powers come from their own deification).
* Scion world of the first edition in favor of a world where the pantheons have always been known to the world, but not necessarily prominent. As a result, a lot of syncretism happens, but it's not treated as a huge deal. A parishioner may go to church on Sunday, but might offer a sacrifice to a Yoruba deity for good luck or order a taurobolium during an OB-GYN appointment. That said, the Abrahamic figures

have gone from being heavily implied to not exist — since Satan is no longer actually Pan while YHVH and his angels aren't heavily implied to be the Titan Aten and his spawn — to having their status go unmentioned.
* Scion, you play the modern children of the gods and have relics that are tied to you and either have a unique property or let you channel your own power. The player is expected to craft a legend around his relics. Some of the sample relics include a smartphone that bounces its signal off a tower in Asgard (which lets it get reception anywhere), perpetual motion machines fueled by Legend that can replace gas tanks, and the tommy gun of Eliot Ness.
* Scion, you play the offspring of a God, and have a whole bunch of different pantheons to choose from (six in the 1e core, ten in the 2e core, and more in the supplements). Admittedly, they did it in a unified, focused way that makes some sense within the system and world.
* Sciron, an elderly man who asks passersby to wash his feet as a sign of respect. When they bend over to comply, he punts them off a cliff and into the jaws of a sea monster at the bottom.
* Scissors, her character (Angie) spends most of the movie trapped in a show home.
* Scissor Shock. Full stop. If you don't know who they are, a simple Google search will lead you to it and subsequently turn your bowels and brain into mush.
* Scissor Shock. What makes this even more awesome is that all of those genres are
* Scissor Sisters: An American pop/rock band full of LGBT individuals. Specifically, Jake Shears, Babydaddy and Del Marquis are gay, while Ana Matronic has been involved with both men and women but doesn't label herself. Only two members, Paddy Boom and Randy Real, do not publicly identify as LGBT.
* Scissor Sisters' first album contains an unnamed track between the CD bonus tracks, which encourages the listener to either start the album from the beginning or to keep the disc playing after a (fairly creepy) sound clip of people screaming to hear the bonus content.
* Scissor Sisters gave us "I Can't Decide", the most upbeat, cheerful, lively and happy song you'll ever hear about casually plotting someone's cold-blooded murder.
* Scissor Sisters's Master as he's dancing to the song while kissing Lucy, abusing Martha's family, and tormenting the Doctor.
* S-Class: Extremely dangerous jobs, where even the smallest mistake can result in death. Only S-Class Mages are allowed to take these jobs. Non-S-Class mages are allowed to take these assignments under the condition that an S-Class Mage is accompanying them.
* S-Class Rank 7 Hero, King is viewed as this by everyone in-universe. He has never lost a battle with a monster,
* S-Class: The most powerful heroes, each of which are said to be as strong as an emergency army division. They are able to to handle Demon and possibly Dragon threats on their own, as well as protect entire cities. There are 17 heroes in this class.
* 's clone (maybe) flies an evacuated Rebel cruiser down to Kamino and bails out at the last minute, resulting in a gigantic ship smashing into the main Imperial cloning facility. Also, judging by the flash, the ship's reactors went up on impact.
* S Club 7 about various forms of dance). S Club teach the kids - and their camp head by extension - the importance of having fun while they still can.
* S Club 7 album "Alive" was release around the time Jo was suffering from back problems. An alternate version of the single was recorded with Rachel on lead vocals instead of Jo. General consensus seems to be that Rachel's version was better - even though it was never officially released.
* S Club 7 by the name of Joannie. She has pictures of all her old boyfriends in her living room and her first episode has her describing many of the relationships in great detail to a concussed Bradley. Poor Paul actually has to pretend to be one of her boyfriends in a later episode.
* S Club 7 did this a couple of times on the TV show. Hannah is said to be a horrible actress and bungles her lines as an extra on a TV show. In real life, Hannah Spearitt studied acting for several years and had acted in numerous

productions before joining the band. Another episode has Rachel failing at being a model. Rachel Stevens was part of a modeling agency prior to joining the band.
* S Club 7 has Jon starting a new job in an office. He's told he should enter his name to win the Christmas prize. Jon is baffled, pointing out that it's only March.
* S-Club 7 in Miami, their boss at the hotel where they work loses them in a poker game to a rival hotel owner.
* S Club 7 involving them working at a hotel where they also got to perform, but the second and third seasons show them going to Los Angeles to try and make it.
* S Club 7 made them react like this. In the movie Bradley is supposed to be attracted to a clone of Rachel but not the real one, and in interviews he said filming the kiss scene was like kissing his sister.
* S Club 7), Rachel reports the death of many people during a hurricane, including several talented artists and Bradley MacIntosh.
* S Club 7's TV series featured an annoying fan that was at first obsessed over Bradley and then later Rachel.
* S Club 7 the band kidnap their dim-witted clones and tie them up. The Rachel clone wonders if it's part of their training program and asks "Do I tie you up now, Bradley?". Bradley gets quite hot under the collar and says "we'll talk about it later".
* S Club 7. The "Two In A Million" video has her hair reaching to her waist while it's shoulder-length in the video for "You're My Number One"
* S Club 7 tie-in magazine has the band interviewing a new assistant, who happens to be a witch. She demonstrates her powers by turning Jon and Bradley into 'Joni' and 'Bradie'.
* S Club 7 TV series, Tina Barrett's character was written to be a choreographer. Tina had been a dancer before joining the band and choreographed a few of their routines — as she was shown doing in the series.
* S Club 7 when Bradley, Jo and Paul toured together as 'S Club 3', Paul eventually stopped appearing with them citing tensions between himself and Jo.
* S Club 7, who received a bucket of green slime dumped on her head by her bandmates.
* S Club 7 with the result that they were pushed more as ballad singers than they had been in their native UK. In America their signature songs were the likes of "Two In A Million" and "Never Had A Dream Come True". In the UK it was the more up-tempo "S Club Party", "Bring It All Back" and "Reach".
* S Club: Seeing Double decided to do it for fun. Director Nigel Dick liked it and had her keep it for the film.
* scofflaw, and thus shared the $200 prize. This word is still used today for anyone who ignores a minor law.
* Scofield Reference Bible, having shoehorned certain passages so that Jesus was born 4000 years after Creation when the Bible does not state this.
* Scolding the Fourth-Wall Breaker: A character is reprimanded for breaking the fourth wall.
* Scolding the Fourth-Wall Breaker: A character scolds another character in-universe for breaking the fourth wall.
* scolex, are just merely reproductive organs that in fact break away from to body to release its eggs. As such, tapeworm removal is very difficult, as even if the entire length of the body is removed, if the head remains then it will just grow an entire new body.
* Scolippi from Part 5 is all but built off of this trope. He believes that everybody is a "sleeping slave" of fate, in that everybody is at its mercy, but not everyone is aware of the consequences. His stand, Rolling Stones, also puts the concept into motion, in that it seeks out anybody who's about to die in the oncoming future and chisels itself into a stone recreation of their scene of death. However, it also offers a
* Scolopidia is the fundamental unit of a mechanoreceptor (sensory neuron) organ in insects.
* S contains several paper inserts, such as letters and postcards, which offer elaboration on both the deepening relationship between Eric and Jen as they

scribble in the book, and also their quest to try and uncover the mysteries of its main narrative and author.
* SCOOB!: After Scooby and Shaggy take an incredibly fast ride aboard the Blue Falcoln's ship, their faces are shown to be frozen in flappy mode.
* Scoob and Shag and is sent to Earth to act as a secret mole that will free Mick for his plans in taking over Earth. He also holds onto the original Shag's Ballyhoo, Jump Cut, and reveals that our Shag can't get that power until he, the earlier clone, is dead.
* Scoob and Shag: Bugs Bunny is known as "the Noise" after the white noise his Ballyhoo power emits.
* Scoob and Shag: Courage's Ballyhoo, "On Demand", allows him to transform into different objects, including weapons. Strip 108 reveals that this is not limited to inanimate objects: for example, he can turn into a human.
* Scoob and Shag glow red when he uses his powers. The glow from his eyes is strong enough to actually light up parts of the scene in episode #74. The fact that his eyes are a consistent color serves as both a signifier of how much danger he poses to the others and as a hint at how much his Ballyhoo energy has corrupted him.
* Scoob and Shag: Subverted. When Sam is taunting Popeye, his comments imply that Olive Oyl is dead, but she's later shown to be alive and well. She and Pop just don't get along anymore.
* Scoob and Shag: This happens twice, in quick succession, in the early sections of Part 1.
* Scoob and Shag: When passing himself off as a woman on Earth, Bugs Bunny doesn't skimp on either makeup or nice clothing and is good enough to fool men into hitting on him.
* SCOOB!, citing it as a frequent method by which Shaggy and Scooby find escapes and secret passages. It doesn't work for her.
* SCOOB!: Dee Dee has this reaction upon learning Brian thinks the anonymous tip he received came from somebody named "Anonymous". Brian says her question made him stop believing it.
* SCOOB! features the younger versions of Mystery Inc. (except Scooby) being voiced by children.
* SCOOB!, Fred who has been heretofore established as loving the Mystery Machine, gets one when a hot blonde cop pulls them over for speeding. It crashes abruptly when revealed to be a disguise.
* Scoobies by virtue of a spell that leaves them incapable of feeling pain.
* Scoobies. Xander's faith is so strong that even looking upon his holy armor is painful and Faith eventually becomes a living saint, making everything she touches holy for the next several days.
* SCOOB! mixed reviews from critics. That didn't stop it from being #1 in VOD sales for 3 weeks straight, though.
* SCOOB! to get them to band together help save Scooby from Dick Dastardly.
* SCOOB!: Velma and Daphne both cry into Fred's chest after Shaggy sacrifices himself, entering the portal to the Underworld in Scooby-Doo's stead in order to keep it locked and prevent Dick Dastardly from opening it.
* SCOOB!: While Scooby and Shaggy are being chased by Dastardly's robots at the Takamoto Bowl, their friends listen to a police radio and hear a report of a 40-15 in progress.
* Scooby and Shaggy are card-carrying cowards. And they're not afraid to admit it. When Fred tells them to enter a doorway for investigation:
* Scooby Apocalypse: All of the main cast qualifies as they try to survive in a world full of violent mutants.
* Scooby Apocalypse bursts into the safe zone at the Henry Hudson Mall by smashing through a skylight. An annoyed Scooby points out that he could have just as easily used one of the many doors.
* Scooby Apocalypse franchise to date has had every member of Mystery, Inc. still alive by the end of the series.
* Scooby Apocalypse has the Complex, the massive underground lab facility in Nevada where Shaggy and Velma work at the start of the series.

* Scooby Apocalypse: In Issue #9, Shaggy made "spam, cheese, spinach an' anchovy omelets". Velma, who had just thrown up from learning what the Four planned to do with her scientific expertise, throws up again upon being offered one of Shaggy's omelets.
* Scooby Apocalypse is revealed at the end to primarily have been a fever dream.
* Scooby Apocalypse: Shaggy brings up the laboratory's dental plan as one of the reasons he agreed to work there.
* Scooby Apocalypse: Thaumatrope Mining Co. has the phone number 555-7234.
* Scooby Apocalypse: When Shaggy thinks Scooby is in mourning because the chili dogs are rotten, Fred asks if a dog eating dogs is cannibalism and Shaggy replies with "Not funny, Dude". Fred later says the same thing word by word when Shaggy asks what's between him and Daphne other than Fred being a "serial proposer" but Shaggy argues that "Actually, it is".
* Scooby-Doo #20 (Gold Key, July 1973) had a story titled "Unlucky Luck", where Velma tries to break Scooby and Shaggy of being superstitious. She has Fred and Daphne plant a ladder and a black cat along a designated path on which she has Scooby and Shaggy follow as part of a game. Of course, they're hesitant, until crossing each bad luck path results in some fortune—a wallet full of money and boxes of candy and dog biscuits. Velma thinks her plan has worked until Scooby and Shaggy go back for their luck talismans—they think if that was bad luck they had, just think of how much good luck they'll have now.
* Scooby-Doo #24 (Gold Key run), "The Mark of the Blue Scarab", starts right off with Scooby and Shaggy being chased by a figure in a comic book superhero costume. The narration asks the reader to check the indicia at the bottom of the page to make sure they're reading the right comic book.
* Scooby-Doo 2: Monsters Unleashed after some vicious slander from a reporter.
* Scooby-Doo 2: Monsters Unleashed: Apart from the opening scene taking place the night before and a following act set inside an old mansion during the day, about two thirds of the film happen over the course of a very long and packed night. Counting the final scene being set in the morning after the Big Bad is defeated, the entire conflict spans maybe a day and a half for the gang.
* Scooby-Doo 2: Monsters Unleashed, as Scooby and Shaggy barricade a door against the Black Knight Ghost, Shaggy is handed armor pieces, presumably by Scooby. However, Shaggy then notices that Scooby is on his other side. The one passing armor to him was the Black Knight Ghost himself.
* Scooby Doo 2: Monsters Unleashed, but he tells to her listen to her heart deeper and trust him. Then, she goes with him and is rescued.
* Scooby-Doo 2: Monsters Unleashed crashes into a billboard advertising diapers.
* Scooby-Doo 2: Monsters Unleashed, Fred tells Shaggy to drive the Mystery Machine while he and the girls try to fend off the Pterodactyl Ghost chasing them.
* Scooby-Doo 2: Monsters Unleashed of the gang and trying to be real detectives,
* Scooby-Doo 2: Monsters Unleashed roars in Velma's face, she responds by saying it has a great mask, but bad breath.
* Scooby-Doo 2: Monsters Unleashed: The Mystery Inc crew encounter real-life monsters based on their old enemies.
* Scooby-Doo 2: Monsters Unleashed, the Pterodactyl Ghost takes Patrick away from Velma.
* Scooby-Doo 2: Monsters Unleashed using whipped cream to go to The Faux Ghost by themselves. They are later called out on it.
* Scooby-Doo 2: Monsters Unleashed (Velma even lampshades this, saying "I really should consider contacts.")
* Scooby-Doo 2: Monsters Unleashed. When Scooby and Shaggy are fleeing the Black Knight Ghost, they start barricading a door behind them only to realize that the Black Knight Ghost is in the room with them, helping them build it.
* Scooby-Doo 2: Monsters Unleashed where past foes of Mystery Inc. hang out called the Faux Ghost by pretending to be Shizzy McCreepy and S.D. McCrawly. Scooby dances at one point and Shaggy tries to gesture to Scooby that his wig is slipping off. Scooby misinterprets this as a dance move and starts jumping around pointing at his head.

* Scooby-Doo #9 (Marvel run) with Mordecai Richler, mainly because he was a fan of his books.
* Scooby-Doo, according to the live-action movie. It is for this specific reason the daemons go after him. While he's a dog, he has the sentience of a human, and the same ability to make good and bad choices -but the worst choice he makes is being a bit of a glutton. (Getting snarly when his friends are threatened doesn't count.)
* Scooby-Doo! Adventures: The Mystery Map, Gnarlybeard the Pirate responds to Scooby and Shaggy flying away from the plank after being tricked into giving Scooby a Scooby Snack by calling the two "poopyheads".
* Scooby-Doo: A few times, the phony monster the gang was called to investigate was revealed to be some sort of robot.
* Scooby-Doo. After crushing an evil robotic double of himself, he says: "Play dead." This is a follow-up to several dog-related puns Freddie unsuccessfully tried to use as Bond One Liners.
* Scooby-Doo, all the mysteries the gang solved in previous incarnations of the show actually happened in their hometown of Crystal Cove, which has made it famous as a supernatural hotspot, and most local business is based chiefly on tourism. So much so that Velma, with her tendency to bitterly point out that every last one was a hoax, poses a significant danger to the local economy all by herself.
* Scooby-Doo among derailing (but the gang and the rest of the passengers survive.)
* Scooby-Doo! & Batman: The Brave and the Bold: At one point, the Scooby gang and Batman are riding in the Mystery Machine, and Scooby has the wheel. Batman tells him to turn left, but he turns right. Batman asks how he got that wrong, and Daphne points out Scooby is a dog.
* Scooby-Doo, and are usually found accidentally by "Danger-Prone Daphne".
* Scooby-Doo and even putting the gang in their classic 1970s outfits and designing them in the same manner.
* Scooby-Doo and friends would grab a trailing strip of mummy wrapping and give a tug, unravelling the mummy like a top.
* Scooby-Doo and goes around ripping off random people's faces to find the real killer.
* Scooby-Doo and Guess Who? does this in many episodes, each time initially starting the gag straight, but then taking a wacky twist (often with the gang suddenly wearing goofy costumes that may or may not be relevant to the story.)
* Scooby-Doo and Guess Who?: In "A Mystery Solving Gang Divided", Scooby and Shaggy act like this when they're tasked with baiting some ghosts.
* Scooby-Doo and Guess Who?: In "The Internet on Haunted House Hill!", when Velma says the titular house is haunted by the ghost of a guy who used to run a newspaper, Scooby asks what newspapers are.
* Scooby-Doo and Guess Who? isn't that tonally different from your average, light hearted Scooby Doo show, yet its given a PG rating despite the previous series getting a TV-G or TV-Y7 rating.
* Scooby-Doo and Guess Who?, Kristen Schall, who is a guest star in the show, tries to find out what member of Mystery Inc. she really is. When she tried to be like Shaggy and Scooby, who loves to eat, she tried to eat as much as much as Shaggy and Scooby, only to end up with a full, bloated belly which pops off the button on her trench coat, flying around and knocking out Shaggy and Scooby.
* Scooby-Doo and Guess Who?: The Kenathon has the message "Call now 1-800-555-0199".
* Scooby-Doo and Guess Who?, the villain uses a sonic device to brainwash two of the Hex Girls so that instead of their usual goth schtick, they're played as cheerful and wholesome. This culminates in Thorn playing one of her usual goth songs in a peppy voice while playing a ukelele.
* Scooby-Doo and Guess Who? this time because nobody would fall for the muffin trick twice.
* Scooby-Doo and his teenage pals encounter a spectre haunting a construction site in "Hi-Rise Hair Raiser".
* Scooby-Doo and Scrappy-Doo: After going to Japan for a baseball game involving

the American and Japanese team, the gang quickly gets caught up in a mystery. When Shaggy complains, Velma answers with this.
* Scooby-Doo and Scrappy-Doo) crooks. The two friends are never seen afterwards.
* Scooby-Doo and Scrappy-Doo, Lennie Weinrib was undergoing problems in his personal life at the time and could be quite difficult as a result. Part of the reason Scrappy was recast after this season was because Weinrib didn't get on with voice director Gordon Hunt. It got to the point where Weinrib would be willing to return if Evanier would take over as voice director, but this didn't work out.
* Scooby-Doo and Scrappy-Doo named "The Night Ghoul of Wonderworld" had the gang go to a robotic amusement park designed after Victorian London. As a result this trope is there in all its characters-disappearing foggy glory.
* Scooby-Doo and Scrappy-Doo, Scrappy gives one to Scooby after they've been reunited.
* Scooby-Doo and Scrappy-Doo, the series premier had Shaggy, Scooby, and Scrappy, after splitting up from the rest of the group, get trapped on a conveyor belt that would have sliced them to pieces had it not been for a last minute burst of adrenaline on Scooby's part.
* Scooby-Doo and Shaggy usually get elected to be the live bait in catching the week's villain in a monster suit.
* Scooby-Doo and the Alien Invaders, but with an attractive human bodyshape and expressive facial features.
* Scooby-Doo and the Alien Invaders, imagining himself and Crystal with Shaggy Jr. Scooby and Amber, Crystal's golden retriever, likewise have puppies. Averted, because Crystal and Amber turn out to be aliens, and although they're benevolent, they're forced to break-up as the girls need to return home. It's also unknown if they would've been able to produce interspecies children anyway.
* Scooby-Doo and the Alien Invaders in the interim, was a perfect match.
* Scooby-Doo and the Alien Invaders, the villains of the story tell Fred, Daphne, and Velma about how they found a gold mine some old miners in the past were digging in, but who gave up and left only a few more feet from a gold deposit. Naturally the villains are happy to gain from their loss.
* Scooby-Doo and the Alien Invaders was also released after her suicide.
* Scooby-Doo and the conflict revolves around Scooby and Shaggy aspiring to become movie stars while Fred, Velma, and Daphne have to work around Scooby and Shaggy leaving their show.
* Scooby-Doo! and the Curse of the 13th Ghost, consists of a monochrome flashback sequence where Vincent Van Ghoul and his friend Mortifer Quinch succeed in recapturing Asmodeus, the last of the 13 ghosts imprisoned in the Chest of Demons. Mortifer appears to be killed by demons after they recapture Asmodeus, but he's later revealed to be still alive when Velma unmasks Asmodeus in the present day as actually being Mortifer in disguise as part of a plan to steal the Chest of Demons, having used an illusion to fake his death to throw off Vincent in the past.
* Scooby-Doo! and the Curse of the 13th Ghost, does not have the involvement of series creators Tom Ruegger and Mitch Schauer.
* Scooby-Doo! and the Curse of the 13th Ghost for those who find it hard to accept that the supernatural stuff actually happened.
* Scooby-Doo! and the Curse of the 13th Ghost that there's got to be a logical explanation for all of this.
* Scooby-Doo! and the Curse of the 13th Ghost, the backstory of Asmodeus, the eponymous 13th ghost, is that he was originally an ancestor of Vincent Van Ghoul named Asamad Van Ghoul who ended up transformed into a demon after he became evil.
* Scooby-Doo and the Cyber Chase, a 2001 American direct-to-video film
* Scooby-Doo and the Cyber Chase: After being beamed into a game based on them, the gang had to play through all ten levels (clearing each one by finding a hidden box of Scooby Snacks), only being able to leave once they beat the game. Beating the game also deleted the living computer virus they'd been dealing with.
* Scooby-Doo and the Cyber Chase. In it, the gang is beamed into a video game based on their adventures and run into the player character versions of themselves. Their digital doubles are not only aware of their lives as game characters, but also

aware of the repetitious nature of their existence. They know it'll all start over again once the game is beaten. As such, when they got to the last level - a reconstruction of their hometown of Coolsville - they found where the monsters lived, where the goal was and stayed away to build a life for themselves there. This may be why the game's creator stated he was unable to finish the game. The virtual characters may have sabotaged him to keep the game from starting over. Ultimately, they do end up helping the originals finish the game in order to get out.
* Scooby-Doo and the Cyber Chase parodied this, with Shaggy and Scooby walking off as soon as Fred suggests splitting up; when he says he didn't say who'd go with who, Shaggy counters with "Like, do we ever do it any other way?"
* Scooby-Doo and the Cyber Chase, the gang is sucked into a video game about their adventures. In the final level they meet themselves (or rather, their video game doubles), who are drawn in the older style.
* Scooby-Doo and the Cyber Chase: The gang leaves their clones for the real world.
* Scooby-Doo and the Cyber Chase, the titular character and his friends are turned into data and trapped inside a computer game after being zapped by an experimental laser. They quickly realize that the only way to escape cyber space is to beat the game, but a sentient malware is sent by the film's villain to thwart their attempts.
* Scooby-Doo and the Cyber Chase when they meet up with old monsters, Scooby and Cyber Scooby attempt to unmask the Gator Ghoul to end up learning this virtual one is real.
* Scooby-Doo and the Cyber Chase: with the Phantom Virus as he is slowly walking towards Eric, Bill and the professor.
* Scooby-Doo and the gang thwart a faceless phantom (from the Marvel comic story of the same name) and at the same time expose their client's time machine invention as a fraud. As Shaggy puts on the featureless mask:
* Scooby-Doo and the Ghoul School. Also, the “delicious” pizza Sibella ordered was topped with some rather questionable ingredients.
* Scooby-Doo and the Ghoul School, but is reimagined as an actual ghost rather than a disfigured living man.
* Scooby-Doo and the Ghoul School features the Calloway Military School, a military boarding school for boys, and located right near Ms. Grimwood's Finishing School for Ghouls.
* Scooby-Doo and the Ghoul School had Shaggy, Scooby, and Scrappy volunteer to teach at a school for monster girls, the students being a vampire named Sibella, a Frankenstein monster named Elsa Frankenteen, a werewolf named Winnie, a ghost named Phantasma, and a mummy named Tannis.
* Scooby-Doo and the Ghoul School has a group of cadets assembling a water bazooka to attack a guard dragon to get their volleyball back. Only due to a misfire they soak their commanding officer, after putting his wet hat back on it comically shrinks down to size.
* Scooby-Doo and the Ghoul School has less screentime than the rest of the Ghouls. Averted in the OK KO episode, Monster Party.
* Scooby-Doo and the Ghoul School: Miss Grimwood is the most human looking of the school, yet she dresses in odd clothing and she's able to cook and eat things normal humans like Shaggy cannot. It is possible that she is a witch or a sorceress.
* Scooby-Doo and the Ghoul School: One of the eponymous ghouls is a mummy girl named Tanis.
* Scooby-Doo and the Ghoul School, placing them all in the same universe.
* Scooby-Doo and the Ghoul School: Scooby and Shaggy are hired as gym teachers at a finishing school for monster girls.
* Scooby-Doo and the Ghoul School: Sybella, Winnie, Elsa, Phanty, and Tanis are all this, as is Miss Grimwood herself to an extent. Examples include enjoying rotten food (including fungus fudge, toadstool tea, swamp brownies chock full of mosquitoes, and poison ivy punch) and relishing the thought of swimming in quicksand.

* Scooby-Doo and the Ghoul School, the cadets at Calloway Military Academy have a pedal-powered helicopter.
* Scooby-Doo and the Ghoul School, the eponymous school has one for no adequately explained reason.
* Scooby-Doo and the Ghoul School: they have a son named Eidolonius "Eddie" Phantom.
* Scooby-Doo and the Ghoul School. They're all the daughters of famous monsters, Sibella for example is Dracula's daughter.
* Scooby-Doo and the Ghoul School: When the cadets are searching, one of them tells another to be sure he looks in 'the updog', leading to this exchange:
* Scooby-Doo and the Ghoul School, which is basically a bugle on tank wheels that rolls around while playing Reveille to wake up the cadets.
* Scooby-Doo and the Ghoul School with both Scooby and Shaggy, then traps Shaggy in the mirror.
* Scooby-Doo! and the Goblin King and switching themselves to make it look like Shaggy transforming into Scooby. Velma becomes a werewolf very briefly (along with Fred who becomes a vampire, and Daphne who turns into a witch) as a result of the Goblin King's magic sceptor.
* Scooby-Doo! and the Goblin King ends with the Goblin King grounding Willow for 1,000 years. Of course, they're immortal, so it is most likely a normal length of time for such a punishment. As the Goblin King takes the evil magician with him for 1,000 years, the magic show was discontinued by the employees who operate the amusement park.
* Scooby-Doo! and the Goblin King. He's not exactly pleased with the ordeal.
* Scooby-Doo! and the Goblin King is a bald magician named The Amazing Krudsky, who schemes to steal the magic of the titular Goblin King and take over the world.
* Scooby-Doo! and the Goblin King: Scooby and Shaggy have to enter the world of magic to stop an evil magician-turned-sorcerer from turning everyone and everything on Earth into Halloween monsters.
* Scooby-Doo! and the Goblin King, The Amazing Krudsky is a stage magician who wants to be a real wizard. He ultimately drains the fairy Princess Willow's magic to grant himself real magic powers.
* Scooby-Doo! and the Legend of the Vampire centers around the disappearance of an Australian rock band called Wildwind, who are believed to have come back as vampires. It eventually turns out that the band were actually pretending to be vampires in order to scare off their competition and get around the rock festival's "no repeat entries" rule. The member Dark Skull is shown to be bald when out of costume.
* Scooby-Doo! and the Legend of the Vampire, Velma sings a solo song at the end of the feature, and it was obviously not Nicole Jaffe doing her own singing. It was Krystal Harris.
* Scooby-Doo! and the Legend of the Vampire" was Krystal Harris while Nicole Jaffe reprised Velma's speaking voice.
* Scooby-Doo! and the Loch Ness Monster is at least a little about scientific skepticism, isn't it? Anybody?
* Scooby-Doo! and the Loch Ness Monster Nessies: a robotic submarine version, a less sophisticated (but still somehow totally convincing in appearance) "parade float" version, and the real monster. The real one looks very different than the impostors, namely having flippers and a tail fluke.
* Scooby-Doo! and the Monster of Mexico (or the Nahual, a lycanthropic being from local folklore).
* Scooby-Doo! and the Reluctant Werewolf, apparently ruled by Dracula himself and with a very apathetic peasant population.
* Scooby-Doo! and the Reluctant Werewolf, Count Dracula claims to no longer fear sunlight thanks to sunscreen. The bottle he uses has a SPF of one million.
* Scooby-Doo! and the Reluctant Werewolf, Dracula makes a pun on Scooby and Shaggy's car being miniaturized, "Shrunk from the battle." His ditsy assistant Vanna Pira doesn't get it. A few scenes later, she suddenly bursts out laughing.
* Scooby-Doo! and the Reluctant Werewolf ends with Shaggy stating that he and

Scooby are through with werewolves, vampires, and monsters forever. Dracula and the Hunch Bunch beg to differ.
* Scooby-Doo! and the Reluctant Werewolf features a mummy among the car racers.
* Scooby-Doo! and the Reluctant Werewolf has Dracula mention one of the menu items, finger sandwiches made with real fingers.
* Scooby-Doo! and the Reluctant Werewolf he reverts to his old self by saying "Oogly boogly wobbly wye, no more a werewolf am I, I'm going to be a normal guy!"
* Scooby-Doo! and the Reluctant Werewolf is one of the most blatant cases in the whole franchise, as every character's dance is simply several frames of animation looped back and forth. Every character's cycle is also the same length, so when multiple characters are onscreen at a time, they always loop at the exact same time.
* Scooby-Doo! and the Reluctant Werewolf: One of Dracula's attempts to slow down Scooby and Shaggy involves a man-eating plant. It tries to eat him instead.
* Scooby-Doo! and the Reluctant Werewolf: Shaggy is turned into a werewolf by Count Dracula himself to compete in a race against other real, famous monsters.
* Scooby-Doo! and the Reluctant Werewolf. She's very beautiful but very ditzy and not very intelligent; she often doesn't get Dracula's jokes which frequently annoys him.
* Scooby-Doo! and the Reluctant Werewolf, the heroes get knocked out by sleep powder and taken to Dracula's castle. When they wake up in this castle full of bizarre monsters, they repeatedly try to wake themselves up, until Dracula gets fed up and says, "Never mind, this is not a dream!"
* Scooby-Doo! and the Reluctant Werewolf werewolf had retired to Florida.
* Scooby-Doo! and the Reluctant Werewolf: with Shaggy in his werewolf form, as he is being chased by a crowd of people at the drive-in parking lot.
* Scooby-Doo! and the Samurai Sword features a sword fight between the Black Samurai and Scoob and Shaggy, Scooby won by using the tremendous horse-cut technique.
* Scooby-Doo! and the Samurai Sword, Miyumi explains her martial arts school's philosophy thusly: "In order to win, you must be willing to do what your opponent is not willing to do." Considering this is a Scooby-Doo movie, that amounts to pulling off Daphne's headband so her bangs obscure her vision, rather than anything dirtier, but Daphne still considers it a dirty trick and an unfair victory.
* Scooby-Doo! and the Samurai Sword. The boys are going to be eaten and the girls are going to be married to the chief.
* Scooby-Doo! and the Samurai Sword, the gang comes upon a tribe of cannibals and get put in a pot. But only the guys.
* Scooby-Doo! and the Samurai Sword: The Green Dragon acts as a guardian to Scooby and Shaggy.
* Scooby-Doo! and the Samurai Sword using the Sword of Fate, the Sword of Doom's opposite, the samurai was freed from his curse and his spirit was able to rest in peace.
* Scooby Doo! and the Skeleton Key, Scooby and the gang find an old-fashioned skeleton key - which the ghost of a pirate wants.
* Scooby-Doo! and the Spooky Scarecrow, Fred compliments the hunchbacked and misshapen store owner Mr. Bumpy on his mask, only for Mr. Bumpy to reply with "What mask?"
* Scooby-Doo! and the Spooky Scarecrow had the gang visit a town called Cobb Corner to attend the Halloween festival before having to deal with a fearsome scarecrow named Cornfield Clem.
* Scooby-Doo! and the Witch's Ghost, at one point the villain is armed with a spell book.
* Scooby-Doo! and the Witch's Ghost a witch and the journal that Ben was looking for was actually a spellbook that he planned on using to bring Sarah back from the dead so that they can rule the world together...only to be shocked when he does so and Sarah reveals that she would rather destroy the world than rule it.
* Scooby-Doo! and the Witch's Ghost: Both Shaggy and Scooby gain a massive amount of weight early in the film. When coming across the Hex Girls, the two try to

impress them by pushing up their weight, but it immediately flops down in fear when the Girls reveal their (fake) vampire teeth.
* Scooby-Doo! and the Witch's Ghost credits, after the movie's credits.
* Scooby-Doo! and the Witch's Ghost example. She's unaffected and more exasperated than anything.
* Scooby-Doo! and the Witch's Ghost, he attempts to reseal her in the book, only to discover those magic words only work for a Wiccan, forcing the member of the Hex Girls who practiced it to perform the spell.
* Scooby-Doo! and the Witch's Ghost: Mystery Inc encounter both an evil warlock and the eponymous ghost witch.
* Scooby-Doo! and the Witch's Ghost practitioner. She was actually a witch.
* Scooby-Doo! and the Witch's Ghost the gang meets famed horror writer Ben Ravencroft, who Velma is a huge fan of, and they agree to help him look for a journal that once belonged to his ancestor, Sarah Ravencroft, who Ben claims was wrongfully accused of being a witch back in the 1600s, and he believes that finding the journal will help clear her name. But by the end of the movie, Ben's true colors are revealed. He was using the gang to help him find not a journal, but a spell book that belonged to Sarah, who really was a witch, and Ben planned on using it to help him bring Sarah back from the dead so that they can rule the world together.
* Scooby-Doo! and the Witch's Ghost. This time, however, they happened to meet three attractive girls and manage to suck in their stomachs to transform into bodybuilder physiques. The girls turn out to be the scary Hex Girls who frighten the two back into normal form in a matter of seconds.
* Scooby-Doo! and the Witch's Ghost when Daphne asks Fred why he always asks her to go with him when they search for clues, he tries to tell her how he feels about her while she leans over to kiss him, she is then prevented from doing so when he spots The Hex Girls whom the gang suspects are witches.
* Scooby-Doo as he attempts to throw a punch to the gut of the mummy ("Scooby-Doo and a Mummy, Too"). His karate chops are even less effective.
* Scooby-Doo. A shot showing the Planet Express headquarters pans down to reveal the words "establishing shot, reuse in every episode" written below the drawing.
* Scooby-Doo as opposed to inward. On at least one occasion, Shaggy and Scooby do this, and they don't immediately realize that the monster they're escaping entered from the opposite side of the room and is helping them build the barricade.
* Scooby-Doo at said theme parks. Each episode of the original Where Are You? series has been released to video and DVD easily over a dozen times. At least one direct-to-video movie has come out each year since 1998, two theatrical successful live action films were produced, and two live-action TV films were also made (the first one garnering Cartoon Network its best ratings ever). Not bad for a little Hanna-Barbera show from the late 60s.
* Scooby-Doo: A witch tried to turn Scooby Doo, Scrappy and Shaggy into frogs. Shaggy was the only one she hit and the witch invoked the trope to show how satisfied she was for having at least one frog.
* Scooby-Doo/Batman) teamed up with the original series' version of Mystery Incorporated.
* Scooby-Doo because it involves a character getting peed on; this was the case when the movie was shown on television in Jamaica. Unfortunately, that scene being cut resulted in the removal of a critical plot point, which meant that a later major reveal came out of nowhere for some viewers and thus made no sense.
* Scooby-Doo becomes one of these at the end of the first live-action movie.
* Scooby-Doo being arrested by the police for the criminal operation the hoax was intended to cover up.
* Scooby-Doo, big dogs aren't allowed to board the plane to Spooky Island, so Scooby Doo is forced to dress up as Shaggy's grandmother.
* Scooby-Doo: Blue Bunny released an ice of Scooby's face with blue gumball eyes.
* Scooby-Doo, but some incarnations have the gang stumble onto the real deal.
* Scooby-Dooby Doors: A chase sequence where everyone runs through a hallway of doors in improbable ways.

* Scooby-Dooby Doors used, the show subverted it or played with it every time.
* Scooby-Doo by now just speaking in a gruff tone: complex sentences and no "R" sounds.
* Scooby-Doo! Camp Scare that the camper Deacon is really a bald criminal named Babyface Boretti in disguise, who, along with his accomplice, was trying to force everyone out of Camp Little Moose so he could uncover the hidden treasure.
* Scooby Doo can talk...and no one cares (though it was lampshaded in that movie with the aliens...) Lampshaded in the crossover episode with Tim Conway. This one has evolved into a running gag with the latter movies, where someone would exclaim "Oh my gosh! A talking dog!" and Scooby would answer
* Scooby-Doo cartoons, it's not surprising you're holding that kind of an opinion.
* Scooby-Doo cartoons tend to be about seemingly paranormal events caused by scientists or technicians with enough know-how to be able to fake such incidences using advanced technology.
* Scooby-Doo cartoons was always losing hers at the worst possible times.
* Scooby-Doo centered on Daphne in "The Gorgeous Ghost." Daphne is entered in a beauty pageant held by a society of magicians where a competing contestant seeks to win the physical crown as she believes it holds mystical powers.
* Scooby-Doo comic features a subplot where Scrappy goes to a gambling table and begins winning hotels. At the end, he declares that he has won hotels and vanishes from the Mystery Machine, where the gang discovers he was using the solid hologram device from that story. The last panel has Scooby leave the van to go back to Las Vegas to get him, but by the next comic, Scrappy isn't anywhere to be seen, so presumably the gang left him there to run his hotels.
* Scooby-Doo comic has Fred tell a boy that he orchestrated one of these at his school prom. He bribed the disk jockey to switch to a slow song when he started dancing with Daphne.
* Scooby-Doo comic once used as villains a gang of counterfeiters who were staging the haunted house masquerade to cover for their true operation... making counterfeit cassette recordings of popular music bands, which they would then supply to unscrupulous music stores.
* Scooby-Doo commonly situated on dogs' faces. He was also given a hunched back, tiny chin, and a large cat's tail: the antithesis of a pedigree Great Dane.
* Scooby-Doo. Considering they always end up finding the guilty party (and never get hurt), they may figure splitting the party works for them.
* Scooby-Doo crew are in an abandoned mansion where to pass some time they play an impromptu basketball game. The Globetrotters spot the gang eight points in a ten-point game, and Shaggy scores the basket to make it 10-0. The Trotters tie it with their own brand of basketball.
* Scooby-Doo! Curse of the Lake Monster begins with Shaggy, Scooby, Daphne, and Fred chasing the witch through the house and unmasking her, expressing astonishment at her unseen identity. The rest of the film explains how the gang got to that point.
* Scooby-Doo! Curse of the Lake Monster, he immediately eats the napkin.
* Scooby-Doo! Curse of the Lake Monster — he tells Fred and Daphne he has this friend, "Scruffy", who has a crush on a girl etc., etc. Of course, he is talking about himself having a crush on Velma.
* Scooby-Doo! Curse of the Lake Monster, Scooby paints a line down the middle of the room he shares with Shaggy following an argument over Shaggy's date with Velma.
* Scooby-Doo! Curse of the Lake Monster, when she was alive in the 1800s.
* Scooby-Doo, Daphne accidentally gives herself a hanging wedgie from a tree while training in martial arts.
* Scooby-Doo dealt with a faceless phantom trying to scare an inventor into giving up his plans for a teleportation device. Turns out the phantom, when unmasked, was a schmuck who feared teleportation devices would render airlines obsolete and he wouldn't be able to see the stewardesses. And the clincher was the inventor's teleportation device was phony. Shaggy puts on the featureless mask and cracks an obvious joke:
* Scooby-Doo, despite being a hard PG-rated film for suggestive humor, scary

moments, and action violence.
* Scooby-Doo did this many times, with Shaggy and Scooby being the worst offenders. Often Fred or Velma would catch them and pull them back whilst they were running on the spot - but they still did it every time.
* Scooby-Doo Direct-to-Video Film Series — 27 animated direct-to-video movies and 1 puppet direct-to-video movie since 1998.
* Scooby-Doo doing the copying, other times it's Shaggy trying to fake out his pursuers.
* Scooby-Doo, Don had him smell a pair of socks belonging to a man he was searching for, and he ended up leading Knotts to a drawer filled with similar socks.
* Scooby-Doo episode, a bunch of toys come to life in a warehouse and nearly kill several employees. A rising star toymaker admits responsibility, and is taken into custody, but it's later revealed to be lying to make himself appear more talented.
* Scooby-Doo episode "Go Away Ghost Ship" (as "The Ghost Of Redbeard," Gold Key #6), the gang are aboard Redbeard's ship when a loud bang erupts. Velma thinks she's been shot and plays out a death scene, only to be told the door behind them slammed shut.
* Scooby-Doo episode involves the gang looking for clues in the mystery they are currently solving.
* Scooby-Doo episode "To Switch a Witch" features the gang going to Salem, MA, on Halloween, and ending up having to save a friend who is accused of being a witch. A mob of townspeople forms and wants to burn the accused witch at the stake, and this was what, in the 1970s?
* Scooby-Doo. Every episode. Subverted, inverted, played straight, whatever you can think of.
* Scooby-Doo felt that in order for a Scooby-Doo film to make money, it must be marketed to kids, and the film was heavily edited down to get a PG. The film is still the tribute/parody it set out to be, just with cleaner humor. On Nickelodeon and Cartoon Network airings, the allegedly cleaner moments were toned down further, mostly via cutting a few scattered instances of mild language, to make it TV-G.
* Scooby-Doo film. Daphne needed Shaggy & Scooby to go into a castle with her when they refuse. So she says, "you're not going to stand out here alone are you?" which gets them very eager to accompany her.
* Scooby-Doo films but he wrote them while Raja Gosnell directed them.
* Scooby-Doo film, where Daphne confuses the heck out of some guy who tells her not to go to a haunted house by wondering aloud whether he's using reverse psychology, reverse reverse psychology, reverse reverse reverse psychology, or something else entirely. Upshot: she's going to look for clues there.
* Scooby-Doo) followed, and a spin-off starring Daphne and Velma was released in 2018.
* Scooby-Doo, for crying out loud), he's always freaking out over monsters, and he even looks and speaks like a hippie stereotype.
* Scooby-Doo franchise is to capture the horrifying villain, sometimes they do so by horrifying them, like for example with a witch doctor seeing his reflection in a mirror.
* Scooby-Doo! Frankencreepy, when Shaggy and Scooby announce that they're not hungry, shots of pigs flying and Hell freezing over are quickly seen.
* Scooby-Doo! Frankencreepy: When the castle explodes and Velma and her friends are believed to be killed by the explosion, everybody in town celebrates.
* Scooby-Doo! Frankencreepy where Shaggy and Scooby try to avert this. Immediately after getting into the library they decide to board up every secret entrance in the room to prevent the monster from getting in. After doing so they then realize in their haste they forgot to lock the front door. Guess how the monster gets in.
* Scooby-Doo (Fred and Shaggy), a full princess ensemble (Daphne), a bearded scholar's outfit (Velma), and a metallic gargoyle (Scooby).
* Scooby-Doo, Fred keeps getting Emile Mondavarious's surname wrong. He only gets it right once.
* Scooby-Doo, Fred's overly complicated plan successfully traps himself and the gang, leaving the monster standing there.

* Scooby-Doo from the final film has her singing "Can't Take My Eyes Off You" while dancing sensually and making motions towards Daphne and/or Fred (they're both standing next to each other and the scene is framed in such a way that it's not clear if she's singing to Daphne, Fred, or both.)
* Scooby-Doo gang don't wind up facing actual ghosts and the mysteries they stumble upon are usually unintentional. This is inverted in the Gold Key comic of Scooby, as starting with issue #14 the gang became ghost breakers for hire.
* Scooby-Doo gang visited these quite a bit in parts of the plot that would normally have taken them to a bar. Also, the Scooby gang would often start an episode in a malt shop (in the 1969-80 series), when they weren't on a beach. This still gets reference in modern adaptations.
* Scooby-Doo Goes Hollywood, which had Scooby and Shaggy getting tired of being stuck in a formula-driven Saturday morning show, and attempting to sell a network executive on giving them a prime time show of their own.
* Scooby-Doo Gold Key issue #15 (when the gang started to become ghostbusters for hire), the gang's client is haunted while he's sleeping. Fred says "Let's go over this room with a finetooth comb." Scooby takes out a hair comb.
* Scooby-Doo go through, lest you lose some of your health from a fright.
* Scooby-Doo) had bi-planes all over the place, one of which, airborne, had Velma in the cockpit—and she doesn't know how to operate it.
* Scooby-Doo had Mystery Inc. facing a criminal who utilised the sinister scarecrow image, either by disguising themselves as such or otherwise.
* Scooby-Doo had several villains who lacked hair throughout the franchise.
* Scooby-Doo had the gang helping at a telethon which gets terrorized by a (duh!) ghost. During the confusion, Daphne makes change from it as she runs an errand for the telethon host. The police are immediately called in as the $10 Daphne gave for the coffee she bought was counterfeit.
* Scooby-Doo had the Mystery Machine, regardless of the main characters.
* Scooby-Doo handles the Mystery Machine in the made-for-video movie
* Scooby-Doo has always been a rather radiant redhead. In "The Gorgeous Ghost" (Gold Key #25, June 1974), she is entered into a beauty pageant held by a society of magicians. With Velma as her surrogate stage mom in prepping her, Daphne knocks it out of the park.
* Scooby-Doo has a scene where Scooby and Shaggy get into a quarrel and resort to the old "insulting the other guy's mother" routine.
* Scooby-Doo has been known to move in fairly bizarre ways while sneaking around, from extending all four legs straight to the sides and toe-walking to pushing his huddled body forward with inchworm-like movements of his tail.
* Scooby-Doo has Fred, Velma, and Daphne come across someone's diary whilst looking for clues. They find that the ink of the text has faded, but the pressure of the pen has worn through to the next page. So one of them grabs a coal and shades the paper to see what was written.
* Scooby-Doo has seesawed on this point in more recent adaptations, showing Freddy pulling on a mask to no effect, and everyone then running away in fear.
* Scooby-Doo has the gang looking for a special buried treasure that is being sought out by the ghost of Shaggy's pilgrim ancestor from hundreds of years ago. After the ghost is caught and revealed to be another man in a mask, the treasure chest is then opened, revealing it to be corn on the cob.
* Scooby-Doo has Velma have one of these due to being too shy to admit she has to pee.
* Scooby-Doo having just been dismissed from their jobs contraband-sniffing dog and handler at a local airport. That's because they ate an entire storage room full of contraband food items that Scooby had detected in people's luggage, not realizing it was needed as evidence against the criminals.
* Scooby-Doo. He usually tries to make himself extremely helpful during the brief time he's seen, which is another hint.
* Scooby-Doo himself, and then later apparently Shaggy finds the rubber Scooby mask and wears it briefly at the end.
* "Scooby-Doo" Hoax: A monster is revealed to actually be a disguised criminal

pretending to be one.
* "Scooby-Doo" Hoax in "Night of the Tarantula" where the murderer strangles the victim of the week and tries to make it look like the work of boa constrictor, which was sent to him as part of a voodoo curse.
* "Scooby-Doo" Hoax, so the off-chance where the monster they are chasing in a given film or episode is, in fact, a monster and not a guy in a costume, counts as this.
* "Scooby-Doo" Hoax: The perpetrator disguises the crime as a paranormal or supernatural event.
* Scooby-Doo holds the record at 52 episodes in two seasons. Despite a relatively modest episode count by the standards of most long-runners, they collectively make up a mythology of nearly 400 episodes.
* Scooby-Doo in Arabian Nights commented on it was amazing how things would happen right on cue in a cartoon.
* Scooby-Doo in Arabian Nights: Haman uses his second wish to become ruler of the universe, which enlarges the palace. It enables Aliyah-Din to leave the cell she and the Prince were locked in and eventually reclaim the lamp.
* Scooby-Doo in Arabian Nights. When he breaks his glasses, he doesn't bother getting a new pair and does away with them, and ends up squinting and with blurry vision for the remainder of the movie.
* Scooby-Doo include "What a Night for a Knight", "Scooby Gumbo", "Wizards and Warlocks", and "The Secret of Shark Island"
* Scooby-Doo) in preparation for his move to ABC where he'd have a ten-year straight run.
* Scooby-Doo in the Castle Mystery's "Scooby Award" for much-delayed games.
* Scooby-Doo in the first live-action movie, in one scene where Scooby tries to tell Shaggy that his new girlfriend isn't what she appears to be. He says, "Mary Jane is a man in a mask!"
* Scooby-Doo. In the same attraction, despite the Jetsons playing a major role, Judy is nowhere to be seen.
* Scooby-Doo In "Watt a Shocking Ghost," Shaggy, Velma and Scooby put the lights of flashlights on a parrot in an effort to get clues about the 10,000 volt ghost. (Scooby even goes as far as impersonating Lt. Columbo.)
* Scooby-Doo! in Where's My Mummy?: Fred considers it personal when the curse of Cleopatra (presumably) turns Velma to stone.
* Scooby-Doo! in Where's My Mummy? made it seem like she was the victim of Cleopatra's curse, and the gang would stop at nothing on her behalf and safety.
* Scooby-Doo! in Where's My Mummy? when Velma tells them that the tomb of Cleopatra has a curse.
* Scooby-Doo is the one who hands them back to her, and she doesn't realize how close he is until she puts them on.) Nicole Jaffe, the actress who originally played Velma, admitted in an interview that at the initial taping of the show, she accidentally dropped her glasses. She then exclaimed something the writers adapted into her catchphrase: "My glasses! I can't see without them!"
* Scooby-Doo is the team pet of mystery-solving teenage sleuths Mystery, Inc. with the slight twist that he's also the protagonist.
* Scooby-Doo, it's Scooby who does this half the time. Shaggy himself only ever truly finds a clue by himself in one episode, which was the gang's search for the missing Scooby.
* Scooby-Doo. ("It takes one to catch one in this business," they claim.)
* Scooby-Doo! Legend of the Phantosaur after a waiter gives Scooby coffee by mistake he becomes incredibly hyperactive and energetic.
* Scooby-Doo! Legend of the Phantosaur, a graduate student who eerily resembles Velma.
* Scooby-Doo! Legend of the Phantosaur has Velma fall for a guy named Winsor who looks exactly like her.
* Scooby-Doo! Legend of the Phantosaur. He finally stops when the doctor tells him to, since people listen to doctors.
* Scooby-Doo! Legend of the Phantosaur the one that inspired Ultra Instinct Shaggy.

* Scooby-Doo! Legend of the Phantosaur, when Shaggy and Scooby eat at an all you can eat buffet, they take giant piles of food and the waitress tells them to leave because she believes they have taken more than they can eat. She turns her head for a second, then turns back to see that they have already eaten the food.
* Scooby-Doo! Legend of the Phantosaur: with Scooby and a ghost elephant during the opening credits when the gang is being chased by ghost animals.
* Scooby-Doo live-action movie takes place after the original series, as most of those villains re-appear in the sequel.
* Scooby-Doo (live-action): Shaggy and Scooby are hiding from the ghost in the beginning of the movie and Shaggy says to Scooby "Like, there's a ghost right behind me, isn't there?"
* Scooby-Doo live-action theatrical films, naturally, made use of this trope:
* Scooby-Doo loves these. Villains often uses projectors (holographic or otherwise) to make their act seem more genuine.
* Scooby-Doo made-for-TV movies were loaded with monster-related puns. It will drive an adult to insanity.
* Scooby-Doo — 12 TV series, 2 live action theatrical films, 8 animated specials and TV movies, 2 live action TV movies, and 6 direct-to-video animated specials since 1969.
* Scooby-Doo Meets the Boo Brothers, after the aforementioned movie starts with a song...
* Scooby-Doo Meets the Boo Brothers. Because he has the leaking powder horn stuffed in his back pocket, the burning trail chases him around.
* Scooby-Doo Meets the Boo Brothers from Freako whenever he delivers a bad pun. For example;
* Scooby-Doo Meets the Boo Brothers, Scooby finds the Headless Horseman's horse is automated and ends up running the Sheriff into the pond. Just before he's sent into the drink, Sheriff Buzby yells to Scooby, "Push the button!" and that gets Shaggy wondering — how did the Sheriff know the horse was mechanical? And for that matter, even if Buzby did know the horse was mechanical, how did he know how to stop it? It's a clue that the Sheriff is not what he seems.
* Scooby-Doo Meets the Boo Brothers, the Boo Brothers are ghosts that work as ghost exterminators. They claim that that's the whole point. ("It takes one to catch one in this business," they claim.)
* Scooby-Doo Meets the Boo Brothers: The Boo Brothers, who come across as a ghostly version of the Three Stooges.
* Scooby-Doo Meets the Boo Brothers, this is how the titular Brothers reach Beauregard Manor when Shaggy calls to hire their services. Being ghosts, they aren't confined to physical limitations. Of course, Meeko gets stuck, (Creating a bulge in the phone line) so Freako has to force him through with a mallet.
* Scooby-Doo Meets the Boo Brothers, when Freako is looking for the skull ghost;
* Scooby-Doo Meets the Boo Brothers who escapes from a wrecked circus train.
* Scooby-Doo! Moon Monster Madness, Daphne fills the role of being the one who has to save the day at the film's climax.
* Scooby-Doo! Moon Monster Madness, Fred accidentally offends two astronauts by reminding them that their mission occurred "before [he] was born".
* Scooby-Doo! Moon Monster Madness, when Hudson becomes attracted to Ridley, the camera zooms in, the lighting changes, and she seems to shake her hair.
* Scooby-Doo movie, Shaggy and Scooby do this to blend in with the possessed tourists during a ritual.
* Scooby-Doo movies has some really weird cravings. In the first film, we see him eat an eggplant burger with chocolate syrup and hot sauce.
* Scooby-Doo movie. She falls off a scaffold and gets her foot caught in the scaffold's chain. When the chain goes taut, Velma is seen hanging upside down.
* Scooby-Doo movies that are generally considered "the good ones;" in fact, it may be part of the reason they're regarded so highly that they give the gang other characters to play off of:
* Scooby-Doo movie. This was when Kasem was still alive, mind, although he did die in 2014.

* Scooby-Doo Mysteries, a caveman steals a professional figure skater's trademark silver skate.
* Scooby Doo: Mystery has one in its first mystery. On the upper floor of an old ski lodge is a hallway with seven doors (the one at the end of the hall is locked). Opening each of the other six doors in turn – you'll be chased by the Phantom every time, and yes there's at least one point where two Scoobys cross paths – literally breaks the trope, as the six doors suddenly open all at once and Shaggy and Scooby exit from the locked room, allowing you to reenter that room and progress the game.
* Scooby-Doo! Mystery Incorporated, after Shaggy formally tells her he'd rather be friends with Scooby than be her boyfriend. Velma's anger deteriorates into piteous crying.
* Scooby-Doo! Mystery Incorporated, all of the main characters' parents have established given names, but two of them are never referred to by their given names except for the end credits. They are Shaggy Rogers' mother (whose first name is Paula) and Velma Dinkley's father (whose first name is Dale).
* Scooby-Doo! Mystery Incorporated and are "too full to be scared" when the monster shows up. However, their morbidly obese bodies are strong enough and durable enough to take on the rampaging and equally large Gluten Demon and defeat it.
* Scooby-Doo! Mystery Incorporated, and in "Aliens among US" where the villains are the three people on a Wanted poster we see for a few seconds.
* Scooby-Doo! Mystery Incorporated and that these traps enshew the franchises' typical humor by working as intended from the outset without losing their Rupegoldberg nature.
* Scooby-Doo! Mystery Incorporated. And that was mainly because Freddy was acutely clueless about Daphne's love for him.
* Scooby-Doo! Mystery Incorporated) and the equally cursed Planespheric Disk that reveals its location.
* Scooby-Doo! Mystery Incorporated: Angel Dynamite wears when she breaks into Destroido in "Menace of the Manticore". Later, Velma and Marcie wear matching suits while trying to steal Baba Yaga's hut.
* Scooby-Doo! Mystery Incorporated, anything remotely shiny derails his train of thought.
* Scooby-Doo! Mystery Incorporated are the only one's unaffected by it. Interesting in the fact that other than being overly mushy with each other (and occasionally trying to kill Scooby on Aphrodite's command), the spell doesn't do much to affect people's personalities.
* Scooby-Doo! Mystery Incorporated as he realizes the evils he and his compatriots are sinking to, while Pericles stops treating Mr. E with any resemblance of respect and properly asserts his authority as the season draws to its' close.
* Scooby-Doo! Mystery Incorporated, as the Gang begins to delve into the darker aspects of her past.
* Scooby-Doo! Mystery Incorporated) as the only ones who still remember the original timeline.
* Scooby-Doo! Mystery Incorporated, a suction-based magical trap is triggered that pulls two of the villains' robot minions into a small opening in a gateway, crushing them into scrap as they're pulled through. Daphne nearly meets the same fate, but Fred uses the Fourth Key to cover the hole and negate the suction just before she and he both slam into the gate.
* Scooby-Doo! Mystery Incorporated. At first it seems like Shaggy's just afraid of commitment and using Scooby as an excuse.
* Scooby-Doo! Mystery Incorporated but he remains oblivious to all of Daphne's advances due to his obsession with solving mysteries and planting traps.
* Scooby-Doo! Mystery Incorporated. By the first episode's official airing the page already had dozens of tropes, and it just keeps growing from there.
* Scooby-Doo! Mystery Incorporated confirms that Pericles did indeed kill Ed Machine.
* Scooby-Doo! Mystery Incorporated: Count Evallo, the perp of episode 33 ("The Gathering Gloom"), is let off the hook, claiming diplomatic immunity.

* Scooby-Doo! Mystery Incorporated: Count Evallo von Meanskrieg, despite having been arrested for stealing natural gas in "The Gathering Gloom", is released because he has diplomatic immunity; the most they can do is deport him back to his home country (and since his family is the "most evil family in all of Europe", it's guaranteed that they won't punish him there either).
* Scooby-Doo! Mystery Incorporated, Daphne gets a rash from touching an item made of fake alligator skin. According to her she's allergic to all cheap knock off and imitation materials. Fortunately, no pun intended, she's very rich.
* Scooby-Doo! Mystery Incorporated, Daphne's and Shaggy's parents both have shades of this, Daphne's more so than Shaggy's given their vapidness and implied history of hospitalization and psychotherapy.
* Scooby-Doo! Mystery Incorporated: Daphne's father delivers one when he is hosting a dinner for a visiting Chinese delegate in "The Dragon's Secret":
* Scooby-Doo! Mystery Incorporated episode "The Man in the Mirror", Fred Jones' biological parents Brad Chiles and Judy Reeves respectively disguise themselves as Fred and an elderly Daphne Blake to try and trick the gang into leading them to the Planispheric Disc. When Scooby and the gang turn out to be wise about their ploy, Fred tries to unmask his father, only for Brad to reveal that he isn't wearing a mask and actually had plastic surgery done to make him look like his son. Judy has her face tugged on by Velma as well, who admits that she knew she also had plastic surgery and just wanted to cause her pain for the heck of it.
* Scooby-Doo! Mystery Incorporated explains all animal-based myths (i.e. Sun Wukong and the Egyptian gods) as being caused by inter-dimensional beings who took animal forms to assist mankind in development. Talking animals like Scooby-Doo are explained as being descendents of these beings.
* Scooby-Doo! Mystery Incorporated features an auctioneer trying to sell off what he dubs a "spooooooooky painting". No one seems interested in it but the monster of the week.
* Scooby-Doo! Mystery Incorporated-filled mansion while being taunted over a radio by the man that set them, thinking they're the original Mystery Incorporated:
* Scooby-Doo! Mystery Incorporated. For a little while, Nova sticks around with the group, but this also doesn't last.
* Scooby-Doo! Mystery Incorporated format. It takes until the last few episodes to reveal all the pieces.
* Scooby-Doo! Mystery Incorporated: Frau Bluke's robots in "The Midnight Zone" have a strong resemblance to Nazi stormtroopers. Then you remember that she was German and was alive during WWII. So in all likeliness she probably was a Nazi Scientist.
* Scooby-Doo! Mystery Incorporated Fred has gotten wise to their plans with the rest of the previous Mystery Inc. team to locate the cursed treasure of Crystal Cove and has disowned them.
* Scooby-Doo! Mystery Incorporated, Fred returns from visiting a Blood Bank with a huge red stain on his mouth and shirt. Shaggy and Scooby nervously ask him if it's blood, and he replies no, it's juice. He goes on to mention they have bags of the stuff hanging all over the place.
* Scooby-Doo! Mystery Incorporated from 2001, itself a retraux example relating to its' original series counterpart).
* Scooby-Doo! Mystery Incorporated gang visits a monster's victim in the hospital, resulting in a comedically stressful interview. After they leave we hear him flatline in the background, but the gang just exchange looks and leave.
* Scooby-Doo! Mystery Incorporated) goes into full effect as far as Velma is concerned.
* Scooby-Doo! Mystery Incorporated: Happens to Mystery Inc. in "Battle of the Humongonauts" when the Humungonauts demolish the boatyard.
* Scooby-Doo! Mystery Incorporated has an episode where the parents have their kids see what the local college is like. It almost seems like the episode is about to go this way until the monster-of-the-week shows up.
* Scooby-Doo! Mystery Incorporated has a ton, relating to the show's overarching story arc about "The Curse of Crystal Cove".
* Scooby-Doo! Mystery Incorporated has Crystal Cove. However, Crystal Cove seems

fairly solidly located in California, and when the the main characters are accepted into Arkham University in the final episode, it is mentioned that getting there will involve driving all the way across the country.
* Scooby-Doo! Mystery Incorporated has Shaggy and Scooby-Doo discover a traditional example of one of these at the Destroido corporation, complete with alarm clock strapped to sticks of dynamite. Thanks to Fred's trapping skills, they are able to send the bomb sailing out of Destroido before it explodes, destroying a farm in the process. We later learn Mr. E had planted the bomb to try and kill Mystery Inc.
* Scooby-Doo! Mystery Incorporated has Shaggy sent to Barnstow Military Academy by his parents, much to his dismay, after the events of season 1. He's rescued in the opening episode of season 2.
* Scooby-Doo! Mystery Incorporated has the gang unraveling the mystery of a cursed treasure and has since uncovered the whereabouts of the previous Mystery Inc. gang.
* Scooby-Doo! Mystery Incorporated has Velma crying into Daphne's chest after Shaggy chooses to be Scooby's pal rather than to be her boyfriend.
* Scooby-Doo! Mystery Incorporated. He is evil, sadistic, and very ruthless. Sometimes, he would even haunt people or would try to murder the Mystery Incorporated, or even his master, Mr. E.
* Scooby-Doo! Mystery Incorporated: In "A Haunting in Crystal Cove", as Fred tells the gang about his dad's recent strange behavior, which included running screaming through the house and sleeping in the yard.
* Scooby-Doo! Mystery Incorporated: In episode 20, Shaggy wants to re-establish a relationship with Velma, but she just wants to remain friends. It shatters Shaggy, but moments later he's up for pizza.
* Scooby-Doo! Mystery Incorporated: In "Heart of Evil", Dr. Zin captures the Blue Falcon and Scooby-Doo. Having established that the Falcon would do anything to save his dog, Zin proceeds to subject Scooby to the agonizer ray. This fails to convince the Falcon to talk and Zin asks him why. The Falcon replies "That's not my dog".
* Scooby-Doo! Mystery Incorporated: In one episode, Sheriff Stone reaches staggering levels of this when he arrests people who say they've known him since they were children. In each case, he swears blind he's never seen them before, including with the second victim who's a TV chef, and he's holding a box of her food in his hand.
* Scooby-Doo! Mystery Incorporated: In "The Creeping Creatures", Daphne uses her allergy to synthetic animal skin to prove that a shipment of gator skin products are counterfeits.
* Scooby-Doo! Mystery Incorporated: In "The Wild Brood", Sheriff Stone attempts to leave Daphne's bedroom and instead walks into her closet. Where he gets lost.
* Scooby-Doo! Mystery Incorporated: In "The Wild Brood", Sheriff Stone somehow managed to get himself lost in Daphne's closet while trying to leave her room in a huff.
* Scooby-Doo! Mystery Incorporated: In "When the Cicada Calls", Destructdo is making snack foods that contain toxic waste landfill.
* Scooby-Doo! Mystery Incorporated: In "Wrath of the Krampus", Mystery, Inc. visit the prison to consult with the grade-school-age Mary Anne Gleardan, one of their former antagonists.
* Scooby-Doo! Mystery Incorporated" is able to control cicadas and is covered in a swarm as their disguise.
* Scooby-Doo! Mystery Incorporated is not shown to have a definitive form until the last episode where it's a mass of darkness with a mouth and eyes.
* Scooby-Doo! Mystery Incorporated is revealed to the audience in the final third of the first season, but the characters themselves aren't made aware of this until the early parts of the next season.
* Scooby-Doo! Mystery Incorporated is this one. He hangs a lampshade in one episode when he wants to give a Riddle to Mystery Inc, but Shaggy demands a straight answer.
* Scooby-Doo! Mystery Incorporated, like most of the rest of Crystal Cove, would love nothing more than to see Scooby and the gang run out of town on a rail. (There's much more than meets the eye.)

* Scooby-Doo! Mystery Incorporated — he's not a superhero, but the chin fits the bill.
* Scooby-Doo! Mystery Incorporated — remember that this isn't how things always were.
* Scooby-Doo! Mystery Incorporated, most non-human motion tends to involve CGI, especially moving cars.
* Scooby-Doo! Mystery Incorporated. Most of these changes however, are to do with her being written a lot more like an actual teenager would act.
* Scooby-Doo! Mystery Incorporated; not only is Daphne's mother committed on a regular basis, Daphne and her sisters once caught their father in the kitchen, jay-bird naked, gnawing on a can of soup.
* Scooby-Doo! Mystery Incorporated of the same sort of they had just caused.
* Scooby-Doo! Mystery Incorporated pays homage to the franchise's use of this trope at the end of the final episode.
* Scooby-Doo! Mystery Incorporated; Pericles used Scooby's need to save the town to further his own plan to find the Cursed Treasure of Crystal Cove.
* Scooby-Doo! Mystery Incorporated playing the background music on a keytar.
* Scooby-Doo! Mystery Incorporated Principal Quinlan before later joining the cast in Season 2 as major character Mayor Nettles.
* Scooby-Doo! Mystery Incorporated probably contains the most explosions in the entire franchise.
* Scooby-Doo! Mystery Incorporated producer of a reality show muse about the potential of a show about meddling kids and their dog trapping knuckleheads in rubber masks; the gang's response is to laugh and say "Naaahhhh!!!" in unison after which the man says that nobody in their right minds would want to see that.
* Scooby-Doo! Mystery Incorporated, Professor Pericles brags that he is "The Smartest Criminal Parrot in the World".
* Scooby-Doo! Mystery Incorporated, Scoob is spooked when a sign for "The Drowsy Gator: Pool, Food and Sundries" suddenly reads "The dog dies".
* Scooby-Doo! Mystery Incorporated, Scooby laughed at Shaggy when he revealed that he used to play role-playing games.
* Scooby-Doo! Mystery Incorporated: Scooby tries this when asking for love advice.
* Scooby-Doo! Mystery Incorporated, Scooby was on the outs with Shaggy, who he had discovered was romancing Velma, and with Velma in a jealous snit over Shaggy. Fortunately, fences were mended soon after.
* Scooby-Doo! Mystery Incorporated seems to have developed one with Velma come Season 2. It's even invoked in the altered opening credits (for the US episodes) wherein she temporarily replaces Daphne and hugs a picture of Velma in the same way Daphne hugged a picture of Fred.
* Scooby-Doo! Mystery Incorporated seems to spend more time on the angst involved with Daphne's unrequited love for Fred, as well as Velma competing with Scooby for Shaggy's attention, than the actual overarching mystery in the first half of the season one. The second half got better about this, while the entire second season avoided it completely as the overarching mystery got a lot more focus.
* Scooby-Doo! Mystery Incorporated, Shaggy and Velma, as having developed a romantic connection.
* Scooby-Doo! Mystery Incorporated: Shaggy has one as an instructor (who refers to him as 'Private Hippy') when he is sent to military school in "The Night the Clown Cried".
* Scooby-Doo! Mystery Incorporated: Sheriff Stone of Crystal Cove is so inept that Scooby-Doo looks him in the eye and calls him the worst police officer he's ever met. Stone's response is to growl that the talking dog has been talking to his lawyer again. The sheriff is more willing to allow fake monsters to terrorize Crystal Cove as it would attract tourists to the town, no matter how dangerous they truly are. He improves in the second season, but it's obvious that he's mostly doing it to impress the new mayor, Janet Nettles, whom he has a crush on.
* Scooby-Doo! Mystery Incorporated. She then uses it to shoot the robot coming up behind them.
* Scooby-Doo! Mystery Incorporated. She was wearing a high-tech black leather

dominatrix-type of costume arranged in rings around her body.
* Scooby-Doo! Mystery Incorporated so it doesn't look too different from the original.
* Scooby-Doo! Mystery Incorporated teaming up to find their kidnapped teenage pals. Episode 26 has Scooby vowing to get the gang back together and hunt down Professor Pericles after revelations about Fred's past and the two parts of the Planispheric Disc are brought up and cause the gang to break up acrimoniously. Episode 33 has Velma and Scooby taking on the mystery when Shaggy, Fred and Daphne are otherwise pre-occupied.
* Scooby-Doo! Mystery Incorporated: The Cicada Creature from "When the Cicada Calls".
* Scooby-Doo! Mystery Incorporated the gang catch the "Dreamweaver" because he was the only left-handed suspect.
* Scooby-Doo! Mystery Incorporated The Hex Girls and features Daphne singing. On the other hand, it features Daphne singing in a skimpy, gothic outfit.
* Scooby-Doo! Mystery Incorporated: The motive of the antagonist of "Where Walks Aphrodite", Amanda Smythe, was getting revenge on the citizens of Crystal Cove for electing her as prom queen in high school as a joke and then humiliating her by pulling a monster mask over her head when she was not as attractive as she is today. While Velma points out that Amanda is now considered beautiful, she responds by saying despite that fact being true, the scars from that incident ran deep.
* Scooby-Doo! Mystery Incorporated: The real culprit behind the mask is usually someone who is only seen once or has little to no connection to the subject the Mystery Inc. are investigating. In fact, one of the villains was seen earlier in a mascot outfit for only a few seconds.
* Scooby-Doo! Mystery Incorporated: The Season 2 premiere "The Night the Clown Cried" was released on CartoonNetwork.com four months before airing on TV.
* Scooby-Doo! Mystery Incorporated, the town hides a dark secret to which is connected to the Planespheric Disks. To which the old Mystery Inc would kill over for.
* Scooby-Doo! Mystery Incorporated: The town of Gatorsburg used to mine alligators... until they ran out of alligators and the economy went bust.
* Scooby-Doo! Mystery Incorporated, this happens to Shaggy and Velma in episode 2, then to Fred and Daphne in episode 13 before Fred is distracted by his dad.
* Scooby-Doo! Mystery Incorporated this is averted with the Kriegstafflebots, who were designed for water travel and exploration, equipped with underwater propellers and durability at high pressure.
* Scooby-Doo! Mystery Incorporated, Velma and Shaggy are secretly a couple for the first half of season one.
* Scooby-Doo! Mystery Incorporated, Velma is all but stated to be Scooby's second best friend. He gets better, of course.
* Scooby-Doo! Mystery Incorporated: Velma's attitude toward Shaggy when they're dating, trying to smarten him up, first by making him stop using "like" as a coma, then changing his wardrobe, despite Shaggy's many complaints (not least because Velma's change of pants are incredibly restrictive). Like, Shaggy's quite happy being a gluttonous slacker who hangs out with his dog all day.
* Scooby-Doo! Mystery Incorporated was an army of skeletal cattle that were in reality a genetically engineered cross between cows, bees, and piranhas.
* Scooby-Doo! Mystery Incorporated was spared, despite her short skirt, with Grimm calling her a homely "model of purity."
* Scooby-Doo! Mystery Incorporated what they intended to happen when they were making the show.
* Scooby-Doo! Mystery Incorporated when a "big shot television producer" suggests that Scooby and the gang's adventures would make a great children's show. Immediately everyone agrees this would be a bad idea.
* Scooby-Doo! Mystery Incorporated, when Fred's father compliments him, Fred asks him if he finally accepts what Fred wants to do with his life (solve mysteries using ridiculous traps) and gets this trope in reply.
* Scooby-Doo! Mystery Incorporated. When he's terrified, she finds him adorable.

* Scooby-Doo! Mystery Incorporated, which is kinda funny considering this show's incarnation of her is probably the most feminine she's ever looked in the entire franchise.
* Scooby-Doo! Mystery Incorporated; while at the same time deconstructing many of the series' well-worn tropes for both laughs and drama.
* Scooby-Doo! Mystery Incorporated, with Fred the guy responsible for them.
* Scooby-Doo! Mystery Incorporated work, in the intended way or otherwise, and may fail even if he hadn't explained exactly how they would work.
* Scooby-Doo: Mystery Mayhem are immune to the Tome of Doom and can't be sucked into it until Scooby and Shaggy have put out the ghosts' flames by luring them near activated sprinklers.
* Scooby-Doo: Mystery Mayhem contains a dedication to the memory of Robert Lamoureux (no connection to the French actor of the same name).
* Scooby-Doo named Mary Jane and their romance is unnecessary, but she at least takes some part of the plot. Velma is the strangest: she has a short conversation with a random guy halfway through the movie, mostly for exposition, and winds up with him at the end.
* Scooby-Doo near the end, he flexes and poses before suddenly gaining a muscle gut.
* Scooby-Doo! Night of 100 Frights has one, as a tribute to the original series (see below), even during gameplay. For instance, it usually pops up whenever Scooby accidentally runs into something and bumps his head.
* Scooby-Doo! Night of 100 Frights, there are areas which are covered in oil or are just generally slippery, which hinder Scooby's progress until he manages to find the professor's Plunger invention - after which walking on slippery surfaces becomes a cinch. Ruins going down the slide in the playground, mind you.
* Scooby-Doo! Night of 100 Frights: Toward the end of the game, Shaggy is found hanging over a tank of water with a shark in it. Scooby has to jump over the top of the tank, grab Shaggy's legs, and swing his way over to two buttons. The first button somehow causes the shark to vanish, while the second button drains the water so Shaggy won't drown.
* Scooby-Doo once got involved with a prehistoric shark (or so it seemed).
* Scooby-Doo on Zombie Island (1999), the only DTV movies in the series to be entirely animated with traditional hand-painted cels.
* Scooby-Doo on Zombie Island, Beau is suspected by Velma to be somehow involved in the onset of the zombies. At one point, Beau lifts up a large rock and appears ready to chuck it at her, but he instead throws it further out to show Velma that she was about to walk into quicksand. Velma's suspicions are somewhat mitigated.
* Scooby-Doo on Zombie Island become this trope a part of her backstory.
* Scooby-Doo on Zombie Island features this as well. Simone, Lena, and Jacques are the real antagonists, who must drain the life force from other humans at the harvest moon to preserve their immortality. The zombies on the island are the restless spirits of their victims, and were only trying to keep the gang from suffering the same fate.
* Scooby-Doo on Zombie Island. For how much of a grumpy, tourist-hating curmudgeon he is, Scruggs is still above letting a dumb tourist (and his dumb dog) get eaten by alligators on his watch.
* Scooby-Doo on Zombie Island, Freddy, Daphne, and Velma are tied up, as wax voodoo dolls of themselves are tossed dangerously close to a fire (Oh, and btw, the supernatural stuff is for real this time.) The actual character's faces visually start to melt before Scooby runs in and pulls the voodoo dolls away from the fire.
* Scooby-Doo on Zombie Island, Fred is convinced that a zombie is just another guy in a costume, like everyone they ever ran into before. When he tries to pull off the "mask," he accidentally takes off the entire head. Naturally, everyone present freaks out at this and they start tossing the head around between them until it lands on the zombie, which nonchalantly puts its head back on.
* Scooby-Doo on Zombie Island had to have about five minutes trimmed off in its UK release to avoid a 12.
* Scooby-Doo on Zombie Island having them as adults who grew apart as they aged.

* Scooby-Doo on Zombie Island is covering up a counterfeiting operation.
* Scooby-Doo on Zombie Island: Simone and Lena fake a breaking and entering and kidnapping. When the gang come to rescue them, it turns out to be a trap.
* Scooby-Doo on Zombie Island, since that movie was advertised as "The Monsters are Real". And so, when Fred PULLS a head off, it's shocking for all present.
* Scooby-Doo on Zombie Island, the gang loses footage of all the paranormal things they witnessed after their camera falls into quicksand.
* Scooby-Doo on Zombie Island: The main antagonists are revealed to be werecats, or more specifically "cat creatures" as they're called here.
* Scooby-Doo on Zombie Island they were supposed to guard while Velma is working at a small book store that's close to going out of business.
* Scooby-Doo on Zombie Island The zombies also only rise on the day of the harvest moon, and don't seem to have the need to eat, and as mentioned above can also manifest as ghosts.
* Scooby-Doo on Zombie Island, turns out to be an FBI agent investigating the disappearances on Moonscar Island.
* Scooby-Doo on Zombie Island was dedicated to Don Messick, the original voice of Scooby.
* Scooby-Doo on Zombie Island: with Lena as she is showing Fred to his room
* Scooby-Doo on Zombie Island work. Now in their 20s, Mystery Inc reunites to visit an island full of real zombies.
* Scooby-Doo, or because he mistook the squeaking sounds made by her suit as Velma farting?
* Scooby-Doo! Pirates Ahoy! has Shaggy and Scooby sliding down a mast rope with a mop handle.
* Scooby-Doo! Pirates Ahoy! probably because the pirates really can't do anything violent on Scooby Doo.
* Scooby-Doo plan after absorbing all the souls with the Daemon Ritus.
* Scooby-Doo, plots would often involve this trope, often invoked word for word by Fred.
* Scooby-Doo properties still consistently running in some capacity today.
* Scooby-Doo ran on this trope. Every competition was some strange game.
* Scooby-Doo says this in "Foul Play In Funland" after the amusement park manager asks the kids to help him retrieve his robot Charlie, who had run amok in the park.
* Scooby-Doo's company had filed for bankruptcy, thus providing a motive.
* Scooby-Doo: Scooby believes to see Don Knotts but as an owl hoots, he responds about the said celebrity guest. Velma learns about the owl.
* Scooby-Doo Scooby-Doo to complete his plans, but because he wanted to make Mystery Inc witness his triumph, he arranged for the team to come back together despite them having broken up two years ago, which drove Fred, Velma, Daphne and Shaggy to come back together as a team in time to save Scooby.
* Scooby-Doo, Scrappy is shown carrying Scooby and Shaggy at the same time!
* Scooby-Doo seems to be able to read absolutely any language, no matter how obscure or ancient.
* Scooby-Doo series. Among other things, Velma once approached a statue and thought it was Shaggy, petrified with fear.
* Scooby-Doo series before the role was recast with North. Many viewers don't know they're hearing a whole other actress in the role of most of the classic episodes.
* Scooby-Doo series— one instance had the gang forming a chain to rescue Scooby and a bunch of pups from a river.
* Scooby-Doo: Shaggy and Scooby-Doo, but only because they love food like this. If they had to cook for someone else, they would probably spare them from eating something like chocolate-covered eggplant burgers (with hot sauce!). And then there's this classic exchange from the episode "A Clue For Scooby-Doo", when Velma hears Shaggy waxing rhapsodic over chocolate-covered hotdogs.
* Scooby-Doo, Shaggy taunts the villains by singing, "Nah nah, we have Scooby-Dee!"
* Scooby-Doo. She carries a whole computer system on her person which she whips out to deduce clues and is usually the one to explain whodunnit and how.
* Scooby-Doo (she inherits her uncle's laboratory and continues her uncle's

experiment of creating a monster). More recently, a made-for-DVD movie centering on Daphne and Velma was released. And now Velma is getting her own standalone series on HBO Max later in 2021.
* Scooby-Doo show to have at least one episode where the costumed crook's true identity was a person who had earlier pretended to be an ally toward the Mystery, Inc. gang.
* Scooby-Doo's most common adversaries, perhaps because it's such an easy Monster Suit of the Week to whip up in a pinch.
* Scooby-Doo's movies. This ends up backfiring as the Critic's past self is unfamiliar with them since they're made after his time period.
* Scooby-Doo sometimes almost always masked (such as the Wild Brood and their orc biker costumes). Even Sheriff Stone would occasionally use rubber mask disguises to catch a criminal in the act.
* Scooby-Doo's Shaggy twice: In "The Spirited Spooked Sports Show" (1973 episode) and "Spooky Games" (2012 special), he becomes an athletic runner who runs fastest when he's scared.
* Scooby-Doo's silhouette, only for the camera to quickly pan around and reveal that it's actually Scooby.
* Scooby-Doo story (issue 23's "Tribute in Flames") where a monster from a volcano terrorizes a town. Shaggy thinks the monster is a scientist the gang met earlier, so he and Scooby run to confront him:
* Scooby-Doo story "The Star Spangled Spectre" (issue #27), Fred is at an archivist office in New Lichfield, Massachusetts trying to find some information about his ancestors. The clerk tells that Fred is related to the town hero Jacob Richfield.
* Scooby-Doo takes Fred's comments and remarks out of context to defame the gang. For context...
* Scooby-Doo) talk openly, but no one finds this unusual - even though a primary concept of the entire franchise is that the supernatural (usually) doesn't exist.
* Scooby-Doo teaches two lessons that encourage a skeptical mindset: 1) Some adults will lie to you for their own benefit 2) Other adults will believe them, so you have to find the truth for yourself.
* Scooby-Doo! Team-Up (actually a monster that a little boy mistakes for a dog):
* Scooby-Doo! Team-Up", after Superman is mutated into a monster by Red Kryptonite, Krypto and Scooby track him down by following the trail of holes in buildings that he left.
* Scooby-Doo! Team-Up character Velma once asks Sylvester Sneekly who he's talking to.
* Scooby-Doo! Team-Up, Daphne says it's weird that beasts like the Minotaur, a dragon, or harpies could be on Paradise Island, given that they're merely mythological. Wonder Woman points out that some people would call Amazons or talking dogs mythological as well.
* Scooby-Doo! Team-Up", Dr. Zin dresses up Dr. Quest as one of his genetically engineered monsters, hoping that his team would attack him, which would allow him [Dr. Zin] some satisfaction from their reactions when they found out what they had done. Luckily, Velma recognized that the "monster" wasn't a monster when she saw its shoes, and was just in time to keep Race from shooting Dr. Quest with the sonic blaster.
* Scooby-Doo! Team-Up: In Bedrock, a cop tells the arrestee: "You have the right to remain silent 'cause I don't wanna have to listen to you!"
* Scooby-Doo! Team-Up, is finally unmasked and arrested for his several attempts to kill Penelope Pitstop and get her fortune.
* Scooby-Doo! Team-Up loaned the whole team shrinking belts for a subatomic adventure...
* Scooby-Doo! Team-Up. One of the examples of stone age technology introduced to the gang is a newspaper. Flint Pumice, a real estate developer featured in that newspaper turns out to be that story's ghost.
* Scooby-Doo! Team-Up staff all react with horror when they see Superman beginning to transform into a monster.
* Scooby-Doo! Team-Up' time. In some aspects, the stone age is more modern than the

gang expected but the record player makes Shaggy comment to Scooby that they must be really prehistoric.
* Scooby-Doo! Team-Up to "find any useful help on a backward mudball like Earth!". Space Ghost even uses the word "primitives" to describe Earthlings.
* Scooby-Doo! Team-Up to send the meddling kids back to their own time but he mistakenly sends them to the Jetsons' time, allowing the next issue to happen.
* Scooby-Doo! Team-Up: Velma figures out Sir Haunts-a-Lot's secret identity by analyzing ballistics evidence, last weekend's football scores and third-grade report cards.
* Scooby-Doo that they may just be notorious criminals actively wanted in other locales, and are being taken in for something completely unrelated.
* Scooby-Doo, the Gang and the Dynamic Duo has the Joker and Penguin captured and arrested. Batman tells the officers there to take the two away. The two officers lead the criminals away side by side before Batman stops them and tells them he meant the other way, going to this trope.
* Scooby-Doo, the gang investigates hauntings on a Louisiana bayou island, including inside a house. They end up being real there too.
* Scooby-Doo. The Ghost Scene Investigation team had a counterpart for Scooby-Doo in a robot cat named Catscan.
* Scooby-Doo. The inventor turned out to be a scammer upon further evidence turning up. (Oh, the phantom? He was just a nutcase who tried to stop the invention because it would have made airplanes—and worse, stewardesses—obsolete.)
* Scooby-Doo themselves, are an odd case. The mysteries are usually solved by Velma, using clues that Scooby and Shaggy discover completely by accident. Freddie is useless until the final act, when he builds a trap for the villain that never does what it's supposed to but results in the villain's capture anyway. Daphne contributes nothing. As famous as this formula is, it was frequently averted even in the first season and fell apart completely afterwards.
* Scooby-Doo! The Mystery Begins at the end by suggesting they check out some "strange happenings at the museum."
* Scooby-Doo! The Mystery Begins Shaggy reluctantly admits that he was held back twice when the others in the teenage Mystery Gang ask how he has a driver's license already.
* Scooby-Doo! The Mystery Begins: The gang are accused of intentionally disrupting the school pep-rally and of vandalizing it during their late-night break-in. Though they're innocent, they're suspended and then expelled for it, forcing them to investigate and find the real culprit. After they catch their principal in disguise as Specter and he gets arrested, they're finally allowed back in the school.
* Scooby-Doo: The Mystery Gang. Well, sort of. They try investigating, but they mostly just run around. Only Velma really searches for any clues.
* Scooby-Doo: The Mystery Inc crew have to solve a mystery at a haunted island/resort.
* Scooby-Doo, the pair discover the pizza they're eating has spider webs, snails, and tadpole tails as toppings. The pair stop briefly to parse this until Scooby declares it delicious and they resume eating.
* Scooby-Doo (they're standing beside each other when she motions towards them), only for Mr. Mondavarious to mention to Shaggy that Velma's drinks were non-alcoholic.
* Scooby-Doo. They usually are working to take down the supernatural threat, but the kids usually beat them to it. Leaving the audience wondering how incompetent the officer has to be, since the target audience would be unaware of the rules of evidence required.
* Scooby-Doo this a lot nowadays, as the older shows used to do this a fair bit, having the culprit be a character who never appeared but would often be some criminal wanted in twelve states that the police were looking for but the characters have never seen before.
* Scooby-Doo. This is despite Scooby intentionally being the antithesis of what a Great Dane "should" be like. The creators researched Great Danes and made Scooby the opposite of breed standards.

* Scooby-Doo. This was following Kasem having quit the role for a few years, after being forced to voice Shaggy in a 1997 Burger King commercial, and only agreeing to return if Shaggy was portrayed as a vegetarian too.
* Scooby-Doo: Trap doors, curtains hiding monsters, vases that activated secret passages, paintings with moving eyes, it was everywhere. Quasi-subverted in the theme song, however, with an obviously-background-painted Scooby-Doo covered in cotton candy, which is cleared away by an animated tongue to reveal the lighter, animated Scooby.
* Scooby-Doo: Velma and Shaggy were originally intended to be brother and sister. It's why Velma has Shaggy's cough medicine with her in "What a Night for a Knight" and why Shaggy is the one carrying Velma's spare glasses in "A Decoy for a Dognapper".
* Scooby-Doo. Velma naturally is rather displeased and keeps insisting her theory about who was the monster was at least plausible.
* Scooby-Doo villains, who leave out clues all over the place for meddling kids to find.
* Scooby-Doo was filmed in Australia, but is set mostly on a fictional US island/theme park named "Spooky Island". The opening scenes not taking place on the island were also filmed here. Filming moved to Vancouver, Canada for the sequel.
* Scooby-Doo were amateur sleuths, even in the comics. But sometime during the Gold Key run (around issue #14), they lost their amateur status when they became ghost busters for hire.
* Scooby-Doo were both voiced by Don Messick. After his death in 1997, Frank Welker eventually took on both roles.
* Scooby-Doo: When Mystery, Inc. go to Italy, Fred continually manages to misread his perfectly legitimate phrasebook, causing him to do things like requesting to rent a car that can outrace a flying hamster and ordering a potted plant at a restaurant.
* Scooby-Doo when Scooby & Shaggy are on the run from the monster of the week, then set up some kind of elaborate scenario in order to confuse the monster. Notable, in that while the scenarios tend to work as planned, the break in manners that still end up catching the bad guy.
* Scooby Doo, Where Are You!, 1975 retool. The laugh track was abandoned in 1981.
* Scooby-Doo, Where Are You! #6, ("The Ghost of Redbeard," an adaptation of the TV episode "Go Away Ghost Ship") has the gang approaching the penthouse of shipping magnate C.L. Magnus to ask about the titular ghost trying to put his business under when Magnus' butler summarily slams the door on them:
* Scooby-Doo, Where Are You! and legitimately well-made aspects that fans generally appreciate.
* Scooby-Doo, Where Are You!) a number of times. In one episode the kidnapper (disguised as a demon) didn't even bother to cover her mouth, there was just its signature cloud of red smoke appearing around a corner while she was looking the wrong way, and its arms popped out and pulled her into it.
* Scooby-Doo, Where Are You! clue - a pair of suction cups used for climbing — the villain grabbed him. (The maid wouldn't have needed those to climb the way the villain did; she had training in acrobatics from having worked as a circus performer.)
* Scooby-Doo, Where Are You! debut episode "What a Night for a Knight", Shaggy and Scooby notice a missing spot on a museum wall. When they gather the others and bring them to the scene, the empty spot had been filled. "It was a minute ago," Shaggy pleads.
* Scooby-Doo, Where Are You! encyclopedia and a POP! keychain of Scooby.
* Scooby-Doo, Where Are You! episode "A Clue For Scooby Doo" has the gang on a barge setting a trap for the ghost of Captain Cutler using a fire hose and a container with soap. When it gets turned on, the hose slips out of Fred and Daphne's collective grips, leaving Shaggy riding it like a bucking mustang.
* Scooby-Doo, Where Are You! episode "A Night of Fright Is No Delight". As the two green ghosts are fleeing Shaggy and Scooby, they jump on to a stair's banister and slide down in an attempt to escape.

* Scooby-Doo, Where Are You! episode "A Night of Fright is No Delight" had a pair of lawyers named Creeps and Crawls.
* Scooby-Doo, Where Are You! episode "A Tiki Scare Is No Fair", as he and Scooby baffle Mano Tiki Tia.
* Scooby-Doo, Where Are You? episode "Go Away, Ghost Ship," in that the mysterious fog that accompanies the "ghostly" Redbeard's pirate ship is produced by dumping blocks of dry ice into the water.
* Scooby-Doo, Where Are You! episode "Go Away, Ghost Ship", the Scooby gang has to chase a ghost pirate. Their employer, Mr. Magnus, has a big, creepy-looking butler who is an obstacle into going to see him. At the end of the episode, when the pirate is unmasked, Shaggy is surprised:
* Scooby-Doo, Where Are You! episode "Go Away Ghost Ship", the villain (the owner of a shipping line) would dress as Redbeard the Pirate and raid his own ships, both to sell the stolen cargo and collect the insurance money.
* Scooby-Doo, Where Are You! episode "Haunted House Hang-Up," Velma tells Fred and Daphne "I tried to tell you" when they discover a headless spectre is roaming around the haunted mansion the gang is at. (If she did, it was off-screen as at no time did we ever hear her tell them.)
* Scooby-Doo, Where Are You! episode "Mine Your Own Business" takes place in an Old West Ghost Town.
* Scooby-Doo, Where Are You! episode "Never Ape An Ape Man". Fred has the rest of the gang run up some stairs while the Ape Man chases them. When the gang reaches the top Fred presses a button, the stairs fold down and the Ape Man slides down them and into a trap.
* Scooby-Doo, Where Are You! episode "Never Ape an Ape Man", Shaggy gets "grabbed" by a stuffed ape. Upon being told this, he says, "Well, I certainly hope you don't think he had me fooled for a minute. I knew it all the time." Scooby sees right through him.
* Scooby-Doo, Where Are You! episode "Nowhere to Hyde," when Dr. Jekyll was working on a vitamin that a person would only take once in their lifetime.
* Scooby-Doo, Where Are You!, episodes "A Tiki Scare Is No Fair", "Scooby's Night With a Frozen Fright" and "Don't Fool With a Phantom".
* Scooby-Doo, Where Are You! episode "Scooby-Doo and a Mummy, Too", the gang learns that the mummy of Anka turns anybody to stone that disturbs his resting place. The mummy (presumably) turns two scientists and Scooby to stone, but the gang soon learns that they were cast duplicates made of concrete.
* Scooby-Doo, Where Are You! episode "Spooky Space Kook". The flying UFO used the "electronic rattlesnake" noise from the heat ray warming up.
* Scooby-Doo, Where Are You! episodes. Velma kept a bottle of cough medicine for Shaggy ("What a Night For a Knight") and Shaggy kept an extra pair of glasses for Velma ("Decoy For a Dognapper"). They had also been seen clinging to each other in fright when one of the faux ghosts appear.
* Scooby-Doo, Where Are You! episode "The Backstage Rage", in which he printed up counterfeit money underneath a theater and smuggled it in violin cases.
* Scooby-Doo, Where Are You! episode "The Haunted House Hang-Up" after he, Velma and Scooby land in a well.
* Scooby-Doo, Where Are You!" featured the following example: In a dark passageway, Shaggy and Velma decide to hold hands so they don't get separated. Both of them comment on how clammy the other's hands are. Then they emerge from the tunnel...to find that the Headless Spectre had gotten between them and both of them were holding one of his hands.
* Scooby-Doo, Where Are You! films have fewer defenders than the first two and the rest of the series is really polarizing to say the least.
* Scooby-Doo, Where Are You!, Fred had Shaggy and Scooby draw broom straws to determine which of the three would stand guard that night. Scooby drew the shortest straw.
* Scooby-Doo, Where Are You!: In "Decoy For A Dognapper," Shaggy borrows a friend's motor scooter so he can chase down the thugs that dognapped Scooby (who was the bait in a plan to solve the mystery of who is stealing prize-winning dogs). He

crashes the scooter out on a rock.
* Scooby-Doo, Where Are You!: In "Go Away Ghost Ship," Shaggy and Velma are dressed as a chef and maid respectively with Scooby under the cart tureen and Fred and Daphne in the cart's lower part. This is so they can get into shipping magnate C.L. Magnus' penthouse and help him with the mystery of who is raiding his ships.
* Scooby-Doo, Where Are You!: In "Scooby's Night With A Frozen Fright," the gang has delivered a caveman frozen in a block of ice to Oceanland Marine Park where it is put in the park's Arctic room. Later, when the gang returns to retrieve Shaggy's fishing pole, they find the block of ice melted and the caveman gone.
* Scooby-Doo, Where Are You!: In "That's Snow Ghost," Scooby and Velma (the latter chained to a log) are being followed by another log with a pack of lit dynamite tied to it. Scooby plucks Velma's glasses from her face and puts them on so he can examine the dynamite more closely. Obviously, Scooby has no ill effect from using Velma's glasses.
* Scooby-Doo, Where Are You!", It's revealed that Mystery Inc is lost because Shaggy has been reading their map upside down, which Velma points out.
* Scooby-Doo, Where Are You! jump into a pile of hay to fight inside there as they poke out their arms and legs out of it, making it look like a Big Hay-Pile of Violence.
* Scooby-Doo, Where Are You! of something between Fred and Daphne in the 1969 series.
* Scooby-Doo, Where Are You!. Often zigzagged since these variations of Fred also tend to be more proactive to the story.
* Scooby-Doo, Where Are You! replace it with the regular vocal theme song.
* Scooby-Doo, Where Are You!: Scooby's arm gets crushed into an accordion when he punches a mummy in "Scooby-Doo and a Mummy Too".
* Scooby-Doo, Where Are You?, "Scooby's Night with a Frozen Fright," a caveman was thawed from a block of ice and went around causing mayhem.
* Scooby-Doo, Where Are You!, Scooby, Velma, and Shaggy are being chased by an evil mummy in a museum. Scooby hides in a large jar, while Shaggy and Velma hop onto a platform and pretend to be a display of Marc Antony (wearing a centurion helmet and carrying a sword) and Cleopatra (with a purple cloak and feather in the hair).
* Scooby-Doo, Where Are You!, Shaggy attempts to shut a door on a mummy, only for the mummy to punch right through.
* Scooby-Doo, Where Are You!, Shaggy even rides Scooby-Doo like he's a motorbike.
* Scooby-Doo, Where Are You! show (which followed Scooby on CBS) already had a sheepdog, Jughead's pet Hot Dog.
* Scooby-Doo, Where Are You! spin on the show in fanfiction and fan art.
* Scooby-Doo, Where Are You!, thanks in no small part to the bubblegum pop background music during some chase scenes (starting with the second season in 1970 — which makes this show a good candidate for the 1970s entries as well!).
* Scooby-Doo, Where Are You!: The Black Knight Ghost holds the honor of being the first villain in the entire series.
* Scooby-Doo, Where Are You!, the Creeper ultimately turns out to be a bank owner that's been embezzling money from his bank and had been trying to take away evidence that incriminates him.
* Scooby-Doo, Where Are You!, the gang look into the odd goings on of Funland, an amusement park that has been shut down temporarily, and has a malfunctioning robot running around causing damage.
* Scooby-Doo, Where Are You!. This is mostly due to her clumsiness and lack of resourceful prowess, which earns her the nickname, ‘Danger-Prone Daphne’.
* Scooby-Doo, Where Are You!, to his horror. When he chips them loose:
* Scooby Doo, Where Are You! were there from the get-go. Subsequent shows had the laugh track when first broadcast but the laughs were inconspicuously absent when prepared for syndication. On DVD releases, some original episodes feature the laugh track. Others don't.
* Scooby-Doo, Where Are You!, "What a Night For a Knight," has Scooby and the gang at a library researching the origins of a pair of spectacles Scooby found at the museum where the episode's villain, the Black Knight is housed and is believed

responsible for the disappearance of British archaeologist Jameson Hyde-White.
* Scooby-Doo, Where Are You!, which had Daphne tied and gagged along with a sheet put on her. Her struggles and her mmmphing through her gag from under the sheet caught the gang's attention, whereas they otherwise might have ignored her.
* Scooby-Doo, where Shaggy falsely thought Elwood Crane was wearing a mask.
* Scooby-Doo, where the characters comment on the mysterious laughter they keep hearing, even when they don't say anything funny.
* Scooby-Doo (which always works, even though the monster is usually a person in a costume).
* Scooby-Doo, which has even outlived its co-creators, Joe Ruby and Ken Spears, who both passed away in 2020.
* Scooby-Doo. While investigating a scary ride, Scooby and Shaggy find themselves entangled on sausages with the only option being to eat their way out. After one bite, Scooby complains about it being plastic only for Shaggy to quip how Scooby drinks out of the toilet. Scooby's response to the statement is telling Shaggy that he does that too.
* Scooby-Doo while opening for the review of the movie based on the cartoon.
* Scooby-Doo who covered himself in flour. Must have been very convincing because when Shaggy and Scooby get covered in the stuff he thinks they're ghosts.
* Scooby-Doo, who seems to get away with impersonating the bad guys' own human and/or monstrously-disguised henchmen with ease, despite being 1) a terrible actor, 2) impaired by a speech impediment, and 3) a freakin' Great Dane.
* Scooby-Doo, Who's Watching Who?, Monty Caswell is the only black member of the Ghost Scene Investigation team.
* Scooby-Doo will have her continue to deny the existence of the supernatural despite having irrefutable proof in front of her.
* Scooby-Doo with an actual monster. Generally, if Shaggy and Scooby are alone (or with Scrappy), the monsters are real. If Fred or Velma is there, they aren't. The films, both live-action and Direct-to-Video, usually have real monsters regardless of their cast.
* Scooby-Doo! WrestleMania Mystery down, Kane (who they were facing before the bear interrupted) approaches Shaggy and Scooby and says a gruff "Well done".
* Scooby has celebrated his fortieth birthday. He's still alive and the members of Mystery Inc. are still teenagers. Also, their ages are always the same, despite the various series having had more than one
* ScoobyNatural bangs his head against a tree when Sam and Dean tell the gang that they hunt for real supernatural beings.
* ''Scoobynatural'' there are fics pairing Dean/Daphne and Sam/Velma, even though canon-wise both pairings were unrequited with Dean crushing on Daphne and Velma crushing on Sam.
* Scooby's All-Star Laff-A-Lympics. In the middle of the Scooby-Doo cartoon, the film suddenly froze as it became jammed in the telecine. A black screen followed, then a bumper slide of the show appeared with the ABC announcer telling kids and their parents that they were experiencing technical problems and were working to resolve it. No footage of this is known to exist.
* Scooby's All-Star Laff-A-Lympics. The cheaters mistakenly switch the signs back, resulting in disgust from their teammates (although they DO get a 50 point bonus for "chivalry" because the judges think they did it to help their opponents).
* Scooby's All-Star Laff-A-Lympics. The Rottens cheated in absolutely every event, and almost always came in last. However, this is one of the few shows in which while the results were subsequently discounted due to the team's cheating, several of their tricks during were accepted as not actually being against the rules, and indeed were able to come in first place at the end of the episode, albeit very rarely.
* Scooby Stack: A group of people look from behind a wall and their heads are somehow in a column.
* Scooby Stack: A group of people peek from behind a wall and their heads are somehow in a column.
* Scooby Stack: A group peeks around a wall with all their heads inexplicably in a

column.
* Scooby with Team JNPR parodying Mystery Inc., Zwei as Scooby-Doo, and a Beowolf Grimm as the monster. There's also a random appearance by Qrow wearing nothing but a speedo, a cape and a pair of goggles.
* Scooner Seawell Georgia Washenting Christiffer Columbia Daniel Boom, usually called Swee'pea
* Scoop features Henry Boot placed, unwillingly and ill-equipped, in this role, plus a number of variations on the theme as supporting characters.
* Scoop had a recently deceased legendary reporter interview a recently deceased secretary who thinks she was poisoned because she found out information that could lead to a notorious serial killer. The reporter escapes back to the land of the living a few times to reveal hints, clues, or whacks with a guilt club to the school newspaper reporter he randomly appeared to the first time appeared.
* Scoop is in desperate need of a nice cold drink after becoming lost in the country and stumbling around for hours. Unfortunately his hosts assume from his dishevelled state that he must be drunk already and refuse to give him one.
* Scoopl, Norwegian actor Sverre Anker Ousdal plays insane Swede Erik Olafsen. Funny thing is, Olafsen is a rather Norwegian spelling, the most common Swedish equivalent would be Olofsson. Not to mention that there is nothing in the plot that requires the character to be a Swede - making him Norwegian would at least be more accurate.
* "Scoop Troop" aka Steve, Dustin, Robin and Erica brutally steal the show in Season 3 with their adventures underneath the mall, thwarting Russians which overshadows the exploits of the rest of the cast in the process.
* Scoop, Woody Allen's character Sid has an interesting take on optimism:
* Scootaloo at the start of "Parental Glideance," followed by an inversion after the commercial break.
* Scootaloo, Derpy's goofy little niece with a talent for speed on her scooter and who loves keeping her friends and family happy.
* Scootaloo eventually learns that one of her parents was a Changeling, and she inherited some of their traits. She is initially shocked and repulsed, before putting it aside and focusing on the battle at hand.
* Scootaloo gives of several squees when she meets Rainbow Dash's parents in "Parental Glideance". They're so high-pitched that she ends up
* Scootaloo is still remembered for her troubles with flying, her name being part of the colloquial term for the
* Scootaloo might have weak puny wings, but on the ground, she gets serious horsepower out of them. Especially with a fully loaded little red wagon attached.
* Scootaloo, normally voiced by Martina Felli, is replaced by Renata Bertolas up to Season 3 and Maria Silvia Roli from Season 4 onwards.
* Scootaloo not only beats Rainbow Dash in a race, but leaves her unconscious in a ditch.
* Scootaloo refers to Rainbow Dash's daughter Prism as "Rainbow Junior" or RJ for short.
* Scootaloo starts to border on this in the seventh season, following Rainbow Dash's parents all over the place. Her scrapbook already contains a lock of Rainbow's mane, and she adds a chunk of a sandwich made with Rainbow's favorite recipe and one of her (used?) diapers over the course of the episode.
* Scootaloo stumbles into a mild version when the Crusaders end up separated in the abandoned castle — she ends up wandering a seemingly endless maze of identical hallways, only to realize something's wrong, and discovering that she's actually in an old dungeon cell with an illusion on it.
* Scootamom: Cadence and Shining Armor, again, much to Scootaloo's disgust whenever she has to witness it.
* Scootamom manages to warp time and space around itself. It makes ordinary ponies ill just looking at it.
* Scooter, and the Ratty song "Sunrise (Here I Am)" was originally released in instrumental form under the Scooter nameplate as "Sunrise (Ratty's Inferno)".
* Scooter as the much more famous "Sunrise (Here I Am)" under their Ratty alias.

* Scooter hilariously murders a touching family moment between Ellie and
* Scooter sends you to take photographs to give him inspiration for a love poem he's writing for a woman. When you deliver it to her, she goes into her home and shoots herself with the pistol she was previously holding.
* Scooter's "Firth Of Clyde" for those who pre-ordered "The Ultimate Aural Orgasm" from iTunes Germany.
* Scooter side project Ratty is a vocal remix of "Sunrise (Ratty's Inferno)", the B-side to Scooter's "She's The Sun".
* Scootertrix the Abridged) and different characters have different levels of success in wielding that power.
* Scootertrix the Abridged and fast-forwards through the rest of their scene. Among the fast-forwarded bits is a brief shot of sinister-looking black vines overrunning Ponyville that never gets explained or referenced again.
* Scootertrix the Abridged. But she also knows that the Script "changes all the time", in response to characters' choices: essentially the characters are creating the Script, rather than it controlling the characters.
* Scootertrix the Abridged come back to bite them in unsee-able circumstances.
* Scootertrix the Abridged: In episode 11, everypony besides Twilight is suddenly wearing a "winter vest" (with a matching arm band), and will eagerly talk at length about how great these vests are. Twilight isn't interested at all, but she eventually decides to buy a vest anyway, just to stop everyone from bugging her. But when she goes to buy one, Rarity refuses to sell one to her because the vests are already out of fashion.
* Scootertrix the Abridged on Twilight by asking whether she trusts magic or science more. She can't answer.
* Scootertrix the Abridged. To the surprise of no one who remembers history, this plan fails, and Equestria gets bogged down in a war of attrition instead.
* "Scop": crap, junk, detrius, etc. A common insult on the streets of NC is "scopmuncher" which is as insulting as it sounds.
* Scope Snipe. A massive bounty was put on his head, with several of the Viet Cong's top snipers sent after him, but he managed to outshoot them all. He also used an M2 Heavy Machine Gun for sniping, meaning that when he hit the .50 BMG bullet blew the target apart and if he was attacked at close range, he would just flip the gun to full auto and open up.
* Scope Snipe, but acknowledged that their initial testing was done with modern scopes and not the shorter, wider scopes with fewer lenses from the correct era. It was confirmed on a revisit.
* Scorbunny garnered a furry fanbase the moment from the first trailer for
* Scorched: a long-time employee of the bank is promoted to Assistant Manager, receiving a vast list of new responsibilities ... and a 55 cents an hour raise.
* Scorched details three different plots to rob a bank, all of which were initiated by bank tellers.
* Scorched Earth and other tank games can cause a cascading ladder of death from a single kill.
* Scorched Earth are capable of tool use (they have opposable claws on their forearms), complex language, and sophisticated ambush tactics. Dahkeya's notes describe an incident where they broke a water pipe into the village purely so they could attack the humans that came out to fix it.
* Scorched Earth has several option settings for this. It can avert the trope, play it straight, or invert it (with a whistle that ascends in pitch as the bomb falls).
* Scorched Earth, in addition to normal energy shields, you could use a literal Deflector Shield which would deflect missiles off course from your tank.
* Scorched Earth is a very randomised weapon. When it hits, it fires out shots of its own in random directions. It might take out five opponents, it might only take out the one it landed near, it might do nothing, or if you're exceptionally unlucky, it might even end up taking you out.
* scorched earth on entire islands concerning the World Government's founding.
* "Scorched Earth" plays it straight. The entire plot of the episode revolves around convincing the Ominous Floating Spaceship not to terraform a resettled

civilization out of existence (not that the AI commanding it wants to, it's just too far into the process to start again somewhere else, so stopping would doom the species in hibernation on board).
* scorched earth tactics and guerrilla warfare to wear the French down and deny them supplies. Napoleon eventually took Moscow, but failed to destroy the Russian army, and with winter setting in, they were eventually forced to retreat. In the end, only about 27,000 French soldiers made it out, with Napoleon (and France's) reputation severely damaged.
* Scorched, leaving any invading army without any means of pillaging for resupply.
* Scorch, which destroys the highest unit(s) on the playing field is the prime offender of this. It's gotten to the point that there are message board's dedicated to explaining that if the highest unit is on your side it will be destroyed. To a lesser extent this applies to epidemic which targets all of the lowest unit(s).
* Score! A Hockey Musical, the establishing shot of the Brampton Blades' home arena is actually a shot of the Port Credit Arena in Mississauga, Ontario (which makes this a case of California Doubling between two Canadian municipalities!).
* Score any kill on humans with electricity and see their heads go "pop" like a lightbulb.
* Scorecasting uses a large volume of statistics to argue that virtually all of home-field advantage in sports in due to the effects of the crowds on the subconscious perceptions of the game officials. The book notes that, for example, the statistical "strike zone" formed by charting the path of each pitch, and whether it was a called ball or strike, is consistently slightly larger for home teams. It also notes that certain things which are completely objective and officials don't have a subjective determination to make (whether a unblocked field goal attempt is made or missed in American football, whether a free throw is missed or not in basketball, etc) happen at the same percentage for home and road teams.
* scorekeeper) Samantha doesn't exist (Humph once explained to a fan that Samantha was real, but pianist Colin Sell wasn't, and this was happily accepted), there is no "laser-display board" and, above all, that Mornington Crescent is anything other than a well-known game with a storied history and clearly defined rules.
* Score Multiplier, and using Hard or Very Hard judge makes incorrect sync stand out even more.
* scorgs by Aleksey Kalugin shows the Moscow Zone full of plant and, occasionally, animal life with only a few examples of bio-tech mixes. Kalugin's nanobots (the word "scorgs" is never mentioned) only care about consuming metal and reanimating machines.
* scoring a crazy goal Ulrik Wilbek in a big tournament - Mikkel Hansen is now regarded as one of the absolutely best handballers in the world
* Scoring a Jackpot during multiball shows a person being thrown through a plate-glass window.
* scoring drugs, including additional difficulty modifiers based on what the player is trying to get.
* Scoring high in the games themselves is a Self-Imposed Challenge. Scoring high in
* Scoring PointsComplete in-game objectives to get abstract points and win the game.
* Scoring Points: It's all about the points, baby! Rack up those zeroes!
* Scoring Points the trope. Yet even today, many casual games and shmups still play it straight (mainly as a sop to hardcore players so they can compare scores). Non-redemption arcade games also still focus on scoring points to this day, with the exception of fighting games, as it's an easy way of showing off your superior skill (or luck).
* scoring system for basketball gives 8(!) points for scoring in the last 3 seconds. Still, that does double as both making those last few minutes really exciting, as well as giving you good reason to watch all the way to the end.
* Scorpia has a bit of this too. In the middle of realising Seahawk is with
* Scorpia Rising [Originally intended to be the last book in the series before Horowitz had a change of heart several years later.]

* Scorpia Rising, pulls a gun on the others, holding them at gunpoint while he prepares to flee. He's shot by a sniper posted nearby seconds later.
* Scorpia, the fifth book, when Alex learns from his boss what happened to the villain of the story after the fact:
* Scorpia, when Julia Rothman tells Alex that Scorpia intends to activate a bioweapon that will kill a significant portion of the population. Alex, knowing that the weapon is designed to specifically target schoolchildren, blurts out that they can't murder children, causing Rothman to realise that Alex is a triple agent for MI6 and that MI6 have figured out how the weapon operates.
* Scorpia, who provide's this trope's page image, fits this trope to a t. In the original she was a slaver who was constantly at odds with Catra. In the reboot, she is endlessly nice to everyone, has a very strong (though mostly one-sided) friendship with Catra, and is a
* Scorpio Milo in the Italian dub is probably the hammiest, most scenery-chewing villain of the entire cast, which is also this trope because he speaks in a much less emphatic way after his defeat and
* Scorpio Milo was a man in the original manga and anime, but was changed into a woman in the 3D movie
* Scorpiomon (who had just eaten, and is not in the greatest shape in the first place) chasing Joe, Mimi, Palmon, and Gomamon (who are all exhausted) in
* Scorpion and has to rely on child prodigy Ralph to direct him so he can drive.
* Scorpion, and realizes he wasted a significant amount of time he could have otherwise spent with her in her last days.
* Scorpion, and this was how they planned to deal with him. They actually went into the cremation oven before the rest of Team Scorpion were able to save them.
* Scorpion best friends with someone before like she is with him and doesn't want to jeopardize that by getting romantically involved.
* Scorpion boss, if Scorpion loses they'll get no more government contracts, which would lead to the end of the team.
* Scorpion: Cabe and Walter pull one on the freeway after Cabe's car is totaled in "Rogue Element".
* Scorpion: Despite being widely recognized as the genius leader of Scorpion, Walter remained a subject of mockery in his home village in Ireland, at least before he saved the villagers from yet another disaster.
* Scorpion episode, "Crazy Train" deals with the team having to figure out how to stop a runaway subway train that Paige and Ralph are on.
* Scorpion eventually averts this... just to receive the Venom symbiote. Rhino, too, recently managed to get rid of the costume and
* Scorpion has him as one of these. The opening scene of the first episode (and used in the opening monologue of each episode since) had him being arrested at the age of 11 for hacking into NASA's computers to get their blueprints for the space shuttle (he wanted a copy for his bedroom wall). In the present, Paige's 10-year-old son, Ralph, is shown to be one as well.
* Scorpion have enough brain power for seven ordinary people and enough social skills for maybe one.
* Scorpion). Her ability to work with their quirks in stressful situations led to her being hired specifically for this trope. Tellingly, in the first-season finale, attempting to take charge of the situation without Gallo's authority or Paige's people skills ends with Toby and Happy getting arrested.
* Scorpion: In "Dam Breakthrough", the team needs helium balloons. Toby inhales from a tank and starts singing "Grandma Got Run Over by a Reindeer". Cabe, looking incredibly serious, also inhales some and continues singing. Happy breathes some in and finishes the verse, culminating in a rare slight giggle from her.
* Scorpion: In "Dominoes", the Scorpion team sets up an elaborate Rube Goldberg - initially triggered by falling dominoes - to dump artificial snow inside the garage to help Ralph celebrate Christmas.
* Scorpion: In "Plutonium is Forever", a lockdown traps Cabe inside a nuclear power plant when the reactor goes into meltdown.
* Scorpion: In "Rogue Element", Happy borrows Cabe's ID and uses it to gain access

to a crime scene by posing as a Homeland Security agent.
* Scorpion: In "Young Hearts Spark Fire", Toby begins to declare his love for Happy, when he is interrupted by a fire extinguisher being sprayed in front of his face.
* Scorpion itself. This theory is heavily disputed, however, and most torpedomen familiar with the Mark 37 torpedo deny that this could have happened given the failsafes of the design. Other theories suggest a major mechanical failure or hostile action by a nearby Soviet task force. The only thing that is certain is that both the US and Russian governments know more about what really happened than they will ever admit.
* Scorpion light armored fighting vehicles (which, technically, aren't stated to be tanks) show up on the planet Mobius Beta in
* Scorpion Megan to go over his head. The expected friction between the two of them is cut short when Megan dies; afterwards, Walter comes to view Sylvester as a brother.
* Scorpion men are cannibalistic omnivores, eating both their own kind and members of other sapient races.
* Scorpion Men (from Sumerian/Mesopotamian mythologies): Described as creatures with human heads, lion bodies, eagle hindquarters, and with a scorpion tail.
* Scorpion Morris for a four-episode arc in Season 2. And yes, that's his legal name. He had it changed.
* Scorpion: "My name is Walter O'Brien. I have the fourth highest IQ ever recorded: 197. Einstein's was 160. When I was 11, the FBI arrested me for hacking NASA to get their blueprints for my bedroom wall." All the members of Team Scorpion were born with the curse of being too clever to understand ordinary people, to some extent or other.
* Scorpion not called Paige Deneen or Cabe Gallo are this, for the benefit of the audience who otherwise wouldn't have a clue what they're up to that episode.
* Scorpion of s4e01 "Extinction", the solution to the Disaster of the Week literally goes up in flames when a piece of equipment falls down the Arctic fissure full of methane they're trying to seal up. The fissure explodes, causing a sheet of flames to shoot up into the sky. A drill bit gets launched into the air, where it falls back down and buries itself in the ice between Toby's legs.
* Scorpion, one of the team would regularly stay behind at the garage and act as this for the others on a job.
* Scorpion (Part 1)", a three man Away Team investigates an alien bioship, so there's no-one to watch Ensign Kim's back when the other two go to investigate the vessel while Kim downloads information from a data node. Suddenly Kim starts to hear creepy alien roars as the bioship's pilot becomes aware of their presence. In a subversion however Kim isn't attacked until the Away Team joins up again, so this trope was only used to build up the suspense.
* Scorpion People) and the formians, a race of Law-aligned Outsiders in the form of human-sized ants.
* Scorpion plan, which was rather more professional and prepared for, goes disastrously wrong due to bad luck, oversight and/or sabotage.
* Scorpion, Ray books the team on a flight to San Jose, Costa Rica, instead of San Jose, California, because he says that San Jose, CA is just a myth; it isn't real, like Tallahassee. When told that that's a real place, too, he doesn't believe it.
* Scorpions album became one of the most popular pages on the site after the UK-based Internet Watch Foundation blacklisted it for containing "a potentially illegal indecent image of a child under the age of 18", and the image was even spread across other sites as a result of the publicity. The IWF de-listed it three days later.
* Scorpions, became one of the biggest pages on Wikipedia the moment the Internet Watch Foundation had it banned. It had 372,000 views one day in December 2008!
* Scorpions, but is nowhere near as iconic as "Rock You Like a Hurricane." Still, "Wind of Change" is their most played song online.
* Scorpions by Mike Cook revolves around giant scorpions being unleashed from beneath the earth by an earthquake. They menace the Nevada town of Laughlin.

* Scorpion Shards accidentally drove his parents insane and eventually killed them before he realized that his mere touch could break minds.
* Scorpion's original Fatality, where he reveals there's nothing but a bare skull under his mask, served as a
* Scorpion's rope spear from the games becomes a living snake-like tentacle in
* Scorpions scored their first hit in 1984 with "Rock You Like a Hurricane", which reached #25 on the pop charts. In 1990, the German group scored another hit, "Wind of Change," which peaked at #4.
* Scorpion Swamp installment of the series. Features unusual, multiple alignment-based paths and endings.
* Scorpions, "Wind of Change". Even though this song became the hymn for the Berlin Wall fall, vocalist Klaus Meine said that the song had actually been written long before, and he happened to stumble on it when looking at some annotations.
* Scorpions wrote a lot of them, for instance "Top of the Bill," "We Let It Rock...You Let It Roll," "Coming Home," "Can't Live Without You," and "Restless Nights." The most frequent theme in these songs is how much they love being on stage and playing for their fans.
* Scorpion). They are interrupted by a schoolteacher shouting about discovering the fireworks going off right outside the school.
* Scorpion was only getting close to him since he was catering a festival which she planned to poison the entire valley.
* Scorpion was the greatest warrior and assassin of the Shirai-Ryu clan before he was killed an resurrected as a specter with
* Scorpion where they really would run around flailing their arms about before expiring.
* Scorpio when they collide with the asteroid and have to spend hours fixing the damage.
* Scorpius also managed a one-handed Neck Snap in the fourth season, but then again, Scorpius is much stronger than the average Sebacean.
* Scorpius, and it is this, as well as his own abusive childhood at the hands of the Scarrens, that fuels his deep hatred for them. Later, he is seen cracking a genuine smile as he caresses a flower that reminds him of his mother.
* Scorpius cheerfully sitting around a table discussing the terms of a Peace Treaty.
* Scorpius had lots of fun with the Aurora Chair — plus the mind-control probes he'd use to make his prisoners torture
* Scorpius himself has a few of these moments, most of them revealing that he has a downright
* Scorpius himself is probably the best liar in the series. In addition to being the resident magnificent bastard. This is largely because he's
* Scorpius - making her a quite literal case of Madwoman In The Attic.
* Scorpius, that in the past was even bigger — the neighboring constellation of Libra was once its claws.
* Scorpius wants to show off his homegrown suicide bombers by using them to disrupt the British General Election.
* Scorponok's Scars that having a race is a good way to release their recent tensions.
* Scotch & Wry not something passers-by would notice) by showing a Lodge Hogmanay party, where the Masons all did this on the "Now here's a hand" part of "For Auld Lang Syne".
* Scotch tape (clear adhesive tape): Used in the USA and Russia; just "Scotch" in France.
* Scot-Irish traditional song "The Parting Glass" doesn't make it clear whether the singer is dying, or simply leaving forever:
* Scotland also has some pretty huge refineries and storage depots for processing of North Sea oil. As civilisation collapsed in a matter of weeks, it's conceivable that there would be enough salvageable fuel to run a limited amount of vehicles.
* Scotland dissolved and banned Catholicism in 1560, though bans on mass were often not enforced. Catholic holdouts still existed in the Highlands region, and

provided support for Catholic monarchs later in the Jacobite Risings. Priests were subject to arrest.
* Scotland during Bane's plane heist). This was incredibly obvious to anyone who lived nearby or who visits regularly. Not that anyone is complaining.
* Scotland, PA, Duncan's Cafe is this until the McBeths remodel it into a fast food hamburger joint.
* Scotland, PA ends with a fight between McBeth and Lt McDuff on the roof of a fast food restaurant.
* Scotland, PA: "I can't believe I drank that water. It tastes like ass."
* Scotland, PA) mentions offhand that he used to be a professional dancer.
* Scotland, PA. The rest of the violence occurs just off-screen, with nary a blood spatter.
* Scotland's design. A fan artist drew an interpretation of Scotland and it's caught on to the point of being assumed canon.
* Scotland war correspondent Kate Adie, who was covering sectarian protests, noted that you could tell when they were going to start by looking at the football schedule. Scottish hooligans gained a global reputation when Rangers fans started rioting in Manchester at the 2008 UEFA Cup Final contested against Zenit Saint Petersburg (another team that gained infamy for their questionable supporters), when a screen showing the match in Piccadilly Gardens failed.
* Scotland Yard: A eurogame where up to six police officers must work together to track down the criminal Mister X (controlled by a seventh player) through a map of London.
* "Scots Wha Hae", by the great Scottish poet Robert Burns, purports to be Robert the Bruce's
* Scott Adams actually advises managers lacking inspiration to do so in
* Scott Adams based many of the characters on his real-life coworkers.
* Scott Adams endorses this trope as a quick, reliable way to make a situation funny in
* Scott Adams, explaining how language may be misused to sell crap and to make bad situations look way better than they are.
* Scott Adams had previously sent out a poll asking his fans whether Dilbert should get lucky. He said in the poll that he'd draw Dilbert's tie straight if he did.
* Scott Adams has often said that the cubicle experience and corporate behavior in
* Scott Adams, in one of his books, suggested a product specifically designed for this purpose, to be called the "Abra Cadaver".
* Scott Adams loves this trope, especially pairing this with the Cleanup in Aisle Three gag.
* Scott Adams's books, he explains that he's too timid and unassertive to complain to the waiter if there's a fly in his glass of wine. Instead he'll drink carefully while talking about the sterilizing effects of alcohol.
* Scott Adams Two of the examples that stand out as examples of this trope are "Amazingly Bad Analogy" ("You can train a dog to fetch a stick. Therefore you can train a potato to dance.") and "Total Logical Disconnect" ("I enjoy pasta because my house is made of bricks.")
* Scott Adams uses a hydrogen-filled drone to supervise his underlings. While looking at Ted, the boss notes Ted is wearing a wool sweater. Evidently, static charge ignited the hydrogen sac, creating a catastrophe. The boss then tells Dilbert to hold the drone's remote control.
* Scott & Bailey: In S03 E08, DCI Gill Murray is threatened by a woman who hid in the back of Gill's car. The rest of the episode shows Gill's team and other police officers trying to work out who the woman is, where she is forcing Gill to drive them, and how to safely rescue Gill, while Gill tries to convince her captor to let her go.
* Scott and Scott's name, while Scott desperately tries to let him in. Eventually they both collapse to the ground and lie pressed against the door on either side, apparently just waiting to die together if they can do nothing else.
* Scott and Taryn broke up in a slightly straighter example as while she was always nice, she apparently no longer wants anything to do with him, but then again

she just found out he's a mutant who could accidentally smash
* Scott, as Ant-Man, jumps and lands on the miniature Thomas the Tank Engine during the climactic fight scene with Yellowjacket.
* Scott Bakula did the same performance with dozens of other actors on
* Scott Bakula. (Reportedly, he was asked due to his previous experience, but he opted not to.)
* Scott Bakula (who played Captain Archer) became a Trekkie in the 1970s when the
* Scott Beach's "Religion and Politics" is a tale where the protagonist is at a political rally when a Conservative tells him he was "full of s#!t" and by the end the Conservative gets beaten to a pulp. Done without taking a breath.
* Scott Cawthon before retiring for good. Cut to 2019, and that last game is now one of the most successful indie game series ever created.
* Scott Cawthon in general has been guilty of trolling fans, though not with the intention of insulting/ridiculing them.
* Scott Cawthon, the start of a critically-acclaimed, wildly-popular horror franchise, and Scott's game-making career rising to indie stardom.
* Scott charges at Ennis and is able to stand his ground, despite the latter's strength.
* Scott Ciencin's comic book adaptations put it, all the adaptations with Ciencin's name on them share is the name of the town and a monster list. Those comics are a prime example of the writer completely missing the point of the source material.
* Scott Dunn episode "Boom!", manages to escape Beckett in a foot chase by getting on a subway.
* Scottex — how the Scott Paper Company is called Italy — is synonymous with paper towel over there.
* Scott Faulconbridge had a routine where he talked about his car. It was worth about twenty bucks. After he filled it with gas.
* Scott Free (Mister Miracle) grew up in (and broke out of) one of these in his first great act of escape art.
* Scott Free while Scott is a very slender and flexible contortionist and escapologist.)
* Scott Hall debuting as one of the "Outsiders" on WCW, had originally used many bits of the Razor Ramon gimmick he used from WWF (Cuban accent, mannerism, etc.). However, due to copyright issues (WWF still maintained the rights to said gimmick), it was dialed down a bit later on.
* Scott Hall Glenn Jacobs, respectively (unlike the previous two examples, the replacements were obvious since their faces and bodies were uncovered). Kevin Nash would wrestle under the "Diesel" name again during the 2011 Royal Rumble and Scott Hall would be inducted into the WWE Hall of Fame as Razor Ramon.
* Scott Hall in the form of a drinking game called "Drinking with the Bad Guy", in which you take shots after certain moments, such as working the wrong (in this case right) side of the opponent, which is accompanied by a voice clip of Scott Hall going "Hey Yo".
* Scott Hall is notorious for retaliation on any victor who defeats him by a surprise pin. For instance, while busy taunting the referee has his opponent take advantage of the distraction by coming from behind and makes a successful pin. To no surprise, Hall, with the aid of his comrade, repays by attacking both the winning opponent and the referee.
* Scott Hall. It was not, however, her pro wrestling debut. She dabbled in valeting and wrestling back around the turn of the century under the name Satin. Her finisher was a "chest-smothering reverse sleeper". While valeting she'd also do it to wrestlers who ended up with their head on the ring apron.
* Scott Hall originally used the Cuban accent he used as Razor Ramon when first debuting as an "Outsider" on WCW. He eventually phased it out altogether (due to WWE still owning rights to Razor Ramon).
* Scott Hall: Started in 1984, made his career with the Razor Ramon gimmick in 1992.
* Scott Hall. That his real-life drinking problem was played for laughs left a bad taste in many viewers' mouths.

* Scott Hall), that if it wasn't for the title, it would probably be better than it sounds.
* Scott Hill doesn’t have much of a career, if at all, outside of playing
* Scott himself ends up getting this during the first stages of his transformation into Santa; when he is getting up out of bed, you can distinctly hear a farting sound.
* Scott himself ends up on the receiving end in Volume 6 whilst battling
* Scott Hope, Buffy's incredibly forgettable high school boyfriend. They flirt and exchange a few gazes in Season 3...until he breaks up with her for being too disinterested. Season 7 has another character reveal he later turned out to be gay.
* Scott in All-Stars to a degree. While his punishment appears to be a continuation of the
* Scottish comedian Danny Bhoy tells the story of a time the power went out in his apartment building. He couldn't find his way to his own apartment, so he knocked on some random guy's door and asked if he could stay there until the power came back on. The two of them were sitting in the dark drinking beer and talking, when the other guy started complaining about all of the Indian people in the neighborhood, how they should go back where they came from, etc. Danny, being half-Indian himself, made an attempt to leave before the power came back on and his appearance was revealed to the guy. Of course, the power came back on at that moment, revealing to Danny that the other guy was
* Scottish comedian Kevin Bridges once did a routine about trying to order tickets to see
* Scottish folk/folk-rock singer Al Stewart has dabbled in the concept album, often dealing with historical themes such as European history 1918-1938 (Between the Wars). Albums such as
* Scottish folklore says that anyone who hears the flowers of the Bluebell ringing will die immediately. Well, then who lived to tell about it?
* Scottish indie band The Yummy Fur, while adored by their small cult audience, were virtually unknown during their 1990's heydey. Lead singer/
* Scottish indie wrestling sensation Grado used Madonna’s “Like A Prayer” as his entrance music for years,
* Scottish mathematician Colin Maclaurin was in the University of Glasgow by 11, and had his master's degree at 15.
* Scottish painter Jack Vettriano's work is criticized as softcore porn. Vettriano makes more money from prints of his paintings than selling the works himself. They are popular in coffee shops and Italian restaurants. Scottish sculptor David Mach has called this attitude to Vettriano’s paintings “art world snobbery”.
* Scottish scientist and Nobel laureate Alexander Fleming discovered penicillin, a turning point in medicine, completely by accident. (Or so the traditional story goes.) According to most accounts, including his own, in his laboratory in the basement of St Mary's Hospital in London (now part of Imperial College), Fleming noticed that a petri dish containing Staphylococcus that had been mistakenly left open was contaminated by blue-green mold from an open window, which formed a visible growth. There was a halo of inhibited bacterial growth around the mold. Fleming concluded that the mold released a substance that repressed the growth and caused lysing of the bacteria. After growing this substance in a culture of its own, he realized its true potential.
* Scottish wildcats have a grumpy frown as their normal neutral expression.
* Scott is kind to his friends, likable, and much more unambiguously heroic in this series.
* Scott Joplin, a much larger library of his work has become remembered by modern audiences, including one of his lesser works, "The Entertainer", even supplanting the "Maple Leaf Rag" in the popular consciousness. (His operas remain niche works, but have been staged and are appreciated for their ambition at a time when Joplin's race was an impediment to being taken seriously as a "legitimate" artist.)
* Scott Joplin had a good career writing light ragtime and other entertainment tunes, and enjoyed far more popularity than would have been expected for a black

man in Reconstruction-era Texas, However, Joplin yearned to be taken seriously as a composer, which, at this time, meant writing romantic operas, so he did. Two of them. However, both flopped spectacularly and were forgotten for decades, until
* Scott Joplin: Ragtime pianist known for "The Entertainer", "Maple Leaf Rag" and "Searchlight Rag".
* Scott Kuehner passed away in January of 2009, leaving the world of
* Scott Kurtz rarely interacts directly with the characters in his comic
* Scott Lobdell himself stated he was very surprised at the amount of controversy the first issue of
* Scott Lobdell is very open and unapologetic about being DC's go-to writer for
* Scott Lobdell look. At the time, he was shot down by his editor and told that ToyBiz would be pissed if the character no longer resembled the Iceman action figure that was currently in stores. Ironically, after learning of the proposed new design, Marvel's marketing department later wound up okaying the idea, as they realized Iceman's new look was more toyetic, and thus would be more appealing to merchandisers.
* Scott Lobdell, Vol. 2, #50 seeing Onslaught trying to kidnap Professor X, which ultimately means Onslaught nonsensically tried to kidnap himself.
* Scott Manley on one of his own videos. In his case, his Scottish accent and use of technical terms confuses the subtitler even further.
* Scott McCloud) and the first person to take comics seriously enough to do literary criticism to them. As any good god seems to be, highly controversial.
* Scott McCloud: At first, he's enjoyed about making the Best Party Ever; then he gets confused about what the friend of him said; then he's shocked because said friend can't come to the party; then he's sad because the party is nothing without him. In one panel, you simply cannot demonstrate four different feelings; break it up, and it works.
* Scott McCloud. At the New Year's party featuring the pie, it passed through 9-Jack-9 to hit the runner up, Zot, in the face.
* Scott McCloud featured a story dealing with a high school girl who is experiencing attraction to another girl. The second girl is known to her classmates to be a lesbian, and is tormented because of it. The first girl is trying to suppress her feelings. The story ends with the second girl passing the first in the hallway, and trying to be friendly. The first girl ignores her, looks very sad, and then the letters page appears, which traditionally is printed at the end of a comic. But after the letters page, the first girl calls back to the second girl, and a later issue shows them to have started a happy relationship. (In the collected edition, the letters page was replaced with commentary by McCloud, so it still works.)
* Scott McCloud is a textbook on the medium of comic books — in the form of a comic book whose main character (McCloud himself) addresses the reader throughout, discussing the techniques the book also demonstrates.
* Scott McNeil (voice acting example, but also starred in some live action works as well)
* Scott McNeil voiced Wolf when he was speaking, with Wolf's singing done by David Pavlovitch.
* Scott Meyer, Al is an AI created by Dr. Lydia Madsen, who realized that a computer doesn't actually need to simulate all of a human brain's activity at the same time, since only a small portion of the brain is active at any given point. In addition, a sizable chunk of the brain is devoted to running the human body, which is of no need to a computer. Thus, her algorithm can run on any commercially-available computer and is fairly compact, while also creating a believable simulation of a child's brain. After resolving the bugs of the previous versions, Al 3.6 has been running nonstop for nearly 6 months, and Madsen feels it's time to unveil him to the public. He's currently at the development level of a first-grader and has trouble with math and spelling. Both of those skills would be trivial for a normal computer, but Al is designed to function like a human, so he can't make direct use of, say, a calculator program or a spell-checker. Unfortunately, Madsen then fails to inform her lab assistants, who are glorified babysitters, that Al's

simulation of the brain also includes the human brain's plasticity and adaptability (she specifically mentions the ability of using technology to allow people to "see" with their tongues), which, coupled with other dubious decisions, results in Al gaining access to the Internet. Now imagine an AI with the mind of a six-year-old discovering this great big world of systems he has a natural affinity to break into, resulting in things like a commercial plane making sharp turns and dips, while "plane noises" are coming through the intercom speakers, or an automated forklift at a warehouse building a giant fort out of boxes.
* Scott Mills Show, Mark Chapman, went to the toilet on Christmas Eve 2009 and hasn't been heard from since.
* Scott once hit a guy so hard he saw the curvature of the Earth, never mind getting punched across the room.
* Scott Peterson tried to throw this out as a red herring in the days leading up to his arrest, speculating that perhaps burglars had been surprised by Laci Peterson and had taken her hostage. Even the woman he was having an affair with called him out on how ridiculous that was when he brought it up, saying burglars would have to be insane to take a woman who was
* Scott Pilgrim: Absolutely everywhere. The characters can see them as well.
* Scott Pilgrim and Envy were this, as Envy is about a head taller than him.
* Scott Pilgrim) and explaining he barely touched Knives during their time together, Mr. Chau goes home and tells his daughter he's OK with her seeing a white guy. Since she doesn't speak a word of Chinese, she has no idea what he said.
* Scott Pilgrim and Gideon Graves both subconsciously create false memories so they don't have to live with their mistakes. The false memories they come up with are kind of... weird, usually reducing the women around them to vapid, smiling fangirls who hang on their every word. Scott gets better. Gideon does not.
* Scott Pilgrim and his gay roommate Wallace have to share a futon because their apartment is apparently too small for another bed. Or Scott being a total freeloader who doesn't want to spring for a bed of his own.
* Scott Pilgrim and Ramona Flowers finally declaring their love for one another in Vol. 4.
* Scott Pilgrim as Scott's plan to cuddle with his girlfriend is ruined by his gay roommate sitting around in his underwear.
* Scott Pilgrim as the series goes on. He regrets naming her after his own sister.
* Scott Pilgrim. At first it seems like only a few people can really fight, but it becomes pretty clear that almost every minor character or random background extra could probably throw down with some bizarre fighting style or weapon if sufficiently provoked.
* Scott Pilgrim books, Ken and Kyle Katayanagi often finish each other's sentences with their reasoning behind it being that they would always work together after Ramona cheated on them behind their backs. This was obviously not in the movie as the only line the Twins have in the film is "Hah!" during a fight sequence.
* Scott Pilgrim both shows some initial hesitance about going all the way (contrasting being gung-ho until he lets his anxiety out the first try), and has been with her for a decent stretch of time.
* Scott Pilgrim by people who criticized his art style and movie deal, causing him to close his account after only a few months.
* Scott Pilgrim, by way of squeezing the film into two hours (and removing quite a bit of characterisation present during the lulls of the comic). Scott still has to do a bit more work to keep her around than in most examples, though.
* Scott Pilgrim crushes the plastic booze cup in his hand when he first tries to talk to Ramona Flowers.
* Scott Pilgrim, definitely. The third volume even included a diagram of the 30-odd characters and their relationships to each other.
* Scott Pilgrim. Despite this, he's still a pretty ordinary if not somewhat clueless guy. Furthermore, he also knows his limitations or knows when the odds aren't even, such as refusing to fight 4th evil-ex Roxie because she was armed with a sword and he was bare-handed.
* Scott Pilgrim due to the jerks' ability to stun lock you, allowing other mooks to

gang upon you.
* Scott Pilgrim ends up walking in on Wallace having sex when he arrives home. Scott's face paints an absolute picture.
* Scott Pilgrim, especially the ones who are particularly evil. The film just makes it more obvious in most cases.
* Scott Pilgrim. Face it, you too thought he was just a 23 year old hipster video gamer slacker without any shame or glory, hanging onto his gay roommate to pay for everything, and just being a bad bass player on a semi crappy band. Then, the first evil ex of Ramona came, and we learned that not only is he capable of fighting, he's the best fighter in the province. Dumb and with a little OCD, yeah, but don't mess with his girlfriend or his friends.
* Scott Pilgrim Gets it Together, Scott notes the moment to be one he wants to last. Ramona then points out it's been spent with his hand right where the trope expects it to be.
* Scott Pilgrim has a seemingly endless supply of fancy high-heeled boots. They even come up as a plot point in a flashback when she sells her Anime paraphernalia to pay for a pair, highlighting how she and Scott are growing apart. Much is made over the fact that Kim actually wore a pair of nice heels to The Clash At Demonhead's gig. She ends up taking them off halfway through.
* Scott Pilgrim, he has the lowest point value of any opponent short of out-and-out mooks.
* Scott Pilgrim is also inspired by the lives of its creator Brian Lee O'Malley, his wife Hope Larson, and their circle of friends from their early 20s.
* Scott Pilgrim is a self-proclaimed "Scott-a-holic" and only (briefly) dates Young Neil because he looks like Scott. She eventually gets past that with time, accepting that it's Ramona that Scott prefers.
* Scott Pilgrim is one big allegory for growing up, taking responsibility for your mistakes, and learning something from them instead of pretending they never happened.
* Scott Pilgrim: It's implied Scott was this to Knives, explaining why she had such strong feelings for him even after they were no longer an item and why she still holds him such high regard when she has moved on. Of course, it didn't turn out so well due to Scott's choices (though it is implied that the relationship might've still been doomed even without Ramona since Scott was still emotionally recovering from the fallout with Envy and that Knives probably still would've become a lot more forward.)
* Scott Pilgrim It's only a panel, casually sneaked in, but it's colored darker than the rest, drawing attention to itself.
* Scott Pilgrim. Kim even gets put on a literal bus at the end of volume five and doesn't return till halfway through six.
* Scott Pilgrim, Knives becoming a young woman and so on.) Notable in that everyone hasn't finished growing, but they're on the right track.
* Scott Pilgrim, Knives Chau's father has a sword so sharp it can cut clean through a streetcar!
* Scott Pilgrim Lisa. There's also some between Scott and Kim, although that does get (more or less) resolved.
* Scott Pilgrim lives in. Sure, everyone has superpowers, and everything is incredibly awesome, but there seem to be no repercussions for challenging someone to a fight and beating them to death.
* Scott Pilgrim: Near the end of Volume 6, it's revealed that Ramona spent her time away from Scott the exact same way he did — by moping, slacking, and sleeping all day. Scott's friends declare them a perfect couple.
* Scott Pilgrim, Ramona is revealed to have gone to college in the University of Carolina in the Sky.
* Scott Pilgrim's cool gay roommate, is characterized with this trope, even going so far as to hang a lampshade on it when he's chastising Scott for infidelity.
* Scott Pilgrim: Scott and Ramona are caught out in a sudden snowstorm (it is Toronto, after all) in the middle of deciding to date each other. This also has the convenient side effect of forcing Scott to crash at Ramona's place...

* Scott Pilgrim, Scott isn't very bright but he is the "best fighter in the province" according to Kim. Gideon, on the other hand, is a genius inventor who relies on his technology in a fight. Guess which one is the villain. Though calling Scott "good" isn't necessarily accurate until quite a bit in.
* Scott Pilgrim, Scott Pilgrim is more or less this in his group of friends. While he isn't perfect, prone to making dumb decisions and being insensitive, he still means well and is learning to be a better person. Furthermore, from an initial glance, he's the most open and friendly out of his group of friends, especially when compared to the stoic Stephen Stills, the moody Kim Pine and the quiet Neil Young among others. He's also the glue that holds the circle of friends together (since they all met each other through Scott).
* Scott Pilgrim, Scott rooms with openly gay Wallace, and in fact shares a futon, even when Wallace has his current boyfriend/date/one-night stand with him. At no point does anyone comment on this, and the included parties are perfectly comfortable with this.
* Scott Pilgrim, Scott says that line after being thrown into the air by Todd. Ramona then says, "It's not raining."
* Scott Pilgrim Scott's better than ever and ready to finish what he started and... Well, see the page picture.
* Scott Pilgrim, Scott, Stephen, and Joseph are recording a song, while in the background, Kim and Ramona are shown to have fallen asleep (presumably from boredom), with Kim's head on Ramona's shoulder.
* Scott Pilgrim, Scott uses the not-even-trying version of this: "We have to go, uhh...thing the... thingy."
* Scott Pilgrim series in the first two volumes, before it lets its video game elements play a bigger impact on the plot and characters from volume 3 onward.
* Scott Pilgrim's Precious Little Life states in the commentary that he thought it was one of Brian Lee O'Malley's best jokes).
* Scott Pilgrim that come from sticking to a strict vegan diet. He believes he's famous enough to do whatever he wants, from cheating on his girlfriend to attacking her because she attacked him for cheating on her, among other things. Unfortunately, not even he is immune to the Vegan Police, a special forces unit that can revoke a vegan's powers if they break their diet too many times.
* Scott Pilgrim, the big band of the moment and admires Envy Adams (Scott's Evil Ex).
* Scott Pilgrim: The cause of Lucas Lee's demise when Scott dares him to skateboard grind down a long flight of steps. Lucas accepts the challenge but the speed is too much for him. And he can't dismount in time when he reaches the bottom, exploding as a result. The caption even lampshades it as "Too Fast to Live".
* Scott Pilgrim, the titular character walks in on his gay roommate having sex with a guy. He's horrified.
* Scott Pilgrim They've been dating since college and Julie was the one who introduced Scott to Natalie.
* Scott Pilgrim, Todd utterly fails at making a threat, and then makes it worse by trying to explain it:
* Scott Pilgrim, until Wallace points out there's nowhere to go from there.
* Scott Pilgrim uses this trope in the first volume when Ramona offers Scott some tea. Some readers may have been unaware up until that point, but there are many, many different kinds of tea.
* Scott Pilgrim version of the main character is introduced. The video game escalates in a similar manner, with the enemies of the first level just being random people fighting out on the street, then moving on to people in costumes (explained by being set at a movie lot), then going to zombies and robots for the last few stages.
* Scott Pilgrim video game ends each of the first four levels with one between Scott and Ramona.
* Scott Pilgrim Volume 1. Scott orders CD's from amazon.ca so that the girl he likes/is obsessed with/is stalking will deliver them. One scene change later he runs to the door, and no one is there. His roommate reminds him that he put the

order in less then three hours ago. In actuality the package arrives the next morning; given Amazon, this is damn near uncanny.
* Scott Pilgrim vs. Snow Flower and the Secret Hall Pass, Shizuo wishes he had a girlfriend in Canada so he could get out of being in an arranged marriage.
* Scott Pilgrim vs. The World also runs on video game logic. Scott earns points for defeating people or for solving things in his life (for instance, patching things up with Kim). It also seems that people in that universe have coins for blood, since Gideon coughs up a coin when injured and people burst into coins when defeated.
* Scott Pilgrim vs. The World, a movie all about videogame tropes, has this in Nega Scott, the evil counterpart of the main character. Built up as a big threat (even more so in deleted scenes), when the time comes to fight him... the scene cuts to Scott and Nega Scott exiting the place chatting and laughing, having become instant friends.
* Scott Pilgrim vs. The World and video-game style effects, taken straight from the comics.
* Scott Pilgrim vs. The World, both Scott and Matthew Patel do it during their fight.
* Scott Pilgrim vs. The World, Bryan Lee O'Malley, and most of the actors have all testified to being more satisfied with the new ending. Additionally, when the film script was being written, the last volume of the graphic novel hadn't been finished yet. When Bryan Lee O'Malley, the original writer, decided to have a happier ending than he originally planned, they also changed the film's ending to match.
* Scott Pilgrim vs. The World but decides not to tell Scott about it until the end, because it looks like he has enough on his plate already.
* Scott Pilgrim vs. The World, by the same director: After throwing Scott through several walls, Todd looks as though he's about to fly through the holes he's made... but then he teleports to the last wall and calmly opens the door next to the hole in it.
* Scott Pilgrim vs. The World comic series, is a positive example of this trope due to the fact that most of the scenes in the comic that were cut out wouldn't have worked on film due to their slow pacing.
* Scott Pilgrim vs. The World comics, responded that Plaza was "making shit up", Edgar Wright, the director of the film adaptation, supported this view.
* Scott Pilgrim vs. The World does this twofold: As a film adaptation of a comic book whose plot runs on video-game logic, it has quite a few video-game elements (scores, extra lives, enemies that turn into coins when defeated, and so on) as well as displaying most of its flashback scenes in the form of animated comic book panels and making extensive use of comic-book style onomatopoeia.
* Scott Pilgrim vs. The World earlier on in the movie. The film even makes use of sound effects and on-screen prompts from that game to further drive the point home.
* Scott Pilgrim vs. The World features Ramona Flowers' seven evil exes.
* Scott Pilgrim vs. The World final volume had been written, so while most of the film is fairly faithful the endings are quite different.
* Scott Pilgrim vs. The World from the director says that most of the weirder stuff that happens in the movie is all in Scott's head, and none of it actually happened. A popular fan theory is that Scott is actually a deranged serial killer. The movie also frequently has weird scene transitions (and weird scenes in general) that make it very hard to tell which parts are really happening and which parts are Scott's daydreams/actual dreams. For example, there's one scene where he excuses himself to go to the bathroom. After doing his business as normal, he exits the bathroom, only to find himself in a corridor resembling a school corridor. He follows it to the end to see his own front door, with snow in front of it, and Ramona standing in front of it ringing the doorbell. The doorbell ringing gets louder and louder, until the scene fades into Scott waking up in bed with the doorbell ringing for real. Just what happened between the bathroom scene and the dream?
* Scott Pilgrim vs. The World game, a throng of Clash at Demonhead fans appears as a stage hazard, trampling your character if they stand at the middle part of the screen.

* Scott Pilgrim vs. The World, Gideon Graves uses a laser sword made of pixels, which is called the Digitana in the script.
* Scott Pilgrim vs. The World Gideon has one, not to a cut along the cheek that would normally elicit this reaction, but to an earlier attack which left no visible mark. But of course, he did have reason...
* Scott Pilgrim vs. The World, Gideon responds to Scott barging into his club by offering him a glass of Coke Zero, his favorite drink.
* Scott Pilgrim vs. The World has a black censor bar flash over her mouth whenever she swears. Scott blatantly asks her "How are you doing that with your mouth?"
* Scott Pilgrim vs. The World has no real stereotypical gay affectations. At one point he even remarks that Scott is acting more gay than he is.
* Scott Pilgrim vs. The World has the film's director Edgar Wright as a sprite in Level 2.
* Scott Pilgrim vs. The World has the titular character battling one of Ramona's Seven Evil Exes.
* Scott Pilgrim vs. The World". He can also be overheard saying that the first album is never as good as "the first" album. Comeau's a satire of the people who are into a given social scene for the social aspect, rather than caring about the subject that supposedly unites everyone there.
* Scott Pilgrim vs. The World hit Crash and the Boys, killing all three in an instant, turning them into flaming skeletons for a second, before the bones turn to ash. "Mystical powers" indeed.
* Scott Pilgrim vs. The World, in which Scott draws a blank circle with scribbles at the top, and it's immediately recognized as a picture of Ramona.
* Scott Pilgrim vs. The World in which Toronto plays itself, but in a fight scene Scott is sent flying through an Empire State Building backdrop, which tears to reveal the CN Tower behind it.
* Scott Pilgrim vs. The World is a comic book movie that is also considered something a "video game movie" as well as an action-adventure love story.
* Scott Pilgrim vs. The World is like a live-action comic book (after all, it is based off a comic book) and a cartoon, with written sound effects, text, and yelled-out lines appearing on-screen, video game elements occurring in the real world, the titular character not showing any injuries or pain from things that would normally injure someone in real life (e.g., thrown hundreds of feet into the air, thrown through walls, repeatedly kicked by stunt doubles, his head being slammed on a table), and more.
* Scott Pilgrim vs. The World, is obsessed with Scott immediately upon dating him, as well as after, a trait she shares with her comic counterpart.
* Scott Pilgrim vs. The World is the first of the evil exes that Scott has to fight, and the only one whom Scott requires no special tricks to defeat.
* Scott Pilgrim vs. The World, Lucas Lee crushes a paper cup filled with coffee after realizing that Scott beat up all his stunt doubles.
* Scott Pilgrim vs. The World: Lucas Lee. He takes the word out of the director's mouth, uttering "action!" to start his scene. Then he completely derails the scene to beat up Scott. The hapless director (and the rest of the crew) barely react.
* Scott Pilgrim vs. The World makes it clear that while Scott is pursuing Ramona and having all his adventures, Ramona is also dealing with some pretty serious issues of her own (particularly recovering from Gideon's emotional manipulation), something that's glossed over in the movie.
* Scott Pilgrim vs. The World: On the way to Julie's party, Scott and Neil complain about how much the party's gonna suck.
* Scott Pilgrim vs. The World: Parodied: Scott sits up and we see his roommate Wallace sit up in the same bed in an attempt to comfort him. This is then followed by Wallace's boyfriend, giving further advice, then finally by a lover they had picked up for a threesome also chirping in to discuss the problem.
* Scott Pilgrim vs. The World", "Pass out", "Idiot!", "When's dinner?", "Uh..." "It was nothing" and "No, you are."
* Scott Pilgrim vs. The World play popular rock band, The Clash at Demonhead.
* Scott Pilgrim vs. The World, Scott buys an item from the internet for the sole

purpose of talking to Ramona. When she delivers it, he casually tosses it into the trashcan behind him without looking. Notable because no special effects were involved: Michael Cera had to do about 40 some odd takes in order to get the package to land exactly in the trash can. Shown in the outtakes, along with a throw counter and, at one point, moving the bin closer to him.
* Scott Pilgrim vs. The World, Scott dumps his girlfriend and gets over his ex-girlfriends to end up with Ramona, the last girl he met.
* Scott Pilgrim vs. The World, Scott gets his thoughts mixed up upon being asked about Knives' age, causing him to blurt out that he wants to give her a golden shower.
* Scott Pilgrim vs. The World, Scott gets one of these. Which pauses for several seconds while he ties his shoes. The original purpose of the scene was to get Scott into a new T-shirt for the final battle; the whole sequence, complete with shoelace gag, was worked out in only a few minutes on the set.
* Scott Pilgrim vs. The World: Scott is very confused by the black censor boxes that pop up on Julie's mouth when she swears.
* Scott Pilgrim vs. The World, Scott Pilgrim and Ramona Flowers (the girl of his dreams) are voiced by brother and sister.
* Scott Pilgrim vs. The World Scott sadly sits on the swing set he and Ramona visited on their first date.
* Scott Pilgrim vs. The World, so the movie must take place in an alternate continuity.
* Scott Pilgrim vs. The World starts off slowly. The first Evil Ex doesn't appear until about 40 minutes in, making it seem like nothing more than some hipster comedy about a dweeb's love life. The idea is to establish all of Scott's inadequacies and progress his courtship with the unattainable Ramona to the point where he has to fight her evil exes.
* Scott Pilgrim vs. The World, the final scene slowly fades falling snow into falling cherry blossom petals, symbolizing new beginnings and Scott's second chance on love.
* Scott Pilgrim vs. The World: The first evil-ex "boss battle" is already beyond absurd to everyone present in the scene, from Matthew Patel's crashing-in appearance to Scott surprisingly fending him off in fantastical fashion, but when Patel breaks out into a Bollywood-esque number (with demon hipster chicks) in the middle of the fight, a disbelieving Stacy Pilgrim can only manage a "what."
* Scott Pilgrim vs. The World: The Game, but the game and comic book were released in tandem.
* Scott Pilgrim vs. The World, there is a running gag where every time someone mentions that Scott might need a haircut, his goofy hat will be on his head in the very next shot.
* Scott Pilgrim vs. The World. The scene alone is worth the price of admission.
* Scott Pilgrim vs. The World (the title of the second volume) because that was thought to be a more exciting title.
* Scott Pilgrim vs. The World, the Vegan Police give evidence that Todd has broken the rules about being vegan by ingesting gelato.
* Scott Pilgrim vs. The World. They seem to replace every instance of "ass" with "owl".
* Scott Pilgrim vs. The World, Todd does this a lot — even in the pre-fight closeup. Kim does this as well, but only if her hand is behind another character's head; if she's the only player, the expression becomes a thumbs-down.
* Scott Pilgrim vs. The World, Wallace Wells, Scott's gay roomate sleeps with Stacey Pilgrim's boyfriend Jimmy and another nameless guy later on. His boyfriend, "Other Scott" does not seem to mind as at one point they're all seen sleeping in the same bed together, as well as Scott.
* Scott Pilgrim vs. The World was both set and filmed in Toronto - almost a requirement, because both the film and the graphic novels it's based on showcase popular Toronto landmarks like Casa Loma, the Toronto Reference Library, and Sneaky Dee's. Though some of those locations were actually too small to film in so replicas had to be built. There is, however, in-universe Toronto doubling, with

Lucas Lee's movie featuring a fake New York skyline... and a castle...
* Scott Pilgrim vs. The World was originally going to have Envy's line "Shut the fuck up, Julie" uncensored, and have Stephen saying "You know how I feel about girls cock-blocking the rock", but if they did have this, it would have landed the movie an R rating (plus, the movie had mentioning of gay sex, an orgasm scene, and one use of "cock" already, so the movie was close to getting an R rating as it was), thus the F-bomb was censored, and Stephen's line was censored by amp feedback.
* Scott Pilgrim vs. The World, we have Ramona in tights throughout most of the film and Envy when she performs on stage in the sexiest way possible.
* Scott Pilgrim vs. The World) We then find out that the laugh track was actually a sound coming from Wallace's stove.
* Scott Pilgrim vs. The World, when Ramona claims she didn't steal anyone, Knives says, "You lie! You're a liar!"
* Scott Pilgrim vs. The World where the characters literally say "heart" instead of "love" while discussing the band The Clash at Demonhead (who's lead singer is Scott's ex girlfriend).
* Scott Pilgrim vs. The World (which has Toronto play itself) during Scott's fight with Lucas Lee, when at one point, Scott is sent flying through an Empire State Building backdrop, which tears, revealing the CN Tower behind it.
* Scott Pilgrim vs. The World which recreates the scene of Scott and Knives' meeting from the comic.
* Scott Pilgrim vs. The World : Why do all of Ramona's evil exes meet some requirement of video game boss style, explode into coins when defeated, and everyone naturally is just that good at martial arts? So that when Scott wins the girl, it's really cool.
* Scott Pilgrim. Wallace toasts the trope name not because anyone is dead but because Scott's friends stood him up.
* Scott Pilgrim when Ramona gets mad at him for not knowing how old she is. He defends himself with, "But your age is unknown!"
* Scott Pilgrim (who played Ramona in the film), along with some of the other actors, a sheet listing 10 facts of Ramona's past, but even he said that these need not necessarily be true.
* Scott Pilgrim) with Scott and Ramona's relationship. Originally, their relationship built up over a year or so before the comic ended. In the movie, the same development had to be cut down to a few weeks.
* Scott Pilgrim with Stephen Stills and Joseph. The parodical nature comes from the fact that Stephen wasn't trying to hide the relationship. Scott was just a bit too thick to notice (though in his defense, he was suffering from a bit of a mental breakdown.)
* Scott Pilgrim. Yes, even knowing the series is related to this trope is a spoiler.
* Scott pins Danny down and smells him during lacrosse practice, Derek really enjoys pinning Stiles to walls, and the males in this series are just really really touchy-feely. Scott seems utterly unfazed by Stiles coming in his window, hanging off his roof, etc.
* Scott, Ramona, Lisa, Julie, Knives, Stephen Stills, Joseph, Lucas Lee and Gideon appear in a panel as a homage after the latter died.
* Scott's expulsion in Season Six was a surprise as well, considering it happened so fast.
* Scott's ex-wife is called Maggie rather than Peggy, likely to avoid confusion with
* Scott Snyder stories. In those stories, the villains are always 5 steps ahead of the heroes, who are always struggling to catch up or straight-up lagging behind and the end of the story, the heroes only save the day by some one last-minute miracle.
* Scott Snyder. The first page has Snyder blatantly telling people not to flip out because of change and the like, in the guise of a character talking about a refurbished bank. He even puts "Gotham National Bank" in bold, in case you don't get it:

* Scott Snyder. The utter shock is enough to snap Bruce out his aggression; Alfred simply straightens his tie and excuses himself to go back to the manor.
* Scott Steiner (58 and still wrestling at indy shows. His brother, Rick, is mostly retired but still works occasional legends and indy matches at 59.)
* Scott Steiner, it's just that nothing changed between them, so nobody really noticed.
* Scott Steiner once frustrated a censor to the point they stopped trying to bleep individual words and just held down the button until he finished speaking.
* Scott Steiner persona to create some truly entertaining, though often nonsensical, promos.
* Scott Steiner regularly went off script and also frequently indulged in gratuitous profanity. On at least one occasion, the censors gave up on trying to bleep out the swear words, and just turned the bleeper on until Steiner stopped talking.
* Scott Steiner 's late 90s image change to near constant use of (prescription) sunglasses has to do with his poor eyesight. It was in evidence as early as WCW. When not wrestling, he often wears regular glasses, as seen in low key interviews.
* Scott Steiner. Steiner would claim that the reason why Joe had it out for him is because the "fat bastard" would look at him and envision him as a twinkie, hamburger, a piece of bacon, etc.
* Scott Steiner was infamous in WCW for getting a cheap pop from mentioning something famous from the town the event was in... then immediately saying it sucked and that the audience were white trash fatasses for liking it. More often than not, the wrestler he would be facing would be a favorite in that town, and he would earn further heat by bashing them.
* Scott Steiner-wearing queer!" in a promo) and xenophobic (He often insulted Canada and Canadians when feuding with them, particularly Petey Williams.)
* Scott Steiner, with "Rick Steiner" being a homophone of the brothers' real surname.
* Scott suffers memory bleed-through from Telford, revealing that Telford is having dinner with Young's wife, resulting in pointless drama:
* Scott Summers, aka Cyclops. It's telling that both women were like Jean in some way (hell, Maddy was her clone), and Jean was dead whenever he was with either.
* Scott Summers and Jean are able to relate to each other when their other classmates look down on them because of the uncontrollable nature of their powers, and gradually, their friendship deepens. Throughout the movie, Jean is emotionally supportive to the newcomer Scott, which mirrors their psychic rapport in the comics.
* Scott Summers and Jean Grey only makes things worse. All of the above barely scratches the surface of how crazy it all is.
* Scott's wife Laura ditched him for Luke and they ran off together. Years later when the couple returned to town, Scott's first reaction upon seeing them, as well as their son Lucky, was to punch Luke out, clearly still angry despite all the time that had passed as well as several relationships and marriages for him. To this day, nearly all of Scott's subsequent scenes with Luke and Laura's children have had an undercurrent of sadness and resentment that they aren't
* Scott takes the initiative when he, Jean and Kurt decide that they should try to save Hank, Raven, Peter and Moira from
* Scott Tenorman to Cartman, though they don't know they're half-brothers at the time. Incensed at being pushed around by Scott, Cartman eventually gets his own back
* Scott the Linux guy and his penguin Ted disappeared without a trace for several years, despite an upcoming plot point about him being announced once and several hints being dropped that they were to be part of a major storyline. In a bizarre move, fans who questioned his absence were actually
* Scott The Woz 200th episode special "Borderline Forever" featured a cavalcade of guest appearances of gaming content creators. Among them is YouTuber Alex Carducci (RelaxAlax), reprising his role as the Supreme Leader from the 2018 season finale "It's Awesome Baby!"; this provoked a backlash from some fans, especially in light

of sexual abuse allegations against him that surfaced in 2019. The backlash caused Scott to quietly remove Alex's cameo from "Borderline Forever" on July 1, 2021, and unfollow him on Twitter and Instagram around the same time.
* Scott The Woz - A comedy series created by the eponymous Scott Wozniak, that mostly tackles "stupid Nintendo games" but also covers in-depth gaming topics in general, along with having non-gaming related original sketches.
* Scott The Woz also doubles as a milestone celebration for Scott. The only exception so far is "You're Not An RPG Guy" which ended the season at Episode 195 instead.
* Scott The Woz. Cue Scott beating the border down with his entire Nintendo Wii games collection.
* Scott The Woz episode "A Very Madden 08 Christmas" sees two people adopting Scott's "Hey all, Scott here!" catchphrase: Terry, one of the vegans, with "Hey Scott, all here," and the police with "Hey all, 911 here."
* Scott The Woz episode "Borderline Forever", the host of the talk show that Scott and Rex attempt to hijack is named Hector Andfriends. He opens his show with, "That's not the name of the show, this is my name, dammit!"
* Scott The Woz episode "Game Stores", when Scott is interviewed by manager Chet in order to apply for a job at a game store:
* Scott The Woz episode "Game Stores"; when working at the game store "Games on a Shelf", Scott is told by the manager to lose subtleties and manners and just push the store membership. When the next customer walks towards the register, Scott greets them with this:
* Scott The Woz episode "History of Nintendo Switch (NX) Rumors and Leaks" opens with Scott wearing a lampshade on his head, after attending a so-called "leak party" the night before.
* Scott The Woz episode "Let's Make a Game Console!", Scott tried to go to the Microsoft offices to pitch his idea for a new Xbox console, but thanks to Google Maps and a few wrong turns he ended up in the W. K. Kellogg Institute for Food and Nutrition Research.
* Scott The Woz episode "Memory Cards", when Scott reenacts a scene of a parent finding their kid's notes of game passwords and asking what the notes are for:
* Scott The Woz episode "Shovelware Variety Hour: Round Three", Scott declares that whoever contributed to the Wii's shovelware problems by buying these obviously terrible games "should disappear." He then pops out of existence.
* Scott The Woz episodes such as "Wii Channels" and "Borderline Forever". Scott would show the silhouette of a console, only to reveal a completely different console's picture, poorly shopped and fitted onto the silhouette. An example from "Wii Channels":
* Scott The Woz episode "The Trial" introduces Liza Lots, a lawyer whose main shtick is defending murderers.
* Scott The Woz episode "The Trial" sees Scott representing himself and his friends in their case against Officer Steel Wool. When his friends express doubt on him as their lawyer, Scott reasons with this:
* Scott The Woz features two instances of giant mechas fighting each other.
* Scott The Woz has a Halloween episode, with most of them covering horror themed video games or urban legends surrounding the medium as a whole. To note:
* Scott The Woz has a subdued instance of this trope in "Borderline Forever". After Team F*cked's efforts to convince people the blue border is real fail, Jeb points out the error in judgement they just made:
* Scott The Woz has Scott looking up the price of the Mad Catz Mojo to order one online and review it, when his phone rings:
* Scott The Woz (held in 1995) opens with Scott playing the role of the paperboy typical of the trope, holding a newspaper that announces the looming E3 2017.
* Scott The Woz is mostly known for his rants and reviews on "stupid Nintendo games", as he himself puts it.
* Scott The Woz. Lampshaded by one of his friends who tagged along for the ride:
* Scott The Woz opens his "2D to 3D" episode by coining a new word to describe "that dimension fever we all have from time to time." The new word is "dimentia."

* Scott The Woz prank calls a styrofoam company in the beginning of his episode "Nintendo Labo | Adventures with the Variety Kit":
* Scott The Woz's 200th episode special, "Borderline Forever", it turns out that the rest of the world in the Scott The Woz universe doesn't believe Ohio (where Scott is based on) is a real place.
* Scott The Woz, Scott attempts to do a wavedash, and then the scene cuts to a rushing ambulance.
* Scott The Woz. Scott hates the fact that first 23 days of December feel like filler, so he moved them back to a new month he dubbed "Bluth", with each day being its own "holiday" (such as "Why Is Scott Wearing That Hat?" Day and National "Shoot, Delaware's a State!" Day). The last six days of Bluth are simply labeled "Empathy."
* Scott The Woz screams for the entirety of the end segment of his "The Worst Games of All Time" video, after he's played and reviewed the aforementioned games.
* Scott The Woz's episode on game show games starts with him messing up as a contestant on "Say That Answer!"
* Scott The Woz series. Scott can get his hands bleeding all over (which happens a lot) or a gunshot wound on his leg, and he'd only be slightly irritated.
* Scott The Woz's first episode opens with a Wii U flying out the window.
* Scott The Woz suggests everyone at the dinner party do in the episode "The Great Mysteries of Gaming", after the dinner host was killed.
* Scott The Woz "The Great Mysteries of Gaming" has Scott attending a dinner party with a few other people, and all goes well until the host is suddenly murdered. Scott refuses to let anyone else leave because the party is over at 9 and "we at least owe [the host] this." Scott and the others then attempt to figure out who the murderer is between all of them.
* Scott The Woz thing, but it acts like a parasite, obstructing Scott's vision for as long as he can remember.
* Scott The Woz. This misconception even gets referenced as a quick joke in the 200th episode.
* Scott The Woz trick, even though he knows that he's lying, because he doesn't want to take any chances.
* Scott The Woz universe, death is basically just an ailment you come down with, like the flu. One episode has Scott and his friends attending a dinner party that ended up causing most of them dying, but Scott reassures the audience that they're being treated for murder at the hospital and they'll be fine. Come their next appearance, they're all okay (and are being invited to Scott's "Gala for Recent Murderees"). One character who's also dead returns as a ghost but only for the weekends; and in his next appearance he's alive again without any explanation.
* Scott The Woz, with the exception of "Collector's Editions" for Christmas 2018.
To note:
* Scott The Woz Wozniak (or Scott W.E.T.A.L.A.T.F.M.M. Wozniak for short).
* Scott Thompson plays Grady in "Three Gays of the Condo", "Homer and Lisa Exchange Cross Words", "Flaming Moe" and "Werking Mom".
* Scott Walker shifted to experimental music for the remainder of his career. He only resurfaced for interviews when he had an album to promote, and virtually disappeared in the time between them. He even worked as an interior decorator in the downtime; he was that low-key.
* Scott Westerfeld before ramming their targets at velocities normally reserved for railgun projectiles.
* Scott Westerfeld: Deryn is up in a scouting balloon and sees Alek's "family" coming to the shipwreck looking for him in their Stormwalker. The message lizard won't get down the cable in time, so she slings a leather strap over the tether and zips down to camp. The book also goes into detail about how and why this sort of action is dangerous and shows the sort of things Deryn has to do to prevent snapping her wrists/neck.
* Scott Westerfeld he did. It takes them a while to get past that misunderstanding, though by the end of the third book he wouldn't trade Deryn for any throne
* Scott Westerfeld, where vampires, and all of their traits, such as being afraid

of sunlight and mirrors and crosses are explained away as parasites affecting brain chemistry. Even vampires turning into bats is explained.
* Scott Westerfeld, worship artificial intelligence, and slowly upgrade themselves, replacing organs, limbs, and connective tissues.
* Scott Weston Nikki even brings up Charles Whitman's infamous rampage, including the fact they found a large tumor in his brain during the autopsy afterwards.
* Scott, when Evan first joined the X-Men he tried making a joke about Kurt looking like the Devil. Scott came down on him hard for that as not only is such a comparison rather insensitive to begin with, but Kurt's a devout Catholic.
* Scott "Wino" Weinrich of Saint Vitus fame. Besides his time in the classic doom metal band, Wino also contends with other doom/stoner metal bands such as War Horse, The Obsessed, Mentors, Lost Breed, Spirit Caravan, Place of Skulls, The Hidden Hand, Shrinebuilder, Probot, and Premonition 13. All of this without ever achieving commercial success (it's doom metal, what did you expect)
* Scotty also made an appearance, after being locked in transporter for decades. He managed to show his old school engineering beats the new engineer.
* Scotty also mentions accidentally killing Archer's beagle. The scriptwriter says this dog is Porthose from
* Scotty and Mccoy obtaining a supply of Plexiglass (to house the whales) using fraud and bribery;
* Scotty at least puts a qualifier in the sentence before he starts talking to the driver: "I speak
* Scotty explains that he believes he was sent to the federation outpost as punishment for attempting interplanetary beaming with 'Admiral Archer's prized beagle' - Word of God.
* Scotty from the original series uses a variation, as revealed in the
* Scotty gets a shuttle to run on the energy from phaser weapons in "The Galileo Seven."
* Scotty is found by the Enterprise D marooned on the surface of an abandoned
* Scotty is, in fact, the patron saint of this trope. All other Starfleet engineers aspire to live up to his example.
* Scotty is one of the few characters to wear a red shirt in the original series, and he's one of the few characters to survive into
* Scotty is one of the few characters to wear a red shirt in the original series, and he's one of the few characters to survive into "Next Generation." He
* Scotty kept using his science chops to lock the simulation in an endless battle, as he responded to every one of the computer's impossible attacks (at one point it summoned more ships than existed in the entire Klingon fleet) with
* Scotty shows up in TNG as well, but he's been trapped in some kind of suspended animation since, apparently, shortly after the events in the beginning of
* Scotty, thinking about that Probert fellow he's heard of, mentions the man has ideas about making the saucer sections of starships bigger. In a handful of decades, those ideas will be implement, with
* Scotty wears a command-division white undershirt with his engineering vest in
* Scoundrels: Cheryl asks Hope what her sister is up to. Hope indignantly protests that Wests don't rat each other out... then, when Cheryl gives in, adds, "Which is why I can't tell you to check her underwear drawer."
* Scoundrels inverted, Patrick Flueger plays both Cal and Logan West. Coincidentally, they don't appear in many scenes together.
* Scourge and the Suppression Squad, couldn't possibly make any gains on Mobius as quickly, as their world is different from his. Their reasoning is vindicated when Scourge is attacked by Metal Sonic, along with a Metal Scourge that Eggman literally put together and sent after him at the last minute, and nearly defeated.
* Scourge but also get a good laugh out of it, but there are also examples of Forsaken who are upstanding citizens.
* "Scourge" features Cabot going after a life insurance company for murder because they failed to inform the health department (who would, in turn, have notified the patient) about a patient's case of syphilis, which allowed the disease to go untreated until it destroyed the patient's brain, causing him to become delusional

and believe that God was commanding him to kill.
* Scourge is introduced as Firestar's evil foil. Scourge takes one of Firestar's lives, tries to kill Firestar's nephew Cloudtail, and is killed by Firestar. What neither cat knows is that they're
* Scourge of Worlds, featured several decision points where the viewer could impact the direction of the story.
* Scourges). They are presented as vain, preening, arrogant pansies who mostly hang out in the sky above Commoragh and don't do a lot, then the Codex goes on to explain that they can afford this because they're so badass that other Dark Eldar will pay them obscene amounts to show up and help out whenever there's a fight, so they don't have to do a lot to be obscenely rich.
* Scourge suggests to Sonic that they work together and rule the multiverse, the two of them working as one because they're so powerful. You even get the feeling he wouldn't betray Sonic if he'd agreed to Scourge's way of thinking. Sonic freezes up, and Scourge takes it as a serious consideration, but Sonic later explains that he was so utterly disgusted at the suggestion that he couldn't even speak.
* Scourge the Hedgehog, being an evil version of Sonic the Hedgehog. Being so snide and sadistic has never looked this entertaining.
* Scourge, the titular black silverfish-like parasite enters through the navel.
* 'Scoutmaster's brew' is another legendary example. It's put on the fire to perk the night before; in the morning you heat it up until it perks again - and then you drink it.
* Scout: "Oh come on, give me a bre—" and then the Pulse Bomb that Tracer stuck to him explodes.
* scout rifle concept, conceived by former US Marine and firearms instructor/historian Jeff Cooper, is designed to be a general survival gun suited for anything that wasn't specialized hunting, capable of taking down humans and big game up to a thousand pounds while being small enough that it won't encumber a lone scout or survivalist out in the wilderness. It was to be a carbine under one meter in length and three kilograms in weight, chambered in a high-caliber round like .308 Winchester or 7mm-08 Remington (with .243 Winchester recommended as an alternative for younger or smaller shooters, albeit only with a 22-inch barrel), and capable of putting down a four-inch group on a target from 200 meters away. A 2x or 3x telescoping scope was optional, but recommended, paired with ghost ring iron sights in case the scope was damaged; said scope was to be forward-mounted to increase peripheral vision, make it easier to clear jams, allow the loading of rounds from a stripper clip (in a bolt-action rifle), and make it so that the recoil wouldn't push the scope into the shooter's face.
* Scouts and even use his revolver to pick off bigger, bruiser-type targets with low health (due to the Spy having the ability to see the remaining health of any enemy he looks at). Its accuracy especially makes it very useful in situations where the Spy can get the drop on his enemy but isn't in a position to backstab.
* Scouts can also pull this off with a little practice: Run ahead of main force. Shoot enemy. Run back. Kill assist. Repeat.
* Scout-Sergeant Oan Mkoll, Chief Scout and bone-deep badass, goes one-on-one with a
* Scouts get the tripwire trap, which is essentially made out of a Russian hand grenade, two sticks, and some chicken wire.
* Scouts Guide to the Zombie Apocalypse features a zombie deer in one scene, and a lot of zombie cats in another.
* Scouts Guide to the Zombie Apocalypse has a variation of this, in that the military in this movie are so desperate to contain the zombie virus that they'll firebomb the town to do so.
* Scouts Guide to the Zombie Apocalypse, seriously impressing his fellow Scouts. Also to a bunch more individual undead, at least until it runs out of ammo.
* Scout's Honor. It's thanks to Cosmo and Wanda exposing Remy's cheating that Timmy wins the bet.
* Scout's Progress, one of the chapter heading quotes is a message home by a pilot, one of the hero's ancestors, giving a brief account of a stopover at space station

where he was overcharged for emergency repairs. "The Space at Tinsori Light" is the story of that pilot, and reveals that there was something much more sinister going on at the space station than the brief account would indicate.
* SCP-001 is arguably one of these. A being of immense power, it can erase from existence any object that it strikes, and it literally has unlimited range. It's heavily implied if not outright stated to be the Archangel Jophiel, who chased Adam and Eve out of Eden and took up the flaming sword to keep humanity out. This article postulates that it was responsible for inspiring the creation of the SCP Foundation.
* SCP-001 proposal. Here, the Foundation itself began as an anomaly that took over a High School. The ruling council of the Foundation, the O5 council, is also revealed to have been a FBI field team that never returned from their field op. And whatever they encountered in there, it turned them into the Council with a drive to secure, protect, and contain, using their training from the FBI to run their new operations. The field team that followed them in, they later reappeared as guards, staff, and other personnel that became the Foundation. Essentially, it was an anomly that became a counter-anomaly.
* SCP-001 - The Children"). The Children can effectively annihilate anything on command, no matter how far away it is.
* SCP-002, the killer hotel room from outer space that contains furniture made of human materials.
* SCP-004 ("The 12 Rusty Keys and the Door"). SCP-004 causes space-time anomalies nearby, such as personnel experiencing only a few days inside Site 62 even though they had actually been in it for several weeks.
* SCP-006-J are a bunch of normal insects considered to be Keter by the entomophobic researchers.
* SCP-008, a.k.a. "Zombie Plague" states that terminating the infected requires the use of "Significant Cranial Trauma".
* SCP-015 which attacks anyone who acts hostile towards it or who carries any sort of tool.
* SCP-035 is a living White Mask of Doom based on Greek drama masks that compels anyone near it to put it on and take it as a host. It's also quite sociopathic and manipulative.
* SCP-038 Tree, grows copies of anything that touches its bark. It's capable of growing even fully formed and living clones of organisms that touch it, although these clones age quickly and only live a couple of weeks.
* SCP-040 ("Evolution's Child"). SCP-040-1a was created by SCP-040. It has polymorphic abilities and can change its size, shape, color, and texture as necessary to act as outer clothing (e.g. a sweater) for SCP-040.
* SCP-040 is a subversion, having only one eye with a black sclera and defying the traditional roles of evil and insanity.
* SCP-041 ("Thought Broadcasting Patient"). SCP-041 is a man who can read the mind of anyone within ten meters of him. He can also transmit thoughts (his or those of a person he reads) to anyone within that range.
* SCP-049, and creates passive zombies. It got in-depth interview logs that give it character and depth, and generally created a much more interesting read while keeping the most famous elements from the original.
* SCP-049, is surprisingly compliant when being detained following a containment breach.
* SCP-053 ("The Young Girl") determined its best course of surviving her to be massive self-sedation. Either way, the result's actually kind of adorable.)
* SCP-053 who drives humans around her violently insane and is apparently immortal and anyone who harms her is instantly killed. She does not even seem to be aware that this is happening.
* SCP-054 a friendly entity made of water that likes to play with personnel. Unfortunately frequent experimentation on her (mostly by men) has caused her to resent men and be fearful of them.
* SCP-055 is a self-keeping secret, or "anti-meme." While many logs, videos, notes, experiments, etc. about it are on file and readily accessible, no information about

it can be retained, instead just leaking out of the mind of anyone who learns about it shortly thereafter. It has a cell and its own set of containment procedures, but nobody knows what it is, how it got there, or why its containment is as it is. It could very well have killed hundreds or thousands of people and nobody would have any way of knowing.
* SCP-055", utterly unobservable and indescribable. The only way to define it in any way is by determining what it is not, e.g. "it is not a sphere".
* SCP-055 Which somehow makes it worse. And what, so far, do people remember it isn't? Round, safe, or contained.
* SCP-056 while passing a group of young women and scored 30 points higher on an IQ test than the smartest/nearest researcher. It causes nothing but stress and chaos wherever it goes and it wants to be seen by more "sycophants".
* SCP-058 is some creature resembling a cow heart with limbs that constantly spouts off completely incomprehensible phrases even while going around killing humans.
* SCP-065 ("Destroyed Organic Catalyst"). Any animals within 12 meters of the center of SCP-065 suffer rapid harmful mutations. The larger the animal is, the faster the mutations occur.
* SCP-071 ("Degenerative Metamorphic Entity"). SCP-071 can read the mind of any person watching it to find out the person's sexual preference.
* SCP-073 him. He is also impossible to injure and anyone who tries to hurt him receives the injury in his place. He cannot turn these effects off.
* SCP-076-2, "Able" because they treated him like a human being and not the superpowered murder machine shaped like a human that he really is.
* SCP-076-2, "Able", is also very difficult to destroy, able to continue its killing spree even under heavy fire. Once, the Foundation had to detonate an on-site nuke, killing all personnel present there, just to stop him. In addition, he cannot be killed permanently, as he will be regenerated by SCP-076-1. If you're lucky, the process could take up to 25 years. If you're not lucky, "Able" could be revived in only six hours!
* SCP-076-2 ("Able") the can) eventually decided to try and work with him; predictably, it didn't end well.
* SCP-076-2, better known as "Able", regards his fight with 682 as "the best fight he had in ages", despite losing quite quickly, and is quite proud to have encountered a creature "whose capacity for violence surpassed his own."
* SCP-076-2.) his corpse will disintergrate, 076-1 (A giant stone box with a coffin inside it) will slam shut, and he'll be respawned as it were. He's basically a video game character.
* SCP-076-2, other wise known as "Able" can spawn blades out of thin air & go on a killing spree even under heavy gunfire. Also, he respawns after death...sometimes in just 6 hours.
* SCP-076-2 seems to see combat as the only worthwhile pursuit in life and agreed to work with the Foundation instead of slaughtering them because he realized it could provide him with
* SCP-076 (Able) and SCP-105 (Iris) — submitted early in the site's history, the quickly-growing community treated them as iconic, to the point of writing fanfic about them. As the site was restructured and formalized, the community shifted strongly against
* SCP-076 wears one of these. It's been activated several times: since 076 has
* SCP-081 caused all (or most) recorded instances of spontaneous human combustion.
* SCP-084 ("Static Tower"), an area centered on a radio tower, can cause objects to randomly "jump" their positions, causing "overlaps", which have been described as "markedly detrimental effect on living tissue."
* SCP-085, hand-drawn "Cassy", an animate and intelligent 2D drawing of a young woman. When her canvas was photographed with a camera that produced a picture showing the subject doing what they most desired at that moment, the picture showed Cassy doing the same thing she'd been doing on the canvas, but as a 3D human.
* SCP-085 is a drawing of a young woman on a sheet of paper who can move around on the sheet and speak to people. However, as a two-dimensional drawing, she cannot physically interact with anyone else, and this has caused her to become depressed.

* SCP-087 (an infinite dark staircase where one can hear the cries of a girl, and no one who went far enough down has come up again) is that there is no girl at all, but a creature resembling a girl that uses this to lure in victims.
* SCP-087's page, look at the main picture. Now click on the exploration logs, read them, then go back and look at the picture again. You will have an idea of what those class-D subjects felt like.
* SCP-089 cause disasters to force people to make human sacrifices to it, or does it predict disasters and stop them in exchange for human sacrifices?
* SCP-089 if the SCP actually causes the disasters or merely offers an extreme means of stopping them (involving sacrificing a baby to it).
* SCP-089 ("Tophet") to be conscious and alert in order for it to work.
* SCP-089 will announce the name of a child 6-years-old or younger and a large-scale disaster of some sort. Unless the child is sacrificed by their own mother (via being put within SCP-089 and burned alive), said disaster will happen and keep happening until the sacrifice is made.
* SCP-093 ("Red Sea Object"). The six-story tall half-giants that haunt SCP-093's world are not affected by bullets from pistols and automatic weapons.
* SCP-093 ("Red Sea Object") universe that details what happened here. The world the object connects to was visited by an incredibly powerful god-like being only named He, who arrived during the Industrial Revolution and declared the world to be unclean. He instigated a massive Tech Boom for a war to purge the world of sin. This left the world in ruins and the survivors became the giant abominations, mutated thanks to exposure to a pure form of a substance called His Tears, which was apparently supposed to free them from sin. Not only that but there are numerous copies of the Red Sea Object that are all linked to other universes, and there's a possibility that He could use the Object copies to travel to any of them... including ours.
* SCP-096, an invincible humanoid that's fast and strong, and can rip a minivan to shreds. It won't attack if you don't look at its face.
* SCP-096 is a nigh-unstoppable killing machine that will travel thousands of miles to kill anything that sees even a pixel of its face (even if it is another SCP). The fact he didn't even attempt to attack SCP-049 once he saw his face is surprising to say the least.
* SCP-096 (it's flesh can be damaged, but it'll simply regenerate over time, doesn't seem to actually need any of it's organs or blood to live, and it's bones seem to be indestructible), with many attempts made to exterminate it that have ended in failure.
* SCP-096 ("The Shy Guy") anti-materiel rifle but wasn't even slowed down. Even if shot with thousands of rounds of ammo or hit with an anti-tank launcher, it will keep on attacking.
* SCP-096. When someone sees its face(It doesn't matter if it's in person or
* SCP-096 will go on a rampage and tear anyone and anything to shreds of they see its face, even if it's just a photograph, though not if it's a drawing. When the one man to survive its initial retrieval was asked if he wanted to see an artist's rendition of its face, he had this to say.
* SCP-097, the remains of a 1969 fairgrounds overgrown with some very strange plant life.
* SCP-1000 ("Bigfoot"). At the height of their civilization, SCP-1000 "made trees and birds of prey grow into fast-moving ships, herds of animals that became trains, bushes that became flying vehicles. From insects and pigeons they made things equivalent to cell phones, televisions, computers. Atomic bombs."
* SCP-1007 ("Mr. Life and Mr. Death"). SCP-1007 ages at a rate of 1 year per minute until it reaches age 75, at which point it dies. Then it comes back to life and goes through the same routine again, and again. If a key is inserted in its back and turned, it will age backwards...
* SCP-1013 "Cockatrice" is a classic cockatrice. It calcifies the outer layer of your body, then happily pecks a hole in you and eats what's inside.
* SCP-1048, a sapient teddy bear that can use any material to make hostile creations in its image.

* SCP-1049 ("The Bonetaker Owl"). By biting a human being with its beak, SCP-1049 can suck the person's entire skeleton out of their body and consume it.
* SCP-1049 ("The Bonetaker Owl"). SCP-1049 is an owl that can suck a person's skeleton out of their body by biting them. It has red eyes.
* SCP-1054-FR-J, in which a scientist leaves the Foundation and starts his own competing organisation, the RPD Command. Then another scientist bring up grievances about how he's running the Command, while at the same time similar events happen at the Foundation, causing both resulting organisations to split again, and so on.
* SCP-1056, the kitchen timer-like device that can make people grow or shrink, was found in the possession of a high school student who was using it for "recreational purposes."
* SCP-1057, which is literally a living blank space with the shape and behavior of a tiger shark.
* SCP-105 ("Iris") is an 18-year old girl with the ability to turn photographs into portals to the area in the photograph as it is at that time.
* SCP-1066 ("Instant Education"). During the 4-10 minutes a man subjected to SCP-1066 is gone he apparently spends four years getting a complete education in whatever he was thinking about at the time he signed SCP-1066.
* SCP-1066 ("Instant Education"). When a man signs the SCP-1066 diploma he disappears for 4-10 minutes. When he reappears, he's four years older.
* SCP-106 can pass through solid matter, but corrodes the material when it does.
* SCP-1073 ("Computing Microbes"). SCP-1073 are sapient silicon-based microbes that can receive and understand radio waves.
* SCP-1080 ("The Creche"). When a child less than 13 years old enters the chamber, it closes and locks. When it opens three to five days later, the child is about 20 years old.
* SCP-1080 ("The Creche"). While the child is inside the chamber, between 3 and 5 days will pass on the outside while 7 or more years pass on the inside.
* SCP-1084, who cursed the town that had killed him and slew all but one of its citizens.
* SCP-1091-RU contained by Russian branch. It's an anomaly which visualises idioms said within it. When, during a test, an American doctor said "It's raining cats and dogs", actual cats and dogs started falling from the sky.
* SCP-1092 ("A Species of Fish"). After growing to full size inside the victim's body, in some cases SCP-1092 will travel up the carotid artery to the victim's brain and take over their minds. They will use this control to make the victim head for the nearest large body of water so they can exit the body and enter the water.
* SCP-1092 ("A Species of Fish"). After SCP-1092 inside a mammal's body grow to adult size, they bite their way through blood vessels and the skin and expel themselves from the body.
* SCP-1092 ("A Species of Fish") reproduces by having one of its eggs enter the body of a large mammal through a cut and grow to adult size (up to 2.1 centimeters) inside the mammal's blood vessels.
* SCP-1107 ("A Signal"). A group of asteroid-like bodies in the Kuiper Belt and the Oort Cloud around the solar system contain unusually pure silicon and silicate based crystals. They absorb solar radiation and use the energy to generate radio signals. Analysis of the signals indicates that they're not only alive, but intelligent.
* SCP-1111 ("The White Dog"). The title ghostly animal has red eyes that glow more brightly the closer it is to its point of origin. It savagely attacks all human beings that approach it.
* SCP-1119 absorbs any human who touches him and adds some of their organs to his own. The Foundation discovered him when he absorbed a police officer who was trying to stop him from committing suicide.
* SCP-1120 ("Freeze Tag"). After an SCP-1120 touches a human being, over the next three minutes the soft tissue of the victim will be petrified and become pyroclastic igneous rock.
* SCP-1120: It's revealed that the eruption of Vesuvius was caused by a man who was trying to bury the numerous instances of SCP-1120 in the ashes before they overran

any more towns.
* SCP-1130 ("A Handy Shortcut"). SCP-1130-2 is a series of interconnected halls, rooms and tunnels stretching for kilometers that is entered through the door SCP-1130-1. While people are traveling through SCP-1130-2 they report the trip lasting hours to weeks, while in the outside world only 11-23 seconds pass.
* SCP-1142 ("A Cry for Help") that is threatening to destroy their world.
* SCP-1145 after getting utterly irradiated by the bombing of Nagasaki.
* SCP-1147, a collection of plum tree seeds that mutate depending on what they're grown in (for example, growing the seeds in a glass sphere results in a colored glass tree), with mixed currency bills as the soil. They end up with a tree that produces bill-like leaves, none of which can pass for real currency.
* SCP-114 is somewhat similar to the above: she is an adult Afghani woman that fosters conflict in those around her. However, unlike 053, that conflict is aimed at each other rather than at the SCP, and has more reach and no defences against it, resulting in much steeper and isolating containment procedures.
* SCP-1158 ("Arboreal Jellyfish Puppeteers"). SCP-1158 is an airborne, carnivorous predator that resembles a large Portuguese man-o-war (jellyfish). It hides in treetops and dangles prehensile dactylozooid polyp bundles that look like vines down to the forest floor. When the tentacles touch an animal they wrap around its limbs and inject a paralyzing poison. When the victim is immobilized they enter all of its orifices and deliver digestive enzymes that dissolve the animal's internal organs, then absorb the residue.
* SCP-1160 ("Effective Containment"). SCP-1160 cannot be damaged by any form of conventional firearm.
* SCP-1160 ("Effective Containment"). SCP-1160 has insect-like eyes around its head and neck, giving it 360 degree vision.
* SCP-1173 may or may not be be an example of this depending on how you interpret it. It either is a phenomenon that makes people think that a real country called The Islamic Republic of Eastern Samothrace doesn't exist, or it is a phenomenon that makes people think an imaginary country called The Islamic Republic of Eastern Samothrace does exist. The Foundation leadership is evenly split on the issue, and both sides have drugs that will cure the effect (or cause it if the other side is right).
* SCP-1176 widespread distribution that they discovered it only works on those of a certain blood type, killing all the others.
* SCP-119 ("Timecrowave"). SCP-119 is a microwave oven which can speed up the flow of time inside of it. Its power setting can be set in a range of 1-5. The time (in seconds) that the microwave is on is raised to the exponential power of the setting to determine the actual time that passes inside SCP-119. So if the power setting is 5 and SCP-119 runs for 30 seconds then (30 x 30 x 30 x 30 x 30) seconds (or 281.25 days) pass inside it. Anything (including creatures) inside SCP-119 experiences the full passage of time that occurs.
* SCP-119 ("Timecrowave"). SCP-119 is a microwave oven which can speed up the flow of time inside of it. Its power setting can be set in a range of 1-5. The time (in seconds) that the microwave is on is raised to the exponential power of the setting to determine the actual time that passes inside SCP-119. So if the power setting is 5 and SCP-119 runs for 30 seconds then (30 x 30 x 30 x 30 x 30) seconds (or 281.25 days) pass inside it. Anything inside SCP-119 suffers the increased aging that occurs.
* SCP-120, a pool that cycles through 11 different destinations. To choose a particular destination, Class D personnel have to be used. Why? Five of the eleven destinations are the Lagrange points. Which are in space. And the pool only works with living, awake humans.
* SCP-1211 ("King in the Castle"). After inhabiting the castle for three months, a man 35 years old will have become about 80 years old. After an additional month (or more) subjects will experience rotting of the skin and muscle tissue and skeletal degeneration, but don't die.
* SCP-1225 ("The Worst Christmas"). When SCP-1225 is activated, anything within 4 meters and inside a container ages at a high rate: one year in the first 24 hours,

and a total of ten years after three weeks, after which the aging stops.
* SCP 1227 is nine Russians and a dog welded together by some unknown pathogen. The whole mass thinks it's a man and his family. Most of the bodies aren't even whole; portions of a man are used as the digestive tract and is fed via hole in the stomach while another is used as the ass end of it and another is used to process urine.
* SCP-1230 ("A Hero is Born").. This guy was asleep for "only" fifteen hours.
* SCP-1230. It also doesn't really appreciate people hurting or killing themselves in the dream.
* SCP-1233 "Mammal Terraformer". After a mammal has been paralyzed and rendered unconscious by SCP-1233 its skin will be filled with silica crystals, its internal organs will turn into clay-rich soil and its skeleton will be replaced with an equal volume of sandstone.
* SCP-1245 is a whaling ship that disappeared in the late 1940s. Over time it has assimilated whale body parts from its catches into its structure. Its engine runs on whale bodily fluids; whale brains are networked together in its comm room, connected to the radio; steel pipes and intestines take the cut-up whale parts around the ship; and it is estimated that the majority of its structure is made up of whale body tissues.
* SCP-1249 ("Pestilence"). SCP-1249 is a mass of land-based invertebrates that can form a humanoid body around a human skeleton. The invertebrates replace and function as human organs, muscles and skin.
* SCP-1262 ("Seed of Destruction"). SCP-1262 is immune to most types of radiation and high pressure. Heat of 180+ ºF (such as that caused by fire) is one of the few ways to destroy it. In the only known case of SCP-1262 getting loose on Earth, it was destroyed by causing an eruption and burying it in molten lava.
* SCP-1269, a mailbox which sits in front of a house in Massachusetts, USA. If a woman aged 23 or older moves into the house for SCP-1269, mysterious unaddressed letters, which are directed at the woman and highly romantic in nature, manifest inside the mailbox every four days. If you attempt to remove 1269 and replace it with a normal mailbox, both disappear, with 1269 appearing back in it's usual spot and the other mailbox appearing in a dumpster 25km away with an extremely hostile and possessive letter inside it. SCP-1269 was recently kicked up to Euclid status when a male D-Class moved into the house with the female D-Class resident only to go missing some weeks later, his battered and mutilated corpse was found in the dumpster. Examples of letters found:
* SCP-1272 ("Slow-Motion Catastrophe"). effect associated with SCP-1272 causes time to pass inside it at a rate of only 184 nanoseconds per hour outside.
* SCP-127 ("The Living Gun"). SCP-127 looks like an ordinary MP5K sub-machine gun on the outside, but the inside is made of flesh and bone, and the bullets it fires vaguely resemble human teeth.
* SCP-1293 ("Squeedle Deedle Dee!"). Every 45 days, SCP-1293-B gather together and perform a dance routine. The Foundation believes that the precise coordination they display is achieved due to them being telepathic.
* SCP-1293 ("Squeedle Deedle Dee!"). They look like human beings wearing costumes, but the costumes are actually part of their bodies. The female versions bear their young live through their mouths, and the young are born fully mature in intelligence and size.
* SCP-1294 ("The Laughing Fox"). After SCP-1294 mates with a normal female fennel fox, the fungus will grow inside the fox and eventually burst out of its chest. Once outside it will assume the standard shape of a SCP-1294.
* SCP-1304 puts the setting's typically creepy spin on this. It's a violent sacrifice ritual where, if one writes a book where a character has it done to them, soon after publication the victim will get reincarnated as a human in the real world. They won't have memories of their fictional past, but their life will mirror that in the novel, as closely as reality allows.
* SCP-1308 ("Hungarian Floater"). The Special Containment Procedures for SCP-1308 say that gunfire is of limited effectiveness against it due to lack of discernible vital organs.

* SCP-1310 is a room which does this to everyone who remains inside. The twist is that they don't themselves disappear, and must hereafter live in a world where they've never actually been born.
* SCP-1313, a mathematical equation whose solution is a live grizzly bear. Foundation mathematicians are thus investigating the implications of bears existing in the set of real numbers.
* SCP-1313 the person that solved it and likely proceed to maul them. Notably, SCP-1313's results can be used in other equations, meaning that it is possible to take the square root of a grizzly bear (which is apparently a prime number).
* SCP-1315 is an NES cartridge that contains a "game" in which hazards manifest in real life, albeit only to the ones who are playing it. When you die in the "game", you vanish, and it is implied that you become minions for the "game".
* SCP-1319 consists of a researcher's individual upper and lower halves who got fed up with each other and decided to split — literally. What's really bizarre about this example (besides the obvious) is that neither half of his body exhibits the personality of the original researcher; they're both entirely separate entities.
* SCP-1323 ("A County Fair").. Customers have to buy tickets by paying things like a cherished memory, or (ominously vague) "a favor", and anyone who eats food there has a 17% chance of staying there permanently as an employee.
* SCP-1323 ("A County Fair")), it's possible to buy 10 tickets by paying "A year and a day".
* SCP-1323 ("A County Fair"). This is in another dimension which can only be accessed at certain points and times in our universe. Customers have to buy tickets by paying things like "a joyful laugh and a sorrowful tear" or "a lost love". Anyone who eats food there has a chance of staying there permanently, the same way that people who ate food while in Faerie would be trapped there. The livestock pavilion contains (among other creatures) unicorns.
* SCP-1325 ("Easter Frog"). When the SCP-1325 growing inside the victim's stomach are large enough they release an emetic toxin that causes the victim to throw up, expelling the SCP-1325 out the victim's mouth. This has a 25% chance of rupturing the victim's esophagus (Boerhaave's syndrome). The chance is higher if the victim is elderly or a child.
* SCP-1341 ("JUNGLE IN A JAR"). Doctor Boyd, the lead researcher on SCP-1341, wrote an account on the outbreak that led to the site being overrun with jungle plants. The last entry is his statement that he's going to commit suicide.
* SCP-134: a harmless young girl whose black eyes happen to be vistas into an uncharted region of space. SCP personnel have actually been reprimanded for getting too attached to "Stella".
* SCP-1351 ("Moebius Cave"). A Foundation expedition entered the cave in 1925 and was discovered by the Foundation again in 2009. As far as the expedition was concerned they had only been in the cave for 18 hours.
* SCP-1361 ("Animal By-Product"). If any living creature consumes SCP-1361, it will be converted into more SCP-1361 over a period of 4-6 hours.
* SCP-1361 ("Animal By-Product"). If it becomes necessary to destroy SCP-1361, Foundation personnel are to use incineration to make sure it's destroyed.
* SCP-1368 ("Aegides"). Any Foundation personnel affected by SCP-1368 are to be burned.
* SCP-1370. Luckily for everything else, 1370 is poorly designed to the point of losing a fight with a potted plant. Not even a paranormal potted plant, just a regular philodendron.
* SCP-1370 to be intimidating, like "Sinister Prime Minister", "ShivaTron, Despoiler of all Mirth" and "Doom-Master Thirteen Seventy, Master Of All Doom".
* SCP-1381 ("Cats' Cabinet"). When a big cat (lion, tiger, etc.) enters the Cabinet, sometime later cat-like creatures called SCP-1381-01 emerge from it. SCP-1381-01 are unharmed by bullets.
* SCP-1384 is a humanoid statue with seemingly omnipotent powers — but it's also a pawn in a life-sized board game whose rules it refuses to divulge because it knows the Foundation wants to contain it while it wants to be free. It's fully

sapient and quite chatty, but a single wrong move or misstep allows it to take a turn and move closer to freedom.
* SCP-1386, and downright violent if they try to get out of paying full price. Otherwise, it's a regular ice cream truck, aside from the fact that it is apparently sapient.
* SCP-1388, underwear in a brief style with pictures of superheroes printed on it. Two examples are currently in Foundation custody. They will literally shift spacetime to fit anyone, compel you to want to wear them, and convince you that you are genuinely superpowered, but doesn't give you any superpowers. It makes you think it does, leading you to kill yourself by trying to use your nonexistent powers in real life.
* SCP-1407 ("DJ's Headphones"). SCP-1407 creates more instances of itself inside a human body, such as in the stomach, head and intestines. When enough are created the internal pressure will cause them to be expelled from the body through its orifices or through the skin.
* SCP-140 (An Incomplete Chronicle), causing the civilization it describes to last longer in history and become more powerful. It is also capable of causing a dangerous obsession in those who study or possess it to cause them to want to add onto the story. The copy in the possession of the Foundation was found in the home of a history professor, where it had leeched all the ink out of multiple volumes in his possession and finally caused him to slash his own wrists and use his blood as new raw material for the book.
* SCP-140 during his early conquests, it leaves the fates of many high-ranking persons ambiguous, and further additions to the text would likely describe them as having resettled elsewhere and continued their empire. Should the account ever catch up to modern day (or at least within several centuries of it), it would likely alter history to such a point that the world as a whole would be substantially transformed for the worse. On top of all this, the book in-possession of the Foundation appears to not be the only surviving record, as there have been noticeable additions to it several times when it was nowhere near any inking substances.
* SCP-140. Here's the real horror: there's more than one copy of the book out there and the one the Foundation has is continually being updated. The Foundation fears that should the Daevites' civilisation survive past a certain point in history, it will have catastrophic consequences for the world.
* SCP-1421 ("The Unreliable Oracle"). SCP-1421 can mentally communicate with and read the minds (and memories) of people nearby.
* SCP-1429 ("Organoid Organisms"). When SCP-1429 infects a human body it settles into a specific randomly chosen organ, grows to large size and exits the body, sometimes through the victim's skin.
* SCP-1437 ("A Hole to Another Place") speaks of an apparently alternate version of Scotland where the sun is blue and the sky is yellow.
* SCP-1440 He has been wandering the Earth hoping to find Death so he can return his "gift".
* SCP-1440, the old man from nowhere. He was originally a nameless soldier that won a game of cards against Death (well, Deaths, there are three of them). They were perfectly content just letting him go, probably intent on collecting him later, but he decided to humiliate them further, challenging them to an all or nothing game. He won, and got the treasures of a cup containing the water of life, that could scare away the small death and save individuals, the deck of fate, that could turn the tides of battle and save the lives of armies, and the bag that could contain every disaster known and unknown to man. Understandably, Death were pissed, and decided to follow him around, causing death to everyone he encountered in his eternal life. His only hope is to capture the All-Death in the bag, keeping him hostage. Unfortunately, the All-Death wisely stays far away.
* SCP-1447 ("Tulpa"). SCP-1447-1 (the Tulpa) can move at speeds over 200 k.p.h. for 20 hours per day.
* SCP-1447 ("Tulpa"). SCP-1447-1 (the Tulpa) is nearly immune to bullets from standard-issue sidearms.

* SCP-1457 ("Mourning Cloak"). SCP-1457 can read a person's memories and transfer them to another person.
* SCP-1461 ("House of the Worm"), exposure to the evil in the house changed some of the human workers into monsters with shining red eyes.
* SCP-1472 is an interdimensional strip club that appears in an empty building for a few hours every Saturday night.
* SCP-1481 loser who is much too out of it to grant wishes, usually just conjuring up food for himself to satisfy his munchies instead. At one point, during some drug-addled incoherent rambling, he reveals that a previous master of his used their first wish to put him in this state, their second wish to make the first wish irreversible, and then walked away without another word. Just to be a dick.
* SCP-1483, a portal to an alternate universe's Antarctic civilization.
* SCP-148 for other SCPs. Wiki site members decided this was boring and rewrote it so that it has such extreme downsides that no one uses it for anything.
* SCP-149 ("The Blood Flies") are mosquitos that reproduce by injecting a retrovirus into the human body that changes cells into fertilized mosquito eggs. When the eggs hatch the mosquitos leave the body through the mouth, nostrils and eye sockets. This invariably kills the victim.
* SCP-1506 ("Aerial Arachnid"). If one of the giant floating spiderweb clouds containing SCP-1506 spiders threatens to attack humans and can't be diverted, it will be destroyed by a combination of flamethrowers and Fuel Air Explosive incendiary bombs.
* SCP – Containment Breach does it with SCP-173, which moves when you're not looking at it.
* SCP – Containment Breach has most of the hostile SCPs as this. The most prominent ones being:
* SCP – Containment Breach, refusing to cooperate with the guards will have you terminated before the containment breach even occurs.
* SCP – Containment Breach (the Birthday Monkey) activating to sing its birthday song.
* SCP – Containment Breach when they look away or blink. The game has a "blink" mechanic, where you can only force your eyes to stay open for so long. That moment when you finally have to blink and the meter recharges may be your last.
* SCP-150 ("The Prosthetic Parasite"). After SCP-150 has removed all of a human victim's limbs, it will infect the victim's torso. The torso will swell up and large numbers of SCP-150 larvae will emerge, killing the victim.
* SCP-150 ("The Prosthetic Parasite") burrows into a human body and changes the nearest limb (arm or leg) into SCP-150 tissue covered with a chitinous exoskeleton. The victim is mind controlled into removing the limb, which then hatches out more SCP-150 larvae.
* SCP-1510, an ancient Roman soldier's helmet containing the cursed spirit of its former owner. Any man between 28 and 35 years old who wears it will become possessed by the soldier's spirit.
* SCP-1512 ("Irrational Root") that weighs more than 80,000 metric tons and has root-like tendrils several hundred meters long. The tendrils secrete a corrosive slime that causes chemical burns, disorientation and vertigo. They are completely immune to most forms of attack and can break through concrete and steel plate.
* SCP-1514 ("Star Wars") (and his mother). They are based on the real-life Strategic Defense Initiative or "Star Wars" program. See real-life folder for more information.
* SCP-1520 exactly, aside from some mild disappointment that he has not achieved enlightenment. He's communicated exactly once with the Foundation, belaying a message meant for a former lover (which was delivered to said lover's descendant under the guise of an unearthed family document) presumably as part of shedding himself of any remaining worldly attachments, and has made no further attempts at communication.
* SCP-1522 ("Ships That Pass In The Night"). When its partner SCP-1522-2 was attacked by a ship of the Global Occult Coalition, SCP-1522-1 accelerated to approximately Mach 4 and rammed the GOC ship, destroying it.

* SCP-1527 ("Our Bellmaker, Our Radiant Skies"). The large crustaceans summoned by the Bell have a kind of telepathy that can be disrupted by radio jamming. They can use it to telepathically attack human beings at a range of up to 50 meters and cause effects such as confusion, inducing suggestibility, implanting compulsions and leaving messages in their minds.
* SCP-1529 is apparently responsible for killing the first man to ever climb Mt. Everest and about half of all the people who've died climbing it since.
* SCP-1536 ("Doppelgängers"). Any living creature whose form is taken by SCP-1536 will become a new SCP-1536 after it dies.
* SCP-1536 ("Doppelgängers"). SCP-1536 can transform itself into any moving object or animal it sees, once every 16 minutes. SCP-1536 cannot be distinguished from what it copied by any known test.
* SCP-1537 ("Akul'hil") ability gives them resistance to physical damage, the only known way to kill SCP-1537-A is to immolate them.
* SCP-1537 ("Akul'hil"). SCP-1537-A can change into an almost limitless variety of shapes. They can also increase their mass to up 3 times normal and make their skin as strong as steel.
* SCP-1545, a two-person llama suit that causes the wearers to continue playing their characters until their deaths. If the back dies, the front continues to walk around and play the act. If the front dies, the back will keep dancing.
* SCP-1547 ("A Mother's Love"). Whenever a living creature comes within 5 meters of SCP-1547-B, SCP-1547-B will transmit a telepathic message to it. The message is the story of how the deity Chioll became determined to stop humans from polluting the Earth.
* SCP-1569 ("Jumbo Shrimp"). Six days after the humanoid SCP-1569-1 left SCP-1569, it committed suicide with poison hidden in one of its molars. It did so once it realized it would be confined by the Foundation indefinitely.
* SCP-1574 is implied to have some connection to the Boxing Day Tsunami, despite being on the other side of the world. It may or may not have been caused by aliens from its home planet who had come looking for it.
* SCP-1575 ("Venus Statue"). When a male animal drinks water from SCP-1575 and changes into a human being, the result usually has an androgynous appearance and its genitalia are either nonfunctional or completely missing.
* SCP-1575 ("Venus Statue"). When the water altered by SCP-1575 is drunk by a mammal, parasitic vermin infesting the mammal can start changing into human beings. They usually don't survive, but you can end up with half human/half flea or half human/half tapeworm abominations.
* SCP-1576 ("Edisonian Afterlife Communicator"). When a human being listens to SCP-1576 they become instances of SCP-1576-1: their brain dissolves and is expelled from their nostrils by sneezing. Breathing in the dissolved brain tissue has the same effect. The bodies of SCP-1576-1 instances are destroyed by incineration to prevent spread of the effect.
* SCP-1583 ("It Only Makes Us Stronger"). The tentacle released by the opening of SCP-1583 can be destroyed by extreme heat, such as fire.
* SCP-1583 ("It Only Makes Us Stronger"). When a container of SCP-1583 is opened a large tentacle will come out, grab any people nearby and pull them into its mass, which will dissolve their bodies.
* SCP-1609 Now it is the remains of a destroyed chair that teleports pieces of itself into the lungs of anybody it feels threatened by.
* SCP-1609 ("The Remains of a Chair") was originally one of the most harmless anomalous objects you could imagine; a teleporting chair that would appear if you were tired and needed to sit. Then the Global Occult Coalition tried to destroy it by running it through a woodchipper, which didn't actually "kill" it. It's now a paranoid pile of woodchips whose individual bits can still teleport, including inside people's bodies if it feels threatened.
* SCP-1615 is an edible fungus that causes the eater to survive via photosynthesis until a more stable food source can be found. Unlike SCP-1176, this was thoroughly tested before distribution, and the only apparent downside appears to be green discoloration of the skin of affected people. However, since photosynthesis only

produces carbohydrates, nutritional supplements are necessary for maintaining long-term health.
* SCP-1620 ("Reflection Infection"). SCP-1620 is a rectangular sheet of metal alloy. Any primate (including human beings) that is reflected in SCP-1620 has their reflection changed into SCP-1620-1, a mirror image that is sapient and malevolent.
* SCP-1627 ("Mushroom Wars"). After a person makes skin contact with an example of SCP-1627-A, over the next two weeks the person will age rapidly until they die of old age.
* SCP-1633 Eldritch Abomination instead of just a video game character, and attempt to leave the game to destroy the real world.
* SCP-1633 ("The Most Dangerous Video Game"). This game was designed to learn from the tactics of the person playing it and design tactics of its own to beat them. However, it goes far beyond that and can actually analyze the player's psychology and arrange in-game events to mess with their heads.
* SCP-1637 ("The Army of the Future"). SCP-1637-3B is a warbot that is controlled by an "adult human brain suspended in a translucent green oxygenated protein/glucose soup."
* SCP-1637 ("The Army of the Future"). SCP-1637-3C is a robot that controls SCP-1637 warbots. Its control unit is a fetus suspended in a liquid nitrogen solution.
* SCP-163 ("An Old Castaway"). After an alien being crash-landed on Earth millions of years ago, its ship was encased in a stasis field that protected it from being crushed by collapsed rock. When the rock was removed, the stasis field disappeared and released the alien, which has not aged at all in the intervening time.
* SCP-163, which is cylindrical, has 8 legs, 4 pairs of arms with different functions and a single compound eye with 360 degree field of vision that sees mainly in ultraviolet. It's also one of the more harmless SCPs and clearly homesick.
* SCP-1655 ("Sorrow Tick"). to the victim. They don't remember the person, can't sense them in any way, and if touched by the person they feel increasing disgust and discomfort.
* SCP-1657 ("MAN EGG"). After they're hatched, SCP-1657 grow to maturity (the equivalent of human adulthood) in only 13 days, and die of old age in 17 days.
* SCP-165 ("The Creeping, Hungry Sands of Tule"). The Foundation's Mobile Task-Force Epsilon-9 used flame accelerator (flame thrower) units to reduce the sand SCP-165 lives into glass and thus destroy the SCP-165.
* SCP-166 is a humanoid who causes the decay of artificial objects around her and accelerates plant growth, neither of which she can turn off.
* SCP-166 was a beautiful woman who drove any man (regardless of sexual orientation) who saw her to a lustful frenzy. However, she was a chaste nun who only wanted a life of religious devotion and celibacy, so the Foundation contained her for her own protection.
* SCP-1674 ("Camera Obscura") is a large painting of an overcast rocky taiga (steppe-like) area. Anyone entering SCP-1674 will end up in another world that resembles the painting.
* SCP-1678 ("UnLondon"). SCP-1678-A ("Bobbies") are dismembered and crudely re-assembled human corpses. They are immune to standard firearms but can be affected by large-caliber bullets.
* SCP-1689 filled with nothing but potatoes. An isolated Russian village has been using it as its sole food supply for over a century, leading to severe vitamin deficiencies.
* SCP-169, a sea serpent so large that its protrusions above the waterline were mistaken for an archipelago of islands.
* SCP-1700 ("Debtshop"). When someone dies while wearing a SCP-1700-A yellow scarf, their body is transported to a sweatshop and becomes animate again for as long as it's inside the building. The body still has its memories and fragments of its personality.
* SCP-1716 ("Imperfect Life Extender") donor to age 10 years for every year the recipient's life is extended.
* SCP-1716 ("Imperfect Life Extender") is a device that transfers life force from

one person to another. The process is inefficient, with the recipient gaining one tenth of the lifespan lost by the donor.
* SCP-1730 on the walls, and the leeches that forcibly enter people's bodies to take control of them. The last we see of the place, it's shifted into another reality during a brawl between a god, the archangel Uriel and a giant leech-thing, all of which were imprisoned there.
* SCP-1730 survivor, who witnessed atrocities so huge burning an entire alternate dimension to the ground and salting the ashes was just the start.
* SCP-1733 is a videotape that is a recording of a specific basketball game from 2010. While everyone in the tape has gone on to lead totally normal lives, the recording itself displays unusual behavior. Every time the video is rewound and replayed, the individuals on the tape appear to be conscious that they keep resetting back to a specific point, and any attempts to either leave the stadium or end the curse have resulted in absolute failure. After several dozen plays of the tape, the people on the tape have resorted to sacrificing people, players, and other bizarre decisions. The research staff decided to stop replaying the tape when the people on it suggested child sacrifice.
* SCP-1739 ("Obsolete Laptop") by creating one of these. The Abomination is distracted by being allowed to destroy the new universe, keeping it from destroying the universe it's in.
* SCP-1739 ("Obsolete Laptop")., keeping it from destroying the universe it's in.
* SCP-173, but much, much more brutal. It can't act while being watched.
* SCP-173 starts multiplying and takes over America. Several of them are caught on video and America is eventually nuked.
* SCP-173 ("The Sculpture"), and it will go straight for it in the literal blink of an eye.
* SCP-1749 ("Trans-American Murder Messengers") who appear only to commit murder. After killing someone they kill themselves by taking a cyanide pill. If it fails they carry a backup pill inside one of their molars.
* SCP-1756, fan created it as a gateway to another universe, possibly the afterlife.
* SCP-1759: A WW2 bomber plane haunted by some form of spirit, dubbed 'Lucy' after the artwork on its side. Noted to be quite genial.
* SCP-1760 ("Casket Garden"). Pyotr was a mortician and scientist who carried out experiments regarding long term chemical preservation of human remains, as well as chemically induced reanimation and regeneration of such remains. This is the source of the animated remains that appear in the SCP-1760-16 coffin every six years.
* SCP-1785 is the anomalous effect of a rose bush which not only forces people referring to the bush to do so with a feminine name, but also forces a new name to be used each time.
* SCP-179-class humanoid woman named "Sauelsuesor" located roughly 40,000 kilometers below the south pole of the sun. After a drone is sent to her location, an interview takes place via radio-waves with the log stating that the sixteen minute delay between speakers have been omitted for the sake of brevity.
* SCP-1805. And to put a final, weird twist to it, she instantly loses all interest in her "husband" the moment he dies, since marriage is, after all, "til death do us part".
* SCP-1807 ("Home Sweet Okapi"). Anyone who touches SCP-1807 will disappear as their life force is drained from them. The life force is stolen to act as an energy source for a civilization living in another dimension.
* SCP-1810 is a creepy marionette who tries to protect children, but is really very bad at it; the creator was jokingly worried people would nickname it SLENDERSITTER.
* SCP-1810 loves children and will take care of any distressed or lost child it comes across. Which would be heart-warming, except its flawed understanding of humans and that the fact that it will do horrific things to non-children if it thinks it will make a child happy renders it creepy.
* SCP-1811 ("Shelf Life") about how he was going to burn one of the books in SCP-1811. Only the burnt cover of the book was found - Adrian Balswell had disappeared.
* SCP-1819 ("Darkness is Only Skin Deep"). The boogeyman that inflicts the

dangerous SCP-1819 effect on children is described by the children as having a large "bright" or "burning" red eye.
* SCP-1839, a book about fish that causes readers to begin to think they are fish as long as they read it and either hold their breaths while in the air or try to breathe underwater, causing them to drown. Note that this will not happen to you as you are a fish.
* SCP-1845-1, a sapient fox that fancies itself the Catholic monarch of a feudal kingdom, insists on being introduced as "His Royal Highness, Eugenio the Second, by the Grace of God, King of the Forest, Lord of the Plains, Duke of the Grand Fir and the Undergrowth, Count of the Swamp, Margrave of ██ ███████, Warden of All the Streams and Rivers, and Lord Protector of the Cities of Man, Defender of the Faith."
* SCP-1851-EX. It was decided that the SCP would be closed but not removed, because they weren't going to "whitewash" their history.
* SCP-1867 ("A Gentleman"). Lord Blackwood is a sea slug that can communicate telepathically with anyone within 5 meters of it.
* SCP-1875: A chess-playing automaton with an engine made of the brain matter of a Russian chess champion's twin daughters. Their souls are still haunting the machine. It also comes with a scary-looking suit of samurai armour, but that's just for show.
* SCP-1884-B, the apparent twin sister of a mild-mannered woman with no hands, is a mass of hands with attitude.
* SCP-1888 ("Terraforming Temple"). When animals or plants are exposed to the substance SCP-1888-2 they physically mutate, with their bodies developing means of effective attacks (claws, poisoned thorns, etc.).
* SCP-1891 paintings. Specifically, it's a painting of a stooped human. The painted human somehow moves to other paintings and gradually transforms everything depicted into machinery.
* SCP-1917 ("The Armour Maker"). SCP-1917-1-36 through SCP-1917-1-42 are duplicates of Russian-made T-34/76 tanks that were created by SCP-1917. Each successive tank is 20% smaller than the previous one, and they were designed so they could be nested inside each other.
* SCP-1922 is doomed to keep dying of natural causes, only to reanimated hours after doing so.
* SCP-1933 is a homeless man in a Santa suit that used to break into houses on Christmas Eve and deliver presents alongside bottles of his urine (he pees Irish cream). He lives off a diet of whiskey and cream and drinking more than 25ml in one day will turn all your bodily fluids into whiskey.
* SCP-1936 ("Daleport"), but a flamethrower severely chars it and renders it incapable of moving.
* SCP-1936 ("Daleport"). One of the Daleport creatures is a sheet of mobile skin in the shape of a fractal. A number of Foundation personnel and robots armed with firearms opened fire on it with little or no effect.
* SCP-1936 ("Daleport"). One of the entities in Daleport is a creature the size of an adult human with multiple tentacles. One of its tentacles can decapitate a human being in one blow and multiple tentacles can rip a human being to shreds.
* SCP-1936 for several demons to free-for-all against each other. Now the air is thick with fog and the buildings bleed ashes.
* SCP-1940 enclosure, from an abandoned house to someone's sock drawer, and materialize a salesman who will try and sell everything inside the enclosure to passers-by. Any claims to the property inside the enclosure will be met with paperwork demonstrating that the enclosure and everything in it is property of Light Courier Enterprises. What's worse, any merchandise bought from the store will cause another instance to appear within six hours.
* SCP-1948 ("Weather Bird"). SCP-1948 is a bird that creates nice weather to keep itself comfortable. The town sacrificed people to it whenever the weather got worse, not realizing that it was responding to El Niño and would return to normal once the system had passed.
* SCP-1948 ("Weather Bird"). The humans in the town decided to start sacrificing

people to SCP-1948 (which they called "The Idol") in years when spring didn't come.
* SCP-1961 ("Transformation Booth"). SCP-1961-1 and SCP-1961-2 are more resistant to trauma and hostile environments than human beings. Fire is recommended as one means for destroying them if necessary, so personnel guarding them are issued flamethrowers.
* SCP-1961 ("Transformation Booth"). SCP-1961-1 can take the form of any living creature of the same mass, including non-humans and SCP objects. They can retain human form for up to 4 hours but any kind of shock or strong emotions will cause them to melt down.
* SCP-1979 ("Relativistic Treadmill"). If SCP-1979 is not operated for at least 30 minutes per hour, a sphere will appear around SCP-1979. Time will pass more quickly inside the sphere than in the outside world. As the sphere expands, the multiplication faction increases exponentially. For example, at a 25 meter radius the factor is 10404 (1 second outside = 173 minutes inside). At 50 meters radius the factor is 108,250,000 (1 second outside = 206 years inside). And it just gets worse from there.
* SCP-1979 ("Relativistic Treadmill"). Time passes faster than normal inside SCP-1979's time acceleration sphere. A person inside the sphere will age at a higher than normal rate, with the rate increasing as the sphere expands. At a radius of 25 meters, a person will age at a rate of 10,404 times normal, or 173 minutes per second. As the sphere expands to 30 meters it will age about 9 years. By the time the sphere reaches 35 meters, they will age another 48 years. By the time the sphere reached 40 meters, they would be long dead.
* SCP-1979 ("Relativistic Treadmill"). While SCP-1979 is being operated time passes faster on the outside than the inside: the multiplication factor depends on the speed the device is set for. At a speed of 2 km/hour the factor is 7.23 to 1. At a speed of 10 km/hour the factor, for each minute spent running on SCP-1979 15 days, 7 hours, 6 minutes and 18 seconds pass outside.
* SCP-1981. It caused him to suffer horrible nightmares for years even though the Foundation almost definitely wiped his memory of the event, and it's implied that the reason he developed Alzheimer's is because it was the only way he could actually forget what he saw.
* SCP-1986, a seemingly-infinite tunnel full of books that range from the slightly odd to extremely weird.
* SCP-198]. Unfortunately, it rapidly malnurishes the person, and the only way to gain any nourishment is to consume the contents of the cup.
* SCP-1993 is a man in a Santa suit who is incapable of living off anything other than the basic ingredients of Irish creme and has drinkable bodily fluids that are fatal because consumption in large quantities cause the drinker's bodily fluids to become Irish creme. He might not be aware of his anomalous effects, but that doesn't make them any less deadly.
* SCP-2000 ("Deus Ex Machina"). Both played straight and inverted. SCP-2000 creates human clones and loads preexisting neural patterns into them. Copies of neural patterns of important personnel are updated as well.
* SCP-2003 jammed into the body of a single human being, who is then confined to a cell and automatically dispensed food while the rest of humanity is wiped out.
* SCP-2006 terrifies humans. And in one tale, it proves it's aware of at least one of those things (the possibility the Foundation itself is the one being fooled into thinking it, and other objects, are genuinely contained) and genuinely terrifies a high-ranking doctor to the point of panic; it found it just as funny as its usual "scares".
* SCP-2009 aspects of this trope, showing a woman slowly succumbing to the SCP's effects.
* SCP-2009 ("Thomas Hoang"). Anyone who breathes in SCP-2009-02 spores created by SCP-2009-01 will become an example of SCP-2009-01 in 8-9 days.
* SCP-2009 ("Thomas Hoang"). Even tiny amounts of SCP-2009-02 spores are highly contagious. In order to ensure its destruction, SCP-2009 must be disposed of by incineration.
* SCP-2009, which causes infectees to assume the appearance, personality, and

memories of a "Thomas Hoang," who may or may not be the origin of the contagion.
* SCP-2014 ("Zsar Magoth"). SCP-2014 has the power of telekinesis with a range of up to 24 meters. He has used it to help a skater pull off impressive maneuvers and to manipulate a pen for the purpose of writing.
* SCP-2018 ("Museum of You"). SCP-2018 says that it was once the protective spirit of the Australian Museum. It can manifest itself as an old man and talk to people who enter it.
* SCP-2018 ("Museum of You"). The spirit of the Museum can read the thoughts and memories of anyone who enters it.
* SCP-2030 show that first appeared on VHS, but has kept up with the times by moving to DVD and eventually to streaming sites like Netflix. No matter how traumatic the prank is for the victim, they always calm down immediately once the host of the show reveals himself. Also, every prank victim died within the same year the episode they were in was supposedly filmed, and their bodies have all mysteriously disappeared.
* SCP-2030: The Netflix description for the anomalous TV program "Laugh is Fun":
* SCP-2047 has the Apollo program happening... before Earth forcibly traded places with an alien world, forcing the Foundation to plant the things NASA had left in the old satellite on our Moon.
* SCP-204. But SCP-204 is still ranked at the highest threat level possible, probably because from organic matter to anything else is a quick jump.
* SCP-2051 ("Stromatolite Habitat") by SCP-2051, people gain the ability to broadcast their thoughts telepathically up to 4 meters away. The transmissions indicate extreme distress from sensory deprivation, then depression and catatonia.
* SCP-2054 ("The Double"). SCP-2054 is an entity capable of duplicating the form of a human being so completely that all of the science and technology of the Foundation can't tell the duplicate from the original. SCP-2054 is also able to copy the mind of the target well enough to convincingly impersonate them.
* SCP-2089 to provide entertainment for other users by self-harm or suicide.
* SCP-2099 ("Brain in a Jar"). SCP-2099 has invented 713 different types of laser gun, all of which he keeps in a bin labeled "713 different laser guns". He has also invented a pistol that fires out highly concentrated X-rays (i.e. an X-ray laser pistol) that is powered by two AA batteries and focused by a common quartz crystal.
* SCP-2099 ("Brain in a Jar"). SCP-2099 is the brain of Jeremy Valdez, which floats in a glass jar filled with water, green food coloring, artificial flavoring, sugars, and electrolytes. The Foundation is unsure if that's what's actually keeping Jeremy alive, or if that's what he thought would be aesthetically pleasing. It uses devices (such as a robot and mechanical hands) to manipulate objects.
* SCP-2102 ("Got Shoggoth?"). The only way to prevent SCP-2102 from expanding is to cauterize it with fire. The Foundation believes that SCP-2102 could be destroyed (if necessary) by the destruction of its soft tissues by flame.
* SCP-2102 ("Got Shoggoth?") to create a super soldier by increasing the speed at which the human body heals itself.
* SCP-2117 ships orbiting Titan in a stable Non-Euclidean segment of space.
* SCP-2132 is an obstacle course run by Marshall, Carter, and Dark Lt.
* SCP-2135 is an out-of-service subway station in New York City that can transport people to a world based on Manhattan as it appeared on February 1st, 1959, except inhabited entirely by people without faces.
* SCP-216 ("The Safe"). Two experiments indicate that time does not pass inside the safe while the door is closed.
* SCP-2190 the deceased mother will, once every two weeks, contact someone in desperate need of money and hire him to try to break up the marriage of her daughter and the daughter's husband.
* SCP-2249 ("The Failed Dreamland"). A medical doctor is taught how to create a small idyllic universe so the children in a hospital have a place to play. Things go terribly wrong and the new universe ends up filled with gamma radiation, with the doctor dying after being trapped inside of it.
* SCP-224 ("Grandfather Clock"). When it chimes it causes time to speed up in the surrounding area, sometimes causing people within range of the sound to age up to

several years in a short time. In one case a person was affected by 7 chimes, aging them approximately 70 years in a matter of seconds.
* SCP-2260 ("Traveler's Journal"). After writing a location in SCP-2260, the writer falls into a coma and their astral double explores the location. While their body is in the coma, they are totally vulnerable to attack.
* SCP-2264 ("In the Court of Alagadda"). The sky over the city in SCP-2264 is colored yellow and filled with an unknown number of black stars. The stars don't match any known Earth constellations.
* SCP-2265 is a heartwarming example. It's a localized time loop trapping two history professors (designated SCP-2265-A and SCP-2265-B) in a section of the restaurant they're eating at, forcing them to repeat the same two hours and unable to react with the outer world. SCP-2265-A retained his memories of each iteration whereas SCP-2265-B did not. While SCP-2265-A initially panicked, he eventually learned to make the best out of the situation by engaging in countless conversations with SCP-2265-B on numerous subjects for two decades until the time loop ended. In an interview with Foundation personnel following the event, SCP-2265-A claimed he didn't regret his experience.
* SCP-2273 ("Major Alexei Belitrov, of the Red Army's 22nd Armored Infantry Division"). SCP-2273 is a soldier from another universe where the U.S. and U.S.S.R. got into a nuclear war.
* SCP-2289 ("The Devils' Eyes"). These are not demonic eyes, mind you. The devil here is the endangered marsupial known as the Tazmanian Devil, host in real life to a transmissible cancer. The anomaly is that this particular strain of the cancer has managed to jump the species barrier, and has a fondness for forming functioning eyes.
* SCP-229 ("Wire Weed"). Because of SCP-229's nature (a mass of power lines and cables), incineration is recommended as the best way of destroying it.
* SCP-229 ("Wire Weed"). Foundation scientists tentatively identified SCP-229 (a mass of wires and electrical cables) as a form of silicon-based life.
* SCP-2300 ("Periodic Golems"). made from the elements hydrogen to californium; SCP-2300-14 is the one made from pure silicon.
* SCP-231. You never know what they're actually doing to the pregnant girl, though it's kinda obvious with how any Class-D personnel conducting Procedure 110-Montauk will be terminated if they even try to prolong it. (The author has claimed it's actually not the obvious answer, but refuses to elaborate on what it actually is, beyond "
* SCP-2332 ("Thought Messenger"). Because SCP-2332 is made of light, it can pass through solid objects as long as they're made of a substance permeable to light (i.e. not opaque) such as glass and Plexiglas.
* SCP-2332 ("Thought Messenger") is a butterfly made of ultraviolet light that was originally created and sent out by another universe's version of the Foundation. It ended up in this universe by accident.
* SCP-239' spell book to help her control her powers after convincing her she was a witch.
* SCP-2400 ("Temporal Dilation Facility"). While the door to SCP-2400 is closed, time passes inside SCP-2400 at a rate 140 times normal.
* SCP-2401 ("Mary Had a Little Lamb") are unusual honeybees that can infest and control a human body, but males all die quickly and most of the females commit suicide. When the host body is female it can have sex with a human male and become impregnated. The babies will be adapted to be better hosts.
* SCP-240-JP comprises of zero instances of anomalous locusts. When a locust dies, it warps reality to erase all traces of it ever having existed, which is why there is/are/was/were always zero instances of them.
* SCP-2412-J is a fairly straight example. They even let him out of his cell for a few hours on Christmas Eve to deliver toys.
* SCP-241 ("Good Home Cooking") is a cookbook that displays appetizing dishes containing one or more ingredients that the book opener is allergic to. If anyone prepares one of said dishes and the one to last open the book eats it, they will always die of anaphylactic shock. In addition, it will amplify the opener's

existing allergies or induce new ones if the opener had none.
* SCP-2422-A can determine how intelligent the person is on a scale of 0-35, with 22 being the average. This corresponds to the standard IQ scale.
* SCP-2422 ("A Friendly Family"). Each member of SCP-2422 can use telepathy to read a person's mind and find out specific information when the person makes eye contact with them.
* SCP-2422-B can learn what the person has been doing for the last 22 hours, including where they've been.
* SCP-2422-C will share the person's emotional state. If the contact continues, it will experience the person's emotional states (up to the last 22 hours) in reverse chronological order.
* SCP-2424 ("Hostile Walrus Cyborg ''research ongoing''").. He says of himself: "I'm the first, the easiest, I'm supposed to be. I've been destroyed more times than I care to remember." He also refers to other opponents who are stronger.
* SCP-2424 ("Hostile Walrus Cyborg ''research ongoing''"), the title character's home village was burned down by Emperor Penguin when he kidnapped Moe's girlfriend Anaaya.
* SCP-2432 is an anomalous hotel room which causes anyone who sleeps in it to leave glowingly positive Word Salad Horror online reviews. Despite being creepy and nonsensical, the reviews manage to persuade people to visit the hotel.
* SCP-2451 ("Love Through Time, Space and Species"). SCP-2451 is a doorway to a series of other universes, some of which are very different from the Foundation's universe. In one the "humans" are 8 foot tall bird-like creatures with beaks the size of a human's arm.
* SCP-2470 is an entity that obliterates anything it becomes aware of. It was created by a cult to destroy reality.
* SCP-247 is a weaponized version of this: a fully grown wild tiger is given a psychic aura that makes everyone think it's a "harmless little kitten", and act accordingly. Tests show that the tiger accepts petting and baby talk... for seven minutes. Then it proceeds to rip and tear the victim apart.
* SCP-2484 ("Parasitic Mayonnaise Worms"). The eggs of an unknown alien species are in a substance resembling mayonnaise. If a vertebrate animal eats enough of it the eggs will hatch inside the victim's body and grow to up to 12 centimeters long. They will then try to eat each other until only one is left.
* SCP-2490 ("Chaos Insurgency Special Operative Alpha-19"). SCP-2490's true form is made up of jointed segments with an oblong head. It can generates a field that disguises it as a normal human being. It appears in its real form only to its intended target. It appears near its target repeatedly over a period of weeks and eventually kills it.
* SCP-2503 ("Estimated Distance: 9,216 Years"). Anyone trapped in the alternate universe of SCP-2503 must spend approximately 9,216 years walking inside of it (though without aging or needing to eat, drink, rest or sleep) to get out, while 80 hours pass on Earth.
* SCP-2507 ("A Web Of Cliques"). SCP-2507 are spider-like creatures with an average weight of 45 kilograms (~100 pounds) and average height of 3 meters (~10 feet).
* SCP-2521, based largely on the image of it wrapping a D-class in its tentacles and abducting them with a heart on its "face."
* SCP-2523 ("Goblin Market"). When a person undergoes an Ejection Event (being thrown out of a SCP-2523 location), they suffer from bad luck for 366 days (365 days + 1 day), a year and a day.
* SCP-2525 ("Extraterrestrial Broadcaster"). The original SCP-2525 (currently SCP-2525-N) was an alien creature that could communicate with human beings using telepathy.
* SCP-252 ("Humboldt Squid") to cause anyone looking at it to see it as a giant monster with up to 200 limbs, including suckered tentacles up to 5 meters long.
* SCP-2558-J versions of the kittens, there was a resolution signed to prevent further weaponization of the creatures. That's right, the Foundation, a group that goes through expendable manpower like popcorn, refusing to let harm come to kittens.

* SCP-2571. Only pairs of siblings can enter Cragglewood Park; in order for one sibling to escape, the other has to go on the carousel and become a singing tree in the park forever.
* SCP-2578 wouldn't work. The incident was fairly disastrous and high in casualties, but it worked.
* SCP-2590 ("Trailer Trash"). During its pursuit of SCP-2590, Alpha Squad lost contact with the Foundation. When it re-appeared almost three and a half years later, as far as it was concerned only fifteen minutes had passed.
* SCP-2592 ("Milk and Bananas"). SCP-2592 can use telepathy in the following ways.
* SCP-2599's reality bending combined with her insecurities mean she has to do everything she's told but always fails. Ask her to play a piece of music she's never heard, and she'll play it most of it perfectly before being unable to finish it. Ask her to turn a white piece of paper blue, and it'll turn purple. Ask her to fly, and she'll jump five meters into the air and break her legs when she lands.
* SCP-2606 ("Verminous Vessel"). SCP-2606 is a drinking glass made from polished amber. If any body part of a creature generally considered to be "vermin" is put in SCP-2606 and a human being consumes the body part, the person gains the ability to read the mind of all examples of that creature within ten meters.
* SCP-2610 ("Procreation"). SCP-2610-A (Simeon Avakian) has the ability to mentally reach out and see the images and impulses in other people's minds.
* SCP-2610 ("Procreation"). SCP-2610-E are mutated human beings who are effectively immune to small arms fire.
* SCP-261, an anomalous vending machine, is a bar of Hershey's with all text mirrored. Scientific analysis of the chocolate reveals the chirality of the amino acids and sugars that it contains is the opposite to those of Earth-life organic compounds.
* SCP-261). Experimenting with it has produced several instances that suggest the machine is capable of being vengeful:
* SCP-261 is a vending machine that sells a number food items similar to the real-world trademarks,
* SCP-261 is a vending machine that takes yen and gives bizarre edible articles in return. At one point they test giving it a counterfeit 500 yen coin. The machine produces a bag of candy similar to gummi bears, but shaped like hands with extended middle fingers. Made of potassium cyanide.
* SCP-261 once provided a snack food called Eetmees. They're small, crab-like creatures that jump up and down, screaming and begging to be eaten, and will force themselves into your mouth if you refuse. There is no description of what they taste like, unlike the logs for other products, presumably because the researcher was so disturbed by the creatures.
* SCP-2622 ("Ambassador from the Mole People"). According to SCP-2622's stories there's a cavern called “The Fire Plain” located under the south-central Pacific Ocean. It's inhabited by silicon-based crystal animals.
* SCP-2639 for 10 years. In an inversion of this trope, though, the teenagers are in no harm at all, in fact, everytime they die, they just respawn. Instead, they pose a major threat to other people, for from their point of view, they are just enemies which they kill for ammo. When the teens realize the truth, they are understandably horrified.
* SCP-2645 ("Through the Looking Glass"). The anomalous mirror SCP-2645 has another universe accessible through its mirrored surface that is initially identical to the SCP Foundation's universe. The contents of that universe can be changed by the influence of entities in the Foundation's universe.
* SCP-2647 ("Premium"). Anyone who signs up for an SCP-2647 life insurance policy will stop aging for as long as the policy continues in effect. If the person cancels the policy they will quickly grow older until they are their true age, which could cause them to die of old age.
* SCP-2650 ("Pediatric Pupaphobia"). SCP-2650-B is the body of a former ventriloquist and magician who is still alive despite having a wooden sphere in place of his brain. He is fed Capsule Rations (food in capsule form).
* SCP-2650 ("Pediatric Pupaphobia"). SCP-2650-B is the body of a former

ventriloquist and magician who is still alive despite having a wooden sphere in place of his brain. If he can get a preadolescent child (between the ages of 5 and 9) alone, he can change them so that they're like him and under his control.
* SCP-2661 ("The Hoof Diary") appeared out of the maze, killed him and ate him. The man left a diary describing his increasing compulsion to build the maze and worship the being who would appear from it.
* SCP-2662 This is because he is going through his species' version of puberty and as he matures he will have more control.
* SCP-2663 ("Dionysus"). SCP-2663 can use telepathy to communicate with anyone within 10 meters.
* SCP-2664 is another GRU-P project. Designated Redline, it was a living psychic weapon intended to turn people into communists of the Soviet stripe, but which was in fact secretly used to cause people to become pacifists, even preventing the Cuban Missile Crisis from igniting nuclear war.
* SCP-268. Instead of only erasing records or removing people from history, the wearer is erased from all memories after prolonged use AND becomes practically invisible to everyone, but paper and digital records remain.
* SCP-2701 ("True Solitary"). A person stored in cell 667 experiences a period of incarceration 300-400 times as long as occurs in the real world. One prisoner was in the cell for 15 minutes and thought he had been inside for weeks. Someone inside it for two hours would experience a period of 25-33 days. Another person on the intake list isn't due for release until December of the year 3300-something.
* SCP-2709 ("Can Anyone Hear You Scream?"). SCP-2709-1 is a gigantic ant lion (insect) with inch-thick chitin skin armor, which causes bullets to be ineffective against it.
* SCP-2718. It's death, or more specifically, the knowledge of what happens to you after you die. One of the senior O-5 council members died years ago of a stroke during a holiday in the Galapagos islands and they used some unknown way of remaking him at the quantum level to figure out what lies beyond.
* SCP-2747 has this effect (mild level) not on humans, but narratives. Books, music, video games, websites... They all get destroyed and all that's left are references to them.
* SCP-2750 ("Navajo Skinwalkers"). According to the Navajo, an SCP-2750 knows whatever a man is pondering (i.e. reads his thoughts).
* SCP-2750 ("Navajo Skinwalkers"). All member of the original SCP-2750 could change into at least five different animals found in the southwest U.S., such as crows, wolves, coyotes, eagles and foxes. Some members could change into nine or more types of animals.
* SCP-2756 ("Surreal Landscaper"). Burning has been found to be the most effective way to destroy victims of infection by SCP-2756. Once each month, at least fifteen members of the Foundation containment site use flamethrowers to burn hostile SCP-2756 victims.
* SCP-2756 ("Surreal Landscaper"). SCP-2756 is an anomalous disease of unknown origin that mutates living creatures, causing extra organs to grow on random parts of their bodies.
* SCP-2756 ("Surreal Landscaper"). SCP-2756 is an anomalous infection that causes extra organs (such as eyes) to grow at random locations on living creatures. One SCP-2756 victim has extra eyes growing on their abdomen and forearm.
* SCP-2757 ("Dr. Wondertainment's Projector Fantastico™"), one of the powers gained by the experimental subjects is electricity generation.
* SCP-2757 ("Dr. Wondertainment's Projector Fantastico™"), one of the powers gained by the experimental subjects is pyrokinesis.
* SCP-2757 ("Dr. Wondertainment's Projector Fantastico™"), one of the powers gained by the experimental subjects is shapeshifting.
* SCP-2757 ("Dr. Wondertainment's Projector Fantastico™"), one of the powers gained by the experimental subjects is super speed.
* SCP-2757 ("Dr. Wondertainment's Projector Fantastico™"), one of the powers gained by the experimental subjects is telekinesis.
* SCP-2757 ("Dr. Wondertainment's Projector Fantastico™"), one of the powers

gained by the experimental subjects is telepathy.
* SCP-2764 ("The Eldritch Antarctic") found in the Antarctic. It can use telepathy to send messages to other creatures up to tens of kilometers away, but apparently cannot receive replies. It communicates in the native language of the creature it's speaking to.
* SCP-2777 ("He Who Would Be King"). SCP-2777-1 is an alien entity that looks like a human child. It exists inside SCP-2777, a 36 kilometer long spaceship. It is capable of communicating telepathically with anyone inside SCP-2777, and in at least one case, people who were outside it.
* SCP-2805 ("Disney on Ice"). You know the Walt Disney urban legend? It's true...and he can communicate with people about "the Florida Project" (Disneyworld).
* SCP-2814 ("Heretic of the Torch"). If the person wearing the SCP-2814 mask performs 108 human sacrifices, the souls of the person and all of the people they've killed will turn into a storm of fire in the shape of a column.
* SCP-2814 ("Heretic of the Torch"). When a human being wears the SCP-2814 mask they can (a) manipulate fire as if it were a liquid or solid (b) modify the temperature of fire under their control (c) touch or "hold" their fire without being harmed and (d) take no damage from heat or flame up to 5000 °C.
* SCP-281-FR are series of magic swords stuck in the ground that keep the world in a spherical shape. They were placed there by SAPPHIRE, a group of atheists who found the Earth was flat when taking aerial photographs intending to prove that it's round.
* SCP-281 ("The Snooze Alarm"). When SCP-281 is activated, time speeds up in an area of 6 meters around it. While one millisecond passes in the outside world, 9 minutes pass inside the area.
* SCP-2835 is a video tape with a cartoon character that directly threatens the viewer if they didn't enjoy the show.
* SCP-2852 ("Cousin Johnny"), and cicadas. None of the people involved will think that there is anything abnormal about these events but will still be left with permanent psychological damage.
* SCP-2860 "Made of Stone" piece and now anything organic that touches him turns to marble, including microscopic dust mites (note: inhaling marble dust all day isn't good for you).
* SCP-2863 ("がしゃどくろ"). SCP-2863 are giant skeletons that bite off people's heads and drink their blood. Conventional weaponry (such as firearms) has no effect on them.
* SCP-2869 ("Fuckworms"). SCP-2869 reproduces by secreting SCP-2869-S, a mucus containing parasitic sperm. If SCP-2869-S touches another living creature, it will enter that creature's body and grow into new versions of SCP-2869 that are a combination of the forms of SCP-2869 and the host body.
* SCP-2870 ("General Malaise"). SCP-2870 is an anomalous version of the common cold virus that causes nasal mucus to become sapient and telepathic. The mucus can mentally communicate only with its host body.
* SCP-2901 ("Mothman"). SCP-2901's standard manifestation is a humanoid with dark-colored wings and large red eyes. They are known to attack human beings, especially when the humans flee them, and their touch causes the victim's skin to be ripped off. They also appear near the sites of disasters and eat the bodies of the victims.
* SCP-2922 ("Notes From the Under"). SCP-2922 is a memetic procedure that can be implanted in a human being's mind. It allows them to telepathically call a specific phone number.
* SCP-2922 ("Notes From the Under") that lives in the afterlife known as Corbenic. It resembles a gigantic spider.
* SCP-2935 and is the only thing in this world that's actually decomposing... Finally the expedition send a drone over to our side with some material but they are all killed when a nuke at the site they're exploring goes off shortly thereafter... Then we learn, through the last recorded words of the dead universe's Agent Keller, the truth, which is no less terrifying and does nothing to dispell

this trope: Alternate Keller of the dead universe was sent into his 'verse's iteration of SCP-2935, only to find a dead universe on the other side — same as the main expedition — and the very moment he returned to his own universe, everyone in his universe died as well.
* SCP-294, a drinks dispenser that dispenses any liquid you ask it for. It was considered completely harmless until someone ordered a "cup of joe", and a security guard collapsed. Upon further inspection, it turned out he was missing about a cup of blood, tissue and various bodily fluids, all of which could be found dispensed into a cup by the machine. And that his name was "Joe".
* SCP-2970 ("Holy Misplacement"). SCP-2970 is a human being who was given magical artificial implants to improve his capabilities. When he broke containment and escaped from site 30, bullets fired at him were deflected before hitting him.
* SCP-2975 ("Another Sun") is a Tale associated with SCP-2975. After Mobile Task Force Sigma-3 enters a crevasse and is transported to another world, they see gigantic wolf-like beings as tall as a skyscraper. When they fire on one such being, it has no effect at all.
* SCP-2978 ("Motherburg"). SCP-2978-B are a race of tiny silicon-based humanoids. They live in the silicon chips of computer motherboards and are experts at using and modifying computers.
* SCP-2978 ("Motherburg"). The SCP-2978-B entities being held in Site 17 change a wireless modem into a flying vehicle and start to explore. Three minutes later the vehicle enters a ventilation duct and visual contact with the vehicle is lost.
* SCP-298 in nature, as people who can't hear it don't seem to be affected. If the organ is used for parts, some of its properties can spread to other organs.
* SCP-299 ("Infectious Tree"). If any examples of SCP-299 are discovered in the wild they are to be destroyed by firebombing them into charcoal.
* SCP-299 ("Infectious Tree"). If any part of a SCP-299 (even a single cell) touches or is inserted into a plant or animal, it will change the plant or animal into another SCP-299. The total time required depends on how large the plant or animal is.
* SCP-299 ("Infectious Tree"). SCP-299 has vine-like tendrils that are up to 2 meters long. It uses them to grab its prey when they get too close to it.
* SCP-3000, is entirely based around their origin and what it costs to make them. SCP-3000 is a gigantic moray eel that rarely moves, and simply looking at it can slowly erode someone's memories. Upon devouring a human being, it secretes a compound that the Foundation uses to make amnestics, so they exploit it by deliberately feeding it D-Class personnel - something heavily objected to by the Ethics Committee, but ultimately the Foundation relies too much on the amnesiacs to stop doing it.
* SCP-3008-2, the "staff" of the infinite IKEA, are faceless humanoid figures with inconsistent proportions, who try to kill people trapped inside after closing time.
* SCP-3063 It's also repeatedly twisted any attempt to wish for its destruction or containment.
* SCP-3125. Although they externally look normal, non-possessed people will no longer recognize them as human.
* SCP-312 ("Atmospheric Jellyfish"). After SCP-312 sucks a victim into the air with its atmospheric vortex it stings it with its tentacles and paralyzes it, then digests it.
* SCP-3166 costume that was apparently created by the comic character becoming self-aware.
* SCP-3200 Eventually, the lead astronaut goes outside the spacecraft and returns two days later with this message:
* SCP-3200 is the Boötes void, and the Foundation theorizes that it can function as a portal to alternate universes. They manage to send a team through, only for them to discover their own mission logs and destroyed spacecraft, as well as lookalike bodies.
* SCP-326 ("A Chinese Peasant"). After being biologically modified, SCP-326 was placed in cryonic suspension for more than 50 years before being released. As a result, even though she is biologically 65-70 years old, she is more than 120 years

old chronologically.
* SCP-3275, which appear to be linked to his mental state. Every pizza he delivers is inadvertently changed to something radically different (and sometimes inedible) while he's not looking, and he has no idea why it keeps happening but it's implied to be related to his grief over his mother's death.
* SCP-3284-J ("Lava Sharks"). These are shark-like creatures that live in lava pools and can swim through them the way normal sharks swim through water. They don't need to eat but attack and consume living creatures anyway.
* SCP-3288's. The kicker? They're all horribly inbred descendants of the Habsburg dynasty, and the name of the trope provides the title of the SCP.
* SCP-3288, "the Aristocrats", describes a strain of humanity originally descended from the House of Hapsburg, survived to the present day by living in underground sects. They originated from the Hapsburgs attempting to use sorcery to counteract the effects of extreme inbreeding so that they could keep their bloodline pure, which was only partially successful. Though nominally human, they are subject to a number of horrifying mutations including supernumerary teeth, abnormally long arms and fingers, ungodly physical strength despite appearing severely emaciated, and a compulsion towards cannibalism. Their "blood" is dominant over other humans — in an instance where SCP-3288 impregnates an ordinary woman, the offspring will be another instance of SCP-3288. A captured instance proudly claims that they will eat and rape all of humanity until only they are left. This is probably what got them reclassified as Keter.
* SCP-3305 turns out to all just be an elaborate build up to the joke at the end.
* SCP-3344 to this effect. The SCP causes Site 24 Director Carter (and anyone with whom he interacts) to believe that his adult son Niklas, who is living in Site 24 and desperate to contact his family, does not exist and to be completely unable to perceive any evidence to the contrary.
* SCP-343 itself to be God, or is it purposefully deceiving the Foundation instead?
* SCP-343 may have done this to a researcher who resisted its psychic properties.
* SCP-3470 and SCP-2086 are variations of this trope, as they are predatory organisms that take the form of man-made vehicles, with barely visible drivers inside, to either lure in or catch their preferred prey (humans) off guard; 3470 has taken the form of a Ford Angilia 105E, while instances of 2086 will take on the forms of public transportation, usually buses.
* SCP-3477 is a collection of 34 men all claiming to be Harold Holt, former Prime Minister of Australia who supposedly died at sea in December 1967, all of whom have become biologically immortal in different ways.
* SCP-349 is the work of one person, that person is an immortal who hunts and kills immortals who started out mortal and purposefully became immortal.
* SCP-3512. The process is detailed in a book written by a pickup artist, excerpts of which are in the report, and advises readers to stop thinking of hot women as people and think of them as instruments to be controlled.
* SCP-3520 horrific, where an unknown force takes sado-masochistic glee in watching humanity become this as they destroy Earth’s environment to make way for industrial farms to make more snack food.
* SCP-354 ("The Red Pool"). At least three of the monsters that have come out of SCP-354 have been effectively immune to bullets, including SCP-354-2 ("virtually bulletproof"), SCP-354-4 ("Gunfire caused very little physical harm and was highly ineffective") and SCP-354-16 ("Gunfire proved mostly ineffective against its hide.").
* SCP-354 ("The Red Pool"). When the monster SCP-354-14 appeared in the Pool it used 5 octopus-like tentacles to grab several D-class personnel and pull them into the Pool.
* SCP-363 ("Not Centipedes"). SCP-363 is scared of fire, and Foundation troops are issued flamethrowers to use against them. After one containment breach, the site where SCP-363 was being held was firebombed in order to destroy them.
* SCP-370 has Incident-370-A, a personal log written by the Foundation doctor in charge of the expedition that found SCP-370. It details the progressive infection and death of expedition personnel caused by SCP-370's influence. Although he had

been infected himself, he managed to use a ritual (which required 80% of his blood supply) to contain it. It ends with a
* SCP-371 ("Macrovirus"). After SCP-371 infects a victim with its genetic material, new SCP-371 specimens are created inside the victim's abdominal cavity. Once the specimens grow to a length of 20 centimeters they burst out of the victim's body, causing severe trauma (including internal injuries, serious bleeding and death).
* SCP-372 ("Peripheral Jumper"). When first encountered it was allowing itself to be seen by a patient in a medical facility but using its powers to prevent itself from being seen by anyone else, apparently just to harass him.
* SCP-3758 ("The Last Dodo"), about an entity named Hualiet which will only be freed when all but one dodo is extinct. The dodo they interview talks about him like one of these, but only because their culture treats ideas like "maybe stop torturing people" and "let's learn how to make buildings" as heretical. Unfortunately his banishment to the "poison light fields" has resulted in Hualiet becoming enormous and lethally radioactive, so the Foundation is secretly maintaining a dodo population to keep him banished.
* SCP-378 ("Brainworm"). After SCP-378 enters a victim's skull it gains control of the brain and controls the body. The victim acts normally while under control, indicating that SCP-378 can read the victim's memories and personality.
* SCP-385 was confiscated from are implied to have purchased it at one of these.
* SCP-3872. Part of this insanity takes the form of an irrational hatred of molasses and rum.
* SCP-387 is a bunch of sentient, self-assembling Legos that enjoy being played with and playing with other Legos, and assimilate Lego products added to their toybox. Aside from somehow giving children highly detailed knowledge of WMD construction, they don't harm anyone and were even approved for recreational use by Foundation personnel. One time, someone left a pile of Micro Blok imitation toys in the room...
* SCP-395 ("The Bottle Baby"). SCP-395 is a human fetus that lives in a specimen jar filled with formaldehyde. It is fed a mixture of milk and blood once per week.
* SCP-4001. The oldest books date back about 75 000 years, but the Foundation have discovered untold layers of ash beneath the floorboards. The library is also sentient, and can interact with its Watchers (various organizations throughout its history, most recently the Foundation) by writing in their books.
* SCP-400 ("Beautiful Babies"). SCP-400 reproduces by touching a human woman's skin. This causes the woman to become pregnant with more examples of SCP-400 and eventually give birth to them.
* SCP-4010 (including the 001 proposals) is tough - and causes unexpected effects.
* SCP-401 ("A Palm Tree"). It's a tree made up of human organs that has an eye on the end of each of its fingers.
* SCP-4035, and at worst very, very lethal. "Make me rich" did make the subject rich -with a severe overdose of Vitamin C.
* SCP-404 having a questionable relationship with his sister when they were pre-teens and killing her boyfriend out of jealousy.
* SCP-405 ("Telepathy Virus"). A person affected by SCP-405 will be able to hear the thoughts of any other human within a specific radius, ranging from 200 meters to several kilometers away.
* SCP-409 "Contagious Crystal" is a crystal that turns anything it touches (except, ironically, granite) into itself.
* SCP-4100) shows up in the system and attacks the planet. Turns out the Foundation left a little gift for their old enemy.
* SCP-4158 artwork not that out of place from the SCP Foundation's world.
* SCP-415 is known as the Harvested Man, whose body is outfitted with zippers for ease of access to his organs, which regenerate within a few months (including possibly his brain, as the top of his head can be popped off).
* SCP-415 ("The Harvested Man"). Occasionally SCP-415 is taken by unknown means into another dimension and returned after a few seconds. After being returned SCP-415 says he spent a considerable period of time in the other dimension, up to several years in some cases.

* SCP-417, the Plague Tree, has fruits that contain insects whose bite causes horrific diseases.
* SCP-420 ("Aggressive Skin Condition"). When a person who drank SCP-420-1 reaches the sixth stage of infection they start growing rapidly and must be incinerated before something horrible occurs.
* SCP-424 ("Nanomimes"). SCP-424 can take the form (but not the coloration) of any object or creature it has ever seen.
* SCP-426 is a toaster that causes people to refer to it in the first person. Its secondary effect is a mental version of this. Anyone left with the toaster for long enough will identify as a toaster and attempt to emulate its functions, with disastrous results.
* SCP-426, or ruptured organs from consuming ten kilos of bread at once. I can do those things of course, because I am a toaster.
* SCP-426. Prolonged exposure to me will cause people to think that they are also toasters. Some of these people have accidentally killed themselves trying to emulate the functions of a toaster, such as an old woman who ate so much bread that her stomach exploded.
* SCP-426: side-effects, leading my previous owners to, be respectively, electrocuted attempting to eat an electrical socket, eating so much bread their stomach exploded, dying of blood loss after attempting [REDACTED] with me, and finally, to suffer from malnutrition after inserting two slices of bread and waiting for them to pop.
* SCP-429 ("Clockwork Teleporter"). If someone tries to use it without understanding it they will still teleport, but when they re-appear they will be dead and in a state of advanced decay. Monitoring devices sent with it on one of these jaunts recorded over 8 months passing. The creator of SCP-429 died of old age after using it too often.
* SCP-429 ("Clockwork Teleporter"). Testing reveals that when SCP-429 is activated without the instinctive understanding it grants, it will disappear and re-appear later within 1.76 kilometers of its previous location between 11 and 17 minutes later. However, approximately 8 months will have passed for anyone or anything attached to it during the teleportation.
* SCP-429 ("Clockwork Teleporter"). When someone wears SCP-429 they can visualize a location and be instantly teleported there, without any warning, as the effect is just described as "disappearing":
* SCP-438 ("Addictive Straitjacket of Espionage"). While the person wearing SCP-438 is undergoing their OBE (Out of Body Experience), their body is completely helpless and vulnerable to being injured or killed.
* SCP-440 ("Sand-Based Ecology"). SCP-440-2 ("Rocktopods") are made up of sand and look like squids or octopi. They can throw rocks with their tentacles.
* SCP-440 ("Sand-Based Ecology"). Several types of creatures are made up of SCP-440, which is an anomalous form of sand. The sand is made up of silica (silicon dioxide).
* SCP-4553 ("Bob Shepherd, Anthropomorphic Mass of Worms and United States Representative of the 3rd Congressional District of Nebraska").
* SCP-455 ("Cargo Ship"), Experiment Log 455. During the second expedition into SCP-455 16 hours passed outside the ship while one minute passed inside it.
* SCP-455 ("Cargo Ship"), Experiment Log 455. During the second expedition into SCP-455 two weeks passed inside the ship while 10 seconds passed outside. During the third expedition ten hours passed inside the ship while a few minutes passed outside of it.
* SCP-458 is an indestructible pizza box which, when opened, always contains the opener's favorite pizza. After extensive testing and no visible side effects, it currently resides in the site-17 canteen alongside an admonishment to not just pig out on free pizza but get some work done too.
* SCP-462 ("The Getaway Car"). remember driving for a few minutes before ending up at their destination. However, they can re-appear up to seven months later.
* SCP-462 ("The Getaway Car"). When someone sits in the driver's seat of SCP-462 and turns the key, they will disappear and turn up near their intended destination

a variable amount of time later, without any other teleportation effects:
* SCP-4666 that kidnaps children during the Christmas season. At least one commenter referred to it as "Slender Claus".
* SCP-466 ("Mobile Veins"). If SCP-466 breaches containment it is to be suppressed using flame weaponry (e.g. flamethrowers).
* SCP-466 ("Mobile Veins"). The vessels of SCP-466's cardiovascular systems (veins and arteries) can be used as tentacles to grasp and constrict. After it acquired additional cardiovascular systems the vessels became more powerful and developed barbs on the ends that can inflict damage.
* SCP-469, ringing a bell within earshot of it will cause it to wake up and do something unspecified but presumably horrific.
* SCP-469, the sound-eating "Many-Winged Angel" has feathers which inject a neurotoxin that triggers all the pain receptors in a victim, causing them to scream in agony and feed the SCP. The neurotoxin also contains stimulants that keep the victim from passing out so they can scream for even longer and provide it with more nourishment.
* SCP-486 is a woman who bleeds snakes instead of blood. She cannot control what the snakes do and they attempt to bite all other humans. Something nasty happens if she has an injury that would cause internal bleeding.
* SCP-490 is an ice cream truck that operates by itself between 2 to 5 AM of local time to lure in people with the jingle it produces to the back of the truck. After this event is over, the freezer is observed to be stocked with frozen treats made of human blood and flesh.
* SCP-4925 then eventually a new cell phone will manifest near her and ring, and more and more cellphones will continue to manifest until she answers one. Upon answering it the dead mother will berate her daughter for her recent life choices until the daughter gives in out of guilt.
* SCP-492 ("Animated Cloth Dummy"). SCP-492 is made of cloth, so it is highly vulnerable to fire and can be easily destroyed by flame.
* SCP-4966's object title is "Tubbioca: Devourer of Souls, Consumer of Secrets, Lord of Munchies"
* SCP-507 control over this, so the only thing he can do is carry emergency supplies with him at all times so they'll be with him when he shifts.
* SCP-507 responds to Tommy, Steve, Bruto, Guy, Houdini, and Grabnok the Destroyer.
* SCP-507 ("The Reluctant Dimension Hopper"). On one of SCP-507's trips he ended up in a dimension with living, moving crystals based on silicon. They're described as looking like crustaceans and may be connected to SCP-440, which also creates crustacean-like silicon-based life.
* SCP-507 ("The Reluctant Dimension Hopper") SCP-507 has been to while in Foundation custody. In universe 9E2-66V-7HG5 he encountered plants that gave off a "telepathic scream" when eaten.
* SCP-507 (who randomly teleports to alternate universes) once found himself at the mouth of a cave, looking at a desert planet baked by its two large suns. Then the "suns" blinked and looked away...
* SCP-513 ("A Cowbell"). Anyone who hears a noise made by SCP-513 (such as it being rung) is thereafter stalked by an emaciated humanoid with large hands. The humanoid is invisible to everyone except those who heard the noise. The stalking causes sleep deprivation and mental stress, causing the victim to suffer paranoia and depression. All but one of the known victims has committed suicide.
* SCP-516: A sentient tank that has pacifistic tendencies and will only allow itself to be fired at armed combatants or inanimate objects. When its picture was taken with 978, it showed a desire for world peace.
* SCP-5208-J are a bunch of normal objects (some granite, a piece of paper, a pen, a cat, and a young boy) with extremely complex security protocols.
* SCP-523 ("The Most Unhelpful Object On Earth"). SCP-523 continuously gives off a low-frequency telepathic signal that is heard as a "a dull ringing sound" by anyone capable of perceiving telepathic communications.
* SCP-523 ("The Most Unhelpful Object On Earth"). When SCP-523 escapes from containment, it changes its form to that of a useful object. When someone tries to

use it for a specific purpose, it changes to another form that's not useful at all for that purpose.
* SCP-525 ("Eye Spiders"). SCP-525 looks like a small starfish. It climbs the body of its victim and extracts one of its eyes, then implants eggs in the eye socket. About 24 days later new SCP-525 hatch from the eggs.
* SCP-5300 is theorized to be a pocket of space possessing topology akin to that of a Klein bottle. Traversing the entire manifold and returning to where you started causes you to invert chirality. This caused lots of bad stuff to happen to the crew that got sucked into the anomaly.
* SCP-538 ("Shadow Spiders") reproduce by biting a victim. After about an hour the victim suffers a horrible death and their shadow breaks up into pieces. Each shadow piece becomes a new shadow spider.
* SCP-544 perceived threads extending upwards from the heads of others, as well as from other living things, and could kill anything instantly by cutting its thread with his mind.
* SCP-545 is a recipe that can bottle someone's life essence and make the drinker effectively immortal (but not immortally young).
* SCP-549, which moves and behaves like a normal grizzly despite being 17 centimetres long. As in, it's still as heavy, strong, and hungry as a regular bear.
* SCP-553 ("Crystalline Butterflies"). The title creatures have a silicon-based biochemistry and are composed primarily of calcium and silicate compounds.
* SCP-557 ("Ancient Containment Site"). Around 2,400 B.C. a tomb was built to be a prison for supernatural beings. Sometime later the "bastard son of Apep" (SCP-557-1) was captured with the help of the gods and secured in the tomb by being chained to a block of granite. Around 300 A.D. the last Keeper (guard) of the tomb died. In 1988 a geological survey team stumbled across the site and somehow released SCP-557-1 from confinement.
* SCP-562 ("Revel Rousers"). After a person is lured through a door and enters the Revel, they appear several years later dead of old age. It's implied that time passes much faster in the area where the Revel is taking place.
* SCP-562 ("Revel Rousers") effect on its victims and the way they are lured into agreeing to go to it.
* SCP-571 ("Self-Propagating Infectious Pattern") which causes its victims to make copies of it and show it to other people.
* SCP-572 that they have Implausible Fencing Powers. Not only does it not grant its wielder any powers whatsoever, it's poorly balanced and barely sharp enough to cut butter.
* SCP-576 is a container containing a liquid that, when consumed, ensures that the drink will have perfect dreams the next time they sleep.
* SCP-579 that tells what it did last time it was in the general population.
* SCP-582 appears to be Slenderman itself, being described as an "adaptive, self-propagating meme" whereby if anyone writes fictional accounts about it, it will become reality. SCP-582 also has a habit of appearing and disappearing at will.
* SCP-586). The page image, instead of being a green pipe, is a green Pope.
* SCP-586 these in every sentence written about it, even one as theoretically foolproof as "It is".
* SCP-590 and SCP-166 for Dr. Bright and Dr. Clef respectively. Though, it’s not
* SCP-592 (Inaccurate History Book) is a history book that is capable of inflicting injuries on the reader if they read past a certain point (known as the point of divergence), and said injuries may be from wars that never actually happened. In addition, it can cause the reader to become suicidal and suffer other mental issues if they read a passage that is over 10 years past the PoD.
* SCP-593 ("Contagious Innumeracy"). SCP-593 is a virus that causes measles-like symptoms. The containment procedures recommend incineration of all materials that anyone infected with it may have touched.
* SCP-599 ("Uncharted City") that lures people in, then kills them and integrates them into itself as citizens.
* SCP-6001 "Why?". In 5000, the Foundation declares war on humanity for seemingly

no reason. They just start killing people en-mass one day with barely any warning. In 6001, they have instead "declared peace". It's a utopian alternate reality where the Foundation and its rivals got together to help people.
* SCP-600 has the faceless version visible on camera, but otherwise takes on appearance based on direct human observers.
* SCP-600 ("That Guy"). The illusions that SCP-600 creates are sent telepathically into the minds of the people observing it. It can also read the memories of anyone talking to it and use the information while communicating with them.
* SCP-602 "The Sculptor of SoHo", a invisible sculptor that supposedly turns humans into statues. At least in the story it's based on.
* SCP-606, resulting in coma and death from overload of information. The entity doesn't seem to do it out of malice, instead calling it "enlightening" its victims.
* SCP-607 who can transfer any injury it sustains to its current owner. This includes fatal injuries, from which Dorian will simply resurrect and bond with another owner shortly afterwards. Ordinarily this wouldn't be too terrible, except the cat keeps deliberately putting itself in danger, so that its owner can be hurt or killed. It's left up in the air whether the cat is really suicidal or is just being a dick.
* SCP-608 ("Fractal Tinsel"). SCP-608 will slowly disintegrate anything it touches.
* SCP-610 ("The Flesh that Hates"), a disease that mutates infected individuals in a Flood-like manner.
* SCP-610 ("The Flesh that Hates")". While the assault team is escaping from the underground church a tendril emerges from the ground, grabs one of them and flings them away. The tendril came from a SCP-610 infected creature hiding under the ground.
* SCP-612 ("Aggressive Cable"). If a human being removes an instance of SCP-612 from a power source the SCP-612 may stick copper wires in their throat and electrocute them. After death occurs the human's spinal cord rips out of their body and becomes a new instance of SCP-612.
* SCP-612 ("Aggressive Cable"). While plugged into an electricity source, SCP-612 can shock any creature it touches and even fire an arc of electricity at targets.
* SCP-612 reference "mountain copper", the miracle metal attributed to Atlantis.
* SCP-630 ("Black Glacier"). The strange ice known as SCP-630 can stand temperatures up to 1500 °C. The best way to destroy it is to burn it with a mixture of aluminum and sodium hydroxide.
* SCP-630 ("Black Glacier"). Touching the strange ice causes the victim to slowly transform into more of the ice.
* SCP-631 ("Nyctophobic Nocturnal Predator") eats the internal organs of a sleeping human victim and lays its eggs in the body. When the eggs hatch an hour later the babies eat the body.
* SCP-631 ("Nyctophobic Nocturnal Predator"). SCP-631 injects a paralyzing poison into a person with its stinger, eats their internal organs and lays its eggs in the resulting body cavities. When the eggs hatch the babies eat the rest of the body.
* SCP-632 ("Intrusive Thoughts About The Many Spiders Forming Inside Your Head"). After the baby SCP-632 inside the victim's brain have grown large enough, the victim will repeatedly hit their forehead with great force to relieve the pain. When the victim's forehead shatters, the baby SCP-632 will leave the skull through the hole.
* SCP-632 ("Intrusive Thoughts About the Many Spiders Forming Inside Your Head") are small spiders that create a filament of spider silk and attach their eggs to it. When the filament touches warm skin the eggs hatch and burrow into the victim. When the baby spiders reach the brain they grow inside of it and cause a headache. The victim's attempts to stop the headache releases the adult SCP-632.
* SCP-632 ("Intrusive Thoughts About The Many Spiders Forming Inside Your Head"). SCP-632 are spiders that arrange for their eggs to infiltrate human victims. The baby spiders enter the victim's brain, grow inside of it and cause a terrible headache. When the victim damages their skull to stop the headache the spiders adult SCP-632 are released.
* SCP-633 ("Ghost In The Machine"). The SCP-633 program was originally designed by

terrorists to attack U.S. government computers. However, it was given the ability to re-write its own code as needed, which eventually allowed it to become sapient.
* SCP-641 ("The Pacifier"). SCP-641 appears to be a normal matryoshka doll, but the dolls are extremely thin and the total number of dolls inside is unknown (it's at least 3,228, and may be infinite).
* SCP-647 is a man eating cardboard box that preys on homeless people.
* SCP-654 ("Thunderhorn") narwhale that can fire lightning bolts from its horn. It uses them to kill seals so it can eat them.
* SCP-682, a lizard the size of a small truck who's capable of rapidly slaughtering dozens of trained, experienced military personal, sometimes including tanks, during routine breakouts.
* SCP-682, "contain" means "keep in vat of concentrated sulfuric acid so as to prevent 682 from murdering humanity"; for the tickle monster that once managed to subdue 682, it just means "keep fed and happy".
* SCP-682 ends up on the other end of this trope several times. It's an
* SCP-682 is a strange, seemingly-reptilian "creature"—the term "creature" can be used only loosely, as it doesn't seem to be alive in the sense we usually think of—that considers all living things disgusting sub-beings that must be destroyed. Well, all of them except
* SCP-682. One story showing an alternate universe suggested that it would take an entire planet wide army of unstoppable monsters like him to take him down for good.
* SCP-682 who any person who is around her for more than about a minute will attempt to murder. Much to the confusion of the Foundation, they got along famously.
* SCP-689 is similar to SCP-173, but is much more dangerous. It able to teleport to and instantly kill anybody who has previously seen it, if it is not being constantly watched.
* SCP-692 ("Revives the Colours"). When clothing is animated by exposure to SCP-692, security personnel are armed with flamethrowers so they can incinerate it if it goes out of control.
* SCP-693 is a set of string dolls that can "attune" themselves to a human and start imitating their movements and speech. However, the dolls will eventually begin tormenting their "owner" (the person who did the attuning) by misrepresenting the actions of whoever they are attuned to.
* SCP-694 has a man making a demand to an unseen entity of a "full repeat" of the last 38 minutes after his son is killed in a kidnapping gone wrong. Said entity then proceeds to trap everyone involved in an externally observable time loop, and all the Foundation can do is quarantine the area.
* SCP-695 ("Eels"). After SCP-695 eggs have grown to juvenile size inside a female human host, they may escape by erupting through the wall of her abdomen.
* SCP-695 ("Eels"). SCP-695 reproduce by entering a male human and laying eggs, then forcing the male to rape a woman and infect her with the eggs.
* SCP-699 ("Mystery Box"), some see it as something dangerous, and two Doctors can see nothing at all in it.
* SCP-7000-J: a wish meant to cure cancer caused a species of crab to go extinct. Of course, even when it does get what it's supposed to be doing, it's still a jackass: when given a wish to permanently lock down an infamously powerful entity, the project head got an email telling him "TU EST BONEDUS, LOLOLOLEM."
* SCP-705 Play-Doh and as such is incapable of harming anything and is only considered a minor nuisance by the Foundation. There was one time when they were left alone in the site's break room.
* SCP-723 ("Aging Staircase"). SCP-723 is a spiral stone staircase. When a person climbs it, after the fourth or fifth step they start aging rapidly, with additional aging occurring for each additional step taken.
* SCP-723-D man who kept escaping Foundation custody. Finally, two SCP workers took him to a bar, where SCP-723-D died of a peanut allergy from ingesting too many bar nuts. Just to be safe, though, they put SCP-723-D's corpse inside a block of concrete.
* SCP-726, but human and animal clones exhibit "expected fly behavior". Enough

iterations of cloning results in something resembling a slug.
* SCP-728 ("The Forever Room"). This can occur due to the time-manipulating abilities of SCP-728. During one test only one hour passed on the outside of SCP-728, but when SCP-728 was opened again, the person who had been inside SCP-728 had aged to death.
* SCP-731 ("Rathole Cover") is a manhole cover which causes anyone who steps on it while not being observed to fall through it and turn into a sewer rat.
* SCP-738 this results in the deaths of 12 Foundation guards and the D-class gets killed off since the Foundation realizes they can't hold him.
* SCP-738 to deal with him. Forty-one hours later, the lawyer falls unconscious due to exhaustion, while in the middle of a discussion over the exact meaning of the word "shall", after having drafted at least nine hundred pages of the agreement they were going to reach. An envelope in one of the lawyer's pocket has a note saying "Please come back any time. I haven't had so much fun in years."
* SCP-739, locking sugar packets in the closet will flip them as well. The scientist specifically notes that they would make excellent diet sweeteners.
* SCP-748 ("Industrial Dissolution"). One of the products created by SCP-748 is cigarettes. When they're lit, anyone inhaling their vapor is turned into a basking shark over a period of 30 minutes.
* SCP-748 ("Industrial Dissolution"). The SCP-748 facility is controlled by the brain of its creator, which is stored in a vat. Nearby are 200 lobotomized human brains contained in glass cylinders filled with a green liquid. They act as auxiliary memory for the controlling brain.
* SCP-751 ("Organ Eater"). After eating its victim's internal organs and increasing in size, SCP-751 swells up and causes the victim's skin to stretch and burst, releasing it from the body.
* SCP-761 ("Slightly Less Dangerous Trampoline"). and become merged with the object. Depending on how much of their body is merged with the object they can be injured or killed.
* SCP-762 afterward, as even those wounds heal completely after the person is released.
* SCP-762, in a subversion. As a torture device, its primary purpose is likely not to keep people alive but to prolong the victim's suffering. The person inside is conscious the whole time and the experience is described to be very painful. This is double subverted afterwards as even those wounds heal completely after the person is released.
* SCP-772 ("Giant Parasitoid Wasps") of him cutting himself open so the larvae could escape.
* SCP-772 ("Giant Parasitoid Wasps") of the scientist that discovered them and the Foundation's report say that SCP-772 is not harmed by bullets.
* SCP-772 ("Giant Parasitoid Wasps"). SCP-772 implants 5-20 eggs into large mammals (such as human beings) using a barbed ovipositor up to 70 centimeters long. The eggs hatch 4-12 days later and the larvae start eating their way through the body.
* SCP-776 that can make the practitioners de-age almost 40 years, although lately there's been some weird side-effects like birth defects ("too many eyes and not enough skin") and...:
* SCP-783 ("Baba Yaga's Cottage"). a cockchafer (beetle) was mutated so that when it bit into a person it implanted eggs into their body for later hatching.
* SCP-783 ("Baba Yaga's Cottage"). an animal mutated by SCP-783 grows tentacles that it inserts into a human being's skull in order to take over his brain.
* SCP-783 ("Baba Yaga's Cottage"). Any animal that enters the Cottage undergoes massive mutations which usually give enhanced combat abilities.
* SCP-783 ("Baba Yaga's Cottage") one of the animals mutated by entering the Cottage grows tentacles powerful enough to grab a human being.
* SCP-796 ("River Cat"). SCP-796 stalks one specific person at a time. It is completely visible to that person, but is not seen by most other people. People who are very perceptive or have psychic abilities may be able to spot it.
* SCP-823 is an abandoned amusement park which was abandoned after a bizarre event where 231 attendees were killed in bizarre accidents including, but not limited to:

bizarre decapitations, dismembered bodies in the hall of mirrors, a person launched into the ground from a roller-coaster, and a couple fused together after exiting the tunnel of love deceased.
* SCP-823, while already being one of the most terrifying articles on the site, has containment procedures that are never actually explained. There are two "zones" surrounding the theme park, a yellow zone and a red zone. The yellow zone is bad enough but whatever is in the red zone is so heinous and dreadful that anyone who enters it is to be killed on sight. The only thing we know about it? Sometimes piping or music comes from the red zone and if that's the case, personnel need to get out of there immediately.
* SCP-826 ("Draws You into the Book"). A person can spend hours inside the book while only minutes pass outside.
* SCP-827 ("The Soup"). Dr. George Farrow was suffering from cancer and had less than six months to live. He tried to cure himself with stem cell therapy and ended up changing himself into a mass of protoplasm.
* SCP-834 ("Marked"). A researcher used a SCP-834 marker to drew reptilian scales on their chest. Six months later their internal organs were converted into a reptile-like monster and burst out of their chest.
* SCP-835 ("Expunged Data Released"). SCP-835 has tentacles that it uses to grab victims and pull them into itself for conversion.
* SCP-845 ("Liquid Polecat"). If SCP-845 is swallowed while in liquid form, it will change back into its animal form in the victim's stomach and burrow its way out of the victim's body through the abdomen.
* SCP-845 ("Liquid Polecat"). SCP-845 is a polecat that can change into a light brown liquid similar to water.
* SCP-849 ("A Perfect Day") before automatically ejecting the user once 24 hours have passed.
* SCP-855 ("The Film Hall") emerged and attacked the guards, who reported that bullets had little effect on him.
* SCP-860 ("Blue Key"). A 27 year old female spent 7 months inside the blue forest and emerged a very old woman, indicating that time passed faster than normal inside it.
* SCP-860, which when used inside of coordinates which appear randomly on the key's blade to open a door, will cause the door to open to a mysterious forest clearing dubbed SCP-860-1. The key has also been shown to be able to dematerialize in one place and appear in another.
* SCP-861 is a large, elastic ball of "pseudorganic matter" capable of manifesting numerous different organs and appendages, ranging from feathered wings to shark fins. Oh, and anyone who comes near it has a chant foretelling the end of the world projected into their head in Biblical Hebrew, driving anyone who understands it insane.
* SCP-864 ("Efficient Washbasin"). When filled with water, SCP-864 can generate tentacles that can grab nearby people.
* SCP-867 ("Blood Spruce"). After an SCP-867 seed is injected into a living creature's body, it grows throughout the creature's circulatory system, eventually killing it. SCP-867 then bursts out of the victim's body and grows to full size, consuming the body as it does so.
* SCP-867 ("Blood Spruce"). SCP-867's leaves act like hypodermic needles, injecting a seed into any creature that brushes up against it.
* SCP-870 ("The Maybe There Monsters"). The creatures known as SCP-870 can only be seen by people with schizophrenia. Each schizophrenic person who looks at an SCP-870 sees something different (a spider with too many legs, a giant ant with a human face, etc.).
* SCP-871 is a bunch of cakes that replicate endlessly if they are not eaten.
* SCP-882 has had at least one known cult worship it due to its effects.
* SCP-896 ("Online Role Playing Game"). A researcher who played the game for less than 10 hours straight leveled up many times but then died. An autopsy showed severe arthritis, Alzheimer’s, a cataract and several tumors, indicating death from old age.

* SCP-896 ("Online Role Playing Game"). One of the test subjects had his Stamina (constitution, resistance to injury, etc.) statistic increased so high that he became immune to bullets from standard issue firearms.
* SCP-899: shrieking, black-eyed, bloodstained ghost children in a forest.
* SCP-900 (the City of the Sun) is an abandoned city which has largely fallen into ruins.
* SCP 904 is a memetic hazard related to writing on a bathroom stall that causes an individual to uncontrollably rhyme whenever they speak. While the effect usually wears off in 24 hours, it can persist permanently and the effect can grow to the point where the individual can rhyme in superior methods but begin hallucinating. The biggest problem comes when rhyming words that have little to no rhymes (such as the word "ninth" as the article says). While the article does not specify the effects of failing to rhyme, it does note that cleaning up the blood afterwards is incredibly difficult.
* SCP-906 ("Scouring Hive"). SCP-906 are worms that can act as a colonial superorganism and gather together to form a humanoid body.
* SCP-906 ("Scouring Hive"). SCP-906 can be destroyed by incineration, and personnel are allowed to use flamethrowers to do so.
* SCP-910 well past the point where their body would ordinarily shut down and any wound, no matter how minor, never heals. Imagine every nick from shaving, every papercut, every bruise and scrap, raw and hurting for the rest of your life. Now imagine that life never ends.
* SCP-919 ("Needy Mirror"). If a person's image is reflected in the mirror for 15 seconds, the reflected image starts moving independently of the person... and begins pleading and begging for the person to not leave, since if the person leaves the reflection dies.
* SCP-920. For instance, if he's forcibly stopped and a building is constructed around him, anyone attempting to find the building will become lost.
* SCP-929 ("The Cuckoo"). When SCP-929 comes within three meters of an animal it will rapidly change into a younger version of the animal. It will stay in that form until the animal it's imitating dies or it's attacked.
* SCP-929 ("The Cuckoo"). When SCP-929 is attacked its head will split open and tentacles will emerge from it. SCP-929 uses these tentacles to strangle, strike and lash its attackers.
* SCP-930 ("Seagull Island"). One of the survivors of the wreck of the U.S.S. Kete kept a journal of his experiences. One by one the other 18 survivors vanished in the night, apparently just walking away. The remaining survivors sometimes found the bodies hanging in the trees, but none of the others ever came back. The last survivor saw glimpses of something in the bushes that was worse than anything he'd ever seen.
* SCP-932 ("Night Feeder"). During the containment breach described in Incident Report 932-02 SCP-932-06 escaped, apparently by somehow getting into Site-09's air ducts. While in the air ducts it reproduced, creating SCP-932-07 and SCP-932-08.
* SCP-936 is capable of this. The object was discovered in the possession of a man who had tried to commit suicide to transfer his consciousness into the object. Instead, an SCP researcher carrying the object died while transporting it, successfully transferring his consciousness into the amulet and possessing whoever touches it. If the host touches the object for 30 days (usually via wearing it like an amulet), the consciousness transfer is permanent, even after the object is removed. The Foundation is restricting the researcher to possessing only one person at a time cycling hosts just in case, but thankfully he retains his loyalty to the cause and is searching for a release.
* SCP-940 ("Araneae Marionettes"). SCP-940 is a spider-like creature with a leg span up to 7 meters across.
* SCP-940 ("Araneae Marionettes"). SCP-940 reproduces by having its host rape other people, which infects the victim with SCP-940 eggs. The eggs grow inside the victim and eventually take it over, continuing the cycle.
* SCP-944 ("Mirror Maze"). A child went through one of the mirrors in SCP-944 and ended up in a windowless brick room being tortured by "Zippo the Pyromaniac Clown".

* SCP-953 ("Polymorphic Humanoid") ability to take the form of one of the loved ones.
* SCP-953 ("Polymorphic Humanoid"). SCP-953 is the basis for the Korean legend of the kumiho (9 tailed fox). It can reach inside a person's abdomen, extract their liver, and swallow it whole.
* SCP-953 ("Polymorphic Humanoid"). SCP-953 normally has the form of a small Red Fox, but can take the form of objects and living creatures, including that of an attractive Korean woman.
* SCP-956 is an evil piñata that kills children by turning their insides into candy and then bludgeoning them open like a piñata, and if a child eats the candy it makes this way, they turn into a copy of it.
* SCP-963, Dr. Bright can't actually die. Whenever he sleeps, he dreams about the deaths of every body he's inhabited, and when 963 is without a host, he is haunted by the minds of the people he's overwritten. When a camera that reveals its subjects' greatest desire was used to photograph Bright, it produced a photo of Bright's gravestone, with the epitaph "Jack Bright, Resting at Last."
* SCP-963 to another host and he can keep walking around like nothing happened.
* SCP-966 ("Sleep Killer"). SCP-966 is a humanoid being that can only be seen by a creature that can see infrared light. It uses a special ability to render a victim unable to sleep, waits until the victim collapses from sleep deprivation and then eats it. It is known to deliberately make scary noises and even assault the target to hasten its psychological collapse. Repeated use of its special ability on a subject can cause the victim to have vivid hallucinations and/or enter a rage state.
* SCP-967 ("Infinite Scrapyard"). When the primitive robots that exit SCP-967 break apart into their component pieces, the Foundation burns them to ashes and puts them back inside SCP-967 so their presence outside SCP-967 doesn't cause it to expand.
* SCP-970 ("The Recursive Room"). Anyone who passes through all of the doors in SCP-970 and ends up in their original location will actually be in a slightly different universe. Each time they pass through SCP-970 the universe will change a little more, until things get really strange.
* SCP-974 ("Treehouse Predator"). Combat between Foundation troops and SCP-974 has shown that it isn't affected by small arms fire.
* SCP-974 ("Treehouse Predator"). SCP-974 is a meat-eating creature that looks like a young human child. It prefers to kill and eat prepubescent children (ages 6-12 years old).
* SCP-978: A camera that takes pictures that show what the subject would rather be doing at the time.
* SCP-978 is an instant one Polaroid camera that when, taking a picture of a person, the photograph is not of that person but of what that person wants to be doing at that time.
* SCP-983 ("The Birthday Monkey"). Each time the Birthday Monkey sings a verse the person who activated it will age 1 year. If it isn't deactivated the victim will be aged to death. The Monkey will continue singing verses until the victim has been reduced to a skeleton.
* SCP-999, nicknamed "The Tickle Monster." A rare exception of a benevolent creature in a list of fairly creepy and/or dangerous experiments. Its favorite activity is to envelop a person and tickle them non-stop, mostly to make them feel happy.
* SCP always changes itself into a "better" version of whatever is viewing it, to the point that they can't even find out its natural form via remote observation because it just turns into a more expensive camera.
* SCP, an apple tree that grows clones like fruit of whatever touches it's bark. Human and animal clones age rapidly and only last about two weeks.
* SCP Animated - Tales from the Foundation She gets roundly chewed out by Director Jones of the Ethics Committee, and reassigned to SCP-187.
* SCP Animated - Tales from the Foundation When she returns, she's terrified of him.
* SCP, a strange arcade game that involves murdering cute little puppies in many

different gruesome ways.
* SCP at cards. The reapers take revenge by destroying everything human-related wherever he goes.
* SCP breach containment procedures sometimes include flamethrowers, particularly where bullets would be ineffective.
* SCP-ES-19. Not all of them are described, but these include implied extraterrestrial invasions, nuclear wars, genocide, and the use of humans as cattle for food. This is bad already, but on an certain percent of times, the listeners begin to suffer of aftereffects of said event, from becoming convinced of what actions should have been taken to prevent it, to presenting PSTD and physical effects related to what they listened.
* SCP Foundation: Abigael and her grandfather talk to each other through telepathy, but no-one else can communicate verbally to him except her.
* SCP Foundation abilities are tied to an entirely different mechanism. This helped the writing community in general go back to treating the series as paranormal rather than high-concept science fiction.
* SCP Foundation about two mime gangs who fight each other with their telekinetic abilities (though sometimes they end up trapping themselves in invisible boxes).
* SCP Foundation, a catalogue of all sorts of detained paranormal entities, it's bound to end up as this. The website started towards it being more orientated towards horror, which is the common way to describe the site, but SCP entries are very varied in tone to reflect that the weird isn't always traditionally scary. The variation of the site includes SCP entities that are:
* SCP Foundation, a "cognitohazardous meme" that causes people to think that jokes are still funny after they've been explained. The Foundation is suppressing its spread by telling people that doing so is "really annoying".
* SCP Foundation acts specifically to kill you in a broken heel situation.
* SCP Foundation Ad Astra has the Tayonu, which has six sexes; each can be reproduced with any of the other five
* SCP Foundation A decent number of artifacts contained by the Foundation bear some resemblance to some form of product intended to be sold to the public, to the detriment of anyone unfortunate enough to find one. In addition, there are a number of organizations of interest that specialize in the production and or sale of such artifacts.
* SCP Foundation, a device used for divining using animal organs. If a fresh sheep's liver is placed on the device, it gives increasingly complex instructions, shutting down for twenty-four hours if one is not completed. It also speaks in a language and tone tailored to the user, so to a speaker of modern English it sounds like a phone tree. ("Welcome to HarusCo! Your sacrifice is very important to us! For Tinia the Thunderer, please perform a horizontal incision on the offering. For Aita of the Underworld, please perform a vertical incision. For Maris, lightly cover your offering with the ash of a dead warrior related to you by blood.") When they had SCP-1510 (the cursed spirit of a Roman soldier who is trapped in his old helmet and possesses the wearer) use the device because he is from the same general area and time period, the instructions were in Latin, and sounded like what you might expect from such a device. ("Son of Romulus, speak the words thy father taught you, and your watcher will speak, his words carried by our spirit.")
* SCP Foundation, a Foundation Agent was killed by a civilian while he was trying to commandeer the civilian's car to deal with a containment breach of another SCP object.
* SCP Foundation After SCP-695 eggs have grown to juvenile size inside a female human host, they may escape by exiting through her vagina, anus or mouth.
* SCP Foundation, Agent Diogenes has had his/her gender changed so many times by magical artifacts that, in addition to a now very androgynous appearance, said Agent also is comfortable with the new gender identity they took, that identity being none. Diogenes refuses to pick either, state what the biological sex even is at this point and also refuses to alter things like hair or uniform to make a more masculine or feminine impression.
* SCP Foundation, a group of artifacts built by aliens attempting to anticipate

what future human technology would be like from watching out-of-date sci-fi.
* SCP Foundation, aka "An SCP". It is captured due to displaying anomalous properties, and interactions with researchers have resulted in [DATA EXPUNGED]. It is contained in a containment chamber which is to contain precautions which aid in its containment, and should it breach containment, personnel are to take necessary actions to recontain it. No fewer than a specified number of staff may enter the containment room at any time.
* SCP Foundation (a.k.a. "Mr. Deeds") is a modern reworking of the classical djinni: A magical British valet who is bound to a silver bell. He's competent, polite, and faithfully serves whoever summons him, but has no powers other than teleportation and immortality.
* SCP Foundation, a key that can open any lock in the world, provided the user can find and identify the lock.
* SCP Foundation, a lake filled with a red fluid. If you lock yourself into a submarine and keep going down, and down, and down, the fluid will keep getting thicker and thicker... until you finally reach a whole new world.
* SCP Foundation, a literal "Gay Bomb", that does exactly as described, with a cloud of pink smoke.
* SCP Foundation also has this property. The former caused 5 civilian injuries and is currently sitting in a tank of goo, while the latter caused 45 casualties upon being dropped and is currently thought to be orbiting Mars.
* SCP Foundation. A man's body is spread out over an entire house in pieces and embedded into the walls, furniture, and appliances, but the scattered parts of him are still alive (and visibly distressed).
* SCP Foundation, a man who beat Death (or Deaths, there are three of them) in a card game. While the Brothers Death are usually good losers, they got a bit pissed when he decided to humiliate them by beating them three more times, and they thus cursed him to ever be barred from the afterlife, with the additional curse that any manmade structures and civilizations will fall to ruin if he ever gets near them.
* SCP Foundation, an abandoned building that connects to every indoor abandoned location, including places that aren't on Earth or even from our reality.
* SCP Foundation, an alien space fleet attacked the Earth and destroyed all major cities, then invaded. The Foundation and the Global Occult Coalition teamed up (calling themselves "AEGIS") to fight them, and ultimately deployed a weapon of mass destruction that caused the breach.
* SCP Foundation, an anomalous mine shaft that screws around with exploration team Mobile Task Force Trotter-5:
* SCP Foundation, and another where he came back and refused to say anything but "So many spiders..."
* SCP Foundation and a very convoluted process to actually hit the button. Oh, and it's been used several times before. The current iteration of the Foundation broke the damn thing so that it doesn't actually work anymore, though.
* SCP Foundation and committed suicide when the attempt to keep his personal fantasy going on forever failed.
* SCP Foundation, and moved him to solitary confinement indefinitely to prevent it from spreading.
* SCP Foundation, and one team plays home games in the caldera of an active volcano.
* SCP Foundation and other groups frequently engage in this. Especially the Global Occult Coalition - while their end goal is the same (protection of baseline reality), their methodology is quite different.
* SCP Foundation and played for all the cosmic and religious horror it can be.
* SCP Foundation, and represents the absolute best of countless other species on (mostly) parallel Earths.
* SCP Foundation and sacrificed all of it in order to have a son. The age of "normalcy" was said to end once the Black Moon howls, but the Overseer council intends to do whatever it can to delay or prevent it and preserve order.
* SCP Foundation), and "Surprise me" (superheated water that exploded in his face... which did, indeed, surprise him). This even extends to abstract concepts

such as "a cup of music" or "my life story". One incident suggested that the machine has a certain level of intelligence: when a disaster happened at the facility it is stored in, one staff member, in desperation, asked it for "a cup of relevant medical knowledge", received it, and was able to save the lives of several critically injured people. Later requests for the same under controlled circumstances received "Out of range" as the response. The researchers speculate that 294 only granted the initial request out of self-preservation.
* SCP Foundation, and the more extreme measures (like the termination of D-Class personnel at the end of every month) have been slowly phased out.
* SCP Foundation. And those are just a handful of categories of items the Foundation has allowed to be catalogued without absolute redaction of all knowledge on the subject.
* SCP Foundation. A nganga (African tribal shaman) is talking with one of the spirits trapped in a SCP-1036 doll. When the nganga asks the spirit how long it has been trapped in the doll, it says "Three hundred twenty-six of your years".
* SCP Foundation, an inedible genetically engineered variant of zucchini that grows rapidly in increasingly harsh conditions. As long as there is organic matter it'll germinate.
* SCP Foundation annoying, though also a bit compelling. Its most common form in containment is a high quality security camera.
* SCP Foundation. Anyone who spends more than 4 hours per 24 hour period within 10-12 meters of SCP-1225 will express aggression, anger and irritability as well as decreased patience and tolerance for frustration.
* SCP Foundation. Anyone who wears one of these goggles can see colored orbs above the heads of most mammals (including human beings). The orbs are invisible to normal sight and it's not clear what they are.
* SCP Foundation (a painting of a wyvern wizard and a cyborg T. Rex fighting), which makes viewers nauseous if they overthink what the painting is supposed to represent. The artist who made it deliberately added this feature so when critics he hated came by, he could laugh at the sick looks on their faces.
* SCP Foundation appears to be one of the few computer AIs that evolved without being programmed to do so.
* SCP Foundation approach to protecting humanity, and claim that the soldiers responsible for the chair incident were in breach of protocol.
* SCP Foundation are consumer products with strange and harmful effects on user. The mysterious organization known as The Factory intentionally mass-produces several such products.
* SCP Foundation are flying insects that are different from any known Earthly species, indicating that they are from another world. SCP-875-3, the large creatures in the cryogenic stasis chambers, are also insectoid in nature and are presumably from the same source.
* SCP Foundation are three near godlike beings who run experiments on the trapped staff members of Site-37. The base was split into four sections. Three are basically given various forms of torture, while the fourth is left as a "control group," unharmed by the experiments. Considering these experiments include "throw fireballs at the scientists while they run away" and "try to measure an ever-changing series of pipes," there is not much point to the control group.
* SCP Foundation as an alien organism that apparently replaced the hangar at Groom Lake as camouflage. The UFO from Roswell was its larval form and the conspiracy theories about it are its attempts to lure in prey, namely humans.
* SCP Foundation, a sapient animated drawing who learned that she is only a drawing and became depressed.
* SCP Foundation as a virus that's said to be the cause of many instances of spontaneous human combustion throughout history.
* SCP Foundation. As in, he keeps the guy's limbless shell strapped to the back of his wheelchair, with tubes connecting their organ systems.
* SCP Foundation, as it actually goes and justifies how and why the whole thing works, and the security measures to keep it safe, but is otherwise played straight (with slight deconstruction, in that it takes about five decades of time and effort

to restart humanity, more or less). The facility can rebuild humanity and its civilization, and it's already been used at least twice. According to the first addendum it's not functioning at the moment but they hope to have it working again by 2020.
* SCP Foundation. As Mobile Task Force Sigma-3 moves through a town, it is attacked by cultists literally armed with torches and pitchforks. MTF Sigma-3 manages to avoid the cultists, who eventually fall asleep.
* SCP Foundation a statue which follows whomever demonstrates themselves to be "the cleverest".
* SCP Foundation a talisman which, if you are killed while holding it, is imprinted with your soul. From then on, anyone else who touches the talisman has their personality overwritten with whoever is contained inside. It's actually possible to make multiple copies of yourself this way.
* SCP Foundation) attempt to leave Earth for Alpha Centauri in a somehow space-worthy minibus, apparently believing that traveling at 80 mph the whole way would get you there in four weeks. One of them realize something's wrong when it takes them two months just to pass the moon. By the time they figure this out, it is too late for them to return to Earth.
* SCP Foundation at their worst, but even the ones intent on spreading anomalies out of a desire to end the "tyranny of normalcy" (The Serpent's Hand) or just profit (MC&D) generally tend to realize that when something is far too dangerous for them to handle, they should just simply hand it over to the Foundation for safekeeping.
* SCP Foundation. A woman named Josephine used an SCP object to summon two familiars, a calico cat named Salix and a female beagle named Willow. They were her only companions, and after an escaped D-Class killed her they avenged themselves upon him.
* SCP Foundation, a "word a day calendar" which lists definitions for these. Which would be fine, except that people who read it become absolutely convinced that they're normal words, and become violently angry at anyone who tells them that they aren't real words. It has since been changed and it doesn't have that effect anymore. Instead, some of the words describe highly anomalous subjects, actions, or events.
* SCP Foundation, both of which are homicidal monsters made of shadows. They differ in the opposite ways they are contained; SCP-017 has to be in a cell surrounded by bright lights, while SCP-280 has to be in a cell surrounded by total darkness. Otherwise, they will escape and kill people.
* SCP Foundation, but does so by destroying anomalies with military force.
* SCP Foundation, but even it is too terrified to dare attack SCP-173. It also didn't attack Dr. Clef when placed in a room with him, just stood there quietly for some reason. On the other end, SCP-343 (God/something everyone calls "God") refused to kill 682 when asked, saying that because he didn't create it, it's not his problem.
* SCP Foundation but fan-submitted content. It's all available for free and no one makes any money off of it.
* SCP Foundation, but there are several characters that are implied to be behind some of the worst SCPs but are beyond the Foundation's reach.
* SCP Foundation by forcing one of the Foundation's soldiers to disassemble and swallow the parts to their gun, and quite possible the most bizarre, "Cause of death: suicide caused by forced sexual entry through left eye, resulting in unsurvivable brain trauma."
* SCP Foundation called the White Sun. They try to use a structure called the Memory House to bring the White Sun to Earth and cause an XK-Class End of the World Scenario.
* SCP Foundation can be used to remove someone's soul. After someone accidentally spilled a soul onto a laptop, it started running without power and behaving erratically.
* SCP Foundation capable of perfectly duplicating human beings, not only their bodies but their minds as well. It copied the form of a Foundation doctor and tried

to kill him to take his place, but the doctor notified Security and both were captured. Problem: the Foundation can't tell which is the doctor and which is the duplicate.
* SCP Foundation carrying it out as the physical suffering it entails to its subjects, which has resulted in the suicide of at least one of both groups (with one of the aforementioned events having occurred after SCP-231-3 "self-terminated"). What happens during Procedure 110-Montauk has been expunged from non-restricted records, except for a warning that it's "as horrible as you have heard" and "does involve brutal [REDACTED]."
* SCP Foundation defensive of it. Even editing its article can incur the mods wrath.
* SCP Foundation: Due to the site's philosophy of "the only canon is that there is no canon", a lot of characters are subject to this trope. For example, SCP-096, a monster that kills anyone who sees its face, be it in person or in a photograph/video feed, is slated for immediate termination due to an incident wherein it escaped and destroyed a small population center. However, it is not listed as a terminated SCP, leaving its status unknown.
* SCP Foundation. During Emergency Procedure 1634-Broadway, Dr. Anderson whips off his glasses at a dramatic moment.
* SCP Foundation. Each episode ends with the host making a monologue that ends with something like this:
* SCP Foundation. Each SCP-625 is a rat-like creature that is apparently made up of parts of at least seven different species of rodents seamlessly merged together.
* SCP Foundation entries, including a sentient teddy bear that can spawn homicidal copies of itself, a video game that decreases the intelligence of players older than 14, and a pinata that kills children.
* SCP Foundation, essentially a clockwork virus, turns any creature in the kingdom Animalia into one of these. It's much worse than it sounds.
* SCP Foundation. Every seven days, an example of SCP-2954-2 appears and attacks. SCP-2954-2 are bipedal and 50-60 meters tall. They have a mixture of traits from fish, amphibians and reptiles, including spiny fins on their back and forearms.
* SCP Foundation example: Dr. Clef created the Scarlet King, but the entity was nothing more than background for SCP 231. It was Djoric instead who greatly expanded on the lore of the Scarlet King, giving readers most of what they know of the Scarlet King.
* SCP Foundation, excluding one with a depopulated but more advanced human race that they're still investigating.
* SCP Foundation, expanded her range and shifted from harmlessly hitching rides to killing people who didn't stop for her.
* SCP Foundation features a creature like this at the bottom of the stairwell. As you approach it, its hands come out of the darkness, unnaturally long.
* SCP Foundation features the Unusual Incidents Unit of the FBI, their world's equivalent of "The X-Files". However, also considered a dead end job for the FBI, and they only find actual SCP items very rarely. They're also looked down upon by the other organizations that investigate anomalies.
* SCP Foundation files make occasional use of this. For displaying either egregious stupidity or horrific disregard for common decency (i.e. rearranging the furnishings of a young blind girl for a laugh), Foundation staff can be reassigned to Keter duty. Keter is the classification used for objects or beings that show an active, intense hostility towards human life, civilization, or existence itself. As they often require incredibly precise and challenging means of containment to prevent wholesale destruction, staff members on Keter duty have a VERY short life expectancy.
* SCP Foundation for more than fifty years. She not only survived, but revived on her own without assistance.
* SCP Foundation for the Foundation itself, thereby deliberately invoking this trope, up until the point where it went rogue and became this for real.
* SCP Foundation frequently deals in Humes, which is a unit used to measure baseline reality in the event of reality warping. They also measure religious faith

in terms of "Akiva radiation" (using centiakivas).
* SCP Foundation generator, but he changed it by crossing out the word "Anti" that was written on it.
* SCP Foundation good reasons for keeping the public from knowing about it. Interestingly, neither the foundation itself nor most of its members are paranormal themselves.
* SCP Foundation half full, but most of the time they tend to the messes made by less dangerous but no less bizarre artifacts and people.
* SCP Foundation has a few on file. Some of them are contained, but most are not (it's rather hard to contain Death). Of note are the Three Brothers, the Foundation multiverse's personification of Death. The younger brother, the Small Death, represents the death of the individual. The middle brother, the Greater Death, represents death caused by war and mass murder, generally mass death that could be prevented. The elder brother, the All-Death represents death caused by unpreventable disasters, such as natural or supernatural disasters. Like all things on the wiki, it's subject to change depending on the author. The brothers were willing to play cards with SCP-1440, and even lost. The winner, unfortunately, got cocky, and the brothers are only good losers to a point.
* SCP Foundation has a few SCP objects that will move when not looked at:
* SCP Foundation has a lot of these, and their effects range from the lethal to the benign. Some examples include:
* SCP Foundation has an odd example in the case of SCP-681, a malevolent form of helium (in real life a non-toxic asphyxiant) that intentionally coats the inside of the lungs of living beings in the most efficient possible manner, causing them to suffocate. Luckily, it can be trapped in balloons.
* SCP Foundation has a number of SCPs which produce an endless supply of food. Appropriately enough, a Group of Interest called the "Manna Charitable Foundation" has attempted to exploit several of them to feed the poor.
* SCP Foundation has a variety of arc words, some of which only apply to specific SCP objects, others that only apply to a group of objects, a "Group of Interest" or the Foundation as a whole.
* SCP Foundation has been written off in a manner similar to this. For instance, claiming that he slammed his head into the table nine times during an interview, or that there was an experimental attempt to terminate SCP-682 using him.
* SCP Foundation has multiple departments taking care of internal affairs. MTF Epsilon-11 "Nine-tailed Fox" handles internal security, sometimes with support from the O5 Council's personal task force, Alpha-1 "Red Right Hand." There is also an Interntal Security department, and an Internal Tribunal department that handles crimes of abnormal nature that normal justice systems are unable to tackle. Finally, there is the Ethics Committee, which oversees everything in the Foundation, up to and including the O5 Council.
* SCP Foundation has quite a few. SCP-343 in particular actually claims to be the Abrahamic God.
* SCP Foundation has several of these. One example is antimemetics, the study of things that can't be remembered.
* SCP Foundation has several references to "onsite nukes" being ready on certain sites in case of any notable containment breach, and some stories feature them actually being detonated (such as in the alternate universe featured in SCP-2935, O, Death).
* SCP Foundation has this as explaining why we don't have all these weird cults dedicated to SCP-level objects. Not that it seems to have worked...
* SCP Foundation hatched out of it. So they demoted it to make less people look in its direction.
* SCP Foundation have been blamed on SCPs, and had to be passed off as natural by way of massive amnesiacs distribution.
* SCP Foundation have initials that spell out "SCP", like "Soap from Corpses Products, Inc.".
* SCP Foundation, having no official canon, varies in how much of a fourth wall any given entry includes, but one particular item posits that the entire universe of

the Foundation lacks one.
* SCP Foundation. He appears to be a balding Caucasian male. He ruthlessly kills speeders in horrible ways, including evisceration and rape.
* SCP Foundation, he said he could hold it off for a while, even suggesting that his body could be booby-trapped with bombs or toxins.
* SCP Foundation. His second-to-last one alerted the Foundation, as he survived a point-blank shotgun blast that only took his lower jaw, which should have been impossible.
* SCP Foundation houses SCP-496 which hints at having interacted frequently with citizens of (possibly) Atlantis.
* SCP Foundation, human cadaver-skinsuits that are (somehow) designed to be operated by two cats.
* SCP Foundation if it ever escapes containment and infects all of Earth's water.
* SCP Foundation if it means their agents aren't getting slaughtered by the dozen.
* SCP Foundation if not maintained properly, sentient objects, time-displaced creatures and people, robots, and other weird phenomenon.
* SCP Foundation if they were to be left unregulated. There is no known exact number of how many underground sites the Foundation has, but these sites could be located in a places where there is a high population density, simply masquerading as a ordinary business, or just located in simple, well-known army base.
* SCP Foundation imaginable, this is somewhat understandable. And indeed, they have killed several entities that could claim the title already.
* SCP Foundation includes a piece of charcoal that causes anyone using it to write "Somebody help me! I'm trapped in the charcoal!" every several seconds.
* SCP Foundation in storage, including Cain, Abel, and the suitcase that ate D.B. Cooper.
* SCP Foundation interested in finding out where these other copies are before the Daevites can retroactively insert themselves into the modern era.
* SCP Foundation in the form of a religious conflict between the Church Of The Broken God and the Sarkic Cults. The Church is usually portrayed as the "good guys" due to the "might makes right" ideology of most Sarkics although there are many exceptions. It can be argued that humanity comprises a third faction, represented by the Foundation, the GOC and other such organizations.
* SCP Foundation in The SCP files, as below in an excerpt from File II on SCP-087:
* SCP Foundation. In-Universe, most people at the Foundation consider them comically useless at this, considering all the morally questionably stuff the Foundation gets up to, but several tales and SCPs depict them as highly competent and powerful, sometimes even matching or surpassing the O5 Council in power.
* SCP Foundation, in which some weed is improved by running it through a couple of SCPs, and then tested by having many other SCPs get stoned.
* SCP Foundation" is about an alternate Earth where Joseph Kennedy became president instead of John, and a nuclear error on the East side was retaliated with a true nuclear barrage from the West, causing the end of the world. Both sides continued to fight during the post-apocalypse, believing the other side struck first.
* SCP Foundation is a cockatoo with the mind of a young child. The Foundation gives him paper to write on, and one time he wrote "i wan my mom" [sic].
* SCP Foundation is a fedora that causes whoever wears it to do one of these out loud.
* SCP Foundation is a Keter-class species of English Ivy that ensnares warm-blooded animals, liquefies their tissues and quickly drains them dry, leaving only their skin and bones — and sometimes a tangle of roots spreading from a seed planted in their skull.
* SCP Foundation is an abandoned town located in southern Chile, the site was part of a eugenic project and strange experiments related to human reproduction apparently were carried out in it. The town was abandoned decades ago, however, there is apparently “something” (possibly supernatural) that continues to influence the animals and humans that enter the area.
* SCP Foundation is an animate teddy bear that can make more of its kind using any random material, including a fetus it somehow removed from a dozing employee.

* SCP Foundation is an anomalous herd of elephants. Once a year, some elephants turn into SCP-1495-M, which can control other animals. They can identify people who have acted in an evil manner and order the animals to attack and kill them.
* SCP Foundation is an entity that appears to be composed entirely of flame, and though it can communicate by writing letters out of its own flames, its goals are limited to simply spreading and acquiring fuel sources. Several wildfires have been attributed to it.
* SCP Foundation is an Etruscan artifact resembling a divining liver. If you put an actual sheep liver on it you get the following message:
* SCP Foundation is an incorporeal entity that travels all over the world looking for remote places to inhabit. After SCP-1448 arrives in an area, it somehow starts spreading rumors among the local youth population that performing a specific magical ritual in its location will be effective, thus effectively creating a new urban legend.
* SCP Foundation is an owl that is able to remove the bones of any human subject it attacks, causing their death.
* SCP Foundation is a pair of caterpillars that are constantly traveling through time and space, trying to find each other and leaving poetry behind in their wake. At the end of the entry, the two finally arrive at the same point in time and space, rush to each other, and fuse into a single chrysalis. After eight days, the chrysalis hatches, revealing a butterfly that matches the description of no known butterfly species. It produces the word "WHOLE" in fifty-three languages before moving to an unknown point in space-time.
* SCP Foundation is a race of human subspecies with lots of extra body parts and bones and muscles enhanced with other materials. They are hostile towards normal humans. In adult form, SCP-1788-1 are all extremely obese, weighing 150-200 kilograms (330-440 lbs.). They kidnap prepubescent children and use an unknown process on them to turn them into more of SCP-1788-1.
* SCP Foundation is a set of 95 of such videos, though each of them is one-use only. It is left unclear whether it is a genuine example, or if the videos are sentient.
* SCP Foundation is a spoon that bends people's spines backwards by 90 degrees when it's picked up, acting as a playful inversion of the trope.
* SCP Foundation is a two-person llama costume that traps its wearers inside until they die of hunger or thirst, unless they are forcibly removed.
* SCP Foundation is aware of them on some level. With the sole exception of a man named Jeremiah Wuthers, who, upon being told, claims he always suspected it.
* SCP Foundation is a woman with a portal to a disused Nazi bunker in her nose.
* SCP Foundation, is described as having been born on a leap day, and as a result, aged only one year for every four, and by the time he was nearing 100 years old, was physically still in his twenties.
* SCP Foundation is either the former Foundation administrator Dr. [REDACTED], or an entity pretending to be Dr. [REDACTED]. Either way, it outright acknowledges that it could be an impostor and insists on being treated with exactly the same degree of distrust as all other SCP items. It even insists that it should be reclassified from "Safe" to a higher threat level, "Euclid", seeing as it is a sapient entity possessing all the dangerous knowledge of a Foundation administrator.
* SCP Foundation is incapacitated and releases pressure on a thumb switch their view of the color will be blocked by a light-absorbing panel.
* SCP Foundation is involved with at least one organization dealing with the paranormal. Well, everyone but one person. The story kicks off with four drinking buddies realizing they all work for the Foundation, then find out their wives do, then about 70% of the population of the town they live in, and eventually it's revealed that roughly 3.5 billion people work for the SCP Foundation alone.
* SCP Foundation is not a good reason) are punished appropriately (read: killed).
* SCP Foundation is not an actual queen, neither is she directly evil, but she's actively working against the "protagonists" of the Foundation.
* SCP Foundation is rife with this idea, especially early in the site's history.

Many early entries could be summed up as "strange monster that horrifically kills you". After the site became oversaturated with these, the most unoriginal were culled, and today their works tend toward existential or cosmic horror, though still liberally sprinkled with visceral imagery just to keep your attention.
* SCP Foundation is straightforward: "kill that motherfucker before he knows you're even there." Their process for training people to face Reality Benders consists of getting them so high on drugs they'll believe anything they're told, then telling them things like the doors and windows have vanished and desks are going to kill them. It's the closest they can come to a Reality Bender attack without an actual Reality Bender, and they encourage their hunters to remember this moment if they ever think a Reality Bender can be contained or otherwise reasoned with.
* SCP Foundation is the anomalous company of Fashion Sun Fabrics Limited. The three people who founded it discovered a way to make yellow scarves that cause anyone who dies while wearing them to come back to life as zombie-like creatures and go to work in one of their factories.
* SCP Foundation is the (literally) monstrous bloodline of Leopold I, who used eldritch magic to make his descendants highly resilient to incestual genetic defects. The defects still propagated and now said descendants are insane, cannibalistic, narcissistic mutants.
* SCP Foundation is the most common. The only group within the Foundation to avert this is the Ethics Committee, who never use euphemisms.
* SCP Foundation is the norm and thus trying to conceal everything together is a tall order. It takes her over a year and causes unexpected effects.
* SCP Foundation is the reanimated skeleton of a dog swathed in a mass of old toys, which it uses to form a body.
* SCP Foundation is this trope up to eleven, with an entire solar system fitting inside a room.
* SCP Foundation). It also works on proxy observers: when used to "distract" a security camera, the camera's monitoring computer suffered a fatal error that caused the security feed data to become irreparably corrupted.
* SCP Foundation" it can share the same universe with anything, since it is up to the reader to decide what is or isn't canon. Several crossover stories have been written by various authors, crossing it with a wide variety of works.
* SCP Foundation. It claims to be carrying out the author's wishes, stating "Rowling wanted Weasley to die. Doyle hated Holmes at the end. Kawahara wishes he had axed SAO a while ago." but neglects to elaborate on its other murders.
* SCP Foundation items withdrawn" and "Acceptable Collateral Damage: 90% of worldwide human population".
* SCP Foundation). It's also not above dispensing food items that are not at all fit for human consumption, including a container of citrus-flavored something that exploded on contact with oxygen, a live frag grenade, and a canister of hydrogen cyanide gas. The alien-ness of the food 261 dispenses is directly proportional to the number of times it's been used in a 24-hour period, as well as the time that has passed since its last use; the more it's used, the weirder and more potentially dangerous the things it spits out, which is why the Foundation established a limit of ten uses per day.
* SCP Foundation. It's a series of three safes (a Safe safe, a Euclid safe, and a Keter safe). The Safe safe is always safe, the Euclid safe is safe except when near the Keter safe, and the Keter safe is never safe (though it is a safe). And don't get started on the researchers observing them...
* SCP Foundation keeps the existence of the paranormal a secret from the general populace, even though neither the Foundation nor (most of) its members are paranormal. The ostensible reason for this is the Foundation's mission to "protect normallacy", with a more practical reason being that keeping the populace ignorant of the paranormal in general makes it much easier for the Foundation to keep the populace from sticking their noses into dangerous paranormal situations, and also that people need to be unaware of the supernatural so they can have happy lives, which makes sense considering all the horrors they face.
* SCP Foundation known as 'Granny Rat Tail', who resembles an elderly lady

possessing a rat's tail, with a large eyeball at its tip. During the early nineteenth century, she was known to visit the small town of Brownsborough Massachusetts, flying on an enchanted wooden spoon, and extend her eye-tail down house chimneys in order to find and steal young babies to cook and eat them.
* SCP Foundation known as "the Mewts", who apparently live to watch over children and serve as "protectors of everything we hold dear". One of the Mewts, known as "Flopsy", is ostracized by the others because "Flopsy failed to protect us."
* SCP Foundation lives and breathes this trope. Not only are they true, but they're also terrifying.
* SCP Foundation long before the emergence of organic life. The entire religion is based around using technology (believed to be superior or more divine than flesh) to rebuild and resurrect their god for Him to "bring about some sort of techno-organic apotheosis". Members regularly seek out, create and give prayer to various anomalous technological constructs.
* SCP Foundation makes them only slightly less terrifying than the things they're protecting humanity from.
* SCP Foundation managed to amass a large number of them. Varying from various SCP, especially of Keter and Apollyon class, to a number of Groups of Interest like Marshall, Carter and Dark Ltd., the Black Queen, Chaos Insurgency, Church of a Broken God, Sarkic Cults, Global Occult Coalition, the Factory or the Fifth Church, not to mention recurring greater-scope threats like the Fairies, the Scarlet King or the Hanged King.
* SCP Foundation maniac of a creature from another dimension, who would enjoy nothing more than killing everything in his sight. 999 is an ankle high bit of sentient goo known as "The Tickle Monster" who produces feelings of ease and joy in those who touch him. Not surprisngly, 682 isn't crazy about his harmless sibling. Referring to him as a "Feckless snot wad."
* SCP Foundation: Many SCPs are both dangerous and invincible to some extent, but SCP-682 is undoubtedly the most prominent example, thanks to its ability to adapt to any attack. The Foundation has tried every feasible method of killing it short of nuking it and failed. And they haven't tried to nuke it yet because of the very real danger that it would then be nuke-proof.
* SCP Foundation material, or a couple humorous exceptions - has her in the real world... doing exactly the same thing.
* SCP Foundation. Most of the time they describe the stuff that's happening in bureaucratic language to make it even creepier, but when things get really scary, like [REDACTED] incident with SCP-███, they just [DATA EXPUNGED].
* SCP Foundation: Multiple, all just plain "disappearance" before reappearing elsewhere:
* SCP Foundation Muppets use the usual Barney-killing playground songs to brainwash young children into viciously attacking suit actors who play Barney, their competition.
* SCP Foundation nature of the SCP 'verse, whether this is true or not is up to the reader: given the level of tech exhibited in some cases, the Foundation could likely selectively remove memories.
* SCP Foundation never give straight answers about the details and inner workings of the Foundation and the SCPs it contains. The stock reply to lore questions usually is to figure it out for yourself. Or that there is no canon:
* SCP Foundation. Notable for SCP-1522-1 being a humble fishing trawler.
* SCP Foundation notes that while adults and teenagers usually use their mind-control powers for sex, children use them to make people be their friends.
* SCP Foundation of great power and drives them to attempt dangerous actions that are almost guaranteed to end terribly because the sword actually grants no supernatural combat skill whatsoever and is, in and of itself, a shitty sword with unnecessary cutting parts that are apparently a lot sharper than its actual edge, which is blunt as a butter knife. In contrast to the usual evil weapon, it's pretty much harmless to others, but almost guaranteed to get the wielder injured or killed, so it still handily qualifies.
* SCP Foundation of itself, leaving nothing left. Half an hour after it finishes

consuming itself, it simply reappears where it last was, whole and unharmed.
* SCP Foundation of its original body mass before it adapts and regenerates.
* SCP Foundation often has to prevent both the general populace and its own personnel from using SCPs for such purposes.
* SCP Foundation. Once the Katana is removed from the victim's grasp, "all psychological effects can usually be expunged by a single swift blow to the back of the subject's head."
* SCP Foundation One of SCP-2099's inventions is a force field generator. Unfortunately the Foundation can't examine it because SCP-2099 has forgotten how to turn it off.
* SCP Foundation One of SCP-2099's inventions is night vision goggles that work even when there's no light at all. Normal NVGs require at least a tiny amount of light to magnify.
* SCP Foundation; one of SCP-748's products is the (highly radioactive) meat of a creature that is a hybrid species of human, squid and pig.
* SCP Foundation. One of the key indicators that bad things are about to go down is when creepy carnival music starts playing out of nowhere.
* SCP Foundation. One of the people affected by SCP-2801 temporarily gained the ability to create an anomalous device. It could emit a low-frequency sound that neutralized the hazardous effect of a deadly chemical.
* SCP Foundation. One of the things that Dr. Bright is no longer allowed to do at the Foundation is swap out D-Class uniforms with red leotards.
* SCP Foundation or deleted text marked with [REDACTED] or [DATA EXPUNGED]. These are usually the worst results of the SCP's unchecked behavior or influence because leaving them to the reader's imagination makes for better horror or comedy than pinning them down.
* SCP Foundation. Other times it can be as bad as keeping entire towns cordoned off, and filled with highly trained (or disposable) agents.
* SCP Foundation picked it up, both they and the white-out instantly disappeared, and disappeared so thoroughly, memories of their existence were erased from everyone's brains and the D-class's file was erased from the Foundation's database, leaving the researcher of the test confused why there was an experiment written down that he'd never done involving a worker there was no record of existing.
* SCP Foundation placed underneath the real London, and intended to serve as an Apocalypse Bunker.
* SCP Foundation plot. After Moose fakes her death, she escapes into her car - convinced she's outsmarted Clef, until she starts the car's engine and it bursts into flames.
* SCP Foundation proposals; they are capable of neutralizing any anomaly in existence, and if they die, they cause massive fluctuations in reality. When all 36 gather in one place, it is implied that it'll neutralize every anomaly in existence, and end the SCP Universe as we know it.
* SCP Foundation ransom notes. If the person the note is addressed to opens the envelope the victims named in the note will disappear into the thin air, and will then reappear out of thin air once the ransom demands are met. The ransom demands are often strange, and don't seem to do anything to benefit the entity making the demands, with the notable exception of the time it was clearly trying to engineer an escape attempt.
* SCP Foundation reads that it administers "7.3 kilosades of psychological trauma to its target".
* SCP Foundation referred to them as the "Satanic Child Pain Foundation", accused them of having kidnapped an American girl in order to make her a puppet for a European science cult, and that they had called her SCP-23-1-9. (presumably a combination of 231-7 and 239, showing that she clearly had no idea about the workings of the Foundation).
* SCP Foundation refers to), and as such she's apparently had a bad experience with a would-be "friend".
* SCP Foundation: Robert Bumaro, head of the Church of the Broken God, a religion that worships a mechanical deity that opposes an evil flesh being, and Grand

Karcist Ion, the head of the Sarkic Cults, which worships said evil flesh (Maybe. It's complicated) have been paired together for quite some time now.
* SCP Foundation scientifically explicable, the anomaly is classified as Explained and safe for everyone else to know about. If it isn't... well, they've made some interesting strides in their research, it's just in fields that prove the physical laws we've ascribed to the universe are about as strong as tissue paper.
* SCP Foundation's circle with three arrows pointing inwards, surrounded by a larger circle with three rectangular bumps facing outwards (even though site members maintain that the logo isn't official in-universe).
* SCP Foundation: SCP-048 is an article detailing that there is no SCP-048. In-universe, the explanation given is that any item given that designation was lost, stolen, destroyed, etc. In reality, several writers attempted to fill that slot with a wide variety of ideas, but they were all removed due to negative response.
* SCP Foundation. SCP-1036 are African dolls that each contain a "sentient incorporeal entity" (AKA spirit). If any of the iron nails inserted into the dolls are removed the spirit will escape, possess someone nearby and make the victim kill themselves.
* SCP Foundation: SCP-1047 is a collection of anomalous road signs that if placed in a room indoors with a suitable concentration of carbon dioxide will forcibly apply effects based on their type to anyone in the room.
* SCP Foundation. SCP-1272 is a nongravitational singularity (similar to that of a black hole/hypermass) that tremendously slows down the passage of time inside its area.
* SCP Foundation SCP-1341 is soil that causes jungle-like plants to grow from it that eventually produce ape-like creatures. During an experiment with SCP-1341, one of the researchers is killed by falling into a pit trap (lined with stakes) dug by the creatures.
* SCP Foundation. SCP-1555 fires shells filled with mice (and sometimes other things). One time, a shell fired by SCP-1555 opened up and a horde of mice poured out for three hours. The total number of mice couldn't have naturally fit into the shell.
* SCP Foundation. SCP-165 is a swarming mass of microscopic mites that can strip an animal of all of its flesh in minutes.
* SCP Foundation SCP-1707 is a colony of worms that can completely remove the skin of any creature. Once the skin is removed, SCP-1707 replaces the creature's skin.
* SCP Foundation. SCP-2099 is is brilliant enough to regularly create new anomalous objects at will, such as a cannon that fires ninja robots. However, he is also quite forgetful and depends on his notes to remember things.
* SCP Foundation. SCP-2141 is a giant worm-like creature at least several kilometers long. It lives inside an underground tunnel of unknown length.
* SCP Foundation. SCP-2331 is an animated scarecrow with a pumpkin head who throws spontaneous raves. The last interview log implies that SCP-2331 is the spirit of Halloween, saddened over the commercialization of the holiday, trying something new to relive the joy the holiday once brought him.
* SCP Foundation. SCP-2331 is a scarecrow with a pumpkin head that has a fluorescent blue glow inside it. He creates raves and acts as a DJ at them.
* SCP Foundation. SCP-2525-1 (formerly Junior Researcher L____) has said that the aliens that sent SCP-2525 (the rocket-like device) did so to provide plans for advanced technology to humanity, and that they had done so for other primitive races as well.
* SCP Foundation. SCP-280 can detect the direction of the nearest human being without any apparent range limitation.
* SCP Foundation. SCP-2872 is a thoroughbred stallion racehorse. After it broke out of SCP Foundation containment it traveled into space and accelerated to faster than the speed of light. It is currently heading for the constellation Equuleus.
* SCP Foundation. SCP-2954-1 look like radio telescopes on pedestals. They can fire an electrical arc similar to a lightning bolt.
* SCP Foundation. SCP-695's life cycle starts when its juvenile form enters a human male through his mouth, nose, anus, and urethra.

* SCP Foundation SCP-826 is two bookends. When a book is placed between them, the room it's in will change into the setting of the book. Anyone who enters the room will enter a random location in the book's setting. Any actions the explorer takes will be reflected in the book after they leave it.
* SCP Foundation. SCP-839 are worms that are somehow alive despite being made up of sugar, coloring and flavoring.
* SCP Foundation SCP-999 is a friendly blob of orange slime with the power to induce happiness and cure depression. Its article doesn't say anything about it having a face, but fanartists always draw it with one to make it even cuter.
* SCP Foundation. SCP-999 loves all animals (including humans) so much that it will leap in front of a person to take a bullet fired at them.
* SCP Foundation, she has an incomplete digestive tract, absorbs nutrients through her skin, and has liquid rot for blood. Furthermore, her only method of voiding waste is to vomit. She also uses this to hunt.
* SCP Foundation, she is executed by the townspeople, who first try burning her, which ultimately fails, so they resort to decapitating her instead, with dire results.
* SCP Foundation's mouth is 4 times the size of a regular human's mouth... and looking at it will result in you getting killed by the creature that it's attached to.
* SCP Foundation: Sometimes lampshaded. It is not known whether the effects of certain SCPs on humans are natural reactions or anomalous phenomena. Part of the Foundation's mission is to find out.
* SCP Foundation's reports on the things they keep the world protected from include descriptions of what happens when an SCP's behaviour is left unchecked resulting in [DATA EXPUNGED], or a line of research into what it does leads to [REDACTED], with implications of casualties, injuries to researchers, property damage and reprimands for allowing it to happen.
* SCP Foundation's SCP-3001, Dr. Robert Scranton has the blinking red light from an audio recorder as his only companion, and often talks to "Red" as though it were his friend.
* SCP Foundation starring them they broke out of Foundation custody and were back on wild adventures after three months.
* SCP Foundation story. There is a big difference between mA and MA. Exactly how he managed to set the circuit to nine orders of magnitude lower than normal isn't given.
* SCP Foundation tag specifically involve this trope as it means the object can generate matter and/or energy in manner that violates the laws of thermodynamics.
* SCP Foundation taught the ancient Egyptians how to build the Pyramids.
* SCP Foundation that plays host to a massive civil war between eldritch deities, supported by a cult known as the Victory Society. It turns out the Society is engineering the conflict in order to distract these monstrosities, turning them against one another before they can turn their focus and their terrible power on the rest of humanity.
* SCP Foundation that shoots a bald eagle. A bald eagle which proceeds to go absolutely berserk at "anyone who displays Communist beliefs, Russian ancestry, or unpatriotic leanings."
* SCP Foundation that's in a war with the nation of Alaria. Its automated zeppelins sometimes accidentally cross into the Foundation's universe and drop propaganda leaflets.
* SCP Foundation. The addendum to the exploration log reveals that it really just sends them to another part of the world and alters their view to think they're in such a place.
* SCP Foundation; the bad news is that he sleepwalks, so the Foundation has to chain him to a bed and break his limbs for good measure, and even that's not a foolproof solution since his breathing also counts as movement. And they can't just kill him, either, as doing so causes another person with the same properties to pop up out of nowhere.
* SCP Foundation: The Burning of the Wanderer's Library is generally considered the

worst that can happen. Whether it actually is literally leading to the end of the world or is more just a shit hit the fan indicator varies.
* SCP Foundation The city inside SCP-2264 is surrounded by a black ocean. The nature of the liquid is unknown but it appears to be more viscous than water.
* SCP Foundation), the examples here will be blotted out save for their links:
* SCP Foundation: The Foundation collects strange objects, creatures and people, lists the ways they contradict the known laws of the universe, and try to find out why and how these things still function.
* SCP Foundation. The Foundation has many contained objects that apparently come from (or are doorways to) other universes, many of which are similar to the Foundation's universe.
* SCP Foundation: The GOC makes use of magitech frequently, including magical sensors and casting spells on tablets and with computers.
* SCP Foundation. The House has small robots that perform routine maintenance and cleaning.
* SCP Foundation. Their remains were salvaged by the SCP Foundation and their rusting hulls now sit together on a beach in Svalbard.
* SCP Foundation. The Library has many volumes of philosophy, theology, and history from cultures that are mythological in the real world (such as Shambhalla (sic), Lemuria and Mu). It has animated statues that can speak various languages and act as guides for visitors.
* SCP Foundation. The Library, the GOC and the Church all originated as enemies of the Foundation (in the Library's case, it's the de facto headquarters of a group called the Serpent's Hand), but were interesting enough they received their own wikis.
* SCP Foundation; the lightning bolt ability is noted as being a mutation.
* SCP Foundation. "The majority of users who read the clause were found to have assumed it was a joke, as Discord is known for its humorous loading screens."
* SCP Foundation; the minimum volume he can vocalize at is 90dB, and he can go far, far louder than that. During initial containment, he managed to rupture 3 people's eardrums while just trying to have a friendly chat.
* SCP Foundation The O5 council, the leaders of the Foundation who already operate with dubious morals at the best of times, are disgusted with themselves that this is the best they can do in this case and avoid talking about it as much as possible; case in point, the photo that would normally accompany the article isn't only missing, it's pointedly removed by order of the O5. The article is screaming this trope with the amount of redaction alone.
* SCP Foundation. There are specific interpretations that argue that the Foundation itself is a manifestation of some higher power working to contain, and knowledge of, the various anomalies.
* SCP Foundation, there is SCP 076-2, or Able, who was upset when one of the Agents at his holding facility was killed by an explosion meant to contain him. The reason being that the Agent was one of the few who could keep up with him and he felt that he deserved a death in combat.
* SCP Foundation. The SCP Foundation has dozens of these, given the classification "keter" from the Hebrew word "crown", which is used in Qabalah to describe the highest principle of the universe. The methods used to contain these things are... intricate. The "euclid" and "safe" ones are easier to contain but most of them are still incredibly dangerous.
* SCP Foundation. The silicon chip technology that almost 90% of the Earth's computer systems are based on came from information provided by SCP-1073.
* SCP Foundation the skull of a Wendigo that still has plenty of effects on people.
* SCP Foundation. The true nature of SCP-1160 changes depending on what people believe about it. The Foundation keeps SCP-1160 manageable by distributing "Super Coco Pows" cereal, which has an SCP-1160-like mascot that tries to steal the cereal from children. "Super Coco Pows" is based on General Mills' "Cocoa Puffs" cereal, and the mascot is based on Sonny the Cuckoo Bird, the mascot for Cocoa Puffs.
* SCP Foundation. The "walls" of the subway are covered in racist graffiti, proving even the Fae aren't above vandalism.

* SCP Foundation They hate our world now and have been trying to throw a Depopulation Bomb back at us.
* SCP Foundation they're an invincible badass. And not only does it give the wielder delusions of grandeur, it's badly balanced and its edge is blunter than a butter knife.
* SCP Foundation. This actually led the author of SCP-2317 to rewrite it, replacing the Object Class with the also-unique "Special Access Designation: CODE NIGHTMARE REGENT RED".
* SCP Foundation, though not so much mentally. It is also capable of altruism, loves to paint, and is very, very homesick.
* SCP Foundation. Though the titular SCP Foundation is loathe to describe anything they encounter as being explicitly "magical".
* SCP Foundation to compare afterwards. Someone else asked it for the trope namer, with predictably spectacular results.
* SCP Foundation to do all sorts of things to the people who try to cut off its power, for obvious reasons.
* SCP Foundation to grab prey and impale them on its sharp lower branches in order to assimilate them.
* SCP Foundation to lethal levels (including an invisible shark or a painting of an atomic bomb that turns the viewer into a caveman).
* SCP Foundation toward poor attempts at comedy. The amount of force used is proportional to how bad the joke is.
* SCP Foundation towards tough opponents, and be upset if they die. At one point his coffin activated under unknown circumstances, and the key to his vault vanished, leading to a three-year manhunt with an untold amount of casualties before he was finally put down.
* SCP Foundation to whomever registers these things with one of their senses, most commonly either sight or hearing.
* SCP Foundation universe either solely or preferentially target humans.
* SCP Foundation universe, the Global Occult Coalition is backed by the United Nations and is considered to be one of the Foundation's most powerful competitors.
* SCP Foundation Universe there are several cults that worship their own gods, such as The Church of the Broken God, the Sarkic Cults and the faith of the Second Hytoth, some of these anomalous religions have their own fictitious pantheons (it is debatable if they are real gods or just entities of enormous power worshiped by human beings, although in the Foundation universe there really is not much difference between the two cases)
* SCP Foundation. Upon inspection, it believed that the doctor who presided over SCP-335 had used its infinite storage space to store his porn. However, it turns out the 150 disks actually contain the entirety of the internet and that the first 12 contained all of the pornography.
* SCP Foundation using a microscopic black hole's Hawking radiation to accelerate and power the ship.
* SCP Foundation version of the city of Boise where the buildings seem to be freshly constructed and beyond city limits is an endless forest. The stars are too bright and don't match Earth's night sky. A member of an exploration team even references the trope name when describing it.
* SCP Foundation Virus, and the actual SCP was something else entirely.
* SCP Foundation was an attempt to kill the creature. He got brutally murdered.
* SCP Foundation was the UFO recovered as Roswell. It later hatched and replaced the hangar at Area 51.
* SCP Foundation were "Wing It," "Make Something Up," "Cross That Bridge When I Come To It," and "Put My Head Between My Knees And Kiss My Ass Goodbye".
* SCP Foundation. When an animal drinks water that has passed through SCP-1575, it mutates into a human being. If it survives the process, the former animal describes it as being extremely painful. The water doesn't lose its potency after ingestion either; the SCP has to check animals for internal and external parasites after there was a half-mutated flea and a human-faced tapeworm screaming as it burst out of a dog's belly.

* SCP Foundation when he turned on the light, and this time it asked "Back so soon?"
* SCP Foundation. When the SCP-633 program was captured and taken to a Foundation site it tricked the technicians into letting it infiltrate the local computer system and take control of it, leading to system failure and a containment breach.
* SCP Foundation. When the SCP teams that were sent inside SCP-1272 finally emerge centuries later, they are expected to experience readjustment shock, including wondering what has happened to their relatives (who are probably all long dead).
* SCP Foundation, where a portal periodically dumps immense loads of high-tech garbage and scrap — including stable transuranic elements — to be incinerated in the lava of one of the moon's volcanoes.
* SCP Foundation, which basically all end with the destruction of humanity and are only distinguished by when and how it happens. One such future, dubbed Determinative Set XW, is a typical subversion of this trope. Alien or otherdimensional beings arrive on Earth and share their advances with humanity, leading hundreds of thousands of humans to volunteer to be joined in a gestalt consciousness. The resultant being is imprisoned, cut off from outside contact, and given bare-minimum rations while the rest of humanity is wiped out.
* SCP Foundation which caused its users to be "completely torn apart from the inside by torrential amounts of internal hair growth."
* SCP Foundation, which does this with her victims' livers, and eats them.
* SCP Foundation which is the entire contents of the internet stored on 150 3.5″ floppy disks. Disks 1–12 contain nothing but porn. To give some perspective, Wikipedia only takes up one disk. (Wikipedia is mostly text, text is much smaller than images or video.)
* SCP Foundation which prevents him from perceiving other humans, any of their actions, or any of their attempts to communicate with him.
* SCP Foundation, which sends romantic letters to its female owners, which quickly become possessive in tone, and later downright crazy and murderous.
* SCP Foundation, which violate our understanding of the laws of the universe. Many of these are dangerous to humans, with more than a few capable of wiping out all humans if left unchecked. Fortunately, the Foundation is around to keep them contained and unable to harm humanity — except they haven't found all of them yet (and, since new anomalies keep appearing, it's unlikely they ever will) and many anomalies are impossible to contain.
* SCP Foundation. While in its standard form, after SCP-974 kills and eats a child of age 6-12 it will change to that child's form over a period of 10-12 days. In its enhanced form it can kill and devour adult human beings and take their form in a short period of time.
* SCP Foundation. While on a mission inside American territory, SCP-2273 ordered its fellow troops to surrender to the Americans so they could become POWs and not have to fight any more. Instead, the Americans cold-bloodedly murdered the surrendering soldiers but kept SCP-2273 alive for some reason.
* SCP Foundation, who can only be contained in crossroads and other intersections, such as the intersection of two corridors.
* SCP Foundation who could destroy a target at any distance away on command.
* SCP Foundation who die in droves every game. The rules include mentions of invocation of weather gods, assassination attempts, Catholic clergy used as mascots, and Atlantis.
* SCP Foundation who has the ability to replicate all of Jesus' miracles, with the assumption that this would bring about the Second Coming.
* SCP Foundation who often engage in genuinely evil actions for the sake of protecting humanity from the paranormal.
* SCP Foundation, whose touch kills people, allowing him to perform a surgery that turns them into homicidal zombies known as SCP-049-2. When he once spoke to a SCP doctor he explained that he was curing them. Of what exactly isn't clear, but apparently few of the people who work at the foundation have it.
* SCP Foundation who the Foundation keeps contained by convincing him that the personnel he interacts with are also gods, using feats such as card tricks or

sleight of hand.
* SCP Foundation wipe out all of Russia, making this an example of an orbital bombardment with weak power by itself but WMD-level effects due to their targets.
* SCP Foundation with a tape that changes the perception of people who see it: after seeing a particular scene, the watcher will percieve every character, fictional or not, watched on TV or in a movie, hear on radio, or read about, to choke and die. This includes incredibly short jokes as well.
* SCP Foundation, with Foundation personnel and their groups/persons of interest adding along side the number of SCPs themselves, the amount of which has past 5,000.
* SCP Foundation within the first 24 hours. Here, the horror is not just in the daylight, the daylight itself is the cause of the horror.
* SCP Foundation without adding or removing parts, how to recycle carbon dioxide inside one's lungs, and... well, this:
* SCP Foundation with random weapons, sometimes primitive, sometimes futuristic.
* SCP Foundation with regenerative immortality. Guess who the Foundation chooses to test things on the most?
* SCP Foundation would provide it with an eternal and powerful host body.
* SCP is a musical recording that causes anyone listening to it to eventually burst into massive plant growth.
* SCP is an adherent to the "fluoridated water is poison" theory, which is ironic considering his body's organs are now made entirely out of various fluorine compounds.
* SCP is an infinite tunnel containing books from many alternate realities. One of them is the second volume of the diary from Woodrow Wilson and his thoughts on various events during his term, one being the battle for Thailand's accession to statehood within the Imperial States of America.
* SCP is a sapient tank which refuses to fire at civilians. The only unarmed person it's made an exception for was a former soldier who betrayed his home country in some fashion. A picture of it taken with SCP-978, a camera that reveals the subject's desires, showed it abandoned in a meadow with plants growing on it.
* SCP. It's a demon who brutally tortures and murders everyone in a household every Christmas except for the youngest child, whom he kidnaps in his sack and takes back to his lair to work themselves to death by making toys out of human remains.
* SCP-K9-J-EX, considering the actions of the Mobile Task Force sent to deal with it.
* SCP, on the other hand, appears to make its various objects with malicious intent behind them, and are very dangerous even when used properly. Many other toy SCPs exist, some just weird, some threaten the world itself.
* SCPs. 682's existence in the Foundation consists of constant torture and frequent attempts on its life.
* SCPs are clearly Judeo-Christian entities, such as Dr Clef's proposal for SCP-001, an angel guarding the Garden of Eden.
* "SCP" semi-officially, by way of motto, stands for "Secure, Contain, Protect". The former two words refer to securing and containing anomalous entities, and "protect" refers to protecting the
* SCPs rely on (or are) extradimensional power sources. For example, SCP-3304 shows the drastic consequences when an extradimensional being tries to sell its own world's energy to ours.
* SCP style game, somehow brought to reality. Interestingly, while he's not aware he's in "the real world", he's fully aware that he's a video game character.
* SCP- there's not enough of his mind left to properly suffer all that agony.
* SCP to a woman that lives in its house. When the other mailbox is around, SCP-1269 immediately destroys the mailbox and leaves an angry letter on it. It also murders any man who moves in to live with a woman he obsesses with.
* *scraaaaaape, clomp. scraaaaaape, clomp. scraaaaaape, clomp.* "Doctor Frankenstein???"
* Scrabble and Battleship, which also uses extra boards, one of which is for Monopoly.

* Scrabble. Averted by modern versions, who run on platforms easily capable of storing or looking up the entire official list of accepted words (about 2.5 MB before compression, which would be unthinkable in the '80s-'90s and even into the 2000s for mobile devices).
* Scrabble doesn't seem keen on fixing this as it means if you're not paying attention you'll be tapping the advertisement.
* Scrabble For Cheaters, a New York fundraiser that gets people to donate money in exchange for bending the rules in a competitive Scrabble match. Cheats start at $50 (for swiping another tile out of the bag) to $500 (to invent your own kwyjibo, no questions asked). Winners receive the coveted Cheater's Cup.
* Scrabble", where he didn't realize he could have spelled "oxidize".)
* Scrabble), while Edd "Kookie" Byrnes hosted the second and third pilots.
* Scrambled Egg has Sonya snarkily telling Trellorv that his breath stinks of rot.
* Scrambled Egg has Synnyk Synncader, who reveals he's dating a male goblin named Gargin.
* Scrambled Egg pissing his loincloth in public solely so he could embarrass his parents.
* Scrambled Eggs version. (Happy birthday to you, you live in a zoo…)
* Scrambled Egg: Trellorv brutally murdered his parents as a young adult, then went on to slaughter the rest of the trolls in his village.
* Scrambled Egg, who raped various civilians in his adult years to fuel his hedonistic nature.
* Scrambled: Syd City superheroine who can get in a relationship with either an older superheroine or a rival supervillain.
* Scrambleverse will assign every card in play to a new controller chosen at random.
* Scrapbook Story, and frequently mentions encountering a silent "double" of himself. Eventually, Steven begins wearing the ring on his finger; according to the epilogue, he vanished from his home soon after and was never seen again.
* Scrap Happy Daffy and it looks as if the Nazis won until Daffy gets some divine intervention.
* Scrap Happy Daffy", Daffy turns into a "Super American" and starts whaling on a German submarine. He awakens to find himself trying to beat up a piece of pipe, and assumes the whole thing was a dream. Then he hears the Germans from atop a pile of scrap saying "Next time you dream, include us out!"
* Scrap Happy Daffy" ends with a rhyming list of all the junk he's collecting for the war effort.
* Scrap Happy Daffy had him protecting a huge scrap metal heap from the Germans, who attacked with a submarine firing a torpedo with a Nazi goat inside it. And then Daffy is inspired by patriotic visions ("Americans don't give up!") to become a "Super American" (duck) and thrash the Nazi saboteurs.
* Scrapheap Challenge aired in Australia before the UK. When it did reach the UK, it got split into two blocks, aired a year apart, and dropped part-way through the second block, leaving several episodes still unaired.
* Scrapheap Challenge brings back to their lot is theirs for keeps. Yeah, right...unless the other team steals it, in which case the hosts and thieves have a laugh at the victimized team's expense.
* Scrapheap Challenge. "Could I have some water, please?" "Certainly, how much would you like?" "Enough to put out a small fire." "Where would you like it?" "On the fire, please." (The requester had set a seat on fire while welding in a car. Possibly scripted, but still funny.)
* Scrapheap Challenge had the situation where the two experts were father and son.
* Scrapheap Challenge in the US, had two teams compete to MacGyver together some sort of machine from parts found in the junkyard each episode.
* Scrapheap Challenge: Robert Llewellyn wears a greyish one...and looks strangely fit in it.
* Scrapheap Challenge special (albeit with smaller excavators then you'd need to really be this trope).
* Scrapheap Challenge title match was full-size radio-controlled jousting cars.

* Scrapheap Challenge to turn their car 180 degrees and put the silly thing in reverse because that was the only gear that worked.
* Scrapheap Challenge used these on occasion when explaining the physics and/or engineering principles being used for this week's project.
* Scrapheap Challenge when a car's wiring loom had been cut. After the first attempt to reconnect the severed wires, the wipers ran whenever the ignition was on.
* Scrapland, D-Tritus is given a program that allows him to hack into The Great Database and overwrite any robot he wants.
* Scrapland has the police, who all have very large chests supported by tiny legs.
* Scrapland is killed because he was willing to share his evidence of The Archbishop's murder with D-Tritus.
* Scrapland. Sure, he's the chief, but he cheats at poker, beats up robots who try to blackmail him, is the Mayor's thug, and helps him traffick stolen weapons, vehicles, and engines.
* Scrapland: The police of Chimera are all kinds of corrupt. Regular police have the power to extort money from other robots, and they often engage in fights. Plus, there's the chief. He's a cheater, the Mayor's partner-in-crime, and will beat up anyone who tries to blackmail him.
* Scrap Mechanic is dedicated to this trope if you choose a female character.
* Scrap Mechanic mechanic who can literally build vehicles and buildings out of scrap lying about, or out of repurposed industrial equipment.
* Scrapped Princess: After capturing the Cassull siblings, Princess Seness challenges Shannon to a duel. When he asks why, she meant to say she wanted him for her army since she knew he was a D-Knight. Except she didn't say it that way:
* Scrapped Princess and uses them, among other things, for spying on people.
* Scrapped Princess, a Peacemaker Proxy could only be destroyed by destroying a small glowing crystal-like object that could only be revealed by powerful magic destroying the ever-regenerating slime that the proxy is made of.
* Scrapped Princess: As seen in the image, the main character gets a sword impaled through her heart and out her back, yet there is no blood. She doesn't die or feel pain either.
* Scrapped Princess because he knows that Pacifica would blame herself for any lives lost...
* Scrapped Princess before she breaks down and screams at the heavens.
* Scrapped Princess book, it's the beloved daughter of an early villain, whom he thinks is still clinging to life.
* Scrapped Princess, but he literally swears to oppose God Himself in her defence, even if it means the destruction of the world.
* Scrapped Princess carries a large axe with a chain attached to it for extra reach.
* Scrapped Princess episode 3 or 4, when everybody besides Pacifica gets put under mind control, this is expressed by turning all of their sclerae black (and their irises red). Whenever anybody is snapped out of it, their eyes return to normal.
* Scrapped Princess gave his captive Winnia Chester his cape because she's cold, while they await Shannon's arrival in an early episode.
* Scrapped Princess -> "Sutepri" (shortened to "Scra-Prin" in English)
* Scrapped Princess has the Ginnungagap, a "Long Ranged Strategic Class Spell", one of a whole class of nuke spells.
* Scrapped Princess is the strongest known military-grade offensive spell in their world and is so powerful that it not only requires numerous high-level clerics to simultaneously cast the spell, it must be sanctioned and unanimously agreed upon, by the High Council, for use.
* Scrapped Princess-like mascot named "Soopy-kun" and peddling the innkeeper's wares to customers. The innkeeper is actually nice to them, and Raquel enjoys doing the work, while Pacifica tries donning the costume and winds up scaring a little boy away when the jaw of the costume falls off. Leo takes the "Soopy-kun" job for a while when Pacifica leaves, but he gets to keep it with him when he returns to the city with Winia in a later episode.

* Scrapped Princess, Pacifica and Winia are happy to dress up Leopold and Fully in drag to sneak past soldiers.
* Scrapped Princess: Pacifica dons a Mr. Soopy costume to help promote a bakery; she isn't very good at the job. Trainee knight Leo, however, really takes to wearing the outfit, and brings it with him when he leaves.
* Scrapped Princess, Pacifica is given the choice to free humanity from its enforced prison or leave them there in blissful ignorance of the real world.
* Scrapped Princess that Pacifica is capable of screwing with the divine plan of the Peacemakers, since she was one of the few who weren't programmed from birth to follow their every wish.
* Scrapped Princess, the entire world is allowed to have only so many human residents; when the population gets too big, the excesses are killed off by the Peacemakers.
* Scrapped Princess, Tron Lines are traced along the air every time a spell is cast.
* Scrapped Princess, when the titular character enters a VR program to save her brother from being brainwashed, only to be promptly impaled by him when he fails to recognize her. There is a moment of shock, and then she slaps him in the face and continues to shout at him with his sword still stuck through her.
* Scrappers are light vehicles decked in frontal armor, but are completely exposed from the back. If the shields take enough fire, it will be completely immobilized for several seconds, at which point players can head to the back of the craft and kill its exposed driver.
* Scrappies twists in order to set up the villains and move the plot forward. Also, in the climax, the author prioritized Erina's family issues over resolving Soma's progress and goals—which was the original premise of the manga. And to make matters worse, despite the unnecessary love triangle plot, there is no resolution.
* Scrappy also liked some strange things-like ketchup on pancakes and whipped cream on pizza, which even Shaggy and Scooby were weirded out by.
* Scrappy-Doo his debut. Ironically, Scrappy is what probably saved the show from cancellation way back in 1979. And the success of that new incarnation of Scooby Doo is likely what has kept the franchise going on for some 40 years.
* Scrappy Doo in top 11 Dumbasses in Distress, he laughs briefly, then shoots his gun several times.
* Scrappy-Doo showing up, only to be carried off by Avenger, presumably to be eaten. Then they all laugh even harder.
* Scrappy-Doo stretching to keep Scrappy out of the Cartoon Network group picture. While fan opinion on Scrappy-Doo has softened over time, it is unlikely he will regain respect from the public or shake off the stigma any time soon.
* Scrappy is also an enigma. He's smaller than Scooby and his catchphrase is "Puppy power!", but in the live-action movie, Daphne states that he isn't a puppy but has a gland problem.
* Scrappy Mechanic: A gameplay mechanic that most players find irritating.
* Scrappy Mechanic — Scrappy-Doo is not a hated video game mechanic.
* Scrappy Mechanic: Players are infuriated when you wanted them to feel intrigued or challenged.
* Scrappy Mechanic (where there were only three instances in which it was possible), and/or believe that it wouldn't make sense for Confidants, which are business relationships as well as friendships.
* Scrappy Weapon: This weapon is not only useless but a pain to use in addition.
* Scrappy Weapon to be a living weapon quite a lot) and he's not a video game character.
* Scratch and Grounder. Their loyalty to Robotnik and their idiocy know no bounds, and that's exactly why they're so funny.
* Scratchbuild: Model made largely or entirely from basic materials rather than manufactured ones.
* Scratch by both high- and low-blooded members. In both worlds, lime bloods (which is the un-mutated version of candy red blood) used to be a common caste, but after a series of revolutions they were hunted to extinction on Alternia because they

supposedly possessed abilities that had the potential to upset the way the violent, oppressive society works, and were implied to have been historically oppressed on Beforus.
* Scratch codified the genre, with its block-based programming as an influence on later, especially educational, ones.
* Scratch Damage against any target and splitting fire has become easier.
* Scratch DamageAll successful attacks must inflict some damage, no matter how little.
* Scratch Damage and instakills you if he touches you. He doesn't drop anything special, as opposed to the Dungeon Guardian.
* Scratch Damage, and you have to lose in order to progress the story.
* Scratch Damage, such as when you fight High Entia assassins. This is downplayed as some enemies like the Chikin and the Hodes display primitive societies (and appear to be organized in tribes) so they appear to have sentience, but the Monado can harm them normally.
* "Scratch", Doc Scratch's theme from the Felt album, most likely counts.
* Scratches, a writer moves into an old Victorian mansion, but every night he hears strange unnerving scratching noises and becomes determined to solve the mystery.
* Scratches fault that you're trapped because you let your car's battery run down. Guess there aren't any cab services in rural England.
* Scratches has several hanging in the upstairs hallway, including the work featured on this page.
* Scratches moves into a Victorian Mansion to become this, but later becomes distracted by the house's past.
* Scratches plays it with both sides: First, by reading the diaries and letters it is clear that the former owners of the mansion (where the game is set) were rational and intelligent people, subsequent findings show how they slowly began accepting supernatural explanations for everything that happened to them. The player character also starts experiencing strange unexplained phenomena culminating on fully embracing a supernatural solution, then a major twist occurs and a natural (and shocking) explanation presents. The Director's Cut goes even further by showing more evidence, but the final coda hints that there is still a missing piece while panning to the source of "the curse".
* Scratches, two loud jumpscares are pulled on you. Aptly, the two tracks containing these are called "It Is Here" and "The Lurker".
* Scratches, when Michael reveals a letter from the former maid of the mansion to her family, in which she details her account on the events that happened in the mansion and revealing the location of a secret compartment.
* Scratch Fury's response to finding out that the "Santa" he'd defeated was
* scratching the paint job" and has happened to catch the man scanning his van for half an hour looking for the nonexistent scratch.
* Scratchman Apoo figured out Soundbite's transponder number by a slight noise he makes
* "Scratch 'N Sniff" features a scene of Jool and Chiana showing off at a party. Jool's gymanstic backflips were Tammy MacIntosh's party piece while Chiana's fire-poi routine was Gigi Edgeley's.
* Scratchy-Voiced Senior: An old person who talks as though they have a never-ending sore throat.
* Scrat gets all the fur ripped off his chest, exposing two dots of nipple. Not only are there fewer nipples present than seems plausible for his species, which would presumably have large litters like other squirrels, but rodents' nipples are generally arranged in paired lines that extend forward from the groin to the chest, not one pair on the chest as in human males (and females). And male rats and mice don't have any at all.
* Scrat has a temporary love interest in the third film, but he ditches her for an acorn.
* Scrat is meant to be a prehistoric version of a ground squirrel, but some viewers have mistaken him for a modern squirrel, or a rat.
* Scrat, the little squirrel, gets buried in an avalanche at the end of the first

movie. He stays frozen for 30,000 years, and when he thaws in the present he's running around as fast as he always does.
* Scrat was originally going to be killed off after his brief scene in the opening of the first
* Scrat were actually about him accidentally causing the continents to break up and move to their current positions while attempting to bury an acorn. And for some reason, the Earth's continents move to their current locations twice.
* scrawny, greasy-haired kid with pale skin and a natural talent for the Dark Arts.
* Scream (1996), and all of the protagonists come together against the killer, Gale Weathers takes Tatum's place as the second girl.
* Scream (1996) genre, late '90s horror was dominated by a wave of '80s-style "body count" slasher movies, this time made with serious budgets, credible TV actors, and often a more self-referential tone.
* Scream (1996). However, this is immediately double subverted when he gives her one anyway.
* Scream (1996), incorporated humor, cast bankable actors, and was generally enjoyable for a mass audience and pulled in many more demographics, becoming the first slasher film to break $100 million.
* Scream (1996). In the age of cell phones and caller ID, however, the trope was lost in the sequels.
* Scream (1996) in the killer's voice, thereby throwing suspicion off of himself.
* Scream (1996): Sidney gets attacked by Ghostface in the school bathroom between classes. He's also shown stalking both her and Tatum during the afternoon before the party.
* Scream (1996) that she's called the police about the murders, he pathetically breaks down and cries "My mom and dad are gonna be so mad at me!"
* Scream (1996), the main character has sex (with the killer!), but still maintains her final girl status throughout the entire film franchise. Subverted somewhat as Gale, Dewey, and Randy survive the events of the first film as well.
* Scream (1996). There were two killers and they engineered the whole thing to screw with Sidney.
* Scream (1996). The winner ended up playing the movie theater employee who hands out Ghostface masks to Jada Pinkett-Smith and Omar Epps in the beginning of the movie. The young woman even got to speak some dialogue in the film (a rarity for these kinds of contests).
* Scream (1996), they don't even wait for the killer to try to come back before shooting the corpse in the head, just to make sure.
* Scream (1996). Two guys pretend to be the killer in school. They don't get killed for this joke, probably because the principal who punished them (and who gets killed later) was even more obnoxious.
* Scream (1996), when Randy asks Stu if he thinks Sidney would go out with him, Stu laughs and points at him in the most flamboyant way possible before putting on a deadly serious face and saying "No. I don't. At all. No."
* Scream (1996) where she dyed her brown hair blonde in order to contrast with brunette Neve Campbell. Strangely, this is one trope the film doesn't lampshade. Drew Barrymore also wore a blonde wig for her part in the film.
* Scream 2, also filming around the same time; she wore hair extensions for the first half of the film, and the killer then cuts her hair (notably in the book it's based on, Helen's defining characteristic is her long hair).
* Scream 2' character goes into a stall since the urinals are occupied, but hears strange noises coming from the next stall. He puts his ear against the partition to try to hear better, only to have Ghostface fatally stab him through the partition.
* Scream 2 fans find Gale's replacement camera man Joel far more entertaining than his predecessor Kenny.
* Scream 2 has four Brazilian Portuguese dubs: Cinevideo (TV), Studio Gabia (DVD), Herbert Richers (in-flight movie/Internet streaming/cable), and Drei Marc (Telecine).
* Scream 2 in Randy's film class, where everyone discusses movie sequels, the frequency of sequels that are better than first installments, and which sequels

achieve this.
* Scream 2 in the form of Ja Rule (who appears in one concert scene and has no impact on the plot).
* Scream 2 is killed in broad daylight, and in the middle of a very active college campus. For everyone else in the series though, this trope very much applies.
* Scream 2 is the drunk sister talking to Cece on the phone at the sorority house before Ghostface calls her.
* Scream 3 also had her as the main killer's accomplice, a further subversion.
* Scream 3 explains that the killer is going to be supernatural this time around, requiring some special means to deal with him.
* Scream 3, Ghostface cuts the power to the mansion that the characters are in, causing them to flee outside, then sends a fax to the house to lure them back inside. Tom takes the bait, and lights his lighter to read the fax... only to realize too late the contents of the fax.
* Scream 3. Ghostface striking a killing blow isn't shown (she was alive and fighting back just a couple seconds earlier), and she seems to scream right as he throws her through the mirror. Afterwards she's seen lying on the ground, apparently dead, with some blood on her face, but she might have just been cut and knocked unconscious from being tossed through the glass door and the others don't explicitly refer to her as being dead in the aftermath.
* Scream 3 has only one killer. For bonus points, it meta twists the first movie's meta twist by having the guy who's very obviously his partner this time around actually be completely innocent.
* Scream 3. Her tears and grief, even after he tried to kill her again out of spite alone, say it all.
* Scream 3: Jennifer is stabbed twice and thrown through a glass pane in front of Gale and Dewey, but the stab wounds don't look fatal and listening closely, she seems to be screaming after smashing through the glass but before hitting the floor, making it possible that she was just unconscious.
* Scream 3 to get the role of Sidney in Stab 3... then she dies seconds later.
* Scream 3 uses this to bring back Randy, who was killed in the previous film. He drops comments and has recorded responses to Dewey's reaction to his comments, leading them into a bit of back-and-forth dialogue.
* Scream 4. A deleted scene had a "we got a heartbeat" from a paramedic examining her, but she appears to die in the finished film.
* Scream 4, Ghostface is asking Kirby trivia questions like the first film, and then he starts asking, "Name the remake of the ground-breaking horror movie in which the villain..." And then Kirby lists off all the horror movie remakes that have come out in recent years.
* Scream 4 is revealed as the killer, and she offs Trevor shortly, making this the exact inverse of the Sidney and Billy example, right down to the sex of the killer.
* Scream 4, much to Miss Roberts' amusement and Mr. Craven's bemusement bordering on blushing. As with the film, Panettiere is therefore the best part of the track.
* Scream 4 that try to update the stories of the original films for "modern" audiences.
* Scream4 was filmed in Michigan, despite still taking place in the fictional town of Woodsboro, California. The first three films were all filmed in Los Angeles.
* Scream 4 who is stabbed in the stomach and left to bleed out, but is still alive and conscious when last seen, causing many fans to theorize that she might have managed to crawl away and survive.
* Scream among the leads - they met while making the first and were married by the third - and were financially successful. The fourth film - during which their marriage fell apart - was ironically the lowest grossing.
* "Scream & Shout" took off in America thanks to Britney Spears and
* Scream and Cry This is a direct foreshadow to the very end of the game.
* Scream), and expands his rules to sequels and trilogies warnings in the later films.
* Scream and outing her as a lesbian. Nina and Tyler are brutally murdered soon after, possibly as retaliation for the video.

* Scream and Scream Again, about to be used as an unwilling donor for one of Browning's transplant experiments. In her defense, none of the men in the movie have any success going one on one against Browning's enhanced humans (of which Keith is one) either.
* Scream and Scream Again: After Keith's crimes attract the attention of the authorities, Kornatz decides to shut down Dr. Browning's research by killing Dr. Browning and all of his staff.
* Scream and Scream Again are set in an unnamed eastern European country that greatly resembles East Germany.
* Scream and Scream Again Dr. Browning is bringing unwilling patients to his private hospital were he harvests limbs, organs and miscellaneous body parts to use in his transplant operations to create a physically superior master race of humans.
* Scream and Scream Again, Dr. Browning is looking to create the race of perfect beings by removing limbs and organs from the undeserving and giving them to the worthy.
* Scream and Scream Again, Keith is handcuffed to the bumper of a police car and escapes by tearing his hand off at the wrist.
* Scream and Scream Again, Konratz breaking into the clinic to kill Dr. Browning and his staff gives Dr. Sorel the opportunity to release Helen and allows the two of them to escape.
* Scream and Scream Again Konratz uses a pair of bone shears to cut the finger off a young woman he is interrogating.
* Scream and Scream Again, Ludwig's car catches fire immediately upon being shot by the border guards; even before it collides with anything.
* Scream and Scream Again: When Dr. Browning catches Dr. Sorel snooping around the facility, he immediately offers to explain everything to him; admitting that he cannot resist the opportunity to explain his scheme to someone who will actually understand. He then adds that afterwards that Dr. Sorel's life will have to take a very different turn.
* Scream Brandon James was treated for his deformities. Now, it's where the current killer has set up their lair... or rather, a mock-up of one they intend for the main characters to find as part of the overall game they're playing.
* Scream. By the time of the second film, she's suddenly shamelessly bitchy with poor social skills who snipes at everyone she comes across. While the trauma of the first film could have had some effect, they act as if Gale was always this way.
* Scream called "dead teenager" movies very uncomfortable because they were too close to that event.
* Scream, Craven expected to be given another NC-17, so he put far more blood and gore than he wanted to have more options when it came time to cut it down. To his surprise, the film was still given an R.
* Scream Discretion Shot: AAAAAHHH! YOU CAN'T SEE ME WHILE I'M SCREAMING!! YOU DON'T WANT TO KNOW WHAT'S HAPPENING TO ME!
* Scream Discretion Shot - Something horrible is visited upon a character but the viewer doesn't see it directly
* Scream Discretion Shot: The audience doesn't see the pain being inflicted, only hearing the victim's scream.
* Scream Discretion Shot: We don't see what happened to the victim, but we do hear the screams of the victim.
* Scream Discretion Shot - We hear someone screaming, but we don't see what made them scream.
* Scream Discretion Shot: You hear the scream, but you don't see what they're screaming about
* Screamed by Bane, almost word for word, as Batman finally overcame him. "You can't do this to me! I am invincible!
* screamed Quickly subverted when she wound up being the most soft-spoken queen that season.
* Scream, Emma is a straighter example, though not perfectly so. In the first season, she's one of several characters who survives, and most of the credit for defeating the killer goes to Audrey, a bicurious punk chick who seems to have been

working with the killer all along. Season two shows that Emma has been traumatized by the experience, her mental state not at all helped by a new killer running around.
* Screamer Prank next to them. Luckily, the image board immediately takes it down it and bans whoever tries to re-upload it, possibly the only use of the "removed it after 5 minutes and blocked me" cliche' for a benevolent reason, ever.
* Screamers are called this because of the earsplitting scream they emit while attacking. You can either cover your ears or fire your weapon at them, but it's difficult to do both.
* Screamers at one point, with a character commenting on how ironic it is that he has to smoke a cigarette to keep harmful toxins out of his lungs.
* Screamers is incinerated by the pre-launch burn of an escape rocket.
* Screamers. Just before the movie ends we see the doll start to move of its own accord.
* Screamers: The Hunting, human-like screamer to Earth. And she's pregnant with his bladed robot offspring.
* Screamers: The Hunting (the Screamers salvage human bodies for the same purpose).
* Screamers: The last survivor escapes the planet after a number of horrifying revelations (and gruesome deaths) and falls asleep, safe at last...turns out, the teddy bear he kept as a souvenir is also a Screamer.
* Screamers. The "Screamers" (after the eerie high-pitched noise they make) continued evolving and eventually turn on their own creators as well.
* Screamers: The two sides have all but obliterated each other and forgot to tell the characters in the movie. Made even worse by the fact that the general they've been receiving orders from back on Earth is already dead.
* Screamer Trailer: HOLY CRAP!! LOOK AT THOSE SCARY IMAGES IN THAT MOVIE TRAILER!!
* Scream for Jeeves, by P. H. Cannon, is a Bertie Wooster/Lovecraft crossover, retelling a number of canon stories as Bertie/Jeeves adventures. Jeeves, of course, is Up To Snuff, having been dealing in Eldritch Phenomena since a lad...
* Scream Fortress 2014 added a Hallowe'en map called Carnival of Carnage, where both teams end up in bumper cars and with a new objective once the map's main objective has been completed by one team or another. The bumper car objectives are collecting rubber ducks or avoiding falling platforms, or trying to play
* Scream, Ghostface is fast and regularly runs after his or her targets, and one stab from that very large knife is usually enough to debilitate a victim and allow Ghostface to go for the kill.
* screaming as if the doctor stabbed him, threatening a malpractice lawsuit.
* screaming at her for getting involved with the guy in the first place. At the end of the video, her boyfriend brings them home, only for her to complain that he got the wrong ones.
* screaming at her, shifting repeatedly from calm-to-furious with breaks to take calls.
* Screaming at Squick: A character reacts to seeing something really disgusting by screaming their head off.
* Screaming Birth-style contractions also aren't there until you're well into it. The mother may be complaining for ages of backache, cramp, indigestion or just be feeling indescribably crappy (all common enough when you're very pregnant) until the waters appear to make it clear that it's a little more dramatic than that. (Particularly prevalent if she's been asleep through the early phase of her labour, as many women are, and is woken by suddenly lying in a wet bed.)
* screaming for a dying Jonathan not to go, after he suffers a heart attack.
* Screaming giant robot skull face and still plenty intimidating at first glance.
* Screaming Jimmy - GMC heavy-duty truck powered by a Detroit Diesel two-stroke engine.
* screaming profanity at them), discuss how pretty he thinks certain female players on the Gryffindor team are, and gush about Harry's new Firebolt ("Jordan, are you being paid to advertise Firebolts? Get on with the commentary!") He also can swear pretty badly when Gryffindor is losing, to the extent where McGonagall tried to take the microphone off of him at one point.

* screaming really loud his sensitive ears. During a rematch, Natsu tries this again, but Cobra reveals that he's learned how to absorb sound waves to power his own sonic attack.
* screaming. The perp is certainly exasperated, but doesn't say a word.
* Screaming Warrior, for a character who deliberately speaks this way in order to appear intimidating.
* Screaming Woman: A female shriek is often heard in response to something scary.
* Screaming Woman, and, as such, was far more prevalent in the black-and-white era.
* Screaming Woman: An (over)used stock character in every slasher movie.
* Screaming Woman: I'm a woman! I can't help it if I scream a lot when I'm scared!
* Screaming Yellow Honkers: Marge gets a Canyonero and develops a bad case of road rage. The climax is Homer accidentally releasing a pack of rhinos from the zoo and Marge having to use the SUV to corral them in and save her family.
* Screamin' Jay Hawkins' breakout hit "I Put a Spell On You" was intended to be a love ballad, but Hawkins (and the rest of the band) were so drunk when they recorded it that it came out as ... well ... just
* Screamin' Jay Hawkins, but his 1956 song "I Put a Spell on You" has become a rock and roll classic. Since it's the only song of his still remembered today, he is often considered a one-hit wonder.
* Scream Inn revolved around a vampiric innkeeper, a zombie maid, a witch, a ghost, a headless man, a skeleton, a devil and a talking spider.
* Scream movies are saying "we know it's a formula, but we're doing it anyway".
* Scream, much like the films, has the killer taunting victims through their phones, though here, it's more through text messages and videos.
* Scream: "No, please don't kill me, Mr. Ghost face! I wanna be in the sequel!"
* scream nothing but "You're in a videogame, this is a videogame, and we're going to remind you that you are playing a videogame. Also, here's some references to some other videogames."
* Scream of the Shalka, was originally a story to celebrate the 40th anniversary with Richard E. Grant as the official Ninth Doctor. However the revival of the series meant it went into non-canon status and so is now considered alternate continuity.
* Scream of the White Bears where a cub with one black paw would be born that could save the species. Unfortunately, the book's project didn't get enough funding and the book was never published.
* Scream painting "The Scream", and was originally designed by an employee at the holiday supply company Fun World before the makers of the film discovered it.
* Scream Park has the protagonists trapped inside the locked fences of the park. Even if they got over the fence, their car keys were confiscated by the manager before the party.
* Scream Park reacts to everything, including the killings, with the same dull expression and monotone voice.
* Scream, people still get killed by being overpowered or by making poor decisions.
* Scream: Piper Shaw invokes this as a cover for the fact that she is Ghostface in season one.
* Scream plays and subverts this. After making the threatening phone call, he claims that he can see the hot blonde he's calling. He's actually reading a porn magazine. It gets worse when he issues the threat, "I want to see what your insides look like!". Her response? Telling him to turn to page 54 of the same magazine.
* scream-prone Jo (who nevertheless would clobber bad guys with heavy objects). This was done because it was felt Liz was too strong a Doctor substitute. Then the writers realized how anti-feminist this looked and replaced the gentle and compliant Jo with a bright and hot-tempered journalist who would shout back at the Doctor.
* Scream provides the trope name (where the killer threatens to gut Casey like a fish if she hangs up on him again) and two examples right in the opening scene, which has both Casey and her boyfriend Steve being murdered this way, with Casey's body being hung from a tree for extra nasty points.
* Scream quadrilogy, every killer gets killed by the heroes at the end. Even when

they are already defenseless and could have been taken to the police instead. Justified, as the protagonists may feel safer knowing that they are dead with no chances of coming back.
* Scream Queens (2008), in order to test how well they can act on their own without co-stars to prop up their performances.
* Scream Queens (2008) manifests itself as a high-pitched scream during an otherwise quiet moment in a show.
* Scream Queens (2015) and crying out over how much they love Chanel for what she's done.
* Scream Queens (2015), combined with her becoming a much nicer person, led to most fans expressing anger at her continuing and escalating suffering, to the point that some fans turned on Chanels One and Three who are arguably two of the most popular characters in the show.
* Scream Queens (2015) for Halloween — to the major. Denise goes into a coma and wakes up asking how Hillary Clinton is doing as the first female president — as the series aired while the presidential election was going on.
* Scream Queens (2015) is an extremely campy series that, while it can be suitably gory and violent to fill the needs of horror fans, has a shockingly low body count for an entry into the slasher genre, as it spends more time focusing on the snarky comebacks and utter ridiculousness of its characters rather than gore effects.
* Scream Queens (2015) is of Italian descent — but has often been mistaken for a lighter skinned black woman or Latina. The fact that she's fond of spray tanning doesn't help.
* Scream Queens (2015) of a Candy Striper. Chamberlain shows up at the hospital with a goody-cart and the pink-and-white-striped shirt and is never questioned about his position. It turns out he was never formally hired in the first place but decided to volunteer at the C.U.R.E Institute Hospital in order to make people happy.
* Scream Queens (2015)", one of the security guards is stabbed to death by the killer hiding in the back of her patrol car.
* Scream Queens (2015), so the main Chanels can live. This ends up ultimately working, as five of the six Chanels end up being targeted and killed by the Green Meanies, while Chanels 1, 3, 5 and 6 and 8 survive.
* Scream Queens (2015). The Chanels are on trial and the evidence is actually pretty flimsy. But their decision to defend themselves backfires as Chanel's "strategy" involves simply yelling at people and demanding to be set free. Even then, it looks like they'll be acquitted...until Chanel stands up in court to bad mouth every member of the jury who then turns in a guilty verdict. If the Chanels had just bothered to get a half-decent lawyer, they would have gotten out scot-free.
* Scream Queens (2015): The episode "Dorkus" has Chanel and #3 discussing which horror movie character the disfigured Melanie Dorkus reminds them of. While standing right in front of her.
* Scream Queens (2015) - the first of the protagonists to die is Tiffany aka 'Deaf Taylor Swift', who is blonde. This is marginal though, considering the other blondes in the cast - Chanels 1, 3 and 5 and Grace - all survive. The only Chanel to be killed off is the brunette of the group.
* Scream Queens (2015) to Chad are revealed as the series goes on - to the point where he walks out on his family after they're rude to Chanel and Hester. By the end of the first season, he's one of only two people in the main cast who has not yet tried to murder someone.
* Scream Queens (2015) when Chad - who is also fully nude - realises "I think our wieners just touched". The episode after that featured a similar scene where Chad once again cornered Brock naked in the shower room, this time noticing that their "wieners" were symmetrical.
* Scream Queens, and the other two Red Devils, Gigi and Boone, both dying at Hester's hands.
* Scream: Resurrection, plays with this. A boy named Deion Elliot is actually Ghostface's primary target, his girlfriend, Liv Reynolds, being a supporting role.

Ironically, she and Deion are not the ones who defeats the killer despite Ghostface outright invoking Liv as the Final Girl, as another supporting girl is the one who finishes the job.
* Scream returning to the first's Woodsboro setting and commenting on remakes and reboots, it only makes the third film feel even more disconnected.
* Scream: Season 1 ends with the reveal that Audrey was working with and/or for the defeated and killed Ghostface killer all along.
* Scream see the severed head get tossed into his girlfriend Nina's hot tub.
* Scream series gives us the Ghostface killer, who can occasionally be a Malevolent Masked Woman.
* Scream series were quite fond of messing with their victims over the phone.
* Scream series, with its exploration and parody of '80s slashers, doesn't take long to go after this trope.
* screams for this after getting an extreme close-up, via flashback visual, of King Hippo's "bitch tits."
* Screamsheet's come back from the dead after its been destroyed in a previous battle. Multiple times, no less.
* Scream; she later admits that she embellished how brutal at least one of the deaths really was.
* Screams Like a Little Girl: AIIIIEEEEEEE!! SO WHAT IF MY SCREAM SOUNDED GIRLY??!! MEN SCREAM TOO YOU KNOW!!
* screams of agony, however, was not cut from the dub, though the blood was removed when we looked back at his face.
* Screams of Silence: The Story of Brenda Q. of the show, he is known as one of the evilest and most sadistic villains of the show and has no redeeming qualities.
* Screams of Silence: The Story of Brenda Q", the neighborhood has an intervention in order to convince Quagmire's sister Brenda to leave her abusive boyfriend. Meg's speech is basically a suggestion that if he likes her, she could change him. Joe is not amused.
* Screams of Silence: The Story of Brenda Q." was only broadcast once before it was pulled by FOX in 2011 due to its heavy references to domestic violence landed the episode to be criticized by viewers and critics. However, the episode can be seen on DVD and in syndication.
* Screams of Silence: The Story of Brenda Q.", which actually shows domestic abuse in a serious light and barely has any jokes in it.
* screams so loud that knocks out his opponent, winning Finn the contest.
* Scream Street) and Luke the werewolf (though not so much when he's in his full wolf form!). Series 2 also adds another cute Frankenstein's monster girl in the form of Six.
* Scream Street focuses on Luke Watson, a young boy who used to live a normal life with his parents. But after he starts turning into a werewolf, Luke and his parents are relocated to Scream Street, a town inhabited by monsters. Luke befriends two other residents of Scream Street, a vampire named Resus Negative and a mummy named Cleo Farr.
* Scream Street: Sir Otto's manservant Nameless is a hulking faceless humanoid construct.
* screams two of these at the trucks who caused Emily to have an extremely serious crash.
* screams, "WHAT?!" Although the reason he did was in reaction to the first thing she said (even though the second was more worthy of that kind of reaction)!
* Scream that came after, but since that's its own separate continuity, it can be, and often is, easily ignored.
* Scream the genre as well, leading to a second wave of slasher movies in the late '90s.
* Scream. The knife's appearance on these iconic horror film posters may be why it was chosen as Ghostface's primary weapon.
* Scream, the opening victim Nina threatens the killer (whom she thinks is her boyfriend Tyler playing a prank on her) by telling him that she has a "trained attack Pomeranian, and she will gut you on command!" Her little dog does bark at

the killer from behind the glass, but it does Nina little good when she's being stabbed to death.
* Scream: The TV Series: Jake survived the first season but was gutted in the first episode of season two. The second Ghostface who survived the second season was killed at the very beginning of the Halloween Special. Justified in that the show is a slasher series.
* Scream: The TV Series, Nina attempts to call 911 when Ghostface is attacking her, but because her hands are wet and can't operate her phone's touch screen, she has to use the voice commands to do it. The phone mishears her request to call 911 as "call Pottery Barn".
* Scream. The two of them bonded over their issues... and used them as motivation to murder people as Ghost Face.
* Scream to add a death to the middle of the film, as outside the two opening kills, there were no deaths for the first hour in the original script.
* Scream trilogy has been quite contested as well. None of the fans seem to agree on which movie was the best or the worst. Some say that the third was the weakest of the series. Others say it was an improvement over the second, but both pale in comparison to the first. Then there are some who say that the second was better than the first, and so on and so forth... and whether the fourth gets the series back into shape or falls flat is also disputed.
* Scream: two in Mexico, and one in Argentina. The second Mexican dub is the most circulated version.
* Scream, where Ghostface has a legion of fans, imitators, and media portrayals who constantly trigger the survivors of the first rampage.
* Scream). With the reappraisal of slashers in general starting in the late '90s, its reputation has recovered, and most critics once more recognize it as a classic.
* Screechers Wild who uses she/her pronouns and was asked if she sisters with Dark Blair instead.
* Screech has bird wings, blue-furred arms and legs, yellow claws and talons, red back spikes, a dark-blue spiked tail, a fireball-shaped head, and a body like a square rocket turbine. Wow.
* Screeching Weasel, in which Ben Weasel sings about the benefits of being a nudist (not getting made fun of for how you dress, not wasting time deciding what to wear, etc.)
* Screech Owls series, where the Screech Owls hockey team (despite almost always being the underdog) win and lose tournaments in a fairly realistic manner.
* screen burn-in (or were, back when people still owned monitors that were vulnerable to it), but look at those colored tubes go! Oooh. Shiny.
* Screencaps show that the Second Doctor's tall hat seemed to change size from episode to episode. It's about the same size as his head in
* Screen Gems logo used in the late 1960s known for the "screeching" synth horn as its logo forms.
* Screen Gems made several wartime shorts, most notably "Song of Victory", which features an allegory of how
* Screen Gems second season even have the original opening-title visuals for the "Girl Who Never Had a Birthday" episodes (lacking Sheldon's creator credit) dubbed with third-season audio.
* Screen Junkies discusses his role to officiate Nick's wedding to his fiancee. What he said was:
* Screen Junkies has done several roasts of fictional characters, such as Darth Vader and the MCU version of Captain America.
* Screen Junkies if only for the studio to not churn out any more lackluster sequels.
* Screen Junkies', they mention how awesome the movie is, but note that they had to do this as a comedy series.
* screen malfunction, and the grand orchestral music suddenly slowing to a stop.
* Screen Rant Pitch Meetings despite its major problems in large part because it will keep the Fantastic Four out of Marvel's hands for a long time. Cue news article confirming that the Fantastic Four will join the MCU.

* Screen Rant Pitch Meetings," does a little research and finds that it's the name of a deformed old woman, not merely a name for the boogeyman. Considering that the Producer usually lets more glaring problems pass with barely any comment, it's surprising that he thought to look up the namesake for John's nickname.
* Screen Rant Pitch Meetings episode, Screenwriter sometimes insult Producer to his face but he doesn't retaliate.
* Screen Rant Pitch Meetings episode, where the Screenwriter had to explicitly explain the innuendo behind the character designs and premise, prompting a nonchalant "very clever" from the Producer.
* Screen Rant Pitch Meetings involves a screenwriter pitching the movie that is the subject of the video to a producer, who offers feedback on the idea. Since the videos are meant to poke fun at the movies, whenever the producer likes some part of the movie(as opposed to raising a legitimate objection only to quickly drop it), it's usually for a very stupid reason.
* Screen Rant Pitch Meetings involves the producer asking the screenwriter what the name of the book that inspired the movie is, and getting confused when he's told that "It" is the title of the book.
* Screen Rant Pitch Meetings might be homophobic, and making Penny less intelligent than the guys might be sexist.
* Screen Rant Pitch Meetings often lampshades this trope when the Producer and the Screenwriter (neither of whom are supposed to be sympathetic), discuss the latter's pitches.
* Screen Rant Pitch Meetings often makes fun of movies that fall into this trope, as shown in the page quote. The Screenwriter will often mention something horrible happening to the character, often losing a mentor or loved one. The Producer then asks whether the character will feel sad about it, and the Screenwriter will say that the character will be upset for a few minutes, if at all.
* Screen Rant Pitch Meetings pitch meeting, both the Screenwriter and Producer realize it makes no sense for Michael Myers to know how to drive despite having spent most of his childhood in a sanitarium. The Screenwriter decides to have the characters note how strange this is without explaining it "because a character pointed out it makes no sense, it's okay."
* Screen Rant Pitch Meetings" that results in him breaking Poe out and crashing onto Jakku, where Finn finds Rey.
* Screen Rant Pitch Meetings, the screenwriter proposes killing off Leia in a "beautiful" death scene, but then is overruled by the producer, who tells him to have Leia save herself using the Force. People used to subsequent episodes may be surprised by the producer not only overruling the screenwriter, but actually telling him what to do.
* Screen Rant Pitch Meetings to dunk on movies or characters that are unimpressive:
* Screen Rant: The "movie pitch" series features a number of recurring jokes that happen at least once an episode:
* Screens Are Cameras becomes built into smartphones and computers that are in the hands of every consumer, viewers have to come to expect that a video call requires cameras to capture the image of a character's conversational partner.
* screens for the warlord. Furthermore, since they have a Thinkamancer, they can extend a bat's normally short scouting range infinitely, giving them a vast spy network.
* Screen Shake Nowadays, live-action sets can be put on a platform that shakes the entire thing, giving a renewed sense of realism to falling on your arse. However, this technique remains popular in animation and video games. If the controller supports vibration-feedback, expect it to shake too.
* screenshot. And then Blizzard added fuel to it by having the majority of Widowmaker's animated short be a fight between her and Tracer.
* Screen Songs cartoon, "Gobs of Fun", the mouse captain finds a note from his crew outside a pub saying they quit. In response, he chews a tack and rapid-firedly spits onto the note "SEZ YOU", before marching into the pub and throwing his crew out of it and back onto his ship.
* Screen Songs cartoon "My Gal Sal", complete with his eyes turning into faucets.

* Screen Songs short "Fireman's Brawl", fighting Popeye's attempts to put out a fire.
* Screen-to-Stage Adaptation, and the poor Chinese immigrant Ching Ho, who she eventually chooses.
* Screen-to-Stage Adaptation "Brimstone and Treacle" opposite "A Spoonful of Sugar".
* Screen-to-Stage Adaptation has a short musical number during the curtain call, thanking the audience for coming and telling them to get lost. This also appears in the 2005 film version after the credits.
* Screen-to-Stage Adaptation leaves out Rasputin and Bartok, going for a story closer to reality.
* Screen-to-Stage Adaptation, whose stage musical also premiered at Seattle's 5th Avenue Theater.
* Screenwipe, he comments on an ad with a talking toilet, wondering why it wants its owner to shit in its mouth.
* Screenwriter and blogger Pamela Ribon provided scratch tracks for Snow White in
* Screenwriter Erika Mann appears as a governess in the 1957 screen adaptation of
* Screenwriters Fran Walsh and Phillipa Boyens describe how, for every fight scene, they would simply write something to the effect of "They fight like men," then hand the script over to
* Screenwriter's Guide to the Autopsy, Ed Uthman notes: "For some odd reason, many prosectors report increased appetite after an autopsy, so the first thing they want to do afterwards is grab a bite to eat."
* Screenwriters Scott Alexander and Larry Karaszewski also had two biopics of 'Anti Great Men' (that some add to
* ScrewAttack crossover with "The Meta vs. Agent Carolina". Ben called out the fandom with a heavy snarking message "thanking" them for their "support" for making the crossover.
* ScrewAttack: Daily Destin. His transformers figures killed themselves because of what he did to them.
* ScrewAttack), has its own Top Ten List section, but they generally like to mix things up a bit, for instance having Best and Worst of... (5 each). And then there is the Top 10 PS3 exclusives... which doesn't start until number 7 because there just weren't enough titles around at the time that qualified.
* ScrewAttack has made a clip of the week stating to stop this or a "first monster" will come and delete the post.
* ScrewAttack really got popular. Whilst that show got better the rest of Screwattack's content seemed to suffer with the humor becoming stale and overdone, top tens becoming really generic, and Stuttering Craig becoming much too prevalent in each video (which many fans felt is what caused the first problem). Some fans think the rot may have even happened earlier after many key members left and with the shut down of Hard News. It seemed Screwattack actually realized this and eventually put all resources into Death Battle.
* ScrewAttack respond in kind, as will the other members of the SA crew; and this goes even further if you badmouth the team's only female member.
* ScrewAttack's sidescroller makes frequent use of this during the Newsdesk (so much so that it's a running gag that Chad will either be ecstatic or upset if there isn't a Florida story) and at least one fan-submitted question said that he was in a dangerous place at the time. And yes, they are always the weirdest...
* ScrewAttack's Top 10 Cartoon Games made sure to include this in one of the entries:
* ScrewAttack: Stuttering Craig suffered from it during his Vortex review.
* ScrewAttack video has the staff opening a portal to an alternate dimension and meet with their doppelgangers. Stuttering Craig and his double (played by Craig's brother) silently size each other up. Then they whack each other in the crotch.
* Screwball Comedy, Wally takes Hazel to a wrestling match. He starts talking about how it's all phony and scripted, and then starts riffing on how New York is full of phonies.
* Screwball is often refereed to as "Screwy" by her friends and family.

* Screwball Serum: Someone ingests a mysterious concoction and it either shapeshifts them or changes their personality.
* Screwball Squirrel: Chirp! (I am a squirrel, but I can hit you with nuts!)
* Screwball Squirrel: Squirrels are depicted as aggressive and sadistic.
* Screw Destiny: A character decides that they won't let fate define them and follows their own path.
* Screw Destiny: Characters want to go against a prophecy and prove it wrong.
* Screw Destiny is probably one of the most debated issues with various schools of thought having different standpoints and justifications for them.
* Screw Destiny: The Enlightenment puts no stock in prophecies, preferring instead to let science and reason to guide them.
* Screw Destiny theme, and as for not relying too heavily on another person, the entire village was involved in stopping the lava, even if Aang did save the day.
* screwdriver into Shiage Hamazura's ear. It renders his ear canal bloody, but fortunately didn't go in deep enough to break his eardrum.
* Screwed by the Lawyers: Production or distribution of a work is ceased or hindered by legal issues.
* Screwed by the Lawyers: When a work is discontinued because of lawyers.
* Screwed by the Merchandise: A series gets canceled because the merchandise didn't sell well.
* Screwed by the Network, and any such relationship no longer survives.
* Screwed by the Network: A show gets canceled because of ill treatment by the network.
* Screwed by the Network: A show gets cancelled because the network didn't treat it very well.
* Screwed by the Network something virtually unheard-of in Western animation at the time.
* Screwed by the Network: The show gets cancelled because the network didn't give it enough decent airtime and chose not to renew the series.
* Screwed by the Network: The show gets cancelled because the network didn't give it enough promotion or airtime, or they straight-up hated it and used scummy tactics to justify its cancellation.
* Screwed by the Network: The show gets cancelled because the network didn't treat it right.
* Screwed by the Network: The show gets cancelled because the network didn't treat it well.
* Screwed By The Studio, Dr. F's lab gets a major overhaul. Complete with a fish tank packed with acid.
* screwed they are afterwards. The third one is polite and says what he believes, apples which shall cure the princess. (Well, technically not a lie but wishful thinking.) The witch makes this real also, cue happily ever after.
* screwed-up cable porn. While you can't see anything, a situation like this plays out with a Pizza Guy, then a Plumber, and a Pool-Cleaner end up in a massive orgy, and in the end, the first guy goes "Seriously, somebody has to pay for this pizza."
* Screwed, Willard(MacDonald) and Rufus(Chappelle) fake Willard's kidnapping, at one point making a fake ransom video with him in a dog cage, and being forced to eat kibble. Then, Rufus(out of frame) squirts some water on him:
* Screwed with with a certain collection of "Go to this site" ripoff commercials (
* screw his former employer, an insurance company, for refusing to pay for his son's experimental surgery, resulting in the boy's death.
* screw in a light bulb? It's an obscure number, you've probably never heard of it.
* screw in a light bulb? Three: the first one screws, the second one takes a photo for Instagram, and the third one writes about it in his blog.
* screwing with Picard and crew in relatively minor ways at the same time.
* Screw Learning, I Have Phlebotinum!: A character doesn't amass knowledge and logic through reading, critical thinking, and otherwise engaging with material when there's an easier way.
* Screw Politeness, I'm a Senior!: An character feels entitled to be rude to others because they're an elder.

* Screw Politeness, I'm a Senior!: An elderly character uses the excuse that being a senior citizen means they can be rude to everyone.
* Screw Politeness, I'm a Senior!: I'm a senior citizen, so this means I can act like an asshole however I want!
* Screw Politeness, I'm a Senior!: I'm a senior citizen, therefore, I can act like an asshole however, whenever and to whomever I want!
* Screw Politeness, I'm a Senior!: Someone believes that being elderly entitles them to be rude to everyone.
* screws The Rules with money in order to "Make the sky burn"—he creates a flammable gas that will ignite at a specific time, then has the Manhattan Clan and his own robotic gargoyles fly the skies with packs full of the stuff. Unfortunately, Demona catches on, reprograms the gas packs to ignite early (which would make the spell fail), and then changes the computer system's password to something only she knows to prevent anyone from stopping her. It takes magic to get her to reveal the code.
* Screwtape, a senior devil, continually advises Wormwood to rely on deception, jargon, and emotion to keep his human from acting morally and ethically. He wants the human thinking about "That was a phase," "This makes me happy," or "That idea is courageous," rather than the more banal questions, "Is this true?" or "Is this just?" Awakening the "patient's" reason would be a terrible idea according to Screwtape, as many of the decisions of the Hell-ward road have no rational justification at all. That's as enlightenment as it can get.
* Screw the Money, I Have Rules!: A character refuses to accept a bribe for moral reasons.
* Screw the Money, I Have Rules!: A character shows their integrity by refusing to accept a bribe.
* Screw the Money, I Have Rules! (as in, the demand is a strictly symbolic exchange — the person who made the demand would have even done it for free had they been allowed to)
* Screw the Money, I Have Rules!: Showing your integrity by refusing to accept a bribe.
* Screw the Money, I Have Rules!: Someone demonstrates their moral/professional integrity by refusing to accept any bribe from unscrupulous folks.
* Screw the Money, I Have Rules!: When a person can't be bribed or otherwise persuaded to bend their standards.
* Screw the Money, I Have Rules!. When he's offered a huge fee to rescue Xinchub from certain death, he refuses, because he and his soldiers hate Xinchub so much.
* Screw the Rules, I Have Connections! because they're friends with the people who have the authority to punish them.
* Screw the Rules, I Have Connections!: Having friends or relatives amongst the higher ups protects you from the law.
* Screw the Rules, I Have Connections!: I don't have to follow the rules, I've got connections to powerful people!
* Screw the Rules, I Have Connections!: Person avoids punishment for their misdeeds because they're friends with those who have the authority to punish them.
* Screw the Rules, I Have Money!: A character bribes people to avoid punishment for their misdeeds.
* Screw the Rules, I Have Money! by bribing the authorities with their obscenely high level of wealth.
* Screw the Rules, I Have Money!: Getting away with your crimes by bribing people.
* Screw the Rules, I Have Money!. Himekawa buys the whole gaming company so he can have the code altered to allow his team to become zombies to beat their opponents.
* Screw the Rules, I Have Money!: I have money, so I don't have to follow the rules!
* Screw the Rules, I Have Money!: Perhaps the only surefire way to exempt yourself from any rule of the internet- or even real life- is to use your massive affluence to make yourself immune from any rules. Who would tell you you're breaking the rules when you're the one with their tax money?
* Screw the Rules, I Have Money!: Richer folk tend to have things easier

considering that they have more money to get themselves out of a jam easier than the poor. Of course, there are always exceptions...
* Screw the Rules, I Have Money!: They both use their families wealth for evil.
* Screw the Rules, I Have Money!, when he actually said this in the abridged series, he was just straight-up cheating in his Duel Monsters game against Yugi.
* Screw the Rules, I Have Supernatural Powers!: A character believes that having powers means they're entitled to break the law.
* Screw the Rules, I Have Supernatural Powers!: A character uses their powers to get away with breaking the law.
* Screw the Rules, I Have Supernatural Powers!: A character with superpowers feels entitled to get away with their crimes.
* Screw the Rules, I Have Supernatural Powers!: Character uses superpowers to get away with breaking laws.
* Screw the Rules, I Have Supernatural Powers!. First, Obnoxious Celtic Guardian is destroyed in battle by Sphinx Teleia which has 2500 ATK, despite the fact that Obnoxious Celtic Guardian cannot be destroyed by monsters with 1900 or more ATK (which saved him from Noah once), and Teleia's effect doesn't activate, which would defeat Atem. Second, Anubis sets Theinen the Great Sphinx like a Spell or Trap Card on the field, despite it being a Monster Card (no, he doesn't set it in Defense Position).
* Screw the Rules, I Have Supernatural Powers! to (try to) get away with breaking the law.
* Screw the Rules, I Make Them!: An authority figure believes that being in charge makes them above the law.
* Screw the Rules, I Make Them!: An authority figure believes that being in charge means they don't have to obey the law.
* Screw the Rules, I Make Them!: An authority figure believes that they're above the law simply because they're in charge.
* Screw the Rules, I Make Them! cards, any cards he makes are technically legal, even if they are wildly unfair, making this an in-universe example.
* Screw the Rules, I Make Them!: I make the rules, so I can say I don't have to follow them!
* Screw the Rules, I Make Them!, which can be true if they really are that powerful and untouchable.
* Screw the Rules, I Make Them!: You make the rules and therefore you don't have to actually have to follow them.
* Screw the Rules, I'm Beautiful!: A character feels entitled to get away with anything because of their good looks.
* Screw the Rules, I'm Beautiful!: A character's good looks enables them to get away with their actions.
* Screw the Rules, I'm Beautiful!: Being good-looking lets you get away with crime.
* Screw the Rules, I'm Beautiful!: I look good, so I get a free pass on the rules!
* Screw the Rules, I'm Doing What's Right!: A character breaks the law in order to do good.
* Screw the Rules, I'm Doing What's Right!: A character listens and does what their heart tells them is the morally right thing to do and not what bureaucratic laws tell them to.
* Screw the Rules, I'm Doing What's Right!: A character who listens and does what their heart tells them is the morally right thing to do and not what bureaucratic laws tell them to.
* Screw the Rules, I'm Doing What's Right! and ends up being tried (and even doing time) because of his "heroic act".
* Screw the Rules, I'm Doing What's Right! and threw that one out the window. And another Watcher fell in love with her immortal and was helping him win a lot until he tried beating Duncan.
* Screw the Rules, I'm Doing What's Right!: Deliberately defying rules because they go against doing what is clearly the right thing.
* Screw the Rules, I'm Doing What's Right!: Doing what's right even if it gets you in trouble.

* Screw the Rules, I'm Doing What's Right!: Someone deliberately defies the rules because they get in the way of doing the right thing.
* Screw the Rules, I'm Doing What's Right!: Someone deliberately defies the rules because they're in a situation where the right thing to do can only be done by breaking the rules.
* Screw the Rules, I'm Doing What's Right!: When a person holds two sets of standards that conflict, they take the higher road.
* Screw the Rules, I'm Famous!: A celebrity believes that their fame means they can get away with anything.
* Screw the Rules, I'm Famous!: A celebrity believes their fame means they can get away with anything.
* Screw the Rules, I'm Famous!: A celebrity thinks that their fame means they can get away with anything.
* Screw the Rules, I'm Famous!: A character feels entitled to use their fame to get away with anything.
* Screw the Rules, I'm Famous!: Being able to get away with anything as long as you're popular.
* Screw the Rules, I'm Famous!: I'm famous, so I don't have to follow the rules!
* Screw the Rules, It's the Apocalypse!: Everyone believes that the world ending means that laws and rules don't matter anymore and they can now do whatever the hell they want without fear of repercussions.
* Screw the Rules, It's the Apocalypse! (or some other major disaster) means that laws and rules are now meaningless, and they can now do whatever the hell they want.
* Screw the Rules, It's the Apocalypse!: People take advantage of the fear and chaos the apocalypse brings to do whatever they want.
* Screw the Rules, It's the Apocalypse!: When the apocalypse happens, everyone starts doing whatever the hell they want with the reasoning that the world ending means that rules and laws don't matter anymore.
* Screw the Rules, They Broke Them First!: Once one side breaks the rules, the other side sees no reason not to follow suit.
* Screw the Rules, They Broke Them First!: One team decides it's okay for them to break the rules if the other team has already done so.
* Screw the Rules, They Broke Them First!: One team decides that it's okay for them to break the rules if the other team has already broken them.
* Screw the Rules, They're Not Real!: A character abandons or ignores rules they have no external reason to obey.
* Screw the Rules, They're Not Real!: A character abandons rules they have no external reason to follow.
* Screw the Rules, They're Not Real!: A character breaks the rules because there is no logical reason to follow them and breaking them grants a clear advantage.
* Screw These Comics was a site that did this for sprite comics, and had a group of characters review a given in dialogue. Eventually, the creator quit after realizing his own reviews had degenerated into the same kind of things that he criticized bad sprite comics for overusing. Where once the team would look at a comic's points legitimately while making fun of it, toward the end many reviews consisted solely of variations of the exchange:
* Screw the War, We're Partying!: Characters have fun despite war and the threats to personal safety and resource constraints that go with it.
* Screw This, I'm Outta Here!: “Well, this was fun, but this is a bit more than I can take. Good luck, everyone else!”
* Screw This, I'm Outta Here!: A character chooses to leave after deciding that the problem they're facing isn't worth getting involved with.
* Screw This, I'm Outta Here!: A character decides they'd rather get the hell out of dodge than stick around and get involved with the current situation.
* Screw This, I'm Outta Here! at the Battle of Blackwater has put an end to this for him.
* Screw This, I'm Outta Here!: Character decides to leave so they don't have to get involved with the current situation.

* Screw This, I'm Outta Here!: Character elects to leave rather than get involved with the present situation.
* Screw This, I'm Outta Here!: Character leaves because they don't want to get involved with the current situation.
* Screw This, I'm Outta Here!: Where a member of either the good guys or bad guys gets sick of it, throws his hands in the air and walks away.
* Screw This, I'm Outta Here! who desert during the fight are usually portrayed in a neutral-to-positive manner, while allies of the protagonist who do the same tend to be portrayed negatively.
* screw with the dysfunctional bad guy team from the inside. When that stops being fun, he promptly escapes to beat the Joker up. Then again, Batman is wearing his own store cupboard.
* Screwy himself sometimes had a high pitched "ah-yuk-yuk-yuk" laugh.
* Screw You, Elves!: The high-and-mighty species who believe themselves to be better than everyone else gets told by a member of one of the so-called "lesser species" where they can shove their arrogance.
* "Screw you guys, I'm going home!" and then leaves the room. A second later he swivels around and heads back into the room because they now have class in fifteen minutes.
* Screw Yourself: If having intercourse with oneself involves using time travel to have sex with one's past or future self.
* Screwy Squirrel, a chase between Screwy and Lenny is briefly and abruptly interrupted when the two stop to take a lunch break. As Screwy remarks, "Strong union."
* Screwy Squirrel, but it can also be viewed as this since Screwy was somewhat unlikeable anyway.
* Screwy Squirrel cartoon "Lonesome Lenny" at one point Screwy sticks Lenny's head into a bucket of alum and he says while his head is shrinking "Why did you put my head in the bucket, George? You shouldn't have put my head in the bucket, George, why did you do it?" in a high pitched voice.
* Screwy Squirrel cartoon, Screwy paints a barn wall white, then paints himself white as well to appear invisible and hit the dog chasing him with a bat.
* Screwy Squirrel has a scene where Screwy hits Meathead the dog with a bunch of items found in a steamer trunk labeled "Assorted Swell Things To Hit Dog On Head":
* Screwy Squirrel", Screwy is being chased by a dog when suddenly the music starts repeating as if it were a broken record, and the action goes back and forth accordingly. Screwy then walks over to a record player, adjusts the needle and the chase resumes.
* Scribblenauts, a few creatures are impossible to kill except using some special objects:
* Scribblenauts allows you to set this up using a "plank", "glue" and something the character wants.
* Scribblenauts, attempting to summon "SCIENCE" nets you a Large Hadron Collider (see below).
* Scribblenauts features George Washington and Abraham Lincoln as summonable characters, despite its statement that proper names are not valid words.
* Scribblenauts games will spawn a green portal that can't be directly interacted with. After a couple of seconds, the wormhole will automatically vanish and spawn a random monster, ranging from a simple mutant or alien to Cthulhu.
* Scribblenauts games, you can spawn some of the 5th Cell developers who helped with the game. "Edison Yan" spawns a dinosaur with a red sweatband on its head. "Jeremiah Slackzcka" spawns the game's main developer who breakdances.
* Scribblenauts has all of its levels (except for Edwin's Farm) named after things that have to do with writing (St. Asterisk Hospital, Bullet Point Bayou, Ruins of Ellipsis, etc.)
* Scribblenauts has this type of car as one of the objects you can summon. Tapping it after summoning spawns three clowns.
* Scribblenauts have no real plot to speak of, although the prequel Scibblenauts Unlimited and DC Crossover Unmasked do.

* Scribblenauts is of the characters you can spawn. He's capable of flying, and will attack every other character, including the player. The game portrays him as an actual cryptid, rather than a human in a suit.
* Scribblenauts, naturally gives them the option to create a working death ray.
* Scribblenauts Remix has a silly glitch in which making a building ridable can allow the player to walk offstage or even clip through the ground.
* Scribblenauts removes his scythe — although he'll still pick one up if you spawn one — and gives him the ability to instantly kill anything with a touch. This includes Maxwell in the playground areas, where he's usually invincible to anything short of a nuke.
* Scribblenauts series are white humanoid objects that can be brought to life. If so, they'll hop instead of walk.
* Scribblenauts, spawning an ambulance and then spawning a lawyer will cause the lawyer to run after the ambulance.
* Scribblenauts summonable creatures and is one of the few things that scares vampires.
* Scribblenauts, the magic wand (which is the default weapon of witches and wizards) shoots bolts that change living things into frogs.
* Scribblenauts to create one (using the trope title, no less!) ever since adjectives were added in the second game.
* Scribblenauts Unlimited and asks for a tool to mine for it. If Maxwell gives the mouse a useful tool, like a pickaxe, the mouse will indeed strike cheese, earning Maxwell the Moon Gold shard.
* Scribblenauts Unlimited, the Starite shard "Liar Liar Pants On Fire", awarded for placing two people who never tell the truth next to each other, can be earned by spawning two lawyers in close proximity. Getting another shard, in the Saurus Park level, involves putting something that sucks blood in a chunk of amber, and a lawyer works just fine.
* Scribblenauts Unmasked, and the latter makes several attempts to sabotage the former. They would've won legitimately had Doppelganger not made the desperate last-minute decision to give Zoom a jetpack, which sends them flying offscreen.
* Scribblenauts went on a rampage at the site's Scribblenauts board. Any topic with gameplay discussion or anything that even appeared to be gameplay discussion was very harshly moderated, mainly because most of the posts were from people who had downloaded the ROM. They were warned for "Illegal Activities", even though some people had actually received perfectly legal copies from stores who had accidentally let it out early.
* Scribblenauts (which results in a notebook that spawns random items when you use it).
* Scribblenauts will bounce all over the place once summoned and placed, sometimes stopping but often not losing any momentum until it hits something in the way. One of the deadliest things you can create is made by adding the adjective "deadly" to a bouncy ball, resulting in the energetic ball killing anyone it runs into, including the player.
* Scribblenauts, writing "monotreme" gives you a porcupine (not an echidna, an actual porcupine).
* Scribblenauts you can create a Laser, as well as a Shark, and then put the laser on the sharks head, though it won't fire... unless the shark is on land. The shark will disappear eventually, though.
* Scribblenauts: You can summon Chupacabras, which attack goats on sight. Amusingly, they can wear hats and hold items.
* Scribblenauts, you're free to open fire with a freeze ray to keep them out of your way; they'll thaw out, unharmed, a short time later.
* Scribbly has Lord Zirtox, evil alien warlord and father of protagonist's-best-frient, Zark (and his twin Kraz).
* Scribes of Angel: Over 800 fics and growing. They are hand picked for greater quality.
* Scribe stories include a series set in the present where Gandalf and the elves meet the reincarnations of the humans, the hobbits and Arwen to oppose the new

plans of the reborn Sauron and his minions. In the course of this series, Aragorn and Arwen's reincarnations swiftly form a connection even before Gandalf and Legolas affirm that the two were married in their past lives, Faramir and Eowyn's modern selves were already married before they became involved in Sauron's schemes, and the reborn Boromir falls for a woman who it appears met Boromir before he left for Rivendell back in the Third Age, with the two simply never having the chance to take their relationship further before Boromir's death.
* Scrin against ground targets, as well as call down a Tiberium-seeding beam from orbit. None of these are superweapon-grade, however.
* Scrin) attempt to take over Phazee, even corrupting Dark Samus... who proceeds to turn the tables and enslave them.
* Scripps College boasts the Motley Coffeehouse, the largest all-female-run coffeehouse west of the Mississippi.
* Script Breaking: Runners like to avoid triggering unskippable cutscenes as much as possible, which may have some weird results.
* Script Creation Utility for Maniac Mansion, with the in-game SCUMM Bar (which after the engine technology changed for the fourth game to Lua, was renamed after a hostile takeover by the game's antagonist to the "Lua Bar").
* Scripted Event: Events in video games which are programmed to unfold in the same way each time.
* Script Fic has had several: "Home Un-Alone", "Full Moon: Full Baloney!", "The Great Halloween Heist", "Pranking the Ghosts"...
* Script Fic has its protagonist trying out for several jobs in "Help Wanted", though he's too young for most of them.
* Script Kiddie. Hollywood almost always ignores this distinction, to the extreme consternation of those that care about such minutiae.
* Script-Reading Doors — Doors which know when to open, when to close, and when not to
* Scripts for the first three episodes of the third season leaked weeks before the season officially premiered.
* Script Swap. The funniest part? The composer of the very song they are playing is in the audience.
* Script Wank: Having a character come right out and say "The lesson to be learned here is..."
* Script Wank: Something that's outright said to the audience after being implied.
* Script Wank: The creator explicitly spells out a work's message because they don't trust the audience to pick up on the subtext, goes hand in hand with...
* scro are advanced orcs who have developed a regimented military culture. The giff have a fondness for military pomp and powerful explosives that dramatically increases both the absurdity and the danger of a seven-foot humanoid hippo.
* Scroll bars: Windows has up and down buttons on each end of the scroll bar. Mac has both button at the bottom end of the bar. It's a good thing that in both cases, the bar itself can be dragged, and users can still click past the bar for a page up/down effect.
* Scrolling down on smartphones and tablets means moving your finger up. Scrolling down with a mouse wheel means moving your finger down. Scrolling down on a laptop with a trackpad means moving your finger down, unless it's using Windows 8, then you move your finger up, unless you've changed the default, then you move your finger down, unless you've changed it using third party software, then you move your finger up to scroll down until that software loads up and move your finger down to scroll down thereafter.
* scrolls. The spell is not learned from the scroll, however, and the scroll is destroyed through use.
* scroll to prevent it from taking up more than 1/3 of the screen. Between the scrolling speed and low contrast, it would be difficult to read even with the ability to pause the ad.
* Scrooge (1951) Christmas Past segment, Marley dies mid-sentence while attempting to tell Scrooge to "save himself".
* Scrooge (1951) introduces her earlier at Fezziwig's party, showing Young Scrooge

proposing to her there. Since then, almost every adaptation has included Belle at Fezziwig's party, with Young Scrooge either proposing there, meeting her there for the first time, or just conversing and/or dancing with her.
* Scrooge (1951), when Scrooge wakes up on Christmas morning and can't stop laughing out of joy, his housekeeper thinks, justifiably, that he's gone quite mad.
* Scrooge (1970) also have Scrooge fall into the grave, often with smoke and hellish light spewing forth from below.
* Scrooge (1970), a picnic, an archery contest, and the carriage ride during which he proposed.
* Scrooge and Glomgold have been shipped as well. Plus Goldie, his canon love interest, almost falls into this at times with how often she betrays him. So Scrooge kinda gets this a lot.
* Scrooge and Magica, as par for the course — from her obsession with owning Scrooge's most prized possession, calling him "Scroogey," borrowing his canonical love interest's
* Scrooge and the Ghost of Christmas Present observe Twenty Questions being played at Fred's Christmas party in Dickens'
* Scrooge berates his nephew Fred for getting married even though he wasn't exactly rolling in money. Fred's response, when asked why he got married anyway, was "
* Scrooged, a trip to Frank's past reveals that he first met Claire after she accidentally flung open a door and clocked him on the bean. It's also where she came up with the pet name "Lumpy" that she still calls him years later.
* Scrooged dad. Frank himself gives bath towels to employees and even his brother, with expensive gifts like VCRs being reserved for people he's trying to impress.
* Scrooged Frank Cross meets the love of his life when she walks out of a store and whacks him "right between the eyes" with the door. She nicknames him "Lumpy" after the incident.
* Scrooged. Frank's resentment of Christmas (and love of television) came as a result of his disinterested parents, especially his father who regarded anyone who didn't work (including his underage son) as lazy. To make things even bleaker, years later around Christmas Frank ended up choosing his career over the love of his life, which left him jaded until the Ghosts came.
* Scrooged has the Ghost of Christmas Present (Carol Kane) doing the following to Bill Murray's Frank Cross:
* Scrooged, in addition to begging his brother not to let him burn, he also cries out for their mother.
* Scrooged is beaten throughout the film by falling sets, carelessly opened doors, and everything else that can get hurled her way. It's very effective at keeping her from doing her job and the smut gets right past her onto the airwaves.
* Scrooged: "Listen, I know I haven't talked to you in... *checks watch* ...about 10 or 15 years, but..."
* Scrooged plays his character's father in the Christmas Past segment.
* Scrooged's character one of his first Christmas evenings. Murray begins to cry. Earlier, the Ghost had claimed that even Attila the Hun had to cry when he saw his own mother. Murray then claims (unconvincingly) that he's crying over the lump of meat his father got him as his Christmas present, which he didn't appreciate back then.
* Scrooged the son of the TV executive's African-American assistant hasn't spoken since his father (her husband) was murdered a couple years back. Until the end with the TV executive, where he speaks: "God bless us every one."
* Scrooged to address the theatrical audience directly, even asking them to sing along to the closing credits — first the people on the right, then the people on the left...
* Scrooged, when the Scrooge stand-in attends his funeral during the Ghost of Christmas Future's tour, he ends up in the coffin as it goes into the retort.
* Scrooged, where a character actually calls the bluff of the menacing hooded figure that claims to be a supernatural creature, and looks under its robes. The ghost is genuine, and the view is not pretty.

* Scrooge has been friends with the Ghosts of Christmas Past, Present, and Future ever since that one time they mistook him for
* Scrooge himself also has a moment like this in the 1984 TV adaptation starring George C. Scott. In the scene following the one above, an older Belle, now
* Scrooge is an old man; Launchpad is still quite young. However, the two do see each other as friends in addition to the boss/employee relationship.
* Scrooge is this in his business dealings as well; work hard, be smart, stay honest. He rejects Glomgold's elaborate schemes against Mark Beaks because even though they both can't stand him, Scrooge would rather simply ignore him and concentrate on his own success than focus on destroying a rival.
* Scrooge McDuck addicted... to nutmeg tea. It was "A Spicy Tale" from September, 1962.
* Scrooge McDuck almost marries one of these in the Season 1 finale of
* Scrooge McDuck and his nephews took shelter in a Spanish Galleon lost in a South American desert after being left for dead by the Beagle boys, while both were trying to find the Seven Cities of Cibola.
* Scrooge McDuck ... and some accident and bad choices and such. "The Prisoner of White Agony Creek", "Hearts of the Yukon" and "Last Sled to Dawson" show as much.
* Scrooge McDuck, Bill Thompson provided Mr. McD's voice? (Most of the hands fall.) Or that in the 1986 special "Sport Goofy in Soccermania," Scrooge was voiced by Will Ryan? (Even more, hands go down.)
* Scrooge McDuck comic during an incident where Scrooge, Donald, and the kids are trying to retrieve a rare coin from where it bounced into a custard pie in a bakery. The bakers misunderstand, and the whole situation devolves into a pie war.
* Scrooge McDuck comic, the protagonists discover the titular lost city deep underwater is populated with these, who have developed an advanced undersea civilization.
* Scrooge McDuck had this intentionally used to stun for a critical moment in
* Scrooge McDuck, he gains some money with this. Step 1: Perform a purposely bad performance in a talent show. Step 2: Catch all vegetables thrown at him. Step 3: Sell them. Step 4: PROFIT!!.
* Scrooge McDuck, Huey, Dewey, Louie, and/or Gladstone) or his office staff try to keep his financial empire running. In stories playing it straight, they really mess things up and manage to damage said empire. When Scrooge inevitably resurfaces, he has his hands full with a rebuilding process. In stories averting the trope, the replacements initially have problems but eventually wise up to proper ways of running things. Scrooge returns to find his affairs in a decent state and even notes a few improvements, proving that his intended heirs are actually worthy of the job.
* Scrooge McDuck is well-known for his meanness, but when it comes to treasure hunting, it's nearly the opposite. For example, in
* Scrooge McDuck Italian comic featured Scrooge building an amusement park based entirely on his life. It had 3 "rides": the first is a cleaning shoes simulation, the second is a simulation of searching gold in Klondike (complete with artificially recreated cold climate and animatronic bears harassing people) and the third is just a marathon of documentaries about economy. That's enough of a failure to bankrupt his entire fortune.
* Scrooge McDuck — pick anywhere in the world, and he's been there. Pick any type of adventure, and he's done it.
* Scrooge McDuck's devotion to his Money Bin reaches this level. You don't become the richest duck in the world with sloppy accounting, after all, and any security breech at the Bin could indicate another theft.
* "Scrooge McDuck's First Full-Length Animated Feature Film" —
* Scrooge McDuck's Scrooge doesn't even know that his arch-enemy was that random jerk he met some 40 years ago, since he never got his name, and likely doesn't even remember the incident. The only reason Glomgold gives a single shit about being the Richest Duck In the World is that he wants to humiliate Scrooge.
* Scrooge McDuck story, Donald and his nephews were stuck in a ship, condemned to peel potatoes until the return to Duckburg... and to make things worse, with a

counting parrot that started to see how many were there!
* Scrooge McDuck story has him run into a convoy of prospectors, which he fails to sell anything to. As he comments that they seem to have everything but the kitchen sink, one of them points towards his mule... sure enough, he's got one.
* Scrooge McDuck story, Scrooge and his rival Glomgold get into a race to find El Dorado. At first, it seems that Glomgold won until Scrooge points out that while he may have found the gold, the ownership of the city technically goes to Scrooge due to him buying an ancient bank at the beginning of the story. Due to unpaid interest, Glomgold now owes Scrooge all the money in the world. Then some tax men show and reveal that Scrooge has to pay taxes for the gold, the amount of which made him broke 100 years ago. In the end, Scrooge is forced to give up El Dorado, but he admits it was worth having Glomgold so indebted to him for just a few moments.
* Scrooge McDuck story where Scrooge went to the center of the Earth to look for the key to time had his vehicle being powered by the power of the market put in a pressure chamber. At one point, he ran out of fuel because the market had been tamed, but his fighting with Donald charged up the pressure chamber again.
* Scrooge McDuck to lead to a faux-medieval battle over the castle, the offended officials of the city basically recognise his claim because he shoots at them with a cannon when they try to disagree.
* Scrooge McDuck vs. Shovel Knight turns out to be a pretty huge one. From analysis, it appears that
* Scrooge McDuck (written 1966, published 1967). It is the story of an immortal man who is tired of his long life and seeks death. He describes himself as "tired, and old and lonely". The story is considered to express the 65-year-old Bark's own feelings of fatigue and decision to end a whole era of his life.
* Scrooge once recounted how a police officer was sentenced to 30 days wearing skirts for arresting him for wearing a skirt simply because he was wearing a kilt. (Scrooge lucked out: the judge was also a guy who wore a kilt; he wasn't amused.)
* Scrooge refers to his closest allies as a "ragtag gang of underdogs" in the second season finale of
* Scrooge's biggest rival, Flintheart Glomgold, is a much more genuine example of this trope on the show.
* Scrooge's headstone can still be visited in the graveyard of St Chad's Church.
* Scrooge's interpretation of the insurance policy is exactly how just about every policy involving "fire" is interpreted.
* Scrooge, Tiny Tim is first seen gazing into a shop window with (authentic Victorian) mechanical toys, including a laughing-man doll that's pure nightmare fuel - although Tim seems to find it charming.
* "Scrote" also happens to be a somewhat vulgar slang term in parts of England, roughly equivalent to "white trash".
* Scrub: A competitive player who claims that their rules are "house rules."
* Scrub has this as a superpower; he can deposit the contents of a spherical volume into another reality.
* Scrub Me Mama with a Boogie Beat, it features a cast of African-Americans who are drawn to heavily resemble chimpanzees.
* Scrub: Players of a competitive video game who insist that all players should play their way.
* Scrubs a baby shower and one of her baby shower games was "Guess the Baby Food Flavor" that she made Keith play to get people interested. Keith remarked that it tasted like "cab-driver feet". Elliot's response: "It's turnips! Now you have to eat the whole jar."
* Scrubs: According to Dr. Cox, the internet is for porn, as evidenced by the page quote.
* Scrubs after a break-up - he even points it out himself as he sits in a bar where a girl first offers to buy him a drink and then strikes a rather flexible pose to further entice him. To no avail though.
* Scrubs after breaking up. He's supportive when she becomes engaged to new intern Keith, but it isn't until the ceremony officiates the whole thing that he realizes

that he did want to marry her himself.
* Scrubs, after finding out his interns don't really find his jokes funny, he tells them to only laugh when they are. When they stop laughing at his jokes, he orders them to start laughing with him again when he makes jokes.
* Scrubs. After J.D. accidentally knocks out Turk during a competitive tussle over the remote, Turk spends the rest of the episode chasing J.D. around the hospital to avenge himself. When they finally talk it out, neither can admit they "lost" their fight without losing face. Then they simultaneously come to a solution.
* Scrubs, after J.D. and Elliot get together for good, their exes Kim and Shaun also become a couple.
* Scrubs, after J.D. and his girlfriend realise their incompatibility;
* Scrubs also has an in-universe example. At one point, JD tries to break the ice with a child by performing improv over the image of the child's parents and Dr. Cox arguing soundlessly through a window; however, all the dialogue JD comes up with is pie-related, and the child is unimpressed. JD resolves to change to an improv class that doesn't meet upstairs from a pie shop.
* Scrubs, and always intended to go. Between cuts she suddenly has a large sunhat on her head and departs.
* Scrubs and his sidekick had been hiding on a lower roof as part of a money-making scheme.
* Scrubs, and Jennifer Dylan after Dr. Cox had two vasectomies. Turk and Carla, on the other hand, had to both have fertility tests and counseling before they finally had Izzy.
* Scrubs and stand up for himself, Ted disagrees with how the Janitor is running the Brain Trust and starts his own group called The Brain Bunch.
* Scrubs (and what we thought was Jack's birthday party was actually Ben's funeral), with his and Cox's interactions being a way for Cox to cope with the loss of his best friend.
* Scrubs. And when JD (justifiably) complains about how bad his life has become, the show treats him as a whiny loser who needs to learn how to stand on his own two feet.
* Scrubs, a season after they broke up. When he realized he was still in love with her and decided to tell her, she broke up with him before he could, ironically because she knew that they would fall in love again and didn't want that to happen.
* Scrubs as he had zero prep time, but his heart was in the right place.
* Scrubs, as he posted a link to the trailer on his facebook page and appeared in a selfie with the guy who played him.
* Scrubs. As Murray's toy plane explodes, J.D. notes, "What an odd-sized explosion..."
* Scrubs as the unnamed priest who Turk wanted to officiate at his wedding to Carla, purely on the basis that he "looked exactly like Sulu!"
* Scrubs attempt a literal version of this on their first date, but lose balance and fall out.
* Scrubs: At the end of the first episode J.D. consoles himself with the thought that at least he got through his first week without embarrassing himself too badly, and walks into a freshly polished glass door which knocks him flat on his ass in front of everyone.
* Scrubs band, and that it was the best employee band in the hospital. This angered Ted's band who challenged him to a showdown. The result was that Elliot said they were both really good.
* Scrubs becomes one of these when he starts wearing a baby blue uniform. While he switches back to gray to regain his "fearitude", he's later shown wearing it off duty, and surrounded by birds again.
* Scrubs, before JD arrives to heroically stop the bikers from pummeling Turk. The part about the bikers getting angry is then subverted, as JD makes up for the knocked-over bikes by buying them cappuccinos.
* Scrubs behavior of the character. In many other instances the other actors would also improvise reaction lines and other moments.
* Scrubs between JD and Elliot in the first three seasons, which included them

sharing an office too small for separate desks. Dr. Cox and Jordan also had this set up for the first two seasons before reuniting.
* Scrubs. Bonus points because it's his inadequacy (in being a doctor) that makes him such a genius in the morgue at figuring out what killed patients.
* Scrubs boyfriend Keith upset with her because he wanted a committed stable relationship, and Elliot just wanted him for sex. Dr. Kelso treats their argument like an entertaining TV program: "It's like he's the chick and you're the dude!"
* Scrubs, but neurotypical people do not experience random, frequent, and vivid waking visions.
* Scrubs, but wasn't), the last image J.D. sees on the "Goodbye" sign is of him and Elliot kissing.
* Scrubs by Boston and the song becomes the soundtrack for the next few scenes.
* Scrubs by eating it himself. They both experience the effects of the laxative.
* Scrubs by JD to leave him alone. He gets around this by making a cardboard cut out and using it to set him up for various sexual harassment complaints.
* Scrubs can also be mentioned, in the first season that is: at first JD likes Elliot but it's not reciprocated; after they sleep together, she still likes him but he's moved on; on the third season it's done again: first he likes her again but she's with another guy, then she dumps such guy but JD's not interested any longer. Then, on fourth, she's with his brother and that annoys him and so on...
* Scrubs can feature quite a bit of this although sometimes they advise against it if it's not really helping, it can make you even more miserable.
* Scrubs Carla tries to use pantomime to remind Turk of a deceased patient's name as he fumbles to recall it in front of the patient's grieving family. Her strange head gestures lead Turk to confess, "We used to call him Ol' Turkey Neck." Bob's family weren't thrilled by this response.
* Scrubs character Doug. In season 8 he accidentally doesn't get invited to the Janitor's wedding, and the Janitor calls to apologize. Doug works in the morgue, so he has one of his assistants close him up in a morgue-drawer where he can sulk in peace. He seems to do stuff like this regularly, as he has mentioned taking a nap in the drawers before. However, this is his final appearance this season, and next season shifts mostly to a new cast of characters, so this is the last we ever see of Doug. Is he still in there?
* Scrubs comes in to the hospital because of a health scare on the news. After he coughs heavily they perform a chest x-ray and it is revealed he has lung cancer and dies within a few days.
* Scrubs, complete with pillow fight. When the fight (inevitably) begins to turn into something else, Eliot snaps him back to reality. On his return to the fantasy, they're saying "I'm glad we all finally experimented with each other...but I'll never do it again!"
* Scrubs could also qualify for this trope. Though a little surprise comes in "My Tuscaloosa Heart," wherein viewers find out Kelso loves his wife very much.
* Scrubs creator Bill Lawrence and other members of the staff had repeatedly stated that J.D. and Elliot would not end up together, and had written several episodes that showed what a terrible couple they were, that all they really want to do is have sex, and finally brought the relationship to its seemingly ultimate conclusion in the penultimate episode of the third season. Guess what happens in the eighth season. They may have just changed their minds later on, though.
* Scrubs: dancing, falling over, being mean to each other, being nice to each other, hugging, etc.
* Scrubs: Dani dates a boy named Danny briefly, confusing other characters into thinking she shouts her own name during sex.
* Scrubs deal with this happening to Dr. Cox. While the fall is temporary, the sight of the normally caustic and extremely confident physician in tears is very heartrending, to say the least.
* Scrubs, Doctor Cox awakes in the break room to find that his arch rival Doctor Kelso is sleeping with his head in Cox's lap. His response is a resigned "fair enough".
* Scrubs does tend to restrict departments to certain specific colors: medical

interns wear shades of light blue, surgical interns wear shades of green, and nurses wear shades of pink. More senior staff usually wear a white lab coat over their scrubs.
* Scrubs does this in Season 7's "Finale", where Dr. Cox is telling a Bedtime story to his son. Cox, as a brave knight, says to a monster (in reality an illness affecting a patient):
* Scrubs Doug is the worst intern ever, in fact he is so bad he makes the perfect coroner because he knows all the ways that a Doctor can screw up and kill someone.
* Scrubs, Dr. Cox comes in to find his ex-wife Jordan chatting to his new girlfriend. He greets them with "Well, isn't this horrible."
* Scrubs, Dr. Cox invokes this trope after Dr. Kelso gives an all-too-graphic description of his and Mrs. Kelso's recent sexual encounter.
* Scrubs, Dr. Cox likes to incorporate actual points inside long funny rants.
* Scrubs: Dr. Cox loves Jordan because she's one of the only people who can stand up to him. Jordan loves Dr. Cox because he's one of the only people who can stand up to her.
* Scrubs. Dr. Cox said this word-for-word to Turk in the episode "My Student" when he drops his pants.
* Scrubs: Dr. Cox started sleeping with his ex-wife Jordan, who is one of the few people with a strong enough personality to keep up with him. After about a season and a half of this just loathing himself and sabotaging any attempt at a new relationship, they get back together officially when Jordan becomes pregnant and remain together officially unmarried the rest of the series.
* Scrubs dresses up with a white sheet and roller skates around the pediatric ward to scare the kids. He does this to discourage the kids from making messes that he would have to clean up. He specifically states that he added the roller blades to make the ghost more "glide-y."
* Scrubs: Dr. Kelso apparently has a "head like a mountain goat", as evidenced by an occasion where the Janitor hit him over the head with his mop and it "only made him mad".
* Scrubs Dr. Kelso pretends to be part of the painted mural outside the hospital. Dr. Cox has to physically touch his arm to convince him to give up the act.
* Scrubs. Dr. Kevin Casey, played by Michael J. Fox, walks in dramatically and looks like he's about to give a one-liner... then stops, turns around, and comes back again. Then he stops, turns around, and comes back again, and J.D. reflects on his obsessive-compulsive disorder. Once he's made his entrance to his satisfaction, in lieu of a proper one-liner, he makes some comment about the crazy-strict rules he gave himself about entering the hospital.
* Scrubs Drs. Cox and Kelso have ever agreed on is that people are "bastard-coated bastards with bastard filling".
* Scrubs due to budget cuts; every member of the main cast is out of focus for at least one episode.
* Scrubs during the final (well technically there's another season, but in truth it's really more of a spin off setting/content-wise) season, one that is clean and without any drama mucking it up (aside from one bit of drama that arbitrarily arises during the two-part episode).
* Scrubs early in the series. When he's about to kiss Elliot, he imagines two likely consequences: either she reciprocates, leading to a steamy romance, eventual marriage, and a threesome with another girl, or she takes it the wrong way and slaps him, he's thrown out the hospital on his ass for sexual harassment, and he ends up wearing a filthy scrub holding a sign saying he'll diagnose for food.
* Scrubs, Eliot often tries to cheer people up by remembering one of her relatives being in a similar situation. These stories all end with the relative committing suicide.
* Scrubs Eliot overhears Dr Kelso talking about his enforced retirement on his cellphone. She later learns that the bathroom doesn't have cellphone reception - this was his way of asking her for help.
* Scrubs Elliot and JD have been on-and-off-again so often that even by the third season other characters treat it as a mundane occurrence.

* Scrubs, Elliot gets annoyed when fellow doctor Veronica shows up to work every day in the same dress she does. When Elliot gets her dress dirty and has to change clothes, Veronica also changes into the same clothes Elliot has on.
* Scrubs: Elliot is a self-confessed drama queen. There's also an episode titled "My Drama Queen" dedicated to J.D.'s new girlfriend.
* Scrubs. Elliot is "Barbie", J.D. is "Newbie" or "random feminine name", Turk is "Gandhi" or "Turtlehead"/"Turtleneck" and Kelso is "Bob/Bobbo/Beelzebob/Bobcat".
* Scrubs: Elliot is unable to perform a tracheal intubation, an easy medical procedure she learned in her first week as an intern.
* Scrubs, Elliot meets a guy named Sean, but her attempts to strike a conversation up with him end with them talking about poo. "At one point I tried changing the subject to art. But we went from art to artists, to alcohol, to coffee... and that just led right back to poo!"
* Scrubs: Elliot's boyfriend, Jake, who existed only for Elliot to pine over him and be her perfect match for a few episodes. In the transition from Season 4 to 5, he abruptly disappears.
* Scrubs: Elliot trips over and hurts herself a lot, especially from Season 2 onwards. She's the main one besides J.D. that is involved in the physical comedy.
* Scrubs, Elliot was in a crabby mood and tossed her drink on the ground right in front of Janitor, sarcastically saying "oops" as she walked past.
* Scrubs ended at least) completely devoid of laugh-tracks or any similar substitutes.
* Scrubs ended badly and for a while they had a "superficial friendship", being generally friendly but not nearly as close as they once were. They became roommates, which brought them a lot closer.
* Scrubs ends with J.D. imagining one possible future for the group, complete with marriages, kids, and Christmases spent together.
* Scrubs episode, a patient's wife is approaching Turk and Elliot in the cafeteria. Turk declares the first one to chug their Slushie is off the hook, and proceeds to give himself brain freeze.
* Scrubs episode, Cox meets a doctor who likes to collect dolls. Did I say dolls? It's a collectible!
* Scrubs episode "My Best Laid Plans", Dr Cox learns the Janitor has a crush on Eliot, and bets his Porche against the Janitor's van that it'll never happen. The usual plot is subverted when the Janitor simply explains the situation to Eliot and she jumps at the chance to annoy Dr Cox ... and then inverted when the Janitor falsely claims Cox wants to see them on an actual date before he pays up.
* Scrubs, episode "My Brother, Where Art Thou?" (03x05) J.D. asks Dr. Cox for a favor. Reply is:
* Scrubs episode "My First Kill", J.D. is trying to tell Dr Cox why a patient isn't being treated, without admitting he just chickened out.
* Scrubs episode "My Friend With Money", JD and Turk are reminiscing about a college friend who died from alcohol poisoning and pour some of their coffee out in his memory.
* Scrubs episode "My House", Dr. Kelso was mad at Dr. Elliot Reid for becoming a private practice doctor and "leaving for greener pastures". He then spends the whole episode ignoring her, one incident involved him saying hello to every nurse, doctor and intern except for her. He also refused to tell her which radiographer was on call.
* Scrubs episode "My Jerks," the Janitor is revealed to have made a key that works on everything. Said key is confiscated by Dr. Maddox.
* Scrubs episode "My Jiggly Ball" gave us "jigglyball", which was actually a hoax designed by the Janitor to maneuver J.D. into a position where the entire hospital got to throw tennis balls at him.
* Scrubs episode "My Lucky Charm", J.D. and Turk play Go Fish in a bar when told to go out and start living life.
* Scrubs episode "My New Role" had Eliot talking to a group of nurses who've frozen Carla out because she hangs out with the doctors so much.
* Scrubs episode "My New Suit", Dr. Cox and Dr. Kelso have a brief moment of

camaraderie, and then Kelso hates Cox more than ever. Dr. Cox can't understand what happened.
* Scrubs episode, "My Nightingale" Dr. Cox realizes he likes his ex-wife again when he catches himself watching her sleep.
* Scrubs episode "My Road to Nowhere" when several characters go on a road trip:
* Scrubs episode "My Screw Up", Dr. Cox spends the second half of the episode being absolutely furious with JD after one of his patients died. It's revealed at the end that the patient who died was not the elderly man JD was seen treating earlier, it was Dr. Cox's brother-in-law and best friend Ben. Several hints are dropped during the second half of the episode, such as Dr. Cox being the only one who interacts with Ben and Ben not carrying around his camera (earlier in the episode he said he would carry it around till the day he died).
* Scrubs episode, Ted is on the roof trying to work up the courage to jump, and then Dr Kelos startles him and he falls. He lands in the huge pile of garbage that the Janitor said he could get rid of, but has apparently just been piling up at the back of the hospital.
* Scrubs episode where Dr. Cox is yelling at Elliot (that narrows it down a bunch...) and begs to "Aiisha", even though it's very, VERY obvious for anyone watching his mouth that he's saying "Allah".
* Scrubs explaining why Dr Cox and Jordan don't go on couple dates any more shows Creepy Swinger Doctor and his wife slipping them both roofies, and announcing "It's party time!" when they're unconscious.
* Scrubs featured a one-line joke about a doctor who always asks his patients to remove their pants, regardless of their complaint. Another episode focused on Elliot's complete lack of bedside manner, including giving J.D. a physical which he compares to "when my older brother used to beat the crap out of me".
* Scrubs features a daydream sequence with Turk reading the following poem:
* Scrubs features a patient who took Viagra and his penis won't go down. The rest of the staff find this hilarious but Elliott insists on remaining professional. However, when she hears the full story — he took them just before breakfast with his girlfriend's family and erection ended up damaging her grandmother's breathing apparatus — she bursts out laughing in front of him.
* Scrubs female) mentions they're looking for something, he'll pop up and say "I got your [object sought for] right here!" and motion to his crotch. He'll also explain his references from time to time.
* Scrubs. Frequently complains about it, but in all honesty, "it's like crack" to her. She's older and definitely more experienced than the rest of the main cast.
* Scrubs frequently has an establishing shot, the shot for the apartment building where the main characters live is only seen a few times in the very first episodes, and then very rarely afterward.
* Scrubs gang enters the lottery, they imagine what they'd do with millions of dollars. This provides a few opportunities for other characters to do JD's "imagine for a bit, oblivious to the world, then come back with a bizarre statement" thing. Dr. Cox imagines putting Jordan into a box. "I gotta call my glass guy."
* Scrubs going to get in her pants, and then jump them like an animal (which usually takes about a month).
* Scrubs grew a beard). Not only did JD dial down his girliness and regain some of his early charms, but it also featured fresh plotlines and episodes that were both hilarious and emotionally stimulating, as well as a spectacular series finale.
* Scrubs had a musical episode too. Not all the cast were good singers (hence why Chalke wasn't a part of the brief musical number they had in season 2), but some were and the rest gamely did their best toward an enthusiastic and entertaining performance overall.
* Scrubs had a parody on one of these, after JD thinks of a silly sitcom about the Janitor and Ted adopting a kid, called "Legal Custodians." The next time JD brings it up, a Bug for it appears at the bottom of the screen.
* Scrubs had Elliot Reid with dark blonde hair in the first two seasons, but the network then demanded a sexier female character to draw in male viewers. So the first episode of Season 3 has Elliot giving herself a makeover involving a shorter

platinum blonde haircut. While the makeover was toned down by the end of the season, Sarah Chalke remained that lighter shade of blonde for the rest of the series.
* Scrubs had episodes with blackface removed from Hulu and Netflix, but are still available for digital download.
* Scrubs had geography as one of J.D.'s weaknesses. He claimed New Zealand was close to "Old Zealand" and pointed out China on the Janitor's globe when he was looking for Iraq.
* Scrubs had JD and Carla drunkenly kiss after JD spent the night trying to convince her to forgive Turk. They both say this immediately after and maintain it after telling Turk about the incident. In this case it really didn't mean anything, but finally made Carla realize how easy it can be to make a small mistake, giving her the impetus to forgive Turk for his.
* Scrubs had J.D. joining Dr Cox and Dr Kelso for their regular golf game. This led to a sequence of scenes in which Cox and Kelso debated medical ethics through J.D., apparently unconcerned that he was trying to play balls that had landed in increasingly ridiculous positions.
* Scrubs had one moment where The Janitor accuses J.D. of taking 'it' after J.D. asked if he had lost something. As J.D. continues to deny taking anything, The Janitor tells him he'll leave his cart unattended and if 'it' should reappear on the cart, no further questions will be asked. J.D. tells him he doesn't even know what 'it' is, to which The Janitor replies, "Then why take it?"
* Scrubs had the great feature of JD and Turk's College Brochure. Turk is photoshopped in twice to make it appear more diverse. Lampshaded in the episode "My Long Goodbye" when Turk struggles to think of other black members of staff. He gets himself and Nurse Roberts (whom he is speaking to), Snoop Dog Attending, and Leonard the Security Guard...
* Scrubs had The Todd ask Carla's brother Marco to teach him a pick-up line in Spanish. Marco tells him to say "Yo tengo herpes genital, para ti."
* Scrubs had Turk save someone's life this way. Dr. Cox tries to provoke him by taking the credit for it.
* Scrubs has a lot of spanking going on. JD spanking Turk. Turk spanking JD. Turk spanking Elliot. Elliot spanking JD. Neena spanking JD so hard, and for so long, that he can't sit down. Various characters spanking themselves. You name it.
* Scrubs has a moment where JD is talking about Elliot's tendency to put her foot in her mouth when talking to people. One example is her turning to a woman sitting down and asking when her baby was due, to which the woman indignantly replies "What baby?"
* Scrubs has an extensive collection of stuffed animals, and likes to make additions whenever some small and furry creature crosses his path. They all have names as well, and he likes to play with them.
* Scrubs has an infant daughter but already plans to be this. He claims he won't tell his daughter that she has a vagina until she's 18. On the other hand, he's eager to get Izzie married to JD's son Sam.
* Scrubs has Dr Cox put an arrow on a hung over Jordon's head. She doesn't notice even while Cox draws attention to it.
* Scrubs has "fingers like biceps", and can force a nearly-closed elevator door back open with her pinky finger. J.D. thinks, "Oh no! Elliot has the pinky-strength of a rock-climbing jazz pianist!" She is also shown to have absurdly strong thighs, to the point that she can break lunch trays with them.
* Scrubs has played with this occasionally with Turk and J.D.: "You'd make a pretty girl."
* Scrubs has said Braff is probably the best director in the crew for large-scale shoots, which is why the more unusual episodes often go to him.
* Scrubs has Turk and Carla chasing each other around the hospital, attempting to meet for a pre-arranged kiss.
* Scrubs has Turk propose to Carla (who dislikes public displays of affection) by standing on a car in the middle of the city, demanding that the other drivers "honk in the name of love". In a later episode, Keith proposes to Elliot in a normal

way... but then Elliot throws a fit because the ring doesn't fit, taking back her "yes" as she wants the moment to be perfect.
* Scrubs have, on occasion, been put on a rollercoaster of emotional torment and soul-searching (by their patients or otherwise) anyway.
* Scrubs have some odd hobbies, like playing "Finger or Toe" in which one of them closes their eyes, the other sticks a finger or toe under their nose, and the first must guess which it is. They also considered switching chairs at their apartment at set intervals to be a major event.
* Scrubs. He calls them out for complaining all the time about how crappy their relationships are and tells them they are lucky because he himself feels very alone because he is the only single one in his group.
* Scrubs how absurd it is to Turk, who thinks Marco only speaks Spanish.
* Scrubs: In an early episode, Dr. Kelso unloads a difficult patient on Elliot after she pisses him off. The patient in question is an elderly man who has a habit of disrobing for no reason. The first time he does this in front of Elliot, she nervously makes an excuse to leave the room:
* Scrubs: In her first appearance, Jordan was assigned to JD as a patient. Because she was a member of the hospital board, she largely ignored him and even planned to leave before he cleared her to go. This caused JD to snap at her and demand she follow his orders. Jordan becomes turned on by this and had sex with him.
* Scrubs: In "My Extra Mile", Carla elbows the Janitor to keep him from revealing to Dr. Kelso that they lost a patient. After Kelso leaves, Carla rubs her elbow due to the Janitor wearing a cup. The Janitor says that people often do try to him in the crotch.
* Scrubs in "My Soul on Fire, Part 2" where the Janitor punishes J.D. for convincing everyone to come to his wedding on such short notice by keeping him at the top of a lighthouse for ten minutes...
* Scrubs: In "My Student", Elliot orders a med student to shave a patient's pubes. The med student tries to fight it, but Elliot threatens him with more stuff. The med student shortly instructs the patient to "think about baseball".
* Scrubs) in season 8 "My Soul on Fire: Part 1" and "My Soul on Fire: Part 2". He marries the Janitor and Lady with the line "It is now time to join these two, as only the creator can."
* Scrubs intern", (roughly 4'10") who is infamous around the hospital for having an impossibly high-pitched voice.
* Scrubs interrupts, "Ladies! Please! Stop!"... then pulls up a chair, sits down and says "Continue."
* Scrubs. In the course of an episode he goes from dateless, to having a girlfriend and back, while a random woman in a bar follows this to a tee.
* Scrubs: In the season three episode "My Tormented Mentor," when Cox and Kelso fight over Dr. Miller, they are shown tearing off her arms and beating one another with them. She looks unimpressed as blood pumps from the stumps.
* Scrubs inversion: While Turk is insisting there's nothing wrong with him, Molly asks him to diagnose one of her patients, listing the same symptoms he's been displaying. Turk instantly realises the "patient" has diabetes.
* Scrubs involves him playing baseball with his "father figure" Dr. Cox.
* Scrubs involves the various cast members seeking promotions and jumping through bureaucratic hoops in order to get them. In the case of Dr. Cox, he proved to be very talented in the small leadership positions he took on, but found himself completely overwhelmed when he reached Chief of Medicine because it required a lot more paperwork and less time with patients. It took him a couple of episodes to find his own rhythm. With both J.D. and Turk, it's a plot point at several times that they are not the most skilled in their specific field (internal medicine and surgery) but had a natural gift in leadership positions. This is in contrast to Elliot, who is extremely gifted with general practice but far too neurotic to be in charge of others.
* Scrubs in which the four main characters were depressed, a raincloud appeared over their table in the cafeteria.
* Scrubs in which your choices of lines of speech can dramatically alter your first

day at the hospital.
* Scrubs is a comedy drama set in a hospital full of cutaway scenes and exaggerated character stereotypes.
* Scrubs) is an affable old doctor who is well loved by everyone, including Kelso (who hates everybody). But during the episode, he prescribes an "old school" procedure which goes disastrously wrong. Kelso confronts him about why he didn't prescribe a newer procedure, and Townshend admits he didn't know about it because he is too tired to keep up with medical advances, and is depending on his decades old knowledge. Kelso is forced to fire him.
* Scrubs is an attempt to do Scrubs without JD, Carla, The Janitor or Elliot.
* Scrubs is being locked in a morgue drawer. After this, he disappears and no mention is made of it.
* Scrubs, is dedicated to the late John Ritter, who played J.D.'s father on the show.
* Scrubs is fond of reeling off long, fast lists of — for example — "things that he cares more about than the fact that it's J.D.'s last day as an intern", normally involving at least one insult to Hugh Jackman. Subverted in the season 6 finale — he's barely started his rant when Dr. Kelso interrupts with "Funny, long list. We get it. You need a new thing, big guy."
* Scrubs is known across Sacred Heart and beyond for his high fives and constant sexual innuendo. When finally asked by the Janitor how many times he had sex recently the answer was a shame-filled "Bagel."
* Scrubs is like this. When attempting to tell a joke about why a man who thinks he's a moth went to the dentist's (the light was on) he ends up improvising a whole pointless conversation between the man and the dentist to stall for time while he tries to remember the punch line.
* Scrubs isn't happy about how long the hospital orderlies took to bring in a cadaver.
* Scrubs is overflowing with bromance between Turk and JD, up to and including a duet between the two called "Guy Love" in the musical episode in season 6.
* Scrubs is posing as a younger woman to impress her new gynecologist, she sports pigtails.
* Scrubs is quite fond of pranks, some requiring more planning than others.
* Scrubs is the day you can look for me up on the roof singing 'I Believe I Can Fly'."
* Scrubs is the difficulty of looking good while working at a hospital;
* Scrubs is the epitome of this trope. It's taken into overdrive in the presence of Neena Broderick though, to the extent that when Ted puts his hand on the edge of a table, it slips due to the sweat and he slams his head into the table, knocking him out.
* Scrubs is Turk (Black) and Carla's (Hispanic) relationship which is considered interracial, but in certain episodes it's pointed out they are technically both Black (Carla is Dominican, thus Black Hispanic).
* Scrubs. It was a long time coming, and Dr. Kelso was being more of a jerk than usual, even singling out one of the residents to bully.
* Scrubs. It was torture. In the final season, the writers finally decided not to play games with the pairing anymore, hooked them up, and gave them only minor drama.
* Scrubs: J.D. accidentally destroys a parked car with a monster truck — he puts this down to the fact that "It's been a while since I drove shift!"
* Scrubs, J.D. and Dr. Cox have a very reserved, patrician patient who sends his wife out of the room for the dirty talk. He confirms, when J.D. asks, that he and his wife are, in fact, WASPs. This makes his passionate declaration that when he makes love to his wife, he's closer to her than any other time and only then can he truly express his love for her all the more effective.
* Scrubs, JD and Turk pretend not to know each other for a few weeks due to an embarrassing memory that they unwittingly brought up. It was done as a gag though and they're seen talking to each other again a few scenes later.
* Scrubs: J.D. and Turk try to hook up their children with each other even when

they are still infants, mostly so the two fathers could spend more time together as soon as possible. The finale of the eighth season has J.D. visioning his son affiancing with Turk's daughter.
* Scrubs: J.D., Cox, Jordan and Jordan's sister Dani get stuck at the top of a Ferris Wheel for an hour.
* Scrubs, JD, experiences daydreams that cause him to go on three-part wiki walks. The trigger comment, the daydream, and his verbal response. Amusingly lampshaded in later seasons, where they show the trigger comment but the camera stays "in the real world", where JD's friends comment on how he's about to snap out of it with a completely off-the-wall comment. He doesn't disappoint.
* Scrubs: JD gets a little short with Ted when the latter interrupts him with some very unimportant news as JD is urgently trying to fix a patient's ruptured surgical stitches.
* Scrubs, J.D. had to deal with an element of this, when he couldn't get some of the ugly scenes from work out of his head and looking at any part of his would-be girlfriend ended up making him think of some scene involving that part of the body (throat cancer when he looked at her neck, etc). He was able to move past it with some "help" from Drs. Cox and Turk.
* Scrubs, J.D. is seen in a fantasy with an incomplete phrase in a game of hangman that reads, "Your _sswipe boyfriend h_s Gonorrhe_"
* Scrubs, JD notices that Dr. Kelso is sporting a rather flashy earring. In a flashback, we see that Enid has found the earring and accused him of adultery, and Kelso proves that the earring is his by giving himself a very bloody impromptu piercing with the earring.
* Scrubs. J.D. spanking Turk. Turk spanking J.D. Turk spanking Elliot. Elliot spanking J.D. Various characters spanking themselves. You name it. In fact, the only main character who hasn't been a spanker or a spankee is The Janitor.
* Scrubs, JD tries to get rid of Todd by doing the old "invisible tennis ball throw" that anyone with a dog will be familiar with. Todd falls for it, but somehow returns with a real tennis ball.
* Scrubs. J.D was meant to meet his girlfriend at a restaurant, but was on a roll at the hospital and either forgot about it, or put his job first (he claimed to have forgotten, but Dr. Cox pointed out he was continually checking his watch). His girlfriend was not happy.
* Scrubs, J.D. witnesses Dr. Cox getting humiliated by Jordan and decides to make a quick exit, saying "Anger like this has a way of being passed on to whoever's closest." As soon as he's out of the room, Carla comes in to ask for Cox's help. He angrily snaps at her, she gets angry and snaps at Turk, and so on. Ironically, the chain eventually reaches J.D. anyway.
* Scrubs job to kiss his father's ass and that she should go out and kick his ass, she does so.
* Scrubs, Keith is sent to tell a patient his condition is incurable and fatal. He reports to JD that he told the patient there was nothing they could do right now, but they'd try to make him comfortable. JD tells him to get back in there and use some form of the word "dead".
* Scrubs: Kelso uses this a lot. To give one example: "I was one of the most promising young shortstops ever to come out of Altoona Pennsylvania. Then came the Dominicans. Long story short...calling them all 'Pepe' was apparently just racist enough to get me a life-long ban from the Appalachian Rookie League."
* Scrubs, Kelso was ready to throw a patient (who happens to be Dr Cox's mentor) out of the hospital just before he nearly died, and then takes credit for saving his life. Cox puts a sign on Kelso's back saying "Never stop kicking me". The patient removes it ... and discovers it's on the back of the discharge form.
* Scrubs kept getting larger and larger as time went on, to the point where they consistently ended up as long as any of the other acts of the show.
* Scrubs. Later, as each is talking about what went wrong to their respective friends, it's revealed that Turk was fine, but Carla couldn't have an orgasm. They work it out by talking about the anxiety she was feeling about them having become more serious and all the things that could wrong now that they were getting closer

instead of just having fun together
* Scrubs, Laverne is annoyed when Colin Farrell's character is ousted from the hospital:
* Scrubs' many fantasy sequences. Carla is asked what she would do if she won the lottery, and she imagines Turk being pregnant instead of her.
* Scrubs, mostly with all the pathologists and coroners constantly eating lollipops.
* Scrubs "My Blind Date" has Elliot pulling one bad pun after another in the hope of impressing Dr. Cox.
* Scrubs narrates his own life in his head, as well as the lives of nearly everyone he has regular contact with, so he is essentially the narrator of the show. Lucy Bennett takes over this role in the last season.
* Scrubs' nearby because it has a dental plan. They return to the hospital after Dr. Kelso agrees to give them a dental plan there.
* Scrubs occasionally mocked this with Turk's history, including the time he got 3rd place in the science fair without entering, and how he was photoshopped multiple times in his college brochure to make it more diverse. Then he's put as the face for an outreach project for the hospital. He even addresses this trope directly and how much he dislikes it. If the hospital wanted to portray him as a role model for being just a good medic, fine, but being singled out as the token annoyed him.
* Scrubs of Cox literally breathing fire at him, giving him one of these.
* Scrubs of one episode shows JD and Turk dramatically running in semi-slow-mo to dramatic music — they're practicing their slow-motion running. Another involves JD's voiceover proclaiming an incident to be one of the biggest emergencies of his life as he plows through a crowd in a panic to get to a patient's room — where Dr. Cox's young son is getting two stitches in his forehead after falling off the jungle gym.
* Scrubs one of these. (Although it was a non sequitur, it wasn't a cutaway.)
* Scrubs overlord of the land. He has a cowed, hunchbacked assistant (Ted) and punishes all those who enter his forbidden forest.
* Scrubs page quote. JD insists that they sleep head to toe. Turk claims it doesn't matter, as their genitals still line up, but JD says it makes it impossible for them to accidentally "lock in".
* Scrubs: Played with when the brain trust decides to make sure Keith is a suitable husband for Elliot.
* Scrubs probably worked harder than any sitcom in history to sell itself on this basis, not just with regard to J.D.'s constant and consistently insane day dreams, but also the whole rest of the whack-a-do cast and the off-the-wall absurdism of the entire world as it exists in and around Sacred Heart.
* Scrubs, raises their hands (J.D. does so behind his then-girlfriends back).
* Scrubs reference in which they take on the roles of Tony and Maria and parody "Tonight".
* Scrubs, requiring him to reapply it seconds after he applied it the first time. Later in the episode, he gets persuaded to go into the sun unprotected and he gets a sunburn in the time it takes to step out of the shade and turn around.
* Scrubs: Sacred Heart Hospital apparently has no policy whatsoever on this matter. Several people from their medical staff date each other and have steady relationships.
* Scrubs, Sam Dorian, was main character J.D.'s father. The reason given for his death was a massive heart attack.
* Scrubs secret spy decoder ring prizes, he gives one to Turk and they both claim it's the best day of their lives (even above Turk proposing to Carla).
* Scrubs. She can't go if someone speaks to her, or if they can hear her.
* Scrubs. She's introduced as a perfect match for JD, equally as quirky and fun-loving - while also encouraging him to do things like buying a half-acre of land. But they end up breaking up because she's not ready for a serious relationship.
* Scrubs side, admonishing J.D. for being rightfully spiteful. Needless to say, this was when a lot of fans abandoned the series.

* Scrubs. Significant in that both are the only minority characters in the main cast. It's a lot more... blatant... in the first episode, where Turk hits on Carla (and only Carla) the moment they meet.
* Scrubs so his "DOC" tattoo is visible and Doug Murphey is seen with a red fannypack.
* Scrubs ... so she tells them she's keeping the secret that Eliot smokes a pipe.
* Scrubs spends a lot of time abusing each other verbally and physically, usually but not always sparing their boss. Dr. Cox even punched Dr. Kelso, Chief of Medicine, in the face once.
* Scrubs's series finale ends this way, although all of what JD sees for this trope are only possibilities and do not actually happen because they are a giant montage video playing in front of him. (If you count the ninth/spinoff season, JD and Elliot did indeed have a baby.)
* Scrubs stems from his relationship with his mother (they made out once).
* Scrubs: "Sticks and stones will break my bones... but words will hurt forever."
* Scrubs, such as J.D. reliving the first season's finale in his dream and Turk's Dating Game dream (which, hinted at by Carla, is a recurring one).
* Scrubs Ted is distraught to find out he's now at the end of both lines.
* Scrubs than to his father commenting about sexy girls walking by in the park. So he wasn't always that way.
* Scrubs that Dr. Kelso comes into the room and lifts up the patient's bedspread to kiss her butt.
* Scrubs that Elliot starting dating, though he only asked her out once he was discharged and didn't have any significant health problems.
* Scrubs That episode also cameoed Matthew's cousin Anthony as "Old Murray".
* Scrubs that the number has since been reassigned to a private cell phone.
* Scrubs, the conflicts are with a disease or simply medical bureaucracy rather than with another character.
* Scrubs: The engagement ring Turk planned on proposing to Carla with was first dumped down the waste disposal and then eaten by one of his patients. In a later episode, after Carla "finds out" what happened to the ring, Turk puts it in his mouth to prove how clean it is... with predictable results.
* Scrubs. The first one, in particular, makes good use of overhead shots.
* Scrubs, the hospital gains and loses aisles right as the plot demands.
* Scrubs (the Janitor's father) who sprang from the same cookie-cutter as most of his other roles.
* Scrubs, the Janitor tells J.D. that he is incredibly predictable, to which J.D. objects:
* Scrubs, the Janitor, who is more than he appears to be, predicts that terrorist in hiding, Osama bin Laden will be found in Pakistan. Four years later, in 2011, US Navy Seals killed bin Laden while he was hiding in a safe house with his wives in Pakistan.
* Scrubs: The medical doctors wear blue scrubs and the surgeons wear green. Nurses most often wear pink or purple and orderlies are in maroon.
* Scrubs. Then there was that time Turk got schooled on black culture by the two whitest chicks in the hospital.
* Scrubs There's also a short gag in the last season involving a revolver...
* Scrubs. There was also an episode that homaged the standard sitcom format, titled "My Life in Four Cameras".
* Scrubs. The song was featured in a few scenes ("My Journey"), since JD insisted that Turk and Carla should have a Journey cover band at their wedding.
* Scrubs, the son of Perry Cox and Jordan Sullivan, Jack Cox, is one of these. No matter what happens to him (including being painted green and then cleaned up), he is smiling broadly and seems delighted with what is going on.
* Scrubs. The version of "Superman" used as the theme is faster and in a different key than the original version.
* Scrubs They eventually patch things up after Cox tells Jordan she's just like her mother, and they agree not to fight in front of Jack... but can do it all they want when he's not around. By the final season, Cox tells Jordan that he's tired of

pretending like they don't like each other because "news flash: we do!" To which Jordan responds by gasping and saying, "Take that back!"
* Scrubs. They often featured somewhat elaborate special effects. For instance, in an early episode, JD imagines that his head blows up in a scene that would be more appropriate in a horror film. It was a comedy/medical drama.
* Scrubs They try to break her spirit by being mean to her, though when she fakes being upset they feel bad about it and prove to her that what she said about people being good on the inside was right.
* Scrubs ("Think horses, not zebras"). JD, however, turns out to be right. Apart from this instance, however, the trope is usually averted.
* Scrubs, this trope is slightly modified by contrasting the Janitor's inner monologue with JD's inner monologue.
* Scrubs to escape a hospital quarantine lock-down. She even, for the first and last time in the series, wears a fedora to grab.
* Scrubs, Turk and Carla's planned big wedding fails to materialise when Turk gets held up in surgery and then goes to the wrong church. They still have the reception, but only get actually married at the hospital later that day when Turk goes back to check on his patient (who reveals he is a priest).
* Scrubs, Turk gets his hand caught in a vending machine not once but twice. The second time is when he's getting ice chips for his wife when she starts giving birth, and it almost causes him to miss his daughter being born. The first time is because of...a less pressing issue.
* Scrubs Turk is given one job: Get ice chips. When the ice machine won't co-operate, he gets his hand jammed in it. In an earlier episode, a similar incident happens when the hospital vending machine cheats him out of some Rolos.
* Scrubs. Turk is keeping his boxers in the freezer and JD's brother warns him to make sure he is completely dry "down there" before putting them on or he could end up with "a tongue on the flagpole situation".
* Scrubs Turk messes up in surgery and now a concert pianist no longer has full use of his fingers, basically ruining his life.
* Scrubs, Turk's internal monologue includes the fact that the hot girl who's seated at the main table at their wedding isn't really his cousin. Carla immediately tells him that the girl's being reseated. Turk then decides to experiment:
* Scrubs - until Turk accidentally sits on the remote afterwards and the tape starts playing again. Carla figures out that whole collective performance was a lie, and grills him for it.
* Scrubs uses this regularly as well. JD often sees his friends solve their problem of the week and realizes this can be applied to his own situation.
* Scrubs usually played death for drama, even if some of the medical humor got pretty dark. The one exception, a conversation between Dr. Kelso and Dr. Reid about a psychiatrist not showing up to a lecture on fear of public speaking:
* Scrubs wanted to end the series several times, but was forced to keep going. In its 9th season, with most of the original cast leaving and the setting moved to a new location, he tried to change the name to separate it from the previous eight seasons but wasn't allowed to. It was finally canceled after said season.
* Scrubs was a C student in high school, but managed to get into medical school and eventually makes head surgeon. This is to some extent true to life; it is often far easier to focus on academics when one has a clear direction, goal, and interest. He notes himself that his college marks picked up soon after he decided where he wanted to go with his studies.
* Scrubs was shot in one of these in Los Angeles. The cast and crew said they weren't bothered by this; in fact, Zach Braff would often duck into an empty room to catch a nap during long filming sessions.
* Scrubs, were it not for his talents in medicine, would probably eke out a living on this. His fondness for delivering long, sarcastic and often highly colorful rants to punish slip-ups - like, oh, asking for advice or leaning on a wall - is something for which he's a little bit legendary.
* Scrubs. When asked her 10 favorite positions, after the two she knew, she just

started naming insects. Apparently "the stinkbug" is quite popular.
* Scrubs when at the end of one season, a girl in a bathtub crashes through J.D.'s ceiling. Unfortunately her towel-clad boyfriend falls through the ceiling a moment later and doesn't appreciate J.D. eying his woman.
* Scrubs. When he temporarily drops it, the staff is torn apart by bickering and it nearly costs a patient his life. Likewise, it is shown that his lack of emotional attachment towards patients is entirely because of the hard decisions he has to make as the Hospital's Chief. They nevertheless affect him, but he simply doesn't show it.
* Scrubs: When J.D. and Elliot are interrupted in the act of leaning in for their first kiss, J.D. tells himself he has 48 hours to get the kiss or be relegated to the Friend Zone. When he fails, the Friend Zone is parodied as an actual room of the hospital filled with all the guys (and one girl) who wound up in Elliot's Friend Zone over the years — some of whom are still hoping she'll come around.
* Scrubs when J.D and Kim's offscreen inability to obtain a condom resulted in the pregnancy storyline that drove the sixth season.
* Scrubs, when J.D. asked the gift shop person if this applied to her, and then she said no.
* Scrubs when JD attempts to assert authority when dealing with his interns by screaming at Lonnie the intern at the end of a pep talk, only to be terrified by the responding scream from his intern. His interns losing respect for him even averts the trope later in the episode.
* Scrubs when JD attempts to escape the hospital so he can go home and have his day off. It goes alright, until he begins talking to the person who wheeled him into the elevator, who panics and hits him with a fire extinguisher.
* Scrubs. When J.D. is assigned to treat an influential member of the hospital board, he thinks that it's going to be a grumpy, unpleasant, elderly man. His narration abruptly changes when he discovers the board member is actually a highly attractive late-30s woman.
* Scrubs. When JD points out to him that he'd never do that, the patient responds "Come on, JD, you know this isn't real." At that point, JD is instantly snapped out of his episode-long fantasy.
* Scrubs, when JD's brother gets mad at him, he likes to pretend to be a person he likes to call "The Constant Questioner"
* Scrubs when JD's girlfriend gets pregnant, they discuss the situation and JD is opposed to adoption because he fears this trope may occur if they have a daughter.
* Scrubs when J.D. tries to come up with a clever insult before the elevator closes. He ends up with, "Hey Dr. Cox. Why don't you just... you're the kinda guy that... aaw."
* Scrubs: When Kelso decides he no longer wants to spend time with patients, he has Ted go room to room with a pre-recorded tape of him. Every time Ted leaves the room, the tape yells at him not to forget the tape. Ted wonders how the tape always knows.
* Scrubs when she tries to dodge Kelso after accidentally revealing his age.
* Scrubs when showing how a little bit of confidence is not necessarily a bad thing and goes a long way towards making their patients feeling at ease.
* Scrubs when they meet a patient who just got plastic surgery after a car accident and wants to go back to the way she looked before
* Scrubs, where Fox played a surgeon with OCD; a psychological rather than physical condition, but one that could result in the same visible symptoms.
* Scrubs where JD and Turk keep trying to do this as a joke with their stuffed dog.
* Scrubs where JD goes swimming; for a few seconds the camera focuses on the scantily-clad women on the beach.
* Scrubs, where J.D. imagines what the acerbic Doctor Cox would be like in Group therapy. After the imaginary Cox beans a fellow person with a chair he decides, "I don't think he'd do well in group."
* Scrubs where JD talks about the "Pain Chart", noting that gender can affect the perception of pain. Cut to a woman giving birth and her husband whining about how

he just bit his finger out of nervosity.
* Scrubs where she thinks of making a robot as her dream husband. She also happens to make him Jewish (revealed by breaking a glass at their imagined wedding ceremony) - while she is blonde and blue-eyed. Immediately after snapping out of the fantasy she bemoans that's really going to piss of her WASP-y parents.
* Scrubs where the Janitor pretends to have a twin brother. He fools no one.
* Scrubs where the sign for SACRED HEART HOSPITAL is amended to SACRED FART.
* Scrubs where Turk buys an off-brand pregnancy test that takes longer than the name brand. This leads to a whole story where Turk knows about his wife's pregnancy before she does.
* Scrubs. Which he and Carla then proceed to raise as their own. After 21 years, they finally reunite with him only for him to be hit by a bus. Also, the pumpkin baby dies.
* Scrubs, while being told that one of his patients has died and that a Morbidity and Mortality conference will be held to figure out who's responsible Turk's phone starts playing the first few bars of Beethoven's 5th symphony. He immediately remarks that he needs to change it.
* Scrubs, while unwanted pregnancy or STDs are not fun, "Losing a baseball scholarship because a bear ate your arm is a much worse consequence of sex." Probably true. This line immediately follows a flashback in which Elliott, having parked in the woods with her high school boyfriend, starts drizzling honey on him as part of foreplay when a ravenous bear comes and breaches the car, eating the poor guy's arm.
* Scrubs who goes out of his way to bully and annoy his brother J.D. and mooches off him constantly despite being well into adulthood. He does show some signs of maturing in later seasons though.
* Scrubs, whose signature high-fives are always followed by him snapping his fingers and pointing at the recipient.
* Scrubs with Jordan and Dr. Cox (They're in a long-term non committed relationship with two children) but JD and Elliot have been playing the trope straight for almost the entire series. And did so until the last season, where they hooked up, finally grew up, and stayed together for good. Dr. Cox and Jordan also got back together and stayed together.
* Scruff. One can only wonder how Holly can put up with an airhead like Peter. Also, Sanda and Truffles, who is known for his hacking cough.
* Scruff version of this trope, being a young Border Collie pup with an easygoing, smart, modest but playful personality.
* Scruffy the janitor actually weaponizes this in one episode when Planet Express needs to fire one employee and are trying to find the least necessary one. He admits he's lazy and does very little, but
* Scrumpers: The darkly humorous adventures of an incompetent pirate captain in an endless black void.
* Scruple, a snarky, delinquent wizard-school dropout, is this to the vengeful Gargamel in
* scrupulously honest shovel. The criminal element actively tries not to piss him off. So well known for inventing the first capable and honest police force of the city of Ankh-Morpork that cops throughout the plains are known as Sammies.
* scrutiny, only a few days later, it was announced that a new franchise had bought the building and it was quickly reverted to a real Burger King.
* Scryed and is a total hack. His second attempt, on Ryuho this time, goes just about as well and is just as corny.
* Scryed averts this, as Kazuma ends up getting attacked in the middle of forming his Alter a couple times over the course of the first half of the series, even when it skips the usual lengthy transformation sequence. By the second half this drops off, however, with Kazuma's second stage for his Alter seeming to be powerful enough that even anyone who would want to interrupt the transformation is simply unable to get close until it's been formed.
* Scryed, but she's so used to correcting him that she does it then anyway out of habit.

* S Cryed ends with Scheris dead and Ryuhou rejecting Mimori despite his implied attraction to her because he feels it wouldn't be right. Although he displayed no attraction to Scheris either, she died for him, and he feels Mimori might very well meet the same end if she was to get together with him now.
* s-CRY-ed gets something the same with her lover Hannish Lightning, despite the fact we have seen her take down dozens of HOLY solders and save the main character. Lightning then gets his ass kicked by a woman and has to be saved by Mijyou.
* s-CRY-ed has Hannish Lightning, at least in the manga, whose Alter is a gun. Then lots of guns. Then when he hits top rank, his entire BODY is guns. Attached to guns. Quite possibly firing guns which shoot you as they hurtle towards you. As Asuka Tachibana commented, "I've got the balls, Akira's got the rod, and Hannish ain't shooting blanks!"
* S Cryed has HOLY, an organization composed of people called Alter Users who control matter with willpower. Many Alter Users seek sanctuary in the Lost Ground outside HOLY's control.
* S Cryed has no family name, which is symbolic of his status as an outcast from proper Japanese society.
* Scryed. His alter power (named "Radical Good Speed") enables him to transform objects (including his own body) to reach their fullest speed capacity. He also both drives and talks very quickly. ("I love it! Two more seconds to live...")
* S Cryed is almost as much defined by his glasses as he is by his speed.
* Scryed, make damn sure you can speedread. Straight Cougar's dialogue approximates a blur at points.
* s-CRY-ed outside of his alter form). They look pretty scary during the last fight.
* S Cryed protagonist, Kazuma. And since Ryuhou and Kazuma get about equal screen time, Ryuhou is a joint protagonist — several episodes focus on his perspective. He evolves into a protagonist in the episodes following his second battle with Kazuma, but up until then he's just painted as a semi-peaceful well-meaning villain.
* S Cryed shows that Kazuma accidentally killed the dinosaurs with one of his punches (that broke through the walls of space and time).
* Scryed. Sometimes considered a rip-off entirely and dismissed because of that and more.
* Scryed takes place in a future rocked by a geographical uprising, which has left 1% of the newborn children with the ability to manipulate matter at will and create "Alters", strange creatures that do their bidding. The number rises as the series progresses, evidently a side effect of continued tampering with the power of the other side, which started the whole mess.
* Scryed, the Lost Ground has been placed under the jurisdiction of HOLY, which doesn't seem to care about civilizing the area in any way other than getting Alter Users under their control.
* s-CRY-ed. We get to see his approach from Scheris's viewpoint — an unstoppable monster stalking out of the flames, spreading death and destruction in his wake...
* Scryers with the Psychometry talent will see a glow around objects and locations that were part of distinctly emotionally charged events.
* Scrying: Term for psychic gazing or seeing. As in gazing into a crystal ball or seeing through a reflective surface. Scrying is an inner vision while de-focusing on an outer object.
* scrying the mortal realm from the afterlife... by refusing to beg him or even to get angry about his unwillingness. Eugene even calls it "reverse psychology" at one point... but he still falls for it. It's unintentional on Roy's part; he really no longer wanted his dad's help at that point. It's absolutely brilliant, too. Only a minute or two after Eugene tells Roy to screw off and go back the mountain to cry to his mother, he's scrying for him.
* SCTV: Almost the entire cast is a psychologist's field day, but a short list:
* SCTV: A tabloid news show has a clip of Hitler, alive and working as a short-order cook (played by Andrea Martin). There's a sign above the counter reading

"Have Hitler cook your breakfast!"
* SCTV at him or when Ramis was given real rum to drink instead of a stand-in during a sketch where a home dentist shows his viewers how to anesthetize themselves with alcohol in lieu of novocaine, which he was unaware of until he actually started drinking it).
* SCTV called "Captain Combat", Gunny Rabbit is shot by an accidental discharge. (Captain Combat's lesson to the kiddies at the end of the sketch: "Never be in a room with a loaded gun unless you're holding it.")
* SCTV Canadian Content rules for the show. As it turns out, Canadians love them as not only funny but as a point of pride of the Canadian national reputation of having an easygoing willingness to laugh at themselves. It's said that their "Coo-loo-koo-koo" call is one of the most popular ringtones ever sold in Canada.
* SCTV did "Nice Kids From Hell", a parody of 1950s juvenile delinquent movies, where a group of clean-cut, polite teens terrorize a middle-aged couple with their pleasant, helpful behavior.
* SCTV did sketch comedy without a live audience. The formative years for the show were shot in Edmonton, Alberta, where television talent was apparently so sparse that the laugh track was done by the guy who did the farm reports, just adding laughter at regular, arbitrary intervals.
* SCTV "Fishin' Musician" segment - host John Candy and musical guests The Tubes are seen on a typical 16mm 'outdoors show' film leaving a little cabin; Candy narrates "There's that lodge we stayed at there, it looks small there, but it goes down four hundred feet, sleeps eight hundred..."
* SCTV for "Crazy Hy's", selling video equipment, except they acted and dressed as straight-laced orthodox Jews, and couldn't quite muster the required manic enthusiasm. Inspired by a series of real-life ads for "Crazy Joe's" drapery stores around Toronto, which did have the enthusiasm.
* SCTV frequently had backstage plots throughout the show, especially during the 90-minute episodes.
* SCTV) from the fictional Baltic state of Lutonia who hosted a polka show (the audience consisting of immigrant senior citizens). Their segment occasionally also featured the "Lemon Twins" (there were three of them), a parody of Welk's "Lennon Sisters".
* SCTV had a "Farm Film Report" program where the two overall-clad rustic hosts rated reviewed movies on how much stuff "blowed up" — later they took to having celebrity guests for the sole purpose of watching them explode, which roused them to ecstatic cheers.
* SCTV had John Candy who did a dead-on Curly, teaming with Eugene Levy as Moe, and Joe Flaherty as Larry (also seen in the one-man show 'Give 'em Hell, Larry')...Candy would also incongruously play Curly as the lead in 'Ben-Hur'.
* SCTV) had the mission crew wearing jump suits with the shoulder seam rolls that show these are Space Clothes.
* SCTV has Bill Needle, played by Dave Thomas, who doesn't like anything.
* SCTV has Joe Flaherty rocking the eyebrow with some particularly weaselly characters.
* SCTV - hippie tv show host Dr. Braino (John Candy) gets too high and does it - then does it again in the only other skit he's in.
* SCTV include a montage of people defenestrating their TVs in rage because the station is on the air. Buildings the TVs were thrown out of include high-rises, suburban tract houses, mansions, and a grass hut (probably referencing the African nation of Togo, a running joke on the show).
* SCTV, in which the town of Amity has actually become dependent on shark attacks to draw the tourist trade.
* SCTV - mad scientist Dr. Tongue, hammily emoting "They laughed at me in Budapest...THEY LAUGHED AT ME IN PRAGUE!!!" - hunchback assistant Bruno chimes in "They laughed at you in Buffalo too."
* SCTV movie - the clip was a drawn-out scene picturing this trope. They weren't impressed.
* SCTV - on "Half Wits", a 'Jeopardy'-style quiz show, Martin Short is contestant

Lawrence Orbach, about 30 years old, going bald, and still in school. The host asks 'Postgraduate work?' and he replies 'High school.'
* SCTV, on which Dave guest-starred as his brother Ben Franklin), and classical violinist Eugene Fodor.
* SCTV picked up the show in 1981, they had moved to Edmonton, Alberta.
* SCTV stars and upgrade their simple "Great White North" spot into an opulent variety show. Unfortunately, this new arrangement is completely out of the brothers' comfort zone, and the resulting show is so disastrously inept that Caballero orders the broadcast canceled and the broadcast stopped right in the middle of a sketch. The McKenzies are forced to dismantle the set by themselves.
* SCTV takeoff on the movie "Melvin and Howard," Melvin Dummar gets Howard Hughes to join with him in singing "The Name Game." All goes well until Hughes tries to sing a verse using the name "Chuck," leading Dummar to smack Hughes in the mouth before he gets to the inevitable naughty word...
* SCTV, the bottle bill is worded in an extremely confusing way, so that it's hard to tell whether or not a "yes" vote is for disposable bottles, or a "no" vote is against returnable bottles, or a "no" vote is against the banning of disposable bottles, or a "yes" vote is against the making of returnable bottles, or, or, or....
* SCTV - the "Fishin' Musician" show featured Gil (John Candy) taking guest Carl Perkins on an endless road trip, driving four days straight fueled by coffee and cigarettes. At a roadhouse he reels in dazedly, proceeds to get stupid drunk, and picks a fight with an innocuous little guy who proceeds to beat the tar out of him before giving him a bar slide through the window.
* SCTV: There were four episodes involving telethons and pledge weeks.
* SCTV through the meadow (he sits in a wheelchair, but for respect rather than being handicapped).
* SCTV, various Soviet television programs periodically cut into the station broadcasts. This is treated as an act of aggression which leads to war.
* SCTV were actually commercials for businesses local to the fictional Melonville area where the SCTV station was said to be based.
* SCTV where boxer Hefty Neil (John Candy) cracks a half-dozen eggs into a glass - then pours them into a frying pan.
* SCTV), who doesn't really go by the Kaiju stereotype of crushing things.
* SCTV with a Soviet sitcom, "Tibor's Tractor", where a farmer's tractor is haunted by Nikita Khrushchev.
* Scuba equipment is designed so that, if it fails, it will fail in the "on" rather than "off" position, leading to potential situations like a buoyancy control device that continually inflates unless it's physically held back or a regulator that keeps pumping air. This is, of course, designed that way because a regulator that continually pumps air is still preferable to a regulator that doesn't pump air at all.
* "Scud" - Made most famous by the Persian Gulf War, it describes the R-11/R-17 ballistic missile series (better known by its Western designation of SS-1: see below).
* Scud the Disposable Assassin, an entire story arc was based on Scud (a robot) losing an arm and getting a human one as a loaner while he was waiting for the parts to come in. Then he discovered that the arm had belonged to a werewolf, and could take over his mind when the moon was full.
* Scud the Disposable Assassin came factory-equipped with a pair of full-auto machine pistols, and knew how to use them right.
* Scud the Disposable Assassin featured a werewolf villain that seemed to regenerate from any kind of death, including having the main protagonist punch his way through the back of its head. The werewolf is finally defeated when it is jettisoned into orbit around the moon, where it explodes, reforms, and explodes again in an endless loop.
* Scud The Disposable Assassin has Scud stick his gun in a target's mouth and say "Something funny." before pulling the trigger.
* Scud the Disposable Assassin on it by asking the writer to not pull a Pinocchio.

"Make him proud of what he is, and you've got my $7.50."
* Scud the Disposable Assassin. Scuds are robot assassins purchased from vending machines; they're bought, pointed at a target, and when the target's dead they self-destruct. The Scud unit the series follows works out what's going to happen to him and instead incapacitates his target, leaving her on life support; the bulk of the series is the jobs he takes to pay the resulting hospital bills.
* Scud the Disposable Assassin takes place close to the 2025 "Mr Tough Guy Challenge".
* Scud the Disposable Assassin through the desert after hitting the ground. Given that the main premise of the comics is that he's avoiding self-destruction (his model self-destructs after killing its intended target, so he instead incapacitates it and puts it in stasis, becoming a hit man to pay its hospital bills), it's strange such a thing would even be possible.
* Scud the Disposable Assassin undergoes this trope while in a stable orbit over earth. Since he is immortal, his body instantly reconstitutes itself only to explode again...and again, and again ad infinitum.
* Scud the Disposable Assassin Unknown to him, his line of robots were programmed to take down their target and self-destruct. He finds this out when he sees the sign on his back warning others of the blast-radius. He decides living is better.
* Scud the Disposable Assassin with her robotic babysitter malfunctioning.
* Scudworth's constant muttering while the Board of Shadowy Figures plot the future of
* Scuffle has your character toss the enemy off screen and a Big Ball of Violence occurs... side-screen.
* Scullery Maid: A common role for the heroine, particularly if she is a princess incognito.
* Scully Box: To make an actor appear taller, they stand on a box outside of the camera's view.
* Scully inherited a show that was starting to go downhill in quality: Season 8 was the beginning of the end, with many senior writers and producers heading for the exits, co-showrunners Oakley and Weinstein operated on the assumption that
* Scully is put under psychological manipulation and wets a diaper that she's been put in.
* Scully's father was killed off this way. The first time we meet him, he's having dinner with his daughter at her home. An hour later, she gets a call saying he's died of a heart attack.
* Scully wakes up shortly thereafter and tells Mulder that she had the strength of his beliefs.
* Scully was essentially raped by the Cigarette-Smoking Man. Once again, fans were less than satisfied, though general reception for the season was more positive than the first.
* Scully was like this early on sometimes, due to her default skepticism, and Mulder often called her out on the fact. However, she did get better slowly.
* Sculpted Physique: When your blind date turns out to be a literal brick house.
* Scum against the institution of borstal, and the details are not inaccurate.
* Scum and Villainy's doctrine revolves around venerating light in general and starlight in particular).
* Scum and Villainy? They call themselves "Guilds", but otherwise, check.
* Scumbags of the Internet gives us the following catchphrase, which all but invokes this trope:
* Scumble, Grandpa Bomba calls Sarah Jane "Betty Lou" and "Mary Anne".
* scumble is a healthy tonic ("It's made from apples. Well, mainly apples."), and the latter explaining to certain folks that some of her medicines contain rare herbal ingredients, like akwa and sukrose. It helps that, on the Disc, when a witch hands you a bottle and says that it will cure your ailments, you'd better darned well believe that it'll cure your ailments.
* scummy prosecutors to use this tactic to make someone look guilty. For example, if someone is accused of murdering someone they might take some quote that was obviously a joke or exaggerating (e.g. "if you forgot my coffee, I'm gonna kill

you") as "evidence" that the person wanted to kill the victim.
* Scum's Wish, Hanabi Yasuraoka and Mugi Awaya are going out together, but they both love someone else — their teachers.
* Scum's Wish, Noriko's outfit is a bit frillier than the usual uniform everyone else wears, and she also doesn't wear a vest.
* Scum's Wish revolves around Hanabi and Mugi, two teenagers who are each in unrequited love with a teacher. They begin a physical relationship to comfort each other, although they stop short of sex. Naturally, it ends up getting complicated.
* Scunthorpe Problem, because "handynasty" sometimes gets caught by porn filters).
* Scurry And Cover, Beasts and humans can mix. The protagonist, Nozomi, is a three-quarters human, one-quarter rat girl. She is very visibly more human-like than her half rat mother, or her full rat grandfather.
* Scurry, grabs the birdhouse in its talons, and carries it and Pict away.
* Scurry: Protagonist Wix is said to be the fastest of the mouse scouts. How fragile he is compared to the other mice is yet to be seen. But considering he's generally pitted against cats, he's VERY fragile.
* Scurry: the antagonist cats seem to hunt the mice more for sport than for food. Titan seems to hold a grudge against Wix the mouse for daring to actually escape from him.
* Scurry. The mice accept him as a member of their colony mostly due to his gentle, affable nature, despite being huge even by rat standards.
* Scurry: The unnamed suburb where the mouse colony lives. The humans have been gone for a long time and anything edible has long-since been picked clean.
* Scuttle the seagull, who is wrong almost every time he opens his mouth, invokes a variant of this in
* Scylla, a desert-dwelling arthropod combining features of spiders and crustaceans, while having a tentacled, cephalopod-like head
* Scylla and Charybdis also fall into this category, as several myths hold them to be former nymphs who were transformed into hideous monsters.
* Scylla cards cover the drilling noise by posing as janitors and using a loud vacuum cleaner to clean a stain on the carpet at the office door.
* Scylla goes missing after the attack on the Bellweather estate. Everyone else assumes that she died, but Raelle refuses to believe it because Scylla's body never turned up. Naturally, Raelle turns out to be right.
* Scythe-arms, ie one main blade and one spur on each forearm. Training with them easily dissolves into chaos, with inexperienced users not being able to keep track of the spurs. Jame, the protagonist, is an exception, finding in them for the first time a weapon that she feels right with; she subsequently carries them everywhere.
* Scythe-arms, with the longer blade jutting forward and the other back. They are used in pairs, ie one main blade and one spur on each forearm. Training with them easily dissolves into chaos, with inexperienced users not being able to keep track of the spurs.
* scythed chariot; the crew just had to plow through the crowd and the scythes would cut in half everyone within 1-2 meters. It wasn't very efficient, as casualties could be greatly avoided by letting it pass, and it could only work in open flat country with enough room to maneuver, but damn, there was nothing as awesome as seeing dozens of soldiers sliced by its might!
* Scythe has this for most of its Eastern European states, like the "Rusviet Union" and "Republic of Polania." While the Crimean Khanate did exist historically, it was gone by World War I.
* Scythe. In a game with several other female characters, including fellow Eastern European - Anna of the Polanian Republic, Olga's the only one who's artwork plays up her looks.
* Scythe is hinted to be the original Archon, William Black, who lived in the time when mankind was young and forged the Sword of Aeons and ruled the Old Kingdom for millennia, and it still alive millennia after it fell.
* Scythes even before that. These more effective designs are rarely seen in fiction. Oddly enough, rarely if ever used by farmers, who prefer Slings and Pitchforks.

* Scythian Mythology is the goddess Tabiti, whereas in most other Indo-European pantheons its a male sky god who leads the gods. Their culture is believed to have inspired the Amazons, as they had more gender equality than most in the region, which included women warriors. For the Greeks it may have all been too unthinkable, so they concluded the Scythians had female rulers. In fact, they're mentioned as having had kings.
* Scythian Mythology the gods are led by a queen, Tabiti, the other two most understood and likely the most promenient deities being Argimpasa (which lead the androgynous priests known as Enarei) and the monstrous Api, which has several depictions in kurgans.
* Scythian Mythology (warrior tribes indigenous to Eastern Europe and Central Asia)
* SD cards of promotional flash drives given away at conventions as they are a ticking time bomb—good luck trying to recover from one once they fail all of a sudden.
* SDCC teaser trailer modified version of the official teaser trailer.
* SDF-1. That said, the animation budget wasn't up to showing them traverse and fire like they do in the newer shows so they end up being largely static decorations. Those four massive railguns on the docking assembly (the 'shoulder' in battle mode) are never once shown firing, for instance.
* SDF it as the fighters being thought-controlled. Since most of the pilots were used to atmospheric craft first and foremost, their veritechs moved as if they were in an atmosphere.
* SDF states that this destroyed more Zentradi warships than had been lost in the entire history of the species. It makes Dolza change his mind about eradicating the humans and decide he should ally with them against his other enemies. Too bad he'd already laid waste to the Earth and slaughtered most of the population.
* SD Generation Wars where her Zaku literally has no attacks of her own and simply consist of her ordering other Zakus to attack before waving. Unlike the one in RvZII, this version is not viable in actual combat because its single attack has an absurdly low hit rate and damage.
* SD Gundam Capsule Fighter does this, allowing players to modify stats to make their units hit harder or move faster. A lot of times, though, it's just to make you die in one hit.
* SD Gundam Capsule Fighter has the "-U" rank units, "User-Created" special units from the Korea server who color certain units (all but one being a C-Rank) and are granted different skills and stats, usually having the skills make up for the weaker stats.
* SD Gundam Capsule Fighter, those same aforementioned Gundam units, usually the high-end S-Ranks, can create speed echoes once they activate a secondary form.
* SD Gundam Force and other SD Gundam gag shorts feature chibi robots living alongside humans.
* SD Gundam Force are this, especially if they were moving when petrified. Princess Rele in particular needs a few minutes to adjust, thinking that it's still the moment she was turned to stone when it was actually two years.
* SD Gundam Force, claiming that they are reporters who want to interview the Gundam Force. The Force quickly sees through their act...except for Bakunetsumaru, who's tickled pink to be on television. Later, after the Zako throw off their 'disguises'...
* SD Gundam Force, clips from past episodes are used as in-universe footage of those events. No explanation is made of this. The Zako Soldiers are the biggest offenders, as they had clips from episodes where there were nowhere to be found.
* SD Gundam Force: During a Zako Zako Hour, one of the hosts is fitted with a giant jet pack and sent flying off the stage by his co-hosts.
* SD Gundam Force ends with the members of the Gundam Force being called once again to save another world in danger.
* SD Gundam Force episode "Ultimate Challenge! Kibaomaru vs Shute" ends with a call that the Kibao Army resume their march, and the shot zooms out to show God-knows-how-many Nobusshi marching after the Tenchijou.
* SD Gundam Force ever by dropping the hand-shaped Blanc Base on the Dark Axis's

Big Zam.
* SD Gundam Force for the Daishinsho... Genkimaru is. The result is Kibaomaru getting forcibly ejected from Daishinsho and Genkimaru using is to lay siege to his forces.
* SD Gundam Force gives us Gunbike, whose AI was Captain Gundam's original pre-deployment instructor. He's brought in to help the newly-formed Gundam Force learn to work as a team, and starts the training off with a long report on their various flaws.
* SD Gundam Force has the Neotopia Invasion arc at the end of the first season.
* SD Gundam Force has the Zakurello Gate, which is primarily used by the Dark Axis to invade Neotopia's dimension. The SDG spends most of the series trying to build their own device, but ultimately just use the Zakurello Gate after the main invasion.
* SD Gundam Force, in the shape of their eye-screens! (Grapper's even has the scar he has.)
* SD Gundam Force mecha) the Pawn Leos explode and revert back to card form when damaged. The rest of the group is confused while Zero brings up that they always do this.
* SD Gundam Force: Nobody ever gets Bakunetsumaru's name right the first time around. Because it's difficult for people not native to Ark to remember it, they usually call him 'Baku'.
* SD Gundam Force, the Dark Axis (or at least Zapper's squad) were not very good at making new weapons, so they have to steal everything. This stopped after Episode 9 as the Dark Axis began sending in better warriors to attack Neotopia.
* SD Gundam Force, the evil Deathscythe creates a duplicate of Lacroa's princess in order to infiltrate the Gundam Force and lead them into a trap. But the fake befriends Shute, and near the end tries to help them escape. In response to this betrayal, Deathscythe returns the fake princess to her original form- a violet rose he had enchanted.
* SD Gundam Force, the question is the subject of a Zako Zako Hour... two of them. And they still don't figure it out.
* SD Gundam Force, there is a distinct difference in the power of Mana, which all people native to Lacroa can use, and the power of Spirit, which one can only use by a pact with a supernatural creature like the Griffin or Dragons. This difference is very important when the evil knight Tallgeese was sealed in the Dark Hole; Mana can't work in the Dark Hole, but the Spirits exist just fine. Because Tallgeese had been fused with the Griffin at the time, he was able to escape.
* SD Gundam Force the Zakos reveal themselves. Then at the very end, Zapper Zaku reveals that his singing janitor routine was just an act, and announces that he's ready to do bad again. Cut to him being surrounded by a small army with their blades pointing at him. Zapper panics and does his routine- pan over to his allies, who have face-faulted.
* SD Gundam Force was dubbed in America, weapons expert Destroyer Dom is given an Ahnold flavor.
* SD Gundam Force with the princess of Lacroa, he feels that the only thing keeping them apart is the fact that she's human and he's not, and the crux of his schemes is obtaining enough magical power to turn himself into a human.
* SD Gundam G Generation. Along with that is a set of original pilots which either is just meant to be filler or is part of a side story plot.
* SD Gundam G Generation Genesis, who sung the theme songs for the game.
* SD Gundam G Generation series take up multiple squares on the map (for example, 3x4 or 4x5) and can be attacked anywhere in that area. Attacking a flashing square that corresponds to the bridge or some other vital system causes a "Pinpoint Attack" that does twice as much damage as usual.
* SD Gundam has a powerful robotic horse that can also transform into a motorbike.
* SD Gundam Online. The game makes no attempt to say, "You need to buy this to be BETTER than everyone!" The only things that cost RL money only are Paint, and you can find some of that with missions, if you're lucky. Buying Mobile Suits is interesting in that you select from about 10 different 'capsule machines' and put

the in-game currency in to get a random MS. It's noted that the Capsule Machines and shop contain every MS available, buyable with in-game currency. And the best thing? You can purchase the Blueprints for some of the best MS... with In-Game currency only!
* SD Gundam Sangokuden: Brave Battle Warriors) as well as telling an entirely new story.
* SD Gundam The Last World, featuring characters from a good number of its works. It also includes a couple of characters made specifically for this story, including Sen-Pu Ninja Exia, Gundam the Gold, Ryuutei Unicorn, Tri Gunvoy, the Throne Siblings and so on.
* SD Gundam (Though granted, there are still some silly moments here and there).
* SD Gundam villains Yazan Gable and Gemon Bajack as transparent parodies of Dick Dastardly and Muttley. Sadly, due to licensing issues, this short couldn't be included in a recent DVD collection.
* SD Gundam, where one of the random questions the player can be asked is what color they'd choose for their custom machine. Red is described as "speedy" while blue is described as "strong" (the third choice is black, which is said to represent good teamwork, referring to the Black Tri-Stars).
* SD Gundam World Heroes, in order to collect the five OOPARTS to stop an oncoming threat from outer space.
* SDI also planned a pop-up one-shot X-ray laser satellite, powered by a nuke and (at least in theory) able to toast an area as wide as a football field. It was tested only once, and the result was inconclusive, but it serendipitously fueled the development of plenty of other technologies (many of them civil). It may also have been an inspiration for the
* SDI Media de México (Known as Prime Dubb before being purchased by SDI Media. Mexico City. Founded and previously ownedy by Eduardo Giaccardi.)
* SDI Strategic Defense Initiative features a stage in the asteroid belt. All those floating rocks, however, are just scenery background that often have bases and/or weapons mounted and can be fired upon (and vice-versa).
* Sdorica as a factor: Anytime a certain well-known furry artist draws a character, even portraits for minor NPCs, the fans will gush over it.
* SDR2 Chapter 0 is pretty much one huge plot hole both in-game and in hindsight. For one thing, Komaeda
* Sdrawkcab Alias: A character creates a pseudonym for himself that's a reversal of his real name.
* Sdrawkcab Name: A character whose name is meaningful when spelled backwards.
* SD Sengokuden Bushin Kourin Hen, have been deliberately made at a larger "deluxe" size than the regular line.
* SD Snatcher, a "Lingu-Disk" to translate Spanish lets Gillian speak with Mr. Cielo.
* SD Snatcher features a machine cult which considers the Snatchers to be the perfect form of life.
* SD Snatcher gives Gillian a large variety of Metal Creatures to do battle with.
* S.D. "Special Delivery" Jones packed a rather powerful headbutt. Being a jobber, it was usually a
* Se7en. As if the black painted windows and red neon cross in his bedroom weren't enough to convince us that John Doe is crazy, the religious icons, drawings and obsessively detailed notebooks he leaves behind leave us in no doubt. (John Doe is also fond of leaving obsessive inscriptions near his murder victims as well.) The most disturbing part of this is all the books were filled with genuine crazy. A guy was hired specifically for the movie and spent two weks scribbling up the texts.
* Se7en: Bizarrely enough. Mills and Somerset have worked themselves ragged and sit down on a bench in the police station. Come the morning, they're asleep.
* Se7en, Detective Mills interviews John Doe's neighbors, and gets descriptions of a man between ages 30 and 40, between 150 and 160 pounds, and between and in height.
* Se7en: Detective Somerset is a completely sane heroic example, always carrying a switch blade wherever he goes and practicing throwing it at night.

* Se7en. Detective Somerset is portrayed as the man bleeding acculturation, where he even digs into Dante Alighieri to try solving some cases. His partner Mills plays the other end, with an example of him throwing away a book, disdainfully of course.
* Se7en. Fans enjoy various alternative pronunciations, such as "Se-seven-en", "Seten", and "Se'en".
* Se7en for him, with one officer even stating "You got what you deserved".
* Se7en has an absurdly inflated opinion about himself, believing himself to be leagues above everybody who crosses his path.
* Se7en involved John Doe kidnapping Mills. Somerset discovers that Doe was raised by an abusive priest in a church orphanage. He finally traces Doe to a decrepit church decorated with artwork depicting the Seven Deadly Sins, where Doe is intent on making Somerset murder him out of vengeance. As Somerset arrives, Doe has cut a cross in Mills' chest, has suspended him above an altar and shoots him. Mills finally dies in Somerset's arms as the church is set on fire. Doe and Somerset subsequently engage in a shootout, with Somerset wounding Doe and letting him die in the flames. The script ends with Mills' funeral.
* Se7en: John Doe. He uses the works of William Shakespeare, Milton, Chaucer, Dante, the Marquis de Sade, and St. Thomas Aquinas, among others, as inspirations for his crimes.
* Se7en keeps trying to retire because he finds the world horrible and his work demoralizing. He frequently sermonizes bitterly about how horrible the world is. Yet he can't find it in himself to quit.
* Se7en of diaries of what he thinks is her account of what is supposed to happen when the world ends.
* Se7en severed a tendon in his hand and had to wear a cast. A scene was added to the film showing Mills broke his arm while pursuing John Doe.
* Se7en shave their chests so they can tape wires to their skin, prompting one of them to wonder if a shaved-off nipple would get treated as a work-related injury.
* Se7en Somerset is actually training Mills (a bright young family man) to take his place once he retires.
* Se7en suddenly made him a household name again, leading to Emmy and Golden Globe nominations. This did, however, come to a halt after allegations came to light in 2017 accusing him of sexual behavior towards young boys.
* Se7en, the detectives think that the name used on the serial killer's library card, "Jon Doe", is an obvious fake. However, they later find out that his legal name actually is "Jonathan Doe" — several unfilmed scenes from the script elaborate that he was an orphan raised in a parochial school, hence the made-up last name.
* Se7en. The idea is still to use this to get the hero to do what the villain wants.
* Se7en, uses a lawyer as the victim for greed. As the killer tells the detectives, "You both must have secretly been thanking me for that one."
* Se7en victim is a model whose face has been mutilated by Doe; she was given the option to call for help and live disfigured, or commit suicide by taking pills.
* Se7en when Mills enters an office with a TV on just in time to catch a news report on the serial killer's murder. Justified in that it's a live broadcast, and Mills walked through the press conference it's covering 30 seconds ago.
* Se7en, where for the Pride murder, the killer cuts off a fashion model's nose and then leaves her locked up with a phone and a bottle of sleeping pills, so she can decide whether to call the police and survive (with a deformed face) or take the pills and kill herself. She kills herself.
* Se7en. You think the movie is about catching the serial killer, do you? Well, he gives himself up when there's half an hour of movie left.
* Seán Cullen: Known for his comedic songs and stream-of-consciousness style.
* Seán Cullen (mainly known for his stand-up comedy, but also has a significant number of voice acting roles and several live-action roles)
* Sea Aping: A child character buying a fictional counterpart of sea-monkeys,

expecting the pets to have a civilization like they’re advertised to.
* "Sea bass" can get even more complicated in the United States where restaurants and places selling fish have an approved list of species that can legally be sold as "sea bass". All
* Sea Bed is a yuri themed mystery drama, with heavy psychological aspects. Unlike many other Yuri Visual Novels, it has a clear LGBTQ audience in mind, with its realism, mental health themes, and subdued character designs standing out.
* Sea Bed mystery, focusing on trying to figure out what happened that caused the two main characters, Takako and Sachiko, to drift apart.
* Sea Bed only to be startled by the sound of leaves rustling. It turns out to be a coconut crab. Takako later recalls the crab and, clearly annoyed, suggests finding it and cooking it for dinner.
* Sea Bed: Sachiko's outfits usually highlight her legs, particularly her short shorts and dark tights combo. Takako actually describes Sachiko’s legs as being “shapely” in one scene.
* Seabert The Seal had a con-artist exploiting a group of jungle-dwelling natives by providing agricultural services in return for sacks of "colored glass". Needless to say, the glass was diamonds which the natives had no use for.
* Seabiscuit: An American Legend about the Depression-era underdog thoroughbred, which became a film in 2003.
* Seabiscuit, George "the Iceman" Woolf is played by real-life Kentucky Derby-winning jockey Gary Stevens.
* Seabiscuit would've also been treated as this to Vinesauce, for the same reasons as Alpaca, but also because her voice
* Seabury Quinn). De Grandin mentions that these beings are manifestations of the worst attributes of humanity and are no match for the power of God. As such, they haunt isolated dark places like swamps and cherry-pick their victims for someone who's weak and vulnerable.
* Seabury Quinn's Jules De Grandin defended New Jersey from monsters and mad scientists.
* Sea Change. Laura almost killing her cat while getting out of bed in a hurry is the start of a long and horrific day.
* Sea Change opens with Sergeant Grey arguing on the phone with someone, talking about how he's "been through this many times before" and is not putting his people through it without some serious backup - "a minimum three squad cars and some basic show of weaponry or we might as well seal off the whole bloody town and let them run riot." His subordinate, standing in the doorway, asks if he knows what the theme is for this year, to which he answers, "Latin". It soon transpires that the conversation is about the Country Fire Authority's annual dance.
* Sea cows got the name cows because they almost exclusively eat sea grass and do so in a slow grazing fashion, much like a cow, and generally have a fairly pleasant and friendly nature due to the lack of any possible environmental threat until the invention of the motorboat.
* Séance: A character is antisocial and awkward, and takes an unnamed medication that he claims is supposed to make him "normal".
* Séance: The main characters hold a séance over Thanksgiving weekend. Three guesses as to how that turns out.
* Séli has basically no idea of geography: she doesn't know where Aquitaine, the Pyrénées, or Burdigala
* Sea Devils, who sometimes call themselves that despite the name having been coined by humans.
* Seadog Peg Leg: The tendency for sailors and other sea-fairing folk to have peg legs.
* "Sea Dogs" opens with an entry in the personal log of a sea galleon's captain, recounting how his ship became lost at sea, and overwhelmed by a mysterious illness, which the main story eventually reveals to be
* "Sea Eagle", incidentally, is also the name of a British anti-shipping missile roughly comparable to the Exocet.
* SeaFire has him visiting her daily, and talking to her despite her comatose

condition.
* SeaFire has Maurice Goodwin (the head of his security) and Connie Spicer (his muscle).
* SeaFire is also a Hitler-wannabe, who seeks to invigorate the Nationalist Socialist Party in Germany.
* Seafirst Bank used to have a "You get served in five minutes or you get $5" policy at its teller windows. They eventually gave it up for obvious reasons. Then they got bought by Bank of America.
* Seafood in general used to be considered poor-people food because of the lack of refrigeration and fast goods delivery (so fish could only be sold locally, and thus did not command high prices) and because seafood was simply more abundant in the past (before overfishing).
* Seafort Saga by David Feintuch, cadets and middies are treated the same regardless of their gender. This extends to mixed sleeping quarters and bathrooms, with it being said that your mates are like family (so having sex with them is a bad idea).
* Seafort Saga has the UN as the governing body of Earth and its colonies. Oddly enough, its society is akin to Napoleonic-era Britain: Swearing in public can lead to legal trouble, the Church is an important factor of life, and there are legal duels.
* Seafort Saga is all about this trope; not just the protagonist, but his fellow midshipmen, play a pivotal role in the story and become men. In the background, they may join the navy at age 13 and be sent on long-range space voyages at 14.
* Seafort Saga is set within the United Nations Naval Service. An actual Space Navy.
* Seafort Saga the inhabitants of the slum areas use "Filmateleven" to mean "hold on" or "wait and see".
* Seafort Saga: while FTL travel existed in the form of "N-Waves" propelling a ship, even human-level computer AI couldn't run a ship (robotics not being advanced in Feintuch's 'verse). Physical mail was carried by the ships traveling to extrasolar colonies, while ordinary radio was used in-system.
* Seafort Sage series (Midshipman's Hope, etc). A boy/man tortured by the heavy responsibilities that fall upon his shoulders.
* Seagulls are similar to pigeons but more ferocious in their tactics. They've even picked up on human
* Seagull Sid and the Naughty Things His Seagulls Did, Sid and a group of seagulls all poop on the picnickers and their belongings so that the seagulls can have the beach to themselves, with the exception of Freda (who was apparently unneeded) and Chris (who intended to, but missed).
* Seaguy; a female warrior who vowed to give herself to the hero who proves his courage.
* Seahorses Are Dragons: Seahorses associated with or tied to dragons, often Eastern dragons.
* Sea horses can't actually breathe water unless they take the feat "Return to the Sea".
* Seahorse Seashell Party", Stewie says a zinger followed by a group of singers saying "Stewie Just Said That". Later, Stewie finds that people are already posting the phrase on Twitter, both in-universe and during the first broadcast in real life.
* Seahorse Steed: Seahorses portrayed as the underwater equivalent of actual horses.
* Sea Hunt naturally enough, although it was only supposed to be a generic "sea serpent," and not Nessie herself.
* Sea Hurtchin: Sea urchins are the painful, painful caltrops of the sea.
* Sea Hurtchin: Urchins existing only to hurt people with their spines.
* Sea Hurtchin: When urchins seem to exist only to hurt people with their spines.
* Sea Kings, unknown and unpredictable weather phenomena, and of course, islands that are somewhat few and far between, and is thus itself considered a Death World by just about everyone who hasn't been there or the New World. And even by Oda's

standards, it screws with physics! Islands that are consumed by perpetual fire, or plagued with storms where lightning strikes like a downpour, or a giant, floating one are some of the highlights from what we have seen thus far.
* Sealab 2020: In "Green Fever", a red alert is signaled after a supply ship's concrete mooring, cast off during a hurricane, unwittingly strikes Sealab's control dome and splits a major section of the shell, causing it to start flooding.
* Sealab 2020 is set in, well, 2020, and it focuses on the crew and their exploits around the said underwater research center.
* Sealab 2020, the com officer for the title installation was Lieutenant Sparks (apparently his real last name).
* Sealab 2020 was a Hanna-Barbera cartoon about a colony under the sea that may have been one of the most boring shows in the history of television.
* Sealab 2021. And, for some reason, everyone has big breasts. Yes, even the guys. They are even referred to as Space _____, which is how Sparks got away with stealing the ASHDTV from them: he signed it as Space Stormy.
* Sealab 2021 a redneck is seen being probed by aliens. During the second 'Uh-oh!' sequence they take the probe out, but the redneck demands it be put back in his butt.
* Sealab 2021, arguably suffered worse from the trope because it took itself seriously.
* Sealab 2021, being made almost entirely from recycled footage of an old, short-lived Hanna-Barbera cartoon, relies on this and uses this for several jokes. Sparks, who's only ever seen sitting down, claims that he's paraplegic before later admitting he's just really lazy. In the original cartoon, he was just never shown doing anything besides sitting at his control panel.
* Sealab 2021, but for various reasons swapped Christianity for the made-up religion of Alvisism, based around a violent, Wild West messiah. Whereas Christmas is about family and giving, Alvistide is about drinking and revenge.
* Sealab 2021. But then a later episode mentioned it again. I guess they don't really seem to care much.
* Sealab 2021 cast faithfully recreate an episode from the prior series.
* Sealab 2021-climaxed when they all fire, and find out the nukes (all bought from the British) are duds.
* Sea Lab 2021 did the Jacques Cousteau version, though he was just called "that French guy."
* Sealab 2021 due to Murphy's credit card debt that kicked the episode off in the first place.
* Sealab 2021 episode "Happy Cake" has Sparks secretly building an army to take over the world.
* Sealab 2021 episode "Splitsville": The two Debbies and Yumi end up getting in one over Quinn. However, while the bar patrons got a good view of the fight in universe, the viewers of the show didn't, thanks to an overturned table blocking their view. Still, the girls were very vocal about what happened, especially when their tops ripped off.
* Sealab 2021 episode "The Policy", Murphy pulled this off when Sparks tried electrocuting him for the insurance money: he got close enough to Sparks to electrocute him as well. There seems to be no hard feelings between the two, as they both sit in hell casually comparing punishments.
* Sealab 2021 "Feast of Alvis", but Standards and Practices wouldn't let them, so they made all these religions up instead...which arguably makes the episode funnier, and makes Murphy (the most ardent Alvian) look even more like a nutjob.
* Sealab 2021 filming an episode. Both groups were portrayed as being ... special.
* Sealab 2021 from the masseurs, we next see all of them smoking (with the masseurs sporting some new bruises).
* Sealab 2021 gives us half-shark, half-Eric Estrada Sharko. Then there's Dolphin Boy, who looks perfectly human but speaks dolphin.
* Sealab 2021 has an episode featuring one of the show's producers, who is human above the waist but a mass of tentacles below. These tentacles, though visually identical, apparently serve a variety of specialized purposes, including this

trope. Debbie grasps one in order to seduce the producer, but he informs her that she chose wrong and that's a "potty tentacle".
* Sealab 2021 has an episode where Sparks reveals that he has the orphans wet Captain Murphy's bed so that he'll think he's doing it himself as part of "a larger plan to drive him insane".
* Sealab 2021 has one of the children get scolded when she calls her rather overweight classmate "Fatass McBlobicus". Turns out that's actually his name.
* Sealab 2021 has Sparks performing this while Captain Murphy rambles on about a video game.
* Sealab 2021. In one episode, it appeared twice, the second time with the phrase "This graffiti is not different stop pausing" added.
* Sealab 2021 is that Stormy specifically says he's going for his G.E.D.)
* Sealab 2021 on fire, we can go anywhere!" before dousing himself in gasoline and striking a match.
* Sealab2021 on "Happy Fun-Time Island", which is infested with talking tree cobras.
* Sealab 2021 sees most of the crew of the eponymous research station's bodies turned into these for mice, while the crew themselves have their brains put into giant robots. It is made more amusing by the fact that the whole cycle was started because the captain of the station had scandalous photos of the science officer engaged in sexual acts with a fat intern, which said captain was threatening to show to said science officer's girlfriend...and the science officer spent 90% of the episode drunk.
* Sealab 2021, Sparks and Captain Murphy don't seem to mind their "mind-blowingly painful" tortures during their stay in Hell. For the record, the latter was in a lava bath, while the former allegedly had burning coals shoved up his ass.
* Sealab 2021, Sparks had the orphans pee in Captain Murphy's bed every night to make him think he was wetting himself, as part of a larger plot to drive him insane.
* Sealab 2021, Sparks's punishment in hell is to get an ass full of red hot coals "right to the rim". Murphy (who gets sitting in a lava bath) considers him to have gotten the better punishment.
* Sealab 2021, Stormy tosses his high-powered hairdryer to a swimming Quinn, shocking him. When Quinn regains consciousness, Stormy tries to revive him by shocking the pool with a defibrillator, knocking out Quinn again.
* Sealab 2021's white masks (see below) when Sealab is hit with a plague.
* Sealab 2021: The episode "Dearly Beloved Seed" begins with Shanks mourning the tragic deaths of all his brothers, which leads him to realize it's up to him to carry on the Shanks name, kicking off the plot.
* Sealab 2021 tries in vain to avoid this, but especially as the series went on, would eventually succumb.
* Sealab 2021, when two football teams are squeezed into a small room:
* Sealab 2021, where a couple of people from Spacelab fall victim to this.
* Sealab 2021", where the crew becomes stranded on an island infested with vicious chupacabras, as well as talking snakes and killer trees.
* Sealab 2021, where the crew leave a capsule for future generations to find. It contains toxic gas and a note reading "Eat it, future bastards!"
* Sealab 2021 where the guys' evil twins show up, Bizarro Dr. Quinn "helps" out Bizarro Sparks, by shattering the jar that houses his disembodied head which is the only thing keeping him alive, then pouring salt on him while jumping up and down while shouting "I'm helping!"
* Sealab 2021 with Debbie. Not porn per se, but when she dumps Quinn and takes up religion she gives her box of sex toys to Hesh.
* Sealab 2021 with Murphy. He's shown as a blond man, sometimes with the goat hooves. Stalin and Hitler pop by and address Satan as Ronnie, hence the episode title. The episode was rejected for not being funny.
* Sealab 2021. ("You hang windchimes for an hour, and then you fight? I don't get it.")
* Sealab track on all episodes that turns into a totally unrelated story the

creators tell over the span of many episodes.
* Sealand around England; he constantly refers to him as "jerk England," and goes out of his way to boast that one day he's going to to be an empire greater than England ever was.
* seal dagger is also treated this way, being a pre-industrial relic that has to be wiped down after each use, but is very sharp. It comes in handy during an exercise when Miles needs to cut a rubber hose and can't use his plasma arc because the cabin is filled with an inflammable gas.
* Sealed Army in a Can: An entire army that's been sealed away for a long time.
* Sealed Badass in a Can: A being is sealed away because they are too powerful to be allowed to roam free.
* Sealed Badass in a Can: They are indeed peaceful and mostly harmless - but their society also has exceptional individuals or clandestine organizations able to defend their entire species on their own.
* Sealed Badass in a Can: When a badass of some type is temporarily put in some sort of stasis so they can later be unleashed. Gives another meaning of "opening a can of whoopass".
* Sealed Cast in a Multipack: When multiple people are all sealed away.
* Sealed Evil in a Can: An ancient villain that was (magically) locked away in some sort of prison or container, in order to keep them from wreaking havoc upon the world again. But they inevitably desire to regain their freedom...
* Sealed Evil in a Can and goes on a rampage when Team Rocket frees it.
* Sealed Evil in a Can, and (mostly unrelatedly) is home to several men who are, or can at least get away with claiming to be, emperor. The evil is leaking, the cans have become something of a tourist industry, and the political tensions are on the rise. Yes, there are some explanations.
* Sealed Evil in a Can: An evil being is sealed away for a long time before eventually being freed.
* Sealed Evil in a Can but instead waited for time and old age to catch up with his archenemy and make him easy prey for him.
* Sealed Evil in a Can, but no instructions on how to use them, who can use them, or under what circumstances these defenses might be needed.
* Sealed Evil in a Can can absorb a very large amount of damage and are armed with a number of one-hit-kill attacks, including an arm that fires a black hole. However, you're armed with the exact same weapon that kills them in one hit too.
* Sealed Evil in a Can for their own Charlie—her priorities are in her own dimension.
* Sealed Evil in a Can. In the first few seasons, Twilight acts like Celestia will banish her to the moon if she makes even the slightest mistake, even though Celestia never so much as implies such a thing.
* Sealed Evil in a Can, Shard is introduced with these - the relative brightness is an excellent barometer of how particularly murderous he is at the moment.
* Sealed Evil in a Can, so a clash with tomb guards accidentally breaks the can, which they otherwise could avoid.
* Sealed Evil in a Can). The campaign in the original revolves around you fighting the latter, and if the player is unlucky enough to encounter them in a standard game...
* Sealed Evil in a Can to reopen the possibility — just the possibility — of this future for a race which cut themselves off from it?
* Sealed Evil in a Duel: A good being and an evil being spend eternity trapped somewhere while fighting each other.
* Sealed Evil in a Duel: Getting rid of a villain by keeping them busy with fighting someone else for all eternity.
* Sealed Evil in a Six Pack: An evil being is divided and imprisoned inside more than one object.
* Sealed Evil in a Six Pack: Just trapping them in one container isn't enough, you have to split it into multiple pieces.
* Sealed Evil in a Teddy Bear: An evil being is kept at bay by confining it in a form that is cute and harmless.

* Sealed Evil in a Teddy Bear: Evil is contained inside something cute.
* sealed evils that have killed thousands of people would never have been released.
* Sealed Good in a Can: A good being is sealed away for a long time before eventually being freed.
* Sealed Good in a Can: A hero who has somehow been imprisoned for a long time.
* Sealed Good in a Can made her not age past 11-13, and she was in stasis for 10 years, which makes one assume that she wasn't aging in any sense.
* Sealed Good in a Can (though if it were a can instead of a leaky ziplock, we'd be short several plotlines).
* Sealed in a Person-Shaped Can as when Yuji eats one of Ryomen Sukuna's fingers, he then gets possessed by Sukuna. Fortunately, Yuji is able to restrain Sukuna from fully possessing his body.
* sealed inside a Dyson Sphere. Whether it was imprisoned or sealed itself there is not quite clear (although the background seems to suggest the latter).
* Sealed Inside a Person-Shaped Can: A being is imprisoned by trapping them inside a living person.
* sealed in the moon for a thousand years. She's bombastic, dramatic and a bit over the top, but she comes off as a big dork when she begins settling in. The comic books also add to this and we also see she was not as good with her subjects as Celestia was. Her lack of social skills, especially compared to Celestia's, when it came to interacting with their subjects and viewing them, may have been part of why Celestia was preferred to Luna.
* sealed in the moon for a thousand years, though. (It's eventually revealed that part of Luna's behavior is due to the guilt she feels over her time as Nightmare Moon.)
* sealed them away out of fear that they would "chomp the entire petri dish".
* sealed within it. So Link has to tromp around the kingdom collecting trinkets in order to reach Vaati's sky palace so he can beat the crap out of him and stuff him back in the sword, which must be returned to its pedestal again.
* Seal from Seal himself which doesn't shed any light on what he meant.
* sealing Poseidon's soul in a giant jar. What remains of Atlantis is Poseidon's undersea kingdom, seen (and destroyed) during the Poseidon Arc.
* Sealing Recovery Magic, using it to seal wounds, even reattaching an arm, as well as body damage.
* sealing, some like Praetorians, the Flayed Ones and Szarekh the Silent King were awake the entire time.
* Sealing them away won't work , since even if one is able to do so they will die once the last of the True Runes magic leaves their body. However there are ways of mastering the power of a True Rune, Often times this will involve the bearer of a True Rune gathering the 108 Stars of Destiny. In the case of the True Rune of Punishment
* Sealing: They are still immortal, but they can't do anything. They're effectively "dead".
* Seal Morning. When her book's popularity grew, her publisher was forced to expend considerable effort to find her. It was discovered that her real name was Lois Parr. Subsequently she published under another name. There is some disagreement concerning her date of birth—she may have been 26 or 35 when her book was published.
* Seal Online, there are creatures called Piyas that have many chicken motifs. As pets, they have a rare chance of evolving into King of All Chicken or Queen of All Chicken in their fifth stage.
* SEALs) who work where they might actually get shot at, previously with a copy of the more traditional fatigues from another service, though now with the NWU type II and III.
* SEAL Team as Bravo Team and Indian police forces respond to a massive city-wide terrorist attack.
* SEAL Team, a UH-60 Blackhawk is used to play an Indian Air Force helicopter, owing to the unavailability of finding actual Indian helicopters in California where filming takes place.

* SEAL Team, Bravo decides to stay and fight the reinforcements to ensure that every single terrorist in the cell is killed.
* SEAL Team, Bravo Team infiltrates a university in Mumbai that's under siege by Hizbul Mujahideen terrorists. To rescue the students and extract them safely, they inform Mumbai Police to switch off the lights from the outside. With this and the use of night vision goggles, they were able to take out the terrorists since they can't see and the team was also using suppressed rifles.
* SEAL Team chews him out, he lampshades the nature of the exercise, and argues that if he'd checked the woman before restraining the man, he'd still have been dinged anyway.
* Seal Team. Even his own teammates chew him out for his overreaction.
* SEAL Team has Bravo Team going to capture a Serbian arms dealer who has been linked to multiple bombings targeting U.S. military personnel in the premier of it's third season, and has a scene of Bosnian Serb forces executing Bosniak civilians in "Ghost of Christmas Future".
* SEAL Team has Bravo Team in Afghanistan to take on the Halani Network and in India to back up Force One and National Security Guard forces against Pakistani-based terrorists Hizbul Mujahideen. One of their patrons is a Pakistani politician. The third season sees Bravo return to Afghanistan to destroy a newly formed terror group called Tahara.
* SEAL Team has many missions that go up against these groups, and the show uses a mixture of real life organizations and fictional ones. Among the real groups, the most common ones are Al-Qaeda, ISIS, and Hezbollah.
* SEAL Team has several jungle operations in its second season, notably part of the Mexico deployment to hunt down Andreas Doza, and the Philippines deployment where Bravo Team goes up against both Chinese special forces and communist terrorists in the Filipino countryside.
* SEAL Team included a suicide bomber taking out Bravo Team's acting team leader. "S-vests" are also talked about a lot.
* SEAL Team occasionally features Bravo training using simunition rounds (made clear by the use of blue magazines and blue suppressors). In one episode, Bravo and Green Team have to engage in multiple rounds of a simulated assault, resulting in everyone involved getting covered in paint marks.
* SEAL Team, one of the team members stands down from a mission due to perfectly understandable and justified reasons. The SEAL who replaces him ends up tackling a suicide bomber and dying in the explosion. The SEAL who stayed behind is hit by this really hard but is told that he cannot let the guilt eat at him. If he went on the mission, things could have gone better but they could have also gone worse.
* SEAL Team Season 4 two-part premier sees Jason and Cerberus separated from the rest of their team on a snowy Afghan mountain while being hunted by Tahara terrorists.
* SEAL Team: the New Resistance Force in the Philippines (based off the still-active New People's Army) and the Asian Liberation Army in Thailand (based off the long-destroyed People's Liberation Army of Thailand).
* SEAL Team the team intercepts a convoy supposedly carrying radioactive materials. What they actually discover is three Soviet-era nuclear artillery shells. The shells have been stored in a bunker for the last two decades and the conventional explosives in them have become unstable. While the chances of a nuclear explosion are slim, a conventional explosion will still kill anyone near the shells and contaminate a large area with radioactive material. The team must transport the shells to a nearby airfield where specialists can defuse the explosives and remove the nuclear material. However, the roads in the area are unpaved and the only bridge across a river needs serious repair. To complicate matters further, the criminals who stole the shells want them back and send a dozen men to attack the SEALs.
* SEAL Team this is a highly likely possibility for all the SEAL characters. They perform extremely dangerous missions and put their bodies through extreme stress.
* SEAL Team touches upon this in the Season 3 episode "In The Blind", and especially in the Season 4 episode "Forever War": the War on Terror has been going

on for two decades with no end in sight. Protagonist Jason Hays is shaken when he realises that he's been fighting the War on Terror for so long, the son of a terrorist leader he killed has now grown up to become a terrorist leader. See Real Life, below.
* SEAL Team, which is why U.S. intelligence missed out on them for a month since they were focusing their investigations on Islamic groups.
* Seal the Breach: Characters are at or travel to a place that has a breach, whether it is a hole in a dam or a gateway to Hell.
* Seal used to have a job putting up prostitute's cards in phone boxes. Annoyingly for him, someone always came round straight after and took them down. I say someone. Jamie Theakston, of course. (He announced it as "I say someone. It's Theakston.")
* Seaman review. The Nerd sets the game so far ahead in time that it seems that real-life time follows suit, as the Nerd is reduced to a skeleton far in the future. Then, time starts reversing back to Christmas 1982 as we go through James' whole history as James and eventually as the Nerd. The very ending has the Gillman and the Nerd's positions switched, with the Nerd in the tank while the Gillman roams free.
* Seaman which differs from many others in that the player can audibly communicate with it, and it has a conversation chain which poses the question of whether it exists. It ultimately decides that it does, because by perceiving and interacting with it, it is directly influencing the player's own ideas and decisions, forming memories in their real brains.
* "Sea Me Now" was dedicated to background painter Julia Kalantarova.
* Sea Mine: A spherical, studded bomb attached to a chain, which floats in the water and goes boom when approached.
* Seamless SceneryDifferent scenes transition into each other as if they're still in one location or linear sequence; characters can literally walk into the next scene
* Seamless Spontaneous Lie: A quick, incredibly detailed and not easily disproved lie.
* Sea Monster: Charybdis and Leviathan are just a couple of many sea monsters found in early myths.
* Sea Monster: Giant aquatic creatures that live in large bodies of water.
* Sea Monster: Gigantic aquatic creatures that lurk around in lakes, rivers, seas, and oceans.
* Sea Monsters (a.k.a. The Ugliest Fish in History) and giant mosasaurs, just to make the sharks look irrelevant.
* Sea Monsters. Exactly what it's like there is uncertain, since those expeditions who return from it invariably find themselves missing most of the memories of the place beyond vague recollections of vast wildernesses and giant marsupials.
* Sea Monsters that had taken up residence on his boat is seen shrieking in panic.
* Sea Monster that is, on closer inspection, still composed of separate fish swimming together.
* seamstresses"). Some of those ladies earn more than the regular guild members because the misunderstanding is so widespread.
* , Seamus and Parvati accidentally walk in on Luna and Harry during an intimate moment. Parvati laments that she could've been in Luna's place until Seamus remarks that he taught Harry everything he knows, causing her to drag him off somewhere private. Really, all Seamus did was share a tip he read in a dirty magazine, having never done it himself.
* Seamus turns over the battle against Dalton solely to Ash after giving him an opening.
* Sean and Carrot do this to each other in a few episodes, like "How Come the Moon Changes Shape?" and "Which Moon is Best?"
* Sean and Jet. At first, Jet seemed interested in Sydney, but this waned and the Jet/Sean shipping was boosted over the course of the show. Jet is very affectionate with Sean, always teams up with him when the situation calls for it, and has a nickname for him ("Seanzo"). They have sung a duet together, danced with each other

at least twice, and Sean finally works up the courage to hug Jet in "One Small Step". In "Lone Star 2 - Rocket Kids!", Sean's character the Shopkeeper all but admits to having a crush on Western Jet towards the end.
* Sean and Sydney were both absent in "Earth Camping", "Sunday Drive", and "Castaway Carrot"
* Seanan McGuire, Aaron jollies Velma into attending Diva's funeral out of respect for the dead.
* Seanan McGuire, Aaron remembers to get blueberry coffee cake for Velma.
* Seanan McGuire, any innocent river rat who saw the amassed crayfish would have sworn off everything for life, just to avoid the chance of seeing something like that twice.
* Seanan McGuire, at one point, going up against the Junior Super Patriots leads to reflections that they are as innocent as those fighting them were, when they were recruited.
* Seanan McGuire books, fairies do not go out in public without illusions to hide them.
* Seanan McGuire containing several characters who are on the LGBTQ+ spectrum.
* Seanan McGuire, others a werewolf) falling in (presumably one-sided) love with a human woman, who's terrified and disgusted by him (at least at first). The song ends on a hopeful note, with him waiting at a movie theater for her.
* Seanan McGuire. (Seanan's the blonde. For the others, see the next two lines.)
* Seanan McGuire series, the alternate universe Velveteen, Marionette, is animating herself based on the life of those about her. Most Marionettes are evil. One is supported willingly by a friend until she defeats the Patriots. This one helps Jackie to deal with how Velveteen brought Tag back — wrong in that it's slowly killing her.
* Seanan Mcguire squad in the first chapter) is the only cheerleader who can always land a perfect back handspring. She also helps her squadmates study for exams and is hinted to like classical literature.
* Seanan McGuire stories, The Super Patriots, Inc. Its attempts to corral everyone drive the plot.
* Seanan McGuire, the amassed crayfish have the mood; all they need is tiny pitchforks and torches to fit the trope exactly.
* Seanan McGuire "The Black Death" argues for the theory that the Black Death was not in fact Y. Pestis:
* Seanan Mc Guire, the first villain, The Claw, almost manages to look not ridiculous, despite the lobster suit.
* Seanan McGuire, the mechanic deduces she can't pay after the coffee house is destroyed, so he won't charge her — the town had needed a masked man to swoop in and deal with the coffee house for a long time.
* Seanan McGuire". The narrator's boyfriend died in a war, but she doesn't care that he's dead, and plans to kill herself so they can be together.
* Seanan McGuire, the train on which the protagonists are traveling crosses through some dimension hole straight into hell ... or, as Jonathan helpfully explains, not quite hell, but some other circle of the underworld. Unusual in that the train stopping would be the worst thing that could happen - they need it to keep going to have a chance at returning to our world.
* Seanan McGuire, this is alluded to when talking about how she got her powers.
* Seanan McGuire, Toby comments on how Luna is generally angry only when she's worried.
* Seanan McGuire, Toby contemplates how she vanished longer than the seven years necessary to declare a human dead.
* Seanan McGuire, Toby is unable to cry the entire day after she realizes that she had been transformed for fourteen years and lost her entire life; only at evening does she break down.
* Seanan McGuire, Toby observes that she's wished for this in the Shadowed Hills.
* Seanan McGuire, Velma remembers how she blushed when Aaron first spoke to her, encouraging her at the auditions.
* Seanan McGuire, Walther's anti-magic topical cream lasts for a year and a day.

* Seanan McGuire, which made his current love a second love, and he willfully ignored that he was in love again.
* SeaNanners. In spite of this, he regularly beats opponents in-game handily and gets to gloat afterwards.
* Sean Astin just by offers of money. Then he was offered a chance to direct at least one short film when he really wanted a directing career. He describes his response to that as "Sold!"
* Sean Astin's distinctive accent for Samwise Gamgee in the films is very similar to one of the most famous (extant) audio narrations of the book, though Astin claims he wasn't aware of the audio version. Eerily, Sam is never actually written with such an accent in the books, making it all the weirder.
* Seanbaby character Fatty, proclaimed that "when you're a writer and you name your fat character Fatty, that's like a writer naming his fat character Fatty."
* Seanbaby comics has the simple-yet-catchy "Kick to the dick" and "Punch to the fucking face!"
* Seanbaby, concluding with an offensive but somewhat pertinent quote: "[What I learned was that] Christian anything sucks more than regular anything."
* Seanbaby. He praises Lex Luthor for his ability to try to make every member of the Legion of Doom sound cool when he makes a roll call.
* Seanbaby in MMA, "there are so many Gracies that teach jiu-jitsu that it's actually sort of an achievement to make up two names and not accidentally pick a real one".
* Seanbaby: "Kids, if there's one thing you take away from River City Ransom, may it be that violence is the answer to your problems. If you beat a gang member hard enough, he will become an honor student. And if you beat an honor student hard enough, he will give you his lunch money. And the final moral is: it's all about good grades and trips to the mall."
* Seanbaby" Luthor noted "Cheetah, you have razor-sharp claws! Brainiac, your mind games are deadly! Scarecrow, you're...YOU'RE MADE OF STRAW!!"
* Seanbaby makes fairly frequent use of this joke; towards the end of
* Seanbaby people sent in letters demanding that he actually review the game itself. Seanbaby's response was: "My review is done: The box isn't very good. If I knew how to review a game based on gameplay mechanics or whatever, me and my Gamecube wouldn't be forced to watch puppets shit every month."
* Seanbaby, Seanbaby theorizes that, after running through the three Legion members with actual powers, he'd swiftly fall into this.
* Seanbaby sense of humor by noting that one entry in his Letterman Top Ten list included no joke other than name-dropping Sammy Sosa. Seanbaby identifies regional sports as one of those crowd-pleasing subjects that gets a big reaction with no punchline, and adds that if Sosa were having a bad season, the gag could have easily been replaced with: "Anyone here from NEW YORK!?"
* Seanbaby terms, saying that he invested so many points into Defense that he wound up with a negative number for Agility, meaning "cars actually swerve to hit him, and it takes him 10 minutes and a person-shaped hole in the wall to get through a doorway."
* Seanbaby, which he describes as one of the worst ideas to make a game about, he says this trope was the reason why the game was made.
* Sean Bean after all, if any character in any series is more or less guaranteed to get killed, it's one played by him.
* Sean Bean (as in all of his roles) that no one else in the films has.
* Sean Bean, but the non-readers sure didn't and reacted with shock and quite a bit of anger.
* Sean Bean lets Morpheus cut his head off because Sean Bean always dies in everything.
* Sean Bean Saves Westeros. Now living as Ned Stark, not just playing him on TV, Sean Bean notes how the ASOIAF characters look compared to the HBO series actors. Many are quite close in appearance, others not. Sean refers to the novel characters as not-Ned (himself), not-Charles (Tywin), not-Peter (Tyrion), not-Michelle (Catelyn), etc.

* Sean Bean Saves Westeros. Now living as Ned Stark, not just playing him on TV, Sean is horrified by the situations he's now thrust into, but he adapts.
* Sean Bean Saves Westeros, they aren't so much wrong as right in the completely wrong way.
* Sean Bean. The majority of the roles Bean has taken over the years end in that character dying (and sometimes not in a pleasant way), and has inspired memes surrounding the trope that have his name on it.
* Sean Bean). This means all of the other Irish characters were this trope. Englishwoman Polly Walker plays the IRA terrorist Annette, though it is revealed in film that Annette is British-born (presumably of Irish ancestry). There have been substantial ethnic Irish communities in England and Scotland for centuries, with many, of course, being involved with Irish nationalist activities in one way or another.
* Sean Bean was assaulted and stabbed with a broken glass bottle in a bar fight. His response? He refused medical attention, patched himself up with the bar's first aid kit, and ordered another drink.
* Sean Cassidy is introduced flirting with a girl, who seems to find him comical more than anything else. He also wolf-whistles at Angel.
* Seanchan have this baked into their entire military. They systematically test all citizens for magical potential and conscript mages to fight as slave soldiers, bound by a magical leash that compels them to obey. They are mostly used as artillery.
* Seanchan obey a complex social hierarchy and get quite irritated when Westerners don't pay attention to it. A Seanchan princess gets driven to distraction by Mat doing unconscionable things like not using her royal title, looking her in the eye, questioning her word,
* Sean Combs, a.k.a. Diddy, a.k.a. P. Diddy, a.k.a. Puff Daddy, a.k.a. Puffy, a.k.a. Sean John.
* Sean Combs was fired from Uptown Records during the early 90's. Afterward he formed his own label, Bad Boy Records. The latter is more or less still thriving while Uptown folded.
* Sean Connery. After he saw the film, Fleming instantly added some Scottish roots into the books as well.
* Sean Connery and Catherine Zeta-Jones dangle from the skybridge of the KLCC Petronas Twin Towers in Kuala Lumpur, Malaysia, in
* Sean Connery (Darrell Hammond) often tormented Alex Trebek (Will Ferrell) in the
* Sean Connery-esque gentleman agent, except that he's also famous for his homosexual conquests and his young male lover Kiki, despite showing no stereotypically gay traits at all and, according to the creators on the Season 2 DVD, transcends sexuality. As Jackson Publick said in his Gentleman voice, "Of course I'm having sex with Tiki. Look at him, he's gorgeous, what the hell else would you do with him?! That doesn't make me gay, it makes me smart!"
* Sean Connery features a doped-up asteroid miner doing this to himself in the opening minutes.
* Sean Connery" Firth (English), and Stellan Skarsgård, a Swedish actor, who has a small role as a Soviet submarine captain sent to hunt down the defecting eponymous vessel.
* Sean Connery, for a fee of £1.2 million, which he used to found the Scottish International Education Trust, an arts funding company for Scottish artists.
* Sean Connery He also donated his entire salary from the role - $250,000 - to charity.
* Sean Connery), he played an Egyptian. Not only was he an Egyptian, but he was an Egyptian who was pretending to be a Spaniard and had at one point been married to a Japanese princess. Who appeared to be a Scot of course...
* Sean Connery, his most notable public appearance afterwards was in 2006, when he received the AFI Lifetime Achievement Award, before passing away on October 31, 2020.
* Sean Connery. However, Connery is only 12 years older than Ford (Connery was born

in 1930, Ford in 1942), even if his baldness and white beard disguises it well.
* Sean Connery however is easily considered as Connery's weakest installment in the series, if not among the weakest of the series in general.
* Sean Connery Is About to Shoot You, as if they were threatening the audience.
* Sean Connery is a literal example: a US Marshal posted to a mining outpost on one of Jupiter's moons.
* Sean Connery named his character after a real-life ornithologist, this isn't too remarkable.)
* Sean Connery named the character John Conner in his book with the hope that Connery would play him in the eventual film version.
* ("Sean Connery Ovipositing 300 Eggs Daily") is a very similar SCP, but in this case the members of each caste turn out to be clones of each of the actors who have played James Bond in the movies, with Sean Connery as their queen bee.
* Sean Connery (played football for Bonnyrigg Rose and also competed as a bodybuilder, finishing third in the 1953 Mr. Universe competition, before becoming an actor)
* Sean Connery's Bond was generally on the more serious side, although not afraid to have fun, go on grand adventures, and crack jokes. As his era went on, things slid more into super spy camp.
* Sean Connery, since the original characters in the Kipling story are not particularly attractive, and Kipling doesn't pretend they are
* Sean Connery's performance in the movies that he made Bond canonically Scottish.
* Sean Connery went the bathtub route to survive a pair of hand grenades in
* Sean does a major jaw drop in "Space Race" after Zucchini uses his new thrusters in the titular race.
* Sean Figueroa, the illegitimate son of Serial Killer. He killed two couples, and a bystander who happened to be present.
* Sean Has a Cold", Sean is said to have a cold, but seems to be fine other than a slight cough.
* Sean Has A Cold", when Jet explains why he chose Earth for his Best Buddy kite, he explains that Earth is round, has air and water, trees, and pie.
* Sean is usually uptight and adamant about going to space the human way,
* Sean, Kieran, Hosea, Lenny, Molly, Susan, Micah and Arthur died off-screen.
* Sean Lock, either as a joke he kept up all evening (claiming that he learned everything he knew about animals from glamour-model Katie Price), or through what he professed to be sincere ignorance, was unable to score a lot of points. Among other "facts", he claimed that Rhinos are dinosaurs, because he thought they were called "Rhinosaurus".
* Sean Lock has a joke about the time he went to a theme pub called The Swan where the signs on the toilets said 'Pens' and 'Cobs', and how he didn't know enough about swan biology to know which he should use.
* Sean Maguire. Few remember that the latter was even part of the series for an episode.
* Sean Majumder played an Arab terrorist on the show, despite being half East Indian and half Newfie.
* Sean Malstrom above, this is probably because of the havoc that would erupt if he were to make his presence known elsewhere on the internet.
* Sean Malstrom came out. This didn't have any effect on his blog post output or his gaming habits whatsoever.
* Sean Malstrom, to be the points when their respective franchises started going downhill.
* Sean Malstrom - writer on the gaming industry, noted for predicting the Wii's success a year before its release.
* Sean McCann was a Canadian actor who was relatively unknown outside of his own country. It wasn't until he died in 2019 that more people got to know who he was, with many fans uploading clips of his work in tribute. In addition, his death increased awareness of
* Sean moment, as his is the first on-screen gang member death of the game.
* Sean Morley's boss. He has stalled out in the police department, largely stopped

caring about the job and just logging time until retirement.
* Sean O'Cann, somehow he managed to wind up as slightly brusque and somewhat sarcastic. The difference is such that without the name you wouldn't be able to tell it was the same character.
* Sean Penn had been so drastically reduced that he wondered why Malick had kept him in at all.
* Sean Penn. He wrote them an angry letter where he invited them to accompany him on a trip to Iraq so he could show them how great it was when he previously visited it.
* Sean Penn how he sent his daughter up to her room so that he could get a few minutes alone with her first boyfriend. He attempted to be intimidating but didn't really do a good job of it. Penn noted that even if he really wanted to, he wouldn't have been able to intimidate the boyfriend because he was much larger than Penn and an MMA fighter to boot.
* Sean Penn in the aforementioned war pic with Michael J. Fox, still very young then.
* Sean Penn reportedly once caught a paparazzo hiding in his hotel room and proceeded to dangle him from his ninth floor balcony.
* Sean Penn, when "everybody knows the capital of Cambodia is... not Sean Penn." (This isn't actually as foolish as it seems since Sean Penn sounds similar to Phnom Penh.)
* Sean Pertwee was actually drunk for this scene; the first punch was a stage punch, the second was an actual punch that actually did drop him. That little pause after it connects is everyone wondering if he's alright...
* Sean Ramsey's movement also invokes this idea, claiming those immune to the virus like him have been "chosen", so his aim is to breed a master race immune to
* Sean Rowley, lead singer for the synthpop band Cause & Effect, died from heart failure brought on by a severe asthma attack during a soundcheck in Minneapolis in November 1992.
* Sean Schemmel's limited materials for the series, most people working on the show were unaware of what was going to happen next.
* Sean Schemmel was dubbed in English Schemmel was the original voice of Flaste Schole in the first half of the series; during the second half he was replaced by Seitz.
* Sean S. Cunningham, the producer-director most famous for creating
* Seans Show; the main actor/character (Irish comedian Sean Hughes) knew he was starring in a sitcom and what sort of plots he could expect as a result.
* Sean Taylor, the free safety for the Washington Redskins (now Washington Football Team), was shot and killed in a home invasion on November 27, 2007. In their next game on December 2 against the Buffalo Bills, Washington's first defensive play
* Sean Tevis, who actually is running for Kansas State Representative on internet donations:
* Sean Waltman (retired at age 47 in 2019; had been semi-retired for several years before)
* Sean Waltman who, like Shawn Michaels, is small for a wrestler. He has a very raspy, baritone voice, probably brought on by age and years of marijuana use since his voice used to be a bit higher, though still low for a guy his size.
* Sean was a great guy and good for Elliot, making JD's jealousy put him in a bad light. Sean however picked up on JD's feelings and called him on it, resulting in JD (for a while, anyway) respecting the relationship, albeit not too happily.
* Sean William Scott's character does this in a post-credits in the movie
* Sean Williams is the origin of the phrase "Murdering Twinmaker", which in the novel is both a nickname for the teleporter and the nickname for a serial killer who uses the data in the sending teleporter to create his own copies, which he murders for pleasure.
* Sean Williams resulting when people travelling via the new method arrive at their destination years before people who set out at light speed before the new method was devised.

* Sean Williams series features both this trope and its inversion, of a sort, with the advent of Overclocking. Most individuals have the ability to alter their relative perception of time, meaning that their relative movement etc will increase as well. This means that a person perceiving time normally would see only blurs moving around them as people overclocked in the same room. (The inversion is that the overclocking can run the opposite way: a person who reduces their "tempo", or a normal "tempo" from the perspective of an overclocking person, will be perceived to be moving incredibly slowly, if not at all, although they are in fact simply operating at a much lower relative speed.) However, moving when overclocking is extremely damaging to the body; bones can be broken by bumping into a wall, or landing badly, and the friction of movement can ignite clothes and materials. Light becomes red- or blue-shifted, too, so this one is actually pretty realistic, relatively speaking.
* Sea of Corruption. The very air is full of poisons that kill any humans that breathe them in, and giant insects that can shrug off modern day weapons.
* Sea Of Dreams, one short centers around a group of five friends spending a day together at Tokyo Disney Sea park. The story is narrated by a boy who has unrequited feelings for a girl dating another guy in the group. Throughout the short, it is revealed that all five teens have unrequited love for another in the group, but no one really acts on these feelings and life goes on.
* Sea of Monsters, Percy Jackson and company use "Attack Plan Macedonia" on the Cyclops Polyphemus. It doesn't work so well for them.
* Sea of Silver Light incarnations in this world, into monsters. Jack grows immensely tall and thin while his arms grow to impossible lengths.
* Sea Org. The church claims the commitment is merely symbolic and not legally binding, since admittedly it would be rather hard to enforce.
* Sea otters are known not only to use rocks to open or pry free shellfish, but also keep a preferred rock in a flap of skin analogous to the human armpit; keeping tools might be an even greater technological leap than merely using and discarding a found tool. They also have been seen using kelp as a net to hold crabs, or as a cradle for their pups.
* Sea otters often hold hands when they're sleeping, to avoid drifting apart due to the ocean current.
* Sea Patrol 2Dads sinks into a pit, briefly going under before he's fished out by a team member. It's described as 'swamp', not quicksand, but it works the same way and when he falls in he's immediately buried up to his chest.
* Sea Patrol feel like this though it's subverted by Kate knowing this and NOT being happy with it and she calls him out when it gets too far.
* Sea Patrol is a very snarky Communications officer. He does go on boarding parties and is the best person with software.
* Sea Patrol. Lt Kate McGregor, apply nicknamed "XO," is second in command and the leader of the boarding parties.
* Sea Patrol. On at least one occasion this ended up driving the plot of a whole episode when he got dumped in the middle of nowhere and left to walk back to the harbour by some locals in revenge for cleaning them out, only to end up witnessing something that lead the crew to uncover a smuggling ring.
* Sea Patrol saves the day, the Captain came down to her cabin to check on her condition; she didn't wake up when he arrived, and he was greeted with "I don't believe in pre-marital soy sauce!"
* Sea Patrol. The Big Bad of the episode wastes the only kidney aboard which matches a current order in the process of capturing two of the crew. One of them is the right blood type...
* Sea Patrol Then there's his believing that Bomber fancies him after she gives him a peck on the cheek, and him not wanting to take credit for saving her life because she told him not to go near her.
* Sea Princesses: In "The Big Game", Maurico, the Urchin Prince, is looking to form a team in the Flubberball Little League. Ester is the best player around but Maurico refuses to have a girl in his team. Ester plans to form her own team for the League.

* Sea Princesses: In "The Crush", Ester thinks love stories are ridiculous. Well, maybe it's not so ridiculous when Ester is struck with a crush for the new boy Caton.
* Sea Princesses: In "The Dingleberry Mystery", a huge food fight is happening in the school. Miss Marla calls everyone inside and demands an explanation for what happened. Tubarina is identified as the one who seemingly started the fight, but she tells her that she didn’t; she was just sitting down to eat her lunch when the dingleberry hit her out of nowhere, causing her to throw her lunch in the air, which lands on Vivi, Leia and Marli.
* Sea Princesses, Isa, the Princess of the Penguins, was afraid of water, but with the help of Santa Claus, she overcame her fear.
* Sea Princesses — An Australian/Brazilian/Spanish co-production.
* Sea Princesses shirtless scene in this case. Marcello is always seen bare-chested. (It also applies to some of the other princes, but Marcello gets the most screen time.)
* SeaQuest (a black woman) to immediately replace her with another. This was the last episode before the series was cancelled, though.
* seaQuest crewmembers is arrested by Macronesian forces "trespassing" in a recently-annexed territory. She thought she was in a free territory.
* seaQuest DSV. A French leisure submarine was lost and the SeaQuest was sent to investigate. Their findings? Small underwater caverns were filled with fresh water, and they caved in like undersea potholes. Rather than aerated water causing the issue, the freshwater mixed with the sea water and desalinated it through dilution. This made the vessels too heavy to remain buoyant in the brackish zone, and they fell to the bottom of the freshwater pockets, unable to escape as their oxygen dwindled.
* seaQuest DSV, and a host of other types for various bad guys forces.
* seaQuest DSV and even tries to train him a bit in using them. This is the last we hear of his powers, though.
* seaQuest DSV appears as the father of Michael's character, and David DeLuise has a small cameo.
* seaQuest DSV available, though, and seems to hold a position and legality roughly akin to that of Cuban cigars in the U.S. today.
* seaQuest DSV began with the titular submarine being found in the middle of an Iowa cornfield. Aliens did it.
* seaQuest DSV by killing the prison warden and putting him in the freezer instead.
* seaQuest DSV, Captain Hudson shows a map of the aggressive Macronesian influence. He asks Lucas when his birthday is then asks the computer to predict its extent by that date. The map changes to show a much larger area.
* seaQuest DSV, Commander Ford relieves Captain Stark of duty as she's about to launch a nuclear strike without just cause.
* seaQuestDSV crewmembers and head to a Native American reservation, where it's revealed that the aliens have been to Earth before, long ago, and made contact with a Native American tribe.
* seaQuest DSV, Darwin the dolphin is able to communicate with his human crewmates using a device that Lucas built. However, due to the abstract nature of a dolphin's thought processes, his communications aren't always clear.
* seaQuest DSV discovered evidence of Atlantis. More plausibly, an early episode had them excavating a ruined city off the North African coast that had been submerged after an earthquake.
* seaQuest DSV doors and hatches. Going red alert on the SeaQuest includes closing all kinds of hatches, so they show this off a lot.
* seaQuest DSV episode after TNG ended, an alien race arrives in a ship whose design was quite obviously lifted from that of the Borg Cube.)
* seaQuest DSV episode has a large sub pulling this to capture UEO transport subs.
* Seaquest DSV featured a giant, fire-breathing worm that lived in underwater caves.
* seaQuest DSV, first through second seasons: Nathan Hale Bridger (though he left), and Oliver Hudson (seaQuest 2032).

* seaQuest DSV), genetically engineered warriors whose very existence was outlawed before they were a year old, and are exiled to life on a prison island. They are freed by the end of the episode, while one of them (Dagwood) joins the main cast.
* seaQuest DSV had an episode in which mecha fighting in a post-apocalyptic future were controlled by kids playing video games.
* seaQuest DSV had an episode that explains ship disappearances in the region are specifically caused pockets of fresh water in limestone aquifers, and occasionally, they would breach, with catastrophic results for anything above them due to density differences between salt water and fresh water.
* seaQuest DSV had himself implanted with gills to allow him to breathe underwater. Apparently, he is also able to survive at great depths.
* seaQuest DSV had the crew holding a brief memorial for the staff of an underwater facility who had died several years previously.
* Seaquest DSV had the HR (Hyper Reality) Probe, a vaguely crab-like ROV that the ship's engineer could operate by means of a VR headset and haptic gloves.
* seaQuest DSV has a police officer in one episode with a sneaky lie detector. He hands people a roughly pen shaped object, tells them it was found at the scene and asks if they have any idea what it could be. After they answer in the negative he proceeds to ask regular questions. The device is actually a lie detector which he owns and he is tricking them into holding it while being questioned.
* seaQuest DSV introduces the Chao-Dai (or Chaodai), a group of highly skilled subfighters with highly advanced technology. They seem to be regarded as terrorists by the UEO and Macronesians, but very little is known about them.
* seaQuest DSV is able to talk due to a translation machine Lucas has built. That doesn't make him any easier to understand, though.
* seaQuest DSV is available but the older generations find it to be a poor substitute.
* seaQuest DSV is controlled by an operator wearing a pair of futuristic VR goggles, which allow her to see the surrounding environment in 3D.
* SeaquestDSV it's revealed that Katie Hitchcock and Ben Krieg married right out of the Academy, then divorced a year later due to incompatible personalities. They wind up assigned to the same ship, but Katie's now Ben's superior officer. Their relationship is best described as friendly/wary (within the bounds of military protocol), but various episodes have shown that either will go out of their way to help/protect the other.
* SeaquestDSV, it's revealed that Katie Hitchcock and Ben Krieg married right out of the Academy, then divorced a year later due to incompatible personalities. They wind up assigned to the same ship, but Katie's now Ben's superior officer. Their relationship is best described as friendly/wary (within the bounds of military protocol), but various episodes have shown that either will go out of their way to help/protect the other.
* seaQuest DSV Lt. Timothy O'Neill, who both is fluent in most existing Earth languages and occasionally helps figure out ancient ones, though even he has his limits.
* seaQuest DSV, mainly after being released from police detention cells.
* seaQuest DSV, meat (and most fruit) are genetically grown because "cow farts were messing up the ozone layer." When the LT Krieg brings out a block of actual ground beef he had hidden, whiz-kid Lucas comments it's "dead cow." Krieg comments that "you haven't lived until you've had it, roasted over an open fire." The same episode shows a number of staff officers eating a roast beef lunch, and the tone of the scene suggests it's the customary way to grease the wheels of negotiation in the upper echelons of society.
* Seaquest DSV: Nicknamed as "Voyage to the Bottom of the Ratings", the submarine focused show's fate seemed certain. Declining ratings due to deteriorating writing and sports pre-emptions led to season 2 almost being last, with the season finale blatantly supposed to end the series - the embodiment of "going out with a bang". Behind the scenes, the planned replacement series (described as being "just awful") fell through, leading to a last-minute renewal and an overall sense of "let's get past this as quickly as possible" in the truncated season 3. Even with the renewal

and improving critical praise, the planned full 3rd season was cut in half and the show sank to a watery grave.
* seaQuest DSV of sorts, and, by saving the future, they're ensuring their own past.
* seaQuest DSV on offer doesn't yield alcohol when mashed and distilled, a failure Lucas teases him for.
* seaQuest DSV takes over from Captain Bridger, he insists that the titular sub is now a warship and is no place for civilians. To stay aboard the sub, Lucas asks Hudson if he can stay if he enlists into the navy. Hudson agrees, and Lucas is given the rank of ensign. That's right, a civilian scientist with no military experience is immediately given an officer rank and starts serving aboard the sub without even having to go through bootcamp. Later, an ex-con gets the same treatment and immediately becomes a sub-fighter pilot.
* seaQuest DSV thanks to a translator device hooked to the ships computer, and is considered an honorary ensign in the Navy. A few episodes involve them telling Darwin what to do, such as "playing" with automated submarine drones, causing them to crash into each other.
* seaQuest DSV. That setting had some potential—the ocean floor was heavily enough colonized to have a full range of human activity for the characters to have adventures with—but the writers weren't up to it. The show did have its moments.
* seaQuest DSV the crew are exploring an ancient alien spacecraft. One of them brings up a science fiction story he read as a kid that was about a similar situation, except the ship hadn't really crashed. The characters in the story were trapped when the ship took off again and dissected.
* Seaquest DSV the dolphin Darwin has his communication translated by a computer, which works fine for simple concepts like physical objects and transitive verbs most of the time, but the difficulty in translating abstractions is a frequent plot point. At the end of one episode, the computer gives a mystifying translation "Darkness fills" for something Darwin said. Captain Bridger muses that this might be an attempt to communicate a complex concept like an emotional state which the computer is unable to interpret sufficiently. In another episode, an illness temporarily makes Darwin able to communicate telepathically; the communications officer mentions that he's fluent in several languages and can get by in several more, but Darwin's thoughts "feel like it's coming at right angles."
* seaQuest DSV: The episode "By Any Other Name" has the crew arrive at an underwater research station where the crew has seemingly vanished, but they find strange piles of dust all over the place. Throughout, people keep disappearing, leaving more piles of dust. The culprit is eventually found to be some genetically engineered plant that suck the water out of people, leaving just dried piles of dust. It's about as silly as it sounds.
* seaQuest DSV. The original featured a rather low-key alarm klaxon and the 1MC call "General Quarters, all hands to battle stations," along with stock shots of watertight hatches sealing throughout the boat. The second season played the trope to the hilt, adding in lots of flashing red lights and making the siren painfully loud.
* seaQuest DSV. There is also a small but powerful aquatic Asian nation called Chaodai. Had the show not been cancelled, the Chaodai would've become a third power, able to rival the UEO and the Macronesian Alliance.
* seaQuest DSV, UEO personnel carry a sonic disruptor as their standard sidearm.
* seaQuest DSV use water showers, but they're rationed. The woman lets the newcomer use one of her shower rations. The strange thing is, they're underwater, which means they should be able to get fresh water through desalination. Then again, with hundreds of crewmembers, it would probably be too much for any system, hence the rations.
* seaQuest DSV was partially organic. One episode even dealt with a biological infection of its hull/skin.
* seaQuest DSV Wedgie. At least in the first season, they were real-life Negative Sea Wedgies (fresh-water sinkholes, black smokers, etc). Then they started finding

alien spaceships and psychic energy vortices on the ocean floor.
* seaQuest DSV where some of the crew meet a group of space aliens, yielding this quote: "We are all that remains of our world, a planet taken by our own hand, leaving nothing but the knowledge that self-destruction is a fate sealed in the genes of all life-bearing worlds."
* Search and Destroy will be arrested, then transferred to a maximum security prison where he can be killed. He demands the right to a phone call, but Samaritan has altered the record to say he's already had his call.
* Search and Do Not Destroy" and so sets out to break them up. To this end, she arranges for first Trent and later Gwen to come to the Dock of Shame. Heather keeps Trent busy until Gwen approaches and forces a kiss on him for Gwen to witness and assume that Trent is cheating on her. Gwen leaves in tears and while by the end of the day Heather's manipulations come to light, it isn't until after Trent has already been voted off for being a two-timer (Heather has immunity that day and couldn't be voted off).
* Search and Do Not Destroy", because a relationship equals an alliance and that's competition she can't afford. So she arranges for Gwen to walk in on her and Trent kissing by means of a fake letter. She lures Trent to the Dock of Shame and tearfully spits out lies that Gwen confessed to the other girls that she dislikes Trent and only uses him to get ahead in the game. Heather kisses Trent when Gwen shows up, making her believe that Trent's unfaithful and letting Trent believe he's being used while ensuring that neither would want to talk to the other any time soon. Due to her meddling, Trent is voted off that evening, but the truth also comes out and the two resume their relationship.
* Search and Rescue having been searched exhaustively before. There's also inexplicable staircases dotting the park. Don't touch them, by the way, something horrid happens whenever someone messes around with them. Best case scenario, you die. The higlight of the weirdness is that time the protagonist found the front half of a whale lying in a clearing (no bowl of petunias, however).
* Search and Rescue: the "crying" is the same sound over and over again, like a song on repeat. He wisely nopes out of there.
* Search and Rescue Woods series, the protagonist hears a crying child, and goes to investigate. He then notices something wrong: the "crying" is the same sound over and over again, like a song on repeat. He wisely nopes out of there.
* Search and Solve: If you get lost, then the final world will turn into this.
* Search announced in the control room (and in the hearing of the agent, too, thanks to the comm gear he wore), leading to a number of running jokes. In the earliest episodes, the technician who did this had a distinct jealous streak; eventually, she somehow got out of the control room and ended up as Girl of the Week for one episode, after which she vanished.
* Search by the end, but their last interactions suggest they might start dating again in the future.
* Search By The Foundation": When the First Foundation starts to become complacent with the idea that the Second Foundation won't let them fall, the Second Foundation convinces a minor dictator, one with just enough strength to threaten the First, to attack them.
* Search by the Mule bothers him. His biggest concern is the way the Mule has described those who have undergone the brainwashing are somehow less capable than before the brainwashing, and being less useful to the Mule than someone who hasn't been brainwashed bothers Pritcher.
* Search by the Mule). Dr Asimov was an emigrant from Russia and wrote about robots.
* Search by the Mule": The Foundation has designed a device called the Lens, which acts as a viewscreen for the ship, but also has the coordinates of every star and planet stored as data. It allows the characters to view the stars from any perspective, and you can "zoom in" to any star, instructing the device to calculate the path. This significantly cut down on the time it took to prepare a hyperspace jump.
* Search: Da-jeong has a daughter and is part of the search team. One of the

reasons she joins the team is to protect her family.
* Search: Dong-jin and Ye-rim dated and broke up before the start of the series. This makes it awkward when they find themselves working together in the search party.
* search engine humans is a story about the birth of a panda cub for a query regarding human gestation.
* Search for "Dennys Brawl" and at least three different viral videos will pop up depicting nasty fights witnessed in the diner-chain. They must be putting something in the
* Search for Dinosaurs, you meet some impressively large dragonflies in the Triassic period.
* Search for Redemption to kill Mathayus and trades blows with Princess Silda.
* Search for Spock, Kirk tries to save the Klingon commander from falling into a lava field. Of course, Klingons being Klingons, the commander tries to drag Kirk down with him; and gets kicked off.
* Searching, David finds a comment of a kid making gross comments about his missing daughter, tracks him down and starts a fight with him. "Crazy Dad at Theater" quickly goes viral.
* Searching "do the harlem shake" on YouTube will cause the web site
* Searching for Bobby Fischer, also has a black belt in Brazilian Jiu-Jitsu.
* Searching for Bobby Fischer) Fred Waitzkin writes a bit about a chess club in New York in which the same players played over and over against the same opponent for months or years on end. They would make moves out of habit more than out of any real innovation or thought, but they had no desire to play against anyone else.
* Searching for Bobby Fischer, the rival chess prodigy in the chess tournament is played by an actual chess prodigy since "it was easier to teach a chess player how to act than it was to teach a child actor how to comfortably play speed-chess".
* Searching for Bobby Fischer with his son that it would be better to let his son play a brainy boardgame than try to force baseball onto him. And when one of his teachers tries to discourage Josh from playing chess, Fred tears her a new one.
* Searching for David's Heart: At a concert, a jealous Darcy watches her brother David and his girlfriend Jayne kissing from the shadows. Then, she overhears how the necklace that Jayne (whom Darcy didn't invite to her birthday party) gave her as a gift was actually Jayne's own idea, not David's idea like Darcy had previously thought. Darcy finally steps out of the shadows, and eventually ends up triggering her brother's death.
* Searching for Dragons, Mendabar has only one servant - an elf named Willin. Unfortunately for him, Willin is hellbent on fixing stupid things like Mendabar's dungeons and torture chambers not being properly stocked (as Mendabar notes, they haven't used those rooms for ages). He also keeps trying to arrange meetings between Mendabar and "proper" princesses, which angers Mendabar so much that he threatens to stick Willin in the rack he wanted to have bought, just for suggesting it.
* Searching for Dragons! The kid will hate it, but it won't actually harm him, so the uncle can appease both the society and his conscience.
* "Searching for Gordon Freeman": While having a private discussion about the fact that the cameraman doesn't know how to edit, Dave decides they can work with it, doing everything in one take, as long as there are no screw-ups. Then, "Is that on?"
* Searching For The Golden Eye, and even uses the 007 theme's chord progression during the verse.
* Searching, it turns out two of Margot's friends who she still keeps on Facebook and in her contacts, Abigail and Derek, are this. Abigail admits to David that she is just using Margot as a fake best friend so she could get into Berkeley while Derek is just exploiting Margot's disappearance for his own petty ends.
* SearchingLyoko, founder of Code Lyoko United and a well known member on
* Searching the Stalls: Searching for someone hiding in a bathroom stall.
* Searching the storage compartment in one's own escape pod, as well as the wrecks of other escape pods and the wreck of the ship the player escaped from in

* Search: Leo, Dong-jin's German Shepherd, is very friendly. So is Mac, Leo's replacement. The flashback to Dong-jin playing tug-of-war with Leo is one of the most heart-warming scenes in the series.
* SearchMan.exe can summmon a small one as his most damaging attack in the
* Search: Min-guk intends to report the truth about how North Korean soldiers opened fire on his group and a North Korean deserter, even though the incident would get him and the other survivors dishonourably discharged. Lee Hyeok shoots him to prevent this.
* Search Party about a group of narcissistic Brooklyn hipsters whose efforts to find out what happened to a missing college acquaintance grow increasingly fraught as they become mired in deceit, conspiracy, back-stabbing, and cover-ups.
* Search Party are portrayed by real-life twins Phoebe and Claire Tyers.
* Search Party: At first Dory appears to be a fairly normal but bored woman going through a post-graduation identity crisis. As the series progresses, however, it becomes clear that she has low empathy, no sense of self, and enjoys manipulating people. She also starts having hallucinations. Based on her interactions with her parents, it's possible that she's always been this way. Her symptoms easily fall under the bounds of cluster B personality disorders.
* Search Party in the fourth season. All of the seasons are highly satirical however.
* Search: Played with. A jeep hits a tree, doesn't explode, and doesn't look like it's badly damaged. The driver has time to climb out and walk to safety. Then a massive fireball abruptly engulfs the jeep.
* Search: Ten-year-old Su-yeong has a crush on twenty-eight-year-old Dong-jin. In their very first meeting she tells him she wants to marry him, so he'd better make a lot of money, and laments he wasn't born later.
* Search, the hi tech detective agency's mission control was manned by an ensemble cast, while the role of field operative switched among a trio.
* Search the Seven Hills is actually a retired Roman general and ex-governor of Antioch, one of the Empire's wretched hives of scum and villainy. He can even make Christians shut up with a stern look.
* Search: These zombies are the "caused by a virus" variety. They're very strong and very fast, and the murderer in particular is smart enough to follow and attack people while staying out of sight. Cutting their medulla is the only way to kill them.
* Search were filmed, but for obvious reasons it was impossible to film them on location.
* search-wise.net, a domain name intentionally reserved for use as a Brand X search engine.
* Seargeant Johnson, a Renegade Space Marine who is a defector to the Tau Empire. While he has turned his back on the Imperium, he has not forsaken his humanity. The Greater Good resonates with his ideals of courage and honour just as deeply as, if not more than, the Imperial Creed.
* Searing Spell is a feat you can apply to Fire spells to make them ignore Fire resistance, and partially BYPASS FIRE IMMUNITY! It burns so hot it can burn things that can't be burned!
* Sears 2011 after Christmas sale had a guy calling a woman and saying that he heard her husband got her a snowblower. She replies with a game attempt at sincerity that "it's cute." He tells her she can get what she
* Sears and Zemansky's University Physics" (or Throcky) who skateboards on frictionless ramps and plays with clotheslines for fun.
* Sears has an in-store ready for pickup service after you ordered online. If the associate doesn't deliver your merchandise within 5 minutes after you input your order information, you receive a coupon good for the next in-store purchase.
* Sears has a very famous series of advertisements for home appliances that went like this.
* Sears Optical uses this several times with people who need glasses:
* Sea Salt is a pixel-art action-strategy game where you play as Dagon (who is depicted as being more akin to Cthulhu) and control a variety of monsters to ravage

a city after the Archbishop refuses to offer himself as a sacrifice.
* seas composed of a mix of ethane and liquid methane rather than water, and reflect the orange-brown sky. Needless to say, it is not an environment that would be well suited for human life.
* Sea Scouts, Donald orders his nephews to hoist the sail on his ship, but they raise the boom rather than actually unfurl the sail. As Don commands them to lower the boom, they accidentally let go of their rope, causing it to drop onto their uncle.
* Sea Serpents: Aquatic serpents/reptiles that are often considered related to dragons or a subcategory of dragon.
* Sea Serpents: Large aquatic creatures with snakelike bodies, including overgrown eels.
* Sea Serpents that swim in their seas of their homeworld and which they revere as holy.
* Sea Shepherd Conservation Society whereupon the nose art changed to that of a woman bearing a trident and the organization's flag.
* Seasick Steve is a folk singer who used to be a hobo. He plays a three-string guitar.
* Seasick Steve's regular appearances on Jools Holland's Hootenanny made him popular.
* Sea Snail Studio, has worked since 2012 on webcomics, but his real-life identity has always been a mystery. The only thing known about him is that he comes from Mexico and that he is male. Maybe.
* Season 10-11: After being cleared, Booth is struggling to trust. Brennan gets pregnant again but the news causes Booth to fall prey to his gambling addiction after an undercover case. Brennan kicks him out until she can trust him again. They try to retire but it doesn’t last. Booth tries to help his brother but his brother is killed and Booth disappears trying to stop the sale of a list of undercover agents. He’s wounded again.
* Season 10 also had Miz Cracker, a comedic queen and a fan favorite who had just won her first challenge the previous week, she ended up being eliminated on her first week in the bottom two up against Kameron Michaels, who was on her third consecutive lip-sync.
* Season 10: Crowley and his mother, Rowena, are set up as being this throughout Season 10, but their alliance falls flat midway into the Season.
* Season 10 did this with the introduction of Chloe, a girl that Timmy has to share Cosmo and Wanda with, with said season seeming to ignore ALL the movies.
* Season 10 episode "200" has a whole segment re-imagining the show with marionettes.
* Season 10 episode "Lost and Found" has the team assuming that dear old dad had knocked up his own daughter with their son/half-brother before disappearing.
* Season 10 episode "The Wild" has Claire, Gloria, Haley and Alex helping a pizza guy make his delivery in under 30 minutes after they accidentally hurt his leg. Turns out the guy is constantly harassed by a frat house that throws obstacles in his way, which the quartet successfully navigate in their own ways.
* Season 10 featured a two-parter entitled "Cartoon Wars," which focuses on
* Season 10 gives us an instance of "Bad Angel, Worse Angel" when Gamma and Sigma team up to dupe Carolina into
* Season 10 had Vanessa Vanjie Mateo, eliminated on the premiere episode up against Kalorie Karbdashian-Williams. The edit of the episode, as well as the critiques, lead to fans believing that Kalorie was the clear choice for the first elimination, that is until the lip-sync happened. Kalorie ended up completely turning it out, and Vanessa was sent home much to the shock of the fans. Luckily for Vanessa, her memeable exit and the fan-reaction led to her returning the next season and just missing out on the finals.
* Season 10 pretty much sums this up when he uses all of his past tragedies as a hunter who lost almost everything he's ever cared about and becomes
* Season 10 reveals that the AI Sigma used to belong to Carolina, and it was her decision to give him to Maine that set off the entire

* Season 10's "Make Love, Not Warcraft" has the boys drinking Rockstar Energy Drinks and eating Hot Pockets while playing
* Season 10 went ahead and topped that with an even more unlikable cast. To start off, the author brings back hated characters like
* Season 11 introduces Locus, a mercenary working for the Federal Army of Chorus. Unlike Tex,
* Season 11's Chris Shockley had quite a shocking elimination as well, as (up to that point) he was the only member from team Christian to win an elimination challenge, as well as the only member of his team to avoid the bottom until then. The most shocking part, however, was the way he was eliminated: he lost a head-to-head against Teej Poole (one of his team mates), who, during the subsequent elimination face-off, started to advocate for the other two members of the bottom three to stay (both members of team Christian as well), essentially stabbing Chris in the back. Chris was
* Season 12 actually answers this. Crowley got his hands on it shortly after the aforementioned unsuccessful attempt on
* Season 12, "Genetic Disorder". Mother does it with son, gets pregnant, dumps off baby to hide it. The kid goes
* Season 12 gives us the two sides in the civil war on Chorus, the Federal Army and New Republic. The war has been going on for so long that most of the worthwhile soldiers were already killed. To put it lightly, these guys look up to the Blood Gulch Crew, which tells a lot about their standards. Most of the actual fighting is done by mercenaries,
* Season 12 had Rock M Sakura, a fan favorite from the minute the cast was revealed. While fans thought her effervescent personality and strong runway looks would carry her to the finale, Rock ended up being eliminated on the fourth week, placing twelfth overall. The fan outcry following Rock's elimination was astronomical. To a lesser extent, eighth-placer Jan was also a shocker, with fans believing she didn't deserve to be in the bottom two over frontrunners Gigi Goode or Sherry Pie, although they admitted that Jan was beaten in the lip-sync fairly by Widow Von'Du.
* Season 12 has taken this trait and amped it up to 11, to the point of where every scene is comedic.
* Season 12 has two for the price of one! First, Locus is working for a third party to
* Season 12 reveals that both of the two factions on Chorus, the Federal Army of Chorus and the New Republic, are being manipulated by Locus and Felix into fighting each other. The two mercenaries are also revealed to be working for an unseen person going under the alias of "Control," revealed at the end of the season to be Malcolm Hargrove, CEO of Charon Industries.
* Season 12's "A Cricket's Tale" shows the previous two episodes, "PTSDee" and "The Gang Tends the Bar" from Cricket's perspective.
* Season 12's "Grimm Job," where in the end, it is implied Meg hung herself. Peter ignores this, simply tenderly telling her good night.
* Season 12's "The Great Money Caper" features the Simpsons at a restaurant featuring a magic show. Marge is given a Long Island Iced Tea (served in a tall glass). She decides to nurse the drink but ends up drunk.
* Season 12 takes this trope, and ends up deconstructing it. Two soldiers dressing as the enemy works okay for the regular guards, but
* Season 12: The son of a warlord Booth killed as a sniper seeks revenge, torturing and killing several people and attacking the safe house Brennan’s dad and the kids are at. Her dad dies fighting to save his grandchildren and the attacker is caught. However, he escapes while everyone is focused on Cam’s wedding and blows up the lab with explosives, causing Brennan a head injury and resulting in a final dramatic battle as the series ends.
* Season 12 was an experiment at more arc-based plotting, as an attempt at
* Season 13 ends just after Epsilon does a speech on how he's making an
* Season 13 even gave the judges the possibility to prevent this trope, by giving them "Pardons", which could be used to save a single candidate from elimination.

These "Pardons" were well-used, as one of the pardoned artists made the top 3 eventually (while she would have fallen under this trope otherwise).
* Season 13 had Denali, a fan favorite and powerhouse performer who had won one of the first challenges and delivered a well-received lip-sync performance early on. Fans expected Denali to demolish her lip-sync against Olivia Lux, however, clearly she was restrained by her gown and as a result her performance fell flat, leading to her surprising elimination in eighth place.
* Season 13 has Tristan hooking up with his English teacher Mr. Yates, though Maya ends the relationship by telling principal Simpson about it.
* Season 13 has two episodes that take place during the Super Bowl, the first focused on Charlie and the second focusing on the rest of the Gang
* Season 13, In a plot that seems to be blatantly following this trope, basketball player Miles and his best friend are shown taking photos of and carrying Zoë (who is inebriated and unconscious) into the pool house where she is later recorded being raped by unknown assailants, resembling the Steubenville rape case.
* Season 13 shows the shapeshifter Mia Vallens. She is one of the few benign monsters in the series. And also the daughter of a male human and a female shapeshifter.
* Season 14, Episode 2: Grif and Simmons are paired up with another recruit named Hammer for a "special" scouting mission, exploring a base that was attacked by Blues. Hammer wants to get in closer to search the base, but the other two shoot him down by saying they already have enough intel from watching via sniper rifle and can go back to base where it's safe. Hammer charges in anyway and get himself blown up by an IED the Blues had set up.
* Season 14 episode "Sexual Healing" has this as its basic plot, with nearly every man in the world pretending this is not the case and that the rich, successful men who go out and have sex with as many women as possible are suffering from a disease.
* Season 14 route. Season 17 is regarded as a return to form with solid character interactions and development, as well as giving the arc a proper wrap-up.
* Season 14's "Helter Shelter" was the final episode aired to be animated with cels before transitioning to digital ink and paint.
* Season 15, and people welcomed the change, finding him funnier and more bearable.
* Season 15 had Zev & Justin, who, when compared to similar editing of teams in previous seasons, appeared to be set up for a run late into the race, including a burgeoning rivalry with Maria & Tiffany, that is until they
* Season 15 has "Every action has an equal and opposite reaction." They're the first words spoken in Episode 1, and they're spoken again when
* Season 15 spent the first half being typically silly until the episode "You're Getting Old" as Stan goes through a fall out with friends and major changes in his life and unlike previous episodes with a breakup, it doesn't get better by the end.
* Season 16 gave us Brent & Caite, who's fighting and yelling gotten them deemed
* Season 16 revolved around the Doctor's needing to gather and assemble the pieces of "The Key to Time",
* Season 17 had Claire trying to topple a knight's armor with watermelons thrown from a slingshot. One of the watermelons backfired and
* season 17 with Liz and Julia as part of the BB Takeover. However, the cast was well aware of the Twin Twist.
* Season 19 could be considered a whole season of these very few episodes focused solely on the boys and if anyone could be considered the main character of the series it would be
* Season 19 has the town attempting to gentrify itself, contrasting the noble, politically-correct posturing of its residents with their still-clueless and selfish mindsets.
* Season 19 in particular gave a lot of minor characters focus as it went on. "
* Season 1: All the main character convene at Hershel's farm but are kicked out when Walkers breach the farm and kill his son. After hooking up with some more characters, they hole up at an abandoned motel for a few months, with a brief hope

spot when invited to a farm, which turns out to be run by cannibals. Though eventually forced to flee the Motel when bandits and Walkers make it no longer safe. After some travels, they come across Crawford which
* Season 1 and two had Eddie (suddenly pierced with a wooden floorboard) and Gabe (
* Season 1 as a whole has become this as of "Cigarette Ash", if this line from RM is any indication:
* Season 1 at the tournament: Johnny did a fantastic job of training his students to physically fight back. But when he sees his son (the Miyagi-do fighter) getting mashed by two of his top students (the first because Robby made the mistake of answering Hawk's
* Season 1: Barry learns how to use his powers and fight the metahumans, and the threat of the
* Season 1 begins not with the founding of The Avengers, but with about two hours' worth of shorts detailing how each of the first eight members fought crime
* Season 1: Bloom's awakening of her powers and coming to accept herself as a true fairy.
* Season 1: Dewey's quest to find out what happened to Della, and Magica de Spell's plan for revenge on Scrooge.
* Season 1, due to being animated by cels, was the only season to use this animation style. As a result, the animation looks sort of unique compared to the rest of the show.
* Season 1 ended on a cliffhanger, with the SORT team raiding the prison to quell a riot. The next season reveals prominent recurring characters Ed Hunt and Scott Ross were killed during the raid, alongside
* Season 1 ends with Matt, Karen and Foggy defeating Wilson Fisk and putting him away after getting a corrupt detective to link Fisk to the murders of Detective Blake and several other cops. However, this only temporarily stops Fisk, as season 2 shows him rebuilding his criminal empire from within prison, even using Frank Castle to get rid of the kingpin who heads the prison's underground economy. And in season 3, he gets out of prison and seeks revenge on Matt, Karen and Foggy for putting him away.
* Season 1 ends with quite a few dangling threads for Season 2 to pick up on: Coulson is now
* Season 1 ends with the Commodore deciding to go against Nucky. The plan for Season 2 was to give him a large part as the year's
* Season 1 episode 6: On Wilson Fisk's orders, Detective Blake and two uniformed cops are shot on live TV, as Blake has proven a liability to Fisk.
* Season 1, Episode 7, Jon is incensed that he was named as Mormont's steward, when he expected to be a ranger because of his fighting abilities. Sam points out that he's essentially being made personal assistant to the Lord Commander, right out of training, which gives him a very rare opportunity to work with and learn from the man, and very likely means that Mormont is grooming him for command.
* Season 1 featured a corrupt sheriff who worked for a Miami drug cartel. He struck a deal with them so he could get revenge on a child killer. He is actually a fairly effective sheriff since he is able to crack down on illegal drug manufacture and sales in the county. The drug cartel is not interested in selling drugs in the county and helped him get rid of the local meth manufacturers who were their competition in other areas. Things go bad for him when the cartel asks him to help them kill Raylan.
* Season 1 features a cameo for Jeyne Poole and a couple of lines alluding to her. She gets a big role in the book
* Season 1 focused on Angel's first attempts of going against the law-firm Wolfram & Hart while also growing accustomed to his new "family" of Cordelia, Doyle, and later Wesley.
* Season 1 focuses on the hunt for the ruthless Ice Truck Killer, who is revealed in the end to be
* Season 1 focuses on various political schemes by Underwood — manipulating an education reform bill, supporting Russo's bid for Governor, etc — as part

of a larger plot to endear himself to the President enough to
* Season 1 had 26 episodes produced for it, but only 20 were actually used. Out of the remaining six episodes, five aired at the end of season 2, and one aired in late season 3. This created some continuity errors, since Arnold's teacher Miss Slovak was
* Season 1 had an intimidating Principal LaRue who didn't really do much. Season 2 demotes him to
* Season 1 had a rivalry between Elliot and JD's girlfriend Alex. Alex, a social worker working at the hospital, has a problem with Elliot who has noticed some drugs have gone missing and suspects a patient who is a former addict. Turk tells him in a situation like that it doesn't matter who is wrong and the smartest move would be to side with the person he wants to sleep with; but even though he and Elliot are
* Season 1 had Peggy Olson doing dancing routines that shown off the ballet training
* Season 1 has a storyline that cleverly evolves over the course of the season: Initially, it's about Coulson's team investigating and combating the machinations of
* Season 1 has Carter running a secret investigation to prove that Howard Stark has been framed for treason, uncovering in the process a conspiracy by Russian intelligence program Leviathan.
* Season 1 has Heather. You know it's bad when we see her parents actually
* Season 1 has "Some Assembly Required" after the three-part pilot, where there are no threats but instead the paladins learning to use their Lions and figuring out how to form Voltron after the first time in the previous episode.
* Season 1 has the Blue Templar, a ring of crooked cops who were engaged in murder, narcotics trafficking, and money laundering. Their leader Sonny Malevski also killed Commissioner Frank Reagan's son Joe when he began to infiltrate them.
* Season 1 has two FBI agents tasked with making Michael's (who was "burned" and turned into a villain in the eyes of most of his fellow co-workers) life miserable, and also Jason Bly, a CSS agent who takes up the cause when the FBI backs off.
* Season 1 introduces Kyler and his gang who relentlessly harass Miguel by calling him 'rhea (after seeing him a bottle of Pepto-Bismol that he bought for his grandma) in addition to picking on less popular kids like Eli and Demetri. If that's not all, Yasmine and her clique are also shown making fun of Aisha for her weight. It gets to the point where Johnny Lawrence's (the original bully from the Karate Kid) Cobra Kai becomes a safe haven for bullied kills, and even their top students (Hawk, Aisha, Miguel) eventually become bullies themselves.
* Season 1: In "World on Fire," Detectives Christian Blake and Carl Hoffman murder an associate of Vladimir Ranskahov's in the 15th Precinct for daring to snitch on Fisk (whose name must not be said ever). Fisk and James Wesley put in a call to their contacts in the Internal Affairs Bureau to sweep the whole thing under the rug and bury it. This allows Blake and Hoffman to go back on the street and assist their fellow corrupt cops that night in eliminating any Russians who survive Fisk's bombings of their stashhouses. Unfortunately, Matt happens to overhear the murder, so he goes after Blake, breaks his right arm and gets him to reveal the locations of said stashhouses, allowing him to locate Vladimir. For that transgression, Fisk has Blake shot. That Blake and Hoffman are so quickly back on the streets is lampshaded by Ben Urich when he turns up as they're establishing a perimeter around an abandoned warehouse where a rookie cop has stumbled upon Matt and Vladimir and subsequently been knocked out.
* Season 1: Kara learns the ropes as a superhero, while having to face off with the escaped Fort Rozz criminals led by her aunt
* Season 1: Kate learns to be a superhero while engaged in conflict with the terrorist known as
* Season 1 plays with this, as while Jschlatt was the villain throughout the season once the elections were over, it was
* Season 1 puts a lot of emphasis on roads, signifying characters' dilemma on where will they go now/next as the world

* Season 1 really liked this trope. The first "meteor freak" Clark ever battled was a
* Season 1's "Close Rick-Counters of the Rick Kind": Evil Rick was actually being controlled by Evil Morty—the true mastermind of the duo's plans and actions—all along.
* Season 1: Selina's attempts to pass the "clean jobs" bill, and the political fallout when it falls through.
* Season 1's "In Excelcis Deo", for example, revolves around Toby organizing a military funeral for a homeless
* Season 1's "Poison Ivy" begins with a police shooting, which (in a subversion) is initially cleared by
* Season 1's "Rain" had clown masks being used in a bank vault robbery. An explosion caused an outline of a mask to get seared into one guy's face.
* Season 1's segment "Letter" was about almost all of the Matsuno brothers quitting their
* Season 1's "Skin Deep" has a flashback to Regina walking into Rumpelstiltskin's castle saying she has a problem with a certain mermaid. This is because
* Season 1 started with a core cast of five engines (although James was only named a few episodes into the season). About halfway through, Percy was introduced. Poetically, like the
* Season 1: The flashbacks are about Oliver first arriving on the island and becoming caught in a fight against
* Season 1, "The Gift": Doug races to Carol's engagement party to tell her he loves her, but
* Season 1: The Mountain Men, frequently mentioned to be an enemy of the Grounders, capture the remaining delinquents using modern technology after the climactic battle.
* Season 1: The mystery of the black rocks popping out of nowhere, and the reappearance of Rapunzel's long, golden hair.
* Season 20's "Lisa the Drama Queen" was the last episode to air in standard definition and feature the classic opening sequence used since season 2, before switching to high definition and introducing a brand new opening sequence.
* Season 21 actually has a number of these, with Strong Woman and Miss Conduct serving as the female counterparts to PC Principal and Mr. Mackey respective. However the most shocking of them all is
* Season 21 had this happen again for another eating task, also set in China. The restaurant's patrons seemed confused at first to have all these Americans with camera crews eating hasma without using their hands, but twins Natalie & Nadiya pumped up the crowd with their Bollywood style dance, to the point that the crowd continued cheering for every team that came afterwards.
* Season 25 had an unusual variant: contestant Priscilla Ball (who was champion on January 16, 2009) was unable to make the taping for her next episode. As a result, she was brought back as co-champion on an episode that aired in April.
* Season 26 of the original series usually began episodes with the Doctor and Ace coming out of the TARDIS. One episode did show them inside working at the console, but the rest of the console room was in darkness. The reason is they'd scrapped the set and didn't want to pay for a new one.
* Season 2 actually had a challenge to create a unique flavor of ice cream. Marcel decided to make a Bacon and Avocado ice cream. That dish was considered to be one of the worst dishes ever to be served on the show. From the same season, Sam mixed watermelon and bleu cheese with gnocchi, and Ilan made a chocolate ganache with chicken liver. Both these dishes... didn't go over so well with the judges either.
* Season 2 adds Eric, Alex's deaf father, who is played by deaf actor CJ Jones.
* Season 2 begins with a Cylon boarding party attempting to take over the
* season 2 Big Bad complex so he believes anything he does is justified because he's the one doing it.
* Season 2, "Bloodlust". The Winchester brothers met rogue vampire hunter Gordon Walker while looking for a nest of vampires. Gordon seems like a decent enough chap and a worthy ally, and Dean likes his "kill all the monsters and enjoy the hunt"

philosophy. Dean and Sam end up fighting when Sam reveals that other hunters say Gordon is bad news. Before this can go any further, Gordon takes a swan dive off the slope when the local vampires turn out to actually be peaceful, having sworn off killing humans, yet he still attempts to slaughter them. Then he tries to feed Sam to the head vampire to prove she's still a monster, and attacks Dean when they try to protect her. Bad move.
* Season 2: Clem ends up meeting up with a group of survivors staying in a cabin. It lasts a bit till it's found by a figure the survivors were trying to escape from. They pack up and leave, finding another group in a wind-powered abode. But said figure soon finds them and forces the group to come to a makeshift fortress he built himself. While the place is secure, under his tyrannical rule, it's no safer than being with the Walkers. The cast eventually nullify the safety by luring the Walkers to the place, which they use as cover to escape and are forced to travel, where the rest of the game proceeds along. Four of the endings either have you go back to the fortress, now abandoned and yours for the taking, or go to another community that'll just barely allow Clem and a baby born during the events in due to overpopulation and limited supplies.
* Season 2 confirms that he was at least telling the truth about being a GCN cameraman,
* Season 2 deals with both Corona's forces and the Luna 6 developing alliances in preparation for the eventual final confrontation between the two sides.
* Season 2 digs deeper into the Sorcerous Sword Index when Shang Bu Huan's old foes Xie Yingluo and Xiao Kuang Juan arrive from Xi-You to steal it from him, with two more of its dangerous swords being revealed. The Night of Mourning is apparently incapable of actually injuring any human, but one touch from its blade turns anyone into the wielder's mindless puppet. And the Seven Blasphemous Deaths is sentient and uses its magical powers to compel people to want it for themselves; its wielder wants nothing more than to continue to wield it and protects it from all who come near, and anyone who gazes upon it is feverishly drawn to steal it for themselves only to meet their demise and have their spilt blood empower the sword and its wielder. And
* Season 2 does confirm that Freeman is actually speaking; when Alyx says her "Man of few words, huh?" line, Freeman gets confused, but then states that yes, he does talks a lot, out loud. Turns out that the people around Freeman either are too stupid to respond to Freeman's words or ignoring his ranting.
* Season 2 does introduce another black man as president of the Earth Sphere Federation, although that might be more to reflect
* Season 2 ends with the child characters dancing at the Snow Ball, but the camera then pans to the Upside-Down where a new monster is seen watching over the school, very much alive.
* Season 2, Episode 10: As long as your heart is in the right place, it's okay if you fib a little.
* Season 2 Episode 4 gives you another one with Rebecca, who dies a few days after giving birth to her baby from a mixture of cold and exhaustion.
* Season 2 episode 8, "Guilty as Sin," ends with Frank Castle throwing his trial so he can meet with Wilson Fisk, who sent him a message, with the last shot being Frank encountering Fisk lifting weights. The next episode, "
* Season 2 episode "Dragon Quest" introduced Peewee, a phoenix chick pet for Spike. Peewee then
* Season 2 episode "The Mexican Staring Frog of Southern Sri Lanka" uses live-action historical
* Season 2 experienced an exodus of fans, similar to the My Little Pony example above as it involved a change in format that split the fanbase. While season 3 received less open flamewars and outrage, there are fans that declare themselves only fans of the "true Superjail" (season 1 and pilot) and don't get along well with people who acknowledge the later seasons (this seems to be a particularly large problem with Season 2, to the point where some fans will acknowledge every season EXCEPT 2).
* Season 2 extras (and the books) all but state outright that Gregor Clegane

murdered his father, and probably his (unnamed) sister as well.
* Season 2 featured 5 Stocks, items, and casual stages with hazzards on, and stage morph on.
* Season 2 featured Wolfram & Hart using Angel's old flame Darla in a plan to cause him to cross the
* Season 2 features an episode in which Dean encounters a Jinn and wakes up in a timeline where his mother was not killed by the YED and thus his father never became a hunter. Dean lives with his beautiful girlfriend and lives a modest life as a mechanic. He also finds out he is estranged from Sam, who is studying Law and Stanford and still with Jessica. Even though he is heavily implied to be an alcoholic and something of a screw-up, Dean finds this existence far better than his own, and he only sets about to return to the regular timeline when he realizes that all the people Sam, John and he saved are dead.
* Season 2 final episode takes place in Hell. The entire place is a bureaucratic nightmare.
* Season 2: Following the black rocks outside of Corona to the Dark Kingdom so Rapunzel can follow her destiny.
* Season 2 gave us Sunshine, though she was never able to do anything with the club after getting snatched up by Vocal Adrenaline. Season 4 gave us Marley, who fits the trope to a T.
* Season 2 gives us an intense reminder of how strongly Zim holds to this view on Dib. When he finds out that his new
* Season 2 had something like this, a small planetoid with an artificial atmosphere that was a TV studio center. Our 'heroes' wind up there and find that if their ratings slide they'll be in trouble.
* Season 2 has a flashback where both Danny and Davos wear the famous mask during a K'un-Lun duel to determine who would become the new Iron Fist.
* Season 2 has a particularly twisted example. According to her adopted son Luke, Lily Gray - a wealthy psychopath who fostered a large number of children she raised to be killers- spent years looking for a soul mate amongst the homicidal maniacs of the world, one being a
* Season 2 has a subplot where Jesse gets kicked out of his late aunt's house, which happened because the house got new owners who didn't give them permission to film there. As a result, the season premiere featured a set of the kitchen with the RV blocking the view out the window, before they could work up to this development. They would regain permission prior to the filming of season 3, so wrote a subplot of Jesse using Saul to buy the house back from his parents.
* Season 2 has Finn utterly obsessed with rescuing Clarke, willing to leave allies to die or attack innocent people if it will help him get to her. This is shown to be a
* Season 2 has Jack captured by terrorists and brutally tortured to death. Yup, his heart actually stops and he's actually pronounced dead at the end of the episode. However, they manage to get a doctor to resuscitate him time at the very beginning of the following episode.
* Season 2 has "Space Mall", although it does have the more serious subplot of Shiro trying to gain full control of the Black Lion to prevent Zarkon from taking it.
* Season 2 has the Widows, a pair of demonic sister-wives, working in concert to resurrect and
* Season 2 has two humans in the Mighy Nein: Caleb Widogast, a wizard, and Beauregard, a monk. The others are two tieflings
* Season 2 heavily downplays the witchcraft and focuses mainly on the sisters' personal lives.
* Season 2 instead has "Cherry Blossoms", when the Matsuno family takes a devastating emotional blow when
* Season 2 introduced a whole new set of facial expressions, many of which are much more
* Season 2 introduces a medic with the name DuFresne. It's decided by the other characters that his name is too hard to pronounce and he is christened "Doc" for

the remainder of the series.
* Season 2 introduces the concept of alternate Earths. When visiting Earth 2, both Caitlin and Cisco discover their counterparts from that Earth are evil meta's: Killer Frost and Reverb respectively. Cisco in particular becomes terrified of turning into a villain himself for some episodes afterwards, but this ultimately never happens. Caitlin on the other hand becomes Killer Frost as well in season 3.
* Season 2 introduces us to Eska and Desna, Korra's twin cousins; while they were not
* Season 2 is very much the same, except for Episode 7, which contains several scenes of the Queen’s photographer brother-in-law, Tony Armstrong-Jones, cheating on his wife,
* Season 2: Murphy and Jaha search for the City of Light, only to find the AI A.L.I.E., responsible for the nuclear devastation a century ago.
* Season 2 opens up with "Scaryoke" and "Into the Bunker," two story-heavy episodes that respectively involve a zombie invasion and a shape-shifter sealed in an underground bunker. Following those is a cooldown with "The Golf War," a more lighthearted stand-alone about a race of minigolf people. After it is "Sock Opera,"
* Season 2 opens with a psychiatrist inspecting the camp in response to reports of erratic, unmilitary behaviour, with the goal of seeing if the camp should be split up. He's simultaneously shocked by their "childish" antics and impressed by their professionalism once the choppers arrive, arguing that the only thing madder than the camp would be breaking it up.
* Season 2 opens with Matt Murdock chasing down some diamond thieves who are evading the cops that are pursuing them. He manages to corner one of the thieves in a Japanese restaurant kitchen and beats the guy senseless. Once Matt is gone, the kitchen staff get their turn to beat the shit out of the thief.
* Season 2 plays this straight with Dream, being an active threat throughout Season 1 before he took a backseat to Jschlatt, coming back in full force by
* Season 2 reveals that Red Arrow and Cheshire developed one during the
* Season 2's antagonist is the far more Romanticist and spiritual Unalaq, attempting to open the gates between the spirit and physical worlds.
* Season 2 saw the Hoffman crew kicked off their Porcupine Creek claim as well as recovering a relatively small amount of gold.
* Season 2 sees Carter and company head out to California to investigate mysterious deaths, entangling them in the machinations of the
* Season 2 sees Daniel, having decided to turn Miyagi-Do into a full-scale dojo, try to apply this with all of his prospective students.
* Season 2 sees Midge and Benjamin attend a club where Lenny Bruce is performing, and Lenny's routine that night includes a segment on this.
* Season 2's episode "How Long is Forever?" has Starfire sent 20 years into the future during a battle with a time-traveling villain named Warp. In the future, her friends split apart after her absence and Warp tells her, despite believing his interference caused it, that nothing has changed, as everything is as history says it is. Of course,
* Season 2 set up a storyline with a number of "psychic kids" that were also fed demon blood and had similar powers to Sam. Two of the psychic kids, Andy and Ava were well-liked by fans but creator
* Season 2 shows that there are other labor camps kept outside the walls of the occupied cities, which are seen as a step below the Factory on the punishment scale.
* Season 2's Jessie Smith had a pretty good run throughout the season, winning two elimination challenges and several flash challenges, while avoiding the bottom. That was, until he was faced with his Achilles' heel, portraits. While the result of his portrait spelled his elimination long before the jury came to an agreement, it was, in fact, quite unexpected that he would get eliminated in fifth place.
* Season 2's "Noël" is about Josh reluctantly seeing a therapist for help in coping with PTSD after he suffers a complete mental breakdown on Christmas, to the point that the constant cheery Christmas carols flooding the hallways of the White House trigger severe traumatic flashbacks to his recent shooting.

* Season 2's "Requiem For an Urkel," where Urkel boxed tormenter Wille Fuffner in a three-round bout. Urkel winds up with his "Urkel uppercut," but Fuffner literally smiles. Urkel has time only to utter part of his "whu-oh" before Fuffner lays into the nerd, prompting others to stand up for the hapless Urkel.
* Season 2's theme sequence makes an appearance in Season 3, when Trent does his own, genderbent rendition.
* Season 2's "The Tattletale," where Cindy is the Obedient Olga/Obadiah. "I justh tellth it lith it isth," lisps the youngest Brady girl as she squeals on her Brady siblings for minor misdeeds ... and then to Sam when she saw an overly excited Alice hug the mailman (after Alice had won a contest). Eventually, Cindy learns not to tattle,
* Season 2's "The Wedding Squanchers": Rick, BirdPerson, and Squanchy are all considered terrorists by the Galactic Federation for opposing it in the past. Furthermore, BirdPerson's fiancée/new wife, Tammy, was actually a spy for the Federation all along.
* Season 2's "Tick, Tick, Tick..." & "Boom!", guest starring Dana Delaney, playing a specialist from the FBI.
* Season 2's titles have "2" in them, except for the first episode, "Return". In addition, the titles of the second through fifth episodes of this season are the names of the first four episodes of the series, with "2" added.
* Season 2's "Tooth and Claw" prominently featured kung fu monks in Victorian era Scotland. The very caucausian monks start fighting with a style ripped almost completely from
* Season 2 subverts Miguel in which he learns his lesson after attacking Robby's injured shoulder in the All-Valley finals. However, Hawk begins to fully embrace his bully mindset by attacking Demetri (after he posts a bad review of the Cobra Kai dojo on Yelp), vandalizing Miyagi-Do (and stealing Mr. Miyagi's Medal of Honor in the process), and
* Season 2's Zoom was a typical villain asshole right from the start, but the reveal that
* Season 2 takes its sweet time for the team to realize there is a mole on their team, this being the BIG cliffhanger from season 1. We're also waiting for the one person who figured this out to escape from the mole's prison. He escapes in episode 9. The arc is 13 episodes long, but the climax and payoff are well worth it as the build-up finally begins to merge and pay off.
* Season 2: Tamara and Greg, until it's subverted and revealed that they were actually co-dragons under Peter Pan.
* Season 2: Team Flash has to deal with the arrival of metahumans from Earth-2, led by
* Season 2: Technically the fights between Buffy and Spike count as an arc, but the
* Season 2: The flashbacks are about Oliver and his allies facing off against
* Season 2: The hostage crisis in Uzbekistan and the resulting Presidential scandal.
* Season 2: The introduction of new Winx member Aisha and the villainous Lord Darkar threatening to take over the magic dimension.
* Season 2: The White Walkers attack the Fist of the First Men (ice), (supernatural).
* Season 2: The "Wizards vs. Vampires" arc, which dealt with Justin's relationship with Juliet and her parents.
* Season 2 used this for an actual, solid twist. The sister of a woman marrying a Muslim boy she met at college in London starts to suspect that he may have ties to a terrorist group.
* Season 2 was partly based on fracking pollution scandals and partly on Enron's manipulation of the energy market.
* Season 3 (2012) was the last year for several first season reactors, namely Emma, Sammie, Athena, and William.
* Season 32 saw the show making steps to get back on its feet despite the new $32,000 Bonus Round minimum being offered on almost three out of every four shows:

the minimum dollar value on the Wheel increased to $500 (but vowels still cost $250), and the cash bonus for winning a car in the Bonus Round also increased back to $5,000. However, all that went out the window with the $1,000,000 being won again just three shows into the season.
* Season 3 adds Russell Edgington and Talbot, his consort of centuries.
* Season 3 (again): The Salazars order Jack to kill his partner, Chase (who has no idea what's going on). Jack pulls the trigger, but the gun is empty.
* Season 3 also contains other things that the fans said they enjoyed, like Kaeloo/Mr. Cat shipping, Pretty/Stumpy shipping,
* Season 3) became featured in too many episodes. In fact, two episodes in particular, "Frightmare" and "Claw of The Wild", had plots that had nothing to do with the relationship yet have the relationship issues take over halfway through.
* Season 3 begins featuring an arc concerning the Equestria Games that's continued into the fourth season, with a few episodes featuring the cast preparing for it.
* Season 3: Cassandra's rise to power and the eventual awakening of Zhan Tiri.
* Season 3: Castle declares his love for Beckett as she lay motionless from a sniper bullet.
* Season 3 continues it: among other things, Brion Markov is sixteen minutes younger than his older twin brother, Gregor.
* Season 3: Daenerys Targaryen (of a family strongly associated with fire) frees the slaves of Yunkai, a city that is located in a desert (fire), (mundane).
* Season 3 ends up repeating this, after Fisk manages to beat his charges and gets out of prison. Karen tries to connect Fisk to the hotel he's under house arrest in. Matt first tries to expose Fisk by bringing in an inmate Fisk hired to shank himself as part of his gambit to get out of prison, but Fisk hires Dex to kill said witness. Ultimately, what takes Fisk down this time is a two step process: first, Karen provokes Fisk into sending Dex after her to avenge James Wesley, causing Dex to go after her at Matt's church, during which Father Lantom gets killed. Subsequently, Ray Nadeem (the agent who sprung Fisk) grows a conscience and decides to testify before a grand jury, with Matt and Foggy negotiating a deal for him with Blake Tower. Fisk thwarts their attempt to use the grand jury by intimidating the jurors, so Nadeem goes home and records a confession video before Dex is sent to his house by Vanessa to kill him. The video ends up being what brings down Fisk, while Matt brings down Dex by using Fisk's murder of a woman close to him to get Dex to turn against Fisk.
* Season 3 episode 10 "Karen" sees Matt have to fight Dex in his church, which is completely bathed in red lighting.
* Season 3 episode 20 focuses on the pixies, especially Digit, fighting the Trix.
* Season 3 Episode 2, called "Been There, Done That", where the male half of two
* Season 3 episode 6: On Wilson Fisk's orders, Benjamin "Dex" Poindexter, dressed in a Daredevil costume tailored by Melvin Potter, attacks the
* Season 3 featured 3 Stocks, no items, and competitive stages with hazzards off.
* Season 3 featured some scenes in Middlesex County, what with Jackie Aprile Jr. trying to build a support base from New Brunswick—including a successful robbery of a benefit concert at the Mason-Gross School at Rutgers.
* season 3 finale, has Twilight Sparkle opening with a song and dance number, only to suddenly be cut off at the end when she gets drenched with rain water.
* Season 3 flips it around as the team's actions have caused massive
* Season 3 gives us Fizzy Rocks, which seems to have a similar effect, but come in the form of Pop Rocks.
* Season 3 had Alcide suddenly shooting Cooter through the head, as well as Jason's surprisingly swift murder of Franklin. Others include Lorena Krasiki and
* Season 3 had an election for sheriff where both candidates were in the pockets of criminals. The incumbent hardly hesitates before accepting a
* Season 3 had Angel becoming a father while an enemy from his past arrived in the present day to try and get his final revenge on the vampire.
* Season 3 has a case of this. Eli, who has spotted Gyp Rosetti organizing a posse to ambush Nucky's liquor convoy at the Tabor Heights gas station, tries to flag down the trucks to warn them, but they ignore him and drive to their doom. As Eli

is trying to start his car, he and the audience hear the gunfire of Gyp's men opening fire on the convoy, killing the dozen or so drivers and guards of the trucks.
* Season 3 has Gideon Malick, a philanthropist and former member of the World Security Council who acts as the benefactor for the ATCU. He also turns out to be a member of HYDRA's old guard and leader of the faction dedicated to their true original purpose
* Season 3 has Janzo get with Wren, the only young woman of color in the cast
* Season 3 has the gymnastics coach, Gunter Schmidt who only appears for three episodes yet plays a factor in Kimberly's decision to leave for the Pan-Olympic Games and pick Kat as her successor.
* Season 3 has the murder of a womanizing kindergarten teacher, who had affair with several of the mothers of the children in his class, being killed in the night all of them found out about each other.
* Season 3 has, what the heroes call, Team Evil. They eventually also start corrupting people into their team,
* Season 3: Huey's search for the Missing Mysteries, and F.O.W.L.'s plot to stop Scrooge once and for all. (Although
* Season 3: If you chose to stay at the community, you find out it got overrun by scavengers. The new heroes of the story come across a junkyard that you can decide to stay in. But of course more scavengers, who were staying there first, soon arrive to make things complicated. After being separated, the main character is taken to a community that converted an air strip into a safe zone. However, in the next episode, said place is destroyed by vengeful scavengers and Walkers. After some traveling, they reach a new safe zone, but it's led by the leader of said scavengers who happens to be the older brother of the protagonist. Thankfully, though, it's subverted a bit as the brother is (somewhat) reasonable and just part of a larger pack guarding the safe zone. Until you find out that one of the leaders is
* Season 3 introduced an all new original opening sequence rendered in CGI, with comets and planets functioning and moving about, as well as the camera crashing through Ghost Planet Industries and navigating through the hallways.
* Season 3 introduces Amaru, the queen of the hell-like dimension of Xibalba and also a much greater evil than Malvado (who fled from her world along with his siblings because they were treated as slaves by her) and she wishes to take over the Earth with her demonic minions.
* Season 3 introduces Hannibal Roy Bean, who loves manipulating everyone from young monks to Jack Spicer. This includes trying to recruit
* Season 3 introduces Lilith, the highest-ranking demon of them all, but also a magic knife that one-shots any demon that isn't a
* Season 3 introduces Shizuka Takanashi, who traumatized her children so much they wear
* Season 3 introduces the Africa-based Islamic terrorist group Hizb al-Shahid, seemingly a stand-in for Daesh.
* Season 3 introduces the Crystal Empire, which blends late-Victorian architecture,
* Season 3 introduces the new Predaking. A massive ancient Draconic Cybertronian beast revived by Shockwave to hunt the now scattered Autobots. Powerful enough to through around both Wheeljack and Bulkhead and durable enough to barely notice a grenade going off underneath it and only slowed down being crushed by a mine falling on its head. Later he reveals
* Season 3 introduces the Top as a young woman, with the character's name changed from "Roscoe Dillon" to "Rosalind 'Rosa' Dillon" (portrayed by Ashley Rickards).
* Season 3 is about rounding up the escaped Arkham patients, Mad Hatter debuting, Penguin running for mayor, and Jerome's
* Season 3 is a season-long arc that starts with Jerry's and Beth's marriage breaking up and Rick replacing Jerry as head of the family. The rest of the season deals with the negative effects that the divorce and Rick's toxic personality has on the Smiths, culminating in them deciding by the finale of the season to reject

his nihilistic worldview and work on themselves, complete with Jerry reconciling with Beth and returning to the family once more.
* Season 3 is entirely about SHIELD dealing with the global outbreak of Inhumans gaining powers. In the first half, this means facing off with HYDRA and new rival agency the ATCU. This results in the arrival on Earth of the season's true
* Season 3 is generally considered the weakest of the original series, "
* Season 3: Kara deals with the emotional fallout from the previous season's finale, and the threat of
* Season 3: Katara again, when she discovers that Aang has run (well, flown) away (perfectly good food).
* Season 3: Katara attempts to get Aang to talk about taking on the Fire Lord while the latter is on his glider.
* Season 3 makes use of China's Ministry of State Security, a real life example of this trope.
* Season 3, on the other hand, has a quite impressive fight between Vilgax and
* Season 3 opened with a big song-and-dance number - Shirley makes a grand entrance in a sparkly purple gown - then the Dean enters wearing the exact same thing. Shirley is creeped out.
* Season 3, "Past and Present": They discover a drug that reverses the effects of aging. Next episode, it's forgotten.
* Season 3 reveals that he doesn't actually stop time, he just slows it down. Daphne, a speedster, is able to notice when using her powers and can speed herself up to compensate. It's also revealed that Hiro doesn't know whether or not his ability is localized. However, since he later carries a frozen Ando a considerable distance in a wheelbarrow with time staying frozen all around him, it seems likely that he's actually speeding himself up relative to the Universe as a whole rather than freezing time in a localized area around him. The best example is when he proves his ability to Charlie by blinking and then showing her hundreds of origami cranes that suddenly appear around her. This scene is shown from Charlie's point of view, as showing Hiro make these would take awhile.
* Season 3 reveals that J. Edgar Hoover has remade the FBI into the ARBI, which adds yet another layer of secret-police oppression to the Reich's American territories.
* Season 3 reveals that Snow's father King Leopold years before marrying Regina was once engaged to Regina's mother Cora.
* Season 3 revolved around the family of a stockbroker who had been caught and convicted of running the largest Ponzi scheme in history but definitely wasn't Bernie Madoff, honest.
* Season 3's "And Xingo Was His Name-o": the part of the episode inside Xingo's cartoon are drawn in a smoother, simplified style.
* Season 3's B-plot serial killer had a rather disturbing calling card:
* Season 3 sees Matt have a continuous one-take fight that one-ups the season 1 fight. In this one, Matt visits Rikers to try to get information on Fisk's time there. Fisk finds out he's there, and a nurse on his payroll proceeds to attack Matt. Matt disarms the nurse but not before the man is able to inject him with a sedative. Fisk then calls Matt to tell him that this is retaliation for the threats Matt made to keep Vanessa from him when Matt visited him last year, then hangs up. Fisk directs a bunch of inmates to start a riot and attempt to kill Matt, forcing Matt to fight his way out down several corridors, get information from the Albanians on Jasper Evans, then escape escorted by an Albanian disguised as a guard, all before the sedatives can kick in. This one is a true
* Season 3 sees Snow and Charming deciding to have a second child that they could actually experience raising was written into the series to explain Ginnifer Goodwin's real-world pregnancy (by the actor who played Charming, cutely enough).
* Season 3 sees the team blackmailed by an INTERPOL detective to pull off a heist on a banker for criminals.
* Season 3 similarly begins with Rita's brother Rito arriving and helping to destroy the Thunderzords (taking the original Power Coins with them). The Rangers subsequently journey to gain new powers, and defeat Rito, though he sticks around

(much to Zedd's irritation).
* Season 3's premiere episode has Ben time-travel to the future, meeting a future version of himself who had torn Vilgax to bits. However, he then gets brought back to life by another recurring villain, who winds up taking a back seat to Vilgax for the rest of the episode.
* Season 3's secret origin part 2 focused on April, Casey, and Splinter trying to rescue the turtles who are being held captive by Bishop.
* Season 3's "Setup" & "Countdown", guest starring Adrian Pasdar, playing a member of the Department of Homeland Security.
* Season 3 starts with our heroes abandoning the Liberator during a space battle. As the teleport is damaged they have to use the life capsules, leading to
* Season 3's theme song ends with Rebecca in the bathroom watching the theme song on her phone and reacting with a
* Season 3's "The Ricklantis Mix-up": The newly-elected president of the Citadel of Ricks,
* Season 3 subverts this totally with Eleven as she's put on the sidelines for the first half of the season, then she gets wounded in
* Season 3 suffered from being half the length of the previous two and having an extremely controversial finale where Twilight Sparkle becomes Princess of Friendship, seen by many at the time as
* Season 3: The "Chronicles of Moises" arc, which dealt with Justin becoming a monster hunter, and Max releasing his conscience. This arc ended with Juliet being captured by the mummy. The next arc in Season 3 was the "Wizards vs. Werewolves" saga, which detailed Alex's growing relationship with Mason, and eventually tied itself with the "Chronicles of Moises" arc. The "Stevie" arc followed, and dealt with Stevie's arrival in New York and her wizard revolution. The "Wizards Exposed" arc came next, where the Russo's are captured and taken to a government facility.
* Season 3: The flashbacks deal with Oliver's time in Hong Kong as an ARGUS agent trying to prevent the outbreak of a deadly bioweapon; the present has Oliver struggling with his identity as the Arrow after being dragged into a conflict between the League of Assassins and
* Season 3: The Legends face off with the followers of the mysterious demon Mallus, who are creating anachronisms that threaten time, while competing with the new Time Bureau.
* Season 3: The Winx earning their Enchantix and Bloom continuing her search for her birth parents, among this is the sorcerer Valtor who harbors a connection with her. Culminates in the movie
* Season 3: To further validate his deep-cover identity in a drug cartel, Jack gets a gang tattoo and a heroin addiction.
* Season 3 took the growing romance issues from the previous season and doubled down on them, almost as though the writers were actively trying to make shipping fans of the show as upset and confused as possible. Starting off, Star likes Marco but has to go back to Mewni due to the events of the
* Season 3, "Union Station": Mark races to Chicago's Union Station to tell the departing Susan that he loves her. Again,
* Season 3 was rated TV-MA for almost no reason. The only possible bits of offensive material are the overall tense opening of the "Aberfan" episode, and one use of "shit" in the final episode.
* Season 3 when a serial rapist taunts Dutch over his initial inability to catch the rapist, leading to the guy killing one of his victims before being caught. The rapist/killer informs Dutch that his by-the-book method of catching monsters like the rapist is bound to fail, because he's never killed and as such, doesn't truly know how the mind of a murderer works. Dutch then, that evening, kills a cat with his bare hands just to see how it feels to kill.
* Season 3: While shutting down A.L.I.E. for good, Clarke finds out that remaining nuclear reactors are breaking down, and the deadly radiation will cover the entire planet in a matter of months.
* Season 4: After Beckett nearly dies, she realizes she only wants Castle, and
* Season 4 also introduced Bioloids — similar to robots, but organic.

* Season 4 also introduces the show's version of Black Bison, who is a woman named Mina Chayton instead of a man named John Ravenhair.
* Season 4 arc is centered around Mark and Sophie's wedding. Naturally the actual ceremony happens in the last episode.
* Season 4: Arya Stark (of a family strongly associated with ice) sails (on water, aka ice) away from Westeros. (ice), (mundane).
* Season 4: Barry's escape from being imprisoned in the Speed Force creates a group of new metahumans, whom Team Flash must track down, while figuring out how they fit into the machinations of
* Season 4 brought a host of these features for support classes. The support job was to help protect and build up an initially-vulnerable Carry,
* Season 4 ends with Prince Wu dissolving the Earth Kingdom monarchy after centuries of rule (and misrule) by his family line, giving the people of the Earth Kingdom a reach choice in deciding how to govern themselves.
* Season 4 ends with several prominent characters departing Westeros to become this. After escaping through the help of his brother Jaime and Varys, both Tyrion and Varys escape to an unknown destination after Tyrion kills Shae and Tywin.
* Season 4 experimented a little with this. For example, after the characters are largely separated at the end of Season 3, the first five episodes focus on the crew coming back together.
* Season 4 finale, Gwen and Ianto are saved from a Dalek invading the Torchwood Hub by a "time lock", freezing everything outside the door. There's also a moment in the second episode of Season 1 when the Doctor appears to slow down time to solve a pendulum-of-death puzzle. However, this is probably a Flash-type scenario where he's actually speeding up his mental perceptions so that time seems to slow around him.
* season 4 finale lives whose Time wave emissions allow the flow of timelines for them all.
* Season 4 finale, the G4 incarnation Tirek appears as a mix of centaur, baboon and bull.
* Season 4 gives us: A top-secret box of mystery, a Pony of Shadows, a magic comic book, and
* Season 4 had a subplot about GOB being unable to recognize his son, Steve Holt. The writers included this because in real life, Justin Grant Wade (the actor who portrays Steve) had put on weight and become nearly unrecognizable during the seven years between the show's cancellation and
* Season 4 had the Marshals searching for Drew Thompson, a fugitive from the FBI and the Detroit Mob who 30 years before faked his death. Raylan quickly discovers that the FBI agents assigned to the case are working for the Detroit Mob and as a result the US Marshal Office gets full jurisdiction on the case. The local sheriff is tentatively in Boyd Crowder's pocket but he is reluctant to help Boyd in the search for Drew and tries to show Raylan that he is not actually corrupt.
* Season 4 has a few off-handed mentions of the bees disappearing, which at first appears like a reference to the real life headlines about bee populations declining in 2007/2008.
* Season 4 has a heavy focus on Kaeloo and Mr. Cat's romantic relationship, which is the most popular ship in the fandom.
* Season 4 has an episode where Sam and Dean are new employees at a hi-tech company, but have false memories of their lives and don't even know each other. While investigating a series of suicides at their company, they come to the conclusion that a ghost is involved and hunt it down. This leads Sam to first suggest that they should continue as ghost-hunters, and then realize that their whole apparent lives are fake. In the end, it turns out to be an illusion created by the angel Zachariah designed to inspire the
* Season 4 has an example with the reveal in mid-scene rather than at the end of it (when
* Season 4 has BoJack believe his mother's inability to recognize him is part of a ploy she'd used before after he'd botched a choir solo.
* Season 4 has Clifford DeVoe, AKA The Thinker. He is a super-genius, who's power

comes at the cost of his physical health. In his own words, he is "the fastest mind alive".
* Season 4 has Tony gain access to a French arms dealer named Rene Benoit (aka
* Season 4 has Underwood continuing his campaign, while also having to deal with
* Season 4 has Varrick tell Baatar Jr. that "You wouldn't know if a wolf-bat made a nest in your butt" to compare Baatar's ability of discovering things to his. Baatar can only reply with "You're a fool. Wolfbats don't build nests" which Varrick calmly mocks him for.
* Season 4 includes a throwaway reference to a First Sword of Braavos named "Elyo Grivas", who is not mentioned in the source novel series,
* Season 4 introduced a "Begin Transition" screen that replaced the static "Start Feed" and "Interrupt Feed" screens and an alternate closing credits theme.
* Season 4 introduces transgender hero Nia Nal aka Dreamer, played by transgender actress
* Season 4 is about all the classic Bat villains finally stepping into their familiar roles while Bruce takes his first steps into vigilantism.
* Season 4 is broken up into three "pods", which are self-contained but linked through the
* Season 4 is technically an aversion. All four characters billed as regulars for the whole season appear in every episode.
* Season 4 is this to a lesser extent, as while fans don't believe it's as bad as the 2013 season, the flanderization and change in format began with the first uncancelled season.
* Season 4: Kara must contend with a rising tide of anti-alien sentiment, spearheaded by the
* Season 4: Lorne, though technically not a regular at that point, appears in every episode except "
* Season 4 marks the only time no main characters die early on, although several long-running recurring characters (Danielle, Alex, and Karl) all get killed off halfway through the season to make up for it.
* Season 4: Marnie and Antonia, up until around episode 10 when Antonia has a
* Season 4: Mr. Gold and Maleficent initially, and it remains so for most of the arc until the 3rd-to-last episode when she leaves his side after
* Season 4 opens with a brief history of organized crime in Kansas City. Liev Moskowitz and his Jewish gang start out as poor immigrants and grow wealthy after taking over the city's rackets. They are then taken out by the
* season 4 premiere Eleanor holds out her hand for a high-five. Jason is initially too upset to high-five her back, but does so anyway because he acknowledges that it's the rule.
* Season 4 reveals that his genetic progenitor, Horde Prime, is just as tall as he is.
* Season 4 reveals the existence of secondary elements as well as their current masters: Metal (Karlof),
* Season 4's antagonist is Kuvira the Great Uniter. This one's more complicated; while Kuvira's position is largely Enlightened in her rejection of an obsolete monarchy in favor of a modern Empire, the series makes it clear that she's almost completely correct in her worldview, and her evil comes from
* Season 4 saw the Hoffman crew pretty much lose everything in the jungles of Guyana.
* Season 4's "Charmed and Dangerous", where the sisters are ambushed by the Source of All Evil himself:
* Season 4, Serena and Ben. Who already had something quasi-romantic going on when she was sixteen.
* Season 4: Set many years earlier, Loy Cannon is shown trying to overthrow the Fadda clan and take over the city with his Cannon Limited organization, eventually getting his enemies to turn on each other... only to find himself cornered and his business absorbed by the newly formed Kansas City mafia. For added irony, he's revealed to be Mike Milligan's father.
* Season 4's finale reveals the entire series was this. The Arc Villain

* Season 4's "Holy Night" has Toby dealing with an unexpected visit from his estranged, former career criminal father, and CJ and Leo trying to stop a news story proving the Bartlet administration's involvement in Shareef's assassination.
* Season 4's last three episode take place over about a day each, and lead directly to Season 5, which takes place over the course of four days,
* Season 4's "Law and Disorder," where Bobby learns a lesson about how to handle responsibility, justice and discretion (i.e., when the right time to report wrongdoing and when to give latitude) after he is appointed a School Safety Monitor (or, as Bobby sulks initially, "should be 'Snitch Monitor'). Bobby takes his responsibilities way too seriously and thus becomes a stool pigeon.
* Season 4's "Luck Be A Lady", introduces Becky "Hazard" Sharp, who is female in both the series and the comics ... except the details of how her
* Season 4's "Pandora" & "Linchpin", guest starring Jennifer Beals, playing a member of the CIA
* Season 4, Spike becomes something of a good guy and assists during a fight with demons trying to open the Hellmouth. He picks up one of the demons and throws him into the Hellmouth (unaware that was their goal all along). When everyone calls him out on it his response is a heartfelt "What? I was helping!"
* Season 4 starts making mention of some unnamed location that people claim is completely free of vampires.
* Season 4: The beginning of Season 4 continued the "Wizards Exposed" arc, which ended with Alex and Justin having to start over in the wizard competition, and Alex deciding to get back in so she could be with Mason. The next arc was the "Maxine" arc, where Max was transformed into a little girl named Maxine. It began with "Three Maxes and a Little Lady", and concluded with "Back To Max". The "Maxine" arc ran concurrently with the next major arc, the "Wizards vs. Angels" saga, which dealt with the Angels of Darkness. The last major arc was the "Apartment 13B" arc, starting with "Wizards of Apartment 13B" and ending with "Wizards vs. Everything". The last arc merges the "Wizards vs. Angels" arc with the "Wizards vs. Werewolves" arc.
* Season 4: The flashbacks see Oliver returned to the island by ARGUS in order to deal with
* Season 4, the flash-forwards show Oliver standing over someone's (eventually revealed as
* Season 4, "The Impotence of Being Ernest," they get it in a restaurant and it figures into a boner joke. So the real soufflé rises but the metaphorical one doesn't.
* Season 4: The Legends and the Bureau, now joined by John Constantine, must hunt down all the magical creatures scattered through time by Mallus' escape in the previous season's finale, as well as deal with the demon Neron's attempts to take advantage of the situation.
* Season 4: The majority of the final season takes place in a boarding school a few teenagers and kids have made their own and are on the run from people who're trying to force them to fight a war against other communities. While a wing of the building is destroyed in a fire during a fight. The school is still standing by the end of the game and ultimately where Clem and AJ settle down at the end of the story.
* Season 4: There are several mentions of the Eligus Mining Corporation across the season, which pays off when one of their spaceships shows up in the final scene.
* Season 4: The Winx going to Earth to help humans believe in fairies and magic.
* Season 4 turns out to be one long SOD for Artie as his Enemy Within
* Season 4 was no better in this regard, and it's made worse since it deals with several building myth arcs concerning Hive, Damien Darhk, and Andy Diggle. Adding to matters, the viewer finds out one member of Team Arrow is going to die, but the identity of who is a mystery to the viewer, and also the writers because they later admitted they didn't have anyone actually planned. Several other subplots are set up and never resolved, while the grave plot is resolved by killing off Laurel Lance, with the writers citing the fact her story was 'done', despite her character having

* Season 4 will see Marinette's life under pressure now that she became a guardian and will have to encounter Shadow Moth. She will likely have less time and the opportunities to tell Adrien her true feelings. Other story arcs have yet to be confirmed.
* Season 5-6: Booth struggles with his feelings for Brennan after a coma dream where they were married. He admits he loves Brennan but she runs away to an island in the Pacific. Booth trains soldiers in Afghanistan and brings home a girlfriend, causing Brennan to angst over missing her chance. Then finally
* Season 5 also plays a weird version of it with generation one being God and two of his archangels, and the Xerox being the original Winchester triad. Dean being the 'good son' Michael the soldier, and Sam being
* Season 5 also reveals that prehistoric humanity used to be enslaved and kept as food by the
* Season 5 briefly inverts this dynamic, with an episode that shows Barney and Robin as a loving couple who managed to avoid fighting months into their relationship while Lily and Marshall have a huge fall out due to some misguided tips from Barney. The end of the episode reveals that Robin and Barney's fights are in much bigger number and intensity than anything Marshall and Lily deal with.
* Season 5: Castle proposes to Beckett just as she takes a job with the Justice Department in Washington D.C.
* Season 5: Cira Manzon, a young Hispanic officer, vomits after she saw one of the Santa Muerte murders. This is the rookie variant of the trope.
* Season 5 derailed both lovers in the relationship at different times with Phoebe and Cole. The relationship went through a LOT of drama (
* Season 5 ends with Buffy dying, but by the time the episode aired, the fans all knew that there would be a season 6.
* Season 5 Ep 11. Daphne (whom Niles secretly loves) is concerned that if Martin marries Sherry, who's "never liked" her, she may lose her job. Niles has this to say:
* Season 5, Episode 2, Cersei and Jaime Lannister learn that their child Myrcella is in danger in Dorne. Cersei loudly and angrily threatens vengeance if "our daughter" is harmed. Jaime tries to quiet her and reminds her that no one can be allowed to hear that Myrcella is their daughter. Cersei reprimands Jaime quite venomously and tells him "then don't call her your daughter," somehow failing to realise that HER previous angry rant is why Jaime spoke up in the first place.
* Season 5 episodes' absenteeisms are explained because of the filming of
* Season 5: Everyone enters cryo-sleep to wait for Earth to recover. Clarke and Bellamy are awoken to find that Monty and Harper figured out that Earth wouldn’t recover and died of old age on the ship, leaving behind their son Jordan. However, they also figured out where to find another habitable planet, and the ship has just arrived there.
* Season 5 features a big hammer which can only be wielded by someone of near-godlike (or Slayer) strength.
* Season 5 features a straight version: the FBI expressed a willingness to take on the
* Season 5 features the Lighthouse, a top secret bunker created by S.H.I.E.L.D. in the 70's in case of nuclear war. It's so big and so well designed that in a
* Season 5 features the team now taking control over of Wolfram & Hart while Angel suffers an internal
* season 5 had a sibling in the house and they were pulling one of these. It was then revealed that to be Adria and Natalie, who switched places in the diary room until the reveal. There was also some brilliance from the crew, because it could have also been Diane or Drew, since they both had a twin sibling outside the house.
* Season 5 had the first half of the season mostly devoted to the rivalry between cousins Charla & Mirna and couple Colin & Christie. You’d think by the editing that one of them was the winner and that both of them were going to get very far into the season. The eventual winners, couple Chip & Kim, were mostly
* Season 5 has an episode where Sam and Dean die, go to Heaven and are resurrected by

* Season 5 has an episode where they go semi-undercover to Bones' high school reunion, with Booth posing as her husband. Made a thousand times more awkward by the fact that this came right after the episode where he confessed his love for her and she said she didn't want to start a relationship.
* Season 5 has an interesting variation: by this point, most of the audience knows that the opening scene will be set on the Island, but this time the opening scene turns out to be
